- is guaranteed by a related party solely by way of a pledge of shares in the debtor, security over the debtor’s receivables, or shares in a company directly or indirectly owning the debtor so long as the holder of such shares and the debtor are members of the same tax group; as a result, this exception will not apply where a foreign company grants a pledge of shares in its French subsidiary to guarantee the bank loan granted to it
- is obtained in the context of a refinancing to allow the debtor to complete the mandatory repayment of a pre-existing debt, which is required as a result of a direct or indirect takeover of the debtor (allowed up to the amount of the loan principal repaid and accrued interest to that date), or
- has been obtained prior to 1 January 2011 in connection with an acquisition of securities or the refinancing of such acquisition debt.

Controlled foreign companies (CFCs)
The CFC rules provide that:

- French corporations are required to include in their taxable income profits made by their more than 50% owned foreign subsidiaries and branches. The 50% holding is determined by direct and indirect control of shares and voting rights.
- The minimum holding threshold has to be reduced to 5% if over 50% of the share capital of the foreign entity is indirectly held through French or foreign companies controlled by the French parent company. However, if the shares in the foreign entity are listed on a regulated market, the French tax authorities will have to demonstrate that the French parent company, together with other entities holding shares in such foreign entity, is acting in concert.
- The CFC rules are only applicable if the foreign legal entity or PE in which the French company owns the requisite percentage of shares is in a country with a privileged tax regime. A privileged tax regime is defined by the FTC as a tax regime in which a foreign jurisdiction subjects taxable income of a foreign entity to at least 50% or lower of the income tax liability that would have been incurred in France, had the activity of the foreign entity been performed in France.
- Profits of the foreign entity that fall under the CFC rules are no longer taxed separately. They are now aggregated with the other taxable profits of the French parent company. Consequently, any tax losses incurred by the French parent company may be offset against the foreign entity’s profits.
- The French parent company can avoid the application of the CFC rules if it demonstrates that the foreign entity carries an effective trading or manufacturing activity, conducted from its country of establishment or registered office. Furthermore, the CFC rules, in principle, are not applicable with respect of foreign branches or subsidiaries located in another EU country. However, this exception is not applicable if the French tax authorities can demonstrate that the foreign entity located in another EU country constitutes an artificial arrangement, set up to circumvent French tax legislation. This concept is similar to the ‘abuse of law’ concept, although it does not have all the same characteristics.
France

Tax credits and incentives

Foreign tax credit
Under DTTs signed by France, several methods have been established to avoid double taxation. The main one is the traditional deduction of a tax credit from tax effectively paid. However, some treaties establish a tax exemption or the exclusive right to tax. Also, a tax-sparing clause is included in some treaties, which allows for the deduction of not only the tax actually paid but a higher amount of tax.

Tax credit to boost competitiveness and employment
To improve the competitiveness of the French economy and reduce employment costs, France has a tax credit that is available to French and foreign enterprises subject to CIT in France.

Partnerships will pass their tax credit through to their partners, provided the partners are subject to French tax.

There are no requirements regarding the nature of the activity carried out in France.

The regime is effective from 1 January 2013, and the tax credit is calculated as a percentage of the wages paid during the calendar year to employees receiving less than 2.5 times the French regulated minimum wage (SMIC).

The current gross monthly SMIC is EUR 1,430. The rate applicable for this tax credit is 6%. The tax credit can be offset against the CIT liability payable by the taxpayer with respect to the calendar year during which the wages are paid. Any excess credit can be carried forward and offset against the tax liability of the taxpayer during the next three years.

Credits unused after three years will be refunded to the taxpayer. The ‘receivable’ (unused credits) can be transferred or sold only to credit institutions. Finally, special provisions apply in the case of mergers and assimilated restructuring operations.

R&D tax credit
The R&D tax credit is determined on the basis of the eligible R&D expenses incurred during the calendar year.

Currently, the R&D credit equals 30% of the R&D eligible expenses incurred during the year, up to EUR 100 million in eligible R&D expenses, and 5% beyond this amount. In addition, eligible R&D expenses incurred by the company can be included in the basis for computation of the tax credit at up to 100% of that amount.

Moreover, the 'standard' rate is 40% and 35% for the first and the second year, respectively, during which the company incurs eligible R&D expenses, or after the expiration of a period of five consecutive years during which the company did not benefit from the tax credit, provided, in both cases, that the concerned company is not affiliated with another company that benefited from the R&D tax credit within the same time period.

The tax code classifies eligible technical and scientific research operations in three areas: fundamental research, applied research, and experimental development.

The eligible expenditures include the following:

- Tax deductible depreciation expenses relating to fixed assets, created or acquired newly, assigned to eligible R&D works/projects, including patents acquired.
• Costs relating to staff qualifying as scientists and/or engineers (staff costs relating to ‘young graduate doctors’ are retained at up to 200% during the 24 months following their hiring by the company).
• Expenses resulting from outsourced R&D works/projects.
• Expenses incurred for patent registration and/or in connection with the defence of patents.
• Expenses relating to the monitoring of technical developments.
• Premiums paid in connection with insurance contracts relating to the legal defence of patents.

Operating costs are taken into account by retaining 50% of the R&D staff costs plus 75% of the depreciation on the assets allocated to the research. Also, spending on outsourcing to private research organisations is included in the limit of three times the total amount of other research expenses qualifying for the tax credit.

The use of patented or patentable technologies in manufacturing
Companies that are involved in the manufacturing of products in France containing patented or patentable technologies, or companies that incorporate such technologies into goods that are manufactured in France, benefit from a reduced effective rate of tax.

In the case of a licensing arrangement between connected French companies, the licensor will benefit from a reduced 15% tax rate on royalty income, whereas the licensee company will benefit from a tax deduction at 33.33%.

In order for a licensee company to benefit from full deductibility for royalties paid, the rules require that the licensee company ‘effectively exploits’ the rights available to it.

Inbound investment incentives
No particular incentives are available to foreign investors in France. However, the government offers a comprehensive programme of tax incentives and development subsidies to encourage investment in underdeveloped areas.

Capital investment is encouraged through the declining-balance method of depreciation as well as through exceptional depreciation for certain capital expenditures.

Withholding taxes
Payments to resident corporations and individuals are not subject to WHT.

Payments to non-resident corporations and individuals are subject to WHT, as shown below.

**Explanation of columns**

**Column 2**: Individuals and companies not qualifying as parents are subject to the WHT rates for dividends as indicated in this column.

**Columns 3 and 4**: Column 3 indicates the WHT rate for dividends paid to a foreign ‘parent’ company. To be considered as a parent company, the foreign company must hold a specified percentage of the French company’s share capital or voting rights. These minimum percentages range from 0% to 50%, as indicated in Column 4, and certain other conditions must be met (see each treaty). If no percentage is indicated, either no minimum shareholding is required or the tax treaty does not reduce the WHT rate of 30%.

No WHT is levied on dividends paid to an EU parent company by a French company that is subject to CIT, provided all the following conditions are met:

- The EU parent company has held a minimum percentage of the share capital of the distributing company, directly and continuously, for at least two years. As of 1 January 2009, the participation required is 10%.
- The EU parent company is the effective beneficiary of the dividends.
- The EU parent company has its effective seat of management in an EU state and is not deemed to be domiciled outside the European Union under an applicable tax treaty.
- The EU parent company is one of the legal forms enumerated by the relevant Directive.
- The EU parent company is subject to CIT in the member state where it has its effective seat of management.
There is an anti-avoidance rule.

**Column 5:** The tax mechanism has been changed so as to exempt the interest from WHT in France except where the interest is paid to a financial institution established in a non-cooperative state or territory (WHT at a rate of 75% applicable). The payer can, however, be exempt if one proves that the main purpose and effect of such a payment is not to take advantage of locating the income in such a jurisdiction.

These provisions apply to income paid as of 1 March 2010. A special provision applies to loans entered into outside of France by French companies and some investments funds prior to this date. Interest paid on these loans and on related loans after 1 March 2010 will continue to be exempt.

**Column 6:** There is no requirement to withhold income tax on royalties paid to EU companies if all the following conditions are met:

- The taxpayer is a French resident company or a French PE of a company resident in another EU member state.
- The recipient of the income is an EU resident company.
- The taxpayer and the recipient are at least 25% associates, which means that either one directly holds 25% or more of the share capital or voting rights in the other, or a third party directly holds 25% or more of the capital or voting rights in them both.

**Column 7:** WHT is automatically imposed on after-tax profits of a PE unless certain conditions are met. The rate is 25% or the reduced tax treaty rate.

Notes

1. See explanation of Columns 3 and 4.
2. Exceptions where the dividends are excluded from the taxable income of the company that has received the dividends.
3. A rate of 15% is applicable for dividends distributed by certain companies.
4. The 1929-type Luxembourg holding companies are not entitled to any of the benefits of the France-Luxembourg tax treaty.
5. A 25% rate applies if dividends are not included in the income taxed to either corporate or income tax.
6. No WHT applies if dividends are taxable in Morocco.
7. The 5% rate applies to dividends when three conditions are fulfilled, as follows: (1) the effective recipient of the dividends must have invested at least EUR 76,224.51 in the company that pays these dividends; (2) the recipient must be a company liable for corporate tax; and (3) the latter company must be exempt from corporate tax. The rate is 10% when only condition (1) or conditions (2 and 3) are fulfilled. In all other cases, the rate is 15%.
8. An addendum signed on 22 July 1997 modifies the provisions of the French-Swiss tax treaty relating to dividends, interest, and royalties, and provides for the removal of the 5% WHT on profits realised by French PE of Swiss resident companies.
9. The rate indicated applies to Swiss resident companies controlled by Swiss residents.
10. The rate indicated applies to Swiss resident companies that are controlled by non-Swiss residents (non-UE) (Article 11.2.b ii) and meet the conditions of Article 14 of the tax treaty. In the case of column 3, the 15% rate applies to these companies, provided both the recipient and the distributing company are not quoted on a stock exchange. If these conditions are not met, the tax exemption applies.
11. The rate indicated applies to Swiss resident companies controlled by non-Swiss residents but not complying with Article 14 of the tax treaty.
12. The 5% rate applies to gross dividends if the effective recipient is a Ukrainian company that holds, directly or indirectly, at least 10% of the French company's capital. The rate is 0% if the participation exceeds 50% and EUR 762,245. It is 15% in all other cases.
13. Non-treaty recipients of royalties and management fees are subject to a 33.33% withholding rate. Where a treaty exists, management fees are exempt from WHT unless they are included in the definition of royalties subject to WHT.
14. In France, the WHT is levied on a provisional basis at 25% of the net profit. This amount is reduced to the extent it exceeds the dividends actually paid by the company during the previous 12 months, and the amount of dividends paid to residents of France. Consequently, if the foreign head office undertakes not to distribute dividends in a given year, the after-tax profits of its French branch are not subject to WHT, even when they are transferred abroad.
15. WHT on interest on loans with a contract is 0%, while withholding on other interest is in a range from 15% to 50%. For treaty rates, consult the individual entry in the table.
16. The WHT rate can be 60% for certain securities if the investor's identity is not disclosed.
17. The WHT is levied on the following amount: French net profit divided by the total foreign company net profit, multiplied by the amount of the distribution.
18. The rate of 10% is applicable on royalties for the use of literary, artistic, or scientific works, including films; 25% on royalties for the use of trademarks; and 15% otherwise.
19. No WHT is applicable on a royalty arising from the use of or the right to use literary, artistic, or scientific works (excluding film).
20. WHT is reduced to 6% for royalties paid for the lease of industrial, commercial, or scientific equipment.
21. A rate of 5% (Cyprus) and 10% (Israel) is applicable on royalties paid for the use or the right of the use of films.
22. Profits realised in France by foreign corporations whose head offices are located in a European country are not subject to WHT if certain conditions concerning the foreign corporation are met (effective head office in a European country; foreign corporation subject to corporate taxation).
23. No WHT is applicable on a royalty arising from the use or the right to use literary, artistic, or scientific works.
24. No WHT is levied on certain royalties paid in the field of audio visual techniques.
25. The rate of 15% is applicable on royalties paid for the use of industrial property and trademarks.
26. A rate of 33.33% is applicable on royalties paid for the use of or the right to use films.
27. The rate of 5% is applicable on royalties paid for the use of literary, artistic, or scientific works, excluding films.
28. The rate of 33.33% is applicable on royalties paid for the use of literary and artistic works, including films, and for information concerning commercial experience.
29. No WHT is levied on royalties paid for the use of or the right to use literary or artistic works, excluding films and recordings.
30. No WHT is levied on royalties paid for the use of or the right to use copyrights or films.
31. No WHT is levied on royalties paid for the use of or the right to use industrial, commercial, or scientific equipment.
32. The rate of 20% is applicable on royalties paid for the use of trademarks, 15% for the use of industrial property, and 5% for the use of literary, artistic, or scientific works.
33. The rate of 5% is applicable on royalties for the use or the right to use industrial, commercial, or scientific equipment.
34. The reduced rate is applicable if the beneficial owner is a company (other than a partnership).
35. Voting shares solely.
36. French domestic law decreases the WHT rate from 30% to 21% concerning individuals who are resident in another EU member state, in Iceland, and in Norway.
37. Anti-avoidance rules applicable to Non-Cooperative States or Territories (NCSTs)

The French parent-subsidiary regime is not applicable to dividends paid from entities located in an NCST.

WHT on passive income is 75% for transactions with an NCST person or entity.

For French tax purposes, a state or territory is considered non-cooperative if it meets all of the following criteria:

- It is not a member of the European Community.
- It has been reviewed and monitored by the OECD Global Forum on Transparency and Exchange of Information.
- It has not concluded at least 12 administrative assistance agreements/treaties that allow a complete exchange of information for tax purposes.
- It has not concluded an administrative assistance agreement/treaty with France.

Payments (e.g. interests, royalties, payments for services) made to an NCST person or entity are, as a general rule, not tax deductible. In addition, it is not possible to offset WHT in France with any foreign WHT borne by the entity located in an NCST.

Moreover, concerning shareholders (individuals and companies) located in an NCST, a tax amounting to 75% is levied on capital gains derived from the disposal of shares in French companies, whatever the level of shareholding.

Tax administration

Taxable period

The ordinary taxable period is equal to 12 months. Conformity with the calendar year is not requested. In particular cases, the duration of the taxable period can be different from 12 months (e.g. newly established companies are allowed to have taxable periods longer than 12 months; companies that are involved in extraordinary transactions [merger, de-mergers, etc.], as well as companies that are liquidated, may have taxable periods shorter than 12 months).
**France**

**Tax returns**
Regarding fiscal years that end on 31 December, CIT returns are due by the end of April of the following year.

**Accounting records to be provided in ‘computerised format’ in case of tax audit**
Companies are required to keep their accounting records in computerised form and to provide them to the tax authorities in the same format. Printed records are no longer accepted for audits initiated as of 1 January 2014, meaning that such electronic files must be provided for fiscal year 2012 and following years when audited in fiscal year 2015.

**Payment of tax**
Payment of tax is made during the fiscal year by way of four instalments totalling 33.33% of the taxable income of the preceding year (i.e. by 15 March, 15 June, 15 September, and 15 December for fiscal years that end on 31 December). Regarding fiscal years that end on 31 December, final CIT payment is due on 15 April of the following year.

Currently, for companies that have gross income in excess of EUR 500 million, the last down-payment is assessed on the basis of the estimated taxable income of the present year (in case of significant increase of the taxable profits in comparison with the previous fiscal year). This leads to an anticipated payment of CIT.

**Interest and penalties**
Regarding CIT, VAT, registration duties, and business tax:

- late payment is subject to late interest computed at a rate of 0.4% per month (4.80% per year) and to a 5% penalty, and
- late filing is subject to late interest computed at a rate of 0.4% per month (4.80% per year) and to a 10% penalty.

Moreover, a penalty of 40% applies in case of bad faith and is increased to 80% in case of fraud.

**Tax audit process**
The French tax authorities are responsible for verifying that taxpayers’ obligations are correctly complied with and, if necessary, for making adjustments by issuing tax assessments.

Once an assessment is notified by the tax inspector and if the taxpayer disagrees with such an assessment, the taxpayer has 30 days to answer (with a possible 30 days extension upon request) and to provide comments to the French tax authorities.

Following an exchange of written correspondences between the tax inspector and the taxpayer, either party may submit any disagreement on a factual issue to the departmental or national tax commission. The decision of this commission is not binding on the taxpayer or on the French tax authorities.

In cases where the disagreement between the French tax authorities and the taxpayer still remains, the taxpayer can file a claim with the French civil courts or with the French administrative courts, depending on the type of tax that has been subject to assessment by the tax inspector.

**Statute of limitation**
Regarding CIT, the general statute of limitation expires at the end of the third year following the one that has triggered the tax liability.
Under certain circumstances, the statute of limitation can be extended (e.g. fraud, undisclosed/hidden activity); statute of limitation can also be interrupted (e.g. notification of a notice of reassessment).

**Topics of focus for tax authorities**
Transfer pricing, business reorganisation, financing arrangements, and VAT are standard elements reviewed during tax audit.

**The ruling system**
To secure the tax status of a situation, foreign companies and individuals can request a private ruling from the French tax authorities as to whether their activities constitute a PE or fixed base.

The French tax authorities have to provide an answer within three months after the receipt of the request. In the absence of response from the French tax authorities within this period of time, the foreign company or individual will be deemed not to have a PE in France.

APAs are also provided by the French tax authorities for transfer pricing purposes (see the Group taxation section for more information).

---

**Other issues**

**France and the United States sign bilateral agreement on the implementation of the Foreign Account Tax Compliance Act (FATCA)**

On 14 November 2013, France and the United States signed a bilateral intergovernmental agreement (IGA) intended to implement FATCA. FATCA was enacted by the United States in 2010 to combat offshore tax evasion by US persons. France, with the United Kingdom, Germany, Spain, and Italy, was an original member of the ‘G5’ countries that agreed with the United States to advance the principles of FATCA under the concept of bilateral IGAs in order to address many of the legal barriers faced by financial institutions in complying with FATCA.

The French government has committed to drafting local laws and regulations to implement FATCA among all financial institutions resident in France (including French branches of foreign companies). Broadly speaking, the banking, life insurance, and asset management industries will be most affected, but certain estate (patrimonial) vehicles, holding companies, as well as hedging, finance, and treasury centres of non-financial groups could also be impacted, depending on the nature of their activities.

As expected, the US-France IGA is based on the Model 1A version with an Annex II negotiated to include provisions specific to the local French market and that contains categories of French financial institutions qualifying for exempt beneficial owner or deemed-complaint status.

Compliance with FATCA's due diligence, reporting, and, in some cases, withholding requirements is necessary for foreign financial institutions (FFIs) to avoid suffering 30% withholding on certain US-source income and payments. The French IGA is intended to simplify the FATCA requirements for French financial institutions, but, in most cases, still requires significant efforts to maintain compliance.

The following are key points specific to the US-France IGA to consider:

- Inclusion of the ‘most favoured nation’ clause allowing adoption of certain provisions from other IGAs that may be more favourable to French financial institutions.
• Consistent with Notice 2013-43, the timetable for implementation of FATCA has been synchronised with the intended amendments to the US Treasury Regulations, starting with the entry into force of key provisions effective 1 July 2014.

• Annex II of the French IGA describes various classes of exempt beneficial owners and deemed-compliant financial institutions.
  • The deemed-compliant financial institutions described in Annex II are treated as Non-Reporting French Financial Institutions under the French IGA. In turn, these Non-Reporting French Financial Institutions are considered certified deemed-compliant FFIs under the US regulations and do not have to register to obtain a global intermediary identification number (GIIN).
  • Collective investment vehicles, including investment entities established in France that are regulated as collective investment vehicles, sociétés de crédit foncier and sociétés de financement de l’habitat, are Non-Reporting French Financial Institutions treated as deemed-compliant FFIs.
  • The asset management industry should benefit from an exemption related to employee savings plans and a special status that is intended to reduce the FATCA obligations of investment vehicles and management companies that can ensure the absence of US investors and non-participating financial institution customers.
  • The agreement also provides specific provisions for certain French institutions and financial products, including:
    • Exemption for certain local banks with an almost exclusively local client base. This could be beneficial to French institutions following the mutual banking model.
    • Most regulated savings products (savings books and savings plans), which are excluded from the definition of a financial account and will not be treated as US Reportable Accounts, whereas the share savings plan (PEA) remains within the scope of FATCA.
    • Products dedicated to retirement planning (Article 39, Article 82 , Article 83, Madelin, Madelin agricole, Perp, Pere, and Prefon), which are excluded from the definition of financial accounts and will not be treated as US Reportable Accounts.
    • Pension funds will also benefit from a specific exemption.

French financial institutions, as well as non-financial organisations with financial institutions within their groups, should be taking steps based on the IGA (and in some cases US Treasury Regulations) to ensure they are prepared to comply. Unofficial draft guidelines have been prepared regarding the US-France IGA. This draft is not binding on French tax authorities. Official guidelines should be published during the summer of 2015.
**Significant developments**

Further to the promulgation of the Financial Act for 2015, the following new tax measures have been introduced:

- The addition of the simplified stock company (SAS) in the scope of application of the corporate income tax (CIT).
- The deductibility of rental expenses within the limit of the annual depreciation applied on the subject of the rent.
- The taxation to CIT of distributed incomes carried out by unit trusts coming from other products than capital gain on shares transfers, including dividends remaining into the taxable profit.
- A new condition for the deduction of social security contributions paid by companies to foreign retirement funds.
- Exclusion from the scope of application of the transferable security income tax (IRCM) of fines and penalties, non-deductible provisions, and some reintegrations within the taxable result (non-declared fees, wrong accounting allocations, etc.).
- Increase of some excise duties.
- Institution of a specific tax regime applicable to mergers and assimilated operations.

**Taxes on corporate income**

Subject to the provisions of double tax treaties (DTTs), profits subject to CIT in Gabon are those obtained by companies exploited in Gabon or those relating to operations carried out in this country.

As the Uniform Act of the Organisation for the Harmonisation of Business Law in Africa (OHADA) relating to the law of companies and economic interest groups has introduced the SAS in the OHADA area, the new General Tax Code has enlarged the application of the CIT to include the SAS.

The CIT rate is fixed at 30%.

The CIT rate is 35% for companies operating in the oil and mining sectors and 25% for the following entities:

- Companies owning intellectual property shares.
- The Gabonese Development Bank.
- Authorised companies of property promotions.
- Public companies.
- Non-profit partnerships and collectives.
- Authorised companies of the tourism sector.

CIT is assessed on profits minus deductible expenses and charges. Profits are composed of all operations carried out in Gabon by companies during the period of taxation, including, notably, capital gains on fixed assets.
Non-resident companies shall be taxed via withholding tax (WHT) at the rate of 10% for income raised in Gabon if they have no permanent establishment (PE) in Gabon.

In cases where non-resident companies have PE in Gabon, they shall be subject to CIT on the income raised in Gabon via the Gabonese PE.

**Impôt Minimum Forfaitaire (IMF)**
The IMF is a lower limit to the CIT and is calculated as 1% of the global turnover carried out during the fiscal year of taxation. Note that the IMF cannot be less than 1 million Central African CFA francs (XAF), even in the case of a negative turnover.

New companies (as defined in Articles 194, etc. of the Gabonese Tax Code), without consideration of the sector of activity, are exempt from this minimum tax during the first two fiscal years of their existence.

**Local income taxes**
There are no local government taxes on income in Gabon.

---

**Corporate residence**
As a general rule, a resident company is a company that is incorporated under commercial laws in force in Gabon.

**Permanent establishment (PE)**
From a general treaty perspective, a PE designates a permanent business installation through which a company carries out the whole or part of its activity.

The expression ‘permanent establishment’ notably includes the following:

- Head office.
- Branch.
- Office.
- Plant.
- Workshop.
- Mine, oil or gas shaft, quarry, or other place of natural resources extraction.
- Building site or assembly line.

---

**Other taxes**

**Value-added tax (VAT)**
VAT is a cumulative tax levied on the sale of goods and the provision of services rendered or used in Gabon.

There are four rates of VAT:

- Standard rate: 18%, which applies to all transactions unless otherwise provided for by the law.
- Reduced rates:
  - 10%, which applies to manufacturing operations and sales of products mentioned in a limitative list provided by Article 221 of the Gabonese Tax Code, including mineral water, chicken, and sugar.
  - 5%, which applies to sales and services relating to cement.
- Zero-rate: 0%, which applies to exports and international transports.
Gabon

Taxable persons are individuals or legal entities carrying out, usually or occasionally, in an independent manner, taxable operations in the scope of an economic activity and for an onerous consideration.

The aforesaid persons, subject to CIT or personal income tax (PIT), being registered or not, are liable to VAT should their turnover out of taxes reach XAF 60 million.

**Customs duties**

Gabon is member of the Central African Economic and Monetary Community (CEMAC), a customs union that comprises countries from Central Africa.

Merchandise entering into the CEMAC customs territory is subject to importation duties registered into the Customs Tariff.

Four customs regimes are available in Gabon, notably one standard regime and three specific regimes (an exemption regime, a temporary admission regime, and a reduced tax regime).

Apart from customs duties, the importation of merchandise in Gabon is subject to the community tax of integration (CCI) at a rate of 0.4% and to the OHADA withholding (duty) at a rate of 0.05% of the customs value of the imported merchandise.

**Excise duty**

Excise duty principally applies to luxury goods, such as alcoholic drinks, perfume and cosmetic products, caviar, salmon, cigars, and cigarettes.

The rates of the excise duty are between 20% and 32%.

The Financial Act for 2015 has provided new increased excise duty rates for the following goods:

- Local and imported beers: 30% (previously 20%).
- Local and imported wines: 30% (previously 20%).
- Cigarettes, cigars, cigarillos, tobacco: 32% (previously 30%).

**Tax on property**

Tax on buildings (Contributions Foncières des Propriétés Bâties or CFPB) is levied annually at the rate of 15% of the rental value of the building after deduction of 25% for deterioration and maintenance. For properties booked into the assets of a company’s balance sheet, the rental value of the premises is equal to 10% of the market (purchase) value.

Tax on non-built property is levied annually at the rate of 25% of the taxable revenue corresponding to 4% to 5% of the rental value or 10% of the purchase value.

**Transfer tax**

The tax on funds transfer is due on remote transfer operations carried out in Gabon at destination of countries outside the Central Africa Monetary Union (UMAC) countries.

The tax is calculated on the amount of the funds to be transferred, except for related fees and commissions paid by the giver.

The rate of the transfer tax is 1.5%.

**Stamp duty**

A stamp duty is levied on all paperwork relating to civil and judicial actions and to documents that could be produced in court as evidence.
All signatories for mutually binding contracts, lenders and borrowers for loans, and ministerial officials who receive or modify deeds announcing unstamped deeds or books are jointly responsible for the payment of stamp duties and fines.

**Business license tax**
The business license tax applies to both individuals and entities, Gabonese and foreign, engaged in a profession, business, or industry in Gabon.

Business license tax corresponds to a professional tax borne annually. It is deductible from the taxable income for CIT purposes.

The rates of this tax vary according to the profession, business, and location within Gabon territory (this tax may vary between XAF 15,000 and XAF 540,000).

The head of the group of companies is exempted from the payment of the business license tax.

**Franchise tax**
The franchise tax is a fixed annual duty varying from XAF 10,000 to XAF 500,000, according to the size, nature, and location of the company. Each company that carries on a trade, business, or activity that is not expressly exempted is liable for franchise tax.

Activities that are expressly exempted from franchise tax are those carried out by companies of provident, craftsmen, teachers and professors, lyrical and dramatic artists, farmers, cattle-breeders, fishers, etc.

**Registration duties**
Registration duties in Gabon are fixed, proportional, or progressive, depending on the nature of the acts and transfers in question.

**Tax on insurance premiums**
Insurance or annuity agreements made with insurance companies or any other Gabonese or foreign insurer are subject to an annual obligatory tax.

The tax is levied on the sums charged by the insurer and on any accessory payments made to this party by the insured party according to the following rates:

<table>
<thead>
<tr>
<th>Nature of the policies</th>
<th>Rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Marine policies</td>
<td>5</td>
</tr>
<tr>
<td>Life policies</td>
<td>Exempt</td>

<td>30</td>
</tr>
<tr>
<td>Other (e.g. personal liability, transportation)</td>
<td>8</td>
</tr>
<tr>
<td>Reinsurance</td>
<td>Exempt</td>
</tr>
</tbody>
</table>

**Social security contributions**
Employers must contribute to the social security system (National Social Security Fund [CNSS] and to the National Disease Insurance and Social Guarantee Fund [CNAMGS]).

The taxable basis for social security contributions to the benefit of the CNSS is made up of gross salaries, including indemnities having the function of a salary and any benefits in kind. However, there is an annual ceiling of XAF 18 million (or XAF 1.5 million per month).

The taxable basis for social security contributions to the benefit of the CNAMGS is made up of gross salaries, including taxable indemnities in the limit of a monthly ceiling of XAF 2.5 million.
The social security contributions due by the employer for both funds are determined according to the following rates:

<table>
<thead>
<tr>
<th>Contribution to CNSS</th>
<th>Rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Family allowances</td>
<td>8</td>

</tr>
<tr>
<td><strong>Total</strong></td>
<td><strong>20.1</strong></td>
</tr>
</tbody>
</table>

**Payroll taxes**

Personal income tax (PIT) and complementary tax on salary (TCS) are withheld monthly by the employer and paid to the Treasury before the 15th day of the following month.

**Branch income**

Taxation of branch income is the same as for corporate income. However, a 15% WHT on profit is due at the time the profit is taken by the head office (located abroad) of the branch. This rate is reduced to 10% in case of the existence of a tax treaty.

**Simplified tax regime for oil subcontractors**

There is a simplified tax regime specific to the oil sector, which is a lump-sum tax regime granted for a biennial period. The request to benefit from such a tax regime is renewable for an additional period of two years, at least. Should the biennial period end after the first quarter of a considered year, the benefit from the simplified tax regime will apply until the end of the said year.

Features of this specific regime are as follows:

- The option for this regime is irrevocable for a period of two years, renewable once.
- The total duration of the benefit of such a regime can’t exceed four years.
- The companies must perform their activities exclusively in the scope of oil operations.
- The option is granted by the Director of the General Tax Office to foreign companies.
- The subcontractor must have signed, with an oil company, a temporary agreement for the provisions of services to this company.
- The option is no longer granted to companies that have been in Gabon for more than nine years. The duration of nine years is calculated from the year during which the company started its activities in Gabon.
- The subcontractor must constitute a Gabonese branch office.

The rate for the 2015 and 2016 fiscal years is 8.75%, corresponding to CIT (5.95%) and PIT for expatriate employees (2.80%).

**Specific regime for regional offices (quartiers généraux)**

A regional office is a company or a branch that renders various administrative services, such as management or accounting, exclusively to other companies of the same group based in a given geographical area (usually a group of countries).

Taxation is based on the expenses of the regional office. A rate, between 5% and 12%, is applied to operating expenditures to determine the tax basis. The CIT rate is then applied to that basis.

**Income determination**

**Inventory valuation**

Stocks are estimated at cost price. If the market price is lower than the cost price, the company has to make provisions for depreciation of inventory.

**Capital gains**

Capital gains arising from the transfer of assets must be used for the calculation of taxable profits. However, the tax on capital gains can be deferred if a company reinvests an amount equal to the capital gain and the sale price of the transferred asset back into its fixed assets within three years.

Capital gains realised on the transfer of legal rights of persons or entities, whose asset is, in its majority, constituted of such rights or rights directly or indirectly owned in a company located in Gabon, are subject to CIT in Gabon.

**Dividend income**

The rate of transferable securities income tax (Impôt sur le Revenu des Capitaux Mobiliers or IRCM) is 20% on distributed dividends.

IRCM charged on the beneficiaries of the earnings is withheld at source by the distributing company. It is paid over to the Registration Officer within 30 days from the payment of the dividends.

**Inter-company dividends**

Inter-company dividends are taxed at a reduced rate in full discharge of the 10% WHT if paid and received by or from companies with their registered office in a CEMAC country, shares were allotted at the time of issue or kept for two years, and the Gabonese company owns more than 25% of the share capital of the subsidiary.

**Interest income**

Interest income paid to companies is subject to a 20% WHT in Gabon. When paid in respect of bonds of five years or more, it is subject to a 10% WHT.

**Foreign income**

Foreign interest, royalties, and dividends are included in taxable income, subject to international tax treaties. Note that tax treaties provide that certain/all types of income are not includable in Gabon taxable income. Gabon has tax treaties with France, Belgium, the other countries of CEMAC, and the African and Malagasy Common Organisation (OCAM).

The concept of deferred tax is not applicable in Gabon.

**Deductions**

**Depreciation**

The straight-line method and an accelerated depreciation method are permitted in Gabon. Tax and book conformity is obligatory (i.e. annual depreciation must be booked to preserve tax deductibility).

The main depreciation rates provided by the Gabonese Tax Code are the following:

<table>
<thead>
<tr>
<th>Asset</th>
<th>Rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Buildings</td>
<td>5</td>
</tr>
<tr>
<td>Machinery, equipment</td>
<td>5 to 33.33</td>
</tr>
<tr>
<td>Office furniture</td>
<td>15</td>
</tr>
</tbody>
</table>
Gabon

<table>
<thead>
<tr>
<th>Asset</th>
<th>Rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Office equipment</td>
<td>10</td>
</tr>
<tr>
<td>Vehicles</td>
<td>20 to 33.3</td>
</tr>
<tr>
<td>Computing equipment</td>
<td>25 to 100</td>
</tr>
</tbody>
</table>

**Goodwill**

There is no provision in the Gabonese Tax Code concerning the tax treatment of goodwill.

**Start-up expenses**

During the first five years of activity, a start-up can use an accelerated depreciation method on the acquired equipment goods under certain conditions and subject to specific provisions of the Gabonese Tax Code applicable to start-ups. Applicability of these provisions must be requested from the General Tax Manager prior to the incorporation of the company.

**Interest expenses**

Interest paid to shareholders with respect to the sums made available by them to the company is only deductible within the global limit amounting to half of the share capital and within the limit of the intervention rate on invitation to tender (TIAO) of the Bank of the Central African States raised by 2%, provided that the share capital is fully paid up.

**Bad debt**

Bad debt can be deducted from the result of the fiscal year during which the debt became completely unrecoverable, subject to the irrecoverable character of the compromised debt being justified due to the situation of the debtor.

**Provisions**

To be tax deductible, provisions must relate to existing liability or loss. General provisions are not deductible.

**Expenditures on rent**

The amount of rentals can be allowed as expenses of the company within the limit of the annual depreciation applied to the subject of the rent.

**Charitable contributions**

Charitable contributions do not, in principle, constitute expenses deductible from the taxable result. However, contributions for charity can be deducted, provided that the donation is made to the profit of organisms of public interest located in Gabon and that the donation is justified.

The deduction is limited to 1/1,000 of the company’s turnover for the considered fiscal year.

**Fines and penalties**

Fines and third-party taxes borne by companies are not tax deductible.

**Social security contributions paid to foreign retirement funds**

According to the provision of the Finance Act for 2015, the deductibility of social security contributions paid by the employer to foreign retirement funds are only allowed when paid to the benefit of employees in secondment and within a limit of 15% of the gross salary paid to these employees.
**Taxes**
Only professional taxes for which the recovery proceeding has started in the current fiscal year and for which the company is effectively liable due to operations carried out in Gabon can be deducted.

**Net operating losses**
The Gabonese Tax Code does not provide the possibility to carry back losses. It does, however, provide for a five-year carryforward for net operating losses.

Regarding depreciation deferred in the accounts, they can be carried forward indefinitely.

**Payments to foreign affiliates**
Management fees paid to a foreign parent company are deductible if they meet all of the following conditions:

- They reflect real transactions.
- They do not present an abnormal characteristic.
- They are not exaggerated.

Management fees determined on a lump sum basis are not deductible.

Management fees exceeding 10% of the taxable profit before deduction of the said fees are not deductible.

Interest paid to shareholders is deductible only within the limit of the Central Bank’s (BEAC) normal rate for advances plus 2%, on the condition that the registered capital is entirely paid. The portion exceeding the ceiling is not deductible and is thus subject to taxation.

**Group taxation**

**Specific group tax regime**
There is a specific tax regime derogatory to the common law tax regime that is applicable, under conditions, to groups of companies.

According to the provisions of Article 11 b. of the Law No. 44/2010, modified by the 2013 Finance Act, groups of companies are those constituted by companies subject to CIT, or a foreign equivalent tax, united between them through direct or indirect capital links of at least 50% and that allow one of them or several companies, jointly, to control the others.

The control is defined as:

- either the direct or indirect holding of the majority of the vote in another company or
- the nomination, during two consecutive years, of the majority of the members of the board of directors of another company.

To be eligible for this specific tax regime, and without any prejudice of other activities performed to the profit of third parties, the head of the group of companies must perform to the profit of other companies of the group an activity relating exclusively to the following fields:

- Provisions of services of any kind, notably technical, accounting, financial, administrative, data processing, legal, human resources, and commercial corresponding to functions of management, coordination, and control of the group’s companies.
Gabon

- Research and development (R&D) to the sole profit of the group.
- Management of the finance intra-group.

Each company subject to CIT that is a member of the group and fulfils the conditions provided by the law will be subject to a separate taxation of its results according to the rules of common law and subject to amendments expressly provided by the law for the determination of the taxable result.

The express amendments provided in the scope of the specific tax regime applicable to groups of companies are the following:

**Capital gains**

Net capital gains are taxed at a reduced rate of 20% when they are realised in the scope of intra-group operations.

**Expenses deductible from the taxable result subject to CIT**

The following expenses are deductible within the group:

- Head office fees and management fees determined on a lump sum basis, according to the conditions of allocation of the expense between the companies members of the group defined in a previous ruling with the tax authorities.
- The whole of the interests on partners' current accounts (i.e. on the sums put, by the partners, at the disposal of a company of the group) within the sole limit of the intervention rate on invitation to tender (TIAO) of the Bank of the Central African States (equivalent to 4%) raised by 2%.
- Rents of movables carried out within the group by the mother company or between companies of the same group.

**10% WHT**

Sums subject to CIT according to the provisions of Article 206 of the Gabonese Tax Code paid by a Gabonese debtor member of a group of companies to a foreign company member of the same group are exempted from the 10% WHT even though no DTT aiming to avoid double taxation has been concluded between Gabon and the country of residence of the beneficiary of the remunerations.

**Transferable securities income tax (IRCM)**

Companies of the group that benefit from transferable securities income originating from Gabon are exempted from IRCM when the said revenues are paid by a company member of the group.

In return, payments carried out by the head of the group of companies to the profit of its partners (individuals or legal entities) are subject to IRCM at a unique and at source rate of 10% (instead of 20%).

It is to be noted that the transferable securities incomes having their source abroad and which gave rise to taxation in their country of origin give the right in Gabon to a tax credit of the amount of the taxation that is deductible from the CIT of the fiscal year of perception of the incomes. The aforesaid tax credit applies even though no DTT aiming to avoid double taxation has been concluded between Gabon and the country of origin of the incomes.

**VAT**

The head of the group of companies is liable for VAT.

Members of a group of companies could, however, on option, consider the following provisions of services performed within the group as being out of the scope of application of VAT:
• Provisions of services of any kind, notably technical, accounting, financial, administrative, data processing, legal, human resources, and commercial.
• Fees relating to studies.
• Putting at disposal of personal.
• Management of finance.

The option for the subjection of the abovementioned operations must be formulated by the concerned taxpayers on express request addressed to the General Tax Manager.

Registration duties
Deeds relating to incorporation, increase or reduction of share capital, breaking up with or without clearance, merger, scission, partial contribution of assets, and transfer of shares of a company member of a tax group, are subject to a fixed duty of XAF 20,000.

In the absence of a more favourable duty provided by the common law of registration, the changes of ownership and use that are not provided at Article 6 of the Gabonese Tax Code are subject to a proportional rate of 1% when carried out by members of the same tax group.

Requirements relating to declaratory obligations
The adherence to the group tax regime must be notified in writing by the head of the group of companies to the General Tax Manager accompanied by the list of the companies included in the tax perimeter of the group.

Each company remains liable for the periodical returns applicable to its activity.

For the purpose of calculation and verification of the returns, each tax return relating to the CIT of each company of the group will be gathered and filed at the same time by the head of the group of companies before the Tax Office.

Transfer pricing
The Gabonese Tax Code provides rules regarding transfer pricing issues.

According to these rules, any payment considered to be a result of mismanagement will be subject to the CIT rate at 30% (35% for companies operating in the oil and mining sectors) plus penalties.

Indeed, Article 12 of the Code provides that “By virtue of law or in fact, for companies which are dependent of companies or groups of companies located outside the CEMAC area, or for those which possess the control of companies located outside the CEMAC area, payments or expenses realised by any mean whatsoever or any kind of advantages or help granted to third parties without equivalent counterpart for the company, comparable to abnormal act of management, constitute transfer of profits subject to corporate income tax”.

It is applicable for the following:

• Payments constituting increase or decrease of purchases or sales.
• Payments of excessive royalties or royalties without compensation.
• Relinquishment of revenues (underestimated sale price, free of charge service provision, granting of a free loan or a loan with low interests).

The abnormal act of management is not limited to expenses; it also includes any form of advantages or allowances granted to third parties without any equivalent compensation for the company.

Article 13 of the Gabonese Tax Code provides that “The advantages or assistance granted by companies belonging to the same group can only be considered as resulting
from a normal management if the company which grants these advantages or assistance demonstrates the existence of its own interest in acting as such. The general interest of the group is not sufficient to justify such practices”.

The Finance Act for 2014 provides documentation requirements concerning transfer pricing. According to Article P831 bis of the Gabonese Tax Code, the following documents must be made available and provided to the tax authorities upon request:

- General information about the group of related entities, notably:
  - A general description of the activity, including any changes that occurred since the beginning of the activity.
  - A general description of the legal and operational structures of the group of related entities, including an identification of each entity.
  - A general description of the exercised functions and assumed risks of the related enterprises.
  - A list of the main intangible assets owned (notably licences, brands, know-how).
  - A general description of the group transfer pricing policies.
- Specific information relating to the company:
  - A description of the spread activity, including any changes that occurred during fiscal years.
  - A description of the operations carried out with other related entities, including the nature and the amount of the flow and including royalties.
  - A list of the agreements pertaining to costs allotment together with copies of any prior agreement on transfer prices and rescripts pertaining to the determination of transfer prices affecting the company’s results.
  - A presentation of the methods of determination of transfer prices according to the arm’s-length principle, including an analysis of the exercised functions, the assets that are used, and the risks that are assumed, together with an explanation concerning the selection and application of this or these method(s).
  - An analysis of the elements of comparison considered as relevant by the company, when the chosen method requests it.

**Thin capitalisation**

There is no specific tax rule under Gabon legislation related to thin capitalisation.

**Controlled foreign companies (CFCs)**

There is no specific tax rule under Gabon legislation related to CFCs.

**Tax credits and incentives**

**Foreign tax credit**

DTTs include provisions relating to the attribution of foreign tax credits. Such tax credits aim to limit the double taxation of profits that are subject to taxation in both member states of the treaty.

**Tax credits for job creation**

There is a mechanism in place for granting corporate tax credits for any salaried appointments of Gabonese personnel.

This tax credit is equal to 20% of the gross salary paid to new employees and is subject to the creation of a minimum number of jobs, according to the size of the company as follows:

- Two jobs, for companies with less than 20 employees.
- Three jobs, for companies with 20 to 50 employees.
- Five jobs, for companies with more than 50 employees.
Note that the tax credit is granted only on newly created jobs since the preceding fiscal year. Contracts concluded with the employees must also be for an undetermined duration, and the new jobs must not result from the diminution of existing jobs.

**Inbound investment incentives**
Due to the provisions of the Investments Law, any private investment in Gabon can benefit from:

- A common law framework.
- Privileged frameworks.
- Specifically agreed frameworks.

Depending on the frameworks it is eligible for, a company can benefit from customs privileges and tax breaks.

Industrial companies already set up in Gabon and wishing to increase their production capacity can be admitted to a preferential tariff framework. This entails the application of a global reduced rate of 5% for duties and taxes paid on imports of equipment (excluding materials, furniture, and spare parts), provided that these correspond to an investment schedule and their value is in excess of XAF 100 million.

New industrial companies can also benefit from this framework, provided they are not subject to any of the other privileged frameworks outlined by current legislation.

The granting of this privileged tariff framework occurs on the basis of a decision by the Minister of Finances, following a proposal from the Director of Customs and Indirect Taxes.

**Capital investment incentive**
New companies are exempt from the IMF, the minimum taxation of CIT, during the first two years of operations.

**Social housing incentive**
There are some tax exemptions applicable exclusively to authorised companies during the performance of a social housing investment project.

Favourable measures are applicable with regards to the importations of materials, engines, and equipment destined to authorised companies. Indeed, such importations are exempt of customs duties. They can also be imported under the normal temporary admission.

The concerned companies may apply before the Customs Authorities in order to benefit from the abovementioned regime.

The concerned companies are those authorised for the planning of urban lands intended for social habitat and the building of housings of a socio-economic nature and industrial units of manufacturing of materials and other inputs used for the building of social housings. The abovementioned tax exemptions relate to CIT, VAT, and business license tax.

**Tourism incentive**
Companies having hotel activity in the tourism sector are exempted from CIT during the first three years of existence, provided that the amount of the investment equals or exceeds XAF 300 million. If not (investment of less than XAF 300 million), aforesaid authorised companies investing in the tourism sector can benefit, during a five-year period, from a 5% tax credit.
**Withholding taxes**

**10% WHT**

When they are paid by a debtor established in Gabon to individuals or companies subject to CIT or PIT that do not have a permanent professional base in Gabon, the following amounts are subject to a 10% WHT:

- All amounts paid pursuant to the practice of an ‘independent profession’ in Gabon.
- Payments received by inventors, payments relating to copyrights, and all payments relating to intellectual and commercial property as well as assimilated rights.
- All amounts paid for services materially rendered or effectively used in Gabon.
- Interest, arrears, and all others fixed-income investment-products pertaining to income declared as professional revenue of the beneficiary.

Net profits carried out by branches of foreign companies having their head offices abroad are also subject to a 15% WHT in Gabon before they are taken into account by the foreign companies.

The WHT of 10% may not apply in the context of the application of a DTT.

**Transferable securities income tax (IRCM)**

IRCM is due at a 20% rate on revenues from stocks and shares paid to legal entities. It is due by beneficiaries of these revenues and must be withheld by the distributing company.

---

**Tax administration**

**Taxable period**

Companies are required by law to have a 31 December closing of any fiscal year.

**Tax returns**

Returns for the previous calendar year are to be filed before 30 April of each year.

**Payment of tax**

Tax is payable to the General Tax Office in two instalments on 30 November and 30 January. The balance of the tax due must be paid by 30 April. The first instalment must equal one-quarter of the tax assessed in the previous year and the second instalment must equal one-third of this tax.

**Tax audit process**

In the Financial Act for 2014, new rules concerning the tax audit procedure have been introduced. The principals are as follows:

- Strengthening the computerised checks.
- New timeline in the recovering process; cancelling of the eight-day timeline (for remembering letter) and the three-day timeline (for supplementary timeline).
- Amendment of the conditions to benefit of a suspension of payment of the tax, which are:
  - Justify an equivalent guarantee of the disputed tax burdens.
  - Previous payment of 20% of the disputed tax burdens.

**Statute of limitations**

The tax administration can proceed to tax audit until the fourth year following the year for which the tax is due.

**Topics of focus for tax authorities**

The tax administration shall particularly focus on the following aspects:
• Compliance of deductibility of management fees.
• Compliance of deductibility of corporate expenses.
• Compliance of WHT on payments made to foreign services providers.
• Payment of VAT on behalf of third parties.

Other issues

Legal reserve
According to the provisions of the OHADA Uniform Act relating to commercial companies and economic interest groups, one-tenth of the year’s profits, reduced, if applicable, by any previous losses, must be put into a reserve account named ‘Legal Reserve’.

The endowment of this reserve ceases to be obligatory when its value reaches one-fifth (20%) of the company share capital.

Tax regime of merger and similar operations
There is a specific tax regime derogatory from the common law applicable to the following operations:

• Mergers.
• Scissions.
• Partial transfers of assets.
• Subsidiarisation.

This regime only applies to operations performed by companies liable to CIT.

The benefit of this specific tax regime is also subject to the fulfilment of conditions listed in the Finance Act for 2015.

This Finance Act also provides the provisions applicable to the abovementioned operations regarding the following taxes:

• CIT.
• VAT.
• Registration duties.
Significant developments

There have been no significant corporate tax developments in Georgia during the past year.

Taxes on corporate income

Corporate income tax (CIT) in Georgia is applied to taxable profit at a rate of 15%. Taxable profit is defined as gross income minus deductible expenses.

Resident enterprises are subject to CIT on worldwide income.

Non-resident enterprises carrying out economic activities in Georgia through a permanent establishment (PE) are subject to CIT with respect to gross income earned from Georgian sources, which can be reduced by deductions attributable to such income.

Non-resident enterprises earning income from Georgian sources, other than through a PE, are subject to withholding taxes (WHTs) (see the Withholding taxes section for more information).

Local income taxes

There are no local income taxes imposed on the profit of legal entities.

Corporate residence

A resident enterprise is any legal entity that is established under the laws of Georgia or has its place of effective management in Georgia.

Permanent establishment (PE)

The domestic definition for a PE essentially adopts the definition for PE found in the Organisation for Economic Co-operation and Development (OECD) Model Tax Convention.

Local legislation provides the definition for economic activity to be any activity undertaken with the intent to gain profit, income, or compensation, regardless of the results of such activity, unless otherwise provided by the tax code.

Other taxes

Value-added tax (VAT)

The standard VAT rate is 18% and applies to the sale of all goods and services supplied in Georgia carried out as an economic activity. Goods are considered to be supplied in Georgia if they are transferred in or their shipment originates in Georgia. Services
generally are considered to be supplied in Georgia if they are performed in Georgia. However, special rules apply for services relating to immovable property and certain services provided to non-residents.

The export and re-export of goods is exempt from VAT with the right to credit input tax (formerly referred to as zero-rated). VAT-exempt supplies include financial services, goods and services required for oil and gas operations, and medical services.

Reverse-charge VAT applies to services provided to Georgian taxpayers by a non-resident entity.

A VAT payer is a person who is registered or required to be registered as a VAT payer. Any person whose annual taxable turnover exceeds 100,000 Georgian lari (GEL) in any continuous period up to 12 months or who produces or imports excisable goods must register as a VAT payer. In addition, an enterprise that expects to perform one-off taxable transaction of more than GEL 100,000 must also register as a VAT payer no later than the second day after effecting the transaction.

**Customs duties**
Import tax is levied on goods that cross the economical borders of Georgia (except export). Depending on the types of products, general rates on imported goods are: 0%, 5%, and 12%. Imported cars are taxed at GEL 0.05 multiplied by the volume of the engine, plus 5% of import tax on each additional year of ownership.

**Excise tax**
Excise tax is levied on specified goods that are produced in Georgia or imported into Georgia. Excise tax generally is calculated with reference to the quantity of goods (e.g. volume, weight) or, in the case of automobiles, on the basis of the engine capacity and vehicle age. Excise tax rate varies from GEL 0.15 to 400 for one unit.

Excise tax applies to the following goods:

- Alcoholic drinks (i.e. GEL 5 per litre of whiskey).
- Condensed natural gas, except for pipeline.
- Oil distillates.
- Goods produced from crude oil.
- Tobacco products.
- Automobiles.

The export of excisable goods is exempt from excise tax with the right to credit.

Apart from goods, mobile telecommunication services and termination service of international calls in mobile and fixed networks are also subject to excise tax in Georgia.

The applicable excise rate for mobile telecommunication services is 8%.

International calls termination is taxable based on the call duration with the following rates:

- Call termination within mobile network: GEL 0.15 per minute.
- Call termination within fixed network: GEL 0.08 per minute.

**Property tax**
Property tax is payable at the rate of 1% on the annual average residual value of fixed assets (except for land) on the balance sheet as well as on leased out property of Georgian entities or foreign entities with taxable property in Georgia. For immovable property acquired before 2005, the average residual value must be multiplied by a coefficient of between 1.5 and 3, depending on the acquisition date.
Georgia

**Land tax**
The annual land tax rate for agricultural land varies according to the administrative unit and the land quality.

The base tax rate per 1 hectare of agricultural land varies from GEL 5 to GEL 100. The tax is further adjusted by a territorial coefficient of up to 150%, depending on the location.

The base tax rate payable on non-agricultural land is GEL 0.24 per square metre, which is further adjusted by a territorial coefficient not exceeding 150%.

**Transfer taxes**
There are no transfer taxes in Georgia.

**Stamp taxes**
There are no stamp taxes in Georgia.

**Social security contributions**
There are no social security contributions in Georgia.

**Payroll taxes**
Payroll tax in Georgia represents a normal personal income tax (PIT), which is withheld by an employer at the source of payment of salary to an employee at a 20% rate of gross payment.

**Branch income**
Branch income is taxed at the general rate of 15%. There is no tax on branch profit remittances.

**Income determination**
Taxable income is determined as the difference between the gross income of a taxpayer and the relevant deductions granted under the Georgian tax code.

**Inventory valuation**
A taxpayer is required to record the value of goods produced or acquired as the outlays (except for depreciation charges) or the purchase price in tax accounting. Furthermore, the taxpayer shall include the storage and transportation expenses in the value of such goods.

A taxpayer is entitled to record the cost of inventory using the individual accounting method, the average weighted cost method, or first in first out (FIFO).

**Capital gains**
The Georgian tax code does not define any separate tax for capital gains. Capital gains are taxable as normal business income at the general CIT rate.

**Dividend income**
Dividends received by local legal entities (except for sole enterprises and entrepreneur partnerships) are not subject to taxation at source and shall not be included in gross income.

Dividends received by non-resident enterprises from resident enterprises are subject to WHT at source (*see the Withholding taxes section for more information*).
**Interest income**
Resident legal entities and PEs of non-residents that received interest income that was taxed at source in Georgia are entitled to a credit on tax paid to the state budget.

Interest income received from a licensed financial institution is not subject to WHT at source, and it should not be included in the gross income of a recipient unless the recipient is another licensed financial institution.

**Rent/royalty income**
Rent and royalty income received by resident companies and/or PEs of non-resident enterprises should be included in the gross income of the enterprise and taxed at the CIT rate of 15%.

**Foreign income**
Resident legal entities are subject to CIT on their worldwide income. Foreign income is subject to CIT at 15%. There is no tax deferral available under the Georgian tax code.

**Deductions**
Expenses connected with the receipt of income generally are deductible from income, provided sufficient primary documentation is available.

**Depreciation**
The declining-balance method of depreciation applies to fixed assets for tax purposes. The maximum rate of depreciation is 20% for most fixed assets, though buildings and construction are subject to depreciation at the rate of 5% (please contact us for additional information regarding other groups and rates).

A taxpayer is entitled to fully deduct costs of fixed assets (excluding those contributed to capital) in the year when the fixed assets are put into operation (a form of capital allowance). In case the taxpayer employs the right of full deduction in this manner, this method may not be changed for five years.

**Amortisation of intangible assets**
Intangible assets (e.g. goodwill) are amortisable in proportion with the period of beneficial use. However, intangible assets of value less than GEL 1,000 are fully deductible from gross income.

If the period of beneficial use of an intangible asset cannot be defined, it is amortisable at the rate of 15%.

**Start-up expenses**
Expenses incurred before registration of an entity as a taxpayer (e.g. public registry fee) are not deductible under Georgian tax legislation.

**Interest expenses**
Interest paid on loans is deductible within the limits established by the Finance Minister. The annual deductible interest rate limitation established by the Minister of Finance of Georgia for the year 2015 is 24%.

**Bad debt**
A taxpayer is entitled to deduct bad debt only if all of the following conditions are met:

- The bad debt is related to the taxpayer’s goods or services sold.
- Income receivable from the sale of goods or services was previously included in taxable gross income.
Georgia

- The bad debt has been written off and recorded as such in the taxpayer’s accounting records.
- Certain documents prescribed under the Georgian tax code are available confirming that the debt is irrecoverable.

**Charitable contributions**
Charitable contributions are deductible, up to 10% of taxable profit.

**Fines and penalties**
Fine and penalties paid to the state budget are not deductible.

**Taxes**
CIT is disallowed for deduction.

**Other significant items**
The following other expenses are not deductible:

- Expenses not related to the generation of income.
- Expenses related to the receipt of income exempted from CIT.

The deduction of certain expenses is subject to limitations, including:

- Representation expenses, up to 1% of gross income.
- Repair expenses, up to 5% of the book value of the relevant asset at the end of the year. Any excess must be capitalised and deducted through depreciation.

**Net operating losses**
Losses may be carried forward for five years but may not be carried back.

A taxpayer may elect to extend the carryforward period to ten years. However, this also results in the statute of limitations period being extended from six to 11 years.

International financial companies, free industrial zone enterprises, and Special Trading Companies are not entitled to carry forward losses.

An international financial company is a financial institution that, on behalf of the application of plenipotentiary representative, gets state registered, is granted as ‘international financial company’, and is given a status confirming certificate. These are resident companies that, after application, were granted the status of international financial company.

A free industrial zone enterprise is an enterprise operating in the free industrial zone (FIZ), which, for the purposes of tax exemption, is granted the status of a free industrial zone enterprise.

**Payments to foreign affiliates**
There is no special tax regime in Georgia for payments made to the foreign affiliates; as such, general rules will apply. Payments may be classified as equity, financing, or service fee. Any such transaction will need to be at arm’s length in accordance with the Georgian transfer pricing rules.

**Group taxation**
Georgian law does not provide for taxation of groups.
**Transfer pricing**

The transfer pricing rules introduced in the tax code are broadly based on the OECD arm's-length principle adopted in tax treaties and by most countries when they implement domestic transfer pricing rules.

The law recognises the five OECD transfer pricing methods for evaluating whether prices are at arm's length:

- Comparable uncontrolled price method.
- Resale price method.
- Cost plus method.
- Net profit margin method.
- Profit split method.

The tax code stipulates that in accordance with the Ministry of Finance (MoF) instructions, the tax authority may recalculate the taxes if they can prove that the prices applied by related parties of transactions differ from the market prices.

According to the instructions issued by the MoF, the methods for assessing the transfer pricing assessment rules have been explained, and the following procedures have been established:

- Determination of comparability of independent transactions.
- Transaction adjustment procedure.
- Information to be represented by the parties of the transaction to the tax authority.
- Documentation list.
- Sources of information on market prices.
- Price range application procedure.

The taxpayer becomes liable to present documentation to the tax authority in support of one's position in considering income received to be consistent with market principles within 30 days of the formal request of the Revenue Service. The report can be written in both Georgian and English but should be translated in Georgian in case it is requested by the Revenue Service. The companies also have an option to sign an Advance Pricing Agreement (APA) in which the transfer pricing methodology will be agreed for specific transactions with the tax authority, who will no longer have the right to charge fines/taxes on these transactions.

The following general penalties, determined by tax legislation, apply for non-compliance with the arm's-length principle or failing to prepare or submit transfer pricing documentation:

- An understated tax liability (e.g. VAT, CIT) is subject to a penalty of 50% of the understated tax.
- Late payment of taxes is subject to interest at a rate of 0.06% per overdue day.
- Failing to submit a required document is generally subject to a penalty of GEL 400.

**Thin capitalisation**

Interest expense may be disallowed if a company's debt-to-equity ratio exceeds 3:1 (5:1 for leasing companies). The thin capitalisation rules do not apply to financial institutions, entities that have gross income of less than GEL 200,000, and entities with interest expense that is less than 20% of their taxable income before deducting such interest expense.

Note that the Georgian government postponed application of the thin capitalisation rules until 1 January 2016.
Controlled foreign companies (CFCs)
Georgia tax legislation does not provide CFC rules.

Tax credits and incentives

Foreign tax credit
Income tax or profit tax paid on income earned from outside Georgia may be credited against CIT payable in Georgia. The amount of credited taxes may not exceed the Georgian tax payable on the foreign income.

CIT exemptions
The following are exempt from CIT (the list is not exhaustive):

- Income of budgetary, international, and charitable organisations (including grants, membership fees, and donations), except for the profit from commercial activity.
- Profit received from financial services conducted by international financial companies.
- Gains on sales of securities issued by international financial companies.

Free industrial zone (FIZ)
The following rules apply for enterprises located in an FIZ:

- Income received by a free industrial zone enterprise from its permitted activities conducted in an FIZ is exempt from CIT.
- The importation of foreign goods into an FIZ is free of customs duties and VAT-exempt.
- Operations carried out in an FIZ are VAT-exempt without the right to credit.
- Property located in an FIZ is exempt from property tax.
- The PIT of employees is paid by those individuals through self-reporting.

Withholding taxes
Non-resident enterprises earning income from Georgian sources, other than through a PE, are subject to WHT at the following rates:

<table>
<thead>
<tr>
<th>Income</th>
<th>WHT (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Dividends</td>
<td>5</td>
</tr>
<tr>
<td>Interest</td>
<td>5</td>

Notes

1. Some agreements provide a 0% rate on the interest paid by the government or any of its units or on the interest guaranteed by them; this table doesn't consider such provisions.
2. The 0% rate applies if the foreign company owns at least 50% of the Georgian company and has invested more than 2 million euros (EUR).
3. Royalty rate paid for the enterprise is 5%.
Georgia

4. The 0% rate refers to the copyright of any literature, art, or scientific works (except software), and films and records; the 5% rate refers to lease of techniques.
5. The 0% rate applies to interest on bank loans and commercial credits.
6. The 0% rate applies if the foreign company owns at least 50% of the Georgian company and has invested more than EUR 3 million.
7. The 0% rate applies if the foreign company owns at least 50% of the Georgian company and has invested more than 2 million pound sterling (GBP).
8. The 0% rate applies if the foreign company owns at least 25% of the Georgian company in any continuous 12-month period prior to distribution of dividends.
9. The 0% rate applies if the foreign company controls at least 50% of the voting power in the Georgian company and has invested more than EUR 2 million.
10. The 0% rate applies for certain types of interest.
11. The 0% rate applies if the foreign company has invested in the Georgian company more than 3 million United States dollars (USD).
12. The 0% rate applies if the foreign company owns at least 10% of the Georgian company.
13. The 0% rate applies if the foreign company owns at least 10% of the capital or the voting power of the Georgian company.
14. Domestic WHT rates are applicable when a treaty provides a relief with more unfavourable rates.

**Tax administration**

The tax departments under the Ministry of Finance are responsible for tax administrative matters in Georgia.

**Taxable period**

The tax year is the calendar year in Georgia.

**Tax returns**

A CIT return should be submitted before 1 April of the year following the reporting period.

**Payment of tax**

CIT is paid in advance in four equal instalments, before 15 May, 15 July, 15 September, and 15 December. The advance instalments are estimated according to the previous year’s annual tax. A taxpayer with no prior-year CIT obligation is not required to make advance payments.

Final payment is due by 1 April of the year following the reporting period. Excess CIT payments may be offset against other tax liabilities.

**Tax audit process**

There are two types of tax audits: desk tax audit and field audit. The tax audit may be conducted based on the order of the Revenue Service of Georgia. The Revenue Service sends a notice to the taxpayer no less than ten working days before the commencement of the audit. The audit should commence no later than 30 days after receiving such notice by the taxpayer. Normally, the tax audit may last for three months, and may be extended to another two months with the approval of the head of the Revenue Service. The findings should be presented to the taxpayer in the form of a tax act.

**Statute of limitations**

The statute of limitations is five years in Georgia. For those taxpayers who decide to increase the loss carryforward to ten years, the statute of limitations is 11 years. The statute of limitations period was six years prior to 2015 and will decrease to four years in 2016.

**Topics of focus for tax authorities**

In recent periods, the tax authorities have become largely focused on transfer pricing issues during tax audits.
Other issues

International agreements
Georgia is a member of the North Atlantic Treaty Organization’s (NATO’s) Partnership for Peace Program and is actively working to join NATO and the European Union (EU). Georgia is also a member of the World Trade Organization (WTO), the United Nations (UN), the Organization for Security and Co-operation in Europe (OSCE), and the Union of Georgia, Ukraine, Uzbekistan, Azerbaijan, and Moldova (GUUAM), and an observer in the Council of Europe.

Georgia was formerly a member of the Commonwealth of Independent States (CIS). Because of the August 2008 conflict with Russia, Georgia formally notified the CIS on 18 August 2008 of its intention to withdraw from the organisation, and that withdrawal came into effect on 18 August 2009. However, Georgia’s Ministry of Foreign Affairs has said it will uphold all trade and treaty agreements made between Georgia and fellow CIS countries.

Georgia has a free-trade regime with members of the CIS, including Armenia, Azerbaijan, Kazakhstan, Turkmenistan, Uzbekistan, Ukraine, and Turkey. This results in duty-free trade of goods and services.

On 18 December 2002, the GUUAM free-trade agreement was ratified by the Georgian Parliament, the goal of which is to create favourable trade conditions and to strengthen economic links among the member countries. The agreement to form a free-trade zone was reached at the GUUAM Presidents’ Summit in July 2003 in Yalta. Uzbekistan has since left the free-trade zone.

In June 2014, the European Union and Georgia signed an unprecedented Association Agreement. This Agreement aims to deepen political and economic relations between Georgia and the European Union and to gradually integrate Georgia into the European Union.

Also in June 2014, Georgia and the United States Treasury reached an agreement about implementing the tax reporting and withholding procedures associated with the Foreign Account Tax Compliance Act (FATCA). The text of such agreement has not been released and financial institutions in Georgia are allowed to register on the FATCA registration website consistent with the treatment of having the agreement in effect, provided that Georgia continues to demonstrate firm resolve to sign the agreement as soon as possible.

---

**Significant developments**

There has been little significant legislative activity over the past year, and that little has been confined to reacting to court cases and international developments. The coalition agreement between the three governing parties mentions taxes only in general terms without proposing any specific reforms. However, it does indicate an intention to slightly simplify compliance procedures, to move towards a self-assessment system, at least for corporations, and to step-up the struggle against tax evasion/avoidance, especially within international groups of companies. In that latter regard, it suggests waiting until the Organisation for Economic Co-operation and Development (OECD) Base Erosion and Profit Shifting (BEPS) project conclusions are available later this year. It also suggests pressing internationally for a system of automatic information exchanges as the more viable alternative to the present OECD model agreement on information exchanges only on request.

---

**Taxes on corporate income**

Germany taxes its corporate residents on their worldwide income. However, most double tax treaties (DTTs) exempt income attributable to a foreign permanent establishment (PE). Non-residents with PE or property income are taxed by assessment on German-source income; those earning royalties and dividends are taxed by withholding at source. Interest paid abroad is, in most cases, free of German tax altogether.

German business profits are subject to two taxes, corporation tax and trade tax.

**Corporation tax (Körperschaftsteuer)**

Corporation tax is levied at a uniform rate of 15% and is then subject to a surcharge of 5.5% (solidarity levy).

**Trade tax (Gewerbesteuer)**

The effective rate of trade tax varies by location from a minimum of 7%, which is the legal minimum and applies in a few small villages in depressed areas, to the Munich rate of 17.1%. The local rates in most cities range between 14% and 16%, while those in small towns can be as low as 12%. The basis for this tax is the adjusted accounting profit: in particular, 25% of all financing costs over 100,000 euros (EUR), including the implicit financing costs in leasing, rental, and royalty payments, are added back to taxable income.

If the basis for the two taxes is identical (unlikely in practice), the overall burden on corporate profits earned in Munich would be 33%. In Frankfurt, the burden would be 32%. In Berlin, the burden would be 30.2%.
Corporate residence

A corporation is resident in Germany for tax purposes if either its place of incorporation or its main place of management is in Germany. A corporation meeting neither of these criteria will be regarded as non-resident with tax obligations limited to its income from German sources. These include active business activities through a PE or the letting of property, as well as investment income, royalties, and equipment rental (leasing). Income of the first two categories is generally taxed by assessment on the actual net earnings. That of the last three is usually taxed at source by withholding from the gross amount payable. Interest paid abroad is generally tax-free. However, interest on convertible or profit-sharing bonds is taxed as a dividend; interest on a German property or ship mortgage is seen as property or shipping income respectively.

Permanent establishment (PE)

Domestic law defines a PE as any fixed business facility serving the corporate purpose. 'Fixed' is not defined further, but is generally taken to imply a duration of at least six months. A permanent representative is someone who 'habitually' deals on behalf of the principal acting on the principal’s instructions, again without any specific time limit. Germany consistently follows the OECD model in her tax treaty PE definitions; thus purchasing activities, delivery stores, and independent agents acting in the ordinary course of their business are regularly excluded from the PE concept. Some, but not all, of Germany’s recent tax treaties reflect the Authorised OECD Approach to PE income. This approach has been adopted into domestic law and is generally followed unless doing so would lead to double taxation from continued adherence to the old approach (of treating a PE as part of the same legal entity as its head office) in the other state.

Other taxes

Value-added tax (VAT)

Proceeds of sales and services effected in Germany are subject to VAT under the common system of the European Union (EU) at the standard rate of 19% (7% on certain items, such as food and books). The taxpayer generally is entitled to deduct the VAT charged on inputs from that payable on outputs.

VAT is administered by the tax office responsible for the corporation tax assessment of a company. It is based on returns filed monthly or quarterly by the tenth day of the following month (monthly where the output tax in the previous year was more than EUR 7,500) drawn up on the basis of the actual transactions during the filing period as shown in the books of account. A permanent filing extension of one month is available against an advance payment of one-eleventh of the total net tax due during the previous year. Otherwise, payment is due when the return is filed.

Legally, VAT is an annual tax. Each taxpayer must file an annual return for each calendar year, regardless of the actual accounting date for the business. The VAT return is filed together with the corporation and trade tax returns. If the annual return does not agree with the total of the monthly or quarterly returns, the tax office can be expected to ask for a detailed explanation and to penalise any irregularity.

Customs duties

Customs duties are levied under a common system on imports into the European Union. The rate is set at zero on most imports from EU candidate countries and on many imports from countries with which the European Union has an association agreement.

For manufactured products from other countries, the rates generally lie within the range of 0% to 10%. The basis is the import value of the goods and thus includes uplifts for royalty or other payments associated with their use but not apparent from the transit documents.
The European Commission (EC) also sets ‘countervailing’ duties from time to time on specific imports from specific countries in order to counter dumping attempts. The countervailing duty rate is set to fully absorb the dumping margin and is therefore usually much higher than 10%.

**Excise taxes**
Excise taxes on fuel, electric power, insurance, and some other products are not a compliance issue for businesses other than dealers in bonded goods and insurance companies, although they can be a significant additional cost factor for business users. These excise taxes also have an environmental element in as much as the rates are set to discourage excessive use of pollutants. However, an air passenger duty is the only tax on pollution as such. Energy producers (such as power stations) can claim a refund of the excise tax borne in the cost of the energy products used in the production process.

**Property taxes**
There are no taxes on wealth or capital employed. There is a minor local authority tax on property, but the effect of this is partly offset by an additional trade tax deduction.

**Stamp taxes**
The only significant German stamp tax is the real estate transfer tax on the consideration on conveyances of German property. The rate varies by province; in 2015, the rate is 3.5% for property in Bavaria and Saxony; 4.5% in Hamburg; 5% in Baden-Württemberg, Brandenburg, Bremen, Lower Saxony, Mecklenburg-German Pomerania, Rhineland-Pfalz, Saxony-Anhalt, and Thuringia; 6% in Berlin and Hessen; 6.5% in North Rhine-Westphalia, the Saar, and Schleswig-Holstein.

This tax is also levied on indirect transfers from the acquisition of at least 95% of the shares in property owning companies. This applies to shares in the shareholder throughout the corporate chain. If the transfer is indirect, and therefore without its own specific consideration, the basis for the tax is 12.5 times the annual rentable value. This value is derived from rents actually achieved over the past three years or estimated from statistics maintained by the local authority.

The tax is not levied on direct or indirect transfers without consideration in the course of a corporate reorganisation under the laws of a member state of the European Economic Area (EEA), provided at least 95% of the ultimate interest in the property remains unchanged for five years before and after the transaction.

Real estate transfer tax is currently under attack before the Constitutional Court.

**Social security contributions**
All employers are required to account for social security contributions on wages and salaries paid, up to set monthly limits. There are four separate types of insurance: for old-age pensions, unemployment benefits, health care, and invalidity care. Employees regularly earning more than EUR 4,462.50 per month can opt out of the health and invalidity insurances if they take out appropriate coverage with a private insurance company. The pension and unemployment insurances are compulsory for all employees. The upper monthly salary limits are EUR 5,950 (EUR 5,000 in the eastern part of Germany) for the pension and unemployment insurances and EUR 4,050 for the health and invalidity insurances. The rates are as follows:

- Pension insurance: 18.7%, of which the employee’s share is one half.
- Unemployment insurance: 3.0%, of which the employee’s share is one half.
- Health insurance: 14.6%, of which the employee’s share is one half. The health funds have the power to levy a supplement.
- Invalidity insurance: 2.05%, of which the employee’s share is one half.
Payroll taxes
Employers are required to pay employee remuneration under deduction of the income tax due. The amounts deducted are paid over to the tax office at regular, usually monthly, intervals. The actual deductions are calculated from the gross pay, taking the employee’s marital, family, and other personal circumstances into account. The necessary personal details can be downloaded from a government database. For the employee, the payroll tax deduction is a prepayment on the income tax due after filing his or her annual income tax return. As such, the payroll tax is a withholding tax and not therefore a financial burden on the employer. However, employers are required to deduct the correct amounts and are thus exposed to the risk from a later tax audit assertion of underdeduction, especially as there are often legal or practical impediments to recovery from the employees after the event. The administrative effort involved is also far from insignificant.

Branch income
Both corporation tax and trade tax are imposed on the taxable income of a foreign company’s German branch. The rates are the same for branches as for resident German companies, although the withholding tax (WHT) on dividend distributions by German companies is not deducted from profits transferred by a German branch to its foreign head office.

Income determination
Strict conformity between book and tax reporting is no longer required. Rather, a company must draw up its financial statements according to the dictates of fair presentation, but may exercise all valuation and other options in the tax acts in its own best tax interest without regard to the accounting treatment for the item concerned. It must keep a register of all variances between the financial statements and the tax computation showing the basis on which each arose and its reversal. IFRS financial statements are not accepted as a basis for computing taxable income.

Inventory valuation
Inventories normally are valued at the lower of actual cost, replacement cost, and net realisable value. However, any write-downs below actual cost must be for specific reasons. If specific identification of the inventories is not possible, valuation at either standard or average cost is acceptable. The last in first out (LIFO) method is accepted as an option. First in first out (FIFO) is not accepted unless its assumption accords with the facts, although this condition is often fulfilled in practice.

Long-term liabilities and accruals
Non-interest bearing long-term liabilities, other than advance payments received, must be discounted at 5.5% per year. A similar provision applies to refurbishment (to restore an asset to its original condition) and other accruals that accumulate over time.

Capital gains
Generally, capital gains realised by a corporate entity from a disposal of business assets are treated as ordinary income. It is possible to postpone the taxation of part or all of the gain on real estate by offsetting the gain against the cost of a replacement property.

Capital gains from the sale of investments in other companies are exempt from corporation and trade taxes. Corresponding losses are not deductible. However, 5% of the capital gains are added back to taxable income as non-deductible directly-related expenses.
Dividend income
Dividends received on significant holdings are exempt from corporation and trade taxes without a minimum holding period. Portfolio dividends are taxable. A portfolio holding is less than 10% for corporation tax and less than 15% for trade tax. 5% of the tax-free gross dividend is added back to taxable income as non-deductible business expenses.

Note that banks do not enjoy this exemption on dividends from securities held for trading.

Stock dividends
In principle, a declaration of stock dividends (by converting reserves to capital stock) by a company will not lead to taxable income for the shareholder or to other tax effects. Subsequent capital reductions, however, will be treated as cash dividends in most circumstances. There is no German tax reason for distributing a stock dividend as opposed to merely leaving accumulated profits on the books to be carried forward. The decision, therefore, depends upon the situation in the investor’s home country.

Interest income
Interest received is taxed as part of a company’s ordinary trading income. There is no exemption corresponding to the trade tax disallowance of 25% of the interest expense or to the general tax disallowance of net interest expense in excess of 30% of ‘earnings before interest, tax, depreciation, and amortisation’ (EBITDA) under the interest limitation rule (see the Deductions section). However, since the interest limitation is based on the net interest margin, a company can benefit from earning income as interest as opposed to an interest substitute.

Foreign income
Foreign income, except dividends, received by a German corporation from foreign sources is included in taxable income for corporation tax unless a tax treaty provides for an exemption. Foreign PE income, in most cases, is exempt from corporation and trade taxes, while double taxation on most items of passive income (e.g. interest and royalties) is avoided by foreign tax credit or, at the taxpayer’s option, by a deduction of the foreign taxes as an expense.

Irrespective of any tax treaty, income from a foreign branch or partnership is not charged to trade tax.

A Foreign Tax Act sets anti-avoidance (including controlled foreign company [CFC]) rules with respect to subsidiaries in certain lines of business subject to a low-tax regime. A low-tax regime is one in which the rate applicable to the income in question is less than 25%. Most forms of passive income fall under the CFC rules, which essentially attribute the income to the German shareholder as though it had been earned directly. Active business income is not generally caught where the business operates from properly established facilities.

Investment income held in an EU/EEA subsidiary is also exempt from attribution, provided the subsidiary is commercially active in its country of operation and maintains at least a minimum establishment.

Other provisions give the tax office the right to insist on full disclosure of all the facts and circumstances surrounding a transaction as a condition for the deduction of a business expense incurred within an essentially tax-free environment for the supplier. This rule operates independently of ownership or shareholding considerations.
Deductions

Depreciation and amortisation
Depreciation on movable fixed assets is calculated on the straight-line method over the asset’s anticipated useful life. Depreciation takes the residual value of the asset into account only if it is material, with any gains on a sale being treated as normal business income.

Buildings are depreciated on a variety of straight-line or reducing-rate systems designed to reach a full write-down between 25 and 50 years, depending on the age of the building and on whether the taxpayer was its first owner.

In addition to normal depreciation, special depreciation is deductible for tax purposes in certain limited circumstances (e.g. small businesses, ancient monuments, buildings in designated renovated city zones).

Intangibles are amortised straight-line over their estimated useful lives; goodwill is amortised over 15 years.

Start-up expenses
Start-up and formation expenses are deductible as incurred.

Interest limitation
Annual net interest expense (the excess of interest paid over that received) of group companies is only deductible at up to 30% of EBITDA for corporation and trade tax purposes. The 30% limitation applies to all interest, whether the debt is granted by a shareholder, related party, or a third party.

This limitation does not apply where the total net interest expense for the year is less than EUR 3 million or where the net amount paid to any one shareholder of more than 25% (or a related party) is no more than 10% of the total. However, this latter concession is dependent on the demonstration that the equity to gross assets ratio of the company is no more than two percentage points below that of the group as a whole. Unused EBITDA potential may be carried forward for up to five years to cover future excess interest cost. This carryforward is otherwise subject to the same principles as the loss carryforward, including curtailment on change of shareholder(s).

It is emphasised that the interest limitation is additional to, and not a substitute for, the transfer pricing requirement that related party finance be at arm’s length.

Bad debts
Bad debts incurred on trading with unrelated parties are deductible once irrecoverability is apparent and all attempts to pursue the debt have failed or been abandoned. Provision for future bad debts may be made; general provisions must reflect the past experience of the business; specific provisions require specific justification based on the actual circumstances. Loans to shareholders of more than 25% or to their related parties may not be written down or off with tax effect, unless a third party creditor would have granted the loan or allowed it to remain outstanding in otherwise similar circumstances.

Charitable contributions
Donations to recognised charities in cash or in kind are deductible, up to the higher of 20% of otherwise net taxable income or 0.4% of the total of sales revenue and wages and salaries paid during the year. Donations to charities registered in other EU/EEA member states also qualify for deduction if the recipient charity meets the German requirements for recognition.
Fines and penalties
Fines and other penalty payments levied by a court, or other authority, with an intent to punish are not deductible. By contrast, those levied to confiscate ill-gotten gains, or to relieve damage to the victims or to the public good, are deductible. Penalty payments levied for attempted tax evasion are not deductible, but late payment surcharges are deductible if the tax itself is, for example VAT.

Taxes
All taxes borne are deductible except for corporation tax, trade tax, and the VAT on most non-deductible expenses.

Net operating losses
Net operating losses are carried forward without time limit. For corporation tax (but not trade tax), there is an optional carryback to the previous year of up to EUR 1 million.

The loss relief brought forward claimable in any one year is limited to EUR 1 million plus 60% of current income exceeding that amount. The remaining 40% of income over EUR 1 million is charged to trade and corporation taxes at current rates. This is referred to as 'minimum taxation'.

The loss carryforward ceases if a single (immediate or ultimate) shareholder acquires more than 50% of the issued capital (voting rights) within a five-year period. An acquisition of between 25% and 50% leads to a corresponding reduction in the loss carryforward.

Under the statute, these forfeiture rules do not apply to share acquisitions in connection with the recovery of a troubled business, where the change is part of a group internal reorganisation without effect on the single ultimate shareholder, or inasmuch as the loss carryforward is covered by hidden reserves in the company's assets that, on realisation, will lead to German taxation. This excludes the appreciation in value of shareholdings in other companies as well as business assets held in foreign PEs. However, the European Commission has chosen to view the exemption from the forfeiture rules for share acquisitions within the context of a corporate recovery bid as unlawful state aid. Application of the provision has been suspended since April 2010; the government lost its appeal to the European Court of Justice against the Commission's decision because of a missed deadline, but is supporting a number of companies in their own actions against the Commission.

Payments to foreign affiliates
A German corporation can claim a deduction for royalties, management service fees, and, subject to the interest limitation, interest charges paid to foreign affiliates, provided the amounts are at arm's length. Detailed provisions covering both form and substance define this. In particular, all services must be covered by prior written agreement, and it is also necessary to conclude agreements for the purchase and sale of goods in writing where this would be usual between third parties (e.g. for quantity rebates on sales). The substance tests must be satisfied, both as to value for money and as to business relevance. Thus, the manager of a German subsidiary must be able to show both an adequate business benefit from a related party transaction and that the company could not have obtained a better deal on the open market. These and all other aspects of inter-company (related-party) trading fall under strict and extensive documentation requirements, breach of which can lead to serious penalties.

Special features for trade tax
There are a number of differences between the income subject to trade tax and to corporation tax. The most significant is the trade tax disallowance of one-quarter of the interest costs, including interest implicit in leasing, rental, and royalty charges. Banks have an exemption from this interest disallowance.
Group taxation

If a German parent holds more than 50% of the voting rights in a domestic subsidiary, the two may conclude a formal, five-year, court-registered profit pooling agreement. The ensuing relationship is then referred to as an Organschaft. Effectively, the annual results of an Organschaft are pooled in the accounts and tax returns of the parent. Profits and losses within a group can therefore be offset, but there is no provision for the elimination of intra-group profits from the total tax base. It should also be noted that any loss incurred within an Organschaft is excluded from offset in the same or another year if a foreign country takes it into account in the taxation of an Organschaft member, or of any other entity.

Transfer pricing

Extensive rules on transfer pricing in respect of all transactions with foreign related parties are in force. The basic principle is that all trading should be at arm’s length, but the documentation requirements go far beyond the level of documentation normally found sufficient to demonstrate a conscientious approach to true third party business. Failure to meet these rules exposes the company to serious risk of penalties as well as unfavourable estimates by the authorities, who have the right to exercise every possible leeway or margin to the taxpayer’s disadvantage.

Thin capitalisation

There are no thin capitalisation rules as such; their substitute is the ‘interest limitation’ to, basically, 30% of EBITDA discussed in the Deductions section.

Controlled foreign companies (CFCs)

Germany operates a CFC regime aimed at passive income sheltered abroad and taxed at less than 25%. Essentially, the income is added to that taxable in Germany in the regular manner against a credit for the foreign tax actually paid and not recoverable by either the foreign entity or its shareholder. Active business income, except from tourism and the arms trade, is generally exempt from the CFC net, provided it is earned through a properly established facility of a scale appropriate to the activity concerned. Treaty and EU directive rules exempting foreign income are respected, although taxpayers do have to demonstrate their treaty entitlement.

Tax credits and incentives

Germany does not offer tax incentives except in very limited circumstances, not usually of direct business relevance (e.g. special depreciation for buildings under a conservation order). Partly, this is a question of the state budget, and partly, it reflects the constitutional requirement for equal treatment of all taxpayers.

Other incentives

Local authorities may offer facilities on favourable terms, such as the provision of cheap land on industrial estates.

Foreign tax credit

If foreign-source income is not exempt from German taxation, a credit will be given for the foreign tax actually paid and not otherwise recoverable. However, the credit is limited to the corporation tax (including the solidarity levy) on the net income after deducting the related expense. Unused credit is lost, as there are no provisions for carryforward or for offset against other taxes, such as trade tax. There are still a few cases of fictitious foreign tax credits under tax treaties with developing countries (to protect the treaty partner’s investment incentives), but German treaty policy is to abandon such provisions at the first opportunity.
### Withholding taxes

Resident corporations paying certain types of income are required to withhold tax as shown in the following tables. There is also a solidarity levy of 5.5% on the tax due.

#### General

#### Notes

1. Corporate recipients of dividend and interest income (interest on convertible and profit-sharing bonds) can apply for refund of the tax withheld over the corporation tax rate of 15%, regardless of any further relief available under a treaty.
2. Generally, only interest paid by banks to a resident is subject to a WHT. A 25% tax is also withheld from income on convertible or profit-sharing bonds.
3. Interest paid to non-residents other than on convertible or profit-sharing bonds is generally free of WHT. Tax on loans secured on German property is not imposed by withholding, but by assessment to corporation tax at 15% (plus solidarity levy) of the interest income net of attributable expenses. The tax authorities can order a WHT of 15.825% (including solidarity levy) if ultimate collection of the tax due is in doubt. Both forms of tax are reduced by treaty relief.
4. Movable asset rentals are taxed by assessment rather than by withholding. For corporations, the rate is the standard 15% corporation tax rate (plus solidarity levy) unless reduced by treaty.
5. Where the EC Parent/Subsidiary Directive applies, dividends paid by a German company to a qualifying company resident in another EU member state are exempted from German WHT. The minimum shareholding is 10%, to be held continuously for at least one year.
6. The EC Interest and Royalties Directive exempts payments from WHT if made to an associated company in another EU member state. The association must be through a common shareholding of at least 25%.

Notes

1. Corporate recipients of dividend and interest income (interest on convertible and profit-sharing bonds) can apply for refund of the tax withheld over the corporation tax rate of 15%, regardless of any further relief available under a treaty.
2. Generally, only interest paid by banks to a resident is subject to a WHT. A 25% tax is also withheld from income on convertible or profit-sharing bonds.
3. Interest paid to non-residents other than on convertible or profit-sharing bonds is generally free of WHT. Tax on loans secured on German property is not imposed by withholding, but by assessment to corporation tax at 15% (plus solidarity levy) of the interest income net of attributable expenses. The tax authorities can order a WHT of 15.825% (including solidarity levy) if ultimate collection of the tax due is in doubt. Both forms of tax are reduced by treaty relief.
4. Movable asset rentals are taxed by assessment rather than by withholding. For corporations, the rate is the standard 15% corporation tax rate (plus solidarity levy) unless reduced by treaty.
5. The treaty does not (effectively) limit the taxation of profit-based interest income; thus, the domestic rate (plus solidarity levy) applies.

6. The USSR treaty continues in force with Armenia, Moldova, and Turkmenistan.
7. The lower royalty rate applies to commercial and industrial royalties, as opposed to cultural royalties.
8. Mortgage interest to a Belgian business is exempt unless the recipient holds at least 25% of the voting rights in the payer.
9. The Yugoslav treaty continues in force with Bosnia-Herzegovina, Kosovo, Montenegro, and Serbia, Croatia, Macedonia, and Slovenia have their own treaties.
10. The higher royalty rate applies to film and television (TV) royalties, licences to use trademarks and names, and to franchises.
11. The Czechoslovak treaty continues to apply to the Czech Republic and to Slovakia. Interest on profit-sharing bonds is taxed as a dividend.
12. 25% on trademark royalties.
13. The higher royalty rate of 5% applies to commercial, industrial, and scientific royalties.
14. Cultural royalties are exempt.
15. Interest on convertible and profit-sharing bonds is taxed as a dividend; mortgage interest is exempt.
16. The 15% royalty rate applies to copyrights.
17. Treaty relief on interest, royalties, and rentals is conditional on taxation in country of receipt.
18. The 5% royalty rate applies to copyrights.
19. Royalties for copyrights, except for films and TV, are exempt.
20. The 10% interest rate applies in certain circumstances where the recipient is a bank.
21. The 15% royalty rate applies to patents, trademarks, films, and TV.
22. The dividend exemption applies to corporate shareholders with at least 80% throughout the previous 12 months.
23. The 5% royalty rate applies to industrial, commercial, film, and TV royalties.
24. The 10% royalty rate applies to access to industrial, commercial, or scientific experience.

Treaties signed, but awaiting ratification: China, Costa Rica, France, Ireland, Israel, Netherlands, Oman, Philippines, South Africa, the United Kingdom (protocol on the Authorised OECD Approach to Business Profits), and Uzbekistan (protocol on information exchange).

---

**Tax administration**

**Taxable period**
The tax year in Germany is the calendar year.

**Tax returns**
Returns are filed for each calendar year and reflect the financial statements for the business year ending in that calendar year. Assessments are issued once the tax office has reviewed the return.

In principle, returns are due by 31 May of the following year. However, there is a virtually automatic extension to 31 December for those filing with professional assistance. A further extension to 28/29 February is possible, if justified under the circumstances. Known late-filers and those with a record of other irregularities can be asked to submit their returns before these extension dates, though not before 31 May.

**Electronic returns**
Monthly or quarterly returns for WHT from employee salaries, dividends, interest, royalties, and other payments, and for VAT must be submitted electronically. The same applies to the annual returns for corporation tax, trade tax, and VAT. There is also an electronic filing requirement for the financial statements supporting the return.

**Payment of tax**
Taxes are payable in quarterly instalments during the year, with a final settlement when the assessment is issued (usually five to six weeks afterwards). The quarterly instalments are based on the estimated ultimate liability. Usually, this is the total tax due shown by the last assessment issued, as adjusted by any rate changes. The corporation tax instalments are due on the tenth day of March, June, September, and December. For trade tax, the due dates are the 15th day of February, May, August, and November. Failure to pay by the due date followed by a three day grace period leads to a penalty of 0.5% per month.

Corporation and trade tax assessments bear interest on the net amount payable after deduction of all credits and previous payments. The rate is 0.5% per month simple interest, and the period runs from 1 April of the second year following the year of assessment. The interest period is independent of the actual date of assessment. It thus runs in retrospect on assessments issued later, for example following a tax audit.
Rulings
Tax offices are able to issue binding rulings in respect of planned transactions, provided the taxpayer can show a particular interest in the tax consequences of the intended action. The fee varies between EUR 241 and EUR 91,456, depending upon the amount of tax involved (no fee is charged if the tax amount is less than EUR 10,000).

Advance pricing agreements (APAs)
A taxpayer can request the Central Tax Office to negotiate an APA on related-party transactions with a foreign tax authority on one’s behalf. The vehicle is the mutual agreement procedure under the treaty, and the fee is a lump sum EUR 20,000 for each new agreement.

Tax audit process
Germany relies heavily on tax audits as a means of ensuring taxpayer discipline. Audits of small businesses are carried out at random, although those for larger operations and for the local subsidiaries of foreign groups tend to be regular. With some district variations, audits are usually conducted at four to five yearly intervals, though not always with equal intensity for the entire period since the auditors’ previous visit.

Statute of limitations
The statutory limitation period for the issue or correction of assessments is four years from the end of the year in which the return was filed. If no return was filed, the period runs from the end of the third year following the end of the year of assessment. The four-year period is extended to five in cases of taxpayer negligence and to ten in the event of evasion.

The statutory limitation period for the collection of tax debts is five years from the end of the year in which payment became due.

Topics of focus for the tax authorities
Tax office reviews of tax returns prior to issuing the assessment notice and payment demand are often rather superficial. Audits, though, are intense, being field reviews on site often lasting for several weeks or even months. Companies with an international focus can expect significant audit emphasis on all aspects of their dealings with their foreign business partners. If the company is a member of an international group, its most important audit component will usually be its transfer pricing on its dealings with foreign related parties and the relevant documentation. It is emphasised that these two topics are separate fields, as documentation deficiencies can lead to unfavourable estimates on the taxpayer, even if the taxpayer is able to justify the taxpayer’s group company pricing in terms of overall result.

Other issues
International exchange of information
For several years, Germany has been forceful in promoting the international exchange of tax information. Ideally, the government would like the information exchange to be automatic, but has been prepared to accept limiting exchanges to specific requests if the other state insists and is willing to discourage evasion with a meaningful WHT. However, attitudes are hardening, not least in the wake of Foreign Account Tax Compliance Act (FATCA) and the Bundesrat refusal to ratify an agreement with Switzerland, seen by many as being too protective of evaders. Indeed, Germany is now pressing for a fully automated system within the European Union and for EU insistence on this from European tax havens outside.

In 2012, Germany participated in a working group with France, Italy, Spain, the United Kingdom (UK) and the United States (US) with the task of drafting a model FATCA agreement designed to keep Germany’s own banks FATCA-compliant, acquire equivalent
rights from the United States in respect to Germany’s own taxpayers, and to resolve potential legal difficulties arising from co-operation of Germany’s own banks with the tax authorities of a foreign power. A bilateral agreement with the United States on this model was signed on 31 May 2013, and Germany has agreed with the other members of the working group to exchange information on the same lines as a pilot project within the European Union. The current hope is that this will lead to a European FATCA in the form of an EU legal act ensuring a multilateral exchange of information between all member states.

Significant developments
Ghana signed a double taxation treaty (DTT) with Denmark in March 2014, which is expected to become effective in 2015, subject to both countries completing legal requirements. This will increase the number of countries Ghana has DTTs with to nine.

2015 amendments
As part of measures to mobilise revenue to support the transformational agenda outlined in the 2015 Budget, Parliament passed some of the proposed amendments in the Budget:

- The National Fiscal Stabilisation Levy (NFSL), which was initially scheduled to end in December 2014, has been extended until 2017.
- The corporate income tax (CIT) rate (after the ten-year tax holiday period) on the exports of a free zone enterprise outside of the domestic market is now 15%.
- Value-added tax (VAT) on financial services rendered for a fee, which was introduced in 2013, has become fully effective, and the tax authority is now implementing it based on agreements reached with the Ghana Association of Bankers. The tax is currently being charged by banks providing service for a fee.
- Withholding tax (WHT) on directors’ remuneration has been increased from 10% to 20%.
- The law on application of excise tax stamp on selected products became effective as of 2 March 2015.
- A flat VAT rate of 5% has been imposed on the supply of an immovable property by an estate developer.

2015 Government Budget and other proposed amendments (yet to be passed into law)

- The National Health Insurance Act, 2012 (Act 852) is to be amended to conform to the provisions of the VAT Act, 2013 (Act 870).
- The government has indicated its intention to introduce another tax on financial institutions/banks. The details of the proposed tax are yet to be announced.
- The Economic Community of West African States (ECOWAS) Common External Tariff (CET), a common external tariff regime that will be applied by all ECOWAS members on all goods imported into their countries, is expected to become operational in Ghana from 1 July 2015.
- The current four band tariff system in Ghana will increase to five under the CET. The five bands are namely: essential goods, primary raw materials/capital goods, intermediate goods, final consumer goods, and specified goods for economic development.
Taxes on corporate income

A resident is taxed on income accruing in, derived from, brought into, or received in Ghana. The income of a resident is treated as accruing in or derived from Ghana unless attributable to a permanent establishment (PE) of the resident outside Ghana.

A non-resident is taxed on income accruing in or derived from Ghana. The income of a non-resident is treated as accruing in or derived from Ghana if the income is attributable to a PE of the non-resident in Ghana.

National CIT is payable on the following:

- Income accruing in, derived from, brought into, or received in Ghana in respect of gains or profits from a trade, business, profession, or vocation.
- Dividends, interest, or discounts.
- Any charge or annuity.
- Royalties, premiums, and any other profits arising from property, including rents.
- Receipts, including royalties and deferred payments of any kind.

The general CIT rate is 25%.

Companies listed on the Ghana Stock Exchange (GSE) are subject to a reduced CIT rate of 22% (this rate is applicable for only a three-year period for companies that listed on the GSE after 1 January 2004).

Mining companies pay CIT at a rate of 35%, while the hotel and hospitality industry pays a reduced rate of 20%.

The CIT rate for companies engaged in non-traditional exports is 8%, while banks lending to the agricultural and leasing sectors pay a CIT rate of 20%.

National Fiscal Stabilisation Levy (NFSL)

The NFSL applies to specified companies and institutions to raise revenue for fiscal stabilisation of the economy. The NFSL is 5% on the profit (accounting profit) before tax on specified companies. The specified companies and institutions include:

- Banks (excluding rural and community banks).
- Non-bank financial institutions.
- Insurance companies.
- Telecommunications companies liable to collect and pay the communications service tax (CST) under the CST Act, 2008 (Act 754).
- Breweries.
- Inspection and valuation companies.
- Companies providing mining support services.
- Shipping lines, maritime and airport terminals.

The levy shall apply to the aforementioned industries irrespective of any existing exemption granted to an entity under any other laws in Ghana. The tax payable shall not be a deductible expense in arriving at the CIT liability of an entity, and the Commissioner-General (CG) shall issue an assessment to an entity for the amount of tax payable for the period.

NFSL is payable in four equal instalments at the end of each quarter (i.e. March, June, September, and December).

The NFSL was initially scheduled to end in December 2014 but has been extended to 2017.
Ghana

**Local income taxes**
Ghana has no local, state, or provincial government taxes on income.

---

**Corporate residence**

Corporate residence is determined by the place where the trade, business, profession, or vocation is carried on. A company is resident if it is incorporated under the laws of Ghana or has its management and control exercised in Ghana at any time during a year of assessment.

Where a non-resident corporate body carries on any trade, business, profession, or vocation in Ghana (part of the operations of which may be carried on outside Ghana), the full gains or profits of the trade, business, profession, or vocation are deemed to be derived from Ghana.

**Permanent establishment (PE)**

A PE is determined under the tax law as the place where a person carries on business, as well as a place where a person:

- carries on business through an agent, other than a general agent of independent status acting in the ordinary course of business as such
- has, is using, or is installing substantial equipment or machinery, or
- is engaged in a construction, assembly, or installation project for 90 days or more, including a place where a person is conducting supervisory activities in relation to such project.

A non-resident carrying on business in Ghana through a PE is subject to tax in Ghana only on that income attributable to the PE in Ghana as well as any deemed repatriated profits of the branch.

---

**Other taxes**

**Value-added tax (VAT)**

Other than exempt goods and services, VAT of 15% and the National Health Insurance Levy (NHIL) of 2.5% are charged on the following:

- Every supply of goods and services made in Ghana.
- Every importation of goods.

VAT and NHIL are charged on the supply of goods and services where the supply is a taxable supply and made by a taxable person in the course of business.

VAT and NHIL are payable by the taxable person making the supply in the case of taxable supply and by the importer in the case of imported goods.

Most professional services are also subject to the same VAT and NHIL rates, including the following:

- Management services.
- Insurance brokerage and other services.
- Financial, tax, and economic consulting.
- Engineering and technical services.
- Accounting services.
- Courier services.
- Legal services.
- Provision of satellite television.
• Architectural services.
• Services rendered by surveyors.

Exports of goods and services are zero-rated. Unless specifically exempt, supplies of all goods and services are subject to VAT.

A special petroleum tax of 17.5% has been imposed on specified petroleum products by licensed oil marketing companies.

VAT on financial services rendered for a fee has been enforced. The tax is currently charged by banks on services rendered for a fee.

A flat VAT rate of 5% on the supply of immovable property by an estate developer has also been enforced. However, estate developers supplying immovable properties are not allowed input tax deductions relating to the supply of immovable properties.

**Customs and excise duties**

Customs and excise duties are imposed on the importation of goods at the port of entry and certain manufactured goods produced or imported into Ghana.

The following rates of excise duties apply on the ex-factory price:

<table>
<thead>
<tr>
<th>Product</th>
<th>Rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Sachet water</td>
<td>0</td>
</tr>
<tr>
<td>Bottled water</td>
<td>17.5</td>
</tr>
<tr>
<td>Malt drink</td>
<td>2.5 to 17.5</td>
</tr>
<tr>
<td>Beer</td>
<td>10 to 47.5</td>
</tr>
<tr>
<td>Spirits</td>
<td>0 to 25</td>
</tr>
<tr>
<td>Cigars and cigarettes</td>
<td>150</td>
</tr>
<tr>
<td>Snuff and other tobacco products</td>
<td>170.65</td>
</tr>
</tbody>
</table>

In addition, a Special Import Levy Act was amended to impose tax on the cost, insurance, and freight (CIF) value of imported goods. The levy varies from 1% to 2%, depending on the type of goods, and is expected to apply up to 2017.

**Property taxes**

Property tax rates are payable by owners of immovable property to the local District Assembly. The rate of property tax differs depending on the location of the property.

The Local Government Act 1993 enjoins all employers to deduct from the remuneration of every employee general or special rates imposed by the Rating Authority (District Assembly) as a basic amount.

**Stamp taxes**

Stamp duty is paid, at rates ranging between 0.25% to 1% and 0.05 Ghana cedi (GHS) to GHS 25, depending on the type of transaction and the instrument. The stamp duty is not a tax on transactions but on documents brought into being for the purposes of recording transactions. It is therefore a tax on documents or specific instruments that have legal effect, such as the following:

• Insurance policies.
• Awards of cost in matters of dispute.
• Conveyances or transfers on the sale of any property.
• Appointment letters of new trustees.
• Natural resource leases or licences (e.g. mining, timber).
• Agreements or memoranda of agreement.
Bills of exchange (e.g. issue of cheques).
Bills of lading.

**Capital gains tax (CGT)**
CGT is payable by every person, including a corporate body, on any capital gain accruing or derived from the realisation of any chargeable asset situated in Ghana. These chargeable assets include buildings of a permanent or temporary nature; business and business assets, including goodwill; land, other than agricultural land; and any assets declared as chargeable by legislative instrument made under the law.

Capital gains in excess of GHS 50 are subject to tax at 15%. However, gains resulting from a merger, amalgamation, reorganisation, or reconstruction are exempt from CGT under certain conditions, as are gains accruing to or derived from a venture capital financing company.

A 20-year exemption that was granted on gains from the sale of securities of companies listed on the GSE and that ended in January 2011 was extended for five additional years to encourage transactions on the stock exchange and, in the long term, to make the securities market more vibrant and fluid.

Details of further exemptions can be found in the income tax laws of Ghana.

**Communications service tax (CST)**
CST of 6% is levied on charges payable by both individual and corporate users of electronic communication services (ECS) provided by service providers other than private electronic communication services. The levy is also applicable to any form of recharge and is payable once a person makes a payment for ECS regardless of whether or not that person is authorised or permitted to provide ECS under the Electronic Communication Act (Act 755). Note that the definition of electronic communication includes interconnection.

**Social security contributions**
The social security contribution scheme is structured into three tiers, with the first two requiring mandatory contributions and the last one being voluntary. The employee is required to contribute 5.5% with the employer contributing 13%. Of the total contribution of 18.5%, 13.5% is contributed to the first tier and 5% to the second tier schemes.

**Payroll taxes**
Employers are required to withhold tax (pay-as-you-earn or PAYE) on employees’ salaries and other emoluments, including benefits in kind, on a monthly basis at the graduated rates, with the highest rate at 25%, and remit it to the Ghana Revenue Authority (GRA) by the 15th day of the subsequent month. Failure to withhold the tax and remit to the GRA attracts a penalty of 20% if payment is less than three months late and 30% if payment is more than three months late.

Employers are also required to file annual returns of employees by 31 March of the year following the year to which the returns relate.

**Branch income**
The CIT rate on branch profits is the same as that on corporate profits.

However, a non-resident entity that conducts activities in Ghana through a PE is required to pay a further 10% on earned repatriated profits, payable within 30 days.
The repatriated profits are calculated as the sum of the total balance sheet value of assets, net of liabilities at the commencement of the period, plus the net profit for the period (where there is a net loss, the loss is expressed in a negative amount), minus the total balance sheet value of assets, net of liabilities at the end of the period.

**Income determination**

**Inventory valuation**
The Internal Revenue Act (IRA) 2000 (Act 592), under Section 31, provides general guidance on the principles of stock (inventory) valuation for income tax purposes. A company that accounts for tax on an accrual basis is required to account for inventory using the absorption-cost method. A company accounting for tax purposes on a cash basis may calculate the cost of stock using a prime-cost method or absorption-cost method. The closing value of inventory is valued for tax purposes at the lower of cost or market value.

**Capital gains**
Capital gains are taxed at a separate rate in Ghana. See Capital gains tax in the Other taxes section for more information.

**Dividend income**
A dividend paid to a resident company by another resident company is exempt from tax where the company receiving the dividend controls, directly or indirectly, 25% or more of the voting power in the company paying the dividend.

**Stock dividends**
The issue of stock dividends is permitted under Section 74 (1) of the Ghana Companies Code 1963, Act 179. It is, however, subject to income tax at the dividend WHT rate of 8%.

**Interest income**
Interest received by a resident company from another resident company is subject to WHT at a rate of 8%.

However, WHT does not apply on the following:

- Interest paid to an individual by a resident financial institution.
- Interest paid to an individual on bonds issued by the government of Ghana.
- Interest received by a resident financial institution.

In addition, interest of an approved unit trust scheme or mutual fund is exempt from tax.

**Exempt income**
Specific exemptions from tax include the following:

- Income of a local authority.
- Income of a statutory or registered building society.
- Income of a charitable or an educational institution.
- Income of organisations formed for the purpose of promoting social or sporting amenities.
- Income accruing from a farming enterprise, for a limited period.
- Income of a registered trade union.
- Income of rural banks, for the first ten years of operations.
- Gain or profit from the business of operating ships or aircraft by non-resident persons if an equivalent exemption is granted by the person’s country of residence to persons resident in Ghana.
- Investment income of a pension or provident society.
• Income or profit of any registered cooperative society.

**Foreign income**

Resident corporations are taxed on their foreign income as and when it is brought into or received in Ghana. Foreign income is taxed together with other income derived in Ghana, and double taxation is avoided through treaties or foreign tax credits. No special rules exist for taxing undistributed income of foreign subsidiaries.

**Deductions**

**Depreciation and depletion**

Depreciation of depreciable assets in the accounts of a business is not an allowable deduction in computing taxable profits. It is instead replaced by capital allowances at prescribed statutory rates, as follows:

<table>
<thead>
<tr>
<th>Class</th>
<th>Assets</th>
<th>Rate</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Assets pooled (allowance calculated on a reducing-balance basis). Mainly computers and data handling equipment.</td>
<td>40%</td>
</tr>
<tr>
<td>2</td>
<td>Assets pooled (allowance calculated on a reducing-balance basis). Mainly automobiles, buses, mini buses, construction and earth-moving equipment, trailers and trailer-mounted containers, plant and machinery used in manufacturing.</td>
<td>30%</td>
</tr>
<tr>
<td>3</td>
<td>Assets not pooled (allowance calculated on a straight-line basis). Mainly mining and petroleum rights assets, such as exploration and development costs, buildings, structures and works of a permanent nature, and related plant and machinery.</td>
<td>20%</td>
</tr>
<tr>
<td>4</td>
<td>Assets pooled (allowance calculated on a reducing-balance basis). Mainly railroad cars, locomotives and equipment, vessels and similar water transportation equipment, aircraft, public utility plant, equipment, office equipment and fixtures, and any other depreciable asset not elsewhere classified.</td>
<td>20%</td>
</tr>
<tr>
<td>5</td>
<td>Assets not pooled (allowance calculated on a straight-line basis). Mainly other building structures and works of a permanent nature.</td>
<td>10%</td>
</tr>
<tr>
<td>6</td>
<td>Assets not pooled (allowance calculated over the useful life of the asset). For other intangible assets.</td>
<td>Useful life</td>
</tr>
</tbody>
</table>

Allowances are granted only on the following conditions:

• The taxpayer must own the asset.
• Capital expenditure must be incurred.
• The asset must be used in the trade.
• The asset must be in use up to the end of the basis period.

Capital allowances are granted for every year in which the asset is in use. Balancing allowances and charges are made, as the case may be, on disposal of the asset.

For intangibles, such as goodwill, patents, trademarks, and copyrights, the law allows for capital allowance deduction over the useful life of the asset.

Foreign exchange losses of a capital nature may be capitalised and capital allowances granted where the loss is incurred in the production of income from a business.

**Start-up expenses and pre-operating costs**

Although the tax law does not specifically mention start-up expenses or pre-operating costs, generally a deduction is allowed for start-up and pre-operating costs incurred by a business, provided such expenses are wholly, exclusively, and necessarily incurred in the production of income of the taxpayer.
Interest expenses
Interest incurred on loans used to generate the income of a business is ordinarily deductible. However, any sum payable by way of mortgage or debenture interest by any company to a non-resident, except where tax has been deducted and accounted for, is considered non-deductible. Restrictions apply on interest payments on related loans. See Thin capitalisation in the Group taxation section.

Bad debts
A deduction is allowed for bad debts incurred in the normal course of business, other than advances made on capital accounts. A bad debt is allowed as a deduction if the taxpayer has taken all reasonable steps to pursue payment and the person reasonably believes payment will not be made.

Any amounts recovered in respect of a bad debt previously written off should be included in income and subject to tax accordingly.

An existing debt that becomes a bad debt after a 50% or more change in underlying ownership is not allowed as a bad debt deduction after the change in ownership has taken place.

Charitable contributions
The following contributions/donations are allowable as deductions in ascertaining the taxable income of a person:

• Contributions made to a charitable institution or fund approved by the government.
• Payments towards a scholarship scheme approved by the government for a technical, professional, or other course of study.
• Donations made for the purpose of any rural or urban area and approved by the government.
• Donations for the purpose of sports development approved by the government.
• Donations to the government for worthwhile government causes approved by the CG.

Fines and penalties
Fines and penalties arising as a result of non-compliance with the provisions of the tax law are generally not allowable deductions.

Taxes
Any income taxes, profit taxes, or other similar taxes are not deductible in determining taxable income.

Other significant items
No other special deductions are allowed. Principal non-deductible expenses include the following:

• Domestic or private expenses, including cost of travel between residence and place of business or employment.
• Any disbursement or expense not being wholly and exclusively paid or expended for the purpose of acquiring income.
• Capital withdrawn or any sum employed or intended to be employed as capital.
• Capital employed in improvement.
• Any sum recoverable under an insurance contract of indemnity.
• Rent of or any expense in connection with premises or a part of premises not occupied or used for the purpose of producing business income.
• Any payment to a savings or other society or fund unless specifically allowed by the tax CG.
Ghana

**Net operating losses**
Tax losses can be carried forward and deducted from assessable income for the five years immediately following the year in which the loss was incurred. This provision covers the following industries: farming and agro-processing, mining, manufacturing (mainly for export), tourism, and information communications technology (ICT) (i.e. software development).

Carryback of losses is permitted for persons deriving income relating to a long-term contract. A long-term contract of a business includes a contract for manufacture, installation, or construction that is not completed within the company’s accounting year in which it is commenced.

**Payments to foreign affiliates**
The Transfer Pricing Regulations 2012, (LI 2188) require that payments or transactions between persons in a controlled relationship are conducted at arm’s length. A transaction is conducted at arm’s length between persons in a controlled relationship if the terms of the transaction do not differ from the terms of a comparable transaction between independent persons. The CG may disregard or disallow transactions if they are deemed to be fictitious or do not have a substantial economic effect and the form does not reflect its substance.

Deductions are also not allowed in respect of amounts paid, other than towards reimbursement of actual expenses by a PE (branch company) to the head office of the non-resident person or any of its offices by way of:

- royalties, fees, or other similar payments in return for the use of patents or other rights
- commission for specific services performed or for management, or
- interest on money lent to the PE, except in the case of a banking business.

**Group taxation**
No form of combined reporting of results of operations by a group or affiliates is permitted.

**Transfer pricing**
The Transfer Pricing Regulations follow the internationally accepted guidelines published by the Organisation for Economic Co-operation and Development (OECD), only with a much broader perspective on the nature of entities and transactions.

The Regulations cover transactions between related parties, including PEs and employees, and also prescribe the transfer pricing methods and documentation that entities are required to maintain and retain.

The Regulations also require entities with related party transactions to file a return on an annual basis.

**Thin capitalisation**
Interest expenses and foreign exchange currency losses incurred by an exempt-controlled resident entity are not allowed as a deduction in arriving at the chargeable income of the entity if the entity is thinly capitalised. An exempt-controlled entity is deemed to be thinly capitalised if its exempt debt to exempt equity ratio exceeds the ratio 2:1.

A resident entity is deemed to be exempt-controlled if at least 50% of the underlying ownership or control is held by a non-resident person, either alone or together with an associate or associates.
Thin capitalisation provisions do not apply to resident financial institutions.

**Controlled foreign companies (CFCs)**
There are no provisions for CFCs in the tax laws of Ghana.

---

**Tax credits and incentives**

**Foreign tax credit**
A resident is entitled to a credit in respect to any foreign income tax paid, to the extent to which the tax paid is in respect of the resident’s foreign taxable income. The foreign tax credit available on a specific income type should not exceed the average rate of Ghanaian income tax of the resident for a year.

**Inward investment**
Under the Ghana Investments Promotion Centre Act, 2013 (Act 865), various incentives are available to encourage strategic or major investments in the country, particularly in the areas of agriculture; manufacturing industries engaged in export trade or using predominantly local raw materials or producing agricultural equipment, etc.; construction and building industries; mining; and tourism.

Incentives generally include exemption from customs import duties on plant and machinery; reduced CIT rates; more favourable investment and capital allowances on plant and machinery; reduction in the actual CIT payable, where appropriate; retention of foreign exchange earnings, where necessary; guaranteed free transfer of dividends or net profits, foreign capital, loan servicing, and fees and charges in respect of technology transfer; and guarantees against expropriation by the government.

**Capital investments**
Venture capital tax incentives include the following:

- Relief from stamp duty in each year on subscriptions for new equity shares in venture capital funds.
- Full tax exemption from CIT, dividend WHT, and CGT for five years.
- Carryforward of losses from disposal of shares during the tax-exempt period to the post-exempt period, up to five years.
- Chargeable income tax deduction equal to 100% of their investment, for financial institutions that invest in venture capital subsidiaries.

**Free zone developers/enterprises**
Companies registered to operate as free zone developers/enterprises do not pay CIT for the first ten years of operation. After the ten year corporate tax holiday has expired, the CIT rate on export outside the domestic market is 15%.

**Tax holidays**
A tax holiday is available to companies that partner with the Minister responsible for Works and Housing in the construction and sale or letting of low cost affordable residential premises and are certified as such by the Minister responsible for Works and Housing.

Tax holidays are also extended to entities in agro-processing, farming business, and for venture capital financing entities.

**Notes**

1. The lower rate applies where the recipient holds at least 10% of the shares. The higher rate applies in any other case.
2. 5% for non-resident banks. 10% in any other case.

The government of Ghana signed a DTT with Denmark (awaiting final administrative procedures to become effective) and is also pursuing DTTs with various countries, including the Czech Republic, Mauritius, Sweden, Syria, the United Arab Emirates, and the United States.
**Tax administration**

**Taxable period**
The tax year runs from 1 January to 31 December. Corporations with financial periods other than the calendar year are taxed on their financial period ending during the calendar year.

**Tax returns**
Companies are expected to submit a tax return not later than four months after the end of the financial year. They may file an application for extension of filing time for not more than two months.

**Assessments**
The CG publishes in the Gazette or print media a list of persons who are under the self-assessment scheme. Companies under the self-assessment scheme are required to make an estimate of their annual chargeable income to be derived for the year and the tax to be payable thereon. The annual tax estimated by the taxpayer is paid in quarterly instalments on or before the last day of the third, sixth, ninth, and 12th months of the period. These tax instalments are an advance payment deductible against the actual tax payable at the end of the year.

An entity that is not under the self-assessment scheme may be issued with a provisional assessment by the CG. The CG may, at the start of the year, serve a provisional assessment on a taxpayer’s chargeable income and estimated tax payable. The taxpayer is required to proceed and make advance quarterly tax instalment based on the provisional assessment.

The revenue office has, however, been gradually moving towards a self-assessment system, with some taxpayers in selected tax offices being required to go under the self-assessment regime.

The CG was also given the mandate to issue assessment to all taxpayers required to pay the National Fiscal Stabilisation Levy of 5%.

**Payment of tax**
CIT is due for payment at the same time as the due date for filing the return. Where a taxpayer is under self-assessment or is issued with a provisional assessment, the tax is payable in four equal instalments at the end of each quarter (i.e. March, June, September, and December) in each year of assessment, but such payments are not deemed to be the actual tax payable.

At the end of the year, all taxpayers are required to file final tax returns and pay any tax outstanding. The final return and tax are due within four months after the financial year-end.

There are also instances where the CG may issue an additional assessment after conduct of an audit. Where such assessment is served, the tax is payable within 30 days after service of the notice. At the discretion of the CG, the time for payment may be extended.

**Penalties**
Where tax is not paid by the due date, a penalty is assessed at 10% of the tax payable in addition to the tax unpaid up to three months after the due date; thereafter, the penalty is 20%.

**Tax audit process**
The GRA assesses taxpayers on a regular basis. The IRA gives powers to persons authorised by the CG to gain full and unlimited access to the taxpayers’ premises, records, and electronic information. Industries such as mining, upstream oil and gas,
and financial institutions are more likely to be selected for a tax audit. Also, request for a tax refund is also likely to lead to a tax audit. The GRA usually gives notice of its intention to perform a tax audit and, after performance, prepares a report on its findings, which is then shared with the taxpayer.

**Statute of limitations**
The IRA requires all taxable persons (excluding employees) to maintain records of all receipts and payments, revenue and expenditure, and all assets and liabilities of the business for a period of not less than six years. This is in conjunction with the fact that the Statute of Limitation bars actions to recover tax after 12 years. The IRA further requires withholding agents to maintain records of payments made to a payee and tax withheld from those payments for up to five years.

**Topics of focus for tax authorities**
Topics of focus for the tax authorities include:

- Tax refunds.
- CST.
- Transfer pricing sensitisation of taxpayers.
- NFSL.

**Other issues**

**Local Content and Local Participation Regulations**
The Minerals and Mining General Regulations 2012 (LI 2173) applicable to mining entities obligate mining contractors and sub-contractors to conform to the requirements for recruitment of expatriates, train Ghanaians, and give preference to local products and services in their operations.

On 19 November 2013, Parliament passed the Petroleum (Local Content and Local Participation) Regulations, 2013 (LI 2204). The Regulations aim at providing a transparent monitoring system to meet the objectives of the government's Local Content Policy. Further, the Regulations are expected to help facilitate job creation through the use of local expertise for goods and services, business, and financing in the petroleum industry value chain.

**Ring fencing for mining entities**
In determining the chargeable income for a basis period, mining companies are no longer able to deduct expenses incurred in one mining area against revenue from another mining area.
**Gibraltar**

**Significant developments**

On 16 October 2013, the European Commission announced that it had opened a formal state aid investigation procedure in order to investigate certain aspects of Gibraltar’s Income Tax Act 2010 (the Act).

The investigation originated from a complaint filed by the Spanish government with the European Commission on 1 June 2012 where it is alleged that the Act constitutes state aid for two reasons. The first claim is that the Act was state aid in favour of an alleged offshore sector through the combined effect of the application of the territorial system of taxation and the exemption from tax of passive income. The second claim is that the Gibraltar corporate tax system was regionally selective in that it differs from, and is more favourable than, the corporate tax system applied in the United Kingdom.

The European Commission does not call into question the territorial system of taxation, which is the reference system of corporate taxation under the Act and which has been in operation in Gibraltar since the 1950s. This is an important issue for Gibraltar because its entire corporate tax system has been underpinned by the territorial system since inception. The European Commission has also categorically rejected Spain’s argument that the corporate tax system in Gibraltar is regionally selective. This is significant as it is the first time ever that the European Commission has officially and formally stated its opinion on the critical issue of regional selectivity and Gibraltar since the European Court judgments under the previous tax regime.

The Commission’s preliminary assessment is that the tax exemption for passive interest and royalty income under the Act may have involved state aid because it departed from the general corporation tax system for the reason that it could grant a special advantage to the particular group of companies that produce this type of income. Unlike dividends, the exemption of which can be justified by the need to avoid double taxation, the Commission found no valid justification for the exemption of interest or royalty income.

Gibraltar introduced an amendment to the Act that, as of 1 July 2013, repealed the exemption for interest receivable, so that a company is now taxable where the interest exceeds 100,000 British pounds (GBP) per year whether it is received from Gibraltar or abroad. Following this amendment, the Act was endorsed by both the European Council of Economic and Finance Ministers of the 27 European Union (EU) Member States (ECOFIN) and the Code Group as being compliant with the EU Code of Conduct for Business Taxation. As a result of this, the Commission has acknowledged that the necessary legislative actions have been taken to rectify this concern from this point onwards. The Commission’s investigation on interest receivable is therefore only concerned with the limited period between 1 January 2011 and 1 July 2013.

The Commission also considered the non-taxation of interest where the amount received does not exceed GBP 100,000 and has decided that such an exemption is regarded as a legitimate simplification measure.
An amendment to the Act was also passed so that, with effect from 1 January 2014, royalty income received or receivable by a Gibraltar company is taxable at the standard corporate income tax (CIT) rate.

On 1 October 2014, the Commission announced that it will extend the on-going state aid investigation to include an examination of the Gibraltar tax rulings practice.

The Commission estimates that the rulings may contain state aid because none of them are based on sufficient information so as to ensure that the level of taxation of the activities concerned is in line with the tax paid by other companies that generate income that is considered to be accrued in or derived from Gibraltar.

The Gibraltar government, in an official press release, have confirmed that they are vigorously contesting this allegation.

If the Commission were to decide that unlawful state aid had been granted, it will order recovery of the aid from the beneficiaries, unless such a recovery would be contrary to the general principle of the EU law.

**Taxes on corporate income**

Companies are subject to Gibraltar taxation on income accrued in and derived from Gibraltar.

The standard CIT rate is 10%, with utility and energy providers and companies that abuse a dominant position paying a higher rate of 20%.

**Corporate residence**

A company will be considered resident in Gibraltar if the management and control of its business is exercised from Gibraltar or from outside Gibraltar by persons who are ordinarily tax resident in Gibraltar.

The location of central management and control will be established under legal principles laid down in the United Kingdom (UK) and is the place of the highest form of control and direction over a company’s affairs, as opposed to decisions on the day-to-day running of the business.

**Permanent establishment (PE)**

Gibraltar has not entered into any double tax treaties (DTTs); consequently, there are no provisions on PE from a general treaty perspective.

**Other taxes**

**Value-added tax (VAT)**

There is no VAT in Gibraltar.

**Import duties**

Goods imported into Gibraltar are subject to import duty at the rate of 0% to 12%. The most noticeable exceptions are fuel, tobacco, and alcohol, which are subject to a fixed amount of duty regardless of the value, and motor vehicles, which attract duty at various rates of between 2% and 35% of the value, depending on the type and size of engine and whether it is a private or dealer importation.
Excise taxes
There is no provision for excise taxes in Gibraltar.

Property tax
A general business property rate is levied annually on all businesses in Gibraltar. The amount varies depending on the property and is subject to an annual review.

Stamp duty
Stamp duty is payable on the transfer or sale of any Gibraltar real estate or shares in a company owning Gibraltar real estate (on an amount based on the market value of said real estate) at the following rates:

- GBP 200,000 or less: 0%.
- Between GBP 200,001 and GBP 350,000: 2% on the first GBP 250,000 and 5.5% on the balance.
- Over GBP 350,000: 3% on the first GBP 350,000 and 3.5% on the balance.

Stamp duty is also payable on mortgages secured on Gibraltar real estate at the rate of 0.13% for mortgages less than GBP 200,000 and 0.20% for mortgages over GBP 200,000.

Gaming tax
Gaming tax is levied at 1% of the gaming income. The tax paid is subject to a minimum of GBP 85,000 and maximum of GBP 425,000.

Capital duty
Capital duty of GBP 10 is payable on the initial authorisation of share capital or any subsequent increase thereto.

Social insurance contributions
Social insurance contributions are payable by every employer in respect of every employee.

Employer contributions are 20% of gross earnings, subject to a minimum of GBP 15 per week (GBP 65 per month) and a maximum of GBP 32.97 per week (GBP 142.87 per month).

Payroll taxes
Collection of employee taxes is initially effected under a pay-as-you-earn (PAYE) system. Employers are required to operate the system without exception, to keep appropriate records and complete the necessary filings.

The PAYE regulations require each employee to obtain from the Commissioner of Income Tax a PAYE allowances certificate, which allocates a code to the employee. The employer is required to use tax tables issued by the Income Tax Office to calculate and deduct tax from emoluments in accordance with the employee’s applicable code. The employer is then obligated to pay over to the Commissioner any tax so deducted by the 15th day of the following month.

An employer must also account for social insurance payments in a similar manner, deducting and paying over the employee tax as well as accounting for employer’s social insurance.

Branch income
The basis for taxation of branches of foreign enterprises is the same as for corporations.
Allowable head office charges or expenses incurred by a Gibraltar branch for the common purpose of the company and its branches, or for the purpose of the head office or another branch exclusively, are limited to 5% of turnover of the Gibraltar branch (see Payments to foreign affiliates in the Deductions section).

**Income determination**

Generally, companies are subject to Gibraltar taxation on income accrued in and derived from Gibraltar.

**Inventory valuation**

Inventory is valued at the lower of historical cost or net realisable value. A first in first out (FIFO) basis of determining cost where items cannot be identified is acceptable, but not the base-stock or the last in first out (LIFO) method.

**Capital gains**

Capital gains are not subject to tax in Gibraltar.

**Dividend income**

There is no charge to tax on the receipt by a Gibraltar company of dividends from any other company.

**Interest income**

Companies with a banking or money lending licence and earning interest as a trading receipt will have that interest treated as income chargeable to tax. Interest received or receivable by a Gibraltar company arising from an inter-company loan will be chargeable to tax at the standard CIT rate. Where the interest received or receivable is less than GBP 100,000 per annum, the interest is exempt from any charge to taxation. All other interest received or receivable is not taxable in Gibraltar.

**Royalty income**

Income from royalties received or receivable by a Gibraltar company is taxable at the standard CIT rate.

**Foreign income**

Foreign income is not normally taxed in Gibraltar.

**Deductions**

For the purpose of ascertaining assessable income, all expenses wholly and exclusively incurred in the production of income shall be deducted.

**Capital allowances**

The first GBP 30,000 of qualifying expenditure on plant and machinery (including fixtures and fittings) and the first GBP 50,000 of qualifying expenditure on computer equipment is fully deductible in the first year as a ‘first year allowance’.

Thereafter, qualifying assets are pooled and are subject to an annual capital, or wear and tear, allowance. Allowances are available for plant and machinery (including fixtures and fittings), computer equipment, and motor vehicles at the rate of 15% (20% for companies that are obligated to pay the higher CIT rate, see the Taxes on corporate income section) and are calculated on a reducing balance basis.
Capital allowances for industrial buildings are deductible at the rate of 4% per annum on a straight-line basis.

**Goodwill**
Amortisation of goodwill is not a deductible expense.

**Start-up expenses**
Expenditure incurred with a view to carrying on a trade is treated as incurred on the first day on which the trade is carried on for the purposes of computing the profits or gains of the trade.

**Interest expenses**
Full deduction is available in respect of interest expenses, subject to anti-avoidance rules (see the Group taxation section for more information).

**Bad debt**
Only specific bad debts or specific bad debt provisions are deductible to the extent that they are respectively estimated to be bad during the said period, notwithstanding that such bad debts were payable prior to the commencement of the period. General doubtful debt provisions are not an allowable expense.

**Charitable contributions**
A charitable donation is not considered as having been wholly and exclusively expended for the purposes of the production of the income of the trade and is therefore not allowable as a deduction for tax purposes.

**Fines and penalties**
Fines and penalties, including those resulting from late payment of taxation or from failure to make the necessary tax submissions, are deemed to be a tax and are therefore not a deductible expense.

**Taxes**
No deduction is allowed for any tax charges under the Income Tax Act.

**Other significant items**
Additionally, no deduction is allowed in respect of the following:

- Domestic or private expenses.
- Expenses not incurred wholly and exclusively in the generation of income.
- Any expenses of a capital nature.
- Any sum recoverable under an insurance contract or contract of indemnity.
- Property expenses not incurred for the purposes of producing income.
- Depreciation of assets (although capital allowances are available, see above).
- Employee remuneration not accompanied by a certified statement of name, address, and amount of remuneration (in respect of Gibraltar employment only).
- Certain business entertainment expenditure falling within guidelines published by the Commissioner.
- Interest paid to a non-Gibraltar resident that is more than a reasonable commercial rate.

In the case of a company that has income, some of which is chargeable to tax and some of which is not, the deductions allowed shall be apportioned on a pro-rata basis between the chargeable and non-chargeable income.

**Net operating losses**
A trading loss incurred in an accounting period may be offset against trading income arising in the same period or subsequent period, provided that within a period of three
Gibraltar

years there has not been both a change in the ownership of the company and a major
change in the nature or conduct of the trade.

There is no provision for the carrying back of losses.

**Payments to foreign affiliates**
In the case of branches, the amount of general head office expenses incurred that is
deductible is limited to 5% of its turnover.

The Income Tax Act 2010 includes anti-avoidance provisions. These provisions state
that if the amount charged for goods or services by a connected person is not at ‘arm’s
length’, then the expenses that are allowed are subject to the lower of:

- the expense
- 5% of the gross turnover of the company, or
- 75% of the pre-expense net profit of the company.

**Group taxation**
Companies are assessed on an individual basis, and trading losses of group members
may not be offset against profits of other members of the group.

The Income Tax Act contains a generic anti-avoidance clause that allows the
Commissioner to disregard an arrangement that the Commissioner believes is fictitious
or artificial. In addition, it includes the following specific anti-avoidance measures.

Where a taxpayer seeks to reduce their liability to tax by creating an artificial split
between activities in Gibraltar and outside of Gibraltar, the Commissioner shall use anti-
avoidance provisions to defeat such an attempt.

**Transfer pricing**
The amount of interest payments to connected persons that are in excess of that payable
at arm’s length will be deemed to be a dividend. Where the amount charged for goods
and services by connected persons is not at arm’s length, this will be disallowed as a
taxable expense. Any expenses allowed will be subject to the lesser of (i) the expense,
(ii) 5% of the gross turnover of the company, and (iii) 75% of the pre-expense profit of
the company.

**Thin capitalisation**
Interest paid on a loan to related parties that are not companies (or loans where security
is provided by related parties) where the ratio of the value of the loan capital to the
equity of the company exceeds 5:1 will be considered as dividend payments and thus not
deductible for tax purposes. This provision is not applicable to Gibraltar banks or money
lenders.

**Back-to-back loans**
Since interest income is not taxable on back-to-back loans, the interest expense is not
deductible.

**Dual employment**
Income from dual employment contracts is taxed in Gibraltar if both employers are
connected persons.

**Transfer of assets abroad**
Where assets are transferred abroad with the purpose of avoiding tax and the taxpayer
has the power to enjoy these assets either now or in the future, then any income or
benefits received from these assets will be deemed to be income chargeable to tax.
**Controlled foreign companies (CFCs)**

There are no CFC rules in Gibraltar. However, under the general anti-avoidance rules, the Commissioner may disregard any CFC or transaction with such a CFC where the Commissioner believes that it is fictitious or artificial.

---

**Tax credits and incentives**

**Development aid**

In order to encourage private development in Gibraltar, promoters and developers of approved projects are offered certain incentives, such as tax relief, import duty relief, and rates relief.

In order to qualify for the above reliefs, the project needs to be a new project that is for the economic benefit of Gibraltar and the aim of which is:

- to create a tangible immovable asset in Gibraltar that will remain in existence after the applicant has ceased to derive the benefits under the licence
- to provide more than two additional units of housing accommodation in Gibraltar
- to contribute materially to the development of the tourism industry in Gibraltar
- to afford any new employment opportunities or career prospects in Gibraltar, or
- to materially improve the economic or financial infrastructure of Gibraltar.

The project needs to be completed within a specified time (dependent on the type of project) following the issue of the licence, and the applicant must not expend less than the prescribed amount for the project.

Applications for development aid must be made to the Minister for Trade.

**Deduction of approved expenditure on premises**

For taxpayers with an interest in a building situated in Gibraltar, an allowance is available for approved expenditure on the painting, decorating, repair, or enhancement of the frontage of that building.

The approved amount will be available as a deduction against the taxpayer’s income. This deduction is in addition to any deduction, relief, or allowance given in accordance with any other provision of the Income Tax Act in respect of the same expenditure.

The claim for the deduction must be made within two years after the end of the year of assessment with respect to which the deduction is claimed.

**Commercial property rate incentives**

There are early payment discounts available on property rates, depending on the business conducted from the premises.

---

**Withholding taxes**

There are no withholding taxes (WHTs) in Gibraltar, except in the following cases:

- Payments to subcontractors in the construction industry. Unless the subcontractor is in possession of an exemption certificate, tax is withheld at the rate of 25% of the amount that relates to the labour and profit element of the contract.
- Payments to employees under the Pay As You Earn (PAYE) system. Under the PAYE regulations, employers are obligated to deduct an amount of tax in accordance with the employee’s tax code.
**Tax administration**

**Taxable period**
The taxable period is the accounting period of the company, which begins on the later of the beginning of the accounting period and the date when the company first receives a source of taxable income and ends on the earlier of the end of the accounting period, 12 months from the beginning of the accounting period, or the date on which trade ceased.

**Tax returns**
Companies with income subject to tax in Gibraltar are required to file a return and calculate their tax liability for the year. The return, together with the estimated liability, needs to be accompanied by payment of the tax due nine months after the date of the company’s financial year end.

Companies with turnover of less than GBP 1 million are obligated to file accounts accompanied by an Independent Accountant’s Report together with the tax return.

Companies with turnover of GBP 1 million or more are required to file audited accounts together with the tax return.

**Payment of tax**
Companies are required to make payments on account of future liabilities on 28 February and 30 September in each calendar year. Each payment should be equal to 50% of the tax based on the previous year’s tax liability.

The balance of tax due (i.e. the actual liability less payments on account) is payable on the date of filing of the return.

**Penalties and fines**
The following penalties and fines are applicable:

- For the late payment of tax, there is a penalty of 10% of the amount of tax due on the day immediately after such payment was due. If unpaid for 90 days, a further amount of 20% of the tax due is charged; and if still unpaid after this period, then a 10% per annum surcharge will be added, which is compounded on a daily basis until the amount of the tax and penalties are fully paid.
- Failure to file a return by the due date will result in a penalty of GBP 50 with a further penalty of GBP 300 if the return is not submitted within three months after the due date.
- Failure to respond to a notice or request to submit information or documentation will result in a fine of GBP 200 on the day the failure occurs and a penalty of up to GBP 500 per day thereafter. Failure to comply beyond a three month period, if convicted, can result in imprisonment.
- For fraudulently, recklessly, or negligently delivering to the Commissioner an incorrect return, accounts, or information, there is a fine of up to 150% of the difference between the actual tax due and the tax due as per the original declaration. The amount of the penalty will depend on:
  - the amount of the tax lost and/or delayed
  - the gravity of the offence (i.e. if deliberate or an honest mistake), and
  - the level of cooperation in the investigation.
- Failure to pay to the Commissioner PAYE or social insurance that has been withheld or should have been withheld will become a criminal offence leading to imprisonment and/or a fine.
- If an amount of PAYE and/or social insurance exceeding GBP 5,000 is outstanding for over three months, the Commissioner will, after giving 14 days notice, publish in the Gibraltar Gazette the name of the person whom the Commissioner has reason to believe has failed to comply with the PAYE regulations.
• Failure to notify the Commissioner of an arrangement, the main benefit of which is to avoid the payment of tax, will result in a fine of GBP 100 on the day the failure occurs and a penalty of GBP 200 per day thereafter.

**Tax audit process**
The Gibraltar tax system is based on self-assessment. However, the Income Tax Office has powers to make an enquiry into the tax return of a company within a period of 12 months from the date when the return is due to be filed or, if filed later than the deadline, 12 months from the date it was filed. If the Commissioner of Income Tax believes a return to be fraudulent, the above time limits will not apply.

A taxpayer may appeal against a disputed assessment by notice in writing addressed to the Commissioner within 28 days of the date of service of the notice of the assessment.

**Statute of limitations**
The Commissioner has up to six years following the date of assessment to revise any incorrect assessments. There is no limit where the incorrect assessment is as a result of fraud, wilful default, or neglect.

**Topics of focus for tax authorities**
There are currently no particular topics of focus for the tax authorities.

**Other issues**

**Intergovernmental agreements (IGAs)**
Gibraltar has entered into Model 1 IGA reciprocal agreements with both the United States (US) and United Kingdom. The Gibraltar/UK agreement was signed 21 November 2013 and the Gibraltar/US agreement was signed 8 May 2014. Legislation is still in draft form.

Information will be exchanged by the Competent Authorities nine months after the year end. The first due date for exchange is 30 September 2016 for the years ended 31 December 2015 and 2014 for UK reportable accounts and 30 September 2015 for the year ended 31 December 2014 for US reportable accounts.
**Significant developments**

Pursuant to a major tax reform, applicable from 1 January 2014 onwards, the Greek corporate income taxation (CIT) regime has been significantly amended. The new Income Tax Code (ITC) introduced significant and far-reaching changes, governed by a different philosophy, namely the establishment of general principles and the direction towards a substance over form approach, creating legal uncertainties as to the interpretation and practical application of specific provisions. During the course of the year, several Ministerial Decisions have been issued by the Ministry of Finance, providing valuable clarifications as to the application of the new regime.

Additionally, pursuant to a recently enacted provision, procedural restrictions for the deductibility of expenses have been introduced. Specifically, the deductibility of certain expenses is contingent on the payment of a withholding tax (WHT) at a tax rate equal to the CIT rate (i.e. 26%). Said WHT shall be refunded if the taxpayer demonstrates that the transaction is ordinary and effected at market prices within three months from the time that the transaction took place. Although the purpose of this provision is to combat tax evasion and tax avoidance, the way the provision has been drafted seems to cover all transactions, even ordinary ones. In this respect, a draft Ministerial Decision on the procedure has been published by the Ministry of Finance and put forward to a public consultation, which limits substantially the scope of application. Although still in draft form, the draft Ministerial Decision provides for a number of exemptions from the application of said provision, such as for transactions between Greek companies as well as between related companies, and introduces an automatic pre-approval procedure following an electronic notification of certain transactions.

**Taxes on corporate income**

The CIT rate of legal entities is set at 26%.

Resident corporations are taxed on their worldwide income. Non-resident corporations are taxed in Greece on any Greek-source income they derive.

**Shipping companies**

The Greek tonnage tax regime model intends to tax shipping activity and applies to Greek or foreign ship-owning companies with vessels flying a Greek flag and foreign ship-owning companies with vessels flying a foreign flag that maintain a ship management company in Greece that is exclusively engaged in ship management activities. The Greek tonnage tax regime applies to vessels of ‘A’ and ‘B’ category that are either flying a Greek or foreign flag. In the case of vessels flying a foreign flag, the foreign ship-owning company should maintain a ship management office in Greece. Category ‘A’ vessels include cargo vessels, tankers, steel hull vessels for dry or liquid cargo that ply/to between foreign ports, passenger vessels, drilling platforms, etc. Category ‘B’ vessels include small boats and any other motor vessels not listed under category ‘A’.
The gross tonnage is calculated by multiplying coefficient rates by each scale of gross registered tonnage. This taxable tonnage is then multiplied by an age corrected rate.

Various exemptions/reductions of the tonnage tax apply, such as:

- Vessels built in shipyards in Greece, under a Greek flag, are exempt from tax for the first six years.
- 50% reduction for vessels operating regular routes between Greek/foreign ports or solely between foreign ports.

The tonnage tax exhausts the tax liability of the owner, and, if the owner is a company, this extends to its shareholders. Tonnage tax also exhausts the tax liability in relation to operating profits and capital gains arising out of the sale of the vessel flying the Greek flag. Tonnage tax also exhausts the tax liability of the foreign owner ship company flying a vessel under a foreign flag managed by a ship management company in Greece, as well as of the shareholders thereof. No CIT or dividend WHT is levied on shipping profits.

This tax burdens the ship owners or ship-owning companies, while the ship management companies are jointly and severally liable for the payment thereof.

An obligation of the liable parties for submitting before the Ministry of Mercantile Marine an annual statement indicating the name, flag, total tonnage, and age of the vessel under the foreign flag is established.

For calculating the tonnage tax (tax rates and tax brackets, criteria) and the special tax return and payment of tax, the provisions on the tonnage tax payable for Greek flagged vessels apply in analogy. A credit for the tonnage tax paid abroad is provided.

**Annual financial contribution for ship-owning companies**

Under the previously applicable legislation, an annual financial contribution for the years 2014, 2015, and 2016 was imposed on ship-owning companies with vessels flying a Greek or foreign flag, provided that the management of said vessels is performed by a ship management company established in Greece according to article 25 of L.27/1975.

The annual financial contribution was equal to double the final amount of tonnage tax payable according to articles 1 and 26 of L.27/1975, without calculating the deductions or reductions of article 5 and 26 par 1 and 5 of L.27/1975. As of October 2014, and pursuant to a bilateral agreement between the Greek State and the Maritime Community (as ratified by article 42 of L. 4301/2014), the abovementioned annual financial contribution has been abolished and replaced by a voluntary financial contribution.

**Annual contribution imposed on foreign ship management companies**

An annual contribution (referring only to fiscal years 2012 through 2015) is imposed on offices or branches of foreign enterprises that have been established in Greece by virtue of Article 25 of L.27/1975 and that are engaged in the chartering, insurance, average (damage) settlements, purchase, chartering or shipbuilding brokerage, or chartering of insurance of ships under Greek or foreign flag of total tonnage over 500 shipping tons, as well as the representation of ship owner companies or undertakings, whose object is identical to the abovementioned activities.

Greek and foreign companies of L.27/1975 that are engaged in the management of vessels flying a Greek or foreign flag (that are subject to tonnage tax), as well as in other activities approved by the license of operation, are exempt. Passenger coastal ships or merchant vessels that perform internal routes are exempt.

This contribution is imposed on the total amount of imported foreign exchange, calculated on a minimum 50,000 United States dollars (USD), and is calculated on the following tax scale:
Greece

<table>
<thead>
<tr>
<th>Bracket of annual total foreign exchange (USD)</th>
<th>Tax per bracket Rate (%)</th>
<th>Tax per bracket (USD)</th>
<th>Total foreign exchange (USD)</th>
<th>Total tax (USD)</th>
</tr>
</thead>
<tbody>
<tr>
<td>200,000</td>
<td>5</td>
<td>10,000</td>
<td>200,000</td>
<td>10,000</td>
</tr>
<tr>
<td>200,000</td>
<td>4</td>
<td>8,000</td>
<td>400,000</td>
<td>18,000</td>
</tr>
<tr>
<td>Excess amount</td>
<td>3</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

A special tax return for calculating the contribution on the basis of the imported foreign exchange of the previous year should be filed within March of each year. Upon filing of said tax return, one-quarter of the annual contribution is payable. The remaining contribution is paid in three instalments (June, September, and December).

The distribution of profits by a foreign ship-owning company maintaining an office or branch in Greece by virtue of Article 25 of L.27/1975 that is exclusively engaged in the chartering, insurance, brokerage, etc. of vessels to Greek individual tax residents is subject to tax at a rate of 10%.

This tax applies to dividends paid or credited and shall be rendered to the Greek State by the beneficiary of the dividend.

The 10% tax also applies to cases of distributions of profits by the abovementioned companies in the form of extraordinary fees and percentages (bonus) to Board of Directors (BoD) members, directors, and officials, in addition to the regular remuneration, exhausting the tax liability of the beneficiaries for said income.

**Local/state/provincial tax rates**

No local taxes on income are paid at a local level. However, it should be noted that the aforementioned rates are reduced by 40% for profits of companies derived from activities carried out on islands with less than 3,100 inhabitants.

**Corporate residence**

A legal entity or other entity is considered as tax resident in Greece if one of the following conditions is met:

- It has been incorporated or established according to the Greek legislation.
- It has its registered seat in Greece.
- The place of effective management is located in Greece.

The determination by the tax authorities that the effective management of a legal entity is exercised in Greece is made on the basis of the actual facts and circumstances of each case and by taking into account mainly the place of exercising the day-to-day management, the place of making strategic decisions, the place where the annual general meeting of shareholders or partners is held, the place where the books and records are kept, the place where the meeting of the members of the Board of Directors or other executive management board takes place, and the residence of the members of the Board of Directors or other executive management board. The residence of the majority of the shareholders or partners may also be taken into consideration.

For determining a legal entity as being tax resident in Greece, the exercise of effective management in Greece for any period during the tax year is sufficient.

Companies that are established and operate according to L.27/1975 ‘on the taxation of vessels [etc.]’ and L.D. 2687/1954 ‘on the investment and protection of foreign capital’ are explicitly excluded from the application of these new provisions on tax residence.
**Permanent establishment (PE)**

The definition of a PE of foreign legal entities in Greece is similar to the one included in the Organisation for Economic Co-operation and Development (OECD) Model Convention on the Double Tax Treaties (DTTs) for the Avoidance of Double Taxation; however, where a DTT applies, its provision will override the domestic definition.

The term ‘permanent establishment’ includes especially:

- A place of management.
- A branch.
- An office.
- A factory.
- A workshop.
- A mine, an oil or gas well, a quarry, or any other place of extraction of natural resources.

In order for a construction site in Greece to constitute a PE, a time period of at least three months is required, instead of the time period of 12 months provided in the OECD Model Convention.

A distinction applies between the cases of maintaining a PE through a dependent agent and not maintaining a PE when performing activities through an independent agent (e.g. broker, general commission agent).

**Value-added tax (VAT)**

The standard VAT rate is 23%. The reduced rate on basic necessities is 13%. A super reduced rate of 6.5% for accommodation in hotels or similar establishments (including holiday accommodation and letting of places in camping or caravan sites), medicines of CN3003 and 3004, and vaccines of CN3002 intended for human consumption is applicable. The aforementioned rate is also applicable for children’s books, colouring, and drawing books.

Supplies of goods and services to individuals and legal entities subject to VAT and established in European Union (EU) countries (intra-Community supplies) are exempt from VAT (zero rated). Exports of goods and certain services to non-EU countries are also exempt (zero rated).

With the following exceptions, real estate leases are generally exempt from VAT. Lease contracts for shopping centres and logistics centres may be subject to VAT on the condition that the taxable person opts for the submission to taxation of the leasing right. Additionally, a right to elect to subject leases of property used for the exercise of professional activities, either independently or as part of mixed contracts, to VAT applies.

**Customs duties**

Many goods imported into Greece from outside the European Union are subject to customs duties. The rates of duty are provided by the EU’s Common Customs Tariff.

**Excise taxes**

Excise taxes are imposed on energy and electricity products (e.g. petrol, natural gas, electricity), manufactured tobacco, and alcoholic products. The tax rates vary depending on the category of products.
**Uniform Tax on the Ownership of Real Estate Property (ENFIA)**

The ownership of real estate property/property rights in Greece is subject to the ENFIA, which consists of a principal tax imposed on each real estate property and a supplementary tax imposed on the total value of the property rights on real estate property of the taxpayer subject to tax.

More specifically, said tax is not imposed on the objective value of real estate property, but is determined on the basis of various factors, according to the final registration of the property at the land registry or ownership title.

The principal tax on buildings is calculated by multiplying the square metres of the building by the principal tax ranging from 2 euros (EUR) to EUR 13 per square metre and other coefficients affecting the value of the property (e.g. location, use).

The principal tax on land is calculated by multiplying the square metres of the land by the principal tax ranging from EUR 0.003 to EUR 9 per square metre and other coefficients affecting the value of the property (e.g. location, use).

The supplementary tax is imposed on the total value of the rights to property at a rate 5‰, with the exception of property that is self-used by the legal entity.

**Real estate transfer tax**

Each transfer of real estate, which is not subject to VAT, is subject to real estate transfer tax. The real estate transfer tax is imposed at a rate of 3% on the taxable value of the property.

**Stamp taxes**

Rentals of non-residential properties are subject to 3.6% stamp duty (with the exception of shopping centres and logistics centres subject to VAT).

In general, loans and interest may be subject to a 2.4% stamp duty. However, there are a number of exemptions, the main one covering bank loans and bond issues.

Other stamp duties may apply, in certain limited cases.

**Contribution tax on capital accumulation following incorporation**

A 1% tax contribution is imposed on capital accumulation (share capital increase) by:

- business companies and joint ventures
- associations of all degrees and any other form of company, legal entity, or union of persons or society aiming to make profits, and
- branches of foreign companies (unless of EU origin).

For Greek Societe Anonyme (SA) companies, an additional 0.1% duty is payable on capital to the competition committee.

The capital concentration tax is no longer imposed upon the incorporation/establishment of legal entities.

**Social security contributions**

Social security contributions are due on salary and benefits in cash or in kind granted by an employer to its employees, with the exception of specifically enumerated extraordinary benefits of social character (e.g. marriage gifts, birth gifts). The imposition of social security contributions depends on the social security fund in which the employee is registered.

For the primary social security fund (IKA), social security contributions are withheld at 15.50% at the level of the employee and contributed at 24.56% at the level of the
employer. The monthly social security contribution cap for the IKA is currently set at EUR 5,543.55.

**Payroll taxes**

Employers are liable to submit payroll withholding taxes on monthly salary payments (following the grossing-up to the yearly salary) at the following tax scale:

<table>
<thead>
<tr>
<th>Taxable income (EUR)</th>
<th>Tax rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Less than 25,000</td>
<td>22</td>
</tr>
<tr>
<td>25,001 to 42,000</td>
<td>32</td>
</tr>
<tr>
<td>Greater than 42,000</td>
<td>42</td>
</tr>
</tbody>
</table>

Reductions may apply depending on the amount of the annual taxable income received by individual taxpayers.

Additionally, for the tax years 2015 and 2016, employers shall submit withholding of the special solidarity contribution on the salary payment at the following rates:

- From EUR 12,001.00 to EUR 20,000.99: 0.7%.
- From EUR 20,001.00 to EUR 50,000.99: 1.4%.
- From EUR 50,001.00 to EUR 100,000.99: 2.1%.
- Exceeding EUR 100,001.00: 2.8%.

Benefits in kind are, in principle, subject to payroll withholding taxes. However, as regards benefits in kind as of 1 January 2015, and to the extent that it is difficult to proceed to an evaluation of such benefits at the time of their granting, no employment withholdings should be effected thereon, but their value (assuming such benefits are taxable) shall be added to the employment income of the beneficiaries and be taxed upon the clearance of the annual income tax return filed by the employees.

**Branch income**

Profits of branches of foreign companies are subject to CIT at a rate of 26%.

**Income determination**

**Inventory valuation**

Inventories are stated at the lower of cost or market (replacement value). The Greek tax system recognises various valuation methods such as first in first out (FIFO), last in first out (LIFO), weighted average, etc.

**Capital gains**

In general, capital gains are included in the taxable profits of Greek companies.

The income derived from the goodwill arising upon the transfer of Greek government bonds or Greek treasury bills that are acquired by legal entities that do not qualify as Greek tax residents and do not maintain a PE in Greece is tax exempt.

**Capital gains tax on sale of listed shares**

Capital gains derived from the sale of listed and non-listed shares are considered business income taxable at the CIT rate of 26%.

Capital gains derived from the sale of listed and non-listed shares by foreign legal entities that are tax resident abroad shall be taxable in Greece only if maintaining a PE in Greece.
Greece

The sale of listed shares is also subject to a transaction duty at a rate of 0.2%.

**Dividend income**

Dividend income is generally taxable. For subsidiaries established in third countries, any dividend WHT that may have been paid is credited against the Greek CIT payable (up to the amount of tax that would arise in Greece).

However, a tax exemption of intra-group dividends received by Greek tax resident legal entities or PEs of foreign legal entities in Greece applies, provided that:

- the legal entity distributing the profits is included in the forms enumerated in Annex I, Part A of Directive 2011/96/EE, as in force
- the legal entity distributing the profits is tax resident in an EU member state and is not considered as tax resident in a third country in application of the provisions of a DTT concluded with such third country
- the legal entity distributing the profits is subject to one of the taxes listed in Annex I, Part II of Directive 2011/96/EE or any other tax substituting one of those taxes
- the recipient taxpayer holds at least a minimum participation of 10% of the value or the quantity of the share or principal capital or voting rights of the distributing legal entity, and
- the minimum participation percentage is held for at least 24 months (although the exemption may be provided prior to the completion of 24 months secured by a guarantee).

In case of further distribution of the reserve formed by tax exempt dividends received from Greek or foreign subsidiaries established in an EU member state, said amount shall not be included in the taxable income of the legal entity proceeding to said distribution, but may be subject to dividend WHT.

Should the aforementioned tax exemption of intra-group dividends not apply, any underlying CIT and dividend WHT that may have been paid by a Greek or foreign subsidiary established in an EU member state are credited against the Greek CIT payable (up to the amount of tax that would arise in Greece).

**Stock dividends**

Stock dividends are treated as cash dividends for CIT purposes.

**Interest income**

Interest income is generally taxable.

**Partnership income**

Both general partnerships (Omorrythmi Etairia or OE) and limited partnerships (Eterrorythmi Etairia or EE) are not tax transparent. They are generally taxed according to a progressive income tax scale with two income brackets, taxable at a rate of 26% for income up to EUR 50,000 and 33% for any exceeding amount, provided that single entry accounting books are kept. In cases where double entry accounting books are kept, partnerships are taxed at the CIT rate of 26%.

**Rents/royalties income**

Income derived from rents and royalties is taxed as ordinary income.

**Foreign income**

Resident corporations are taxed on their worldwide income. Foreign income received by a domestic corporation is taxed together with other income. If related income tax is paid or withheld abroad, a tax credit is generally available up to the amount of the applicable Greek income tax.
Losses from foreign sources may not be set off against profits generated in Greece. Exceptionally, losses from foreign sources may be set off with profits arising in other EU or European Economic Area (EEA) member states, provided that they are not exempt on the basis of the DTT concluded and applied by Greece.

**Deductions**

**Depreciation**
Mandatory depreciation on a fixed annual basis applies by using fixed depreciation rates stipulated in the law. The transfer of depreciated amounts between fiscal years is not permitted.

The rates of depreciation are determined on the basis of the following table:

<table>
<thead>
<tr>
<th>Category of assets of the enterprise</th>
<th>Rate of depreciation per tax year (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Buildings, installations, facilities, industrial and special installations, non-building facilities,</td>
<td>4</td>
</tr>
<tr>
<td>warehouses, and stations, including their annexes (and special loading and unloading vehicles)</td>
<td></td>
</tr>
<tr>
<td>Plots of land used for mining and quarries, unless used for ancillary mining activities</td>
<td>5</td>
</tr>
<tr>
<td>Public means of transportation, including airplanes, trains, vessels, and ships</td>
<td>5</td>
</tr>
<tr>
<td>Machinery and equipment (aside from personal computers and software)</td>
<td>10</td>
</tr>
<tr>
<td>Means of transportation of individuals</td>
<td>16</td>
</tr>
<tr>
<td>Means of transportation of goods (&quot;internal transports of goods&quot;)</td>
<td>12</td>
</tr>
<tr>
<td>Intangible assets, royalties, and expenses of multiannual depreciation</td>
<td>10</td>
</tr>
<tr>
<td>Personal computer equipment, principal and ancillary and software</td>
<td>20</td>
</tr>
<tr>
<td>Other fixed assets of the enterprise</td>
<td>10</td>
</tr>
</tbody>
</table>

Specifically for intangible assets and royalties, the rate may be adapted on the basis of the lifetime of the right.

An option for the lessee to depreciate a leased asset is provided in cases where there is a financial leasing agreement, provided that specific conditions are met. A financial leasing agreement is defined as any oral or written agreement by which the lessor (owner) is obligated, in return for a rent, to provide to the lessee (user) the use of an asset, provided that one or more of the following criteria are met:

- The ownership of the asset is passed on to the lessee following the end of the lease agreement.
- The lease agreement includes a term of preferential offer for the purchase of the equipment at a price below market value.
- The period of the lease covers at least a percentage of 90% of the financial life of the assets as it derives from the abovementioned table, even in cases where the ownership title is not transferred after the end of the lease agreement.
- At the time of concluding the lease agreement, the present value of the rents amounts to at least 90% of the market value of the asset that is leased.
- The assets that are leased are of such special nature that only the lessee may use them without proceeding to important modifications.

**Goodwill**
There are some court cases that support the deductibility of goodwill as a start-up expense, but the specifics of each case must be carefully considered.
Organisational and start-up expenses
The amount of start-up expenses (including costs for acquisition of real estate) may be amortised in equivalent instalments within a ten-year period. Specifically, expenses realised by financial leasing companies in relation to the acquisition of real estate, which will constitute the object of an agreement of the same law, may be depreciated in equivalent amounts, in analogy to the years of duration of the agreement.

Interest expenses
Interest deductibility restrictions apply.

Non-deductible expenses include interest expenses on loans undertaken by the enterprise from third parties, to the extent that they exceed the interest that would arise if the interest rate was equal to the interest rate of loans on open deposit/withdrawal accounts provided to non-financial enterprises, as indicated in a Statistical Bulletin of the Central Bank of Greece at the prior time period closest to the date such loan was undertaken.

The above interest deductibility restrictions do not apply to inter-bank loans and bond loans issued by SAs.

Bad debt
The amounts of bad debt provisions and the write-off thereof are deductible, as follows:

- For uncollected due debt up to the amount of EUR 1,000 for a time period exceeding 12 months, the taxpayer may form a provision at a percentage of 100% of the said claim.
- For uncollected due debt exceeding the amount of EUR 1,000 for a time period exceeding 12 months, the taxpayer may form a provision according to the following table:

<table>
<thead>
<tr>
<th>Duration of late payment (in months)</th>
<th>Provision (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Greater than 12</td>
<td>50</td>
</tr>
<tr>
<td>Greater than 18</td>
<td>75</td>
</tr>
<tr>
<td>Greater than 24</td>
<td>100</td>
</tr>
</tbody>
</table>

The condition for the deduction of the provision for the aforementioned two cases is that all appropriate actions have been taken to ensure the right of collecting the said claim.

The formation of provisions of bad debt is prohibited in the following cases:

- For due debt of shareholders or partners of the enterprise with a minimum participation percentage of 10% and the subsidiary companies of the enterprise with a minimum participation percentage of 10%, unless the claim of such debt is pending before court or court of arbitration, or if the debtor has filed an application for bankruptcy or for a procedure of rationalisation or an enforcement procedure has commenced against the debtor.
- For due debt that are covered by insurance or any guarantee or other contractual or in rem security or for debts of the state or local authorities or for those that have been provided by a guarantee of those bodies.

It is provided that a claim may be written off, provided that the following conditions are cumulatively met:

- An amount corresponding to the debt has been previously recorded as income.
- It has been previously written off from the books of the taxpayer.
- All legal actions for the collection of the debt have been exhausted.
This provision will apply for provisions formed in the tax years commencing from 1 January 2014 onwards.

Banks may deduct provisions of bad debt at a percentage of 1% on the amount of the annual average of real grants, as indicated by their monthly accounting statements. Aside from the aforementioned deductibility percentage, banks may deduct from their income additional special provisions regarding their clients, for which the settlement of interest has ceased. Moreover, specific provisions on leasing and factoring companies are included.

**Charitable contributions**
The tax deductibility of donations is not expressly regulated in the respective Greek tax legislation (in contrast to the previously applicable Greek ITC providing for the tax deductibility of specifically enumerated donations, up to a certain amount). Thus, the deductibility of charitable contributions shall be examined in light of the generally applicable deductibility criteria, focusing on the productivity of such expenses on a case-by-case basis.

**Fines and penalties**
Fees from activities constituting a criminal offence, from penal clauses, fines, and penalties are not recognised as deductible expenses.

**Taxes**
Taxes, other than income tax, extraordinary contributions, and VAT corresponding to non-deductible expenses that are not deductible as input VAT, are recognised as deductible expenses.

**Other significant items**
A general rule on the deductibility of all real and evidenced business expenses realised for the benefit or in the frame of the usual transactions of the company, the value of which is not deemed as higher or lower than the market value, and duly registered in accordance with the rules of recording of transactions is established, with the exception of the restrictively enumerated expenses that are not deductible.

The non-deductible expenses include:

- Some cases of loan interest (**see Interest expenses above**).
- Every kind of expense concerning the acquisition of goods or receipt of services of a value exceeding EUR 500, provided that the partial or total payment was not made through a means of bank payment.
- Unpaid insurance contributions.
- Provisions, with the exception of the explicitly regulated bad debt provisions (**see Bad debt above**).
- Provision or receipt of services in cash or in kind that constitute a criminal offence.
- Deemed income in case of self-use of property, to the extent that the latter exceeds a percentage of 3% of the objective value of the property.
- Expenses for the organisation and conducting of informative conferences and meetings concerning the hospitality (meals and stay) of clients or employees if exceeding the amount of EUR 300 per participant and to the extent that the total annual expense exceeds a percentage of 0.5% of the annual gross income of the enterprise.
- Entertainment expenses, with the exception of such expenses realised by taxpayers having as a main object the provision of entertainment services.
- Private consumer expenses.
- Expenses relating to tax-exempt dividends.

A condition for the deductibility of certain expenses is the payment of a WHT at a tax rate equal to the CIT rate (i.e. 26%). Said WHT shall be refunded if the taxpayer
demonstrates that the transaction is ordinary and effected at market prices within three months from the time that the transaction took place.

The above procedural requirement applies to expenses paid to individuals or legal entities that:

- are tax resident in a non-cooperative state
- are tax resident in a country with a beneficial tax regime
- are de facto related companies without the taxpayer being compliant with the transfer pricing documentation rules at the time of the transaction or the issuance of the respective invoice, or
- do not have the required organisation and substance (either on their registered seat or to a related entity) to perform the business activity for which the invoice was issued.

Although the purpose of this provision is to combat tax evasion and tax avoidance, the wording of the law seems to cover all transactions, even ordinary ones. In this respect, a draft Ministerial Decision on the procedure for application of this provision has been published by the Ministry of Finance and put forward to a public consultation, which limits substantially the scope of application. Although still in draft form, the draft Ministerial Decision provides for a number of exemptions from the application of said provision, such as for transactions between Greek companies as well as between related companies, and introduces an automatic pre-approval procedure following an electronic notification of certain transactions. The new procedure shall apply to invoices issued as of 1 September 2015 onwards.

**Net operating and capital losses**
Losses can be carried forward five years. Carrybacks are not permitted.

Pursuant to a rule on the abuse of provisions on the transfer and setoff of losses, in cases where the direct or indirect ownership or voting rights of an enterprise are changed at a percentage exceeding 33% during a tax year, the carryforward of tax losses ceases to apply unless the taxpayer can prove that the change in ownership occurred for commercial or business purposes.

**Payments to foreign affiliates**
Royalties, interest, and service fees paid to foreign affiliates are deductible expenses under certain requirements and conditions.

**Special restrictions on transactions with non-cooperative states and states with preferential tax treatment**
Greek tax law has established rules in relation to non-cooperating states and states with preferential tax treatment.

Non-cooperating states are defined as states that are not EU member states and have not concluded agreements of administrative assistance in the tax sector with Greece or with, at least, 12 other states. Non-cooperative states are enumerated in a Ministerial Decision to be issued annually.

Pursuant to the Ministerial Decision for 2014, the non-cooperating states for 2014 are specified as follows:

- Andorra
- Anguilla
- Antigua and Barbuda
- the Bahamas
- Bahrain
- Barbados
- Bermuda
- British Virgin Islands
- former Yugoslav Republic of Macedonia (FYROM)
- Gibraltar
- Grenada
- Guatemala
- Hong Kong
- Isle of Man
- Jersey
- Lebanon
A legal entity, irrespective of its legal form, is considered located in a preferential tax regime, even if its residence of registered office is located in an EU member state, in cases where it is not subject to taxation in this state or is de facto not subject to taxation, or is subject to tax on income or capital at an amount that is equal to or lower than 50% of the tax that would have been due, in accordance with Greek tax legislation, if such entity were resident or were maintaining a PE in Greece.

Pursuant to the Ministerial Decision for 2014, states with preferential tax treatment for 2014 are specified as follows:

- Albania
- Andorra
- the Bahamas
- Bahrain
- Belize
- Bermuda
- Bosnia and Herzegovina
- British Virgin Islands
- Bulgaria
- Cayman Islands
- Cyprus
- former Yugoslav Republic of Macedonia (FYROM)
- Gibraltar
- Guernsey
- Ireland
- Isle of Man
- Jersey
- Liechtenstein
- Macau
- Marshall Islands
- Monaco
- Montenegro
- Montserrat
- Nauru
- Oman
- Paraguay
- Qatar
- San Marino
- Saudi Arabia
- Seychelles
- Turks and Caicos
- United Arab Emirates
- Vanuatu

**Group taxation**

Group taxation is not permitted in Greece.

**Transfer pricing**

Related entities are obligated to document the prices of their intra-group transactions.

An exemption from maintaining a transfer pricing documentation file is provided if:

- the above transactions or transfer of operations amount to up to EUR 100,000 annually and the total turnover of the liable party does not exceed EUR 5 million annually, or
- the above transactions or transfer of operations amount to up to EUR 200,000 annually and the total turnover of the liable party exceeds EUR 5 million annually.

The transfer pricing documentation file is accompanied by the “Summarized Table of Transfer Pricing Information” which is submitted electronically to the tax administration within four months following the end of every fiscal year.

The transfer pricing documentation file is kept at the registered seat of the liable party for the whole time period that the books and records are required to be kept, and should be provided to the tax administration within 30 days from the receipt of the relevant request.
The obligation of updating the respective transfer pricing file is provided in case of a change of market circumstances that affect the data included therein. The update is made in the tax year in which the change takes place.

The option of obtaining an Advance Pricing Arrangement (APA) of the methodology of specific future intra-group transactions with related parties is integrated in the Code of Tax Procedures. The object of the APA constitutes the total of the criteria used for the determination of the prices of intra-group transactions during a specific time period, which include mainly the transfer pricing methodology used, comparable or reference data, and the respective adjustments, as well as the critical assumptions on future developments. The object of the APA may constitute every other specialised matter concerning the pricing of transactions with related parties.

The validity of the APA decision cannot exceed four years, and it cannot enter into force retroactively (i.e. the tax year that has lapsed at the time the application for the APA has been submitted). The issuance of the APA decision does not impede the subsequent application of a mutual settlement procedure according to the applicable DTT.

The APA decision may be renewed, revoked, or cancelled by a decision of the tax administration, provided that the legal conditions are met.

The delayed submission of the summarised table of transfer pricing Information and of the transfer pricing documentation file incurs a penalty calculated at a percentage 1/1,000 of the declared gross profits (not below EUR 1,000 and not exceeding EUR 10,000).

The penalty for the non-submission, or inaccurate or incomplete submission, of the summarised table of transfer pricing information or of the transfer pricing documentation file is calculated at a percentage 1/100 of the declared gross profits (not below EUR 10,000 and not exceeding EUR 100,000).

A repetition within five years of the first infringement incurs double the initial penalty, whereas a second repetition within five years from the first infringement incurs quadruple of the initial penalty.

**Thin capitalisation**

The thin capitalisation rules are determined in connection to the taxable profits before interest, tax, and depreciation (EBITDA). More specifically, interest expenses are not deductible to the extent that the surplus of interest expenses compared to interest income exceeds a percentage of 30% of EBITDA.

In application of a transitional provision, this limit will be:

- 60% from 1 January 2014.
- 50% from 1 January 2015.
- 40% from 1 January 2016.
- 30% from 1 January 2017.

The aforementioned limit does not refer to net interest expenses that do not exceed the amount of EUR 5 million, and from 1 January 2016 this amount is reduced to EUR 3 million.

Any excess amount of non-deductible interest expenses may be carried forward indefinitely to future years and will be deductible in future years to the extent that these future years indicate an uncovered EBITDA amount.
The aforementioned rules do not apply to credit institutions, leasing companies, and factoring companies that are licensed by the Bank of Greece or respective regulatory authorities of other EU member states.

**Controlled foreign companies (CFCs)**

CFCs rules have been introduced into the Greek legislation applicable from 1 January 2014 onwards. More specifically, the taxable income of a taxpayer with tax residence in Greece shall be increased by the undistributed income of a legal person or legal entity with tax residence in another country, under the following conditions:

- The taxpayer, alone or together with affiliated persons, directly or indirectly owns shares, voting rights, or equity in excess of 50% or is entitled to receive more than 50% of the profits of that legal person or legal entity.
- The above legal person or legal entity is subject to taxation in a non-cooperative state or in a country with a preferential tax regime (see the lists in the Deductions section).
- More than 30% of the net income before taxes earned by a legal person or legal entity falls into at least one of the categories of income derived either from interest, dividends, royalties, income from immovable property, or income from insurance, banking, or other financial activities.
- It is not a company whose principal class of shares is subject to trading on a regulated market.

The above do not apply to legal persons or legal entities with tax residence in the European Union or residence in a country that is a contracting member of the European Economic Community (EEC) unless the establishment or the financial activity of such legal entity constitutes a fictitious situation with the view to avoid taxation.

**Tax credits and incentives**

**Foreign tax credit**

Tax paid abroad for income taxable in Greece is credited but is limited to the amount of Greek tax due.

**Deferred taxation**

The concept of deferred taxation has recently been introduced into the Greek tax legislation on the basis of the International Financial Reporting Standards (IFRS) and applies to entities supervised by the Bank of Greece (namely banks and leasing companies, as well as factoring companies). In this respect, said entities may convert tax assets into tax credits in return for shares issued to the Greek State. Specific rules and conditions apply.

**Incentives for the maintenance of workplaces**

Legal entities that suffer a reduction of turnover for two consecutive accounting periods without reducing their workforce can enjoy a reduction of the tax rate by three percentage units. However, a revocation of the granted benefit and imposition of further tax in case of reduction of personnel or increase of the turnover within the three-year period is provided.

**Other tax incentives**

Apart from the aforementioned tax incentives, L. 3908/2011 on ‘Bolstering of Private Investments for Economic Growth, Entrepreneurship and Regional Sustainability’ (the Investment Incentive Law) includes the following tax incentives:

- Any investment plan in any sector of the economy may receive benefits under the law. Only certain cases explicitly specified in the law are exempt (e.g. power generation from photovoltaic arrays).
• The types of subsidised expenditures for tangible and intangible assets are indicatively mentioned, whereas the expenses that may not be subsidised are exhaustively enumerated. Especially the subsidy percentage for the expenditure of intangible assets may not exceed 50% of the total eligible expenditure of the investment plan.
• The term of ‘new’ enterprises is specifically defined for the new law’s purposes. An enterprise is considered as ‘new’, if the establishment procedures have not been completed before the enterprise applies for aid according to the law or if it has been established within the past 24 months prior to filing the application.
• There are three types of aid: (i) tax exemption, (ii) subsidy, and (iii) leasing subsidy.
• The law lists three categories of General Investment Plans and specifies the type of aid for each of them: (i) General Entrepreneurship which only the tax exemption may be granted for, whereas for the (ii) Technological Development and the (iii) Regional Sustainability investment plan, the subsidy and/or the leasing subsidy may be granted in principle, with different percentages for the existing and the new enterprises. The remaining percentage may be covered by tax exemption.
• The law also lists four categories of Special Investment Plans: (i) Youth Entrepreneurship, (ii) Major Investment Plans, (iii) Integrated Long-Term Investment Plans, and (iv) Synergy and Networking. The aids granted are further specified by type, volume, and/or percentage for each of them.
• The percentages of aid available are specified in conjunction with the division of the country into three zones (A, B, and C) and are the following:

<table>
<thead>
<tr>
<th>Zones</th>
<th>Large enterprises</th>
<th>Medium-sized enterprises</th>
<th>Small and micro enterprises</th>
</tr>
</thead>
<tbody>
<tr>
<td>ZONE A (Prefecture of Attica, Prefecture of Viotia)</td>
<td>15</td>
<td>20</td>
<td>25</td>
</tr>
<tr>
<td>ZONE B (Prefectures with gross domestic product [GDP] per capita &gt; 75% of the average GDP of the country)</td>
<td>30</td>
<td>35</td>
<td>40</td>
</tr>
<tr>
<td>ZONE C (Prefectures with GDP per capita &lt; 75% of the average GDP of the country)</td>
<td>40</td>
<td>45</td>
<td>50</td>
</tr>
</tbody>
</table>

In any case, the above percentages should comply with the ceiling set by the Regional State Aid Map (RSAM) approved by the European Commission.

• Additional aid is granted for investment plans in Industrial Entrepreneurship Zones and Innovation Zones up to the ceiling set by the RSAM. Benefits are also granted up to the ceiling set by the RSAM, by enterprise size, for investment plans on islands and regional units of islands that belong administratively to the regions of the mainland.
• The law sets a ceiling for each aid of EUR 15 million for a single enterprise and EUR 30 million for the total of cooperating and related companies.
• The application can be filed throughout the entire year but is evaluated twice a year (May in relation to applications filed until 30 April and November in relation to applications filed until 30 October, although such periods can be prolonged by ministerial decisions). Additionally, conditions for approval are further specified.
• The law specifies the conditions and evaluation criteria for each investment project and determines, in general, the procedure for evaluation, approval, and monitoring of implementation of investment projects.
• The mode of payment of each type of aid is further determined. Especially for the aid of tax exemption, the law stipulates that the amount of tax exemption aid is annually formed with the following restrictions:
  • The enterprise is entitled to the use benefit of the incentive from the fiscal year in which the decision on the completion and beginning of the productive operation of the investment has been published. In this fiscal year, the ceiling of tax exemption to be used is set at ½ of the approved amount of the tax exemption aid.
• In the following fiscal year, the ceiling of tax exemption to be used, including the aid for the first fiscal year, is set up to the total of the approved amount of the tax exemption aid.
• The remaining amount of the approved tax exemption aid may be covered within 15 fiscal years following the fiscal year in which the decision on the completion and beginning of the productive operation of the investment has been published.
• The amount of the tax exemption aid shall be shown as a tax-free reserve in a special account in the enterprise’s accounting books and shall consist of the income tax on the net profits reported in the initial timely income tax return, which shall not be paid based on the tax exemption granted.
• Where the equipment is acquired through leasing, the tax exemption to which the enterprise is entitled in each fiscal year is calculated on the part of the purchase price of the equipment that is included in the rents already paid by the end of this fiscal year.
• The law stipulates that the amounts of subsidies and leasing subsidies as well as of tax exemption shall be shown as tax-free reserves in special accounts. Said reserves may not be distributed or capitalised and shall be returned in case of dissolution of the enterprise. In case of distribution or capitalisation, certain penalties shall be imposed.
• The law stipulates that any aid to be paid is exempt from any tax, stamp duty, right, and any other charge in favour of the state or any third party.
• Finally, the law specifies the obligations of the beneficiary enterprises and penalties in case of non-compliance.

The above rules are very detailed, and analytical and careful advice needs to be sought before making any decision in respect thereof.

We should not fail to note that the incentive law L.3908/2011 had been introduced in Greece in compliance with the EU State Aid regulatory framework as formed by the Commission Regulation (EC) 800/2008 (in line with Regulation 994/98/EC) and the Map for Regional Aid for the period 2007-2013, which were effective up to 30 June 2014, and thus are no longer in force. As such, the application of L.3908/2011 has been suspended.

Despite the fact that the EU Commission has published the Guidelines on Regional State Aid for the period 2014-2020, which entered into force on 1 July 2014, this has not been integrated into the Greek legislation through the adoption of a new investment incentive law.

**Withholding taxes**

WHT rates are as follows:

<table>
<thead>
<tr>
<th>Type of income</th>
<th>WHT rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Dividends</td>
<td>10</td>
</tr>
<tr>
<td>Interest</td>
<td>15</td>
</tr>
<tr>
<td>Royalties and other payments</td>
<td>20</td>
</tr>
<tr>
<td>Fees for technical projects, management fees and consultancy and other related services</td>
<td>20</td>
</tr>
<tr>
<td>By exception, fees received by contractors of every kind of technical projects and lessors of public, municipal, association, or port proceeds</td>
<td>3% on the value of the project under construction or lease payment</td>
</tr>
</tbody>
</table>

Legal entities tax resident in Greece are not subject to WHT in relation to royalties, fees received for the provision of consultancy and other related services, and management fees, unless provided to general government bodies.
Legal entities that are not tax resident in Greece and do not maintain a PE in Greece are not subject to Greek WHT in relation to technical services, consultancy services, or other related services and management fees.

Conversely, foreign legal entities that maintain a PE in Greece are subject to Greek WHT in relation to the provision of the aforementioned services.

Legal entities that are tax resident in Greece or foreign legal entities that maintain a PE in Greece are not subject to WHT in relation to royalty payments.

The exemption from the obligation of WHT for payments of dividends, interest, and royalties by a Greek subsidiary to its parent company seems to include payments of dividends, interest, and royalties to Greek parent companies.

For the exemption from dividend WHT, the following conditions apply:

- The receiving legal entity should own shares, parts, or a participation of at least 10%, on the basis of the value or number, in the share capital, right to profits, or voting rights of the distributing taxpayer.
- The minimum holding percentage of shares or parts or participations should be held for at least 24 months (subject to providing a bank guarantee, in which case the exemption may apply prior to completing the 24-month holding period).
- The receiving legal entity should be:
  - included in the forms enumerated in Annex I Part A of Directive 2011/96/EU, as in force
  - tax resident in an EU member state according to the legislation of such state and not be considered as tax resident in a third country in application of the terms of the DTT concluded with such third country, and
  - subject, without the option or exemption, to one of the taxes mentioned in Annex I Part B of Directive 2011/96/EU, or to any other tax that may in the future replace one of those taxes.

For the exemption from WHT for interest and royalty payments, the following conditions apply:

- The receiving legal entity should directly own shares, parts, or a participation of at least 25%, on the basis of the value or number, in the share capital, right to profits, or voting rights of the paying taxpayer; the paying taxpayer directly owns shares, parts, or a participation of at least 25% in the share capital of the receiving entity; or a third legal entity directly owns shares, parts, or a participation of at least 25% in the share capital of the receiving entity and the paying legal entity.
- The minimum holding percentage of shares or parts or participations should be held for at least 24 months (subject to providing a bank guarantee, in which case the exemption may apply prior to completing the 24-month holding period).
- The receiving legal entity should be:
  - included in the forms enumerated in Annex I Part A of Directive 2003/49/EU, as in force
  - tax resident in an EU member state according to the legislation of such state and not be considered as tax resident in a third country in application of the terms of the DTT concluded with such third country, and
  - subject, without the option or exemption, to one of the taxes mentioned in Annex I Part B of Directive 2003/49/EU, or to any other tax that may in the future replace one of those taxes.

Payments of interest of bank loans, including default interest, as well as interest of intra-bank deposits, are exempt from WHT.
Interest received from Greek government bonds and treasury bills by legal entities that are not tax resident in Greece and that do not maintain a PE in Greece are not subject to WHT.

The following table provides a summary of the WHTs applicable under the respective DTTs entered into by Greece:

Notes

1. The non-resident legal person, legal entity, or individual pursuing business activity may elect to be taxed on income from royalties and fees for technical services, administration fees, and fees for consulting or similar services in accordance with the rules applicable to tax residents who receive such fees and then credit the WHT against the income tax due.
2. The rate of 5% applies in case the beneficiary is a company (excluding a partnership) and directly holds at least 25% of the voting power of the paying company.
3. It should be taken into account that such rates are based on the DTT applicable as of 1 January 2011, whilst other rates have been applicable in the past.
4. The rate of 5% will apply if the beneficial owner is a company that directly holds at least 25% of the voting power of the company paying the dividends.
5. The rate of 5% is applicable only for the right to use cinematograph films.
6. The rate of 5% applies to loans not incorporated into negotiable instruments and granted by banks.
7. A rate of 5% is applicable to shareholders of 25% and above.
8. The rate is 5% applies if the royalties consist of payments of any kind received as a consideration for the use of or the right to use any copyright of literary, artistic, or scientific work, including cinematograph films.
9. Exemption (‘0’ rate) applies to payments of any kind received as a consideration for the use of, or the right to use, any copyright of literary, artistic, or scientific work including cinematograph films and films or tapes for television or radio broadcasting.
10. Interest (on bonds, securities, notes, debentures, or on any other form of indebtedness) received from sources within Greece by a resident or corporation of the United States (US) not engaged in trade or business in Greece through a PE therein, shall be exempt from Greek tax but only to the extent that such interest does not exceed 9% per annum; but such exemption shall not apply to such interest paid by a Greek corporation to a US corporation controlling, directly or indirectly, more than 50% of the entire voting power in the paying corporation.
11. The 5% rate is applicable if the royalties consist of payments of any kind received as a consideration for the use of industrial, commercial, or scientific equipment, and the 10% rate is applicable for all the other cases.
12. The 8% rate is applicable when the beneficiary of the interests is a bank or a financial institution, 10% rate is applicable for all the other cases.
13. Exemption (‘0’ rate) applies to copyright royalties and other like payments in respect of the production or reproduction of any cultural or artistic work (but not including royalties in respect of motion picture films nor royalties in respect of works on films or videotapes or other means of reproduction for use in connection with television broadcasting).

In general, it should be noted that certain DTTS may include specific clauses in specific cases that are not all captured in the table; therefore, a careful review of each DTT is highly advisable.
Tax administration

Taxable period
The taxable period is the calendar year, which may end either on 30 June (for legal persons or legal entities keeping double entry books) or 31 December. The taxable year should not, in any case, exceed 12 months.

The exceptional case of closing the accounting period, for income tax purposes, at a date other than the 31 December or 30 June is limited only to Greek legal entities/other entities that are directly or indirectly owned at a percentage exceeding 50% by foreign legal entities/other entities.

Tax returns
CIT returns of Greek SAs, limited liability companies (LLCs), and branches of foreign companies are filed on a special form by the last day of the sixth month following the end of the tax year.

Tax returns are required to be submitted electronically.

The CIT return constitutes the basis for the direct assessment of tax, which arises without a further action by the tax administration, simultaneously with the submission of the tax return by the taxpayer.

The taxpayer also has the right to amend the tax return by paying the respective difference in tax or by establishing one’s rights for a refund of tax paid in excess according to the amended tax return.

Moreover, the taxpayer may request the issuance of a corrective tax assessment act in case of filing an amending tax return for which an administrative assessment tax act has been issued, and the tax administration is obligated to issue such corrective tax assessment if the amending tax return is accepted.

Payment of tax
CIT and tax prepayment (80% [100% for banks operating in Greece] of the current year’s CIT less tax withheld at source) based on the tax return are paid in eight equal monthly instalments, the first of which should be paid upon filing.

For newly established companies, the pre-payment is reduced to 50% for the first three years of operations.

Tax audit process

Tax audit procedures
The tax audit commences with the issuance of an audit order for tax open years, usually not more than five. The order concerns the audit of all tax issues (CIT, VAT, WHT, capital gain tax, etc.). The duration of the audit may vary from a few weeks to a few months, in certain cases.

The tax administration performs a tax audit from its offices on the basis of the financial statements, tax returns, and other documents that are submitted by the taxpayer, as well as the documents and information in its possession.

The performance of a complete on-site tax audit must be notified to the taxpayer by a previous written notification. A complete on-site tax audit is performed without prior notification in cases where indications of tax avoidance exist.

The tax administration may have access to the books and records and to other documents of the taxpayers, as well as to the receipt of copies thereof. The tax
administration has the same rights with regard to books and records that are kept electronically. It is noted that the legal entity subject to keeping books and records must maintain these books and records for at least five years.

An extension of the on-site tax audit may be granted once for six months, as well as for another six months in extraordinary cases.

The right for a new audit of a tax period already audited is provided only in case new data arises that affects the calculation of the tax liability. ‘New data’ is defined as all data that could not have been known to the tax administration upon the commencement of the original tax audit.

The election of the cases subject to audit will be made on the basis of risk analysis criteria. Exceptionally, cases may be elected on the basis of other criteria, according to a decision of the General Secretary of Public Revenue.

The tax administration may use the following audit techniques for the indirect determination of the taxable basis:

- The proportionality principle.
- The analysis of the liquidity of the taxpayer.
- The net position of the relation between the sales price to the total turnover.
- The amount of bank deposits and expenses in cash.

The procedure of notification of the taxpayer of the results of the tax audit is provided. More specifically, a temporary corrective assessment of tax is issued in case a differentiation of tax arises on the basis of the tax returns of the taxpayer and the results of the audit.

Following the submission of such decisions and within 20 days from the receipt of the notification thereof, the taxpayer may submit its views in writing, whilst after that point a final corrective assessment of tax sheet is issued, which is notified to the taxpayer, within a month from the end of the deadline for submitting the taxpayer’s views in writing.

Audit Authority for Taxpayers with Great Wealth
The special audit authority ‘Audit Authority for Taxpayers with Great Wealth’, competent for the whole Greek territory, performs provisional, temporary, and ordinary tax audits, as well as the audit of real estate property and of the annual expenses of individuals. The audit of foreign real estate companies not disclosing their ultimate beneficiary individuals and of Greek real estate companies in which a foreign legal entity participates without disclosing the ultimate beneficiary individuals are also assigned to the Audit Authority for Taxpayers with Great Wealth. Moreover, the Audit Authority for Taxpayers with Great Wealth is also competent for the certification and enforced collection of revenue of taxpayers with great wealth.

Audit Authority for Large Enterprises
The ‘Audit Authority for Large Enterprises’ is responsible for the performance of ordinary audits of taxpayers with annual gross income exceeding EUR 25 million for the fiscal year closing within 2009, of affiliated enterprises drafting consolidated financial statements irrespective of their gross income on the condition that the gross income of at least one of the affiliated enterprises exceeds EUR 25 million for the fiscal year closing within 2009, and unaudited cases prior to any business restructuring effected until 2011 irrespective of the gross revenues and the competent tax authority responsible for the taxation of their income on the condition that the company or any of the companies resulting from the business restructuring falls within the ambit of the Audit Authority for Large Enterprises. The Audit Authority for Large Enterprises is also competent for the enforced collection of revenue of large enterprises located in the whole Greek territory.
Following the audit and the notification of tax audit findings, the company may in turn:

- File a petition within the framework of the special administrative procedure (out-of-court settlement procedure) before the Directorate for Dispute Resolution with the claim of reviewing the tax assessment act, in case the content of the tax assessment act is questioned within a deadline of 30 days from the notification of the act or the realisation of the failure. The direct filing of a petition before the competent administrative courts against acts of the tax administration is inadmissible. Exceptionally, the direct petition before the competent administrative courts against a preventative tax assessment act is permitted (challenging the fulfilment of the conditions for issuing this act) (article 35, par.1).

- Take the case to court (filing of a recourse) against the explicit/tacit rejecting decision of the Directorate for Dispute Resolution. For tax/custom cases exceeding EUR 150,000, the competent court is the Court of Appeal (of first and last instance, which could normally issue a decision within six to 12 months; said timeframe may be longer, taking up to one to two years in case the competent court is the Court of First Instance [i.e. for disputes of an amount less than EUR 150,000]). The Supreme Court may take up to three to four years. There are several measures being currently implemented in an attempt to reduce this time.

- There is also a possibility to take the case to a Fiscal Arbitration Body. The Fiscal Arbitration Body is competent to arbitrate over dispute resolution arising from tax assessments exceeding EUR 150,000, by filing an application and subject to the consent by the Minister of Finance. The commencement of operation of the Fiscal Arbitration Body is to be determined by a Presidential Decree to be issued following the suggestion of the Ministers of Finance and Justice; to date, such Presidential Decree has not been issued.

- Criminal sanctions are also imposed on the company’s legal representative under certain conditions, which are waived in the case of settlement on the amount of taxes assessed.

**Tax auditors’ practice**

In the past, complexity of the Greek tax legislation and the vagueness of its requirements enabled the tax auditors to dispute either the company’s results reflected in its accounting records or to disallow expenses. This is true in all tax audits and, in spite of companies’ endeavours to comply with the tax requirements, tax audits have always resulted in assessment of additional taxes and penalties.

The amount of additional taxes depends mainly on the following:

- Company's vulnerability because of nature of business and transactions.
- Taxes already paid on the basis of the company’s income tax returns.
- Profits declared by competitors.
- Weaknesses and shortcomings that the tax auditors might reveal, if a full audit is carried out.

In respect of deductible expenses, the legislation prescribes, among other requirements, that such expenses must be realised for the benefit of the company or in its ordinary course of normal business activity to represent, a valid transaction at a value that is not over or under the market value based on the data available by the tax administration, properly recorded in the company’s books in the respective period to which they relate, and can be evidenced by appropriate documentation, without defining what a business expense is. Consequently, the tax auditors dispute the deductibility of various items arguing that, in their opinion, they are not contributing to the company’s business income.

Greek SAs and LLCs whose annual financial statements are subject to a statutory audit by individual Certified Auditors and audit firms are required to obtain an ‘annual tax certificate’ from their certified auditors upon the completion of a tax audit conducted,
confirming compliance with Greek tax legislation. The tax audit is conducted on specific tax areas as defined by a special audit program issued by the Ministry of Finance in cooperation with the Committee of Accounting Standardization and Auditing (ELTE). The audit program will be updated annually and is in accordance with the provisions of International Standard on Non-Audit Assurance Engagements 3000.

**Statute of limitations**
The tax administration may issue an administrative, estimated, or corrective tax assessment within five years from the end of the year in which the deadline for filing the respective tax return lapsed.

This five-year prescription period may be extended for one year if:

- the taxpayer files an initial or amending tax return within the fifth year of the prescription period
- an application for the granting of information from a foreign state has been filed and commences from the date of the receipt of the respective information by the tax authority, or
- an out-of-court settlement petition/judicial appeal/petition has been filed and commences from the issuance of a decision that is not subject to petition/appeal.

Exceptionally, for cases of tax avoidance, the tax administration has the right to issue an administrative, estimated, or corrective tax assessment within 20 years from the end of the year in which the deadline for filing the respective tax return lapsed.

In case of a corrective tax assessment resulting in an amendment of the tax assessment act for a year for which the prescription period of the state’s right to audit has lapsed, the adaptation is made to the last year for which said right has not been prescribed.

**Other issues**

**Intergovernmental agreements (IGAs) and cooperation**
Greece and the United States have reached an agreement in substance and Greece has consented to disclose this status on the US Foreign Account Tax Compliance Act (FATCA) arrangements with effect from 30 November 2014.

In accordance with this status, the text of such IGA has not been released, and financial institutions in Greece are allowed to register on the FATCA registration website consistent with the treatment of having an IGA in effect, provided that the jurisdiction continues to demonstrate firm resolve to sign the IGA as soon as possible.

**Base erosion and profit shifting (BEPS)**
Greece adheres in general to the BEPS guidelines.

Measures that have been adopted and that are in the spirit of the BEPS guidelines include the CFC legislation and General Anti-Avoidance Rule (GAAR) applicable, as well as the newly introduced procedural requirements for the deductibility of expenses.

**Choice of business entity**
The main differences between a subsidiary (i.e. Société Anonyme [SA] or limited liability company [LLC]) and a branch of a company, from a corporate establishment perspective, are the following:

- A subsidiary is a separate legal entity from its parent company, whereas a branch does not form a separate legal entity, does not have its own shareholders, and consequently the funds needed for its operation are transferred from the overseas parent company.
• The parent company of a branch must be either the equivalent of a Greek SA or an LLC, whereas there is no such restriction for subsidiaries.
• The day-to-day management of a branch is exercised by the legal representative, a person appointed by the parent company, whereas an SA is represented by its BoD and an LLC is administered and directed by the administrator(s).
• No minimum capital is required for the establishment of a branch or LLC; nevertheless, the share capital of the parent company should be, in principle, at least EUR 24,000 if the parent company has the legal form of an SA. However, from a practical perspective, the competent Greek General Commercial Registry might accept the establishment of a branch of an EU based SA, even if the share capital of the parent company is less than EUR 24,000.
• An SA appears to be a more popular type of company than a branch and an LLC. In particular, certain investors still tend to opt for the establishment of an SA company, particularly if they would like to participate in public tenders, etc.

The main legal differences between an SA and an LLC in Greece from a company law/establishment perspective are the following:

• An SA is managed by a BoD consisting of at least three members, whereas an LLC can be managed by only one individual, the administrator (legal entities are permitted to be appointed as BoD members or administrators). Both BoD members and administrators have to acquire a Greek tax registration number and a Greek residence permit (if applicable) prior to the establishment of the relevant companies. It should also be noted that the acquisition of a residence permit for non-EU citizens is a time consuming procedure.
• The shareholders of an SA are not required to be registered with the Greek tax authorities (however, if the said shareholders are also BoD members, they are required to be registered with the competent Greek tax authorities), whereas the partners of an LLC have to be registered with the Greek tax authorities.
• Establishment/incorporation of an SA is performed through the so-called One Stop Shop Authority (i.e. Notary Public). Any appropriate documents (applications, declarations, certificates, etc.) required for establishment process should be produced and submitted to the Notary Public by the founders of the SA, as said persons are defined in the Articles of Association (AoA) of the SA under establishment, or their representatives appointed by virtue of a (duly legalised as to the signature of the founders) authorisation. After the submission of the necessary documentation to the competent One Stop Shop Authority, the said authority accomplishes all the necessary steps for the establishment of the Greek SA, including the granting of the Greek tax registration number. Depending on the particular activity of the SA under establishment, the satisfaction of particular regulatory requirements, such as the acquisition of certain licences, might be required.
• Establishment/incorporation of an LLC is performed through the One Stop Shop Authority (i.e. Notary Public). Any appropriate documents (applications, declarations, certificates, etc.) required for the establishment process should be produced and submitted to the Notary Public by the founders of the LLC, or their representatives appointed by virtue of written authorisation (duly legalised as to the signature of the founders). After the submission of the necessary documentation to the competent One Stop Shop Authority, the said authority accomplishes all the necessary steps for the establishment of the Greek LLC, including the granting of the Greek tax registration number. Depending on the particular activity of the Greek LLC under establishment, the satisfaction of particular regulatory requirements, such as the acquisition of certain licences, might be required. SA and LLC companies are supervised by the Greek Ministry of Development (joint supervision by the General Commercial Registry and the competent Prefecture of the registered seat of the SA), which necessitates certain filings to be performed (e.g. minutes of BoD, general announcements, financial statements).
The ‘Private Company’ (PC)

- The PC constitutes a legal entity and is commercial in nature, even if its object is not per se commercial. The capital of the PC can be freely determined by the partners and can amount to zero, whilst its partners participate in the PC by means of capital, non-capital, and guarantee contributions.
- The PC is not entitled to acquire, either directly or indirectly, its own capital parts.
- The PC has its registered seat in the municipality referred to in its AoA, while the transfer of the registered seat of the PC in another country of the European Economic Area does not necessarily result in the dissolution of the PC, provided that the recipient country recognises the transfer and the continuity of legal personality. The PC is not obligated to have its actual seat in Greece, whilst the PC is capable of establishing various types of secondary establishments either in Greece or abroad.
- The term of the PC is definite; if not otherwise stipulated in the AoA of the PC, the PC has a term of 12 years following its establishment.
- The PC is administered and represented by one or more administrators.
- The administrator represents the PC and conducts in its name all actions pertaining to the administration of the PC, the management of its assets, and, in general, the pursuit of its objects.
- The establishment of the PC is effected by means of its registration with the Greek General Commercial Registry (GEMI).
- The PC is dissolved: (i) at any time following a resolution of the partners, (ii) when its definite term has expired, unless the term of the PC is extended by virtue of a resolution of the partners, (iii) if the PC defaults, and (iv) in all other circumstances contemplated by the law or the AoA.
Significant developments
There have been no recent significant corporate tax developments in Greenland.

Taxes on corporate income
Greenlandic companies are taxable to Greenland on their worldwide income, except for income from real estate outside of Greenland, which is exempt. Very few double tax treaties (DTTs) offer relief since Greenland only has DTTs covering corporate tax with Denmark, the Faroe Islands, Iceland, and Norway.

The corporate tax rate is 30% for both Greenlandic and foreign companies. On top of the corporate tax, there is a ‘surcharge’ of 6% of the corporate tax payable; consequently, the effective corporate tax rate is 31.8%. Oil and mineral licence holders are exempt from the 6% surcharge according to current practice.

There are no industry-specific or special-tax regimes in Greenland. However, it is determined in all oil exploration licences that oil licensees pay a so-called ‘surplus royalty’ on top of the corporate tax.

Oil companies
All companies with mineral exploration licences (current and future) are required to pay a government royalty as a condition for grant of a production licence. The royalty terms form part of the licence conditions and vary with the age of the licence.

On licences issued prior to 2014, oil companies pay a ‘surplus royalty’ of 7.5%, 17.5%, and 30%, which should be paid when the internal rate of return exceeds, respectively, 21.75%, 29.25%, and 36.75% plus the official Danish discount rate, and carry the state-owned company with 12.5% (open door area 8%). Newer licences apply a gross royalty of 2.5% and a surplus royalty of 7.5%, 17.5%, and 30%, which should be paid when the accumulated turnover exceeds 35%, 45%, and 55%, respectively. Further, the state participation is reduced to 6.25% (carried).

Nonetheless, the model licence terms for upcoming rounds in Baffin Bay contain surplus royalty levels of 7.5%, 10%, and 12.5% at 35%, 45%, and 55% internal rates of return, respectively. In other words, royalty levels are likely to differ between licences and should therefore be scrutinised.

Mining companies
There has been a policy of implementing royalty terms in mining licences as well. A Strategy Report for 2014 through 2018 stipulated that mining companies shall pay a gross royalty of up to 5.5% (depending on the type of mineral) based on turnover, plus, in the case of gemstones, a ‘surplus royalty’ on future licences. Apparently, this is not only for licences awarded in the future but also, to some extent, for mining companies with existing exploration licences in order for them to obtain a production licence.
Greenland

Since these changes are implemented predominantly through licence terms rather than legislation, it is not entirely clear when and to what extent the changes will be finally implemented.

It is not clear what stance the new government appointed on 4 December 2014 will take towards the short-lived 2013/14 government’s implemented licence changes.

**Local income taxes**
There are no local corporate income taxes or similar charges in Greenland.

---

**Corporate residence**

A corporation is resident in Greenland for tax purposes if it is registered in the Danish Companies Register with its principal seat of business in Greenland or if it has its effective seat of management in Greenland. The effective seat of management is typically the place where the management decisions concerning the company’s day-to-day operations are made.

**Permanent establishment (PE)**
Non-resident companies are liable to tax in Greenland on business profits derived through a PE in Greenland. Generally, Greenland may be assumed to rely on the principles of the Organisation for Economic Co-operation and Development (OECD) model tax treaty in the determination of whether a PE exists. There is virtually no published practice on the issue. Apart from income from a PE, foreign companies are tax liable on income in connection with the exploration and exploitation of oil, gas, and minerals, regardless of whether a PE exists. This includes all activity ultimately serving the extractive industries, including all kinds of subcontractors and service providers to the industry.

---

**Other taxes**

**Value-added tax (VAT)**
There is no VAT in Greenland.

**Import duties**
There are no general import duties on operating equipment in Greenland. However, if present in Greenland for more than an eight-months period, operating equipment has to be declared to the Greenlandic tax authorities for statistical purposes. There are import duties on some assets, such as cars, etc.

There are also import duties on alcohol, cigarettes, food products, etc. The fares vary depending on the exact goods in question.

**Excise duties**
There are Greenlandic excise duties on fishing of some fish species, alcohol produced in Greenland, lottery and gambling activities, motor vehicles, and various other excise taxes. The duties depend on the exact circumstances.

**Property taxes**
There are no property taxes in Greenland.

**Stamp taxes**
Stamp tax is payable on a few documents, such as a deed of transfer of real estate and ships (1.5% of the transfer sum), including on transfer of shares in companies that own ships.
**Capital gains taxes**
There are capital gains taxes on receivables, equity instruments, real estate, financial contracts (derivatives), and depreciable assets, including oil, gas, and mineral licences. The tax rate is identical to the general corporate tax rate, effectively 31.8% (30% for oil, gas, and mineral licence holders).

Losses on financial instruments may only be deducted from gains on financial assets.

**Social security contributions**
Employers are obligated to pay 0.9% of all paid wages and salaries as social security contribution.

All Danish, Greenlandic, and Faroese employers are subject to Danish social security payments (ATP). This applies to both foreign and Danish employees. However, foreign employees are exempt unless they are working in Greenland for more than six months.

Foreign employers are exempt from ATP unless they employ Danish employees who are not residents in Greenland.

**Payroll taxes**
No additional payroll taxes are applicable in Greenland.

**Branch income**
Greenlandic PEs of foreign companies, and taxable income connected to oil, gas, and mineral activities, are taxed under the same rules and rates as Greenlandic resident companies. There is no branch profits remittance tax or other similar tax on branch profits. As a branch is considered to be the same legal entity as the headquarters, interest paid from the branch to the headquarters is not tax deductible.

Unusually, if one foreign company has more than one location or PE in Greenland, these are treated as separate taxable entities with no possibility of consolidation.

**Income determination**
Taxable income is generally calculated as income determined for accounting purposes, which is adjusted and modified for several items as prescribed by the tax laws. One typical timing difference is depreciation.

**Inventory valuation**
There are no formal rules about inventory valuation in Greenland. Generally, inventory is valued at acquisition cost according to a first in first out (FIFO) principle.

**Capital gains**
Capital gains are subject to capital gains taxes. See *Capital gains taxes in the Other taxes section* for more information.

**Dividend income**
Income from dividends is generally included in taxable income. There is no relief, such as participation exemption or the like, meaning that any form of Greenlandic holding structure is generally inefficient. Dividends from foreign companies, however, are tax free, provided that the recipient holds at least 25% of the shares in the distributing company for at least one year.

**Interest income**
Interest income is generally included in taxable income.
Greenland

**Rental income**
Rental income is generally taxable in Greenland; however, rental income from real estate located outside of Greenland is not taxable.

**Royalty income**
Royalty income is taxable in Greenland.

**Partnership income**
Partnership income is treated similarly to other income. Partnerships are generally fiscally transparent.

**Unrealised gains/losses**
Unrealised gains/losses are not taxable in Greenland. Greenland does not use a mark-to-market principle on capital gains.

**Stock transactions**
Gains and losses on equity transactions are taxable.

**Foreign currency exchange gains/losses**
Foreign exchange gains/losses are taxable in Greenland if realised; however, only foreign exchange gains/losses on receivables are taxable, not on debentures.

**Foreign income**
Greenlandic companies are taxable to Greenland on their worldwide income, except for certain income relative to foreign real estate; consequently, income from foreign PEs is taxable to Greenland.

The income of a foreign subsidiary may be taxed in the hands of its Greenlandic parent company if the subsidiary constitutes a controlled foreign company (CFC). See Controlled foreign companies (CFCs) in the Group taxation section for more information.

**Deductions**
The general deduction scheme is fairly standard, although the Greenlandic Tax Agency seems to have a restrictive view of the kinds of expenses that are deductible. One very unusual feature is that dividends paid are deductible for the distributing company.

**Depreciation and amortisation**
Tax depreciation is not required to be in coherence with book depreciation.

Operating assets can be depreciated by 30% a year on a declining-balance basis, ships and aeroplanes can be depreciated by 10% on a straight-line basis, and buildings and installations can be depreciated by 5% on a straight-line basis. Oil and mineral licences can be depreciated over ten years (oil) and four years (minerals) on a straight-line basis. If the lifetime of the licence is shorter than ten or four years, the licences are depreciated over the lifetime of the licence on a straight-line basis.

Depreciation allowances that are recaptured as part of a capital gain on the sale of an asset are generally fully taxable.

Unusually, companies are allowed a depreciation relief corresponding to gains on divested depreciable assets; however, this rule may not reduce the company's income to less than zero (or less than the balance of depreciable assets in the case of operating assets).
**Goodwill**
Goodwill can be depreciated as an operating asset (i.e. by 30% on a declining-balance basis).

**Start-up expenses**
No specific rules in Greenlandic tax law govern the treatment of start-up expenses. Instead, these expenses are treated according to general tax law.

**Interest expenses**
Interest expenses are generally deductible under Greenlandic tax law. However, there are some limitations (see Thin capitalisation in the Group taxation section).

**Bad debt**
Companies can deduct losses on bad debt for Greenlandic tax purposes only to the extent the losses are realised. Note that there is a high threshold for when a loss is deemed to be realised.

**Charitable contributions**
Contributions to charity are not deductible for Greenlandic tax purposes.

**Pension expenses**
Pension expenses are deductible as operating expenses.

**Payments to directors**
Payments to directors are deductible as operating expenses.

**Research and development (R&D) expenses**
R&D expenses may be deductible or not, depending on whether they are deemed operating expenses or capital expenses.

**Bribes, kickbacks, and illegal payments**
There is no published practice on the deductibility of bribes, kickbacks, return commissions, and the like. In Danish and Greenlandic practice, illegal payments are generally not deductible. Since 2008, any bribery payments, whether in or outside Greenland and whether towards a national or international authority, have been a criminal offence. Consequently, it may reasonably be inferred that no such payments are deductible.

**Fines and penalties**
Fines and penalties are not deductible for Greenlandic tax purposes.

**Taxes**
Income taxes are, in general, not deductible for corporate tax purposes. Excise duties are deductible.

**Other significant items**
A highly unusual item is that dividends distributed are deductible in the hands of the distributing company. If a decision to distribute is made before the deadline for filing the income tax return (1 May) on the basis of the preceding year’s profits, the deduction may be carried back into the preceding year.

**Net operating losses**
Tax losses can be carried forward for up to five years. However, oil and mineral licence holders can carry losses forward indefinitely.

Tax losses may not be carried back and utilised in previous income years.
Greenland

Tax losses are forfeited at ‘significant’ change of ownership or, unusually, activity of the company. Dispensation is available. ‘Significant’ is interpreted as 30% of ownership rights.

**Payments to foreign affiliates**

A Greenlandic corporation can claim a deduction for royalties, management fees, and similar payments made to foreign affiliates, provided that such amounts are made on an arm’s-length basis and reflect services received. Interest at normal commercial rates paid to foreign affiliates generally will be allowed as a deduction but is subject to thin capitalisation (see Thin capitalisation in the Group taxation section).

**Group taxation**

Joint taxation is not possible in Greenland.

**Transfer pricing**

Greenlandic transfer pricing rules apply to transactions between related parties (e.g. intra-group transactions). The rules apply when a company or person directly or indirectly owns at least 50% of the share capital or 50% of the voting rights in another company.

Companies are obligated to disclose in the annual tax return certain information regarding type and volume of intra-group transactions. There is currently no practice regarding requirements for transfer pricing documentation.

**Thin capitalisation**

Greenland limits interest deductions according to the thin capitalisation rule. This rule works to disallow gross interest costs and capital losses on related party debt to the extent the overall debt-to-equity ratio exceeds 2:1. Related party debt is defined so as to include external bank debt if group member companies or shareholders have provided guarantees to the bank. This rule does not apply if the controlled debt is less than 5 million Danish kroner (DKK).

**Controlled foreign companies (CFCs)**

According to the Greenlandic CFC rules, a Greenlandic company has to include in its taxable income the CFC income of a foreign subsidiary if all of the following criteria are met:

- The Greenlandic company, alone or together with other group companies, individual owners, and/or their next of kin, controls the foreign company.
- During the income year, the subsidiary's financial assets, on average, make up more than 10% of the subsidiary's total assets.
- The foreign company is taxed 'substantially lower' than under Greenlandic taxation.

There is no black or white list that exempts subsidiaries resident in certain countries.

CFC income is defined in some detail and includes a broad spectrum of passive and financial income.

**Tax credits and incentives**

There are no tax credits or tax incentives in Greenland in general. However, current oil licence holders do, in their surplus royalty basis, qualify for an extra deduction in their capital and operating expenditure of 21.75%, 29.25%, and 36.75%, respectively, plus the Danish discount rate, provided that the surplus royalty basis never has been positive. This is akin to the so-called ‘uplift’ known to other oil tax regimes.
Newer licences are subject to different royalty regimes, including different ‘uplift’ regimes. Please refer to Oil companies in the Taxes on corporate income section.

It is also possible for mineral licence holders to get a tax holiday from the corporate tax. However, this is only possible if the corporate tax is replaced entirely by other forms of fiscal levies or duties, which provide the Greenlandic government with at least the same income as the corporate tax would have done.

**Foreign tax credit**
According to Greenlandic tax law, relief is generally available to credit foreign tax paid on non-Greenlandic source profits against the Greenlandic tax on the same profits. If relief is offered by treaty, the level of relief is capped at the level offered by the treaty. There are only treaty provisions to this effect with Canada, Denmark, the Faroe Islands, Iceland, and Norway.

**Withholding taxes**

Greenland has the following withholding taxes (WHTs):

- Dividends: 36% to 44%, depending on the local municipality (may be reduced by treaty). It should be noted that paid dividends are deductible in the corporate tax base.
- Interest: There is no WHT on interest.
- Royalties: 30% (may be reduced due to treaty reduction).

Treaty rates are as follows:

<table>
<thead>
<tr>
<th>Recipient</th>
<th>Dividends (%)</th>
<th>Interest (%)</th>
<th>Royalties (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Denmark</td>
<td>35</td>
<td>0</td>
<td>10</td>
</tr>
<tr>
<td>Faroe Islands</td>
<td>No relief (44% to 46%)</td>
<td>0</td>
<td>25</td>
</tr>
<tr>
<td>Iceland</td>
<td>35</td>
<td>0</td>
<td>15</td>
</tr>
<tr>
<td>Norway</td>
<td>35</td>
<td>0</td>
<td>10</td>
</tr>
</tbody>
</table>

**Tax administration**

**Taxable period**
The taxable period is the calendar year. Permission can be granted to use a 12-month period other than the calendar year, provided that the period starts on the first day of a calendar month.

**Tax returns**
Tax returns are completed on the basis of audited financial accounts with adjustments for tax. Tax returns should be filed no later than four months following the end of the income year, meaning 1 May for companies using the calendar year as the income year.

The tax system, in practice, is based on self-assessment. Tax assessments are made by the tax authorities on the basis of the tax return.

**Payment of tax**
The corporate tax is due for payment by 20 November of the following year. Greenland does not have an on account tax system, so there are no advantages in paying the tax prior to this date.
Greenland

Penalties
A tax surcharge of DKK 200 per day (maximum DKK 5,000) is levied for late submission of the tax return.

Tax audit process
Tax audit is a rather informal procedure, whereby questions for clarification and/or documentation may be asked by the Greenlandic Tax Agency. There are few rules governing audit other than statutory limitation rules.

Statute of limitations
The general statute of limitations is 31 October in the fifth calendar year after that of the end of the relevant income year.

Topics of focus for tax authorities
There does not seem, presently, to be particular focus areas of the Greenlandic Tax Agency, and none have been publicly announced.

Other issues
United States (US) Foreign Account Tax Compliance Act (FATCA)
In relation to the US FATCA, a Model 1 Intergovernmental Agreement (IGA) is treated as ‘in effect’ by the US Treasury as of 29 June 2014. The United States and Greenland have reached an agreement in substance, and Greenland has consented to disclose this status. In accordance with this status, the text of such IGA has not been released and financial institutions in Greenland are allowed to register on the FATCA registration website consistent with the treatment of having an IGA in effect, provided that the jurisdiction continues to demonstrate firm resolve to sign the IGA as soon as possible.

**Significant developments**

There have been no significant corporate tax developments in Guatemala during the past year.

**Taxes on corporate income**

The tax system of Guatemala is a unitary system, whereby income of all kinds, other than capital gains, is lumped together and subject to a single tax. The components of gross income subject to tax are usually business income, interest, dividends, rent, salaries, and services. Companies are subject to income tax only on their Guatemala-source income. Dividends and other income payable abroad are taxed separately by way of withholding taxes (WHTs).

For income tax purposes, there are two main systems that taxpayers may subscribe to: the system on earnings from lucrative activities and the simplified optional system on income from lucrative activities. The taxpayer chooses what system the company is registered for. Once a system is chosen, it cannot be modified until the next tax period. The request for the modification must be requested before the tax authorities at least one month prior to the new tax period.

These systems are explained below.

**System on earnings from lucrative activities**

Under the system on earnings from lucrative activities, the tax is determined and paid at the end of each quarter, without prejudicing the end-of-period final tax liquidation. The tax rate is 25% on net income.

This system allows taxpayers to deduct costs and expenses incurred during the period, according to requirements established by law.

**Simplified optional system on income from lucrative activities**

Under the simplified optional system on income from lucrative activities, the tax is payable under flat tax withholdings (the tax is to be retained by either the customer or the recipient of services) or by direct remittances to the tax office made monthly within the first ten working days of the month following the invoice date. The tax rate is 5% on gross income that ranges from 0.01 Guatemalan quetzales (GTQ) to GTQ 30,000 and 7% on the excess.

**Local income taxes**

There are no specific state or provincial government taxes on income other than the two systems previously described.
Corporate residence

The place of incorporation determines corporate residence. Entities incorporated under Guatemalan laws are required to have their fiscal and corporate residence in Guatemalan territory.

Permanent establishment (PE)

PE includes activities conducted in the country in a continuous manner, either in a fixed business place or facilities conducting work of any kind, except for insurance and refinancing activities, brokers, independent agents, etc. acting in the normal turn of events.

Other taxes

Value-added tax (VAT)

A 12% VAT is levied on the sale or transfer of merchandise and on non-personal services rendered or effected in Guatemala. The tax is payable to the government by way of the invoice method, whereby the tax charged to the customers is offset by the VAT paid over purchases, and the government collects the net resulting amount. The issuance and circulation of credit titles is VAT-exempt.

Sale of goods

The taxable amount on the sale of goods includes the sales price, less any discounts provided under sound commercial practices, plus other charges shown on the invoice.

Services

The taxable amount of services includes the price of the service, less any discounts provided under sound commercial practices, plus financial charges and products used to render the services.

Imports and leases

The tax base for imports is the value declared for import duties computation purposes.

The tax base for leases of movable or immovable property is the value of the lease.

Exempted sales and services

The following items are exempt from VAT:

- Importations made by:
  - cooperatives legally constituted as registered on imported machinery, equipment, and other goods relating to the activity or service of the cooperative
  - individuals and juridical entities under temporary importation regulations, and
  - diplomatic and consular missions accredited before the Guatemalan government.
- Banking institution services and their agents.
- The issuance, circulation, and transfer of credit bonds, value bonds, and stocks of any kind.
- Interest accrued by credit bonds and other obligations issued by mercantile partnerships, negotiated through an authorised stock exchange.
- Exports of goods and services.
- Contributions and donations to educational, cultural, assistance, or security service partnerships, constituted as not-for-profit entities.

VAT return

The amount payable to the Superintendencia de Administración Tributaria (SAT), Guatemala’s tax authority, is the difference between the debits and credits accrued
during the tax period (one month) and is paid monthly by filing a tax return in the following calendar month at the end of each tax period.

**Refunds of VAT**
The VAT credit can be claimed on monthly, quarterly, or semiannual tax periods. The refund of VAT credit corresponds to exporter taxpayers who cannot offset the VAT credit with VAT debts.

In addition, the VAT credit can be claimed by those taxpayers who have a high percentage of sales to entities exempt from VAT.

**Import duties**
The Customs Duties on Imports (DAI) are contained in the Central American Tariff System (SAC), which contains the tax rates applicable to goods imported into the Guatemalan Territory, ranging from 0% to 20%.

The import duties apply to the customs value declared by the importer.

**Excise taxes**
Excise taxes are applicable to specific activities, such as Fuel Distribution Tax, Alcohol & Beverages Distribution Tax, and Tobacco Distribution Tax.

**Real estate taxes**
Real estate taxes are assessed annually at GTQ 2 per thousand on declared property values of from GTQ 2,000 to GTQ 20,000, at GTQ 6 per thousand on values from GTQ 20,000 to GTQ 70,000, and at GTQ 9 per thousand on values in excess of GTQ 70,000 (e.g. property valued at GTQ 1 million will pay real estate taxes of GTQ 9,000).

**Transfer of property**
VAT is payable on the first sale of real estate, and subsequent sales are taxed under the stamp tax regime.

**Stamp taxes**
Other than sales invoices, contracts, and documents subject to VAT, and other minor exemptions, a stamp tax must be paid on all documents covering commercial and legal transactions (e.g. collection of dividends), either by preparing the document on papel sellado, which is special stamped paper, or by affixing stamps on the documents. This tax is also assessed on documents issued abroad, other than drafts or promissory notes and commercial invoices from foreign suppliers. Letters of credit and acceptances involving international transfers of funds are generally exempt from stamp taxes.

The normal tax rate is 3% and is calculated on the face value of the documents or on the gross value of the related transaction.

The stamp tax on dividend payments or credits has been repealed, and a 5% income tax should be paid on dividend payments or credits in account equity.

**Solidarity tax (Impuesto de Solidaridad or ISO)**
The ISO tax rate of 1% is assessed on the net assets of a corporation, or on the gross income of a corporation, whichever is higher, and there is no limit on the amount to be paid. Tax paid may be credited against the corporation’s income tax. If the ISO exceeds the income tax, no reimbursement is possible.

The tax is to be paid quarterly on the basis of the corporation’s opening balance sheet for each fiscal period.
Guatemala

**Payroll taxes**

**Social security contributions**
Corporations contribute 12.67% of their monthly payroll and employees contribute 4.83% of their monthly salary to social security.

**Branch income**

In Guatemala, branches are taxed as any other legal entity. There are no specific taxes for branches.

**Income determination**

**Inventory valuation**
For tax purposes, taxpayers are authorised to use any of the following methods for valuing stocks (i.e. inventory), provided they technically fit the taxpayers' business and are consistently applied:

- Cost of production.
- First in first out (FIFO).
- Weighted average.
- Historical price of assets.
- Estimated cost at a fixed price (additional for livestock activities).

**Capital gains**
The regime of capital income, capital gains, and capital losses is established with the following tax rates:

- Real estate equity income: 10%.
- Income from trading movables: 10%.
- Capital gains and losses: 10%.
- Incomes from lotteries and raffles: 10%.

Capital losses can be netted only against capital gains, up to a maximum of two years.

**Dividend income**
Dividends earnings and profits are subject to a 5% income tax.

**Interest income**
All interest income is subject to a 10% income tax.

**Foreign income**
Foreign-source income received by a domestic corporation is non-taxable under Guatemalan income tax law, provided that it does not relate to a service or activity rendered in Guatemalan territory.

**Deductions**

Taxpayers under the system on earnings from lucrative activities may deduct costs and expenses from gross income, including the following.

**Depreciation**
Depreciation is calculated annually using the straight-line method. The tax authority may authorise a different method on request of the taxpayer. The annual maximum rates allowed as deductible expenses are the following:
### Guatemala

#### Asset Rate (%)
- Building and improvements 5
- Machinery and equipment 20
- Furniture and fixtures 20
- Vehicles 20
- Tools 25
- Tree and vegetable species 16
- Computer equipment 33.33
- Any other depreciable asset 10

#### Intangible assets
Intangible assets (e.g. goodwill, trademarks, manufacturing processes, patents, software, know-how) may be deductible under the straight-line method of amortisation over a period that depends on the conditions of the acquisition or creation of the intangible asset concerned, and cannot be less than five years. Goodwill actually paid can be amortised over a period of a minimum of ten years.

#### Start-up expenses
Start-up expenses are deductible.

#### Interest expense
The deduction of interest expense may not exceed the result of multiplying the interest rate by three times the average net total assets reported by the taxpayer in the corresponding annual tax return.

#### Uncollectible accounts
Uncollectible accounts arising in normal business operations can be deducted individually or, alternatively, via an allowance for doubtful accounts, which shall not exceed 3% of the debit balances of accounts and notes receivable.

#### Charitable contributions
Duly proven donations made to the government, the municipalities, and their agencies, as well as to duly authorised not-for-profit welfare, social service, and scientific associations and foundations, universities, political parties, and guild entities, are deductible. The maximum deductible amount for income tax purposes of each period shall not exceed 5% of the donor’s net income, up to a maximum of GTQ 500,000 per year.

#### Employee pension/retirement funds
The deduction of provisions to establish or increase employee pension and retirement funds or reserves is allowed, provided the government approves the related plans.

#### Severance compensation payments
Severance compensation payments are allowed as deductible expenses as well as limited allocations (not to exceed 8.33% of total annual salaries and wages) to a reserve for severance compensation. Provisions pertaining to actual liability for severance compensation per year are also allowed, provided the related plans, based on collective bargaining agreements, are approved by the employer and employees.

#### Fines and penalties
Charges, penalties, and interest charged by any government institutions are not deductible.

#### Taxes
All taxes are deductible, except income tax and VAT when these are not considered as a cost.
Guatemala

**Net operating losses**
Operating losses may not be carried forward for deduction from otherwise taxable profits. Guatemalan laws also do not permit carryback of losses.

**Payments to foreign affiliates**
Deduction for royalties will be allowed, up to 5% of gross income. The deductible expenses for technical services rendered from abroad shall not exceed 5% of gross income.

Expenses incurred abroad by non-residents in connection with income earned from Guatemalan sources cannot be deducted for income tax purposes by merely having the supporting receipts, as the regulations to the law do not permit such a deduction for these purposes, unless these expenses are related with the Guatemalan company operations and these expenses are needed for generating taxable income.

**Group taxation**
There is no consolidation for tax purposes, as each group entity is treated as an independent taxpayer that shall file its own tax returns.

**Transfer pricing**
All companies that have any transaction with a related party abroad should have a transfer pricing study.

From a Guatemalan transfer pricing perspective, the scope of application of the rules of valuation of transactions between related parties reaches any operation that has been carried out between a person living in Guatemala with a resident abroad.

Local legislation allows the selection of traditional methods and profit-based methods consistent with the Organisation for Economic Co-operation and Development (OECD) guidelines as well as a sixth method applicable to imports and exports.

Advance pricing agreements (APAs) are permitted, and it is also stated that the tax authority can reclassify activities according to its true nature in accordance with Tax Code statements.

**Thin capitalisation**
Thin capitalisation applies regarding deductible expenses for interest paid. The deductible amount for such costs may not exceed the value of multiplying the annual maximum simple interest rate determined by the Guatemalan Monetary Board for tax purposes by three times the amount of average total net assets submitted by the taxpayer in the annual income tax return.

Average total net assets is defined as the sum of total net assets of the previous year and total net assets at the end of the year in force (both values must correspond to the amounts filed in the annual income tax return of each period of final settlement) divided by two. Total net assets are defined by law to correspond to the book value of all goods that are actually the property of the taxpayer.

**Controlled foreign companies (CFCs)**
Guatemala does not have any provisions regulating CFCs.
**Tax credits and incentives**

**Foreign tax credit**
Guatemala has no provisions or agreements signed to avoid international double taxation, and no foreign tax credit is allowed.

**Drawback industries (maquila)**
The Law of Promotion and Development of Exports Activities and Drawback Industries is known in Guatemala as *maquila*. This law seeks to promote, encourage, and develop the manufacture of products within areas controlled by the Customs Authority for export to countries outside the Central American region, as well as to regulate exporting and drawback activities.

The exporter may apply for authorisation to operate under any of the following three systems provided by the law:

- Export under a temporary admission system.
- Export under the reimbursement of duties system.
- Export under the total added national component system.

Tax incentives and benefits of the law include the following:

- Exemption of taxes, import duties, and other charges on imports of machinery and equipment, including VAT.
- Discontinuance of VAT payments on temporary raw material imports.
- Exemption of income tax for ten years on profits obtained under this law.

**Withholding taxes**
The following WHT rates apply on payments to non-resident corporations or individuals:

<table>
<thead>
<tr>
<th>Payment</th>
<th>WHT (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Dividends, international freight, telecommunications (1), electric energy</td>
<td>5</td>
</tr>
<tr>
<td>Interest (2)</td>
<td>10</td>
</tr>
<tr>
<td>Royalties; salaries; commissions; professional fees; professional, technical, economic, or financial assessment</td>
<td>15</td>
</tr>
<tr>
<td>Other</td>
<td>25</td>
</tr>
</tbody>
</table>

Notes

1. For international news transmission supplied from abroad to local entities, the rate is 3%.
2. Interests will not be taxed (i.e. no withholding applies) when:
   - These interests are paid to a multilateral entity.
   - These interests are paid from a Guatemalan banking or financial entity to a similar entity abroad.

Non-residents can operate in Guatemala with or without PE; accordingly, income tax treatment depends of the circumstance as follows:

- Non-residents with PE will be subject to income tax, choosing one of the two methods of payment established for residents.
- Non-residents without PE will be subject to WHT, applying specific rates according to the nature of the services rendered.

**Tax treaties**
Guatemala has no tax treaties in force.
Guatemala

**Tax administration**

**Taxable period**

**System on earnings from lucrative activities**
Under the system on earnings from lucrative activities, the annual final tax liquidation period begins on 1 January and ends on 31 December of each year.

**Simplified optional system on income from lucrative activities**
Under the simplified optional system on income from lucrative activities, taxes are paid on a monthly basis.

**Tax returns**

**System on earnings from lucrative activities**
Under the system on earnings from lucrative activities, returns are due after the end of the fiscal period (31 December) but no later than 31 March of each year.

The income tax return shall be accompanied by the documents required by the regulations, which might include a:

- balance sheet
- statement of results of operations
- statement of cash flows, and
- statement of cost of production.

Documents must be duly certified by a professional or an independent accounting firm. The financial statements that accompany the return shall agree with both those recorded in the financial statements ledger and those destined for publication.

Both the income tax return and exhibits thereto shall be signed by the taxpayers, their agent, or their legal representative or by any other responsible persons so determined by this law and the Tax Code.

**Simplified optional system on income from lucrative activities**
Under the simplified optional system on income from lucrative activities, there is an obligation to file an annual informative tax return, which is due on 31 March of each year.

**Payment of tax**

**System on earnings from lucrative activities**
Under the system on earnings from lucrative activities, taxpayers are required to prepay their estimated annual income tax liability in quarterly instalments. The balance is due upon filing the return.

Taxpayers may choose one of the following procedures for computing estimated quarterly tax liability:

- Tax on income shown by partial closure of accounts or computation of presumed liquidation of operations at the end of each quarter.
- Tax on 5% of overall gross income earned during the corresponding quarter of the preceding year (5% of the 30% income tax rate equals 1.5%).
- Tax equivalent to one-fourth of the tax paid for the immediately preceding tax year.

**Simplified optional system on income from lucrative activities**
Under the simplified optional system on income from lucrative activities, tax is payable via flat tax withholdings (the tax is to be retained by either the customer or the recipient...
of services) or by direct remittances to the tax office made monthly within the first ten working days of the month following the invoice date.

Taxes on income are governed by the income tax law, *Ley de Actualización Tributaria*, and its related regulations. Administration of the law is vested with the SAT.

Taxpayers registered before the tax administration under this system will settle and pay the tax through the withholding system. Persons or entities obligated to withhold are those taxpayers who pay or credit into account for the acquisition of goods and services to the taxpayers registered under this system.

**Tax audit process**
The tax authorities can request specific information at any moment. If necessary, a tax audit can be carried out. The tax authorities must formally notify the taxpayer of any specific adjustments, and the taxpayer has 30 working days to file a response. After filing the response, the taxpayer will again be notified by the tax authorities if the adjustments are confirmed or overturned.

**Statute of limitations**
The right of the tax administration to checks, adjustments, corrections, or determinations of tax liabilities; settle and enforce interest and penalties; and enforce payment of taxpayers must be brought within four years. In the same period, taxpayers must exercise their right of recourse for overpaid or unduly charged taxes, interest, penalties, and fines.

**Topics of focus for tax authorities**
The tax authorities normally focus on the following:

- Deductible expenses.
- VAT credits.
- WHT.
- Capital gains.

---

**Other issues**
Accurate and current information regarding taxation in Guatemala is often difficult to obtain as the country lacks reporting services such as those available in other countries. It is also difficult to determine how the tax laws will be applied in practice in complex situations. The laws and regulations are limited and ordinarily cover only the most common situations. The system of legal precedent resulting from court decisions is narrowly used, and each issue is resolved by reference to the respective codes. Guatemala has shown little interest in tax planning, but it is possible to have informal consultations with the tax authorities and to obtain authoritative rulings in many cases. Discrepancies between government and management criteria are commonly brought to judgment by the Constitutional Court, whose binding sentences generally abrogate the laws in dispute.

Significant developments

Guernsey has signed intergovernmental agreements (IGAs) with the United States (US) and United Kingdom (UK) regarding the implementation of the Foreign Account Tax Compliance Act (FATCA). For further information, please see the Other issues section.

Guernsey has signed tax information exchange agreements (TIEAs) with 57 jurisdictions and full double taxation treaties (DTTs) with Cyprus, Hong Kong, Isle of Man, Jersey, Liechtenstein, Luxembourg, Malta, Mauritius, Monaco, Qatar, Seychelles, Singapore, and the United Kingdom.

The intention to introduce a Share Transfer Duty on Real Property was announced in the 2013 Guernsey Budget and reiterated in the 2015 Guernsey Budget. It has been recognised that Document Duty, a duty levied on the sale of real property, is being avoided where real property transactions have been through a corporate vehicle. It is expected that the draft law will be published during 2015 and the duty will be in line with the current Document Duty rates.

Following the 2015 Budget announced in October 2014, the 10% intermediate tax rate has been widened, with effect from 1 January 2015, to include licensed fund administration businesses providing administration services to unconnected third parties.

The Treasury and Resources Department Minister has indicated that the review of the implementation of a General Sales Tax in Guernsey is on his agenda. However, any plans for implementation were recently placed on hold for the time being by the States of Guernsey.

 Taxes on corporate income

Resident corporations are liable to tax on their worldwide income. Non-resident corporations are subject to Guernsey tax on their Guernsey-source income.

Companies pay income tax at the current standard rate of 0% on taxable income.

Income derived from a banking business, insurance business, and licensed fund administration business is taxable at 10%.

‘Banking business’ is broadly defined as income that arises as a result of the provision of credit facilities by any type of company and the utilisation of customer deposits. Income derived from licensed fiduciaries (with regulated activities), licensed insurers (in respect of domestic business), licensed insurance intermediaries, and licensed insurance managers is also taxable at 10%. In addition, income derived by licensed fund administration businesses from providing administration services to unconnected third
parties falls within the 10% tax rate, with effect from 1 January 2015. Relief is available for eligible expenses that are allocated against different streams of income.

Any income derived from the exploitation of property located in Guernsey or received by a publicly regulated utility company is subject to tax at the higher rate of 20%.

**Exempt companies**
Some collective investment schemes (CISs) and unit trusts may qualify for exempt status, which will place them completely outside the Guernsey tax regime. In addition, any body that forms part of, or contributes to, the overall structure of a CIS may claim exempt company status. This removes doubt in relation to the entities that are involved in the management or support of a CIS qualifying for exempt status. For each year for which exempt status is sought, a charge of 1,200 British pounds sterling (GBP) is levied.

One of the following conditions, among others, must be met for the company to be considered exempt:

- The company is beneficially owned outside of Guernsey.
- No Guernsey-resident individual or company has a beneficial interest in the company (with the exception of shareholders, loan creditors, or nominees/trustees).

**Loans to participators**
If a company makes loans with preferential terms to an individual or entity connected with the company, this will be deemed to be income in the hands of the debtor, and the creditor company will be required to account for, withhold, and pay the tax. Certain exemptions apply.

**Local income taxes**
Guernsey does not operate any local government taxes.

**Corporate residence**
All Guernsey-registered companies are regarded as tax resident on the island unless granted exempt company status. In addition, a company will be treated as a resident in Guernsey (regardless of where it is incorporated) if shareholder control is exercised by persons resident on the island.

**Permanent establishment (PE)**
The Income Tax (Guernsey) Law, 1975 defines PE as including:

- a branch
- a factory, shop, workshop, quarry, or building site, or
- a place of management.

Note that the fact that a body's directors regularly meet at a particular place does not, in itself, make that place a PE of that body.

**Other taxes**

**Value-added tax (VAT)**
Guernsey does not operate a VAT or goods and services tax (GST).

**Customs and excise duties**
In accordance with the European Community (EC) Customs Code and the Implementing Regulation, Customs Import Duty is liable on all goods arriving in the Customs territory.
Guernsey, Channel Islands

of the Community. The rates of duty are set by the European Community and are the same in all countries of the European Community.

The rates vary according to the commodity. Some may be as high as 22%, while, for other goods, the rate may be free.

The Channel Islands are not within the fiscal territory of the European Union (EU), and, as such, the Community Regulations that concern excise duties do not apply. Excise duty is classed as an internal tax.

The rates are reviewed annually by the States of Guernsey and set at budget time, which is usually in November. These cover Guernsey and Alderney, while Sark has its own rates set by the Chief Pleas.

An additional 15% rate of duty is applicable on some goods originating in the United States.

Property taxes
Income from Guernsey land and buildings is subject to Guernsey income tax at 20%. No other property taxes apply.

Transfer taxes
Guernsey does not levy transfer taxes.

It is expected that a draft law will be published during 2015 introducing a Share Transfer Duty on Real Property in order to counter avoidance of Document Duty by transferring property through corporate vehicles. Document duty is a duty levied on the sale of real property.

Stamp taxes
Guernsey does not levy any stamp duties.

Social security contributions
An employer, for the purposes of Social Insurance, is anyone who has employees. An employee is anyone who is gainfully occupied in employment under a contract of service in Guernsey or Alderney.

In general, contributions are required from both employer and employee in respect of any employed person who is over school-leaving age and under 65. Employer social security contributions are levied on the gross employment income of the employee at 6.5%.

Employer social security contributions for 2015 are calculated on a monthly lower earnings limit of GBP 567.67, which is the level of earnings at which an employer becomes liable for the payment of contributions. The upper limit for 2015, which is the highest level of earnings on which contributions are calculated, is GBP 11,271 per month.

Payroll taxes
The Employee Tax Instalment (ETI) Scheme is a scheme whereby the employer deducts income tax from its employees and pays this over to the Guernsey Income Tax Office.

The ETI Scheme applies to all employees. For the purposes of the ETI scheme, an employee is an individual holding or exercising an office or employment, including a company director, part-time workers, casual workers, and sub-contractors.

The ETI Scheme operates on a quarterly basis. Throughout each quarter, the employer should deduct tax from their employees on each payday. Details of the gross weekly or
monthly wage and deductions made must be recorded and returned with the relevant remittance by the 15th day of the month following the end of the relevant quarter (e.g. tax deducted during the first quarter needs to be submitted by 15 April).

**Branch income**

Branch income is taxed in the same manner as companies, at the appropriate rate according to the activity being undertaken.

No further tax is withheld on the transfer of profits abroad to group companies, provided no Guernsey-resident individual has an interest in the company.

**Income determination**

**Inventory valuation**

Inventory is valued at the lower of historical cost or net realisable value. Use of last in first out (LIFO) is not permitted. Generally, there are no material differences between accounts prepared on a normal accounting basis and those prepared on a tax basis.

**Capital gains**

Capital gains are not subject to tax in Guernsey.

**Dividend income**

All dividends paid by a standard tax-paying company (0%) are deemed to have been paid from income arising after 31 December 2007 (i.e. after the introduction of the zero/ten tax regime), unless the company elects to have them treated otherwise.

**Stock dividends**

Stock dividends may be treated as income.

**Interest income**

Interest income received by a standard tax-paying company is taxable at 0%.

*Please refer to the Taxes on corporate income section for further information on companies liable to tax at the company intermediate rate (10%).*

**Foreign income**

Resident corporations are liable to tax on their worldwide income. Income tax is levied on foreign branch income when earned, and on investment income from foreign dividends, interest, rents, and royalties. Double taxation is mitigated either through unilateral relief (by giving credit for foreign taxation of up to three-quarters of the effective Guernsey rate) or by treaty relief.

**Deductions**

Normally, business deductions are allowed if they are incurred wholly and exclusively for the purpose of trade.

**Depreciation**

Annual allowances are granted for income tax purposes in respect of the following:

<table>
<thead>
<tr>
<th>Assets</th>
<th>Basis</th>
<th>Rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Stone, brick, concrete, or other substantial structures</td>
<td>Reducing-balance</td>

</tr>
<tr>
<td>Other expenditure</td>
<td>Straight-line</td>
<td>5</td>
</tr>
</tbody>
</table>

* Section 123 (3) of the Law defines expenditure and circumstances on which initial allowances can be claimed in respect of glasshouses

#### Goodwill

The amortisation of goodwill is not a deductible expense in Guernsey.

#### Start-up expenses

Pre-trading expenditure incurred within the 12 months prior to the commencement of trade, which would have been allowable had it occurred on the first day of trading, may be allowed as a deduction in computing the profits of the first accounting period.

#### Interest expenses

Interest is a deductible expense where it is incurred wholly and exclusively for the purposes of trade.

#### Bad debt

Bad and doubtful debts discovered in the accounting period to have become bad or irrecoverable may be deducted from taxable profits, but the deduction may not exceed the amount written off as such in the books of the business.

#### Charitable contributions

Charitable donations by companies are not deductible for Guernsey income tax purposes.

#### Fines and penalties

Fines or penalties incurred are not deductible for Guernsey income tax purposes.

#### Taxes

Income tax paid is not deductible in computing taxable income.

#### Net operating losses

Losses from one class of income may be used to offset the profits from another class of income if both classes are subject to tax at the same rate. Unrelieved trading losses may be carried forward to offset future trading income.

Upon cessation of trade, operating losses arising from balancing allowances may be carried back to the previous two years of charge to be relieved against past trading profits.

#### Payments to foreign affiliates

Guernsey-source royalties and long-term interest are subject to taxation at source. Relief is obtained by the retention of the tax deducted. Short-term interest, unless owed to an authorised bank, is not deductible, unless the advance in respect of which it is paid is used wholly and exclusively for the purposes of trade. Other fees must be paid on an arm’s-length basis.
Group taxation

Group loss relief may be claimed when both companies are members of the same group and the companies are either carrying on business in Guernsey through a PE or incorporated in Guernsey. Loss relief is available only against income taxed at the same rate.

A claim for group loss relief must be made by the claimant company within two years after the end of the calendar year in which the relevant accounting period ended, and the claim must be accompanied by a declaration by the surrendering company that it consents to the surrender.

Transfer pricing

Guernsey does not currently have specific transfer pricing legislation in place. However, the general anti-avoidance provisions do apply.

Thin capitalisation

Guernsey does not currently have specific thin capitalisation legislation in place. However, the general anti-avoidance provisions do apply.

Controlled foreign companies (CFCs)

Guernsey does not currently have specific anti-avoidance legislation in relation to CFCs. However, the general anti-avoidance provisions do apply.

Tax credits and incentives

In view of the low rate of tax, no special incentives are available to local businesses in Guernsey.

Foreign tax credit

Guernsey has signed full DTTs with Cyprus, Hong Kong, Isle of Man, Jersey, Liechtenstein, Luxembourg, Malta, Mauritius, Monaco, Qatar, Seychelles, Singapore, and the United Kingdom and TIEAs with 57 other jurisdictions.

If no bilateral agreement exists, relief available to Guernsey-resident companies is the lesser of the other territory’s effective rate or three quarters of the Guernsey effective rate.

Withholding taxes

Companies paying dividends to Guernsey resident individuals are required to deduct or account for the difference between the tax incurred by the company and the shareholder’s individual tax rate (20%) on actual distributions.

A company is required to withhold tax when it is acting as an agent and making payments to a non-resident liable to Guernsey tax.

Guernsey does not levy any other forms of withholding tax (WHT).

Double taxation treaties (DTTs)

The table below sets out the rates of WHT applicable to the most common payments of dividends and interest under Guernsey domestic law where such a liability arises and the reduced rates that may be available under an applicable DTT. Please refer to specific treaties to ensure the values are up to date.
### Guernsey, Channel Islands

#### Tax administration

**Taxable period**
The tax year runs from 1 January to 31 December, although companies can adopt a year-end of their choice.

**Tax returns**
It is compulsory for all Guernsey companies to file their tax returns online.

Companies are required to file their income tax return on 30 November following the calendar year in which the accounting period ends. Should a company meet the conditions below, a simplified return may be filed without either a computation or financial statements.

In order to qualify for a simplified return, a company must have none of the following:

- Guernsey employees (other than directors).
- Guernsey-resident individual beneficial owners.
- Income from utilities (e.g. Guernsey water or electricity companies).
- Income from Guernsey properties.

### Notes

1. Resident corporations receiving dividends and interest are not subject to any WHT.
2. For resident individuals, if the income has been taxed on the paying company at 0%, a 20% deduction should be made. If the income has been taxed on the paying company at 10%, 10% WHT should be applied. If the income has been taxed on the paying company at 20%, there should be no deduction at source.
3. Resident individuals are paid interest gross, without any WHT; however, individuals are required to file an annual tax return and pay 20% income tax on any interest received.
4. Where a reduced rate of withholding is allowed by any treaty, whether on dividends or interest, it is usual for this reduced rate to be stated not to apply to amounts that are in excess of a normal commercial rate of interest, or where the dividend or interest is effectively connected to a PE in Guernsey of the recipient; such general limitations are not specifically indicated in the table. Moreover, note the general requirement for dividends and/or interest to be beneficially owned by the recipient in order to access benefits under a treaty.
5. Dividends paid by a company that is a resident of Guernsey to a resident of Luxembourg may be taxed in Luxembourg. However, such dividends may also be taxed in Guernsey, and if the beneficial owner of the dividends is a resident of Luxembourg, the tax charged may not exceed 5% of the gross amount of the dividends if the beneficial owner is a company that directly holds at least 10% of the capital of the company paying the dividends or 15% of the gross amount of the dividends in all other cases.
6. The Explanatory Note to the Guernsey-UK DTT specifically excludes dividends and interest from the scope of the DTT.
• Income from a banking business.
• Income from domestic insurance business.
• Income from a licensed fund administration business providing administration services to unconnected third parties.
• Loans to Guernsey participators.
• Distributions made to Guernsey-resident individuals.

Should a company have Guernsey-resident individual beneficial members and/or make loans to participators, it will be required to submit quarterly returns accounting for distributions and loans advanced.

**Payment of tax**
In Guernsey, tax is payable in two instalments, on 30 June and 31 December in the year of charge (calendar year). If liabilities have not been determined, this may necessitate initially raising estimated assessments based on prior year figures and raising a final assessment when the figures are agreed. Once the Income Tax Office has received the company's income tax return, they will issue an assessment detailing the final balancing income tax payment due. This amount will be due to be paid within 30 days of the issuing of the final assessment.

**Tax audit process**
The Income Tax Office will assess each company tax return as and when it is received, and the turnaround time from submission of a return to the issue of a final assessment varies dependent upon the workloads of the Income Tax Office but is generally dealt with in around three months.

**Statute of limitations**
The Director can raise an assessment in respect of any income that has not been assessed at any time no later than six years after the end of the year of charge in which the income arose.

**Topics of focus for tax authorities**
There are no current areas that the Guernsey Income Tax Office is particularly focusing on in regards to corporate taxpayer compliance.

**Other issues**

**US-Guernsey IGA**
On 13 December 2013, Guernsey signed an IGA regarding the implementation of FATCA. The IGA has been ratified by Guernsey's Parliament and is embodied in The Income Tax (Approved International Agreements) (Implementation) (United Kingdom and United States of America) Regulations 2014. Its operative provisions came into force from 30 June 2014.

**UK-Guernsey IGA**
On 22 October 2013, Guernsey signed a FATCA-style IGA with the United Kingdom (UK-Guernsey IGA) under which mandatory disclosure requirements may be imposed in respect of 'Investors in the Fund' who are UK resident or who are non-UK entities controlled by one or more UK resident individuals, unless a relevant exemption applies. The UK-Guernsey IGA has been ratified by Guernsey's Parliament and is embodied in The Income Tax (Approved International Agreements) (Implementation) (United Kingdom and United States of America) Regulations 2014. Its operative provisions came into force from 30 June 2014.
**Significant developments**

There have been no significant corporate tax developments in Guyana during the past year.

**Taxes on corporate income**

Resident companies are liable to tax on their worldwide income. Non-resident companies that carry on a trade or business in Guyana are subject to tax on the income that is derived from Guyana.

The current rates of corporate tax are as follows:

<table>
<thead>
<tr>
<th>Type of company</th>
<th>Corporate tax rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Telephone companies</td>
<td>45</td>
</tr>
<tr>
<td>Commercial companies</td>
<td>40</td>
</tr>
<tr>
<td>Other companies (non-commercial)</td>
<td>30</td>
</tr>
</tbody>
</table>

* A commercial company is one that derives at least 75% of its gross income from goods not manufactured by it or if it is engaged in telecommunication, banking, or insurance (other than long-term insurance).

**Minimum Corporation Tax (MCT)**

Commercial companies (other than insurance companies) are subject to tax at the rate of 40% of chargeable profits or 2% MCT of turnover, whichever is higher. Any excess MCT over tax at the normal rate is carried forward for setoff against corporation tax payable in subsequent years, provided that in no year is the tax payable reduced to less than 2% of turnover.

**Local income taxes**

There are no additional income taxes imposed on companies.

**Corporate residence**

Corporate residence is determined by reference to the location of the central management and control of the business of a company. There are no specific provisions within the law, and, as such, common law principles established by the courts are generally applied in determining residence. The place of incorporation is regarded as merely one of the factors to be taken into account in determining where central management and control are located.

**Permanent establishment (PE)**

There are no specific provisions in the legislation dealing with PE, so common law principles are applied.
**Other taxes**

**Value-added tax (VAT)**
VAT is charged at the rates of 16% or 0% on the taxable supply of goods and services within Guyana by a registered person.

Zero-rated supplies include goods for export, electricity supplied by Guyana Power and Light, water supplied by Guyana Water Incorporated, and international travel. Exempt supplies include educational services, residential rent, and financial services.

**Customs duties**
Customs duty is paid on all goods imported into Guyana. The rates of duty vary between 5% and 150%, depending on the classification of the item in question. Rates of duty are highest on ‘luxury items’, which include perfumes.

**Excise taxes**
Excise tax is imposed on specific imported or home-produced products. These products include alcoholic beverages, tobacco products, petroleum products, and motor vehicles.

**Property taxes**
Property tax is an annual tax charged on the net property of a person at the end of each year. ‘Property’ for the purpose of this tax refers to movable or immovable rights of any kind and effects of any kind. Net property is the amount by which the total value of the property exceeds the total value of all debt owned by the person at that time.

The tax is payable on 30 April at the following rates:

<table>
<thead>
<tr>
<th>Net property of a company (GYD *)</th>
<th>Property tax rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>On the first 1.5 million</td>
<td>0</td>
</tr>
<tr>
<td>On every dollar of the next 5 million</td>
<td>½</td>
</tr>
<tr>
<td>On every dollar of the remainder</td>
<td>¾</td>
</tr>
</tbody>
</table>

* Guyanese dollars.

**Stamp taxes**
Stamp duty is levied at various rates on several instruments, including affidavits, statutory declarations, deeds of conveyance, mortgages, share transfers, awards of arbitrator, powers of attorney, agreements, bills of exchange, receipts, and policies of insurance.

**Social security contributions**
As an employer, a company is also required to deduct and remit social security contributions on behalf of employees. Social security contributions are due on monthly earnings of employees up to GYD 143,455 and weekly earnings up to GYD 33,105. The rates of contribution are 7.8% for employers and 5.2% for employees.

**Branch income**
A branch is subject to tax in Guyana on all income directly or indirectly accruing in or derived from its operations in Guyana. The tax rates applicable on branch profits are the same as on corporate profits. In addition, branch profits, after deduction of corporate tax and reinvestments, are subject to withholding tax (WHT) at the rate of 20%. The position noted may be varied by the provisions of any applicable double tax treaties (DTTs).
**Income determination**

**Inventory valuation**
Inventory is valued at the lower of cost and net realisable value. Cost is generally determined using the average cost method for accounting and tax purposes, but the first in first out (FIFO) method is also acceptable.

**Capital gains**
Capital gains tax is imposed at the rate of 20% on the net chargeable gains derived from the disposal of capital assets. Gains derived from the disposal of an asset within 12 months of its acquisition are treated as ordinary income and subject to corporate tax at the applicable rates. Gains derived from the disposal of assets held for more than 25 years are exempt from tax.

**Dividend income**
Corporate tax is payable on dividends received by resident companies from non-resident companies. However, dividends paid by resident companies to other resident companies are exempt from tax.

**Interest income**
Interest income is taxed at the applicable rate of corporate tax.

**Foreign income**
Income earned by a non-resident company in Guyana is subject to tax in the year the income was earned. There is no deferral regime in Guyana.

**Deductions**
All revenue expenses wholly and exclusively incurred in the production of income are generally deductible.

**Depreciation**
Tax depreciation rates (wear and tear allowances) apply to the following classes of assets, as follows:

<table>
<thead>
<tr>
<th>Class of assets</th>
<th>Depreciation rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Aircraft</td>
<td>33 1/3</td>
</tr>
<tr>
<td>Boats</td>
<td>10</td>
</tr>
<tr>
<td>Buildings (housing and industrial)</td>
<td>5</td>
</tr>
<tr>
<td>Furniture and fittings</td>
<td>10</td>
</tr>
<tr>
<td>Motor vehicles</td>
<td>20</td>
</tr>
<tr>
<td>Office equipment, including computers and computer software</td>
<td>50</td>
</tr>
<tr>
<td>Other</td>
<td>15</td>
</tr>
<tr>
<td>Plant and machinery</td>
<td>20</td>
</tr>
</tbody>
</table>

Buildings that house machinery are depreciated using the straight-line method. Other assets may be depreciated using the declining-balance or straight-line methods.

**Goodwill**
Goodwill expense is generally not allowable in arriving at chargeable income.

**Start-up expenses**
No specific rules exist in respect of start-up expenses, but such expenses are generally not deductible.
Interest expenses
Interest expense incurred in the production of income is deductible. There is no restriction to the deductibility of this expense.

Bad debt
A bad debt is deductible where it has been incurred in the trade in which the company is engaged and has been respectively estimated to the satisfaction of the tax authority to have become bad in the year of income when the claim is made.

Charitable contributions
Charitable donations are not deductible unless they are made under a deed of covenant.

Fines and penalties
Fines and penalties are not generally deductible.

Taxes
Taxes are not generally deductible in arriving at taxable profit.

Net operating losses
Companies may carry forward losses for an unlimited number of years, but the losses may not reduce the taxable income in any year by more than 50%. Loss carrybacks are not permitted.

Payments to foreign affiliates
A corporation engaged in business in Guyana may claim a deduction for royalties and interest charges paid to foreign affiliates, provided the appropriate WHT is deducted and properly accounted for. Deductions for administrative, technical, professional, or other management services fees paid to a non-resident company or branch, referred to as 'head office expenses', are restricted to 1% of the annual turnover.

Group taxation
There is no provision under the legislation for group taxation in Guyana. All companies are taxed separately.

Transfer pricing
There is no transfer pricing legislation or rules in Guyana, although the issue has been discussed and is expected to be more formally considered in the future. However, the current Act contains a general anti-avoidance provision, and the tax authority monitors multinationals to ensure that their transactions are conducted at arm’s length and in conformance with the applicable tax legislation.

Thin capitalisation
There are no thin capitalisation rules in Guyana.

Controlled foreign companies (CFCs)
CFCs are not covered under Guyana tax laws.

Tax credits and incentives
Various tax incentives are available, depending on the nature of the industry that the companies are engaged in, including the following:

- Customs duty and VAT exemption on most plant, machinery, and equipment.
- Customs duty and VAT exemption on raw materials and packaging materials used in the production of goods by manufacturers and small businesses.
Guyana

- Unlimited carryover of losses from previous years.
- Accelerated depreciation on plant and equipment.
- Full and unrestricted repatriation of capital, profits, and dividends.
- Tax deduction for scientific research expenses.
- Initial and annual allowances.
- Tax holidays.

Tax holidays are granted in respect of pioneering activities, that is, to companies whose trade or business are wholly of a developmental and risk-bearing nature and likely to be instrumental to the development of the resources of and beneficial to Guyana.

This does not include trade or business carried on by a gold or diamond mining company or a company carrying on petroleum operations.

**Foreign tax credit**
Foreign tax relief is available under DTTs with Canada, the United Kingdom, and Caribbean Common Market (CARICOM) countries.

Unilateral relief is also available for foreign taxes paid in non-treaty countries with tax systems and legislation similar to those in Guyana. For British Commonwealth countries, the relief is 50% of the relief that would be available if the foreign country were a treaty country. For other countries, the relief is 25% of such available relief. The available relief is the lower of the tax rate in Guyana and the tax rate in the other country.

**Withholding taxes**
WHT is chargeable on gross payments to non-residents and must be remitted to the tax authority within 30 days of making the payment. In cases where the treaty rate is higher than the statutory rate, the lower statutory rate applies. The rates of WHT for various payments are shown in the table below.

<table>

</table>

**Tax administration**

**Taxable period**
The tax year is the calendar year. Tax is assessed during a tax year on income earned during the year of assessment, which is generally the calendar year preceding the tax year. Companies with an accounting year other than a calendar year may, however, be allowed to account for taxes by adopting their accounting year as their income year.

**Tax returns**
Tax returns must be filed by 30 April of the tax year.

**Payment of tax**
Corporate tax is payable in advance quarterly instalments on the preceding year’s tax liability. Advance tax payments are due on 15 March, 15 June, 15 September, and 15 December of the calendar year prior to the tax year. However, the Commissioner of
Inland Revenue may require the company to calculate the payments based on estimated income for the current year.

Any balance of tax due must be paid by 30 April of the tax year.

**Penalties**
Failure to file a tax return and pay the balance due by 30 April of the tax year incurs a further charge of 45% on the outstanding tax for the first year and 50% thereafter.

**Tax audit process**
Companies are generally selected at random for audits, and the frequency is usually every three years. Companies are generally required to provide financial information and supporting documentation to the tax personnel.

The tax authority is the Guyana Revenue Authority.

**Statute of limitations**
A company carrying on business in Guyana is required to keep proper accounts and records and is required to retain these accounts for a period of at least eight years after the completion of the transactions, acts, or operations to which they relate.

The Commissioner is empowered to raise an assessment for tax or additional tax within seven years after the expiration of the year of assessment.

**Topics of focus for tax authorities**
The following issues are currently being focused on by the tax authorities:

- Tax evasion and corruption.
- Strengthening tax administration.
- Creation of tax policies and forecasting analysis capability.
- Business registrations and compliance.

**Other issues**

**Foreign investment restrictions**
There are no restrictions on the repatriation of capital and investment income, and residents and non-residents have unlimited access to foreign exchange markets and to repatriate funds.

**Exchange controls**
There are no exchange control rules in place in Guyana.

**Choice of business entity**
Businesses operating in Guyana may establish a local company or register an external company. Additionally, companies may operate through a joint venture.
Honduras

**Significant developments**

Effective 5 April 2014, Decree No. 290-2013 regulates non-resident companies providing sea, land, and aerial transport services to pay 3% income tax on the annual gross income from Honduran sources in cases where the tax calculation resulting from the application of the corporate income tax (CIT) rate is less, based on the taxable base established by the corresponding regulation.

Effective 5 June 2014, Decree No. 284-2013 reforms the Law for the Promotion and Protection of Investment (Ley para la Promoción y Protección de las Inversiones), establishing a 15-year term for tax stability agreements, except for Public and Private Alliances projects. At the same time, it repeals the special income tax discounts granted by this law.

Effective 1 July 2014, the government of Honduras signed an intergovernmental agreement (IGA) regarding the Foreign Account Tax Compliance Act (FATCA) with the government of the United States (US), formalising the exchange of information for tax purposes.

Effective 23 October 2014, the tax authority agreement No.058-2014 establishes the obligation for all taxpayers to comply with the new Invoice, Other Fiscal Documentation, and Printers Registry Regime (Regimen de Facturación, Otros Documentos Fiscales y Registro Fiscal de Imprenta).

Effective 29 April 2015, Decree No.125-2014 abolishes the double taxation on dividends paid by a legal entity.

**Taxes on corporate income**

Honduran resident companies are taxed on their worldwide income. Non-resident companies are subject to CIT only on income derived from Honduran sources.

The CIT rate for a resident company is 25% of its net taxable income.

Non-resident companies providing sea, land, and aerial transport services are subject to 3% income tax on the annual gross income from Honduran sources in cases where the tax calculation resulting from the application of the CIT rate is less, based on the taxable base established by the corresponding regulation.

**Minimum tax**

Domiciled companies are subject to a 1.5% tax on gross income equal to or greater than 10 million Honduran lempiras (HNL) when the CIT is less. There is a reduction of the rate to 0.75% for the cement industry, public services provided by government companies, the human pharmaceutical and medicine industry, the oil and petroleum products industry, and bakeries. There are some exceptions to the rule.
Solidarity Contribution
The Solidarity Contribution is a non-deductible surcharge levied on all companies on taxable income over HNL 1 million. The Solidarity Contribution tax rate is 5%.

Income tax anti-evasion measures
A law created in response to tax evasion and fraud establishes payment of an income tax of 1% on gross income equal to or greater than HNL 100 million for all taxpayers who report losses for two years in a row or two out of five. The 1% tax paid will be considered as a credit in the resulting income tax, surtax, or net asset payable in the annual returns. There are some exemptions to the rule.

Municipal income taxes

Industry, commerce, and services tax
Companies doing business in Honduras are levied the following municipal tax on annual gross income:

<table>
<thead>
<tr>
<th>From (HNL)</th>
<th>To (HNL)</th>
<th>Range (HNL)</th>
<th>Tax per '000</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>500,000</td>

<td>0.2</td>
</tr>
<tr>
<td>30,000,001</td>
<td>And over</td>
<td></td>
<td>0.15</td>
</tr>
</tbody>
</table>

Corporate residence
The place of incorporation is regarded by Honduran authorities as the corporate residence. Non-resident companies are companies incorporated/registered outside of Honduras.

Permanent establishment (PE)
There is a provision in the transfer pricing rules that provides the following definition of PE:

“Permanent establishment is a fixed place of business where a natural or juridical person resident or domiciled in another state performs part or all of its activities in Honduras. Likewise, a foreign resident will be considered to have a permanent establishment in Honduras when it acts in the national territory through an independent agent that is not acting under the regular framework of its activity.”

There are some exceptions to the rule.

There is no treaty definition of PE since, at the present time, Honduras is not a signatory of any double taxation treaty (DTT) with another jurisdiction in the world.

Other taxes

Sales tax
Sales tax is charged on all sale and purchase transactions of goods and services made in Honduran territory.

The general sales tax rate is 15%. It applies to most goods and services, with the exception of machinery and equipment, basic grains, pharmaceutical products, raw materials for the production of non-taxable goods, petroleum products, school supplies, and insecticides, among others.
Honduras

The import and sale of beer, other alcoholic beverages, cigarettes, and other tobacco products are subject to 18% sales tax.

There is a 15% sales tax applicable to some PCS, cellular, internet broadband, cable TV, and energy services, depending on the amount of consumption billed by the supplier.

There is an 18% sales tax levied on first class and business class air tickets.

**Customs duties**
The duty assessed by the Honduran government at the time of customs clearance ranges between 0% and 15% for most items.

Honduras is a member of the Central American Common Market (CACM), which also includes Costa Rica, El Salvador, Guatemala, and Nicaragua. Honduras' rates on most goods from outside CACM are currently within the 0% to 15% range. Under the Dominican Republic-Central America Free Trade Agreement (CAFTA-DR) with the United States, about 80% of US industrial and commercial goods can now enter the region duty-free, with the remaining tariffs to be phased out over ten years. Nearly all textile and apparel goods that meet the Agreement’s rules of origin are now duty-free and quota-free, promoting new opportunities for US and regional fibre, yarn, fabric, and apparel manufacturing (the Agreement’s tariff treatment for textile and apparel goods was made retroactive to 1 January 2004).

It is necessary to first obtain the appropriate Harmonized System (HS) classification number for determining when a particular product can enter the CAFTA-DR region duty-free. With this number, it is then possible to check the country and product-specific tariff elimination schedule.

Ad valorem import taxes can be as high as 20%. In addition, imports are subject to the sales tax of 12% or 15% that applies to the sum of the cost, insurance, and freight (CIF) value, the ad valorem duty, and the customs fees.

**Excise taxes**
There is an excise tax levied on the production and importation of cigarettes, sodas, beer, and alcoholic beverages.

Cigarettes are levied at HNL 350 per unit.

Excise tax on sodas, beer, and alcoholic beverages are levied according to the following table:

<table>
<thead>
<tr>
<th>Description</th>
<th>Tax rate per litre (HNL)</th>
</tr>
</thead>
<tbody>

</tr>
<tr>
<td>Aguardiente 30°</td>
<td>7.02</td>
</tr>
</tbody>
</table>
**Net assets tax**
The net assets tax is an annual 1% tax on the net asset value of the company. It applies to the gross value of assets less reserve for accounts payable and any accumulated depreciation allowed under the income tax law and other deductions allowed by law. The law also allows a special deduction of HNL 3 million.

The net assets tax is in lieu of CIT when CIT is less than the amount due for net asset tax. Resident companies during their preoperative period (i.e. the period in which the company started operations but has not issued its first invoice) and companies operating in free trade zones (FTZs), among others, are exempt from the net assets tax.

Non-resident companies are not liable for the net assets tax.

**Transfer taxes**
Transfer taxes are levied on real estate transactions at HNL 1.5 per every HNL 1,000.

**Stamp taxes**
There are no provisions for stamp taxes in Honduras.

**Capital gains tax**
In general, a 10% tax is applied on capital gains, regardless of the person’s residence status. Under the Zolitir law territory, a special regime, the tax rate is a 4% flat tax on capital gains.

The payment of capital gains tax must be made within ten business days after the agreed amount of the transaction has been determined.

In instances where a transaction is subject to the capital gains tax and a non-resident is involved, the buyer has an obligation to withhold 4% of the transaction amount as an advance payment to this tax and must pay it to the government within ten business days of the date of the transaction.

The government offices make a corresponding 10% withholding tax (WHT) on capital gains on payments made due to purchase and sale transactions of goods, indemnifications, purchase of rights, and securities.

**Payroll taxes and contributions**
Payroll taxes and contributions are paid by employers at the following rates:

- Social security: 7.2%, with a ceiling of HNL 4,800.
- **Instituto Nacional de Formación Profesional** (INFOP): 1%.
- Housing fund ('Régimen de Aportaciones Privadas' or RAP/'Fondo Social para la Vivienda' or FOSOVI): 1.5%.

**Special temporary contributions**
For the term of five years starting 1 January 2014:

- Under the Special Temporary Security Contribution on Financial Transactions (**Contribución Especial por Transacciones Financieras Proseguridad Poblicional**), financial transactions are subject to 0.2% WHT, with some exceptions.
- Companies providing mobile communication services will pay a special temporary contribution of 1% on gross monthly income.
- Under the special temporary contribution for the protection of the environment from the mining sector, there is a 2.5% contribution on the freight on board (FOB) value of the exports filed for non-metallic activity and a 6% contribution for metallic activity.
- The special temporary contribution from the food and beverages business under special tax regimes is 0.5% on gross monthly income.
- The cooperatives special contribution is 3.6% on annual net surplus.
**Municipal taxes**
Companies doing business in Honduras are also subject to the rules and regulations of the respective municipalities. Taxes and obligations are ruled by the ‘Plan de Arbitrios’. Some of these tax obligations include the following:

- Industry, commerce, and service tax, which is based on gross income per year (see the Taxes on corporate income section).
- Public services fee, which is paid for services such as waste management.
- Real estate tax, which is a tax on urban and rural real estate.
- Sign tax, which is a tax on public advertising.

**Branch income**
Branch income is subject to income tax on income generated from Honduran source at the rates applicable for corporate income.

**Income determination**
Income is computed in accordance with generally accepted accounting and commercial principles, subject to certain adjustments required by the tax law.

**Inventory valuation**
Inventories are generally valued using the first in first out (FIFO), last in first out (LIFO), and weighted-average cost methods.

**Capital gains**
Capital gains are not generally subject to CIT, but may be subject to capital gains tax. See Capital gains tax in the Other taxes section for more information.

**Dividend income**
The income from dividends is considered ‘other income’, thus non-taxable under the general income tax rates. There is a 10% WHT rate applicable on the dividends paid to non-residents.

In the first quarter of 2015, the government abolished the double taxation on dividends. Any dividends or distribution of profits that were subject to the corresponding 10% dividend WHT will not be taxed again in case of redistribution.

**Stock dividends**
Stock dividends are also not taxable.

**Interest income**
Honduran Bank interests are subject to a 10% WHT at the moment the interest is given, when the sum is over HNL 50,000. Interests from abroad are considered as other income. For income tax reconciliation, interest income is considered non-taxable when subject to the 10% WHT.

**Royalty income**
Royalties are taxed in the same manner as general income if the recipient is a local company or branch. If the recipient is a non-resident, then the application of a WHT will apply.

**Foreign income**
Deferral and anti-deferral of foreign income are not regulated in Honduras.
Deductions

The net taxable income of an enterprise is determined by deducting all the ordinary and necessary expenses incurred in the generation of income, including amortisation and depreciation; municipal taxes; donations made in favour of the state, the central district, the municipalities, and legally recognised educational institutions, charities, and sporting facilities; mandatory employer-employee contributions to the social security system; and ‘reasonable’ charges for royalties and management services.

In general, all expenses incurred in the generation of taxable income are considered as deductible for income tax purposes. However, there are some ‘non-deductible’ expenses, even if incurred in the generation of income (e.g. interest paid to owners or shareholders, capital losses).

Depreciation

Depreciation may be computed using the straight-line method. Companies may also obtain authorisation from the tax authorities to use other depreciation methods. However, after a company selects a depreciation method, it must apply the method consistently thereafter. The following are the applicable straight-line method rates for some common assets.

<table>
<thead>
<tr>
<th>Asset</th>
<th>Rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Buildings</td>
<td>2.5 to 10</td>
</tr>
<tr>
<td>Plant and machinery</td>
<td>10</td>
</tr>
<tr>
<td>Vehicles</td>
<td>10 to 33</td>
</tr>
<tr>
<td>Furniture and office equipment</td>
<td>10</td>
</tr>
<tr>
<td>Tools</td>
<td>25</td>
</tr>
</tbody>
</table>

Goodwill

Goodwill can be amortised over a period of five years.

Start-up expenses

Organisation or reorganisation expenses are deductible for the total amount as long as they do not exceed 10% of the initial capital stock. These expenses can be amortised over five years.

Interest expenses

Interest expenses are deductible as long as they are incurred in order to generate income. Interest paid to stockholders, owners, or their spouses are not deductible.

Bad debt

Taxpayers can record a bad debt provision of 1% of the total credit sales, which will not exceed 10% of the accounts receivable balance.

Charitable contributions

Contributions to organisations legally recognised by the government are deductible.

Capital losses

Capital losses are not deductible to determine the net taxable income. Capital losses can only be netted against capital gains, which are subject to a tax rate of 10% (see Capital gains tax in the Other taxes section).

Contingent liabilities

Provisions for contingent liabilities, such as severance pay, are not deductible for tax purposes; actual payments during the fiscal period, for those liabilities, are considered to be deductible expenses.
Honduras

**Fines and penalties**
Fines and penalties are not deductible.

**Taxes**
With the exception of the Solidarity Contribution, net asset taxes, CIT, and sales tax (i.e. if sales tax paid is used as a credit to net the sales tax payable to the government), taxes and contributions paid to district or municipalities are deductible expenses when determining taxable income.

**Net operating losses**
Companies engaged in agriculture, manufacturing, mining, and tourism may carry forward losses for three years. However, certain restrictions apply. Losses may not be carried back.

**Payments to foreign affiliates**
Payments to foreign affiliates are deductible as long as the service is effectively received.

**Group taxation**
No provisions exist for group taxation in Honduras.

**Transfer pricing**
The Transfer Pricing Law for Honduras published in the *Diario Oficial La Gaceta* establishes the transfer pricing regulations applicable in Honduras effective as of January 2014. There was a period of one year to adopt the transfer pricing policies and to negotiate with the tax authority the corresponding advance pricing agreements (APAs).

**Thin capitalisation**
At the present time, there are no provisions for thin capitalisation in Honduras.

**Controlled foreign companies (CFCs)**
At the present time, there are no provisions in the Honduras legislation for CFCs.

**Tax credits and incentives**
Companies operating under a special tax regime are exempted from CIT, sales tax, customs duties, and some municipal taxes. These special tax regimes are the following:

- FTZs.
- Industrial processing zone (*Zona Industrial de Procesamiento* or ZIP).
- Temporary import regime (*Régimen de Importación Temporal* or RIT).
- Tourism incentive law.
- Law promoting the generation of electric energy with renewable resources (*Ley de Promoción a la Generación de Energía Eléctrica con Recursos Renovables*), which provides tax exemptions for ten years for projects generating 50MW and over.
- In the regulations for the FTZs there is a consideration for international service companies (e.g. business processing operations [BPOs], call centres and contact centres, shared service centres) that will have the same tax exoneration provided by this regime.
- The Call Centre and BPO Promotion Law, which provides a tax holiday on import of tools, parts, accessories, furniture and office equipment, and all goods involved with the company’s active business as well as an income tax holiday on revenue from all the business activities carried out within the FTZs.
Companies must comply with some governmental requirements to operate under one of the above mentioned special regimes.

Companies under special tax regimes are allowed to sell their partial or total production in the local market; income from local sales will be subject to the regular corporate tax regulations.

The Organic Work Regions and Economic Development Law (Ley Orgánica de las Zonas de Empleo y Desarrollo Económico) allows the beneficiaries of this law to use reduced rates for income tax, sales tax, property tax, real estate tax, and flat tax.

There is a reform to the tariff and customs legislation that grants tax exonerations in general; the government established in the Decree No. 278-2013 a list of the valid tariff and customs tax exonerations decrees that continue to have the corresponding benefits (contact your local PwC practice for more information).

There is also a reform to the income tax legislation that grants tax exonerations in general; the government established in the Decree No. 278-2013 a list of the valid income tax exonerations decrees that continue to have the corresponding benefits (contact your local PwC practice for more information).

Effective 1 January 2014, the term of tax exonation is limited to 12 years to those companies under special tax regimes with no specific term for their tax benefits specified in their corresponding resolution issued by the government.

Effective 5 June 2014, the Law for the Promotion and Protection of Investment (Ley para la Promoción y Protección de las Inversiones) was amended, establishing a 15-year term for tax stability agreements, except for Public and Private Alliances projects. At the same time, it repeals the special income tax discounts granted by this law.

**Drawback industries**

Special benefits exist for industries that import semi-manufactured materials for assembly in Honduras and export finished products. Benefits consist of duty-free imports of raw materials for subsequent export as manufactured products. Machinery for these industries may also be imported duty-free.

**Foreign tax credit**

There are no provisions for foreign tax credits in Honduras.

**Withholding taxes**

**WHT for residents**

Distribution or payment of dividends or any other form of distribution of retained earnings or reserves to resident or domiciled individuals and/or legal entities is taxed via WHT at 10%.

The tax authority is empowered to withhold 3% on CIF from import operations for commercial purposes as an advance payment to income tax to those companies or individuals not duly registered with the tax authority, not complying with CIT filing, or in liquid arrears for any tax administered by the Dirección Ejecutiva de Ingresos (DEI). There are some exceptions to the rule.

**WHT for non-residents**

For non-residents in Honduras, any income derived from Honduran sources is taxable under the following table of the Income Tax Law:
### Income source

<table>
<thead>
<tr>
<th>Income source</th>
<th>WHT (%)</th>
</tr>
</thead>

### Tax treaties

Honduras has not signed any tax treaties with foreign jurisdictions.

### Tax administration

The DEI is the tax authority in Honduras. It is responsible for the administration of the tax and customs system. Taxpayers may request approval from the DEI regarding direct or indirect taxes (e.g. accelerated depreciation methods on new assets acquired by corporations with monetary activities requiring constant technological update, higher installed production capacity and productive re-conversion processes in order to maintain and strengthen their competitive advantage).

### Taxable period

The statutory tax year runs from 1 January through to 31 December. However, taxpayers may apply to use a special tax year by requesting an authorisation from the DEI.

### Tax returns

Companies must file a CIT return on 30 April every year.

### Payment of tax

Mandatory advance tax payments are payable each quarter, based on the income tax paid for the preceding tax year. Final tax is due with the CIT return on 30 April every year.

### Tax audit process

The audit cycle can begin after (i) the date the tax return should have been filed or (ii) sometime after the taxpayer made a request before the tax authority (e.g. tax credit, loss carryforward).

### Statute of limitations

The statute of limitation for legal actions is applicable for taxpayers, in order to challenge and request payment, and for the fiscal authority, to review, notify, and request payment. Such limitation is established according to the following terms:

- Four years for those conducting operations in the customs regime and five years for registered taxpayers.
- Ten years for those who have the obligation to be registered and currently are not.
- Ten years for those who have withheld information when declaring/filing.
Limitation of actions and powers of the fiscal authority will be interrupted according to the following:

- Determination of the tax by the fiscal authority counted from the day following notification of resolution.
- Notification of the resolution in which the fiscal authority confirms assessment, interests, penalties, or fines in liquid payable amounts, counted from the day following the resolution's notification.
- Legal appeal filed by the taxpayer, counted from the day following the filing of the appeal.
- Express acknowledgement from the debtor, counted from the day following the acknowledgement.
- Payment plan agreement granted to taxpayers according to law, counted from the day following the formal agreement.
- Exercise of the appropriate legal actions, counted from the day following their initiation.

Relapse in the lack of complete or partial payment from the taxpayer, as established in the Tax Code, will be considered as criminal tax fraud.

**Topics of focus for tax authorities**
The tax authority is currently focused on the adoption of the new Invoice, Other Fiscal Documentation, and Printers Registry Regime (Regimen de Facturación, Otros Documentos Fiscales y Registro Fiscal de Imprenta) by the taxpayers. This regime establishes the type of fiscal documents accepted and the requirements those documents have to fulfil.

**Other issues**

**US FATCA**
The government of Honduras signed the IGA regarding FATCA with the government of the United States, formalising the exchange of information for tax purposes on American and Honduran citizens and/or companies.
Significant developments

New legislation enacted
The following pieces of legislation were enacted/became effective in the past 12 months:

- Stamp Duty (Amendment) (No.2) Ordinance 2014: This ordinance (i) introduced a set of special (higher) stamp duty rates on transfer of immovable property in Hong Kong and (ii) advanced the charging of stamp duty on non-residential property transactions from conveyance on sale to the agreement for sale. Although the ordinance was enacted in July 2014, the two measures mentioned above are applied retrospectively to immovable property transactions executed on or after 23 February 2013.
- Stamp Duty (Amendment) Ordinance 2015: This ordinance became effective on 13 February 2015 and gave effect to the stamp duty exemption for the transfer of shares or units of all exchange traded funds listed in Hong Kong as proposed in the 2014/15 Budget.

Tax information exchange agreements (TIEAs)
Hong Kong and the United States signed a TIEA on 25 March 2014. The agreement is the first of its kind signed by Hong Kong and allows the free exchange of tax information on request between Hong Kong and the United States. Subsequent to the signing of the TIEA, Hong Kong also signed a Model 2 intergovernmental agreement (IGA) with the United States in November 2014 to facilitate financial institutions in Hong Kong to comply with the Foreign Account Tax Compliance Act (FATCA).

In addition to the HK-US TIEA, Hong Kong signed six more TIEAs with the Nordic jurisdictions (i.e. Denmark, the Faroes, Greenland, Iceland, Norway, and Sweden) in August 2014.

Taxes on corporate income
Hong Kong adopts a territorial basis of taxation. Profits tax is payable by every person (defined to include corporation, partnership, and sole proprietorship) carrying on a trade, profession, or business in Hong Kong on profits arising in or derived from Hong Kong from that trade, profession, or business. However, capital gains and receipts that are capital in nature are not subject to tax. Dividends from local companies chargeable to tax are exempt, whereas dividends from overseas companies are generally offshore in nature and not subject to tax in Hong Kong. The tax residence of a person is generally irrelevant for profits tax purposes. The tax treatments of public and private companies are the same.

Certain income that would not otherwise be subject to Hong Kong profits tax is deemed to arise in or be derived from Hong Kong from a trade, profession, or business carried on in Hong Kong and thus becomes taxable in Hong Kong. This includes royalties received by a non-resident for the use of or right to use a patent, design, trademark, copyright material, secret process or formula, or other property of a similar nature in Hong Kong,
or for the use of such intellectual properties (IPs) outside Hong Kong, but the royalties paid can be claimed as a deduction by a person for profits tax purposes.

The tax rates are 16.5% for corporations and 15% for unincorporated businesses.

There are special rules for determining the tax liabilities of certain industries, such as shipping, air services, and financial services. There is also a special tax framework for Islamic bonds (i.e. sukuk) that provides for the same tax treatments for sukuk vis-à-vis their conventional counterparts.

Incomes from certain qualifying debt instruments (QDIs) are either tax exempt or subject to a concessionary tax rate (i.e. 50% of the regular profits tax rate). However, there is a specific anti-avoidance provision under which the concessionary tax rate/tax exemption does not apply to incomes derived from QDIs by a person who is an associate of the issuer of the QDIs.

Offshore funds having Hong Kong fund managers and investment advisors with full discretionary powers are exempt from Hong Kong profits tax on profits derived in Hong Kong from six types of 'specified transactions' that are carried out or arranged by 'specified persons'. However, there are also specific anti-avoidance provisions in the Inland Revenue Ordinance (IRO) deeming certain resident persons to be subject to profits tax on their share of the non-resident person's tax-exempt profits.

Profits derived from the business of reinsurance of offshore risks and qualifying offshore captive insurance business are subject to profits tax at a concessionary tax rate (i.e. 50% of the regular profits tax rate).

Corporate residence

In general, for Hong Kong profits tax purposes, corporate residency is not important in determining taxability of an entity. The decisive factors for taxability are (i) whether a corporation is carrying on a trade, profession, or business in Hong Kong, and (ii) whether the profits are arising in or derived from Hong Kong.

However, where it is necessary to determine the corporate residence, such as for the purpose of a comprehensive double tax agreement (CDTA), companies incorporated in Hong Kong and companies that are normally managed or controlled/centrally managed and controlled (depending on the provisions of the relevant CDTA) in Hong Kong are generally considered as a Hong Kong tax resident.

Permanent establishment (PE)

For Hong Kong profits tax purposes, whether a foreign corporation is carrying on a trade, profession, or business in Hong Kong and the source of profits, rather than whether there is a PE in Hong Kong, are the decisive factors in determining taxability. The existence of a PE is generally irrelevant for profits tax purposes except in the situation where a CDTA of Hong Kong is applicable.

Other taxes

Value-added tax (VAT)

Hong Kong does not have a VAT, goods and services tax, or sales tax.

Customs duties

There is no tariff on general imports in Hong Kong.
Hong Kong

**Excise tax**
Duties are levied on limited categories of dutiable commodities (i.e. tobacco, liquor, methyl alcohol, and hydrocarbons), regardless of whether they are imported or locally manufactured.

**Property tax**
Property tax is charged annually to the owner of any land or buildings (except government and consular properties) in Hong Kong at the standard rate of 15% on the net assessable value of such land or buildings. Net assessable value of a property is the consideration payable to the owner for the right to use the land or buildings less rates paid by the owner and a 20% notional allowance.

Rental income derived by a company from a Hong Kong property is subject to profits tax. The company that is subject to profits tax may apply for an exemption from property tax in respect of the property. If no exemption is applied, the property tax paid can be used to offset against the profits tax payable by the company.

**Stamp duty**
Stamp duty is charged on transfer of Hong Kong stock by way of sale and purchase at 0.2% of the consideration (or the market value if it is higher) per transaction. Hong Kong stock is defined as stock the transfer of which must be registered in Hong Kong.

For conveyance on sale of immovable property in Hong Kong, the stamp duty payable depends on the property consideration. For property transactions executed on or after 23 February 2013, there are two sets of stamp duty rates. Scale 2 rates range from 100 Hong Kong dollars (HKD) (for property consideration of up to HKD 2 million) to 4.25% (for property consideration exceeding HKD 20 million) and are applied to residential property acquired by a Hong Kong permanent resident who does not own any other residential property in Hong Kong at the time of acquisition. Scale 1 rates range from 1.5% (for property consideration of up to HKD 2 million) to 8.5% (for property consideration exceeding HKD 20 million) and are applied to all other cases. The stamp duty payable is computed by applying the relevant rate to the consideration or market value of the property (whichever is higher), with marginal relief upon entry into each higher rate band.

For lease of immovable property in Hong Kong, stamp duty is calculated at a specified rate of the annual rental that varies with the term of the lease. Currently, the applicable rate ranges from 0.25% (for lease period of not more than one year) to 1% (for lease period of more than three years).

Exemption is available for certain transactions, such as transfer of shares between associated corporate bodies, transfer of shares or units of exchange traded funds listed in Hong Kong, and certain stock borrowing and lending transactions, provided that the specified conditions for exemption (if any) are satisfied.

**Special Stamp Duty (SSD)**
There is an SSD on resale of residential property within 36 months from the date of acquisition. The SSD is imposed on top of the stamp duty payable on conveyance on sale or agreement for sale of residential property, with a few exemptions. The SSD payable will be calculated based on the stated consideration or the market value (whichever is higher) of the resold property at the regressive rates indicated below.

- 20% for residential properties held for six months or less.
- 15% for residential properties held for more than six months but for 12 months or less.
- 10% for residential properties held for more than 12 months but for 36 months or less.
**Buyer’s Stamp Duty (BSD)**
A BSD is payable on acquisition of Hong Kong residential properties by any person (including Hong Kong and foreign companies) other than a Hong Kong permanent resident. The BSD is charged at a flat rate of 15% on the stated consideration or the market value of the property acquired, whichever is higher. The BSD is imposed on top of the stamp duty and the SSD (if applicable), with exemptions in certain situations.

**Business registration fees**
Every person who carries on a business in Hong Kong is required to apply for business registration with a fee within one month from the date of commencement of the business. The business registration certificate has to be renewed either on an annual basis or every three years with a payment of a business registration (renewal) fee. Special registration and licence fees are applicable to banks and deposit-taking companies.

**Capital duty**
There is currently no capital duty in Hong Kong.

**Government rates and rent**
Rates are an indirect tax levied on properties in Hong Kong. Rates are charged at 5% of the rateable value, which is the estimated annual rental value of a property at the designated valuation reference date of 1 October.

Privately owned land in Hong Kong is normally held by way of a government lease under which rent is payable to the Hong Kong SAR Government in return for the right to hold and occupy the land for the term (i.e. duration) specified in the lease document. Currently, government rent is calculated at 3% of the rateable value of the property and is adjusted in step with any subsequent changes in the rateable value.

**Payroll taxes**

**Mandatory Provident Fund (MPF) contribution**
Under the MPF scheme, an employer is required to make a mandatory contribution for an employee in the amount equal to 5% of the monthly income of that employee. The maximum level of income for contribution purpose is HKD 30,000 per month. An employer may make voluntary contributions in addition to the mandatory contribution required.

**Branch income**
The tax rate for branches is the same as that for corporations. The Hong Kong profit of a foreign corporation with a branch in Hong Kong is determined according to the accounts maintained for the Hong Kong operation (or business). If the Hong Kong accounts do not disclose the true profits arising in or derived from Hong Kong attributable to the Hong Kong operation, the Hong Kong profit will be computed according to the ratio of turnover in Hong Kong to total turnover (or the proportion of Hong Kong assets over total assets) on the worldwide profits. Alternatively, the Hong Kong Inland Revenue Department (HKIRD) tax assessor may estimate the profits of the Hong Kong branch. In certain situations, the profits of the Hong Kong branch can be estimated based on a fair percentage of the turnover in Hong Kong.

**Income determination**

**Inventory valuation**
Inventory may be stated at the lower of cost or market value. Last in first out (LIFO) may not be used for tax purposes. First in first out (FIFO) must be consistently applied.
The prevailing accounting standards require financial assets and liabilities held for trading purpose (e.g. shares and securities held as trading stock) to be carried at market value, with fluctuations in values of such assets and liabilities taken to the profit and loss accounts, irrespective of whether the profits or losses are realised. Following the recent court decision in the Nice Cheer case, the increases (unrealised gains) in the market values of trading securities are not taxable while the decreases (unrealised losses) may be deductible when they are recorded in the financial statements.

There are special tax provisions for valuation upon cessation of a business under which inventory is valued at market value, unless it is sold to a person carrying on business in Hong Kong, who may deduct a corresponding amount as the cost of the inventory in computing the assessable profits.

**Capital gains**
Gains from realisation of capital assets or receipts that are capital in nature are not taxed.

**Dividend income**
Dividends from local companies chargeable to tax are exempt, whereas dividends from overseas companies are generally offshore in nature and not subject to Hong Kong profits tax. Hong Kong corporations may declare bonus issues (i.e. stock dividends), which are not taxable in the hands of the recipients.

**Interest income**
Interest income received by or accrued to a corporation carrying on a trade or business in Hong Kong is subject to profits tax. Exemption is provided to interest income derived from any deposit placed in Hong Kong with a financial institution, unless the deposit secures a borrowing the interest expense of which is deductible. This exemption, however, does not apply to interest accruing to a financial institution.

Interest accruing to a bank or financial institution will be deemed to be sourced and taxable in Hong Kong if the interest arises through or from the carrying on of business in Hong Kong by the bank or financial institution.

**Royalties**
Royalties paid or accrued to a non-resident for the use of or right to use in Hong Kong or outside Hong Kong (if the royalties are deductible in ascertaining the assessable profits of a person for Hong Kong profits tax purposes) a trademark, patent, design, copyright material, secret process, or other property of a similar nature, or for the use in Hong Kong of cinema or television tape or any sound recording, are deemed to be taxable in Hong Kong.

A total of 30% of the sum receivable is deemed to constitute profits subject to tax in normal situations. Where such royalties are received by or accrued to an associated corporation, however, 100% of the sum is deemed to constitute profits under certain circumstances.

**Partnership income**
Partnership business is taxed as a single entity, although an individual partner can use its share of losses incurred by a partnership to offset against the assessable profits of its other business. In general, there is no special registration requirement other than business registration for a partnership. The assessable profits of a partnership are basically determined in the same way as those of a corporation, with certain special rules (e.g. salaries or other remunerations paid to a partner or a partner’s spouse are not deductible).
**Unrealised exchange gains/losses**

In general, unrealised exchange gains/losses are taxable/deductible if they are recognised in the profit and loss accounts in accordance with Generally Accepted Accounting Principles (GAAP), provided that they are revenue in nature and with a Hong Kong source. The nature and source of exchange gains/losses are determined by the nature and source of the underlying transactions. Exchange gains/losses arising from ordinary business transactions (e.g. trade receivables or payables) are taxable/deductible whereas exchange gains/losses arising from capital transactions (e.g. sale of capital assets) are non-taxable/non-deductible.

**Foreign income**

Hong Kong resident corporations are not taxed on their worldwide income. Foreign-sourced income, whether or not remitted to Hong Kong, is not taxed. As such, there is no specific tax provision dealing with deferral or non-remittance of foreign earnings. Nor does Hong Kong have any controlled foreign company (CFC) legislation.

**Deductions**

Expenses that are incurred for producing profits chargeable to tax and that are not capital in nature are generally tax deductible. In addition, special tax relief is available for certain capital expenditure. There are special rules for deduction of certain expenses (e.g. interest expenses).

Accounting treatments are usually followed in determining the assessable profits, except when there is an explicit rule in the IRO. Accrued expenses recognised in the profit and loss accounts in accordance with GAAP are usually deductible if they are incurred for producing profits chargeable/subject to tax and are not capital in nature.

Expense items for which a tax adjustment is necessary in determining the amount of taxable profits from the accounting profits include: tax depreciation allowance vs. accounting depreciation, expenses that are capital in nature, general provisions that are non-deductible, and non-deductible interest expenses on borrowings used to finance non-income producing assets.

Set out below are the Hong Kong profits tax treatments of some common expense items.

**Tax depreciation of fixed assets**

Tax depreciation allowances/deductions are available for capital expenditure incurred on the construction of buildings or structures and in the provision of machinery and plant for trade or business purposes, as follows:

- **Industrial buildings and structures**: An initial allowance of 20%, in addition to an annual allowance of 4%, of the cost of construction or cost of purchase from a developer is granted for an industrial building or structure occupied for the purpose of a qualifying trade. Provision is made for balancing allowance or charge in the year of assessment in which the building is disposed of to adjust the written-down value of the building to the disposal price. Balancing charges are restricted to the total of initial and annual allowances previously given.
- **Commercial buildings and structures**: An annual allowance of 4% of the capital expenditure incurred on the construction is applicable. A balancing allowance or charge applies upon disposal. Balancing charges are restricted to the total annual allowances previously given.
- **Plant and machinery**: An initial allowance of 60% of the capital expenditure on plant and machinery is given for the year of assessment during the basis period in which the expenditure is incurred. An annual allowance is also given for depreciation at three prescribed rates on the reducing value of each of the three depreciation rate ‘pools’. The three prescribed rates are 10%, 20%, and 30%, and the reducing value
of each of the three depreciation rate pools is original cost less initial and annual allowances and sales proceeds. Provision is made for balancing charges when plant and machinery within one of the three depreciation rate pools is sold or disposed of and the reducing value of that pool is less than the sale price, which is capped at the original amount incurred in the pool. In addition, balancing allowances or charges may be applicable upon cessation of business. Otherwise, sales proceeds are deducted in calculating the reducing value on which the annual allowance is calculated.

Book depreciation is adjusted for tax purposes in accordance with the above depreciation allowances granted under the IRO.

**Goodwill**
Cost of acquisition of goodwill/amortisation of goodwill is not deductible as it is capital in nature.

**Organisational and start-up expenses**
In general, company formation/start-up expenses that are incurred before the commencement of a trade, profession, or business and that are for the establishment of the overall income producing structure are capital in nature and not tax deductible.

**Research & development (R&D)**
There is a specific provision allowing the deduction of expenditure incurred on R&D (including payments made to an approved research institute and in-house expenditure), provided that certain specified conditions are met.

**Interest expenses**
There is no thin capitalisation rule in Hong Kong. However, deduction of interest expense is subject to stringent and complicated rules that are designed to guard against loan arrangements with an intention to avoid Hong Kong profits taxes.

**Bad debts**
A bad or doubtful debt incurred in any trade, business, or profession, proved to the satisfaction of the HKIRD to have become bad during the basis period for a year of assessment, is deductible. The deduction is limited to debts that were included as a trading receipt in ascertaining the taxpayer’s assessable profits or debts in respect of money lent in the ordinary course of a money-lending business in Hong Kong.

If any bad or doubtful debt that has previously been allowed as a deduction is ultimately recovered, it will be treated as taxable profits of the basis period in which it is recovered.

**Charitable contributions**
A deduction is allowed for cash donations to approved charities made in the basis period for a year of assessment if the aggregate of such donations is not less than HKD 100. The deduction is limited to 35% of the assessable profits of the year of assessment.

**Pension expenses**
A deduction is allowed for regular/ordinary contributions to a mandatory provident fund scheme or recognised occupational retirement scheme made by an employer in respect of an employee to the extent that the contributions do not exceed 15% of the employee’s total emoluments for the period to which the contributions relate.

Special payments, other than the ordinary contributions to a mandatory provident fund scheme or recognised occupational retirement scheme, are capital in nature but can be deducted evenly over a five-year period under a specific provision of the IRO.

There are also specific rules for deduction of provisions for contributions to a mandatory provident fund scheme or recognised occupational retirement scheme.
Payments for directors
Director fees or other remunerations paid by a corporation to its directors are generally deductible under the normal deduction rule. Nevertheless, no deduction is allowed on salaries or other remunerations paid to a sole proprietor or any partners or partners’ spouses of a partnership business.

Contingent liabilities
Generally speaking, general provisions for expenses are not deductible, whereas specific provisions are deductible if the HKIRD is satisfied that the amount has been incurred (i.e. the taxpayer has a legal/contractual obligation to pay such amount in future) and that the provision represents a reasonably accurate estimate of the future liability.

Special deductions
There are special deduction rules for expenditures incurred:

• for refurbishment of a building or structure, other than a domestic building or structure
• on environmental protection installation and machinery
• on environment-friendly vehicles
• on machinery or plant used specifically and directly for any manufacturing process, computer hardware (other than that which is an integral part of machinery or plant), computer software, and computer systems (collectively known as prescribed fixed assets)
• for registering trademarks, designs, or patents used in the production of taxable profits, and
• on the purchase of patent/know-how rights and specified IP rights (i.e. copyrights, registered trademarks, or registered designs), provided certain specified conditions are met.

Fines and penalties
Fines and penalties are generally not deductible, as the HKIRD does not consider them to be expenses incurred for producing profits chargeable/subject to tax.

Taxes
Taxes paid on corporate profits are generally not deductible for the purpose of calculating the assessable profits. However, the HKIRD generally accepts that a foreign tax that is an expense that must be borne regardless of whether or not a profit is derived (e.g. a foreign withholding tax [WHT] levied on the gross amount of interest or royalties received), as opposed to a charge on the profits themselves, is deductible under the general deduction provision. Where interest income or gains from the sale of a certificate of deposit or bill of exchange are deemed to be subject to profits tax, a deduction is allowed for foreign taxes of substantially the same nature of Hong Kong profits tax paid in respect of the same income, provided that the taxpayer is not eligible for double taxation relief under a CDTA.

Net operating and capital losses
Net operating losses incurred in an accounting year can be carried forward indefinitely to offset future profits of the business. A corporation carrying on more than one business may have losses in one business offset profits of the others, with any balance being carried forward. Net operating losses cannot be carried backward.

Capital losses are not tax deductible.

Payments to foreign affiliates
Royalties and service fees paid/payable by a Hong Kong corporation to foreign affiliates are deductible, provided they are incurred for the production of profits chargeable/subject to tax. There is no special restriction on the deductibility of these payments. Interest payable by a Hong Kong corporation to a foreign affiliate is not deductible if
Hong Kong

the recipient is not chargeable/subject to Hong Kong profits tax on the interest income received (except where either the payer or the recipient is a financial institution as defined in the tax law).

**Group taxation**

Hong Kong does not have a consolidated or group taxation regime.

**Transfer pricing**

Strictly speaking, there is no comprehensive transfer pricing legislation in Hong Kong. While a few existing provisions in the IRO may be employed by the tax authority to tackle non-arm’s-length transactions, such provisions are primarily aimed at transactions with closely connected non-residents or tax avoidance transactions rather than specific legislation on transfer pricing.

There are two Departmental Interpretation and Practice Notes (DIPNs) issued by the HKIRD to address the transfer pricing issues in Hong Kong. DIPN 45 focuses on the administrative/procedural issues involved in providing double tax relief in a treaty context, such as when such relief is available and what are the procedures for claiming such relief. DIPN 46 outlines the HKIRD’s view on the legislative framework for transfer pricing in Hong Kong (including the statutory provisions in the IRO and the articles in a CDTA that are relevant to transfer pricing) and provides guidance on numerous transfer pricing related issues, such as the application of the arm’s-length principle and the acceptable transfer pricing methodologies, which are largely in line with the Organisation for Economic Co-operation and Development (OECD) transfer pricing guidelines. The DIPN also spells out the documentation that taxpayers should consider retaining to support their transfer pricing arrangements and explains the interaction between the transfer pricing and sourcing rules in Hong Kong.

In general, the HKIRD adopts the arm’s-length principle and will seek to apply the OECD transfer pricing guidelines except where they are incompatible with the express provisions in the IRO.

An advance pricing arrangement (APA) program is available in Hong Kong. The objectives of the APA program are to help taxpayers obtain tax certainty on their complex or significant transfer pricing arrangements and reduce the risk of double taxation arising from related-party transactions. Resident enterprises or non-resident enterprises with a PE in Hong Kong may apply for an APA in respect of their transactions with associated enterprises under a CDTA, provided that certain conditions (including the threshold for an APA application) are met.

Currently, the HKIRD is primarily focused on bilateral APA or multilateral APA applications in respect of cross-border related-party transactions involving countries that are CDTA partners with Hong Kong.

DIPN 48, issued by the IRD, provides guidance on various aspects of the APA regime, such as the timeframe and threshold for an APA application, the various stages involved in the APA process, an audit involving years covered by a concluded APA, and possible rollback of the transfer pricing methodology agreed under an APA to prior years. The appendices of the DIPN include various sample documents for use in an APA application.

**Thin capitalisation**

Hong Kong does not have thin capitalisation rules.

**Controlled foreign companies (CFCs)**

Hong Kong does not have a CFC regime.
**Tax credits and incentives**

**Foreign tax credits**
Foreign tax credits are available if foreign taxes are payable/paid on income derived from a jurisdiction that has entered into a CDTA with Hong Kong and the same income is subject to tax in Hong Kong. See the Withholding taxes section for a list of jurisdictions that have entered into a CDTA with Hong Kong.

**Foreign investment incentives**
Hong Kong does not have any specific incentives for foreign investment, except that offshore funds may be exempt from profits tax under certain circumstances.

**Withholding taxes**

There is no WHT on dividends, interest, or royalties. However, the 4.95%/16.5% (for corporations) or 4.5%/15% (for unincorporated businesses) tax on royalties received by non-residents (see Royalties in the Income determination section) is, in effect, similar to a WHT.

Resident consignees are required to furnish quarterly returns to the HKIRD showing the gross proceeds from sales on behalf of their non-resident consignors and to pay to the Commissioner of Inland Revenue (CIR) a sum equal to 0.5% of such proceeds. The HKIRD normally accepts this as satisfying the Hong Kong tax obligations of the non-resident.

Hong Kong has so far entered into 32 treaties with different jurisdictions. The following table shows the applicable WHT rates for payments made from Hong Kong payers to non-treaty and treaty country corporate recipients. The rates shown in the table are the lower of the domestic and treaty rates. For WHT rates on payments received by Hong Kong recipients from treaty country payers, please refer to the summaries of the respective treaty countries.

Notes

1. Hong Kong IRO does not impose WHT on dividends and interest currently. However, the treaties provide for a maximum WHT rate on dividends and interest should Hong Kong IRO impose such WHT in the future. Some of the treaties also provide for a reduced WHT rate on dividends and interest if conditions specified in the treaties are met.

2. Generally, royalties paid to non-resident corporations that are not otherwise chargeable to Hong Kong profits tax are subject to WHT at 4.95%. The 16.5% rate applies if the royalties are received by or accrued to a non-resident from an associate, unless the Commissioner is satisfied that no person carrying on business in Hong Kong has, at any time, wholly or partly owned the property in respect of which the royalties are paid.

3. Since a higher rate is specified in the treaty, the lower domestic/non-treaty rate of 4.95% will apply.

4. Ratified and effective.

**Tax administration**

**Taxable period**

A year of assessment (or tax year) begins on 1 April of a year and ends on 31 March of the following year. The period that is used to compute the taxable profits for a year of assessment is called the basis period, which is normally the financial year ended in the year of assessment.

**Tax returns**

Tax returns are issued on the first working day of April each year. The filing deadline is usually within a month from the date of issue. However, corporations whose financial year ended after 30 November and are represented by a tax representative are normally granted with an extension for filing their returns. The exact filing due date depends on the accounting year-end date of the taxpayer.

The basis of assessment is the accounting profits of the financial year ending within the year of assessment, with appropriate adjustments for tax purposes. A tax return is usually filed together with a tax computation showing the tax adjustments to the accounting profits in arriving at the taxable profits or allowable tax losses for a given year of assessment.

Corporate taxpayers are also required to attach their audited accounts as supporting documents when filing a profits tax return, unless they qualify as a small corporation as defined by the HKIRD (i.e. mainly those with gross income for a basis period of not exceeding HKD 2 million plus a few other conditions). Small corporations are not required to attach supporting documents with their profits tax returns but are still required to keep those documents and submit them upon request. A branch of a foreign corporation doing business in Hong Kong is required to file a profits tax return annually.
and the HKIRD may require audited accounts of the foreign corporation to support the Hong Kong branch’s profits tax return.

Notice of assessment will be issued after the tax return has been examined by the HKIRD. Taxpayers may be subject to post-assessment investigation or field audit under the computerised random selection procedures of the HKIRD at a later date.

Payment of tax
The dates of payment of tax are determined by the CIR and specified in the assessment notice. A system of provisional tax payments applies whereby estimated tax payments are made during the current year. The provisional profits tax payable is normally estimated based on the previous year’s profits tax liability. The provisional profits tax already paid is credited against the final profits tax assessed for a year of assessment, which is determined after filing of the return.

For companies with an accounting year-end date of 31 December, the provisional tax payments for a given tax year (to be paid in two instalments) are usually due in November of the current year and January of the next year, whereas the final tax payment for a given tax year is usually due in November of the year in which the return is issued.

Tax audit process
There is no specific tax audit cycle in Hong Kong. Tax audit targets are selected with reference to certain criteria determined by the HKIRD.

Statute of limitations
An additional assessment may be made by an HKIRD tax assessor if a taxpayer chargeable to tax has not been assessed to tax or has been assessed at less than the proper amount. The assessment must be made within the relevant year of assessment or within six years after the end of that year of assessment. The time limit for making additional assessments is extended when a taxpayer either has not been assessed, or is under-assessed, due to fraud or wilful evasion. In that case, an additional assessment may be made up to ten years after the end of the relevant assessment year.

A statement of loss is not an assessment, and the above six-year time limit does not apply to issue or revision of a statement of loss. A tax loss year remains technically open until the sixth year after the first year in which the taxpayer has an assessable profit after utilising all the tax losses brought forward.

Topics of focus for tax authorities
Profits tax issues that are often subject to close scrutiny of the tax authority include offshore claim of profits, capital claims of income, transactions with related parties and closely connected non-residents, and deductibility of expenses (e.g. interest expenses, share-based payments, intra-group management/service fees).

General anti-avoidance rules (GAAR)
The IRO includes a GAAR (i.e. section 61A) allowing the HKIRD to disregard a transaction or counteract the tax benefit conferred by a transaction if the sole or dominant purpose of entering into such a transaction is to obtain a tax benefit. Whether the sole or dominant purpose of entering into a transaction is for obtaining a tax benefit will be assessed according to a set of factors stipulated in section 61A. Another GAAR in the IRO is section 61, which empowers the HKIRD to disregard a transaction that reduces or would reduce the amount of tax payable by any person if that transaction is considered artificial or fictitious. Although both GAARs could be used, in practice, section 61A is more often invoked by the HKIRD in tackling tax avoidance schemes.
Specific anti-avoidance provision for related party transactions
In addition to the general anti-avoidance provisions described above, there is a specific anti-avoidance provision dealing with transactions with closely connected non-residents. Under the specific provision, if a resident person carries on a business with a closely connected non-resident person such that no profits or less than the ordinary profits are derived by the resident person in the course of such business, the non-resident person can be assessable and chargeable to tax in respect of profits derived from such business in the name of the resident person.

Other issues

Tax information exchange agreements (TIEAs)
Currently, Hong Kong has entered into seven TIEAs with different jurisdictions as shown below.

- Denmark (2)
- Faroes (2)
- Greenland (2)
- Iceland (2)
- Norway (2)
- Sweden (2)
- United States (1)

Notes
1. Ratified and effective.

In addition to the signing of the HK-US TIEA, Hong Kong signed a Model 2 IGA with the United States in November 2014 to facilitate financial institutions in Hong Kong to comply with FATCA.

Foreign investment restrictions
In general, Hong Kong does not impose restriction to foreign investors to make investments in Hong Kong, and wholly foreign owned companies are allowed. The only exception is the restriction on foreign ownership of Hong Kong’s licensed television/sound broadcasters, of which the collective foreign ownership ceiling is 49% of the voting power. In addition, an approval from the Broadcasting Authority must be obtained for holding, acquisition, or exercise of voting control by a foreign investor of more than 2% of a licensee.

Exchange controls
Hong Kong does not have any foreign exchange control. There is no restriction on entry or repatriation of capital or remittance of profits from investments. Funds can be freely remitted to persons outside Hong Kong by various means, such as dividends, interest, royalties, service fees, and branch profits, etc.

Choice of business entity
The principal forms through which a business can be conducted in Hong Kong are as follows:

- Company incorporated in Hong Kong (either private or public via listing on the Stock Exchange of Hong Kong).
- Branch of a foreign company.
- Representative or liaison office of a foreign company.
- Joint venture (can be set up either as a company or partnership).
- Partnership.
- Sole proprietorship.

Of the above, privately incorporated companies and branches of foreign companies are most commonly used by foreign investors, as limited liability is usually desirable.
**Intellectual property (IP) regulations**
The Intellectual Property Department is responsible for monitoring the IP regime and ensuring the protection and enforcement of IP rights in Hong Kong. The Department is also responsible for investigating complaints against infringements and has extensive powers of search and seizure. Registration and protection of patents, copyrights, trademarks, and registered designs are each governed by a separate ordinance.

**Merger and acquisition (M&A) activities**
There are no specific restrictions on M&A activities in Hong Kong. The following tax considerations are relevant in the M&A context:

- Dividends or other forms of distribution of profits (e.g. distribution of branch profits to the head office) are generally not taxable.
- Capital gains arising from an M&A transaction are not taxable in the hands of the transferor, whereas amortisation of the goodwill in the transferee’s accounts is not tax deductible due to its capital nature.
- For a share deal, stamp duty is payable on the transfer of Hong Kong shares at 0.2%, unless an exemption applies; for an asset deal, stamp duty is payable on conveyance of immovable property in Hong Kong at progressive rates of up to 8.5%.
- Gains derived from transfer of revenue items (e.g. trade receivables) in an asset deal will be subject to profits tax.
- There is no special tax concession/incentive relating to M&A transactions.
- Tax losses in the acquired company can generally be carried forward indefinitely to set off against future assessable profits. However, there are specific anti-avoidance provisions in the IRO that prevent the transfer of shares of a company with accumulated tax losses to owners of a profitable company for the sole or dominant purpose of utilising the tax losses (i.e. offsetting the tax losses against the profits generated from other trade, profession, or business of the transferee).
As of 1 January 2015, the following significant changes were introduced to the Hungarian tax system. The changes are mainly related to corporate income tax (CIT) and indirect taxes.

**Corporate income tax (CIT)**

- The loss carryforward rules have been supplemented with respect to losses incurred from 2015. If the tax base is negative in any tax year, the taxpayer may deduct such amount of loss from its pre-tax profit spread out at any rate in the following five tax years.
- The option of allocating some of the payable CIT to support sports and culture has become available as part of the corporate income allowance regime.
- Cost of goods sold and the value of intermediated services ceased to be deductible items when determining the minimum tax base.
- The depreciation of goodwill may be recognised as CIT depreciation at an annual rate of 10% (provided that depreciation of goodwill can also be recognised for accounting purposes).
- The transfer pricing regulations containing guidance on the application of certain transfer pricing methods and the determination of the arm’s-length nature of prices have become more stringent.
- Regarding transfer pricing, a new section of the Corporate Tax and Dividend Tax was issued on 1 January 2015. As per this new rule, taxpayers are required to apply the interquartile range when determining and presenting the arm’s-length nature of the transfer prices of their inter-company transactions (see Transfer pricing in the Group taxation section for more information).

**Environmental protection product fee**

**Change in the range of products subject to a product fee**

The following new product flows became subject to the environmental protection product fee: other chemical products (soaps, organic surface-active agents, laundry detergents, and cosmetic or toilet preparations), paper stationery (writing, printing, or photocopying paper, notepads, letter pads, journals, binders, dossiers, etc.), other plastic products (plastic artificial flowers, foliage and fruit and parts thereof, articles made of artificial flowers, foliage, or fruit).

The range of product flows currently subject to the environmental protection product fee also changed; for example, among packaging materials, a product fee is payable for plastic edge profiles and iron and steel strapping bands, as well as for electric generators, transformers, electronic integrated circuits, and many electronic parts.

**Change in fee rates**

Fee rates changed substantially. The fee was reduced for certain product flows (e.g. for packaging materials made of paper, metal, or wood, the rate was reduced from 20 Hungarian forint [HUF] per kilogram to HUF 19 per kilogram), while the fee rate
increased for other product flows (e.g. for plastic packaging materials the rate increased from HUF 42 per kilogram to HUF 57 per kilogram, and for small and large electrical and electronic household and equipment, the rate increased from HUF 50 per kilogram to HUF 57 per kilogram).

**Excise duty**

**Change in tax rates**
The tax rate on fuel oils and liquefied and compressed hydrocarbon gases increased.

The differential tax rate for alcohol products was eliminated and a uniform tax rate of HUF 333,385 per hectolitre of pure alcohol was introduced (with special rules continuing to apply to contract distilling and private distilling).

**Excise guarantee**
The amount of excise guarantee for commercial activities with taxed products subject to excise authorisation was, as a general rule, raised for alcohol products, beer, wine, champagne, and intermediate alcoholic products.

**Food chain supervision fee**

**Change in fee rates**
As of 1 January 2015, the rate of the food chain supervision fee primarily changed for stores whose main profile is selling daily consumer goods within the meaning of the Trade Act. For such stores, the first HUF 500 million will not be subject to tax, the rate will be 0.1% for the part of the tax base (net sales revenue in the previous year) above that amount up to HUF 50 billion, 1% for the part between HUF 50 and HUF 100 billion, and will increase by 1% for each HUF 50 billion above that amount. The highest rate of 6% will be applicable to the part of the tax base above HUF 300 billion.

**Energy tax**

**Change in tax rates**
The tax rate for electric power was raised from HUF 295 to HUF 310.5 per megawatt hour, for natural gas from HUF 88.50 to HUF 93.5 per gigajoule, and for coal from HUF 2,390 to HUF 2,516 per thousand kilograms.

**Public health product fee**

**Range of products affected**
Alcoholic products (except for fruit spirits and certain beverages made with the use of herbs) became subject to tax at a rate of HUF 20 to HUF 900 per litre (depending on alcohol content).

**Customs duties**

**Customs penalty**
As a general rule, the rate of the customs penalty will increase from the current 50% to 100% of the customs duty shortfall.

**Taxes on corporate income**

Resident taxpayers are subject to all-inclusive or unlimited CIT liability. Non-residents are subject to CIT on their income from their Hungarian branch’s business activities.

The CIT rate is 10% on the first HUF 500 million of a positive CIT base, without any further preconditions. The tax base above this limit is subject to 19% CIT.
**Minimum tax base**
If a company’s CIT base or the pre-tax profit, whichever is higher, is less than 2% of its total revenues reduced by the income of its foreign permanent establishments (PEs) (i.e. the ‘minimum tax base’), the company can choose to file a declaration and pay CIT either according to the general provisions or on its minimum tax base.

**Real estate holding companies**
The owner of a real estate holding company is subject to Hungarian CIT in the case of alienation or withdrawal of its shares in the real estate holding company.

The tax base of the owner of a real estate holding company in cases of share transfers and share capital decreases is the positive amount of the consideration minus the acquisition price of the shares less the costs of acquisition and of administration. The tax rate is 19%.

A company and its related parties are defined as real estate holding companies if at least 75% of the book value of their assets is domestic real estate and if they have a foreign shareholder that is not resident in a country that has a double tax treaty (DTT) with Hungary or the treaty allows capital gains to be taxed in Hungary.

Please note that the definition of the payer for CIT purposes is very different from the definition used for stamp duty purposes.

**Energy suppliers’ income tax**
Mines, energy producers, and energy distribution system operators are subject to energy suppliers’ income tax. The scope of the definition of ‘energy suppliers’ also includes universal suppliers and authorised distributors of electricity and natural gas.

The base of energy suppliers’ income tax is similar to the CIT base with certain additional adjustments. The tax rate is 31%.

If the energy supplier entity possesses a development tax incentive (see the Tax credits and incentives section), then it is possible to claim this tax incentive for up to 50% of energy suppliers’ income tax liability as well. Additionally, the settled amount of mining royalty can be claimed for up to HUF 1.5 billion from energy suppliers’ income tax liability.

From an accounting point of view, energy suppliers’ income tax falls under the same treatment as CIT.

**Advertisement tax**
The new advertisement tax was introduced in Hungary in August 2014. It applies to certain advertising services, including advertising services made available over the internet. The tax applies in respect of advertisements that are published in Hungarian, or where the advertisement is not published in Hungarian but is available on a website/webpage that is mainly in Hungarian.

In the case of primary taxpayers (see below) the tax is based on net sales revenue. The advertisement tax rate rises progressively by tax brackets: 0% will apply up to HUF 500 million of the tax base, and the top rate of 50% is applicable to the amount over HUF 20 billion of the tax base.

**Primary and secondary taxpayers**
The company providing the advertising service is the primary taxpayer, and the progressive rates above apply to the company’s sales that are within the scope of the tax. The tax is not a withholding tax (WHT), and the customer is not obligated to withhold tax on payments made to the advertising service provider.
The person/company that orders and pays for the advertisement is considered to be the secondary taxpayer. Secondary tax obligation does not arise if:

- the secondary taxpayers are in possession of a declaration from the primary taxpayers stating that they are the primary taxpayers and that they will fulfil their obligations under the new regulation
- the primary taxpayers apply for a registration to the database of the Hungarian tax authority, stating that they are primary taxpayers and that they fulfil their obligations on time or they do not have advertisement tax payment obligation in the tax year because they will not exceed the HUF 500 million threshold, or
- the secondary taxpayers notify the tax authority with the name of the primary taxpayer and the value of the services and they are able to prove that they requested the declaration but have not received it.

Otherwise, the secondary taxpayer is subject to a tax equivalent to 20% of the value of the advertising fee (provided that the secondary taxpayer spends at least HUF 2.5 million in a month for advertisement services). In addition, such advertisement expense would not be a deductible CIT expense for the secondary taxpayer when filing its CIT return (in cases when such yearly spending exceeds HUF 30 million).

**Local business taxes (LBTs)**

All municipalities are entitled to LBTs. LBTs are deductible for Hungarian CIT purposes and are not normally treated as ‘income tax’ in the application of the tax treaties.

The LBT base is the net sales revenue reduced by the cost of goods sold, subcontractors’ work, the costs of materials, mediated services, and research and development (R&D) costs. However, taxpayers are only allowed to deduct from the LBT base part of the cost of goods sold and part of the value of mediated services as calculated based on brackets determined in relation to their annual sales revenues. In the case of related parties, an aggregated LBT base has to be determined if the ratio of the sum of the cost of goods sold and mediated services to the net sales revenue exceeds 50%. This ratio has to be examined separately at the level of each company, and only those related party tax bases that meet the 50% condition have to be aggregated.

General service fees, depreciation, and labour costs are typically not deductible for LBT purposes. 100% of royalty, interest, or dividend income and the LBT base of a foreign PE of a Hungarian company are exempt from LBT.

The LBT rate may differ from municipality to municipality but is capped at 2% by law.

**Innovation contribution**

Companies defined as such in the Accounting Act, except for small and medium-sized enterprises and branches, are also subject to an innovation contribution. The tax base of the innovation contribution is the same as the LBT base. The tax rate is 0.3%.

**Corporate residence**

Corporations are residents for CIT purposes if they are incorporated in Hungary, although foreign corporations may also be deemed to be Hungarian residents for CIT purposes if their place of effective management is in Hungary. As of 2014, tax residents also include the Hungarian trust asset (see Hungarian trust in the Other issues section for further information).

Foreign entities may carry out business through resident corporations or through branch offices (PEs for tax purposes). Commercial representative offices may be opened for auxiliary activities that do not create a taxable presence.

**Hungary**

**Permanent establishment (PE)**

Hungary treats PEs as ‘distinct and separate enterprises’, and profit is attributed to a PE based on the principles set out in the Organisation for Economic Co-operation and Development (OECD) guidelines.

In the Corporate Income Tax Act, a PE is defined as fixed business premises (machinery or equipment) through which the entrepreneurial activity of an enterprise is partly or wholly carried on, regardless of the title of the taxpayer to those premises. A PE may consist of any of the following: a place of management; offices, including representative offices registered in Hungary; factories and workshops; and mines, crude oil or natural gas wells, quarries, or other places from which natural resources are extracted.

Construction sites (including assembly) and related supervisory activities constitute a PE if they last, in the aggregate, for at least three months in a calendar year. All activities carried out at the same construction site qualify together as a single PE, regardless of whether they are based on separate contracts or were ordered by different persons. Construction sites are defined as sites that represent a unit for economic, business, and geographical purposes.

PEs are also created by the direct utilisation of natural resources by a foreign person. A foreign person (except from real estate funds established in a European Economic Area [EEA] member state and not being subject to any tax that may be substituted for CIT) is deemed to have a PE in Hungary if it utilises natural resources or immovable property for consideration, including the alienation or capital contribution of any rights related to the immovable property or natural resources.

A non-resident enterprise is considered to have a PE with respect to activities undertaken on its behalf by another person if its agent is authorised to conclude contracts in Hungary on behalf of the non-resident entity and the agent regularly exercises this right or maintains a stock of goods and products from which it regularly makes deliveries in the name of the non-resident entity.

The insurance of risks occurring in Hungary and insured on behalf of the non-resident person by another person constitutes a PE of the foreign insurer, except for reinsurance activities.

Furthermore, as mentioned above, a foreign taxpayer must also be treated as having a PE if it has a Hungarian branch.

The definition of a PE does not include the following:

- Establishments used solely for the purpose of storing and presenting the goods or products of a non-resident person.
- The stockpiling of goods and products of a non-resident person solely for the purpose of storing, presenting, or processing by another person.
- Establishments used for collecting information, or purchasing goods and products, exclusively for the non-resident person.
- Establishments used for other activities of a preparatory or auxiliary nature.
- Activities of independent agents, provided they are acting in their ordinary course of business.

Note that a different definition of a PE is applicable for LBTs, and no definition is available for special taxes.
Other taxes

Value-added tax (VAT)
VAT is payable on sales of goods and the supply of services. VAT is also payable on the importation of goods, on the intra-Community acquisitions of goods, and on the purchase of certain services provided to Hungarian taxable persons by foreign taxable persons.

VAT rates
The general VAT rate is 27%.

A reduced VAT rate of 18% is applicable for some products (e.g. milk, certain dairy products, products made from cereals, flour, and starch). The 18% VAT rate is also applicable to commercial accommodation services and to services that grant admission to musical and dancing events.

A reduced VAT rate of 5% is available for certain pharmaceutical products, audio books, printed books, newspapers, district heating services, certain live performance activities, certain products of the animal sector (e.g. live and processed large animals, such as pig, sheep, goats, cattle).

Exempted, out of scope transactions
Certain services are exempt from VAT, including, but not limited to, medical, cultural, sporting, and educational services provided as public services. VAT exemption is also available for financial and insurance services. The intra-Community supplies of goods, services, and exports are also treated as exempt transactions.

Generally, the supply of a building or parts of a building, the land on which it stands, and the rental of real estate are VAT exempted. An option is available to apply VAT on the supply or rental of this real estate. VAT exemption cannot be applied to the supply of building plots.

There are some special transactions that may be out of scope of the Hungarian VAT, provided that special conditions are met. These include the acquisition of any contributions in kind, the acquisition of any assets by way of succession, and the transfer of business as a going concern.

Reverse charge mechanism
A domestic reverse charge applies between Hungarian taxable persons for the following activities:

- Services related to immovable property (e.g. construction, maintenance).
- Sales of certain steel products.
- Sales of waste materials.
- Sales of carbon quotas.
- Sales of real estate and land if the application of VAT was chosen.
- Sales of certain agricultural products (e.g. maize, wheat, barley, rye).
- Leasing staff or making available personnel and the use of student-work placement offices.

VAT recovery
VAT deduction is available only for the business-related element of purchases that were made partially for non-business purposes.

If a taxpayer has a negative VAT balance in a VAT period, the amount can be recovered, provided that the VAT balance reaches or exceeds an absolute value of HUF 1 million for monthly filers, HUF 250,000 for quarterly filers, or HUF 50,000 for annual filers.
As a general rule, the deadline for remitting VAT reclaims is 75 days, irrespective of the amount concerned. However, if all incoming invoices, regarding which the VAT was deducted in the VAT return, are settled (paid fully to the suppliers) until the due date of the related VAT return, a 45-day deadline can be applied.

**Directive for refunds of foreign taxable persons**
Taxable persons with their establishment in a European Union (EU) country, other than Hungary, or in Switzerland or Lichtenstein, can recover local VAT. The refund applications have to be submitted electronically. Reclaim requests should be submitted to the tax authority of the country where the EU-registered taxable person is established.

**Reporting obligations**
All types of intra-Community transactions have to be reported in the periodic Intra-Community List in Hungary.

Taxpayers registered in Hungary have to submit domestic recapitulative statements about those transactions where the VAT amount reaches or exceeds HUF 1 million together with the basic data of the related business partner. In respect of the incoming invoices, those cases also have to be considered and included where the sum of the VAT on all transactions carried out by the same partner in a given VAT period reaches or exceeds HUF 1 million. Taxpayers liable to file the statement may opt to report their transactions even below this threshold to the tax authority. If a domestic recapitulative statement has to be prepared (i.e. there are transactions with a VAT amount higher than the referred threshold), the VAT return can only be submitted in electronic form.

A new Electronic Road Freight Control System (EKAER) was introduced in Hungary, which is effective from 1 January 2015. Based on this new reporting obligation for specific road shipments, an EKAER number needs to be requested from the tax authority. The taxpayers who do not fulfil this new reporting obligation can face serious consequences (e.g. the tax authority is entitled to levy a default penalty of up to 40% of the value of goods transported, and also to seize the goods).

**Group taxation**
The VAT Act allows all companies that have established business presences in Hungary and qualify as related enterprises to form a VAT group. The essence of a VAT group is that its members act under a single VAT number in their transactions (i.e. they issue invoices under a shared VAT number and submit a single, joint tax return) and the supplies of products and services between the members do not qualify as business transactions from a VAT perspective.

**Customs duties**
Hungarian customs legislation and policies have been fully harmonised with EU legislation.

As a general rule, the rate of the customs penalty is 100% of the customs duty shortfall.

The EU customs legislation is comprised of the following main regulations:

- Council Regulation 2913/92/EEC establishing the Community Customs Code.
- Council Regulation 1186/2009/EEC setting up a Community system of reliefs from customs duty.
- Council Regulation 2658/87/EEC on the tariff and statistical nomenclature and on the Common Customs Tariff.

**Excise taxes**
The following goods are subject to excise duty:
• Mineral oils.
• Alcohol and alcoholic beverages. Any product with an alcohol content of 1.2% or more by volume qualifies as an alcohol product.
• Beers.
• Wines.
• Sparkling wines.
• Intermediate alcoholic products.
• Tobacco products.

As of 1 January 2015, the excise duty rates are as follows:

• Petroleum products: HUF 110,350 to HUF 124,200 per thousand litres or HUF 4,655 to HUF 116,000 per thousand kilograms, depending on the type of petroleum product.
• Alcohol products: HUF 333,385 per hectolitre of pure alcohol.
• Beer: HUF 1,620 per alcohol degree and per hectolitre, HUF 810 per alcohol degree and per hectolitre for beer produced in a micro-brewery.
• Wines: HUF 0 for grape wines and for certain mixtures of grape wines and sparkling water; HUF 9,870 per hectolitre for wines made from other types of fruit.
• Sparkling wines: HUF 16,460 per hectolitre.
• Intermediate alcoholic products: HUF 25,520 per hectolitre.
• Cigarettes: HUF 12,500 per thousand cigarettes plus 31% of the retail sale price, but a minimum of HUF 24,920 per thousand cigarettes. The tax base per cigarette also depends on the length of the cigarette (without filter). It is double if the length of the cigarette is 8 cm to 11 cm, triple if the length is 11 cm to 14 cm, and so on.
• Cigars and cigarillos: 28.5% of the retail price.
• Fine-cut tobacco: 52% of the retail price, but a minimum of HUF 12,460 per kilogram.
• Other tobacco: 32.5% of the retail price, but a minimum of HUF 12,460 per kilogram.

The Customs Body of the National Tax and Customs Authority is responsible for excise duty (and municipal tax authorities for the excise duty of private distillers). The European Union’s excise duty rules apply in Hungary.

**Property and land taxes**

Hungarian municipalities have the right to levy property tax and land tax at their own discretion until the below caps are reached.

**Property tax**

The owner of a building is subject to property tax liability annually on the first day of the calendar year.

The local government can determine the tax base in either of the following ways:

• The net floor space of the building expressed in square metres, with a maximum tax rate of HUF 1,100 per square metre.
• The adjusted market value of the building, with a maximum tax rate of 3.6% of the adjusted market value.

**Land tax**

The owner of land is subject to land tax liability annually on the first day of the calendar year. Undeveloped plots of land situated within the area of jurisdiction of a local government, including peripheries, are subject to this tax. The local government can determine the tax base in either of the following ways:

• The actual area of the plot expressed in square metres, with a maximum tax rate of HUF 200 per square metre.
The adjusted market value of the plot, with a maximum tax rate of 3% of the adjusted market value.

**Stamp duties**
The most common types of stamp duty are gift duty and duty on transfers of property for consideration. Stamp duty is levied on movable and immovable property and property rights if they were acquired in Hungary, unless an international agreement rules otherwise.

**Gift duty**
Gift duty arises on the date when a contract concerning a gift is concluded.

Transfers of movable property, immovable property, and property rights without consideration are subject to gift duty. In these cases, however, gift duty is only incurred if the transaction was formally documented; except for movable property with a market value of more than HUF 150,000, where gift duty must be paid in any event.

The base of gift duty is the net value of the gift, which is the market value minus any liabilities related to the gift. The general duty rates vary, depending on the type of property: 9% on residential property and 18% on other assets. In general, the transaction shall be reported to the state tax authority within 30 days.

Transfers of movable assets without consideration and acquisitions of claims without consideration including waivers of claims and assumptions of debts are exempt from gift duty, provided that the recipient is a company. However, as of January 2014, this exemption only applies if in the country where the non-resident beneficiary is based, both the rate of the tax corresponding to the corporate tax and the rate of the tax on the sale of the shareholding are no less than 10%. The same conditions apply to the exemption of preferential exchange of shareholdings, preferential asset transfer, and transfer of assets between related parties.

**Duty on transfer of property for consideration**
The obligation to pay duty on the transfer of movable and immovable property for consideration arises on the date when the contract is concluded.

Transfer of real estate, property right, and the transfer of companies that own domestic real estate are subject to stamp duty. In this latter case, stamp duty only applies for acquisitions of direct or indirect participations (stocks, shares, co-operative shares, investor shares, converted investor shares) of at least 75% in a company that owns domestic real estate. For stamp duty purposes, a company that owns domestic real estate is a company (i) in which the book value of the domestic real estate represents at least 75% of the assets or (ii) that holds at least 75% of the shares of another company in which the book value of the domestic real estate represents at least 75% of the assets. Note that for classification purposes, liquid assets, receivables, prepaid expenses, and accrued income have to be disregarded when determining the 75% ratio. The stamp duty for the transfer of real estates and the transfer of companies that own domestic real estate is 4% up to HUF 1 billion and 2% of the amount exceeding HUF 1 billion, up to a maximum of HUF 200 million per real estate.

There are special rules for real estate trading companies and financial leasing service providers. Under certain circumstances, exemptions are available more generally.

Stamp duties are also levied on certain court procedures (e.g. Court of Registration) and on submissions to certain authorities (e.g. appeals to the tax authority). Stamp duty is, for instance, levied in an amount of:

- HUF 100,000 on the registration of a private stock company or a limited liability company
• HUF 600,000 on the registration of a European company
• HUF 100,000 on the registration of any other entity with legal personality (except from European companies)
• HUF 50,000 on the registration of a branch office, and
• HUF 50,000 on the registration of a representative office.

Registration tax
Registration tax is charged on passenger cars, motor homes, and motorcycles before they can be registered and put into service in Hungary. The registration tax is also payable by fleet operators. The duty is payable with the first domestic registration, import, intra-Community purchase, or in the case of a conversion.

The registration tax rate from 1 January 2015 is applied as follows:

• Passenger cars: HUF 45,000 to HUF 4.8 million, depending on the technical features of vehicles (cc, engine type) and environmental classification.
• Hybrid cars: HUF 76,000.
• Electrical cars: HUF 0.
• Motorcycles: HUF 20,000 to HUF 230,000, depending on technical features of the motorcycles (cc).

The registration tax is levied by the Customs Body of the National Tax and Customs Authority.

Mining royalty
Mineral resources and geothermal energy, at the places where they are found in nature, are state property and subject to concession.

The mining company must pay a mining royalty, based on the quantity of the mineral resources extracted under authority permit.

Public health product tax
The first domestic distributor of certain products, as well as the acquirer of goods that are brought from abroad and used for the domestic manufacture of own products that will be sold in Hungary, are liable to pay a product tax. The duty rates from 1 January 2015 are as follows:

• Beverages (depending on sugar content and tariff number): HUF 7 per litre (HUF 200 per litre for syrups and concentrates).
• Energy drink (depending on tariff number, methyl-xanthine, and taurine content): HUF 40 or HUF 250 per litre.
• Cocoa powder with added sugar (depending on tariff number, sugar, and cocoa content): HUF 70 per kilogram.
• Other pre-packed product with sugar (depending on tariff number, sugar, honey, and cocoa content): HUF 130 per kilogram.
• Salty snacks (depending on tariff number and salt content): HUF 250 per kilogram.
• Seasonings (depending on tariff number and salt content): HUF 250 per kilogram.
• Flavoured beer and alcoholic beverages (depending on tariff number and sugar content): HUF 20 per litre.
• Fruit jam (depending on tariff number and sugar content): HUF 500 per kilogram.
• Alcoholic drinks (depending on tariff number and herb content): HUF 20 to HUF 900 per litre.

Environmental protection product fee
The following products are subject to the environmental protection product fee: other crude oil products, tyres, packaging materials, batteries, commercial printing paper, other plastic products, other chemical products (soaps, detergents, cosmetics), printing
or copy paper for office use, and electrical and electronic products (based on customs tariff numbers applicable on 1 January 2010).

The following entities are liable to pay the product fee:

- The first domestic distributor or user for own purposes.
- In the case of domestically manufactured other crude oil products, the first buyer from the first domestic distributor or user for own purposes.
- In the case of toll manufacturing, the party that orders the toll manufacturing.

Product fee rates from 1 January 2015 are as follows:

- Tyres: HUF 57 per kilogram.
- Packaging materials: HUF 19 to HUF 1,900 per kilogram.
- Commercial packaging materials (solely metal packaging of beverages): HUF 304 per kilogram.
- Other crude oil products: HUF 114 per kilogram.
- Batteries: HUF 57 per kilogram.
- Paper-based advertisement materials: HUF 85 per kilogram.
- Electrical and electronic products: HUF 57 to HUF 304 per kilogram.
- Printing or copy paper for office use: HUF 19 per kilogram.
- Other plastic products: HUF 1,900 per kilogram.
- Other chemical products: HUF 11 to HUF 57 per kilogram.

The Tax Body of the National Tax and Customs Authority controls the payment and reporting of the product fee and carries out product fee inspections. The product fee is self-assessed. The product fee returns must be submitted quarterly to the tax authority via its electronic system. An advancement payment is payable for the fourth quarter.

The product fee penalty is generally 100% of the product fee shortfall in cases of non-payment or underpayment.

**Environmental load charges**

Environmental pollution charges were introduced to protect the natural environment, to reduce its impairment, to encourage the users of the environment to engage in activities aimed at the preservation of the natural environment, and to provide funding from the central budget for environmental protection and nature preservation.

Emitting entities liable to pay charges include those who operate point-source emitters subject to registration, pursue activities subject to a water right permit, or who do not use available public drainage systems and dispose of their sewage under a water right permit or a permit from the local water management authorities.

Qualifying materials include sulphur dioxide, nitrogen oxides, mercury, phosphorous, cyanides, and others.

The load charge is calculated on the basis of the quantity of emitted materials multiplied by the fee rate (and, in certain cases, by vulnerability and sludge disposal factors, taking into account average concentration). Basically, the amount of the fee payable depends on the hazard level of the emitted material, e.g. HUF 50 per kilogram for sulphur dioxide and HUF 220,000 per kilogram for mercury.

**Energy tax**

Goods are subject to energy tax at the following rates:

- Electricity: HUF 310.5 per megawatt hour.
- Coal: HUF 2,516 per thousand kilograms.
- Natural gas: HUF 93.5 per gigajoule.
The following entities are subject to energy tax:

- Energy traders.
- End-users.
- Producers.

The tax is self-assessed, and the Tax Body of the National Tax and Customs Authority is responsible for the related administration procedures, except in the case of imports.

**Food chain supervision fee**

The purpose of the food chain supervision fee is to raise revenue for the operation of a regulatory body tasked with the official supervision of the food chain.

The supervision fee is payable by the following natural persons, legal persons, or unincorporated organisations:

- Persons who place animals on the market that are kept for food production, breeding, or experimental purposes.
- Persons who place food or fodder crops, seeds, plant products, and planting material on the market.
- Registered or authorised food businesses.
- Registered or authorised feed businesses.
- Persons who manufacture or place on the market veterinary medicines or veterinary medicinal products.
- Persons who manufacture or place on the market ‘EEC fertiliser’ or other products subject to authorisation.
- Persons involved in the handling, use, further processing, and transport of animal by-products or placing derived products on the market.
- Businesses engaged in the transport of live animals.
- Persons operating facilities for the cleaning and disinfection of vehicles used for transport of live animals, isolation facilities for receiving animals from different stocks, livestock loading ramps, assembly centres, trading sites, feeding and watering stations, rest stations and livestock fairs.
- Persons manufacturing and storing plant propagation material.
- Persons operating a registered or authorised laboratory.
- Persons placing devices on the market that are used for marking animals.

The annual supervision fee is 0.1% of the net sales revenue (excluding excise duty and the public health product tax) derived in the preceding year from these activities.

Any commercial establishment whose main profile is the supply of products recognised as consumable goods (retail store of consumables) has to pay the following rate of the annual supervision fee according to the net sales revenue (excluding excise duty and the public health product tax) derived in the preceding year from the activities listed above:

</tbody>
</table>
The taxpayers concerned have to comply with their reporting obligation by 31 May. The annual supervision fee is payable in two equal instalments: the first instalment by 31 July, and the second by 31 January.

**Telecommunication tax**
The telecommunication tax applies to telecommunications service providers. The telecommunication tax rate is HUF 2 per minute for calls made and HUF 2 per message sent for private individuals, and HUF 3 per minute for calls made and HUF 3 per message sent for parties other than private individuals. The monthly ceiling is HUF 700 per number for private individuals and HUF 5,000 per number for entities other than private individuals.

**Tax on financial transactions**
The scope of the tax on financial transactions includes payment service providers with a registered address or branch office in Hungary, credit institutions entitled to provide foreign currency services, and special services intermediaries entitled to provide intermediated foreign currency services.

The financial transaction tax applies to the following payment services:

- Bank transfers.
- Direct debits.
- Postal cash payments.
- Cash payments from payment accounts (including cash withdrawals using a credit card).
- Cash transfers.
- Bank card payments.
- Letters of credit.
- Cashing cheques.
- Foreign currency exchanges.
- Debt repayments.
- Commissions and banking fees.
- Other transactions in which the amount of the transaction is deducted from the payment account credit balance.

If certain conditions are fulfilled, no tax will be payable for transactions such as:

- Technical transfers between accounts held at the same bank.
- For investment services, transfers between the payment account and the client account, if the investment service provider is a related party of the financial service provider.
- Payments from limited purpose accounts (long-term investment accounts, voluntary pension accounts, subsidised accounts for minors [START account], and custodial accounts).
- Cash pool related payment transactions within the same financial service provider.
- Transactions between financial service providers (including among others financial institutions, investment companies, etc.).
- Payment transactions from social security and family allowance administrative accounts.
- Unapproved (or approved but incorrectly made) payment transactions and their corrections.

In general, the tax base is the amount of the transaction (debit amount, amount paid, amount of currency sold, etc.). In most cases, the tax rate is 0.3% of the transaction but the amount payable may not be more than HUF 6,000 per transaction. This cap is not applicable to transactions in which the duty is payable by the State Treasury or Magyar Posta Zrt, or in case of cash withdrawal. As of 2015, in the case of (card) payment transactions initiated by the payer through the payee, a flat-rate tax of HUF 800 per year.
will be payable. Also, if such payment includes transactions executed with the use of a contactless payment feature, the duty payable is reduced to HUF 500 per year.

**Bank tax**
In Hungary, the bank tax is levied on financial institutions. The rates, among others, are 0.15% on the adjusted balance sheet totals of up to HUF 50 billion, and 0.53% on adjusted balance sheet totals of HUF 50 billion and above. Financial institutions are also subject to 30% tax on their profit before taxation; however, this tax liability is deductible from the bank tax calculated on the balance sheet totals.

**Insurance premium tax**
Insurance premium tax is applicable on voluntary vehicle liability insurance policies (CASCO) and on property and casualty insurance policies in Hungary.

The insurance tax should be paid by the insurance companies after the gross insurance premium received on insurance policies insuring risks located in Hungary. Insurance companies subject to the tax include:

- insurance companies headquartered in Hungary
- foreign insurance companies' Hungarian branches, or
- insurance companies providing cross-border insurance services if these entities, which are headquartered abroad, render taxable insurance services in Hungary.

The above mentioned entities should apply two different tax rates. For voluntary vehicle liability insurance policies, the rate of the tax is 15%; for property and casualty insurance, the rate is 10%.

We note that this tax should be paid neither after the mandatory vehicle liability insurance, nor after life and health insurance.

**Accident tax**
The base of the accident tax is the yearly fee of compulsory motor vehicle liability insurance. The tax rate is 30%, but the maximum rate shall not be more than HUF 83/day/vehicle.

**Employment-related tax and social security contributions payable by employers**
The social tax base is the gross income paid to the employee. The tax rate is 27%.

The rate of training fund contribution on employment income is 1.5%. The tax base is the gross income paid to the employee.

**Branch income**
Foreign companies may establish branch offices in Hungary. A branch office is an organisational unit of a foreign company without legal personality, vested with financial autonomy, and registered in the Hungarian companies register as a branch office of the foreign company. The provisions of the Hungarian Accounting Act apply to branch offices, which must prepare reports using double-entry bookkeeping. Statutory audits are obligatory, except for the branches of corporations whose registered office address is in the European Union.

A branch office is regarded as established when it has been entered into the companies register. A branch office may start operating once the application for registering the branch office has been submitted to the Court of Registration, provided that it indicates ‘under registration’ on its corporate correspondence. Until a branch has been registered,
it cannot carry out any activities that are subject to official permission. A branch office is considered dissolved upon its removal from the companies register.

Branch offices are treated as PEs for taxation purposes. They have to determine their tax base according to the general rules applicable to Hungarian companies. The profit for the year (calculated on the basis of the Hungarian accounting system and adjusted by specific provisions of the Corporate Tax and Dividend Tax Act or CDTA) is subject to CIT of 10% on the first HUF 500 million of the positive CIT base. The tax base above this limit is subject to 19% CIT. The definition of PE is similar to that in the tax treaties but somewhat broader. For treaty countries, the respective treaty definition applies.

A foreign company’s CIT base is determined for all its domestic PEs (except for branches) collectively and for its branches separately. A branch should account for costs and revenues as if it were independent from its foreign parent company.

For a Hungarian PE, earnings before taxes are reduced by cumulated administrative costs incurred proportionately at the headquarters and any of its PEs, with the maximum proportion defined as the revenues of the PE compared to all revenues of the foreign company.

However, if there is a treaty between Hungary and the other country, the provisions of the treaty have priority over domestic law. Therefore, the provisions of the treaty have to be followed in the first instance, and all costs related to the activity of the branch have to be allocated to the branch, without the above restrictions in domestic law, and all profit realised with respect to the branch must also be allocated to the branch. The allocation method must be consistent from year to year, unless there is a good reason for changing it.

The foreign parent must continuously provide the assets and funds required for the operation of the branch office and the settlement of its liabilities. The employees of a branch office are in a legal relationship with the foreign company, and the foreign parent exercises employer’s rights. A branch is considered to be related to its parent company/ headquarters. Therefore, the prices used in inter-company transactions have to be at arm’s length, and the transfer pricing documentation requirements have to be taken into consideration.

**Income determination**

The CIT base should be calculated by modifying the accounting pre-tax profit by adjustments and deductions as provided by the CDTA.

**Inventory valuation**

Inventories are generally valued at their historical cost unless their fair market value is significantly lower than their book value, in which case the fair market value should be recorded. Cost may be determined on the basis of first in first out (FIFO) or average cost.

**Capital gains**

Capital gains (losses) are treated as ordinary income (losses) for tax purposes. The gain on the sale of depreciable assets equals the sales revenue reduced by the net value of the asset for CIT purposes.

If a participation (of at least 10%) is registered within 75 days, or an intangible asset is registered within 60 days, of acquisition and held continuously for at least one year, capital gains from the sale or contribution in kind of the participation, or the intangible asset, are exempt from CIT in general. Any additional acquisitions in the case of a registered participation may also be registered, provided that the 10% participation was already registered.
Stock transactions
Shareholders of a real estate holding company are also subject to CIT on their income from the alienation of the shares in the real estate holding company. Transfers of direct or indirect participations in companies that own real estate may be subject to CIT.

Dividend income
Except in the case of controlled foreign companies (CFCs) (see the Group taxation section), dividends received and accounted for as income in the given tax year are tax-free.

Interest income
No specific provision exists in Hungary for interest income; consequently, interest income is taxable for CIT purposes.

Royalty income
50% of royalty income is deductible for CIT purposes, up to 50% of pre-tax profit. Royalties as revenues are derived from (i) permission for the exploitation of patents, from the industrial design of assets under industrial law, and from know-how; (ii) permission to use trademarks, business names, and business secrets; (iii) permission to use copyrights and similar rights attached to protected work; and (iv) transfers of the property described above (except for trademarks, business names, and business secrets).

Unrealised exchange gains/losses
Tax deferral may be chosen for unrealised exchange gains/losses.

Foreign income
Taxpayers resident in Hungary and foreign entrepreneurs must calculate their CIT base exclusive of any income that is subject to taxation abroad if so prescribed by an international treaty. In any other case, a foreign tax credit is available for income taxes paid abroad (see Foreign tax credit in the Tax credits and incentives section for more information).

In Hungary, there are no provisions under which income earned abroad may be tax deferred.

Deductions
In general, costs and expenses incurred in relation to the taxpayer's income-generating business activity are deductible for CIT purposes.

Accrued expenses are recognised for taxation purposes in the tax year they affect.

Depreciation and amortisation
Accounting depreciation that is accounted as expenditure, and thus included in the accounting profit, should be added to the CIT base. Tax depreciation calculated according to the CDTA reduces the tax base, even if the tax depreciation is higher than the accounting depreciation. The tax depreciation of tangible assets should be calculated using the straight-line method on the basis of the historical value from the time when the asset was first used for business purposes.

Examples of tax depreciation rates include the following:

<table>
<thead>
<tr>
<th>Assets</th>
<th>Depreciation rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Computers and other high-tech machinery</td>
<td>33 or 50</td>
</tr>
<tr>
<td>Vehicles</td>
<td>20</td>
</tr>
<tr>
<td>Other tangible assets</td>
<td>14.5</td>
</tr>
</tbody>
</table>
Hungary

<table>
<thead>
<tr>
<th>Assets</th>
<th>Depreciation rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Buildings (long-life structure)</td>
<td>2</td>
</tr>
<tr>
<td>Rented buildings</td>
<td>5</td>
</tr>
</tbody>
</table>

Assets newly acquired since 2003 can be depreciated at 50% annually; these instruments include, among other items, machinery and intellectual property (IP).

Generally, there is no prescribed amortisation rate for intangibles; the historical value, the residual value, and the useful life should be considered. However, as of 2015, goodwill can be amortised at an annual rate of 10%, provided that the business of the taxable person is in line with its intended purpose and that depreciation of goodwill can also be recognised for accounting purposes. Additionally, extraordinary amortisation might also be recognised for CIT purposes.

In the case of transformations, specific amortisation rules apply.

**Organisational and start-up expenses**
Companies are not obligated to capitalise the costs of formation/reorganisation. The capitalisation of these costs is at the company’s discretion, but the company should comply with its accounting policy. Furthermore, only the direct costs of formation/reorganisation that are not classified as investments or renovations and are likely to be recovered ultimately can be capitalised.

**Interest expenses**
Interest expenses are deductible if the following conditions are met:

- Interest incurs in relation to the company’s profit generating activity.
- Thin capitalisation rules are fulfilled (see Thin capitalisation in the Group taxation section).
- Interest is not paid to a CFC.

**Bad debt**
Under the Accounting Act, bad debts are only deductible for CIT purposes if they are supported by legally valid third-party documents stating that the receivable cannot be collected. Expenses claimed that cannot be enforced in court and expired claims are not deductible for CIT purposes.

In addition to the above, 20% of eligible bad debts are deductible from the CIT base if the debt was not settled within 365 days from the due date.

**Charitable contributions**
Grants made or assets that are transferred without consideration, as well as liabilities assumed or services provided free of charge, will qualify as business expenses if the taxpayer has a declaration from the recipient stating that the recipient’s profit will not be negative without the income received.

Grants will always qualify as non-business expenses if they are provided to a foreign person or foreign resident company.

In the case of film and sports (football, basketball, handball, ice-hockey, and water polo) sponsorship grants, the amount of support is deductible both from the CIT base (as an expense) and from the CIT amount, provided that an official sponsorship certificate is available.
Development reserve
50% of pre-tax profit may be assigned as development reserve. The maximum value of the reserve is HUF 500 million. In general, the period within which the development tax reserve can be released, consistently with the cost of investment, is four years.

Intellectual property (IP) reserve
There is a possibility to create an IP reserve from the profit derived from the sales or capital contribution of intangible assets that generate royalty income, deeming that income non-taxable. The IP reserve should be shown as part of the tied-up reserve in the companies’ books. It may also be used to buy intangible assets that generate royalty income at the company within three years from its creation; otherwise, CIT and late payment penalty should be paid on the amount.

Tax base allowance regarding R&D
A tax base allowance is only applicable for R&D activities if the taxpayer carries out basic research, applied research, or experimental research activities within its own scope of activities.

‘R&D activities carried out within the taxpayer’s operations’ shall mean R&D activities carried out:

- using the taxpayer’s own assets and employees, at the taxpayer’s risk and benefit
- R&D activities carried out by the taxpayer’s employees using the taxpayer’s own assets on behalf of others, or
- (joint) R&D activities carried out under an R&D agreement (e.g. cost sharing agreement).

The direct cost of the R&D activity or the amount of depreciation on the research activity (if the cost of R&D activity is capitalised) is deductible when calculating the pre-tax profit. Additionally, an extra deduction is granted from the tax bases in the form of a downward tax base adjustment.

300% of the direct costs of research activity (up to a maximum of HUF 50 million) are deductible from the tax base if the research activity is carried out jointly with a higher education institution, the Hungarian Academy of Sciences, or a research institute established by them.

The same deductibility rule is applicable if a cooperation agreement is concluded with a research institution operating either as a central budgetary organ or as a majority state-owned business organisation.

Taxpayers may also deduct from their CIT base the direct costs of R&D activity carried out with own assets and employees of their related parties if, based on the choice and the declaration of the related party, the deduction was not utilised on its side and the R&D also serves the business of the taxpayer who utilises the deduction.

Employee benefit expenses
Employee benefits and the fringe benefit tax payable on them are tax-deductible.

Bribes, ‘kickbacks’, other illegal payments
Bribes, ‘kickbacks’, and illegal payments are not recognised as business costs for CIT purposes and are non-deductible from the tax base.

Fines and penalties
Fines and penalties are not deductible for CIT purposes.
Taxes
Taxes are usually deductible for CIT purposes, except for CIT, recoverable VAT, and the income tax of energy suppliers and public utility service providers.

Net operating losses
Losses can be carried forward according to the following:

<table>
<thead>
<tr>
<th>Year the tax loss was generated</th>
<th>Period of utilisation</th>
</tr>
</thead>
<tbody>
<tr>
<td>Before the tax year starting in 2014</td>
<td>Indefinitely</td>
</tr>
<tr>
<td>During the tax year starting in 2014</td>
<td>Until the tax year including 31 December 2025</td>
</tr>
<tr>
<td>During the tax years starting after 2014</td>
<td>During the following five tax years</td>
</tr>
</tbody>
</table>

In the case of acquisition or legal transformation, the company’s tax losses carried forward cannot be utilised if:

- the majority of the company’s shares are directly/indirectly acquired by an independent entity (an entity who was not one of the company’s owners in the preceding two financial years)
- the activity of the company changes significantly in the two years following the transformation, or
- the successor company does not generate any revenue from at least one activity of the predecessor.

Losses carried forward may only be used to offset up to 50% of the tax base calculated without losses carried forward. However, as of 2015, losses carried forward and acquired by the successor company in the course of corporate transformation may be written off in a tax year only in proportion to the ratio of the sales or other revenues gained in the tax year in respect of the continued business activity and the average sales or other revenues gained by the predecessor company in the last three tax years preceding the transformation.

Note that earlier tax losses must be used first (FIFO principle), and the losses of predecessors are also deductible from the successor company’s CIT base if the aforementioned conditions are met.

Losses cannot be carried back (except for agricultural companies, who may account deferred losses by self-revision or by correcting the amount of tax paid in the previous two tax years).

Payments to foreign affiliates
There is no general restriction on the deductibility of a consideration due to a foreign entity, provided the payment is a justifiable business cost. General anti-avoidance provisions (abuse of law, substance-over-form) may also result in non-deductibility. If the parties are considered to be related parties under the definition of the CDTA, the Hungarian tax office is entitled to adjust the Hungarian party’s tax base to reflect the market price (arm’s-length price) if the parties did not make the adjustment themselves.

Considerations due for services are only deductible if the actual performance of the services is supported and the Hungarian taxpayer can prove that it benefits from the service.

Thin capitalisation rules may apply to interest on any non-banking debt in excess of three times the equity (see Thin capitalisation in the Group taxation section).

The consideration paid to a CFC is not deductible for CIT purposes unless the taxpayer is able to prove and keeps documentation that it serves the purposes of business operations. For further details on the CFC rules, see the Group taxation section.
**Group taxation**

Group taxation is not available for CIT purposes in Hungary. However, in the case of certain taxes (e.g. LBTs), an aggregated tax base has to be determined for related parties if certain conditions are met.

*See Value-added tax (VAT) in the Other taxes section for a description of group taxation for VAT purposes.*

**Transfer pricing**

If parties qualify as related parties (as defined in the Hungarian CDTA) and the price applied differs from the arm’s-length price, the CIT base should be modified by a proper transfer pricing adjustment. In addition, the foreign PEs of a Hungarian company and the Hungarian head office also qualify as related entities and are subject to transfer pricing regulations.

Taxpayers are obligated to prepare transfer pricing documentation on intra-group transactions. The documentation has to be prepared for every contract between related parties (including in-kind contributions made at the time of establishment).

Transfer pricing documentation is not required to be prepared:

- For transactions between a resident taxpayer’s PE and a related company if the resident taxpayer under the provisions of an international treaty adjusts the corporate tax base ensuring that it does not include the foreign taxable income.
- For transactions covered by an advanced pricing agreement (APA) issued by the state tax authority.
- If the consideration due for goods or services supplied by a third party is recharged in full to a related party.
- In the case of liquid assets transferred without consideration.
- If the aggregated value of the transaction does not exceed HUF 50 million during the tax year.
- In the case of individuals, small or micro enterprises, transactions conducted on the stock exchange, or at an officially set price.

When determining the transfer prices applied between related companies, in addition to the traditional methods (comparable uncontrolled price, resale-minus, and cost-plus methods), it is also possible to use the transactional net margin method and the profit-split method. In addition to these methods, companies may continue to use other methods if the traditional methods are inadequate.

Taxpayers are allowed to prepare two types of documentation: country-specific documentation or consolidated transfer pricing documentation. Taxpayers may prepare consolidated transfer pricing documentation if this does not jeopardise comparability, and the contracts:

- have the same subject matter and all their terms and conditions are identical or only slightly different or
- closely relate to each other.

Taxpayers are required to make a declaration in their CIT returns as to which type of documentation they choose.

Country-specific documentation must include the following:

- A functional analysis.
- Industry and company analyses.
- An economic analysis.
Hungary

• A financial analysis.
• An account of the process of selecting the transfer pricing methodology.

Consolidated transfer pricing documentation must consist of two main parts:

• The core documentation, which includes the standard data for each company within the group that is resident in any EU member state.
• Country-specific documentation, which describes the agreements between the taxpayer and its related parties.

The documentation has to be available no later than the filing deadline for the CIT return in any given year; otherwise, the tax authority may assess a default penalty of up to HUF 2 million for each case of missing or deficient documentation. In the case of a repeat offence, it is up to HUF 4 million for each missing or deficient documentation. For the repeated lack or deficiency of the same documentation, the penalty may go up to four times the original penalty levied. Note, however, that this documentation only has to be prepared and kept in the company's files, rather than being filed with the tax authority.

A new section of the Corporate Tax and Dividend Tax was issued on 1 January 2015. As per this new rule, it requires taxpayers to apply the interquartile range when determining and presenting the arm's-length nature of the transfer prices of their inter-company transactions if they meet all of the following conditions:

• The arm's-length price is determined by applying the resale minus, the cost plus, the transactional net margin, or the profit split method, or by other methods.
• The arm's-length price or range is determined based on information from databases that are publicly accessible or verifiable by the tax authority.
• The comparability analysis covers the data of at least ten comparable companies for at least three financial years or the sample range exceeds 15%.

The above provisions must first be applied for 2015 tax year documentation purposes.

**Thin capitalisation**

As a general thin capitalisation rule, interest payable is not a deductible expense for CIT purposes if the amount of a company's outstanding liabilities owed to non-financial institutions exceeds three times the value of the equity.

Debt means the average daily balance of outstanding loans, outstanding debt securities offered privately, bills payable (with the exception of bills payable to suppliers), and any other liability shown in the balance sheet that entails the payment of interest from the taxpayer's profit. Debt includes non-interest bearing loans as well.

Equity means the average daily balance of registered capital, capital reserve, accumulated profit reserve, and tied-up reserve. This means that revaluation reserves and current year profit and loss have to be disregarded when computing the equity for Hungarian thin capitalisation purposes.

Back-to-back arrangements are exempted from the thin capitalisation calculation.

**Controlled foreign companies (CFCs)**

CFCs are foreign persons or entities established abroad and/or foreign resident entities if, among other conditions, they are owned by a resident private individual/entity who is deemed to be the beneficial owner (i.e. has a certain ownership share or voting ratio or dominant influence in the enterprise) or if the majority of their income derives from Hungarian sources and, in both cases, the effective tax rate of the persons/entities is lower than 10%. If a foreign company's tax base is negative or zero and a multi-rate
corporate tax system is in place in the given country, the lowest tax rate must be no less than 10% in order for an entity not to qualify as a CFC.

Certain exceptions may be available (for companies in EU member states, OECD member states, and treaty countries if a real economic presence can be proved). It is the taxpayer’s obligation to provide proof on the (lack of) CFC status.

---

**Tax credits and incentives**

**Foreign tax credit**

Foreign tax credit is available for income taxes paid abroad, up to the Hungarian tax payable on the creditable income (at a maximum of 90% of income tax paid abroad).

The foreign income has to be classified by country of origin and revenue type. The deducted tax may not exceed the lesser of either the applicable foreign tax or the applicable tax based on the taxation treaty between Hungary and the given country.

If there is no taxation treaty, 90% of the tax payable abroad is credited against the tax liability, up to a hypothetical tax liability calculated by using the average Hungarian tax rate. Full tax credit is applicable if so described by a tax treaty. The average tax rate is the CIT rate, reduced by the applicable tax allowances, divided by the tax base. Indirect costs should be allocated in proportion to the revenue of the branch office to the total revenue of the whole company.

**Development tax incentive**

Each development tax incentive may be claimed for a ten-year period (beginning on the completion of the development) on the CIT returns over a maximum period of 14 years from the original application for the incentive. In any given tax year, the tax incentive is available for up to 80% of the tax payable but is limited, in total, to the state aid intensity ceiling.

Claiming the tax relief is subject to a government decree, based on authorisation by the European Commission, if the total amount of state aid required for the investment project exceeds the amount that can be provided at the same municipality for an investment project with eligible expenses exceeding 100 million euros (EUR). If the investment is below this threshold, taxpayers only need to notify the Ministry for National Economy before starting the investment. However, the beneficiary will also have to obtain prior consent of the European Commission if it has closed down the same or a similar activity in the European Economic Area in the two years preceding the aid application or intends to close down the same or a similar activity elsewhere in the European Economic Area in the two years after the completion of the investment.

Tax incentives are available for investments if:

- the net present value of the investment is at least HUF 3 billion or
- the net present value of the investment is at least HUF 1 billion in certain designated areas and provided that in the four years following the year in which the tax incentive is first used against the tax base:
  - the annual average number of employees has increased by at least 150 compared with either the year before the investment was made or the average number of employees for the three years preceding the investment (by 75 in certain designated areas) or
  - the annual wage costs have increased by 600 times the minimum wage effective on the first day of the tax year (by a multiple of 300 in certain designated areas) compared with either the annual wage costs of the year before the investment was commenced or the average annual wage cost for the three years preceding the investment.
Further incentives may be granted, provided certain criteria are met, to companies that invest:

- at least HUF 100 million in equipment for zoogenic food production
- at least HUF 100 million in environmental protection projects (including energy efficiency)
- at least HUF 100 million in the production of films and videos
- at least HUF 100 million in basic research, applied research, and experimental development projects
- at least HUF 100 million in projects financed by an issue of stock market-quoted shares if (i) the project is started before the last day of the third calendar year following the date of issue, (ii) the total nominal value of the shares issued by the fifth year following the start of the project continuously reaches 50% of the value of the registered shares, (iii) the total issue price reaches 50% of the eligible costs, and (iv) at the date of the application for the incentive the company has at least 25 shareholders or at least 25% of the issued shares are owned by shareholders where each of them does not have more than 5% of the issued shares' nominal value
- at least HUF 500 million in projects initiated by small and medium-sized enterprises, or
- at least HUF 100 million in projects implemented and operated in a free entrepreneurship zone.

Tax incentives may also be granted for projects that create new jobs. The restrictions prescribed in the CDTA regarding the headcount of staff and the percentage of new entrants to the labour market that may be claimed for such investments have been abolished, although the conditions prescribed in the relevant decree must still be met.

In addition, the law stipulates that a taxpayer will be required to submit the details of the investment in their tax returns submitted for the tax year in which the investment is put into operation, including, in particular, the date of completion and the eligible expenses actually incurred at present value.

**Regional aid map of Hungary**
Large enterprises based in Budapest will not be eligible for tax incentives, while those in Pest County will only be able to claim tax incentives for projects aimed at starting a new economic activity in certain assisted areas (most assisted areas will have a 5% increase in their maximum aid intensities from 30% to 35%).

Aid intensities will decrease by 5% in the Western and Central Transdanubia regions (from 30% to 25% and from 40% to 35%, respectively).

In the Northern Hungary, Northern Great Plain, Southern Great Plain, and Southern Transdanubia regions, the maximum aid intensity will remain the same (50%).

**Free entrepreneurship zone**
The free entrepreneurship zone contains over 900 settlements in the unprivileged areas of Hungary designated by the government and coordinated by the regional business development agency that is comprised of individual regions, separated by public administration, borders, and topographical lot numbers, that are treated jointly for regional development purposes.

**Tax holidays**
Tax holidays may be granted in relation to film and theatre subsidies, developments, and small and medium-sized entities (SMEs).
**Other tax incentives**

**Film, performing arts, and spectator sports incentives**

In Hungary, companies are encouraged to subsidise film production, performing arts, and spectator sports through the high rate of tax savings available. As sponsors, companies are able to achieve tax savings up to 104.75% of the financial support they provide for film makers, performing artists, or sport clubs. Also, as of 2015, the option of allocating some of the payable CIT to support sports and culture has also become available. These two regimes are not applicable in parallel within the same tax year.

**Tax incentive for SMEs**

A tax incentive is available for SMEs (basically, those with a maximum of 250 employees; annual net revenue of a maximum of EUR 50 million; or a maximum annual balance sheet total of EUR 43 million). SMEs that take a loan from a financial institution for the acquisition or production of tangible assets may deduct 40% of the interest paid on the loan from their tax due and may deduct 60% of the interest paid on loans that have been taken since 1 January 2014, up to a maximum deduction of HUF 6 million. However, taxpayers engaged in certain business sectors cannot use this tax incentive (e.g. transportation, agricultural activity).

In order to be eligible for the above tax incentives, the wages and salaries need to be kept at a certain required level, according to relevant regulations.

**Withholding taxes**

Under the domestic rules, there is no WHT on dividends, interest, or royalties paid to entities.

**Tax administration**

**Taxable period**

CIT must be calculated by reference to the accounting year, which is either the calendar year or, for group companies, the group’s accounting year.

**Tax returns**

Returns must be lodged by the last day of the fifth month following the last day of the accounting year (31 May for a calendar year taxpayer). The tax payable is determined by self-assessment.

Tax returns may be submitted either electronically or in paper format. However, those who are legally obligated to submit monthly tax and contribution returns (e.g. employers and payers) may only submit tax returns electronically.

**Payment of tax**

CIT instalments must generally be reported and paid quarterly or monthly (above HUF 5 million tax payable). The final (‘top-up’) payment is due by the last day of the fifth month following the last day of the accounting year (31 May for a calendar year taxpayer). In the case of taxpayers with net sales revenues of over HUF 100 million, 100% of the expected final payment is due by the 20th day of the last month of the accounting year. However, a late payment penalty is only levied if the company fails to pay at least 90% of the expected final payment by the above deadline. The late payment penalty is 20% of the difference between the tax advances paid (including the top-up payment) and 90% of the actual CIT liability.
Tax audit process
Generally, the tax authority selects the taxpayers subject to tax audit based on certain criteria, which are communicated to the public, and an elaborate risk assessment model. Tax audits can vary in the following ways: the tax authority can (i) re-audit tax returns, (ii) monitor the redemption of government guarantees, (iii) audit the fulfilment of certain tax obligations, (iv) gather data and information, (v) monitor compliance with duty payment obligations, or (vi) re-audit previously audited tax periods.

A tax audit period can cover any years that are not lapsed (five years after the last day of the calendar year in which the taxes should have been declared or reported, or paid in the absence of a tax return or declaration) or not closed by a re-audit of tax returns. The tax audit starts when a company receives the notice of audit and finishes when that company receives the report containing the tax authority’s findings. The deadline for the completion of the tax audit is between 30 and 90 days, although, in special cases (e.g. related tax audit, request for assistance from foreign tax authorities), it can last over a year.

Once the tax authority has completed the audit process, it issues its minutes. The minutes detail all the findings of facts of the audit and serves as the background of the tax assessment, and the basis on which the tax authority will pass its first-instance resolution. Upon receipt of the minutes, the taxpayer has the opportunity to submit its remarks to the minutes and raise any disagreement with the findings of the audit.

In case of a dispute, the tax assessment of the tax authority may be appealed and challenged before the second-instance tax authority, which has the right to annul the first-instance resolution and decide on the merits of the case, or to instruct the first-instance tax authority to carry out a new audit if the facts and circumstances have not been appropriately and fully developed.

The decision of the second-instance tax authority is final and binding. Following the receipt of this decision, the company may appeal to the court. The court may uphold, amend, or annul the Resolution of Second Instance and, if it is necessary, may order a new process in relation to the tax audit.

The superior tax authority or the minister in charge of taxation (minister appointed for the supervision of the tax authority, i.e. Minister of Ministry for National Economy in Hungary) may take regulatory action on request by the taxpayer. The superior tax authority or the minister can also amend or annul the unlawful resolution, and, if it is necessary, a new procedure can be ordered.

Statute of limitations
In general, the statute of limitations is five years from the end of the calendar year in which the tax return should be filed. Self-revision interrupts the term of limitation.

Topics of focus for tax authorities
The tax authority will take more stringent measures against ‘aggressive tax planning’ (tax planning that takes advantage of unintended administrative or legal loopholes) using its international experience and cooperation agreements.

Generally, the following categories of taxpayers may expect to be scheduled for tax audits:

- Taxpayers whose records show frequent changes in registered address or ownership.
- Businesses that have operated for several years with substantial loans from their shareholders.
- Taxpayers that declared significant amounts of payable and deductible VAT during their pre-company period.
- Taxpayers that have been in continuous operation despite continuing losses.
• Taxpayers that spend a significant portion of their sales revenues on services.
• Taxpayers that have significant tax base decreasing items, tax allowances, and subsidies related to investments.
• Taxpayers that deduct R&D expenses.

The tax authority will also pay more attention to the actual content of transactions conducted between related parties and to the methods companies use to determine the arm’s-length price.

Other issues

Principal forms of doing business

• Branch.
• Partnership.
• Limited liability company.
• Private company limited by shares.
• Public company limited by shares.

Mergers and acquisitions (M&A) from a business and tax perspective

Mergers in Hungary are tax-free transformations if they qualify under the definition of preferential transformation. Preferential transformation means that a company, without going into liquidation, transfers all its assets and liabilities to another company in exchange for the issue to its shareholders of securities representing the capital of that other company, and a cash payment not exceeding 10% of the nominal value, or, in the absence of a nominal value, of the accounting par value of those securities.

In a preferential transformation, the predecessor company does not have to amend its tax base by the difference between the adjusted book value and the book value. The adjusted book value means the historical value of assets less any depreciation deducted from the tax base plus the readjusted amount of extraordinary depreciation. Furthermore, for shareholders, the income accounted in excess of the historical value of the shares they acquire in the preferential transformation is also not taxable for CIT purposes for as long as the shareholder holds its participation.

In any other case, if two companies merge, the difference between the market value and the book value of the assets and liabilities is taxable for the successor company. Furthermore, the predecessor company may decrease its tax base by the amount of the difference between the adjusted book value of its assets and their book value if the adjusted book value is the higher of the two. The company will increase its tax base if the book value is higher than the adjusted book value.

International Financial Reporting Standards (IFRS) adoption

Companies defined in Section 4 of Decision no. 1606/2002/EC (mainly companies listed on the stock exchange) have to prepare their consolidated annual reports according to IFRS. However, non-listed subsidiaries of EU-listed entities are exempt from the preparation of IFRS consolidated financial statements. If a company chooses IFRS, Hungarian Accounting Rules (HAR) financial statements must also be prepared and filed with the Court of Registration.

Foreign Account Tax Compliance Act (FATCA) agreement with the United States (US)

Hungary and the United States signed an intergovernmental agreement (IGA) on 4 February 2014 in order to implement the US FATCA. The Hungarian IGA is based on the ‘Model 1 A’ Agreement, which means a reciprocal information exchange between the Hungarian tax authority and the US Internal Revenue Service (IRS). As part of the negotiations regarding the IGA, Hungary can include further entities and accounts into
Annex II of the Agreement with exempted or deemed-compliant status compared to the originally issued Model Agreement. Changes to the local legislation for FATCA and IGA purposes are currently in the process of being adopted by the Hungarian Parliament.

**Hungarian trust**

As of 2014, the Hungarian trust, a new contractual institution, was enacted. Under a Hungarian trust contract, the settlor entrusts the trustee to manage (in its own name but for the benefit for the beneficiary) the assets, rights, and receivables (trust asset) transformed thereto by the settlor. A trust contract cannot have a term longer than 50 years.

The trustee can be either a natural person or a legal entity, and its private fortune is handled separately from the trust asset/fortune. The trustee is liable for the tax administration (tax number, tax returns, etc.) and the bookkeeping of the trust. The Hungarian National Bank keeps an authentic registry of the Hungarian trustees.

The trust asset is subject to Hungarian CIT and LBT and is considered to be tax resident under domestic law (thus, may have access to treaty benefits).

The Hungarian trust is a good business opportunity for companies since it may be inserted into a structure tax neutrally.

Significant developments

Value-added tax (VAT)
Changes to the VAT took effect as of 1 January 2015, resulting in a higher price of food products, while the price of clothing, beauty products, medicine, and other products will be lowered.

The general VAT rate is 24% as of 1 January 2015 (previously 25.5%). The lower VAT rate increased from 7% to 11%.

Excise tax
The general Icelandic excise tax has been abolished as of 1 January 2015.

Taxes on corporate income

Resident corporations pay tax on their worldwide income less operating expenses. Deductible operating expenses are comprised of all the expenses and costs needed to provide, insure, and maintain income.

Corporate income tax (CIT) for limited liability companies (LLCs) and limited partnership companies is assessed at a rate of 20%. CIT for other types of legal entities (e.g. partnerships) is assessed at a rate of 36%.

Non-resident corporations receiving payments for services or business operations carried out in Iceland, as well as corporations operating a permanent establishment (PE) in Iceland or receiving a profit from such establishments, are subject to CIT for their Icelandic income at the same rate as applies to resident corporations.

Corporate residence

In general, all corporations incorporated and registered in Iceland are considered to be tax residents in Iceland. The same applies to corporations that have their home address in Iceland according to their articles of association or if the management of the company is carried out in Iceland.

Foreign corporations are regarded as Icelandic tax residents if the effective management is carried out in Iceland.

The Internal Revenue Directorate can decide with a ruling whether a corporation’s residence is in Iceland. The ruling can be appealed to a court of law.

Permanent establishment (PE)
Apart from the above mentioned, when defining whether a business activity in Iceland constitutes a PE, definitions in tax treaties are taken into consideration as well as commentaries to the Organisation for Economic Co-operation and Development (OECD) Model Tax Convention.
Iceland

**Other taxes**

**Value-added tax (VAT)**

VAT is a consumption tax levied on all stages of domestic business transactions. VAT is levied on all goods and services, as well as on the imports of goods and services, unless specific exemptions apply.

**VAT rates**

The general VAT rate is 24%.

The following goods and services are subject to a reduced VAT rate of 11%:

- Rental of hotel and guest rooms and other accommodation.
- Subscription to radio and television.
- Newspapers, periodicals, and magazines.
- Books, both Icelandic and translated, musical notation as well as their audio recordings. Same applies to compact discs and other similar media as well as electronic media.
- Geothermal hot water, electricity, and fuel oils used for heating houses and swimming pools.
- Food and other consumables for people as detailed in an addendum to the VAT Act.
- Access to roads and other transport related constructions.
- Compact discs, records, audio cassettes, and other equivalent mediums for music only and not videos. Same applies to electronically published music without video.
- Condoms.
- Reusable cloth diapers and diapers inserts.

Certain services and goods are zero-rated, which means that there is, in fact, no VAT charge. Zero-rated VAT mainly applies to exported goods and services provided abroad.

**VAT entities**

Businesses engaged in the trade of taxable goods and services for business purposes must register and collect VAT.

**VAT transport and tourism**

As of 1 January 2016, passenger transportation will bear 11% VAT. This includes:

- Whale watching.
- Horseback riding.
- Snowmobile tours.
- Four wheeler tours.
- Air tours.

The following passenger transportation will still be exempt from VAT:

- Public transportation on land, air, and sea.
- Organised transportation for the disabled.
- Organised transportation of school children.
- Taxi.
- Medical transportation.

The entrance fee to swimming pools and spas will bear 11% VAT as of 1 January 2016.

The service of travel agencies for services used in Iceland will bear 11% VAT as of 1 January 2016. If the service is used abroad, then there is 0% VAT.
Services exempt from VAT
The VAT Act details certain services that are exempt from the tax, such as healthcare services, social services, the operation of schools, various education services, cultural activities, postal services, sale of real estate (not including the rental of hotel and guest accommodation), rental of car parking lot, insurance activity, services of financial banks as well as securities trading, lotteries and betting pools, artistic activities, funeral services, and all services of ministers of the church.

Those selling taxable goods and services totalling less than 1 million Icelandic króna (ISK) per 12-month period are also exempt from collecting and remitting VAT.

Agent for non-resident parties
Non-residents who are engaged in taxable transactions in Iceland but are neither domiciled nor have permanent residence in Iceland must appoint a VAT agent with residence in Iceland to report on their behalf. Both parties are liable for the VAT payments (responsible for ensuring remittance of VAT). If a non-resident does not appoint a VAT agent, the purchaser of the services/goods is responsible for paying the VAT (reverse charge).

VAT accounting periods and due dates
VAT is generally filed and paid on a bimonthly basis. The due date for payment of VAT is one month and five days after the end of the settlement period. For example, the due date for the January and February payments is 5 April.

If the VAT is not paid on the due date, a 1% penalty charge is added for every day up to a total of 10%. Late penalty interests also apply.

VAT reimbursement
Foreign enterprises, which are neither residents of Iceland nor have a PE, may obtain reimbursement of VAT paid on goods and taxable services that have been purchased or imported for the commercial purposes of such enterprises in Iceland.

Such reimbursement can be effected to foreign enterprises that would be subject to registration in Iceland according to Article 5 and Article 6 of the VAT Act if the enterprises in question were engaged in such business in Iceland. This means that such enterprises as travel agencies, insurance companies, banks, and other financial institutions cannot obtain such reimbursement.

Another prerequisite is that the enterprise shall neither have sold goods nor taxable services in Iceland during the period to which the application refers.

Parties domiciled abroad can get partial VAT reimbursement on goods they have bought in Iceland if they take them abroad with them within three months from the date of purchase. They then must provide the goods, along with any necessary documents, to the appropriate reimbursement company or to the customs authorities on the date of departure, and the purchase price must amount to at least ISK 4,000.

Customs duties
The Directorate of Customs controls import, transit, and export and also collects duties, taxes, and various state revenue. The general rule is that import duties are to be paid on imported goods (customs, excise duties, VAT, and various other charges) unless otherwise stated in the law. For import of some products, other conditions, such as an import licence, may need to be submitted.

Iceland, Liechtenstein, Norway, and Switzerland are members of the European Free Trade Association (EFTA). The EFTA Convention established a free trade area among its member states. In addition, the EFTA states have jointly concluded free trade agreements with a number of countries in Central and Eastern Europe as well as in the
Iceland

Mediterranean region, Mexico, and Singapore. Also, the EFTA states entered into the Agreement on the European Economic Area (EEA) in 1992. The current contracting parties are, in addition to the three EFTA states, the European Community (EC) and the 25 EC member states. Iceland also has a bilateral agreement with its two neighbouring countries, Greenland and Faeroe Islands.

**Excise tax**
The general Icelandic excise tax has been abolished as of 1 January 2015.

**Property taxes**
A municipal property tax is applied annually on the assessed value of real estate in Iceland.

**Stamp taxes**
Stamp duty is levied on documents regarding change of ownership of real estate and land and ships registered in Iceland.

The stamp duty rate is 0.8% and 1.6%, depending on whether the rightful owner is an individual or a legal entity.

When issuing deeds and purchase agreements of real estate and land, a 0.8% or 1.6% stamp duty is levied on the officially registered value of the real estate and land. The same applies to the deeds and purchase agreements of ships.

All other documents bear no stamp duty.

**Turnover taxes**
There is an agricultural charge of 1.2% of agricultural turnover.

**Payroll taxes**

**Social security contributions**
Employers are responsible for social security contribution. The general rate is 7.49%. An additional social security contribution for fishermen is 0.65%. The social security contribution for taxpayers who have submitted the A1 form is 0.425% until 30 June 2015 and 0.360% from 1 July 2015 onwards.

**Pension contributions**
The minimum contribution by employers into their employees’ pension fund is 8% of each employee's salary. An employer’s additional contribution into private pension funds is 2% against a maximum 4% contribution from the employee.

**Rehabilitation fund**
Employers must pay 0.13% of all salaries to VIRK, The Icelandic Rehabilitation Fund.

**Taxes on natural resources**

**Carbon tax**
A carbon tax for liquid fossil fuels is paid to the treasury. Liquid fossil fuels are gas and diesel oils, petrol, aircraft and jet fuels, and fuel oils. All importers of fossil fuels are liable for the carbon tax regardless of whether it is for retail or personal use. The tax rate is:

- ISK 5.90 per litre of gas and diesel oils.
- ISK 5.15 per litre of petrol.
- ISK 6.50 per kilo of mineral oil gas and other carbohydrate gases.
- ISK 7.30 per kilo of fuel oil.
Tax on electricity/hot water
A special tax is collected from parties that sell electricity and/or hot water to end users.

Carbohydrate tax
Corporations licensed for carbohydrate research, and/or processing, as well as anyone who directly or indirectly participates in the processing or distribution of carbohydrates, must pay a processing tax, which is independent of processing performance, and a carbohydrate tax on profits.

Bank tax and an additional bank tax
Financial services permitted to operate as banks and savings banks are subject to 0.376% tax on total debt exceeding ISK 50 billion at year-end.

Financial Activities Tax (FAT)
A 5.5% tax is levied on all salary payments made by financial institutions, including insurance companies. The tax is collected monthly.

A temporary addition to FAT
In assessment year 2015, an addition of 6% to FAT will be levied and collected on total salary payments in excess of ISK 1 billion. This tax is paid by the same entities that are subject to the general FAT.

Accommodation tax
Those who sell accommodation that is subject to VAT are liable to collect and return a tax of ISK 100 for each sold night.

National Broadcasting Fee
There is a National Broadcasting Fee of ISK 17,800 per year.

Branch income
A branch is treated as an extension of a trading activity of the overseas parent company incorporated in another jurisdiction and is not a separate legal entity.

Due to the fact that a branch acts in the name of the overseas parent company, a branch’s income is taxable in accordance with the parent company (i.e. if the parent company is an LLC, the branch is subject to a CIT rate of 20%).

Tax treaties may allow Icelandic CIT as a credit against foreign income tax imposed on the parent company.

There is no branch profits remittance tax on the repatriation of profits to the parent company.

Income determination

Inventory valuation
The valuation method of raw materials and finished goods is on a first in first out (FIFO) basis or via the average cost method. When computing the value of produced goods, both direct and indirect production cost must be taken into account. For tax purposes, inventories can be further written down at a rate of 5% of calculated value.

Last in first out (LIFO) is not permitted.
Iceland

**Capital gains**
Capital gains are treated as taxable income in the year that transfer of ownership occurs and, as such, taxed as part of the general corporate income. Capital gains are generally not subject to withholding tax (WHT). There are rules that allow full deduction of net capital gains from the sale of shares, so, in general, corporations are not subject to taxation on capital gains from sale of shares.

**Dividend income**
Dividend income is treated as taxable income and taxed as a part of corporate income. There are extensive rules that allow full deduction of the dividend, so, in general, corporations are not subject to taxation on dividends. Dividends are subject to WHT (currently 20%), which is a temporary payment towards the final tax assessment.

**Interest income**
Interest income derived from bank deposits, mutual and investment funds, bonds, or other financial deeds; any kind of exchange rate profit; and any other income from monetary assets are subject to 20% tax.

Interest income of foreign parties is subject to 10% WHT in Iceland.

**Profit from derivatives**
Profits from derivatives, which were previously treated as interest income, are now treated as profits/losses from sales and are subject to 20% tax. Losses from derivatives can be used against profits from derivatives within the calendar year, which was not possible when profit was treated as interest income.

**Foreign income**
Income earned abroad is generally taxed as a part of corporate income since a resident company is subject to CIT on its worldwide income.

Controlled foreign company (CFC) rules stipulate that profits of companies in low-tax jurisdictions must pay income tax of such a profit in direct proportion to shares, regardless of distribution. A low tax jurisdiction is defined as a jurisdiction where the CIT rate is less than two-thirds of the Iceland’s tax rate (i.e. 13.3%, being two-thirds of 20%). See Controlled foreign companies (CFCs) in the Group taxation section for more information.

Double taxation of foreign income is avoided either through tax treaties or domestic tax provisions.

**Deductions**
Deductible operating expenses are comprised of all the expenses and costs needed to provide, insure, and maintain income (e.g. interest expense, employee expense, travel expense, insurance expense).

**Depreciation**

</tr>
</tbody>
</table>

* The depreciation base for these assets is their purchase value less earlier depreciations (book value).

The method used to calculate depreciation is the straight-line method.

**Goodwill**

Purchased goodwill can be written down at 10% to 20% per year.

**Start-up expenses**

Purchased fishing rights (quotas) cannot be depreciated.

Start-up costs for agricultural production rights can be depreciated without revaluation over five consecutive years. The following assets can be depreciated in full in the year they are initiated or paid with steady payments over five years:

- Start-up costs, such as enterprise registration and obtaining operation licences.
- Cost of research, developments, marketing, obtaining patents and trademarks. If the use of individual assets does not fall into the same depreciation category, the depreciation base will be dependent on how much of it is used, so that if an asset is used for three-quarters or more for the same operation, the whole asset will have the same depreciation percentage.

**Interest expenses**

Interest expenses are deductible, provided that the loan was taken for business purposes.

**Bad debt**

As a general rule, 5% of bad debt can be written off. Certain conditions must be met in order to write off a higher percentage of bad debts.

Temporary provisions in Icelandic tax law allowed corporations to make a credit entry for only 50% of debt write-off totalling ISK 50 million and 75% of debt write-off for amounts over ISK 50 million in income years 2009 through 2014. The requirement for the provision was that the debt was business-related and operating loss and transferable loss had been offset.

The debt write-off could be carried forward from the income year 2010 to the income year 2014. The transferrable amount that could be carried forward on a yearly basis was the amount that exceeded the transferable operating losses and the possible operating loss, tax depreciation, and write-down each year. All assets that could be depreciated had to be depreciated and all possible write-downs on receivables and stock had to be done to fulfil the requirements of the provisions. No dividend could be distributed for the income years 2010 through 2014, and the company could also not be merged, wound up, or be jointly taxed with another company during the period. At the end of this five year period (i.e. at the end of the income year 2014), it is now possible to transfer any debt write-off that exceeded ISK 500 million as profit with an equal amount each year from the income year 2015 to the income year 2019. If the write-off does not exceed ISK 500 million, the amount will not be subject to taxation.

**Charitable contributions**

Charitable contributions up to 0.5% of total income are deductible.
**Iceland**

**Pension expenses**
Payments to obligatory pension funds for employees at a minimum of 8% of wages are deductible.

**Fines and penalties**
Fines and penalties are not deductible.

**Taxes**
Taxes levied on business profit are not considered to be deductible; consequently, CIT is not deductible. However, social security contributions and other labour taxes are deductible.

**Net operating losses**
Operating losses may be deducted from income from business and independent economic activity. Tax losses can be carried forward for ten years and utilised over ten years from the year that the loss was incurred.

No carryback of losses is allowed.

**Payments to foreign affiliates**
An Icelandic corporation can claim a deduction for royalties, management fees, and similar payments made to foreign affiliates, provided that such amounts are made on an arm’s-length basis and reflect services received. Interest at normal commercial rates paid to foreign affiliates generally will be allowed as a deduction on the condition that the loan terms are comparable to those that would have been agreed upon by unrelated parties.

**Group taxation**
Companies may opt for consolidated taxation if a company owns at least a 90% share in another company. Consolidated taxation means, among other things, that losses of one company can be offset against profits of other companies. Consolidated taxation cannot be extended to non-resident companies or PEs of foreign companies.

**Transfer pricing**
The Icelandic transfer pricing rules are based on the OECD’s arm’s-length principle. The transfer pricing rules include a definition of related parties and they also state that certain corporations are bound to documentation duties regarding transactions with related parties.

In addition to specific rules regarding transfer pricing, there are also certain provisions in domestic law that contain the so-called arm’s-length principle, which state that when a deal or transaction between the parties significantly differs from what is thought to be normal in such transactions, the tax base can be determined and reassessed according to what the tax authorities consider to be normal.

These adjustments can be performed only within the domestic statute of limitation period, i.e. six years.

**Thin capitalisation**
There are no specific rules regarding thin capitalisation in Iceland, but anti-avoidance principles can be applied (see Transfer pricing above).

**Controlled foreign companies (CFCs)**
Any individual who either directly or indirectly owns a share in any kind of a company, fund, or organisation domiciled in a low-tax jurisdiction must pay income tax on
the profit of such corporations in direct proportion to one’s own share, regardless of
distribution.

The same applies to taxpayers chairing companies, funds, organisations, or associations
in a low-tax jurisdiction from which they receive direct or indirect benefits. In order for
the above to apply, the foreign party must be domiciled in the low-tax jurisdiction, half
the ownership of the foreign party must be directly or indirectly in the hands of Icelandic
taxpayers, or they must have effective management and executive control within the
income year.

CFC regulations do not apply if a fund or an organisation is protected by a double
taxation treaty (DTT) between Iceland and the low-tax country or if such entities
are registered in another EEA member country where they have legitimate business
operations and the countries have assigned a DTT between them.

**Tax credits and incentives**

**Foreign tax credit**
The Income Tax Act offers a foreign tax credit to mitigate the potential for double
taxation. The credit applies only to taxes of a nature similar to the tax being reduced
by the credit (i.e. taxes based on income). This credit is limited to the amount of tax
attributable to foreign-source income.

**Temporary Reimbursements in Respect of Filmmaking in Iceland**
On account of Act No. 43/1999 on Temporary Reimbursement in Respect of Filmmaking
in Iceland, it is possible to have 20% of production expenses incurred in the production
of films or television material in Iceland reimbursed. When more than 80% of the total
production cost of a motion picture or television programme is incurred in Iceland, the
reimbursement shall be calculated from the total production cost incurred within the
EEA. Production costs refer to all costs incurred in Iceland deductible from the revenues
of enterprises pursuant to the provisions of the Act on Income Tax. Payments pertaining
to employees and contractors are only to be included in production costs if they are
verifiably taxable in Iceland.

Application for reimbursement of production costs shall be submitted to the Ministry of
Industry. The application, with supporting documentation, shall be submitted before
production commences in Iceland.

In assessing whether a proportion of the production costs of a motion picture or
television programme shall be reimbursed, the following conditions must be fulfilled:

- The production shall be suitable for promoting Icelandic culture and the history and
  nature of Iceland.
- The production shall be suitable for enhancing the experience, knowledge, and
  artistic ambition of the parties involved. A specific company shall be established in
  Iceland for the production; an Icelandic branch or agency of a company registered in
  another member state of the EEA shall be considered a specific company.
- Information about the subject of the production or programme shall be made
  available.
- An itemised estimate of the production costs and sources of funding shall be made
  available, together with confirmation by the funding parties and a declaration by the
  applicant to the effect that the production conforms to the aims of the Act.
- Information about the content of the proposed production of a motion picture or a
  television programme shall be made available, such as a script and information about
  filming locations.
- A statement shall be made available to the effect that the material to be produced is
  intended for general distribution to cinemas or television stations.
Iceland

- The subject matter of the film or television programming should not violate the provisions of law relating to film inspection and the ban on violent films, nor the provisions of the General Penal Code concerning pornography.
- A confirmation that all taxes and debts in Iceland have been paid.

Act No. 43/1999 on Temporary Reimbursements in Respect of Filmmaking in Iceland expires at year end 2016. All projects approved by that date will be reimbursed in accordance with the law.

Research and development (R&D)
Innovative companies are entitled to a special deduction from CIT amounting to 20% of expenses incurred on the projects, provided certain conditions are met.

The maximum amount on which the deduction is calculated within each company shall not exceed ISK 100 million for each operating year. In the case of purchased R&D services, maximum expenses shall not exceed ISK 150 million.

Withholding taxes
Dividends paid to a resident company are subject to 20% WHT. Dividends paid to a non-resident company are subject to 18% WHT. The final taxation of dividends paid to a company within the EEA is nil, as WHT will be reimbursed in the year following payment upon filing a tax return.

Interest paid to resident company is subject to 20% WHT, and interest paid to non-resident company is subject to 10% WHT.

Gross royalties paid to a non-resident are taxable at the standard 20% CIT rate and subject to withholding.

### Notes
1. The lower rate applies to corporate shareholders with a minimum ownership of 10%.
2. The lower rate applies to corporate shareholders with a minimum ownership of 25%.
3. The lower rate applies to copyright royalties (except films, etc.) and royalties for computer software or patent, or for information concerning industrial, commercial, or scientific experience (except information provided in connection with a rental or franchise agreement).
4. The lower rate applies to royalties paid for the use of industrial, commercial, or scientific equipment.
5. The lower rate applies to the right to use computer software or patent concerning industrial, commercial, or scientific experience.
6. The lower rate applies to corporate shareholders with a minimum ownership of 10%, and which has been held for a period of at least 12 months preceding the date the dividends were declared.
7. The lower rate applies to Russian corporate shareholders with a minimum ownership of 25% of capital in the Icelandic company and the foreign capital invested exceeds 100,000 United States dollars (USD).
8. The higher rate applies to royalties for the use of trademarks, know-how in relation to a trademark, and films, etc.

### Tax administration

#### Taxable period
The tax year is the calendar year. However, in certain circumstances and upon application, the Internal Revenue Directorate can allow a different fiscal year from the calendar year.

#### Tax returns
At the beginning of every year, the Internal Revenue Directorate determines the time limit for taxpayers to submit their tax returns and supporting documentation. The deadline for receipt of tax returns from corporations is generally 31 May each year. This deadline is extended upon application. Those who have their tax returns prepared by professional services can generally have the deadline extended until 10 September each year.

The final assessment must be completed no later than ten months after the end of the income year. Tax assessments for corporations will be available at the end of October.

#### Payment of tax
Advance tax payments are due on the first day of every month, except January and October. Corporations pay income tax in advance, which is in turn deducted from the final tax assessment in October each year. The advance tax is collected in the months

www.pwc.com/taxsummaries  Iceland 869
Iceland

of February to September and amounts to 8.5% of the income tax on each due date. In total, the advance tax payments amount to 68% of the income tax. Any deficit remaining when final tax is assessed must be paid in equal instalments by 1 November and 1 December.

Income tax payments on dividends and interest income are due every quarter. Due dates in 2015 are 20 April, 20 July, 20 October, and 20 January (2016), and the final deadline for payment is 15 days later.

**Tax audit process**
The Icelandic tax authorities select returns for examination using a variety of methods. Some returns are selected based on electronic selection; some are selected based on a formal supervisory plan. A tax audit can also be traced to information obtained by the tax authorities through efforts to identify participants of tax avoidance transactions.

The examination generally takes place by formal, written communication. The rules of the procedure are very strict, and the process can take from a few weeks to a year/years.

Appeal rights involve two administrative levels and also two judiciary levels.

**Statute of limitations**
Tax authorities in Iceland have the right to reassess tax returns for CIT six years prior to the year of the assessment (i.e. the statutory period of limitation is six years). The statutory period only reaches a maximum of two years in time if tax returns have been filled out properly and all necessary information presented for tax authorities to establish a correct assessment. This means that in the year 2015, tax authorities can, in theory, reassess the company’s tax back to income year 2009.

**Topics of focus for tax authorities**
The topic of focus for tax authorities in Iceland is tax avoidance in general.

**Other issues**

**Foreign currency financial statements/Accounting in foreign currencies**
Companies can apply to the Registry of Annual Accounts for an authorisation to keep their books and prepare their annual accounts in a foreign currency. An application must be filed no later than two months before the beginning of the company's fiscal year. The authorisation is valid for five years, and the Registry of Annual Accounts is responsible for ensuring that the authorised companies continue to fulfil one or more of the following necessary conditions:

- The company's main business operations take place abroad or the company is a part of a foreign company group.
- The company owns foreign subsidiaries or shares in foreign companies, and its main business transactions are with those companies.
- The company's main place of business is Iceland, while a considerable number of their transactions are in foreign currencies.
- A considerable portion of the company's investments and related debts are in foreign currencies.

If the company deems that it no longer fulfils the conditions, it must notify the Registry of Annual Accounts. The Registry can postpone its decision of the authorisation's discontinuance for two fiscal years if the situation that is causing the fact that the company does not continue to fulfil the necessary conditions is deemed to be temporary.

The average exchange rate for the fiscal year must be used when converting income and expenses, depreciations included, into Icelandic króna. The exchange rate at the end of
the fiscal year must be used when converting assets, debts, and capital. Exchange rate differences that may arise do not affect income on profit and loss accounts.

**Rules on foreign exchange**

In 2008, the Central Bank of Iceland issued rules on foreign exchange in order to restrict or temporarily prevent certain types of cross-border capital movements or foreign exchange transactions related thereto, which, according to the Central Bank of Iceland, can cause serious and considerable instabilities in exchange rates and financial matters. These rules were later added to Act No. 87/1992 on Foreign Exchange.

The Act on Foreign Exchange defines capital movements as:

- The issue, sale, or purchase of shares, debt instruments, drafts, unit shares in mutual funds, and other long-term and short-term securities.
- Deposits in and withdrawals from accounts with depository institutions.
- Lending, borrowing, and the issue of securities not related to international transactions with goods and services.
- The import and export of share certificates and domestic and foreign currencies.
- Forward contracts, options, currency and interest-rate swaps, and other related foreign exchange transactions in which the Icelandic króna is one of the denominated currencies.
- Presents, grants, or other transactions equivalent to the ones detailed above.

**Capital movements of foreign currencies**

All capital movements of foreign currencies between countries are prohibited, with the exception of payments for the purchase of goods and services or other capital movements specifically exempt from the regulations, according to Act No. 87/1992 on Foreign Exchange.

**Capital movements of domestic currencies**

Capital movements between countries in domestic currencies are also prohibited. There are several exceptions to this rule.

**Cross-border mergers**

Rules regarding taxation in relation to cross-border mergers between Icelandic LLCs and LLCs from EEA and EFTA countries are now in the Icelandic Tax Act. Tax will be levied on uncapsulated profit, which can be postponed for five years.
**India**

**Significant developments**

Please note this information is current as of 1 June 2015. Typically, new legislation comes into force in June or July. Please visit the Worldwide Tax Summaries website at [www.pwc.com/taxsummaries](http://www.pwc.com/taxsummaries) to see any significant corporate tax developments that occurred after 1 June 2015.

**Place of effective management (PoEM)**

Presently, a foreign company is considered resident in India if the control and management of its affairs is situated wholly in India.

To bring to tax those companies that are incorporated outside India but controlled from India, the concept of PoEM has been introduced. PoEM is an internationally recognised concept and accepted by the Organisation for Economic Co-operation and Development (OECD).

From the tax year 2015/16 onwards, a company will be regarded as a resident in India if its PoEM is in India in that year. The term PoEM has been explained to mean a place where key management and commercial decisions that are necessary for the conduct of the business of an entity as a whole are, in substance, made. Also in due course, a set of guidelines for determination of PoEM are expected to be issued.

**Disclosure of foreign income and assets**

In order to deal with undisclosed money held abroad, the Black Money (Undisclosed Foreign Income and Assets) and Imposition of Tax Act, 2015 has been enacted. Apart from penalties and prosecution, the Act provides for separate taxation of undisclosed income in relation to foreign income and assets. Such income will henceforth not be taxed under the Income Tax Act, 1961 but under the provisions of the new legislation. The most important highlight of this new Act is the provision of a one-time compliance opportunity to those who have undisclosed foreign income and assets. If such persons file a declaration with the specific authority and pay the tax and penalty thereon, no prosecution will be launched against them.

**Taxes on corporate income**

A resident company is taxed on its worldwide income. A non-resident company is taxed only on income that is received in India, or that accrues or arises, or is deemed to accrue or arise, in India.

The corporate income tax (CIT) rate applicable to an Indian company for the tax year 2015/16 is 30% (plus surcharge, education cess, and secondary and higher education cess). Resident companies are liable to pay surcharge at 7% on the amount of CIT if the total income exceeds 10 million Indian rupees (INR) and at 12% if income exceeds INR 100 million. The effective tax rate for income up to INR 10 million remains unchanged.
at 30.9%. The corporate tax rates are proposed to be reduced from 30% to 25% over the
next four years in a phased manner starting from financial year 2016/17.

Foreign companies (i.e. companies that have been registered under the laws of a country
other than India) operating in India are taxed at 40% (plus surcharge, education cess,
and secondary and higher education cess). For tax year 2015/16, surcharge for foreign
companies is 2% if income exceeds INR 10 million and 5% if income exceeds INR 100
million. The effective tax rate for income up to INR 10 million remains unchanged at
41.20%.

The education cess is 2%, and the secondary and higher education cess is 1%.

**Minimum alternative tax (MAT)**

Companies are liable to pay MAT on their adjusted book profits (other than income
from life insurance business) where the tax liability under the normal provisions of the
Income Tax Act, 1961 for the tax year is not more than 18.5% (excluding surcharge,
education cess, and secondary and higher education cess) of such book profits. A credit
of such MAT is available in the subsequent years (up to ten years) where tax is payable
under the normal provisions of the Income Tax Act, 1961 (i.e. other than MAT).

Capital gains from the transfer of securities, interest, royalties, and fees for technical
services accruing or arising to a foreign company have been excluded from chargeability
of MAT if tax payable on such income is less than 18.5% (exclusive of surcharge,
education cess, etc.). Further, expenditures, if any, debited to the profit and loss account
corresponding to such income shall be added back to the book profit for the purpose of
computation of MAT.

Additionally, a surcharge at the rate of 10% on the tax amount is applicable where the
taxable income exceeds INR 10 million.

<table>

</tbody>
</table>

* Surcharge is payable only where total taxable income exceeds INR 10 million.

Sick companies (companies whose losses have wiped out their net worth and that are
doubtful of being revived and nursed back to profitability) are not subject to MAT.

A Special Economic Zone (SEZ) developer and a unit in an SEZ are also liable to pay
MAT.

**Tonnage tax scheme**

The tonnage tax scheme, a presumptive tax provision, can be chosen by a non-resident
company that has a place of effective management in India, owns at least one qualifying
ship, and whose main objective is to carry on the business of operating ‘qualifying ships’. The
tonnage tax scheme is in place of CIT and is levied on the basis of tonnage of vessels
owned, operated, or chartered by it instead of net income generated by commercial
operations. Under a presumptive tax system, taxpayers can opt to be taxed at a pre-
designated tax rate on its revenues.
Under this scheme, deemed income shall be assessed at a rate of 7.5% of the amount paid or payable (whether in or out of India) for carriage of passengers, livestock, mail, or goods shipped from any port in India, and the amount received or deemed to be received in India on account of carriage of passengers, livestock, mail, or goods shipped to any port outside India shall be treated as profits and gains of business.

Treaty rates will apply to non-resident shipping companies if they are lower than under the tonnage tax scheme.

A government company, or a public company formed and registered in India with the main object of operating ships, is eligible for a deduction not exceeding the lower of 50% of its profits and the sum transferred to a special reserve to be utilised in accordance with the provisions of the Income Tax Act, 1961.

**Direct taxes code**

During his speech of Budget, 2015, the Hon’ble Finance Minister announced that the enactment of Direct Taxes Code (DTC) Bill, 2010 is no longer required as most of its provisions have already been legislated as a part of the current income tax law.

**Local income taxes**

There are no local, state, or provincial taxes on income in India at present.

---

**Corporate residence**

A company is treated as a resident of India if:

- it is an Indian company or
- its PoEM in that year is situated in India (see below).

A partnership firm, a limited liability partnership (LLP), and other non-individual entities are treated as resident in India if any portion of their control and management is in India. They are non-resident if their control and management is situated wholly outside India.

**Place of effective management (PoEM)**

Presently, a foreign company is considered resident in India if the control and management of its affairs is situated wholly in India.

To bring to tax those companies that are incorporated outside India but controlled from India, the concept of PoEM has been introduced. PoEM is an internationally recognised concept and accepted by the OECD.

From the tax year 2015/16 onwards, a company will be regarded as a resident in India if its PoEM is in India in that year. The term PoEM has been explained to mean a place where key management and commercial decisions that are necessary for the conduct of the business of an entity as a whole are, in substance, made. Also in due course, a set of guidelines for determination of PoEM are expected to be issued.

**Permanent establishment (PE)**

A PE is defined in India as a fixed place of business through which the business of an enterprise is wholly or partly carried on.
Other taxes

Value-added tax (VAT)/Central sales tax (CST)
The sale of movable goods in India is chargeable to tax at the central or state level. The Indian Constitution grants powers to state legislatures to levy tax on goods sold within that state. Such sales are, therefore, chargeable to VAT at the rates specified under the VAT laws of the relevant state. All goods sold in the course of inter-state trade are subject to CST.

Where goods are bought and sold by registered dealers, on an inter-state basis for trading or for use in the manufacture of other goods or specified activities (such as mining or telecommunication networks), the rate of sales tax is 2%, provided Form ‘C’ is issued by the purchasing dealer. In the absence of Form ‘C’, the applicable rate would be the rate of VAT on such goods in the originating state. Inter-state procurement, on which CST is charged by the originating state, is not eligible for input tax credit in the destination state and is a cost to the buyer.

Under the VAT regime, the VAT paid on goods purchased within the state is eligible for VAT credit. The input VAT credit can be utilised against the VAT/CST payable on the sale of goods. It is, thus, ensured that the cascading effect of taxes is avoided and only the value addition is taxed.

Currently, there is no VAT on imports into India. Exports are zero-rated. This means that while exports are not charged to VAT, VAT charged on components purchased and used in the manufacture of export goods or goods purchased for export is available to the purchaser as a refund based on the state VAT legislations.

The state VAT is charged at different rates varying from 5% to 15% with a few exceptions where the VAT is charged at a lower or higher rate. The rate of VAT depends on the nature of the goods involved and varies from state to state.

A turnover threshold is prescribed so as to exclude small traders from the ambit of VAT. A tax under composition scheme, at a lower rate, may be levied on small traders within a specified turnover limit in lieu of VAT.

Entry tax/Octroi duty
‘Entry tax’ is a tax on the entry of specified goods into the state from outside the state for use, consumption, or sale therein. Entry tax continues to exist under the VAT regime. However, in certain states, it has been made VATable and can be offset against the output VAT liability in the state. Where entry taxes have been imposed in lieu of octroi, there is no offset available, and hence they are a cost. Typically, the rate of entry tax ranges from 0.5% to 15%, depending upon the state.

The levy of entry tax has been considered unconstitutional by the High Courts in many states. The state governments have filed petitions before the Supreme Court to challenge the decisions of the High Courts, and, at present, the matter is pending final adjudication before the Supreme Court.

Octroi is a municipal levy that is levied at the time of entry of specified goods into the limits of the relevant municipal corporation. Thus, octroi is leviable, if there is movement of goods from one city to another in the same state, in the event that the cities fall under the jurisdiction of two different municipal corporations.

Customs duty
Customs duty is levied by the Central Government on goods imported into, and exported from, India. The rate of customs duty applicable to a product imported or exported depends upon its classification under the Customs Tariff Act, 1975. With regard to exports from India, customs duty is levied only on a very limited list of goods.
The Customs Tariff is aligned with the internationally recognised Harmonised System of Nomenclature (HSN) provided by the World Customs Organization.

Customs duty is levied on the transaction value of the imported or exported goods. According to section 14 of the Customs Act, 1962 (CA), the concept of transaction value is the sole basis for valuation for the purpose of import and export of goods. While the general principles adopted for valuation of goods in India are in conformity with the World Trade Organization (WTO) agreement on customs valuation, the Central Government has passed independent Customs Valuation Rules that apply to the export and import of goods.

The customs duty applicable to any product is composed of a number of components, which are as follows.

- The Basic Customs Duty (BCD) is the basic component of customs duty levied at the effective rate under the First Schedule to the Customs Tariff Act (CTA) and applied to the landed value of the goods (i.e. the cost, insurance, and freight [CIF] value of the goods plus landing charges). The peak rate of BCD is 10%.
- The additional customs duty in lieu of excise duty (commonly known as Countervailing Duty [CVD]) is equivalent to, and is charged in lieu of, the excise duty applicable on similar goods manufactured or produced in India. CVD is typically calculated on the sum of the landed value of the goods and the applicable BCD. However, the CVD on specific consumer goods intended for retail sale in India is calculated on the basis of the maximum retail sale price (MRP) printed on their packs less the specified abatement. The present rate of excise duty is 12%, and, consequently, the rate of CVD is also 12.5%.
- Education cess at 2% and secondary and higher education cess at 1% are also levied on the aggregate of the customs duties (except in cases of safeguard duty, countervailing duty, and anti-dumping duty).
- An additional duty of customs (ADC) to countervail state taxes and VAT of 4% is charged in addition to the above duties on imports, subject to certain exceptions. ADC is calculated on the aggregate of the assessable value of the imported goods, the total customs duties (i.e. BCD and CVD), and the applicable education cess and secondary and higher education cess.

BCD, education cess, and secondary and higher education cess levied on the aggregate of duties of customs are a cost of any import transaction. The duty incidence arising on account of the CVD and ADC may be set off or refunded, subject to prescribed conditions. Where goods are imported for purposes of manufacture, the Indian manufacturer may take a credit of the CVD and ADC paid at the time of import for offset against the output excise duty. In the case of service providers, only the credit of the CVD is available. Similarly, the Central Government provides exemption from payment of ADC on import of certain specified goods, subject to fulfilment of prescribed conditions. The Central Government has also prescribed a refund mechanism in relation to ADC paid on goods imported for the purpose of trading in India, subject to fulfilment of the conditions prescribed under the governing notifications and circulars issued in this regard.

**CENVAT (Excise duty)**

Central Value Added Tax (CENVAT) is an excise duty levied by the Central Government on the manufacture or production of movable and marketable goods in India.

The rate at which excise duty is levied on the goods depends on the classification of the goods under the Central Excise Tariff Act, 1985. The excise tariff is primarily based on the eight digit HSN classification adopted so as to achieve conformity with the customs tariff.
The excise duty on most consumer goods that are intended for retail sale is chargeable on the basis of the MRP printed on the package of the goods. However, abatements are admissible at rates ranging from 15% to 55% of the MRP. Goods, other than those covered by MRP based assessments, are generally chargeable to duty on the ‘transaction value’ of the goods sold to an independent buyer. In addition, the Central Government has the power to fix tariff values for imposing ad valorem duties on the goods.

Presently, the excise duty rate is 12% with a few exceptions of lower or higher rates. However, there is also a partial or complete exemption for specified goods from payment of excise duties available.

The central excise duty is a modified VAT wherein a manufacturer is allowed credit of the excise duty paid on locally sourced goods and the CVD and ADC paid on imported goods. The CENVAT credit can be utilised for payment of excise duty on the clearance of dutiable final products manufactured in India. Manufacturers of dutiable final products are also eligible to take advantage of the CENVAT credit of the service taxes paid on input services used in or in relation to the manufacture of final products and clearances of final products from the place of removal, subject to the fulfilment of certain conditions.

Service tax
Service tax is levied on all services provided or agreed to be provided in a taxable territory, except the following:

- Services on the negative list.
- Services specifically exempted by notification.

The rate of service tax is 14% with effect from 1 June 2015.

Typically, the onus of payment of service tax lies with the provider of services. However, for certain services (e.g. import of services), the onus of paying the service tax lies, either fully or partially, with the service recipient.

Goods and services tax (GST)
The Central Government took a major step towards the transition to a national integrated GST in 2006. In this regard, a Joint Working Group (JWG) was constituted by the Empowered Committee (EC) to study global GST models and identify suitable models for introduction in India.

The EC released its First Discussion Paper on the proposed GST in India on 10 November 2009. In the discussion paper, the government indicated that the GST shall have two components; one levied by the centre (Central GST or CGST) and the other levied by the states (State GST or SGST). The CGST and the SGST would be applicable on all transactions of goods and services made for a consideration except for exempted goods and services, goods that are outside the purview of the GST, and transactions that are below the prescribed threshold limits. The exact date of implementation of the GST is not yet decided. Details of taxes that would be subsumed into the dual GST are as follows.

The following taxes will be subsumed into the CGST:

- Excise duty.
- CVD/ADC.
- Service tax.

The following taxes will be subsumed into the SGST:

- VAT.
India

- Entertainment tax.
- Luxury tax.
- Lottery taxes.
- State cesses and surcharges.
- Entry tax not in lieu of octroi.

It is likely that the CST will be phased out in the GST regime.

The Finance Minister has indicated that the GST will be implemented with effect from 1 April 2016.

**Advance ruling for customs, excise, and service tax**

In order to enable foreign investors to ascertain their indirect tax liabilities arising from proposed business ventures in India, the Central Government has constituted the Authority for Advance Rulings (AAR) as a high level quasi-judicial body. The functions of the AAR consist of giving advance rulings on a specific set of facts relating to specified matters under customs, central excise, and service tax.

Advance rulings may be sought by any resident/non-resident investor entering into a joint venture in India in collaboration with another non-resident, or a resident of India, or by a resident setting up a joint venture in India in collaboration with a non-resident. Through the Finance Act 2005, this facility has also been made available to existing joint ventures in India. The Central Government is also empowered to include any other class or category of persons as eligible for the benefit of an advance ruling. Under the customs law, the Central Government has allowed a ‘resident public limited company’ to be eligible for an advance ruling. The Central Government has also allowed a ‘resident public limited company’ to apply for advance ruling under central excise and service tax law in relation to a proposed new line of business.

Further, the definition of ‘activity’ has also been expanded under the customs and excise law to enable the existing importer/exporter or manufacturer, as the case may be, to seek advance ruling for a proposed new line of business. In addition, the advance ruling can now be sought on the issue of admissibility of credit of service tax paid or deemed to have been paid on ‘input services’ used in or in relation to manufacture of excisable goods. Earlier, it was only limited to the ‘inputs’ used in or in relation to manufacture of excisable goods.

**Property taxes**

Municipal tax on a property is levied on the basis of the municipal law prevalent in each city. The rate of tax levied varies from city to city in India, and is generally related to the prevailing market prices for property in each locality.

**Transfer taxes**

Documents evidencing transfer of shares have to be stamped under the Indian Stamp Act. Transfer of other movable property is chargeable to stamp duty under the respective State Acts, or under the Indian Stamp Act, in case a state has not passed its own Stamp Act. See the discussion under Stamp duties below.

Immovable property or rights in it can be transferred by way of sale, lease, licence, or easement. Sale of immovable property requires a conveyance deed on which stamp duty is payable, and must be registered with the Registrar of Assurances of the state under the Registration Act 1908. A lease agreement also needs to be stamped and registered compulsorily. A licence is defined in section 52 of the Indian Easements Act (IEA), as a grant of a right to do something in or upon the property that would be unlawful but for such grant, which is not an easement or interest in the property. Easement is defined in section 4 of the IEA as the right given to an occupier of a land, to continue enjoyment of which one can do or prevent something from being done on land that is not one’s own. An easement agreement also needs to be registered. Other non-tax laws
governing transfers of immovable property include the Transfer of Property Act, 1882 and the Benami Transactions Prohibition Act. The last-mentioned Act prohibits, on pain of confiscation, the purchase and registration of property in the names of persons who are not the true beneficial owners, which has been used as a way of hiding undisclosed wealth. There are also some state-level Acts (e.g. the Maharashtra Ownership Flats Act).

**Stamp duties**

In India, stamp duty is charged on certain documents (not the transaction). No document that has not been duly stamped can be introduced as evidence in any court proceedings. However, this does not affect the legality of transactions. Improperly stamped documents can be impounded by any public officer. The Bombay Stamp Act also provides for imprisonment and fine for executing improperly stamped documents. The Registrar of Assurances can also refuse to register any document that the Registrar feels is improperly stamped. Stamp duty is charged at both central and state levels. State level stamp duties vary from state to state, and on document type.

The Indian Stamp Act, 1899 applies to the whole of India except to those states that have enacted their own Acts. Six states have so far enacted their own stamp law (Jammu and Kashmir, Maharashtra, Gujarat, Rajasthan, Karnataka, and Kerala) while some states have adopted Schedule I of the Indian Stamp Act, with or without modification. Even in states that have enacted their own Acts, stamp duty on certain instruments of commercial character, such as transfer of shares, is always leviable under the Indian Stamp Act because, under the Constitution of India, duty on certain instruments can only be levied by the Union of India, whereas, in respect of all other instruments or documents, either the state or the Union can levy duty.

An important source of revenue for state governments is the stamp duty charged on transfer of immovable properties, where rates are prescribed by each state in respect of transfer of property within their jurisdiction. The stamp laws do not define what immovable property is; the definition is imported either from section 3 of the Transfer of Property Act, 1882 or from the General Clauses Act, 1897. Payment of stamp duty is mandatory for immovable property transfers, whereas for other transactions involving movable assets other than actionable claims, stamp duty is not payable if there is delivery of possession without executing a conveyance.

Buyers of newly constructed properties are also required to pay service tax and VAT calculated as percentages of the total consideration, and are obligated to withhold tax from the seller. The cumulative cash flow impact of these three tax requirements, in addition to stamp duty and registration charges, have increased transaction costs of buying immovable property in India to very high levels.

**Dividend distribution tax (DDT)**

Indian companies distributing or declaring dividends are liable to pay DDT at 15% (plus surcharge [surcharge has increased to 12%], education cess, and secondary and higher education cess). This tax is payable on declaration, distribution, or payment, whichever is earlier, and it is in addition to the CIT payable on business profits.

A holding company does not have to pay DDT on dividends paid to its shareholders to the extent that it has received dividends from its Indian or foreign subsidiary company on which DDT has been paid by the respective subsidiary. However, the benefit will not be available if the holding company is itself a subsidiary of another company.

**Securities transaction tax (STT)**

STT is applicable to transactions involving the purchase/sale of equity shares, derivatives, units of equity-oriented funds through a recognised stock exchange, or the purchase/sale of a unit of an equity-oriented fund to any mutual fund. The STT leviable in respect of such transactions varies for each kind of instrument, whether delivery based or non-delivery based.
Wealth tax
All companies are liable to pay wealth tax assessed at 1% of the value of specified net assets if the value of net wealth exceeds INR 3 million. Valuation of assets is in terms of specific rules notified by the government. The term ‘net wealth’ broadly represents the excess value of certain assets over debts.

Note that wealth-tax will not be applicable with effect from tax year 2016/17.

Payroll taxes and social security payments
Contributions representing 8.33% of the employees’ pay needs to be remitted by the employer to the Employees’ Pension Fund in respect of all Indian nationals working in an establishment covered under the Employees’ Provident Fund and Miscellaneous Provisions Act, 1952, within 15 days of the close of every month. ‘Foreign workers’ holding a passport of a country with which India has signed a social security agreement are required to contribute to the social security system 12% of one’s salary. A similar 12% of one’s salary is contributed by resident employees’ together for the Employees’ Provident Fund and Employees’ Pension Fund. However, foreign workers can detach themselves from the scheme under a special provision on obtaining a ‘detachment/coverage certificate’ issued by an appropriate social security institution indicating the period of employment in India being less than the maximum period of detachment agreed in the agreement.

Branch income
Branches of foreign companies are taxed on income that is received in India, or which accrues or arises in India, at the rates applicable to foreign companies. There is no withholding tax (WHT) on remittance of profits to the company’s head office.

Income determination

Income computation and disclosure standards (ICDS)
The Central Board of Direct Taxes (CBDT) has notified ten standards with effect from 1 April 2015 (i.e. for tax returns to be filed for the year ending 31 March 2016). These standards do not require maintenance of separate books of account. For tax returns to be filed by all taxpayers following the accrual system of accounting, these standards will determine how taxable income is computed and are mandatory.

Inventory valuation
Inventories are generally valued at cost or net realisable value, whichever is lower. Generally, there is conformity between book and tax reporting. The first in first out (FIFO) and weighted average cost methods are acceptable, provided that they are consistently applied.

Capital gains
Capital gains refer to the gains made on the transfer of a capital asset, including extinguishment of the rights in an asset. Capital assets are either short-term capital assets or long-term capital assets. Long-term capital gains are eligible for concessional rate of tax.

Short-term capital assets are capital assets held for a period of less than 36 months. In the case of shares, listed securities, or units of specified mutual funds or zero-coupon bonds, the short-term holding period is less than 12 months. Capital assets that do not qualify as short-term capital assets are considered as long-term capital assets.

Normally, long-term capital gains are determined after increasing the cost by prescribed inflation factors. In the case of non-residents, capital gains on the transfer of shares...
Capital gains are taxed as follows:

- **Long-term capital gains on the transfer of shares in a company, or units of an equity-oriented fund, that are subject to STT are exempt from taxation. Further, such gains are not taxable under MAT provisions if tax payable on such income is less than 18.5%.
- Other long-term capital gains are subject to taxation at 20% (plus the surcharge, education cess, and secondary and higher secondary education cess). However, long-term capital gains arising from the transfer of listed securities, units, or zero-coupon bonds are taxed at 10% (without adjusting the cost for inflation) or at 20% (after adjusting the cost for inflation), whichever is more beneficial to the taxpayer. These rates exclude surcharge, education cess, and secondary and higher education cess.
- Long-term capital gains arising to a non-resident (not being a company) or a foreign company from transfer of unlisted securities, shares, debentures, etc. are taxable at 10% without any indexation benefit.
- Short-term capital gains on the transfer of shares in a company or units of an equity-oriented fund that are subject to STT are taxed at 15% (plus the surcharge, education cess, and secondary and higher education cess).
- Other short-term capital gains are subject to taxation at the normal rates.
- In the case of certain overseas financial organisations (e.g. off-shore funds and foreign institutional investors), long-term capital gains arising on the transfer of units purchased in foreign currency are taxable at 10% (plus the surcharge, education cess, and secondary and higher education cess) on the gross amount.
- Long-term capital gains earned by non-residents on the transfer of bonds relating to Indian companies (issued abroad in accordance with government guidelines or approved schemes and acquired in foreign currency) are taxable at 10% (plus surcharge, education cess, and secondary and higher education cess) on the gross amount of gains.

The rules of carryforward and offset of loss for capital gains are as follows:

- Capital losses arising from the transfer of a short-term capital asset can be offset against capital gains arising from any other asset in the same tax year.
- Capital losses arising from the transfer of a long-term capital asset can be offset only against capital gains arising from the transfer of any other long-term capital asset.
- Capital losses that cannot be offset in the tax year in which they are incurred can be carried forward and offset against future capital gains at any time within a period of eight years after the year of loss.
- When depreciable assets forming part of a block of assets for tax purposes are transferred, as a result of which the value of the block becomes negative, the excess of transfer price over the value of the block is treated as short-term capital gains.

**Taxability of shares received by way of transfer at less than fair market value of shares**

Where a partnership firm or a closely held unlisted company receives shares of another closely held company for no consideration or at a price that is lower than the fair market value of the shares, then the difference will be deemed to be the income of the recipient-company. The ‘fair market value’ is computed according to the formula prescribed under the Income Tax Rules.

**Share premium in excess of fair market value to be treated as income**

Any amount received towards consideration for issue of shares by any closely held company (other than a venture capital undertaking receiving from a venture capital fund/company or from any other notified person to be notified by the Central
Government) in excess of the fair market value of such shares will be considered as its income. The company is entitled to justify the price in terms of valuation under the prescribed rules or in terms of the value of the company's tangible and intangible assets. If such explanation is satisfactory in the opinion of the tax officer, the sum shall not be taxed. However, these provisions do not apply to a venture capital undertaking receiving consideration from a venture capital company/fund, or from specified classes of residents.

**Dividend income**

Dividend income received from domestic companies is not taxable in the hands of all shareholders. This applies to resident as well as non-resident shareholders.

Income received by overseas financial organisations (offshore funds) from units of specified mutual funds, or from the Unit Trust of India, that are purchased in foreign currency is taxable at 10% on the gross amount of income. Dividends (other than those received from domestic companies) and interest earned by foreign financial institutions from investment in the Indian capital market are taxable at 20% on the gross amount.

Income received from units of specified mutual funds is not taxable in the hands of the recipient. The distributing mutual fund is liable to pay a distribution tax of 25% or 30% (plus surcharge, education cess, and secondary and higher education cess). The above tax is not chargeable in respect of income distributed by an equity-oriented fund in respect of distribution under such scheme.

Stock dividends (bonus shares) distributed are not taxed at the time of receipt in the hands of the recipient shareholders, but capital gains provisions are applicable to the sale of these stock dividends.

**Buyback of shares**

An additional tax is payable on transactions involving buyback of shares by unlisted companies from its shareholders. A tax at 20% is payable by the company on the difference of consideration paid on buyback and the issue price of shares. The buyback consideration received will be tax exempt in the hands of the receiver. No tax credit will be allowed in case of such taxes paid either to the company or to the shareholder.

**Interest income**

Interest income received by a resident company is taxable at normal CIT rates. Interest income received by a non-resident company is taxed at a concessional rate of withholding at 20%, subject to conditions.

**Partnership/LLP income**

A partnership firm and an LLP are taxed as separate legal entities. The share of income of partners from a partnership firm or an LLP is exempt from tax. Partnerships and LLP are taxed at 30% (plus education cess and secondary and higher education cess).

The interest payment to partners on capital or current account is allowed as tax deductible expenditure; however, the maximum interest rate allowable for tax purposes is 12% per annum. A working partner can be paid salary, bonus, commission, or remuneration. The maximum permissible deduction in respect of remuneration payable collectively to all working partners is based on the book profit of the firm, at slab rates for different levels of book profit.

**Unrealised exchange gains/losses**

There are no specific rules under the tax law for determining the nature of unrealised foreign exchange gains or losses. However, there are various judicial precedents available that lay down principles for classification of foreign exchange gains or losses.
India

- Profit/loss is considered to be trading profit/loss if foreign currency is held on revenue account, as trading assets, or as a part of circulating capital invested in the business.
- Profit/loss is considered to be of a capital nature if a foreign currency loan is taken for a capital asset or fixed asset.

**Foreign income**

A resident company is taxed on its worldwide income. A non-resident company is taxed only on income that is received in India, or that accrues or arises, or is deemed to accrue or arise, in India. This income is subject to any favourable tax treaty provisions. According to the current tax law, payments for allowing/transferring the right to use software, customised data, or transmission of any signal by satellite, cable, optic fibre, or similar technology are taxable as royalty income deemed to accrue or arise in India, whether or not the location of such right or property is in India. The CBDT has been empowered to lay down the procedure for granting relief of any tax paid by Indian residents in any foreign country or specified territory.

Double taxation of foreign income for residents is avoided through treaties that generally provide for the deduction of the lower of foreign tax or Indian tax on the doubly taxed income from tax payable in India. Similar relief is allowed unilaterally where no treaty exists, in which case a resident would be taxed under the Indian tax law but would be allowed a deduction from the Indian income tax payable of a sum being the lower of the Indian tax rate on the doubly taxed income or the rate of tax prevailing in the other country in which income is already taxed.

**Deductions**

Expenses that are revenue in nature are, by and large, allowed as a deduction to businesses and professionals if they are:

- incurred wholly and exclusively for the purpose of the business or profession
- not in the nature of a personal expense, and
- not in the nature of a capital expense.

**Depreciation**

Depreciable assets are grouped in blocks, and each block is eligible for depreciation at a prescribed rate (ranging between 15% and 100% for different kinds of machinery, 5% and 100% for different kinds of buildings, 10% for furniture and fittings, 15% for plant and machinery [in general], 60% for computers, 15% for motorcars [other than used in a business of running them for hire], and 25% for intangible assets) on the opening value (net of depreciation charged in preceding years), plus cost of acquisition, less deletions, during the year. A deletion is the reduction by way of sale, discarding, demolition, or destruction of the assets, and the amount realised is reduced.

Where the asset is used for less than 180 days in a tax year, the depreciation is restricted to 50% of the prescribed rate. The remaining 50% depreciation is allowed in the subsequent year of its acquisition. If money receivable on the transfer exceeds the opening written-down value plus acquisitions of assets falling within the block concerned, the excess is taxed as a short-term capital gain at the same tax rate as that applicable to business income.

Additional depreciation of 20% on the cost of new plant and machinery (other than ships or aircraft) is allowable in the year of commissioning for manufacture. This benefit is extended to power generating and distributing business. Power-generating or power-distributing companies have the option to either apply the reducing-balance method provided under the normal schedule or charge depreciation on a straight-line basis. The straight-line rates are aligned with power companies’ book depreciation rates.
India

Know-how, patents, licences, franchises, and similar intangible assets can form part of a block of depreciable assets, provided they are owned and put to use in the course of their business and are eligible for depreciation at the prescribed rate, which is 25%.

Additional depreciation of 35% (as against the current rate of 20%) has been made available on new plant and machinery acquired and installed during 1 April 2015 to 31 March 2020, in the year of installation in the states of Andhra Pradesh, Bihar, Telangana, and West Bengal. In line with the existing provisions, such incentive is not available to certain specified assets (such as office appliances, computer software, etc).

Tax depreciation is not required to conform to book depreciation. However, an Accounting Standard mandates companies to reconcile both and provide for deferred tax assets, liabilities, expenses, and incomes.

Investment allowance
An investment allowance benefit is allowed for companies engaged in the business of manufacture of articles or things. New plant and machinery acquired and installed during tax years 2015/16 to 2016/17 exceeding INR 250 million can avail of an allowance of 15% of the value of investment made in plant and machinery. The assets have to be held for more than five years, and, if the asset is sold before this period, the investment benefit claimed will be reversed in the year of sale. The minimum limit of INR 250 million has been relaxed for investment in plant and machinery in the states of Andhra Pradesh, Bihar, Telangana, and West Bengal.

Investment in new plant and machinery will not include assets like plant or machinery used earlier in or outside India, any plant or machinery installed in any office premises or in residential accommodation (or guest house), any office appliances (including computers or computer software), vehicle, ship, or aircraft, the cost of which has been allowed as a deduction under any other provision.

Goodwill
Based on the Indian Supreme Court decision, goodwill and commercial brand equity that are acquired in the course of amalgamation are intangible assets entitled to depreciation.

Start-up expenses
Certain expenses are incurred by taxpayers either before the start-up of a business or after start-up of business, in connection with extension of the industrial undertaking, or in connection with setting-up a new unit. One-fifth of such expenditure is allowed as a deduction each year, over a period of five years.

Interest expenses
Any interest paid by a taxpayer on capital borrowed for the purposes of the taxpayer’s business or profession is tax-deductible without any limits. However, if such interest is paid to certain related persons, then, to the extent the interest payment is considered excessive or unreasonable, the tax officer is empowered to disallow the deduction. If the capital is borrowed for acquiring a capital asset for the purpose of extension of an existing business or profession, then interest liability pertaining to the period until the time the asset is put to use cannot be allowed as a tax-deductible expense and will have to be added back to the cost of such asset. See Expenses allowable on actual payment basis below.

Bad debts
The amount of any bad debt, or part thereof, that has been written off as irrecoverable in the accounts of the taxpayer for the year is allowed as a tax-deductible write-off. If any part of the sum written off is subsequently recovered, the recovered sum is taxable in the year of recovery.
**Charitable contributions**
Any charitable contribution made by a company to any charity is allowed as a tax-deductible expense, subject to certain conditions. The tax deductibility ranges from 50% to 100% of the charitable contribution, depending upon the nature of charity.

**Disallowance of expenditure incurred on corporate social responsibility (CSR) activities**
Expenditure incurred by a taxpayer on CSR activities mandated under the Companies Act, 2013 is not allowed as a deduction for tax purposes under the Income Tax Act.

**Expenses allowable on actual payment basis**
Certain expenses, such as, but not limited to, employees’ provident fund dues (i.e. retirement benefit funds), bonus to employees, and interest payable to financial institutions and banks, are allowed as tax deductible expenses only on actual payment. Tax disallowances are attracted if certain payments are delayed beyond their due dates under the respective laws.

**Bribes, kickbacks, illegal payments**
Expenditure incurred by a taxpayer that is illegal is deemed not to have been incurred for the purposes of the business or profession, and no deduction of such expenditure will be allowed.

**Fines and penalties**
Under the tax law, there are various procedural compliances (viz., audit of books of accounts, submission of tax returns, disclosure of particulars of income, etc.) that need to be complied with by taxpayers by the respective due dates prescribed therein. Non-compliance/delayed compliances of these procedures attract interest and penal consequences. There are prosecution provisions as well for certain offences. Penalties and fines paid for infractions of, or non-compliance with, any law are not deductible as business expenditure. Prosecution proceedings are criminal proceedings, and, in such proceedings, courts presume a culpable mental state on the taxpayer’s part. The burden of proving beyond all reasonable doubt (and not merely by preponderance of probability) the absence of such a state is on the taxpayer.

**Taxes**
All taxes (tax, duty, cess, or fees by whatever name called) relating to business (other than income tax and wealth tax) incurred during the tax year are usually deductible only in the year of payment.

**Net operating losses**
Losses can be carried forward and offset against income from subsequent year(s) for periods set out in the following table:

<table>
<thead>
<tr>
<th>Types of losses</th>
<th>Time limit</th>
</tr>
</thead>
<tbody>
<tr>
<td>Unabsorbed depreciation</td>
<td>Perpetually</td>
</tr>
<tr>
<td>Other business losses (other than speculation business losses)</td>
<td>8 years</td>
</tr>
<tr>
<td>Speculation business losses</td>
<td>8 years</td>
</tr>
<tr>
<td>Capital losses</td>
<td>8 years</td>
</tr>
</tbody>
</table>

There are no provisions in India for carrying losses back to earlier years.

**Payments to foreign affiliates**
Indian companies can claim deduction for payments on account of royalties, and for interest and fees for technical or management service provided by foreign affiliates, as long as they are not capital in nature. Such payments are deductible in the year the requisite WHT is paid into the government treasury.
India

**Group taxation**

Group taxation is not permitted under the Indian tax law.

**Transfer pricing**

**Transfer pricing on international transactions**

The Indian transfer pricing regulations (ITPR) stipulate that income arising from ‘international transactions’ between ‘associated enterprises’ should be computed having regard to the ‘arm’s-length price’. Furthermore, any allowance for expenses or interest arising from any international transaction is also to be determined having regard to the arm’s-length price. The expressions ‘international transactions’ and ‘associated enterprises’ have been defined in the ITPR.

The ITPR also contain the concept of ‘deemed international transaction’ whereby a transaction between an enterprise and a third party (whether based in India or overseas) would be subjected to transfer pricing regulations in case there exists a prior agreement in relation to such a transaction between the third party and the associated enterprise of the transacting enterprise or if the terms of such a transaction are determined in substance between the third party and the associated enterprise of the transacting enterprise.

The ITPR also define a certain class of transactions undertaken by a taxpayer with its domestic related parties and whose aggregate value exceeds INR 200 million as specified domestic transactions to which the transfer pricing provisions apply.

Initially, the ITPR prescribed five methods for computation of arm’s-length price. These are broadly in line with OECD Guidelines. A sixth method, termed as the ‘other method’, was notified in 2012. Taxpayers are required to adopt the most appropriate method for determining the arm’s-length price.

Taxpayers are also required to maintain a comprehensive set of prescribed information and documents relating to international transactions that are undertaken between associated enterprises, on an annual basis, within the prescribed timelines (due date of filing the income tax return). Further, taxpayers are required to obtain an Accountant’s Report from an independent accountant certifying the nature and amount of international transactions. The certificate needs to be filed along with the income tax return. The burden of proving the arm’s-length character of the transaction is primarily on the taxpayer.

The taxpayer is required to comply with the above requirements on an annual basis.

The ITPR adopt an arithmetic mean of comparable prices as the arm’s-length price, with a flexibility of deviation from the percentage that is notified by the Central Government as +/- 1% for wholesalers and +/- 3% for others. Where the transfer pricing officer is of the opinion that the arm’s-length price was not applied, the officer may re-compute the taxable income after giving the taxpayer an opportunity to be heard. Stringent penalties are prescribed in cases of failure to comply with the provisions of the Indian transfer pricing regulations.

**Notified Jurisdictional Area (NJA)**

The Indian government is empowered to declare a country/territory with which there does not exist an effective mechanism for exchange of information as an NJA.

Any transaction between a taxpayer and a person located in an NJA or a transaction entered into by a taxpayer wherein one off the parties is located in an NJA will be covered under the ITPR. However, the benefit of the +/- 3% range and the option to be covered under the Safe Harbour Rules would not be available in this case.
Safe Harbour Rules
Safe Harbour Rules were notified in 2013. These rules prescribe who the eligible taxpayers are, which are the eligible international transactions, the target operating margin, procedural aspects, timeline for audit, etc.

The Safe Harbour Rules are initially applicable for a maximum of five tax years beginning with tax year 2013/14.

Where a taxpayer has opted to be covered under the Safe Harbour Rules and the transfer price declared has been accepted by the tax authorities, then such a taxpayer cannot invoke proceedings under a Mutual Agreement Procedure.

Advance pricing agreements (APAs)
An APA is an arrangement between the taxpayer and the tax authority covering future transactions, with a view to pre-empt potential transfer pricing disputes. The CBDT has notified detailed rules providing the procedures and necessary forms for application/administration of APAs.

The rules provide for constitution of an APA team (team), which shall consist of an income tax authority and experts from economics, statistics, law, and other necessary fields. APAs can be applied to existing, as well as proposed, transactions.

The rules have provided for both unilateral and bilateral/multilateral APAs. In cases where a bilateral APA negotiated between competent authorities is not acceptable to the taxpayer, the taxpayer may, at its option, continue with the process of entering into a unilateral APA without benefit of a mutual agreement process.

The salient features of the procedure laid down for APAs are application for APA, withdrawal of APA, defective application, procedure, compliances post-APA, cancellations of APA, and revisions and renewal of APA.

With effect from 1 October 2014, the legislation has introduced the provisions of rollback of APAs for four years prior to the first year covered under the APA.

Draft rules prescribing the use of ‘range’ and multiple year data
The CBDT has notified draft rules prescribing the scheme for the usage of the ‘range’ concept and multiple year financial data for determining the arm’s-length price. The CBDT has invited comments and suggestions of stakeholders and the general public on these proposed rules.

The draft rules, in their present form, envisage the applicability of the ‘range’ concept and multiple year data only where the arm’s-length price determination is done using either the Transactional Net Margin Method, Resale Price Method, or Cost Plus Method. Furthermore, the draft rules in connection with the applicability of the ‘range’ concept inter alia prescribe the adequate number of external comparables, the methodology for computing the upper and lower percentile, etc. In case the number of external comparables identified is not adequate, the ‘range’ concept will not apply and the concept of arithmetic mean would continue to apply.

Thin capitalisation
No prescribed debt-to-equity ratios or thin capitalisation rules exist under Indian taxation law. However, interest paid to related parties at rates or on terms that are considered unreasonably high are disallowable by the tax officer.

Controlled foreign companies (CFCs)
India currently has no CFC rules, so there will be no Indian tax on foreign profits that remain unremitted from offshore subsidiaries.
Tax credits and incentives

Tax incentive provisions normally have conditions applicable for the period within which the preferred activity should be undertaken and the period for which the tax incentive is available. It may also be necessary to fulfil certain other conditions such as ‘forming’ of a ‘new’ undertaking.

Real Estate Investment Trusts (REITs)/Infrastructure Investment Trusts (InvITs)

The Securities and Exchange Board of India (SEBI) has enacted regulations relating to two new categories of investment vehicles, namely REITs and InvITs.

Pass-through status is provided to REITs in respect of income earned from renting, leasing, or letting out any real estate asset owned directly by the REITs. Thus, the rental income will be exempt in the hands of REITs. On distribution of rental income, REITs will not be required to withhold tax at 10% in case of resident unit holders and at the applicable tax rates in case of payment to non-residents. Tax will not be required to be withheld by the tenants on payment of rent to the REITs.

The interest paid by special purpose vehicles (SPVs) to business trusts (BTs) will be taxable at the investor level (as against the BT itself) when the BT distributes such amounts. Interest income to non-resident investors would be taxable at a lower rate of 5% (plus applicable surcharge and cess), whereas residents would be taxable at the applicable tax rates.

Dividends distributed by SPVs to the BTs would be subject to DDT. Such dividends would be exempt in the hands of BTs and investors. Capital gains (e.g. on sale of shares of SPVs) would be taxable in the hands of BTs at the applicable capital gains tax treaty rates. Any other income (including rental income) would be taxable at the maximum marginal rate. Onward distributions of such income would be exempt in the hands of the investors.

Transfer of units of BTs through stock exchanges would be liable to STT, and gains earned by investors on such sale of units would be exempt from tax if the units qualify as long-term capital assets. A lower rate of 15% (plus applicable surcharge and cess) would be applicable to short-term capital assets. Taxability of capital gains arising to sponsors on exchange of shares in SPVs with units of BTs would be deferred to the time of disposal of such units by the sponsor. The applicability of MAT on gains arising from the swap of shares of the SPV for units of BT has been deferred to the stage when the units are transferred by the BT. No capital gains tax exemption would be available on the swap of other assets with units of BT.

Tax incentives for undertakings other than infrastructure development undertakings

New industrial undertakings located in ‘backward’ states and districts notified as such are entitled to full tax exemption of profits for the first three or five years of operation, followed by a partial tax exemption of 30% of profits for the next five years. The list of ‘backward’ districts has been categorised into category A and category B districts, depending upon the current level of infrastructure development in those areas. The initial tax holiday period is five years in the case of category A districts and three years in the case of category B districts. A similar incentive is also applicable for hotels satisfying prescribed conditions.

If certain conditions are met, a tax holiday is permitted on the profits earned by an undertaking engaged in any of the following:

- Integrated business of handling, storage, and transportation of food grains.
- Developing and building of housing project.
• Scientific research.
• Commercial production or refining of mineral oils.
• Setting up and operating a cold chain for agricultural produce.
• Processing, preservation, and packaging of fruits or vegetables.
• Operating and maintaining a hospital in a rural area.

The tax holiday periods range from five to ten years, and the percentage of the rebate is 30%, 50%, or 100% in initial years and 30% in the later years. The number of years constituting 'initial' and 'later' years varies from sector to sector.

**Tax incentives for infrastructure development undertakings**
Enterprises engaged in the business of power generation, transmission, or distribution; developing or operating and maintaining a notified infrastructure facility, industrial park, or SEZ; or in substantially renovating and modernising the existing network of transmission or distribution lines (between specified periods); or in laying and operating a cross-country natural gas distribution network are eligible for a tax exemption of 100% of profits for any ten consecutive years falling within the first 15 years of operation (first 20 years in the case of infrastructure projects, except for ports, airports, inland waterways, water supply projects, and navigational channels to the sea).

‘Infrastructure facility’ means roads, including toll roads, bridges, rail systems, highway projects, water supply projects, water treatment systems, irrigation projects, sanitation and sewerage systems or solid waste management systems, ports, airports, inland waterways, inland ports, or navigational channels to the sea.

**Tax incentives for exports**
The export profits from a new undertaking satisfying prescribed conditions of set up in an SEZ is eligible for tax exemption of 100% of profits for the first five years, from the year of commencement of manufacturing, followed by a partial tax exemption of 50% of profits for the next five years. A further tax exemption of 50% of the profits for five years is also available after that, subject to an equal amount of profit being retained and transferred to a special reserve in the books of account.

**Tax incentives for units in the North Eastern Region of India**
Measures are in place to facilitate the development of the North Eastern Region of India and of the state of Sikkim. Undertakings located in these states that (i) begin to manufacture or produce any eligible article, (ii) undertake substantial expansion, or (iii) commence an eligible business between 1 April 2007 and 1 April 2017 are eligible for a 100% deduction of profits for ten consecutive years.

A list of eligible businesses has been provided by the Indian government. The eligible businesses include hotels (not below two-star category), adventure and leisure sports including ropeways, the provision of medical and health services in nursing homes with a minimum capacity of 25 beds, operating a vocational training institute for hotel management, catering and food crafts, entrepreneurship development, nursing and para-medical training, civil aviation related training, fashion design and industrial training, running an information technology-related training centre, manufacturing of information technology hardware, and bio-technology. Businesses other than the above listed eligible businesses are not entitled to claim the tax holiday.

**Tax incentives for hotels/convention centres located in specified districts**
A tax holiday of five years is provided to hotels (two, three, or four star) and convention centres located in the National Capital Territory of Delhi and the districts of Faridabad, Gurgaon, Gautam Budh Nagar, and Ghaziabad, provided the date on which the hotel began functioning, or by which construction of convention centre was completed, was before 31 July 2010. Hotels located in a specified district having a World Heritage Site,
that are constructed and that have started functioning at any time during the period 1 April 2008 to 31 March 2013, are eligible for a tax holiday for a period of five years.

**Tax incentives for certain income relating to offshore banking units and international financial services centre**

A scheduled bank, or any bank incorporated by or under the laws of a country outside India, that has an offshore banking unit in an SEZ or an international financial services centre with a specified income that is subject to prescribed conditions is eligible for a tax exemption of 100% of the specified income for five consecutive years beginning from the year in which the permission under the Indian Banking Regulation Act, 1949 was obtained and for 50% of the specified income for five consecutive years.

To facilitate the location of offshore fund managers in India, a specific regime has been laid down. In the case of an eligible investment fund, the fund management activity carried out through an eligible fund manager acting on behalf of such fund will not constitute business connection in India. An eligible investment fund will not be a resident in India merely because the eligible fund manager undertakes fund management activities in India. Offshore fund and fund managers are required to satisfy certain conditions to be eligible for the regime. The conditions are not applicable in case of funds set up by the government of a foreign state or the Central Bank of a foreign state or a sovereign fund and such other funds as may be notified by the government of India and subject to fulfilment of conditions as may be specified. Further, the special regime shall be applied in accordance with guidelines and in such manner as the administrative board may prescribe.

**Tax incentive for hiring new workmen**

With a view to encourage generation of employment, the benefit of deduction to all taxpayers having manufacturing units has been extended to all, rather than restricting it to Indian companies. Further to enable smaller units to claim this deduction, the benefit has been extended to units employing 50 regular workmen.

**Tax incentive of capital expenditure on certain specified businesses**

Capital expenditure is allowed at 100% in respect of the following specified businesses:

- Setting up and operating cold chain facilities.
- Setting up and operating warehousing facilities for storage of agriculture produce.
- Setting up and operating an inland container depot, freight station, or warehousing facility for storage of sugar and beekeeping and honey and beeswax production.
- Laying and operating a cross-country natural gas or crude or petroleum oil pipeline network for distribution, including storage facilities being an integral part of such a network.
- Building and operating a hotel of two-star or above category in India.
- Building and operating a hospital with at least 100 beds.
- Developing and building a housing project under a scheme for slum redevelopment or rehabilitation framed by the government.
- Developing and building specified housing projects under an affordable scheme of the central/state government.
- Investing in a new plant or newly installed capacity in an existing plant for production of fertiliser.

In case of certain specified businesses (commencing operations on or after 1 April 2012), such as cold chain facility, warehousing for agriculture produce, hospital with at least 100 beds, notified affordable housing projects and production of fertiliser, the deduction is 150% of capital expenditure that is incurred on or after 1 April 2012.

The following characteristics and conditions may be noted:
• Any sum received or receivable in cash or in kind on transfer, etc. of the capital asset shall be considered as business income if expenditure on such an asset has been allowed as a deduction under this section.

• Any loss computed in respect of the above specified businesses shall be allowed to be offset or carried forward and offset only against the profits and gains of specified businesses.

• The specified business should:
  • not be set up by splitting up or reconstruction of a business already in existence
  • not be set up by transfer of used machinery or plant exceeding 20% of the total value of the machinery or plant used in such business, and
  • have been approved by the prescribed authority (i.e. the government).

Research and development (R&D) expenditure

The weighted deduction available in respect of expenditure incurred on scientific research in an in-house R&D facility approved by the prescribed authority is 200% of such expenditure for companies engaged in specified businesses.

A payment made to an approved research association undertaking research in social science or statistical research or to an Indian company to be used by it for scientific research is eligible for a weighted deduction of 125% of the payment made.

Contributions made to the National Laboratory, approved scientific research associations, universities, and the Indian Institute of Technology are 200% deductible.

Foreign tax credit

See Foreign income in the Income determination section for a description of the foreign tax credit regime.

Withholding taxes

There is an obligation on the payer (either resident or non-resident) of income to withhold tax when certain specified payments are credited and/or paid. Some of the expenses that require tax withholding are as follows.

Payments by resident companies

<table>
<thead>
<tr>
<th>Nature of payment</th>
<th>Payment threshold for WHT (INR)</th>
<th>WHT rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Specified type of interest</td>
<td>None</td>
<td>10</td>
</tr>
<tr>
<td>Non-specified type of interest</td>
<td>5,000 (2)</td>
<td>20</td>
</tr>
<tr>
<td>Professional or technical service</td>
<td>30,000</td>
<td>10</td>
</tr>
<tr>
<td>Commission and brokerage</td>
<td>5,000</td>
<td>10</td>
</tr>
<tr>
<td>Rent of plant, machinery, or equipment</td>
<td>180,000</td>
<td>2</td>
</tr>
<tr>
<td>Rent of land, building, or furniture</td>
<td>180,000</td>
<td>10</td>
</tr>
<tr>
<td>Contractual payment (except for individual/</td>
<td>30,000 (single payment)</td>
<td>2</td>
</tr>
<tr>
<td>Hindu undivided family [HUF]</td>
<td>75,000 (aggregate payment)</td>
<td>1</td>
</tr>
<tr>
<td>Contractual payment to individual/HUF</td>
<td>30,000 (single payment)</td>
<td>1</td>
</tr>
<tr>
<td></td>
<td>75,000 (aggregate payment)</td>
<td></td>
</tr>
<tr>
<td>Royalty or fees for technical services</td>
<td>30,000</td>
<td>10</td>
</tr>
</tbody>
</table>

Notes

1. Payments have different threshold limits. The payer is only required to withhold tax if the total payment within a tax year to a single person (except where specified otherwise) is above the limits specified above.

2. The threshold limit for WHT for non-specified type of interest is INR 5,000, except in the case of interest received from a bank, co-operative society, or deposit with post office, for which it is INR 10,000.
If the Permanent Account Number (PAN) of the deductee is not quoted, the rate of WHT will be the rate specified in relevant provisions of the Income Tax Act, the rates in force, or the rate of 20%, whichever is higher.

The definition of ‘royalty’ also includes consideration for use of, or right to use, computer software. Transfer of all or any rights in respect of any right, property, or information includes transfer of all or any right to use computer software (including granting of a licence), irrespective of the medium through which such a right is transferred and irrespective of whether any right or property is located in India. Hence, while applying WHT on such payments in the nature of royalty, one needs to consider the definition of royalty as amended by the Budget 2012 with retrospective effect from 1 June 1976.

**Payment to non-resident companies**

<table>
<thead>
<tr>
<th>Nature of payment</th>
<th>WHT rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Dividend</td>
<td>20</td>
</tr>
<tr>
<td>Interest on foreign currency (subject to conditions)</td>
<td>5</td>
</tr>
<tr>
<td>Interest on money borrowed in foreign currency under a loan agreement or by way of long-term infrastructure bonds (or rupee denominated bonds) (time period for borrowing is July 2012 to July 2015)</td>
<td>5</td>
</tr>
<tr>
<td>Interest on investment in long-term infrastructure bonds issued by Indian company (rupee denominated bonds or government security)</td>
<td>5</td>
</tr>
<tr>
<td>Royalty and technical fees</td>
<td>25</td>
</tr>
<tr>
<td>Long-term capital gains other than exempt income</td>
<td>20</td>
</tr>
<tr>
<td>Income by way of winning from horse races</td>
<td>30</td>
</tr>
<tr>
<td>Other income</td>
<td>40</td>
</tr>
</tbody>
</table>

**Notes**

- Percentage to be increased by a surcharge, education cess, and secondary and higher education cess to compute the effective rate of tax withholding.
- Income from units of specified mutual funds is exempt from tax in the hands of the unit-holders.
- Dividends received from Indian companies are tax-free in the hands of the shareholder.
- Short-term capital gains on transfer of shares of a company or units of an equity-oriented fund would be taxable at 15% if they have been subjected to STT.
- Long-term capital gains on transfer of shares (through stock exchange) in listed companies or units of an equity-oriented fund are exempt from tax if they have been subjected to STT.
- There is no threshold for payment to non-resident companies up to which no tax is required to be withheld.
- If the PAN of the deductee is not quoted, the rate of WHT will be the rate specified in relevant provisions of the Income Tax Act, the rates in force, or the rate of 20%, whichever is higher.
- The payer is obligated to report specific information in the prescribed form (whether or not such payment is chargeable to tax).

**Treaty rates**

Some tax treaties provide for lower WHT rates from certain types of income, as follows:
<table>
<thead>
<tr>
<th>Recipient</th>
<th>WHT (%)</th>

Notes

1. The treaty tax rates on dividends are not relevant since, under the current Indian tax legislation, most dividend income from Indian companies that is subject to DDT is exempt from income tax in the hands of the recipient.
2. 10% for equipment rental and ancillary services:
   - for other cases in the first five years: 15% if government or specified organisation is the payer and 20% for other payers.
   - for subsequent years: 15% in all cases (income of government organisations is exempt from taxation in the country of source).
3. If at least 10% of capital is owned by the beneficial owner (company) of the company paying the dividend or interest.
4. If at least 20% of capital is owned by the beneficial owner (company) of the company paying dividend or interest.
5. In absence of specific provision, it may be treated as business profits or independent personal services under respective treaties, whichever is applicable.
6. The 'most favoured nation' clause is applicable. The protocol to the treaty limits the scope and rate of taxation to that specified in similar articles in treaties signed by India with an OECD or another country.
7. If royalty relates to copyrights of literary, artistic, or scientific work.
8. If the company paying the dividend is engaged in an industrial undertaking.
9. If at least 25% of capital is owned by the beneficial owner (company) of the company paying the dividend.
10. If at least 25% of capital is owned by the company during at least six months before date of payment.
11. If paid on a loan granted by a bank/financial institution.
12. The tax rate for royalties and fees for technical services, under the domestic tax laws, is 10%. This rate is to be increased by a surcharge at 2.5% on the income tax and education cess at 2% and secondary and higher secondary education cess at 1% on the income tax including surcharge. As a consequence, the effective tax rate is 10.658%. This rate applies for payments made under an agreement entered into on or after 1 June 2005. Accordingly, a tax resident can either use the treaty rate or domestic tax rate, whichever is more beneficial.
13. If interest is received by a financial institution.
14. Taxable in the country of source as per domestic tax rates.
15. If royalty payments arise from the use or right to use trademarks.
16. Tax treaties of certain countries do not have a separate clause specifying the WHT rate for fees for technical services.

List of limited agreements between India and other countries
A list of the countries with which India has entered into limited agreements for double taxation relief with respect to income of airlines/merchant shipping, is given here.

Tax information exchange agreements (TIEAs) between India and other countries
A list of the countries with which India has entered into TIEAs for effective exchange of information relating to tax matters is given below. In addition, several of the comprehensive treaties signed by India have an information exchange clause (usually clause) that has the same effect as signing of a TIEA. These are not listed here.

**Tax administration**

**Taxable period**
For India, the tax year ends on 31 March. Taxpayers can follow any accounting year, provided they file a set of audited results approved by its Board for the tax year ending 31 March.

**Tax returns**
Accounts for tax purposes must be made up to 31 March. For persons having business/professional income, the electronic return of income is required to be filed by 30 September of the succeeding tax year.

**Quarterly withholding tax returns**
Quarterly statement of taxes withheld are to be filed electronically with the tax authorities on or before 15 July, 15 October, and 15 January for the first three calendar quarters of the tax year and on or before 15 May following the last calendar quarter of the tax year.

**Obligation to submit tax return for assets located outside India**
A resident taxpayer having any asset (including financial interest in any entity) located outside India or signing authority in any account located outside India is mandatorily required to furnish a tax return.

In cases where taxpayers have assets outside India, the extant time limits of four and six years for reopening tax assessment (where income has escaped assessment) has been increased to 16 years. In case of a person who is treated as an agent of a non-resident, the time limit for issuing reassessment notice has been extended from two years to six years.

The Black Money (Undisclosed Foreign Income and Assets) and Imposition of Tax Act, 2015 has been enacted. The Act provides for separate taxation of undisclosed income in relation to foreign income and assets. Such income will henceforth not be taxed under the Income Tax Act, 1961 but under the provisions of the new legislation. The Act has a provision for a one-time compliance opportunity to those who have undisclosed foreign income and assets. If such persons file a declaration with the specific authority and pay the tax and penalty thereon, no prosecution will be launched against them.

**Payment of tax**
Tax is payable in advance (if tax for the year exceeds INR 10,000) in specified instalments for every quarter, before the 15th day of the succeeding month, during the tax year (April to March) in respect of the income of the tax year ending 31 March. Any balance of tax due on the basis of the return must be paid on a self-assessment basis before the return is filed. A tax return will be treated as defective if the tax liability along with interest is not paid on or before the date of submission of the tax return. The interest levied for default in payment of advance tax will be computed beginning from the first day of the assessment year to the date of the reassessment order.
Tax audit process

Audit for income tax purposes
Persons carrying on business are required to get their books of account audited for income tax purposes where the turnover is INR 10 million. For persons carrying on a profession, the turnover threshold is INR 2.5 million. The penalty for non-compliance with this audit requirement is INR 0.15 million, subject to 1% of total turnover/gross receipts.

Special audit
Tax authorities, at any stage of proceedings, having regard to nature, complexity, and volume of accounts or doubts on correctness of accounts or other reasons, may, after taking necessary approval of Chief Commissioner, direct a taxpayer to get their accounts audited and to furnish the report.

Statute of limitations
The statute of limitations under the Income Tax Act in the case of submission of returns, assessment of returns, and reassessment of returns is four years from the end of the relevant tax year.

Topics of focus for tax authorities
WHT provisions and their applicability to cross-border deals are a topic of great current interest to tax authorities. Transfer pricing (i.e. pricing of international transactions with associated enterprises) is also an area that is witnessing increased attention by tax authorities in recent years.

General Anti Avoidance Rule (GAAR)
GAAR provisions introduced in the Income Tax Act were based on the recommendations of a committee chaired by Dr. Parthasarathi Shome. The effect of the provisions relating to GAAR have been deferred by two years so as to implement it as a part of a comprehensive regime to deal with the OECD’s base erosion and profit shifting (BEPS) project, of which India is an active participant. However, as per the recent media reports, the GAAR provisions are presently being reviewed by the government. These provisions empower the tax department to declare an ‘arrangement’ entered into by a taxpayer to be an ‘Impermissible Avoidance Agreement’ (IAA). Consequence of this will be denial of tax benefit under the provisions of the Income Tax Act or under the tax treaty. The provisions can be invoked for any step in, or part of, any arrangement entered, and that arrangement or step may be declared as an IAA. The provisions would be attracted only where the main purpose of the IAA is to obtain tax benefit.

The GAAR provisions will not apply in the following cases:

- Where tax benefit (to all parties in aggregate) from an arrangement in a relevant tax year does not exceed INR 30 million.
- Foreign institutional investors (FIIs) registered with SEBI and not availing any benefit under a tax treaty, and also investment in FIIs made by non-resident investors.

The government clarified that the provisions of GAAR will apply prospectively to investments made on or after 1 April 2017.

Other issues

Mergers and acquisitions
The expression ‘merger’ has not been defined in the Income Tax Act but has been covered as part of the definition of the term ‘amalgamation’. Amalgamation is defined as a merger of one or more companies with another, or the merger of two or more companies to form a new company, in such a way that all the assets and liabilities...
of the amalgamating company or companies become the assets and liabilities of the amalgamated company, and held by the amalgamated company for a minimum period of five years, and shareholders holding not less than 75% in value of the shares in the amalgamating company or companies become shareholders of the amalgamated company. In case of demerger, the cost of acquisition and period of holding of the assets related to the demerged company shall be available to the resulting company.

**Capital gains**
No capital gains tax is levied on the transfer of capital assets by an amalgamating company to the amalgamated company, provided the amalgamated company is an Indian company. Similar is the position in case of a demerger by a demerged company to a resulting company.

In cases where shares of an Indian company are transferred by a foreign company or a demerged foreign company to any another foreign company or resulting foreign company, there is no tax payable, provided it satisfies certain specified conditions. Furthermore, the shareholder of the amalgamating company or demerged company is not liable to pay capital gains tax on the exchange of shares with that of the amalgamating company or the resulting company under the scheme of amalgamation.

**Carryforward of accumulated losses of amalgamating company**
The losses and unabsorbed depreciation of the amalgamating company are deemed to be those of the amalgamated company in the year in which the amalgamation takes place, provided it satisfies certain specified conditions.

In the case of amalgamation of a company owning an industrial undertaking, the amalgamated company shall achieve the level of production of at least 50% of the installed capacity of the undertaking before the end of four years from the date of amalgamation and continue to maintain the minimum level of production till the end of five years from the date of amalgamation. If these conditions are violated, the benefit claimed will be taxed in the hands of the amalgamated company in the year of default.

In case of demerger of a company, the accumulated losses or unabsorbed depreciation of the demerged company directly relatable to the undertaking or the division transferred is allowed to be carried forward and offset in the hands of the resulting company.

Amalgamations and demergers normally attract stamp duty at varying rates. Such rates are derived from the laws of the state involved. High court(s), stock exchange, and other regulatory clearances are required for amalgamations or demergers.
**Significant developments**

In line with the spirit of enhancing the investment climate, the government has recently updated the package of income tax facilities available for companies investing in certain designated business sectors and/or regions with changes, including an expansion of the definition of eligible investment and elimination of some requirements perceived as difficult for investors to demonstrate.

The government has also issued several regulations during the past year that include, among others, the extension of the tax holiday application until 15 August 2015 (previously expired on 14 August 2014) and improvements in the Mutual Agreement Procedure (MAP) and Advance Pricing Agreement (APA) regulations. New incentives for payment of tax in arrears and the second round of the sunset policy, which provides for elimination or reduction of administrative sanctions, have also been provided, subject to certain requirements.

Indonesia also continues the reform of the tax system by proposing a bill of amendment of the tax to be included in its national regulatory programs, to be discussed in the Parliament for the next five years. The government is also contemplating a tax amnesty facility. The supporting electronic infrastructure and systems are also being developed intensively to be more practical and reliable for taxpayers, with the launch of the new tax and customs online systems.

By the end of 2014, Indonesia had expanded its international tax agreements through the enforcement of a Double Taxation Agreement (DTA/tax treaty) with Papua New Guinea and a Tax Information Exchange Agreement (TIEA) with the Isle of Man, as well as ratifying its commitment to the multilateral Convention on Mutual Administrative Assistance in Tax Matters.

**Taxes on corporate income**

Taxable business profits are calculated on the basis of normal accounting principles as modified by certain tax adjustments. Generally, a deduction is allowed for all expenditures incurred to obtain, collect, and maintain taxable business profits. A timing difference may arise if an expenditure recorded as an expense for accounting cannot be immediately claimed as a deduction for tax (see the Deductions section).

Resident corporations are taxed based on worldwide income. A foreign company carrying out business activities through a permanent establishment (PE) in Indonesia will generally be required to assume the same tax obligations as a resident taxpayer.

Resident taxpayers and Indonesian PEs of foreign companies have to settle their tax liabilities either by direct payments, third party withholdings, or a combination of both. Foreign companies without a PE in Indonesia have to settle their tax liabilities for their Indonesian-sourced income through withholding of the tax by the Indonesian party paying the income.
Corporate income tax (CIT) rates
A flat CIT rate of 25% applies to net taxable income.

Public company discount
Public companies that satisfy a minimum listing requirement of 40% (being put in the collective custody of a custody and settlement institution) and certain other conditions are entitled to a tax discount of 5% off the standard rate, providing an effective tax rate of 20%.

Small company discount
Small enterprises (i.e. corporate taxpayers with an annual turnover of not more than 50 billion Indonesian rupiah [IDR]) are entitled to a 50% tax discount of the standard rate, which is imposed proportionally on taxable income on the part of gross turnover up to IDR 4.8 billion. Certain enterprises with gross turnover of not more than IDR 4.8 billion are subject to final income tax at 1% of turnover.

Final income tax
Certain types of income are subject to a final income tax at a specified percentage of the gross amount of income, without regard to any attributable expenses.

Resident companies, PEs, representatives of foreign companies, organisations, and appointed individuals are required to withhold the above final tax from the gross payments to resident taxpayers and PEs.

Special industries and activities
Companies engaged in upstream oil and gas and geothermal industries typically have to calculate CIT in accordance with their production sharing contracts (PSCs). Certain companies engaged in metal, mineral, and coal mining are governed by a contract of work (CoW) for the income tax calculation. Different provisions may apply to them, pertaining to corporate tax rates, deductible expenses, and how to calculate taxable income.

Note that such contractual-based concessions are no longer available to new mining projects since the enactment of the Mining Law in 2009. The Mining Law stipulates that general prevailing tax laws/regulations apply to mining projects; consequently, any tax facilities should be provided accordingly, except as otherwise stated in a particular mining licence.

Local income taxes
There are no local taxes on income in Indonesia. For a list of other local taxes, see Regional taxes in the Other taxes section.
Corporate residence

A company is treated as a resident of Indonesia for tax purposes by virtue of having its establishment or its place of management in Indonesia.

Permanent establishment (PE)

Under the Income Tax Law, a non-resident company may be treated as having a taxable presence if it runs a business or conducts activities in Indonesia, which can be in the form of:

- a place of management
- a branch of the company
- a representative office
- an office building
- a factory
- a workshop
- a warehouse
- a room for promotion and selling
- a mining and extraction of natural resources
- a mining working area for oil and natural gas
- a fishery, animal husbandry, agriculture, plantation, or forestry location
- a project of construction, installation, or assembly
- the furnishing of services in whatever form by employees or other person, insofar conducted not more than 60 days within a 12-month period
- a person or corporation acting as a dependent agent
- an agent or employee of an insurance company that is not established and domiciled in Indonesia that receives insurance premiums or insures risk in Indonesia, and
- the computers, electronic agent, or automated equipment owned, leased, or used by an electronic transactions provider to conduct business via the internet.

Where the non-resident company is resident in a country that has a tax treaty with Indonesia, the rules on a PE creation may be changed; usually there is a longer ‘time test’ for certain activities performed in Indonesia.

Other taxes

Value-added tax (VAT)

With a few exceptions, VAT is applicable on deliveries (sales) of goods and services within Indonesia at a rate of 10%. VAT on export of goods is zero-rated while the import of goods is subject to VAT at a rate of 10%. Zero-rated VAT is also applicable on exported services, but subject to a Ministry of Finance (MoF) limitation. Currently, only certain exported services, including toll manufacturing services, are subject to the 0% VAT rate. Services performed within the Customs Area for customers outside of the Customs Area are considered as locally delivered and are therefore subject to the regular VAT rate of 10%. Inbound use or consumption of foreign services or intangible goods, with a few exceptions, is also subject to a self-assessed VAT at a rate of 10%.

The VAT law allows the government to change the VAT rate within the range of 5% to 15%. However, since the enactment of the VAT law in 1984, the government has never changed the VAT rate.

In general, VAT collection is based on the accrual principle, whereby VAT must be collected at the time of delivery of taxable goods or services. The term delivery, in this case, is defined as the time when risk and ownership of goods have been transferred or when income from a service delivery can be reliably estimated or measured. In the accrual system, income or receivables are acknowledged when a transaction takes place, regardless of whether the transaction has been paid for or not. The recognition
of revenue or receivables is indicated by the issue of a commercial invoice, which is a source document for this recognition and a basis for recording it.

VAT filing is done on a monthly basis, with payment and filing being due no later than the last day of the month following the taxable delivery.

**Luxury-goods sales tax (LST)**
In addition to VAT, some goods (e.g. certain household appliances, sport equipment, motor vehicles, luxury residences) are subject to LST upon import or delivery by the manufacturer to another party at rates currently ranging from 10% to 125%.

**Import duty**
Import duty is payable at rates from 0% to 150% on the customs value of imported goods. Customs value is calculated on the cost, insurance, and freight (CIF) level.

</tbody>
</table>

As a commitment to liberalising trade, the Indonesian government is progressively lowering import duty rates on most products. Higher duty rates remain to protect certain industries and goods regarded as sensitive for security or social and cultural reasons.

**Duty relief/exemption/deferral**
The Indonesian government offers duty relief, duty exemption, and duty deferral concessions to foreign and domestic investors in order to promote the development of local and export industries. Such concessions include the Badan Koordinasi Penanaman Modal (BKPM) Masterlist, Bonded Zone, Bonded Warehouse, import duty exemption and drawback for exports, Free Trade Zone (FTZ) in Batam, Bintan, and Karimun, Association of Southeast Asian Nations (ASEAN) duty rates, Free Trade Area (FTA) agreement duty rates, Indonesia-Japan Economic Partnership Agreement (IJEPA), MITA (main partners) lanes, and Authorised Economic Operator.

**Land and building tax**
Land and buildings tax (Pajak Bumi dan Bangunan or PBB) is a part of regional taxes, which are governed under Regional Taxes and Retribution (Pajak Daerah dan Retribusi Daerah or PDRD) Law in which each regional government has to issue a regulation (Peraturan Daerah or PERDA) to regulate PBB in its territory.

The scope of PBB under PDRD Law covers all land and building except for forestry, plantation, and mining areas, which are governed by separate regulations.

Under PDRD Law, the PBB rate is maximum 0.3% and the tax due is calculated by applying the tax rate on the sale value of the tax object (Nilai Jual Objek Pajak or NJOP) deducted by non-taxable NJOP. The non-taxable NJOP is set at minimum of IDR 10 million. Any changes are to be made by issuing a PERDA.
**Tax on land and building transfer**
A transfer of land and building will cause income tax on the deemed gain on the transfer/sale to be charged to the transferor/seller. The tax is set at 5% of the gross transfer value or the government-determined value, whichever is greater (see Final income tax in the Taxes on corporate income section).

**Duty on the acquisition of land and building rights**
In a land and building transfer, the acquirer is liable for duty on the acquisition of land and building rights (Bea Pengalihan Hak atas Tanah dan Bangunan or BPHTB) at a maximum of 5% of the greater of the transaction value or the government-determined value. Similar to PBB, BPHTB has been made a part of regional taxes.

**Stamp duty**
Stamp duty is nominal and payable as a fixed amount of either IDR 6,000 or IDR 3,000 on certain documents.

**Social security contributions**
Employers are responsible for ascertaining that their employees are covered by the workers social security program managed by Badan Penyelenggara Jaminan Sosial (BPJS), which provides compensation in the event of working accidents, deaths, and old age (55 years), as well as sickness or hospitalisation. The program calls for premium contributions from both the employers and the employees. Employees’ contributions are collected through payroll deductions. The premium contributions borne by employers are calculated as a percentage of regular salaries/wages, ranging from 0.24% to 4%.

As of 1 January 2014, the scheme applies to all employees, including expatriates who have been working in Indonesia for more than six months. Previously, the scheme was not compulsory for such expatriates.

**Payroll taxes**
There are no additional payroll taxes applicable other than those for social security contributions and employee income tax withheld by employer on the salary payment.

**Regional taxes**
A corporate taxpayer may be liable for a number of regional taxes and retributions. The rates range from 1.5% to 35% of a wide number of reference values determined by the relevant regional governments. The following are regional taxes, other than PBB and BPHTB, that may apply:

- Motor vehicle tax.
- Motor vehicle ownership transfer fee.
- Motor vehicle fuel tax.
- Surface water tax.
- Cigarette tax.
- Hotel tax.
- Restaurant tax.
- Entertainment tax.
- Advertisement tax.
- Road illumination tax.
- Non-metal and rock minerals tax.
- Parking tax.
- Ground water tax.
- Swallow-nest tax.
### Branch income

Branch profits are subject to the ordinary CIT rate of 25%. The after-tax profits are subject to a withholding tax (WHT) (i.e. branch profits tax or BPT) at 20%, regardless of whether the profits are remitted to the home country. However, a concessional WHT rate may be applicable where a tax treaty is in force (see the Withholding taxes section for more information). The BPT may be exempt if the profits are entirely reinvested in Indonesia (see the Tax credits and incentives section for more information).

### Income determination

#### Inventory valuation

Inventories must be measured at cost by using either the average or first in first out (FIFO) method. Once a costing method is adopted, it must be applied consistently.

#### Capital gains

Capital gains are generally assessable together with ordinary income and subject to tax at the standard CIT rate. However, gains from the transfer of land and buildings are not subject to regular CIT but rather are subject to final income tax at a rate of 5% of the transaction value or the government-determined value, whichever is higher.

The proceeds from sales of shares listed on the Indonesian stock exchange are not subject to normal CIT. Instead, the proceeds are subject only to a final WHT of 0.1% of the gross sales consideration. An additional tax of 0.5% applies to the share value of founder shares at the time an initial public offering takes place, irrespective of whether the shares are held or sold. Shareholders may elect not to pay this tax, in which case the actual gain will be subject to normal tax at the time the shares are sold.

#### Dividend income

In principle, dividend income received by a resident taxpayer from a limited liability company (generally referred to as a Perseroan Terbatas or PT) is taxable as ordinary income for the taxpayer receiving the dividend. However, if the dividend recipient is a PT with a minimum shareholding of 25% in the company paying the dividend and the dividend is paid out of retained earnings, it is exempt from CIT.

Where the recipient is not resident in Indonesia, a WHT rate of 20% applies, subject to variation by tax treaties (see the Withholding taxes section for more information).

The same rules apply to stock dividends (bonus shares), including dividends paid out of share premium (agio).

#### Interest income

Interest income on time or saving deposits and on Bank of Indonesia Certificates (SBIs) received by a resident company or a PE is taxed at a final tax rate of 20%.

#### Exchange gains and losses

Gains and losses arising from currency fluctuations are generally recognised on an accrual basis in accordance with the prevailing Indonesian Accounting Standards, which resemble International Accounting Standards in most respects.

#### Foreign income

Foreign branch income of an Indonesian company must be accounted for as Indonesian taxable income under the controlled foreign companies (CFCs) regulation. These rules apply to Indonesian tax residents owning at least 50% of the paid-up capital (shares) in a CFC. The rules make no reference to such terms as tax avoidance or tax evasion and therefore apply even if the CFC is domiciled in a non-tax haven country. The only situation in which the rules do not apply is when the CFC's shares are listed on a
recognised stock exchange. In very broad terms, under the CFC rules, the Indonesian shareholder of the CFC is deemed to receive a dividend with respect to the CFC profits based on a shareholding proportional calculation.

**Deductions**

In general, expenses incurred in the ordinary course of business (to obtain, collect, and maintain taxable income) are deductible, subject to the requirements for documentary support.

Note that expenses relating to gross income subject to final income tax are not deductible for CIT purposes.

**Depreciation, amortisation, and depletion**

Depreciable/amortisable assets include both tangible and intangible property or costs, including the cost of extending building use rights, rights for business use, rights for use, and goodwill, with a useful life of more than one year, except land that is owned and used in business. Depreciation and amortisation may be calculated under the straight-line method or the declining-balance method on an individual asset basis. Once a method is chosen, it should be applied consistently. In calculating depreciation, depreciable assets are divided into the following classes:

<table>
<thead>
<tr>
<th>Class</th>
<th>Depreciation/amortisation rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Straight-line method</td>
</tr>
<tr>
<td>Property:</td>
<td></td>
</tr>
<tr>
<td>Useful life of four years</td>
<td>25</td>
</tr>
<tr>
<td>Useful life of eight years</td>
<td>12.5</td>
</tr>
<tr>
<td>Useful life of 16 years</td>
<td>6.25</td>
</tr>
<tr>
<td>Useful life of 20 years</td>
<td>5</td>
</tr>
<tr>
<td>Buildings:</td>
<td></td>
</tr>
<tr>
<td>Permanent</td>
<td>5</td>
</tr>
<tr>
<td>Non-permanent</td>
<td>10</td>
</tr>
</tbody>
</table>

Special rules apply for assets used in certain business fields and/or certain areas. Tax depreciation need not conform to book depreciation.

The costs incurred for acquiring rights, with a beneficial life of more than one year, for mining, oil, and natural gas concessions; forest concessions; and other rights to exploit natural resources should be amortised by the production-unit method. Except for the right to acquire oil and natural gas concessions, the depletion rate used should not exceed 20% per annum.

**Organisational and start-up expenses**

The costs of incorporation and expansion of the capital of an enterprise are claimed in full in the year in which the expenditure is incurred or are amortised using either the declining-balance or straight-line method at the above rates.

Costs incurred before the commencement of commercial operations with a useful life of longer than one year are capitalised and amortised according to the above rates.

**Interest expense**

Interest incurred in the ordinary course of business is deductible as long as the related loan is used for business purposes.
Interest on loans relating to time deposits (which income is subject to a final tax) is not deductible.

Interest on loans used to buy shares where dividends to be received are not subject to income tax is also not deductible.

**Bad debts**
Uncollectible debts are deductible for tax purposes, with the following conditions:

- The creditor has recognised the amount of uncollectible receivables as expenses in the commercial income statement.
- The taxpayer must submit a list of uncollectible account receivables to the Directorate General of Tax.
- A legal case to enforce collection has been brought to a District Court or government agency that handles state receivables, there is a written agreement on cancellation of receivables/debt release and discharge between the concerned creditor and debtor, it has been publicised in a general or a special publication, or the debtor has otherwise acknowledged that his/her debts have been cancelled.

**Charitable contributions**
Donations for national disasters, education facilities, sport development, and social infrastructures, with certain conditions, may be deductible in the fiscal year when the donations are provided.

**Benefits in kind**
Most benefits received in kind by employees, such as free housing, are not tax-deductible to the entity providing the benefit. Free motor vehicle and telephone expenses, including depreciation, are tax-deductible but only for 50% of the total expenses incurred. Expenses for meals and transportation made available to all staff are tax-deductible. Apart from these, certain benefits in kind (e.g. housing provided in remote areas as designated by the MoF, Integrated Economic Development Areas as designated by Presidential Decree) can also be claimed as tax-deductible expenses.

**Fines and penalties**
Fines, penalties, and interest on underpayment of taxes are not deductible.

**Taxes**
Land and buildings tax and regional taxes may be deducted from taxable income. With several exceptions, input VAT is also deductible against taxable income as long as it is not claimed as a credit against output VAT.

**Net operating losses**
Losses may be carried forward for a maximum period of five years. Carrying back of losses is not permitted. Offsetting losses within a corporate group is not permitted.

**Payments to foreign affiliates**
WHT is applied as a final tax on the recipient for payments of royalties, interest, and service fees to foreign non-resident companies. Excessive and non-arm's-length payments to related parties are disallowed as deductions. The tax law denies deductions for all payments from a branch to its head office for royalties, interest, and services provided by the head office (exceptions apply for loans between bank branches and their head offices).

**Group taxation**
Consolidated returns are not allowed in Indonesia.
Transfer pricing
Transactions between related parties must be consistent with the arm's-length principle. If the arm's-length principle is not followed, the Director General of Tax (DGT) is authorised to recalculate the taxable income or deductible costs arising from such transactions applying the arm's-length principle.

Under the General Tax Provisions and Procedures (Ketentuan Umum dan Tata Cara Perpajakan or KUP) Law, the government requires specific transfer pricing documentation to prove the arm's-length nature of related-party transactions.

Detailed transfer pricing disclosures are required in the CIT return, which include the following:

- The nature and value of transactions with related parties.
- The transfer pricing methods applied to those transactions and the rationale for selecting the methods.
- Whether the company has prepared transfer pricing documentation.

Transfer pricing disputes may be resolved through the domestic objection and appeal process, or, where the dispute involves a transaction with a related party in a country that is one of Indonesia's tax treaty partners, the parties may request double tax relief under the Mutual Agreement Procedures (MAP) article of the relevant tax treaty. There is a restriction that an MAP application cannot be lodged when the Tax Court has declared an end to the court hearing process, and an existing MAP will cease when the Tax Court announces its decision. If a party is not satisfied with the Tax Court decision, a judicial review by the Supreme Court is allowed.

The tax law authorises the DGT to enter into Advance Pricing Agreements (APAs) with taxpayers and/or another tax country's tax authority only on the future application of the arm's-length principle to transactions between related parties; consequently, taxpayers should not expect an APA to be 'rolled-back' to address any transfer pricing matters in open years in relation to the same/similar transactions. Once agreed, an APA will typically be valid for a maximum of three tax years after the tax year in which the APA is agreed or four years if the process involves cooperation with foreign tax authorities that escalate an APA application to be an MAP in order to settle any ongoing double taxation in accordance with a relevant tax treaty.

Increase in transfer pricing focused investigations
The number of tax audits with transfer pricing as the key focus area has continued to increase following the issuance of regulations relating to transfer pricing. The DGT has issued detailed guidelines that, broadly stated, typically follow Organisation for Economic Co-operation and Development (OECD) principles. Transactions under particularly close scrutiny include payments of royalties and technical or management services fees, inter-company services, royalty and financing transactions, and exports to related parties.

Where a taxpayer has no documentation available to substantiate these transactions, there is a high risk that deductions for the payments will be denied in full. In this regard, the 30-day time limit within which a taxpayer must produce any documentation requested by the Indonesian Tax Office (ITO) during an audit is being strictly enforced. Any documentation provided after the 30-day time limit is being disregarded by the ITO in its decision making process.

Transfer pricing specific audits are regularly conducted by the ITO, with the high priority targets generally identified based on:
Indonesia

- profit performance of the company (companies that have incurred consistent losses will be the highest priority, but there is also a risk of being selected for companies with profits below industry norms) and
- materiality of the company’s related party transactions.

The ITO has issued questionnaires to several taxpayers who are not under an audit that focus primarily on transfer pricing issues. It is possible that the information gathered by the ITO from these questionnaires will lead to follow-up investigations or audits in some cases.

The DGT has also reinforced tax audit procedures for taxpayers with related party transactions. This regulation provides more clarity and is more relevant with the current transfer pricing issues in practice (e.g., the use of the median point as the basis of correction, mandatory use of the comparable uncontrolled price [CUP] method for interest and the use of multiple year data for comparables). Comprehensive forms required to be completed by the taxpayers during a tax audit are also provided in the regulation.

**Thin capitalisation**

The MoF is authorised to make a determination on an appropriate ratio of debt to equity. Under the law, debt between related parties may be re-characterised as equity, thus giving rise to the disallowance of a tax deduction for related costs. However, the MoF has not yet issued any implementing regulation on these matters.

**Controlled foreign companies (CFCs)**

See Foreign income in the Income determination section for a description of the CFC regime.

---

**Tax credits and incentives**

**Foreign tax credit**

Tax paid or payable in foreign countries upon income from abroad received or obtained by a resident taxpayer may be credited against tax payable in Indonesia in the same fiscal year.

The amount of tax credit is the same amount as income tax paid or payable abroad, but shall not exceed tax payable calculated according to the Indonesian tax law.

**Tax holiday**

Several companies have been granted tax facilities by the government in the form of a CIT exemption or reduction for a period of five to ten years from the start of commercial production. After the end of the CIT exemption, the company will receive a 50% CIT reduction for two years. These facilities are provided to firms in pioneer industries that have a wide range of connections, provide additional value and high externalities, introduce new technologies, and have strategic value for the national economy. Currently, five business sectors may enjoy the tax holiday: base metals, oil refinery and/or base organic chemicals sourced from oil and gas, renewable energy, machinery, and telecommunication.

To be eligible for the above facilities, taxpayers should be newly incorporated in Indonesia no earlier than 14 August 2010, should have a legalised new capital investment plan of a minimum IDR 1 trillion, should deposit a minimum of 10% of their planned investment value in banks located in Indonesia, and should not withdraw the deposit prior to the realisation of the investment plan.

An application must be submitted to the Minister of Industry (MoI) or to the BKPM Chairman. A proposal for the MoF’s approval will be made by the MoI or the BKPM Chairman after carrying out research on the applicant. The government has extended
the application period to submit the tax holiday proposals to the MoF until 15 August 2015.

If the facilities are granted, taxpayers should submit periodic reports on the realisation of their investment plans and the use of their funds deposited in the Indonesian bank or banks. Failure to realise the investment plan and to submit the above periodic reports will result in the termination of the tax facilities.

**Inbound investment incentives**

The DGT, on behalf of the MoF and based on the recommendation of the BKPM Chairman, may provide the following tax concessions to PT companies following their investment in certain designated business areas and/or in certain designated regions with a high priority on the national scale:

- A reduction in net income of up to 30% of the amount invested (generally amount spent on assets), prorated at 5% for six years from commercial production date, and provided that the assets invested are not transferred out within six years.
- Acceleration of fiscal depreciation deductions.
- Extension of tax loss carryforwards for up to ten years.
- A reduction of the WHT rate on dividends paid to non-residents to 10%.

The tax facilities will be provided for all forms of investment, including intangible assets. Consequently, this will add accelerated amortisation of intangible assets to the tax facility.

The most recent regulation removes previous requirements that are perceived as difficult for investors to demonstrate, such as minimum investment realisation of 80% in order to be able to utilise the tax facilities. It also set out new high-level criteria and leaves the detailed requirements for the relevant ministers to determine by issuing separate ministerial decrees. The high-level criteria are as follows: (i) high investment value or for export purposes, (ii) high absorption of manpower, or (iii) high local content. Options for the taxpayer to extend the tax loss carryforward are also added.

After the tax facilities are granted, the taxpayers must submit to the DGT certain regular reports (e.g. investment realisation reports). Taxpayers must also maintain separate records for assets eligible to receive the facilities and for those that are not.

The list of investments eligible for the tax facilities covers 143 qualifying types of investment (based on Business Classification Field or KBLI), including 66 types of investment in designated sectors and 77 types of investment in designated sectors and also in designated regions.

Taxpayers who obtain this tax concession cannot use the 1% final tax on turnover or other tax facilities for Integrated Economic Development Zones (Kawasan Pengembangan Ekonomi Terpadu or KAPET) and the tax holiday.

The same tax facilities may be granted by the DGT to companies conducting business in a KAPET. Specific approval must be obtained from the DGT for these tax facilities. If the company has bonded zone (Kawasan Berikat or KB) status, the tax facilities will also include those typically enjoyed by a KB company, for example:

- Non-collection of VAT and sales tax on certain luxury goods transactions.
- Exemption from prepaid income tax on the importation of capital goods and other equipment directly relating to production activities.
- Postponement of import duty on capital goods and equipment and goods and materials for processing.
- Exemption from import duty for four years on machinery and certain spare parts.
The designation of an area as a KAPET is set out in a specific presidential decree. Currently, there are approximately 13 areas designated as KAPETs.

**Reinvestment of branch profits**

PEs that reinvest their after-tax profits in Indonesia within the same year or no later than the following year are exempt from branch profit tax on these profits. The reinvestment should be one of the following forms:

- As a founder or a participant founder in a newly established Indonesian company through capital participation.
- As a shareholder of an established Indonesian company through capital participation.
- Acquisition of a fixed asset used by the PE to conduct its business or activities in Indonesia.
- Investment in the form of an intangible asset used by the PE to conduct its business or activities in Indonesia.

Shares in a newly established company shall not be transferred until, at a minimum, two years from the date that the company commences commercial production. With regard to the investment in an established Indonesian company, acquisition of a fixed asset, or investment of an intangible asset, the investment shall not be transferred until, at a minimum, three years after the investment.

**Other incentives**

Income earned by venture capital companies in the form of profit sharing from their investments in Indonesia is exempt from tax, provided that the following conditions are met:

- Entities are small or medium-scale businesses in one of the sectors designated by the Indonesian government.
- Investments are not listed on the Indonesian stock exchange.

**Withholding taxes**

Indonesian income tax is collected mainly through a system of WHTs. Where a particular income item is subject to WHT, the payer is generally held responsible for withholding or collecting the tax. These WHTs are commonly referred to using the relevant article of the Income Tax (*Pajak Penghasilan* or PPh) Law, as follows.

**Article 23/26 Income Tax (PPh 23/26)**

PPh 23/26 is levied on a variety of payments to corporations and individuals, resident and non-resident, at the following rates:

<table>
<thead>

The issue of beneficial ownership has come under tax office scrutiny. For treaty WHT rates to apply to passive income such as interests, dividends, and royalties, the recipient of such income must be the beneficial owner. The recipient must also provide a Certificate of Domicile (CoD) in the form required by the ITO and certified by their home country tax authority that the recipient is a tax resident of that country. The CoD in the form prepared by the other country’s tax authority may only be used in limited circumstances. Further, the CoD form also requires a number of declarations to be made.
by the recipient that acknowledges that the use of the treaty jurisdiction was not merely for obtaining the benefit of the treaty. These declarations place onerous obligations on both the Indonesian payer and the recipient entity. Without a certified CoD, a WHT at a rate of 20% will apply. These aspects need to be considered when paying income of this nature.

**Article 22 Income Tax (PPh 22)**

PPh 22 is typically applicable to the following:

<table>
<thead>
<tr>
<th>Event</th>
<th>Tax rate (%)</th>
<th>Tax base</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. The import of goods using an Importer Identification Number (Angka Pengenal Impor or API):</td>

</tr>
<tr>
<td>14. The purchase of automotive products by local distributors</td>
<td>0.45</td>
<td>Selling prices</td>
</tr>
<tr>
<td>15. The purchase of pharmaceutical products by local distributors</td>
<td>0.3</td>
<td>Selling prices</td>
</tr>
<tr>
<td>16. The purchase of motor vehicles from Sole Agents (Agen Tunggal Pemegang Merek or ATPM), Agents (Agen Pemegang Merek or APM), and general importers (3)</td>
<td>0.45</td>
<td>Selling prices</td>
</tr>
<tr>
<td>17. The purchase of materials by manufacturers or exporters in forestry, plantation, agriculture, cattle breeding, and fishery from wholesalers</td>
<td>0.25</td>
<td>Selling prices</td>
</tr>
<tr>
<td>18. The purchase of very luxurious goods</td>
<td>5</td>
<td>Selling prices</td>
</tr>
</tbody>
</table>

**Notes**

1. In events 4 and 5, the PPh 22 collectors (State Treasury, BUMN, etc.) must withhold PPh 22 from the amount payable to a particular vendor, except payments for the purchase/use of: (i) oil fuel, gas fuel, lubricants, postal products; (ii) water and electricity; (iii) oil, gas (including upstream by products) from a contractor of a PSC or contractor’s head office; and (iv) geothermal and electricity from a contractor of a joint operation contract. There is also an exemption for the purchase of goods with a value of up to IDR 2 million and IDR 10 million for events 4 and 5, respectively. In the other events, the importer or the buyer of the designated goods must pay PPh 22 in addition to the amounts payable for the goods imported or purchased.

2. The withheld PPh 22 constitutes a pre-payment of corporate/individual income tax liabilities, except for the purchase of oil fuel, gas fuel, and lubricants by distributors/agents, which is categorised as final tax.

3. Exemption applies on the purchase of very luxurious motor vehicles since it is already subject to PPh 22 in event 18.
4. The tax does not apply, either automatically or with an Exemption Certificate issued by the DGT, on the following types of imports:
   - Import/purchase of goods not subject to income tax.
   - Import of goods exempted from import duties and/or VAT or subject to 0% import duty.
   - Goods that have been temporarily imported (i.e. goods for re-export).
   - Goods for re-importing (i.e. exported and re-imported in the same quality or to be repaired/tested for subsequent re-exporting).
   - The PPh 22 exemption also applies to the import/purchase of gold bars for the production of jewellery for re-export and related to the use of the government school operations subsidy (Bantuan Operasional Sekolah or BOS) fund.

**Tax administration**

**Payments of tax and tax returns filing**

Tax liabilities for a particular period or year must typically be paid to the State Treasury through a designated tax-payment bank (bank persepsi) and then accounted for at the DGT office through the filing of the relevant tax returns. The tax payments and tax return filing for a particular tax must be undertaken monthly or annually, depending upon the tax obligation in question. Electronic payments of taxes are now available using the e-Billing system developed by the DGT. The DGT also continuously improves the e-Filing system to encourage taxpayers to register with the appointed Application Service Providers (ASPs) so that they can submit the tax returns online.

Corporate tax liabilities may be settled either by direct payments, third party withholdings, or a combination of both. Monthly tax instalments constitute the first part of tax payments to be made by taxpayers as a prepayment of their current year CIT liability. A monthly tax instalment is generally calculated using the most recent CIT return. The tax withheld by third parties on certain income or tax to be paid in advance on certain transactions (i.e. imports) also constitute prepayments for the current year corporate tax liability of the income recipient or the party conducting the import. If the total amounts of tax paid in advance through the year are less than the total CIT due, the company concerned has to settle the shortfall before filing its CIT return. Returns for transaction taxes, such as WHT, must be filed on a monthly basis.

A summary of these tax obligations is as follows:

**Monthly tax obligations**

<table>
<thead>
<tr>
<th>Type of tax</th>
<th>Tax payment deadline</th>
<th>Tax return filing deadline</th>
</tr>
</thead>
<tbody>
<tr>
<td>Article 21/26 (Payroll) WHT</td>
<td>The 10th of the following month</td>
<td>The 20th of the following month</td>
</tr>
<tr>
<td>Article 23/26 Income Tax</td>
<td>The 10th of the following month</td>
<td>The 20th of the following month</td>
</tr>
<tr>
<td>Article 22 Income Tax on imports/payments to Tax Collectors</td>
<td>The 10th of the following month</td>
<td>The 20th of the following month</td>
</tr>
<tr>
<td>Article 4(2) Final Income Tax</td>
<td>The 10th of the following month</td>
<td>The 20th of the following month</td>
</tr>
<tr>
<td>VAT and LST</td>
<td>Prior to the tax return filing deadline</td>
<td>The end of the following month</td>
</tr>
</tbody>
</table>

**Annual tax obligations**

<table>
<thead>
<tr>
<th>Type of tax</th>
<th>Tax payment deadline</th>
<th>Tax return filing deadline</th>
</tr>
</thead>
<tbody>
<tr>
<td>Corporate Income Tax</td>
<td>The end of the fourth month after the book year end before filing the tax return</td>
<td>The end of the fourth month after the book year end</td>
</tr>
<tr>
<td>Land and Building Tax (PBB)</td>
<td>Six months after the receipt of a Tax Due Notification Letter from the ITO</td>
<td>N/A</td>
</tr>
</tbody>
</table>
Penalties
Late payments of the above taxes incur interest penalties at 2% per month, with a maximum of 48%. Part of a month, for example a single day, is considered a full month.

Late filing of a tax return or failure to file a tax return incurs an administrative penalty at the following amounts:

<table>
<thead>
<tr>
<th>Type of tax return</th>
<th>IDR</th>
</tr>
</thead>
<tbody>
<tr>
<td>VAT return</td>
<td>500,000</td>
</tr>
<tr>
<td>Other monthly tax returns</td>
<td>100,000</td>
</tr>
<tr>
<td>CIT return</td>
<td>1,000,000</td>
</tr>
</tbody>
</table>

Tax assessments
Indonesia uses a self-assessment system under which taxpayers are trusted to calculate, pay, and report their own taxes in accordance with prevailing tax laws and regulations. However, the DGT may issue tax assessment letters to a particular taxpayer if it finds that, based on a tax audit or on other information, the taxpayer has not fully paid all tax liabilities. A tax assessment letter may also be issued by the DGT to a taxpayer who ignores a warning letter to file a tax return within a specified period. Failure to maintain books in accordance with the prescribed standards is another condition that may lead the DGT to issue an official tax assessment.

Tax audit process
The tax audit of a company may cover only a particular tax or all taxes for a particular tax period (a tax month) or tax year. It may be conducted at the company’s premises, at the DGT offices, or at both.

Conditions triggering a tax audit
A tax refund request will always trigger a tax audit. Due to the requirement for the DGT to decide on a refund request within 12 months, a tax audit will typically begin from a few weeks to several months from the refund request date. A corporate tax refund request will normally trigger a complete tax audit covering all taxes. A refund request of any other tax will normally trigger a tax audit covering only one particular tax. The DGT will likely broaden the tax audit scope to include other taxes.

Other events that may trigger a tax audit include the following:
- A tax return in an overpayment position (not necessarily accompanied by a refund request).
- An annual income tax return presenting/claiming a tax loss.
- The taxpayer has changed its fiscal year or bookkeeping method or performed fixed assets revaluation.
- A tax return not filed within the prescribed time or filed after the deadline stated in a warning letter, which has been selected to be audited based on a risk analysis.
- A tax return meeting certain (undisclosed) DGT criteria.

Statute of limitations
Under the current Tax Administration Law, the DGT can issue an underpaid tax assessment letter for the years 2008 onwards within five years after the incurrence of a tax liability, the end of a tax period (month), or the end of (part of) a tax year.

Topics of focus for tax authorities
Indonesia is largely a self-assessment tax environment, and enforcement remains a priority of the tax authorities. The DGT continues its efforts in improving compliance by targeting tax audits on transfer pricing and certain industries (particularly those in the oil and gas and coal mining industry).
Indonesia

On the other hand, the DGT has also made some efforts to collect more information from various sources and is issuing several incentives to increase tax compliance as well as boosting national tax revenue (i.e. incentives for the payment of tax in arrears and the sunset policy that eliminates or reduces administrative sanctions in certain cases).

Other issues

**Business combinations and splits**
Transfers of assets in business mergers, consolidations, or business splits must generally be dealt with at market value. Gains resulting from this kind of restructuring are assessable, while losses are generally claimable as a deduction from income. However, a tax-neutral merger or consolidation, under which assets are transferred at book value, can be conducted but are subject to the approval of the DGT. To obtain this approval, the merger or consolidation plan in question must pass a business-purpose test. Tax-driven arrangements are prohibited, and tax losses from the combining companies may not be passed to the surviving company. Subject to a similar, specific DGT approval, the same concession is also available for business splits that constitute part of an initial public offering (IPO) plan. In this case, within one year of the DGT’s approval being given, the company concerned must have made an effective declaration regarding registration for an IPO with the Financial Services Authority (*Otoritas Jasa Keuangan* or OJK). In the event of complications beyond the company’s control, the period may be extended by the DGT for up to four years.

**Tax information exchange agreements (TIEAs)**
The sending of Diplomatic Notes from Indonesia on 22 September 2014 has completed the exchange of ratification documents and marked the entry into force of Indonesia’s TIEA with Isle of Man. Other TIEAs with Bermuda, Guernsey, Jersey, and San Marino are still in the ratification process and not yet effective.

**Exchange of Information (EOI)**
Indonesia has ratified its commitment to the multilateral Convention on Mutual Administrative Assistance in Tax Matters (the Convention) that deals with administrative co-operation between member states in the form of EOI, assistance in recovery of foreign tax claims, and service of documents. Along with other members of the G20, Indonesia commits to participating in the Convention to support its effort in resolving issues surrounding tax base erosion and profit shifting (BEPS) initiated in 2013.

At a national level, a Minister of Finance regulation on EOI implementation procedures has been established, which sets out the procedures of tax examination abroad and simultaneous tax examinations relevant to EOI. This domestic EOI regulation is applicable for the following international tax agreements: DTAs, TIEAs, and the Convention.

EOI can be carried out through several channels, which may be initiated by a relevant unit under the DGT (domestic request) or initiated by a country/jurisdiction partner (foreign request). The competent authority to manage EOI in Indonesia is the Director of Tax Regulation II under the DGT.

**United States (US) Foreign Account Tax Compliance Act (FATCA)**
Indonesia has principally agreed to sign the InterGovernmental Agreement (IGA) 1 for FATCA compliance purposes.
**Iraq**

---

**Significant developments**

A new sales tax law was issued in early 2015 whereby a sales tax of 300% is imposed on alcohol and tobacco (cigarettes), 15% on travel tickets, 15% on cars, and 20% on mobile recharge cards and internet.

---

**Taxes on corporate income**

All income derived from Iraq is subject to tax in Iraq, regardless of the residence of the recipient.

The effective corporate income tax (CIT) system presented in Iraq for juristic persons (except partnerships) is based on a statutory CIT rate of 15% at all income levels, with no progressive tax rate scale.

**Foreign oil company income tax**

The income realised in Iraq from contracts concluded with foreign oil companies, their branches or offices, and subcontractors working in Iraq in the oil and gas production sector and related industries is taxed at a rate of 35%.

**Local income taxes**

To the best of our knowledge, there are no local, state, or provincial taxes on income in Iraq.

---

**Corporate residence**

One of the key issues in determining when a company becomes taxable in Iraq is whether the foreign company is considered to be doing business ‘in Iraq’ or ‘with Iraq’.  
In 2009, with Instructions No. 2/2008, the Iraqi tax administration provided a clearer distinction between business ‘in Iraq’ and business ‘with Iraq’.

Once the determination has been made that the company is trading ‘in Iraq’, the company should legally register in Iraq and then register with the General Commission for Taxes (GCT). A company that is registered with the GCT will be subject to CIT and will be required to file a CIT return.

**Permanent establishment (PE)**

It is important to note that the current Iraq income tax law does not clearly define a PE; consequently, it is important to monitor commercial activity being performed in the country to ensure compliance with the registration requirements and tax law. The company should consult with their internal tax department and external advisers if they have signed a contract to provide any type of services inside Iraq to determine if the company should have a legal registration and begin to file CIT returns.
Iraq

Other taxes

Sales tax
A new sales tax law was issued in early 2015 whereby a sales tax of 300% is imposed on alcohol and tobacco (cigarettes), 15% on travel tickets, 15% on cars, and 20% on mobile recharge cards and internet. This is in addition to services rendered by deluxe and first class restaurants and hotels, which were already subject to a 10% sales tax.

Excise taxes
There is no tax provision in the Iraqi tax law addressing excise taxes.

Property taxes
A basic tax of 10% is assessed on the annual revenue for all real estate and is collected from the real estate owner or the long-term lessee (five years). In cases where the owner or long-term lessee cannot be located, the person occupying the real estate will be assessed. Note that the annual revenue for each real estate is discounted by 10% for expenses and maintenance before assessing the tax on that real estate.

Transfer taxes
There are no restrictions or taxes on transferring funds into or out of Iraq.

Stamp duty
All direct and indirect contracts related to credit facilities and other bank’s activities (e.g. letter of credit contracts) are subject to stamp fees at a rate of 0.2% of the contract value.

Social security contributions
With respect to contribution to the social security fund in Iraq, employers are divided into a number of categories, which is the driver for determining the contribution percentage. Employers that are categorised as prime contribute at the upper rate (25% from the employer and 5% from the employee), whereas other categories contribute at the lower rate (12% from the employer and 5% from the employee).

Determining to which category the employer relates is subject to the social security department discretion. The criteria for this determination is not crystallised in the law; however, in practice, the social security authorities make their determination based on the business sector the employer is involved in (e.g. those in the oil and gas related industries are expected to attract the upper rate (25% from the employer and 5% from the employee).

Payroll taxes
The payroll tax system in Iraq is similar to a pay-as-you-earn (PAYE) system, whereby the employer is obligated to withhold tax from salaries and wages paid to its employees and remit same to the tax authorities. Failure to do so will result in the employer being subject to penalties and late payment interest.

Branch income
The tax treatment for a branch is similar to a local Iraqi corporation. In general, CIT is imposed on corporate entities and foreign branches with respect to taxable profit from all sources arising or deemed to arise in Iraq. However, certain limitations apply to head office expenses.

Income determination
A corporation has to determine its profit/loss according to its income statement for a tax period as established under the Unified Accounting System (Iraqi Generally Accepted
Accounting Principles [GAAP]). However, to reach the taxable income, positive or negative adjustments have to be made to the profit/loss as determined according to GAAP.

**Inventory valuation**
There is no tax provision in the Iraqi tax law addressing inventory valuation.

**Capital gains**
Capital gains on sales of depreciable assets are taxed at the normal CIT rate. To the best of our knowledge and legal practice, gains derived from the sale of shares and bonds not in the course of a trading activity are exempt from tax. Capital gains derived from the sale of shares and bonds in the course of a trading activity are taxable at the normal CIT rate.

**Dividend income**
Under the tax law, dividends paid out of profits that have been subject to tax are not taxed again in the hands of the shareholder.

**Interest income**
Interest income deemed to arise in Iraq is taxed at the normal CIT rate.

**Rent/royalty income**
Rent and royalty income deemed to arise in Iraq are taxed at the normal CIT rate.

**Foreign income**
There is no tax provision in the Iraqi tax law addressing foreign income. However, as per the Iraqi tax law, tax shall be imposed on the income of an Iraqi resident that arises inside or outside Iraq (i.e. worldwide), regardless of place of receipt.

---

**Deductions**
In general, all expenses incurred by the taxpayer in order to produce income during the year are deducted from income, provided that such expenses are confirmed by acceptable documents, with some exceptions.

**Depreciation**
The Iraqi Depreciation Committee sets the maximum depreciation rates for various types of fixed assets (please contact us for additional information regarding the specific rates). If the rates used for accounting purposes are greater than the prescribed rates, the excess is disallowed.

The depreciation method is either a straight-line method or declining-balance method.

**Goodwill**
Iraqi tax law does not contain a provision that covers the deductibility of goodwill.

**Start-up expenses**
Iraqi tax law does not contain a provision that covers the deductibility of start-up expenses. However, as per Iraqi GAAP, such cost will be capitalised and amortised once the operation is started.

**Interest expenses**
Iraqi tax law does not contain a provision that covers the deductibility of interest expenses.
Iraq

**Bad debt**
Bad debt is deductible if it was included in earlier income and there is proof of the unsuccessful steps to collect it.

**Charitable contributions**
Charitable contributions to the Government and Socialist Sector departments and to scientific, cultural, educational, charitable, and spiritual organisations, which are legally recognised (provided that the Minister of Finance has issued a list containing the names of these organisations), are deductible.

**Bribes and illegal payments**
Bribes and illegal payments are not allowed or deductible.

**Fines and penalties**
Broadly speaking, fines and penalties are not deductible items.

**Taxes**
Broadly speaking, taxes are not deductible items.

**Net operating losses**
Under the tax law, losses of a taxpayer from some sources of income arising in Iraq, substantiated by legally accepted documents, are generally deducted from profits arising from other sources.

Losses that can be settled in this manner shall be carried forward and deducted from the income of the taxpayer over five consecutive years, provided that losses may not offset more than half of the taxable income of each of the five years and the loss is from the same source of income from which it has arisen.

Losses cannot be carried back.

**Payments to foreign affiliates**
Iraqi tax law does not contain a provision that covers the deductibility of payments to foreign affiliates.

**Group taxation**
Iraqi tax law does not contain any provisions for filing consolidated returns or for relieving losses within a group of companies.

**Transfer pricing**
The precise meaning of transfer pricing under the effective Iraqi tax system is rather unclear from a tax and legal perspective.

We note that while having no specific transfer pricing legislation, Iraq does have a ‘third party’ arm’s-length provision contained within its tax legislation; whereby, if a non-resident taxpayer is engaged in business with a resident and it appears to the tax authority that due to the connection existing between the resident and the non-resident, and the substantial control of one over the other, that the business relationship is arranged in a manner that leaves no profits to the resident, or the profits left are much less than what is normally earned, the tax shall be assessed on the actual profits of the non-resident and charged to the resident as if the resident is the business agent for the non-resident.

**Thin capitalisation**
Iraqi tax law does not contain a provision that covers thin capitalisation.
Controlled foreign companies (CFCs)
Iraqi tax law does not contain any provisions for CFCs.

Tax credits and incentives
In accordance with the Iraqi Investment Law, approved industrial projects are given certain custom duty and tax incentives; however, oil and gas is not one of the sectors that is normally granted investment promotion exemptions incentives.

The tax incentives may include corporate tax, individual tax, and others; however, the tax incentives vary from one project to another.

The Board of Investment Promotion has the authority to add any sector or specific project to the list of sectors or projects that benefit from the investment promotion law incentives.

Foreign tax credit
Income tax paid to a foreign country on income earned in that country may be credited against tax paid to Iraq. The amount of the credit may not exceed the amount of tax assessed in Iraq.

Withholding taxes
Under the tax law, the amount due from any residing taxpayers to a non-resident, whether the payment is made in cash or credited to the account, is subject to withholding tax (WHT) at the rate of 15% if such amounts are related to interest on debentures, mortgages, loans, deposits and advances, as well as annual allowances, pension salaries, or other yearly payments. Dividends are not subject to WHT since dividends paid out of profits that have been subject to tax are not taxed again in the hands of the shareholder.

Additionally, industries/activities (non-upstream) contracted with oil and gas companies are subject to WHT on all payments at a rate of 3.3%.

Tax administration

Taxable period
The taxable year in Iraq is the calendar year.

Tax returns
The statutory time line for filing tax returns is the first day of June of the year of assessment. If the self-assessment of tax is not accepted by the tax authorities, tax is assessed on the income of the taxpayer based on the information available to the tax authorities.

Failure to file a tax return may lead to an estimate of income and assessment of tax by the tax authorities; however, such an assessment does not relieve the taxpayer from responsibility for non-submission of the return within the statutory time line stipulated by law.

Payment of taxes
Payment of the tax liability has to occur within 21 days from the assessment date by the tax authority. There is no requirement of quarterly payments during the taxable year.
Iraq

**Tax audit process**
Tax inspection is mandatory in Iraq, as the tax authority will scrutinise the financial statements of the taxpayer to determine the tax liability and, accordingly, issue a tax clearance.

**Statute of limitations**
The statute of limitations is five years. However, the tax authority has the right to go back beyond five years in certain instances.

**Topics of focus for tax authority**
Obtaining a tax clearance from a tax audit/inspection is becoming increasingly important for importation and government bidding purposes, as well as for other areas that affect the continuation of operations.

**Iraqi GAAP**
The Iraqi tax law requires all taxpayers to maintain books and records in accordance with Iraq’s local unified accounting system (Iraqi GAAP).

These books shall constitute tax books/accounts. This accounting treatment will determine when income is accrued and costs are incurred for computing taxable profits.
Significant developments

Company residence
In an effort to further enhance Ireland’s tax regime’s transparency, the Finance Act 2014 announced changes to Ireland’s corporate tax residence rules.

Following on from some changes to tax residency rules last year, broader corporate tax residence reform was introduced from 1 January 2015 to ensure that Irish incorporated companies can only be considered non-Irish tax resident under the terms of a double tax treaty (DTT). These new provisions are effective 1 January 2015 for new companies. In order to give certainty to companies with existing Irish operations, the changes include a transition grandfathering period to the end of 2020. While current Irish companies should not need to take immediate action, in the period to 31 December 2020, all groups with Irish operations need to carefully monitor the corporate tax residence position of Irish incorporated, non-resident companies that do not satisfy the sole exception contained within the Finance Act 2014 provisions. This includes, for example, considering the impact of any proposed merger and acquisition (M&A) transactions involving both change in ownership and business changes/integration measures.

Research and development (R&D) tax credit
Tax incentives for companies undertaking in-house R&D activities are at the forefront of Ireland’s attractiveness as a knowledge economy. Changes announced in successive Finance Acts continue to enhance the attractiveness of Ireland as an R&D location.

Removal of base year from the R&D tax credit regime
Finance Act 2014 further enhanced the basis of expenditure available when calculating the R&D tax credit. With effect for accounting periods beginning on or after 1 January 2015, a volume basis will apply to the calculation of the R&D tax credit, which means that it will no longer be necessary to take account of expenditure incurred in a base year. This will result in increased R&D claims for companies that were previously impacted by the 2003 base year restriction. All qualifying R&D expenditure will be eligible for the 25% tax credit in addition to a deduction at 12.5%, resulting in a total tax deduction of 37.5% for qualifying R&D expenditure.

Ireland’s International Tax Strategy and Road Map for Ireland’s Tax Competitiveness
In 2013, the Minister of Finance published a new international tax strategy statement to provide a clear and accurate picture of Ireland’s corporation tax regime for the foreign direct investment (FDI) sector. Furthermore and in conjunction with the Finance Act 2014, the Minister of Finance issued the policy document ‘A Road Map for Ireland’s Tax Competitiveness’. In addition to confirming Ireland’s commitment to the 12.5% corporate trading tax rate, this document also outlines other commitments relevant to multinationals. These include strengthening the capabilities of Ireland’s transfer pricing competent authority, expanding Ireland’s tax treaty network, and maintaining an open and transparent tax regime.
Ireland

**Intellectual property (IP) regime**
The Finance Act 2014 again provides for positive improvements in the Irish IP regime. With effect from 1 January 2015, there is no restriction to the annual tax deduction available for IP (i.e. the cap of 80% of IP profits has been removed). The Act also expands the definition of IP assets to include customer lists acquired other than ‘directly or indirectly in connection with the transfer of a business as a going concern’.

---

**Taxes on corporate income**
Corporation tax is chargeable as follows on income and capital gains:

<table>
<thead>
<tr>
<th>Standard rate on income ('trading rate')</th>
<th>Higher rate on income ('passive rate')</th>
<th>Capital gains rate</th>
</tr>
</thead>
<tbody>
<tr>
<td>12.5%</td>
<td>25%</td>
<td>33%</td>
</tr>
</tbody>
</table>

Resident companies are taxable in Ireland on their worldwide profits (including gains). Non-resident companies are subject to Irish corporation tax only on the trading profits of an Irish branch or agency and to Irish income tax (generally by way of withholding) on certain Irish-source income.

Non-trading (passive) income includes dividends from companies resident outside Ireland (with some exceptions), interest, rents, and royalties. Legislation provides that certain dividend income (e.g. income from foreign trades) is taxed at 12.5% (see the Income determination section). The higher rate (i.e. 25%) also applies to income from a business carried on wholly outside Ireland and to income from land dealing, mining, and petroleum extraction operations.

An additional ‘profit resource rent’ tax applies to certain petroleum activities. Depending on the profit yield of a site, the tax rate applicable can range from 25% to 40%.

Close companies (see the Income determination section) may be subject to additional corporate taxes on undistributed investment income (including Irish dividends) and on undistributed income from professional services. Examples of professional services include professions such as solicitor, accountant, doctor, and engineer.

**Local income taxes**
Ireland does not levy local or regional taxes on income.

---

**Corporate residence**
In an effort to further enhance Ireland's tax regime’s transparency, the Finance Act 2014 announced changes to Ireland’s corporate tax residence rules. Further to the limited changes to the residency rules last year, broader corporate tax residence reform has been introduced from 1 January 2015 to ensure that Irish incorporated companies can only be considered non-Irish resident under the terms of a DTT. These new provisions are effective from 1 January 2015 for newly incorporated companies. In order to give certainty to companies with existing Irish operations (i.e. incorporated prior to 1 January 2015), the changes include a transition period to the end of 2020. While current Irish companies should not need to take immediate action, in the transitional period to 31 December 2020, all groups with Irish operations need to carefully monitor the corporate tax residence position of Irish incorporated, non-resident companies that do not satisfy the sole exception contained within the Finance Act 2014 provisions. This includes, for example, considering the impact of any proposed M&A transactions involving both change in ownership and business changes/integration measures.
For companies incorporated before 1 January 2015, a company incorporated in Ireland or that has its place of central management and control in Ireland will be regarded as resident in Ireland for the purposes of corporation tax and capital gains tax. However, the link between incorporation and residency does not apply if (i) an Irish incorporated company is considered non-Irish tax resident under the terms of a DTT ('treaty exemption') or (ii) where the incorporated company or a related company carries on a trade in Ireland and either the company is ultimately controlled by tax resident of a European Union (EU) member state or a country with which Ireland has a DTT, or the company or related company are quoted companies ('trading exemption'). Where the conditions of the trading exemption are met, the company's location of tax residence is determined by the jurisdiction where the company has its place of central management and control. However, the trading exemption does not apply if an Irish incorporated company's place of management and control is in a jurisdiction that only applies an incorporation test for determining residency (and the company would thus not be regarded as tax-resident in any jurisdiction).

**Permanent establishment (PE)**

Non-resident companies are subject to Irish corporation tax only on the trading profits attributable to an Irish branch or agency, plus Irish income tax (generally by way of withholding, though this is not the case with Irish-source rental profits) on certain Irish-source income.

Subject to the terms of the relevant DTT, a non-resident company will have a PE in Ireland if:

- it has a fixed place of business in Ireland through which the business of the company is wholly or partly carried on, or
- an agent acting on behalf of the company has and habitually exercises authority to do business on behalf of the company in Ireland.

A fixed place of business includes (but is not limited to) a place of management, a branch, an office, a factory, a workshop, an installation or structure for the exploration of natural resources, a mine, oil or gas well, quarry, or other place of extraction of natural resources, or a building or construction or installation project. A company is not, however, regarded as having an Irish PE if the activities for which the fixed place of business is maintained or which the agent carries on are only of a preparatory or auxiliary nature (also defined in the statute).

---

**Other taxes**

**Value-added tax (VAT)**

VAT is charged at 23% on the supply of most goods and services in the course or furtherance of business.

There are currently two main reduced rates of VAT. A 13.5% rate applies, *inter alia*, to most building services, labour intensive services, domestic fuel, and power. In addition, a reduced 9% VAT rate is applicable to certain supplies in the tourism sector. These include restaurant and catering services, hotel and holiday accommodation, and various entertainment services (e.g. admissions to cinemas, theatres, museums, sporting facilities).

Exports, most basic food items, oral medicines, books, and children's clothing and footwear are zero-rated.

Some supplies are exempt from VAT. The main exempt categories are most banking services, insurance services, medical services, passenger transport, education services, etc.
Ireland

and training, and letting of immovable goods (although an ‘option to tax’ may be possible in certain circumstances).

Zero rating is preferable to exemption because most VAT costs incurred in making a zero-rated supply can be recovered, while those incurred in making an exempt supply generally cannot.

If a business is fully engaged in a VATable business (irrespective of the rate), it will be entitled to reclaim VAT incurred, subject to the normal rules of deductibility. Businesses engaged in exempt supplies will not be in a position to reclaim VAT; consequently, it will be a real cost. Any business engaged in both VATable and exempt supplies will be required to apportion the VAT incurred appropriately.

**Customs duties**

Goods imported into Ireland from countries outside the European Union are liable to customs duty at the appropriate rates specified in the EU’s Combined Nomenclature (CN) Tariff. These rates vary from 0% to 14% for industrial goods, with much higher rates applicable to agricultural products. Imports may qualify for a partial or full reduction in rates in specific circumstances.

The three main elements (‘customs duty drivers’) that determine the duty liability arising on goods imported into the European Union from a non-EU country are (i) the product’s commodity code (Tariff Classification), (ii) its customs valuation, and (iii) its origin. Each of these elements will need to be considered when determining the customs duty cost at import.

There are special customs procedures that allow for the import of goods into the European Union from non-EU countries with full or partial relief from customs duty or under a suspension of customs duty. Examples of these are Customs Warehousing, Inward Processing Relief, Processing under Customs Controls, and Outward Processing Relief. There are different conditions attached to each customs special procedure, and an analysis of the trade footprint of the importer of the goods will need to be considered in order to determine whether or not they may avail of one of these reliefs. These procedures are important and are in place with the intention of stimulating economic activity within the European Union.

It should be noted that no customs duties arise on goods ‘imported’ from other EU member states, provided they originate in the European Union or have been customs cleared in another member state of the European Union.

**Excise duties**

Excise duties are charged on mineral oils (including petrol and diesel), alcohol products (including spirits, beer, wine, cider, and perry), and tobacco products where they are consumed in Ireland. Reduced rates of excise duty may apply when setting up a microbrewery in Ireland (depending on production quantities).

In addition, a diesel rebate scheme was recently introduced in Ireland. It provides hauliers or coach/bus owners with an opportunity to claim a partial refund of excise duty paid on fuel used in specifically designated vehicles for the purposes of transporting goods or passengers.

Excise duties are not charged on the export or sale of excisable goods to other EU countries but special control arrangements apply to the intra-EU movement of such goods.

In addition, Ireland applies excise duties to electricity, betting, and the first registration of vehicles in the state (the latter is known as VRT). The current VRT regime for motor vehicles is based on a CO2 emissions rating system and charged on the ‘open market
selling price of the vehicle. Specific reductions in VRT apply to electric and hybrid vehicles subject to certain conditions being met. In addition, there are reliefs available for cars imported temporarily by non-residents, or imported on transfer of residence to Ireland (such VRT reliefs require prior approval from the Customs authorities).

**Stamp duty**

Stamp duty is a tax on instruments. It is payable on transfers of land and on other assets where legal title cannot be passed by delivery. It is chargeable on instruments of transfer executed in Ireland and on instruments, wherever executed, that relate to Irish property or relate to matters to be done in Ireland. Stamp duty on the transfer of assets between associated companies may be fully relieved from stamp duty, provided the following key conditions are met:

- The companies have a 90% relationship (that is, one company is, directly or indirectly, the beneficial owner of at least 90% of the ordinary share capital of the other and is entitled to at least 90% of the profits available for distribution and at least 90% of the assets in the case of a winding-up of the other company, or a third company has these rights, directly or indirectly, in respect of both companies).
- This relationship is maintained for a period of at least two years after the transfer of the assets (to avoid the relief being clawed back).

There is an exemption for transfers of intellectual property (IP), and the categories of IP qualifying for this exemption are the exact same as those for which IP capital allowances are available (see Intellectual property [IP] regime in the Tax credits and incentives section).

Stamp duty is payable based on the higher of the consideration paid for the transfer or the market value of the assets transferring. Rates of 1% to 2% apply for transfers of residential property, 2% for transfers of non-residential property (commercial/industrial land and buildings but also business assets such as goodwill, debtors, contracts, etc.), and a rate of 1% is levied on transfers of shares.

**Capital duty on share capital**

Ireland does not levy capital duty on share capital of companies.

**Capital taxes**

Ireland does not levy tax on the net worth of companies.

**Social security contributions**

Employed persons are compulsorily insured under a state-administered scheme of pay-related social insurance (PRSI). Contributions are made by both the employer and the employee. The employer is responsible for making PRSI contributions up to a rate of 10.75%, and these are an allowable deduction for corporation tax purposes.

**Levies on insurance policies**

A levy of 3% of gross premiums received by insurers applies in respect of non-life insurance policies relating to risks located in Ireland. This levy is payable four times per annum, within 25 days of the end of each quarter (i.e. within 25 days from quarters ending 31 March, 30 June, 30 September, and 31 December).

A levy of 1% of gross premiums received by insurers applies in relation to certain classes of life insurance policies relating to risks located in Ireland. This levy is payable four times per annum, within 25 days of the end of each quarter (i.e. within 25 days from quarters ending 31 March, 30 June, 30 September, and 31 December).

An additional contribution of 2% to the Insurance Compensation Fund applies to premiums received in relation to non-life insurance policies. Similar to the 3% non-life insurance levy, the contribution applies where premiums are received in respect of risks
Ireland

located in Ireland. The contribution is also payable four times per annum in conjunction with the non-life insurance levy on premiums.

Reinsurance business is excluded from the levy.

There is also a stamp duty liability of 1 euro (EUR) on each non-life insurance policy where the risk is located in Ireland.

Certain voluntary health insurance policies are subject to fixed levies, up to EUR 350 per policy.

**Emissions allowances**
Legislation was introduced in relation to the tax treatment of emission allowances under the EU Emissions Trading Scheme. The legislation distinguishes between allowances acquired free of charge from the Environment Protection Agency under the EU Scheme and those that are purchased.

**Environmental taxes**
In Ireland, a levy (currently 22 cent per bag) is imposed upon consumers provided with a plastic bag when purchasing goods in supermarkets and other retail outlets. Under the applicable legislation, retailers are obligated to collect 22 cent in respect of every plastic bag or bag containing plastic, regardless of size, unless specifically exempted, that is provided to customers and remit all plastic bag levies collected to Irish Revenue. As a result of the levy, most non-supermarket retailers provide paper carrier bags, and many retailers provide ‘bags for life’, which are made from non-plastic material and, therefore, not subject to the environmental levy.

**Carbon tax**
A carbon tax has been introduced on mineral oils (e.g. auto fuels, kerosene) that are supplied in Ireland. The rates of carbon tax on oil and gas broadly equate to EUR 20 per tonne of CO2 emitted. Relief applies where mineral oils are supplied to an Emissions Trading Scheme (ETS) installation or for electricity generation. Pure biofuels are exempt from carbon tax. There is full relief for the biofuel component of the fuel. Where biofuel has been mixed or blended with any other mineral oil, the relief from carbon taxes shall apply to the biofuel content of the mixture or blend, regardless of the percentage.

A carbon tax has also been introduced on natural gas and solid fuel where supplied for combustion. Again, reliefs apply where these fuels are supplied to ETS installations or used in electricity generation, chemical reduction, or in the electrolytical or metallurgical processes.

**Local taxes**
Local taxes known as ‘rates’ are not based on income but rather are levied on the occupiers of business property by reference to a deemed rental value of the property concerned. The level of rates levied can depend on the region in which the property is located. Rates are an allowable deduction for corporation tax purposes.

Local authorities are also empowered to levy charges on all occupiers for specific services (e.g. water supply). These charges are also deductible for corporation tax purposes.

**Branch income**
Irish branches of foreign companies are liable to corporation tax at the rates that apply to Irish resident companies. No tax is withheld on repatriation of branch profits to the head office.
**Income determination**

Irish trading profits are computed in accordance with Irish Generally Accepted Accounting Principles (GAAP) or International Financial Reporting Standards (IFRS), subject to any adjustment required by law. Prior-year adjustments may arise on the first-time adoption of IFRS, which may result in double counting of income or expenses or of income falling out of the charge to tax. Generally speaking, in order to avoid such an outcome, transitional adjustments exist whereby amounts of income or expenses that could be double-counted or that would fall out of the charge to tax are identified and the amounts concerned are taxed or deducted as appropriate over a five year period.

**Inventory valuation**

Each item of inventory is valued for tax purposes at cost or market value, whichever is lower, and this will normally accord with the accounting treatment. The method used in arriving at cost or market value of inventory generally must be consistent and must not be in conflict with tax law. The first in first out (FIFO) method is an acceptable method of calculation for tax purposes. The base-stock method has been held to be an inappropriate method for tax purposes, as has the last in first out (LIFO) method.

**Capital gains**

Companies are subject to capital gains tax in respect of gains arising on the disposal of capital assets. The taxable gain is arrived at by deducting from the sales proceeds the cost incurred on acquiring the asset (as indexed to reflect inflation only up to 31 December 2002). The resulting gain is taxable at 33%. In cases of disposals of interests in offshore funds and foreign life assurance policies, indexation relief does not apply; while a tax rate of 33% applies to non-corporate shareholders in respect of funds and policies located in EU/European Economic Area (EEA)/DTT countries, and a rate of 33% or 40% applies to funds or policies located in all other jurisdictions. A reduced rate of 25% exit tax applies to Irish corporate shareholders investing in Irish funds. Special rules apply to gains (and losses) from the disposal of development land in Ireland.

Companies that are tax resident in Ireland (i.e. are managed and controlled in Ireland or incorporated in Ireland and not qualifying for exclusion from Irish residence by virtue of being resident in a DTT territory) are taxable on worldwide gains. Non-resident companies are subject to capital gains tax on capital gains arising on the disposal of Irish land, buildings, mineral rights, and exploration rights on the Irish continental shelf, together with shares in unquoted (unlisted) companies, whose value substantially (greater than 50%) is derived from these assets. Non-resident companies are also subject to capital gains tax from the realisation of assets used for the purposes of a business carried on in Ireland.

Losses arising on the disposal of capital assets may be offset against capital gains in the accounting period or carried forward for offset against future capital gains. No carryback of capital losses is permitted. There is no facility to offset capital losses against business income or to surrender capital losses within a tax group.

Irish capital gains tax legislation facilitates corporate reorganisations on a tax-free basis in situations where there is a share for share exchange. Assets can be transferred within certain company groups without capital gains tax applying (see the Group taxation section for further information).

**Participation exemption from capital gains**

A participation exemption is available to Irish resident companies on the disposal of a shareholding interest if:

- a minimum of 5% of the shares (including the right to profits and assets on winding up) is directly or indirectly held for a continuous 12-month period
Ireland

- the shares have been held for a period of 12 months within which the date of the disposal falls or for a period of 12 months ending in the 24 months preceding the date of disposal
- the company whose shares are sold is resident in an EU member state (including Ireland) or in a country with which Ireland has a DTT at the time of the disposal (this includes tax treaties that have been signed but not yet ratified), and
- a trading condition is met at the time of the disposal whereby either: (i) the business of the company whose shares are disposed of consists wholly or mainly of the carrying on of one or more trades or (ii) taken together, the businesses of the Irish holding company and all companies in which it has a direct or indirect 5% or more ownership interest consist wholly or mainly of the carrying on of one or more trades.

If the Irish holding company is unable to meet the minimum holding requirement but is a member of a group (that is, a parent company and its 51% worldwide subsidiaries), the gain arising on the disposal should still be exempt if the holding requirement can be met by including holdings of other members of the group. Thus, the Irish company may be exempt from capital gains tax on a disposal of shares even if it does not directly hold a significant shareholding. The exemption also applies to a disposal of assets related to shares, such as options and convertible debt. However, it does not apply to a sale of either shares or related assets that derive the greater part of their value (more than 50%) from Irish real property, minerals, mining rights, and exploration and exploitation rights in a designated area. Shares deriving their value from non-Irish real property, minerals, and mining rights qualify for exemption if the other conditions are met.

Capital losses arising on the disposal of a shareholding where a gain on disposal would be exempt under the participation exemption are not deductible.

**Dividend income**

Dividends from Irish resident companies are exempt from corporation tax. Dividends paid out of the trading profits of a company resident in an EU member state or a country with which Ireland has a DTT (or a country with which Ireland has ratified the Convention on Mutual Assistance in Tax Matters) may be taxed at the 12.5% rate, provided a claim is made. The 12.5% corporate tax rate applies to the same type of dividends received from companies resident in non-treaty countries, provided the company paying the dividend is a listed company or is part of a 75% listed group the principal class of the shares of which are substantially and regularly traded on the Irish Stock Exchange, a recognised Stock Exchange in an EU member state or a country with which Ireland has a DTT, or on such other Stock Exchange as is approved by the Minister for Finance for the purposes of this relief from double taxation.

As outlined above, the 12.5% corporate tax rate is also applicable to foreign dividends paid out of trading profits of a company resident in a country that has ratified the Convention on Mutual Assistance in Tax Matters. Such countries include Azerbaijan and Ukraine. Please note that Brazil and Indonesia have signed, but have not yet ratified, the Convention.

Foreign dividends received by an Irish company where it holds 5% or less of the share capital and voting rights in that foreign company are exempt from corporation tax where the Irish company would otherwise be taxed on this dividend income as trading income.

Dividends from Irish resident companies are not liable to further tax, other than a surcharge on close company recipients where the dividend is not redistributed. Broadly speaking, a close company is a company that is under the control of five or fewer 'participators'. Participators can include individual shareholders, corporate shareholders, loan creditors, any person with a right to receive distributions from the company, etc. Where not less than 35% of the shares of a company (including the voting power) are listed, a company will not be regarded as a close company.
A close company surcharge of 20% is payable on certain non-trading income (for example, rental income, certain dividend income, and interest income) if it is not distributed to shareholders within 18 months of the accounting period in which the income was earned. A close company making a distribution and the close company receiving a distribution have the option jointly to elect to have the dividend disregarded for surcharge purposes. This can give close companies the option of moving ‘trading income’ up to a holding company without incurring a surcharge. Generally speaking, close companies avoid the surcharge through the payment of dividends within the prescribed period. Capital gains accruing to a non-resident company that would be close if it were resident can be attributed to Irish resident participators in certain instances.

**Stock dividends**

Stock dividends taken in lieu of cash are taxed on the shareholder based on an amount equivalent to the amount that would have been received if the option to take stock dividends had not been exercised. If the recipient is an Irish resident company and it receives the stock dividend from a quoted (listed) Irish company, then there will be no tax. For a quoted (listed) company paying the stock dividend, dividend withholding tax (WHT) with the appropriate exemptions and exclusions applies. Other stock dividends (bonus issues) are generally non-taxable.

**Interest income**

Interest income earned by Irish companies is generally taxable at the rate of tax for passive income of 25% (interest may be regarded as a trading receipt for certain financial trader companies). It is possible to offset current-year trading losses against passive interest income arising in the same year on a ‘value basis’. It is not possible to offset prior-year trading losses against current-year interest income unless that interest constitutes a trading receipt of the particular company.

**Foreign income**

Resident companies are liable to Irish tax on worldwide income. Accordingly, in the case of an Irish resident company, foreign income and capital gains are, broadly speaking, subject to corporation tax in full. This applies to income of a foreign branch of an Irish company as well as to dividend income arising abroad.

In general, income of foreign subsidiaries of Irish companies is not taxed until remitted to Ireland, although there are special rules that seek to tax certain undistributed capital gains of non-resident close companies.

Foreign taxes borne by an Irish resident company (or Irish branch of an EEA resident company), whether imposed directly or by way of withholding, may be creditable in Ireland (see Foreign tax credit in the Tax credits and incentives section).

**Deductions**

In general, expenses incurred wholly and exclusively for the purposes of the trade are tax-deductible.

General accruals and provisions are not tax-deductible.

Capital items expensed to a company’s profit and loss account are also not tax-deductible. However, depending on the nature of the capital item, they may qualify for tax depreciation (see below).

**Depreciation**

Book depreciation is not deductible for tax purposes (except in the case of certain IP assets). Instead, tax depreciation (known as capital allowances) is permitted on a
straight-line basis in respect of expenditure incurred on assets that have been put into use by the company. The following rates are applicable:

<table>
<thead>
<tr>
<th>Asset type</th>
<th>Tax depreciation rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Plant and machinery</td>
<td>12.5</td>
</tr>
<tr>
<td>Industrial buildings used for manufacturing</td>
<td>4</td>
</tr>
<tr>
<td>Motor vehicles</td>
<td>12.5</td>
</tr>
<tr>
<td>IP assets</td>
<td>Book depreciation or 7</td>
</tr>
</tbody>
</table>

The allowances are calculated on the cost after deduction of grants, except for plant and machinery used in the course of the manufacture of processed food for human consumption. In this case, the allowances are calculated on the gross cost. Allowances on cars are restricted to a capital cost of EUR 24,000 and may be restricted further (to 50% or zero), depending on the level of carbon emissions of the vehicle.

**Accelerated capital allowances**
A 100% first-year capital allowance is available in respect of expenditures incurred on certain approved energy-efficient equipment up to 31 December 2017.

**Leasing**
Ireland operates an eight-year tax depreciation life on most assets. A beneficial tax treatment applies to finance leases and operating leases of certain assets. For short life assets (i.e. those with a life of less than eight years), Ireland allows such lessors to follow the accounting treatment of the transaction that provides a faster write-off of the capital cost of an asset rather than relying on tax depreciation over eight years. This effectively allows the lessors to write-off their capital for tax purposes in line with the economic recovery on the asset.

**Goodwill**
The amortisation of goodwill is generally not allowable as a deduction. However, a tax deduction may be available for capital expenditure on the acquisition of certain goodwill (see Intellectual property [IP] regime in the Tax credits and incentives section).

**Start-up expenses**
A deduction may be allowed in respect of pre-trading expenses that are incurred for the purposes of a trade and within three years of the commencement of the trade. Such expenses may be offset against the income of that same trade.

**Interest expenses**
A deduction for interest is allowed only to the extent that borrowings are used for the purpose of a trade or acquisition of certain non-trading assets.

**Research and development (R&D) expenses**
Expenditure on scientific R&D and payments for the acquisition of know-how in general are allowable deductions, as are the costs of obtaining or extending patents and obtaining and renewing trademarks.

**Bad debts**
A deduction is available for bad debts written off in the accounts of a company as irrecoverable. Specific bad debt provisions may also be deductible once they satisfy Irish GAAP or IFRS accounting standards. The creation of a general bad debt provision is not a deductible expense.

**Charitable contributions**
Companies are entitled to a deduction, as a trading expense, for qualifying donations to approved charities, educational institutions, schools, churches, research foundations, sports bodies, and other approved organisations that satisfy certain conditions. To
qualify for a tax deduction, the donation(s) to an organisation in a 12-month accounting period must amount to at least EUR 250.

**Meals and entertainment**
Costs incurred for third-party entertainment are not tax-deductible. Entertainment includes the provision of accommodation, food, drink, and any other form of hospitality, including the provision of gifts. Expenditure on *bona fide* staff entertainment is allowable as a deduction, provided its provision is not incidental to the provision of entertainment to third parties. Certain promotional costs are tax-deductible if they are incurred wholly and exclusively for the purposes of the trade.

**Pension expenses**
Contributions to certain employee pension schemes and the cost of setting up such schemes are deductible. Pension contributions are allowable as a deduction for employers in the year in which they are paid.

**Fines and penalties**
Fines and penalties imposed for breaking the law, civil penalties, interest, and late filing surcharges imposed by the Revenue Commissioners are generally not deductible.

**Taxes**
Taxes that are deductible in computing profits for corporation tax include VAT not recovered, the employer’s share of PRSI contributions, and local taxes (i.e. rates levied on commercial property and local authority charges).

**Net operating losses**
Losses are computed for tax purposes in the same way as business profits. Trading losses can be offset against other income of any nature, either in the current or preceding accounting period (of equal length). The amount of losses required to shelter the income is dependent on the tax rate that would have been applied to the income in the absence of the loss relief. Any excess losses can be carried forward indefinitely against future trading income. Certain changes in ownership may prevent the carryforward of losses to future periods. Terminal losses that arise within 12 months of the date a company ceases to trade may be carried back three years.

**Payments to foreign affiliates**
Generally, deductions can be claimed for royalties, management service charges, and most interest charges paid to foreign affiliates, provided the amounts do not exceed what would be paid to unrelated entities. Depending on the circumstances, certain elections may be required. Ireland does not have any thin capitalisation rules.

**Group taxation**
The concept of ‘fiscal unity’ or consolidated group tax does not exist in Ireland. However, trading losses as computed for tax purposes may be offset on a current period basis against taxable profits of another group company. As with loss relief in a single company, the amount of losses required to shelter the income is dependent on the tax rate that would have been applied to the income in the absence of the loss relief.

A group consists of a parent company and all of its 75% subsidiaries, with all group members being tax resident in Ireland, in another EU member state, in an EEA state with which Ireland has a DTT, or in another country with which Ireland has a DTT. It is also possible to trace through companies quoted on certain recognised stock exchanges (or 75% subsidiaries of companies so quoted). Non-Irish members may only surrender losses from activities that would, if profitable, be subject to Irish tax.
Both the claimant company and the surrendering company must be within the charge to Irish corporation tax. To form a group for corporation tax purposes, both the claimant company and the surrendering company must be resident in an EU country or an EEA country with which Ireland has a DTT (‘EEA treaty country’). In addition, one company must be a 75% subsidiary of the other company, or both companies must be 75% subsidiaries of a third company. The 75% group relationship can be traced through companies resident in a ‘relevant territory’ being the EU, an EEA treaty country, or another country with whom Ireland has a DTT. In addition, in determining whether one company is a 75% subsidiary of another company for the purpose of the group relief provisions, the other company must either be resident in a ‘relevant territory’ or quoted on a recognised stock exchange.

Capital losses cannot be surrendered within a group.

Relief from capital gains tax is available on intra-group transfers of capital assets. Where a capital asset is transferred from a resident company to another resident company in a 75% group, no capital gains tax charge arises. A group, for capital gains tax purposes, consists of a principal company and its 75% subsidiary companies. A 75% subsidiary is defined by reference to the beneficial ownership of ordinary share capital, owned either directly or indirectly. A capital gains tax group can include companies resident in an EU member state or an EEA DTT country for the purpose of analysing the beneficial ownership of a company.

It also is possible for an Irish resident company and an Irish branch of an EEA company in the same group to transfer capital assets without crystallising a capital gains charge, provided the asset transferred remains within the scope of the charge to Irish capital gains tax.

Subsequent to an intra-group transfer, a charge to capital gains tax will arise when either:

- the asset is sold outside the group, in which case the tax is calculated by reference to the original cost and acquisition date of the asset when first acquired within the group or
- a company owns an asset that was transferred by a group company and subsequently leaves the group within a ten-year period of the intra-group transfer. The gain on this intra-group transfer crystallises and becomes payable at this point.

**Cash pooling and treasury activities**

Ireland is a popular location for cash pooling and treasury activities, with a large number of multinationals centralising intra-group treasury activities to avail of the low corporate tax rate of 12.5%. To further enhance the attractiveness of Ireland as a treasury location, Irish tax legislation contains specific provisions to facilitate cash pooling activities and ensure favourable tax treatment of ‘short’ interest for tax purposes. Under a typical cash-pool arrangement, interest payments by the Irish cash-pool leader typically would constitute ‘short’ interest for tax purposes because of the overnight/short-term nature of these arrangements.

Short interest is generally regarded as interest on a loan/deposit where the term is less than a year. Essentially, the Irish company will be entitled to a tax deduction for the interest payable to any group company resident outside the European Union in a non-treaty country, provided the recipient country taxes foreign interest income at a rate equal to or greater than the Irish corporate tax rate of 12.5%. If the recipient country does not tax foreign interest income, then relief will be given in Ireland at that effective tax rate. If the recipient country exempts foreign interest, then no interest relief will be available in Ireland. It should be noted that this will affect not only cash-pooling operations but all forms of short-term lending (i.e. less than one year). A tax deduction for interest payable to a group company resident in the European Union or in
a country with which Ireland has a DTT is also available, regardless of the rate at which the foreign country subjects that interest to tax.

**Transfer pricing**

Ireland has enacted broad-based transfer pricing legislation, effective for accounting periods beginning on or after 1 January 2011. The legislation endorses the Organisation for Economic Co-operation and Development (OECD) Transfer Pricing Guidelines for Multinational Enterprises and Tax Administrations and adopts the arm’s-length principle. The regime applies to domestic as well as international related-party arrangements.

Multinationals with operations in Ireland will be familiar with Ireland’s corporate tax rates of 12.5% for active or ‘trading’ income and 25% for passive income. The transfer pricing regulations will only apply to related-party dealings entered into by a taxpayer engaged in a trade that is within the charge to tax under Case I or Case II of Schedule D.

Therefore, income that is characterised as ‘passive income’ and subject to tax at a rate of 25% will fall outside the scope of the transfer pricing legislation. Passive income for the purposes of these rules may include interest, royalties, dividends, and rents from property where the income arising is not derived from an active trade. For example, interest income arising to a bank will clearly constitute income from an active trade; consequently, any interest arising to a bank from a related-party arrangement will fall within the scope of the transfer pricing rules.

The rules confer a power on the Irish tax authorities to re-compute the taxable profit or loss of a taxpayer where income has been understated or where expenditure has been overstated as a result of certain non-arm’s-length arrangements. The adjustment will be made to the Irish taxable profits to reflect the arrangement had it been entered into by independent parties dealing at arm’s length.

The legislation also places an obligation on a taxpayer to provide documentation ‘as may reasonably be required’ to support the arm’s-length nature of the related-party arrangements and that documentation will need to be prepared ‘on a timely basis’. Guidance notes issued by the Irish tax authorities on transfer pricing documentation support the legislative basis and indicate that a company is required to have transfer pricing documentation available for inspection if requested by the Irish tax authorities. Notably, the guidance notes state that “it is best practice that the documentation is prepared at the time the terms of the transaction are agreed”. Additionally, the guidance notes state that in order “for a company to be in a position to make a correct and complete tax return, appropriate transfer pricing documentation should exist at the time the tax return is filed”. It is worth noting that the taxpayer can maintain documentation in the form ‘of its choosing’. Additionally, where documentation exists in another territory that supports the Irish arrangement, this will also be sufficient from an Irish transfer pricing perspective, provided that the documentation is in English. The Irish tax authorities have also confirmed that they will accept documentation that has been prepared in accordance with either the OECD Transfer Pricing Guidelines or the code of conduct adopted by the EU Council under the title ‘EU Transfer Pricing Documentation’.

Note that arrangements entered into between related parties prior to 1 July 2010 are ‘grandfathered’ and thereby excluded from the scope of the transfer pricing rules. There is also an exemption from the rules for small and medium-sized enterprises. Broadly speaking, small and medium-sized enterprises include enterprises employing less than 250 people and that have either a turnover of less than EUR 50 million or assets of less than EUR 43 million.

The Irish tax authorities monitor compliance with the transfer pricing rules through the Transfer Pricing Compliance Review (TPCR) programme. Under this programme, companies selected are notified to undergo a self-review of their compliance with the
Ireland

Irish transfer pricing rules. Companies selected are requested to provide a transfer pricing report to the tax authorities within three months.

The Irish tax authorities have clarified that the TPCR programme is not a formal audit, so this allows for voluntary disclosures to be made at any time during the process. The outcome of a TPCR will be a Revenue letter indicating either (i) no further enquiries or (ii) issues that need to be further addressed within the TPCR process. However, in some instances, a case selected for TPCR may be escalated to an audit (e.g. in cases where a company declines to complete a self-review or where the output from the review indicates that the company’s transfer pricing policies may not be in accordance with the arm’s-length standard).

In 2015, a dedicated transfer pricing audit team was formed within the Large Cases Division of the Irish tax authorities. It has begun to initiate specific transfer pricing audits. This transfer pricing unit is expected to take responsibility for the TPCR programme and all transfer pricing audits initiated by the Irish tax authorities.

**Thin capitalisation**

Ireland does not have any thin capitalisation rules.

**Controlled foreign companies (CFCs)**

Ireland does not have CFC rules.

---

**Tax credits and incentives**

The main tax incentives in Ireland are:

- 12.5% corporation tax rate on active business income.
- A 25% credit on qualifying R&D expenditures; total effective tax deduction of 37.5%.
- Ability to exploit IP at favourable tax rates.
- Accelerated tax depreciation allowances for approved energy efficient equipment.
- Ability to carry out investment management activities for non-Irish investment funds without creating a taxable presence in Ireland for such funds.
- An effective legal, regulatory, and tax framework to allow for the efficient redomiciliation of investment funds from traditional offshore centres to Ireland.

**R&D credit**

For accounting periods commencing on or after 1 January 2015, a tax credit of 25% will apply to the full amount of R&D expenditure incurred by a company without having to take account of a base year expenditure. A full volume based approach will apply.

This credit is in addition to the normal 12.5% revenue deduction available for the R&D expenditure thereby resulting in an effective corporation tax benefit of 37.5%.

For accounting periods commencing on or before 31 December 2014, a tax credit of 25% is available on incremental R&D expenditure (i.e. current year qualifying expenditure over qualifying expenditure incurred in a base year fixed at 2003) incurred by a company. In the same period, a limited volume-based approach applies for the purposes of calculating the tax credit so that the first EUR 300,000 of qualifying R&D expenditure will benefit from the 25% R&D tax credit without reference to the base year (i.e. 2003) spend. This means that companies engaging in R&D are guaranteed a credit of EUR 75,000 in respect of their first EUR 300,000 of expenditure.

A separate R&D tax credit is available in respect of expenditure incurred on the construction or refurbishment of a qualifying R&D building. In order to qualify, 35% of the building must be used for qualifying R&D activities, and this threshold is measured over a four-year period. This is of particular assistance where R&D is carried on in a
manufacturing environment. The credit available is equal to 25% of the expenditure incurred on the construction or refurbishment of a qualifying building, and the qualifying amount is restricted according to the R&D use. A full volume basis applies to the R&D tax credit for expenditure incurred on qualifying R&D buildings (i.e. an incremental basis does not apply).

The R&D tax credit is available for offset against the current year corporation tax liability of the company in the first instance. Any excess can be carried back for offset against the prior-year corporation tax liability to generate a tax refund, and any further excess can be monetised over a three-year cycle. The amount that can be monetised is limited to the greater of the corporation tax payable by the company in the preceding ten years or the payroll tax liabilities of the company for both the period in which the R&D expenditure is incurred and the prior year (subject to an adjustment dependent upon previous claims).

In addition, companies may account for the R&D tax credit through their profit and loss account or income statement in arriving at the pre-tax profit or loss. This immediately impacts the unit cost of R&D, which is the key measurement used by multinational corporations when considering the locations of R&D projects. Companies that are in receipt of an R&D tax credit have the option, in certain instances, to reward key employees through an alternative use of that credit. In effect, the company may surrender a portion of their R&D credit (that could otherwise have been used to reduce corporation tax) to ‘key employees’ to reduce their effective rate of tax to 23% (the average effective rate of tax for such employees would typically be in excess of 40% in the absence of such R&D tax credit). In order to qualify as a ‘key employee’, the individual must perform 50% or more of their employment duties on qualifying R&D activities.

The R&D regime caters for pre-trading expenditure incurred on qualifying R&D activities. Where a company incurs R&D expenditure but has not yet commenced to trade, an R&D claim in this regard must be made within 12 months from the end of the accounting period in which the company first commences to trade.

Sub-contracted R&D costs of up to the 15% of qualifying in-house R&D expenditure incurred by a company or EUR 100,000 (whichever is greater) can qualify for the R&D tax credit.

It should be noted that expenditure incurred on the acquisition of intangible assets that qualify for capital allowances under the IP regime and expenditure incurred in registering/applying for legal protection for intangible assets that are developed as a result of R&D activities do not qualify for the R&D credit.

**Intellectual property (IP) regime**
Legislation provides for a tax deduction for capital expenditure incurred by a company, which is carrying on a trade, on the acquisition of qualifying IP assets. The definition of IP assets is widely drafted and includes the acquisition of, or the licence to use, the following:

- Patents and registered designs.
- Trademarks and brand names.
- Know-how (broadly in line with the OECD model tax treaty definition of know-how).
- Domain names, copyrights, service marks, and publishing titles.
- Authorisation to sell medicines, a product of any design, formula, process, or invention (and rights derived from research into same).
- Applications for legal protection (for example, applications for the grant or registration of brands, trademarks, patents, copyright, etc.).
- Expenditure on computer software acquired for commercial exploitation.
Ireland

- Customer Lists acquired other than ‘directly or indirectly in connection with the transfer of a business as a going concern’.
- Goodwill, to the extent that it relates directly to the assets outlined above.

Capital allowances will be available at the same rate as the depreciation/amortisation charge for financial accounting purposes. Alternatively, the company may elect to claim allowances over a period of 15 years.

With effect from 1 January 2015, there is no restriction on the annual amount of qualifying amortisation that can be deducted from the IP profits earned by the company for the year. In respect of accounting years prior to 1 January 2015, tax deductions are available up to a maximum deduction of 80% of the relevant IP profits. The remaining 20% is taxable at the 12.5% corporation tax rate on the basis that the company is carrying on a trade. There is no clawback of tax deductions previously claimed, provided the IP is held for at least five years.

A shorter write-off period of eight years has also been retained for acquired software rights under the existing capital allowances regime where the rights are not acquired for commercial exploitation (i.e. were acquired for end use by the company).

**Exemption for new start-up companies**

A corporation tax holiday applies to certain start-up companies that commence to trade between 2009 and 2015. The relief applies for three years where the total amount of corporation tax payable does not exceed EUR 40,000 in each year. Marginal relief is available where corporation tax payable is between EUR 40,000 and EUR 60,000. The relief available is now linked to the amount of employer’s PRSI paid by a company in an accounting period as it is intended to target the relief at companies generating employment.

The exemption also allows unused relief arising in the first three years of trading (due to insufficiency of profits) to be carried forward for use in subsequent years.

**Section 110 company**

Ireland has a favourable tax regime for entities known as ‘Section 110’ companies. A Section 110 company is an Irish resident special purpose company that holds and/or manages ‘qualifying assets’ and satisfies a number of conditions. A Section 110 company can provide an onshore investment platform, which should be eligible to access Ireland’s DTT network where the Irish company is the beneficial owner of the income flow. The Section 110 regime has been in existence almost 25 years and, with appropriate structuring, can provide for an effective corporate tax rate of close to 0%. The regime is widely used by international banks, asset managers, hedge funds, private equity firms, and investment funds in the context of securitisations, investment platforms, collateralised debt obligations (CDOs), collateralised loan obligations (CLOs), acquisition of distressed loan portfolios, big ticket leasing, and capital markets bond issuances.

Section 110 companies are permitted to invest in financial assets, commodities, and plant and machinery. The term ‘financial asset’ is widely defined and includes both mainstream financial assets, such as shares, loans, leases, lease portfolios, bonds, debt, and derivatives, as well as assets such as greenhouse gas emissions allowances and carbon offsets.

In addition, the extension of the Section 110 regime to include plant and machinery has increased the attractiveness of Ireland as the preferred destination for aircraft financing and leasing activities.
Grants
Cash grants may be available for capital expenditures on machinery and equipment and industrial premises, training of employees, creation of employment, rent subsidies, R&D, manufacturing and exporting products, providing services to customers overseas, etc. The level of grant aid depends on a number of factors and is specific to each project. Rates depend on the location of the new industry.

Foreign tax credit
Foreign taxes borne by an Irish resident company (or Irish branch of an EEA resident company), whether imposed directly or by way of withholding, may be creditable in Ireland. The calculation of the credit depends on the nature of the income item, but for income sources other than dividends and some related party interest, the credit is limited to the Irish tax referable to the particular item of income. A system of onshore pooling of excess foreign tax credits applies to dividends from 5% or greater corporate shareholdings, and excess credits in the dividend pool can be carried forward indefinitely. A similar pooling system applies to some related party interest and also to foreign branch income.

An Irish resident company with a branch or branches outside Ireland is generally taxable in Ireland on the foreign branch profits with a credit for foreign taxes paid on those profits. A unilateral form of credit relief for foreign taxes paid by foreign branches operating in countries with which Ireland does not have a tax treaty is also available. To the extent that there were foreign taxes on branch profits that were not utilised in the relevant period (that is, where credit for foreign tax exceeds the Irish tax payable), these unused credits can be carried forward indefinitely and credited against corporation tax on foreign branch profits in future accounting periods.

A form of pooling of tax deductions in relation to foreign tax on royalties may be applicable where the royalty income is taken into account in computing the trading income of a trade carried on by the company.

An additional tax credit is available on certain dividends received by an Irish Holdco from an EU/EEA subsidiary that is subject to either the 12.5% or 25% rate of Irish tax.

The additional tax credit will provide for a credit up to the amount of Irish tax in instances where the Irish nominal rate is lower than nominal rate of tax on the underlying profits in the country where the profits are sourced.

Withholding taxes
Irish resident companies are required to withhold tax on certain types of payments as set out below (see sub-sections below for WHT exemptions and table at end of this section for WHT rate reductions).

Dividend WHT
Dividend WHT applies at 20% to dividends and other distributions. However, an exemption may be available where the recipient of the dividend is either an Irish company or a non-Irish company eligible for the Parent-Subsidiary Directive (which in Ireland requires a 5% or greater shareholding).
Exemptions from dividend WHT also are available where the recipient of the distribution falls into one of the categories listed below and provided an appropriate declaration is made to the company paying the distribution in advance of the distribution. In a move to significantly ease the administrative burden in applying for exemption for dividend WHT, this declaration is now self-assessed and valid for up to six years.

- Irish tax resident companies (a declaration is not required for Irish tax resident companies that hold a 51% or greater shareholding of the company).
- Non-resident companies, which are resident in a country with which Ireland has a tax treaty or in another EU member state, where the company is not controlled by Irish residents.
- Non-resident companies that ultimately are controlled by residents of a tax treaty country or another EU member state.
- Non-resident companies whose principal class of shares is traded on a recognised stock exchange in a treaty country or another EU member state or on any other stock exchange approved by the Minister for Finance (or if recipient of the dividend is a 75% subsidiary of such a listed company).
- Non-resident companies that are wholly owned by two or more companies the principal class of shares of each of which is traded on a recognised stock exchange in a treaty country or another EU member state or on any other stock exchange approved by the Minister for Finance.
- Individuals who are resident in a tax treaty country or in another EU member state.
- Certain pension funds, retirement funds, sports bodies, collective investment funds, and employee share ownership trusts.

Companies that make a dividend distribution are required, within 14 days of the end of the month in which the distribution is made, to make a return to the tax authorities containing details of the recipient of the dividend, the reason for any exemption from dividend WHT, and to pay over any tax withheld.

**Interest WHT**
Financial institutions operating in Ireland are obligated to withhold tax (deposit interest retention tax or DIRT) out of interest paid or credited on deposit accounts in the beneficial ownership of resident companies, unless the financial institution is authorised to pay the interest gross. The rate is 41%. There is no DIRT on interest paid to non-residents where a written declaration of non-residence is completed. Certain annual interest payments are subject to WHT at 20%. Interest payments made by companies to companies resident in other EU member states or in treaty countries are generally not subject to WHT. The EU Interest and Royalties Directive may also provide an exemption from WHT for payments between associated companies.

**Royalties WHT**
Royalties, other than patent royalties, are not generally subject to WHT under domestic law. Patent royalty payments and certain other annual payments are subject to WHT at 20%. Lower WHT rates may be accessed under treaties, subject to certain documentation and reporting requirements. The EU Interest and Royals directive may also provide an exemption from WHT for payments between associated companies. Associated companies, for the purpose of this directive, are companies where one can directly control at least 25% of the voting power of the other or at least 25% of the voting power of both companies is directly controlled by a third company. In all cases, all companies must be resident in a member state of the European Union.

**WHT on capital gains**
Where any of the following assets is disposed of, the person by whom or through whom the consideration is paid (i.e. the purchaser) must deduct capital gains WHT at 15% from the payment:

1. Land or minerals in Ireland or exploration rights in the Irish continental shelf.
2. Unquoted (unlisted) shares deriving their value or the greater part of their value (more than 50%) from assets described in (1).
3. Unquoted (unlisted) shares issued in exchange for shares deriving their value or the greater part of their value from assets as described in (1).
4. Goodwill of a trade carried on in Ireland.

The requirement to withhold tax does not apply where the consideration does not exceed EUR 500,000 or where the person disposing of the asset produces a certificate from the Revenue Commissioners authorising payment in full. A clearance certificate may be obtained by making application on Form CG50 to the Revenue Commissioners supported by a copy of the agreement or contract for sale. The certificate may be obtained on the grounds that the vendor is Irish resident or that no capital gains tax is due in respect of the disposal or that the capital gains tax has been paid. WHT is creditable against the capital gains tax liability of the vendor, and any excess is refundable.

To avoid the requirement to withhold, clearance must be obtained before the consideration is paid. There is no exemption from the withholding procedure where the asset is held as trading stock or where the transaction is intra-group and a capital gains tax liability does not arise. Failure to obtain the certificate will lead to the purchaser being assessed to capital gains tax for an amount of 15% of the consideration.

**Professional services withholding tax (PSWT)**
Individual income tax at the standard rate (currently 20%) is deducted from payments for professional services by government departments, state bodies, and local authorities. Credit is granted for any PSWT withheld against the corporation tax (or income tax for an individual) liability of the accounting period in which tax is withheld.

**Relevant contracts tax (RCT)**
RCT is a WHT that applies in the construction, forestry, and meat-processing industries in Ireland. It applies where a ‘principal contractor’ engages a sub-contractor under a ‘relevant contract’ to carry out ‘relevant operations’. Compliant taxpayers can obtain Irish Revenue clearance for zero WHT.

The RCT system applies if the ‘relevant operations’ are carried out in Ireland. Therefore, it is irrelevant whether or not the parties to the contract are resident in Ireland, the parties are liable to tax in Ireland, the contract is executed outside Ireland, or whether payments under the contract are made outside Ireland.

It is important to note that principal contractors who are liable to RCT may not necessarily operate in the above industries. In the case of construction, in particular, relevant contracts may be entered into by a variety of entity types. For example, companies involved in electricity generation, oil and gas exploration, and telecommunications undertakings are all classed as principal contractors. Relevant operations are also broadly defined. Examples are repairs to buildings and structures, ground works, installation alteration and repairs to various systems in buildings (e.g. electrical, ventilation, water supply, telecommunications, burglar and fire protection systems), mining, exploration works, and also certain haulage contracts.

Where RCT applies, the principal contractor must notify the contract and all payments under the contract to Revenue on the eRCT system in advance of payment being made. Once the principal notifies Revenue that they intend on making a payment to the sub-contractor, Revenue will then revert on a real-time basis and issue a Deduction Authorisation to the principal advising of the rate of RCT to be withheld from the gross payment. The current rates of RCT are 20% and 35% and depend on the Irish tax compliance position of the sub-contractor. The 20% rate will apply to sub-contractors who are registered with Revenue and have a good tax compliance record. The 35% rate will apply where the sub-contractor is not registered for tax in Ireland or has an
Ireland

inadequate tax compliance record. The sub-contractor is entitled to credit for, or offset of, the RCT withheld by the principal and paid to Revenue.

If, however, the sub-contractor has applied for and received zero rate authorisation from Revenue, then 0% RCT rate applies and the sub-contractor can receive payment gross without deduction of RCT. If a principal does not notify payments to Revenue in advance of making payment to the sub-contractor, then penalties will apply.

**WHT rate reductions and exemptions**

Exemptions and rate reductions apply under domestic law and under tax treaties. Where an exemption from WHT is not available (please see sections above for domestic law exemptions), a reduced rate of WHT may apply under an applicable tax treaty. The table below sets out the reduced rates of WHT that may be available to payments from Ireland of dividends, interest, and royalties under an applicable tax treaty.

Irish tax legislation allows for favourable treatment in situations where a DTT has been signed but not yet ratified.

Notes

1. The EU Interest and Royalties Directive may provide an exemption from WHT for payments between associated companies.
2. As of 1 January 2015, the treaty has been ratified but is not yet in force.

Ireland is currently negotiating treaties with the following countries:

- Argentina
- Azerbaijan
- Ghana
- Jordan
- Kazakhstan
- Taiwan
- Tunisia
- Turkmenistan

Ireland

**Tax administration**

**Taxable period**
The tax accounting period normally coincides with a company’s financial accounting period, except where the latter period exceeds 12 months.

**Tax returns**
Corporation tax returns must be submitted within nine months (and no later than the 23rd day of the ninth month) after the end of the tax accounting period in order to avoid a surcharge (maximum of EUR 63,485) or a restriction of 50% of losses claimed, to a maximum of EUR 158,715.

**Payment of tax**
Corporation tax payment dates are different for ‘large’ and ‘small’ companies. A small company is one whose corporation tax liability in the preceding period was less than EUR 200,000. Interest on late payments or underpayments is applied at approximately 8% per year.

**Large companies**
For large companies, the first instalment of preliminary tax totalling 45% of the expected final tax liability, or 50% of the prior period liability, is due six months from the start of the tax accounting period (but no later than the 23rd day of the month).

The second instalment of preliminary tax is due 31 days before the end of the tax accounting period (but no later than the 23rd day of the month). This payment must bring the total paid up to 90% of the estimated liability for the period.

The balance of tax is due when the corporation tax return for the period is filed (that is, within nine months of the end of the tax accounting period, but no later than the 23rd day of the month in which that period of nine months ends).

**Small companies**
Small companies are only required to pay one instalment of preliminary tax. This is due 31 days before the end of the tax accounting period (but no later than the 23rd day of the month).

The company can choose to pay an amount of preliminary tax equal to 100% of the corporation tax liability for its immediately preceding period or 90% of the estimated liability for the current period. As is the case for large companies, the final instalment is due when the corporation tax return is filed.

**Tax audit process**
A system of self-assessment and Irish Revenue audits is in operation in Ireland.

**Statute of limitations**
Irish Revenue may undertake an audit of a company’s tax return within a period of four years from the end of the accounting period in which the return is submitted.

**Topics of focus for tax authorities**
In 2015, a dedicated transfer pricing audit team was formed within the Large Cases Division of the Irish tax authorities. It has begun to initiate specific transfer pricing audits. This transfer pricing unit is expected to take responsibility for the TPCR programme and all transfer pricing audits initiated by the Irish tax authorities.

**General Anti-Avoidance Legislation**
The general anti-avoidance provisions are designed to counteract transactions that lack commercial reality and are put in place with a view to reducing or avoiding a charge to taxation.
The impact of the general anti-avoidance rule is that where a person enters into a transaction and it would be reasonable to consider that the transaction is a ‘tax avoidance transaction’, Irish Revenue may, at any time, deny or withdraw the tax advantage. In order to deny or withdraw that tax advantage, Irish Revenue may:

- make or amend an assessment
- allow or disallow in whole or in part any credit, deduction, or other amount that is relevant in computing tax payable
- allocate or deny in whole or in part any credit, deduction, loss, abatement, relief, allowance, exemption, income, or other amount, or
- recharacterise, for tax purposes, the nature of any payment or other amount.

The assessment made by Irish Revenue will stand unless the taxpayer successfully appeals it to the Appeals Commissioners/Courts.

**Other issues**

**Mandatory disclosure**
In a move to promote transparency between taxpayers, practitioners, and tax authorities, provisions relating to the disclosure of tax schemes are applicable. These require promoters of such schemes to provide information to the tax authorities within a specified time of having made the scheme available. A transaction that comes within the new law and must therefore be reported to Revenue is not necessarily a tax avoidance transaction for the purposes of existing legislation. The rules are wide reaching and essentially cover all tax heads, including corporation tax, income tax, capital gains tax, stamp duty, VAT, customs duties, and excise duties.

**Asset management**
Irish tax legislation contains provisions aimed at promoting Ireland as a leading location for the management of both Undertakings for Collective Investment in Transferable Securities (UCITS) and non-UCITS funds. UCITS IV brought about fundamental changes to both the management and structuring of UCITS. One of the reforms introduced permits UCITS management companies located in one EU jurisdiction to manage UCITS domiciled in another EU jurisdiction. One of the areas of concern is whether the activities of the management company could bring a foreign UCITS within the charge to tax in the management company’s home jurisdiction (e.g. by creating a branch or agency or causing the fund to be regarded as tax resident there). Irish legislation provides that an Irish management company managing a non-Irish UCITS will not be regarded as a branch or agency of the non-Irish UCITS and will not bring the profits of the foreign UCITS within the charge to Irish tax or treat the foreign UCITS as an Irish regulated fund.

Following the United States (US) and OECD review of offshore domiciles, which has resulted in increased regulation and tax obligations, fund managers are being forced to consider possible alternative onshore jurisdictions for their investment fund products. Because of the international reputation of its asset management industry and the favourable corporate tax regime, Ireland is seeing a significant trend in investment managers moving their investment platforms to Ireland from the traditional offshore jurisdictions. Company law changes also allow corporate funds to migrate to Ireland through a re-registration process, whereby the fund company would benefit from its continued existence, including the ability to retain the fund’s performance track record post migration and avoid potential adverse tax consequences and costs that typically arise from a merger of an offshore fund with a new onshore fund. The Irish Central Bank has a coordinated authorisation process to facilitate speed to market, which, at present, is a key advantage in comparison to delays being experienced in other EU domiciles.
Ireland

**International funds sector**
Legislation has introduced a number of provisions designed to support and enhance the international funds sector in Ireland, as set out in further detail below:

**Funds re-domiciling to Ireland**
Where the Central Bank has authorised an investment fund that has re-domiciled to Ireland from certain offshore centres, a declaration can be made by the fund stating that the unitholders are non-Irish resident, to ensure that no Irish tax charge arises in respect of such non-residents, thereby clarifying the tax exemption applying to payments made by Irish funds to non-resident investors. To the extent that there are any Irish resident unitholders, these need to be identified in the declaration and tax accounted for, where appropriate, on any payments made to such unitholders.

**Cross-border fund mergers involving Irish funds**
Mergers (both inbound and outbound) involving an Irish fund with a fund located in a member state of the European Union, European Economic Area, or an OECD country with which Ireland has entered into a DTT will not give rise to a charge to tax in respect of Irish resident investors. Effectively, the charge to tax is deferred until the ultimate disposal of the replacement units. The calculation of any future gain on such units is calculated by reference to the cost of the original units.

No charge to Irish tax shall arise on the transfer of units in the formation of certain master/feeder structures.

A number of significant stamp duty exemptions are available for collective investment vehicles.

**Real Estate Investment Trusts (REITs)**
REITs are exempt from tax on income and capital gains if certain conditions are met, notably the requirement to distribute at least 85% of property income annually and that at least 75% of the aggregate income of the REIT must derive from carrying on property rental business. There are also requirements regarding the number of properties held and the financing arrangements. Distributions made by the REIT are subject to WHT of 20%, with exemption/reduced rates available for eligible investors. The REIT must be incorporated and resident in Ireland and listed in an EU jurisdiction. This vehicle provides access to market for smaller investors and facilitates capital injections into the Irish property market without an additional layer of taxation.

**The introduction of the Irish Collective Asset-management Vehicle (ICAV)**
The Irish funds industry continues to work with the Irish government to explore new products that could enhance the competitiveness of Ireland's fund offering on the global stage.

In this regard, the long awaited legislation introducing the ICAV was published by the Department of Finance on 29 July 2014. The ICAV Act 2015 was signed into law on 4 March 2015.

Previously, investment funds in Ireland structured as companies were incorporated as public limited companies ('plc') under the Irish Companies Acts. The ICAV is specifically designed for investment funds and is not subject to the legislation governing other types of companies, thereby removing the need to comply with certain requirements under the Companies Acts. The legislation also increases the range of structures open to investment managers and promoters establishing funds in Ireland.

One of the main advantages of the ICAV is the ability of this structure to 'check-the-box' (an election to be regarded as tax transparent) for US tax purposes, whereas an Irish plc cannot avail of this election. This is seen as a very positive development in the funds...
industry, particularly in the context of investment funds seeking to re-domicile from traditional tax haven jurisdictions to a regulated jurisdiction like Ireland.

An ICAV may be established as an umbrella structure with a number of sub-funds and share classes. Where an umbrella structure is created, each sub-fund will have segregated liability and also have the flexibility to prepare separate financial statements on a sub-fund basis. The ICAV also qualifies for the tax exemptions that apply to Irish regulated funds.

**Investment limited partnership**

Finance Act 2013 confirmed the tax transparency of investment funds structured as investment limited partnerships under the Investment Limited Partnership Act 1994. Previously, such funds were regarded as opaque under Irish tax legislation. This change and further measures expected to be announced in the coming months further enhance the flexibility and competitiveness of Ireland’s product offering in this area.

**Islamic finance**

Irish tax law facilitates most Islamic finance transactions, including *ijara* (leasing), *takaful* (insurance), *re-takaful* (reinsurance), *murabaha* and diminishing *musharaka* (credit arrangements), *mudaraba* and *wakala* (deposit arrangements), and *sukuk*. While there is no specific reference in the legislation to Islamic Finance, rather the reference is to Specified Financial Transactions, overall, the premise of the legislation in Ireland is to ensure that Islamic finance transactions are treated in the same favourable manner as conventional financing transactions.

The legislation also facilitates the favourable taxation (and tax impact) of UCITS management companies. The UCITS structure is one of the most commonly used structures for many different types of Islamic funds, such as retail Islamic equity funds, Shariah-compliant money market funds, Shariah-compliant exchange traded funds (ETFs), etc. This demonstrates the desire of Irish government and Irish tax authorities to enhance the attractiveness of Ireland as a location for Islamic finance transactions by extending to this form of financing the relieving provisions that currently apply to conventional financing transactions.

**Islamic insurance**

The Irish Revenue has provided guidance in respect of the Irish tax treatment of general *takaful* (non-life), *re-takaful* (reinsurance), and family (life) *takaful* arrangements. Legislative changes are not currently required to facilitate Islamic insurance in Ireland.

**Choice of legal entity**

Foreign investors tend to operate either through an Irish legal entity or as a branch of a foreign entity. Both are equally valid means of doing business in Ireland, and the choice will normally depend on the commercial fact pattern and individual circumstances of the investor parent company.

**Foreign Account Tax Compliance Act (FATCA) intergovernmental agreement (IGA)**

In December 2012, the Chargé d’affaires at the US Embassy in Ireland and the Minister for Finance of Ireland signed an intergovernmental agreement (the US-Ireland IGA), for which enabling provisions were enacted into Irish tax legislation in Finance Act 2013.

The Financial Accounts Reporting (United States of America) Regulations 2014 (‘the Regulations’), which give effect to FATCA in Ireland, were signed into law on 20 June 2014 and took effect from 1 July 2014. The Regulations, together with the provisions of Section 891E Taxes Consolidation Act 1997, complete the legislative basis for the registration, due diligence, and reporting obligations of Irish financial institutions. Further guidance is provided in the Irish Guidance Notes issued by Irish Revenue. It is
expected that Irish Revenue will issue a FAQ document to assist industry in advance of the 30 June reporting deadline.

The IGA changes the way in which FATCA affects Irish financial institutions. Its effect is to give Irish laws and regulations precedence in governing FATCA compliance for Irish entities, and it provides that reporting will be carried out to the Irish Revenue Commissioners, rather than to the US Internal Revenue Service (IRS). The reporting requirements will apply to all Irish financial institutions, as defined, regardless of whether the entity has US account holders or US assets.

**US-Ireland IGA**

The US-Ireland IGA defined the types of Irish financial institutions that are in scope for FATCA as:

- a custodial institution
- a depository institution
- an investment entity, or
- a specified insurance company.

Specific definitions are attached to each type of entity above.

For the asset management industry, the IGA covers investment funds, their administrators and investment managers, as well as other parties involved in the running of the fund. The Irish regulations clarify that the fund is the party with primary responsibility for complying with the relevant obligations, but that certain due diligence and reporting responsibilities can be delegated to a third party, such as the fund administrator, at the fund’s discretion.

The US-Ireland IGA also defines the types of institutions that are either exempt from the scope of FATCA or that can qualify as ‘Deemed-Compliant Financial Institutions’. Entities qualifying under the ‘Deemed Compliant’ status will benefit from a reduced compliance burden under FATCA. Such entities include non-profit organisations, financial institutions with a local client base, and certain collective investment vehicles. Collective investment vehicles may qualify under the ‘Deemed Compliant’ status where all of the interests in the vehicle are held by or through one or more financial institutions that are not non-participating financial institutions.

**IGA benefits**

Under the IGA and its enabling Irish provisions, reporting Irish financial institutions will not be required to sign an agreement with the IRS, as envisaged by the FATCA regulations. Instead, relevant entities must report account holder information annually to Irish Revenue Commissioners (by 30 June each year). The Irish Revenue Commissioners will then collate and exchange this information with the IRS.

Under the US-Ireland IGA, reporting Irish financial institutions are considered to be compliant with local regulations, and, as a result, those entities should not suffer 30% FATCA WHT on US-source income or gross proceeds. Similarly, reporting Irish financial institutions should not be obligated to operate 30% FATCA WHT on such payments made to recalcitrant account holders or investors, provided the requirements of the IGA are met.

This is a very positive feature of the US-Ireland IGA, and means that the task of developing complex WHT systems to identify and withhold on payments to certain account holders is avoided in most cases.

**IGA requirements**

Some of the key requirements of reporting Irish financial institutions under the US-Ireland IGA include the following:
• Register as a reporting Irish financial institution and receive a Global Intermediary Identification Number (GIIN).
• Apply due diligence procedures to identify and report certain information on US Reportable accounts (as defined) and accounts held by non-participating financial institutions.
• Update account on-boarding procedures with effect from 1 July 2014 to identify whether the account holder is considered a US person (individual accounts) and classify and document the account into different categories of account holder (entity accounts).
• Annually report certain details on US reportable accounts.

Reporting
The Guidance Notes include a useful timetable demonstrating the phased in approach to Reporting over the next three years. They also contain a link to the IRS Schema and provide details on the transmission of the report to Revenue via Revenue’s Online Service (ROS). Reporting can be done in US dollars or in the functional currency of the financial account.

The draft Guidance Notes had stated that the IRS may contact financial institutions directly in the case of minor errors. This has now been removed, and the updated Guidance Notes state that where reporting errors are discovered by the IRS, the IRS will contact Revenue directly, who will liaise with the financial institution to resolve the issue.
**Isle of Man**

**PwC contact**

**Significant developments**

**Increase in rate of income tax**  
With effect from 6 April 2015, companies with profits arising from land and property situated in the Isle of Man will be subject to tax at a rate of 20% on those profits, an increase from the previous rate of 10%. Other rates of tax remain unchanged.

**Tax treaties**  
In October 2014, the Isle of Man was one of over 50 jurisdictions that signed an agreement in Berlin committing to adopt the common reporting standard (CRS), the new global standard for tax information agreements.

As of 11 May 2015, the Isle of Man had entered into ten comprehensive double tax agreements (DTAs), 13 limited scope DTAs, and 32 tax information exchange agreements (TIEAs) based on the Organisation for Economic Co-operation and Development (OECD) models. The Isle of Man also has a DTA with the United Kingdom (UK) that predates the OECD model.

**Taxes on corporate income**  
Companies resident in the Isle of Man are taxed on their worldwide income and are required to file an annual income tax return reporting worldwide taxable profits calculated in line with local legislation and practice.

A non-resident company incorporated outside the Isle of Man but having a place of business or a permanent establishment (PE) on the Isle of Man will be taxed on the profit attributable to the Isle of Man establishment.

With effect from 6 April 2015, there are three rates of corporate income tax (CIT).

The 10% rate applies to income from:

- a banking business carried on in the Isle of Man on the basis of a deposit taking licence issued by the Isle of Man Financial Supervision Commission, and  
- retail activities (i.e. the sale of goods to consumers through retail premises) carried on in the Isle of Man, but only if that income exceeds 500,000 Isle of Man pounds (IMP) in the year.

The 20% rate applies to income from real estate situated in the Isle of Man (the 10% rate of tax applies to this income up to 5 April 2015).

The 0% rate applies to all other income.

Where an election is made, certain companies subject to Manx income tax at the standard 0% rate can elect to pay tax at the 10% rate.
The general rules for the calculation of taxable income are the same whether a company is liable to tax at 0%, 10%, 20%, or a combination of these rates. Both resident and non-resident companies are taxed on their income at the same rates.

Unilateral relief from double taxation in respect of foreign-source income is given by way of tax credit.

**Local income taxes**

There are no profit based taxes levied by local government in the Isle of Man. However, commercial business rates are payable. Premises are assessed and given a ‘rateable value’ that forms the basis of the annual rates charge levied.

**Corporate residence**

A company incorporated in the Isle of Man is automatically resident for tax purposes and must therefore file an annual income tax return, whether it pays tax at 0%, 10%, 20%, or a combination of these rates.

A company that is incorporated elsewhere will be considered resident in the Isle of Man if it is ‘managed and controlled’ in the Isle of Man, and will be taxed on their worldwide income accordingly. ‘Managed and controlled’ is generally interpreted as being the place where the board of directors meets, although this is not always conclusive.

In cases where a company is resident in a country with which the Isle of Man has a tax treaty, then a tie-breaker may operate to determine residence.

Note that a company that is incorporated in the Isle of Man will not be resident if it can prove to the satisfaction of the Assessor that:

- its business is centrally managed and controlled in another country
- it is resident for tax purposes under the other country’s law
- either it is resident for tax purposes in the other country under a DTA in which a tie breaker clause applies or the highest rate at which any company may be charged to tax on any part of its profits in that other country is 20% or higher, and
- there is a *bona fide* commercial reason for its residence status in the other country, which is not motivated by a desire to reduce Isle of Man tax.

**Permanent establishment (PE)**

A place of business includes a PE, such as a branch office or shop, factory, workshop, or mine. The definition of a PE is not set out in statute, and, in cases where the company is resident in a country with which the Isle of Man has a DTA, the terms of the agreement will determine the company’s residence.

**Other taxes**

**Value-added tax (VAT)**

VAT is a transaction-based tax applied on the domestic supply of most goods and services and is currently charged at a standard rate of 20%. VAT is designed to be a tax borne by the final consumer, and there is a mechanism for businesses to recover VAT incurred in a supply chain, subject to meeting certain conditions.

For VAT purposes, the Isle of Man forms a single territory with the United Kingdom, and the VAT rules are broadly identical. This means that VAT is charged on supplies between Isle of Man and UK businesses as if they were domestic supplies. The Isle of Man has its own tax authority for VAT and other indirect taxes, which works in conjunction with the UK tax authorities.
Isle of Man

Some supplies are charged at 0%, including food, books and publications, and public transport, and there is also a 5% rate applied to domestic property repairs, amongst other things. Finally, some supplies are exempt from VAT, including insurance and financial services, betting and gaming, education, and healthcare.

**Customs and excise duties**
In addition to VAT, the Isle of Man forms a common jurisdiction for customs and excise duties with the United Kingdom, and, again, the rules are broadly identical. Customs duties are levied on most goods imported from outside the European Union (EU) into the Isle of Man, and there are various rates of duty that apply. Excise duties apply to such things as alcohol, tobacco, and fuels, and there are various rates of duty that apply. There is also a levy on commercial passenger flights known as Air Passenger Duty.

**Property taxes**
There are no property-related taxes for companies other than (i) income tax payable at a rate of 20% on their profits from the rental or development of land or property situated in the Isle of Man (the 10% rate of tax applied to this income up to 5 April 2015) and (ii) business rates as detailed in the Taxes on corporate income section.

**Transfer taxes**
There are no capital transfer taxes in the Isle of Man.

**Stamp taxes**
There is no stamp duty payable in the Isle of Man.

**Betting duty**
There are no other transaction taxes in the Isle of Man other than betting duty on gaming transactions, which is levied at differing rates of up to 15%, depending on the nature of the gaming transaction and whether it is online or land-based.

**National Insurance contributions**
In addition to deducting ‘National Insurance’ contributions from their employees' earnings, employers in the Isle of Man are required to make a ‘secondary’ National Insurance contribution in respect of each of their employees, depending on the individual’s circumstances.

The standard rate of secondary contribution is 12.8% on earnings over IMP 117 per week, but reduced rates apply in certain circumstances where the employee is a member of a pension scheme.

From 6 April 2012, in order to reduce the costs of taking on additional employees, employers have been able to apply for an exemption from paying the secondary contribution where certain conditions are met. This concession was in force until 5 April 2015.

**Payroll taxes**
Employers in the Isle of Man are also responsible for deducting tax from an employee's remuneration using the Income Tax Instalment Payments (ITIP) scheme. An employer is any person, which includes any individual, company, partnership, or public body, that engages or hires the services of someone and, in return, pays a wage or fixed payment.

The scheme covers everyone who receives remuneration and includes employees, office holders such as directors, and pensioners. Any remuneration is subject to ITIP, and tax should be deducted in accordance with the individual’s tax code.

For the purposes of ITIP, ‘remuneration' means any payment of salary, wages, fees, commission, pensions, or annuities and some termination payments.
**Branch income**

The income of branches is taxed in the same way as other corporate income in the Isle of Man. Foreign companies with branches in the Isle of Man will be taxed at the appropriate rate on the profits attributable to the Isle of Man branch.

**Income determination**

The general rules for the calculation of taxable income are the same whether a company is liable to tax at 0%, 10%, 20%, or a combination of these rates.

**Inventory valuation**

Inventories are generally stated at the lower of cost or market value. Any method of valuation that accords with sound commercial principles is acceptable for tax purposes, provided it is adopted consistently at the beginning and end of the accounting period and does not conflict with tax law. In practice, inventories are normally valued for tax purposes at the lower of cost or net realisable value. A first in first out (FIFO) basis of determining cost where items cannot be identified is acceptable, but not the base stock method or the last in first out (LIFO) method.

In general, the book and tax methods of inventory valuation must conform.

**Capital gains**

There is no capital gains tax in the Isle of Man.

**Dividend income**

Dividends are taxed at the standard rate of 0%. Dividends received from Isle of Man companies do not suffer withholding tax (WHT).

**Banking income**

Licensed banks are taxed at 10% on income from deposit taking, and any related activities, and interest earned from the investment of regulatory reserves only.

Income earned on capital and reserves in excess of the regulatory capital, group funded lending, fiduciary deposits, assurance, insurance, custody, trust, and corporate services are not banking business and are therefore taxed at 0%.

General expenses are allocated against 0% and 10% income streams on a pro rata basis.

The 20% rate applies to income earned by banks from real estate situated in the Isle of Man (the 10% rate of tax applied to this income up to 5 April 2015).

**Rental income**

Companies with profits arising on rental income in respect of land or property situated in the Isle of Man are charged to income tax at a rate of 20% (the 10% rate of tax applied to this income up to 5 April 2015). This rate applies whether or not the company is resident in the Isle of Man.

**Foreign income**

Resident corporations are liable to tax on their worldwide income (albeit the relevant rate of tax is often 0%).

**Deductions**

Relief is given in calculating the taxable profit of a company if the expense is incurred in the normal course of the business and is incurred wholly and exclusively for business
purposes. However, certain expenses that are deducted in the computation of profits are not allowable for tax purposes. These include depreciation, unpaid but accrued pension and bonus payments, certain lease payments, and customer entertainment costs.

**Depreciation**
Depreciation charged in accounts is not allowable for tax purposes. Instead, relief for depreciation is given using ‘capital allowances’ based on a reducing-balance method. Plant and machinery, tourist premises, industrial buildings, commercial buildings within a designated area, fish processing buildings, and agricultural buildings and works have an initial allowance of 100%. There are restrictions on allowances for expensive motorcars.

Isle of Man government grants are not taken into account in determining the amount of expenditure on which allowances may be given.

Tax depreciation is not required to conform to book depreciation.

Upon disposal, allowances will be reclaimed on the sale proceeds, restricted to cost.

**Goodwill**
No relief is given against trading profits for the purchase of goodwill.

**Start-up expenses**
Start-up expenses incurred in the three years prior to the commencement of trading, which would have been deductible as a trading expense if incurred after the commencement of trading, are treated as a loss arising in the year trading commenced, and relief for these losses can be claimed, subject to the normal loss-relief rules.

**Interest expenses**
Interest paid to lenders subject to Isle of Man tax is allowable in full. Interest paid to lenders not subject to Isle of Man taxation is allowable if it is incurred in the normal course of the business and is wholly and exclusively for business purposes. Only interest charged at a reasonable commercial rate will be allowed as a deduction.

**Bad debt**
Relief against trading profits is only available in respect of specific bad debts. General provisions are not allowable.

**Charitable contributions**
Broadly, trading companies are able to claim a deduction for donations made to charities, subject to a maximum of IMP 15,000 or 1% of their taxable income, whichever is greater.

**Fines and penalties**
No relief is available for any payments made in respect of fines or penalties, whether related to income tax compliance or otherwise.

**Taxes**
Business rates, as detailed in the Taxes on corporate income section, are deductible when calculating net taxable profit.

**Net operating losses**
Losses can be carried forward indefinitely against future profits from the same trade.

Trading losses incurred may be carried back against preceding year profits. There are additional rules that apply in the opening years of trade. Terminal losses in the last year of trade can be carried back against profits for the previous three years.
Payments to foreign affiliates
There is no transfer pricing regime in the Isle of Man. If, however, the Assessor of Income Tax is of the opinion that the main purpose, or one of the main purposes, of any transaction is the avoidance or reduction of tax liability, assessments may be made to counteract that avoidance or reduction.

For details of WHTs, please see the Withholding taxes section.

Group taxation
Trading losses and excess capital allowances may be surrendered (subject to certain restrictions) between 75% affiliates resident in the Isle of Man. Similar concessions are available to members of a consortium, but only a fraction of the loss or excess may be set-off, that fraction being equal to the members' share in the consortium in the relevant year of assessment.

Transfer pricing
There is no transfer pricing regime in the Isle of Man. If, however, the Assessor of Income Tax is of the opinion that the main purpose, or one of the main purposes, of any transaction is the avoidance or reduction of tax liability, assessments may be made to counteract that avoidance or reduction of tax liability.

Thin capitalisation
There is no specific thin capitalisation rule in the Isle of Man.

Controlled foreign companies (CFCs)
There is no CFC regime in the Isle of Man.

Tax credits and incentives
No special tax incentives are available in the Isle of Man.

Foreign tax credit
See Foreign income in the Income determination section for a description of foreign tax credits.

Withholding taxes
WHT should be deducted from certain payments made to non-residents by Isle of Man resident companies as follows:

- Rent from Manx land and property: 20% if paid to either a company or to an individual.
- Dividends: WHT is not required.
- Loan interest and royalties: WHT is generally not required, but there are certain exceptions that may apply.
- Other: The Assessor of Income Tax in the Isle of Man has the power to require WHT, at a rate determined by the Assessor (typically 20%), on payments of taxable income made to a non-resident (e.g. payments made to non-resident sub-contractors).

Taxable administration
Taxable period
An accounting period for tax filing purposes can be no more than 12 months.
Isle of Man

**Tax returns**
All companies are required to submit income tax returns on an accounting-period basis, whether they are liable to tax at 0%, 10%, 20%, or a combination of these rates. The tax return is due for submission one year and one day following the end of an accounting period. Where the financial statements cover more than 12 months, two (or more) returns may be required.

As of April 2015, companies will be required to file their income tax returns online.

Fixed rate penalties apply if returns are filed late. The Assessor of Income Tax also has the powers to raise a default assessment where a tax return has not been filed.

**Payment of tax**
Payment of tax is due within one year and one day of an accounting period end. Interest is charged on tax paid late.

**Tax audit process**
There is no formal regular tax audit process in the Isle of Man. The Assessor of Income Tax can make an enquiry into a return within the time limits set out below.

**Statute of limitations**
Generally, the Assessor of Income Tax may make an enquiry into a tax return no later than 12 months from the date that the tax return is delivered to the Assessor.

If, however, the Assessor discovers that income tax has not been assessed that should have been assessed, the Assessor is able to make an assessment of that tax within a period of four years from the end of the relevant accounting period.

The Assessor also has powers to require the production of documents.

**Topics of focus for tax authorities**
The Isle of Man government is focussed on delivering openness and transparency across all areas of Isle of Man taxation. The government and the tax authorities work closely with international bodies such as the EU Code of Conduct group and the EU’s Economic and Financial Affairs Council to ensure that the Island is fully compliant with international standards in areas such as tax transparency and exchange of information. The Island is already recognised on the OECD White List as being in the top tier of countries for transparency and information exchange.

The Isle of Man is focussed on reducing the avoidance of income tax and national insurance contributions of individuals using personal service companies and introduced legislation, which came into effect on 6 April 2014, to tackle this issue.

There is also more focus on the taxation of dividends paid to shareholders, particularly in relation to whether a payment is a *bona fide* dividend or disguised remuneration.

**Other issues**

**Tax treaties**
As of 11 May 2015, the Isle of Man had entered into ten comprehensive DTAs, 13 limited scope DTAs, and 32 TIEAs based on the OECD models. The Isle of Man also has a DTA with the United Kingdom that predates the OECD model.

In December 2013, the Isle of Man signed an intergovernmental agreement (IGA) with the United States to improve international tax compliance and to implement the Foreign Account Tax Compliance Act (FATCA). Information will be exchanged as of 2015.
Additionally, in October 2013, the Isle of Man became the first British dependency to sign an agreement with the United Kingdom extending the automatic disclosure of tax information. The agreement is modelled on the requirements of FATCA. The UK and Isle of Man governments have agreed to start exchanging additional information as of 2016.

In October 2014, the Isle of Man was one of over 50 jurisdictions that signed an agreement in Berlin committing to adopt the CRS, the new global standard for tax information agreements.

**Choice of business entity**
There are several different entities through which businesses may operate in the Isle of Man. These include companies, limited liability companies, partnerships, limited partnerships, and protected cell companies.
**Israel**

**Significant developments**

There have been no significant corporate tax developments in Israel during the past year.

**Taxes on corporate income**

Israel-incorporated companies and foreign companies that have a branch presence in Israel are both subject to Israeli corporate tax. An Israeli-resident entity is subject to Israeli corporate tax on worldwide income while a non-resident entity is subject to Israeli corporate tax only on income accrued or derived in Israel. Income sourcing rules determine when income is to be considered from an Israeli source.

The corporate tax rate is 26.5%.

Approved enterprises (AEs) are subject to reduced rates of tax depending upon the level of foreign ownership and location (see the Tax credits and incentives section).

**Local income taxes**

Israel does not impose local taxes on corporate income.

**Corporate residence**

The following are considered to be resident in Israel:

- A company incorporated in Israel.  
- A company whose business is managed and controlled from Israel.

In the absence of a definition of the term ‘management and control’ either in Israeli legislation or a direct discussion of this term by the Israeli courts, it may be difficult to determine whether a company that is incorporated outside of Israel shall be viewed as managed and controlled from Israel. This is a complex subject that needs to be addressed on a case-by-case basis. When an entity is both an Israeli tax resident and a resident of a foreign jurisdiction that is party to an income tax treaty with Israel, most treaties provide a tiebreaker test in the determination of an entity’s tax residency.

**Permanent establishment (PE)**

Foreign resident entities might be exempt from corporate tax to the extent that its activities do not constitute a PE under the tax treaty applicable between Israel and the foreign resident’s country of residency.

Whether a non-resident has a taxable presence under Israeli domestic tax law is far less clear than the definition of PE under a relevant tax treaty. There is no detailed legislation or Israeli court decisions that directly address this issue. In general, where there is no tax
treaty protection, a non-resident is subject to tax on income accrued or derived in Israel, which is a taxation threshold lower than the PE criterion.

**Other taxes**

**Value-added tax (VAT)**
The current rate of VAT is 18%.

Exports of goods and various other transactions are zero-rated, and certain transactions are exempt. Banks and other financial institutions pay VAT-equivalent taxes at the rate of 18% based on their total payroll and on profits. Not-for-profit organisations pay VAT-equivalent tax (wage tax) at the rate of 7.5% of their total payroll.

**Customs duties**
Customs duty is imposed on certain products imported into Israel. The rates of duty depend upon their classification according to the Harmonised Customs Tariff and the country of origin. Israel has concluded free-trade agreements with the United States, Canada, Mexico, the European Union (EU), and the European Free Trade Association (EFTA).

**Excise taxes**
The government imposes excise taxes on a variety of goods (e.g. fuel, tobacco). The excise taxes are levied item-by-item.

**Municipal tax**
Municipal tax is levied annually on buildings by local municipalities based on the size, location, and purpose of the property.

**Real estate capital gains**
Capital gains on real estate are subject to the Land Appreciation Tax Law. The law relates to any real estate in Israel, including houses, buildings, and anything permanently fixed to land; real estate rights; and leases for 25 years or more. Tax calculations closely follow the calculation of company tax on capital gains (see Capital gains in the Income determination section).

The tax rate on the real gain is the applicable corporate tax rate (26.5%).

A special tax rate may apply with respect to real estate acquired prior to 1960.

**Transfer tax**
The purchaser of real estate is generally subject to acquisition tax at rates up to a maximum of 10% (the highest rate applies when the purchase price exceeds approximately 15.5 million Israeli shekels [ILS]).

**Stamp taxes**
There are no stamp taxes imposed in Israel.

**Payroll taxes**

**Employer’s national insurance contributions**
Employers are obligated to pay national insurance contributions based on a percentage of each employee’s income on a monthly basis. Employers are responsible for withholding employees’ contributions from wages and remitting these together with the employer’s own contributions. The employer’s contribution rates (current as of April 2015) for Israeli-resident employees are 3.45% up to monthly income of ILS 5,556 and
Israel

7.25% on the difference between ILS 5,557 and the maximum monthly income of ILS 43,240.

For non-resident employees, the employer rates are significantly lower and are 0.49% up to monthly income of ILS 5,556 and 2.34% on the difference between ILS 5,557 and the maximum monthly income of ILS 43,240. The minimal national insurance payments for non-resident employees do not provide any retirement benefit for the non-resident but generally provides a certain element of work accident coverage.

When an irregular salary payment in excess of one quarter of the usual salary is made, special provisions apply to the computation of social charges by which the application of this payment is equally attributed to the current month and to the past 11 months.

Israel has social security totalisation agreements with 14 countries that may allow for an exemption from Israeli national insurance throughout the employment period of the employee in Israel.

Branch income

A branch is liable for tax at the standard corporate rate on Israel-source income. No tax is withheld on transfers of profits to the foreign head office unless the branch is an AE (see the Tax credits and incentives section).

Income determination

In general, the annual results (i.e. the excess of income over expenses or vice versa) of an Israeli company or branch, as detailed in the taxpayer's financial statements, form the basis for computing the taxable income of the business.

The base amount is then adjusted pursuant to the provisions of the tax law to arrive at ‘taxable income’.

Inventory valuation

Inventories are generally valued at the lower of cost or market value (i.e. net realisable value). Conformity is required between book and tax reporting of inventory. The first in first out (FIFO) or weighted-average basis of valuation is acceptable; the last in first out (LIFO) method is not accepted.

Capital gains

Capital gains tax is generally payable on capital gains by residents of Israel on the sale of assets (irrespective of the location of the assets) and by non-residents on the sale of the following:

- Assets located in Israel.
- Assets located abroad that are essentially a direct or indirect right to an asset or to inventory, or that are an indirect right to a real estate right or to an asset in a real estate association, located in Israel. Taxation applies only in respect of that part of the consideration that stems from the above property located in Israel.
- Assets that are a share or the right to a share in an Israeli entity.
- Assets that are a right in a foreign resident entity that is essentially a direct or indirect right to property located in Israel. Taxation applies only with respect to that part of the consideration that stems from the property located in Israel.

The cashless transfer of rights and assets arising from certain mergers, spin-offs, and asset transfers may be exempt from tax upon meeting various requirements.
Determination of the capital gain
Company tax on capital gains is imposed on the disposal of fixed and intangible assets where the disposal price is in excess of the depreciated cost.

Computation of real gain and inflationary components
For tax purposes, the capital gain is generally calculated in local currency, and there are provisions for segregating the taxable gain into its real and inflationary components. The inflationary amount is the original cost of the asset, less depreciation (where applicable), multiplied by the percentage increase in the Israeli consumer price index (CPI) from the date of acquisition of the asset to the date of its sale. The inflationary amount component is exempt to the extent it accrued after 1 January 1994 and is generally subject to tax at the rate of 10% if it accrued before that date.

The real gain component, if any, is taxed at the rates set out further below.

A non-resident that invests in capital assets with foreign currency may elect to calculate the inflationary amount in that foreign currency. Under this option, in the event of a sale of shares in an Israeli company, the inflationary amount attributable to exchange differences on the investment is always exempt from Israeli tax.

Sale of assets (including publicly and non-publicly traded shares)
The real gain is generally subject to tax at the corporate tax rate applicable in the year of the gain (26.5% in 2015). Special exemptions may apply for non-residents (see further below).

Special rule for retained profits upon sale of shares
In the case of a disposal by corporations of: (i) non-traded shares and (ii) traded shares when the seller generally directly or indirectly holds at least 10% of the sold Israeli company during the 12-month period preceding the sale, special provisions apply to such part of the real gain that is attributed to the seller’s share of retained profits. The share of retained profits is the amount of gain equal to the proportional part of the retained profits of the company that the seller of the shares would have rights to by virtue of those shares. Detailed rules apply in determining this profit component.

Generally, the seller’s proportionate part of the company’s retained profits is taxed as if this amount had been received as dividends immediately before the sale (i.e. at a tax rate of 0% in the case of an Israeli-resident corporate shareholder or at a tax rate of 30% when the seller is a non-Israeli resident corporate shareholder that generally holds 10% or more in the rights of the Israeli company [it is unclear if this 30% rate may be reduced by an applicable tax treaty]). The part of the retained profits that is attributed to the period ending on 31 December 2002 is subject to tax at the rate of 10%.

Special exemptions for non-residents
Publicly traded Israeli shares
Non-residents corporations not having a PE in Israel are exempt from tax on capital gains from the sale of shares of an Israeli company traded on the Israeli stock exchange or on a foreign stock exchange. Certain exceptions apply.

Where the shares were purchased by the non-resident prior to being publicly traded, subject to the availability of exemptions detailed below, capital gains tax might apply for the portion of the gain that was generated up to the day of the share’s public listing but not to exceed the capital gain actually arising upon the sale of the share and provided that the value on the day of public listing was more than their value on the date of purchase and that the proceeds upon sale exceeded the value on the date of purchase.
Non-publicly traded shares
For purchases after 1 January 2009, an exemption exists under domestic law for non-residents, regardless of their percentage holding in an Israeli company, from gains derived from the sale of securities not traded on a stock exchange, provided the following conditions are met:

- The investment is not in a company in which, on the date of its purchase and in the two preceding years, the main value of the assets held by the company, directly or indirectly, were sourced from an interest in (i) real estate or in a real estate association (as defined in the Income Tax Ordinance [ITO]); (ii) the use in real estate or any asset attached to land; (iii) exploitation of natural resources in Israel; or (iv) produce from land in Israel.
- The capital gains were not derived by the seller’s PE in Israel.
- The shares were not purchased from a relative (as defined in the ITO) or by means of a tax-free reorganisation.

A non-resident company shall not be eligible for this exemption if Israeli residents are controlling shareholders or benefit or are entitled to 25% or more of the income or profits of the non-resident company, either directly or indirectly.

For shares purchased between 1 July 2005 and 1 January 2009, more restrictive conditions apply in order to be eligible for the exemption. Detailed rules apply.

Treaty exemption
Non-residents may qualify for a tax treaty capital gain exemption, depending upon the particular circumstances and the provisions of the applicable tax treaty (e.g. in some tax treaties, no capital gains exemption is allowed where the holding in the sold Israeli company exceeds a certain percentage).

When assets are attributable to an Israeli PE or are real estate rights (including rights in a real estate association), a treaty exemption will generally not be available.

The Israel Tax Authority (ITA) is very sensitive to treaty shopping, and it will be necessary to demonstrate to the ITA that the foreign holding entity has business substance in its country of residence and that the structuring of the holding through that entity was not implemented for tax treaty benefit purposes.

Capital losses
Capital losses may offset all capital gains (including gains from Israeli or foreign securities) and gains from the sale of property (whether Israeli or foreign source).

Where the capital loss is from a non-Israeli asset (including when carried forward into future years), the loss must first be offset against foreign-source capital gains.

Capital losses derived from the sale of securities may also be offset against interest and dividend income generated from the sold security and also against interest and dividend income received from other securities (where the income was not subject to tax of more than 25%).

Capital losses from the sale of shares are generally reduced by any dividends received by the selling corporation during the 24 months preceding the sale, unless tax on the dividends of at least 15% was paid.

Capital losses can generally be carried forward indefinitely and set-off only against capital gains.
**Exit tax**

When an Israeli tax resident, including a company, ceases to be an Israeli resident for tax purposes, its assets are deemed to have been sold one day before it ceased being an Israeli resident. Although exit tax is primarily applicable to individuals, this might also apply to corporations incorporated outside of Israel whose management and control is transferred from Israel to another jurisdiction at a particular time.

Any gain attributable to the deemed sale of assets may be paid on the day the residency ceased or it may be postponed until the date the assets are actually realised. When the tax event is deferred to the sale date of the assets, the amount of the Israeli capital gain portion is determined by taking the real capital gain at the time of realisation, multiplied by the period of ownership from the day on which it acquired the asset until the day it ceased being an Israeli resident, divided by the entire period from the day of the asset’s acquisition until the day of realisation. The Minister of Finance is authorised to prescribe provisions for the implementation of the exit tax, including provisions for the prevention of double taxation and the submission of tax reports, but no provisions have yet been issued.

**Dividend income**

**Received by an Israeli-resident company**

Dividends received by an Israeli-resident company from another Israeli-resident company that originate from income accrued or derived in Israel are exempt from corporate tax, except for dividends paid from income of an AE (see the Tax credits and incentives section). This affords the opportunity to transfer after tax profits within an Israeli group of companies for further investment.

Dividends received by an Israeli-resident company from a non-resident company, as well as dividends received from an Israeli company that arise from foreign-source income of the distributing company, are generally taxable for the receiving company at the rate of 26.5%. Under certain circumstances, the receiving company may elect to be taxed on such dividends at the corporate tax rate, in which case it will also be entitled to a foreign tax credit with respect to corporate taxes paid by the company distributing the dividend (i.e. an ‘underlying’ tax credit).

**Received by a non-resident shareholder**

Dividends received by a non-resident shareholder from an Israeli company are generally subject to tax at the rate of 25% (30% if paid to a 10% or more shareholder), subject to a reduced rate of tax under an applicable tax treaty.

Several of Israel’s tax treaties have very beneficial withholding tax (WHT) rates for dividends being paid from Israel. The ITA is very sensitive to treaty shopping, and it will be necessary to demonstrate to the ITA that the foreign holding entity has business substance in its country of residence that will support its residency for treaty purposes and that the structuring of the holding through that entity was not implemented for tax treaty benefit purposes. Furthermore, many of the treaties contain a beneficial ownership clause as a condition to enjoying the treaty WHT rates.

**Interest income**

**Received by an Israeli-resident company**

Interest income received by an Israeli-resident company is subject to the regular corporate tax rate (26.5%).

**Received by a non-resident**

Interest income received by a non-resident company is generally subject to tax at the rate of 26.5% or subject to a reduced rate of tax under an applicable tax treaty.
Interest received by a non-resident from deposits of foreign currency with an Israeli bank is exempt from tax, subject to certain conditions.

**Rent/royalties income**
Rent and royalty income, less allowable deductions for tax purposes, is subject to tax at the regular corporate tax rate (26.5%).

**Partnership income**
From an Israeli tax perspective, a partnership is, in principle, a fiscally transparent vehicle. Accordingly, Israeli tax law does not tax partnerships as such; however, generally, each partner is taxed in respect of its share of the partnership income, with the taxable income allocated to a corporate partner taxed at the regular company tax rate. Consequently, the actual distribution of partnership income to a partner is a non-taxable event.

**Foreign income**
An Israeli-resident company is liable for tax on its worldwide income. Double taxation is avoided by way of a foreign tax credit mechanism that also applies unilaterally in the absence of an applicable double taxation treaty (DTT) (see the Tax credits and incentives section).

Under the controlled foreign company (CFC) regime in Israeli tax law, an Israeli company or individual may be taxed on a proportion of the undistributed profits of certain Israeli-controlled non-resident companies in which the Israeli shareholder has a controlling interest (10% or more of any of the CFC's 'means of control'). See Controlled foreign companies (CFCs) in the Group taxation section for more information.

**Deductions**
Costs incurred by a branch or a company are deductible as a business expense for tax purposes where they are incurred 'wholly and exclusively in the production of income'. The amount of the deduction may be limited or disallowed further to other ITO provisions and income tax regulations.

**Depreciation**
The ITO and tax regulations prescribe standard annual rates of tax depreciation for assets serving in the production of taxable income. Depreciation is generally on a straight-line basis for industrial and other enterprises based on the specific asset types as set out in the tax regulations.

Accelerated rates of depreciation may be available in regard to certain activities (such as industrial) where there is unusual wear and tear due to additional shifts of equipment use. Detailed rules apply.

Depreciation is not permitted on land.

**Goodwill**
In general, under Israeli tax regulations, goodwill purchased may be amortisable by the purchaser over a ten-year period (10% annually).

**Organisational and start-up expenses**
Organisational and start-up expenses are generally not immediately deductible but, rather, are to be capitalised for tax purposes.

**Interest expenses**
Interest expenses incurred in the production of taxable income are generally deductible. Since there are no thin capitalisation rules in Israel, there are no specific debt-to-
equity ratio requirements and there is no limit to the amount of debt that may be used in establishing a branch or local company operation in Israel. Interest and linkage payments arising from late tax payments are generally not deductible for tax purposes. Interest charges between related parties must be set based on transfer pricing principles. Detailed rules apply.

**Bad debt**
Provisions for bad debts are deductible in the year in which it is evident that the debt has become irrecoverable. Detailed rules apply for making this determination.

**Charitable contributions**
Charitable contributions do not constitute a regular business expense. However, a tax credit may be available (see Tax credit for donations in the Tax credits and incentives section).

**Research and development (R&D) costs**
Special tax relief is provided under the ITO for R&D costs incurred (see the Tax credits and incentives section).

**Pension expense**
Pension fund contributions made to recognised funds are generally deductible for the employer, provided, *inter alia*, the contributions do not exceed a prescribed level and are effected on a regular basis.

**Directors’ fees**
Payments for commercially justifiable director fees should generally be deductible.

**Accrued expenses**
Payments are generally deductible on an accrual basis for commercially justifiable expenses representing arm’s-length consideration. However, when payments made to foreign residents attract WHT, the deduction will generally be allowed, provided the payment is effected within the tax year. Alternatively, such payments may be deductible in a tax year if the applicable WHT is deducted within three months after the tax year-end and remitted to the tax authorities within seven days of the deduction, together with index linkage differences and interest accrued since the year-end.

However, accrued expenses for severance pay, vacation pay, recreation pay, holiday allowances, and sick pay are not deductible, even if there is an obligation to make these payments. They are only deductible in the year in which they are actually paid to the beneficiary or to a recognised fund.

**Contingent liabilities**
Based on Israeli court decisions, contingent liabilities may be deductible for tax purposes upon satisfying the following criterion: (i) according to accepted accounting principles, the taxpayer must include in its balance sheet a suitable provision for the potential liability; otherwise, its income will be considered to have been incorrectly reported; (ii) the circumstances of the case and the technical means according to accepted accounting practice must be provided, enabling a determination of the amount of the liability; and (iii) there is a high probability that the potential debt with respect to which the provision was made will become an absolute debt.

**Excess (disallowed) expenses**
Israeli tax law disallows the partial deduction of certain employee-related expenses incurred by a company doing business in Israel. These include so-called ‘excess expenses’. Examples of these are (i) payments for business, travel, and meals that exceed allowable deductions; (ii) expenses incurred in respect of a benefit granted by an employer to its employees but that cannot be attributed to a particular employee; and (iii) certain vehicle maintenance expenses (all expenses relating to a company owned
vehicle that was also designated for use of an employee are generally tax deductible as the employee is taxed in this regard upon an imputed amount).

A company is obligated to pay a monthly advance on excess expenses in the amount of 45% of the excess expense. The amount paid as an advance in respect of excess expenses is deemed a payment on account of the regular tax advances and payments that the company must pay for corporate tax and is offset against them, but it is not refundable (i.e. when a taxpayer’s tax liability in a given year is lower than the excess expense advances paid, the unutilised amount shall be carried forward to future tax years). Detailed rules apply.

**Fines and penalties**
Payment of fines and penalties are generally not deductible.

**Taxes**
Municipality taxes incurred in the production of taxable income are generally deductible.

**Net operating losses**
Business losses can be offset against income from any source in the same year. Loss carrybacks are not allowed. Losses may be carried forward and set-off without time limit against income from any trade or business or capital gains arising in the business, but not against income from any other source.

**Payments to foreign affiliates**
Payments of interest, royalties, and management fees to foreign affiliates are deductible if based on normal commercial terms and practices and evidenced by an inter-company agreement and transfer pricing documentation. Where such payments attract WHT, the deduction will only be allowed where such tax has been withheld and paid in accordance with certain requirements. All cross-border payments to foreign affiliates for goods and services have to comply with arm's-length pricing standards (see Transfer pricing in the Group taxation section).

**Group taxation**
As a general rule, a parent company and its subsidiaries may not submit consolidated tax returns. Only groups of industrial companies in the same line of business, as well as parent companies that control industrial companies in the same line of business and have at least 80% of their assets invested in industrial companies, are eligible to file consolidated tax returns.

**Transfer pricing**
The ITO and its accompanying regulations contain elaborate transfer pricing provisions, including the arm’s-length principle, that apply to any international transaction in which there is a special relationship between the parties to the transaction and for which a price was settled on for property, a right, a service, or credit. In general, the regulations are based upon internationally recognised transfer pricing principles (i.e. United States [US] tax regulations or Organisation for Economic Co-operation and Development [OECD] rules). These regulations generally require the taxpayer to support the pricing of international transactions with a transfer pricing study, inter-company agreements, and other documentation. In accordance to Israeli High Court Rulings, the terms of transaction conducted between related parties should be set in written contracts.

Since transfer pricing is a subject that receives considerable attention from the ITA in its examination of related inter-company transactions, transfer pricing principles and documentation requirements should be carefully adhered to.
A taxpayer is required to include in its annual corporate tax return a special form entitled 'Declaration of International Transactions' providing details for every cross-border transaction conducted with related parties. The taxpayer must sign the form, which includes a declaration that the transactions with related parties abroad were in accordance with the arm's-length principle, as defined in the Israeli transfer pricing regulations promulgated under the ITO. As a result of this form and declaration, the importance of appropriate transfer pricing documentation has increased.

**Thin capitalisation**

Israel has no statutory or regulatory provisions or other rules concerning thin capitalisation for tax purposes as exist in certain other jurisdictions. Since there are no thin capitalisation rules and Israel has no specific debt-to-equity ratio requirements, a company may be financed with minimum capital, and there is no limit to the amount of debt that may be used. Transfer pricing principles shall generally apply with regards to interest charges.

**Controlled foreign companies (CFCs)**

Under the CFC regime in Israeli tax law, an Israeli company or individual may be taxed on a proportion of certain undistributed profits of certain Israeli-controlled, non-resident companies in which the Israeli shareholder has a controlling interest (10% or more of any of the CFC's 'means of control'). A CFC is a company to which a number of cumulative conditions apply, including that most of its income or profits in the tax year were derived from passive sources (e.g. capital gains, interest, rental, dividend, royalties) and such passive income has been subject to an effective tax rate that does not exceed 15%.

**Tax credits and incentives**

**Foreign tax credit**

Double taxation is avoided by way of a foreign tax credit mechanism that also applies unilaterally in the absence of an applicable DTT. The foreign tax credit is limited to the Israeli corporate tax payable with respect to the same income. Foreign-sourced income is divided into ‘baskets’ (i.e. categories) on the basis of the income source (e.g. dividends, business income), and a particular credit limitation applies to each basket. Excess uncredited foreign income can be carried forward for the subsequent five tax years.

**Approved enterprises (AEs)**

AE status, which provides for cash and tax benefits, may be granted under the Law for the Encouragement of Capital Investments (the Law) to enterprises that increase the productive capacity of the economy, improve the balance of payments, or provide new employment opportunities. Qualification conditions include, *inter alia*, that the enterprise is an ‘industrial enterprise’ as defined in the Law. It is important to examine if the contemplated business operations in Israel qualify as an industrial enterprise under the Law. R&D services performed in Israel on behalf of a foreign resident may qualify as an industrial enterprise, provided that an approval is received from the Office of Chief Scientist.

The extent of the benefits provided under the Law also depends upon the geographical location in which the industrial enterprise is located.

New AE programmes and expansion of prior existing AE programmes are governed by the Law, which underwent a major amendment on 29 March 2005 (2005 Amended Law) and also on 29 December 2010 (2011 Amended Law), effective for 2011 and thereafter.

AE programmes that commenced their period of benefits generally prior to 2005 may still be subject to the Law’s provisions prior to these amendments.
The 2011 Amended Law is intended to simplify the manner of taxation that applies to income generated from an AE by applying a uniform tax rate for all AE-generated taxable income. Prior to these amendments, as summarised below, the corporate tax rate applicable to an AE depended upon many factors, including the tax route selected, the geographical area in which the industrial site is located, the level of foreign investment ownership, and attribution of taxable income between different tiers of AE plans further to complex formulas.

It should be noted that the 2011 Amended Law shall apply for income generated by an AE during 2011 and thereafter. Transition rules allow AE owners to elect to continue with the AE tax benefits allowed for under the Law prior to these amendments or to choose, in any tax year, to commence to apply the new provisions of the Law and to waive the remaining benefit period those AE benefits provided under the Law prior to its amendment. It should also be noted that once such an election is made by the taxpayer to implement the new provisions, it may not be altered in future tax years.

This general overview will address the Law as applicable prior to the 2011 Amended Law as well as setting forth the material tax law changes under the 2011 Amended Law.

**Cash grants (also applicable under the 2011 Amended Law)**

AEs located in certain development areas are eligible for cash investment grants, which vary according to the geographic location of the enterprise. Grant amounts and conditions are subject to governmental change from time to time.

**AE tax incentives prior to 2011 Amended Law**

**Reduced tax rates**

In addition to financial incentives for the establishment or expansion of an AE, various tax incentives are available once a new AE or expansion thereof is operational.

The reduced tax rates generally apply for a seven-year benefit period (or a ten-year period in certain cases of local companies established in development area A or in the case of a foreign investor company, see below), commencing with the year in which the AE first generates taxable income.

Generally, this seven or ten-year period of benefits is limited to 12 years from the year of implementation. For AE plans governed prior to the 2005 amendment to the Law, the period of benefits cannot extend beyond 12 years from the year the enterprise commenced its operations or beyond 14 years from the year in which approval of status as an AE was granted, whichever is earlier.

**Locally owned companies**

Income derived by a company from an AE during the maximum seven-year period of benefits is generally subject to company tax at a rate of 25%.

A WHT rate of 15% (subject to a possible reduction under a tax treaty) applies to dividends paid from profits of an AE earned during the benefits period if distributed either during the benefits period or during the subsequent 12 years. Note that dividends from non-AE profits that are paid to non-residents are generally subject to a maximum 30% WHT rate that may be further reduced under the terms of a relevant tax treaty.

**Foreign investors’ companies (FICs)**

A company that qualifies as a FIC is entitled to enhanced tax benefits on AE income. In general, an FIC is a company having more than 25% of its share capital (in terms of rights to shares, profits, voting, and the appointment of directors) and its combined share capital and investor loan capital owned by foreign residents. To qualify for FIC status, a foreign investor must make an investment in the company of at least ILS 5 million.
An FIC benefits from reduced company tax on the profits of an AE for a period of ten years (instead of seven years) commencing with the first year in which taxable income is generated. The total period of benefits is restricted as discussed above.

An FIC enjoys reduced company tax rates applicable to its AE income as shown below:

<table>
<thead>
<tr>
<th>Percentage of foreign ownership</th>
<th>Company tax rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Over 25% but less than 49%</td>
<td>25</td>
</tr>
<tr>
<td>49% or more but less than 74%</td>
<td>20</td>
</tr>
<tr>
<td>74% or more but less than 90%</td>
<td>15</td>
</tr>
<tr>
<td>90% or more</td>
<td>10</td>
</tr>
</tbody>
</table>

The foreign ownership percentage is annually determined as the lowest level retained during the specific tax year.

Dividends paid by an FIC out of the profits of its AE are subject to tax in the hands of the recipient at the rate of 15%, without limitation as to their distribution date, provided the dividends are distributed out of AE profits derived during the benefits period.

**Alternative system of tax benefits for AEs (tax holiday)**

Companies with new or expanding AEs may elect to forego all government cash grants and receive, instead, a total exemption (i.e. tax holiday) from company tax on undistributed profits of the AE for ten years in development area A, for six years in development area B, and for two years in development area C. The area of incentive is the area in which the company’s facilities are located.

The tax holiday provides an Israeli tax exemption so long as the AE profits generated in the exemption period are retained within the company. Should a subsequent distribution of such profits occur, company tax and dividend WHT is imposed on the income distributed, at the rates which would have been applicable if the tax holiday had not been elected (i.e. 25% or at a lower rate if the company is an FIC with a foreign ownership percentage of 49% or more during those years).

Under certain anti-avoidance provisions applicable to tax holidays, amounts directly or indirectly paid or credited by an AE to a relative, a major shareholder, or to a related entity controlled by either a relative or a major shareholder may be treated as a deemed taxable distribution of profits by the AE.

**Ireland track and strategic investment track**

For companies having an AE in development area A that seeks to distribute dividends while maintaining a low company and dividend tax burden, there is an ‘Ireland track’ under which the aggregate Israeli corporate and dividend WHT for a foreign resident shareholder is 15% and for an Israeli resident shareholder is 24.8%. This track is in contrast to the standard alternative benefit track discussed above, which provides a tax holiday, provided that profits remain undistributed.

Furthermore, a ‘strategic investment track’ allows for an exemption during the benefit period from company tax and dividend WHT for a company having (depending on its location within area A of the country) very significant investment and revenue levels. This means that during the benefits period, a company eligible for benefits from income accrued under this track will have no tax liability whatsoever for its productive activity arising from such investment and for the distribution of profits. Detailed rules apply to these tracks.
Qualifying for AE status

Minimal investment amount
For entitlement of tax benefits under the alternative benefit track, there must be a certain minimal investment amount (‘minimum qualifying investment’) towards purchasing productive assets (e.g. machinery and equipment, but not buildings) within three years.

Automatic approval
Where an investment project meets all of the eligibility criterion under one of the alternative tracks (standard alternative track, Ireland track, or strategic investment track) as set out in the Law and in regulations to be issued, a project will automatically qualify for the AE taxation benefits under the Law with no need for prior approval from the ITA (i.e. a ‘green lane’).

Interruption of entitlement to benefits
Under the Law, following its amendment in 2005, the examination as to whether an owner is entitled to enjoy AE benefits for a tax year is determined on a year-by-year basis. Consequently, if in any tax year during the benefit period a company does not meet any of the conditions required under the Law, then for that tax year it is not entitled to benefits. However, if the company again meets the conditions during the benefit period, the company is entitled to the benefits during the remainder of the benefit period.

Mixed enterprises
Special rules govern the allocation of taxable income of ‘mixed enterprises’. These are essentially entities that derive only part of their income from an AE or entities that operate under a number of approvals relating to separate investment projects. The company tax payable in respect of income from each part of a mixed enterprise is separately computed, and a composite WHT is applicable to dividends distributed by a mixed enterprise.

Neutralisation of assets
Assets used in the operation of an enterprise that are not part of an AE are regarded as non-approved assets. Consequently, turnover that is deemed to be generated from the non-approved assets will result in non-AE income that should be taxed at the regular Israeli corporate tax rate applicable for the relevant year.

AE 2011 Amended Law overview
In contrast to the FIC regime under the pre-2011 Law, under the provisions of the 2011 Amended Law, a company may elect to be taxed in regard to its AE income at flat tax rates, which vary depending upon the location of the AE. This is a major change in policy from the pre-Amendment FIC route discussed above, which encouraged foreign investment in Israeli companies having AE programs by providing for increasingly reduced rates (e.g. 10% rate where 90% foreign owned). Further to the amendments, there will no longer be available any deferral of corporate tax for undistributed profits (i.e. cancellation of the tax holiday route) nor will there be any additional AE tax benefits specifically linked to foreign investment. Notwithstanding the cancellation of the tax holiday route, a distribution or deemed distribution of profits that were tax-exempted under the tax holiday route before the legislative change had taken effect shall continue to be subject to company tax at the applicable AE reduced rates, in addition to the dividend WHT that will be imposed on the income distributed.

The uniform tax rates legislated under the 2011 Amended Law as of 2014 and thereafter are 9% for a company located in area A and 16% if located in the rest of the country.

The 2011 Amended Law shall apply for income generated by an AE during 2011 and thereafter. Transition rules allow current AE owners to elect to continue with the AE tax benefits allowed for under the Law prior to the 2011 Amendments or to choose in any
tax year to commence to apply the new provisions of the Law and to waive the remaining benefit period for those AE benefits provided under the Law prior to its amendment. Once such an election is made by the taxpayer to implement the new provisions, it may not be altered in future tax years. According to the approach of the ITA, the election in regard to an application to transition from the pre-2011 Law to the Amended Law must be filed by 31 May of the relevant tax year (e.g. 31 May 2016 in order to elect the 2011 Amended Law for 2016).

Dividends paid from generated profits from an AE governed by the 2011 Amended Law are subject to a WHT rate of 20% for distributions, subject to a reduction under the terms of an applicable tax treaty.

**Research and development (R&D) incentives**

Under special relief provided under the ITO, which was enacted for the purpose of encouraging taxpayers to invest in R&D activities, R&D costs can generally be deductible for tax purposes even when they represent capital costs.

The ITO provision generally distinguishes between two types of investors in R&D projects:

- The R&D project is conducted or sponsored by the owner of an enterprise in the fields of industry, agriculture, transportation, and energy, and it is intended to develop this enterprise.
- The R&D costs are borne by a taxpayer that is not the owner of an enterprise in the above mentioned fields or the taxpayer participates in R&D costs of another developer in consideration for a reasonable return, when such R&D projects also enjoy government grants.

In regard to the first group of taxpayers, the R&D expenses shall be deducted in the tax year incurred when such expense has been approved as an R&D expense by the relevant government department (the approval in regard to industrial related projects is generally granted by the Office of the Chief Scientist [OCS]). When such OCS approval is not obtained, the expense shall be deducted over three tax years.

The R&D expenses incurred by the second group of taxpayers shall generally be deducted over two tax years. The deductible expenses allowed to a participant in R&D costs of another developer generally may not exceed 40% of the taxable income of the investor in the year in which the expenses had been incurred.

For acquisitions between 1 January 2011 and 31 December 2015, an Israeli tax resident company that acquires a controlling interest in a private Israeli company that meets certain R&D activity levels shall be entitled to amortise its acquisition amount (i.e. consideration paid for shares less the purchased company’s positive equity capital if any) from its taxable income equally over five years beginning with the tax year following the acquisition. Entitlement to this deduction is subject to the fulfilment of detailed qualifying conditions, which include, *inter alia*, that both companies have AE plans in the year of acquisition, meet certain R&D investment levels, employ a certain prescribed percentage of employees having academic degrees in certain qualifying fields, and for the first three years of the amortisation period the R&D expenses of the acquired company are incurred for its own company or that of the purchasing company and at least 75% of such expenses are incurred in Israel. Detailed rules apply.

**Tax credit for donations**

A tax credit is granted in respect of donations to approved state and charitable institutions aggregating at least ILS 190 (for 2015) in a tax year. The donor is allowed a tax credit equal to the amount of the contribution times the corporate tax rate applicable during the year, provided the amount eligible for the credit does not exceed the lower of the following: (i) 30% of the corporation’s taxable income in that year or (ii) ILS
Israel

9,295,000 (in 2015). The above figures are adjusted each year according to the CPI. Excess unused tax credits may be carried forward for three years, subject to detailed rules.

**Incentive to promote foreign investment in Israeli corporate bonds**

In order to promote foreign investment in the Israeli corporate bonds market, there is an exemption from tax with respect to interest income received by foreign investors on their commercial investments in Israeli corporate bonds traded on the Tel Aviv stock exchange (TASE). The exemption is not granted to a foreign investor that has a PE in Israel or is related to, or holds 10% more of the means of control in, the investee company. In addition, in order for the exemption to apply to a foreign investor that has ‘special relations’ with the investee company, regularly sells products to or provides services to the investee company, or is employed by the investee company, the investor must prove that the interest rate on the corporate bond was determined in good faith.

**Withholding taxes**

Under Israeli domestic tax law, a 25% WHT on payments of Israeli-source income is generally deducted by an Israeli paying bank from all income remittances abroad, unless a tax certificate is obtained from the ITA authorising withholding-exempt remittances or a reduced rate of tax pursuant to an applicable tax treaty.

Set out below is a listing of WHT rates for dividends, interest, and royalties under domestic tax law and pursuant to tax treaties in force. Detailed rules apply under certain tax treaties for eligibility to the treaty-reduced rates (e.g. beneficial ownership, having no permanent establishment in Israel). The applicable tax treaty should be consulted to determine the relevant WHT rate and to examine detailed conditions that may apply for the specific circumstance.

Notes

* Some Israeli tax treaties provide for an exemption from WHT on interest involving governmental and quasi-governmental parties. Such exemptions are not separately indicated in the table above.

1. Dividends between Israeli resident companies are generally exempt from Israeli tax. Dividends paid from a foreign resident company received via an Israeli payer (e.g. bank) to an Israeli resident company or individual are subject to WHT at the rate of 25%.
2. 30% rate applies in the case of a 10% or more shareholder (detailed rules apply).
3. 10% where beneficial owner directly holds at least 25% of the capital of the company paying the dividends.
4. At a rate that is 50% of the rate that would have been imposed but for this provision but not to exceed 12.5% and not less than 7.5%. A 10% rate applies where paid from profits generated by an enterprise entitled to special tax rates under the Encouragement of Investment Law.
5. 5% if the beneficial owner is a company (other than a partnership) that directly holds at least 25% of the capital of the company paying the dividends; 10% rate if the beneficial owner is a company that directly holds at least 10% of the capital of the company paying the dividends where that latter company is a resident of Israel and the dividends are paid out of profits that are subject to tax in Israel at a rate that is lower than the normal rate of Israeli company tax; 15% rate applies in all other cases.
6. 5% if the beneficial owner is a company (other than a partnership) that directly holds at least 15% of the capital of the company paying the dividends; 15% rate in all other cases.
11. At the domestic Israeli tax rate.

12. If the recipient directly holds at least 10% of the capital of the company paying the dividends.

13. If the beneficial owner is a company (other than a partnership) that directly holds at least 25% of the capital of the company paying the dividends.

14. If the beneficial owner is a company (other than a partnership) that directly or indirectly holds at least 10% of the voting power of the company paying the dividends.

15. If the beneficial owner is a company that owns at least 25% of the voting shares of the company paying the dividends during the period of six months immediately before the end of the accounting period for which the distribution of profits takes place.

16. If the beneficial owner is a company that directly or indirectly holds at least 10% of the capital of the company paying the dividends; 10% rate if the beneficial owner is a company that directly holds at least 10% of the capital of the company paying the dividends and the dividends are paid out of profits that are subject to tax at a rate that is lower than the normal rate of the corporation tax; 15% rate in all other cases.

17. If the beneficial owner is a company (other than a partnership) that directly holds at least 10% of the capital of the company paying the dividends; 10% rate if the beneficial owner is a company that directly holds at least 10% of the capital of the company paying the dividends and the dividends are paid out of profits that by virtue of provisions in the Israeli Law of Encouragement of Investments in Israel are exempt from tax or subject to tax at a rate that is lower than the normal rate of Israeli company tax; 15% rate in all other cases.

18. If the beneficial owner is a company (other than a partnership) that directly holds at least 10% of the capital of the company paying the dividends; 10% rate if the beneficial owner is a company that directly holds at least 10% of the capital of the company paying the dividends and the dividends are paid out of profits that are subject to tax at a rate that is lower than the normal rate of Israeli company tax; 15% rate in all other cases.

19. If the beneficial owner is a company that directly or indirectly holds at least 10% of the capital of the company paying the dividends.

20. If the beneficial owner is a company (other than a partnership) that directly holds at least 25% of the capital of the company paying the dividends.

21. With respect to dividends paid to a company that directly holds at least 25% of the capital of the company paying the dividends: (i) 10% where the dividends are paid out of profits that, by virtue of provisions in Israeli law for the encouragement of investment in Israel, are exempt from tax or subject to a tax rate that is lower than the standard rate levied on the company resident in Israel; (ii) 5% where paid out of regularly taxed profits. A 15% rate applies in all other cases.

22. If the recipient directly holds at least 10% of the capital of the company paying dividends.

23. If the beneficial owner is a company (other than a partnership) that directly holds at least 25% of the capital of the company paying the dividends; 10% rate if the beneficial owner is a company that directly holds at least 25% of the capital of the company paying the dividends and the dividends are paid out of profits that are subject to tax at a rate that is lower than the normal rate of Israeli company tax; 15% rate in all other cases.

24. If the beneficial owner directs at least 10% of the capital of the company paying the dividends.

25. If the beneficial owner directly holds at least 10% of the capital of the company paying the dividends.

26. If the recipient directly or indirectly holds at least 10% of the capital of the company paying the dividends.

27. If the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that directly holds at least 10% of the capital of the company paying the dividends; 10% of the gross amount of the dividends if the beneficial owner is a company that directly holds at least 10% of the capital of the company paying the dividends and the dividends are paid out of profits that, by virtue of law of the state in which the payer is resident, are exempt from company tax or subject to company tax at a rate that is lower than the normal rate in that state; 15% of the gross amount of the dividends in all other cases.

28. If the beneficial owner is a company (other than a partnership) that directly holds at least 10% of the capital of the company paying the dividends; 10% rate if the beneficial owner is a company that directly holds at least 10% of the capital of the company paying the dividends and the dividends are paid out of profits that are subject to tax in Israel at a rate that is lower than the normal rate of Israeli company tax; 15% rate in all other cases.

29. If the recipient holds at least 25% of the capital of the company paying the dividends.

30. If the beneficial owner is a company (other than a partnership) that directly holds at least 25% of the capital of the company paying the dividends; 10% if the beneficial owner is a company that directly holds at least 10% of the capital of the company paying the dividends where that latter company is a resident of Israel and the dividends are paid out of profits that are subject to tax in Israel at a rate that is lower than the normal rate of Israeli company tax; 15% in all other cases.
31. 12.5% but only if (i) during the part of the paying corporation’s taxable year that precedes the date of payment of the dividend and during the whole of its prior taxable year (if any), at least 10% of the outstanding shares of the voting stock of the paying corporation was owned by the recipient corporation, and (ii) not more than 25% of the gross income of the paying corporation for such prior taxable year (if any) consists of interest or dividends (other than interest derived from the conduct of a banking, insurance, or financing business and dividends or interest received from subsidiary corporations, 50% or more of the outstanding shares of the voting stock of which is owned by the payor corporation at the time such dividends or interest is received). A 15% A 15% rate applies for payments from income derived during any period for which the paying corporation is entitled to the reduced tax rate applicable to an AE under Israel’s Encouragement of Capital Investments Law (1959). A 25% rate applies in all other cases.

32. Different rates ranging from 15% to 35% apply for certain types of instruments. Interest paid to a 10% or more shareholders is subject to tax at the highest marginal tax rate (48% [plus 2% if the overall annual income exceeds ILS 810,720] in 2015). Detailed rules apply.

33. 5% for interest in connection with the sale on credit of any industrial, commercial, or scientific equipment or on any loan of whatever kind granted by a bank.

34. 5% for interest in the case of a bank or other financial institution.

35. 7% for interest received by any bank or financial institution.

36. 5% for interest paid on a loan granted by a bank.

37. 5% for interest paid on any loan of whatever kind granted by a bank.

38. 5% where in connection with the sale on credit of any industrial, commercial, or scientific equipment, or sale on credit of any merchandise by one enterprise to another enterprise, or on any loan of whatever kind granted by a bank loans made by banks; 10% in all other cases. An election can be made to be taxed on the net amount of the interest as if such interest were business profits.

39. 5% for interest in connection with the sale on credit of any industrial, commercial, or scientific equipment, sale on credit of any merchandise by one enterprise to another enterprise, or on any loan of whatever kind granted by a bank.

40. 7.5% for interest received from a financial institution; 10% rate applies in all other cases.

41. 10% where paid to a bank or a financial institution.

42. 5% where paid in connection with the sale on credit of any industrial, commercial, or scientific equipment, or sale on credit of any merchandise by one enterprise to another enterprise, or on any loan of whatever kind granted by a bank.

43. 2% applies to government debt or government-assisted debt; 5% rate applies when paid to a financial institution; 10% rate applies in all other cases.

44. 10% where paid to a financial institution; 10% rate applies in all other cases.

45. 5% where paid in connection with the sale on credit of any industrial, commercial, or scientific equipment, or in connection with the sale on credit of any merchandise by one enterprise to another enterprise, or on any loan granted by a financial institution.

46. 7% for interest paid on any loan of whatever kind granted by a bank.

47. 10% for interest received by any financial institution (including an insurance company).

48. 10% for interest derived from a loan of whatever kind granted by a bank, savings institution, or insurance company or the like. 17.5% rate for other interest. An election can be made to be taxed on interest income as if that income were industrial and commercial profits.

49. 0% for literary, dramatic, musical, or artistic work copyright royalties (excluding in respect of motion picture films or films for use in connection with television).

50. 5% for copyright royalties for literary, artistic, or scientific work (excluding cinematograph films) or for the use of, or the right to use, industrial, commercial, or scientific equipment or road-transport vehicles.

51. 0% for copyright royalties for literary, dramatic, musical, artistic, or scientific work (excluding in respect of films for cinema or television).

52. 15% for trademark royalties.

53. The rate is 50% of the rate that would have been imposed but for the treaty provision but not to exceed 12.5% and not to be less than 7.5%.

54. 0% for copyright royalties for the production or reproduction of any literary, dramatic, musical, or artistic work (but not including royalties in respect of motion pictures).

55. For industrial, commercial, and scientific equipment royalties, the 10% rate applies to the adjusted amount of the royalties (70% of the gross amount of the royalties).

56. 0% for copyright royalties for literary, artistic or scientific work (excluding cinematograph films).

57. 0% for copyright royalties for literary, dramatic, musical, or artistic work.

58. 0% for copyright royalties for literary, artistic, or scientific work (excluding cinematograph films or tapes for television or broadcasting).

59. 2% for industrial, commercial, and scientific equipment royalties.

60. 5% for industrial, commercial, and scientific equipment royalties.

61. 10% for royalties for cinematograph films and films or video-tapes for radio or television broadcasting.

62. 5% for industrial, commercial, or scientific equipment royalties.

63. For royalties in respect of cinematograph or television films, the WHT rate shall not exceed tax at the rate applicable to companies on 15% of the gross amount of the royalty.

64. 5% for royalties for copyrights of literary, dramatic, musical, artistic work, or for the use of, or the right to use, industrial, commercial, or scientific equipment.

65. The definition of royalties does not include any royalty or other amount paid in respect of (i) the operation of a mine or quarry or of any other extraction of natural resources or (ii) in respect of cinematograph including television films.

66. 5% for royalties for literary, artistic, or scientific work, excluding cinematograph films or films or tapes used for radio, or television broadcasting.

67. For royalties in respect of cinematograph or television films, tax may be imposed in Israel, but not to exceed tax at the rate applicable to companies on 15% of the gross amount of the royalty.

68. 10% for copyright or film royalties.
69. 5% of the gross amount of the royalties where such royalties consist of payments of any kind received as a consideration for the use or the right to use any copyright of literary, artistic, or scientific work (excluding cinematograph films).

70. 5% for royalties for any patent, design or model, plan, secret formula, or for the use of, or the right to use, industrial, commercial, or scientific equipment, or for information concerning industrial, commercial, or scientific experience; 7.5% for technical fees; 15% for all other royalties.

71. 0% if the beneficial owner is a company (other than a partnership) that directly holds at least 10% of the capital of the company paying the dividends or where paid to certain qualifying pension funds.

72. 0% if to a pension fund or if paid on publicly traded corporate bonds or in respect of a loan, debt-claim, or credit guaranteed or insured by an institution for insurance or financing of international trade transactions that is wholly owned by Israel.

73. 0% if the beneficial owner is a company (other than a partnership) that directly holds at least 10% of the capital of the company paying the dividends where such holding is being possessed for an uninterrupted period of no less than one year and the dividends are declared within that period; or where paid to certain qualifying pension funds.

74. An election can be made to be taxed on the interest income as if that income were business profits.

75. 0% if the beneficial owner is a company that directly holds at least 10% of the capital of the company paying the dividends; 15% in all other cases.

76. 5% if the beneficial owner is a pension fund; 20% if the distributing company is a real estate investment company and the beneficial owner owns less than 10% of the capital of the company paying the dividends; 15% for all other dividends.

77. 0% if to a pension fund or if paid on publicly traded corporate bonds or if the company paying the dividends or the beneficial owner is one of the contracting states or one of their central banks, political subdivisions, or local authorities.

---

**Tax administration**

**Taxable period**
The tax year is generally the calendar year. Certain entities may apply to have their tax year-end on different dates, specifically, mutual funds, government companies, quoted companies, and subsidiaries of foreign publicly listed companies.

**Tax returns**
The Israeli system is based on a combined form of assessment and self-assessment.

The statutory filing date is five months following the end of the tax year, which for a calendar year taxpayer would be 31 May. It is possible, however, to secure extensions of the filing date.

**Payment of tax**
Generally, 12 monthly advance payments are levied at a fixed ratio of the company’s turnover. Alternatively, a company may be required to make ten monthly payments beginning in the second month of its tax year, each payment being a fixed percentage of the previous year’s tax assessment.

**Penalties**
Penalties are imposed on overdue advance payments and on delays in the submission of tax returns. The balance of any taxes due is payable from the beginning of the following tax year and is linked to the CPI; it bears interest of 4% until paid.

When the ITA determines that a taxpayer has a tax deficiency exceeding 50% of the total tax due and the taxpayer has not proven to the satisfaction of the ITA that it was not negligent in its tax reports filed (or where there was a failure to file reports), a penalty equal to 15% of the tax deficiency shall be imposed.

A penalty equal to 30% of the tax deficiency may be imposed when an additional tax liability exceeding ILS 500,000 is issued by the ITA further to a tax assessment and the tax deficiency is more than 50% of the total tax due (additional conditions apply).

**Tax audit process**
A tax return, once filed, constitutes a self-assessment that remains open to review by the ITA for three years from the end of the tax year in which the tax return is filed (within four years after the end of the said tax year with the Commissioner’s approval). If no
return is filed and a tax officer believes a taxpayer owes tax, the tax officer may issue a ‘best judgement’ assessment without time limit.

An assessment issued by an Assessing Officer may be challenged by the taxpayer in writing within 30 days stating in the objection the reasons why the assessment is not correct. A different Assessing Officer will then review the facts of the case. If following the filing of the objection the taxpayer reaches an agreement with the Assessing Officer, the tax assessment shall be amended and a notice of tax served on the taxpayer. If no agreement is reached, the Assessing Officer may determine the tax by issuing a Written Order, which may confirm, increase, or reduce the original tax assessment. If following the conclusion of the statute of limitation periods of three or four years (as discussed above) or within one year after the appeal was submitted, whichever is later, no agreement is reached and no Written Order was issued, then the taxpayer’s objection shall be deemed to have been accepted.

An appeal of a Written Order may be made by the taxpayer directly to the Israeli district courts. There is no special tax court system in Israel. A decision of the district court may be appealed to the Supreme Court as a court of civil appeals.

Detailed rules apply to the procedural appeal process.

**Statute of limitations**
The statute of limitation period for corporate tax is three years from the end of the tax year in which the relevant tax return is filed. The Commissioner of the ITA has the authority to extend this period to four years.

**Topics of focus for tax authorities**
Some key tax issues that the ITA has focused on recently include:

- Transfer pricing.
- Treaty shopping to reduce WHT and capital gains tax.
- WHT on payments to overseas service providers and for payments in regard to software.

**Other issues**

**Choice of business entities**
Investments and business operations in Israel may be structured in a variety of ways. The following are the common types of business entities in Israel: (i) Israeli public or private company; (ii) foreign company in Israel (i.e. a branch); (iii) Israeli general or limited partnership; (iv) foreign general or limited partnership; (v) other entities such as cooperative societies; and (vi) other arrangements (e.g. contractual joint ventures).

**Mergers and acquisitions**
Israeli tax law allows for non-taxable reorganisations in situations in which the ownership and business enterprise of the original parties is continued after the reorganisation takes place, allowing for the deferral of the tax liability until the shares or assets transferred in such reorganisations are actually sold. Different qualifying requirements and conditions apply (e.g. obtaining a ruling from the ITA in certain cases), depending upon the tax residency of the parties and the type of transfer.

**US Foreign Account Tax Compliance Act (FATCA) in Israel**
A Model Reciprocal Intergovernmental Agreement (IGA) was signed by Israel and the United States on 30 June 2014. The IGA provided clarity around the implementation of FATCA for the financial institutions and investment entities resident in Israel.
Israel

The IGA must be ratified under Israeli law by the Israeli Parliament (Knesset) before it comes into force, and, afterwards, it will be implemented into Israeli law. However, Israeli financial institutions are considered to have an IGA in effect as of the date of the signature of the agreement.

Guidance for the FATCA reporting regime is expected to be released in the coming months.
Significant developments

The major recent changes in the Italian tax rules that occurred in the last 12 months are the following:

• Changes to the regional production tax (imposta regionale sulle attività produttive or IRAP).
• Introduction of patent box rules.
• Tax credit for investment in research and development (R&D).
• Corporate income tax surtax (known as ‘Robin Tax’) declared unconstitutional.
• Changes to the value-added tax (VAT).

Please note that Italy tax updates are generally expected to occur between November and December in connection with the finance bill and approval of related laws. In this respect, we suggest visiting the Worldwide Tax Summaries website at www.pwc.com/taxsummaries in order to check whether or not relevant changes affect your business.

Changes to IRAP

In order to reduce the tax burden for labour intensive companies, starting from fiscal year (FY) 2015, costs related to employees with open-ended contracts are fully deductible from the IRAP taxable base.

Introduction of patent box rules

As of FY 2015, a new regime is introduced to partially exempt income derived from qualifying intangible assets from corporate income tax (imposta sul reddito sulle società or IRES) and from IRAP.

Tax credit for investment in R&D

As of FY 2015, a new tax credit is introduced for companies that have qualifying R&D expenditures to the extent those expenditures are higher than the average of the same in FY 2012, FY 2013, and FY 2014.

Robin Tax declared unconstitutional

The Italian Constitutional Court has recently declared the surtax on IRES (Robin Tax) for companies operating in the oil, gas, energy business as unconstitutional.

Changes to VAT

Starting from 1 January 2015, changes in the VAT legislation have been introduced, including the following:

• Telecommunications, broadcasting, and electronic supplied services are taxable at the place where the private customer is established, has one’s permanent address, or usually resides.
• The reverse-charge mechanism has been extended to new types of domestic supplies of goods and services.
• The VAT exemption on the supplies of goods and of ancillary services performed towards public bodies and development cooperation entities, intended to be transported or shipped outside the European Union (EU), has been reinstated.
Italy

The so-called ‘split payment’ for the supply of goods and services carried out towards public bodies has been introduced.

As of March 2015, there are new obligations to issue electronic invoices to Italian public entities. Moreover, new rules with regard to e-invoicing and e-archiving have entered into force.

Taxes on corporate income

Applicable rates
Italian corporate entities are subject to a corporate income tax, known as IRES, and to a regional production tax, known as IRAP.

The standard rates are as follows:

- 27.5% for IRES.
- 3.9% for IRAP.

A 6.5% increase (surtax or ‘Robin Tax’) to the IRES rate was applied to companies operating in the areas of oil, gas (refining, production, or trade), and electrical energy (production or trade) whose turnover exceeded 3 million euros (EUR) and whose taxable income was EUR 300,000 in the prior fiscal year. However, the Italian Constitutional Court has declared unconstitutional the Robin Tax with effect from 12 February 2015; the Court stated that the repeal is not retroactive.

The following increased IRAP rates are applicable for certain entities:

- 3.80% for entities with a determined governmental exclusive right to provide services.
- 4.20% for banks and financial entities.
- 5.30% for insurance corporations.

Regions have the power to slightly increase or decrease IRAP rates.

General rules

IRES
The IRES taxable base is determined according to the worldwide taxation principle, which states that, regardless of the location/jurisdiction where the income is produced, to the extent that the income is legally attributable to an Italian resident entity, the income is taxed in Italy. IRES is charged on the total net income reported in the financial statements of the company as adjusted for specific tax rules. Non-resident companies are taxed only on Italian-source income.

IRAP
There are different methods of computation for the IRAP taxable base, depending on the nature of the business carried out by the taxpayer. Provisions for liabilities and risks, as well as extraordinary items, cannot be taken into account when determining the IRAP taxable base.

For sales and manufacturing companies, the IRAP taxable base is broadly represented by the company’s gross margin in its financial statements. In addition to the non-deductible items mentioned above, interest income and expense and provisions for bad debts are excluded for the purposes of the IRAP taxable base.

For banks, the IRAP taxable base is broadly defined as follows:
• Intermediation margin reduced by 50% of dividends.
• 90% of amortisation costs relating to fixed tangible and intangible assets.
• 90% of other administrative expenses.
• Net value of adjustments and reassessments for bad debts.

Special rules apply to financial institutions, other than banks.

IRAP is levied on a regional basis, and regions are allowed to increase or decrease the standard IRAP rate up to 0.92%. Companies with facilities in different regions must allocate their overall taxable base to the different regions on the basis of the employment costs of personnel located at the various sites. Facilities become relevant to the calculation of IRAP if they have been established for more than three months. Italian companies with permanent establishments (PEs) abroad, as well as shipping companies qualifying for the tonnage tax regime (see Tonnage tax below), are not subject to IRAP on the income earned through these PEs.

As of FY 2015, the deduction of labour costs for IRAP purposes depends on the type of hiring contract. In particular:

• Full deduction for costs related to employees hired with an open-ended contract.
• Deduction limited to contributions for compulsory insurance against accidents (i.e. Istituto Nazionale Infortuni sul Lavoro or INAIL) for temporary employees.

Moreover, for the companies that have no employees, a tax credit equal to 10% of IRAP is recognised to be used to offset other tax liabilities.

Up to FY 2014, companies were allowed to partially deduct from the IRAP taxable base the following items:

• The total amount of the social security and welfare contributions related to the open-ended contract employees.
• A fixed amount for every employee working under an open-ended contract, women, and employees under 35 years (higher amounts were foreseen for employees in Abruzzo, Basilicata, Calabria, Campania, Molise, Puglia, Sardegna, and Sicilia).

**Substitutive tax on reorganisations (mergers, demergers, contributions in kind)**

Corporate restructurings, such as contributions in kind, (assets versus shares transactions) mergers, and demergers, are, in principle, tax neutral even if, for financial accounting purposes, the transaction results in the recognition of higher values of the assets or of goodwill. Companies may elect to obtain partial or full recognition for tax purposes of the step-up in the financial accounting values of assets or of the goodwill arising from the corporate restructurings, provided they pay a substitutive tax.

The substitutive tax is calculated on the step-up in tax basis and is based on progressive rates of 12% to 16%. The first EUR 5 million is taxed at 12%, the tranche above EUR 5 million but less than EUR 10 million is taxed at 14%, and the amount in excess of EUR 10 million is taxed at 16%. The substitutive tax may also be paid in three annual instalments of 30% in the year of election, 40% in year two, and 30% in year three plus interest at the rate of 2.5% per year on the deferred amounts. The substitutive tax is not deductible for the purposes of IRES or IRAP.

In addition, stepped-up values of goodwill and trademarks may be depreciated for tax purposes over ten tax years instead of the normally allowed 18 years by paying a substitutive tax of 16%. The higher tax depreciation arising from this election is effective from the tax period subsequent to the one in which the substitutive tax is paid. For example, if a merger transaction occurred in year one and the substitutive tax was paid in year two, the increased tax depreciation would begin in year three.
**Tonnage tax**

Italian tax resident shipping companies, as well as non-resident shipping companies operating in Italy through a PE, can qualify for and then elect to be subject to the Italian tonnage tax regime. The regime basically allows for the determination of presumptive income based on the net tonnage of the qualifying ships apportioned to the effective shipping days (tonnage income). The tonnage income is subject to IRES only.

To qualify for the tonnage tax, ships must: (i) have a net tonnage of more than 100 net tons (NT); (ii) be used for goods transportation, passenger transportation, salvage, towing, and other services; and (iii) operate in international shipping as defined by the rules disciplining Italian International Registry. Ships chartered out on a bare boat charter are excluded. Chartered ships with crew are included in the tonnage tax regime if their global net tonnage is less than 50% of the total net tonnage.

Tonnage income is calculated on the basis of the ship’s net tonnage. The daily income is determined according to the following rate system:

<table>
<thead>
<tr>
<th>Ship’s net tonnage (NT)</th>
<th>Daily income in EUR per NT</th>
</tr>
</thead>
<tbody>
<tr>
<td>0 to 1,000</td>
<td>0.0090</td>
</tr>
<tr>
<td>1,001 to 10,000</td>
<td>0.0070</td>
</tr>
<tr>
<td>10,001 to 25,000</td>
<td>0.0040</td>
</tr>
<tr>
<td>above 25,001</td>
<td>0.0020</td>
</tr>
</tbody>
</table>

No deductions are allowed from tonnage tax income.

Income and expenses from the following activities are all deemed to be covered by the tonnage income determined as previously discussed:

- Transport of goods.
- Transport of passengers.
- Salvage and towing.
- Other services that need to be performed on the high seas.
- Charges related to the above-mentioned activities (e.g. administrative and commercial expenses, insurances fees).
- Other operations performed in close connection with the transportation operations (e.g. loading and unloading).
- Other minor activities.

Capital gains or losses arising from the transfer of ships that have been acquired by a company while under the tonnage tax regime are also deemed to be included in tonnage tax income. Conversely, for capital gains arising from the transfer of a ship acquired prior to election for the tonnage tax regime, the difference between the sale price and the net tax cost as of the last tax period prior to the election for the tonnage tax regime is subject to the ordinary tax regime. Tax losses, in this latter case, are tax deductible.

An election for the tonnage tax regime should be made for all of a company’s or group’s qualifying vessels. So called ‘cherry picking’ is not allowed. Election for the tonnage tax regime is on a voluntary basis, but, once elected, it remains in effect for ten years. The election is renewable.

**Corporate residence**

Companies having their legal or administrative headquarters or their principal business activity within the Italian territory are considered to be resident companies and are taxable in Italy on their worldwide income.
A foreign company holding one or more Italian subsidiaries is deemed to be resident of Italy for tax purposes if at least one of the following conditions exists:

- The foreign company is, either directly or indirectly, held by Italian tax resident persons.
- The board of directors of the foreign company is made up mainly of Italian resident individuals.

Non-resident companies are subject to IRES and IRAP only on their Italian-source income. Specifically, Italian non-resident companies having a PE in Italy are subject to IRES and IRAP with respect of the taxable income generated from the PE in Italy.

**Permanent establishment (PE)**
The domestic definition of PE is substantially aligned with the Organisation for Economic Co-operation and Development (OECD) model.

**Corporate residence of a trust**
Trusts are considered as persons subject to corporate taxation.

Residence is defined on the basis of the location of the place of management and of the main object of the trust. In the first instance, trusts that operate through an appropriate structure are deemed to be tax resident in Italy if the said structure is located in Italy. In the absence of any such structure, trusts managed by a trustee will be deemed as tax resident in Italy if the trustee is tax resident in Italy. In addition, trusts that have the largest part of their assets located in Italy are deemed a tax resident in Italy.

Note that there are anti-avoidance rules for Italian non-resident trusts, setting out the specific conditions on which these trusts can become Italian tax resident.

**Other taxes**

**Value-added tax (VAT)**
Italian VAT (*Imposta sul Valore Aggiunto*) applies to the supply of goods and services carried out in Italy by entrepreneurs, professionals, or artists and on importations carried out by anyone. Intra-Community acquisitions are also subject to VAT taxation under certain situations.

The Italian standard VAT rate is 22%. Reduced rates are provided for specifically listed supplies of goods and services, such as 4% for listed food, drinks, and agricultural products and 10% for electric power supplies for listed uses and listed drugs. Intra-Community supplies and exports are exempt from VAT.

Specific supplies of goods and services expressly listed in the law are exempt from VAT (e.g. hospital and medical care, education, insurance services, specific financial services, supply, leasing of particular immovable property). Other specifically listed transactions are also out of the VAT application scope (e.g. transfer of money, transfer of going concern).

Input VAT on purchases of goods and services related to business activity generally is allowed for recovery. Special limitations apply in relation to specific items (e.g. cars, entertainment expenses) and to companies carrying out both exempt from VAT with no right to deduct and taxable transactions.

The filing deadline for the annual VAT return is 30 September of the following year.

Starting from the 2016 VAT return, the filing deadline will be the end of February of the following year.
Several simplified compliance procedures have been introduced since 13 December 2014 into the VAT legislation. The main ones relate to:

- VAT refund claims (mainly in terms of possibility to avoid the submission of a guarantee to the Italian tax authorities where certain conditions are met).
- Communication to the Italian tax authorities of the data included in the so-called ‘dichiarazioni di intento’ (i.e. the declaration taxable persons meeting certain threshold in terms of exports and similar transactions have to provide their suppliers in order to benefit from VAT exemption on the received suppliers).
- Communication related to transactions carried out with operators established in ‘black list’ countries.
- Request for authorisation to perform intra-EU transactions.
- Intrastat declarations regarding the provision of ‘generic’ services.

**Service supply rules**

Generic services supplied by a taxable person to another taxable person (business-to-business or B2B) are in the scope of the Italian VAT if the services are supplied to Italian taxable persons or to PEs of an Italian non-resident entity.

The specific rules are as follows:

- For services related to immovable property, reference must be made to the place in which the immovable property is located.
- For the transportation of passengers, the place in which the transportation takes place must be identified, including the proportion of the distance covered.
- For catering and restaurant services, the place in which the activity will be physically carried out must be identified.
- For short term hiring, leasing, and similar means of obtaining transport services, the place in which the vehicle is used must be identified (use and enjoyment rule has been implemented on these services).

The general rule for services supplied by a taxable person to a non-taxable person (business-to-consumer or B2C) identifies the place of taxation with the country of residence of the supplier.

Several rules, in addition to the B2B general rules, exist for the following:

- Brokerage services.
- Goods transport services.
- Services related to movable goods and ancillary activities related to transports.
- Long term hiring/leasing of means of transport services.
- Electronic services supplied by extra-EU suppliers.
- Telecommunications and television/radio broadcast services.

In addition, special rules are provided for certain services rendered to final customers established outside the European Union.

In relation to the VAT treatment of cultural, artistic, sporting, scientific, educational, recreational, and similar services, VAT is due in the country where the activities were physically carried out for B2C activities and VAT is due in the country of the recipient for B2B activities other than admission. For B2B services in respect of admission, the place of supply is where the events take place.

**Time of supply for certain services**

Time of supply is the time of completion in case of:
• supply of services falling under the general rule (i.e. generic supply of services) rendered by EU and non-EU taxable persons to taxable persons established in Italy, and
• supply of services falling under the general rule rendered by taxable persons established in Italy to EU and non-EU taxable persons.

In case of periodic or continuous supply of services, the time of supply is the date of maturity of the consideration.

Moreover, the above supplies of services, if performed/received by taxable persons established in Italy continuously over a period longer than one year and if no payments are carried out, even partially, in the same period, shall be considered carried out at the end of each calendar year up to completion of the same supplies.

**Reporting obligation**

Transactions carried out with subjects resident in 'black list' countries (i.e. tax haven jurisdictions) must be disclosed in an annual communication to be electronically filed with the tax authorities. The total amount of input and output transactions carried out with operators located in 'black list' countries, higher than EUR 10,000, has to be reported.

A taxable person must also communicate the total amount of the output transactions rendered towards each customer and input transactions received from each supplier. As regards the communication related to transactions for which there is no obligation to issue an invoice, the threshold for this fulfilment is EUR 3,600, VAT inclusive. Specific transactions are excluded from the communication (e.g. importations, exportations, and other transactions that have already been communicated to the tax authorities, such as insurance, electricity supply, and telephone services contracts).

**Reverse-charge mechanism extension**

According to the reverse-charge mechanism, the obligations related to supply of goods and provision of services carried out in Italy by non-resident taxable persons towards taxable persons established in Italy are fulfilled by the latter. Due to the implementation of the EU Directive 45/2010, the recipient of goods and/or services has to integrate the invoice received by the EU supplier or has to issue a self-invoice in case of a non-EU supplier and record it in the VAT sales register and VAT purchase register within a defined timeline.

The reverse-charge mechanism obligation has been extended to the supply of all goods and services in the scope of the Italian VAT carried out by non-resident entities to taxable persons resident in Italy. Non-resident entities (including those having an Italian VAT number through indirect or direct registration) cannot charge Italian VAT to an Italian established VAT person.

As of 2015, the reverse-charge mechanism has been extended to the following supplies of goods and services:

• Cleaning, demolition, equipment installation, and completion services related to the buildings (this rule is in force starting from 1 January 2015).
• Transfer of greenhouse gas emission allowance (this rule is in force starting from 1 January 2015 and will be applicable for a period of four years).
• Supply of gas and electricity to a taxable dealers established in the territory of the state (this rule is in force starting from 1 January 2015 and will be applicable for a period of four years).
• Supplies of goods carried out towards hypermarket (activity code 47.11.1), supermarkets (activity code 47.11.2), and discount foods (activity code 47.11.3). The legislative provision in force is subject to the authorisation by the EU and it will be applicable for a period of four years.
‘Split payment’
Starting from 1 January 2015, VAT is paid in each case by the public body for the following transactions: supply of goods and services carried out towards the state, government bodies even with legal personality, public entities and consortia among them incorporated, chambers of commerce, industry, trade and agriculture, universities, local health entities and nursing homes with prevailing scientific aim, assistance and charitable public entities, and pension institutions.

Taxable persons carrying out supplies of goods and services towards the above mentioned public bodies:
• have to issue the invoice quoting the wording ‘scissione dei pagamenti’ (i.e. ‘split payment’)
• are not required to pay the relevant VAT, and
• have to book the invoices issued separately on the ‘sale VAT register’ and the ‘purchase VAT registers’ without considering the VAT included in the VAT settlement.

VAT credit offset with other taxes
To offset a VAT credit against other taxes for an amount higher than EUR 5,000, it is necessary to wait until the 16th day of the month following the filing of the yearly VAT return on which the credit is shown.

Furthermore, in order to avoid abuse, taxpayers intending to offset a VAT credit for an amount greater than EUR 15,000 are required to ask their tax advisors or auditors to affix their signature to the VAT return, which is known as the ‘conformity mark’.

Electronic invoicing to public entities
There is an obligation to issue electronic invoices to Italian ministers, tax agencies, national public entities, and national social security and welfare entities. The receiving entities are no longer entitled to accept paper invoices and, accordingly, they will not proceed with the payments. Particular conditions apply for the format of the invoices under discussion as well as for the related e-archiving obligations.

Registration tax
Specific deeds and contracts must be filed with the local registration tax office either upon signature or if specific circumstances occur, and the relevant tax must be paid.

Depending on the nature of the contract and on the assets that are the object of the contract, as well as on the form of the contract, registration tax is levied as a fixed amount or as a percentage of the value of the goods and/or rights that are the object of the contract. As a general rule, no proportional registration tax is due in the case of transactions subject to VAT.

VAT and registration tax on lease of immovable properties
Leases of residential and commercial buildings, or portion thereof, generally are exempt from VAT with no right to deduction and subject to the registration tax at 2% or 1% rate.

Different VAT rates, VAT treatment, and registration tax treatment apply depending on the type of buildings the lease refers to (e.g. residential, commercial buildings), the supplier (e.g. individual, constructions companies, taxable persons other than construction companies).

Specific rules apply in case of financial leases of residential and commercial buildings from a registration tax perspective.

Customs duties
At the moment of the importation of goods into the EU territory, customs duties are applied. The amount of customs duties to pay depends on the value and nature of
the goods imported. In particular, for each kind of good, the Common Customs Tariff provides a tax rate to be applied to the value or number of the goods imported.

The correct classification of the goods is one of the most important issues to consider when an economic operator introduces goods in Italy. A wrong classification can give rise to the application of higher customs duties, and the operator could face a tax burden not due, or to the application of lower customs duties, and this situation could lead to a Tax Assessment by Italian Customs Authority.

The value of the goods is represented by the transaction value, hence, the price actually paid or payable for the goods when sold for exportation to the customs territory of the EU, provided that:

- there are no restrictions as to the disposal or use of the goods by the buyer
- the sale or price is not subject to some condition or consideration for which a value cannot be determined with respect to the goods being valued
- part of the profits of any subsequent resale, disposal, or use of the goods by the buyer will not be accrued, directly or indirectly, to the seller, and
- the buyer and seller are not related, or, where the buyer and seller are related, that the transaction value is acceptable for customs purposes.

In determining whether the transaction value is acceptable, the fact that the buyer and the seller are related is not, in itself, sufficient for considering the transaction value as not acceptable. Where necessary, the circumstances surrounding the sale are examined, and the transaction value is accepted if the relationship did not influence the price.

The price actually paid or payable is the total transaction amount paid for the imported goods and includes all payments made as a condition of sale of the imported goods by the buyer to the seller or by the buyer to a third party to satisfy an obligation of the seller.

In determining the customs value, the following items shall be added to the price, to the extent that they are incurred by the buyer and are not included in the price (list not exhaustive):

- Commissions and brokerage.
- Royalties and licence fees related to the goods under assessment.
- The cost of transport and insurance of the imported goods.

At the same time, provided that they are shown separately from the price actually paid or payable, the following items shall not be included in to the customs value (list not exhaustive):

- Charges for the transport of goods after their arrival at the place of introduction into the customs territory of the European Union.
- Charges for construction, erection, assembly, maintenance, or technical assistance, undertaken after importation of imported goods such as industrial plant, machinery, or equipment.
- Buying commissions.

A reduced or zero rate of duty at importation can be applied when the goods imported have a preferential origin. The preferential origin depends on the existence of commercial agreements between the European Union and other non-EU states or by facilities provided by the European Union to non-EU states unilaterally.

The application of a reduced or zero rate of duty can even depend on the existence of preferential tariff treatment or on the existence of a particular exemption provided by law for some kind of goods.
Any person may appoint a representative in one’s dealings with the Customs Authority to perform the activities and formalities laid down by customs rules. Such representation may be direct, in which case the representative shall act in the name and on behalf of another person, or indirect, in which case the representatives shall act in one’s own name but on behalf of another person.

For direct representation, a forwarding agent, holder of a particular licence, must be appointed.

The representative must be established within the European Union.

**Excise duties**

The following goods are subject to excise duties:

- Energetic products (e.g. petrol, gas oil, natural gas, coal).
- Alcohol and alcoholic drinks (e.g. wine, beer, ethylc alcohol).
- Processed tobaccos (e.g. cigars, cigarettes, tobacco).
- Electric power.

The subjection of a product to excise duties has to be verified on the basis of its customs combined nomenclature code.

The tax liability, depending on the products, arises:

- at the moment of importation or production (and the excise duties must be paid at the moment in which they are released for consumption in Italy)
- when the excisable goods are used for heating or as fuel, and
- when the excisable goods are released for consumption or used for own use.

As a general rule (with exception of natural gas and coal, coke, and lignite), with reference to excise goods released for consumption during a month, the payment of the relative excise duties has to be done within the 16th day of the following month.

With reference to excise goods imported, customs rules are applied as far as the procedure and terms of payment are concerned.

The production, processing, and holding of ‘excise goods’, except from natural gas, coal, coke, lignite, and electric power, are subject to a suspensive regime performed through a fiscal warehouse.

In order to manage a fiscal warehouse, it is necessary to acquire a licence issued by the Italian Customs Authority, and there are specific obligations for the owner of a fiscal warehouse (e.g. provide for a particular guarantee, keep a particular accounting system for the goods stored, be subject to controls performed by Italian Customs Authority, where requested).

The Italian legislation provides for many exemptions with regards to the use of ‘excise goods’.

Furthermore, under certain circumstances, a tax refund is granted to the operator who released for consumption, if, afterwards, the products are not consumed in Italy.

**Stamp duty taxes**

Stamp duty taxes (*Imposta di Bollo*) apply on a certain list of deeds or documents provided for by the relevant law provision (e.g. checks, bills of exchange, statements of account, certificates, books of account, deeds of transfer of quotas, and, in some cases, invoices).
According to the kind of deed, stamp duty tax is due at the moment of the deeds’ origin or in case of use (e.g. if the deed is filed to the Italian Registration Office). Moreover, it can be a fixed amount or as an amount proportional to the value of the deed or document.

Stamp duty tax can be paid:

- ordinarily, through a physical stamp attached on the document, or
- virtually, through electronic means (in this case, a specific authorisation from the Italian tax authorities and a specific process procedure are needed).

Stamp duty tax is usually alternative to VAT; however, in case of considerations partially subject to VAT and partially not subject to VAT, the invoice is subject to stamp duty tax if the total amount of the considerations not subject to VAT exceeds EUR 77.47. Moreover, some transactions are stamp duty tax exempted (e.g. inter-Community supply of goods). For transactions that are exempted from VAT (with restriction on VAT credit) and for transactions out of scope of VAT, exceeding EUR 77.47, an amount of EUR 2 is due as stamp duty tax for each issued invoice.

**Unified municipal tax (Imposta Unica Comunale or IUC)**

The IUC is composed of the following different taxes:

- **Imposta Municipale Unica** (IMU): Real estate tax levied on the ownership of immovable properties (buildings, rural land, farmlands), except for immovable properties owned as primary private properties. The standard tax rate is 0.76%. Depending on the municipality and status of the taxpayer, the tax rate can be increased or decreased. The taxable base is generally determined on the basis of the so called ‘cadastral value’ (i.e. capitalisation of the deemed standard income that is expected to be derived from the real estate).
- **Tributo per i Servizi Indivisibili** (TASI): A service tax due by real estate owners and by tenants. The amount due by the tenant can range according to the regulation stated by the municipality.
- **Tassa sui rifiuti** (TARI): A waste tax levied on the owner or the user of immovable properties.

**Financial Transaction Tax (FTT)**

FTT is applicable on the purchase side of a transfer of property of:

- portfolio shares and other equity instruments issued by Italian resident companies
- instruments or securities representing shares, regardless of the residence of the issuer
- shares, due to convertible bonds, and
- derivative instruments whose underlying are securities issued by Italian resident companies (these are subject to a special tax scale, on both the purchase and the sale sides).

The cash equities FTT tax base is the net daily balance of transaction on the same financial instruments by the same person; derivatives FTT tax base is the notional amount (no netting).

The applicable general rate is equal to 0.20%. The tax rate is reduced to 0.10% for transactions that are operated on regulated markets and multilateral trading facilities. Derivatives FTT is reduced to 1/5 for transactions on regulated markets and multilateral trading facilities.

**Social security contributions**

The Italian employer, in order to pay social security contributions for employees, must register with the Italian Social Security Administration (Instituto Nazionale Previdenza Sociale or INPS).
Italy

The total social security rate is around 40% of the employee’s gross compensation (the rate depends on the work-activity performed by the company, the number of employees of the company, and the employee’s position), and is shared as follows:

- Employer’s charge is around 30%.
- Employee’s charge is around 10%.

**Branch income**

The tax regime for PEs is the same as for corporate Italian entities (e.g. joint-stock companies). Accordingly, a PE is subject to IRES as well as IRAP. Both taxes are determined on the basis of the relevant financial statements related to the business activities carried out by the PE.

Transfer pricing principles apply to ‘transactions’ between the head office and its Italian PE.

**Income determination**

In principle, positive and negative components of a company’s income statement are, respectively, taxed or deducted on an accruals basis (under the accrual principle) for tax purposes. Additionally, in order to be taxed/deducted, income items have to be certain under a legal standpoint and either objectively determined or capable of objective determination as to their amount (under the certain and objective determination principle). Income statement items accrued in the statutory accounts not meeting the above criteria are not allowed for tax deduction nor taxed as income in the tax period. Deduction or taxation of income is correspondingly deferred to future tax periods when the criteria are met.

Expenses generally are deductible if they relate to activities generating revenues concurring to the company’s taxable income (under the inherence to business principle) and provided they are included in the relevant statutory accounts (under the imputation principle). An exception to this general rule is made for those income statement items accrued in the statutory accounts relating to a tax period different from that in which they become relevant for tax purposes in accordance with the principles of certainty and objective determination as described above. These items are taken into account in determining taxable income in the tax period when the latter conditions are met.

For IRAP purposes, relevant income and expense are those reported in the financial statements.

Specific rules have been released for entities that have adopted International Financial Reporting Standards (IFRS) for Italian statutory financial reporting purposes. These provisions are aimed to align income determination rules with IFRS.

**Inventory valuation**

Italian tax law allows the application of all the most commonly used inventory valuation methods: last in first out (LIFO), first in first out (FIFO), average cost. For IRES only, the reference prices used to calculate the written down value of the inventory items cannot be lower than their market prices during the final month of the tax period.

Companies operating in the oil and gas sector are required to adopt either average cost or FIFO for tax purposes.

**Capital gains**

Capital gains are taxable in the tax period in which they are realised, as follows:
• Fixed assets: the gain realised on the sale of fixed assets is taxable for both IRES and IRAP purposes. Additionally, for IRES purposes, tax on capital gains can be spread over a maximum of five years. This treatment is allowed if the company owned the fixed assets for not less than three years.

• Financial Investments: a specific participation exemption regime (PEX) is applicable. Under this regime, capital gains realised by Italian companies on sales of shareholdings are 95% exempt from IRES.

PEX applies if all of the following conditions are met:

• The shareholding was held uninterruptedly for at least 12 months prior to the sale.
• The investment was classified under financial fixed assets in the financial statements relating to the first tax period of uninterrupted ownership.
• The subsidiary is actually carrying on a commercial activity (e.g. investments in companies mainly performing management of their own real estate are not entitled to PEX benefits).
• The majority of the subsidiary’s income is not generated in a tax haven country or one with a privileged tax regime.

The third and fourth conditions must be met both at the time of the sale of the investment and in the three preceding years. If these conditions are not met, the capital gain realised by the company is ordinarily taxed. Capital losses arising from the sale or write-down of shareholdings meeting PEX conditions are basically not tax deductible. Likewise, the capital losses realised on sales of non-PEX investments are tax deductible. Specific exemptions are provided for those entities adopting IFRS for Italian statutory accounts reporting purposes.

Specific anti-dividend washing rules provide that where capital losses arise from the disposal of shareholdings that are not eligible for PEX, such losses are deductible only for the part exceeding the tax exempt amount of dividends (see Dividend income discussion below) received from the shares in question in the 36 months prior to the disposal.

Capital gains on financial investments generally are excluded from the IRAP taxable base.

**Dividend income**

Dividends received by Italian resident companies from Italian companies or from companies resident in countries other than tax havens (i.e. not included in the ‘black list’) are excluded from the IRES taxable base for 95% of their amount. Conversely, no exemption applies to dividends paid by entities that are resident in tax haven jurisdictions (unless those dividends derive from profits that were already taxed under the Italian controlled foreign company [CFC] rules). There are specific rules for entities adopting IFRS for Italian statutory financial reporting purposes. For such entities, dividends from investments in shares and other financial instruments held for trading are fully taxable.

Dividends generally are excluded from the IRAP taxable base.

**Interest income**

Interest income is generally part of the taxable base.

**Foreign income**

An Italian resident corporation is taxable on all income whether produced in Italy or abroad. Profits earned by subsidiaries that are resident or located in countries or territories other than tax havens are taxed only on distribution of the relevant profits. Double taxation is, in principle, avoided by means of foreign tax credits.
Shell companies
Resident companies and PEs of non-resident companies can be qualified as non-operating entities if, alternatively, one of the following conditions is met:

• The entity is in a tax loss position for five consecutive tax periods.
• The average revenues recorded in the current fiscal year and in the prior four years are lower than the amount resulting by applying certain ‘deemed return’ percentages to the average balance sheet value of specific assets in the current fiscal year and the four previous years.

The main assets to be taken into consideration are shares and shareholdings, financial receivables, owned or leased real estate, and owned or leased tangible and intangible assets. The value of any assets acquired or sold during the fiscal year must be adjusted according to the ownership period.

These conditions must be checked every year. Therefore, it is possible for an entity to be ‘non-operative’ in one year and operative in the following year.

The shell company is assessed as having a minimum taxable income for both IRES and IRAP purposes.

For IRES purposes, the taxable income of a non-operative entity is determined as the sum of such values emerging from the application of specific percentages to the book values of the above-mentioned assets.

The current IRES standard rate for entities qualified as shell companies is 38% (27.5% plus surtax of 10.5%).

Tax losses generated in a tax period when the company was deemed to be non-operating cannot be carried forward.

For IRAP purposes, non-deductible items have to be added back to the deemed minimum IRES income as outlined above.

These rules are not applicable in the first year of a company’s incorporation. Exemptions from these rules can be achieved:

• by means of an advance ruling from the Italian tax authorities aimed at assessing the specific circumstances that caused the company not to earn the minimum amount of income or
• by specific objective situations provided for by Italian law (e.g. company directly or indirectly held by listed companies).

Shell companies are also subject to limitations in their ability to recover VAT credits.

Deductions
The principles outlined in the section on Income determination also apply for deductible costs.

Depreciation and amortisation
All fixed assets that are used in the business of the company, except land, are depreciable for tax purposes (for both IRES and IRAP).

For IRES, the maximum depreciation rates for fixed tangible assets are set forth in a Ministerial Decree. Such depreciation rates are different, depending on the type of asset and on the economic sector in which the company operates. In the event that financial
accounting depreciation exceeds the amounts allowed for tax purposes, temporary
differences arise. Tax depreciation of fixed tangible assets is allowed from the tax period
in which the asset is first used. In the first tax depreciation period, the depreciation rate
cannot exceed one-half of the normal rates.

It is worth pointing out that a project aimed at achieving the grouping of the
tax amortisation rates has been announced by the government. Timing for the
implementation of such a project is still uncertain.

Land is not a depreciable asset. Amortisation of goodwill derived from an asset deal and
amortisation of trademarks are deductible for an amount not exceeding one-eighteenth
of the cost in any year.

Patents, know-how, and other intellectual property (IP) may be amortised over a two-
year period.

Concession rights may be depreciated with reference to the utilisation period as
determined either by law or in the relevant agreement.

For IRAP purposes only, depreciation and amortisation (other than as related to
goodwill and trademarks) are deductible in accordance with the amounts reported in
the financial statements, regardless of the limits outlined above.

**Finance leasing**
Leasing expenses booked in the profit and loss statement pursuant to Italian Generally
Accepted Accounting Principles (GAAP) are fully deductible from the IRES taxable
base if the relevant agreement has a minimum duration period. In particular, if the
agreement is executed as of 1 January 2014, the duration required is the following:

- For fixed tangible assets, at least half of the depreciation period as set forth in the
  above Ministerial Decree.
- For real estate, at least 12 years.

Longer minimum duration periods are provided for financial leasing agreements
executed before 1 January 2014.

**Interest expense**
Generally, interest expense is fully tax deductible up to the amount of interest income.
Thereafter, excess interest expense is deductible at up to 30% of the gross operating
margin (interest deduction capacity) as reported in the financial statements. Gross
operating margin is defined as the difference between operating revenues and expenses
excluding depreciation of tangible and intangible assets and charges for leased assets as
stated in the profit and loss account for the year.

Net interest expense in excess of the yearly limitation is carried forward indefinitely.
Hence, net interest expense not deducted in previous years can be deducted in any
future fiscal year as long as total interest in that year does not exceed 30% of gross
operating margin. If net interest expense is lower than the annual limit (i.e. 30% of gross
operating margin), this difference can be carried over to increase the company's interest
deduction capacity in future years.

Where an election is made for the domestic tax consolidation regime (as discussed in the
Group taxation section), the net interest expense limitation applies to the consolidated
tax group. As a consequence, if a company participating in a tax group has an excess
interest deduction capacity, this excess may be used against the interest deduction
deficit in another company belonging to the same tax consolidation group. Under
specific conditions, non-resident subsidiaries can also be ‘virtually’ included in the tax
consolidation for the sole purpose of transferring their excess capacity over 30% of
Italy

gross operating margin in order to increase the overall interest deduction capacity of the Italian group.

The above-mentioned rules are not applicable for financial institutions, such as banks and insurance companies, where the deductibility of interest expense (for both IRES and IRAP purposes) is limited to a fixed amount of 96% of the interest expense shown in the income statement of these entities.

**Allowance for Corporate Equity (ACE)**
The ACE is a deduction that corresponds to the net increase in the equity employed in the entity, multiplied by a rate yearly determined by the Ministry of Finance. This rate is equal to 4.5% for FY 2015 and to 4.75% for FY 2016.

The relevant increase is determined by the equity contributions and by the retained earnings (except profits allocated to a non-disposable reserve) less the following items:

- Reductions of the net equity with assignment to shareholders, including, in particular, dividend distribution.
- Investments in controlled companies.
- Certain intra-group business acquisitions.

If the allowance for a year is higher than the net IRES taxable base, the difference will be carried forward to the next periods.

To calculate the equity increase, the reference equity is that disclosed in the financial statements for the fiscal year current as at 31 December 2010, net of the profits for the same year.

**Bad debts**
Yearly provision for bad debts not guaranteed by third parties and relating to sales of goods and services is tax deductible at up to 0.5% of the receivables gross value. Deduction shall no longer be permitted when the total amount of the bad debts reserve exceeds 5% of the above-mentioned gross value of the receivables as of the end of the fiscal year.

Regardless of the above, losses on bad debts shall be deductible if supported by precise and objective elements or, in any case, if the debtor is subject to bankruptcy proceedings.

A loss on a bad debt can be deducted for IRES purposes when the following conditions jointly apply:

- The term for payment has elapsed by six months.
- The receivable has a determined threshold. In particular, the item is up to EUR 2,500 for small companies and up to EUR 5,000 for big corporations (with turnover over EUR 100 million).

The loss is tax deductible, regardless of the amount, when the collection right is prescribed.

Moreover, losses are tax deductible in case of derecognition of bad debts applied in compliance with accounting standards (both Italian GAAP and IFRS), always provided the inherence test is met.

**Charitable contributions**
Deduction of charitable contributions is allowed. The amounts allowed for deductions depend on the specific features of the recipient entity, and specific limitations are set by the law.
Entertainment expenses
For IRES purposes, expenses for gifts and entertainment that meet the requirements (both qualitative and quantitative) contained in the specific Ministerial Decree are fully deductible in the tax period in which they are incurred. Entertainment expenses that do not meet these requirements cannot be deducted.

Expenses related to gifts with a value of EUR 50 or less are entirely deductible.

Travel expenses
For IRES purposes, the deduction for travel expenses incurred within the municipality is limited to 75% of the amount incurred. However, the VAT related to such costs is fully recoverable.

Car costs
The IRES deductibility of expenses related to cars used by companies is as follows:

- **20%** for cars that are not assigned to employees or are granted to employees solely for business use.
- **70%** for cars granted to employees for both business and private purposes.

Car costs may be entirely deducted if (i) automobiles are absolutely necessary for the company's business or (ii) automobiles are an essential element in the company's activity (i.e. vehicles owned by a car rental company).

Telephone expenses
For IRES purposes, up to **80%** of the total expenses related to both mobile and landline telephones are deductible.

Fines and penalties
Fines and penalties are generally not considered inherent costs and are, consequently, not deductible for tax purposes.

Taxes
The following IRAP items are deductible in determining the IRES taxable base:

- The **10%** of IRAP paid during the year.
- An amount determined on the IRAP paid on the cost of employees, net of the relevant deductions.

IMU, municipal tax on real estate, is deductible for IRES purposes up to **20%** of the amount paid in the fiscal year, whereas no deduction is allowed for IRAP purposes.

Purchases from suppliers resident in tax haven jurisdictions
The costs of goods and services purchased from entities that are resident in tax haven jurisdictions are deductible on the condition that the taxpayer can, upon request of the tax authorities, provide evidence that the foreign counterparts carry out a real business activity or that the transactions were carried out for good and sound economic reasons (e.g. better economic conditions, the foreign supplier is the sole distributor for that product).

An official list of tax haven jurisdictions (known as the 'black list') has been issued by the Ministry of Finance. A list of countries that are not considered to have a privileged tax regime (known as the 'white list') is expected, and countries not on this white list will be deemed tax havens. Specific disclosure is required in a company's income tax return for the expenses arising in tax haven jurisdictions.
**Net operating losses**

Tax losses can be carried forward for IRES purposes and used to offset income in the following tax periods without any time limitation.

Tax losses can only be offset with taxable income for an amount not exceeding 80% of the taxable income. Thus, corporations are required to pay IRES on at least 20% of taxable income.

Note that losses arising in the first three years of activity can be offset with 100% of taxable income.

For IRAP purposes, tax losses may not be carried forward.

Specific (tax anti-avoidance) rules limit the carryforward of tax losses in the event of:

- change of control and
- an effective change of the main activity (performed by the company carrying forward the losses).

The aforementioned changes must occur together in order for the limitations to be applicable. The change of the main activity is relevant for these purposes if it takes place in the tax period in which the change of control occurs or in the two subsequent or preceding periods.

Specific anti-abuse provisions are also applicable to net operating losses in cases of merger or demerger.

In Italy, tax losses may not be carried back.

**Payments to foreign affiliates**

Transactions with foreign affiliated companies should be at ‘fair market value’ and, generally, as defined by OECD guidelines. See Transfer pricing in the Group taxation section for more information.

---

**Group taxation**

**Domestic tax consolidation**

Companies belonging to the same group can elect domestic tax consolidation. This allows the determination of a single IRES taxable base comprised of the taxable income and losses of each of the participating entities. The tax consolidation does not operate for IRAP purposes.

Where an overall tax loss position arises, this can be carried forward and used against future consolidated taxable income. Conversely, tax losses arising in fiscal years preceding the domestic tax consolidation election can be carried forward and used only by the company to which these losses belong.

The taxable basis determined by each company participating in the tax consolidation arrangement is included in its entirety. No apportionment is made in relation to the percentage of control.

In order to validly elect the Italian domestic tax consolidation regime, the following conditions must be met:

- The consolidating entity must be an Italian tax resident company, and it must hold, directly or indirectly, more than the 50% of the share capital of the consolidated entities (so called ‘legal control’).
• This control must be in place from the beginning of the tax period for which the tax consolidation is applied for.
• All of the companies participating in the group must have the same year-end.

Provided that specific requirements are met, Italian PEs of foreign companies can also participate as controlling entities in a tax consolidation.

The consolidation arrangement operates on an elective basis. Taxpayers may select whether to be included or not, and it is not necessary for all the Italian group/sub-group companies to jointly elect for the tax consolidation.

Once the election is made, it cannot be revoked for three fiscal years.

**Worldwide tax consolidation group**

A worldwide tax consolidation group is available, allowing the consolidation of foreign subsidiaries.

In addition to the requirements set out for the domestic tax group system, the following conditions apply:

• The ultimate parent company must be either owned by individuals who are tax residents of Italy or listed on the Italian Stock Exchange.
• The option must be exercised for all foreign companies (under the ‘all in, all out’ principle).

Income for each company is apportioned in the tax consolidation based on the actual percentage of control exercised by the ultimate parent company that is an Italian tax resident.

A number of additional requirements need to be fulfilled in order for a worldwide tax consolidation to be operative, including a mandatory audit of the financial statements of all the foreign subsidiaries.

Once the election is made, it cannot be rescinded for five fiscal years.

**Transfer pricing**

Income derived from operations with non-resident corporations that directly or indirectly control the Italian entity, are controlled by the Italian entity, or are controlled by the same corporation controlling the Italian entity have to be valued on the basis of the normal value of the goods transferred, services rendered, and services and goods received if an increase in taxable income is derived from. Possible reductions in taxable income as a result of the normal value rule are allowed only on the basis of mutual agreement procedures or the EU Arbitration Convention.

The normal value is the average price or consideration paid for goods and services of the same or similar type, carried on at free market conditions and at the same level of commerce, at the time and place in which the goods and services were purchased or performed. For the determination of the normal value, reference should be made, to the extent possible, to the price list of the provider of goods or services, and, in their absence, to the price lists issued by the chamber of commerce and to professional tariffs, taking into account usual discounts.

**Penalty protection regime with transfer pricing documentation support**

Transfer pricing rules provide for a penalty protection regime in case of transfer pricing audit, provided that the taxpayer has prepared proper documentation detailing the compliance of inter-company transaction to the arm’s-length principle.
Italy

The regulation applies to transactions incurred between Italian entities and non-resident entities belonging to the same group (transfer pricing rule are not applicable to domestic transactions). No specific methods have been introduced to test the arm's length of transactions; reference is made to the OECD guidelines. An exception exists for corporations involved in on-line advertising and related ancillary activities that are required not to use cost-based indicators for transfer pricing purposes, unless an advance pricing agreement (APA) has been defined with the tax authorities on this.

On the base of the transfer pricing regulation, taxpayers can obtain penalty protection if they provide the Italian tax authorities with:

- Documentation to support the inter-company transactions drawn up in the specific format detailed in a Regulation issued by the Italian tax authorities and drawn up in Italian. The tax authority confirmed that information in annexes (inter-company contracts and transactions diagram) can be in English.
- Notification that documentation has been prepared and available by checking the box in the annual corporate income tax return.

The information required is based on the EU Code of Conduct for Transfer Pricing documentation.

Based on the group structure, a Master File and/or Country File have to be prepared.

Italian-based groups and Italian sub-groups owning non-Italian subsidiaries must produce both a Master File and a Country File. Italian subsidiaries of multinational groups need to produce a Country File only.

The sub-group provisions are onerous, especially so where they relate to branches. Where a foreign entity has an Italian branch but the company itself is also a holding company, a Master File is required for the foreign entity’s subgroup, even if there is no holding directly attributed to the branch.

Sub-holding companies based in Italy with at least one non-Italian subsidiary, which need to produce a Master File, may instead produce the Master File for the entire group in English. If it does not contain all the information in the Italian Regulation, they will need to supplement it.

Documentation must be signed by the legal representative of the company and provided to the authority upon request within ten days. Also, an electronic copy must be provided at authority request.

Small and medium companies (defined as those with an annual turnover of less than EUR 50 million) need to update the economic analysis only every three years, provided that no significant change in the business occurred. Otherwise, it is necessary to update the economic analysis each year.

The transfer pricing adjustments arising on tax audits are also relevant for IRAP for companies’ financial years commencing on or after 1 January 2008. Moreover penalties will not be levied in relation to the additional IRAP applicable to transfer pricing adjustments assessed by the tax authorities for the fiscal years from 2008 to 2012, unless the assessment has become final before 1 January 2014.

Relief from penalties is granted on the additional IRAP applicable to transfer pricing adjustments to taxpayers who have prepared transfer pricing documentation in line with Italian regulation.

International ruling procedures are available, to agree transfer pricing methodology with the tax authorities.
The agreement executed between the tax authorities and the taxpayer is binding for the fiscal year during which the agreement is executed and for the following two fiscal years, unless significant changes in the circumstances relevant for the conclusion of the agreement executed by the taxpayer take place.

**Thin capitalisation**

Italy no longer has thin capitalisation rules per se. Instead, net interest expense is deductible only up to an amount equal to 30% of gross operating margin (see Interest expense in the Deductions section for more information).

**Controlled foreign companies (CFCs)**

An Italian company that controls, either directly or indirectly, an entity located in a tax haven jurisdiction is required to consolidate the taxable income arising in proportion to the percentage of shareholding held, irrespective of whether the profits have been distributed or not.

Income from CFCs is taxed separately from the other taxable income of the business at the standard IRES rate (i.e. other tax losses cannot be used to offset CFC income). Foreign taxes paid by the CFCs are recoverable by way of a corresponding tax credit.

Dividends received by an Italian shareholder from a CFC are excluded from taxable income up to the amount of the taxable income attributed under the above CFC provisions. The excess of any dividends over income already included through the CFC regime is fully taxable in the hands of the shareholder.

Where companies are located in a tax haven, the CFC rules also apply for companies holding not less than the 20% of the company’s share capital or entitled to not less than 20% share of the company’s profits. In such instances, there are specific rules to determine the taxable income attributable to the Italian resident shareholder. The taxable income is determined by applying specific income ratios to the business assets of the CFC as they appear in the relevant accounts.

Exemption from these CFC rules can be achieved by means of an advance ruling from the Italian tax authorities. To obtain such a ruling, adequate evidence must be provided to demonstrate at least one of the following:

- The foreign company is mainly and effectively engaged in sales and/or industrial activities in the ‘market’ of the foreign host state or territory. Banks, other financial entities, and insurance companies must demonstrate that most of the financial resources and related proceeds are made in or the result of yields, respectively, from the market of the foreign host state or territory. However, this exemption cannot be requested where more than 50% of the income of the foreign subsidiaries is derived from ‘passive income’ (e.g. holding or investment in securities, receivables, or other financial assets, transfer or licence of intangible rights) or from intra-group services.
- No less than 75% of all the proceeds of the CFC have been taxed in jurisdictions that are not tax privileged countries (e.g. a company resident in Hong Kong has all of its operations in China mainland and it is subject to ordinary taxation there).

The CFC rules also extend to controlled companies that are located in a jurisdiction with a privileged tax regime that is not a tax haven, if the following conditions exist:

- The effective tax is less than 50% of the tax that would have been charged had the company been resident in Italy.
- More than 50% of revenue is derived from so-called ‘passive income’ or from intra-group services.

By means of an advance ruling, the Italian parent company is able to obtain an exemption from these rules if it is able to provide proper evidence that the establishment
of the company in the privileged tax jurisdiction is not for tax avoidance purposes (unfair tax advantage).

---

**Tax credits and incentives**

**Foreign tax credit**
Where foreign-source income definitively is taxed abroad, a tax credit can be claimed for use against a company's IRES liability. The amount of the tax credit that can be claimed is the lower of the foreign tax incurred and the proportion of the IRES liability related to the foreign-source income. For partially exempt income (e.g. dividends), the foreign tax credit is reduced in proportion to the amount of the income taxable in Italy.

If an Italian company receives foreign income from more than one country, this limitation is applied separately to each country.

Foreign taxes borne by the foreign PE of an Italian resident company are allowed to be offset against the overall consolidated tax liability (IRES).

Any excess of foreign tax credit over the maximum amount allowed for recovery in the same tax period can be carried back or carried forward for eight years and recovered if specific conditions are met (e.g. same source country of the income, occurring because of an excess of the IRES liability related to the foreign-source income).

**Inward investment, capital investment, and research and development (R&D) investment incentives**
A number of incentives have been established to attract new industry to southern Italy and certain depressed mountain areas in central and northern Italy.

The possibility of taking advantage of these rules, however, depends on the taxpayer fulfilling specific conditions and on the actual availability of financial resources by the Italian state. These financial resources generally are set in the annual state budget.

In particular, from FY 2015 through FY 2019, Italian companies that carry out qualifying R&D activities can benefit from a tax credit computed as a percentage of the R&D expenditures in excess of the company's average R&D expenditures in FY 2012, FY 2013, and FY 2014.

The credit percentage is 25% for depreciation of laboratory equipment and for technical expertise related to industrial or biotech IP. The percentage increases to 50% for costs related to ‘highly qualified’ personnel and R&D activities outsourced to universities or other similar research institutions.

The tax credit cannot exceed EUR 5 million per year per taxpayer, and requires qualifying R&D costs of at least EUR 30,000 per year.

**Patent box regime**
Italian resident companies and PEs of non-resident entities that carry out R&D activity, either directly or by outsourcing it to universities or other research institutes or equivalent institutes, may elect to apply the Italian patent box regime. The regime exempts a portion of the income derived from the exploitation, either direct or by licensing, of ‘qualifying intangible assets’.

The general exemption is 50%, but is limited to 30% for 2015 and 40% for 2016.

The regime can be applicable to PEs only if the non-resident entity resides in a country with which Italy has concluded a tax treaty and that allows adequate exchange of information.
The election is effective for five years and cannot be revoked during that period. Qualifying intangible assets include patents; know-how, such as industrial, commercial, or scientific information, formulas, and processes that are eligible for legal protection; and trademarks.

Taxpayers must request a specific ruling from the Italian tax authorities to benefit from the regime when the qualifying intangible is either used directly by the company or licensed to a related party.

Specific guidance is expected to be issued.

**Withholding taxes**

A 26% base standard withholding tax (WHT) rate is applicable on the yields on loans and securities (bonds, shares, etc.) paid by Italian resident entities to both Italian and non-Italian resident investors. Up to 30 June 2014, the standard rate was 20%.

The said standard WHT rate, however, does not affect the applicability of those rules allowing either the application of reduced WHT rates or the full exemption from the said withholdings (e.g. double tax treaties [DTTs], EU directives, special domestic tax rules).

Interest on government bonds is subject to a 12.5% domestic WHT.

**WHT chart**

Domestic corporations paying certain types of income are required to withhold as shown on the following chart. The numbers in parentheses refer to the notes below.

**Notes**

1. The actual applicable rate depends on the nature of the recipient. Applicable rates are as follows: 0% applies on loan agreements and ordinary notes when the recipient is a corporation; 26% rate in all other cases.
2. 0% is applicable on dividends received by ‘qualified’ shareholders (i.e. holding more than 20% of voting rights or 25% of the share capital, 2% or 5% in case of listed companies). The rate applicable to ‘non-qualified investments’ is 26%.
3. The rate is applicable on 75% of the gross amount of the royalty paid.
4. Pursuant to the EU Directives and provided that the requirements set forth therein are met, payments of dividends, interest, and royalties made by an Italian company to an EU resident group company can be WHT exempt. Specifically for the dividends, the minimum shareholding requirement (to benefit from this exemption) is currently equal to 10%; for interest and royalties, it is 25% of voting rights; a one-year minimum holding period applies for both.
5. Should the full WHT exemption not apply, 1.375% is applicable on dividends paid to EU tax resident corporations.
6. Pursuant to the 2004 Swiss EU tax agreement and provided that the requirements contained therein are met, payments of dividends, interest, and royalties made by an Italian company to a Swiss tax resident group company can be WHT exempt.
7. Non-resident persons have the right to obtain reimbursement for up to 11/26 of the withholding effected, upon proof of the actual taxation of the dividends in the foreign country where the recipient is a resident.
8. Provided that all conditions are met, domestic tax legislation is applicable if more favourable for the taxpayer. In a number of circumstances, tax treaties may provide for particular tax rates mainly dependent on the nature of the instruments and on the profile of the recipients/payers. In such cases, the applicable WHT must be verified from an analysis of the relevant tax treaty.
9. The treaty with the former USSR remains applicable with respect to Kyrgyzstan, Tajikistan, and Turkmenistan.
Italy

**Tax administration**

**Taxable period**
The ordinary taxable period is equal to 12 months. Conformity with the calendar year is not requested. In particular cases, the duration of the taxable period can be different from 12 months (e.g. newly established companies may be allowed to have taxable periods of up to 18 months; companies that are involved in extraordinary transactions [merger, de-mergers, etc.], as well as companies that are liquidated, may have taxable periods shorter than 12 months).

**Tax returns**
IRES and IRAP returns must be filed by the end of the ninth month following the tax year-end.

The ordinary filing deadline for WHT agent returns is 31 July for both the simplified WHT return and the ordinary WHT return.

**Payment of taxes**
For IRES and IRAP purposes, the tax law provides for both advance payments and settlement payments. As a general rule, the advance payments are equal to the net tax liability for the previous tax period and are due during the tax period to which they refer. The advance payments due for FY 2015 are equal to 100%.

Advance payments are split into two instalments:

- 40% by the 16th day of the sixth month following the tax year-end.
- 60% by the end of the 11th month following the tax year-end.

Settlement payments are due by the 16th day of the sixth month following the tax year-end to which they refer.

Tax payments should be performed through a specific form to be electronically filed to the tax authorities (i.e. F24 form).

**Offsetting of taxes**
Payables and receivables (not claimed for refund) resulting from a return regarding different taxes are allowed for off-setting within a yearly limit of EUR 700,000.

Furthermore, in order to offset tax credits exceeding EUR 15,000, a so-called ‘conformity mark’ affixed by a qualified professional on the related return is required.

No offsetting is allowed in case of unpaid taxes resulting from an official payment notice and exceeding EUR 1,500.

**Administrative penalties**
Failure to file a tax return results in a penalty ranging from 120% to 240% of the taxes due. Minimum penalties (ranging from EUR 258 to EUR 1,032) are applicable if no tax liability emerged in the return.

A tax return showing either a taxable income lower than the one assessed or a tax credit higher than those owed to the taxpayer (i.e. an untrue tax return) results in a penalty ranging from 100% to 200% of the higher taxes ultimately due.

Omitted and/or late payments of taxes of whichever kind and nature result in a penalty equal to 30% of the unpaid/late paid tax.

Special rules apply where similar violations are repeated over various years.
Self-disclosure of tax law breaches are allowed on payment of the higher taxes and of reduced administrative penalties. The reduced penalties are always computed on the floor of the applicable range of penalties. The starting of an audit does not prevent the possibility to amend tax returns or to carry out late tax payments.

The actual reduction of penalties depends on the time elapsed between the occurrence of the breach and the self-disclosure itself (i.e. different interim thresholds apply). The penalty is reduced from 1/15 (lower floor), if the correction is done within 14 days (for an omitted/lower tax payment only), up to 1/5 (upper floor), if the correction is carried out during a tax authorities audit or after the issue of a tax audit report (i.e. processo verbale di constatazione).

In any case, the possibility to apply the self-disclosure is prevented after the issuance of final notice of tax assessment (i.e. avviso di accertamento) or tax redetermination (i.e. avviso di irregolarità).

**Software based tax controls (so-called ‘Studi di settore’)**
The Italian Tax law provides for special tax control procedures for those enterprises whose total turnover does not exceed EUR 7.5 million. The controls, so-called ‘Studi di Settore’, are based on standardised economic models of the different business fields and are aimed at assessing whether or not a specific subject’s taxable income is in line with its own standard model (on statistical basis).

A higher possibility of undergoing tax audit should be considered for entities not meeting the expected profitability and/or turnover resulting from these automated controls.

**Tax audit process**
For larger companies having a yearly turnover exceeding specific thresholds (that are in the process of being progressively decreased to EUR 100 million), administrative checks on tax returns may be carried out within the year following that in which the tax return has been filed.

Tax audit can take place at the taxpayer’s premises as well as in the tax authorities’ offices. The statute of limitations provides that tax auditors can stay at a taxpayer’s premises for not longer than 60 working days (30 days ordinary term plus 30 days of extension). At the end of this period, the audit must come to an end unless extraordinary issues arise. Tax auditors must take note of the observations and requests made by the taxpayer. At the end of their audit, the tax auditors must draw up a tax audit report whereby the outcome of the audit activity must be detailed and the findings (if any) must be illustrated and motivated. A copy of the report has to be filed with the tax office.

The tax office receiving the tax audit report examines the findings reported by the tax auditors and starts the assessment procedure, which may lead to the issuing of a tax assessment notice bearing the request for payment of higher taxes and/or penalties.

**Tax controversy and dispute resolutions**
Should the taxpayer accept all of the challenges raised by the tax authorities, it may take advantage of the application of reduced penalties. The reduced penalties may range from 1/6 to 1/3 of the minimum applicable penalties, depending on the status of the controversy.

In case the taxpayer decides not to accept the challenges by the tax authorities, a settlement procedure can be initiated. The favourable outcome of the settlement procedure brings forth (in addition to the agreed-upon reduction of challenged taxes) the reduction of penalties: ordinarily down to 1/3 of the minimum applicable penalties.
In case no settlement is either achieved or requested for, the taxpayer may start a tax dispute before the Court. The judicial proceedings are structured in three tiers:

- Provincial Tax Commission, in first instance.
- Regional Tax Commission, in second instance.
- Supreme Court of Cassation.

**Statute of limitations**

The Italian tax authorities are entitled to make an assessment in relation to direct taxes (IRES and IRAP), VAT, and WHT returns up to the end of the fourth calendar year following the year in which the tax return was filed. Under certain circumstances (e.g. no return filed or fraud giving rise to criminal law penalties), the above deadlines may be extended.

**Topics of focus for tax authorities**

Extraordinary transactions (such as mergers, de-mergers, etc.) continue to be a topic of focus for tax authorities due to the potential applicability of tax anti-abuse rules.

As a response to recent cases of carousel-frauds on VAT, cross-border transactions are being more heavily scrutinised.

Over the last few years, we experienced an increasing focus by the tax authorities on transfer pricing and PE related issues.

The beneficial ownership condition is very carefully scrutinised in case of payments where a nil or reduced WHT is applied based on EU Directive or applicable DTT, in particular when the ultimate owner of the group is non-EU.

**Other issues**

**Adoption of IFRS and taxation**

Italian tax law provides for two basic principles and some specific rules for taxation of a company adopting International Accounting Standards (IAS)/IFRS in the statutory financial statements:

- Derivation principle (‘Principio della Derivazione’): the taxable base of companies is determined starting from the net income arising from the profit and loss, increased or decreased by items directly booked to equity pursuant to the application of IAS/IFRS. To such income, the general tax adjustments set forth by the Corporate Income Tax Law apply. In this respect, as exception to the general tax criteria, the accrual principle, and the qualification and classification criteria stated by the IFRS are relevant for the calculation of the taxable base.

- Neutrality principle (‘Principio della Neutralità’): such principle aims to neutralise the effects deriving from the movement to IAS/IFRS (First Time Adoption or FTA). Conversely, such principle does not grant an equal treatment for companies adopting or not IAS/IFRS (in fact, specific rules are applicable only to IAS/IFRS adopters, e.g. taxation of dividend on held for trading securities, derivatives).

The following specific rules applicable to IAS adopters must be considered:

- Adjustments or recognitions of transactions made in equity and/or in the ‘other comprehensive income (OCI)’ are relevant for tax purposes, to the extent that such items are in compliance with general tax principles.

- For equity instruments, the legal classification is prevailing over the accounting one (debt vs. equity classification).
• Under certain conditions, unrealised profits and losses recognised in the profit and loss become taxable and deductible (e.g. fair value on securities other than shareholdings and on derivatives transactions).
• The tax treatment of transactions between IFRS adopters and non-IFRS adopters is based on the accounting principle adopted by each company (e.g. financial leasing transaction).
• Depreciation and amortisation are permitted within the rates provided by the tax rules and limited to the amount booked in the profit and loss statement. In this respect, the abolition of the imperative systematic depreciation of the goodwill and its substitution by the goodwill’s review for impairment does not affect the tax deduction of the goodwill amortisation that should be made solely for tax purposes.
• Negative components booked in the income statement as expenses for personnel settled with equity instrument under IFRS 2 are, in principle, deductible for IRES purposes (stock options).
• In order to identify financial instruments with hedging purposes, IFRS adopters are allowed to give relevance to the classification made in the financial statement. In particular, financial instruments designated in the financial statement as hedging instruments in compliance with IFRS principles are considered also as hedging instruments for fiscal purposes (hedging accounting approach including the fair value option [FVO]).
• Given the possibility, under the IAS 39 accounting principle, to reclassify financial securities in a different portfolio from that of the initial booking, the value at which the security is booked in the new portfolio is tax relevant.

**United States (US) Foreign Account Tax Compliance Act (FATCA)**

As of 10 January 2014, Italy and the United States signed a bilateral intergovernmental agreement (IGA) in order to implement FATCA.

FATCA, a US legislation entered into force as of 1 July 2014, obligates Italian financial institutions to identify and classify account holders in order to report certain financial information (e.g. name, address, TIN, account balance) related to US persons to the Internal Revenue Agency (Agenzia delle Entrate). The Italian tax authority will then exchange such information with the US Internal Revenue Service (IRS) by the end of September of each year (starting on 2015).

The IGA requires the approval of the Italian Parliament in order to be incorporated into domestic law and thus be effective. To date, the Italian IGA ratification law has only been approved by the Chamber of Deputies. After the ratification, the Internal Revenue Agency will release the FATCA implementing regulations and the Reporting Guidance in order to address implementation and reporting issues.

As of 9 December 2014, the European Council officially adopted the revised Directive on Administrative Co-operation and Mutual Assistance (DAC2), which has been amended in order to take into account the provisions of the Common Reporting Standard (CRS) developed by the OECD that, in general, will require financial institutions to identify and report non-resident (not only US) account holders. Italy is expected to incorporate the above-mentioned Directive into domestic law by 31 December 2015.
Significant developments

The year 2015 has introduced the use of electronic methods for a number of formalities in the Ivorian tax and legal and system.

Companies under a real taxation scheme (which includes large-size companies) are required to provide their tax returns electronically. They can also perform payment of due taxes either electronically or via bank transfers.

Companies under the real normal taxation schemes are required to provide the financial statements to be provided with their corporate income tax (CIT) returns both physically and electronically.

The tax administration is entitled to release its notice of assessment electronically.

With respect to tax, social, and commercial identification numbers, an important measure has been taken by presidential order, which consists of the creation of a single taxpayer number.

Note that enforcement actions pertaining to the above mentioned measures were not released at the time of this update.

Taxes on corporate income

Tax on industrial and commercial profits in Côte d’Ivoire is levied at 25%, subject to a minimum tax. The rate is 30% for companies in the telecommunication, information technology, and communication sectors.

Taxable corporate income in Côte d’Ivoire is based on worldwide income for resident companies (for exceptions, see Foreign income in the Income determination section). Non-resident entities are subject to withholding tax (WHT) at 20%, subject to existing double taxation agreements (DTAs), on their Côte d’Ivoire source income when they do not have a permanent establishment (PE). Non-residents with a PE are taxed in the same way as a resident.

Minimum tax

The minimum tax is based on total turnover and is calculated at the rate of 0.5% (0.15% for banking activities, 0.1% for oil companies), with a minimum tax of 3 million Communauté financière d’Afrique (Financial Community of Africa or CFA) francs (XOF) and a maximum tax of XOF 35 million.

Local income taxes

The income tax is levied at the national level. There is no local income tax.
Corporate residence

In Côte d’Ivoire, companies are considered resident in tax jurisdictions where they have a registered fixed establishment (e.g. subsidiaries, branches, representative offices).

Permanent establishment (PE)

A non-resident is considered as having a PE in Côte d’Ivoire when its activities involve a comprehensive commercial cycle in Côte d’Ivoire or when it operates through a dependent agent in Côte d’Ivoire.

According to DTAs, a non-resident is considered as having a PE in Côte d’Ivoire when it has a registered establishment, including a subsidiary, a branch, a representative office, a mine or an oil well, a building site, a manufacture plant, or a trading establishment. Sometimes, a time threshold of six months is considered.

Other taxes

Value-added tax (VAT)

VAT is a non-cumulative tax levied on the sale of goods and services at the rate of 18%. Subject to certain restrictions, VAT is recoverable.

The rate is reduced to 9% for milk, pasta products that contain 100% durum wheat semolina, and equipment designed for the production of solar energy.

Customs duties

Customs duties rates range from 0% to 35%, depending on the classification of the imported goods according to the customs tariff.

Upon import, goods are also subject to the statistical duty (1%), to community levy (0.5%), and to VAT (18%).

Special taxes, depending on the nature of the imported goods, may apply, such as excise duties.

Statistical duty

The statistical duty is levied together with the customs duties during the customs clearance procedures of imported goods.

The rate of the statistical duty is 1% on the cost, insurance, and freight (CIF) value of the imported goods.

Community levy

The community levy is due together with the customs duties during the customs clearance procedures of imported goods.

The rate of the Economic Community of West African States (ECOWAS) community levy is 0.5% on the CIF value of the imported goods.

Products imported from outside the West African Economic and Monetary Union (WAEMU) remain subject to the community levy at 1% for five years from January 2015.

The community levy does not apply to goods imported from member countries of the WAEMU, which includes Côte d’Ivoire, Senegal, Burkina Faso, Mali, Benin, Togo, Niger, and Bissau Guinea.
Ivory Coast (Côte d’Ivoire)

**Excise duties**
Excise duties apply on cigarette imports, alcoholic or non-alcoholic beverages, and oil products.

**Real estate tax**
A real estate tax is imposed at the following rates:

- 1.5% for undeveloped lands.
- 4% on land revenue.
- 11% on developed land or 15% when the built property is used by the company itself. The rate is reduced to 4% for unoccupied buildings.

Property owners are required to withhold 15% of rentals, payable on the 15th day of each month to the tax authorities. This is an advance payment on the annual real estate tax by the owner of the estate property.

**Transfer taxes**
In the case of the transfer of property through a direct sale, taxes are assessed at the following rates:

- 10% for lease transfers.
- 4% for the sale of real estate.
- 10% for the sale of businesses.

For mortgages, the rate is 5% for the financial lessor at the acquisition of the good and 1% for acquisition of the immovable property by the lessee from the excise of the option.

**Stamp duty**
A direct tax is paid for any document subject to a registration procedure, for an acknowledgment of a cash payment, and for bills of exchange.

**Special tax for equipment**
A special tax is paid by all taxpayers for the purpose of the equipment of the government. The tax is calculated on 0.1% of total turnover and is paid monthly.

**Business franchise tax**
The business franchise tax includes a turnover tax and a proportional tax. The turnover tax is calculated on turnover at the rate of 0.5%, with a minimum tax of XOF 300,000 and a maximum tax of XOF 3 million. The proportional tax rate is 18.5% and is based on the rental value of the professional office location (based on general office rents).

**Tax on banking operations**
A cumulative tax of 10% is levied on bank services rendered. Tax on banking operations charged by banks to companies is fully deductible from output VAT.

**Registration taxes**
Registration of capital contributions is taxed, whether the capital or increase in capital is made in cash or in kind. The rate is 0.3% for contributions exceeding XOF 10 million to XOF 5 billion and 0.1% for contributions over XOF 5 billion, with a minimum tax of XOF 18,000. Increases in capital by incorporation of reserves are taxed at 6%.

In the event of a capital increase through a merger, the increase in the share capital of the acquiring company is taxed at half the rates above.

**Tax on insurance premiums**
Insurance premiums are subject to tax as follows:
Policy type | Tax rate (%)  
---|---
Marine policies | 7.0  
Life policies | Exempted when contract’s duration is more than three years  
Fire policies | 25.0  
Health policies | 8.0  
Export credit insurance | 0.1  
Other (e.g. personal liability, transportation) | 14.5

Premiums paid under commercial shipping insurance policies for maritime risks are exempt. The tax may be paid by the insurance company, its agent, or the subscriber, in cases where the subscriber had to pay the premium to a foreign insurance company.

**Tax on telecommunication services**
A specific tax of 5% is applicable on the turnover of mobile telecommunication, information technology, and communication of companies. Companies operating in the telecommunications, information technology, and communications sector should invest 20% of the amount of dividends transferred abroad in bonds of the public Treasury.

Companies operating locations of passive infrastructures and telecom towers are not within the scope of the tax.

**Payroll taxes**
Taxes are levied at the rates of 2.8% for local employees and 12% for expatriate employees on the total taxable remuneration, including salaries, benefits, and benefits in kind.

**Social security contributions**
Employers must contribute to the social security system (CNPS) at the following rates:

<table>
<thead>
<tr>
<th>Contribution</th>
<th>Contribution rate (%)</th>
<th>Monthly ceiling (XOF)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Family allowance</td>
<td>5.75</td>
<td>70,000</td>
</tr>
<tr>
<td>Work injury</td>
<td>2.0 to 5.0</td>
<td>70,000</td>
</tr>
<tr>
<td>Retirement pension</td>
<td>7.7</td>
<td>1,647,315</td>
</tr>
</tbody>
</table>

**Branch income**
The tax rate for branch income is the same as that for corporate income. After-tax branch earnings are subject to a 15% tax (Impôt sur le revenu des valeurs mobilières or IRVM) calculated on 50% of the taxable profit. This is analogous to the WHT on dividends.

**Income determination**

**Inventory valuation**
Inventory is generally stated at the lower of cost or market value. Last in first out (LIFO) and first in first out (FIFO) methods are permitted. Book and tax conformity is required.

**Capital gains**
Capital gains are normally taxed at full corporate rates. However, the tax on capital gains, exclusive of recaptured depreciation, can be deferred if the gain is reinvested within three years.
Ivory Coast (Côte d’Ivoire)

**Dividend income**
Dividends are brought into taxable income at 50% of the net amount earned by the company (after 15% WHT).

The exemption is increased to 95% for dividends received from a subsidiary if a parent company domiciled in Côte d’Ivoire owns 10% of the subsidiary.

**Stock dividends**
Stock dividends are unusual, but in the event they are declared, they are not taxable to the recipient.

**Interest income**
Interest from loans is brought into taxable income at 50% of the net amount earned by the company after 18% WHT.

**Foreign income**
Resident corporations are taxed on their worldwide income, except for profits derived from business conducted through a PE outside Côte d’Ivoire. Since income derived from business conducted outside Côte d’Ivoire is not taxable, no tax credit is allowed. Interest and dividends from foreign sources are entitled to certain deductions to alleviate instances of double taxation. Subject to provisions of tax treaties, no deductions or tax credits are allowed for revenue from royalties and services.

**Deductions**

### Depreciation and depletion
Depreciation is generally computed on a straight-line basis over the useful life of the asset (e.g. 20 years for buildings, three years for automobiles). Accelerated depreciation is sometimes permitted for machinery. The following depreciation rates are generally accepted for tax purposes:

<table>
<thead>
<tr>
<th>Assets</th>
<th>Depreciation rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Buildings</td>
<td>5</td>
</tr>
<tr>
<td>Machinery, equipment (rate depending on equipment)</td>
<td>8/10/20</td>
</tr>
<tr>
<td>Office furniture</td>
<td>10</td>
</tr>
<tr>
<td>Office equipment</td>
<td>20</td>
</tr>
<tr>
<td>Vehicles</td>
<td>33.3</td>
</tr>
<tr>
<td>Computing equipment</td>
<td>20 to 50</td>
</tr>
</tbody>
</table>

A time coefficient is applied to the rate of depreciation to obtain the declining balance. Depreciation rates may be amended, but only after agreement with the tax authorities.

New plants and equipment may be depreciated at twice the normal rate in the first year of use, provided they are depreciated over at least six years. Under certain circumstances, buildings used for staff housing may be depreciated at 40% of cost in the first year. Annual depreciation must be booked to preserve tax deductibility. The whole or any part of the annual charge can then be deferred in annual accounts for fiscal years showing a tax loss. Recaptured depreciation is taxed at full rates. Tax and book conformity is obligatory.

Depletion allowances, as such, do not exist, but tax incentives are available for exploration to replace depleted natural reserves.

**Goodwill**
Goodwill (capital gain) deriving from the transfer of assets is included in taxable profit. The gain may be exempt from the income tax basis if the taxpayer commits to reinvest.
the purchase price of the transferred assets plus the goodwill in the three following years.

If the reinvestment is not completed in the three years, the gain will be subject to income taxation.

_Start-up expenses_
Start-up expenses (e.g. legal fees, registration duties on share capital subscription, the costs of any registration procedure, advertisement expenses) have to be amortised over a period from two to five years.

_Interest expenses_
Interest paid to shareholders may be deducted. The maximum interest rate allowed is related to the Banque Central des Etats de l’Afrique de l’Ouest (BCEAO) rate plus three points. The reimbursement of the loan must take place in the five years following the loan.

_Bad debt_
Provisions for bad debts are deductible, provided that a minimum set of collection procedures have been engaged.

Bad debts are deductible for income tax purposes unless the debt results from abnormal business decisions.

_Charitable contributions_
Charitable contributions to recognised sport and health associations are deductible.

Charitable contributions to individuals or non-recognised beneficiaries are not tax deductible.

_Fines and penalties_
Fines borne by corporations are not tax deductible.

_Taxes_
Regular taxes paid by corporations are deductible for income tax purposes.

Third party taxes (such as WHT on non-resident service providers) borne by corporations are not tax deductible.

_Other significant items_
In respect to legal reserves, 10% of net profit must be transferred to a reserve for legal fees until the reserve equals 5% of the paid-up share capital.

To be tax deductible, provisions must relate to existing liability or loss. General reserves are not deductible.

_Net operating losses_
Losses may be carried forward for five years.

Losses derived from depreciation can be carried forward indefinitely.

Losses cannot be carried back.

_Payments to foreign affiliates_
Reasonable royalties, interest, and management and service fees paid to foreign parent companies are tax deductible. However, the deductions should not exceed 5% of the turnover and 20% of the overhead. Otherwise, the portion exceeding the ceiling is not
Ivory Coast (Côte d’Ivoire)

tax deductible. The onus is on the taxpayer to prove that expenses are justified and reflect real transactions.

**Group taxation**

Group taxation is not permitted in Côte d’Ivoire.

**Transfer pricing**

Profits directly or indirectly transferred to related non-resident companies are disallowed from the income tax basis.

The tax administration may inquire on transfer pricing when local subsidiaries having most of their transactions with non-resident group companies record losses.

Transfer price documentation is not generally requested.

**Thin capitalisation**

The deduction of the interest of loans granted on top of the share capital by related parties is subject to restrictions (see Interest expenses in the Deductions section).

When, because of losses, the equity of the company is less than 50% of the share capital, the company must be recapitalised in the two following years, unless the company is dissolved.

**Controlled foreign companies (CFCs)**

There are no CFC rules in Côte d’Ivoire.

**Tax credits and incentives**

**Foreign tax credit**

Since income derived from business conducted outside Côte d’Ivoire is not taxable, no tax credit is allowed.

**Investment zones**

The aim of the Investment Code is to:

- help create companies in other regions than the economic capital city (Abidjan)
- help the employment of nationals
- help companies doing business in a sustainable manner
- develop the regions of the country, and
- favour the existence of local small and medium-sized enterprises (SME).

The Investment Code regimes involve the creation of three zones (A, B, and C), depending on the location of the company:

- Zone A covers Abidjan District.
- Zone B covers any town in Côte d’Ivoire with more than 60,000 inhabitants.
- Zone C covers any town in Côte d’Ivoire with less than 60,000 inhabitants.

The duration for the granted tax benefit is:

- 5 years for Zone A.
- 8 years for Zone B.
- 15 years for Zone C.
The Investment Code includes two specific tax incentive regimes: the Investment Declaration Regime and the Investment Approval Regime. Both regimes apply to all economic activities, excluding finance and banking, non-industrial buildings builders, and commerce activities.

For the Investment Approval Regime, the minimum investment cost is XOF 200 million (VAT and working capital exclusive).

The benefit from the Investment Code is granted by the Centre for the Promotion of Investments (named CEPICI), after an application is filed by the requestor.

During the investment period, the beneficiary enjoys the following:

- Reduction of 50% of the customs duties on the equipment and materials included on the filed list together with the first spare parts, when the investment is less than XOF 1 billion.
- Reduction of 40% of the customs duties of the equipment and materials included on the filed list together with the first spare parts, when the investment is more than XOF 1 billion.
- Exemption from VAT on purchase of equipment, material, and first spare parts.

After the completion of the investment, the beneficiary enjoys the following exemptions during a period that depends on the Zone the company is located in:

- Exemption from CIT.
- Exemption from business franchise tax.
- Exemption from real estate tax (only for Zone C in the Investment Declaration Regime).
- Exemption from registration taxes on share increases (only for Zone C in the Investment Declaration Regime).
- Reduction of the payroll taxes due on employee’s wages. The reduction is 80% for Zone B and 90% for Zone C in the Investment Declaration Regime and 50% for Zone A, 80% for Zone B, and 90% for Zone C in the Investment Approval Regime.

These incentives may not be combined with sector-specific investment programs, such as those for mining and hydrocarbons.

**Capital investment incentives**

With prior approval of the tax authorities and varying with geographical location, 35% to 40% of the total investment in fixed assets related to commercial, industrial, or agricultural activity may be deducted from taxable income. The deduction is limited to 50% of taxable profits. The balance of deduction of the first year may be carried forward over the three following years.

**Export incentives**

No VAT is levied on export sales.

**Export incentives for the mining industry**

During the exploration phase, investments may be exempt from payroll tax; VAT on goods and services; additional tax (on the sale of goods) on imports and purchases; all import taxes and duties, including VAT on materials, machines, and equipment used in research activities; registration duties applicable to in-kind or cash share-capital contributions; real estate tax; CIT; and minimum tax.

In the exploration phase, mining subcontractors can benefit from the same import VAT and customs exemptions granted to mining title holders.
During the production phase, mining activities may have a five-year exemption from CIT and relief from all import duties, including VAT on recovered investments required for exploitation, special equipment tax, business franchise tax, etc. In addition, they may be granted temporary admission of machines and equipment that facilitate research and exploitation. Mining subcontractors are exempt from customs duties, including VAT on importing of liquid or gas fuels, lubricants, and chemical or organic products intended for the treatment of minerals, for the whole duration of the mine.

A tax on profit is levied as soon as investment funds are recovered. Mining enterprises may not combine these incentives with those of the Investment Code.

**Export incentives for petroleum service contractors**

A special and optional tax treatment applies to petroleum service contractors that meet established criteria. Corporate tax, distribution tax, payroll tax, income tax on salaries, and the tax on insurance premiums are calculated on the turnover of the contractor. The total taxes represent 5.786% of turnover. Standard rates apply for business franchise tax and social security contributions for local personnel. The exemption from customs duties and VAT for oil companies is extended to petroleum service contractors.

---

**Withholding taxes**

WHTs are levied as follows:

- **Impôt sur le revenu des valeurs mobilières (IRVM):** 15% on dividends and directors’ fees.
- **Impôt sur le revenu des créances (IRC):** 18% on interest payments, reduced to 13.5% (individuals) and 16.5% (businesses) on bank deposit interest. The revenue realised by individuals on Treasury Bonds is subject to 10% tax on terms of up to 12 months and to 5% tax when ranging from three years to five years. Foreign banks are subject to 18% tax on loan interest or 9% on equipment loans with minimum three-year terms.
- **Impôt sur les bénéfices non commerciaux (BNC):** 25% of 80% of revenues on royalties, licence fees, and management and service fees paid by Ivorian companies to foreign companies (effective rate: 20% of net amount paid). Treaties with Belgium, Canada, France, Germany, Italy, Norway, Switzerland, and the United Kingdom provide a maximum BNC rate of 10% on royalties and management fees. The tax treaty between the member states of the West African Economic and Monetary Union (UEMOA) provides a maximum BNC rate of 15% on royalties.
- **Interest on certificates of deposit (bons de caisse):** 25%.

**WHT on public contracts for services**

Any payment made by government bodies or public institutions to non-resident persons or companies for a contract for goods or services is subject to a 20% WHT, subject to DTAs (see Impôt sur les bénéfices non commerciaux above).

Resident persons or companies are not subject to this WHT, except for individual service (or goods) providers registered under the standard tax regime for small companies (see below).

**WHT on small-size businesses**

A 7.5% WHT is applicable on the remunerations paid to individual service providers registered under the standard tax regime for small companies.

A 10% WHT is applicable on payments made by government bodies or public institutions for a contract for services (or goods).
**WHT on writers’ revenue**  
A 7.5% WHT applies to occasional revenue paid to individuals or companies as royalties on books, scientific studies, and artistic productions.

**Tax administration**

**Taxable period**  
Companies are required by law to have a 31 December fiscal year-end.

**Tax returns**  
Financial statements are filed annually, according to local generally accepted accounting principles (GAAP). Taxpayers under the real taxation scheme (the normal real taxation scheme is for companies with a turnover above XOF 150 million, the simplified real taxation scheme is for companies with a turnover between XOF 50 million and XOF 150 million) are required to produce electronic and paper financial statements. The deadline for filing is 30 April for medium and large-size companies and 30 May for other entities.

Companies under the direction of large size companies are allowed to submit tax returns electronically and perform tax payments via wire transfer.

**Payment of tax**  
Payment of CIT is due on 20 April (⅓ of the due amount), 20 June (⅓ of the due amount), and 20 September (the last ⅓ of the due amount) following the end of the fiscal year.

**Tax audit process**  
Many types of tax audits are available to the tax administration, which may request any accounting-related document for the purpose of tax audit.

The most common is the general tax audit of the taxpayer’s situation, which covers the statute of limitation period. It is carried out with a notice at least five days before the beginning of the audit. The audit is carried out on the premises of the taxpayer for a maximum of six months (with a possibility to extend for a period of three additional months), and a primary tax assessment is issued.

The taxpayer then has 30 days to agree or challenge the assessment, and the definitive assessment is issued within a maximum of three months following the primary tax assessment.

Since fiscal year 2015, the tax administration is entitled to release tax assessments electronically.

Further challenge of the definitive assessment is possible before the head of the tax administration and the court.

**Statute of limitations**  
The statute of limitations covers the current year and the three prior years.

**Topics of focus for tax authorities**  
The tax administration generally focuses on compliance with the CIT filing deadline and on the payment of the instalments.

For consistency of the tax returns, the tax administration focuses on the filing of the additional records (Annual Financial Statements, Etat 301: Annual Salary Statement, Etat 302: Annual Fees Statement), records of the provisions, tax losses, and amortisations carried forward.
Ivory Coast (Côte d’Ivoire)

During tax audits, the focus is on transactions with non-resident related parties.
**Significant developments**

**Asset tax**
An *ad valorem* asset tax at the rate of 0.25% is imposed on the ‘taxable value’ of the assets of specified regulated entities (deposit-taking institutions regulated by the Bank of Jamaica, as well as securities dealers and property and casualty insurance companies regulated by the Financial Services Commission). This rate became applicable to the asset tax returns that were due for filing on 15 March 2015 and for each successive year. Previously, the rate of asset tax applicable to specified regulated entities was 0.14%.

As a temporary measure, in April 2014, the government imposed asset tax on life assurance companies at the rate of 1.00% (which was payable on 15 March 2015). The government of Jamaica announced recently that this rate will revert to 0.25% for subsequent years.

For other entities subject to asset tax, an annual fixed tax ranging from 5,000 Jamaican dollars (JMD) to JMD 200,000 (previously JMD 5,000 to JMD 100,000) is imposed, depending on the aggregate value of assets. The minimum tax (of JMD 5,000) is payable where the aggregate value of the company’s assets is less than JMD 50,000, and the maximum tax (of JMD 200,000) is payable where the aggregate value of the company’s assets is greater than or equal to JMD 50 million.

**Proposed changes to the taxation of life assurance companies**
Life assurance companies are liable to income tax at a rate of 3% on gross premiums derived from life assurance, pensions, and annuity business (subject to certain exclusions). Income tax at the rate of 15% is also imposed on investment income, which comprises all other taxable sources of income (net of expenses incurred in earning such income). The government of Jamaica recently announced a reform of the income tax regime applicable to the life assurance industry. With effect from the year of assessment 2015, it is proposed that the dual methods of taxation (premium tax and the tax on investment income) will be abolished and life assurance companies shall then be liable to corporate income tax (CIT) on their entire chargeable income at the rate of 25%. It is further proposed that there shall be a simultaneous reduction in the asset tax rate applicable to life assurance companies from 1% of the taxable value of assets to 0.25% (which is the current rate of asset tax imposed on other regulated companies).

**Proposed implementation of a withholding tax (WHT) on specified services**
The government is proposing to implement a WHT of 3% on payments in respect of ‘specified services’ purchased locally (above a *de minimis* amount of JMD 50,000 per invoice). It is proposed that the imposition of the requirement to withhold tax be implemented on a phased basis. This is intended to be a compliance measure, similar to other forms of WHT, and the tax withheld should be available for offset against the payee’s income tax liability on the filing of returns.
Proposal to broaden the base of the environmental levy

Environmental levy is imposed at the rate of 0.5% on the cost, insurance, and freight (CIF) value of most goods imported (with the exception of goods originating from other countries in the Caribbean Community). It is proposed that the levy be extended to (i) goods imported from other countries in the Caribbean Community and (ii) domestic sales of manufactured goods by local manufacturers, with an input tax credit available for any levy paid in respect of imported productive inputs.

Reform of the general consumption tax (GCT) regime

The GCT (Amendment) Act, 2014 has made a number of changes to the GCT regime in an effort to broaden the tax base and improve administration of the tax. A number of the more significant reforms to the Act include the following:

- Amendment to the filing date so that the monthly GCT Return should be filed by the last working day of the following month.
- Redefinition of exported services and the provision of a framework for implementing GCT on imported services.
- Modification to registration requirements, including strengthening the powers of the Commissioner General, Tax Administration Jamaica (TAJ) to ‘force-register’ a person as a registered taxpayer under the Act.
- Removal of zero-rated treatment of supplies to the government of Jamaica and a number of government entities as well as the introduction of a withholding mechanism to remit the GCT payable on these transactions.
- Provision of a mechanism for manufacturers of exempt goods to claim an input tax credit or refund (as appropriate) of GCT incurred on specified capital and operating productive inputs used in the manufacturing process.
- Amendment to the GCT deferral mechanism for manufacturing inputs by implementing a postponed accounting regime for GCT incurred on specified operating inputs and capital goods imported that qualify for exemption from customs duty under the productive inputs relief (PIR) regime.
- Granting an exemption from the 5% advance GCT upon importation to goods that qualify for exemption from customs duty under the PIR regime.
- Imposition of a moratorium for refund claims for prescribed periods and a reduction in the time-limit for claiming refunds.
- Modification to the basis for calculating GCT. The Act amends the rules that determine the value of a supply for GCT purposes and has also standardised the method for apportioning input tax credits where there is a combination of taxable and exempt supplies of goods and services.
- Amendments to the lists of zero-rated and GCT-exempt items and changes in rates applicable to other items.
- Overhaul of the penalties regime for GCT offences.

Additionally, a GCT group regime has recently been implemented, whereby two or more affiliated entities approved by the Commissioner General, TAJ may be treated as a single taxpayer for the purposes of the GCT Act. Approval will be granted only where the Commissioner is satisfied the treatment of two or more affiliated entities as a single taxpayer “is not likely to prejudice the collection of tax, result in a significant loss of revenue or facilitate the obtaining of a tax advantage”. Regulations supporting the implementation of GCT group accounting have not yet been established.

With effect from 1 April 2015, GCT has been imposed on supplies of electricity to residential customers that exceed 350 kWh per month.

Special consumption tax (SCT) on automotive fuels

SCT is imposed on the importation or manufacture of ‘prescribed goods’ (certain petroleum products, ethanol, alcoholic drinks, tobacco products, and motor vehicles).
SCT is imposed on automotive fuels (a subset of petroleum products) at ‘specific’ rates of JMD 15.41 to JMD 16.65 per litre, plus an *ad valorem* rate of 10% (inclusive of specific SCT). With effect from 18 March 2015, the rate of specific SCT on automotive fuels has been increased by JMD 7.00 per litre.

**Taxes on corporate income**

A resident corporation is taxable on its worldwide income. Non-resident companies are subject to tax on Jamaican-sourced income. Tax is imposed on certain sources of income, such as interest, dividends, royalties, and fees, by way of withholding at a rate of 33\(\frac{1}{3}\)% for non-resident corporations. Lower rates of withholding are possible, provided that the recipient is resident in a country that has concluded a double taxation treaty (DTT) with Jamaica.

The current rates of CIT are as follows:

<table>
<thead>
<tr>
<th>Classification</th>
<th>Definition</th>
<th>CIT rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Regulated company</td>
<td>A company that is regulated by the Bank of Jamaica (other than building societies), the Financial Services Commission (other than life assurance companies), the Office of Utilities Regulation, or the ministry with responsibility for finance.</td>
<td>33(\frac{1}{3})</td>
</tr>
<tr>
<td>Building societies</td>
<td>Entities similar to savings and loans associations.</td>
<td>30</td>
</tr>
<tr>
<td>Unregulated company</td>
<td>A company that is not a regulated company.</td>
<td>25</td>
</tr>
</tbody>
</table>

Life assurance companies are liable to income tax on premium income (gross) derived from life assurance, pensions, and annuity business, as well as on investment income, which comprises all other taxable sources of income (net of expenses incurred in earning the income). Gross premiums are taxed at the rate of 3% while investment income is taxed at the rate of 15%. Proposed changes to the taxation of life assurance companies have been outlined in the *Significant developments section*.

The income of certain organisations is specifically exempt from income tax. These include pension and superannuation funds and charitable organisations that are approved by the Commissioner General, TAJ.

**Local income taxes**

Income tax is imposed at the national level. Income tax is not separately imposed at the local level.

**Corporate residence**

A corporation, wherever incorporated, is resident in Jamaica if the central management and control of its business is exercised in Jamaica. Normally, this is the case if meetings of directors and shareholders are held in Jamaica and major policy decisions of the corporation are made in Jamaica.

**Permanent establishment (PE)**

The term PE is not defined by local law. In the case of a treaty jurisdiction, the relevant treaty will prescribe the meaning of the term. Where a company’s activities create a PE, this may require the company to be registered for tax purposes.
Other taxes

General consumption tax (GCT)
GCT is a value-added tax (VAT), and the standard rate is currently 16.5%. Higher or lower rates of GCT are applicable to certain goods and services; for example, the provision of telephone services (including phone cards) and handsets is subject to GCT at the rate of 25%, while the tax is imposed on hotels and other businesses in the tourism sector at an effective rate of approximately 10%. However, operators within the tourism industry who were granted approval under the Hotel (Incentives) Act or the Resort Cottages (Incentives) Act and who have not elected to forego the remaining benefits to which they are entitled under these repealed enactments (in return for the new incentive regime introduced) are liable to GCT at the standard rate.

GCT is also charged on imported services. Where services are imported from a supplier who is not resident in Jamaica, the recipient of those services is deemed to be liable to account for GCT on the services. The recipient may be able to claim a credit for GCT incurred on imported services in certain circumstances; in particular, there are specific conditions where such services are received from overseas connected parties.

An additional 5% advance GCT is levied on the commercial importation of goods subject to GCT (with the exception of certain categories of imports, such as goods that qualify for exemption from customs duty under the PIR regime).

The list of items exempt from GCT includes a range of basic food items, prescription drugs, medical supplies, construction, transportation, and financial services. Zero-rated goods and services include agricultural and fisheries inputs, exported goods and services, and purchases by diplomatic and international organisations and foreign governments.

A GCT group accounting mechanism has recently been implemented, whereby two or more affiliated entities approved by the Commissioner General, TAJ may be treated as a single taxpayer for the purposes of the GCT Act. Approval will be granted only where the Commissioner is satisfied the treatment of two or more affiliated entities as a single taxpayer “is not likely to prejudice the collection of tax, result in a significant loss of revenue or facilitate the obtaining of a tax advantage”. Regulations supporting the implementation of GCT group accounting have not yet been established.

Customs duties and related imposts
Customs duty is levied on the customs value of goods imported, which is determined in accordance with the World Trade Organization (WTO) rules on customs valuation. The rates are specified by a prescribed Customs Tariff, having regard (where appropriate) to the Common External Tariff agreed between Caribbean Community (CARICOM) member states.

In addition to normal customs duties, a customs administration fee (CAF) and an environmental levy are imposed on the value of imports. The CAF imposes a range of fees based on the nature of the service provided. The environmental levy is imposed at the rate of 0.5%. It is also proposed to be applied on the supply by local manufacturers of manufactured goods (please see the Significant developments section). Other import levies apply in certain instances including additional stamp duty (ASD) and a standards compliance fee.

Special consumption tax (SCT)
SCT is imposed at various rates on the importation or manufacture of ‘prescribed goods’ (certain petroleum products, ethanol, alcoholic drinks, tobacco, and motor vehicles).
**Property tax**
All land in Jamaica is valued for property tax purposes on the ‘site value’ or ‘unimproved value’. The property tax structure is applicable as follows:

<table>
<thead>
<tr>
<th>Unimproved property values (JMD)</th>
<th>Rate of tax</th>
</tr>
</thead>
<tbody>
<tr>
<td>Not exceeding 100,000</td>
<td>JMD 1,000</td>
</tr>
<tr>
<td>100,000 to 1 million</td>
<td></td>
</tr>
<tr>
<td>For the first 100,000</td>
<td>JMD 1,000</td>
</tr>
<tr>
<td>For every dollar thereafter</td>
<td>1.5%</td>
</tr>
<tr>
<td>Exceeding 1 million</td>
<td></td>
</tr>
<tr>
<td>For the first 100,000</td>
<td>JMD 1,000</td>
</tr>
<tr>
<td>For the next 900,000</td>
<td>1.5%</td>
</tr>
<tr>
<td>For every dollar thereafter</td>
<td>2.0%</td>
</tr>
</tbody>
</table>

**Transfer tax**
A transfer tax of 5% is applicable on the consideration payable (or market value in certain instances) on the transfer of land, buildings, securities, and shares (provided that a refund is available where the transfer tax charged exceeds 37.5% of the capital gain made). Transactions on the Jamaica Stock Exchange (JSE) are exempt from transfer tax, as are the transfer of registered corporate bonds, whether or not the company is listed on the JSE.

**Stamp duty**
There is stamp duty of 1% payable on the transfer/disposal of shares and 4% for real property sold/transferred. Transfers of shares on the JSE are exempt from stamp duty, as are the transfer of registered corporate bonds, whether or not the company is listed on the JSE. Stamp duty is also imposed at a nominal rate of JMD 100 on instruments effecting a refinancing of an existing mortgage. Where, however, the mortgage is increased, the normal *ad valorem* stamp duty rates shall apply to the amount by which the mortgage is increased.

**Minimum business tax (MBT)**
An MBT of JMD 60,000 per annum is levied on all corporate bodies incorporated under the Companies Act, the Building Societies Act, the Friendly Societies Act, or the Industrial & Provident Societies Act, as well as on individuals carrying on a trade, profession, or business whose chargeable income (less emoluments and an amount equivalent to the annual tax-free threshold) exceeds JMD 3 million per annum.

The MBT is payable in two tranches: JMD 30,000 on 15 June and 15 September of the year of assessment to which it relates. The MBT is creditable against the taxpayer’s income tax liability for the year of assessment.

In the case of an individual taxpayer, any MBT paid in excess of income tax liability for the year of assessment may be refunded or carried forward. Companies, however, are not entitled to a refund or carryforward of excess MBT.

**Asset tax**
An *ad valorem* asset tax at the rate of 0.25% (previously 0.14%) is imposed on the ‘taxable value’ of the assets of deposit-taking institutions regulated by the Bank of Jamaica, as well as securities dealers and property and casualty insurance companies regulated by the Financial Services Commission. Life assurance companies are subject to asset tax at the rate of 1%. The taxable value of assets is broadly determined as the value of assets on the balance sheet with adjustments for certain items specific to each type of institution.
Jamaica

For other entities, a fee ranging from JMD 5,000 to JMD 200,000 (previously JMD 5,000 to JMD 100,000) is imposed and is payable on or before 15 March annually, depending on the aggregate value of assets. The minimum fee is payable where the aggregate value of the assets is less than JMD 50,000, and the maximum fee is payable where the aggregate value of the assets is greater than or equal to JMD 50 million.

**Contractors levy**
Payments to contractors (including sub-contractors) in respect of construction, haulage, and tillage operations are liable to a withholding of a contractors levy of 2% of the gross amount paid. This must be remitted to TAJ within 14 days of the end of the month in which the payment is made. The levy paid is allowable as a credit against the income tax liability of the contractor in the year of assessment in which the levy is deducted. To the extent that there is any excess, it is not refundable.

**Guest accommodation room tax (GART)**
GART is levied at a specific rate on hotels and other tourist accommodation facilities based on room occupancy. GART is tiered depending on the number of rooms at the hotel or other tourism accommodation facility.

**Telephone call tax**
Tax is imposed on telephone calls, including inbound calls terminating on fixed or mobile networks. The following rates of tax are imposed:

- JMD 0.05 per minute on calls originating and terminating on the local fixed network.
- JMD 0.40 per minute on all other calls (whether domestic or international) originating in Jamaica.
- 0.075 United States dollars (USD) per minute on international calls that terminate in Jamaica on a mobile network.

The telephone tax is included in the taxable base for the purpose of calculating GCT.

**Payroll taxes**
Payroll taxes are imposed at the national level on employees’ emoluments, including (subject to certain conditions) expatriates who undertake work in Jamaica. The taxes comprise Pay-As-You-Earn (PAYE) Income Tax for employees only, Education Tax, and contributions to the National Housing Trust (NHT), the National Insurance Scheme (NIS), and the Human Employment and Resource Training (HEART).

Employers are obligated to deduct and remit payroll taxes by the 14th day of the month following the month of deduction. Employers and employees contribute at the following rates:

<table>
<thead>
<tr>
<th>Payroll tax</th>
<th>Basis</th>
<th>Employee rate (%)</th>
<th>Employer rate (%)</th>
</tr>
</thead>

<td>2.50</td>
</tr>
<tr>
<td>HEART contributions</td>
<td>Gross emoluments</td>
<td>0.00</td>
<td>3.00</td>
</tr>
</tbody>
</table>

**Branch income**
Branch income is taxed at the same rate as that of local corporations and on a similar basis. The transfer of profits to the head office is subject to a WHT of 33⅓% or at a lower treaty rate, where applicable.
A branch operation, irrespective of the nature of its business activities, is subject to Jamaican tax on income derived from the island and elsewhere. In computing the income for tax purposes, expenses incurred, wholly and exclusively for the purpose of the branch’s trade, are deductible, including a reasonable proportion of head office expenses.

Transactions between the branch, its head office, and affiliates should be at arm’s-length values.

**Income determination**

**Inventory valuation**
Inventories are valued at the lower of cost or market value. The Commissioner General has made no pronouncement, but last in first out (LIFO) is not generally permitted.

Any method of valuation that accords with standard accounting practice is acceptable for tax purposes, provided it is consistently applied at the beginning and end of the accounting period and it is not in contravention of the Income Tax Act.

**Capital gains**
There is no tax on capital gains. There is, however, a transfer tax on the market value of certain assets transferred and stamp duty payable on the transfer/disposal of shares or real property. See the Other taxes section for more information.

**Dividend income**
Ordinary dividends paid by Jamaican tax resident companies to Jamaican tax resident shareholders are liable to tax at the rate of 15%. The tax is to be deducted on payment by the distributing company and represents the final tax on such dividends. The Income Tax Act provides relief from taxation for dividends received by Jamaican tax resident corporate shareholders where they hold at least 25% of the voting rights of the distributing company (referred to as ‘group relief’).

Additionally, the dividend income on which tax is payable may not be offset by tax losses, and expenses incurred to earn the dividend are not deductible in arriving at chargeable income, with the exception of expenses incurred in respect of specified dividend income. Specified dividend income refers to the dividend income of companies that are subject to tax and are regulated by the Bank of Jamaica or the Financial Services Commission and whose dominant trade or business is comprised of making investments in loans, securities, and other financial assets. However, this exception does not apply to dividends enjoying group relief.

Preference dividends that qualify as tax deductible expenses of the paying company (see below) continue to be liable to tax at a rate of 25% where the recipient is an individual and at the applicable CIT rate where paid to a company. Dividends paid to non-resident shareholders are subject to income tax thereon at the default rate of 33⅓% in the case of a company and 25% in the case of an individual (subject to any treaty protection or incentive relief available).

Subject to certain conditions being met, a company may claim an income tax deduction in respect of preference dividends paid during the year of assessment. However, to the extent that these preference dividends do not qualify for this income tax deduction, they will be treated on the same basis as ordinary dividends.

**Stock dividends**
Stocks issued by way of the capitalisation of retained earnings (referred to as ‘bonus issues’) do not create a taxable distribution in the hands of the shareholders.
**Jamaica**

**Interest income**

Interest income is included in chargeable income and is subject to tax when received. Where interest is paid by a prescribed person, tax is deducted at source at the rate of 25% (see the Withholding taxes section for more information). The interest payable on certain securities issued by the government of Jamaica has been designated as being exempt from tax.

**Foreign income**

Resident corporations are taxable in Jamaica on their worldwide gains or profits. This includes the income of a foreign branch of a Jamaican company, as well as dividends arising abroad.

Tax deferral is not permitted in Jamaica.

---

**Deductions**

Expenses are deductible to the extent that they were incurred wholly and exclusively to earn the income and are claimed in the year in which they were incurred.

**Depreciation**

Tax depreciation (referred to in Jamaica as ‘capital allowances’) is generally computed at specified rates over the anticipated normal working lives of assets on a straight-line basis. In the year of expenditure, initial allowances are available at rates ranging from 20% to 25% on certain buildings and plant/machinery. Capital allowances are also available for capital expenditure on a wide list of intellectual property (IP) rights as well as pure or applied science and research and development (R&D) costs.

The capital allowances regime was overhauled in 2014 and applied new rates of capital allowances to capital expenditure incurred on or after 1 January 2014. Capital expenditure incurred prior to 1 January 2014 continues to be written off for income tax purposes in accordance with the rates prescribed under the previous regime.

The rates of capital allowances that are applicable to capital expenditure incurred on or after 1 January 2014 are as follows:

<table>
<thead>
<tr>
<th>Asset category</th>
<th>Initial allowance rate (%)</th>
<th>Annual allowance rate (%)</th>
</tr>
</thead>

</tbody>
</table>

For expenditure incurred prior to 1 January 2014, tax depreciation was generally computed on the reducing-balance basis over the anticipated normal working life of the asset at specified rates. An election could be made for machinery and equipment to be depreciated at higher rates on the straight-line basis.

In the year of expenditure, initial allowances were available at the rate of 20% on industrial buildings and structures and machinery and plant. Annual allowances were generally available on the reducing-balance basis on buildings ranging from rates of 2.5% to 5% and at various rates for machinery and equipment (excluding computers). Computers were written down at an annual rate of 22.5% on the straight-line basis. Special rates of capital allowances ranging from 20% to 100% were also available to certain industries/business activities in the form of investment allowances and accelerated depreciation (special capital allowances).

Generally, capital gains on depreciable property are not taxed. However, a recharge limited to the extent of the capital allowances allowed (or balancing charge) is taxable. Tax depreciation may not conform to book depreciation.

**Goodwill**
The amortisation or write-off of goodwill is not an allowable deduction.

**Start-up expenses**
The costs of incorporation and other expenses incurred in connection with establishing a business are not deductible against income.

**Interest expenses**
A deduction is available for interest that is paid on capital employed in acquiring income. Additionally, where interest is paid to a non-resident, tax must be withheld and remitted to the tax authorities in order to secure a deduction.

**Bad debts**
A deduction is available in respect of specific debts that become bad during the year of assessment.

**Charitable contributions**
Approved donations (not exceeding 5% of taxable income) to certain qualified charities and educational institutions are deductible.

**Foreign exchange gains/losses**
Foreign exchange gains and losses arising from trading are included in or deducted from chargeable income when realised. Foreign exchange gains and losses arising on capital assets are not taxable or allowable for tax purposes; however, where they pertain to fixed assets, on realisation, they may become part of the underlying acquisition cost and tax depreciation computed thereon.

**Fines and penalties**
Fines, penalties, and interest arising from tax arrears are not deductible.
Jamaica

**Taxes**
Taxes on income are not deductible. Additionally, GCT, contractors’ levy, transfer tax and stamp duty incurred on capital assets, input tax credits for GCT purposes, MBT, as well as the asset tax, are generally disregarded for income tax purposes. Other taxes, such as property tax, payroll taxes, and other business taxes, are deductible, to the extent that they were incurred to earn the income.

**Net operating losses**
Any claim for deduction of tax losses incurred in a prior year will be capped at 50% of the taxpayer’s chargeable income (before deduction of tax losses carried forward) of the year in which the claim is being made.

This cap will not apply:

- for the five years of assessment following the first year of operation of a new trade, profession, or business, or
- where the taxpayer’s gross revenue from all sources for the relevant year of assessment is less than the amount referred to in section 27(1)(b)(i) of the GCT Act (currently JMD 3 million per annum).

There are provisions designed to disallow the deduction of tax losses where the company that has accumulated them is sold under certain circumstances.

Tax losses are not available for carryback.

**Payments to foreign affiliates**
Royalties, management fees, and interest charges paid to foreign affiliates are deductible to the extent that these payments are made at arm’s-length rates. WHT should be paid in respect of such services, normally at 33 1/3% where payment is to a company and 25% in the case of individuals, unless a lower rate is provided for under a DTT. Furthermore, interest paid to non-residents is not deductible until the WHT is remitted.

---

**Group taxation**
Group taxation is generally not permitted in Jamaica, with the exception of a mechanism to permit group filing of returns for GCT purposes.

**Transfer pricing**
There are no specific transfer pricing rules in Jamaica. Transactions between connected parties are accepted if they are conducted on an arm’s-length basis. The Commissioner General, however, has the power to restate the value of such transactions if a view is formed that they are conducted at artificially high/low consideration for the purpose of avoiding tax. Legislation has been recently tabled in Parliament with a view to implementing comprehensive transfer pricing rules in Jamaica.

**Thin capitalisation**
There are no provisions for thin capitalisation in the tax laws of Jamaica. It has been proposed, however, that such provisions should be introduced in the near future.

**Controlled foreign companies (CFCs)**
There is no CFC regime in Jamaica.

---

**Tax credits and incentives**
Previously a number of incentive laws granted relief from taxation to approved persons for a specified number of years. The regime was recently overhauled, and a more
transparent, rules-based system with limited sectoral tax incentives was put in place to replace the former (mostly sectoral) schemes.

**Repealed incentive enactments**
Effective 1 January 2014, the government of Jamaica repealed the following tax incentive legislation:

- The Cement Industry (Encouragement and Control) Act
- The Export Industry (Encouragement) Act
- The Foreign Sales Corporation Act
- The Hotels (Incentives) Act
- The Industrial Incentives Act
- The Industrial Incentives (Factory Construction) Act
- The International Finance Companies (Tax Relief) Act
- The Motion Picture Industry (Encouragement) Act
- The Petroleum Refining Industry (Encouragement) Act
- The Resort Cottages (Incentives) Act
- The Shipping (Incentives) Act

Additionally, the Income Tax Act was amended to remove the incentive provisions pertaining to approved farmers and discontinue various incentives that were embedded in the capital allowances regime.

Certain relief from GCT that was available to beneficiaries under repealed tax incentive legislation has been terminated as of 1 January 2014. Previously, the GCT Act accorded a zero-rated status to imported items that were exempt from customs duty pursuant to the repealed legislation.

As of 1 January 2014, no new approvals will be granted under these repealed incentive legislations. Persons who were granted approval prior to 1 January 2014 (continuing beneficiaries) shall continue to be entitled to the benefits afforded under that repealed incentive until they expire. However, such persons may elect to forego their remaining entitlement under that repealed incentive legislation in order that they may benefit from new tax incentives. New tax incentive benefits include the availability of an employment tax credit (see Employment tax credit [ETC] below) and enhanced rates of capital allowances (see Depreciation in the Deductions section).

**Incentive enactments retained**
Incentive legislation that has been retained includes the following:

- The Jamaica Export Free Zones Act
- The Urban Renewal (Tax Relief) Act
- The Income Tax Act (Junior Stock Market Companies)
- The Bauxite and Alumina Industries (Encouragement) Act

Persons who have been granted approval under these incentive programmes will continue to benefit under the current tax regime (excluding the ETC).

**The Jamaica Export Free Zones Act**
The Jamaica Export Free Zones Act offers concessions to manufacturers who can operate within a designated free zone area as well as in stand-alone free zones approved by the Ministry of Industry, Investment, and Commerce (MIIC). Exporters benefiting from this scheme obtain 100% relief from income tax and duty exemption on capital goods, consumer goods, raw material, or imports for the construction, extension, and repair of free-zone premises.
Companies approved to operate in one of Jamaica's free zones must be registered or incorporated in Jamaica under the Companies Act. They must also obtain approval from the Jamaica Free Zone Council to undertake an approved activity.

The incentives offered under the Jamaica Export Free Zones Act are to be phased out by 31 December 2015, given Jamaica's commitments under WTO agreements. It is proposed that free zones will be replaced by WTO-compliant special economic zones (SEZs) from which licensed activities may be carried on.

**The Urban Renewal (Tax Relief) Act**
The Urban Renewal (Tax Relief) Act provides tax incentives to persons approved under the Act in connection with undertaking programmes of development in areas designated as special development areas (such as Downtown Kingston), with a view to improving or restoring them. The tax incentive provides certain tax benefits, including relief from income tax on rental income and interest earned by an investor in an Urban Renewal Bond. There is also exemption from stamp duty and transfer tax on the transfers of property.

A tax credit of 33\(\frac{1}{3}\)% of expenditure on capital improvement works in a designated special development area is also available. In addition, lessees of the improved properties, who satisfy certain criteria, are able to claim a tax deduction of double the rental paid.

**The Income Tax Act (Junior Stock Market Companies)**
Subject to certain conditions being met, a company listed on the Junior Market on or after 1 January 2014 (and by 31 March 2016) is eligible for relief of 100% of the income tax payable by it in the first five years from the date of its admission.

The income of companies listed on the Junior Market prior to 1 January 2014 qualified for the following remission:

1. 100% of the income tax payable in the first five years from the date of admission to the Junior Market.
2. 50% of the income tax payable by the company in the five years following the period specified in 1 above.

**Employment tax credit (ETC)**
The ETC was introduced by the FIA and is comprised of a non-refundable tax credit that is available to certain persons (referred to as ‘eligible persons’) in computing their income tax liability commencing 1 January 2014 (i.e. year of assessment 2014). A number of taxpayers are ineligible to claim this tax credit:

- Companies regulated by the Bank of Jamaica, Financial Services Commission, or Office of Utilities Regulation.
- Continuing beneficiaries under repealed tax incentive legislation.
- Companies listed on the Jamaica Stock Exchange Junior Market and obtaining relief under the Income Tax Act (Junior Stock Market Companies) relief provisions.
- Approved group head office companies.
- Approved free zone enterprises.
- Approved bauxite producers.

The ETC is the total of the statutory payroll levies (Education Tax and contributions to the National Housing Trust, the National Insurance Scheme, and HEART). In order to benefit from the ETC, the monthly statutory returns that report the statutory payments must be filed by the due dates and the payments remitted by that date (i.e. by the 14th day of the month following that to which they relate).
ETC is capped at 30% of the income tax payable on profits from business operations. With a headline income tax rate of 25%, the tax credit therefore provides tax-compliant businesses with an opportunity to reduce the effective income tax rate on their trading profits to as low as 17.5%.

The ETC may not be claimed against any income tax chargeable on non-trading income (e.g. passive investment income) nor can it be claimed in the year of assessment where the taxpayer incurred a tax loss on trading operations. The amount must be utilised in the year that the statutory payments are made. Unutilised amounts are not available for refund and may not be either carried forward or back to be utilised in other years of assessment.

Where a company makes a distribution (dividends and certain other benefits to shareholders), the credit is clawed back by TAJ to the extent of 10% of the distribution, less the tax payable by the recipient of the distribution (i.e. the ETC clawback only applies where tax imposed on the recipient of the distribution is less than 10%). The credit clawed back must be repaid to TAJ within 14 days of the end of the month in which the distribution is made.

**Tax incentives for pioneer industries**
The Income Tax Relief (Large-Scale Projects & Pioneer Industries) Act is designed to encourage innovation and high-value investments. It provides a mechanism through which additional income tax incentives can be offered in circumstances where the Minister of Finance & Planning designates a project as an approved large-scale project or an economic activity as an approved pioneer industry. An approved large-scale project is one that is capable of generating high levels of investment and employment. An approved pioneer industry refers to an economic activity not currently being carried out in Jamaica on a substantial commercial basis and involving the innovative use of technology, cultural assets, or other available resources.

The Minister shall make this designation subject to affirmative resolution in Parliament. Participants in either a designated large-scale project or a pioneer industry may subsequently be approved by Ministerial Order, which will stipulate the extent of relief granted. The income tax relieved under all orders issued pursuant to this mechanism in any year will be capped at 0.25% of the country's gross domestic product (GDP) for the previous financial year.

**Productive inputs relief (PIR)**
A mechanism is in place to provide relief from customs duty and additional stamp duty on the importation of certain 'productive inputs'. Productive inputs include goods that are imported as raw materials, intermediate goods, consumables, and packaging materials that are directly used in the 'production of primary products' or the 'manufacture of goods'. In addition to the manufacturing and agricultural sectors, relief will also be granted on certain products imported for use in the tourism, creative arts, and healthcare industries. The manufacture of goods may involve a determination by the Commissioner of Customs as to whether the process involved in transforming raw materials or intermediate goods into a finished product qualifies as the manufacture of goods.

The relief is subject to the proviso that imported items are not available in adequate supplies from a local manufacturer or from a manufacturer within the CARICOM Common Market area.

**Non-resident deposits**
Non-residents who place deposits with Jamaican banks can earn interest free of Jamaican tax in certain circumstances. The deposits may be designated in foreign currency or Jamaican dollars.
Employee Share Ownership Plan (ESOP)
Certain tax benefits accrue to employees and employers in respect of contributions to an approved ESOP as well as the allocation of shares from such plans.

Foreign tax credit
The avoidance of double taxation is achieved by means of foreign tax credits available under most tax treaties or by means of deduction in the case of the CARICOM treaty. Under the provisions of the Income Tax Act, a foreign tax credit is also available to companies in Jamaica that have paid or are liable to Commonwealth Income Tax. Where recourse cannot be had through either of these methods, by convention, in practice, partial relief by way of expense deduction is granted against income for the foreign tax.

Withholding taxes
The Jamaican Income Tax Act refers to deduction at source and not to withholding. The following references are to deduction at source. If it is proved that this exceeds the tax actually payable, refunds are made.

‘Prescribed persons’, primarily financial institutions, are required to withhold tax at source at a rate of 25% on interest income earned on investment instruments (subject to any lower rate as prescribed in a DTT). The Income Tax Act has been amended to provide a wider definition of the term ‘interest’. ‘Prescribed persons’, as defined, include the Accountant General; banks operating under the Banking Act or the Bank of Jamaica Act; institutions operating under the Financial Institutions Act; building societies; societies registered under the Industrial and Provident Societies Act, unless certain conditions are met; the Ministry of Finance & Planning; life insurance companies; companies registered under the Companies Act in which the government or an agency of the government holds more than 50% of the ordinary shares and which issues interest bearing securities; issuers of commercial paper; unit trust management companies; and any person who is connected with any of the persons mentioned above (with the exception of the Accountant General).

As is indicated in the Income determination section, the Income Tax Act provides that there is a requirement to deduct tax at the rate of 15% where dividends are paid to Jamaican tax resident shareholders, excluding corporate shareholders who hold 25% or more of the voting rights of the paying company. The tax deducted at source represents the final tax in respect of the dividends.

With effect from 30 April 2014, WHT has been imposed at the rate of 15% on all insurance premiums paid by Jamaican residents to non-residents. However, premiums paid by registered Jamaican insurance companies will be exempt from this WHT, subject to satisfying certain conditions.

Generally, all WHTs, including taxes withheld from dividend, interest, royalties, and fees must be remitted to TAJ within 14 days of the end of the month in which the payment is made in order to avoid the imposition of interest and penalties.

Notes

1. Substantial holdings refer to resident companies that hold 25% or more of the voting rights of the paying company.
2. Tax is withheld at the rate of 15% where a dividend is paid by a company resident in Jamaica to a resident individual shareholder, regardless of shareholding.
3. Tax is deducted from interest paid to Jamaican residents if payment is made by a prescribed person.
4. Rates apply only to specified member states.
5. The lower treaty rates do not apply if the recipient has a PE in the other territory that is ‘effectively connected’ with the company paying the dividend.
6. A rate of 15% applies to an individual regardless of shareholding.
7. Reduced to 10% if received by a bank recognised as a banking institution under the laws of that state.
8. A rate of 22.5% applies to an individual regardless of the shareholding.
9. Nil in the absence of a PE.

A WHT rate of 25% is required to be applied in respect of interest paid or credited by prescribed persons. However, certain categories of interest income earned on long-term savings accounts (LSAs) were made exempt from tax, including:

- Interest paid or credited in respect of investments or deposits made by individuals with prescribed persons if:
  - the deposit remains a minimum of five years without any withdrawal from the principal sum invested
  - the deposit or investment (other than interest accrued or credited) does not exceed JMD 1 million in any year
  - the account is not transferable, except on the death or bankruptcy of the depositor or investor, and
  - not more than 75% of the interest accrued in any year is withdrawn during the year.
- Benefits derived from investments in certain life insurance policies may also be exempt from income tax if specified criteria are satisfied.

It is proposed to implement a regime where tax of 3% will be required to be deducted from payments made by the following persons to local service providers rendering ‘specified services’:

- Ministries or departments of government.
Jamaica

- Entities with gross revenues of more than JMD 500 million per annum that are:
  - Regulated companies.
  - Tourism operators.
  - Utility and cable companies.

The date of implementation has not yet been announced.

**Tax administration**

Jamaica has established the following departments to handle tax administration:

- Tax Administration Jamaica (TAJ) operates as a semi-autonomous revenue authority whose functions include compliance and tax collection, administrative and legal support, audit and assessment of income tax, general consumption tax, stamp duty, and transfer tax. The Commissioner General has responsibility for the direction, supervision, and administration of TAJ and is supported in undertaking this role by several Deputy Commissioner Generals.
- The Revenue Appeals Division of the Ministry of Finance processes appeals to decisions made by TAJ.
- The Jamaica Customs Agency has the powers of an executive agency and has responsibility for administering taxes at the ports of entry.

There is also a Financial Investigations Division in the Ministry of Finance, which investigates customs breaches and fraudulent acts in respect of tax legislation.

**Taxable period**

A corporation is subject to tax on its income for a calendar year. However, where the Commissioner General of TAJ is satisfied that a corporation normally prepares financial statements to a date other than 31 December, the company may be permitted to use the profits of its own financial year rather than the calendar year as the basis of assessment. The basis period should not exceed 12 months; however, a company wishing to file its income tax return for a period exceeding this period must obtain the approval of TAJ.

**Tax returns**

Income tax returns are due for filing by 15 March in the year following the year of assessment and are based on a system of self-assessment of the tax payable.

**Payment of tax**

Tax is payable in quarterly instalments on the 15th day of March, June, September, and December of each tax year. Quarterly instalments are based on an estimate of the year’s liability or the actual tax payable for the previous year. The balance of income tax payable for a taxation year, after deduction of the instalments of estimated tax, is due on 15 March of the following year. Interest is charged on unpaid tax at a rate of 20% per annum while the amount remains unpaid. A penalty of up to 50% may also be imposed if TAJ issues an assessment.

TAJ has implemented an electronic tax system that taxpayers may use to file various tax returns and remit taxes.

**Tax assessments and audits**

The Commissioner General is empowered to conduct audits on selected tax returns or to assess a taxpayer for additional tax at any time prior to the expiration of the statute of limitation, which is six years, except in certain cases. Tax audits can be carried out whether or not notices of assessment have been issued. Tax assessments may be raised where the Commissioner General is of the opinion that a taxpayer has been assessed for less tax than the taxpayer ought to have been charged, or where the taxpayer failed to file a tax return.
**Topics of focus for tax authorities**

In support of the ongoing policy and legislative reform of the tax regime, the revenue authorities have been focusing on enhancing voluntary compliance, improving business processes and information technology infrastructure, modernising their operations so as to increase revenue collection and efficiency, as well as simplifying tax administrative processes. Initiatives being undertaken to achieve these objectives include enhancing web-based service offerings to facilitate greater levels of electronic tax filing/payments, amendments to GCT and income tax return forms, and improving the resources of the Large Taxpayer Office (LTO). Legislation has also been enacted to widen the range of offences across various tax types and to increase/harmonise the penalties for breach of those offences to more realistic levels.

Legislation is in progress to introduce transfer pricing rules, thin capitalisation rules, and the establishment of an SEZ regime, which is intended to replace free zones.

**Other issues**

**Intergovernmental agreements (IGAs)**

The government of Jamaica has entered into an agreement with the government of the United States (US) to improve international tax compliance and to implement the US Foreign Account Tax Compliance Act (FATCA). The agreement seeks to provide an effective mechanism for the automatic exchange of information for tax purposes and addresses the burden of domestic reporting and the legal impediments that Jamaican financial institutions may face in complying with FATCA.

Legislation is in progress to amend the income tax law to introduce the measures that are required by FATCA.

Notes

1. Interest paid/received is dealt with on the cash basis, hence the adjustments for the amount receivable/payable at the current and prior period ends.
2. Reserve for specific bad debts is allowed.
3. Recapture of excess tax depreciation is allowed.
4. Tax depreciation is granted in lieu of book depreciation.
5. Restricted to 50% of statutory income before the deduction of tax losses.
6. Rate generally applicable to unregulated companies.
7. Based on payroll taxes paid (excluding PAYE) but capped at 30% of tax payable on business operations (excludes passive income from investments).

Significant developments

2015 Tax Reform
On 31 March 2015, the 2015 Tax Reform Act was approved by the Diet, and, on the same date, the 2015 Tax Reform Act, the Enforcement Orders, and Regulations were promulgated, which are effective for corporate tax years beginning on or after 1 April 2015.

The 2015 Tax Reform Act provides for tax measures to help realise ‘economic virtuous cycles’ by reducing the effective corporate tax rate from fiscal year 2015. In addition, several measures were approved to expand the taxable base to make up for the revenue loss from the tax rate reduction (i.e. limits on the net operating loss deduction, reductions in the dividend income exclusion, changes in the incentive tax system, changes to the size-based enterprise tax system). In addition, certain amendments to the international tax system reflect measures under discussion at the Organisation for Economic Co-operation and Development (OECD) under the so-called ‘base erosion and profit shifting’ (BEPS) discussions.

A new protocol to the United Kingdom (UK)-Japan Tax Treaty
The protocol to the UK-Japan Tax Treaty entered into force on 12 December 2014 and is applicable in Japan as follows:

• With respect to taxes withheld at source, for amounts taxable on or after 1 January 2015.
• With respect to taxes on income that are not withheld at source, as regards income for any taxable year beginning on or after 1 January 2015.

Consumption tax
According to amendments to the Consumption Tax Law, the consumption tax rate will increase to a 10% rate as of 1 April 2017.

Note that due to the 2015 Tax Reform, consumption tax will be imposed on the cross-border provision of digital services (e.g. e-books, music, and advertising) by foreign service providers on or after 1 October 2015. In this respect, a reverse-charge mechanism will be introduced for business-to-business (B2B) transactions, and foreign service providers may need to register for consumption tax purposes with regard to business-to-consumer (B2C) transactions.

Also, Japanese sponsors will be subject to a reverse-change system for sports or music/art attractions in Japan provided by foreign entertainment providers. This amendment applies to the provision of services on or after 1 April 2016.
**Taxes on corporate income**

A domestic corporation in Japan is taxed on its worldwide income, including foreign branch income, while 95% of dividends received by a company from a foreign company in which it has held at least 25% (or could be lower under relevant tax treaties) of the outstanding shares for a continuous period of six months or more can be excluded from the company’s taxable income. See the description of Dividend income in the Income determination section below for more information.

A foreign corporation is taxed only on its Japan-source income.

**Corporation tax**

The corporation tax rates are provided in the table below (effective from fiscal years beginning on or after 1 April 2015).

<table>
<thead>
<tr>
<th>Company size and income</th>
<th>Corporation tax rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Paid-in capital of over 100 million Japanese yen (JPY)</td>
<td>23.9</td>
</tr>
<tr>
<td>Paid-in capital of JPY 100 million or less, except for a company wholly owned by a company that has paid-in capital of JPY 500 million or more:</td>
<td></td>
</tr>
<tr>
<td>First JPY 8 million per annum</td>
<td>15.0</td>
</tr>
<tr>
<td>Over JPY 8 million per annum</td>
<td>23.9</td>
</tr>
</tbody>
</table>

**National local corporate tax**

Corporate taxpayers are obligated to file and pay the national local corporate tax at a fixed rate of 4.4% of their corporate tax liabilities.

**Standard enterprise tax (and Special Local Corporate Tax)**

Enterprise tax is imposed on a corporation’s income allocated to each prefecture. This allocation is generally made on the basis of the number of employees and number of offices in each location.

The standard rates of enterprise tax, including a Special Local Corporate Tax, are shown below.

<table>
<thead>
<tr>
<th>Taxable base</th>
<th>Enterprise tax (%)</th>
<th>Special Local Corporate Tax</th>
</tr>
</thead>
<tbody>
<tr>
<td>First JPY 4 million per annum</td>
<td>3.4</td>
<td>43.2% of the current enterprise tax</td>
</tr>
<tr>
<td>Next JPY 4 million per annum</td>
<td>5.1</td>
<td>43.2% of the current enterprise tax</td>
</tr>
<tr>
<td>Over JPY 8 million per annum</td>
<td>6.7</td>
<td>43.2% of the current enterprise tax</td>
</tr>
</tbody>
</table>

If the paid-in capital of a corporation is JPY 10 million or more and the corporation has places of business in more than two prefectures, the graduated rates above are not applicable.

For utilities and insurance companies, the standard tax rate is shown as follows:

<table>
<thead>
<tr>
<th>Taxable base</th>
<th>Enterprise tax (%)</th>
<th>Special Local Corporate Tax</th>
</tr>
</thead>
<tbody>
<tr>
<td>Net revenue (net utility charges or net insurance premiums)</td>
<td>0.9</td>
<td>43.2% of the current enterprise tax</td>
</tr>
</tbody>
</table>

**Size-based enterprise tax (and Special Local Corporate Tax)**

Instead of the above general enterprise tax, a ‘size-based’ enterprise tax (Gaikei Hyojun Kazei) is applied to a company whose paid-in capital is more than JPY 100 million as of the year end.
Factors such as the size of a corporation’s personnel costs and its capital (the amount of paid-in capital) will determine the additional amount of tax payable. The existing profit-based enterprise tax will also continue to apply at the tax rates indicated below. Therefore, a loss company in Japan may be required to pay tax based on value-added activities and the corporation’s paid-in capital. The applicable standard rates are shown below, due to the 2015 Tax Reform.

<table>
<thead>
<tr>
<th>Taxable base</th>
<th>Before amendments (%)</th>
<th>Fiscal year 2015</th>
<th>Fiscal year 2016</th>
</tr>
</thead>
<tbody>
<tr>

<td>0.3</td>
<td>0.4</td>
</tr>
<tr>
<td>First JPY 4 million</td>
<td>3.8 (2.2)</td>
<td>3.1 (1.6)</td>
<td>2.5 (0.9)</td>
</tr>
<tr>
<td>Next JPY 4 million</td>
<td>5.5 (3.2)</td>
<td>4.6 (2.3)</td>
<td>3.76 (1.43)</td>
</tr>
<tr>
<td>Over JPY 8 million</td>
<td>7.2 (4.3)</td>
<td>6.0 (3.1)</td>
<td>4.8 (1.91)</td>
</tr>
<tr>
<td>Local corporate special tax (the rate is multiplied by the income base of size based enterprise tax), which is collected as national tax by filing corporate tax returns</td>
<td>67.4 (2.9)</td>
<td>93.5 (2.9)</td>
<td>152.6 (2.9)</td>
</tr>
</tbody>
</table>

* The rate shown for the income base is the total income based tax including (i) the portion collected as part of the national tax return and (ii) the portion included as part of the enterprise tax return. The portion in parentheses of the income base column shows the amount collected as an enterprise local tax (the difference is collected as a national tax). The above rate changes for income base may not affect taxpayers who have elected consolidated taxation since consolidation is not applicable for local tax purposes.

**Inhabitant’s tax**

Inhabitant’s tax is imposed on a corporation’s income allocated to each prefecture and city (municipal borough). The allocation is generally made on the basis of the number of employees, in the same way as enterprise tax.

The standard tax rate is 3.2% as prefectural tax and 9.7% as municipal tax. However, the tax rate may be increased up to 4.2% for prefectural tax and 12.1% for municipal tax, depending upon the determination of each local government.

In addition to the above, inhabitant’s tax is imposed on a per capita basis, in the range from JPY 70,000 (in cases where the amount of paid-in capital is JPY 10 million or less and the number of employees in each prefecture and city is 50 or less) to JPY 3.8 million (in cases where the amount of paid-in capital is over JPY 5 billion and the number of employees in each prefecture and city is over 50). The inhabitant’s tax amount is determined by the local government by the factors of paid-in capital and the number of employees.

**Effective tax rate**

The total corporate income tax burden (i.e. effective tax rate) varies depending upon the size of a company’s paid-in capital. Since enterprise tax is deductible, the effective tax rate is less than the total of the statutory rates of corporation tax, inhabitant’s tax, and enterprise tax.

The following is the summary of the effective applicable tax rates in the case of small and medium enterprises (SMEs) and large corporations operating in Tokyo (taking no thought of an additional-value-based tax and capital-based tax out of the enterprise tax above):

<table>
<thead>
<tr>
<th>Tax year</th>
<th>Effective corporation tax rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>SMEs</td>
</tr>
<tr>
<td>Beginning on or after 1 April 2015</td>
<td>35.36</td>
</tr>
<tr>
<td>Beginning on or after 1 April 2016</td>
<td>35.36</td>
</tr>
</tbody>
</table>
Since the excess rate for fiscal year 2016 is not yet determined, the rate is calculated with the standard rate multiplied by the excess rate for 2015.

**Corporate residence**

**Domestic and foreign corporation**
A company that has its head office in Japan is a domestic corporation. The nationality of its shareholders or place of central management is not relevant.

A corporation other than a domestic corporation is regarded as a foreign corporation.

**Permanent establishment (PE)**
Under domestic tax law, the scope of Japan-source income in respect of which a foreign corporation is taxable depends upon the type of taxable presence that it has in Japan. The types of taxable presence that a foreign corporation may have in Japan include the following:

- Branch, factory, other fixed places in which business is conducted in Japan, mine, quarry, building for rent, etc., but exclude a specified place used only for the business of purchasing assets and for keeping them (Direct PE).
- Construction, installation, assembly project, or supervisory services related thereto for a period of greater than one year.
- Certain agents (Agent PE), as follows:
  - A person in Japan who has an authority to conclude contracts for a foreign corporation (excluding contracts to purchase assets) and exercises such authority continuously (Contracting Agent).
  - A person in Japan who keeps for a foreign corporation a certain quantity of assets sufficient to meet ordinary demand from the foreign corporation's customers and delivers the said assets to the customers according to their requirements (Fills Order Agent).
  - A person in Japan who, solely or principally for or on behalf one foreign corporation, habitually performs an important part of solicitation of orders, negotiations, or other acts leading up to the conclusion of contracts with respect to the business of the foreign person (Secure Order Agent).

As a matter of law, the articles of Japan’s tax treaties have precedence over domestic tax law. In general, there are no significant differences between the definitions of PE under domestic tax law and Japan’s tax treaties. However, once a PE has been established for a foreign corporation under domestic law, all Japan-source income is taxable to the PE (as opposed to just income ‘attributable to’ the PE, as is the case under most treaties).

Note that Japanese domestic rules with regard to the taxation of PEs in Japan will become consistent with the revised Model Tax Convention from tax years commencing on or after 1 April 2016.

**Other taxes**

**Consumption tax**
Consumption tax (value-added tax or VAT) is levied when a business enterprise transfers goods, provides services, or imports goods into Japan. The applicable rate is 8%. As of 1 April 2017, the rate will increase to 10%. Exports and certain services to non-residents are taxed at a zero rate. Specified transactions, such as sales or lease of land, sales of securities, and provision of public services, are not subject to taxation.

Consumption tax paid by the business enterprise attributable to taxable revenue shall be creditable/refundable by filing the consumption tax return to the extent that such transaction is recorded in the accounting book and relevant invoices are kept.
Note that due to the 2015 Tax Reform, consumption tax will be imposed on the cross-border provision of digital services (e.g. e-books, music, and advertising) by foreign service providers on or after 1 October 2015. In this respect, a reverse-charge mechanism will be introduced for B2B transactions, and foreign service providers may need to register for consumption tax purposes with regard to B2C transactions.

Also, Japanese sponsors will be subject to a reverse-change system for sports or music/art attractions in Japan provided by foreign entertainment providers. This amendment applies to the provision of services on or after 1 April 2016.

**Customs duty**
A customs duty is levied on imported goods based on the custom tariff table.

**Excise taxes**
Excise taxes were abolished by introduction of consumption tax.

**Fixed assets tax**
The annual fixed assets tax is levied by the local tax authorities on real property and depreciable fixed assets used for business purposes. Real property is taxed at 1.7% (standard rate including city planning tax) of the value appraised by the local tax authorities. The depreciable fixed assets tax is assessed at 1.4% of cost after statutory depreciation.

**Stamp duty**
A stamp duty is levied on certain documents prepared in Japan. The tax amount is generally determined based on the amount stated in the document.

**Registration and licence tax**
Registration and licence tax is levied where certain property is registered, at a rate from 0.1% to 2% of the taxable basis or at a fixed amount. The taxable basis depends upon the property being registered (e.g. the amount of paid-in capital registered by a company or the value of real estate as assessed by local tax authorities).

**Labour and Social Insurance**
There are four types of insurance systems in Japan that enterprises employing workers that meet certain conditions must enrol in. Workers’ accident compensation insurance is borne entirely by the employer. Employment insurance, health insurance/nursing care insurance, and employees’ pension insurance is born by both the employer and employee.

The employer is generally liable to pay a share of the following contributions on salary or bonus, including fringe benefits, to be paid in Japan. The employer’s share consists of the following contributions:

<table>
<thead>
<tr>
<th>Contribution</th>
<th>Standard premiums on monthly salary</th>
<th>Standard premiums on bonus</th>
</tr>
</thead>
<tbody>
<tr>
<td>Health insurance for the Metropolis of Tokyo (each prefecture has its own health insurance rate, and rates are slightly higher for individuals between the ages of 40 and 65)</td>
<td>4.985% (on a maximum of JPY 1,210,000 of wages per month)</td>
<td>4.985% (on an annual cap of JPY 5.4 million of irregular annual total payments)</td>
</tr>
<tr>
<td>Welfare pension, plus child allowance (1)</td>
<td>8.887% (on a maximum of JPY 620,000 of wages per month)</td>
<td>8.887% (on a maximum of JPY 1.5 million of irregular payments per month)</td>
</tr>
<tr>
<td>Employment insurance</td>
<td>0.85%</td>
<td>0.85%</td>
</tr>
<tr>
<td>Total (2)</td>
<td>14.722%</td>
<td>14.722%</td>
</tr>
</tbody>
</table>
Note

1. The rate of 8.737% for welfare pension will be applied from September 2014 to August 2015. Premiums on child allowance will be imposed separately at 0.15%.
2. In addition, workers’ accident compensation insurance will be imposed. The rate varies depending on the type of business.

Payroll taxes
In general, the employer has an obligation to withhold payroll taxes monthly, and for annual year-end adjustment.

Family corporation tax
If an individual shareholder together with family members own, either directly or indirectly, more than 50% of the total issued shares or voting rights of a Japanese corporation, the corporation is treated as a family corporation (with the exception of corporations with paid-in capital of JPY 100 million or less) and is subject to the family corporation tax in addition to corporation tax.

A family corporation is liable for an additional tax at the rates shown below on its undistributed current earnings in excess of specified limits.

<table>
<thead>
<tr>
<th>Taxable undistributed current earnings</th>
<th>Family corporation tax rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>First JPY 30 million per annum</td>
<td>10</td>
</tr>
<tr>
<td>Next JPY 70 million per annum</td>
<td>15</td>
</tr>
<tr>
<td>Over JPY 100 million per annum</td>
<td>20</td>
</tr>
</tbody>
</table>

Business premises tax
Business premises tax is levied and designated by each city in Japan, such as Tokyo, Osaka, Nagoya, Fukuoka, and other cities with a population of more than 300,000. A company that uses business premises in excess of 1,000 square metres and/or has more than 100 employees in a designated city is responsible to pay this tax based on the usage of the business (JPY 600 per square metre) and gross payroll (0.25% of gross payroll).

Branch income
Branch profits are taxed in the same manner as corporate profits. However, the family corporation tax does not apply to a branch of a foreign corporation. In addition, no withholding tax (WHT) is imposed on the repatriation of branch profits to the home office.

Income determination
The taxable income of a corporation is the aggregate income from all sources. There is no specific requirement to differentiate between the types of income. In principle, accounting for tax purposes follows Generally Accepted Accounting Principles (GAAP) in Japan, and income of a corporation is determined on an accrual basis.

Inventory valuation
Inventory cost should be determined by applying one of the following methods accepted for corporate tax purposes: actual individual cost, first in first out (FIFO), weighted average, moving average, most recent retail, selling price reduction, and lower of cost or market.

Capital gains
Capital gains and losses are classified as ordinary income and losses, respectively.
Under certain circumstances (e.g. qualified reinvestment, exchange property), taxes generally levied on capital gains may be deferred (i.e. provided rollover relief) as long as certain requirements are met. A special relief is available in the case of expropriation of real property by either the national or local government.

The recognition of capital gains or losses from the transfer of certain assets between group companies are to be deferred until the asset is transferred to another group company or a non-group company.

**Dividend income**

In the 2015 Tax Reform Act, the threshold ownership percentage for corporate dividend exclusion is increased as illustrated in the following table.

The amendments apply to dividends received by a corporation on or after 1 April 2015. Before the amendments, the dividend income exclusion for an ‘affiliated domestic corporation’ was allowed to the extent that the shareholder ownership duration was for six months or more until the dividend declaration date. After the amendment, the holding period is changed to the six months or more until the fiscal year end for which the dividend will be paid. The dividend income exclusion for an ‘other domestic corporation’ and ‘portfolio investment’ is allowed by reference to the ownership percentage as of the fiscal year end for which the dividend will be paid.

<table>
<thead>
<tr>
<th>Before amendments</th>
<th>After amendments</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Type of investment</strong></td>
<td><strong>Ownership %</strong></td>
</tr>
<tr>
<td>Wholly owned domestic subsidiary</td>
<td>100%</td>
</tr>
<tr>
<td>Affiliated domestic corporation</td>
<td>25% or more</td>
</tr>
<tr>
<td>Other domestic corporation</td>
<td>Less than 25%</td>
</tr>
<tr>
<td>Portfolio investment (including exchange trust fund [ETF], foreign currency denominated trusts, and other investment trusts)</td>
<td></td>
</tr>
</tbody>
</table>

**Notes**

1. Under certain simplified calculations to determine allocable interest, the ‘base period’ is the fiscal years beginning between 1 April 2015 and 31 March 2017.
2. For dividends from portfolio investments received by insurance companies, the exclusion percentage will be 40%.
3. Not including bond investment trusts, foreign investment trusts, and specific types of foreign currency denominated investment trusts.
Japan

95% of dividends received by a company from a foreign company in which it has held at least 25% of the outstanding shares for a continuous period of six months or more, ending on the date on which the dividend is declared, can be excluded from the company's taxable income.

If the foreign company is resident in a country with which Japan has concluded a tax treaty for the avoidance of double taxation, and such treaty provides for the allowance of an indirect foreign tax credit for taxes paid by the foreign company on the profits out of which the dividend is paid where the company holds a certain percentage of the foreign company's outstanding shares (e.g. 10% based on the tax treaty between the United States and Japan), that percentage will apply for the purpose of determining the availability of the above exemption to the extent that it is lower than 25%.

The BEPS Action Plan 2 proposed that measures be taken to neutralise the tax effects of so-called ‘hybrid mismatch’ arrangements where, because of differences in the treatment of certain payments between jurisdictions, an item of income is not taxed in either the payer or the payee country because the payment is deductible in the payer country but not taxable in the recipient country. Thus, the recommendation in the BEPS Action Plan is to modify local tax law in order for the recipient country to tax the receipt.

Before the 2015 amendment, any dividends received by a Japanese corporation from a foreign affiliate was 95% exempt from taxation in Japan regardless of the tax treatment in the payer country. This position was clarified in Q&A guidance issued by the National Tax Agency. Based upon the recommendation of the BEPS Action Plan 2, the 2015 Tax Reform Act excludes such types of dividends from the dividend exclusion regime. As a result, any dividends paid to Japanese corporate taxpayers under so called ‘MRPS’ issued by Australian affiliates or by Brazilian affiliates where the dividends are paid in a manner similar to interest and deductible for Brazilian tax purposes will no longer be excluded from taxation in Japan.

To the extent any portion of the dividend is deductible for foreign tax purposes, the general principle is that all of the dividend should be taxable in Japan. However, if a portion of the dividend is not tax deductible in the foreign jurisdiction, dividend exclusion will be allowed only if the taxpayer discloses all of the appropriate information regarding the portion of the dividend that is not deductible in the foreign jurisdiction and backup details for the calculation in a timely filed tax return and maintains the relevant documents for inspection by the tax authorities.

Any foreign tax imposed on the taxable dividend in Japan will be eligible for foreign tax credit relief.

The new rules will, in principle, apply for any dividends received by a Japanese corporate taxpayer whose fiscal year begins on or after 1 April 2016. However, if the Japanese corporate taxpayer owns the stock of the foreign affiliate as of 1 April 2016, dividends received for years beginning between 1 April 2016 and 31 March 2018 will be subject to the old rules (i.e. still eligible for exclusion).

The WHT for dividends is applicable at a rate of 15% national tax and 5% local tax or 20% (national tax) depending on the type of stock from which the dividends were received, and a tax credit may also be available for such WHT. The WHT (national tax) is subject to the income surtax of 2.1%, which is levied for the income earned for the period from 1 January 2013 through 31 December 2037.

**Interest income**

Interest received is included in taxable income. The WHT for interest is applicable at a rate of 15% national tax and 5% local tax and a tax credit may be available for such WHT. As with dividend income, the WHT (national tax) is subject to the income surtax of 2.1%, which is levied for the income earned for the period from 1 January 2013
through 31 December 2037. Note that under the 2013 Tax Reform, only national tax will be withheld at source for interest income received on or after 1 January 2016 by a corporate recipient.

**Foreign income**
A Japanese corporation is subject to Japanese corporate income taxes on its worldwide income. However, to avoid double taxation of foreign-source income, Japanese corporations are allowed to claim a tax credit against corporation and inhabitant’s taxes for foreign income taxes paid directly. *See Foreign tax credit in the Tax credits and incentives section for more information.*

Undistributed profits of a foreign subsidiary (i.e. controlled foreign company [CFC]) located in a tax haven are included in the Japanese parent company's taxable income under certain conditions. *See Anti-tax haven (CFC) rules in the Group taxation section for more information.*

**Deductions**

**Depreciation and amortisation**
Depreciation is deductible in the calculation of taxable income for corporation tax purposes. Depreciable assets include tangible property (e.g. buildings, attachments to buildings, structures, machinery and equipment). Certain intangible assets are also eligible for amortisation (e.g. goodwill, patents, trademarks).

With regard to depreciation methods, a taxpayer may adopt one of the allowable methods for each of the types of depreciable property. Tangible property is generally depreciated using either the straight-line method or the declining-balance method. Intangible property is generally amortised under the straight-line method.

Useful lives for assets are set forth on the table in detail. For reference, the following is the brief table of useful lives for typical assets.

<table>
<thead>
<tr>
<th>Types of assets</th>
<th>Useful lives (years)</th>
</tr>
</thead>
<tbody>
<tr>

</tr>
<tr>
<td>Patents</td>
<td>8</td>
</tr>
<tr>
<td>Software</td>
<td>3 or 5 (depending on uses)</td>
</tr>
</tbody>
</table>

**Start-up expenses**
Start-up expenses, such as corporation organisation costs and opening costs (i.e. costs to begin business after the corporation is established), are treated as deferred assets and allowed to be amortised on a voluntary basis.

**Interest expenses**
Interest expenses on borrowing are deductible in the calculation of taxable income in principle. However, the interest payment to related parties in the corporate group may be disallowed to be deducted to some extent in certain cases. *See ‘Thin capitalisation’ and ‘Interest expense deduction limitation’ in the Group taxation section.*
**Reserves**
Reserves recorded in the books of accounts, except for reserves for doubtful receivables and return of goods not sold, are not deductible for corporate tax purposes.

**Reserve for doubtful receivables**
The deductibility of a reserve for doubtful receivables is limited by the following two components: (i) an estimate of irrecoverable amounts from a debtor and (ii) a calculation of the limit in the aggregate based on either the actual historical bad debt percentage or statutory percentage (reduced for large corporations), excluding the irrecoverable amount of receivable in (i) above.

Per the December 2011 Tax Reform, the reserve for doubtful receivables is abolished, except for SMEs, banks, insurance companies, and other similar financial corporations. The abolishment is phased in over four years, as follows:

<table>
<thead>
<tr>
<th>Applicable tax years</th>
<th>% of the deductible amount (100% = deductible amount before 2011 Tax Reform)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Beginning between 1 April 2012 and 31 March 2013</td>
<td>75</td>
</tr>
<tr>
<td>Beginning between 1 April 2013 and 31 March 2014</td>
<td>50</td>
</tr>
<tr>
<td>Beginning between 1 April 2014 and 31 March 2015</td>
<td>25</td>
</tr>
<tr>
<td>Beginning on or after 1 April 2015</td>
<td>0</td>
</tr>
</tbody>
</table>

**Reserve for return of goods not sold**
A deductible reserve for return of goods not sold is available to corporations such as publishers, wholesalers of books, and others, provided that the corporation sells the merchandise under an unconditional repurchase agreement.

**Charitable contributions**
Except for certain designated donations, the tax deduction for charitable contributions is limited to certain amounts, as follows:

<table>
<thead>
<tr>
<th>Donation</th>
<th>Deduction limit</th>
</tr>
</thead>
<tbody>
<tr>
<td>General donation</td>
<td>$((0.25% \text{ of capital plus capital surplus}) + (2.5% \text{ of income})) \times \frac{1}{4}$</td>
</tr>
<tr>
<td>Donation made to designated public purpose companies</td>
<td>$((0.375% \text{ of capital plus capital surplus}) + (6.25% \text{ of income})) \times \frac{1}{2}$</td>
</tr>
</tbody>
</table>

Donations subject to this limitation include economic benefits considered to be given as a subsidy. Donations to foreign affiliates are not fully deductible.

In cases where a donation occurs between group companies (as defined), there will be no tax implications for either the donor or donee (i.e. no deduction for the donor and no taxation for the donee).

**Directors’ remuneration**
The remuneration paid to directors is deductible only in the following three cases:

- Fixed monthly payments.
- Fixed payments in accordance with an advance notice to the tax office.
- Performance bonuses paid in proportion to the company’s earnings to directors who engage in the operation of the company’s business, to the extent that certain requirements are met.

If the amount of remuneration is deemed unreasonable by the tax authority, only the reasonable amount is deductible for tax purposes.
**Entertainment expenses**
In principle, entertainment expenses are not deductible for tax purposes. However, an SME, defined as a company with paid-in capital of JPY 100 million or less (except for a company wholly owned by a company that has paid-in capital of JPY 500 million or more after the group taxation regime is effective) may take a tax deduction up to the smaller of the actual disbursement for the entertainment expense or JPY 8 million. With regard to expenses for eating and drinking, a company may deduct such expenses as far as the expense does not exceed JPY 5,000 per person (excluding expenditures for internal purposes) for tax purposes.

The corporations will be able to deduct 50% of the entertainment expenses for food and drink (excluding entertainment for internal purposes).

**Fines and penalties**
Fines and penalties are not deductible.

**Taxes**
Enterprise tax and business premises tax are deductible in the calculation of the taxable income for corporation tax purposes on a cash basis. However, corporation tax and inhabitant’s tax are not deductible. Fixed assets tax and other taxes are deductible, when assessed. Foreign income taxes also may be deductible if the Japanese corporation does not elect to claim a foreign tax credit.

**Net operating losses**
For corporation tax and enterprise tax purposes (indirectly for inhabitant’s tax purposes), a tax loss can be carried forward to offset future income in the case that a taxpayer files a ‘blue form’ tax return (see Tax returns in the Tax administration section) or if the tax loss is incurred as a result of certain disaster events.

The changes in the limitation for the net operating loss deduction will be implemented in two steps. For the first two years, the current 80% limitation will be reduced to 65%. Thereafter, the limitation will be reduced to 50%, although the limitation carryover period will be extended from the current nine years to ten years for losses incurred on or after years beginning on or after 1 April 2017. SMEs are not subject to the loss deduction limitation.

<table>
<thead>
<tr>

<td>9 Years</td>
<td>9 years</td>
</tr>
</tbody>
</table>

**Notes**
1. For fiscal years beginning on or after 1 April 2015 and before 1 April 2017 in which the taxpayer claims a net operating loss deduction.
2. For fiscal years beginning on or after 1 April 2017 in which the taxpayer claims a net operating loss deduction.
3. Applicable to tax losses incurred in fiscal years beginning on or after 1 April 2017.

Certain newly established corporations and companies coming out of a rehabilitation process will not be subject to the loss limitation rules for a certain period.
Japan

<table>
<thead>
<tr>

<td>For years ending on or after (i) a company is listed on a stock exchange, or (ii) the company is deemed to be rehabilitated.</td>
</tr>
</tbody>
</table>

Notes

1. SMEs, 100% subsidiary of larger corporations, or 100% parent corporation after share transfer are excluded.
2. SMEs are excluded.

Where there is a change in ownership of a corporation followed by certain events, such as the cessation of business or a significant change in its business within a five-year period following a business acquisition, the utilisation of its tax loss is restricted.

Carryback of tax losses is generally available for one year for national corporation tax purposes. This carryback rule is suspended until the fiscal year ending 31 March 2016 (except in specified circumstances, e.g. year of liquidation).

No carryback of losses is allowed for enterprise tax and inhabitant’s tax.

**Payments to foreign affiliates**

In order to support a deduction in Japan for expenses incurred by a foreign affiliate and charged to a Japanese corporation, in general, it should be demonstrated that the service arrangement between the foreign affiliate and the Japanese corporation satisfies arm’s-length criteria for purposes of Japan’s transfer pricing laws and regulations.

Generally, fees that are paid by a Japanese subsidiary to a foreign affiliate should be deductible for Japanese tax purposes if the following conditions are met:

- The services should have the same character as services that take place between non-related companies or such services are essential to Japan’s activities.
- There is a written service agreement.
- The services were requested by the Japanese corporation.
- The rendering of services is documented with evidence (e.g. requests for services from the Japanese subsidiary, regular invoices sent by the foreign affiliate).
- The service charges are reasonable.

**Group taxation**

**Consolidated tax regime**

Under the consolidated tax regime, a consolidated group can report and pay national corporate income tax on a consolidated basis. A consolidated group may be formed by a Japanese parent company and its 100% owned (directly or indirectly) Japanese subsidiaries. The taxpayer may file an application to elect a consolidated group filing for tax purposes, but the election must include all of the parent’s eligible subsidiaries. Once the election is made, the consolidated filing, in principle, cannot be revoked unless there is a specific event, such as an ownership change, that causes the qualifying conditions of a consolidated filing to fail or an application to discontinue the consolidated group has been approved by the Commissioner of the NTA.

The taxable income of the consolidated group is computed on a consolidated basis by aggregating the taxable income or losses of each member of the consolidated group followed by the consolidation adjustments. Profits from intra-group transactions, except
for transfer of certain assets as defined, should be included in the aggregate taxable income. Gains or losses from the intra-group transfer of certain assets are deferred.

Pre-consolidation tax losses of a subsidiary can be carried forward into a consolidated tax group if certain conditions are met, but may only be offset against taxable income of the subsidiary for the calculation of consolidation income.

The consolidated national corporate income tax liability is determined by applying the corporate income tax rate to the consolidated taxable income and adjusted for consolidated tax credits. The total tax liabilities are allocated back to each member company. The parent company files the consolidated return and pays the national corporate income tax for the group; however, each member company remains jointly and severally liable for the consolidated group’s total national corporate income tax liability.

Local corporate income taxes levied on member companies are paid on a separate company basis, but the amount of local tax payable may be affected because of the consolidated filing.

**Group taxation regime**

A group taxation regime is applicable to domestic companies that are wholly owned by a domestic company, foreign company, or individual (‘group companies’). Unlike the consolidated tax regime, the group taxation regime automatically applies to group companies.

The key points of this regime are summarised as follows:

- The recognition of capital gains or losses from the transfer of certain assets (including the transfer of assets as a result of a non-qualified or taxable merger) between group companies is deferred until the asset is transferred to another group company or a non-group company. The scope of assets is the same as that under the tax consolidation system (i.e. fixed assets, land, securities, monetary receivables, and deferred expenses [excluding securities for trading purposes and assets with a book value of less than JPY 10 million]).
- Where a donation occurs between group companies, there are no tax implications for either the donor or donee (i.e. no deduction for the donor and no taxation for the donee). Note that this treatment is not applied to a group company owned by an individual. This is consistent with the treatment of a donation between members of a consolidated tax group.
- A dividend received from a group company can be fully excluded from taxable income without any reduction for allocable interest expense. This is consistent with the treatment of dividends between members of a consolidated tax group.

A group company that would otherwise qualify as an SME on a stand-alone basis is not eligible for SME benefits (e.g. reduced corporate tax rate, preferable allowable ratios for deductible portion of bad debt provisions, partial deductibility of entertainment expenses, carryback of tax losses) if the SME is owned by a parent company or two or more parent companies of the group that has paid-in capital of JPY 500 million or more.

Where a corporation that is a member of a 100% group is in the process of liquidation and is expected to be dissolved, any loss from the impairment or devaluation of the shares of the liquidating corporation cannot be recognised by the parent company as a tax deductible expense.

**Transfer pricing**

If a corporation that is subject to corporation tax sells property to or buys property from a foreign-related person, or provides services or conducts other transactions with a foreign-related person, and consideration is received or paid by the corporation, the
transaction is required to be carried out at an arm’s-length price for corporation tax purposes.

A foreign-related person is a foreign corporation that maintains certain special relationships with the subject corporation, such as parent-subsidiary, brother-sister, or substantial control relationship.

The arm’s-length price for the sales or purchase of inventory may be determined using one of the following methods:

- Comparable uncontrolled price method.
- Resale price method.
- Cost plus method.
- Berry Ratio method.
- Other method (i.e. profit split method and transactional net margin method [TNMM]).

The ‘most appropriate method’ should be applied in order to calculate the arm’s-length price.

An advanced pricing agreement (APA) system is available to confirm the arm’s-length pricing system proposed by a taxpayer. In general, corporations entering into an APA are advised to file a request for mutual agreement procedures (MAP) in order to obtain the agreement of the competent authorities of each country.

**Thin capitalisation**

Interest paid on debt to controlling foreign shareholders is disallowed to the extent the average balance of debt on which that interest is paid is more than three times the equity of controlling foreign shareholders.

**Interest expense deduction limitation**

The deductible portion of a corporation’s net interest expense to a related party is restricted to 50% of the adjusted income. The net interest is calculated as interest expense to related parties less corresponding interest income. The adjusted income is defined as taxable income, adding back interest expense, depreciation expense, and exempted dividend income but excluding extraordinary income or loss.

**Anti-tax haven (controlled foreign company or CFC) rules**

Undistributed profits of a foreign subsidiary (i.e. CFC) located in a tax haven are included in the Japanese parent company’s taxable income under certain conditions.

Tax havens are defined as certain countries or territories that do not impose corporate income tax or that tax the income of a foreign subsidiary at a rate of less than 20% (due to the 2015 Tax Reform). A Japanese corporation owning a 10% or more direct or indirect interest in a CFC is required to include its pro-rata share of the taxable retained earnings of the CFC in its gross income under certain circumstances.

A dividend paid by a CFC is not deductible when calculating its undistributed income.

**Tax credits and incentives**

**Foreign tax credit**

A Japanese corporation is subject to Japanese corporate income taxes on its worldwide income. However, to avoid double taxation of foreign-source income, Japanese corporations are allowed to claim a tax credit against corporation and inhabitant’s taxes for foreign income taxes paid directly.
Creditable foreign taxes are defined as taxes that (i) are incurred directly by the taxpayer; (ii) are levied by foreign governments and local authorities in accordance with local tax laws; (iii) are levied on corporate income; and (iv) have the same characteristics as Japanese income tax, corporation tax, and local income-based taxes. A tax for which a refund can be claimed optionally by the taxpayer after the tax payment, or a tax whose payment grace period can be decided by the taxpayer, is not regarded as a foreign tax.

In order to prevent the credit from reducing corporation tax on Japan-source income, certain limitations are set on the amount of foreign taxes that can actually be credited. The ceiling is 35% for the foreign taxes paid in the tax years beginning on or after 1 April 2012.

A foreign tax credit is not applicable for enterprise tax purposes, although foreign branch income attributable to a business executed outside Japan is exempt from enterprise tax.

Generally speaking, the foreign tax credit system does not apply to the extent the dividend income from the foreign subsidiary is subject to the dividend exemption system.

Foreign corporations with a PE in Japan should note that under the 2014 Tax Reform, when a foreign corporation’s PE in Japan is subject to taxation in Japan as well as in jurisdictions other than its country of residence, double taxation may arise. To alleviate an unfair tax burden, a foreign tax credit regime is also applicable to PEs in Japan similar to that which applies to Japanese corporations. However, foreign tax (including WHT) paid in the enterprise’s country of residency would not, in principle, be creditable under consequential changes to the foreign tax credit regime.

**Tax credit for research and development (R&D) cost**

The R&D tax incentive is the largest incentive in terms of tax benefit in the Japanese corporate tax system. Thus, the Tax Commission Report, on one hand, wanted to limit the tax revenue cost of the incentive, while also maintaining the benefit from a ‘competitiveness’ perspective. Thus, the trend in the legislation is to reward increases in R&D spending rather than support existing spending, which has been the case in the 2014 Tax Reform and is continued in the 2015 Tax Reform Act. In addition, there is focus on the ‘special R&D’, which is the type of R&D that is considered likely to develop innovative basic research. This is illustrated as follows:

The amendments apply for tax years beginning on or after 1 April 2015.

**Investment incentive to improve production efficiency**

An investment incentive is available for corporations for investments in production facilities that improve production efficiency. Corporations eligible for the incentive are limited to enterprises that acquire new facilities to improve production efficiency. When certain requirements are met, a corporation is allowed to claim 25%, 50%, or 100% depreciation of assets when the assets are placed in service, or 2%, 3%, 4%, or 5% tax credit (limited to 20% of the corporate tax liability before the credit). This incentive is effective for assets acquired on or before 31 March 2017.
Japan

Special tax treatment for investment in certain equipment
SMEs filing ‘blue form’ tax returns may elect, under certain conditions, to claim accelerated depreciation of 100% of the base acquisition cost or a special tax credit equivalent to 10% of the base acquisition cost on designated equipment to the extent that it is acquired between 1 April 2014 and 31 March 2017. The maximum tax credit is limited to 20% of the taxpayers’ corporate tax liability.

The ‘Incentive for New Investment into Production Facilities’ is applicable to any industry that invests in new production facilities (30% special depreciation or 3% tax credit on acquisition cost, up to 20% of corporate tax liability, etc., and subject to certain conditions). In addition, an investment incentive applies to SMEs that invest in equipment and furnishings pursuant to certain facility remodelling (30% special depreciation or 7% tax credit on acquisition cost, up to 20% of corporate tax liability [one-year carryforward of any excess], and subject to certain conditions). The SME tax incentive is granted to an SME engaged in the distribution, retailing, service, and/or agriculture business. This incentive is effective for tax years beginning on or after 1 April 2013 through 31 March 2017.

Special tax treatment for the Designated International Strategic Area
Qualifying corporations doing business in certain designated metropolitan areas (i.e. the ‘Designated International Strategic Area’) will be granted the following tax incentives:

• If qualifying corporations are engaged in specified businesses in the Designated International Strategic Area, certain capital expenditures (JPY 20 million or more for machinery and equipment and JPY 100 million or more for building and construction) incurred for the specified businesses will be eligible for either (i) a deduction equal to 50% of the capital expenditures (building is limited to 25%) or (ii) a tax credit equal to 15% of the capital expenditures (building is limited to 8%), with the maximum credit amount in any given tax year being equal to 20% of the tax liability before the credit, with a one year carryforward.

• If qualifying corporations are engaged primarily in specified businesses in the Designated International Strategic Area, they will be entitled to an income exclusion of up to 20% for five years, provided they are incorporated in the Designated International Strategic Area and incur certain capital expenditures. If qualifying corporations claim the 20% income exclusion, they will not be entitled to the tax credit regime described above.

Qualifying corporations will be eligible for the tax credit regime described above with respect to capital expenditures incurred from the effective date of the law concerning this regime through 31 March 2016. Corporations will be eligible for the 20% income exclusion regime for five years once they are specified as qualifying corporations during a period from the effective date of the law concerning this regime through 31 March 2016.

Investment incentive designed for National Strategic Special Areas
Tax incentive measures designed for National Strategic Special Areas include special depreciation or tax credit by investment in such designated areas. This incentive is effective for assets acquired on or before 31 March 2016.

Employment promotion taxation
If qualifying corporations increase the number of employees subject to employment insurance by 10% or more and by five people (two in the case of SMEs) or more from the end of the prior tax year, the qualifying corporations will be eligible for a tax credit equal to the increased number of the employees multiplied by JPY 400,000 with the limitation of 10% (20% in the case of SMEs) of the tax liability before the credit, subject to certain conditions for the tax years that commence from 1 April 2011 (excluding years ending before 30 June 2011) to 31 March 2016.
Another tax incentive allows an employer corporation to claim a tax credit based on increases in salary payments (tax credit equal to 10% of the increased salary amount with a limitation of 10% [20% in case of SME] of the tax liability, subject to certain conditions). The employer corporation is allowed to claim a credit by either increased employment incentive or employment promotion incentive as explained above. To take a credit, the employer corporation must be a 'blue form' filer. The credit is effective for tax years commencing from 1 April 2013 to 31 March 2018.

**Incentive for venture capital investment**
To assist venture capital investment, certain procedures to accredit venture capital partnerships was legislated in the Industrial Competitiveness Enhancement Law. Investment tax incentives were also introduced to allow corporate investors the ability to take a loss from a venture capital investment on an accelerated basis compared to current rules. A qualified investor is allowed to deduct a tax reserve for the investment loss at up to 80% of the book value of the investment. This incentive is effective for investors into a qualified partnership designated on or before 31 March 2017.

**Incentive for corporate reorganisation**
To promote business reorganisation within the same industry in order to improve business profitability, a corporation can apply to be a ‘qualified’ corporation by submitting a business reorganisation plan pursuant to the Industrial Competitiveness Enhancement Law. A qualified investor is allowed to deduct a tax reserve for the investment loss at up to 70% of the book value of the investment or loan. This incentive is effective for corporations designated on or before 31 March 2017.

**New incentives for the revitalisation of local ‘hubs’**
A taxpayer will be eligible for certain tax incentives if it relates to or expands certain kinds of operations in local areas (generally other than Tokyo, Osaka, or Nagoya). Details as to the kinds of operations eligible will be included in a future Revised Regional Revitalization Law.

Any qualifying investments will have the following depreciation incentives with respect to investments in buildings:

<table>
<thead>
<tr>
<th>Depreciation incentives</th>
<th>Investment pursuant to an approved relocation plan</th>
<th>Investment pursuant to expanding an existing operation</th>
</tr>
</thead>
<tbody>
<tr>
<td>Type of depreciation (if plan is approved prior to 31 March 2018 and asset is acquired within two years of approval).</td>
<td>Additional first year depreciation of 25% of the acquisition cost (depreciation is accelerated).</td>
<td>Additional first year depreciation of 15% of the acquisition cost (depreciation is accelerated).</td>
</tr>
</tbody>
</table>

Alternatively, a taxpayer may choose to take a tax credit rather than accelerated depreciation, as follows:

<table>
<thead>
<tr>
<th>Tax credits</th>
<th>Investment pursuant to an approved relocation plan</th>
<th>Investment pursuant to expanding an existing operation</th>
</tr>
</thead>
<tbody>
<tr>
<td>Tax credits (if plan is approved and asset acquired prior to 31 March 2017)</td>
<td>Acquisition costs x 7%</td>
<td>Acquisition costs x 4%</td>
</tr>
<tr>
<td>Tax credits (if plan is approved prior to 31 March 2018 and asset is acquired within two years of approval)</td>
<td>Acquisition costs x 4%</td>
<td>Acquisition costs x 2%</td>
</tr>
</tbody>
</table>

Minimum investment is JPY 20 million for large corporations and JPY 10 million for SMEs.
In addition, an employment related tax credit is allowed for increased employment in a local hub if hired within two years of the plan approval. The credit shall be JPY 500,000 times the number of increased employees at a maximum (if certain conditions are not met, the credit becomes JPY 200,000 per employee).

In total, the amount of the above tax credits can only offset up to 30% of a corporation’s tax liability.

**Tohoku Earthquake and special tax legislation**

**Corporate tax refunds by loss carrybacks**
Under the current law, one year tax loss carrybacks are allowed for SMEs. Other corporations are allowed a one year tax loss carryback in the year of liquidation. In the Tohoku Legislation, corporations that incurred a specified disaster loss from the Tohoku Earthquake (the ‘Tohoku Earthquake Disaster Loss’) may carry back such loss for two years for national tax purposes. Such carryback may be elected either with the annual corporate tax return or an interim tax return based upon a full interim closing of the corporate books. For local tax purposes, the tax loss carryback is not applicable, although carryforward of all losses (including the Tohoku Earthquake Disaster Loss) is allowed over the normal nine-year carryforward period.

**Special depreciation for newly acquired assets relating to the Tohoku Earthquake**
A corporation may claim a special depreciation of certain assets in the year of acquisition in addition to normal depreciation. The qualified assets should be acquired and placed in service between 11 March 2011 and 31 March 2016 and satisfy either (i) or (ii) below:

i. Newly acquired assets to replace assets destroyed in the Tohoku Earthquake, including:
   - Buildings, structures, machinery, or equipment.
   - Registered vessels, aircraft, or vehicles.

ii. Newly acquired assets placed in service in a business carried out at the affected area*, including buildings, structures, machinery, or equipment.

* Areas where destroyed buildings or structures were located and surrounding areas where machinery or equipment were installed.

<table>
<thead>

<td>36</td>
<td>30</td>
</tr>
</tbody>
</table>

**Rollover relief given to newly acquired assets to replace old assets**
Under the current statutes, up to 80% of the capital gain realised when a corporation acquires an asset to replace an old one may be deferred. Under the Tohoku Legislation, for certain assets acquired between 11 March 2011 and 31 March 2016, the entire amount of capital gain may be deferred. Qualified replacement assets include the following:

- Real estate or depreciable assets located in Japan purchased to replace real estate (including buildings or structures fixed to the land) in the affected area that had been acquired prior to 11 March 2011.
Japan

• Real estate or depreciable assets purchased in the affected area to replace real estate, buildings, or structures located other than in the affected area.

When applying the rollover relief rules, the due date for acquiring replacement assets is extended for a further two years if it is difficult to acquire the replacement asset by the normal due date as a result of the Tohoku Earthquake.

Additional special tax relief for restoration of the affected area
The following additional tax incentives were introduced on 14 December 2011. Please note that a corporate taxpayer must choose one of (i), (ii), or (iii) below, where (ii) can be chosen only where ‘employment promotion taxation’ (see above) is not applied.

i. Tax incentive for a newly established company doing business in designated areas
A newly established company satisfying certain criterion is not subject to tax on income for the first five years of its existence. However, in effect, the tax holiday is more akin to a deferral since the income is offset by a special reserve that is reversed in later years.

The tax incentive applies to a company that acquires machinery, equipment, and building structures in a specified industrial concentration area that is organised by an approved local government and designated by 31 March 2016 by the local government as a company that contributes to providing opportunities for employment (‘Designated Company’) and newly established on or after the date when the designated restoration planning is approved.

If a Designated Company set up reserves for reinvestment in each of the tax years (including a day) within a designated period (five years from the date on which a company is designated), the amount of reserve (which may be set up to be 100% of taxable income) is deductible and may essentially defer tax for ten years.

In a tax year where a Designated Company reinvests in machinery or building in a specified industrial concentration area, a corporation is allowed to claim a deduction of the lesser of (i) special depreciation up to the balance of the reserve and (ii) special depreciation equal to the reversed reserve amount.

ii. Special corporation tax credit
A Designated Company is allowed to enjoy a tax credit for 10% of salary paid (but limited to 20% of corporation tax due) to employees within a specified industrial concentration area.

iii. Special depreciation and special tax credit
A Designated Company is allowed to enjoy special depreciation or a special tax credit for (i) machinery and equipment and (ii) buildings and structures acquired by 31 March 2016 in a specified industrial concentration area.

• Special depreciation: Depreciation rates applicable for machinery and equipment are 100% if acquired and used by 31 March 2014, and 50% if acquired and used by 31 March 2016. The depreciation rate applicable for buildings and structures is 25%.
• Special tax credit: The rates of tax credit applicable for (i) machinery and equipment and (ii) building and structures are 15% and 8%, respectively, but limited to 20% of corporation tax due. Any tax credits in excess of this limitation can be carried forward for four years.
## Withholding taxes

### Tax treaty network

As of 1 January 2015, Japan has entered into 64 tax treaties with 89 countries and/or regions. Companies making certain payments are required to withhold income taxes using the following rates.

### Notes

The applicable treaty rates are effective as of 1 January 2015.

1. The tax treaty rates apply only to corporate shareholders. The applicable treaty should be checked for conditions required to claim the reduced rate. Note that WHT may be subject to the income surtax of 2.1%, which is levied for the income earned for the period from 1 January 2013 through 31 December 2037.

2. The applicable treaty should be reviewed because certain tax treaties exclude film royalties and/or gain from copyright transfer from taxable income. Note that WHT may be subject to the income surtax of 2.1%, which is levied for the income earned for the period from 1 January 2013 through 31 December 2037.

3. 15% for publicly traded shares (minority interest [less than 3% ownership]) and investment trusts. Note that WHT may be subject to the income surtax of 2.1%, which is levied for the income earned for the period from 1 January 2013 through 31 December 2037.

4. Interest on bank deposits and/or certain designated financial instruments is subject to a 15% national WHT and 5% local inhabitants WHT (20% combined). Taxation of such interest is fully realised by withholding, so resident individuals are not required to aggregate such interest income with other income. Interest on loans made by resident individuals is not subject to WHT; instead, it is taxed in the aggregate with other income. Such WHT is subject to the income surtax of 2.1%, which is levied for the income earned for the period from 1 January 2013 through 31 December 2037.

5. Dividends, interest, and royalties earned by non-resident individuals and/or foreign corporations are subject to a 20% national WHT under Japanese domestic tax laws in principle. An exceptional rate of 15% is applied to interest on bank deposits and certain designated financial instruments. Interest on loans, however, is taxed at a 20% rate. A special exemption from WHT applies to certain long-term corporate bonds issued to non-residents in foreign countries. Note that WHT may be subject to the income surtax of 2.1%, which is levied for the income earned for the period from 1 January 2013 through 31 December 2037.
6. Tax treaties with many countries provide reduced tax rates, as indicated. Some treaties, however, provide higher tax rates (e.g. Brazil, Thailand) or do not provide rates (e.g. Egypt, New Zealand). In these instances, rates specified under Japanese domestic tax laws apply. Each treaty should be consulted to see if a reduced rate for dividends (in the case of substantial holdings) is applicable.

7. The tax treaty was concluded mainly for the purpose of information exchange.

8. The tax treaty with Brazil provides a 25% tax rate for certain royalties (trademark). However, the WHT rate cannot exceed 20.42% (including the income surtax of 2.1%) on any royalties to be received by a non-resident taxpayer of Japan under Japanese income tax law. Film royalties are taxed at 15%. Any other royalties are taxed at 12.5%.

9. The treaty with the former Czechoslovakia is applied to the Czech Republic and the Slovak Republic. It stipulates that cultural royalties are tax exempt.

10. Film royalties are taxed at 20%, and other royalties are taxed at 15%.

11. Cultural royalties are tax exempt.

12. The rate of 10% for royalties includes consideration for technical services.

13. The rate for royalties is reduced from 10% to 5% by Protocol.

14. Dividends received from subsidiaries, by parent companies that have met certain conditions, are exempt from WHT.

15. Dividends received from subsidiaries for which the parent company has over 50% shareholding are tax exempt. Interest received by government and other specific entities, or paid as a consequence of sale on credit of any equipment, merchandise, or service, is tax exempt.

16. A 5% rate is applied to a company that has over 50% shares with direct voting rights, and a rate of 7.5% is applied to a company that has over 25% shares with direct voting rights.

17. Film royalties are taxed at 15%. Any other royalties are taxed at 10%.

18. Cultural royalties are taxed at 10%.

19. Royalties paid for the use of certain equipment are taxed at 5%.

20. Interest paid to financial institutions is tax exempt, as well as film and copyright royalties. Patent royalties are subject to a 10% rate.

21. If certain conditions for beneficial owners are met, dividends are taxable only in the contracting state of which the beneficial owner is a resident.

22. Dividends paid by a corporation that is engaged in industrial undertakings are taxed at 15%. Interest paid to financial institutions is taxed at 10%.

23. Interest paid to financial institutions is taxed at 10%.

24. The treaty with the former USSR is applied to Armenia, Azerbaijan, Belarus, Georgia, Kyrgyzstan, Moldova, Russia, Tajikistan, Turkmenistan, Ukraine, and Uzbekistan. It stipulates that cultural royalties are tax exempt.

---

**Tax administration**

**Taxable period**

The tax year is the corporation's annual accounting period specified in its articles of incorporation. A Japan branch of a foreign corporation must use the same accounting period that is adopted by the corporation in its home country.

**Tax returns**

Corporate income tax returns (i.e. the national corporation tax return, enterprise tax return, and local inhabitants' tax return) are self-assessment tax returns.

If a corporation meets certain conditions, such as keeping certain accounting books, and makes an application for it in advance, it is allowed to file a ‘blue form’ tax return. A blue form filing corporation may benefit from loss carryforward and other benefits.

A corporation (including a branch) is required to file the final tax return within two months after the end of its annual accounting period. If a corporation cannot file the final return because of specific reasons, the due date of final return may be extended for one month with the tax authority's approval.

**Payment of tax**

Income taxes payable on the final corporate income tax return should be paid on or before the filing due date of the final tax returns (usually two months after the end of the corporation's accounting period). If an extension of time for filing is granted, the taxes may be paid on or before the extended due date with interest accrued at a rate of 1.8% (for the year 2015) per annum for the period from the day following the original due date (i.e. two months after the end of an accounting period) to the date of the actual payment.
Provisional tax payments are required for a corporation that has a fiscal period longer than six months. Provisional taxes generally are computed as one-half of the tax liabilities for the previous year, but they may be reduced by the filing of interim tax returns that reflect semi-annual results of the operations. The provisional tax payment is required to be made within two months after the end of the sixth month of the corporation's accounting period.

**Penalties**

If the tax return is filed late, a late filing penalty is imposed at 15% to 20% of the tax balance due. In the case that a corporation voluntarily files the tax return after the due date, this penalty may be reduced to 5%.

An under-payment penalty is imposed at 10% to 15% of additional tax due. In the case that a corporation amends a tax return and tax liabilities voluntarily after the due date, this penalty may not be levied.

In addition, interest for the late payment of tax is levied at 2.8% per annum for the first two months and increases to 9.1% per annum thereafter (for the year 2015).

**Consolidated taxation**

The parent company will file the consolidated tax return and pay national corporate income tax for the group. The consolidated tax return and payment due dates are the same as previously discussed; however, the due date of the final return may be extended for two months.

For local corporate income taxes, each member of the consolidated group must separately file the returns and pay the taxes.

**Tax audit process**

Generally speaking, corporate tax audit is performed in cycles of three to five years' duration. However, this period may be shortened in the case that some significant tax matters were pointed out in the prior audit and so on. If taxpayers request a downward correction, a tax audit will be performed to make sure of it.

With regard to tax audit procedures, tax laws have not clarified them thus far. Prior to conducting a tax audit, in principle, tax agents are required to notify taxpayers, and, upon completion of tax audits, tax agents are required to provide to taxpayers a brief written summary of their findings, etc.

Note that due to the 2015 Tax Reform, once an audit is complete, the basic principle is that a second audit is not allowed. However, if newly acquired information is obtained by the tax authorities that lead them to conclude that the reported taxable income should have been different, then the tax authorities can conduct another audit of the taxpayer. This limitation on the ability of the tax authorities to conduct a second audit only applies if the first audit was conducted on-site. If a 'desk audit' is only conducted, where the tax authorities do not conduct the audit on-site, no limitation applies.

**Statute of limitations**

The statute of limitations to request a downward correction of prior year tax liabilities is five years (six years for transfer pricing) from when the original tax return was filed.

The statute of limitations with regard to upward corrections by the tax authorities is also five years (six years for transfer pricing).

**Topics of focus for tax authorities**

Tax authorities are often focusing on cross-border, inter-company transactions (i.e. transfer pricing or donation issues), PE, and significant group restructuring, among
other issues. Any developments in discussion on G20/OECD’s BEPS project will also be of great interest for Japanese authorities.

Other issues

Requirement for banks to collect and remit information regarding bank accounts owned by non-residents

In July 2014, the OECD guidelines for automatic information exchange by financial institutions were issued, and it was recommended by the OECD fiscal committee to begin such measures by G20 countries by the end of 2015. To meet this recommendation, the 2015 Tax Reform Act introduces a tax reporting system. Under the Act, it is anticipated that individuals will be required to report information to the relevant branch of the financial institution, which will, in turn, submit such information to the tax authorities in Japan.

The person who contracts with the financial institution for a deposit to a bank account in Japan on or after 1 January 2017 will be required to report the relevant information to the bank, including (i) name, (ii) address, (iii) date of birth, and (iv) resident country. If the resident country is outside Japan, the individual will be required to report the taxpayer identification number in the taxpayer’s resident country. The financial institution will be required to report the individual information collected as well as details regarding the account (balances, transactions, etc.) as of 31 December by the following 30 April.

**Significant developments**

There have been no significant corporate tax developments in Jersey during the past year.

**Taxes on corporate income**

Resident companies are generally taxed on their worldwide income. A permanent establishment (PE), e.g. a branch of a company, is taxed on profits attributable to the PE. Non-resident companies are taxable on Jersey real estate income.

Companies pay income tax at a rate of 0%, 10%, or 20% on taxable income. The general rate applicable is 0%; the 10% and 20% rates apply to certain companies/income streams as explained in this section. The tax rate applies to the company as a whole, the only exception being Jersey-source real property income, which is taxed at 20% regardless of the classification of the real property holding company.

Certain Collective Investment Funds and Securitisation Vehicles can elect to be exempt from tax on income, other than income from Jersey land or property, for an annual fee of 500 British pounds sterling (GBP).

The 20% tax rate applies to Jersey-based utility companies, such as telephone, gas, and electricity companies. Additionally, income from Jersey real estate, including rental income, property development profits, and income from exploiting Jersey land (e.g. quarrying activities) is subject to tax at 20%. Companies involved in oil importation and supply are also taxed at 20%.

The 10% rate applies to financial services companies. A company is defined as a financial services company if:

- it is registered under the 1998 financial services law to carry out investment business, trust company business, or fund services business as an administrator or custodian in relation to an unclassified or an unregulated fund
- it is registered under the 1991 banking business law, or
- it holds a permit under the collective investment funds law of 1988 as an administrator or custodian.

The 0% rate applies to all entities that are not exempt, financial services entities, or utility companies, including fund managers who do not hold any of the permits mentioned above.

**Local income taxes**

There are no local government taxes on income.
Corporate residence

A company is regarded as tax resident in Jersey if it is incorporated in Jersey or if it has its place of central management and control in Jersey. However, a Jersey incorporated company that is managed and controlled elsewhere will not be regarded as a Jersey resident, provided certain conditions are satisfied.

Permanent establishment (PE)

Under domestic legislation, a PE, in relation to a company, includes a branch of the company, a factory, shop, workshop, quarry, or a building site, and a place of management of the company; however, the fact that the directors of a company regularly meet in Jersey shall not, of itself, make their meeting place a PE.

For a definition of PE contained in Jersey’s double tax agreements (DTAs), the relevant clause and agreement should be reviewed. In general, it may include a branch, management, or other fixed place of business, but not an agency, unless the agent has, and habitually exercises, a general authority to negotiate and conclude contracts or has a stock of merchandise from which the agent regularly fills orders.

Other taxes

Goods and services tax (GST)

The standard rate of GST is 5%.

Companies with taxable supplies of more than GBP 300,000 per annum are required to register for GST.

International service entity (ISE) status

To address the difficulty of irrecoverable input tax in the financial services sector, and to mitigate the administrative cost of GST for exporters in general, Jersey has introduced the concept of an ISE. Where an entity qualifies for this status:

• it will not be required to register for GST
• services to it will be zero-rated (i.e. treated as an export) where the supply exceeds GBP 1,000, and
• input tax on purchases of less than GBP 1,000 may be reclaimed.

ISE status is automatically available to a wide variety of service providers and administered entities based in Jersey, upon application and payment of the relevant fee, including licensed banks, licensed trust service providers, licensed fund administrators, fund managers, and managed managers.

Other entities not automatically eligible under one of the categories above, including companies, partnerships, trusts, unrecognised funds, and special purpose vehicles, may still obtain ISE status if they fulfil certain criteria.

The ISE must be included on a list maintained by the Comptroller of Taxes. The list will refer either to the entity itself or (e.g. for administered entities) a class of entities as submitted by the administrator.

Customs duties

A common customs tariff is applicable on all goods imported from outside the European Union (EU). The amount is dependent on what the goods are and where they are imported from.

Excise taxes

An excise duty tax is payable on imported alcohol, tobacco, and fuel at varying rates.
Property taxes
There are no property taxes in Jersey apart from income tax on Jersey-source property income, stamp duty on Jersey real estate, and rates levied by each parish.

Stamp duty
Stamp duty is payable on the purchase or transfer of Jersey real estate, with rates ranging from 0% to 7%. Mortgages secured by a charge over Jersey real estate are subject to stamp duty at rates of up to 0.5% of the amount borrowed. No stamp duty is payable on the transfer of shares.

Land transaction tax
A land transaction tax applies when shares in companies are transferred and the ownership of which confers a right of occupation of residential real estate in Jersey. The amount of land transaction tax payable is equal to the stamp duty that would have been suffered if the real estate were held directly.

Social security contributions
Employers are responsible for paying employer social security contributions at a rate of 6.5% on each employee's gross earnings, up to the monthly standard earnings limit of GBP 4,020 for 2015 (annual limit GBP 48,240). Employer social security contributions of 2% apply to employees' earnings above the standard earnings limit, up to an upper earnings limit (GBP 13,302 monthly/GBP 159,624 annually).

Payroll taxes
Employers are required to deduct tax from salaries paid to employees and remit this to the tax authority to settle the employees' tax liability. Under the Income Tax Instalment System (ITIS), the tax authority issues each employee with an effective rate notice to pass to their employer indicating the deduction rate. If no such notice is provided, the default rate of deduction applied is 20%.

Branch income
Branch income is taxed at the rate applicable to the company. No further tax is withheld on the transfer of profits abroad.

Income determination

Inventory valuation
Inventory is valued at the lower of historical cost or net realisable value. The last in first out (LIFO) method is not permitted. Generally, there are no material differences between accounts prepared on a normal accounting basis and those prepared on a tax basis.

Capital gains
Capital gains are not subject to tax in Jersey.

Dividend income
There is no requirement to withhold tax at source when paying dividends. If a dividend is paid out of profits that have suffered tax at a 10% or 20% rate, then the net dividend will be accompanied by a tax credit at the applicable rate. Repayment of the tax credit can be claimed by Jersey investment companies and financial services companies receiving the dividends, subject to certain restrictions. However, trading companies subject to tax at 0% are not entitled to claim a repayment of any of the tax credit.

Stock dividends
Stock dividends are not taxed as income.
**Interest income**
Interest income forms part of taxable income and is taxed at the rate applicable to the company.

**Foreign income**
Income tax is levied on foreign branch income when earned and on foreign dividends, interest, rents, and royalties. Double taxation is mitigated by either the granting of unilateral relief to the extent of taxing foreign income net of foreign taxes or by treaty relief, which gives credit for foreign tax. Concessional credit relief might be granted in certain limited circumstances upon application.

In addition to the long standing DTAs with the United Kingdom and Guernsey, Jersey now has DTAs with Australia, Denmark, Estonia, Faroes, Finland, France, Germany, Greenland, Hong Kong, Iceland, Isle of Man, Luxembourg, Malta, New Zealand, Norway, Poland, Qatar, Singapore, and Sweden. The scope varies from agreement to agreement, but most are of limited scope.

**Deductions**
Normally, business deductions are allowed if they are incurred wholly and exclusively for trade purposes.

**Depreciation and depletion**
Capital allowances are available using the diminishing-balance method on machinery and equipment, including vehicles, at a rate of 25%. For this purpose, all such assets are pooled, and the allowance is calculated by reference to the value of the pool.

On disposal of an asset, the lower of cost and sale proceeds of the asset is deducted from the pool. A balancing charge is levied if the proceeds exceed the balance of the pool.

Motor vehicles costing more than GBP 22,000 and greenhouses are subject to special rules and are not pooled with other assets.

By concession, an alternative is to claim the full cost of replacement in the year of replacement.

Capital allowances are not applicable to buildings or the depletion of natural resources.

**Goodwill**
Goodwill expenditure is non-deductible for Jersey income tax purposes.

**Start-up expenses**
Once a company has commenced its trade, start-up expenditure will be allowable for tax purposes if it is not capital in nature and has been incurred wholly and exclusively for trade purposes.

**Interest expenses**
Interest expense will be allowable if it is incurred for the purposes of a trade or is paid in connection with a loan taken out for a qualifying purpose. Interest relief may be restricted if the interest exceeds the amount that could reasonably be expected to be charged on a commercial basis.

**Bad debts**
Trading bad debts are normally allowable for Jersey income tax purposes unless they relate to a general provision.
Charitable contributions
Charitable contributions are generally non-deductible for tax purposes, unless the contribution itself provides a benefit to the trade (i.e. marketing).

Fines and penalties
Fines and penalties are generally non-deductible for tax purposes.

Taxes
Local income tax paid is not deductible in computing taxable income. ISE fees paid are a tax-deductible expense.

Net operating losses
No distinction is drawn between different types of income or losses arising from different trades or sources, apart from Jersey property income, which is separately streamed.

Unrelieved losses may be carried forward and used to offset profits in future accounting periods. Alternatively, losses can be group relieved to group companies in the same income tax rate band.

There are now only very limited circumstances where a company can obtain relief for carrying back losses.

Payments to foreign affiliates
There are no withholding taxes (WHTs) on patent royalties paid by Jersey companies to non-residents.

Group taxation
Group taxation is not permitted in Jersey. However, there are provisions for group relief between group companies subject to the same rate of tax. It is not possible to relieve losses between two companies taxed at different rates. It is not possible for group companies to relieve losses from Jersey property rental income. Also, it is only possible to relieve losses from Jersey property development profits and from quarrying activities against profits arising from the same activities.

Transfer pricing
There are no specific rules in relation to transfer pricing in Jersey. There is, however, a general anti-avoidance provision in Jersey tax law. It may be applied by the Comptroller of Taxes if a transaction or a combination or series of transactions is entered into for the avoidance or reduction of Jersey income tax. In addition, interest relief may be restricted where the interest incurred exceeds the amount that could reasonably be expected to be charged on a commercial basis.

Thin capitalisation
There are no specific rules in relation to thin capitalisation in Jersey.

Controlled foreign companies (CFCs)
Jersey has no CFC legislation.

Tax credits and incentives
There are generally no special incentives for locally owned businesses in view of the low rate of tax.
**Foreign tax credit**
There is no local foreign tax credit regime in Jersey. DTAs need to be considered as appropriate. Unilateral relief may be available under very limited specific circumstances.

**Withholding taxes**
There are no WHTs on dividends or interest paid by Jersey companies.

**Tax administration**

**Taxable period**
The tax year is the calendar year. Companies are assessed on income earned in respect of the financial year that ends within the applicable calendar year of assessment.

**Tax returns**
The system relies on the filing of a return of information with the Jersey tax authority, which then raises an assessment (in the case of companies taxed at 10% or 20% on all or part of their income). Companies taxed at 0% are required to submit a tax return but are not required to submit accounts and tax computations.

There is a filing deadline for the corporate return of 6pm on the last Friday in July following the year of assessment and a late filing penalty of GBP 250.

**Payment of tax**
For companies, tax is payable in arrears during the calendar year following the year of assessment.

Under the law, tax is due the day after the assessment is made. In practice, an estimated assessment is made by the tax office in February/March, which is then appealed based on information at that time. A payment is suggested based on the appeal with the company making a top up payment (if necessary) prior to the surcharge deadline (the Friday after the first Monday each December in the year following the year of assessment) or once a final computation has been produced and submitted.

Tax paid after a prescribed date (usually the first Friday in the December following the year of assessment) incurs a 10% surcharge.

**Tax audit process**
There is no formal tax audit process in Jersey.

**Statute of limitations**
There is no statutory limitation date, as such. If the Comptroller discovers profits have not been fully assessed, the Comptroller can issue an amended/additional assessment at any time not later than five years after the expiration of the year of assessment. If the error involves fraud, wilful default, or neglect, then the assessment can be revised at any time.

**Other issues**

**Intergovernmental agreements (IGAs)**
On 13 December 2013, the Jersey authorities signed an IGA with the United States to facilitate tax reporting under the Foreign Account Tax Compliance Act (FATCA) regime. The Jersey authorities have also signed a similar IGA with the United Kingdom.
Tax information exchange agreements (TIEAs)
The Jersey tax authorities are committed to being tax transparent, with an increased emphasis on agreeing further DTAs and TIEAs. Jersey has signed TIEAs with 36 countries and is negotiating DTAs with several other jurisdictions (see Foreign income in the Income determination section for a description of DTAs that have been signed).
Significant developments

On 31 December 2014, the Jordanian government approved and published a new income tax law, which entered into effect from 1 January 2015. The new Law includes several amendments to individual and corporate income tax (CIT) rates, withholding tax (WHT) rates, and various administrative changes. See the corresponding sections of this summary for more information.

The temporary income tax law no. 28 for the year 2009 was in force until 31 December 2014 and is now replaced by the new income tax law no. 34 for the year 2014 starting from 1 January 2015.

Taxes on corporate income

The corporate tax rates in Jordan are applied based on the industry/business activities from which the taxpayer generates income. According to the new income tax law, the corporate tax rates are as follows, starting from 1 January 2015:

- 35% (previously 30%) for banks.
- 24% for telecommunication, insurance and reinsurance, financial intermediation companies (including exchange and finance leasing companies), companies that generate and distribute electricity, and companies that undertake mining raw material activities.
- 14% for the industrial sector.
- 20% (previously 14%) for other companies.

Jordanian resident corporations are not subject to income tax on their worldwide income unless that income is raised from sources that originate and relate to Jordanian deposits and funds. For foreign branches of Jordanian resident corporations, all of the branch net income is taxed at a fixed rate of 10% (previously, 20% of net income after foreign taxes was subject to corporate tax at 30%).

Non-resident corporations are taxed through WHT (see the Withholding taxes section).

Local income taxes

There are no local income taxes in Jordan.

Corporate residence

An entity will be deemed to be resident in Jordan if it has been established and registered in accordance with the provisions of the Jordanian legislation in force and (i) has an office or branch practicing management and supervision of its work in Jordan, (ii) whose management head office or actual office is located in Jordan, or (iii) which the government or any official or public institutions own more than 50% of its capital.
Permanent establishment (PE)
There are no clear provisions in the Jordan income tax law to define PE.

Other taxes

Sales tax
A general sales tax similar in operation to a value-added tax (VAT) is imposed at the rate of 16% on the following transactions:

- Sales of goods or services, or both.
- Importing any service or goods from outside Jordan or from the free zone areas and markets inside Jordan.

Special tax rates are applied on certain items (see Excise tax below).

A zero rate is applied to the export sales of goods and services outside Jordan, to the free zone areas and markets, to the Aqaba Special Economic Zone (ASEZ), and to development areas. A zero rate is also applied to sales inside Jordan of certain food items, books, magazines, manure, farm tractors, other agricultural tools, and salt.

Goods exempt from sales tax include fish, eggs, animals, bread, water packed in less than 5 litres, trees and plants, fruits, vegetable oils, honey, tea, sugar, gold, money, potash, emergency and fire vehicles, electricity, and pharmaceutical products.

Services exempt from sales tax include the following:

- Air transport.
- Education.
- Disposal of sewage and waste.
- Public health and similar activities.
- Activities of religious organisations.
- Activities of social organisations.

Customs duties
Certain goods imported to Jordan are subject to customs duties. Customs duties vary depending on the type and the origin of imported goods, as prescribed by the Customs Tariff. The Customs Tariff is based on the Harmonised Commodity Description and Coding System (HS Nomenclature).

Excise tax
Excise tax is the special sales tax that is imposed on certain goods and services, including cement, tobacco products, wines, spirits, cars, beer, fuel, and lubricants.

Property taxes
There is a property tax in Jordan that is paid annually, and the tax rate is determined by the municipality depending on the location and size of the property and, in case of buildings, depending on annual rental value.

Transfer property taxes
Transfer of property is subject to tax at a rate of 9% (registration fee at a rate of 5% and sale of property tax at a rate of 4%).

Stamp duty
Generally, an ad valorem stamp duty of 0.3% or 0.6% is levied.
Payroll tax
As per the new income tax law, which entered into effect from 1 January 2015, the payroll tax rates are imposed at progressive rates ranging from 7% and 20% (previously 7% to 14%).

Social security tax
As of 1 January 2015, social security tax is imposed on the employer and the employee at rates of 13.25% and 7% (previously 12.75% and 6.75%), respectively, on the monthly salaries and certain allowances. The employer should report and withhold these contributions on a monthly basis.

Branch income
Operating branches of non-resident companies registered in Jordan are taxed based on their activities/business being carried out in Jordan at the prevailing corporate tax rates. Non-operating branches (regional or representative offices) of non-resident companies registered in Jordan are generally prohibited from carrying on any commercial activity in Jordan.

Income determination
Any income incurred in or from Jordan, regardless of the place of payment, shall be subject to tax. This includes, but is not limited to, income from:

- Professional services or activities.
- Interest, commissions, discounts, currency differences, deposit profits, and profits from banks and other legal resident persons.
- Royalties.
- Selling goods produced in Jordan, whether sold in Jordan or exported.
- Selling or leasing of movable properties located in Jordan.
- Leasing immovable properties located in Jordan and the income from key money.
- Selling or leasing intangible assets in Jordan, including goodwill.
- Insurance premiums due according to insurance and re-insurance agreements for risk in Jordan.
- All forms of telecommunication services, including international telecommunications.
- Transportation between Jordan and any foreign country.
- Re-export.
- Service compensation gained by a non-resident person from Jordan for a service provided to any person if the activity or the work related to this compensation was carried out or the output of this service was used in Jordan.
- Prizes and lottery if exceeds 1,000 Jordanian dinars (JOD), whether paid in cash or in kind.
- Any contract in Jordan, such as construction contracting, commercial agencies profits, and any other similar entities, whether their source is inside or outside Jordan.
- Any other source, which has not been exempted according to the provisions of the law.

The following shall be exempted from tax:

- The King’s allocations.
- Income of public and official institutions and municipalities, excluding its income from any investment activities or annual surplus that the Council of Ministers decides, upon the recommendation of the Minister, to be subject to tax.
Jordan

- Income generated by non-operating foreign companies, such as the regional office and the representative office, and which is received for its business abroad.
- Income of charity awqaf (public endowment) and income from the Orphans Development Fund.
- Income of unions, professional commissions, cooperation societies, and other societies legally registered and licensed from non-profit activities.
- Income of any religious, charity, cultural, educational, sports, or health institutions with a public character, not aiming to achieve profit.
- Income of exempted registered companies according to the companies' law, which is incurred from activities undertaken outside Jordan, except income derived from income sources subject to tax according to the provision of the law.
- Profits from stocks and dividends distributed by a resident to another resident, except profits of mutual investment funds incurred for banks, financial companies, main telecommunication companies, companies who undertake mining raw materials activities, and insurance and reinsurance companies, and juristic persons who undertake financial lease activities.
- Capital gains incurred inside Jordan, other than profits from assets subject to depreciation.
- Income derived from inside Jordan from trading in dividends and stocks, bonds, equity loan, treasury bonds, mutual investment funds, currencies, commodities in addition to futures and options contracts related to any of them, except that incurred by banks, financial companies, financial intermediation, main telecommunication companies, companies who undertake mining raw materials activities, and insurance and reinsurance companies, and legal persons who undertake financial lease activities.
- Income derived by non-Jordanian resident investors from sources outside Jordan that are initiated from their investments of their foreign capital, returns, profits, and proceeds from their investments' liquidation, returns, or selling of their projects, shares, or stocks after transferring them outside Jordan in accordance to the enacted Investment Law or any other law that will replace it.
- Compensation paid by insurance entities, other than what is paid as reimbursement for the loss of income from business activity or employment.
- Any income generated by banks and financial companies not operating in Jordan from banks operating in Jordan, such as deposit interest, commissions, and deposit profits from investment in interest-free banks and financial companies.
- Profits gained by re-insurance companies from insurance contracts concluded with insurance companies operating in Jordan.
- Income covered by double taxation agreements (DTAs) concluded by the government, to the extent of that which is covered under these agreements.
- The income of public or private pension funds and savings funds and any other funds approved by the Minister shall not be subject to tax if this income is derived from the employees and employers contributions.
- Certain types of local origin goods and services’ exports outside Jordan may be totally or partially exempted from tax as set forth in regulations issued for this purpose.

**Inventory valuation**
Inventory is generally valued in accordance to the International Financial Reporting Standards (IFRS) accounting framework.

**Capital gains**
Capital gains are not taxable in Jordan, except for capital gains that are generated from depreciable assets and goodwill.

**Dividend income**
Dividend income received from a resident juristic person is not taxable in Jordan. However, dividend income received from a non-resident juristic person is subject to income tax.
Foreign income
Jordanian resident corporations are not subjected to income tax on their foreign income, except for foreign branches of Jordanian resident corporations, whereby, as per the new income tax law, all of the branch net income is taxed at a fixed rate of 10% (previously, 20% of the branch net income after foreign taxes was subject to Jordanian corporate tax at 30%).

Deductions

Depreciation and amortisation
Depreciation and amortisation of fixed assets are determined using the straight-line method, provided that the provisions, procedures, and rates shall be defined by the depreciation regime issued for this purpose.

Goodwill
Purchased goodwill can be amortised using the straight-line method, provided that the provisions, procedures, and rates shall be defined by a regulation issued for this purpose.

Start-up expenses
There is no clear provision in the enacted temporary Jordan income tax law to define the treatment of start-up expenses; however, these expenses can be accepted at the establishment year.

Interest expenses
As of 1 January 2015, when the new income tax law took effect, the thin capitalisation rule has been removed (see Thin capitalisation in the Group taxation section), and all interest charges are deductible for all taxpayers. However, executive instructions will be issued in later stages to regularise the deduction of such expenses beside others.

Prior to the effectiveness of the new income tax law, only interest and Murabaha (profit-sharing) paid by banks or financial institutions were deductible, subject to the thin capitalisation limitation.

Bad debt
Bad debts are deductible.

Charitable contributions
A person may deduct any amount paid during the tax period as a donation to any of the governmental departments, public or official institutions, or municipalities from the gross income in the period in which the payment occurred.

Any person may deduct subscriptions and donations paid in Jordan without any personal benefit, for religious, charitable, humanitarian, scientific, environmental, cultural, sport, and professional purposes if the Council of Ministers approves its character. The deductible amount according to the provisions of this paragraph shall not exceed 25% of the taxable income after deducting what is provided for in the first paragraph above and before making this deduction.

Fines and penalties
Fines and penalties are not acceptable expenses for income tax purposes.

Taxes
Taxes and fees paid on taxable activities are deductible.

Foreign income tax paid for income earned from sources outside Jordan that was subject to tax under the provisions of the tax law is deductible.
Jordan

**Other significant items**
Approved expenses, including the following, are deductible:

- Insurance premiums.
- Amounts paid as civil compensation under contracts concluded by the taxpayer for the purpose of carrying out taxable activities.
- Amounts paid by the employer for employees to the Social Security Corporation.
- Hospitality and travel expenses incurred by the taxpayer.
- Expenditures for employees’ medical treatment, meals during duty, travel, transport, and life insurance against work injuries or death.
- Marketing, scientific research, development, and training expenses.
- Expenses of prior tax periods that were neither defined nor final.

**Net operating losses**
As per the new income tax law, losses may be carried forward up to five years (previously, the losses could be carried forward indefinitely). The carryback of losses is not permitted.

**Payments to foreign affiliates**
A resident generally may claim a deduction for royalties, management service fees, and interest charges paid to foreign affiliates taking into account the transfer pricing regime and the applicable WHT.

**Group taxation**
Group taxation is not permitted in Jordan.

**Transfer pricing**
Any disposition transaction which is not based on arm’s length, is with parties that have mutual interests, and leads to a decrease in the taxable income is ignored, and the real profits are estimated according to the regular market value of the transactions.

Any illusionary or fake disposition transactions are ignored and the tax due is estimated as if there were no transactions.

**Thin capitalisation**
As of 1 January 2015, the thin capitalisation rule has been removed, and all interest charges are deductible for all taxpayers. Previously, interest and Murabaha that were paid by any taxpayer other than banks and financial institutions and finance leasing companies was accepted as a deduction, provided that the deduction did not exceed a 3:1 rate of relative value (i.e. total debt to the paid capital or average owners’ equity, whichever was higher).

**Controlled foreign companies (CFCs)**
In the Jordanian tax laws, there is no definition of a CFC.

**Tax credits and incentives**
Jordan has had tax reductions for selective sectors categorised by development zones or free zone areas. Generally, these have required pre-approval.

**Foreign tax credit**
Foreign tax credit treatment is not available in Jordan.
**Withholding taxes**

**Dividends paid**
Dividends are not taxable in Jordan.

**Non-resident WHT**
With respect to services performed by a non-resident juristic or natural person, under the income tax law, “Amounts received or earned by the non-resident person from the Kingdom, which are derived from services provided to any person if the work or service related has been performed in the Kingdom or if the outcome of such services has been used in the Kingdom as well, is subject to tax in Jordan”.

As of 1 January 2015, the WHT rate on services performed by a non-resident juristic or natural person is 10% (previously 7%) of the payment.

**Resident WHT**
According to the new income tax law, the following services shall be subject to resident WHT of 5% if provided by resident natural persons or civil companies: services provided by resident doctors, lawyers, engineers, auditors, experts, consultants, commissioners for taxpayers, insurance and reinsurance agents and brokers, arbitrators, customs brokers, commission brokers and agents, financial intermediaries, and commission shipping agents.

**Tax treaties**
Jordan has entered into income tax treaties with Algeria, Azerbaijan, Bahrain, Bulgaria, Canada, Croatia, the Czech Republic, Egypt, France, India, Indonesia, Iran, Iraq, South Korea, Kuwait, Lebanon, Libya, Malaysia, Malta, Morocco, the Netherlands, Pakistan, Palestine, Poland, Qatar, Romania, Sudan, Syria, Tunisia, Turkey, Ukraine, the United Kingdom, and Yemen.

Jordan has transportation agreements with many countries and is negotiating treaties with more countries.

**Tax administration**

**Taxable period**
A taxpayer’s due tax shall be computed on a calendar year basis.

A taxpayer who closes one’s accounts on a date other than the end of the calendar year may calculate the due tax according to the fiscal year, provided that prior approval shall be obtained from the General Director of the income tax department.

A taxpayer who commences activity within the first half of the calendar year shall compute the due tax for the period from the establishment date until the end of the calendar year.

A taxpayer who commences activity within the second half of the calendar year may compute the due tax for the period from the establishment date until the end of the next calendar year.

**Tax returns**
Taxpayers are obligated to file tax returns before the end of the fourth month following the end of the tax period, including details related to income, expenses, exemptions, and tax due. Tax returns are submitted by any of the following means approved by the department according to terms and procedures to be determined by instructions:

- Registered mail.
Jordan

- Banks.
- Any licensed company to undertake the tasks of public or private mail post approved by the Council of Ministries upon the recommendation of the Minister.
- Electronic means.

The date of filing is considered to be the earlier of the date of receipt by the department, post seal, or deposit receipt at a bank or licensed company. In the case of sending electronic mail, implementation instructions have not yet been introduced to determine the approved date of submitting the same.

**Payment of tax**

The tax balance is due before the end of the fourth month following the end of the tax period.

A taxpayer who is carrying out business activities and has gross income in the previous tax period exceeding JOD 1 million from these activities is required to remit two advance payments on the accrued income tax from these activities using the rates determined for each tax period mentioned in the following schedule. The advance payments are calculated according to the income tax in the financial statements presented to the income tax department for the concerned period. In the absence of the financial statements for this period, the income tax included in the immediate preceding tax declaration will be used to calculate the advance payments.

<table>
<thead>
<tr>
<th>Tax period</th>
<th>Rate on accrued income tax (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>2015 and following years</td>
<td>40</td>
</tr>
</tbody>
</table>

The first advance payment is due within a period not exceeding 30 days from the last day of the first half of that income tax period.

The second advance payment is due within a period not exceeding 30 days from the last day of the second half of that income tax period.

**Fines and penalties**

Failure to pay tax on the assigned dates according to the provisions of the tax law will result in a delay fine at a rate of 0.4% of the value of the tax due or any deductible amounts for each full or partial week of delay.

Prior to 1 January 2015, if a taxpayer submitted a tax return and paid the declared tax in a timely manner, but the declared tax was less than the actual amount due, a shortage fee for such differences was imposed, as follows:

- 15% of the shortage if the difference exceeded 20% but less than 50% of the tax due by law.
- 80% of the shortage if the difference exceeded 50% of the tax due by law.

As of 1 January 2015, the shortage fee has been removed.

**Tax audit process**

The tax audit is likely to take place within one year from the date of filing the return.

**Statute of limitations**

The tax auditor may not audit a tax return after four years from the date of filing the return.

Significant developments

Kazakhstan introduced the law on amnesty for Kazakh citizens and those holding a residence permit, regulating property legalisation. The legalisation started on 1 September 2014 and ends on 31 December 2015. The law provides an exemption from criminal and administrative liability and disciplinary responsibility for failing to submit appropriate declarations and information.

In June 2014, Kazakhstan introduced amendments to legislation on improvement of the investment climate in Kazakhstan. These amendments are aimed for investment projects in listed priority sectors (primarily manufacturing, not oil and gas) of approximately 20 million United States dollars (USD). The measures include:

- Ten-years exemption from corporate income tax (CIT) and land tax, as well as eight-years exemption from property tax.
- State reimbursement for up to 30% of capital expenditures after commissioning.
- The right to employ foreign labour, until one year after construction is complete, free of quotas and permissions.

Starting from 2015, planned tax inspections were ceased. Also, the moratorium on inspections of small and medium business was finished on 1 January 2015.

Starting from 2015, liquidation tax inspections of certain taxpayers can be outsourced to audit firms. The tax inspections should be conducted using a methodology established by the tax authorities.

Starting from 2015, Luxembourg was excluded from the Kazakhstan black list. Currently, the black list includes 59 states with privileged taxation.

In January 2015, Kazakhstan ratified a double tax treaty (DTT) with Qatar.

In March 2015, Kazakhstan ratified a DTT with Macedonia.

In April 2015, Kazakhstan ratified a DTT with Vietnam.

Taxes on corporate income

The tax rate for corporations is 20% and is based on a calendar year. All Kazakhstan legal entities and branches of foreign legal entities are subject to CIT. Taxable income is determined as the taxpayer’s aggregate annual income less allowable deductions.

Resident companies are taxable in Kazakhstan on their worldwide profits, while non-resident companies operating through a permanent establishment (PE) in Kazakhstan are subject to Kazakhstan CIT only on the profits attributable to that PE.
Kazakhstan

Non-residents without a PE in Kazakhstan that receive income from sources in Kazakhstan are generally subject to income tax withheld at source of payment on Kazakhstan-source income (please see the Withholding taxes section for more information).

**Reduced CIT rates**
A reduced CIT rate of 6% applies to the qualified agricultural income of legal entities producing agricultural products.

In addition, taxpayers operating in special economic zones (SEZs) may enjoy full exemption from CIT if certain statutory requirements established for such benefits are met (see the Tax credits and incentives section for more information).

**Excess profit tax (EPT)**
EPT rates are progressive and range from 0% to 60%. The tax base is comprised of the portion of net income of subsurface users exceeding 25% of deductions for EPT purposes. Subsurface users may include asset acquisition costs, capital costs, and losses (with certain limitations) as deductions.

**Local income taxes**
There are no local income taxes in Kazakhstan.

---

**Corporate residence**

Generally, Kazakhstan incorporated companies or other legal entities that have their place of effective management located in Kazakhstan are treated as Kazakhstan tax residents.

**Permanent establishment (PE)**
Non-resident legal entities having business activities in Kazakhstan may create a PE in the following cases:

- ‘Fixed place PE’: a non-resident enterprise carries on business activities in Kazakhstan through a fixed place, including, but not limited to, through a place of management.
- ‘Services PE’: a non-resident enterprise renders services in Kazakhstan through employees or other personnel engaged by the non-resident for such purposes, provided that these activities continue for more than 183 days within any consecutive 12-month period for the same or connected projects.
- ‘Construction PE’: a construction site, in particular a shop or an assembly facility, performance of projecting work, forms a PE, notwithstanding the timing of performing operations.
- ‘Agency PE’: a non-resident enterprise carries on business activities in Kazakhstan through a dependent agent. A dependent agent is an individual or legal entity that meets all of the following criteria simultaneously:
  - Has the contractual authority to represent the non-resident’s interests in Kazakhstan and makes use of this authority by acting and signing (negotiating) contracts on behalf of the non-resident.
  - The business is carried on outside the activity of either a customs broker or professional participant of the securities market or other brokerage type of business (except for activity as an insurance broker).
  - Carries on activities that are not limited to those of a preparatory and auxiliary nature.
**Other taxes**

**Value-added tax (VAT)**
The current VAT rate is 12%. This tax is applicable to the sales value of products, works, and services, as well as imports. Exports of goods are taxed at 0%. There is a list of goods, works, and services exempt from VAT (e.g. financial services provided by financial institutions, financial leasing services, notary and advocacy services, operations with financial securities and investment gold).

Goods and services are subject to VAT if they are deemed to be supplied in Kazakhstan under the place of supply rules.

VAT refunds are generally available with respect to excess input VAT, provided certain criteria are met.

The VAT reporting period is the calendar quarter.

**Customs duties**

Customs duties apply to goods imported to the Customs Union countries from third countries. The customs duties rates are established either based on a percentage (in general ranging between 0% and 30%; higher rates exist for certain goods) of the customs value of goods or in absolute terms in euros.

Goods of the Customs Union countries should be generally exempt from Kazakhstan customs duties.

In addition to membership in the Customs Union, Kazakhstan concluded a number of bilateral and multilateral Free Trade Agreements with the Commonwealth of Independent States (CIS), which provides for exemption of goods circulated between the CIS member states from customs duties, if certain conditions are met.

Kazakhstan is not yet a World Trade Organization (WTO) member.

**Customs fees**

A customs processing fee is assessed at 60 euros (EUR) for the main page of a customs declaration plus EUR 25 for each supplemental page.

**Excise taxes**

Excise taxes apply to the sale and import of crude oil, gas condensate, petrol/gasoline (excluding aviation fuel), diesel fuel, spirits and alcoholic beverages, beer, tobacco, and passenger cars.

<table>
<thead>
<tr>

</tr>
</tbody>
</table>

* Kazakhstani tenge

**Property tax**

Property tax is assessed annually at a general rate of 1.5% of the average net book value of immovable property.

**Land tax**

Entities and individuals that own land plots (or land share in cases of commonly shared ownership of land plots) must pay land tax annually. Land tax rates vary based on the purpose for which the land is used as well as the size and quality of the land.
Kazakhstan

**Transfer taxes**
There are no transfer taxes in Kazakhstan.

**Stamp taxes**
There are no stamp taxes in Kazakhstan.

**Vehicle tax**
The vehicle tax rate is based on monthly calculation indices and determined in accordance with the type of vehicle, engine volume, operation period of the vehicle (aircraft only), and other factors.

**Social tax**
Employers must pay social tax at the rate of 11% of gross remuneration (salaries and certain benefits provided) of all employees (local and expatriate).

**Obligatory social insurance contributions**
Obligatory social insurance contributions are payable by employers at the rate of 5% to the State Pension Centre of Pension Payments. Obligatory social insurance contributions are capped at 5% of ten times the minimum monthly wage (approximately USD 57) per month, and are deductible from social tax. Only Kazakhstan citizens and foreigners holding a residence permit in Kazakhstan are subject to obligatory social insurance.

**Obligatory pension contributions**
Obligatory pension contributions are withheld at a rate of 10% out of employees’ gross income and paid to the State Pension Centre of Pension Payments. The gross income subject to obligatory pension contributions is capped at 75 times the minimum monthly wage (approximately USD 8,615) per employee per month. Only Kazakhstan citizens and foreigners holding a residence permit in Kazakhstan are subject to obligatory pension contributions.

**Payroll taxes**
Employment income (salary, compensation, etc.) is subject to withholding individual income tax paid at source. Tax paid at source should be calculated, withheld, and remitted by the Kazakh company acting as tax agent at the rate of 10%.

**Mineral extraction tax**
The mineral extraction tax applies to the monetary value of extracted volume of crude oil, gas condensate, natural gas, minerals, and groundwater.

The tax is calculated based on the value of the extracted content, which is computed by applying average global prices to the extracted volume (adjusted for content). The determination of average global prices is based on the list of publications that are considered official sources for computation of mineral production tax (Platts Crude Oil Marketwire and Crude Argus).

Currently, the tax rates for crude oil and gas condensate range from 5% to 18%, depending on the accumulated production volume for the calendar year. For hydrocarbons, rates can be reduced by 50% if they are supplied to domestic refineries on the basis of a sale/purchase agreement or tolling agreement.

The tax rate for natural gas is set at 10%. For domestic sales of natural gas, tax rates range from 0.5% to 1.5%.

Tax rates for minerals that have undergone initial processing (except for widespread minerals) and for coal vary between 0% and 22%.
Branch income

The net income of branches of foreign legal entities, after CIT at 20%, is subject to a branch profits tax at a rate of 15%, which may be reduced under an applicable DTT. As such, the effective tax rate for the income of branches of foreign legal entities equals 32% if there is no reduction under a DTT.

Income determination

Kazakhstan legal entities are taxable on aggregate annual income earned worldwide. Non-resident legal entities, carrying out business activities through a PE in Kazakhstan, are taxable on income attributed to the activities of that PE. All taxpayers must apply the accrual method for recognition of income.

Inventory valuation

For tax purposes, inventory is valued in accordance with International Financial Reporting Standards (IFRS) and Kazakhstan financial accounting legislation. As such, permitted inventory valuation methods include first in first out (FIFO), weighted average, and specific identification methods.

Capital gains

Capital gains are subject to ordinary CIT rates. An exemption is available for capital gains realised from the sale of shares and participation interests in Kazakhstan legal entities or consortiums that are not engaged in subsurface activities and are held for more than three years.

Dividend income

Dividend income of a Kazakh resident company on inbound dividends is exempt from Kazakh taxation. Dividends from a Kazakhstan resident company to another Kazakhstan resident company are exempt from taxation, except for dividends paid by certain types of investment funds.

Interest income

Interest income should be included in the aggregate annual income of a taxpayer and taxed at the 20% CIT rate.

Foreign exchange gain

Foreign exchange gain should be determined in accordance with the provisions of IFRS and Kazakhstan financial accounting legislation. The excess of foreign exchange gain over foreign exchange loss should be included in the aggregate annual income of a taxpayer.

Foreign income

Foreign income is subject to ordinary CIT.

There are no provisions for tax deferrals in Kazakhstan.

For additional information, please refer to Controlled foreign companies (CFCs) in the Group taxation section.

Deductions

Allowable deductions generally include expenses associated with activities designed to generate income, unless specifically restricted for deduction by tax legislation. All expenses require supporting documentation.
Depreciation and depletion
Tax depreciation is calculated using the declining-balance method at depreciation rates ranging from 10% to 40%, applied to the balances of four basic categories of assets:

- Buildings and facilities (except for oil and gas wells and transmission facilities): 10%.
- Machinery and equipment (except for machines and equipment for oil and gas production, and also computers and equipment for information processing): 25%.
- Computers and equipment for information processing: 40%.
- Fixed assets not included into other groups, including oil and gas wells, transmission equipment, oil and gas machinery and equipment: 15%.

Goodwill
There are no special provisions in the Kazakhstan Tax Code with respect to deductibility of goodwill expenses.

Start-up expenses
The Kazakhstan Tax Code does not specifically address deductibility of start-up expenses, but, generally, expenses incurred in relation to business activities and aimed at earning revenue occurring at start-up should be deductible.

Interest expenses
Interest paid to unrelated third parties and credit partnerships created in Kazakhstan are deducted in full. For information about taxation of interest paid to related parties, please refer to Thin capitalisation in the Group taxation section.

Bad debt
Amounts of receivables that were not paid within three years are to be recognised as bad debt expenses. Such expenses can be deducted in full by a taxpayer, provided that (i) these receivables are reflected in the books of a taxpayer and (ii) proper supporting documents are in place.

Charitable contributions
Charitable contributions are entitled to decrease taxable base but are capped at 3% of the company's annual taxable income.

Foreign exchange loss
Foreign exchange loss should be determined in accordance with the provisions of IFRS and Kazakhstan financial accounting legislation. The excess of foreign exchange loss over foreign exchange gain is allowed for deduction.

Fines and penalties
Generally, deductions are available for forfeits, fines, and penalties that are not payable to the state budget.

Taxes
Taxes remitted to the state treasury of Kazakhstan are deductible, except for the following:

- Taxes excluded prior to the calculation of the aggregate annual income.
- Income taxes paid in Kazakhstan and other countries.
- Taxes paid in preferential tax jurisdictions.
- Excess profit tax.

Net operating losses
Net operating losses may be carried forward for up to ten years. Loss carryback is not permitted under Kazakhstan tax legislation.
**Payments to foreign affiliates**
Payments to foreign affiliates are deductible for CIT purposes if the payments are intended to generate income, are supported by documentation, and comply with Kazakhstan transfer pricing law.

**Group taxation**
Kazakhstan tax law does not permit group taxation.

**Transfer pricing**
Under Kazakhstan transfer pricing law, both customs and tax authorities have the right to monitor and adjust prices used in cross-border and certain domestic transactions when prices are perceived to deviate from market prices, even if such transactions are with unrelated parties. If the authorities adjust prices, the re-assessed liability will include taxes, duties, penalty interest, and fines to the state budget.

Transfer pricing rules impact the following transactions:

- International commercial transactions.
- Domestic transactions that directly relate to international commercial operations where:
  - the sale relates to a subsurface use contract
  - one of the parties has tax preferences, or
  - one of the parties has losses for two years prior the year of the transaction.

**Thin capitalisation**
Deduction of interest paid to related parties, to unrelated parties under related parties warranties, or to parties registered in a country with privileged taxation depends on the borrower’s capital structure; such that deductible interest will be limited with reference to an ‘acceptable’ proportion of debt-to-equity (7:1 for financial institutions, 4:1 for all other entities). The list of jurisdictions with privileged taxation, the so called ‘black list’ established by the government, includes 60 jurisdictions (see the Kazakhstan summary at www.pwc.com/taxsummaries for a current list).

**Controlled foreign companies (CFCs)**
Under the CFC rules, if a Kazakhstan legal entity has 10% or more of direct or indirect ownership in the share capital or voting rights in a non-resident company, registered or located in a country with privileged taxation (see above), the legal entity is subject to Kazakhstan CIT on the portion of the undistributed profits from the non-resident company.

**Tax credits and incentives**

**Foreign tax credit**
In general, the Kazakhstan Tax Code allows taxpayers to credit the foreign income taxes paid against the income taxes payable in Kazakhstan, provided the documents confirming the payment of such taxes are available. However, a tax credit may not be granted in certain cases (e.g. for taxes paid in countries with privileged taxation).

**Investment incentives**
Investment incentives are available to certain Kazakhstan legal entities that fit certain criteria and possess objects (e.g. certain fixed assets), for which investment incentives may be applied. Generally, the investment incentives allow companies to fully deduct, for CIT purposes, the cost of the investment objects and the cost associated with their reconstruction and modernisation either at once or within the first three years of their use.
Kazakhstan

Based on the Investment Law, incentives are granted under an investment contract between the government and companies and focus on priority sectors of the economy, as determined by the government.

**Special economic zones (SEZs)**

Currently, the following SEZs have been established in Kazakhstan:

- ‘Astana, the New City’ in Astana (the expiry date is in 2027).
- ‘Aktau Sea Port’ in Aktau (the expiry date is on 1 January 2028).
- ‘Ontustik’ in Sairam district of South-Kazakhstan region (the expiry date is on 1 July 2030).
- ‘National Industrial Petrochemical Park’ in Atyrau region (the expiry date is on 31 December 2032).
- ‘Burabai’ in Akmola region (the expiry date is on 1 December 2017).
- ‘Park of Innovative Technologies’ (the expiry date is 1 January 2028).
- ‘Saryarka’ in Karaganda region (the expiry date is 1 December 2036).
- ‘Horgos - the eastern gates’ in Almaty region (the expiry date is 2035).
- ‘Pavlodar’ in Pavlodar (the expiry date is 1 December 2036).

In order to enjoy the incentives available in SEZs, a legal entity must meet the following requirements:

- It must be registered by the tax authorities in the territories of SEZs.
- It must have no structural subdivisions beyond the boundaries of the territories of the SEZs.
- 90% of aggregate annual income must constitute income earned from activities in the SEZ consistent with the objectives of the SEZ’s formation.

The general incentives available for legal entities in SEZs are:

- CIT: 100% reduction.
- VAT: 0% rate (for goods fully consumed during realisation of activities corresponding to purposes of creation of the SEZ and included in the list of goods established by the government of Kazakhstan).
- Land tax: 0% rate.
- Property tax: 0% rate.

**Withholding taxes**

Kazakhstan-source income of non-residents and the proceeds from the sale of shares in subsurface users are subject to withholding tax (WHT) at the rates shown in the table below.

A non-resident legal entity is exempt from dividend WHT if:

- the holding period of shares or participation interest is greater than or equal to three years
- the entity paying the dividends is not a subsurface user, and
- 50% or more of the charter capital value of the entity paying the dividends is not the property of a subsurface user.

Notes

1. 5% if the beneficial owner is a company owning, directly (or indirectly in case of Canada and the United Kingdom), at least 10% of the voting power of the company paying the dividends.
2. 5% (10% in the cases of Moldova and Serbia) if the beneficial owner is a company that directly holds at least 25% of the capital of the paying company.
3. 10% if the beneficial owner is a company directly or indirectly holding at least 20% of the capital of the paying company.
4. 5% if the beneficial owner is a company (other than a partnership) that owns not less than 10% of the capital of paying company.
5. 5% if the recipient is a company (other than a partnership) that directly owns not less than 20% of the capital of paying company.
6. 10% if the actual owner is a legal entity that owns not less than 30% of the authorised capital of the legal entity paying the dividends.
7. 10% if the beneficial owner is a company that directly holds at least 30% of the capital of the company paying the dividends.
8. 0% if dividends are paid in consideration of an investment of at least USD 50 million in the paying company.
9. 0% if the company receiving the dividends directly or indirectly holds at least 50% of the capital of the paying company and has made an investment in the company paying the dividends of at least USD 1 million, which investment is guaranteed in full or insured in full by the government of the first contracting state, the central bank of that state, or any agency or instrumentality (including a financial institution) owned or controlled by that government, and has been approved by the government of the other contracting state.
10. 5% (or 12.5% in case of Pakistan) if the beneficial owner is a company that directly owns (or indirectly in case of the Netherlands and Pakistan) at least 10% of the capital of paying company.
11. 5% if the beneficial owner is a company directly or indirectly owning, for the period of six months ending on the date on which entitlement to the dividends is determined, at least 10% of the voting power of the company paying the dividends.
12. 5% if the beneficial owner is a company (other than a partnership) that directly owns not less than 15% of the capital of the paying company.
13. 5% if the beneficial owner is a company that directly owns at least 70% of the voting power of the paying company.

---

**Tax administration**

**Taxable period**

The tax year in Kazakhstan is the calendar year.

**Tax returns**

Annual CIT declarations are due by 31 March of the year following the tax year-end. However, a taxpayer may be granted a 30 calendar-day extension of the deadline, upon request.
Certain taxpayers are required to submit their estimated calculation of monthly advance payments of CIT.

The deadline for other tax returns is the 15th calendar day of the second month following the reporting period. However, a taxpayer may be granted a 30 calendar-day extension of the deadline, upon request.

**Payment of tax**
For CIT, advance payments are due every 25th day of the month. Taxpayers with aggregate annual income during the tax period preceding the previous tax period of less than 325,000 times the amount of the monthly calculation index established for the relevant financial year (approximately USD 3.72 million) are exempt from the obligation to calculate and pay CIT advance payments. Payment of any outstanding CIT liabilities is required within ten calendar days following submission of the annual CIT declaration (i.e. 10 April).

Most other taxes are payable by the 25th day of the second month following the end of reporting period.

**Fines and interest penalties**
Interest penalties are assessed on late tax payments at 2.5 times the Kazakhstan National Bank refinancing rate. The National Bank refinancing rate is set at 5.5% per annum.

Substantial fines are imposed for understatement of tax liabilities. Generally, the fines amount to 50% of the understated tax.

For advance CIT payments, an administrative fine of 40% applies to understated advance tax payments compared with the final declared CIT, provided the understated amount is greater than 20% of the final declared amount.

If a taxpayer is deemed to have concealed taxable income, a fine of 150% of the concealed amount may be assessed.

Certain taxpayers are allowed to write off tax fines and penalties assessed before 1 January 2014 and not paid as of 1 October 2014.

**Tax audit process**
Kazakhstan tax authorities have the right to conduct regular tax audits (at least once a year). Before 2015, there were two types of audits, planned and unplanned. Planned tax audits ceased, starting from 2015. Information about misstatements in tax returns or any other discrepancy may trigger an unplanned tax audit.

**Statute of limitations**
The statute of limitations for tax purposes in Kazakhstan is five years. For taxpayers operating under subsurface use contracts, the tax authorities maintain the right to assess or revise the assessed amount of excess profit tax and other taxes and obligatory payments to the budget, where a methodology of calculation uses one of the following indices: internal rate of return (IRR) or internal revenue rate or R-factor (earning yield), during the effective period of a subsurface use contract and five years after the end of the effective period of a subsurface use contract.

**Topics of focus for tax authorities**
Tax audits may be comprehensive or thematic. Comprehensive tax audits cover all applicable taxes, while thematic tax audits may cover only some specific tax liabilities. As a rule, Kazakh tax authorities are form, rather than substance, driven during audits.
Other issues

**Accounting system**
Kazakhstan legal entities should maintain accounts and produce financial statements in accordance with IFRS or national accounting standards (depending on the size of the company and other factors). In most cases, tax treatment follows accounting treatment.

**United States (US) Foreign Account Tax Compliance Act (FATCA)**
Kazakhstan has no signed intergovernmental agreement (IGA) with the United States to implement procedures associated with the FATCA, but Kazakhstan financial institutions are allowed to register at the FATCA registration website.
**Kenya**

**PwC contact**

**Significant developments**

In line with the Constitution, the new Public Finance Management (PFM) Act, 2012 sets out the fiscal responsibility to ensure that a reasonable degree of predictability with respect to the level of tax rates and tax bases shall be maintained, including taking into account any tax reforms that may be made in the future.

**Proposed tax reforms**

In the budget statement for 2014/15, the Cabinet Secretary proposed tax reforms that the government would put in place to enhance revenue collection. The Cabinet Secretary’s budget speech focused on the following reforms for 2015 and beyond.

**New Income Tax Act**

The Cabinet Secretary proposed to review the Income Tax Act. The current law was enacted in 1973 following the breakup of the East African Community (EAC), leading to each country introducing its own Act. Since then, the other partners in the East African Community have each introduced new Acts, while Kenya has maintained its 1973 legislation, albeit with numerous amendments.

It is envisaged that the new Act will simplify the administration of income tax.

**The Tax Appeals Tribunal Act, 2013**

The Tax Appeals Tribunal Act came into operation on 1 April 2015. The Act establishes one tribunal to hear appeals from all tax areas. It replaces the Income Tax Tribunal, Value Added Tax (VAT) Tribunal, Customs and Excise Tribunal, and Local Committee (Income Tax).

**Tax Procedure Bill, 2015**

In order to simplify the tax administration system, the government has proposed to enact the Tax Procedure Bill, 2015. The Bill seeks to provide uniform procedures for administering the Income Tax Act, Value Added Tax Act, and Excise Duty Act. It will further harmonise and consolidate tax procedural rules.

**Revision of the Ninth Schedule of the Income Tax Act**

The Ninth Schedule of the Income Tax Act, providing for taxation of extractive industries, has been replaced. The new Schedule attempts to align the tax provisions of the Income Tax Act with the tax provisions contained in the Product Sharing Contracts (PSCs). The new Schedule also incorporates the taxation of mining entities.

The revised Schedule does not, however, deal with natural gas and its peculiar tax and accounting issues. New definitions have been introduced and existing ones expanded. Any term that has not been defined in Income Tax Act but has been defined in the Mining Act, Geothermal Resources Act, or Petroleum Exploration and Production Act will take the meaning assigned in those Acts.
Kenya

Set up of Special Economic Zones (SEZs)
A budget allocation of 600 million Kenya shillings (KES) has been made for the establishment of SEZs. This is an indication of the government’s commitment to have the SEZ legislation enacted, which has been the subject of debate since 2009.

Harmonisation of employee statutory payments
Remittance dates for the National Social Security Fund (NSSF) and the National Hospital Insurance Fund (NHIF) will be harmonised with pay-as-you-earn (PAYE) (i.e. ninth day of the following month).

VAT refunds back log
The Cabinet Secretary acknowledged the existence of a huge VAT refund backlog and the government’s intention to develop a long-lasting solution.

Reforms of Excise Duty Act
It is envisaged that a new Excise Duty Management Bill will be tabled in Parliament after going through public participation in the financial year 2015. The intention to table a new Excise Duty Management Bill is in line with the efforts being witnessed in the other partner states in the East African Community.

Specific changes introduced in the Finance Act, 2014

Tax on capital gains (ToCG)
After being suspended for 30 years, the 2014 Finance Act reintroduced ToCG on transfer of property situated in Kenya. For the purpose of ToCG, transfer of property will include:

- The sale, exchange, disposal, or conveyance of property.
- Compensation received on loss or destruction of property, except where such compensation received under an insurance policy is used to reinstate the property to its original form within one year.
- The abandonment, surrender, cancellation, or expiry of property.

Definition of permanent establishments (PEs) amended
The definition of a PE has been amended to include a dependent agent that habitually concludes contracts for others. This brings the definition of a PE in the Kenya Income Tax Act closer to the definitions contained in the Organisation for Economic Co-operation and Development (OECD) Model Convention on Double Tax Treaties (DTTs).

Underlying ownership condition for double tax relief
The 2014 Finance Act introduced a provision that restricts the application of benefits of DTTs. Relief from double taxation will only apply to a person who is resident in a country that has a DTT with Kenya if 50% or more of one’s underlying ownership is held by an individual or individuals resident in that country/contracting state.

The underlying ownership requirement does not apply to a company that is listed in a stock exchange in the treaty country.

Reintroduction of withholding VAT by government ministries, departments, and agencies
The 2014 Finance Act reintroduced the withholding VAT system, which was abolished in 2011. Under this system, government ministries, departments, and agencies will be required to withhold 6% of the tax payable on payment to suppliers and remit the same directly to the Commissioner. However, the Kenya Revenue Authority (KRA), through a Public Notice, has indicated that the 6% withholding is based on the taxable value instead of the tax payable.
**Taxes on corporate income**

Resident companies are taxable in Kenya on income accrued or derived from Kenya. Resident companies with business activities outside Kenya are also taxed on income derived from business activities outside of Kenya.

Non-resident companies are subject to Kenya corporate income tax (CIT) only on the trading profits attributable to a Kenyan PE.

The rate of CIT for resident companies, including subsidiary companies of foreign parent companies, is 30%. The CIT rate for branches of foreign companies and PEs is 37.5%.

**Special rates**

There are special rates for certain resident and non-resident companies as set out below.

<table>
<thead>
<tr>

</tr>
</tbody>
</table>

**Local income taxes**

There are no county or provincial taxes on income, as all taxes are collected by the national government. However, county governments are empowered by the Constitution to impose property and entertainment taxes at the county level.

**Corporate residence**

Kenya-incorporated companies are treated as Kenyan-tax resident. Additionally, companies incorporated overseas are also treated as Kenya resident if their “management and control is exercised in Kenya in a particular year of income under consideration”. A company may also be declared a tax resident in Kenya pursuant to a declaration in a legal notice by the Cabinet Secretary.

**Permanent establishment (PE)**

A business carried on in Kenya through a fixed place of business gives rise to a PE, as does a building site, or a construction or assembly project, that has existed for six months or more.

The definition of a PE has been extended to include a dependent agent that habitually concludes contracts on behalf of others. This brings the definition of a PE in the Kenya Income Tax Act closer to the definitions contained in the OECD Model Convention on DTTs.

Note that the definition of a PE may be modified by a DTT.
Kenya

Other taxes

Value-added tax (VAT)
VAT is levied on the supply of taxable goods and services in Kenya, as well as on the importation of taxable goods and services into Kenya.

The following VAT rates apply in Kenya:

<table>
<thead>
<tr>
<th>Activity</th>
<th>VAT rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>All goods and services that are neither exempt nor zero-rated</td>
<td>16</td>
</tr>
<tr>
<td>Export of goods and taxable services, designated goods and services</td>
<td>0</td>
</tr>
</tbody>
</table>

Certain goods and services are designated as exempt from VAT. Exempt supplies do not count towards the VAT registration threshold, and the related input VAT is not recoverable.

Zero rating mainly applies to the export of goods or taxable services. The supply of goods or services to certain designated persons and projects are also zero-rated.

The threshold for VAT registration is taxable supplies of KES 5 million per year. Registered persons must record their turnover using an approved electronic tax register or signature device. Only registered persons may recover input tax. An input tax credit is not available for several items, such as non-commercial vehicles, office furniture, and hospitality and entertainment services. An excess input tax credit may be carried forward or refunded, subject to certain conditions.

Reintroduction of withholding VAT by government ministries, departments, and agencies
The 2014 Finance Act reintroduced the withholding VAT system, which was abolished in 2011. Under this system, government ministries, departments, and agencies are required to withhold 6% of the tax payable on payment to suppliers and remit the same directly to the Commissioner. However, the KRA, through a Public Notice, has indicated that the 6% withholding is based on the taxable value instead of the tax payable.

Import (customs) duty
Import duty is levied under the East Africa Community Customs Management Act. Imported goods are generally subject to import duty at 0% for raw materials and capital goods, 10% for intermediate goods, and 25% for finished goods. However, a different rate of duty can be prescribed. Enterprises established in an EPZ are exempt from customs duty on machinery and inputs for exported products while licensed oil and gas contractors with a PSC with the government of Kenya are exempt from customs duty on importation of machinery, spares, and inputs used in exploration, excluding motor vehicles. Where raw materials that are not subject to 0% import duty are used to manufacture goods for export outside the East African Community, one may apply for exemption under the EAC duty remission arrangement. This is subject to a requirement for proof of export and execution of a bond/bank guarantee.

Duty rate for steel imports
The EAC Gazette notice dated 20 June 2014 increased the duty rate of steel products imported into Kenya from between 0% and 10% to 25%. Previously, the duty rate for products from tariff heading 72.06 to 72.17 comprising of various iron and non-alloy steel products ranged from 0% to 10%, depending on the respective tariff codes.

Excise duty
Excise duty is imposed on the manufacture or importation of certain commodities and services. Excisable commodities include items such as mobile phone services, bottled water, soft drinks, cigarettes, alcohol, perfumes, fuels, and motor vehicles, at varying
rates. There are various classes for each category and commodity affecting different rates of duty.

<table>

</tr>
</tbody>
</table>
Kenya

Activity | Stamp duty rate
--- | ---
Lease: Period of three years and under | 1% of annual rent
Period over three years | 2% of annual rent

* Transfer of quoted securities is exempt.

**Tax on capital gains (ToCG)**
After being suspended for 30 years, the 2014 Finance Act reintroduced ToCG on transfer of property situated in Kenya. Therefore, gains derived on the sale or transfer of property by an individual or company carried out on or after 1 January 2015 shall be subject to a final tax at the rate of 5%.

**Compensating tax**
Where a company pays dividends out of profits that have not been subject to CIT, the company will be liable to pay a compensating tax. The compensating tax rate is 42.8%. The aim of this tax is to ensure that all dividends are paid out of profits that have suffered CIT.

**Turnover tax for small business taxpayers**
A resident taxpayer whose annual gross turnover does not exceed KES 5 million will be taxed at the rate of 3% per quarter of one’s turnover. In such a case, the taxpayer will not be required to register for VAT. Turnover tax does not apply to rental income, management or professional fees, training fees, income subject to withholding tax (WHT) as a final tax, and income of incorporated companies. Loss making businesses are allowed to make an election to be exempted from turnover tax. A written application for exemption has to be made to the Commissioner, and there is a procedure to be followed.

**Business permit**
Every person who carries on a business in Kenya is required to apply for a business permit from the relevant local authority. The business permit is usually based on the size of one’s business and is renewable on an annual basis.

**Catering levy**
The catering levy is payable to Catering Levy Trustees by hotels and restaurants at a rate of 2% of turnover.

**National industrial training levy**
All employers are required to pay to the Directorate of Industrial Training a monthly levy of KES 50 per employee. The only exemption is for employers remitting the catering levy.

**Railway development levy (RDL)**
The RDL is payable on all imports into the country at 1.5% of the customs value of the goods. This was implemented to provide funds for the construction of a standard gauge railway track.

**National construction levy**
The National Construction Authority introduced a construction levy for all construction works that commenced after 6 June 2014. The levy is payable at the rate of up to 0.5% of the contract value of any construction project whose construction value exceeds KES 5 million. The levy is in relation to all construction projects relating to buildings, roads, water works, electrical works, and other works that require the service of a contractor.

**Advance tax on motor vehicles**
Advance tax is payable at varying annual rates depending on the motor vehicles and is creditable against any CIT payable for the year.
**Fringe benefit tax (FBT)**
The FBT is payable by an employer on interest-free or low-interest loans granted to employees, company directors, and their relatives. FBT is due, whether the employer is exempted from tax or not, at the resident CIT rate of 30%. The benefit is the difference between actual interest charged and the interest computed using the Commissioner’s prescribed rate published quarterly. The directors and employees are not personally taxed on the benefit.

**Employers’ National Social Security Fund (NSSF) contributions**
Employers and employees are obligated to contribute monthly to the NSSF a standard contribution of KES 200 each. However, the new NSSF Act provides for a higher contribution rate of 6% of pensionable earnings with matching contribution from the employer. The implementation of the new Act awaits conclusion of a pending court case.

**National Hospital Insurance Fund (NHIF) contributions**
An employer has an obligation to deduct and remit NHIF contributions on a monthly basis.

NHIF is payable by the employee at graduated bands up to a maximum of KES 1,700 per month. The maximum contribution is reached at a salary level of KES 100,000 per month.

**Payroll taxes**
Payroll taxes are administered through the PAYE mechanism of deducting income tax from employment income (salaries, wages, bonuses, commissions, etc.). PAYE also applies to taxable non-cash benefits.

It is the employers’ obligation to deduct and account for payroll taxes on a monthly basis.

*The tax tables applicable to individuals are provided in the Taxes on personal income section of the Individual summary at www.pwc.com/taxsummaries.*

**Local government rent and rates**
Rent and rates are levied annually on properties in Kenya, and the rateable value that is payable to the county government shall vary in each county based on various forms of ratings, such as area rate, agricultural rental value, or site value.

**Branch income**
The profit of a PE is taxed at the branch income tax rate of 37.5%, but there is no further taxation on the distribution of branch profits. There are certain restrictions with respect to the tax deductibility of certain costs, such as royalties, interest, and management fees, paid to the head office. However, these payments are also not subject to WHT.

**Income determination**

**Inventory valuation**
Inventory is stated at the lower of cost or net realisable value, with the exception of biological assets, whose value is prescribed by the Commissioner.

**Capital gains**
Tax on capital gains (ToCG) has been reintroduced. See Tax on capital gains (ToCG) in the Other taxes section for more information.

**Dividend income**
Kenya-source dividends are taxable income in Kenya unless the recipient is a Kenya resident company holding 12.5% or more of voting power of the company paying the
Kenya

dividend. However, for companies holding less than 12.5% of the votes, and other resident taxpayers, the 5% WHT is the final tax. Dividends paid to non-residents and any overseas holding company attract 10% WHT.

Dividends issued in a ratio not proportionate to shareholding of the existing equity are considered as taxable dividends to the extent of the disproportionate increase in the value of the ownership of the company.

**Interest income**
Interest income is generally included in the determination of taxable income unless expressly exempted for income tax.

**Foreign income**
In Kenya, companies are taxed on income accrued or derived from Kenya. Resident companies with business activities outside Kenya are taxed on worldwide profits.

**Deductions**
The general principle in Kenya is that, unless expressly provided otherwise, expenses are tax deductible if they are incurred wholly and exclusively to generate taxable income.

**Depreciation and depletion**
No deduction is allowed for accounting depreciation or impairment. However, capital allowances are permitted at varying rates (on a straight-line basis) for certain assets used for business purposes, including buildings and machinery used in manufacturing, industrial buildings and hotels, machinery and plant, agricultural works, and mining.

* Different percentages apply for previous years.
**Goodwill**  
Cost acquisition of goodwill and amortisation of goodwill are not deductible since they are capital in nature.

**Start-up expenses**  
There is a specific provision allowing the deduction of certain start-up expenses, provided that the required conditions have been met.

**Interest expenses**  
A deduction for interest is allowed only to the extent that the borrowings are used for the purpose of trade. Where a non-resident person controls a company alone or with four or fewer other persons, interest restriction or ‘thin capitalisation’ rules apply (see Thin capitalisation in the Group taxation section).

**Bad debts**  
Bad debts are deductible in the year in which it is evident that the debt has become irrecoverable. Detailed rules apply for making this determination.

**Charitable contributions**  
Donations to qualifying charities and for certain public works are deductible, subject to certain conditions.

**Fines and penalties**  
Generally, fines and penalties are not deductible as they are not considered to be expenses incurred for producing profits chargeable to tax.

**Taxes**  
Kenyan income taxes are not deductible while computing income tax of a person. However, foreign income taxes incurred are generally deductible as an expense if tax credit relief is not available under a DTT.

**Net operating losses**  
Losses calculated under the tax rules may be carried forward against income from the same source for a maximum of five years, including the year in which the losses arise. Losses cannot be carried back, except for petroleum companies, where losses can be carried back indefinitely.

**Payments to foreign affiliates**  
Transfer pricing rules based on OECD principles apply to transactions with foreign affiliates (both companies and branches/PE). Additionally, there are restrictions on the deductibility of expenses incurred outside of Kenya by non-residents with a Kenyan PE.

**Group taxation**  
Each company in a group is taxed as a separate entity in Kenya.

**Transfer pricing**  
A company that has related party transactions is required to ensure such transactions are at arm’s length. The company is therefore required to prepare a transfer pricing policy to justify the pricing arrangements. The Commissioner is allowed to specify conditions and procedures on the application of the methods for determining the arm’s-length price and to adjust the prices if they do not conform to the arm’s-length principle. The policy should be prepared and submitted to the KRA upon request.

**Thin capitalisation**  
In Kenya, a company is thinly capitalised if all of the following occur:
Kenya

- The company is in control of a non-resident person alone or together with four or fewer persons.
- The company is not a bank or financial institution.
- The highest amount of all loans held by the company at any time exceeds the sum of three times the revenue reserves (including accumulated losses) and the issued and paid up share capital of all classes of shares of the company.

A company that is thinly capitalised cannot claim a deduction on the interest expense incurred by the company on loans in excess of three times the sum of revenue reserves and issued and paid up capital of all classes of shares of the company. The company also cannot claim a deduction for any foreign exchange loss realised by the company with respect to any loans from its shareholders in the period that the company remains thinly capitalised.

**Deemed interest**
The Kenyan tax legislation was amended in 2014 to allow the Commissioner of Taxes to ‘deem interest’ on interest-free borrowings received by foreign controlled entities in Kenya. The ‘deemed interest’ is based on the Commissioner’s prescribed rates.

This means that WHT is due on the ‘deemed interest’ as if this was an actual finance change. The WHT rate on payments of interest to non-residents is currently 15% (in the absence of a DTT).

**Controlled foreign companies (CFCs)**
Kenya has no specialised rules regarding CFCs.

However, there are restrictions on interest and foreign exchange losses deductibility of companies that are foreign controlled and are thinly capitalised.

---

**Tax credits and incentives**

**Foreign tax credit**
For business income, there is no tax credit for foreign tax paid on business income except as provided for by a DTT (if applicable) between Kenya and that other country. However, foreign tax paid can be deducted as an expense.

**Investment deduction**
Qualifying investments exceeding KES 200 million incurred outside Nairobi or the municipalities of Mombasa or Kisumu are allowed an investment deduction of 150%. All other qualifying investments are allowed a 100% investment deduction in the year the asset is put into use.

**Export processing zone (EPZ)**
Companies located in an approved EPZ, principally to export goods, are taxed at a 0% CIT rate for ten years from its commencement and at a rate of 25% for the next ten years.

**Listed companies**
Companies listed on the Nairobi Securities Exchange are entitled to reduced rates of income tax for a period depending on the percentage of share capital listed (see the Taxes on corporate income section for the rates).
**Withholding taxes**

WHT is levied at varying rates (3% to 30%) on a range of payments to residents and non-residents. Resident WHT is either a final tax or creditable against CIT. Non-resident WHT is a final tax.

Notes

1. Interest paid by the government and the Central Bank of Kenya is tax-exempt.
2. The rate is 12.5% for management and professional fees.
3. No Kenya tax is due if subject to tax in Zambia.
4. The rate is 17.5% for management and professional fees.
5. Management and professional fees subject to normal WHT rates.

Where the treaty rate is higher than the non-treaty rate, the lower rate applies.

Treaties awaiting conclusion and or ratification: Iran, Kuwait, Malaysia, Mauritius, Qatar, Seychelles, Singapore, South Africa, Thailand, and the United Arab Emirates.

**Tax administration**

**Taxable period**

A company has discretion to determine its financial year-end, provided it is a 12-month period. However, any changes in this must be approved by the Commissioner of the KRA.

**Tax returns**

Resident companies and PEs of non-resident companies must file a self-assessment tax return annually. The return is accompanied by a tax computation and financial statements, amongst other schedules. The return is due within six months following a company's financial year-end.

**Payment of tax**

Instalment tax payments must be made quarterly during the year based on the lower of 110% of the previous year’s liability or an estimate of the current year’s liability. Agricultural companies are required to pay estimated tax in two instalments of 75% and 25% during the year. Any balance of tax at the end of the year must be paid within four months of the financial year-end.

**Payment of agency taxes**

The tax withheld from payments must be paid by the 20th day of the month following the month in which the deduction is made.

**Penalties for non-compliance**

If a self-assessment tax return is not submitted by the due date, a penalty of 5% on the unpaid tax for the year may be imposed, subject to a minimum of KES 10,000. Failure or late submission of an EPZ company return will be subject to a penalty of KES 2,000 per day for as long as the failure continues.

A penalty of 20% and interest at 2% per month are imposed on underestimation and late payment of instalment tax and any balance of tax. Interest is charged only on the principal tax due, capped at the amount of the principal tax due.
Failure to make a deduction or to remit the WHT deducted attracts a penalty equal to 10% of the amount of tax involved (subject to a maximum of KES 1 million) and accrues interest at 2% per month.

**Tax audit process**
There is no prescribed audit process, as an audit can be triggered by any factor as determined by the revenue authority. Generally, tax audits should be carried out after every two to four years. The audit or inspection will commence with a request from the revenue authority for the taxpayer to make available any such records or information as may be required.

**Statute of limitations**
The tax authorities must commence an audit before the expiry of seven years after the end of a year of income. The revenue authorities may go back past seven years where fraud is suspected. There is no time limit for completing tax audits. However, they are normally completed within a reasonable time, especially if there are no major disputes.

**Topics of focus for tax authorities**
The KRA, in their 2012/13 to 2014/15 Strategic Plan, stated that they will focus on the following key areas:

- Real estate sector.
- High net worth individuals.
- Transfer pricing.
- Innovative approaches to enhance collection in sectors with low tax compliance.
- Scaling up taxation of the small and medium enterprise (SME) sector.
Significant developments

The latest amendments to corporate income tax (CIT) and other major tax laws, most of which have effect for taxable years beginning on or after 1 January 2015, address the Korean government’s efforts to stimulate the Korean economy by encouraging corporations to make investment. One of the main CIT Law changes to spur corporate investment is the introduction of a temporary 10% additional levy on larger corporations if the use of corporate earnings on qualifying investments, wage increases, and dividend payments falls below 80% of adjusted taxable income for the concerned year. Alternatively, corporations can choose, by election, for this percentage to be reduced to 30% where only amounts spent on wage increases and dividends are taken into account. Another change introduces a temporary 10% tax credit (5% for larger corporations) on the increase in corporate payroll calculated in a prescribed manner. Meanwhile, Korea’s thin capitalisation rule is amended to reduce the threshold for borrowings from overseas controlling shareholders to two times equity (from three times), while the threshold for financial institutions remains at six times equity.

The latest amendment also includes significant changes in the Value-added Tax (VAT) Law that may affect domestic as well as foreign companies in Korea. VAT will apply to the supply of specified non-traditional financial services, including insurance actuary, investment advisory, etc. (while financial and insurance services are, in general, exempt from the taxable supplies). Zero-rating VAT will apply to the supply of clinical trial services by domestic hospital or medical institutions to foreign pharmaceutical companies outside Korea if the considerations for the supply of these services are received in a foreign currency. VAT will apply to supplies of electronic services purchased through offshore open markets app stores (to take effect from 1 July 2015).

In order to strengthen taxpayers’ claim rights, the statute of limitation for tax refund request is extended from three years to five years, which takes effect for tax refund requests made on or after 1 January 2015.

Taxes on corporate income

The basic Korean CIT rates are 10% on the first 200 million Korean won (KRW), 20% for the tax base between KRW 200 million and KRW 20 billion, and 22% for the excess.

Resident corporations are taxed on their worldwide income, whereas non-resident corporations with a permanent establishment (PE) in Korea are taxed only to the extent of their Korean-sourced income. Non-resident corporations without a PE in Korea are generally taxed through a withholding tax (WHT) on each separate item of income.

New surtax on corporate income

In order to motivate corporations to utilise corporate retained earnings to fund facility investment, wage increases, and dividend payments, the amended CIT Law introduces a 10% additional levy on corporate income if the use of such earnings falls short of a
certain portion of corporate net income for the concerned year. The additional levy shall apply to companies with net equity in excess of KRW 50 billion (excluding small and medium-sized enterprises [SMEs]) and companies belonging to business groups subject to restrictions on cross-shareholdings under the Act on Monopoly Regulation and Fair Trade.

Regarding the method of charging the additional levy, companies may elect one of the following methods and cannot revoke its election for three consecutive years:

- (taxable income for this purpose for the year x 80% - the total amount of facility investment, payroll increases, and dividend payments) x 10%
- (taxable income for this purpose for the year x 30% - the total amount of payroll increases and dividend payments) x 10%

The new surtax takes effect for three taxable years beginning on or after 1 January 2015.

**Agriculture and fishery surtax**
When a corporate taxpayer claims certain tax credits or exemptions under the Special Tax Treatment Control Law (STTCL), a 20% agriculture and fishery surtax is levied on the reduced CIT liability.

**Minimum tax**
Corporate taxpayers are liable for the minimum tax, which is defined as the greater of 10% (to the tax base of up to KRW 10 billion, 12% on the excess up to KRW 100 billion, 17% on the excess above KRW 100 billion) of the taxable income before various deductions and exemptions pursuant to the STTCL applied to arrive at adjusted taxable income or the actual tax liability after various deductions and exemptions are applied.

For SMEs, the minimum tax is the greater of 7% of adjusted taxable income or actual tax liability. For middle market companies that exceed the size of SMEs (medium-scale companies), an 8% minimum tax rate is applicable for the first three years, starting from the year when the size exceeds an SME for the first time, and a 9% rate is applicable for the next two years.

**Local income tax**
The basic local income tax rates for corporations are 1% on the first KRW 200 million, 2% for the tax base between KRW 200 million and KRW 20 billion, and 2.2% for the excess. The local income tax is a separate income tax that has its own tax base, tax exemption and credits, and tax rates.

**Corporate residence**
A corporation having its head office or principal office in Korea is a resident corporation. A corporation with a place of effective management in Korea is also treated as a resident corporation.

**Permanent establishment (PE)**
A non-resident corporation is generally deemed to have a tax presence (i.e. PE) in Korea if one of the following applies:

- It has any fixed place of business in Korea, where the business of the entity is wholly or partly carried on.
- It is represented by a dependent agent in Korea, who has the authority to conclude contracts on its behalf and who has repeatedly exercised that authority.
- Its employee(s) provides services in Korea for more than six months within 12 consecutive months.
Korea, Republic of

- Its employee(s) continuously or repeatedly renders similar services in Korea for two or more years, even if each service visit is for less than six months within 12 consecutive months.

Exceptions to a PE in Korea for a non-resident corporation include fixed places of business used only for purchasing or storage of property at which no sales activities, advertising, publicity, collecting, or furnishing of information, or other activities that are preparatory or auxiliary to the conduct of business, occur.

---

**Other taxes**

**Value-added tax (VAT)**

VAT is levied at a rate of 10% on sales and transfers of goods and services, except zero-rated goods and services (e.g. goods for exportation, services rendered to non-residents, international transportation service by ships and aircraft, other goods and services supplied for foreign exchange earnings) and exempt goods and services (e.g. basic life necessities and services, such as unprocessed foodstuffs and agricultural products; medical and health service; finance and insurance services; duty-exempt goods). Regarding financial and insurance services, the VAT Law has been amended for the supply of 'non-traditional' financial services to be subject to VAT. Affected non-traditional financial and insurance services include: (i) safe deposit of securities certificates, (ii) investment advisory, (iii) insurance actuary and pension actuary, (iv) money trust and discretionary investment business investing in real estate and non-financial assets, and (v) real estate trust business limited to management, disposition, and parcel-out administration. The amended rule is applicable to supply contracts made on or after 1 July 2015.

Also, effective from 1 July 2015, VAT will be applicable to supplies of electronic services (applications, MP3, music, films, etc.) purchased through offshore open markets app stores. If an app developer is a foreigner, offshore open marketers are required to undertake procedures online, including a simplified VAT registration process and a VAT return filing and payment process through the homepage of the National Tax Service (NTS).

Electronic VAT invoicing is a compulsory requirement. If a taxpayer fails to issue the electronic VAT invoice or report electronically to tax authorities, the relevant penalties shall be imposed.

**Customs duties**

Customs duties are generally assessed on imported goods. ‘Importation’ refers to the delivery of goods into Korea (in case of goods passing through a bonded area, delivery of such goods into Korea from such a bonded area) to be consumed or to be used in Korea.

**Property tax**

An annual tax ranging from 0.07% to 5% is charged on the statutory value of land, buildings, houses, vessels, and aircraft. Five times the property tax rate is applied to property that is newly constructed or expanded in the Seoul metropolitan area for five years from its relevant registration date.

**Securities transaction tax**

A securities transaction tax of 0.5% is imposed on the total value of securities at the time of transfer, but the government is authorised to adjust the tax rate in certain circumstances. The flexible tax rate prescribed by the Presidential Decree is 0.3% on transactions in both the Korea Stock Exchange and the Korean Securities Dealers Automated Quotations (KOSDAQ).
**Acquisition tax**
Acquisition tax is charged on the price of real estate, motor vehicles, construction equipment, golf membership, boats, etc. The minimum rate is 1%. A weighted rate is charged on acquisitions in the Seoul metropolitan area or on acquisition of luxury items, such as villas, golf courses, and yachts.

**Stamp tax**
Stamp tax is levied on a person who prepares a document certifying establishment, transfer, or change of rights to property in Korea. The stamp tax ranges from KRW 50 to KRW 350,000, depending on the type of taxable document. The electronic stamp system has been implemented to make it mandatory to use stamps bought online rather than paper stamps bought in banks or post offices. As of 1 January 2015, the use of paper stamps is prohibited.

**Registration tax**
Registration tax ranging from 0.02% to 5% is charged upon the act of registering the creation, alteration, or lapse of property rights or other titles and incorporation with the concerned authorities. Registration tax shall not be applied to the registration made as a result of the act of acquisition as defined in Chapter 2 of the Local Tax Act. Registration tax upon the registration of title or right and incorporation for corporations located in large cities may be subject to three times the rates otherwise applied.

**Gift tax**
Gift tax is imposed on a person who acquires property by gift. If CIT or individual income tax is imposed on the gifted property, however, the gift tax shall not be imposed. Gift tax ranges from 10% on not more than KRW 100 million in tax base to the top marginal tax rate of 50%.

**Social security contributions**
There are four types of social security contributions in Korea, namely national pension, national health insurance, employment insurance, and worker’s accident compensation insurance. Employers and employees are almost equally required to bear a total amount of 8.39% of salaries for the first three types of social security taxes (i.e. national pension, national health insurance, and employment insurance), while the worker’s accident compensation insurance is borne by employers only, which varies by industry, ranging from 0.7% (banking, insurance) to 34% (coal mining) of salaries.

**Payroll taxes**
Employers are required to withhold income taxes at source on a monthly basis, finalise their employees’ tax liability, and file the final tax settlement receipt with the tax authorities no later than 10th of March of the following year.

**Branch income**
In general, a branch office of a foreign corporation is taxed in the same manner as resident companies.

Remittance of retained earnings from a Korean branch to its head office is subject to reporting to a designated foreign exchange bank in Korea under the Foreign Exchange Transaction Act.

If the tax treaty between Korea and the country in which a foreign corporation is residing allows the imposition of a branch profits tax, the tax is imposed on the adjusted taxable income of the Korean branch.
Where applicable, the branch profit tax is levied in addition to the regular CIT, which is imposed at the rate of 20% (or at a reduced rate as provided in a treaty) of the adjusted taxable income of the Korean branch.

**Income determination**

Gross income consists of gains, profits, income from trade and commerce, dealings in property, rents, royalties, and income derived from any ordinary transactions carried on for gain or profit.

**Inventory valuation**

Inventories generally are stated at either the lower of cost or market (LCM) or cost method. Any one of LCM and six cost methods, including specific identification, first in first out (FIFO), last in first out (LIFO), weighted-average, moving-average, and retail method, can be elected for tax purposes. The method elected should be applied consistently each year unless an application for change has been submitted before three months from the year-end. Different valuation methods may be used for different categories (i.e. products and merchandise, semi-finished goods and goods in process, raw materials, goods in stock) and different business places.

For inventory costing under Korean International Financial Reporting Standards (K-IFRS), LIFO is not an acceptable accounting method. Consequently, taxable income arising from adjusting the inventory balance booked under LIFO using other acceptable costing methods (e.g. FIFO, weighted average) is allowed to be spread in its recognition over a five-year period since the first year adopting K-IFRS.

**Stock valuation**

The valuation of securities or bonds shall be made using the cost method. For the cost method, the weighted-average cost method or moving-average cost method shall be applied for the purpose of valuation of securities and the individual cost method may be used for valuation of bonds.

**Capital gains**

For the purposes of taxation, gross income does not include income derived from gains from capital transactions such as capital surplus; gains on reduction of paid-in capital; or gains from merger, divisions, comprehensive share transfer, or comprehensive share exchange. However, gains from treasury stock transactions are taxed, and losses are deductible from taxable income.

Note that capital gains from the disposal of non-business purpose land or houses may be subject to additional capital gains tax at the rate of 10% in addition to the normal CIT. For SMEs, however, the 10% additional tax will be waived for the disposal made, until the end of December 2015.

**Dividend income**

All distributions to shareholders are taxed as dividend income, whether paid in cash or in stock.

However, a qualified domestic holding company that owns more than 80% (40% in case of listed subsidiary) share ownership in its domestic subsidiary will receive a 100% deduction for dividends while an 80% deduction is allowed for share ownership of 80% (40% in case of listed subsidiary) or less. A domestic corporation other than a qualified holding company will also receive a 100% deduction for share ownership of 100%, 50% for more than 50% (30% in case of listed subsidiary) share ownership, and 30% for share ownership of 50% (30% in case of listed subsidiary) or less.
**Interest income**
Except for certain cases, all interest income must be included in taxable income. Generally, interest income is included in taxable income as it is received.

**Rental income**
A company engaged in the business of the rental of real properties is also taxed on the deemed rental income calculated at the financial institutions’ interest rate on the lease security money as well as on the recognised rental income.

**Royalty income**
Royalties are considered to be taxable income when earned.

**Gains and losses on foreign currency translation**
Companies are allowed to recognise unrealised gains and losses on foreign currency translation of their monetary assets in a foreign currency. This recognition is also allowed with respect to currency forward transactions and swaps to hedge foreign exchange risks of such assets. In this regard, a taxpayer can choose whether to recognise unrealised gains and losses or not for tax purposes. Once elected, the same method must be consistently used.

**Foreign income**
Resident corporations are taxed on their worldwide income. A Korean company is taxed on its foreign-sourced income as earned at normal CIT rates. To avoid double taxation, taxes imposed by foreign governments on income recognised by a resident company are allowed as a credit against the income taxes to be paid in Korea or as deductible expenses in computing the taxable income. In general, foreign taxes will generally be applied as credit rather than as a deduction.

Income of foreign subsidiaries incorporated outside Korea is not included in the taxable income of a resident company. Income is recognised by a resident company only upon the declaration of dividends from a foreign subsidiary. Therefore, the Korean tax impact may be delayed through deferring the declaration of dividends unless the anti-tax haven rule under the Law for Coordination of International Tax Affairs (LCITA) is triggered.

Korean anti-tax haven rules state that accumulated earnings (distributable retained earnings) of a resident company’s subsidiary located in a low-tax jurisdiction (i.e. a tax haven where the effective tax rate on the taxable income for the past three years averages 15% or less) are taxed as deemed dividends to the resident company that has direct and indirect interest of 10% or more in such subsidiary. Where the passive income is more than 50% of gross income, the controlled foreign corporation (CFC) rule shall apply for the entire amount of retained earnings of the foreign subsidiary. Even in cases where the passive income is between 50% and 5% of the foreign subsidiary’s gross income, the CFC rule will apply in a limited manner (i.e. a CFC’s retained earnings will be included in taxable income of the CFC’s domestic related parties in proportion of such passive income to its gross income). However, dividends will be excluded in calculating the amount of passive income if they are derived from shares issued by the company that is 10% or more owned by a CFC. This change takes effect from 1 January 2015.

The foreign tax paid by a qualifying subsidiary is eligible for foreign tax credit against the dividend income of a resident company regardless of whether there are tax treaties with the relevant foreign countries. In connection with percentage of shareholding for tax credits, a qualifying subsidiary is one in which a resident corporation owns 25% or more of its shares for more than or equal to six consecutive months after the date of dividend declaration. Unused foreign tax credits can be carried forward for five years.
Deductions

In general, expenses incurred in the ordinary course of business are deductible, subject to the requirements for documentary support.

A corporation’s disbursements of more than KRW 30,000 for goods or services provided are required to be supported by corroborating documents, such as credit card sales vouchers, cash receipts, tax invoices, and those vouchers and invoices stored in the company’s enterprise resource planning (ERP) system. The corporation is required to maintain these documents for five years. If the corporation fails to maintain proper evidences, a 2% penalty shall be levied on the amount of disbursement.

Accrued expenses are not deductible until the expenses are fixed or paid.

Depreciation and amortisation

With the exception of land, depreciation of all property, plant, and equipment (PP&E), which includes buildings, machinery, and auto-vehicles, used to generate income is allowed as a deduction for CIT. Generally, interest on debt acquired to purchase, manufacture, or construct PP&E must be capitalised until the PP&E is operational. This does not apply to the interest associated with the expansion or improvement of existing PP&E. A detailed list of fixed assets, gross values (including capitalised interest), the useful lives of the assets, and the current year’s depreciation charge must be submitted to the tax authorities when filing the annual CIT return.

The tax law allows the following methods for calculating depreciation:

- Straight-line or declining-balance method for tangible fixed assets, other than plant and buildings.
- Straight-line method for plant, buildings, and intangible assets.
- Service-output or straight-line method for mining rights.
- Service-output, declining-balance, or straight-line method for tangible fixed assets used in mining.

In determining depreciation using a straight-line method, salvage value of the assets is regarded as zero. However, where the declining-balance method is used, 5% salvage value is required. Changes in the depreciation method must be approved by the tax authorities in advance, and such approval may only be obtained in exceptional cases (i.e. merger between two corporations having different depreciation methods). Although the tax law specifies the useful lives of assets, the useful life of a fixed asset can be increased or decreased by 25% of the specified useful life at the taxpayer’s election. The selected depreciation method should be consistently applied.

The standard useful life and the scope of useful life for assets are provided in the following tables:

<table>
<thead>
<tr>
<th>Tangible fixed assets</th>
<th>Standard useful life (years)</th>
<th>Scope of useful life (years)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Autos and transportation equipment (excluding those used for transportation businesses, leasing service of machinery, equipment, and consumer goods), tools, equipment, and fixtures</td>
<td>5</td>
<td>4 to 6</td>
</tr>
<tr>
<td>Ships and aircraft (excluding those used for fishery, transportation, leasing service of machinery, equipment, and consumer goods)</td>
<td>12</td>
<td>9 to 15</td>
</tr>
<tr>
<td>All buildings and constructions of brick structure, block structure, concrete structure, mud structure, mud wall structure, wooden structure, wooden frame mortar structure, and other structures</td>
<td>20</td>
<td>15 to 25</td>
</tr>
</tbody>
</table>
Tangible fixed assets

<table>
<thead>
<tr>
<th>Uses of buildings and constructions</th>
<th>Standard useful life (years)</th>
<th>Scope of useful life (years)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Steel-frame/iron bar concrete structures, stone structures, brick/stone structures, steel-frame structures</td>
<td>40</td>
<td>30 to 50</td>
</tr>
</tbody>
</table>

Note that machinery and equipment used for specific industries shall be subject to different useful lives from four years (e.g. bag manufacturing) to 20 years (e.g. water supply service).

Intangible fixed assets

<table>
<thead>
<tr>
<th>Description</th>
<th>Useful life (years)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Goodwill, design rights, utility model rights, trademarks</td>
<td>5</td>
</tr>
<tr>
<td>Patents</td>
<td>7</td>
</tr>
<tr>
<td>Fishery rights, extraction rights under the law of development of mineral resources at the sea bottom (may elect activity method), right of management for toll roads, water rights, right of use for electricity and gas service facilities, right of use for tap water facilities for industrial use, right of use for general tap water facilities, right of use for heating facilities</td>
<td>10</td>
</tr>
<tr>
<td>Mining rights (may elect activity method), right of use for exclusive telegraph and telephone facilities, right of use for exclusive sidetracks, right of management for sewage disposal, right of management for tap water facilities</td>
<td>20</td>
</tr>
<tr>
<td>Right of use for dams</td>
<td>50</td>
</tr>
</tbody>
</table>

Note that for used fixed assets (including assets acquired through mergers or spin-offs) that have been used for more than half of their useful lives, a new useful life may be filed with the tax authorities within the range of half of the original useful life and the original useful life filed for the first time of its utilisation.

According to CIT law, depreciation is allowed for tax deduction only when expensed for book purposes. However, in order to alleviate any dramatic increase in tax burden due to decreased depreciation expenses through the adoption of K-IFRS, additional expense deduction through tax adjustment may be allowed on a temporary basis. For tax purposes, depreciable assets acquired on or before 2013 may be depreciated at the rate equivalent to the average of three years before the adoption of K-IFRS. Depreciable assets acquired after 2014 may be depreciated using the tax useful lives only if they are the same type of existing assets used for the same business line and the calculation method of deduction is regulated.

**Goodwill**

Goodwill for tax purposes is defined as “value transferred with consideration, apart from transferred assets included in business transfer, valued by taking into account business premium factors of the transferor such as permission/licence, legal privileges, geographical advantages, business secrets, credit, reputation, transaction partners, etc.”. Goodwill may be amortised over five years using the straight-line method for tax purposes.

**Start-up expenses**

Start-up expenses, such as incorporation expenses, founders’ salary, and registration fees and taxes, are deductible when the expenses are actually paid.

**Interest expenses**

Interest incurred in the ordinary course of business is deductible as long as the related loan is used for business purposes. There are, however, a number of exceptions to the general rule, as follows:
• If borrowings from a foreign shareholder, or from a third party under a payment guarantee by the foreign shareholder, exceed two times the equity of the relevant foreign shareholder, the paid interest and discount fee as to the relevant excessive portion will be treated as a dividend payment and not allowed as a deduction.
• Debenture for which the creditor is unknown.
• Bonds and securities on which recipient of interest is unknown.
• Construction loans and loans for the purchase of land and fixed assets up to the date on which the assets are acquired or completed must be capitalised as a part of the cost of the asset and depreciated over the life of the asset. Interest after the date of completion or acquisition is deductible as incurred.
• Interest on loans related to non-business purpose assets or funds loaned to related parties.

**Contingent liabilities**
In general, contingent liabilities are not deductible, except for reserves under the following items, which are counted as losses within the tax limit:

• Reserves for retirement allowance.
• Reserves for bad debts.
• Liability reserves and emergency reserves prescribed in the Insurance Business Law.
• Reserves for non-profit organisations.
• Reserves for the write-off of a compensation claim set aside by trust guarantee funds in each business year.

The amounts enumerated below are also counted as losses in calculating income for the business year:

• The amount of gains from insurance claims used to acquire the same kinds of fixed assets as the lost fixed assets, or to improve the damaged fixed assets within two years after the first day of the business year following the business year in which the gains fall.
• The amount of a beneficiary’s share of construction costs received by a domestic corporation engaged in the electricity or gas business, etc., used for the acquisition of fixed assets.
• The amount of the national treasury subsidies actually used for acquisition or improvement of fixed assets for business.

**Bad debt**
A doubtful accounts reserve is allowed for tax purposes at up to 1% or the previous year’s ratio of actual loss from bad debts to total balance of account receivables at year-end. Actual losses on bad debts are allowed when certain legal proceedings are satisfied or the statute of limitations has lapsed.

Although companies could set aside bad debt allowances based on reasonable estimates under the old generally accepted accounting principles (K-GAAP), the new GAAP for non-K-IFRS users and K-IFRS users requires objective evidence to recognise the allowance. This stricter rule is expected to create disproportionately higher taxable income in the first year of adoption.

In order to relieve K-IFRS users from any disproportionate burden for tax payment from book-tax difference due to the adoption of a new accounting method or treatment, the current tax law allows for deferral of taxable income recognition in various situations. One such situation is the taxable income created in accounting for bad debt allowance.

This deferral is currently effective to cover a wider scope of entities over an extended time period. For tax administration purposes, the scope of entities for deferral will cover a domestic place of business of a foreign corporation as well as domestic companies. Deferral was available through 31 December 2014. The deferred income is added back to
taxable income of the fiscal year that begins after 1 January 2015. Please note that non-IFRS users will be excluded from the scope of eligible entities.

**Charitable contributions**

Donations to public interest entities, such as government authorities and social welfare organisations, as well as donations for academic research, technical development, etc., are classified as Bub-jung donations. Bub-jung donations are tax-deductible at up to 50% of the total taxable income for the concerned fiscal year after deduction of net operating loss (NOL). Ji-jung donations to public entities prescribed by CIT Law are also tax-deductible at up to 10% of the total taxable income for the fiscal year after the deduction of deductible Bub-jung donations and NOL.

The amount in excess of such limit may be carried over for five years. Donations other than the statutory donations above will not be deductible for tax purposes.

**Employee remuneration**

There is no statutory limit for employee remuneration, which includes salaries, wages, stipends, bonuses, retirement payments, pensions, and meal and housing allowances, as well as all other kinds of subsidies, payments, and compensation. Remuneration of foreign employees is determined according to their engagement contracts.

**Pension expense**

For tax purposes, severance allowance may be deducted at up to 5% of the annual total amount of wages paid. However, the accumulated amount of the severance allowance reserve may not exceed 5% of the actual aggregate liability to employees for fiscal year 2015. This deduction limit will be phased out in 2016. If a corporation subscribes to a corporate retirement plan with an insurance company to cover future payments of retirement allowances, additional tax deductions beyond the limits described above are available.

Employers hiring one or more employees are required to set aside severance pay or retirement pensions for their employees. Defined contribution (DC) and defined benefits (DB) are the two available schemes for the retirement pension system. Under the DC scheme, the premiums paid by the employer are deductible upon payment while deductions for the reserve under the DB scheme are subject to a limit, similar to the severance insurance.

**Payment for directors**

Bonuses paid to directors in excess of the amount determined in the articles of incorporation or at a shareholders’ meeting, etc. are not deductible. Also, severance benefits paid to directors in excess of the amount prescribed in the tax law are not deductible.

**Entertainment expenses**

Entertainment expenses of more than KRW 10,000 on an event basis must be supported by corporate credit card vouchers, cash receipts, or tax invoices in order to be deductible. In addition, the entertainment expenses in excess of the tax limit are not deductible.

The deductible limit for entertainment expenses in a business year is computed as:

- an amount calculated by multiplying KRW 12 million (KRW 18 million [temporarily increased to KRW 24 million for the tax years beginning on or after 1 January 2015 and ending on 31 December 2016] for an SME) by the number of months in the respective business year divided by 12, plus
- an amount calculated by multiplying the amount of gross receipts for a business year by the rates listed in the following table (in the case of receipts from transactions between related parties, 10% of the amount calculated by multiplying the receipts by following rates shall be applied).
<table>
<thead>
<tr>
<th>Amount of gross receipts (KRW)</th>
<th>Rate</th>
</tr>
</thead>
<tbody>
<tr>
<td>10 billion or less</td>
<td>0.2%</td>
</tr>
<tr>
<td>Over 10 billion up to 50 billion</td>
<td>KRW 20 million + 0.1% of the excess over KRW 10 billion</td>
</tr>
<tr>
<td>Greater than 50 billion</td>
<td>KRW 60 million + 0.03% of the excess over KRW 50 billion</td>
</tr>
</tbody>
</table>

**Insurance premiums**

Insurance premiums paid to an insurance company are deductible if the business enterprise is the listed beneficiary. Insurance premiums for which the beneficiary is the employee are also deductible; however, they are treated as salaries for the employees and are subject to WHT on earned income (this excludes the severance insurance premium or social security taxes that are borne by employers).

**Fines and penalties**

Fines, penalties, and interest on underpayment of taxes are not deductible.

**Taxes**

Income taxes are generally not deductible in determining income subject to CIT.

**Net operating losses (NOLs)**

In general, an NOL carryover is allowed for ten years.

Generally, loss carrybacks are not allowed. However, SMEs can carry back an NOL for one year.

**Payments to foreign affiliates**

With sufficient supporting documentation, interest, royalty, and management service fees paid to foreign affiliates are deductible for CIT purposes.

Under the LCITA, the following conditions must be met in order for a management service fee to be deductible:

- The services must be provided based on an agreement entered into by the service provider prior to the service transaction.
- The provision of the service can be verified by a schedule of services, description of services, description of the company providing services and its employees, detailed explanation of expenses incurred, and other supporting documentation.
- A company must be able to anticipate the company’s additional profit or reduced expense through the services provided by a foreign affiliate.
- Payment for the provided services should be consistent with arm’s-length standards.

**Group taxation**

The consolidated corporate tax filing system can be adopted for a domestic corporation in cases where two or more wholly-owned subsidiaries exist. A taxpayer may elect the consolidated filing scheme, but it cannot be revoked for at least five years after the election of the consolidated tax filing.

**Transfer pricing**

The LCITA authorises the tax authorities to adjust the transfer price based on an arm’s-length price and to determine or recalculate a resident’s taxable income when the transfer price of a Korean company and its foreign counterpart is either below or above an arm’s-length price.

The LCITA lists the following methods for determining an arm’s-length price: the comparable uncontrolled price (CUP) method, the resale price method, and the cost-plus method. Furthermore, the Decree elaborates upon the profit-split method, the
The method used and the reason for adopting that particular one for an arm's-length price determination must be disclosed to the tax authorities by a taxpayer in a report submitted along with the taxpayer’s annual tax return.

**Thin capitalisation**
In cases where a Korean company borrows from its controlling shareholders overseas, an amount greater than two times (six times in the case of financial institutions) its equity interest payable on the excess portion of the borrowing is characterised as dividends to which the article on dividends in tax treaty applies and is treated as non-deductible in computing taxable income.

**Controlled foreign corporations (CFCs)**
Under the Korean CFC rule, when a Korean national directly or indirectly owns at least 10% in a foreign corporation and the foreign company's average effective income tax rate for the three most recent consecutive years is 15% or less, the amount of retained earnings as of the end of each business year of the CFC shall be deemed to be paid as a dividend to the Korean national and subject to tax in Korea.

For more information on the CFC rule, see Foreign income in the Income determination section.

**Anti-tax haven rules**
In cases where a Korean company invests in a company located in a tax haven, which unreasonably has reserved profits in the controlled foreign company, the profits reserved therein shall be treated as dividends paid out to that Korean company (individual), despite the fact that the reserved profits are not actually distributed.

Anti-tax haven rules are intended to regulate a company that has made overseas investments of an abnormal nature. Thus, these anti-tax haven rules apply to those Korean companies that have invested in a company incorporated in a foreign country with an average effective tax rate of 15% or less on taxable income for the past three years.

However, if a company incorporated in such a tax haven country actively engages in business operations through an office, shop, or a factory, then the anti-tax haven rules will not apply.

**Related party transactions**
Under the provision of CITL, the tax authorities may recalculate the corporation’s taxable income when CIT is unreasonably reduced due to transactions with related parties. Generally, if the discrepancy between the transaction price and fair market value exceeds 5% of the fair market value or KRW 300 million, the transaction will be subject to this provision.

**Tax credits and incentives**

**Foreign tax credit**
Taxes imposed by foreign governments on income recognised by a resident taxpayer are allowed as a credit within the limit against the income taxes to be paid in Korea, or as deductible expenses in computing the taxable income. In general, foreign taxes will be applied as credit rather than as a deduction. The excess foreign tax credit can be carried forward five years.
Indirect foreign tax credit is also available for a Korean parent company in cases where the foreign subsidiary distributes dividends to the Korean parent company after paying corporate taxes in that resident jurisdiction. From 2015, the conditions on indirect tax credit are tightened to exclude the overseas grandson subsidiary and raise the shareholding ratio from 10% or more to 25% or more.

**Investment incentives**
Tax credits are generally available for qualified investment in facilities for productivity enhancement, safety, job-creating investments, etc.

**Tax credit for investment in facilities for productivity enhancement**
If a resident makes an investment in facilities or equipment to increase productivity by no later than 31 December 2017, then 3% (5% and 7% in the case of medium-scale companies and SMEs, respectively) of such investment amount shall be deducted from CIT. The unused tax credit can be carried forward five years.

**Tax credit for investment in facilities for safety**
If a resident or a domestic corporation makes an investment in a facility (excluding any investment in used assets) for safety that is considered necessary for industrial purposes no later than 31 December 2017, then an amount of 3% (5% and 7% in the case of medium-scale companies and SMEs, respectively) of such investment shall be deducted from CIT. The unused tax credit can be carried forward five years.

**Tax credit for job-creating investments**
The tax credit for job-creating investments consists of a basic credit and an additional credit. The basic credit is not available at all in the event of decreased employment by any one person with an exception to SMEs, which may claim the basic credit after a certain amount (KRW 10 million per capita) is subtracted. The basic credit includes a 0% to 3% tax credit for a company maintaining a status quo employment and an additional 3% to 6% tax credit for new job-creating investments. The additional tax credit for job creation does not exceed the ceilings set at KRW 10 million (KRW 15 million per employee between the ages 15 and 29, KRW 20 million per specified occupational high school graduate employee) multiplied by the amount of new employment in net. This credit will apply to investments made no later than 31 December 2017.

**Temporary tax credit for increase in corporate payroll**
The amended law introduces a temporary 10% tax credit (5% for large corporations) on the incremental amount in average corporate payroll over a certain base level calculated in a prescribed manner by taking into account the average corporate payroll over the previous three years. This is conditional on there being no decline in the number of full-time employees from the previous year. The temporary credit is implemented from 1 January 2015 through 31 December 2017.

**Special tax treatment to facilitate dividend payments**
In order to facilitate dividend payments to shareholders of listed companies to try and boost the growth of the stock market, a new provision lowers the withholding rate on dividend income distributed by high-dividend paying listed companies from 14% to 9% and allows the segregated taxation of financial income if those listed companies meet the requirements as prescribed in the tax law. This special tax treatment applies to eligible dividend income for tax years beginning on or after 1 January 2015 and ending on 31 December 2017.

**New tax credit for re-hiring retired female employees of SMEs**
The amended law introduces a tax credit to promote the re-employment of female employees of SMEs who retired for childbirth or care and other personal reasons as prescribed in the Presidential Decree. The tax credit is designed to allow SMEs to subtract the amount, as much as 10% of labour costs paid per re-hired female employee, from their corporation tax payable for the period of two years following the month of re-
employment if prescribed conditions are met. This new credit applies to re-employment taking place on or after 1 January 2015.

**Research and development (R&D) tax incentives**
The STTCL provides various tax incentives to stimulate R&D activities. These include a tax credit for research and manpower development expenses, a tax credit for technology transfer, and tax credits for merger or acquisition of technology innovative SME.

**Tax credit for development of research and manpower**
Companies presently claim a tax credit in relation to qualifying R&D expenditure to the extent of either (i) 2% to 3% (8% to 15% for medium-scale companies, 25% for SMEs) of the current R&D expenses or (ii) 40% (50% for SMEs) of the incremental portion of the current R&D expenses over the average of the previous four years. The incremental method can be applied only when the R&D expenses for the prior year exceed the average R&D expenses for the previous four years. The tax credit has been extended to include R&D in relation to core technologies as authorised by government ministries as well as pre-designated strategic growth industries until the end of December 2015, and, for these industries, the credit rate for the current R&D expenditure is 20% (30% for SMEs).

**Tax credit for technology transfer among SMEs (Korean patent box regime)**
Tax credit and reductions have been introduced to facilitate the transfer of technology between companies so as to enhance technical competencies and the recovery of funds invested in technology more efficiently. CIT on income derived by SMEs and specified medium-scale companies from the transfer of patents, etc. is reduced by 50%. The amended law grants a 25% tax credit for income derived by SMEs and medium-scale companies from the leasing of patents or utility model rights where the company has first filed a registration of such rights. This temporary credit is applicable to leases taking place until the end of December 2015.

**Tax credit for merger or acquisition of technology innovative SME**
In cases where a domestic company merges with a technology innovative SME in a qualified manner, the merger company shall be permitted to take a 10% tax credit with respect to the payment made in such a merger, up to the value of the acquired technology. This 10% tax credit will be also available for a company that acquires shares in a technology innovative SME in a qualified manner no later than the end of December 2015. In this case, if any of requirements for a qualified manner fails to be met, the amount of tax credited will be collected. In addition, the unused tax credits are allowed to be carried forward over the next five years.

**Tax credit for investment in facilities for technology and human resources development**
A corporation purchasing facilities no later than 31 December 2015 prescribed in the Presidential Decree with the purpose of R&D and job training is eligible for a tax credit of up to 3% (5% for medium-scale companies, 10% for SMEs) of such investment. The unused tax credit can be carried forward five years.

**Energy/environmental incentives**

**Tax credit for investment in energy-economising facilities**
If a resident makes an investment (excluding any investment in used goods) no later than 31 December 2016 in energy-economising facilities, 3% (5% for medium-scale companies, 10% for SMEs) of such investment shall be deducted from CIT. The unused tax credit can be carried forward five years.

**Tax credit for investment in facilities for environmental protection**
If a resident makes an investment (excluding any investment in used goods) in any facility for the purpose of environmental conservation no later than 31 December 2016,
then 3% (5% for medium-scale companies, 10% for SMEs) of the investment amount shall be deducted from CIT. The unused tax credit can be carried forward five years.

**Inbound investment incentives**
The Korean government provides various incentives and benefits for inducing foreign investment under the Foreign Investment Promotion Law.

Foreign invested companies that engage in certain qualified high-technology businesses can apply for 100% exemption from CIT for five years, beginning from the first year of profitable operations (from the fifth year, if not profitable until then) and a 50% reduction for the following two years in proportion to the foreign shareholding ratio. An exemption from WHT on dividends, which was available for foreign investors in the same manner as above during the same grace period, is no longer granted. However, the WHT exemption on dividends already approved will not be affected by the tax law change. In addition, the taxpayer can apply for 100% exemption from local taxes, such as acquisition tax, registration tax, and property tax on assets acquired for their business for five years after the business commencement date and 50% reduction for the following two years. For local tax exemption, some local governments grant longer exemption periods (up to 15 years) in accordance with their local ordinances. Qualified foreign investment also can be eligible for exemption from customs duties, VAT, and individual consumption tax on imported capital goods.

In addition, foreign investors satisfying specified criteria are provided with tax incentives and other benefits for investment in specially designated areas, including foreign investment zones (FIZs), free economic zones (FEZs), free trade zones (FTZs), and strategic industrial complexes exclusively developed for foreign invested companies. The tax incentives for qualifying foreign investors in FIZs are similar to those of the above foreign invested high-tech companies. Qualifying investors in FEZs, FTZs, and strategic industrial complexes may receive the 100% exemption from corporate or individual income tax as well as local taxes for the first three years and 50% reduction for the next two years. They also receive exemption from customs duties on imported goods.

To receive tax incentives for inbound investment, a register of foreign substantial shareholders must be filed together with an application for tax incentives. In addition, effective 1 January 2015, foreign investment made via specific countries is excluded from the exemption from corporate or individual income tax and local taxes for inbound investment. They include those countries with which Korea has not entered into income tax treaties (including tax information exchange agreements [TIEAs] and investment promotion and protection agreements), such as Botswana, Republic of Cyprus, Dominican Republic, Guatemala, Lebanon, Nauru, Niue, Seychelles, and Trinidad and Tobago.

**Foreign direct investment (FDI) incentive limitations**
The FDI credit limits incentives granted to qualified FDIIs. The ceiling has been set to encompass both investment amount and job-creation. In terms of investment amount, the level of incentives for FDI has been reduced to 70% of the aggregated FDI amount for companies benefiting from a seven-year incentive period (50% ceiling for companies enjoying a five-year incentive period). In terms of job-creation, the level of incentives for FDI has been reduced to the lower of either 20% of the aggregated FDI amount or KRW 10 million times the company’s net increase in employment.

Companies that have enjoyed tax benefits based on job-creation will be subject to tax assessment in cases where there is a net decrease in employment within the subsequent two years in comparison to the year that the relevant tax credit was obtained.
Withholding taxes

Foreign corporations with income derived from sources in Korea are subject to CIT on such income. If the foreign corporation has no ‘domestic place of business’ in Korea, it will be subject to tax on its Korean-source income on a withholding basis in accordance with the tax laws and the relevant tax treaty, if applicable. Any Korean-source income attributable to a domestic fixed place of business of a foreign corporation will be subject to Korean CIT.

For residents of countries having a tax treaty with Korea, reduced WHT rates may apply. An application form must be submitted to the withholding agents in order to apply the treaty rate. If a beneficiary cannot be identified in the application form, the withholding agents should withhold the tax at the non-treaty rate.

For dividends, interest, and royalties, the WHT rates are limited as follows (as of April 2015):

<table>
<thead>
<tr>

## Notes

1. Dividends and interest paid to resident individuals by corporations generally are subject to a 14% WHT rate. In addition to this, there is a resident surtax of 10% on the CIT liability.
2. In addition to the indicated tax rate, a resident surtax is charged at a rate of 10% of the respective tax rate.
3. Lower rate applies in case of equity ownership of 10% or more.
4. 10% rate applies to royalties paid for the use of or the right associated with industrial activities.
5. 10% rate applies if the loan period extends to seven years or more, the recipient is a financial institution, and the loan is used for certain designated purposes.
6. 25% rate applies to royalties associated with the use of trademarks or trademark rights.
7. 5% rate applies in case of equity ownership of 15% or more.
8. Lower rate applies in case of equity ownership of 25% or more.
9. 10% rate applies if the term of loans exceeds three years.
10. 10% rate applies when a recipient of interest income is a bank and income is connected with a loan with a term in excess of seven years.
11. Lower rate applies in case of equity ownership of 20% or more.
12. 10% rate applies if a recipient is a bank.
13. 5% rate applies if a recipient holds 10% or more ownership in a paying corporation but, even in case of 10% or more ownership, 10% rate applies if the dividends are paid out of profits subject to tax at a lower rate than the normal corporate tax rate of a country where a payer resides. In other cases, 15% rate applies.
14. 7.5% rate applies when a recipient of interest income is a bank or a financial institution.
15. 2% rate applies to royalties paid for use of or the right to use industrial, commercial, or scientific equipment.
16. 10% rate applies if it is for the use of or the right to use industrial, commercial, and scientific equipment or information.
17. 15% rate applies if royalties are for use of or the right to use cinematography films or tapes for radio or television broadcasting or any copyright of literary or artistic work.
18. 0% rate applies in case of equity ownership of 10% or more.
19. 5% rate applies if a recipient is a bank.
20. 5% rate applies to royalties for use of copyrighted literature and music.
21. 10% rate applies if the term of the loans exceeds seven years.
22. Lower rate applies if it is for the use of or the right to use a patent, trademark, design, or secret formula, or industrial, commercial, and scientific equipment or information.
23. 10% rate applies in cases of equity ownership of 25% or more, or dividend paid by a resident company engaged in a preferred pioneer area and registered with the Board of Investment.
24. 10% rate applies in cases where the interest is paid in respect of public offering of bonds, debentures, or similar obligations or interest paid by a company that is a resident of the Philippines, registered with the Board of Investment, and engaged in preferred pioneer areas of investment under the investment incentive laws.
25. 10% rate applies in case of royalty paid by a company that is a resident of the Philippines, registered with the Board of Investment, and engaged in preferred pioneer areas of investment under the investment incentives laws.
26. 5% rate applies if a recipient holds 30% or more of equity interest in the amount of at least 100,000 United States dollars (USD).
27. 10% rate applies if a beneficial owner of the income is a financial institution (including insurance company) or resident of Thailand who is paid with respect to indebtedness arising as a consequence of a sale on credit by a resident of Thailand of any equipment, merchandise, or services, except where the sale was between persons not dealing with each other at arm’s length.
28. 10% rate applies if the term of the loan exceeds two years.
29. 10% rate applies to royalties for use of copyrighted literature, music, films, and television or radio broadcasts. Otherwise, 15% rate applies.
30. 10% rate applies if equity ownership is 10% or more and not more than 25% of the gross income of a paying corporation for a preceding tax year consists of interest or dividends.
31. 10% rate applies when a recipient of interest income is a bank or an insurance company.
32. 5% rate applies when a recipient holds 25% or more of equity interest, and 10%, when a recipient holds 10% or more of equity interest. In other cases, 15% rate applies.
33. 5% rate applies to royalties paid for the use of or the right associated with industrial, commercial, or scientific equipment.
34. 0% rate applies to royalties paid for the use of academic rights.
35. 5% rate applies to royalties paid for the use of or the right associated with any copyright of literary, artistic, or scientific work, including software, and motion pictures and works on film, tape, or other means of reproduction for use in connection with radio or television broadcasting. 10% rate applies to royalties paid for the use of or the right to use a patent, trademark, design or model, plan, secret formula, or process. 15% rate applies to royalties paid for the use of or the right to use industrial, commercial, or scientific equipment, or for information concerning industrial, commercial, or scientific experience.

In addition to the indicated tax rate, a resident surtax is charged at a rate of 10% of the respective tax rate.
Korea, Republic of

36. 14% rate applies if interest arises from bonds issued by a Korean company or government bodies.
37. 0% rate applies if a recipient of interest income is government, central bank, etc.
38. 5% rate applies to royalties paid for the use of industrial, commercial, or scientific equipment.
39. Fees arising from rental of industrial, commercial, scientific equipment, etc. are classified as rental income subject to 2% WHT.
40. 10% rate applies to royalties paid for technical support.
41. 7.5% rate applies if a recipient directly holds 10% or more equity share. In other cases, 10% rate applies.

If a foreign company is located in a foreign jurisdiction designated as a tax haven by the Minister of Strategy & Finance, any Korean-source income of such foreign company will be subject to the domestic withholding rate of 20% regardless of whether or not the foreign company is resident of a treaty country. Currently, only Labuan is designated as such a jurisdiction. The foreign company may claim a refund of any excess WHT paid within three years, if it proves to the Korean Tax Office that it is entitled to the reduced treaty rates as the substantive and beneficial owner of the income. Alternatively, a foreign company may attempt to seek a pre-approval in order to have the treaty benefits apply upfront by making an application to the Commissioner of Taxation.

---

**Tax administration**

**Taxable period**

In Korea, the taxable year is on a fiscal-year basis as elected by the taxpayer. However, it cannot exceed 12 months.

**Tax returns**

A corporation must file an interim tax return with due payment for the first six months of the fiscal year, and the filing/payment must be made within two months after the end of the interim six-month period.

A corporation must file an annual tax return with due payment for the fiscal year, and the filing/payment must be made within three months from the end of the fiscal year. In case the external audit is not completed and the financial statements are not fixed, a corporation can request for extension of tax filing by one month with delinquent interest of 2.9% per annum.

**Payment of tax**

Where the tax amount to be paid by a resident corporation is in excess of KRW 10 million, part of the tax amount to be paid may be paid in instalments within one month of the date of the expiration of the payment period (two months for SMEs).

Where the tax amount to be paid is KRW 20 million or less, the excess of KRW 10 million may be paid in instalments; and where the tax amount to be paid exceeds KRW 20 million, 50% or less of the tax amount may be paid in instalments.

**Functional currency**

In instances where the taxpayer adopts to use a foreign currency as its functional currency, there are three ways to calculate the CIT base: (i) calculate the tax base using the financial statements in functional currency and translate it into Korean won; (ii) prepare the financial statements in Korean won and calculate the tax base; or (iii) translate the financial statements into Korean won and calculate the tax base. Once elected, the same method must be consistently used.

**Tax audit process**

For large companies whose sales revenue exceeds KRW 300 billion, a tax audit will be conducted every five years. Other companies are selected by certain standards, which were announced by the National Tax Service (NTS).
Statute of limitations
The statute of limitations is generally five years from the statutory filing due date of the annual CIT return. However, the statute of limitations is extended further in the following cases:

- Seven years if a taxpayer does not file its tax base by the statutory due date.
- Ten years if a taxpayer evades taxes by fraud or unjustifiable means.
- 15 years for fraud or unjustifiable means involving cross-border transactions. For this purpose, a ‘cross-border’ transaction means when a party or parties to the transaction include(s) non-resident(s) or foreign corporation(s) (excluding domestic business places of non-resident(s) or foreign corporation(s)).

Along with the extension of the NOL carryforward period from five years to ten years, when a taxpayer uses the NOL incurred more than five years ago, the statute of limitation shall be one year from the filing due date of the fiscal year when the NOL is utilised.

Period of extinctive prescription for collection of national taxes
The period of extinctive prescription for collection of national taxes is five years (ten years for national tax payable worth KRW 500 million or more) from the date on which the government’s right to collect a national tax becomes exercisable. Along with the five year extinction prescription period of national tax collection, the extinction prescription period of tax refund request of taxpayers is extended to five years, which was previously three years from the tax return filing due date, effective for tax refund requests made on or after 1 January 2015.

Topics of focus for tax authorities
The recent topics of focus for tax authorities are as follows:

- Increased focus on foreign exchange compliance during customs audits.
- Increased scrutiny for tax evasion of the underground economy through investigating financial information available under the revised Financial Information Unit (FIU) Act.
- Increased scrutiny for the prevention of offshore tax evasion through aggressive tax planning.
- Gift tax imposed on a transaction giving unfair share of works to an affiliated company that is deemed a gift to a controlling shareholder.
- Prevention of embezzlement through fictitious expenses or tax evasion using subcontractors.
- Deductibility of management service fees or allocated expenses incurred by foreign affiliates.
- International inter-company transactions and transfer pricing.

Other issues
Exchange controls
Most transactions involving foreign exchange generally do not require approval or reporting under the Foreign Exchange Transaction Act (FETA), with a few exceptions as prescribed by the FETA. Receipt of foreign exchange from outside Korea is freely permitted, and payments to foreign companies are not regulated. Most restrictions on Korean companies’ foreign currency transactions with foreigners have been removed. However, the government continues to monitor certain flows of foreign currency in an attempt to minimise incoming speculative currency and outgoing capital flight.

Advance reporting is required for most capital transactions. For example, foreign currency loans obtained by a Korean resident or loans provided by a Korean resident to an overseas resident should be reported in advance. Foreign currency deposits should
also be reported in advance. The agency to which the reporting should be made again differs based on materiality of the transaction amount or transaction type.

In addition, reporting in advance to the appropriate agency is required for the netting of receivables and payables with a foreign resident, third party payments where a payment is made to a foreign resident other than the transaction counterpart, and cross calculation, which is similar to netting, but the concerned company opens a bank account in which the offsetting takes place for future receivables and payables.

Ever since Korea's currency crisis, most restrictions on short-term as well as mid and long-term borrowings from overseas by corporations have been removed. Most foreign currency loans are allowed and are subject to reporting to a foreign exchange bank. There are no specific regulations, except the reporting requirements, on borrowings from overseas by foreign investment companies in Korea.

**Intergovernmental agreements (IGAs)**
Korea signed an agreement on automatic exchange of tax information with the United States in March 2014. If ratified by the parliaments of both countries, the agreement will mandate the tax authorities to collect from financial institutions and exchange data on interest, dividends, and other income subject to withholding paid to non-residents and provide the collected data to the governments where the non-residents are located every September beginning in 2015.

Korea approved the regulations to comply with the US Foreign Account Tax Compliance Act (FATCA), effective from 1 July 2014. Based on the Law for Coordination of International Taxation Affairs and the Korea-US income tax treaty, the approval of these regulations will help Korean financial institutions participate directly with the FATCA. Korean financial institutions covered by the regulations include banks (including savings banks), mutual finance companies, securities companies, investment funds, insurance companies, etc. The coverage of financial accounts will include deposits, trusts, funds, (only if the refund of insurance surrender value exceeds USD 50,000), and pension accounts. However, those accounts having annual deposit ceilings for tax incentive purposes shall be exempt from the reporting requirements.

**Choice of business entity**
The following types of commercial entities are permitted in Korea:

- **Corporation (Hoesa):** There are five classes of corporation, outlined as follows:
  - Limited corporation:
    - **Jusik Hoesa (JH):** A corporation incorporated by one or more promoters, with each shareholder’s liability limited to the amount of contributed capital. This type of entity is the most commonly used in Korea.
    - **Yuhan Hoesa (YH):** A corporation incorporated by one or more members, with each member’s liability limited to the amount of that member’s contribution to the corporation.
    - **Yuhan Chegim Hoesa:** A corporation incorporated by one or more members, with each member’s liability limited to the amount of that member’s capital contribution. With significantly fewer restrictions for establishment and operation, **Yuhan Chegim Hoesa** provides more flexibility and self-control than YH.
  - Unlimited corporation:
    - **Hapmyong Hoesa:** A corporation incorporated jointly by more than two members who are responsible for corporate obligations if the assets of the corporation are insufficient to fully satisfy those obligations.
    - **Hapja Hoesa:** A corporation composed of one or more partners who have unlimited liability and one or more partners with limited liability.
- **Partnership:** **Hapja Johap** is a legal form of partnership allowed under the Commercial Code.
• Joint venture: A joint venture is generally established as a domestically incorporated corporation whose shareholders have limited liability regarding the obligations of the corporation under the Commercial Code.

• Branch: A foreign corporation can perform its business operation in Korea by setting up a taxable presence in the form of a branch office. The branch office can be classified as a corporation and be taxable under the Corporate Income Tax Law if one of the following conditions is met; otherwise, the foreign entity shall be classified as an individual and be subject to the Individual Income Tax Law:
  • The foreign entity is a corporation under the laws of one's home country.
  • The foreign entity is composed of only limited liability members.
  • The foreign entity has an independent ownership of assets or separate right of lawsuit from its members.
  • An entity similar to the foreign entity is classified as a corporation under Korean law.

• Liaison office: A foreign corporation can establish a liaison office, which is not allowed to execute income-generating business activities in Korea.

• Sole proprietorship: Sole proprietorships are not a legal form of entity in Korea.

**Guidance on taxation of an off-shore partnership**

Under the CITL, a foreign corporation is defined as a corporation that has a head office or principal office in a foreign country (only if the foreign corporation shall not have the place of effective management in Korea).

Based on the nature of business, an offshore partnership would be categorised as a foreign corporation if one of the following conditions is met:

• Has a legal personality.
• Only comprised of partners with limited liability.
• Has the legal rights and liabilities that are distinct from its members including taking possession of assets or having the legal capacity to be a party against a lawsuit.
• The same or the most similar kind of domestic business entity constitutes a corporation under Korean laws.

Off-shore partnerships with a legal personality like corporate entities prescribed in the Korean Commercial Act, such as stock corporations (*Chusik Hoesa*), limited corporations (*Yuhan Hoesa, Yuhan Chegim Hoesa*), and unlimited corporations (*Hapmyong Hoesa, Hapja Hoesa*), are treated as foreign corporations for Korean CIT purposes. Also, off-shore partnerships having the nature of limited corporations prescribed in the Korean Commercial Act, such as stock corporations (*Chusik Hoesa*) and limited corporations (*Yuhan Hoesa, Yuhan Chegim Hoesa*), are treated as foreign corporations.
**Significant developments**

**Foreign Direct Investment (FDI) - Change in FDI Law**

The Law No. 116 of 2013 is a welcome addition to a host of new economic laws and regulations that have been recently approved for the purpose of improving the overall investment climate, fostering competitiveness, and encouraging more engagement in value added investment opportunities.

As per the provisions of the FDI Law, foreign investors operating in Kuwait are now eligible to increase the equity share up to 100% when establishing a Kuwaiti company, rather than being restricted to a maximum of 49%, in accordance with the commercial law.

An entity may apply for an investment licence and operate under the provision through the following:

- Kuwaiti company with a 100% foreign entity ownership.
- Licensed branch.
- Representative office.

Moreover, since the aim of the FDI Law is to ultimately promote the direct investment of opportunities in the country, investors shall be granted an exemption from income tax for a period of up to ten years and customs exemption on import of machinery, equipment and their spare parts, raw materials, etc. (provided that there will be a restriction on use/disposal of such imported material for a period of five years), given that the state of Kuwait is benefitted through the following criteria:

- The transfer of advanced technology.
- Stimulation of the local market through engagement of local suppliers for operational purchases.
- Creation of job opportunities for local staff.

The Kuwait Direct Investment Promotion Authority (KDIPA) has also introduced the ‘one stop shop’ unit, which serves as a guidebook on post investment matters for ease of investors and also provides solutions on day-to-day issues concerning investors.

Under the FDI Law, the Council of Ministers determined the negative list of direct investments excluded from the scope of the FDI Law in light of its developmental and economic plans and the state’s general policy, and the proposals of the authority’s board of directors in this regard.

**Public Private Partnerships (PPP) Law**

In line with the FDI Law, another form of investments has been invited in Kuwait through the PPP Law. The PPP Law attracts investors to promote economic, social, and infrastructure development for Kuwait by providing them the benefits of 100%
shareholding in the Kuwaiti entity (depending on the funding requirements) and exemptions from tax.

Under this Law, the foreign investor is allowed to initiate/provide concept paper, implement, and operate the project for a specified term. The Law provides general guidelines on project procurement procedures/incorporation/investment terms and transfers of the project to the state. The PPP Law strengthens and enables the institutional framework for PPPs and broadens the benefits of PPP projects. The Executive Regulations to the Law have been introduced, which provide for various provisions to enforce this Law (including processes, criteria, committees, etc.)

**Capital Market Authority (CMA) Law - Introduction of new Law**

The CMA recently issued Law No. 22 of 2015 for amending some provisions of Law No. 7 of 2010 concerning the establishment of the CMA and regulating securities activities.

As per Article No. 150 of the Law No. 22 of 2015, in addition to the capital gains on trading of securities on the Kuwait Stock Exchange (KSE), dividends are also exempted from income tax in Kuwait, provided they are generated through the KSE.

**Tax developments**

As an important development on the provisions of tax retention in the Income Tax Law of Kuwait, The Supreme Court in Kuwait has recently pronounced a judgment whereby it has ruled that the Kuwait government has the right to sue the local companies (acting as agents on behalf of the foreign corporates operating in Kuwait) in respect of collection of tax and penalties due for delaying tax payment concerning its activity in Kuwait, and such local agents are under an obligation to pay such tax liability (including penalty) due from the foreign company.

**Taxes on corporate income**

Kuwait does not impose income tax on companies wholly owned by the nationals of Kuwait or other Gulf Cooperation Council (GCC) countries, including Bahrain, Oman, Qatar, Saudi Arabia, and the United Arab Emirates. However, GCC companies with foreign ownership are subject to taxation to the extent of the foreign ownership. Income tax is imposed only on the profits and capital gains of foreign 'corporate bodies' conducting business or trade in Kuwait, directly or through an agent.

Income earned from activities in Kuwait shall be considered subject to tax in Kuwait. In cases where a contract involves the performance of work both inside and outside Kuwait, the entire revenue from the contract must be reported for tax in Kuwait, including the work carried out outside Kuwait. Please refer to the Income determination section for more information on income that is subject to tax in Kuwait.

The current tax rate in Kuwait is a flat rate of 15%.

Foreign companies carrying on trade or business in the offshore area of the partitioned neutral zone under the control and administration of Saudi Arabia are subject to tax in Kuwait on 50% of taxable profit under the law.

**Zakat**

Zakat is imposed on all publicly traded and closed Kuwaiti shareholding companies at a rate of 1% of the companies' net profits.
Kuwait

**Contribution to the Kuwait Foundation for the Advancement of Sciences (KFAS)**
All Kuwaiti shareholding companies are required to pay 1% of their net profits as per their financial statements, after their transfer to the statutory reserve and the offset of loss carryforwards, to the KFAS, which supports scientific progress.

---

**Corporate residence**

A foreign corporate body is any association formed and registered under the law of any country or state other than Kuwait that is registered as having a legal existence entirely separate from that of its individual members. No Kuwait-registered company is subject to income tax. However, any foreign corporate body that is a shareholder in a Kuwait-registered company undertaking business in Kuwait is subject to tax (see the Taxes on corporate income section). For the purposes of this law, GCC residents and entities wholly owned by GCC residents are treated in the same manner as Kuwaiti business entities.

**Permanent establishment (PE)**

The interpretation and application of the tax laws in Kuwait is usually not consistent with international standards, and the tax provisions are usually subjected to the widest possible interpretation by the tax department to tax all income from Kuwaiti sources. An insignificant presence of employees or short-term visits to Kuwait by the representatives of a company may render the entire revenue from the transactions as taxable in Kuwait. Full value of the contract, including the value of work performed outside Kuwait, is subject to tax in Kuwait.

---

**Other taxes**

**Value-added tax (VAT)**
There is currently no VAT system in Kuwait.

**Customs tariffs**
The GCC states have approved a unified customs tariff of 5% on cost, insurance, and freight (CIF) invoice price, subject to certain exceptions. A higher tariff is imposed on imports of tobacco and its derivatives and other products as notified.

**Excise taxes**
There are no excise taxes in Kuwait.

**Property taxes**
There are no property taxes in Kuwait.

**Transfer taxes**
There are no transfer taxes (e.g. stamp duty, real estate) in Kuwait.

**National Labour Support Tax (NLST)**
The purpose of the NLST law is to encourage the national labour force to work in the private sector by closing the gap in salaries and benefits between public and private sectors.

As per the law, Kuwaiti companies listed in the KSE are required to pay an employment tax of 2.5% of the company’s net annual profits.

**Social security contributions**
For Kuwaiti employees, contributions are payable monthly by both the employer and employee under the Social Security Law. The employer’s contribution is 11.5% and the employee’s is 8% of monthly salary, up to a ceiling of 2,750 Kuwaiti dinars (KWD) per
Benefits provided include pensions on retirement and allowances for disability, sickness, and death.

In addition to the above contributions, effective 1 January 2015, the employee’s contribution under the Social Security Law will increase by 2.5% of the monthly salary, up to a ceiling of KWD 1,500 per month.

There are no social security obligations for expatriate workers. However, for foreign employees, it is generally necessary to make terminal indemnity payments calculated at 15 days’ pay-per-year for the first three years of service and 2/3 month’s pay-per-year thereafter.

**Branch income**

The tax rates on branch profits are the same as on corporate profits.

**Income determination**

Income tax is imposed on the profit of a business in Kuwait as calculated by the normal commercial criteria, using generally accepted accounting principles (GAAP), including the accrual basis. Note that provisions, as opposed to accruals, are not deductible for tax purposes. In addition, for contract accounting, revenue is recognised by applying the percentage of completion method.

Article 2 of the amended tax law provides that income earned from the following activities in Kuwait shall be considered subject to tax in Kuwait:

- Any activities or business carried out either entirely or partially in Kuwait, whether the contract has been signed inside or outside Kuwait, as well as any income resulting from supply or sale of goods, or from providing services.
- The amounts collected from the sale, rent, or granting of a franchise to utilise any trademarks, design, patents, copyright, or other moral rights, or those related to intellectual property rights for use of rights to publish literary, arts, or scientific works of any form.
- Commission earned or resulting from agreements of representation or commercial mediation, whether such commissions are in cash or in kind.
- Having permanent office in Kuwait where the sale and purchase contracts are signed and/or where business activities are performed.
- Profits resulting from the following:
  - Any industrial or commercial activity in Kuwait.
  - Disposal of assets, either through the sale of the asset, part of the asset, the transfer of the asset’s ownership to others, or any other form of disposal, including the disposal of shares in a company whose assets mainly consist of non-movable capital existing in Kuwait.
  - Granting loans in Kuwait.
  - Purchase and sale of property, goods, or related rights in Kuwait, whether such rights are related to monetary assets or moral rights such as mortgage and franchise rights.
  - Lease of property used in Kuwait.
  - Providing services, including profits from management, technical, and consultancy services.
  - Carrying out trading activities in the KSE, whether directly or through portfolios or investment funds.
Inventory valuation
Inventory is normally valued at the lower of cost or net realisable value, on a first in first out (FIFO) or average basis.

Capital gains
Capital gains on the sale of assets and shares by foreign shareholders are treated as normal business profits and are subject to tax at a 15% rate. The tax law provides for a tax exemption for profits generated from dealing in securities on the KSE, whether directly or through investment portfolios.

Dividend income
Treatment of dividends is not specifically addressed in the amended tax law or in its bylaws. The bylaws to the amended tax law, however, require investment companies or banks that manage portfolios, funds, or act as custodians of shares for foreign entities to withhold corporate tax due from payments due to foreign investors. Tax payment should be made within 30 days from the date of the deduction of tax, together with a list showing names of the foreign entities and the amount withheld from each.

Interest income
In principle, tax is levied on the foreign company's share of the profits (whether or not distributed by the Kuwaiti company) plus any amounts receivable for any other income in Kuwait (e.g. interest, royalties, technical services, and management fees). However, the Kuwait tax law will still subject the interest received from a Kuwaiti source to tax in Kuwait, whether this interest is the only source of income for the foreign entity in Kuwait or the foreign entity has more sources of income in Kuwait than the interest income.

Foreign currency exchange rates and related profits and losses
The tax treatment for realised and unrealised losses and gains related to foreign currency transactions are as follows:

- Unrealised foreign exchange gains are required to be reported in the tax declaration. However, unrealised gains may be excluded from taxable income for calculating the tax due for the fiscal year.
- Realised foreign exchange gains are taxable in Kuwait and therefore added to calculate taxable profits.
- Unrealised losses are not considered as tax deductible costs and therefore excluded for calculating taxable profits.
- Realised losses may be claimed as tax deductible costs, provided such losses are supported by adequate supporting information and documents.

Exempt income
The following sources of income are exempt from tax in Kuwait:

- Kuwaiti merchants purchasing, transporting, and selling goods imported on their own account where the foreign supplier has not been involved in Kuwait operations.
- Profits of a corporate body generated from dealing in securities listed on the KSE, whether such activities are carried out directly or through investment portfolios or funds.

Foreign income
The Kuwait tax law does not clearly state the tax treatment of foreign income. Such income is currently treated on a case-by-case basis.

Deductions
For expenses to be deductible, they must be incurred in the generation of income in Kuwait. Such expenses must be supported by adequate documentary evidence.
**Depreciation**
Depreciation is taken on a straight-line basis at specified rates. However, within 90 days prior to submission of the tax declaration, the taxpayer may request that the tax department calculate the depreciation using a different method than the straight-line method. The tax department shall accept this request if it is based on a reasonable basis in accordance with the tax accounting principles and rules.

The principal depreciation rates are specified in the law, as follows:

<table>
<thead>
<tr>
<th>Type of fixed asset</th>
<th>Depreciation rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Buildings</td>
<td>4</td>

</tr>
<tr>
<td>Computer equipment and accessories</td>
<td>33.3</td>
</tr>
</tbody>
</table>

**Goodwill**
In accordance with Executive Rule No. 30, amortisation of incorporated body goodwill is not allowed as a tax deductible expense.

**Start-up expenses**
Expenses incurred prior to signing of the contract are not allowed as tax deductible costs.

**Interest expenses**
Interest expenses are deductible if they are related to operations in Kuwait and are paid to a local bank.

**Bad debt**
Bad debt is deductible if related to operations in Kuwait and final resolution from the court is available.

**Charitable contributions**
Grants, donations, and subsidies paid to licensed Kuwaiti public or private agencies are deductible.

**Fines and penalties**
Fines and penalties are not tax deductible.

**Taxes**
Taxes and fees, except income tax, are deductible in Kuwait.

**Subcontract costs**
A subcontractor is any third party, provider, or beneficiary that in any way executes a portion of the contract or any phase thereof and is responsible for that portion or stage.

As per the Executive Rule No. 28, subcontract costs are deductible if the following conditions are fulfilled:

- The work performed by the subcontractor is related to the main contract.
- The cost of the subcontractor works does not exceed revenues for such works.
Kuwait

- The necessary documents (e.g. the contract, invoices, and settlement documents) are available.
- In the event that the incorporated body implementing the contract sells or assigns it to the subcontractor or any other party, official written approval from the contracting body is provided.
- In the event that the subcontractor sells or assigns the contract to another subcontractor, official written approval from the contracting body and the incorporated body implementing the contract is provided.

During inspection, the tax department shall disallow the amounts paid to subcontractors if the incorporated body does not notify the tax department of the subcontractors or does not withhold 5% of the contract value signed with the subcontractor as income tax retention.

**Net operating losses**
As per the amended tax law, losses may be carried forward for a maximum of three years, provided that the following situations do not arise in the fiscal period following the period in which the loss was recorded:

- The tax declaration does not include any revenue from the business activities of the taxpayer in Kuwait.
- Change in the legal structure of the taxpayer.
- Merger of the taxpayer with another entity.
- Liquidation or ceasing of the activities of the taxpayer in Kuwait.

Please note that losses cannot be carried back in Kuwait.

**Head office expenses/payments to foreign affiliates**
The deduction of head office expenses (the overhead or the indirect expenses) is limited to 1.5% of the company's Kuwait revenue after deducting the subcontractors' shares (if any).

The direct costs allocated by the head office (e.g. supply of goods, design and consultancy costs) are regulated as follows.

For goods costs incurred outside Kuwait:

<table>
<thead>
<tr>
<th>Work conducted by</th>
<th>Maximum allowable costs as a percentage of revenue</th>
</tr>
</thead>
<tbody>
<tr>
<td>Head office</td>
<td>85%</td>
</tr>
<tr>
<td>Affiliated companies</td>
<td>90%</td>
</tr>
<tr>
<td>Third parties</td>
<td>95%</td>
</tr>
</tbody>
</table>

For design costs incurred outside Kuwait:

<table>
<thead>
<tr>
<th>Work conducted by</th>
<th>Maximum allowable costs as a percentage of revenue</th>
</tr>
</thead>
<tbody>
<tr>
<td>Head office</td>
<td>75%</td>
</tr>
<tr>
<td>Affiliated companies</td>
<td>80%</td>
</tr>
<tr>
<td>Third parties</td>
<td>85%</td>
</tr>
</tbody>
</table>

For consultancy costs incurred outside Kuwait:

<table>
<thead>
<tr>
<th>Work conducted by</th>
<th>Maximum allowable costs as a percentage of revenue</th>
</tr>
</thead>
<tbody>
<tr>
<td>Head office</td>
<td>70%</td>
</tr>
<tr>
<td>Affiliated companies</td>
<td>75%</td>
</tr>
<tr>
<td>Third parties</td>
<td>80%</td>
</tr>
</tbody>
</table>
In case there is no separate revenue for the consultancy, design, or goods work, although the nature of the contract requires the existence of consultancy work, the following formula shall be applied:

Consultancy, design, or goods revenue = (consultancy, design, or goods costs / total direct costs) x contract revenue

**Group taxation**

If a foreign company conducts more than one business activity in Kuwait, one tax declaration aggregating the income from all activities is required to be submitted in Kuwait. In addition, in the case where two affiliates are involved in similar lines of business or work on the same project, their taxable results may be aggregated for the assessment of tax by the Department of Inspection and Tax claims (DIT).

**Transfer pricing**

*Please refer to Head office expenses/payments to foreign affiliates in the Deductions section.*

**Thin capitalisation**

Executive Rule No. 38 deals with the tax treatment of interest and letters of credit. Through this rule, the DIT will accept the interest paid by a company, provided it is fully supported, paid to a financial institution, and related to the Kuwait operations. However, the tax law provides the DIT the right to determine the proper tax treatment on a case-by-case basis (if required).

**Tax credits and incentives**

**Foreign tax credit**

Foreign taxes paid to a country with which Kuwait has a treaty for avoidance of double taxation may be eligible for credit up to the maximum of the Kuwaiti tax that would have been payable on such income.

**Leasing and Investment Companies Law No. 12 of 1998**

Leasing and Investment Companies Law No. 12 of 1998 allows the formation of investment and leasing companies having their principal place of business in Kuwait, with Kuwaiti or foreign shareholders. The law grants a five-year tax holiday to non-Kuwaiti founders and shareholders of such companies, beginning on the date of establishment of the companies.

**Foreign Direct Investment Law No. 116 of 2013**

With enactment of the FDI Law, ‘a new public authority’ (the Kuwait Direct Investment Promotion Authority) has been formed to take over the roles and the responsibilities of the Kuwait Foreign Investment Bureau.

The FDI Law gives several incentives and flexibility, including:

- More efficiency within the process by introducing a new public authority, which will be responsible for determining, evaluating, and granting the licence and approval for foreign companies operating in Kuwait (compared to the old committee and Council of Ministers).
- More flexibility by allowing foreign companies to have the eligibility to structure and operate through a ‘branch’ and ‘representative offices’ in Kuwait.

The issuance and amendments made to the investment law, as well as the incentives granted to foreign investors in Kuwait, shall be applicable to activities within specific
Kuwait

economic sectors, including all industries with the exception of activities listed on the negative list.

**Kuwait Free Trade Zone (KFTZ)**
Businesses set up in the KFTZ for carrying on specified operations are exempt from taxes on operations conducted in the zone. Foreign entities can own 100% of such businesses. Currently, the government of Kuwait has stopped issuing KFTZ licences.

**Build, operate, and transfer (BOT)**
Kuwait has begun to use the BOT method in respect of some large infrastructure projects. Tax and tariff concessions may be built into a BOT contract.

**Circular No. 50 of 2002**
As per Circular No. 50 of 2002 issued by the DIT regarding treatment of exempted companies under tax laws and/or other special laws and/or tax treaty, exempted companies shall comply with the provisions of submission of tax declaration, inspection, and assessment procedures like other companies in order to be eligible for exemption.

Some of the privileges under this law include:

- Exemption from income tax or any other taxes for a period of ten years from the commencing of the actual operations of the enterprise.
- Benefits under double taxation agreements.
- Benefits under investment encouragement and protection agreements.
- Total or partial exemption from customs duties on imports.
- Recruitment of required foreign labour.
- Allotment of land and real estate.

**Withholding taxes**
Apart from the withholding tax (WHT) on dividends arising from trading securities listed on the KSE, there are no other WHTs. However, all government bodies and private entities are required to retain the final payment due to a contractor or subcontractor until presentation of a tax clearance certificate from the Ministry of Finance (MOF) confirming that the respective company has settled all of its tax liabilities. The final payment should not be less than 5% of the total contract value.

**Tax treaties**
Kuwait has entered into tax treaties with several countries for the avoidance of double taxation. Treaties with several other countries are at various stages of negotiation or ratification.

However, little experience has been gained in Kuwait regarding the application of tax treaties. As a result, disputes about the interpretation of various clauses in tax treaties between taxpayers and the DIT are not uncommon. Disputes with the DIT regarding tax treaties normally arise with respect to the following issues:

- Existence of a PE.
- Income attributable to a PE.
- Tax deductibility of costs incurred outside Kuwait.

The domestic tax law in Kuwait does not provide for WHTs. As a result, it is not yet known how the Kuwaiti government will apply the WHT procedures included in the treaties listed in the table below. The WHT rates listed in the table are for illustrative purposes only.

Notes

1. The rate is 0% for amounts paid to a company of which the government owns at least 20% of the equity.
2. The rate is 0% for interest paid to the government of the other contracting state. Under the Ethiopia treaty, the rate is also 0% for the interest paid to entities in which the government owns a specified percentage of the equity and for interest paid on loans guaranteed by the government.
3. The rate is 0% for dividends and interest paid to the government of the other contracting state. Under the Ethiopia treaty, the rate is also 0% for dividends paid to entities in which the government owns a specified percentage of the equity.
4. The rate is 10% for dividends paid to the government of Kuwait or any of the institutions or any intergovernmental entities. The rate is 15% for other dividends.
5. The 5% rate applies if the recipient of the dividends owns, directly or indirectly, at least 10% of the payer. The 15% rate applies to other dividends.
6. The rate is increased to 5% if the beneficial owner of the interest carries on business in the other contracting state through a PE and the debt on which the interest is paid is connected to such PE.
7. The rate is 0% for amounts paid to the government of the other contracting state and to entities of which the government owns at least 51% of the paid-up capital.
8. For dividends and interest, the rate is 0% if the payments are made to the government or a governmental institution of the other contracting state, or to a company that is resident of the other contracting state and is controlled by, or at least 49% of the capital is owned, directly or indirectly, by, the government or a governmental institution. A 0% rate also applies to interest arising on loans guaranteed by the government of the other contracting state or by a governmental institution or other governmental entity of the other contracting state.
9. A 0% rate applies if the beneficial owner of the dividends is a company that holds directly at least 10% of the capital of the company paying the dividends.
10. The rate is 0% if the payments are made to the government or a governmental institution of the other contracting state, or to a company that is resident of the other contracting state and is controlled by, or at least 25% of the capital is owned, directly or indirectly, by, the government or a governmental institution of the contracting state.
11. The rate is 0% if the beneficial owner of the interest is a resident in the other contracting state and the loan is secured or financed, directly or indirectly, by a financial entity or other local body wholly owned by the government of the other contracting state.
12. The 5% rate applies if the recipient of the dividends owns, directly or indirectly, at least 25% of the payer. The 10% rate applies to other dividends.
13. The 5% rate applies if the recipient of the dividends owns, directly or indirectly, at least 25% of the payer. The 10% rate applies to other dividends.
14. Dividends or interest paid by a company that is resident of a contracting state is not taxable in that contracting state if the beneficial owner of the dividends or interest is one of the following:
   • The government.
   • A political subdivision or a local authority of the other contracting state.
   • The Central Bank of the other contracting state.
   • Other governmental agencies or governmental financial institutions as may be specified and agreed to in an exchange of notes between the competent authorities of the contracting state.
Kuwait

Kuwait is awaiting conclusion or ratification of treaties with Algeria, Bangladesh, Benin, Bosnia and Herzegovina, Guyana, Kenya, Lithuania, Luxembourg, Macedonia, Nigeria, Senegal, and Seychelles.

**Tax administration**

**Taxable period**
Tax is imposed on profits arising in a taxable period, which is defined as the accounting period of the taxpayer and further assumed to be the calendar year. However, the DIT may agree to a written request from the taxpayer to change the year-end to a date other than 31 December. Also, at the taxpayer’s request, the DIT may agree to extend the accounting period, provided it does not exceed 18 months.

**Tax returns**
The taxpayer must submit a tax return, based on the taxpayer’s books of account, within three months and 15 days of the end of the taxable period. A foreign entity can request an extension of up to 30 days for filing the tax declaration. The maximum extension in time to be granted will be 60 days. If such an extension is granted, no tax payment is necessary until the tax declaration is filed, and payment must then be in one lump sum.

The taxpayer must keep in Kuwait certain accounting records, which are subject to inspection by the tax department’s officials. Accounting records may be in English and may be in a computerised system used to prepare financial statements, provided that the system includes the required records and the tax department is previously informed.

The tax return should be supported by the following:

- Audited balance sheet and profit-and-loss account for the period.
- Detailed list of fixed assets (e.g. additions, disposals).
- List of inventory (e.g. quantities and values).
- List of subcontractors and the latest payments to them.
- Copies of current contracts and a statement of income and expenditure for each.
- Trial balance, forming the basis of the accounts.
- Last payment certificate from the client.
- Insurance companies must attach to the Public Budget and the tax declaration a detailed statement with the reinsured documents and the related terms and conditions.

As a general rule, an assessment is finalised only after inspection of records by the tax department. As indicated above, proper documentation must be kept to support expenditure and to avoid disallowances at the time of tax inspection. If support is considered inadequate, the assessment is apt to be made on the basis of deemed profitability. This is computed as a percentage of turnover and is fixed arbitrarily, depending on the nature of the taxpayer’s business.

**Payment of tax**
Tax is payable in four equal instalments on the 15th day of the fourth, sixth, ninth, and 12th months following the end of the tax period. If an extension is approved by the DIT, all of the tax is payable upon the expiration date of the extension. Failure to file or pay the tax on time attracts a penalty of 1% of the tax liability for every 30 days of delay or part thereof.

**Objection process**
If a company disagrees with an assessment issued by the DIT, the company should submit an objection within 60 days from the date of the assessment. The DIT is required to resolve the objection within 90 days of the filing of the objection, after which a revised tax assessment is issued by the DIT. Upon issuance of a revised tax assessment, any
additional tax is payable within 30 days. If the DIT issues no response within 90 days of filing the objection, this implies that the taxpayer’s objection has been rejected.

**Appeals process**
In case the objection is rejected or the taxpayer is still not satisfied with the revised tax assessment, the company may contest the matter further with the Tax Appeals Committee (TAC) by submitting a letter of appeal within 30 days from the date of the objection response or 30 days from the expiry of the 90 days following submission of an objection if no response is provided by the DIT.

The matter is then resolved through appeal hearings, and a final revised assessment is issued based on the decision of the TAC. Tax payable per the revised assessment must then be settled within 30 days from the date of issuance of the revised assessment. Failure to do so results in a delay penalty of 1% of the amount of the tax due per the final assessment for each period of 30 days or part thereof of the delay.

**Statute of limitations**
Law No. 2 of 2008 introduced a statute of limitation period of five years into the tax law. The prior Kuwait tax law did not provide a statute of limitations for tax. However, under Article No. 441 of the Kuwait Civil Law, any claims for taxes due to Kuwait or applications for tax refunds may not be made after the lapse of five years from the date on which the taxpayer is notified that tax or a refund is due.

**Topics of focus for tax authorities**
The DIT has implemented an active approach to ensure the compliance of local companies with the tax retention mechanism, especially those who have franchise operations and agreement with foreign franchisors in Kuwait. In some cases, the DIT has asked the Kuwaiti companies to settle the 5% retention where the franchisors have failed to comply with the tax law requirements.
**Significant developments**

Currently, Kyrgyzstan is in the process of joining the Eurasian Economic Union (EEU); consequently, a number of major changes are expected with respect to Kyrgyzstan tax and customs legislation.

In addition, the following changes were introduced to the tax legislation of Kyrgyzstan (with effect from 2014):

- Based on Law #147 as of 18 July 2014, from 1 January 2009, interest expenses included in the original cost of fixed assets should be related to the purchase and production of fixed assets for own use.
- From 1 April 2014, payment of acquired natural resources paid in cash and/or non-cash form is taxable for value-added tax (VAT) purposes.
- From 2 February 2014, voluntary VAT registration is effective from the first day of the month following the month of application submission.
- From 2 February 2014, VAT registration documents should be issued within ten days from the day of registration of application.
- From 1 April 2014, the amount of VAT on natural resources acquired in the territory of Kyrgyzstan paid in cash (where the total cost of such natural resources exceeds 300,000 Kyrgyzstani som [KGS]) should not be offset.

Several CIT, VAT, ST updates were introduced with respect to taxation of religious organisations and/or income from provision of devotions, rituals, ceremonies, and services on pilgrimage.

**Taxes on corporate income**

Pursuant to the Tax Code, resident entities are subject to a corporate income tax, called the ‘profit tax’, on their aggregate annual income earned worldwide. Non-resident legal entities carrying out business activities through a permanent establishment (PE) in Kyrgyzstan are subject to profit tax on the income attributed to the activities of that PE.

Profit tax is calculated at a rate of 10% of aggregate annual income less allowed deductions.

**Gold industry profit tax**

The profit tax rate for taxpayers extracting and selling gold ore, gold concentrate, gold alloy, and refined gold is set at 0%.

Additionally, there is a tax (‘income tax’) specifically for taxpayers extracting and selling gold ore, gold concentrate, gold alloy, and refined gold.

Income tax is calculated at a varying rate of 1% to 20% (depending on the world price of a troy ounce of gold) of revenues from selling gold alloy and refined gold or of the value.
of gold in the gold-bearing ore and gold concentrate calculated on the basis of world prices.

**Local income taxes**
There are no local income taxes in Kyrgyzstan.

---

**Corporate residence**

There is no concept of corporate residence in the Kyrgyzstan tax legislation.

Legal entities formed under the Kyrgyz law should be taxed in Kyrgyzstan on their worldwide income, whereas foreign legal entities should be taxed only in relation to Kyrgyzstan-sourced income.

**Permanent establishment (PE)**

Under Kyrgyzstan tax legislation, a PE is a permanent place of business through which a non-resident carries out business operations, including activities performed through an authorised person. A PE includes the following:

- Any place of management, department, office, factory, workshop, mining, oil and gas wells, land, construction site, or project.
- Any services rendered by non-residents by hiring personnel working in the territory of Kyrgyzstan for a duration of more than 183 calendar days within any consecutive 12-month period.

A PE is not created in Kyrgyzstan if a non-resident is limited to the following activities in Kyrgyzstan:

- Use of warehouses or buildings exclusively for storage or demonstration activities.
- Use of a fixed place of business exclusively for preparatory purposes.
- Performance of activities in Kyrgyzstan through an agent in cases where such agent usually performs such activities in the ordinary course of business.

Creation of a PE may be connected with the establishment of a branch or subsidiary. Both branches and subsidiaries are considered appropriate business vehicles for foreign investors, and the choice between them is determined by the business the investor is engaged in, along with various other factors.

---

**Other taxes**

**Value-added tax (VAT)**

In Kyrgyzstan, VAT is assessed on taxable supply and taxable imports. Input VAT assessed on purchases used for business purposes is generally offset against output VAT on taxable supplies. The VAT rate is 12%, except for certain zero-rated supplies and certain exempt turnover (see below).

All taxpayers registered for VAT purposes are required to charge VAT on their taxable supply and to calculate and report their VAT liabilities. Taxpayers are required to register for Kyrgyzstan VAT purposes if their taxable supply in the preceding 12 calendar months exceeds KGS 4 million. Even if an entity is not required to register for VAT purposes, it may still do so voluntarily by submitting an application to the appropriate tax committee.

**Place of supply of goods**

Goods and services are subject to VAT if they are deemed to be supplied in Kyrgyzstan under the place of supply rules. According to these rules, transactions are deemed to
be made at the place where transport of the goods begins if the goods are transported by the supplier and at the place where the goods are transferred to the customer in all other cases. The rules regarding services are more complicated. Services that are not specifically mentioned are deemed to be supplied at the place where the service provider has established a place of business. Certain other services are deemed to be supplied at the place of the purchaser.

Import of goods
Generally, imports of goods are subject to VAT.

Non-deductible input VAT
The input VAT is not allowed for offset if it is subject to payment in connection with the receipt of goods, works, or services not related to entrepreneurial activity, or if it relates to inputs for VAT-exempt supplies.

Zero-rated supplies
Certain supplies are zero-rated for VAT purposes. These include exports (except for certain limited types of export), international transportation, and services connected with the service of transit air flights related with international transportation. Supply of goods, works, or services for official use of diplomatic and consular representations is taxable, but may be refunded, provided that certain conditions are met.

Exempt supplies
Certain supplies are VAT-exempt, including supplies and exports of gold and silver alloy and refined gold and silver, supplies of pharmaceuticals, land plots, residual buildings and construction, financial services, and export of works and services. When a taxpayer generates both taxable and exempt supplies, input VAT proportional to the ratio of the exempt supply to the total supply is disallowed for offset.

VAT incentives
Certain imports are VAT-exempt, including imports of technological equipment, if used for one’s own production purposes. A preferential offset method of VAT settlement in respect of certain fixed assets imported to Kyrgyzstan is also available, whereby the import VAT does not need to be paid to customs but is reflected simultaneously as input and output VAT in the VAT accounts.

Reverse-charge VAT
The current Tax Code does not have any provisions on reverse-charge VAT.

VAT liability calculation and VAT offset carryforward
In general, the VAT liability of a taxpayer is calculated as output VAT (i.e. VAT charged by a taxpayer) less input VAT (i.e. VAT paid by a taxpayer to its suppliers) in a reporting period. The excess of input VAT over output VAT may generally be carried forward against future VAT liabilities.

VAT compliance
The tax period for VAT is a calendar month. The submission of the VAT declaration is due by the 25th day of the month following the reporting period (except for major taxpayers, for which it is due by the end of the month following the reporting period). Payment of the VAT liability is due by the 25th day of the month following the reporting period.

Sales tax
Sales tax is assessed on Kyrgyz legal entities or foreign entities operating through a PE in Kyrgyzstan for any sales of goods or rendering of services. The sales tax mechanism differs from VAT, i.e. the sales tax is levied for the whole sales turnover and does not take into account the purchases (input turnover).
Kyrgyzstan

Sales tax rates are as follows:

- In case of sale of goods, works, or services that are VATable and VAT exempt:
  - Trading activities: 1%.
  - Mobile communication activities: 5%.
  - Other activities: 2%.
- In case of sale of goods, works, or services not outlined above:
  - Trading activities: 2%.
  - Other activities: 3%.

The Kyrgyzstan Tax Code further defines trading activities as activities on sale of goods purchased for re-sale purposes.

The tax period of sales tax is a calendar month. Taxpayers have to submit tax returns and make payments of sales tax at the place of tax registration by the 21st day of the month following the reporting month.

**Customs duties and regimes**
According to the Customs Code, the customs value of goods imported to the customs territory of Kyrgyzstan is determined by applying the following methods:

- Transaction value of imported goods.
- Transaction value of identical goods.
- Transaction value of similar goods.
- Deductive method.
- Computed method.
- Provisional method.

Based on the Kyrgyzstan customs legislation, the rates of customs duties may be:

- *Ad valorem* - charged in percentage to customs value of the taxable goods.
- Specific - charged within established size for unit of the taxable goods.
- Combined - including both above mentioned types.

The rates in percentage range from 0% to 30%; however, the maximum rate of 35% may be charged if the country of origin is unknown.

**Import restrictions**
Generally, all entities or persons have equal rights to import and export or transfer goods into the Kyrgyzstan territory, including when carrying out foreign trade activity, except in special cases as stipulated by legislation and international treaties.

Import of certain goods (e.g. weapons, nuclear materials) is subject to licensing.

**Temporary import relief**
There is a temporary import regime under which foreign goods are used in Kyrgyzstan with full or partial conditional exemption from the payment of customs duties and taxes and without application of non-tariff regulatory measures. The term of the ‘temporary import’ customs regime may not exceed two years.

**Customs duties incentives**
Certain items are exempt from customs payments, including:

- Transportation vehicles used in the international conveyance of passengers and goods and items of material and technical supply in transit.
- Goods imported in the customs territory or imported from the customs territory for official and personal use by official state representatives of foreign states.
Kyrgyzstan provides preferential rates or exemptions on the importation (and export) of certain goods, including goods originating from the states that form free trade zones or a customs union with Kyrgyzstan and goods originating from developing countries, included on a special list provided by the government.

**Documentation and procedures**
Kyrgyzstan pays close attention to formalities/documentation, so it is necessary to furnish the customs authorities with a set of required documents. For import, such documents usually include cargo customs declaration, invoices, contracts, etc.

**Warehousing and storage**
There is a bonded warehouse customs regime in Kyrgyzstan. Under this regime, imports entering into Kyrgyzstan may be stored in special facilities or special areas that have the status of a customs warehouse under the customs legislation of Kyrgyzstan. This regime implies exemption from customs duties and taxes.

Generally, most goods (unless otherwise specifically provided for) can be placed under the bonded warehouse customs regime. The period for storage of goods at a bonded warehouse is determined by the person placing the goods into the customs warehouse but cannot exceed three years from the date when the goods were placed under the bonded warehouse customs regime.

**Re-exports**
The re-export regime is similar to that used in international practice. It is defined as a customs regime under which goods previously imported into Kyrgyzstan are exported without payment or with a refund of the paid amounts of import customs duties and taxes and without applying the non-tariff regulatory measures with respect to the goods in compliance with Kyrgyz legislation.

There are certain conditions under which goods can be re-exported. Customs duties and taxes are not charged for goods declared as goods intended for re-export. However, if the goods do not meet the re-export criteria, customs duties and taxes are paid in the amount that would be payable if the goods, at their importation, were declared for release for free circulation, as well as interest on them paid at the National Bank rates, as if deferment was provided with respect to the amounts at placement of the goods under the customs regime of re-export.

**Excise tax**
Certain goods manufactured in Kyrgyzstan or imported to Kyrgyzstan are subject to excise tax. These include certain alcohol and alcoholic drinks, fortified drinks, beer, tobacco goods, platinum, and oil products.

The rates of excise tax are adopted annually by the Kyrgyzstan government and range from KGS 10 for 1 litre of wine materials to KGS 3,000 for 1 ton of fuel. The rate for tobacco goods (including cigarettes) range from KGS 5 to KGS 580 based on the type of tobacco. Note that the excise tax on cigarettes and tobacco products will increase each year starting from 1 January 2014 till 2016.

**Stamp taxes**
There are no stamp taxes in Kyrgyzstan.

**Subsurface use taxes**
The subsurface use taxes consist of separate bonus and royalty taxes on subsurface users, both Kyrgyz legal entities and branches of foreign legal entities. Under Kyrgyz legislation, subsurface users are legal entities and individuals who perform exploration and/or extraction of mineral resources.
Kyrgyzstan

The government, depending on the type of mineral resources, establishes the bonus rates.

The royalty rates are estimated either as a percentage of sales turnover (1% to 12%) or in absolute terms in Kyrgyzstani som, depending on the type of mineral resources.

Social contributions
The social security system in Kyrgyzstan is comprised of the Pension Fund, Obligatory Medical Insurance Fund, and Employees Recovery Fund. The employer pays social contributions at 17.25% of employees' gross remuneration from its own funds.

The employer is also required to withhold social contributions at 10% out of the salary that is payable by the employees to the Pension Fund and State Saving Fund.

Payroll taxes
The employer is obligated to withhold and transfer to the budget the income tax from its employees' gross remuneration less allowable deductions. The income tax rate is 10%.

Local taxes
There are two local taxes in Kyrgyzstan, property tax and land tax.

Property tax
Property tax is a local tax payable quarterly by legal entities owning transport vehicles and immovable property in Kyrgyzstan, including apartment houses, apartments, boarding houses, holiday inns, sanatoria, resorts, production, administrative, industrial, and other buildings or facilities. Certain real estate may not be subject to this tax according to special lists approved by the government.

In respect of immovable property, the tax rate is established by the city or local authorities at a rate not to exceed 0.8% of the taxable base, except for apartment houses and apartments designated solely for residence, for which the rate may not exceed 0.35% of the taxable base. For transport vehicles, the tax is computed in Kyrgyzstani som, depending on engine volume and year of production.

Land tax
Land tax is paid quarterly by legal entities on the area of owned land. The basic rates are provided in the Tax Code, depending on the location and purposes of the land. The basic rates may range from KGS 0.9 to KGS 2.9 per square metre.

Branch income
Branch income is subject to the profit tax. There is no special branch profits tax in addition to profit tax.

Income determination
Aggregate annual income is comprised of all types of income, including, but not limited to, the following, in addition to gross revenue from the sale of goods, works, or services:

- Dividends.
- Interest income (except for income already subject to withholding tax [WHT]).
- Royalties.
- Assets received free of charge.
- Rental income.
- Income from the reduction of liabilities.
- Foreign exchange gain.
• Write-off liability.

The Tax Code envisages some profit tax privileges aimed at developing certain areas of the business economy. Currently, these include privileges/preferences for:

• Charity organisations.
• Associations of invalids of I and II groups (i.e. persons with disability with different levels of physical disability); associations of blind and deaf persons.
• Agricultural organisations.
• Growing of berries, fruits, and vegetables.
• Credit unions.
• Companies that have been involved in the food industry for less than three years and included in the Kyrgyzstan government’s list of exempt companies.

Non-taxable revenues include, *inter alia*, the following:

• Property received as a charter capital contribution and income from realisation of shares of organisations.
• Property donated to special organisations using such property for development purposes under the government’s social culture plan. Despite being designated as property used for social culture purposes, such property may still be used for other purposes (i.e. citizen defence projects, mining equipment, water intakes, heat networks, roads, stations).

**Inventory valuation**

There are no special provisions on inventory valuation in the Kyrgyzstan Tax Code. Inventory valuation is conducted in accordance with the International Financial Reporting Standards (IFRS).

**Capital gains**

Capital gains are subject to the ordinary profit tax rate. There is an exemption available for capital gains from selling shares that occur on the date of a given sale in the official lists of the stock exchange in the top two categories of listing.

**Dividend income**

Dividends from participation in Kyrgyz legal entities are exempt from profit tax. All other dividends are subject to the ordinary profit tax rate.

**Interest income**

Interest income should be included into the aggregate annual income and taxed at the standard profit tax rate, provided the tax has not already been withheld at the source of payment in Kyrgyzstan at the 10% rate.

**Partnership income**

Simple partnerships are not taxpayers in their own right, and income and expenses flow through to the partners for tax reporting purposes. Kyrgyzstan limited liability partnerships are taxed as corporations.

**Foreign income**

Generally, Kyrgyz legal entities are taxable on income earned worldwide. Foreign income is subject to the ordinary profit tax rate.

There are no tax deferral provisions in Kyrgyzstan tax legislation.
Deductions

Depreciation

The Tax Code establishes a deduction for depreciation based on the declining-balance method. Depreciable fixed assets are divided into several groups, for which maximum depreciation rates range from 10% to 50%.

<table>
<thead>
<tr>
<th>Group</th>
<th>Assets</th>

<td>50</td>
</tr>
</tbody>
</table>

Certain expenses are deductible within specified limits, including expenses on repairs, expenses on procuring and producing capital production assets, and certain other expenses.

Goodwill

Kyrgyzstan domestic tax legislation does not stipulate the allowance of a deduction for goodwill for profit tax purposes.

Start-up expenses

Kyrgyzstan domestic tax legislation does not stipulate the allowance of a deduction for start-up expenses for profit tax purposes.

Interest expenses

Deductions for interest actually paid on debts, where the loan proceeds were used to fund expenses incurred for the taxpayer’s business activity, are allowed within limitations provided in the Tax Code, depending on methodology and nature of the debt. For example, interest on loans connected with the purchase of depreciable assets is not deducted, but increases their value.

Bad debt

Bad debt amounts are deductible in Kyrgyzstan. The Tax Code defines a ‘bad debt’ as the amount the taxpayer is unable to fully receive as a result of the termination of an obligation by the court, bankruptcy, liquidation, or death of the debtor, or expiry of the limitation period provided by the civil legislation of Kyrgyzstan.
**Charitable contributions**
Deductions for donations of assets to charity and budget organisations are limited to 10% of taxable income.

**Fines and penalties**
Fines and interest penalties paid to the state budget are not deductible.

**Taxes**
The following taxes may be deducted:

- Land tax.
- Property tax.
- VAT not allowed for offset.
- Subsurface use taxes.

**Other significant items**
Generally, other expenses related to the earning of aggregate annual income are considered deductible for profit tax purposes, including:

- Business trip expenses that were actually incurred and supported by appropriate documentation (per diems during business trips are deductible only within the established statutory limits).
- Commissions on payroll expenses for labour.
- Material and social benefits provided to employees.
- Representational expenses connected with earning income (transportation, hotel, and translator services).
- Training and retraining of employees.
- Scientific development and exploration works (deductions are relevant for fixed assets).
- Any other costs related to earning income, which can be supported by appropriate documentation in terms of their nature and amount (e.g. invoices, payment orders, receipts).

The other categories of expenses that are not deductible include:

- Capital expenses and expenses connected with the purchase, production, and installation of equipment.
- Any expenses incurred on behalf of any other third persons, except in cases where documentation proves business needs for such expenses.
- Pricing losses caused by rates, understated below-market prices, and price incentives.
- Expenses connected with purchases of services in entertainment, vacations, and leisure.

**Net operating losses**
Net operating losses can be carried forward for up to five years. There are no provisions in Kyrgyz legislation allowing carryback of losses.

**Payments to foreign affiliates**
Payments to foreign affiliates are deductible for profit tax purposes if they are aimed at earning income and supported by documentation.

**Group taxation**
Group taxation is not permitted in Kyrgyzstan.
Kyrgyzstan

**Transfer pricing**
While there is no special law on transfer pricing in Kyrgyzstan, rules on transfer pricing are found in the Tax Code. The general transfer pricing provisions set in the Tax Code do not follow Organisation for Economic Co-operation and Development (OECD) guidelines (thus, no advance pricing agreement [APA] mechanism is provided). According to the Kyrgyz transfer pricing regulations, the tax authorities are empowered to determine the value of the following transactions:

- Transfers between related parties.
- Barter transactions.
- Cross-border transactions.

**Thin capitalisation**
There are no thin capitalisation limitations under the Kyrgyzstan Tax Code.

**Controlled foreign companies (CFCs)**
There are no provisions for CFCs in Kyrgyzstan.

---

**Tax credits and incentives**

**Foreign tax credits**
There is no possibility to offset the amount of tax paid outside Kyrgyzstan against the Kyrgyz tax if there is no double tax treaty (DTT) with the country.

**Investment incentives**
There are no special tax preferences in the Kyrgyzstan Tax Code; however, Kyrgyz Law on Investments envisages that in case of changes in the tax and customs legislation, investors may apply terms that are more beneficial to them.

**Special economic zones**
There are four special economic zones in Kyrgyzstan: Naryn, Karakol, Bishkek, and Maimak. The special economic zones generally provide for a tax-neutral regime, exemption from customs duties, and a liberal currency control regime. However, there is a special fee for incentives, which varies from 0.1% to 2% of sales (depending on the region).

**Park of Innovative Technologies**
Activities of residents of the Park of Innovative Technologies are exempt from profits tax, sales tax, and VAT, providing they meet requirements of the Tax Code of Kyrgyzstan. The tax rate for employees of residents of the Park of Innovative Technologies and individual entrepreneurs is 5%.

---

**Withholding taxes**
Passive income from sources in Kyrgyzstan by a non-resident that is not connected with a PE is taxable at the source of payment, without deductions, at the following rates:

- Dividends and interest: 10%.
- Insurance premiums received under risk insurance or re-insurance agreements: 5%.
- Authorship fee and royalty: 10%.

Income obtained by a non-resident from performing activities and services in Kyrgyzstan, not connected with a PE, is taxable at the source of payment, without deductions (with the exception of VAT), at the following rates:
• Income from telecommunication or freight services in international communication and transportation between Kyrgyzstan and other countries: 5%.
• Income from management and consulting services: 10%.
• Other services and activities: 10%.

WHT applies to Kyrgyzstan-source income regardless of whether the payment is made within or outside of Kyrgyzstan.

The application of DTTs often effectively provides a reduction of WHT rates or, in the case of non-passive income, an income tax exemption. Note that the application of treaty privileges is not necessarily automatic, and taxpayers may need to comply with certain administrative procedures to secure relief.

**Tax treaties**

According to the Tax Code, the provisions of international tax agreements and other acts to which Kyrgyzstan is a party and ratified by the President or the Parliament (as appropriate) take precedence over the provisions of the Tax Code.

As of 1 January 2015, Kyrgyzstan has concluded DTTs with the countries listed in the following table, which shows the corresponding WHT rates:

<table>

**Notes**

1. 5% if the beneficial owner is a company (other than a partnership) that directly holds at least 25% of the capital of the paying company.
2. 5% if the beneficial owner is a company (other than a partnership) that owns not less than 10% of the capital of the paying company.
3. 5% if the beneficial recipient is a company that owns not less than 50% of the capital of the paying company.
4. 5% if the beneficial owner is a company (other than a partnership) that directly holds at least 20% of the capital of the paying company.

5. 5% from the total amount of royalty paid for the use of, or the right to use, industrial, commercial, or scientific equipment.

---

**Tax administration**

**Taxable period**
The taxable period for profit tax is one calendar year.

**Tax returns**
The Tax Code stipulates that the Aggregate Annual Income Tax Declaration must be filed with the tax authorities by 1 March of the year following the reporting year.

Tax authorities may grant an extension for filing a tax return for up to one month upon application by the taxpayer. Such extension does not relieve or prolong the taxpayer’s obligation to pay the tax in a timely manner.

**Payment of tax**
Tax payments should be made as follows:

- Advance payments on profit tax: Taxpayers (except for zero-rated taxpayers and taxpayers exempt from profit tax) should file tax reporting and pay to budget a preliminary amount of profit tax on a quarterly basis (from the second quarter). The reporting period for the preliminary amount of the profit tax is established as the first quarter, first half year, and first nine months of the current fiscal period. The advance profit tax amount for the reporting period shall be determined in the amount of 10% of the profit calculated for the reporting period according to the rules established by Kyrgyz legislation on accounting. The advance profit tax amount payable to the budget for the reporting period shall be defined as the positive difference between the advance profit tax calculated for the reporting period and advance profit tax calculated for the previous reporting period.
- Final payments on profit tax: 1 March of the year following the reporting year.
- Tax withheld at the source of payment by a tax agent: by the 20th day of the month following the month when income was recognised.

**Tax audit process**
The State Tax Committee of the Ministry of Finance of Kyrgyzstan and its local tax authorities are the only state authorities that have the right to perform tax audits. The Kyrgyzstan tax service consists of relevant subdivisions of the revenue committee of the Ministry of Finance of Kyrgyzstan and its local authorities.

A tax audit is performed based on a written notification from the Head of the State Tax Inspectorate, which specifies the name of the company to audit, the scope of the audit, and the terms of the audit. Tax audits may be performed not more than once a year by one of the tax authorities (district, city, region, or the state tax authorities) and should not last more than 30 days. If necessary, however, a tax audit may be extended for ten additional days with written approval from the State Tax Inspectorate.

**Statute of limitations**
The period of limitation for tax liability is six years.

**Topics of focus for tax authorities**
Generally, the Kyrgyz tax authorities focus on the support for profit tax deductions, correctness of tax calculations, and WHT issues during the tax audits. Recently, however, we have also observed a rising interest from the tax authorities in transfer pricing issues.
Significant developments

There have been no significant corporate tax developments in Lao People's Democratic Republic (PDR) during the past year.

Taxes on corporate income

**Profits tax (PT)**

All companies (including all forms of legal entities) that are registered under Lao PDR law are subject to PT on their worldwide income. Companies formed under foreign law, operating a business in Lao PDR, and conducting business in Lao PDR are subject to tax on their income derived in Lao PDR.

The standard rate of PT for companies in Lao PDR is 24% of net profit after adjustments for non-deductible expenses and others according to Lao Tax Law 2011. The 24% rate applies to both domestic and foreign investors.

Tax holidays and reduced PT rates are applicable to companies whose investment activities qualify as promoted investment activities (see the Tax credits and incentives section for more information).

**Lump-sum tax**

The lump-sum tax is imposed on small and medium business operators that are not registered in the value-added tax (VAT) system and companies that did not prepare Lao accounting books. The lump-sum tax is paid in lieu of the PT, based on an agreement with the tax office; consequently, the lump-sum tax is regarded as a tax within the PT category.

**Local income taxes**

There are no provincial or local income taxes in Lao PDR.

Corporate residence

There is no definition of residence or permanent establishment (PE) provided in the Tax Law 2011. However, the concept of PE is provided in the Law on VAT 2009 (Article 3(9)). This article states:

‘Permanent Business Establishment’ is referred to as an establishment where a taxpayer operates her/his business on a regular basis. Establishments considered to be permanent include administrative offices, branch offices, factories, mining/extraction sites, construction fields or sites, and any site where undertakings take place.

It is understood that the reason for having no PE definition in the law is because there is foreign contractor withholding tax (FCWHT) levied on foreign entities conducting their business activities in Laos. For more information about the FCWHT, please see the Withholding taxes section.
Lao People’s Democratic Republic

**Other taxes**

**Value-added tax (VAT)**

The standard VAT rate is 10%.

VAT is imposed on the final consumer of goods and services. Goods and services used for production, trading, and consumption in Lao PDR, goods imported into Lao PDR, and services rendered by foreigners to Lao PDR customers are subject to VAT.

Certain goods and services are exempt from VAT. Exempted items include unprocessed agricultural products, seeds, fertilisers, textbooks, education services, medical services, banking services, and insurance.

Exported goods and services are zero-rated. The conventional credit method is used to calculate the VAT payable (i.e. output VAT less input VAT). Excess input VAT can be carried forward for six months (extendable). Input VAT for exports is refundable.

Business operators engaged in production or trading of taxable goods and services must register in the VAT system if their annual revenue is 400 million Lao kip (LAK) or more. Companies below this threshold may voluntarily register. Only registered VAT payers may claim VAT refunds.

One unique feature of Lao PDR VAT is that VAT is imposed on the services rendered by overseas service providers to domestic service users (withholding VAT). Domestic service users have an obligation to withhold VAT out of the service fees paid to overseas service providers.

**Import duties**

All goods imported into Lao PDR are subject to import duty. Exemptions are available to enterprises operating promoted investment activities (see the Tax credits and incentives section for more information).

Lao PDR has adopted the General Agreement on Tariffs and Trade (GATT) valuation principles. Duty rates are based on the Association of Southeast Asian Nations (ASEAN) harmonised tariff nomenclature for imports from ASEAN member countries; otherwise, normal rates are applied. Duty rates range between 0% and 40%, depending on whether the goods are ASEAN or other source.

**Excise taxes**

Excise tax applies to the import and sale of certain luxury products. Excisable goods include alcohol, beer, cigarettes, perfume, cosmetics, motor vehicles, soft drinks, mineral water, and many types of electrical equipment. Excise tax rates range from 5% to 150%.

Under the new Tax Law 2011, the excise tax rates on vehicles range from 25% to 150%. However, the rates under Tax Law 2005 are still applicable until the relevant supporting regulations of the new Tax Law 2011 are issued.

**Property taxes**

Land taxes vary depending on the location and the type of the land (e.g. land for construction, agriculture). The calculation of the land tax is based on both the location and the size of the land and is levied at annual rates per square metre. Land tax is payable in the first quarter of the relevant calendar year.

**Transfer taxes**

There are no transfer taxes in Lao PDR.
Stamp taxes
The stamp taxes in Lao PDR range from LAK 2,000 to LAK 20,000, depending on the types of documents.

Administrative fees
Under the Tax Law, government sectors can collect fees for issuing fiscal licences, business licences, permits, visas, advertisement boards, broadcasting rights, and other services. The charges and service fees are set periodically by Presidential Decree.

Social Security Scheme contributions
An enterprise with ten or more employees must register itself and its employees in the Social Security Scheme and make contribution to the scheme. Both the enterprise and its employees are obligated to contribute to the Social Security Scheme a combined 11.5% of the employees’ basic salaries or wages. The enterprise contributes 6% and each employee contributes 5.5%. At the moment, the basic amount for Social Security Scheme calculation is capped at LAK 2 million.

Branch income
Branches of foreign companies are taxable on their income from carrying on business in Lao PDR.

Income determination
The PT calculation is based on an entity’s actual accounting profits, prepared in accordance with the Lao Accounting Manual, as adjusted for tax purposes. The Lao PDR tax regulations are silent on the treatment of a large number of items. Generally, in such cases, the tax treatment will follow the accounting treatment. Some of the more common differences are depreciation, entertainment expenses, and the non-deductibility of reserves and provisions (until actually paid).

Inventory valuation
Inventory valuation for tax purposes follows the method used for accounting purposes in Lao PDR.

Capital gains
There is no separate tax on capital gains in Lao PDR. However, profits from the sale of shares are subject to tax at a rate of 10%, except for the sale of investments of listed companies in Lao PDR. The buyer of the shares is required to withhold and remit the tax.

The rate of income tax on sales or transfers of real property is 5%.

Dividend income
Dividends received from another Lao PDR company or a foreign company are taxed at a flat rate of 10%, except for dividend income of listed companies in Lao PDR.

Interest income
Interest income is taxable in Lao PDR, except for interest income derived from loans lent by commercial banks and interest income derived from money deposited with commercial banks. The rate of income tax on interest income is 10%.

Rental/royalties income
Rental income and royalties income are taxable in Lao PDR. The rate of income tax on rental income is 10%, and the rate of income tax on royalties income is 5%.
Unrealised exchange gains/losses
Unrealised exchange gains are not taxable and losses are not deductible in Lao PDR.

Foreign income
There is no controlled foreign company (CFC) or similar regime in Lao PDR. Profits of a foreign subsidiary are taxable when remitted as dividends.

Deductions
Accrued expenses are deductible in Lao PDR. Reserves and provisions are not deductible until actually settled.

Depreciation
Depreciation rates are prescribed in the Tax Law and may differ from financial accounting. Depreciation is on a straight-line basis over prescribed useful lives, as follows:

<table>
<thead>
<tr>
<th>Assets</th>
<th>Years</th>
</tr>
</thead>
<tbody>
<tr>
<td>Buildings used for industrial purposes:</td>
<td></td>
</tr>
<tr>
<td>With useful life of 20 years or less</td>
<td>20</td>
</tr>
<tr>
<td>With useful life over 20 years</td>
<td>50</td>
</tr>
<tr>
<td>Buildings used for commercial and residential purposes:</td>
<td></td>
</tr>
<tr>
<td>Permanent structures</td>
<td>20</td>
</tr>
<tr>
<td>Semi-permanent structures</td>
<td>10</td>
</tr>
<tr>
<td>Machinery, equipment, vehicles</td>
<td>5</td>
</tr>
<tr>
<td>Software</td>
<td>5</td>
</tr>
<tr>
<td>Office equipment</td>
<td>5</td>
</tr>
<tr>
<td>Ships and passenger aircraft</td>
<td>20</td>
</tr>
</tbody>
</table>

Goodwill
There is no specific guidance on the deductibility of goodwill or amortisation in Lao PDR.

Start-up expenses
Start-up expenses are amortisable over two years in Lao PDR.

Interest expenses
Interest is deductible on an accrual basis following the accounting treatment. All interest payments must be supported by documents showing that the payments are commercially reasonable. Interest paid to a shareholder is not deductible.

Bad debt
Bad debt reserves are not deductible in Lao PDR. However, a deduction is allowed if a certain procedure has been followed, one still cannot recover the debt, and the debt is ultimately written off.

Charitable contributions
Charitable contributions in Lao PDR are limited to 0.30% of annual revenue.

Entertainment expenses
Entertainment expenses are capped at 0.40% of annual revenue.

Pension expenses
Pension expenses are deductible when paid in Lao PDR.
**Bribes, kickbacks, and illegal payments**
Bribes, kickbacks, and illegal payments are not deductible in Lao PDR.

**Fines and penalties**
Fines and penalties are not deductible in Lao PDR.

**Taxes**
PT and input VAT paid when purchasing fixed assets are not deductible.

**Net operating and capital losses**
Tax losses can be carried forward for three years, but no carryback is allowed. A change in control will not impact a company's loss carryforward. Capital losses are treated as ordinary losses.

**Payments to foreign affiliates**
Payments to foreign affiliates are deductible if in the ordinary course of business.

**Group taxation**
Consolidation or grouping is not permitted, and each entity must file on a separate basis in Lao PDR.

**Transfer pricing**
There are no specific transfer pricing rules in Lao PDR. However, inter-company transactions should be at arm's length.

**Thin capitalisation**
The ratio of debt to capital must not exceed 70% of the total capital for concession investment activities. There are no thin capitalisation rules for general investment activities in Lao PDR.

**Controlled foreign companies (CFCs)**
There is no CFC or similar regime in Lao PDR.

**Tax credits and incentives**

**Foreign tax credit**
There is no foreign tax credit regime in Lao Tax Law. However, certain tax treaties entered into by Lao PDR do have provisions for either deductibility of foreign tax or a credit.

**PT incentives**
PT incentives are provided under the Law on Investment Promotion 2011. This law divides investment areas into three zones, namely Zone 1, Zone 2, and Zone 3, and divides the investment activities into three different levels of promoted activities, namely Promoted Activity 1, Promoted Activity 2, and Promoted Activity 3. The PT exemptions are as follows:

<table>
<thead>
<tr>
<th>Zone</th>
<th>Areas</th>
<th>Promoted Activity 1 (years)</th>
<th>Promoted Activity 2 (years)</th>
<th>Promoted Activity 3 (years)</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Mountainous, plain, and plateau zones with no economic infrastructure to facilitate investments.</td>
<td>10</td>
<td>6</td>
<td>4</td>
</tr>
<tr>
<td>2</td>
<td>Mountainous, plain, and plateau zones with a moderate level of economic infrastructure suitable to accommodate investments to some extent.</td>
<td>6</td>
<td>4</td>
<td>2</td>
</tr>
</tbody>
</table>
3 Mountainous, plain, and plateau zones with good infrastructure to support investments.

PT exemption starts from the date of the enterprise beginning its business operations. For activities producing new products, research, and new technology, the PT exemption commences from the date the enterprise starts making profit. After finishing the period of PT exemption as mentioned above, the enterprise shall pay PT in accordance to the Tax Law.

Mining and hydro power concession and tree plantation shall comply with concerned laws.

**Incentives related to customs duty and other taxes**

In addition to the incentives related to PT, investors shall also be entitled to the following customs duty and other tax incentives:

- Exemption from PT in the next accounting year for a business that spends its net profit to expand its business.
- Exemption from import duty on raw materials, equipment, spares parts, and vehicles that are directly used for production. As for import tax exemption of these items, one shall comply with specific regulations.
- Exemption from export duty for exporting general products. As for export of natural resources and products from natural resources, one shall comply with concerned laws and regulations. Importation of all types of fuel is not exempted from import duties and taxes.
- Investors can transfer the annual losses to the next following year to be deducted from profit within the period of three years; however, the losses shall be audited and certified by the tax officer. After this period, the remaining loss is not allowed to be deducted from profit anymore. In the case of the Special and Specific Economic Zones, the incentives related to customs duties and other taxes shall comply with the Decrees on the establishment and management of each zone.

**Specific promotion incentives**

Investment in hospitals, kindergartens, academic schools, vocational schools, colleges, universities, research centres, and some activities related to public utilities shall obtain an exemption of rental or land concession as follows:

- Zone 1: Exemption of rental or land concession for 15 years.
- Zone 2: Exemption of rental or land concession for ten years.
- Zone 3: Exemption of rental or land concession for three years.

Investment in hospitals, kindergartens, academic schools, vocational schools, colleges, universities, research centres, and public utilities shall obtain an additional five-year period of PT exemption.

**Withholding taxes**

WHT is applied to various types of payments made to domestic and foreign recipients.

<table>
<thead>
<tr>
<th>Payment</th>
<th>WHT rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Dividends and profit from sale of shares</td>

<td>10</td>
<td>10</td>
<td>5</td>
</tr>
</tbody>
</table>

* The rate stipulated under Lao PDR law is lower than the limit provided in the DTT.

**Foreign contractor withholding tax (FCWHT)**

An FCWHT on payments to foreign contractors applies where a Lao PDR contracting party contracts with a foreign party that does not have a licence to do business in Lao PDR (regardless of whether the services are provided in Lao PDR or outside Lao PDR). The FCWHT comprises both a PT and VAT element and is the final tax on the foreign company. The FCWHT withholding and filing obligation rests with the Lao PDR customer.

For foreign contractors, PT must be withheld at a deemed percentage of taxable turnover. The deemed rates are determined according to the nature of the contract or activity.

<table>
<thead>
<tr>
<th>Activity</th>
<th>Deemed profit margin (% of business revenue)</th>
<th>Deemed PT rate (%)</th>
</tr>

</tr>
<tr>
<td>Transportation and construction</td>
<td>10</td>
<td>2.4</td>
</tr>
<tr>
<td>Service</td>
<td>20</td>
<td>4.8</td>
</tr>
</tbody>
</table>

The above rates are under Article 21 of Instruction No. 2137/MOF on Implementation of the Tax Law 2005. According to the Tax Department, these rates are applicable until the relevant supporting regulations of the new Tax Law 2011 are issued.

These PT rates are then added to the VAT at 10% to determine the total FCWHT. For example, a foreign service charge of LAK 1,000 would result in LAK 48 of PT and LAK 100 of VAT for a total FCWHT of LAK 148.

**Tax administration**

**Taxable period**

PT is determined on a calendar-year basis.
Lao People’s Democratic Republic

**Tax returns**
The tax return is due by the final day of March of the subsequent year. Submission of the final tax return will be followed by an audit by the Tax Department.

**Payment of tax**
PT is payable quarterly in advance, with a final payment after year end. The first three payments must be paid by 10 April, 10 July, and 10 October of the current tax year. The final payment is due with the submission of the final tax return by 10 March of the subsequent year. The quarterly payments are based on the prior year’s PT (or expected tax for the current year). Any excess PT payment can be carried forward to the subsequent year.

**Tax audit process**
According to Enterprise Law 2005, the audit of a large company, who has assets of more than LAK 5 billion, is mentioned. However, in practice, the tax authorities will access the company after the annual tax filing and issue a certificate after they complete their audit process to the company. Most large companies are audited annually in Lao PDR.

**Statute of limitations**
The statute of limitations is generally three years in Lao PDR.

**Topics of focus for tax authorities**
There are no areas of special focus in tax examinations in Lao PDR.
**Significant developments**

**Attractive holding company regime**
Latvia continues to be an attractive place for registering holding companies. Recently, withholding tax (WHT) on dividends, interest, and royalties (except for payments to tax havens) was cancelled.

Additionally, another option is introduced for European Union (EU)/tax treaty residents with regards to other types of payments that are still subject to WHT. In case of management fees, rental payments, and real estate disposal, EU/tax treaty residents may choose between WHT payments calculated on total fees or 15% tax on profit if the non-resident can present proof of expenses. The Latvian company must first withhold the applicable tax, but the non-resident may later recover tax in excess of 15% calculated on profits (income less expenses) by submitting a separate tax declaration.

**Tax incentive for deductibility of research and development (R&D) costs**
Certain R&D costs may be deducted by multiplying the costs by three. The companies must have an approved project before CIT relief may be used (i.e. the project documentation must be prepared during 2015).

**Taxes on corporate income**
The standard corporate income tax (CIT) rate is 15%. The tax is assessed on a company’s financial profit (loss) that has been adjusted by certain corrections required by law. There are no other taxes on corporate income stated either by the government of Latvia or by local municipalities.

Resident companies are taxed on their worldwide income.

Non-resident companies are taxed on their Latvia-source income through permanent establishment (PE) at the standard CIT rate. If no PE is created, non-residents may be taxed with 0% to 15% WHT for qualifying payments (e.g. management fees, payments to tax havens).

**Micro-business tax (MBT)**
The Micro-business Tax Act gives existing and newly-formed businesses the opportunity of acquiring micro-business status and registering for MBT if they meet the following criteria:

- The shareholders are individuals.
- The turnover does not exceed 100,000 euros (EUR) in a calendar year.
- The number of employees does not exceed five at any time.
- Members of the board are concurrently employees of the MBT payer.
- Remuneration of each MBT payer employee does not exceed EUR 720 per month.

The standard MBT rate is based on a micro-business’s turnover, up to EUR 100,000, and covers payroll taxes, business risk duties, and CIT.
Latvia

As of 1 January 2015, the standard MBT rate of 9% is applicable on a micro-business’s turnover up to EUR 7,000, while the turnover part from EUR 7,001 till EUR 100,000 is subject to MTB at:

- 11% as of 2015
- 13% as of 2016, and
- 15% as of 2017.

Prior to 1 January 2015, the standard MBT rate was 9% on a micro-business’s turnover up to EUR 100,000.

The standard rate may be increased in the following cases:

- If its quarterly staff count exceeds five, then 2% per extra employee will be added to the standard rate.
- If the turnover exceeds EUR 100,000 in a calendar year, the excess will attract a rate of 20%.
- If an employee’s net income exceeds EUR 720 a month, the excess will also attract a rate of 20%.

There is no extra rate of MBT where a taxpayer has reported a steady revenue growth rate in the financial statements over the last two tax years, capped at 30% per year. Similar rules apply to a micro-business’s headcount growth, capped at one to two employees per year.

If a micro-business has reported no revenue or if its MBT charge for the tax period (calendar year) does not exceed EUR 50, the MBT payer has to pay a charge of EUR 50 within 15 days after the date of filing the tax return for the fourth quarter of the tax year.

Corporate residence

A company is resident in Latvia if it is incorporated or had to be incorporated in Latvia.

Permanent establishment (PE)

Under the Latvian Taxes and Duties Act, a non-resident has a PE in Latvia if all three of the following conditions are met simultaneously:

- The non-resident uses a fixed place for activities in Latvia.
- The place for activities is permanently used or is established for the purpose of being used permanently.
- The place for activities is used for the performance of commercial activities.

In addition, it is considered that a non-resident has a PE in Latvia if the non-resident performs in Latvia at least one of the following activities:

- Uses a construction site or performs building or installation activities or supervision or consultative activities related to the construction site or aforementioned activities.
- Uses equipment or installations, drilling platforms, and special ships intended for the research or extraction of natural resources, or carries out supervisory or consultative work related thereto.
- Within a time period, which together exceeds 30 days in any six-month period, provides services, including consulting, management, and technical services, utilising one’s employees or associated personnel.
- Uses the activity of an individual, legal, or other person for the benefit of one’s commercial activities, provided that this person is authorised to enter into contracts in the name of the foreign entity and the person regularly (more than once in a taxation period) exercises such an authority.
Note that the PE risk for entities located in treaty countries should be tested in accordance with the relevant double tax treaty (DTT).

**Other taxes**

**Value-added tax (VAT)**
The following VAT rates apply in Latvia:

<table>
<thead>
<tr>
<th>Description of goods</th>
<th>VAT (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>The standard rate on supplies of goods and services, commodity imports, services rendered by non-residents and treated as supplied in Latvia, and intra-Community acquisitions of goods.</td>
<td>21</td>
</tr>
<tr>
<td>A reduced rate on medicines, medical devices, specialised baby food, domestic public transport services, household heating charges, firewood and wooden heating material to households, textbooks, original literature publications, accommodation services, newspapers and other periodical publications, and electronically supplied media information.</td>
<td>12</td>
</tr>
<tr>
<td>Exemption with credit on supplies of goods within the European Union to taxable persons registered for VAT in other EU member states.</td>
<td>0</td>
</tr>
<tr>
<td>Exemption with credit on commodity exports and imports not released for free circulation in the European Union, supplies of goods and services to diplomats, supplies of goods and services financed by foreign aid, import of gas that is supplied through natural gas system, import of electricity and heat and cooling energy.</td>
<td>0</td>
</tr>
</tbody>
</table>

A number of services are exempt, including education, financial, medical, and insurance services; nursery fees; and the sale of used real estate, including land (except for building land, which is taxable).

**Customs duty**

Customs duty is levied on goods imported into Latvia. The rate of customs duty generally is between 0% and 20% of the value of imported goods, depending on the type and origin of such goods. Exports are generally exempt from customs tax.

**Excise duty**

An excise duty is levied on specific categories of goods, mostly as a fixed amount per unit. Excise duties are applied to the following goods, whether made in Latvia or imported:

<table>
<thead>
<tr>
<th>Product</th>
<th>Excise amount</th>
</tr>
</thead>
<tbody>
<tr>
<td>Oil and oil products</td>

<td>EUR 99.60 per 1,000 m³ for use as fuel.</td>
</tr>
</tbody>
</table>

### Real estate tax

The real estate tax is payable annually for:

- Business properties, such as land and buildings used for economic activities, as well as engineering structures, such as motorways, streets, roads, parking places, bridges, elevated highways, tunnels, pipelines, communication lines, and power lines.
- Buildings that form part of a private dwelling house development (also if owned by a company but not used for living purposes).

Municipalities may determine the real estate rate within the interval from 0.2% to 3%. If a municipality does not announce the rates until 1 November before the taxation period, then statutory rates apply.

Municipalities can apply a tax rate higher than 1.5% if buildings are not maintained according to maintenance requirements.

Statutory real estate tax rates are as follows:

- The standard rate of 1.5% on the cadastral value of land, buildings, and engineering structures.
- A progressive rate for dwelling houses, their parts, and any parts of a non-residential building that are functionally used for living and not used in trade or business:
  - 0.2% of cadastral values up to EUR 56,915.
  - 0.4% of cadastral values exceeding EUR 56,915; but not exceeding EUR 106,715.
  - 0.6% of cadastral values exceeding EUR 106,715.
- Up to 3% for uncultivated land capable of agricultural use, unless it is up to one hectare in area or subject to statutory restrictions on agricultural activity. By law, uncultivated land capable of agricultural use is agricultural land that is not used for making or growing agricultural products (including harvesting, grazing, and keeping animals for agricultural purposes) or is not kept in good agricultural and environmental condition. Municipalities may also determine an additional rate of 1.5% for uncultivated land, thus the total rate for this land may reach 4.5%.
Newly constructed or reconstructed buildings used for economic activity are exempt from real estate tax for one year after completion. Other reliefs are available under the Real Estate Tax Act or determined by municipalities.

A rate of 3% applies for buildings under construction if the permitted construction period has expired. The tax is applicable until the building is accepted for service. The rate will be charged on the highest of cadastral value of the related land and the cadastral value of the building itself.

The residential property owned by companies is eligible for reduced rates (0.2% to 0.6%), but only in cases where the property is rented out and the rent rights are properly registered within the Land Register of Latvia.

**Stamp duty**
Stamp duties are levied on certain legal and other kinds of services, such as court trials, company formation and registration, licences for certain types of business activity, provision of information, notary services, operation of bills of exchange, and registration of real estate at the Land Registry (e.g. in case real estate is sold: 2% of the higher of deal value or cadastral value, capped at EUR 42,686.15 per property).

Stamp duty is not payable if re-registration of real estate in the Land Registry is necessary due to the reorganisation process. Stamp duty payable for re-registration of the title to immovable property in case of contribution in kind to a company's capital is 1%.

**Payroll taxes**
Payroll taxes consist of personal income tax (PIT) and national social insurance contributions (NSIC). The employer is responsible to withhold PIT, at a rate of 23%, and the employee's part of NSIC, at a rate of 10.50%, from gross employment income. The employer's part of NSIC, at a rate of 23.59%, is calculated on top of gross employment income.

**Natural resource tax**
Any natural resources acquired as a result of economic activities (e.g. surface and underground water, dolomite, and quartz sand), the collection of edible park snails, taking advantage of useful features of the bowels of the earth by pumping natural gas or greenhouse gases into geological structures, pollution (waste, emissions, and pollutants), products harmful to the environment (e.g. lubricating oil, electric batteries, oil filters, and tyres), electrical and electronic equipment and appliances, radioactive substances, packaging, disposable tableware, means of transport, the volume of emitted greenhouse gasses that is not included in the number of emission quotas surrendered, coal, coke, and lignite are subject to a natural resource tax in Latvia. The rates are specific for each product and are based on weight, volume, or the amount of the product.

The taxpayer may reduce the natural resource tax by taking part in recycling programs for packaging, products harmful to the environment, electrical and electronic equipment and appliances, and means of transport. Taxpayers do not have an obligation to recycle, themselves, to be entitled to the relief; instead, they can conclude an agreement with the recycling company.

For some of the products, the taxpayer must also pay the disposal tax. The rates differ for a large variety of products.

**Vehicle taxes**
There are two vehicle taxes in Latvia, a vehicle usage tax and a light corporate vehicle tax. The first is payable for exploitation of trucks, and the second is payable for light vehicles held or owned by a company.
Vehicle usage tax
The vehicle usage tax is payable on a yearly basis for the usage of vehicles, and it must be paid in full prior to the state technical inspection.

The vehicle usage (exploitation) tax amount depends on vehicle classification by vehicle features under statutory provisions. The amount of tax depends on various criteria, such as vehicle type (e.g. bikes, cars, trucks), vehicle gross weight, vehicle engine volume, vehicle maximal engine power, etc.

For example, the vehicle usage tax for trucks with gross weight up to 12,000 kg is payable only in accordance with the gross weight of these trucks in the following amounts:

- Up to 1,500 kg: EUR 17.07.
- Between 1,501 kg and 1,800 kg: EUR 34.15.
- Between 1,801 kg and 2,100 kg: EUR 64.03.
- Between 2,101 kg and 2,600 kg: EUR 76.84.
- Between 2,601 kg and 3,500 kg: EUR 102.45.
- Between 3,501 kg and 12,000 kg: EUR 145.13.

Light corporate vehicle tax (LCVT)
LCVT is paid for vehicle(s) owned or held (e.g. rented) by a person engaged in economic activity, which is registered for the first time after 1 January 2005, and with information on the engine volume in the registration certificate. There is a fixed rate of LCVT calculated according to the engine volume, as follows:

- Up to 2,000 cc: EUR 27.03 per month.
- From 2,001 cc to 2,500 cc: EUR 42.69 per month.
- Over 2,500 cc: EUR 56.91 per month.

For vehicles not mentioned in the above criteria, the LCVT will be EUR 42.69 per month.

Car and motorcycle duty
Cars and motorcycles registered for the first time or after modification are subject to a car and motorcycle duty. This duty is payable by any individual or entity registered as the owner of a car or motorcycle.

The applicable tax rates for new cars or cars registered in foreign countries after 1 January 2009 are calculated based on the carbon dioxide (CO2) on each kilometre constituted by the car. The rates range from EUR 0.43 to EUR 7.11 where the CO2 is from 120 grams to 350 grams for each kilometre. The rate for new motorcycles or motorcycles registered in foreign countries after 1 January 2009 is EUR 0.14 for each cubic-centimetre of the engine’s capacity.

For other cars, rates range from EUR 106.72 to EUR 853.72, depending on age and capacity. For other motorcycles, the rate depends on age and is 25% of the rate for cars.

Lottery and gambling tax
A lottery and gambling tax is levied on licensed organisers of games or lotteries. Licence fees range from EUR 4,270 to EUR 427,000. Game organisers, gambling places, and gambling machines are subject to the gambling tax. The tax rates depend on the number and type of gambling machines or percentage of income for several gambling types.

Electricity tax
The electricity tax is levied on electricity supplied to final consumers or consumed by suppliers. The rate is EUR 1.01 per mega-watt-hour. Exemptions are available to producers of electricity and for electricity used by domestic public transport and households.
Local duties
Certain activities are subject to local duties (e.g. construction permits).

Branch income
As a general rule, branches and resident companies are taxed alike, with certain adjustments for payments to the head office. Branch income is subject to a 15% CIT.

Income determination

Inventory valuation
Dictated by the matching and prudence concepts, stock should be valued at the lower of cost or net realisable value. Cost must be computed on a first in first out (FIFO) basis. Cost can mean purchase price or production cost. Any unrealised losses from stock revaluation are non-deductible.

Capital gains
From 1 January 2013, capital gains from trading in non-public shares, except shares of companies established in tax havens, are not taxable and losses are not tax deductible. Capital gains from trading in other non-public securities are taxable and losses are tax deductible. Transactions with public EU/European Economic Area (EEA) securities remain tax neutral, capital gains are not taxable and losses are non-deductible. Capital gains from other public securities (except shares) are taxable and losses are non-deductible.

Capital gain on the disposal of a capital asset is calculated as the difference between the sale proceeds and cost. This gain is subject to a 15% CIT as ordinary income. Unutilised losses arising on the sale of securities other than EU/EEA public securities before 2013 may be offset in chronological order against the company's taxable income of future tax periods.

Dividend income
From 1 January 2013, dividends received from any companies abroad or in Latvia are exempt from CIT, except for dividends from companies registered in blacklisted tax havens (a list of tax havens is provided by the Cabinet of Ministers).

Stock dividends
The distribution of new shares to a company's shareholders in proportion to their existing shareholdings (after a share capital increase by conversion of accrued capital) is not a taxable event for the shareholders.

Interest income
Interest income is taxed at the 15% CIT rate.

Foreign income
Resident companies are taxed on their worldwide income. Income is taxed for the given taxation period; there is no possibility to defer taxation until the profit is repatriated to Latvia. Income tax paid abroad included in the taxable base is allowed as a credit against the CIT charged for the year. However, the credit must not exceed the Latvian tax attributable to the income taxed abroad. Any unused tax credits may not be carried forward.
Deductions

Depreciation and amortisation

Fixed assets may be depreciated for tax purposes according to the reducing-balance method by applying the following rates to tax written-down values:

<table>
<thead>
<tr>
<th>Types of property</th>
<th>Depreciation rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Buildings, structures, and perennial plantations</td>
<td>10</td>
</tr>
<tr>
<td>Technology and energy installations, fleet, railway</td>
<td>20</td>
</tr>
<tr>
<td>Computer hardware and software, information systems, electronic equipment</td>
<td>70</td>
</tr>
<tr>
<td>Light passenger cars (except special purpose vehicles), motorcycles, and air transport means</td>
<td>30</td>
</tr>
<tr>
<td>Oil rigs, oil exploration and extraction ships, sea and river transport means</td>
<td>15</td>
</tr>
<tr>
<td>Other fixed assets</td>
<td>40</td>
</tr>
</tbody>
</table>

The value of new technological equipment is multiplied by a coefficient (1.5 from 2009 to 2020) before claiming capital allowances. The effect of applying a coefficient is reversed if the new technological equipment is disposed of within five years from acquisition.

Non-business assets are ineligible for capital allowances.

Intangible assets are eligible for capital allowances on a straight-line basis over the following recovery periods:

- Concessions: Ten years.
- Patents, licences, and trademarks: Five years.
- R&D expenses: One year.

Any intangible assets not fitting into any of these categories (such as goodwill) are ineligible for capital allowances.

Start-up expenses

There is no specific treatment for start-up expenses. Generally, after registration of the company for tax purposes, expenses are deductible. Expenses accrued before registration of a company cannot be deducted for CIT purposes due to the lack of supporting documentation with company identifying information. However, input VAT on goods purchased or services received prior to registration for VAT purposes is recoverable if the goods purchased and services received or used will further be used for taxable transactions.

Interest expenses

The CIT Act imposes restrictions on deductibility of interest payable on loans or credits, factoring transactions, and finance leases under two methods. For further details, see Thin capitalisation in the Group taxation section.

Bad debts

Bad debts may only be deducted for CIT purposes if certain conditions are met.

Charitable contributions

Donations paid to charitable institutions, non-profit making foundations, churches and monasteries, and various other welfare institutions are not tax deductible, but may qualify for a tax relief if certain criteria are met (see the Tax credits and incentives section).
Luxury vehicles
Luxury vehicles (i.e. light passenger cars with a value greater than EUR 50,000, excluding VAT) are not eligible for capital allowances. A tax deduction is denied for expenses incurred in using and maintaining luxury vehicles and for lease or hire purchase payments associated with leasing such vehicles. These rules do not, however, apply to special purpose vehicles (such as emergency vehicles and special passenger vehicles).

Provisions
Any increase in general provisions and reserves for the tax period as compared with the previous tax period is non-deductible. These provisions include accruals for accrued benefits, bonuses and commissions, and other expenses.

Non-business expenses
A tax deduction is not allowed for any expense not directly related to business activities. In fact, non-deductible expenses have to be multiplied by a coefficient of 1.5 (except donations made to qualifying institutions). Effectively, such expenses are taxed at 22.5% (15% x 1.5).

Non-business expenses include costs that are not directly related to commercial activities; all expenses incurred for the leisure and recreation of owners and employees; entertainment trips taken by owners and employees in company vehicles; any benefits, gifts, credits, and loans turned into gifts to owners and employees; and any other disbursements in cash or in kind to owners or employees that are not part of remuneration or that are not related to the taxpayer’s commercial activities.

Representation expenses
Under the Latvian CIT Act, representation expenses are costs that a company incurs in developing and maintaining its prestige at a level acceptable to society. Representation expenses include costs incurred in holding public conferences, receptions, and meals, and the cost of producing items to represent the company (e.g. items bearing its logo). 40% of representation expenses are deductible for CIT purposes.

Fines and penalties
Fines, contractual penalties, and statutory interest on arrears (including increase in principal debt) levied under the Taxes and Duties Act and specific tax laws are not deductible.

Taxes
Excise duties, employer’s national social insurance contributions, natural resource taxes, customs duties, and real estate taxes are deductible.

Net operating losses
Tax losses may be carried forward for an unlimited period of time if accrued since 2008. Tax losses accrued before 2008 may be carried forward eight years (for more details, please see table below).

<table>
<thead>
<tr>
<th>Year losses accrued</th>
<th>Last year losses can be used</th>
</tr>
</thead>
<tbody>
<tr>
<td>2007</td>
<td>2015</td>
</tr>
<tr>
<td>2008 and after</td>
<td>Not limited</td>
</tr>
</tbody>
</table>

The carryback of losses is not permitted.

A company in which more than 50% of shares (a controlling interest) have changed hands may utilise its tax losses if it continues for five years the same business that it carried on during the two years prior to the change of control. When companies are reorganised by a merger or spin-off, it may be possible to utilise losses accrued.
Payments to foreign affiliates
In general, a Latvian company may deduct the full amount of royalties, service fees, and interest (subject to statutory limits) made to related parties to the extent that such payments are made at arm’s length. Such payments may be subject to a WHT (see the Withholding taxes section). However, if a taxpayer fails to deduct the WHT due, the amounts paid cease to be deductible for tax purposes.

Group taxation
Group consolidation is not permitted for tax purposes. As of 2014, it is no longer possible for the members of a group of Latvian companies, whose parent directly or indirectly owns 90% of the capital of its subsidiary or subsidiaries, to surrender their current-year tax losses to one another.

Transfer pricing
The Latvian Regulation governing the application of the CIT Act states that for transfer pricing calculation purposes, use may be made of the Transfer Pricing Guidelines for Multinational Enterprises and Tax Administrations, a document issued by the Organisation for Economic Co-operation and Development (OECD).

Latvian law requires that related-party transactions be in compliance with the arm’s-length principle. Under the arm’s-length principle, the conditions made or imposed between two related enterprises in their commercial or financial relations must not differ from those that would be agreed between independent enterprises engaging in similar transactions under similar circumstances.

A tax audit may examine and adjust the price of a transaction in the following circumstances:

- The transaction is between related parties.
- Barters and set offs.
- A price deviation exceeds 20% of prices that the taxpayer has applied to similar goods or services over a short period.
- Exports and imports.

The transfer pricing requirements for the arm’s-length price of a related-party transaction primarily apply to transactions between two or more related companies. Also, Latvian legislation requires the taxpayer to adjust one’s taxable income for the difference between the price applied to a transaction and the arm’s-length value if the transaction involves:

- individuals related to the company
- related foreign companies
- companies exempt from CIT or enjoying CIT relief pursuant to other Latvian laws
- a Latvian-related company with which it forms a single tax group, or
- a company located in a jurisdiction with a more favourable tax regime.

This provision may apply to any transaction, including purchases and sales of fixed assets and goods, supplies of services, loans and borrowings, and intellectual property (IP). It is possible to use corresponding adjustments and adjust taxable income if a related party has made adjustments of its income according to transfer pricing rules. It is possible only if the related party is registered in the European Union or a country that has an effective DTT with Latvia and documentary evidence from the respective tax authorities is received.

Latvian taxpayers who enter into transactions with any of the parties listed above and whose annual turnover exceeds EUR 1,430,000, and related-party transactions
amounting to EUR 14,300 or more, have to prepare transfer pricing documentation for those transactions exceeding statutory limits.

Within one month after receiving a request from the Latvian tax authorities, a taxpayer must submit full transfer pricing documentation containing the following information:

- Industry analysis giving a general overview of the industry in which the taxpayer operates.
- Company analysis.
- Functional analysis giving information on the related parties’ functions, risks, and assets.
- Economic analysis, including:
  - a description of how the transfer pricing method was selected and
  - a benchmarking study.

While the full transfer pricing documentation requirement applies to entities exceeding statutory limits in respect of turnover and the annual amount of related-party transactions, other entities will still be required to prove that their transfer pricing is at arm’s length. Normally, Latvian tax authorities expect taxpayers to be able to demonstrate which transfer pricing method is used and how it has been applied (i.e. a benchmarking study of third-party comparables showing that the prices applied by the taxpayer fall within the arm’s-length range).

Latvian taxpayers can apply for an Advance Pricing Arrangement (APA) with the State Revenue Service (SRS). The APA is an administrative act issued by the SRS to address a taxpayer’s request in relation to establishing the conditions and methodology to set transfer prices in related-party transactions for a maximum period of three years.

An option to apply for an APA with the SRS is available to companies whose value of the transaction with foreign related parties is expected to exceed EUR 1,430,000 a year.

The fee payable to the SRS for the APA application is EUR 7,114 per APA application payable in the following manner:

- 20% when submitting the APA application to the SRS.
- 80% after the SRS issues an official decision for initiating the APA with the taxpayer.

Please also note that in case the SRS refuses to initiate the APA with the taxpayer, they reserve the right not to refund the initial 20% of the APA fee.

**Thin capitalisation**

Thin capitalisation rules apply when claiming a tax deduction for interest payments on loans and finance leases.

Taxable income should be adjusted for either:

- interest paid in excess of interest calculated by applying to the liability 1.57 times the weighted average annual interest rate applied to domestic non-financial companies as determined by Latvian Bank (weighted average interest rate), or
- interest in proportion to the excess of the average liability over an amount equal to four times shareholders’ equity at the beginning of the tax year less any revaluation reserve.

The higher of these calculations should be added to taxable income.

The following interest payments are fully deductible:
Latvia

- Interest paid on borrowings from credit institutions resident in Latvia, EEA member states, or countries with which Latvia has an effective DTT.
- Interest paid on Latvian or EEA debt securities in public trading.
- Interest expenses incurred by credit institutions and insurance institutions, regardless of the lender.

Interest paid on borrowings from a financial institution is deductible up to the amount of interest calculated by applying to the liability 1.57 times the weighted average annual interest rate applied to domestic non-financial companies as determined by Latvian Bank (weighted average interest rate). The qualifying financial institution must meet the following criteria:

- It is resident in Latvia, the EEA, or a country with which Latvia has an effective DTT.
- It provides lending services or finance lease and is monitored by the controlling institution that supervises credit institutions or the financial sector.

**Controlled foreign companies (CFCs)**

There is no CFC regime in Latvia.

---

**Tax credits and incentives**

**Foreign tax credit**

Tax paid abroad on income included in the taxable base is allowed as a credit against the CIT charged for the year. However, the credit must not exceed the Latvian tax attributable to the income taxed abroad and must be substantiated by confirmation from the foreign tax administration. Any unused tax credits may not be carried forward.

**Donations to public benefit organisations**

CIT charge may be reduced by 85% of amounts donated to qualifying state-funded institutions; Latvian-registered societies, establishments, and religious organisations; or to institutions qualifying as public-benefit organisations under the Public Benefit Organisations Act. Such a reduction may not exceed 20% of the total CIT charge. When making a donation, the donor is not permitted to impose an obligation on the recipient to carry out any acts that may be classified and treated as consideration.

Donation relief is also available for donations to EU/EEA entities that have statuses similar to public-benefit organisations in the country of residence.

**Large investment relief**

CIT relief is available for investments over EUR 10 million in qualifying industries in new, unused fixed assets (buildings and structures classified as industrial buildings and new plant and technological equipment) used for business purposes. The available tax relief is 25% of the amount of investments made (15% for investments over EUR 50 million). Investment projects must be completed within five years after the tax relief is granted by the Cabinet of Ministers.

Investments have to enable a company to launch a new line of business or to modernise its existing production, which includes manufacturing new goods, a shift of business activity from producing one type of goods to producing another type of goods, or a complete overhaul of the manufacturing process.

**Free ports and special economic zones (SEZs)**

Companies operating in SEZs are entitled to CIT and real estate tax relief. These areas include the free ports of Ventspils and Riga and the SEZs of Rezekne and Liepaja.
The qualifying companies may apply CIT relief of 80%. The CIT must be calculated at a 15% rate, resulting in an effective CIT rate of 3%. The companies may also apply 80% WHT relief for payments made to non-resident companies.

Real estate tax relief amounts to 80%, and the municipality may waive the remaining 20%. Therefore, when meeting certain criteria, qualifying companies may decrease real estate tax to zero.

The amount of total CIT and real estate tax relief that may be claimed by the company depends on the amount of qualifying investments made by the company in the free port or SEZ area. Depending on the size of the company, the total tax relief available ranges from 50% to 70% from the amount of investments made.

**Deferred tax on asset replacements**

Latvia will allow a deferred payment of tax on profits arising on the sale of a replaced asset in order to encourage manufacturing companies to replace inefficient and outdated plant and machinery.

If a company acquires a functionally similar asset within 12 months before or after the old equipment is disposed of, then any income (profit) on the disposal of the old equipment is ignored in this tax period (i.e. the profit is deductible from taxable income). Tax payment is deferred until the new equipment is sold and may be further postponed if the equipment is replaced.

**Tax incentive for deductibility of research and development (R&D) costs**

There is a possibility to apply accelerated amortisation of R&D related costs (for tax purposes, costs are multiplied by three). This relief is aimed at encouraging R&D and will apply to employment related costs and R&D service agreements signed with specific scientific institutions registered in an EU/EEA or a tax treaty country (both type of costs that accrue after 1 July 2014). The IP that results from the R&D activity must be the taxpayer’s property for at least three years. To qualify for R&D costs relief, the taxpayer must have its own project documentation that meets certain rules.

**Withholding taxes**

The following types of payments to non-residents and, in some cases according to Latvian transfer pricing rules, to related Latvian companies using CIT reliefs are subject to WHT.

**Management fees**

Management and consulting fees are subject to a 10% WHT. The term ‘management and consulting’ means activities carried out by a non-resident directly or by outsourced personnel to ensure the management of a Latvian company or to provide necessary advice.

A Latvian company can rely on a DTT to reduce the rate of WHT to nil for management fees if the non-resident does not create a PE. To this end, the Latvian company must obtain a valid residence certificate for each type of payment to each recipient prior to making the actual payment. A valid residence certificate is one approved by the foreign tax authority and the Latvian tax authority.

**Rental payments**

Rental payments for movable/immovable property in Latvia are subject to a 5% WHT, except payments for aircraft used in international flights and payments for the rights to use or use of industrial, commercial, or scientific equipment, which are exempt.
Latvia

**Disposal of real estate**
A 2% WHT applies to proceeds from real estate disposals. This applies to income from disposed shares or other participation in a Latvian or foreign-registered company or other entity if real estate in Latvia made up (in the period of disposal or the previous period, whether directly or indirectly, through shareholdings in one or more other entities established in Latvia or abroad) more than 50% of the asset value of the company being disposed of.

**Dividends**
Only dividends paid to residents of tax havens are subject to 15% WHT.

In case of extraordinary dividends paid to persons that are established, situated, or created in a tax haven, the applicable WHT rate is 30%.

**Interest and royalties**
Interest and royalty payments attract WHT only if they are made to companies in tax havens. In certain cases, the company may obtain SRS relief from WHT, provided that the payment has not been made to reduce the taxable base. A 5% rate applies on interest payments to tax havens made by Latvian credit institutions; a 15% rate applies on all other interest and royalty payments to tax havens.

**Option for EU/tax treaty residents**
In case of management fees, rental payments, and real estate disposal, EU/tax treaty residents may choose between a WHT payment calculated on total fees or 15% tax on profit if the non-resident can present proof of expenses. The Latvian company must first withhold the applicable tax, but the non-resident may later recover tax in excess of 15% calculated on profits (income less expenses) by submitting a separate tax declaration.

**Summary of WHT rates**
Please see the following table for WHT rates applicable to the payments described above:

<table>
<thead>
<tr>
<th>Recipient</th>
<th>Dividends (1)</th>
<th>Interest (2)</th>
<th>Royalties (2)</th>
<th>Rental payments</th>
<th>Management fees</th>
<th>Disposal of real estate</th>
</tr>
</thead>

<td>15/30</td>
<td>5/15</td>
<td>15</td>
<td>15</td>
<td>15</td>
<td>15</td>
</tr>
</tbody>
</table>

Notes
1. No WHT from 1 January 2013, excluding companies in tax havens.
2. No WHT from 1 January 2014, excluding companies in tax havens.
3. 15% WHT applies to all payments to companies located in tax havens, with the following exceptions:
   - 5% for interest on deposits and current accounts paid by Latvian banks.
   - Repayments of loan principal are exempt.
   - Goods/securities acquired at market prices are exempt.
   - 30% for dividends that are paid more than once per year.

**Tax administration**

**Taxable period**
The fiscal year may not exceed 12 months and is normally based on the calendar year. However, companies are permitted to choose alternative start and end dates for the tax year. The first year of trading may last up to 18 months.
**Tax returns**

Tax returns are filed annually, together with annual accounts, within one month after they have been approved but not later than four months after the end of the financial year. Thus, if the financial year ends on 31 December, the CIT return and annual accounts must be filed not later than by 1 May of the following year. Larger companies may file the CIT return and annual accounts not later than seven months after the end of the financial year.

**Payment of tax**

CIT usually is paid monthly on or before the 15th day of each month, with a final adjustment when the annual tax return is filed. Monthly tax instalments are based on the tax liability in the previous fiscal year and adjusted by the consumer price index. A company may choose quarterly instalments if its monthly advances in the previous period were less than EUR 711. For a new company, advance payments are voluntary.

**Tax audit process**

The tax audit commences with an audit note for open tax years (not more than three years since the tax payment was due, and, from 2013, five years in case transfer prices are audited). The duration of the audit may vary from a few weeks to a few months, in certain cases, not exceeding 90 days. It can be extended to 150 days if information is requested from foreign tax authorities. In case a simultaneous tax audit with a foreign tax administration is initiated, the prolongation of such tax audit is not limited.

Tax authorities should inform a taxpayer of a tax audit no later than ten working days prior to the commencement of the audit with notification about documents the tax authorities may like to receive.

During a tax audit, the auditor notifies the taxpayer about irregularities of calculation of tax payments and any possible fines that could be charged. Prior to issuing the tax audit decision, the auditors invite the taxpayer to final negotiations to discuss the tax audit results.

Following the tax audit and the notification of tax audit findings, the company may in turn:

- Negotiate with the tax authorities with a view to reducing the tax burden and achieve an 'out of court settlement'. The out of court settlement offers the possibility to reduce fines and late payment penalties calculated (not the additional principal amount of tax calculated) by 50% to 85%. The conclusion of such a settlement presupposes that the company accepts the findings of the audit for the audited years.
- Appeal the decision to the Director General of the SRS.
- Only after receiving the decision of the Director General of the SRS, may the taxpayer take the case to court. An advance payment of additional tax calculated and late payment penalties is required. The first decision normally takes up to two years and another two years until a decision by the Court of Appeal and Supreme Court is issued.

**Statute of limitations**

The right of the Latvian tax authorities to collect unpaid taxes is three years since the relevant tax payment was due. Transfer prices may be examined for five years from 2013 onwards.

**Topics of focus for tax authorities**

Topics of interest to the Latvian tax authorities include:

- Transfer pricing, non-arm's-length lending, and other arrangements with related parties.
- Non-business, marketing, and representation expenses.
Latvia

- Payments to and from non-resident companies, including tax haven companies.
- Obligation to register PE in Latvia.
- Unpaid payroll taxes or hidden employment relationships.
- Recoverability of input VAT.

Other issues

**Double tax treaties (DTTs) and intergovernmental agreements (IGAs)**

Latvia has effective DTTs with 56 countries and continues developing its tax treaty network.

Latvia has also signed an IGA with the United States (US) government to implement the tax reporting and withholding procedures associated with the Foreign Account Tax Compliance Act (FATCA). On 2 April 2014, the US Treasury announced that an IGA was ‘in effect’ and, on 27 June 2014, the US Treasury and Latvia signed and released the IGA.
Significant developments

The Ministry of Finance (MoF) is in the process of establishing new tax laws connected with the oil and gas sector in Lebanon. Our understanding is that the MoF will recommend a different treatment for such companies from the current tax law, whether related to the corporate income tax (CIT), value-added tax (VAT), or personal income tax (PIT). Therefore, this tax summary may not be applicable to oil and gas companies considering establishing in Lebanon.

Following the Council of Minister’s approval of the agenda for the Licensing Round during its session of 27 December 2012, the Ministry of Energy and Water (MoEW) issued, on 21 February 2013, Decree no. 9882 regarding the rules and procedures for launching of the Pre-Qualification Round for Oil Exploration in Lebanon.

A new Decision no. 142/1, dated 23 February 2015, relating to imposing an annual lump sum licence fee was introduced. With some exception for certain type of companies (holdings and offshore companies, institutions exempt from tax as per Article 5 of the income tax law), the annual lump sum licence fee for joint stock companies is 2 million Lebanese pounds (LBP), for limited liability companies is LBP 750,000, for establishments assessed based on real profit is LBP 550,000, and for taxpayers assessed on assumed profits is LBP 50,000. The above mentioned licence fees apply to local head offices, branches, outlets, and to any place in which the taxpayer carries on its activity or receives customers. For income tax purposes, the lump sum licence fee is considered as a non-deductible expense. This Decision will become effective in 2016.

Taxes on corporate income

Under the income tax law in Lebanon, tax is levied based on income type. Accordingly, the income tax law divides income into the following three categories:

- Chapter I - profits from industrial, commercial, and non-commercial professions.
- Chapter II - salaries and wages and pension salaries.
- Chapter III - revenues from moveable capital (Chapter III mainly covers all types of dividend income, board member appropriations from profits, and interest income, including interest on bonds and treasury bills).

The income tax law does not provide for a single tax on income. Accordingly, where a taxpayer has income from different sources, each type of income is taxed according to the tax chapter it falls under. The applicable rates are as follows:

- CIT: 15%.
- Capital gains tax: 10%.
- Dividend distribution withholding tax (WHT): 10% (may be reduced to 5% in certain cases).
- Non-resident WHT: 7.5% for services and 2.25% for other than services.
Lebanon

- Payroll tax: from 2% to 20%.
- Moveable capital WHT: 5% or 10%

Not all businesses are taxed in the same manner. Depending on the relative size and structure of a business, the tax method applied is assessed depending on real (or actual) profits or deemed profits.

**Real profit method**
In Lebanon, tax is charged on the total income or profits derived in Lebanon. Based on the income tax law and the principle of territoriality, the main premise for considering a profit to have been realised in Lebanon is if it was generated through an effort or activity exerted in Lebanon.

The tax base (the determination of profits) and the tax rates differ between resident and non-resident taxpayers.

For resident corporate entities, CIT is computed at 15% based on the taxpayer’s accounting profits after adjustments resulting from tax rules through the schedule of accounting-to-tax calculation.

The use of the real profit method is mandatory for the following:

- Corporations (SAL).
- Limited liability companies (SARL).
- Companies of individuals.
- Branches of foreign companies.
- All entities employing more than four employees or importing goods.

Small entities may choose voluntarily to be subject to the real profit method; however, once they choose the real profit method, they cannot revert back to the deemed profit method.

Concerning tax on non-residents, WHT applies at 2.25% on payments for goods and 7.5% on payments for services.

**Deemed profit method**
A deemed profit method is imposed on insurance and savings institutions, taxable transport companies, oil refineries, and public work contractors.

Taxation is based on deemed profits and is levied at a flat rate of 15%.

The rate of deemed profit for public work contractors, as approved by the MoF, is currently set at either 10% or 15% of total amounts collected per year, based on the type of activity performed by the contractor.

For insurance companies, the deemed profit rate is 8% for all insurance activities.

**Local income taxes**
There are no local government taxes on income in Lebanon.

---

**Corporate residence**
Tax is levied on all corporeal/natural and incorporeal/artificial persons, resident in Lebanon or outside, on all profits that they generate in Lebanon. The main premise for considering profits to have been realised in Lebanon is when such profits have occurred from an effort exerted in Lebanon, irrespective of the identity of the taxpayer or place of residency.
Tax is levied on profits generated by two categories of taxpayers: resident taxpayers and non-resident taxpayers.

**Resident taxpayers**
A person, establishment, or company is considered resident for tax purposes, even if not physically resident in Lebanon, when any of the following two terms are satisfied:

- Have an office or a fixed place of business in their name in Lebanon, even when they are not undertaking their business in a normal and repetitive manner.
- Practising a profession or business activity in a normal or repetitive manner in Lebanon, even if they do not have a known registered place of business in Lebanon. This is because they are considered to have practised their profession from the place in which they contact their customers, even if such place is a hotel or a café.

**Non-resident taxpayers**
Non-resident taxpayers can consist of persons residing in Lebanon and persons residing outside Lebanon. A corporeal person residing in Lebanon is subject to the non-resident WHT (see the Withholding taxes section for more information) if neither of the following two terms are satisfied:

- Practise a certain trade in a normal and repetitive manner in Lebanon, irrespective of whether or not they have a known registered place of business.
- Have a known registered place of business in Lebanon.

A person residing outside Lebanon is subject to the non-resident WHT on the amounts, revenues, profits, or proceeds obtained from Lebanon as a result of undertaking an activity in whole or in part on Lebanese territory or as a result of exploiting rights in Lebanon.

**Permanent establishment (PE)**
There are no clear provisions in the Lebanese income tax law to define PE.

**Other taxes**

**Value-added tax (VAT)**
The standard VAT rate in Lebanon is 10%. Unless specifically exempt, VAT is levied on all commercial transactions undertaken by business entities. Export of goods and services and export-related services, international transport, and some of the intermediate operations are zero-rated. Banking, financial services, and insurance operations are exempt from VAT.

Note that the recharge of expenses from an entity in Lebanon to another entity abroad is subject to VAT at 10% (prior to 17 May 2013, VAT at 0% was applied).

**Customs duties**
Modern, simple, and efficient assessment means are adopted by the customs authorities (e.g. electronic declarations, declaration in advance, applying international procedures in clearing the goods, selective inspection, auditing the goods after their release, and adopting the unique declaration).

Customs rates are imposed and modified according to decisions from the Lebanese customs authorities. These decisions are adopted based on the need of the Lebanese markets of some goods and the will to protect national production sectors.

Safeguard measures are provided for in relation to imported goods. The purpose behind such measures is to protect the domestic production sectors when an increase of imports is witnessed when compared to the same period during the previous year.
Lebanon

The rates are determined based on a specific schedule created in conformity with the Harmonised System of Nomenclature. This conformity with the unified system allows Lebanon to represent an ‘importer friendly’ environment for importers.

The normal rates are applied where there is no preferential agreement. When the origin of the good or part of the good is from a country with which Lebanon has a preferential customs treatment, preferential rates apply.

Customs rates in Lebanon are either determined in percentage or paid as a lump sum per unit of imported products.

**Excise taxes**
Excise taxes are mainly applicable in Lebanon on certain beverages and spirits, tobacco products, gasoline, and vehicles.

**Built property tax (BPT)**
The BPT is an annual progressive tax, ranging between 4% and 14%, on built property.

**Stamp duty**
Two kinds of stamp duties are levied. A proportionate stamp duty of 0.3% is levied on all deeds and contracts (written or implied) that mention specific payments or other sums of money. A fixed stamp duty ranging between a minimum of LBP 100 and a maximum of LBP 2 million is applicable on documents in accordance with schedules appended to the stamp duty law.

**Capital gains tax**
Under local legislation, companies are permitted to revalue their fixed assets every five years. Capital gains recognised from such a revaluation, as well as any profits that may be realised from the disposal of fixed assets, are subject to a capital gains tax of 10%.

Income from disposal of shares realised by a company is subject to 10% capital gains tax when the shares are classified as financial assets on the company’s balance sheet.

Income from disposal of shares realised by a company whose main activity is the acquisition of investments is subject to 15% CIT.

**Registration taxes**
The estimated cost of establishing a company in Lebanon is around 7,500 United States dollars (USD). This includes lawyer’s fees and registration fees. The registration fees will increase if the company is established with capital exceeding the minimum requirement. However, the registration fees should not normally exceed 1% of the value of capital.

For branch offices and representative offices, establishment costs are lower and may be estimated at USD 5,000.

When transferring ownership of real estate, registration fees of approximately 6% are applicable.

**Payroll taxes**
Employers are responsible for withholding and declaring payroll taxes on behalf of their employees. Payroll tax is levied at progressive rates of 2% to 20%.

**Social security contributions**
Social security contributions are the following:

- Borne by the employer: 7% for the maternity and sickness benefit schemes, on a maximum of LBP 2.5 million per month, and 6% for the family benefit schemes, on a
maximum of LBP 1.5 million per month, in addition to 8.5% of total annual earnings for the end of service indemnity, with no ceiling.

- Borne by the employee: 2% for the medical scheme, on a maximum of LBP 2.5 million per month.

Branch income

Net income derived from a branch’s operations in Lebanon is subject to Lebanese CIT, levied under the real profit method at a rate of 15%. Taxable profits of foreign branch offices are deemed to be distributed on a yearly basis and are subject to a dividend distribution tax at the rate of 10%.

Representative offices

Representative offices do not pay CIT as long as they do not carry out commercial activities. Representative offices are required to submit annual tax declarations along with detailed company information that includes employee information, a balance sheet, an income statement, a non-resident tax schedule, and a schedule of payments to professionals. The declaration, with all relevant documentation, should be submitted as one single set. All the information included should be based on accounting records. The deadline for submitting the declaration depends on the legal form of the parent company (i.e. before 1 June of the following year for SAL or SARL companies and before 1 May of the following year for others).

Income determination

Inventory valuation

For tax purposes, inventory is valued using the weighted average cost method.

Capital gains

Capital gains are not generally subject to CIT, but may be subject to capital gains tax. See Capital gains tax in the Other taxes section for more information.

Note that income from disposal of shares realised by a company whose main activity is the acquisition of investments is subject to 15% CIT.

Dividend income

Dividends received as a result of a taxable person’s activity are deemed trading income and are subject to 15% CIT. Dividends received as passive income are subject to 10% tax in Lebanon. However, dividends received from Lebanese entities are exempt from CIT, as the dividend tax is withheld at source, but are not exempt from further tax upon distribution from the recipient entity.

Stock dividends

The Lebanese law is silent on the tax implications of stock dividends. However, when share capital is increased by reducing retained earnings, no tax is applicable.

Interest income

Interest earned by corporations is added to taxable income. Relief is given for the WHT suffered on bank accounts, treasury bills, and bonds issued to the extent of the CIT due.

Rental income

Rental income should be deducted from the accounting result to reach the taxable result. Moreover, expenses related to property that is rented out should be added back to the accounting result to reach the taxable result.

A BPT is paid on rental income at progressive rates ranging between 4% and 14%.
Lebanon

Royalties income
Royalties received by a holding company from Lebanese companies for patents and the like are taxed at a rate of 10%. Royalties received by holding companies from abroad are exempt from tax.

Royalties received by other than holding companies are taxed as ordinary income at 15%.

Unrealised exchange gains/losses
Unrealised exchange gains and losses are not treated differently from any other gain or loss for tax purposes (i.e. unrealised exchange gains are subject to CIT at 15% and unrealised exchange losses are deductible for CIT purposes).

Foreign income
Resident corporations are not taxed on foreign-source income derived from activities carried out abroad through foreign branches.

Deductions

Depreciation
Depreciation of property, plant, and equipment (at rates fixed by ministerial decree) is deductible. The depreciation method to be used is the straight-line method. If a depreciation rate that is higher than the low rate is adopted, the MoF should be notified. The allowable depreciation rates are as follows:

<table>
<thead>
<tr>
<th>Assets</th>
<th>Low rate (%)</th>
<th>High rate (%)</th>
</tr>
</thead>
<tbody>
<tr>

</tbody>
</table>

Goodwill
Under Lebanese tax rules, goodwill cannot be amortised.

Organisation and start-up expenses
Organisation and start-up expenses are amortised over three to five years for tax purposes.

Interest expenses
Interest on business loans is deductible, under certain conditions. Interest paid on the taxpayer's capital is not deductible.

Bad debt
Bad debts are deductible if all means for collection of the debt have been exhausted.
Provisions for bad debts are deductible if a debtor has been declared bankrupt. Surplus provisions are added to profits.

**Charitable contributions**
Charitable contributions are deductible if made to approved charitable, social, cultural, or sporting institutions, within certain limits.

**Gifts**
Gifts given by the company in cash are non-deductible.

Gifts given by the company in-kind to customers when the amount of each gift exceeds LBP 1 million per person per year and when the total amount of gifts in-kind exceeds 1% of the turnover are non-deductible.

**Fines and penalties**
Fines and penalties are not deductible in Lebanon.

**Taxes**
Taxes and duties incurred in the course of business (except CIT) are deductible.

Taxes due to foreign governments on income earned in Lebanon are non-deductible.

Exceptional taxes and fines are non-deductible.

**Other significant items**
Other deductible expenses include:

- Cost of goods sold.
- Cost of services rendered.
- Rent of business premises or, if the premises are owned by the taxpayer, their depreciation.
- Salaries, wages, and other employee benefits, including end-of-service indemnities.
- General business expenses, including insurance premiums.
- Reserves for severance payments, pensions, and disability payments. Surplus provisions are added to profits.
- Advertising and publicity expenses, within certain limits.
- Travel, telephone, and vehicle expenses, within certain limits.
- Entertainment expenses that are properly supported.
- Board remuneration against services performed.
- Accrued expenses as long as their occurrence is certain.
- Employees’ life insurance premiums are deductible as long as they are included in the employees’ benefits subject to payroll tax.

Other non-deductible expenses include:

- With the exception of normal maintenance expenses, costs that increase the value of the property, plant, or equipment (such costs should be capitalised and depreciated in accordance with the fiscal depreciation rates).
- Losses or share-in-costs resulting from enterprises, offices, and branches situated outside Lebanon.
- Representation allowances in excess of 10% of an employee’s basic salary, as well as unjustifiable and unreasonable salaries.
- Personal expenses, such as payments deducted by an employer or partner for the management of the business and for certain business expenses incurred by the employer or partner.
- Appropriations made to board members that do not comprise remuneration for work done.
Lebanon

- Provisions, other than those specifically allowed by law. Examples of non-deductible provisions include provisions for bad debts, provisions for slow moving items, and provisions for bonuses, contingencies, and charges.

**Net operating and capital losses**
Tax losses may be carried forward for up to three years after the year in which they were originally incurred. The carryback of losses is not available.

Capital losses may be used to offset taxable profits of the current year but may not be carried forward.

**Payments to foreign affiliates**
Payments to foreign affiliates are generally subject to WHT.

Based on guidance issued by the MoF, recharges from the head office located abroad (including advertising) are deductible up to a certain limit, calculated as follows:

\[
\frac{\text{Assets of the branch in Lebanon}}{\text{Consolidated assets}} \times \text{Central administrative expenses}.
\]

However, a ceiling of 3% of the branch’s revenues is applied.

**Group taxation**
There is no group taxation in Lebanon.

**Transfer pricing**
In Lebanon, there are no clear and detailed transfer pricing or general anti-avoidance rules. However, even in the absence of clear transfer pricing rules, exchanges or transactions made between related parties should be done on an arm’s-length basis.

The tax administration has the right to reassess related-party transactions and adjust their value in order to reflect the taxable amount related to the period under study.

**Thin capitalisation**
In Lebanon, there are no clear or detailed thin capitalisation rules.

**Controlled foreign companies (CFCs)**
There are no CFC rules in Lebanon.

**Tax credits and incentives**

**Foreign tax credit**
There are no specific regulations concerning foreign tax credit in Lebanon.

**Holding companies**
Lebanese holding companies are exempt from CIT and from WHT on dividends. However, they are subject to a tax on their paid-up capital and reserves. In any given tax year, total tax payments on paid-up capital and reserves are capped at LBP 5 million.

Interest, management fees, and royalties received by holding companies from abroad are exempt from tax in Lebanon.

Holding companies are subject to a 10% tax on interest received from loans granted for a period less than three years to companies operating in Lebanon. Management fees received by the holding company from companies operating in Lebanon are subject to
a 5% tax. Capital gains on financial assets in Lebanese companies held for less than two years are subject to a 10% tax. Royalties received from Lebanese companies for patents and the like are taxed at a rate of 10%.

Offshore companies
Offshore companies are exempt from CIT and from the WHT on dividends, and are instead subject to a lump-sum annual tax of LBP 1 million. Contracts related to offshore activities outside Lebanon are exempt from Lebanese stamp duty.

Offshore companies are required to be registered as SAL companies and, with a few exceptions, are subject to the same regulations as a SAL company. The business objectives of an offshore company are limited.

Permanent exemptions from CIT
Companies and organisations that are granted an indefinite exemption from CIT include the following:

- Educational institutions.
- Hospitals, orphanages, asylums, and other shelters that admit patients free of charge.
- Shipping, sea, and air transport associations (subject to certain restrictions).
- Farmers, provided they do not display farm produce and cattle outlets or sell products and meat after conversion tax.
- Syndicates and other types of professional associations.
- Miscellaneous non-profit organisations and co-operatives.
- Holding companies and offshore companies.
- Public sector bodies that do not compete with private institutions.

Reinvestment incentives
Industrial companies using operating profit to finance certain capital investments are exempt from up to 50% of their CIT liabilities for a period of up to four years, provided that such exemptions do not exceed the original investments made. In areas designated 'development zones', 75% of a company's tax liabilities may be exempt.

In order to take advantage of this regulation, investments should consist of capital expenditures designed to increase a company's manufacturing capacity or of investments in housing facilities for the company's staff and other employees.

Withholding taxes

WHT on interest
The income, revenues, and interest earned from accounts opened at Lebanese banks and from treasury bonds are subject to a 5% WHT that is non-refundable and cannot be carried forward. This WHT is considered as an advance payment on the current CIT due to the extent of that amount and acts as a minimum tax in situations where the tax due is lower than the tax on interest paid.

WHT on dividends
Tax is withheld from dividends paid to resident and non-resident shareholders/partners at a rate of 10%. The dividend distribution tax rate may be reduced to 5% under specific conditions.

Movable capital WHT
A 10% WHT is levied on income derived from movable capital generated in Lebanon. Taxable income is comprised of the following:

- Distributed dividends, interest, and income from shares.
- Directors’ and shareholders’ fees.
Lebanon

- Distribution of reserves or profits.
- Interest from loans to corporations.

**Non-resident WHT**

Revenues earned by non-residents in Lebanon are subject to an effective WHT of 2.25% on revenue from the sale of materials and equipment, and 7.5% on the revenue in the case of sale of services.

**Double tax treaties (DTTs)**

DTTs provide the following WHT benefits. Note that treaty rates do not override lower non-treaty rates. Treaty members may take advantage of the non-treaty rates.

</table>

**Notes**

1. Shall not exceed:
   - 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that directly holds at least 25% of the equity capital of the company paying the dividends.
   - 10% of the gross amount of the dividends in all other cases.

2. Dividends, interest, or royalties arising in a contracting state and paid to a resident of the other contracting state shall be taxable only in that other state.

3. Shall not exceed:
   - 5% of the gross amount of royalties paid for the use of, or the right to use, any industrial, commercial, or scientific equipment.
• 10% of the gross amount of royalties paid for the use of or the right to use, any copyright of literary, artistic, or scientific work, including cinematograph films and films or tapes for radio or television broadcasting any software, patent, trademark, design or model, plan, secret formula or process, or for information concerning industrial, commercial, or scientific experience.

4. Where the dividends are paid by a company that is:
• A resident of Lebanon to a resident of Malta who is the beneficial owner thereof, the Lebanese tax so charged shall not exceed 5% of the gross amount of the dividends.
• A resident of Malta to a resident of Lebanon who is the beneficial owner thereof, the Malta tax on the gross amount of the dividends shall not exceed that chargeable on the profits out of which the dividends are paid.

5. Shall not exceed:
• 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that directly holds at least 10% of the equity capital of the company paying the dividends.
• 10% of the gross amount of the dividends in all other cases.

6. Shall not exceed:
• 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that directly holds at least 20% of the equity capital of the company paying the dividends.
• 10% of the gross amount of the dividends in all other cases.

7. Shall not exceed:
• 10% of the gross amount of royalties paid for the use of or the right to use, any copyright of literary, artistic, or scientific work, including cinematograph films and films or tapes for radio or television broadcasting.
• 5% of the gross amount of royalties paid in other cases.

8. Shall not exceed:
• 10% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that directly holds at least 15% of the equity capital of the company paying the dividends.
• 15% of the gross amount of the dividends in all other cases.

9. Shall not exceed:
• 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that directly holds at least 20% of the equity capital of the company paying the dividends.
• 15% of the gross amount of the dividends in all other cases.

10. Shall not exceed:
• 5% of the gross amount of the dividends if the beneficial owner is a company that has owned at least 10% of the capital of the company paying the dividends for a period of at least 12 months preceding the date the dividends were declared.
• 15% of the gross amount of the dividends in all other cases.

---

**Tax administration**

**Taxable period**

Lebanon's fiscal year runs from January to December and is based on the Gregorian calendar. With the special approval of the local tax authorities, companies may, however, use their own accounting year.

**Tax returns**

Taxes on business income in any given year are based on the profits of the previous financial year.

Tax returns by artificial persons (entities) must be filed by 31 March of the year following the year of income. Tax returns by capital companies must be filed by 31 May of the year following the year of income.

Submission deadlines of annual declarations for institutions that are exempt from income tax (other than companies) are as follows:

• Before 1 February for institutions adopting the cash basis of accounting.
• Before 1 April for institutions adopting the accrual basis of accounting and for representative offices that represent non-corporate entities.
• Before 1 June for representative offices that represent corporations.

If taxpayers fail to submit a tax return, realisation penalties will be due.
Lebanon

**Payment of tax**
The same deadlines for tax returns apply for tax payments.

If taxpayers fail to make payment, late payment penalties will be due.

**Tax audit process**
The most common ways for the tax authorities to select companies for tax audits are the size of the company, the type of business, and certain risk assessment measures.

Tax audits typically cover a single type of tax.

In a typical situation, a tax audit is likely to take less than one year from first information request to substantive resolution.

**Statute of limitations**
The tax administration has four years to collect its rights. The period is calculated from the end of year that follows the current business year.

The taxable person may request the refund of excess tax within four years starting from the end of the year where the refund right was created.

The tax administration can exceed the statute of limitations in cases where a profit or revenue has been proven by a court order, arbitration, or inheritance clearance. The extension is limited till the end of the calendar year following the end of the year in which the tax administration was notified of such event.

Under the statute of limitations, a company should keep its accounting books and documentation for ten years.

**Topics of focus for tax authorities**
Lately, several topics have been of interest to the tax authorities in Lebanon, including transfer pricing, payments of royalties and management fees to non-resident parties, provisions, and employee compensation.

**Other issues**

**Foreign ownership of real estate restrictions**
The following restrictions apply to foreign ownership of real estate:

- Up to 3,000 square metres does not require Council of Ministers approval.
- Exploitation and normal lease right extending for a period of more than ten years cannot be attained without obtaining approval.
- Real estate owned by foreigners, for which approval has been obtained, cannot exceed, over all of the Lebanese territory, 3% of the total area of Lebanon. In each province, the total area owned should not exceed 3% of its area. With respect to Beirut, the total area owned should not exceed 10% of its area.
- The approval is nullified if not acted upon during a period of one year.
- When approval is granted, the building on the real estate should be constructed within a period of five years (renewable once by the Council of Ministers).

**Choice of business entity**
Lebanon’s commercial law provides for a range of business entities available to both local and foreign investors. These consist of the following:

- Sole proprietorships.
- General partnerships.
- Limited partnerships.
• Joint-stock companies (SAL).
• Limited liability companies (SARL).
• Holding companies.
• Offshore companies.
• Representative offices and branches of foreign companies.

Legal structures commonly used by foreigners in conducting business in Lebanon are SALs, SARLs, and branch offices.

**Joint-stock companies (Société anonyme libanaise or SAL)**
Lebanese joint-stock companies are permitted to engage in all kinds of business activity. Shareholders of a SAL have no liability beyond their actual capital subscriptions.

With a small number of exceptions (such as real estate companies and banks), there are no limits on the amount of capital that can be held by foreign investors.

The management of a SAL is entrusted to a board of directors with a minimum of three and a maximum of 12 members. The majority of board members must be Lebanese, but the chairman may be a foreign national.

• Certain types of businesses, such as banks and insurance companies, are required to incorporate as joint-stock corporations. Minimum capital: LBP 30 million.
• Taxation: the applicable CIT rate is 15% in addition to a WHT on dividends of 10%, reduced to 5% in certain cases, mainly if the shares are listed.

**Limited liability companies (Société à responsabilité limitée or SARL)**
Members of a limited liability company are partners, and the company's capital is divided into parts rather than shares. Partners are liable only to the extent of their parts, and individual partners' claims on the company's capital are fixed in the partnership deed.

All partners may be foreigners, with the exception of companies seeking to engage in commercial representation.

Limited liability companies may not be active in certain sectors of the economy, such as in insurance, banking, fund management, or air transportation.

The transfer of parts in a limited liability company is subject to the consent of partners representing at least three-quarters of the capital. Existing partners enjoy priority in the purchase of parts offered for transfer.

• A limited liability company is managed by one or several directors (managers) who may or may not be selected from among the partners. Minimum capital: LBP 5 million.
• Taxation: the applicable CIT rate is 15% in addition to a WHT on dividends of 10%.

**Intellectual property (IP)**
The law in Lebanon does not contain a clear definition of author's rights. It protects all products of the human intellect whether written, pictorial, sculptural, scriptural, or oral, regardless of its value, importance, destination, or form of expression.

The law provides patent protection for inventions and plant varieties and a *sui generis* protection for layout designs of integrated circuits. Furthermore, the law provides protection for undisclosed information. According to an assessment conducted by the World Intellectual Property Organization (WIPO) in July 2002, the Patent law is in complete conformity with the WTO's Agreement on Trade-Related Aspects of Intellectual Property Rights (TRIPS). It was also pointed out that the provisions of the Plant Varieties exceed the minimum requirements of the TRIPS Agreement.
Lebanon

The law does not explicitly protect notorious trademarks and geographical indications. However, those are provided protection via Lebanon’s membership to the Paris Convention. Moreover, geographical indications are provided protection under the provisions of the Law on Customs, the Law on Fraud Control, and the Criminal Law.

The copyright protection originally available to literary and artistic works is now extended to computer software, video films, and all kind of audio-visual works. The law provides stiffer penalties for offenders and better compensation to the persons whose rights have been infringed. The manner in which the copyright is breached has also been extended.
**Significant developments**

Since 2011, there have been no significant corporate tax developments. We are aware that the relevant authorities are drafting new legislation with respect to Income Tax and Petroleum Law, but uncertainty exists as to whether these drafts will become legislation due to the current political uncertainty.

**Taxes on corporate income**

For any Libyan registered entity, income arising both in Libya and abroad (i.e. worldwide) is assessable for corporate income tax (CIT) purposes in Libya.

CIT is imposed annually on the same basis for Libyan controlled corporate entities, foreign controlled corporate entities, and branches of foreign companies.

CIT is levied on taxable profits at a flat rate of 20%.

**Jehad Tax**

There is a flat rate of Jehad Tax assessed at 4% on taxable corporate profits.

Jehad Tax was established by Law 44 of 1970.

**Local income taxes**

Libya has no provincial income tax laws.

**Corporate residence**

Corporate residence is not specifically dealt with under the tax laws of Libya. The tax authorities will seek to assess any income derived from services provided in Libya.

**Permanenent establishment (PE)**

Double tax treaties (DTTs) that have been signed introduce the concept of PE. However, general law requires that any foreign entity seeking to provide services in Libya should obtain a business licence, which necessitates it registering as a legal entity. Historically, unregistered foreign entities have provided services in Libya, but this is not in line with the law and it is becoming difficult to do so.

**Other taxes**

**Value-added tax (VAT)**

There is no VAT in Libya.

**Customs duties**

Customs duties were abolished in 2005, except for tobacco and tobacco products.
Libya

A service fee of 5% on the value on most imports also exists. There are various exemptions to this service fee, specifically under Investment Law and within the oil sector.

Other dues and taxes on importation are estimated at 0.5%. Initially, a temporary import licence is issued for six months that can be extended to a maximum of three years. A guarantee or a deposit can be provided by the importer to the Customs Department.

**Excise taxes**
Libya has no excise taxes.

**Property taxes**
Libya has no specific property taxes.

**Transfer taxes**
Libya has no transfer taxes.

**Stamp duty**
Stamp Duty Law levies a schedule of duties and rates on various documents and transactions. The most relevant to corporate entities is Schedule 28, which prescribes the rate of duties on contracts for the provision of services or supply. The duty on main contracts is 1% and on subcontracts is 0.1%. Note that there is a duty of 0.5% on all payments to the Tax Department as well.

**Social security contributions (INAS)**
Social security contributions are payable by all persons working in Libya, including expatriates.

Social security contributions are computed on gross income, and current rates are as follows:

<table>
<thead>
<tr>
<th>Gross income</th>
<th>Foreign branch (%)</th>
<th>Libyan entity (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Employee's contribution</td>
<td>3.75</td>
<td>3.75</td>
</tr>
<tr>
<td>Employer's contribution</td>
<td>11.25</td>
<td>10.50</td>
</tr>
<tr>
<td>Contribution from public treasury</td>
<td>0.75</td>
<td></td>
</tr>
<tr>
<td><strong>Total</strong></td>
<td><strong>15</strong></td>
<td><strong>15</strong></td>
</tr>
</tbody>
</table>

Social security is withheld by the employer and payable monthly, within ten days after the month end. For social security purposes, a late payment fine of 5% *per annum* is assessed on the amount due.

**Payroll taxes**
An employer is responsible for collecting taxes and contributions for the state. When an entity is audited by the tax authorities, the assessment is effectively on the employer for failing in its statutory obligation to collect those taxes and contributions. Note that individuals are not required to file annual statements of income.

**Branch income**
Tax rates on branch profits are the same as on corporate profits. However, the Income Tax Law allows the Tax Department to assess income tax on branches of foreign companies as a percentage of turnover via the ‘deemed profit’ basis of assessment. Tax is therefore payable even where tax losses are declared.

The level of deemed profit applied to turnover varies according to the branch’s type of business activity. This ranges from 10% to 15% for civil works and contracting (turnkey...
projects), 15% to 25% for oil service, and between 25% and 40% in the case of design/consulting engineers. A deemed profit of between 5% and 7% is also assessed on supply. The deemed profit percentage applied to any year will be higher than the profit percentage declared in the annual tax return since the deemed profit basis is applied during the course of a tax audit and is effectively a revenue generating exercise for the tax authorities. Historically, tax audits have not resulted in credits or reimbursements.

**Income determination**

No specific rules apply on income determination for the following categories:

- Interest income.
- Partnership income.
- Rent/royalties income.
- Foreign income.

The Income Tax Law allows entities to account on an accrual basis or on a cash basis.

**Inventory valuation**

The Commercial Code allows inventory to be valued at the lower of cost and net realisable value.

**Capital gains**

Any chargeable gains on the sale of capital assets are taxed as ordinary income. For entities assessed on a deemed profit basis, capital gains should be added to the deemed taxable income.

**Dividend income**

Historically, dividend income has not been subject to any additional taxes.

**Inter-company dividends**

Libyan taxation laws do not contain any special provisions regarding inter-company dividends.

**Stock dividends**

Stock dividends are not specifically dealt with in Libyan taxation laws. The current practice is for dividend distributions not to be taxed.

**Deductions**

Taxable income is determined after deducting all expenditure and costs incurred in the realisation of the gross income (for more details on the deemed profit basis of assessment on branches of foreign companies, see the Branch income section).

For any entity (not a foreign branch) seeking to be assessed on an add-back basis, it should ensure, in accordance with Stamp Duty Law, that the majority of its costs can be supported by tax-registered documents, i.e. declared payrolls and registered contracts and invoices.

**Depreciation**

Depreciation should be calculated in accordance with the Executive Regulations of the law.

</table>

**Goodwill**

Purchased goodwill can be amortised on a straight-line basis over five years.

**Organisation and start-up expenditure**

Organisational and start-up expenditure can be capitalised and amortised over five years on a straight-line basis.

**Interest expenses**

No specific rules apply for the deduction of interest expenses.

**Bad debt**

Bad debts are only recognised to the extent that they have been recognised as such legally.

**Charitable contributions**

Donations to charities recognised by the state are permitted at up to 2% of net income.

**Fines and penalties**

No specific rules apply for the deduction of fines and penalties.

**Taxes**

No specific rules apply for the deduction of taxes.

**Net operating losses**

Losses may be carried forward and deducted from future profits, for up to five years. The Income Tax Law has no provision for the carryback of losses.

**Payments to foreign affiliates**

No specific rules apply for the deduction of payments to foreign affiliates.
Group taxation
There is no recognition of a group for taxation purposes.

Transfer pricing
No transfer pricing rules exist in the general law.

Thin capitalisation
No thin capitalisation rules exist in the general law.

Controlled foreign companies (CFCs)
No rules on CFCs exist.

Tax credits and incentives

Foreign tax credit
Under general tax law, no provision exists for allowing the deduction of foreign tax credits.

CIT exemption
Exemptions to CIT exist, most notably, under the Investment Law. General projects registered under the Investment Law are permitted a five-year CIT holiday with a possibility to extend for a further three years.

Exemptions also exist for strategic infrastructure projects. Such exemptions must be awarded by the legislative body, either by ratifying the relevant contract, which includes a tax exemption clause, or by the issuance of a separate law.

Customs and stamp duties exemption
The Investment Law also provides exemptions for customs duties and stamp duty. The exemptions that exist are bestowed on subcontractors to the relevant projects.

The Petroleum Law provides exemption to customs duties on oilfield-specific equipment and materials, which is also provided to oil service companies.

Withholding taxes

Libyan law has no withholding taxes (WHTs). Generally, for unregistered foreign entities seeking to register a contract with the tax authorities, CIT will be assessed (and must be settled) on a deemed profit basis at the time of registration. It may be possible to negotiate a WHT in preference to the aforementioned general procedure for a significant contract where there is greater uncertainty as to the estimated contract value.

Tax administration

Taxable period
The tax year is generally a calendar year, although assessments can be made on the basis of a company’s own year-end, provided permission is granted in advance from the Tax Department and the company then adheres consistently to the same date.

Tax returns
All corporate entities must make an annual filing within four months of its year-end or within one month of its audit report, whichever is earlier.
Libya

**Payment of tax**
CIT is payable on a quarterly basis (10 March, 10 June, 10 September, and 10 December) normally commencing the first quarter date after an assessment has been issued.

**Late payment penalties**
A late payment penalty is assessed on the tax due at the rate of 1% to a maximum of 12%. In addition, the remaining quarterly payments are due immediately for failing to make an instalment on time.

The law also imposes the following penalties:

- A fine of not less than three times the amount of unpaid tax due shall be applied to any person who fails to pay tax by the due date.
- Without prejudice to any harsher penalty, a fine of not less than four times the amount of tax due and unpaid will be applied to any person who, with intent to evade all or part of the tax, commits any of the following acts or abets, agrees, or aids a person who commits such an act:
  - The making of false statements in declarations submitted under this law.
  - The preparation of false accounts, books and records, reports, or budgets.
  - The use of fraudulent means to conceal or attempt to conceal taxable amounts due under this law.

**Tax audit process**
Tax audits typically occur every three or four years.

**Statute of limitations**
The statute of limitations for CIT purposes is seven years.

**Topics of focus for tax authorities**
The tax authorities’ focus during audits continues to be on confirming revenue, ensuring major services providers contracts are tax registered, and seeking additional undeclared salaries and benefits.

**Other issues**

**Statutory Books**
Business entities operating in Libya are required by Libyan Law to maintain a General Ledger and a General Journal (i.e. the Statutory Books).

Before use, these must be stamped as registered with the Revenue Authorities and the Commercial Court. It should be noted that a Ledger or Journal will not be registered if it already contains accounting entries (i.e. one cannot register existing books of account).

Similarly, transactions pre-dating the date the books are registered will be disallowed. In theory, transactions should be entered daily, but in practice, most companies write up their statutory records on the basis of monthly transactions summaries.

The Tax Inspector will always request production of the Statutory Books at the commencement of a tax audit. If these are not available, a perfunctory audit of the English (or other language) books of account will be made, and it is likely that there will be a punitive increase in taxable income as a consequence.

The new Commercial Code allows approved computer based ledgers to be used instead of the traditional manual ledgers.
Significant developments

Changes for tax period 2014
The Liechtenstein Parliament passed various amendments to the Liechtenstein Tax Act on 4 September 2014, which were set into force in December 2014 with a retrospective application for the tax period 2014. The most important changes impacting corporate taxpayers are set out below.

Notional interest deduction (NID) on equity
According to the Liechtenstein Tax Act, modified equity is defined as the equity amount minus own shares, participations in corporations, and assets not operationally necessary. In addition, modified equity must be further reduced by 6% of all assets qualifying for the NID. This means that, after deducting non-qualifying assets (own shares, participations, non-operating assets), an additional deduction of 6% on the remaining assets applies.

Furthermore, if a related party loan has an interest rate below the level of the NID of 4%, the difference in the amount has to be deducted from the modified equity. However, no deduction has to be made if the loan arises from the operating business of the company.

Losses from foreign PEs and group loss offsetting
Losses from a foreign PE can be offset with taxable net corporate income to the extent these losses were not already taken into account in the country where the PE is situated or in another country. If that PE records profits in the following years, these profits need to be added to taxable net corporate income again. The period a loss can be carried forward is now limited up to five years. Afterwards, the losses will be added if not yet added to the taxable profit due to foreign loss offsetting. The same limitation of loss carryforward applies to group taxation as well.

Old reserves (coupon tax)
Due to administrative and financial aspects, the Parliament has decided to raise coupon tax on all old reserves by 31 December 2015. The coupon tax rate has been reduced to 2.5% (instead of 4%) for the tax years 2014 and 2015.

Income from investment funds
For corporate investors, income from investment funds is subject to corporate profit tax at a rate of 12.5%. Since units in investment funds do not constitute participations in legal persons, to the extent that investment funds in turn invest in participations in legal persons, dividends and capital gains (including non-realised capital gains) from such investments are tax-exempt. Since investment funds are subject to proper accounting rules, the net income shown in the financial statements provides for the taxable basis. If in practice, however, based on proper accounting, it is not possible to differentiate between income from dividends, capital gains, or interests, a simplified approach can be used to calculate the taxable basis for the fiscal year 2014 going forward. The simplified approach will be guided by the equity exposure of investment funds. Accordingly, the higher the investments in participations in legal persons are, the higher the lump sum tax exemption for dividends and capital gains will be.
Recent developments with regard to tax treaties

- The double taxation treaty (DTT) with Guernsey was signed on 11 June 2014.
- The DTT with the Czech Republic was signed on 25 September 2014.
- The tax information exchange agreement (TIEA) with Canada entered into force on 26 January 2014 and is applicable for the tax period 2015 and beyond.
- TIEAs with China, Italy, and South Africa have been signed.

Taxes on corporate income

In principle, all corporations, foundations, and establishments are subject to a profit tax at a flat rate of 12.5%. Resident companies are subject to unlimited tax liability on worldwide income. Non-resident companies are subject to limited tax liability on income from properties or branches within Liechtenstein.

Minimum tax

All legal entities are subject to an annual corporate minimum tax of 1,200 Swiss francs (CHF). This tax can be fully credited to the profit tax.

The full tax amount is due even if the corporation is not resident in Liechtenstein for the whole tax period.

Under a lone exception, minimum tax is not due if the total assets of a legal entity did not exceed CHF 500,000 during the last three years.

Corporate residence

A company is considered to be resident in Liechtenstein if its registered seat (incorporation) or place of effective management is within Liechtenstein.

Companies that have neither a domicile nor effective place of management in Liechtenstein, as well as special asset dedications without legal personality (e.g. trusts), are subject to limited tax liability for the following income:

- Corporate income from the cultivation of domestic real estate used for agriculture and forestry.
- Rental and lease income from real estate situated within Liechtenstein.
- Taxable net corporate income of permanent establishments (PEs) situated in Liechtenstein.

Permanent establishment (PE)

Please note that Liechtenstein has only a limited number of DTTs (see the Withholding taxes section). However, Liechtenstein is in the process of negotiating various new DTTs and has generally included PE definitions according to the Organisation for Economic Co-operation and Development (OECD) model treaty.

Other taxes

Value-added tax (VAT)

Liechtenstein has adopted the VAT law of Switzerland, while having its own VAT administration.

The general VAT rate is 8%. A reduced rate of 2.5% is applicable to deliveries of food, drugs, newspapers, magazines, and books. Furthermore, lodging/accommodation is
taxed at a reduced rate of 3.8%. Note that various services are VAT-exempt (e.g. health, social security, education, banking, insurance).

Any person who, irrespective of legal form, carries on a business is liable for VAT. Any person liable for VAT that is involved in domestic entrepreneurial activity with a taxable turnover that is less than CHF 100,000 within a financial year can be exempted from taxation. Special regulations apply for non-profit institutions as well as for non-profit sport or cultural clubs. Reverse charge is applicable for services and certain deliveries from an entity domiciled abroad.

**Customs duties/import tariffs**
Based on the customs union treaty of 1923 between Liechtenstein and Switzerland, Switzerland customs duties and import tariffs are applicable for Liechtenstein as well. The tariffs and duties depend on various specific attributes of the products and are listed on comprehensive tariffs and duties lists. Therefore, the specific tariffs and duties must be checked for every case individually.

**Excise taxes**
Several excise taxes apply in Liechtenstein (e.g. petroleum tax, tobacco tax, car tax, CO2 tax, beer tax, salt tax, taxation of distilled spirits).

**Property taxes**
No property taxes are applicable in Liechtenstein.

**Stamp duty**
Based on the customs union treaty of 1923 between Switzerland and Liechtenstein, the Swiss stamp duty tax law of 27 June 1927 is applicable in Liechtenstein. The stamp duty law, *inter alia*, includes the issuance stamp tax and the security transfer tax.

**Issuance stamp tax**
Upon the formation of legal entities whose capital is divided into shares (e.g. company limited by shares, limited liability company, establishment with capital divided into shares), the stamp duty amounts to 1% of the nominal value or the higher amount effectively paid (above par). The first CHF 1 million is tax exempt.

The same duty also becomes due when the capital is increased or when the shareholders make contributions without increasing the capital. There is no stamp duty tax on bonds and money market certificates.

Various exemptions should also be considered.

**Security transfer tax**
Security transfer tax is due on all transactions of qualifying securities if a security dealer is involved. The tax amounts to 0.15% for domestic securities (Switzerland and Liechtenstein) and 0.3% for foreign securities.

In particular, banks and financial intermediaries qualify as security dealers and are liable for the payment of the security transfer tax. Furthermore, legal entities with qualifying securities with a book value of more than CHF 10 million also qualify as security dealers and are also liable for the payment of the security transfer tax.

**Formation tax (Gründungsabgabe)**
Unless Swiss stamp duty law applies, a formation tax in the amount of 1% of the statutory nominal capital is levied upon the formation or relocation of legal companies in Liechtenstein (e.g. foundation, establishment) as well as for capital increases.
The general tax rate of 1% is reduced to 0.5% for amounts greater than CHF 5 million and to 0.3% for amounts greater than CHF 10 million. The first CHF 1 million is tax exempt.

Foundations are subject to the formation tax at a tax rate of 0.2%, but at least CHF 200.

**Real estate profit tax**
Capital gains from the sale of real estate, or equivalent actions with the same result, are subject to a separately assessed real estate profit tax. The taxable gain is generally the difference between proceeds of the sale and the original purchase price of the property plus any capital expenditure incurred. The basic tax rate can be up to 24%, depending on the amount of taxable real estate gain. The transfer of the economic ownership of real estate (e.g. via the sale of the majority of the shares in a real estate company) may trigger real estate tax as well.

**Tax on insurance premiums**
Liechtenstein levies a tax on certain insurance premiums. The tax rate amounts to 5% of the cash premium (2.5% for life insurance). Cash premiums in foreign currency have to be converted to Swiss francs at the time the tax claims arise.

Various exemptions should also be considered.

**Social security contributions**
Employers, in general, are required to account for social security contributions on the salaries of their employees. If the employee is subject to the Liechtenstein social security system, the following compulsory social security contributions are concerned:

- Old age, survivors’, and disability insurance (9.3%, the employer’s share is 4.75% and the employee’s share is 4.55%).
- Family compensation fund (1.9%, fully employer financed).
- Unemployment insurance/supplementary unemployment insurance (1%, the employer’s share is one half).
- Occupational accident insurance (approximately 0.1%, fully employer financed).
- Occupational pension scheme (2nd pillar) (contributions depend on pension plan, the employer’s share is usually one half).

**Branch income**
The principles applicable to corporations also apply for branch income, provided that transactions with the head office or other branches are at arm’s length. Liechtenstein taxation is imposed on the profit attributable to the branch. The corporate minimum tax of CHF 1,200 is also applicable.

There is no withholding tax (WHT) on profit transfer to the head office.

**Income determination**
The corporate profit tax is determined according to the taxable corporate net income, which is based on the financial statement under consideration of the following provisions.

**Inventory valuation**
Inventories must be stated at the lower of cost or market. Cost is generally determined by the first in first out (FIFO) or by the average cost method. The tax authorities permit a general reserve against stock contingencies of up to one-third of the inventory cost or market value at the balance sheet date without inquiry into its justification, provided a
detailed record of inventory is available for review by the tax authorities. The need for a reserve in excess of this amount (e.g. for obsolescence, slow-moving-stocks) must be substantiated to the satisfaction of the tax authorities.

**Capital gains**
Capital gains derived from the sale of shares are tax-exempt. Capital gains from the sale of real estate are subject to a separately assessed real estate profit tax (see the Other taxes section for more information).

**Dividend income**
Dividend income and liquidation proceeds are tax-exempt.

**Interest income**
Interest income is taxable and must be at arm’s length if it is in respect to related parties (for safe harbour rates, see Interest expenses in the Deductions section).

**Foreign income**
Resident corporations operating locally are generally taxed on their worldwide income. However, income from foreign real estate and PEs situated abroad is exempt from taxation in Liechtenstein.

**Deductions**

**Depreciation and amortisation**
Depreciation of tangible fixed assets and amortisation of intangible assets is allowed if it is ‘commercially justified’. For tax purposes, either the straight-line (depreciation based on the acquisition value) or the declining-balance method (depreciation based on the book value) may be used. Depreciation and amortisation not recorded in statutory accounts are not deductible for tax purposes.

A special (higher) rate of depreciation may be allowed for assets used only for short periods or for assets for which a rapid decrease in value can be proved.

The depreciation/amortisation rate per annum of various property types are provided below. Note that these depreciation rates relate to write-downs on the book value. If the write-down is performed on the acquisition value, then the rates enumerated below should be reduced by half.

</tbody>
</table>

**Start-up expenses**

In general, the expenses for a start-up are tax deductible as long as they are economically justified.

*Please see Formation tax (Gründungsabgabe) in the Other taxes section.*

**Interest expenses**

Interest paid by a corporation to a third party is a deductible business expense. Interest paid to related parties (affiliates or shareholder) has to reflect the fair market rate and has to be at arm’s length.

With respect to related parties, the tax administration of Liechtenstein annually issues safe harbour interest rates to be used on loans denominated in Swiss francs on the one hand and in foreign currencies on the other hand. The corporation may deviate from these safe harbour rates as long as it can prove that the rates are at arm’s length and more appropriate in the present case.

**Safe harbour rates 2015**

<td>9.00</td>
</tr>
</tbody>
</table>

Furthermore, tax authorities ask for an economic justification if loans are not in the currency of the statutory accounts.

**Notional interest deduction (NID) on equity**

The NID on equity is a standardised deduction for interest on equity based on the multiplication of the ‘modified’ equity by the interest rate (according to the annual finance law). For 2014 and 2015, the equity interest rate is 4%. Losses due to the NID are
not accepted; consequently, a negative result due to this deduction does not generate loss carryforward.

To determine the modified equity, the following terms have to be considered:

- Paid-in capital and open reserves plus taxed hidden reserves, such as:
  - Deduction of own shares.
  - Deduction of participations/shares.
  - Deduction of non-operating related assets.
- Equity increases and decreases, based on the capital at the beginning of the business year.

</tbody>
</table>

According to the Liechtenstein Tax Act, modified equity is defined as the equity amount minus own shares, participations in corporations, and assets not operationally necessary.

In addition, modified equity must be further reduced by 6% of all assets qualifying for the NID. This means that, after deducting non-qualifying assets (own shares, participations, non-operating assets), an additional deduction of 6% on the remaining assets has to be made.

Furthermore, if a related-party loan has an interest rate below the level of the NID of 4%, the difference in the amount has to be deducted from the modified equity. However, no deduction has to be made if the loan arises from the operating business of the company.

**Provisions**

**Bad debt provision**
It is admissible to set up an accounting provision for specific impaired debt; additionally, it is possible to account for a general bad debt provision of up to 10% on receivables from Liechtenstein and Switzerland and up to 15% on receivables from any other country if no specific provision has been accounted for the corresponding debt. These provisions are not accepted regarding receivables to corporations and institutions under public law, banks, or for inter-company receivables.
Inventory provision
See Inventory valuation in the Income determination section for a description of the inventory provision regime.

Provisions on financial investments
Provisions on financial investments are possible but must be proved by an established corporate evaluation method or other suitable documents.

Other provisions
Provisions at the expense of the profit and loss statement are admissible for obligations during the business year whose amount is not yet determined or for other immediately imminent losses during the business year.

Charitable contributions
Charitable contributions to legal persons and special asset dedications with domicile in Liechtenstein, in another country member of the European Economic Area (EEA), or in Switzerland, which are exempt from tax liability in light of exclusively and irrevocably common-benefit purposes, are deductible, up to the amount of 10% of the taxable corporate net income.

Deduction for income from intellectual property (IP)
A deduction of 80% is allowed on the net income from IP rights that was created or acquired after 1 January 2011. IP rights, in the sense of the tax law, consist of patents, supplementary protection certificates, utility models, trademarks, and designs, which must be protected by registration in a national, foreign, or international Register, as well as software and technical/scientific databases.

The Liechtenstein IP box has been approved by the European Free Trade Association (EFTA) Surveillance Authority (ESA).

Fines and penalties
Fines and penalties are not tax deductible, provided the penal nature predominates.

Taxes
Taxes are not deductible in Liechtenstein.

Net operating losses
A loss can be carried forward and offset against the profits for future years. There is no time limitation of loss carryforwards as well as loss offsetting. Losses cannot be carried back.

For assessments as of 2013, the loss carryforward is limited to 70%. The other 30% can still be carried forward indefinitely. As a consequence, 30% of the taxable profit is subject to annual taxation even if corresponding losses from previous years exist.

Payments to foreign affiliates
Interest, royalties and licences, and other fees to foreign affiliates are allowed as deductions to the extent that they meet the arm's-length test (i.e. equivalent to charges that would be made by an unrelated third party).

For interest payments between affiliated companies or between shareholders and companies, Liechtenstein tax authorities publish safe harbour rules annually (i.e. generally accepted interest).
**Group taxation**

Resident and non-resident corporations have the possibility to opt for group taxation if they meet the legal requirements (such as more than 50% of capital and 50% of voting rights). The ultimate group leader must either be a corporation domiciled in Liechtenstein or with the effective place of management in Liechtenstein.

In order to form multi-level group structures, sub-groups may also be built. The same rules are applicable for the group leader of the sup-group as for the primary group leader.

The group leader can decide, for each company that fulfils the conditions, which company will be included in the group or not.

Losses of group members can be offset against profits of the (sub) group leader within the same year. The offsetting is only possible under the following conditions:

- Only losses incurred after the option for group taxation can be considered.
- Losses need to be calculated according to Liechtenstein profit calculation rules.

The losses are allocated to the (sub) group leader according to the direct participation quota of the (sub) group leader to the group member whose losses should be offset. If the losses cannot be used at the level of the (sub) group leader, they can be allocated to other group members. However, the minimum tax is applicable for each group member.

Losses that have been attributed to the (sub) group leader must be adjusted in the following cases:

- Losses can be offset against profits on the level of the group member.
- Exit of group member from the group.
- Reduction of participation quota of a group member.
- Depreciation is made on a participation due to losses.

The (sub) group leader must provide evidence annually that no adjustment needs to be made. Even if the conditions for adjustment are not fulfilled, losses that have been attributed to the (sub) group leader must be adjusted five years after attribution.

**Transfer pricing**

Liechtenstein does not have specific transfer pricing rules apart from the rule that intra-group transactions are carried out at arm’s-length terms.

**Thin capitalisation**

Liechtenstein does not have thin capitalisation rules.

**Controlled foreign companies (CFCs)**

Liechtenstein does not have specific CFC rules. However, legal or actual structures that appear inappropriate to the economic circumstances and whose sole economic purpose consists in attaining tax advantages are considered abusive if:

- the granting of this tax advantage would violate the object and purpose of the tax law, and
- the taxpayer is unable to present any economic or other substantial reasons for the choice of this structure and if the structure does not yield any independent economic consequences.
**Tax credits and incentives**

The following tax incentives are currently applicable:

- Profit tax exemption for corporations that have an irrevocable charitable, cultural, or ideal purpose without commercial activity.
- Profit tax exemption of dividend income and capital gains on shares/participations (especially interesting for holding companies).
- NID on equity (see the Deductions section).
- Private asset structure (PAS).
- Deduction for income from IP (see the Deductions section).

**Private asset structure (Privatvermögensstrukturen or PAS)**

Liechtenstein offers tax privileges for PASs. A PAS must not conduct any economic activity. The purpose of a PAS is limited to acquiring, holding, administrating, and selling financial instruments according to the Liechtenstein assets management law as well as cash and bank accounts. Participations may only be held if it can be proved that the shareholders or beneficiaries have no influence on the administration of this company.

The articles of the PAS must contain a clause that the regulations for PAS are applicable. Exemptions of this rule are applicable for legal entities that existed before the introduction of the tax law as of 1 January 2011.

The investors of a PAS must be individuals who administrate their own assets or structures acting in the interest of individuals.

The company or the audit company needs to confirm, upon formation or after major changes, that the conditions for the PAS structure are fulfilled. This is supervised by the tax authority or a neutral certified accountant.

A PAS only pays the minimum tax of CHF 1,200 annually.

This tax scheme was qualified as in conformity with the provisions on state aid set out in Article 61 of the Agreement on the European Economic Area by the ESA.

**Avoidance of double taxation**

Foreign taxes shall be allowable against domestic taxes (credit method) under circumstances where (i) the income is derived or wealth is owned in a country that has concluded an agreement for the avoidance of double taxation with Liechtenstein and such agreement provides for a tax credit or (ii) reciprocity is granted. Income or wealth shall be exempted from taxation in Liechtenstein (exemption method) if the agreement for the avoidance of double taxation provides tax exemption or if reciprocity is granted.

**Withholding taxes**

**Coupon (withholding) tax**

Until the end of 2010, Liechtenstein had a coupon tax of 4% on dividend payments and certain interest payments. The coupon tax was abolished as of the beginning of 2011. This means that no coupon tax is due on new reserves incurred after the end of 2010 or on interest payments. However, the coupon tax still applies with regard to old reserves (reserves existing on 1 January 2011).

Due to administrative and financial aspects, the Parliament has decided to raise the coupon tax on all old reserves by 31 December 2015. The coupon tax rate has been reduced to 2.5% (instead of 4%) for the tax years 2014 and 2015.
**Tax treaties**
Currently, a comprehensive DTT on income is in effect with Austria, Germany, Hong Kong, Luxembourg, Malta, San Marino, Singapore, the United Kingdom (UK), and Uruguay, as well as a limited one with Switzerland. An extension of the treaty with Switzerland is in negotiation. DTTs with the Czech Republic and Guernsey have been signed but have not yet entered into force.

Liechtenstein has concluded TIEAs with the following governments: Andorra, Antigua and Barbuda, Australia, Belgium, Canada, China, Denmark, Germany, Faeroe Islands, Finland, France, Greenland, Iceland, India, Ireland, Japan, Mexico, Monaco, Netherlands, Norway, St. Kitts and Nevis, St. Vincent and the Grenadines, Sweden, the United Kingdom, and the United States. Recently, TIEAs have been signed with Italy and South Africa but have not yet entered into force.

The governments of Liechtenstein and the United Kingdom signed a Memorandum of Understanding (MOU) relating to cooperation in tax matters, which includes the Liechtenstein disclosures facility (LDF). According to these regulations, financial intermediaries in Liechtenstein are required to show that their UK costumers have been declaring their Liechtenstein investments to the tax authorities in the United Kingdom. In certain circumstances, even accounts or assets outside of Liechtenstein can be transferred in order to take advantage of the terms of the LDF.

**Tax administration**

**Taxable period**
The tax year corresponds with the business year. Therefore, the applicable accounting period, which may end at any date within the calendar year, is the basis for corporate taxation.

**Tax returns**
Corporations resident in Liechtenstein or with PEs in Liechtenstein must file a tax return by 1 July of the calendar year following the fiscal year-end.

Due to a substantiated written request, the tax authority may extend the submission deadline by six months. A deadline extension requires the payment of the provisional invoice. In especially justified cases, the submission deadline may be extended once again. Such a request must be made before expiry of the first deadline extension.

The tax assessment issued by the tax administration is based on the company's tax return, including the attachments and the financial statements filed.

**Payment of tax**
Companies must pay tax within 30 days of receipt of the assessment. The defaults charge rate is 4%.

**Tax audit process**
Generally, the Liechtenstein tax system is based on self-assessment. In the past, the Liechtenstein tax authority assessed an entity based on the documents and information provided by the entity itself and additional documents or explanations requested by the tax authorities. Currently, however, the Liechtenstein tax authority aims to carry out external tax audits in-house. However, due to limited resources, profit tax audits happen rarely.

**Statute of limitations**
The limitation of the right to assess a tax is five years, starting after the end of the tax year in terms of periodic tax and after the end of the year in which the taxable incidence
Liechtenstein

had taken place in terms of non-periodic tax. The tax claims, in any case, are prescribed ten years after the end of the year in which the taxes have been assessed on a final basis.

**Topics of focus for tax authorities**
The tax authority especially focuses on payments between affiliated companies (e.g. inter-company loans). Furthermore, all provisions and depreciations will be checked under the premise of economic necessity.

**Other issues**

**Restructurings**
Restructurings (e.g. change of corporate form, merger, spin-off) can be carried out tax neutrally, provided certain conditions are met.

All restructurings have in common that they can only be carried out tax neutrally if they are performed at tax book value and if the assets remain taxable within Liechtenstein. Furthermore, specific/additional conditions must be met for each kind of restructuring.

**Foreign Account Tax Compliance Act (FATCA)**
A Model 1 intergovernmental agreement (IGA) for the implementation of FATCA was signed between the governments of Liechtenstein and the United States on 16 May 2014.

Under the Model 1 IGA, Liechtenstein financial institutions will be required to report to local tax authorities on the accounts of US citizens. The Liechtenstein tax authorities will then send the tax information to the US Internal Revenue Service (IRS).

**Automatic information exchange**
Liechtenstein, *inter alia*, has committed to implement the Common Reporting Standard for automatic exchange of tax information, which the G20 Finance Ministers endorsed on 23 February 2014. Accordingly, Liechtenstein belongs to the group of early adopters leading to the first automatic information exchanges in 2017 for the year 2016.
**Significant developments**

The following recent amendments have been introduced into the Lithuanian tax legislation:

- As of 1 January 2015, double tax treaties (DTT) with Cyprus, Turkmenistan, and the United Arab Emirates entered into force.
- Certain technical amendments were performed due to Lithuania joining the Eurozone from 1 January 2015 (e.g. conversion of figures, adjustment of forms).

**Taxes on corporate income**

The standard corporate income tax (CIT) rate is 15%. However, small companies and agricultural companies can apply a reduced CIT rate of 5% if certain conditions are met.

Generally, CIT is applied on taxable income received by a Lithuanian tax resident from its local and worldwide activities. Taxable income is calculated by reducing general income of a certain tax period with deductible expenses and non-taxable income.

Income of a tax resident company is not subject to taxation in Lithuania if it was received from activities through a permanent establishment (PE) in a foreign country that is in the European Economic Area (EEA) or that has a DTT with Lithuania and if the income was subject to taxation there.

Furthermore, CIT may be reduced or even not applied if foreign-sourced income received not through a PE is taxed with a withholding tax (WHT) in a foreign country and this country has a DTT with Lithuania.

Non-resident companies are generally taxed on Lithuania-sourced income received through a local PE and reduced by deductible expenses or on income subject to WHT in Lithuania.

**Reduced CIT rate for small companies**

Entities with fewer than ten employees and less than 300,000 euros (EUR) in gross annual revenues can benefit from a reduced CIT rate of 5%.

**CIT regime for certain maritime activities**

The rate of CIT on certain maritime activities is 15%, with the base set by reference to the functional capacity of the ship. This fixed CIT may be applied to maritime entities that fulfil certain conditions indicated in the law. An election must be made to the tax authorities to apply this regime.

**Local income taxes**

There is no local or municipal CIT in Lithuania.
Lithuania

**Corporate residence**

A company is resident in Lithuania if it incorporates there or its activities create a PE for tax purposes.

**Permanent establishment (PE)**

According to local legislation, a foreign company is deemed to have a PE in Lithuania when:

- it permanently carries out commercial activities in Lithuania in whole or in part
- it carries out its activities through a dependent representative (agent)
- it uses a building site or construction, assembly, or equipment objects, or
- it uses equipment, including drilling installations and ships, for exploration or extraction of natural resources.

DTTs may establish different rules of PE recognition. According to domestic law, where there is a DTT, the provisions of the treaty take precedence.

A PE must be registered as a taxpayer with the tax authorities in the territory where its activities are carried out. Its profits are subject to CIT at the rate of 15%.

**Other taxes**

**Value-added tax (VAT)**

The standard VAT rate is 21%.

The reduced rate of 9% applies to:

- Books and non-periodical publications.
- Periodical publications meeting certain criteria.
- Public transport services performed on regular routes determined by the Ministry of Communications or municipalities.
- Supply of heating to residential premises and supply of hot water (applicable until 1 July 2015 but could be extended).
- Accommodation services.

The reduced rate of 5% applies to:

- Technical aid devices and their repair services for the disabled.
- Pharmaceuticals and medical aid devices, when their acquisition cost is wholly or partly compensated following the provisions of the Law on Health Insurance.

The compensational rate for farmers is 6%.

In general, supplies of goods and services made by a taxable person performing its economic activity for a consideration within the territory of Lithuania, as well as imports of goods, are subject to VAT.

**Exempt with credit (zero-rated)**

Goods and services that are exempt with credit (zero-rated) include, but are not limited to, the following:

- Supply of goods exported outside of the European Union (EU).
- Goods acquired by non-EU resident passengers in Lithuania and carried out from the European Union.
- Goods and services for vessels and aircraft.
• Transportation and any directly linked ancillary services related to export of goods and any directly linked ancillary services related to the import of goods when the value of these services shall be included in the customs value of the goods.
• Transportation of imported goods carried to a VAT exemption warehouse or temporarily stored under customs' supervision, placed in a free economic zone (FEZ) or free warehouse, put under customs warehousing procedure, processed under customs' supervision, temporarily imported for processing without levying customs duties, temporarily imported without implicitly levying customs duties, or put under internal or external transit procedure.
• Issuance of International Road Transportation (TIR) and Admission Temporaire/Temporary Admission (ATA) transportation documents.
• Insurance and certain financial services directly related to export of goods from the European Union.
• Supply of goods to sponsorship or charity recipients registered in Lithuania and listed in the Lithuanian law on charity and sponsorship, provided that the goods are exported by the recipients as sponsorship or charity to non-EU organisations that may be recipients of sponsorship or charity under the law.
• Supply of maintenance and processing services for movable property supplied to non-taxable persons established outside Lithuania that have no fixed establishment within the country, provided that the property was temporarily imported for maintenance, repair, processing, etc. in the European Union and will be carried out from the European Union after supply of these services.
• Services of disclosed agents participating in certain transactions of supply of goods or services to local taxable and non-taxable persons where zero-rated VAT is applied and transactions of supply of goods or services where the supply of goods or services is considered carried out outside the European Union.
• Supply of goods to VAT payers registered in another EU member state when these goods are carried out from Lithuania to another EU member state.
• Supply of new means of transport supplied to any person when new vehicles are carried out from Lithuania to another EU member state.
• Supply of goods subject to excise duty when they are supplied to a company not registered for VAT purposes and the goods are carried out from Lithuania to another EU member state.
• Supply of goods in certain cases related to international trade.

In order to apply zero-rated VAT on goods carried out from Lithuania, VAT payers must hold supporting documents as evidence that these goods were actually exported from the European Union or carried out from Lithuania to another EU member state.

**Exempt without credit**
Goods and services that are exempt without credit include, but are not limited to, the following:

• Personal or public health care services, under certain conditions.
• Supply of human organs, blood, human milk, and dental prostheses supplied by dentists or dental technicians.
• Transportation of ill, wounded, or other persons requiring medical care by special means of transport.
• Social services supplied by institutions for children and young people, nursing homes for the elderly, and/or by care or guardianship institutions for disabled or by other non-profit entities.
• Education and training services.
• Cultural and sports services rendered by non-profit entities.
• Services provided by political parties, trade unions, and other non-profit membership based legal entities to their members when these services correspond to that set out in the articles of association and are provided free-of-charge, except for membership fees.
Lithuania

- Services provided by religious communities, other communities, and centres to their members if these services correspond to the purposes of these communities set out in their canons, statutes, and other documents and are provided free-of-charge, except for donations.
- Postal services and directly related goods supplied by government-listed universal postal services providers, except for individually negotiated postal services.
- Radio and TV broadcasting services provided by non-profit legal entities.
- All types of insurance and re-insurance services and related services rendered by insurance and re-insurance agents.
- Financial services meeting certain requirements.
- Lotteries and gambling.
- Postage stamps and other government-listed special signs available for sale against their nominal value (this provision shall be applied only to the postage stamps that can be used as a confirmation of payment for postal services in Lithuania).
- Letting of residential premises (except for accommodation services provided by hotels, motels, camping, and other accommodation services or letting of residential premises not indicated above when the letting period does not exceed two months).
- Letting or sale of immovable property, other than residential premises (certain exceptions apply).
- Supply of goods where the VAT payer has not deducted any proportion of the VAT on purchases and/or importation thereof (certain conditions apply).

Intra-Community acquisitions (i.e. acquisitions of goods from other EU member states) are VAT-exempt, provided that:

- the supply of such goods in Lithuania would be VAT-exempt or zero-rated or the import of such goods would be VAT-exempt
- the purchaser who is a foreign taxable person would be able to refund this VAT, and
- triangular transactions meet certain criteria.

Sale and contribution in kind of a business or part of a business is treated as being out of scope of VAT (under certain conditions).

Option to tax
Option to tax is applicable to:

- Lease of immovable property.
- Sale or other transfer of old immovable property (i.e. used for more than 24 months).
- Financial services meeting certain requirements.

Option to tax may be exercised only if the customer is a taxable person registered for VAT purposes. Option to tax the lease of immovable property can also be applied for diplomatic agencies, EU institutions, and/or international organisations. If a VAT payer decides to use the option to tax, it is valid for at least 24 months.

Customs duties
EU customs law is applicable in full.

EU customs law, also known as the Community Customs Code, compiles the rules, arrangements, and procedures applicable to goods traded between the European Community and non-member countries. The Community Customs Code indicates an obligation on a person to pay the amount of the import or export duties that apply to specific goods under the Community provisions in force. The application of the EU customs law means that:

- trade between Lithuania and other EU countries is customs-free
- imports from non-EU countries are subject to EU customs tariffs, and
• numerous free trade agreements concluded between EU and non-EU countries apply to Lithuania.

**Excise taxes**

Excise duty is imposed on the following goods produced in or imported into Lithuania: ethyl alcohol and alcoholic drinks, including beer and wine; processed tobacco, including cigarettes, cigars, cigarillos, and smoking tobacco; energy-related products, including petrol, kerosene, gasoline, fuel oil, natural gas, and their substitutes and additives; coal, coke, and lignite; and electricity. The tax rate depends on the type and quantity of goods.

**Land tax**

Lithuanian and foreign entities are subject to land tax collected by the municipalities for the land they own in Lithuania. Roads for general use and forestland are exempt. The assessment and payment terms are set forth by the municipalities, which are also entitled to grant land tax incentives.

The annual land tax rate ranges from 0.01% to 4%, depending on local municipalities. There is a transitional period set for years 2013 to 2016 if the taxable value of land increases during this period. Please see the table below describing the main features of the land tax in force as of 1 January 2013:

<table>
<thead>
<tr>
<th>Tax rate</th>
<th>0.01% to 4%, defined by municipality</th>
</tr>
</thead>
<tbody>
<tr>
<td>Taxable value</td>
<td>The average market value determined in the map of values established according to the mass valuation.</td>
</tr>
<tr>
<td>Taxes</td>
<td>The mass valuation is performed not rarer than every five years.</td>
</tr>
<tr>
<td>A possibility to apply the value determined during the individual valuation if it differs from the market value by more than 20% (principles are similar to real estate tax).</td>
<td></td>

<tr>
<td>Additional comments</td>
<td>Transitional application: Gradual increase of the tax from 2013 to 2016.</td>
</tr>
</tbody>
</table>

**Land lease tax**

State-owned land that is leased for Lithuanian and foreign companies is subject to land lease tax at a rate established by the municipalities. The minimum tax rate set by the government is 0.1%, and the maximum rate is 4% of the value of the land.

**Real estate tax**

The real estate tax rate ranges from 0.3% to 3%. Tax is levied on the value of real estate owned by individuals and used for commercial purposes or owned by legal entities (with certain exemptions). Municipal councils establish a specific tax rate for real estate situated in their territories annually.

**State duties (stamp taxes)**

There are no stamp duties applied in Lithuania; however, minor fees for the services of state institutions, such as the issuance of documents having legal force and other deeds, may apply.

**Environmental tax**

Environmental tax is imposed on pollutants discharged into the environment, a few specified products (e.g. tyres, batteries), and certain types of packaging.

**Tax on natural resources**

A tax on natural resources is payable on the value of extracted natural resources.
Lithuania

**Social security contributions**
The rate of social security contributions ranges from 30.98% to 32.6% for employers and is 9% for employees. At present, there are no lower or upper limits set for social security contributions on employment related income.

**Contributions to the Guarantee Fund**
Contributions to the Lithuanian Guarantee Fund are calculated by employers at a rate of 0.2% on the gross salary payable to employees. The Guarantee Fund provides support to employees in case of employer’s bankruptcy.

**Payroll taxes**
There are no additional payroll taxes applicable to an employer other than the employer's part of social security contributions and the payments to the Guarantee Fund.

---

**Branch income**
A branch of a foreign company is defined as a structural subunit of a foreign company, which has an establishment in Lithuania and is entitled to engage in commercial activities in Lithuania as well as conclude contracts and undertake obligations according to the power of attorney issued to the branch by its founder. A branch does not have the status of a legal person. It is taxed in the same manner as a PE (see the Taxes on corporate income section).

---

**Income determination**

**Inventory valuation**
Under domestic accounting legislation, stock used in the production and included in the cost of produced goods is valued in the financial statements by the first in first out (FIFO) method. The last in first out (LIFO), weighted-average, progressive-average, actual-price, or another method that corresponds to the stocks' movement can also be used. However, the method used must be disclosed in the notes to the annual accounts, and, among other things, the note must report the profit that would have been calculated if the FIFO method of valuation had been used. For CIT purposes, usage of another method than FIFO should be approved by the tax authorities.

**Capital gains**
Capital gains are taxed as part of the corporate profit of the enterprise.

Capital gains are treated as non-taxable income when they are derived from the transfer of shares in a company incorporated in the European Economic Area or in a country with which Lithuania has a valid DTT and that pays CIT or an equivalent tax. This holds true if the Lithuanian holding company holds more than 25% of voting shares for a continuous period of (i) at least two years or (ii) at least three years when the shares were transferred in one of the established forms of reorganisation. Certain restrictions apply.

**Dividend income**
The receiving company does not include the dividends received from other entities in its taxable income.

**Interest income**
Interest income is treated as general taxable income and is subject to 15% CIT.

**Exemptions from taxable income**
The following additional types of income are exempt from CIT:
• Insurance indemnity not in excess of the value of lost property or other losses or damages, the refunded part of insurance premiums in excess of the premiums deducted from income in accordance with the procedure established, and the part of insurance indemnity in excess of the premiums deducted from income in accordance with the procedure established.
• Proceeds of a bankrupt company received from sale of its property.
• The balance of the formation fund of an insurance company as prescribed by the law on insurance.
• Investment income of investment companies with variable capital and closed-end investment companies acting in accordance with the law on collective investment undertakings and investment income of investment companies acting in accordance with the law on collective investment undertakings for informed investors, except for dividends and other distributable profits.
• Income derived by health care institutions for their services that are financed from the funds of the Compulsory Health Insurance fund.
• Income derived from revaluation of fixed assets and liabilities as established by laws and regulations, except for income derived from the revaluation of derivative financial instruments acquired for hedging purposes.
• Default interest, except for that received from foreign companies registered or otherwise organised in blacklisted territories or residents of such territories (see Blacklisted territories in the Deductions section).
• All or part of the profit gained from legal entities of unlimited civil liability that are payers of CIT and with income that is subject to CIT under the law or to a similar tax under respective statutes of foreign countries, with certain exceptions.
• Fees collected by seaports and airports, charges for air traffic navigation services, and funds collected from the lease of seaport-owned land.
• Results arising from adjustments made for the previous tax periods as prescribed by the law on accounting.
• Indemnification for damages received by the company, with certain exceptions.
• Compensation received according to the Lithuanian programmes of the EU financial support relating to taking fishing ships for scrap.
• Life insurance payments received by insurance companies, provided the term of the life insurance policy is valid for not less than ten years or at the date of the receipt of the insurance benefit the recipient has reached the pension age in accordance with the additional law on pensions. Additionally, life insurance investment income of insurance companies, except for dividends and other distributable profit, is exempt along with investment insurance income of insurance companies received according to the contracts of life insurance occupational pensions concluded in accordance with the law on accumulation of occupational pensions.
• Direct and other compensational allowances that are received by units performing agricultural activities to maintain their level of income, which meet the requirements established in the laws and other legal acts of Lithuania.

Foreign income
Income is not subject to taxation in Lithuania if it was received from activities through a PE in a foreign country that is in the European Economic Area or that has a DTT with Lithuania and if the income was subject to taxation there. Since such income is not subject to taxation in Lithuania, costs related to the income cannot be deducted from income that is subject to taxation in Lithuania.

Deductions
Allowable deductions include all the usual costs that an entity actually incurs for the purpose of earning income or receiving economic benefit unless the law on CIT provides otherwise.
Depreciation
Tangible and intangible assets may be depreciated using a directly proportional (straight-line) depreciation method, a production depreciation method, or a double-declining-balance depreciation method. Depreciation may not exceed maximum rates established by the law. For certain typical assets, depreciation rates relevant for tax purposes are shown in the chart below:

<table>
<thead>
<tr>
<th>Asset</th>

Goodwill
Goodwill can be amortised for tax purposes in a straight-line method over 15 years after a merger of a purchasing company and an acquired company, provided that certain conditions are met.

Start-up expenses
Generally, startup expenses are deductible for tax purposes.

Interest expenses
Interest expenses are generally deductible for tax purposes. Interest expenses should be recognised as non-deductible for tax purposes if, after acquisition, a purchasing company and an acquired company are merged and debt used for acquisition of shares is pushed down to the acquired company and certain conditions are not met.

Interest paid to related parties may be non-deductible for tax purposes if thin capitalisation rules are infringed and the interest rate on a debt from related party does not correspond to a fair market interest rate (see Transfer pricing and Thin capitalisation in the Group taxation section).

Bad debts
Bad debts are deductible only if proved and specific criteria are met. Provisions are non-deductible.

Charitable contributions
Generally, double the amount of donation/sponsorship can be deducted for tax purposes (i.e. 200% deduction is available) but only if donation/sponsorship was provided to registered recipients and only up to a limit of 40% of taxable result before deduction of sponsorship and utilisation of tax losses carried forward.

Fines and penalties
Fines and penalties are generally non-deductible for tax purposes.

Taxes
All taxes, fees, and other compulsory payments to the state budget are deductible for CIT purposes, except VAT paid to the budget and CIT. Note that VAT can be treated as deductible for CIT purposes if it is input or paid import VAT that is non-refundable for VAT purposes and this input or paid import VAT is calculated on deductible expenses.

Other significant items
Limited deductible expenses also include the following:
• Maintenance, repair, and reconstruction expenses of tangible fixed assets: If the repair or reconstruction increase the service period and improve the qualities (useful characteristics of the fixed assets), the value of repair or reconstruction shall be added to the acquisition value of the tangible fixed assets.
• Business travel expenses: Deductible with restrictions.
• Advertising and representation expenses: 75% of representation expenses are deductible.
• Natural losses: Deduction limited to not more than 1% of turnover.
• Contributions and expenses for the benefit of employees: Deductible with restrictions.
• Special provisions of credit institutions and insurance companies: Calculated according to the methods established by the Bank of Lithuania and the Commission of Insurance Supervision.
• Membership fees, contributions, and premiums: Deductible with restrictions.

Non-deductible expenses also include the following:

• Default interest (forfeit), fines, and late interest paid to the state budget as well as other sanctions imposed for violations of laws and regulations of Lithuania.
• Interest or any other indemnity paid due to non-performance of contractual obligations by related parties.
• Amount of the limited deductible expenses in excess of the established limits.
• Expenses attributed to allowable deductions more than 18 months past, although the payments for goods or services supplied by the entities registered or otherwise organised in blacklisted territories (see below) have not been made.
• Sponsorship and gifts that do not correspond to the requirements of CIT law.
• Payments to blacklisted territories (see below) if they are not verified and payments are not subject to WHT.
• Indemnification for damages inflicted by the entity.
• Dividends or otherwise distributed profits.
• Other expenses not related to the deriving of income and not attributed to operating activities of the entity as well as the expenses that are not considered allowable deductions under the law.
• Amounts resulting from adjustments and corrections of errors of previous tax periods.
• Expenses related to revaluation of fixed assets and securities, except for financial instruments acquired for hedging purposes.
• Deductible or limited deductible expenses attributed to non-taxable income.
• Expenses related to income from certain international maritime activities if a maritime entity chose to apply a fixed CIT.

**Net operating losses**
Operating losses may be carried forward for an indefinite period, provided that certain requirements are met.

Current year operating losses incurred after 1 January 2010 can be transferred to another legal entity of the group if certain conditions are met.

Losses incurred due to the transfer of securities and/or derivative financial instruments may be carried forward for five years (indefinitely for financial institutions).

As of 1 January 2014, reduction of taxable profit by accumulated tax losses is limited to 70% of the taxable profit for the current year (except for entities that are subject to the reduced CIT rate of 5%). The rest of the accumulated tax losses can be carried forward for an unlimited period of time.

No carryback of losses is available in Lithuania.
Lithuania

Payments to foreign affiliates
Payments to foreign affiliates (e.g. interest, royalties, management fees, fees for other services) are deductible for tax purposes if the payment serves a business purpose, provides a benefit to the payer, is at arm’s length, and is substantiated by sufficient documentation. Payments to foreign affiliates may also be subject to various WHTs. Certain payments to affiliates located in tax haven (blacklisted) countries are subject to 15% WHT rate.

Blacklisted territories
A blacklisted territory is a foreign country or territory that is included on a list of offshore territories established by the Minister of Finance that meets at least two of the following criteria:

- Similar tax rate in such territory is below 75% of that set in the Lithuanian CIT law.
- In such territory, different rules for levying a similar tax are applied, depending on the country where the parent company (controlling entity) is registered or otherwise organised.
- In such territory, different rules for levying a similar tax are applied, depending on the country where the business is conducted.
- The company (the controlled taxable entity) has entered into agreement with the tax administrator of that territory with regard to the application of a tax rate or tax base.
- There is no effective exchange of information in such territory.
- There is no financial and administrative transparency in such territory, the tax administration rules are not quite clear, and the application thereof is not communicated to tax administrators of other countries.

A list of 58 offshore territories has been published. With certain exceptions specified in the law, all payments to offshore companies or their branches for any work or services, commodities, interest on funding, insurance premiums, guarantees, etc. are non-deductible for CIT purposes unless the Lithuanian entity provides evidence to the state tax authorities that:

- the payments are related to usual activities of the paying and the receiving business entities
- the receiving foreign business entity manages the property necessary to carry out such usual activities, and
- there is a connection between the payment and the economically grounded business operation.

Group taxation
Group taxation legislation and regimes are not available in Lithuania. Each Lithuanian entity is regarded as a separate taxpayer and may not deduct tax losses accumulated from previous tax periods at the level of any other group entity.

Transfer of current year operating tax losses incurred to an entity of the same group of companies is allowed if certain requirements are met.

Transfer pricing
All transactions between associated parties must be performed at arm’s length. The tax authorities have a right to adjust transaction prices if they do not conform to market prices.

The Lithuanian rules refer to the Transfer Pricing Guidelines for Multinational Enterprises and Tax Administrations established by the Organisation for Economic Co-operation and Development (OECD) to the extent that they do not contradict with the domestic rules.
According to the Lithuanian transfer pricing regulations, companies may apply the following methods, although traditional methods should be given preference:

- Comparable uncontrolled price method.
- Resale price method.
- ‘Cost plus’ method.
- Profit split method.
- Transactional net margin method.

All entities with an annual revenue exceeding EUR 2,896,000, as well as all banks, insurance companies, and credit institutions, are required to prepare transfer pricing documentation in a specifically prescribed form. The documentation may be in a foreign language, but upon request has to be translated to Lithuanian.

Advance pricing agreements (APAs) and binding rulings are available in Lithuania. Taxpayers can apply for an APA or a binding ruling from the Lithuanian tax authority in respect of future transactions.

Decisions in the form of a binding ruling or APA will be issued by the Lithuanian tax authority regarding the application of tax legislation provisions and pricing principles. The above mentioned decisions will be particularly relevant to companies planning to undertake new transactions where the taxation principles of such transactions are not clearly defined in the tax legislation and to international companies planning to perform significant transactions with associated parties.

**Thin capitalisation**

The Lithuanian thin capitalisation rules apply in respect to borrowings from related parties as well as borrowings from third parties guaranteed by related parties. The debt-to-equity ratio is 4:1. The above provisions do not apply if a Lithuanian company can prove that the same loan under the same conditions would have been granted by a non-related entity.

**Controlled foreign companies (CFCs)**

Positive income of a CFC, i.e. income not derived from operating activity (including interest, royalties, leasing, dividend income, etc.), shall be included in the taxable income of a controlling Lithuanian company if a CFC is established or organised in a country that is:

- a blacklisted territory (see Blacklisted territories in the Deductions section)
- on the ‘white’ list of countries as defined by the Ministry of Finance but is eligible for special CIT or an equivalent tax relief in a country of establishment, or
- neither on the ‘white’ list nor on the ‘black’ list of countries and is subject to a CIT or an equivalent tax lower than 11.25% in a country of establishment.

Certain other conditions apply.

A Lithuanian company may reduce tax payable in Lithuania by the tax paid in a foreign country on the positive income of CFC included in the tax base of that Lithuanian company.

**Tax credits and incentives**

**Foreign tax credit**

A company may reduce tax payable on certain foreign-sourced income in Lithuania by taxes paid on that income in a foreign country if that Lithuanian company has received appropriate notice from that foreign country. The tax credit may not exceed the CIT rate payable in Lithuania.
Investment project incentive
Entities involved in an investment project are able to reduce their taxable profits by up to 50% of the actually incurred acquisition costs of long-term assets meeting certain requirements. Please note that depreciation (amortisation) expenses of such assets shall be deducted in a common manner.

Taxable profits can be reduced by such costs incurred from 2009 to 2018. This relief is applied to the following categories of fixed assets:

- Machinery and equipment.
- Computer and communication equipment.
- Software and acquired intellectual property (IP) rights.

As of 1 January 2014, the application of investment projects relief is extended to lorries, trailers, and semi-trailers.

The costs exceeding the above mentioned 50% limit can be carried forward for four years.

There are certain criteria defining what could be considered an investment project. The project should be precisely described to meet the criteria allowing a company to use the tax relief, and the tax authorities should be properly notified about the project.

Tax relief for research and development (R&D)
Expenses, except for fixed assets' depreciation (amortisation) expenses, incurred for R&D purposes can be deducted three times in the tax period when they are incurred, provided that R&D works performed are related to ordinary business activities.

A company applying tax relief for R&D has to prepare R&D documentation. This documentation has to cover the performed project, substantiate conformity with certain tax requirements, and specify the amount of expenses for R&D activities.

Funds granted for producing a film or a part of a film
Funds granted for producing a film or a part of a film can be deducted from taxable income and from CIT payable due during the period of 2014 to 2018 if the following conditions are met:

- The film meets the criteria of cultural substance and evaluation of the production.
- Not less than 80% of the film production expenses are incurred in Lithuania, and the amount exceeds EUR 43,000.
- Total amount of funds granted by all companies may not exceed 20% of total expenses of the film production.

Certain restrictions for reduction of taxable income and tax due apply.

Free economic zones (FEZs)
Entities that invest in Lithuanian FEZs are entitled to partial or complete CIT relief (depending on the investment amount), relief of tax on real estate, and 50% relief of land lease tax. In 1996, two FEZs were established for a period of 49 years: one in Kaunas and the other one in Klaipėda. As of 1 January 2012, five more FEZs were established in Akmenė, Kėdainiai, Marijampolė, Panevėžys, and Šiauliai. At the moment, however, Akmenė and Šiauliai FEZs are not operating yet since the procedures have not been finalised.
**Withholding taxes**

**Domestic legislation**

Generally, income of a foreign entity in Lithuania not derived through a PE is deemed to be Lithuanian-source income and is subject to WHT at the following rates:

- Interest on any type of debt obligations, including securities: 10%.
- Proceeds from the sale, transfer (with title), or lease of immovable property located in Lithuania: 15%.
- Income derived from sports activities or performers’ activities: 15%.
- Income from distributed profits: 15%.
- Royalties: 10%.
- Annual payments (tantiemis) to the members of the board or supervisory board: 15%.
- Indemnities received for the infringement of copyrights or neighbouring rights: 10%.

0% WHT is applied on royalties paid to related parties meeting requirements of the European Commission (EC) Interest and Royalty Directive.

Lithuanian WHT on interest paid to EU entities or DTT tax residents is 0%.

WHT is not applied on government securities issued on international financial markets, interest accumulated and paid on deposits, and interest on subordinated loans that meet the criteria established by legal acts adopted by the Bank of Lithuania.

Dividends distributed by a resident company to another resident company are subject to a 15% CIT, which is withheld by a distributing company.

The dividends distributed by a resident company are exempt from WHT if the recipient company has held not less than 10% of the voting shares in the distributing company for at least a 12-month period and the distributing entity is subject to 5% or 15% Lithuanian CIT rate. However, this relief is not applied if the foreign entity (recipient) is registered or otherwise organised in blacklisted territories (see *Blacklisted territories in the Deductions section*), as specified by the Ministry of Finance. Please note that the requirement of the 12-month holding period does not necessarily have to be fulfilled on the day of dividend distribution.

The receiving company may reduce its CIT payable for that period when dividends were received by the amount of CIT withheld from the received dividends. Any excess credit may be offset with other taxes payable.

Dividends distributed by a foreign entity are subject to a 15% WHT that is to be paid by the receiving Lithuanian entity.

Dividends distributed by a foreign company to a Lithuanian company are exempt from WHT if the distributing foreign entity is established in the European Economic Area and related profit is properly taxed in the domiciled country.

The dividends are also exempt from WHT if the recipient company has held not less than 10% of the voting shares in the distributing company for at least a 12-month period and the receiving entity is subject to 5% or 15% Lithuanian CIT rate. This participation exemption satisfies the requirements of the EC Parent-Subsidiary Directive. The exemption also applies to dividends paid by non-EU foreign companies, except those registered or organised in blacklisted territories.

According to the changed provisions of the CIT Law, the payments received by a foreign entity for the activities of the members of the supervisory board in Lithuania are recognised as income of the foreign company in Lithuania, regardless of the frequency of such payments and whether they are paid as tantiemis or as other types of payments.
These payments are subject to 15% WHT, which should be withheld by the paying company in Lithuania. The tax is applicable only if the member of the supervisory board is a foreign company (not an individual).

**Tax treaties**
Where a treaty for the avoidance of double taxation and prevention of fiscal infringement with the country in question contradicts the local regulations, the treaty provisions prevail. Lithuania now has 53 DTTs in force with foreign countries.

The following WHT rates apply to dividends, interest, and royalties paid to a recipient or beneficial owner resident in a tax treaty country. The lower of the domestic or the treaty rate is given.

Notes
1. Dividends are exempt from WHT if the recipient company has held not less than 10% of the voting shares in the distributing company for at least a 12-month period and the distributing entity is subject to a 5% or 15% Lithuanian CIT rate. However, this relief is not applied if the foreign entity (recipient) is registered or otherwise organised in blacklisted territories (see Blacklisted territories in the Deductions section), as specified by the Ministry of Finance. If participation exemption criteria are not met, the standard WHT rate of 15% should be applied. However, some of the DTTs allow applying WHT at a reduced rate of 5% or 10%.
2. Under the domestic law, the rate is nil if interest is paid to a company established in a country that has a DTT with Lithuania or is a member of a European Economic Area. In other cases, except for Latvia where 0% WHT is established in the DTT, 10% WHT rate should be applied.
3. Under the domestic law, 0% WHT is applied on royalties paid to related parties meeting requirements of the EC Interest and Royalty Directive.
4. Royalties for the use of industrial, commercial, or scientific equipment: 5%; other royalties: 10%.

Reduction of, or exemption from, WHT under a DTT may be obtained if a special residence certificate (Form DAS-1) is completed and approved by the tax authorities before a taxable payment is transferred. If a payment that would have been subject to a tax treaty has already been made and WHT at the local rate was withheld, it is possible to obtain an appropriate refund (reduction) by completing a special claim for a refund of the Lithuanian tax withheld at source (Form DAS-2) and obtaining the approval of the tax authorities.

In addition, the tax authorities may require completion of a special certificate giving information about income received and taxes paid in Lithuania (Form DAS-3).

**Tax administration**

**Taxable period**
The Lithuanian tax year runs from 1 January to 31 December. However, a corporation may apply to adopt a substitute year of reporting (e.g. 1 July to 30 June).

**Tax returns**

**CIT**
CIT returns must be submitted by the first day of the sixth month of the following tax period (1 June for companies using the calendar year).

If advance CIT due is calculated based on activity results for the previous year, the advance CIT return for the first nine months of the tax period is to be submitted by
Lithuania

the last day of the first month (usually January) of the tax period. The return for the remaining months of the tax period is to be submitted by the last day of the tenth month (usually October) of the tax period. If the taxpayer has chosen to pay the advance amount based on the projected amount of CIT for the current year, the return must be submitted not later than the last day of the first month of the tax period.

WHT on dividends
A tax-withholding entity must submit to the tax authorities a special form of a return reporting the dividends paid and tax withheld within ten calendar days after the end of the month of the dividend payment.

WHT on payments other than dividends
A tax-withholding entity must submit to the tax authorities a special form of a return reporting the amounts of payments paid and taxes withheld during the calendar month no later than 15 days after the end of the month in which the amounts were paid.

Payment of tax

CIT
The final payment deadline for CIT is aligned with the annual CIT return submission deadline (i.e. the first day of the sixth month of the following tax period).

If advance CIT due is calculated based on the activity results for the previous year, the advance amount of CIT for the first nine months of the tax period is calculated based on the actual CIT amount for the tax period before the previous tax period. For example, the CIT for the first nine months of 2015 would be calculated based on the appropriate portion of the actual amount of CIT for 2013. The advance amount for the remainder of the tax period is based on the actual amount of CIT for the previous period, for example, tax for the last three months of 2015 would be based on the appropriate portion of the actual amount of CIT for 2014. Thus, the advance CIT amount for each quarter would be equal to one-fourth of the actual tax amount calculated for the tax periods discussed.

The taxpayer may choose to pay the advance amount based on the projected amount of CIT calculated for the current year. The advance amount of CIT calculated on the basis of the projected amount of CIT for the tax period shall account for not less than 80% of the actual amount of the annual CIT; otherwise, late payment interest shall be calculated in respect of each amount of advance CIT that was not paid for the quarter.

The advance tax must be paid no later than the last day of the respective quarter, and for the last quarter by the 25th day of the last month of the quarter.

If the amount of tax indicated in the annual CIT return exceeds the amount actually paid during the tax period (i.e. the advance CIT), the taxpayer is obligated to transfer the additional amount no later than the annual CIT return submission deadline (i.e. by the first day of the sixth month of the following tax period). Overpaid tax can be offset with other tax dues or refunded in accordance with the law on tax administration.

WHT on dividends
WHT on dividends is to be calculated, withheld, and remitted by a Lithuanian company that pays dividends within ten calendar days after the end of the month of the payment.

WHT on payments other than dividends
WHT on payments other than dividends is to be calculated, withheld, and remitted by a Lithuanian company or a PE of a foreign company no later than the return submission deadline.
**Tax audit process**
The Lithuanian tax system for companies is based on self-assessment; however, the tax authorities undertake ongoing compliance activity to ensure corporations are meeting their tax obligations. The tax authorities take a risk-based and materiality approach to compliance and audit activities, with efforts generally focused on taxpayers with a higher likelihood of non-compliance and/or material consequences of non-compliance. Compliance activities take various forms, including general risk reviews, questionnaires, reviews of specific issues, and tax audits.

**Statute of limitations**
Generally, the tax authorities may investigate current and five previous tax periods. However, the limit of ten previous tax periods applies where the tax authorities are of the opinion there has been fraud or tax evasion.

**Topics of focus for tax authorities**
The Lithuanian tax authorities are focusing on the following areas of corporate taxpayers’ compliance:

- Obligation to register PE in Lithuania (investigations of foreign companies that perform activities in Lithuania without registering as local taxpayers).
- Compliance with transfer pricing rules and thin capitalisation rules.
- Applications of tax reliefs (e.g. investment project incentive, relief for R&D).
- Proper recognition of costs for non-business related assets and expenses.
- Social security contributions’ optimisation schemes.

**Other issues**

**Foreign Account Tax Compliance Act (FATCA) agreement with the United States (US)**
Lithuania signed an intergovernmental agreement (IGA) with the United States under the framework of FATCA. Lithuania and the United States will exchange information about the accounts of foreign (US or Lithuania, respectively) residents held in local financial institutions or local branches of foreign financial institutions.

**Implementation of base erosion and profit shifting (BEPS) provisions**
There are no publicly announced projects to implement BEPS provisions into the Lithuanian tax law. However, Lithuania started formal OECD accession talks in April 2015. Should Lithuania become an official OECD member, it is likely to apply the provisions in BEPS guidelines directly or start implementing them into national legislation.

Significant developments

New tax measures for 2015
The ‘Zukunftspak’ Law (Measures for the Future of Luxembourg), as well the ‘Budget Law’, entered into force on 1 January 2015, both of which include new tax measures for corporations and individuals. These proposals demonstrate the wish of the government to retain and build on Luxembourg’s reputation for tax stability, while at the same time complying fully and positively with international initiatives towards increased transparency and the fight against tax fraud. The practical aspects of the ‘Zukunftspak’ measures are to be finalised via Grand-ducal Decrees. Hereafter is a summary of the new measures.

Corporate income tax (CIT)
The CIT rate is not being increased for 2015.

The minimum CIT rules are clarified and, in practice, will reduce the amounts payable by many small entities. A minimum tax will apply when the sum of, especially, financial assets of a resident corporate entity exceeds both 90% of the total gross assets and 350,000 euros (EUR). All entities with total gross assets not exceeding EUR 350,000 will, in 2015, be liable to pay only the EUR 535 minimum CIT due by entities whose balance sheets do not mainly comprise financial assets.

Transfer Pricing
A new general transfer pricing framework has been introduced in Luxembourg law effective as of 1 January 2015. The new provisions incorporated into domestic law (i) restate the arm’s-length principle endorsed by the Organisation for Economic Co-operation and Development (OECD) and (ii) introduce transfer pricing documentation requirements for taxpayers.

Value-added tax (VAT)
Further to the increase of some of the VAT rates as of 1 January 2015, the current reduced, intermediary, and standard VAT rates are set at 8%, 14%, and 17%, respectively.

The super-reduced rate has not been increased and remains set at 3%. The scope of services benefitting from this super-reduced rate has, however, been slightly revised.

Functional currency
On 16 June 2014, the Luxembourg tax authorities issued a Circular letter regulating the use of a functional currency other than the euro for tax purposes. For more information, see Tax returns in the Tax administration section.

Taxes on corporate income
Luxembourg taxes its corporate residents on their worldwide income and non-residents only on Luxembourg-source income.
Businesses with taxable income lower than EUR 15,000 are subject to CIT at a rate of 20%. The CIT rate is 21% for companies with taxable income in excess of EUR 15,000.

The CIT does not apply to tax-transparent entities (e.g. general or limited partnerships or European Economic Interest Groupings).

**Minimum CIT**

Minimum CIT of EUR 3,000 (i.e. EUR 3,210 taking into account the solidarity surtax) is applicable to all corporate entities having their statutory seat or central administration in Luxembourg that own fixed financial assets, transferable securities, and cash at banks (including receivables due by affiliated companies) exceeding 90% of their total assets and exceeding EUR 350,000.

Minimum CIT ranging from EUR 500 to EUR 20,000 (increased by the solidarity surtax), depending on a company's total assets, is applicable to all other corporations having their statutory seat or central administration in Luxembourg (i.e. it is applicable to all corporations not falling within the scope of the EUR 3,000 CIT noted above), as follows:

<table>
<thead>
<tr>
<th>Total assets (EUR) *</th>
<th>Minimum CIT (EUR) **</th>
</tr>
</thead>
<tbody>
<tr>
<td>Up to 350,000</td>
<td>535</td>
</tr>
<tr>
<td>350,001 to 2,000,000</td>
<td>1,605</td>
</tr>
<tr>
<td>2,000,001 to 10,000,000</td>
<td>5,350</td>
</tr>
<tr>
<td>10,000,001 to 15,000,000</td>
<td>10,700</td>
</tr>
<tr>
<td>15,000,001 to 20,000,000</td>
<td>16,050</td>
</tr>
<tr>
<td>20,000,001 and above</td>
<td>21,400</td>
</tr>
</tbody>
</table>

* Total assets of the company as shown in its accounting balance sheet at the end of the fiscal year  
** Including solidarity surtax

The minimum CIT is to be considered as an advance tax payment of any present or future CIT that will be due by the corporation. As an exception to general Luxembourg tax principles, this minimum CIT will not be reimbursed to the taxpayer.

The tax credits for investments provided by the Luxembourg Income Tax Law (LITL) for the recruitment of unemployed persons, for expenses related to further professional education, and for venture-capital investments are creditable only against the amount of CIT in excess of the amount of minimum CIT as determined above.

For tax-consolidated entities, the head of the tax unity will bear the aggregate amount of minimum CIT that would have been borne by each member of the tax unity had these not been consolidated, capped at EUR 20,000 (increased by the solidarity surtax).

Some key aspects of the minimum CIT have been further detailed in Circular L.I.R. n°174/1 as follows:

- When incorporation/dissolution of an entity occurs within the fiscal year, the minimum tax is due for the full amount (i.e. no pro-rata).
- A Luxembourg permanent establishment (PE) of a foreign collective entity is out of the scope of the minimum CIT.
- When real estate property/PEs are located in a treaty country, the net value of assets whose taxation rights are exclusively allocated to the other contracting state of a double tax treaty (DTT) entered into by Luxembourg is not to be taken into account when determining the total gross assets of the company. Hence, the company will either be subject to the so-called Soparfi minimum tax (if at least 90% of its remaining assets are financial assets or if said assets are worth more than EUR 350,000) or to the progressive minimum CIT in all other cases.
Luxembourg

**Solidarity surtax**
A 7% solidarity surtax is imposed on the CIT amount.

Taking into account the solidarity surtax, the aggregate CIT rate is 22.47% for companies with taxable income in excess of EUR 15,000.

**Municipal business tax on income**
Municipal business tax is levied by the communes and varies from municipality to municipality. The municipal business tax for Luxembourg City is 6.75%.

The effective combined CIT rate (i.e. CIT, solidarity surtax, and municipal business tax) for Luxembourg City is 29.22%.

---

**Corporate residence**

Based on domestic law, a company is considered to be resident in Luxembourg if either its registered office or place of central administration is located in Luxembourg. The registered office is designated as such in the company's articles of incorporation.

The place of central administration is generally understood to mean the place where the company is managed and controlled. While this term is not legally defined, the location of the company's major establishment is determined by facts and circumstances, including the following:

- The place where meetings of the board of directors are held.
- The place where shareholders meetings are held.
- The place where the company's officers make their decisions.
- The place where the company's books and records are kept.
- The place where other, similar factors evidencing management control occur.

**Permanent establishment (PE)**
The provisions on PEs included in the tax treaties concluded by Luxembourg generally follow the wording of the OECD model.

Under Luxembourg domestic tax law, a similar PE concept exists but is defined in a broader way and is to be understood as every fixed piece of equipment or place that serves for the operation of an established business.

---

**Other taxes**

**Value-added tax (VAT)**
Supplies of goods and services, which are deemed to take place in Luxembourg, are subject to VAT at the standard rate of 17% (lowest standard VAT rate in the European Union [EU]) or, on certain transactions, at 14% (e.g. certain wines, advertising pamphlets, management and safekeeping of securities), 8% (e.g. supply of gas or electricity), or 3% (e.g. food [except most alcohol beverages]; pharmaceutical products; books; radio and television broadcasting services [except adult entertainment]; shoes, accessories, and clothes designed for children under the age of 14). Some transactions, such as export and related transport, are zero-rated. Further to a Court of Justice of the European Union (CJEU) decision dated 5 March 2015 (C-502/13, Commission v. Luxembourg), the super reduced VAT rate of 3% is no longer applicable to the supply of e-books. The Luxembourg VAT Authorities have published a Circular stating that, as of 1 May 2015, the standard VAT rate of 17% applies to the supply of e-books.
Taxpayers whose activities are subject to VAT are entitled to offset against their VAT payable the amount of such tax charged to them by their suppliers or reverse charged (i.e. self-accounted) by them on import or acquisitions of goods or services from abroad.

Banking, financial, insurance, and reinsurance transactions are generally exempt activities. The VAT paid on costs that have a direct and immediate link with these transactions cannot be recovered except when related to services performed for persons established outside the European Union. VAT on expenses made in the context of ‘passive’ holding activities, which are considered as outside the scope of VAT, are not recoverable.

VAT returns must be filed on a monthly basis (as well as a recapitulative annual return). Derogations may be obtained, to file quarterly or only annual VAT returns, subject to certain conditions (level of turnover or incoming transactions subject to VAT and level of purchases of goods and services on which Luxembourg VAT must be self-accounted for).

A Standard Audit File for Tax (SAF-T), containing reliable accounting data, has been implemented by the VAT authorities. This specific .xml file is used by taxable persons to make information available to Luxembourg VAT authorities during a VAT audit. Only specific taxable persons (subject to the Luxembourg Standard Chart of Accounts) having a certain minimum number of transactions (+/- 500) and registered under a ‘normal filing regime’ with a turnover exceeding EUR 112,000 are firstly concerned. On the other hand, some entities, banks and insurance companies, are not yet subject to these SAF-T obligations, although they may be required to provide all VAT-relevant data to the authorities in a structured electronic file.

**Customs duties/import tariffs**
Based on a European Regulation, goods entering within the territory of the European Union may be subject to customs duties/import tariffs. Applicable rates are based on the nature and on the quantity of the products.

**Excise duties**
In addition to VAT, some products are subject to specific excise duties. In Luxembourg, these products are electricity, mineral oils, manufactured tobacco, and alcohol.

Excise duties are not based on the sale price of the products but on the quantity. Excise duty becomes chargeable at the time, and in the EU member state, of release for consumption. Release for consumption occurs in any of the following instances:

- The departure of excise goods from a duty suspension arrangement.
- The holding of excise goods outside a duty suspension arrangement where excise duty has not been levied, pursuant to the applicable provisions of Community law and national legislation.
- The production of excise goods outside a duty suspension arrangement.
- The importation of excise goods, including irregular importation, unless the excise goods are placed, immediately upon importation, under a duty suspension arrangement.

**Stamp taxes**
There is no stamp duty in Luxembourg.

**Net wealth tax**
Both Luxembourg resident companies and Luxembourg branches of non-resident companies are subject to net wealth tax levied at a rate of 0.5% on their net wealth, based on prescribed valuation methods. In general, assets are to be taken into account at market value (except for real estate, which is subject to a special regime). Shareholdings qualifying for the participation exemption (see **Dividend income in the Income determination section**) generally are exempt from net wealth tax.
Resident companies and Luxembourg branches of non-resident companies may claim a reduction of their net wealth tax liability by making an allocation to a special reserve before the closing of the tax year following the year for which the net wealth tax reduction is claimed. To this end, an amount corresponding to five times the net wealth tax that should have become payable must be kept in this special reserve for the five years following the year in which it was allocated.

As of 2015, the mechanism of the net wealth tax reduction has been slightly amended, and the net wealth tax reduction for year N cannot exceed the amount of CIT for year N-1 in excess of the minimum CIT for year N-1.

Regarding the transition from the previous method to the new one, the CIT due for tax year 2014 will constitute the limit for determining the net wealth tax reduction for the year 2014 (still under the currently existing regime) and also for tax year 2015 (under the new law).

**Subscription tax**
Investment funds are subject to subscription tax (at various rates) on their total net assets valued at the last day of each quarter. Institutional funds and monetary funds are subject to an annual rate of 0.01% and the other funds to an annual rate of 0.05%. Funds of institutional funds and monetary institutional funds are exempt from subscription tax.

Exemptions from subscription tax are available for exchange traded funds, and an extension of exemption is available for funds dedicated to multi-employer pension vehicles or to several employers providing pension benefits to their employees.

Where a foreign Undertakings for Collective Investment (UCI) is managed by a Luxembourg-based management company (or where the UCI’s place of effective management is located in Luxembourg), the UCI will not be deemed to be domiciled in Luxembourg and therefore not be subject to any tax in Luxembourg.

**General registration taxes**
Registration taxes (inclusive of the transcription tax described below) are levied at 7% on the market value of real estate purchased or transferred (10% in the commune of Luxembourg City for some categories of property) and 1% on mortgages on real estate. The taxes are deductible for CIT purposes.

A fixed registration duty of EUR 75 is levied on certain transactions involving Luxembourg entities (i.e. incorporation, amendment to the articles of association, and transfer of seat to Luxembourg).

In case of Luxembourg real estate assets, contributions made to a company remunerated by shares are subject to a proportional registration duty of 0.6% (0.9% for Luxembourg City for some categories of properties) and a transcription tax of 0.5%. Contributions remunerated by means other than shares remain subject to a proportional registration duty of 6% (9% for some categories of property located in Luxembourg City) and a transcription tax of 1%. Transfers made within the framework of a corporate reorganisation may be exempt from any proportional registration duty under certain conditions.

**Commune (municipalities) real estate tax**
Communes (municipalities) levy an annual real estate tax, the basis of which is the unitary value of real estate, which represents its estimated value in 1941. The basic rate varies from 0.7% to 1% of the unitary value, according to the category of property, and is multiplied by a coefficient, which varies with communes and different types of property. For commercial property, the coefficient in Luxembourg City is 750%, which should be applied to 1% of the unitary value. The real estate tax is deductible for CIT purposes.
**Social security contributions**
Compulsory social security contributions for employees are listed below:

- For sickness: 3.05% of gross periodic remuneration, which is limited to a monthly ceiling of EUR 9,614.82 (annual ceiling estimated at EUR 115,377.84 for 2015).
- For pension: 8% of gross remuneration, which is limited to a monthly ceiling of EUR 9,614.82 (annual ceiling estimated at EUR 115,377.84 for 2015).
- For dependency contributions: 1.4% of gross remuneration (reduced by EUR 480.74 per month [i.e. estimated at EUR 5,768.88 for 2015]) with no cap.

The social security contributions have to be withheld by the employer from the employee’s gross salary.

**Payroll taxes**
Payroll taxes have to be withheld by the employer. The top payroll tax withholding rate is 43.60% (40% basic rate income tax and a 9% surcharge for the unemployment fund applied to the tax liability).

**Branch income**
Income of a Luxembourg-based branch of a non-resident company is generally taxed at normal CIT rates. The municipal business tax generally only applies if the branch is carrying on commercial activity within Luxembourg.

**Income determination**

**Inventory valuation**
Inventories generally are valued at the lower of actual cost or market cost. There is no statutory specified method. In general, the first in first out (FIFO), the last in first out (LIFO), and the weighted-average costs methods of inventory valuation are acceptable for income tax purposes, provided the method is in accordance with the facts.

**Dividend income**
Dividends received by a Luxembourg resident company (or by a domestic PE of a non-resident company in certain cases) should, in principle, be subject to CIT.

**Participation exemption regime**
Dividends received may be tax exempt in Luxembourg, according to the so-called ‘participation exemption’ regime, if the conditions described below are satisfied:

- The distributing company is:
  - a collective entity falling within the scope of the EU Council ‘Parent Subsidiary Directive’
  - a Luxembourg resident joint-stock company, which is fully taxable and does not take one of the forms listed in the LITL, or
  - a non-resident joint-stock company that is fully liable (in its state of residence) to a tax corresponding to the Luxembourg CIT (i.e. as a general rule, it is required that the foreign tax is compulsorily levied at an effective rate of at least 10.5%, on a basis similar to the Luxembourg one).
- The beneficiary company is:
  - a Luxembourg resident collective entity, which is fully taxable and takes one of the forms listed in the LITL
  - a Luxembourg resident joint-stock company, which is fully taxable and does not take one of the forms listed in the LITL
  - a domestic PE of a collective entity falling within the scope of the Parent Subsidiary Directive
• a domestic PE of a joint-stock company that is resident in a country with which Luxembourg has concluded a DTT, or
• a domestic PE of a joint-stock company or of a cooperative company, which is a resident of a European Economic Area (EEA) member state (other than an EU member state).
• At the date on which the income is made available, the beneficiary has been holding or undertakes to hold, directly (or through a tax transparent entity, see Transparent entities below), for an uninterrupted period of at least 12 months, a participation in the share capital of the subsidiary of at least 10% or with an acquisition price of at least EUR 1.2 million.

Nevertheless, consistent with the general principle under Luxembourg income tax law, which denies the deductibility of expenses connected to exempt income, any expenses incurred during the year in which a dividend is received, and which have a direct economic connection to the exempt participation, may only be deducted insofar as they exceed the exempt dividend for the year in question.

**Capital gains**

Capital gains (and losses) generally are taxed as ordinary income (or losses). It is possible to defer the taxation of gains on certain fixed assets where the proceeds are used to acquire replacement items. Under certain conditions, capital gains and hidden reserves may be deferred or exempted and remain untaxed in a merger or another form of reorganisation of resident companies or other EU companies.

In general, capital gains on the disposal of qualifying shareholdings held by entities eligible to the participation exemption regime are tax exempt, provided (i) the shareholding constitutes at least 10% of total ownership or an acquisition price of at least EUR 6 million and (ii) the disposing company has held or intends to hold a qualifying shareholding for at least 12 months.

A recapture system exists wherein the capital gain realised will become taxable up to the amount of the aggregate expenses and write-downs in relation to the participation deducted during the year of realisation of the exempt capital gain and in previous years.

The purpose of the system is to avoid a taxation vacuum, which would be the result if the deductibility of expenses and write-downs connected to the participation was allowed, while the income arising from the participation is tax exempt. This system should, in principle, remain tax neutral, as the company should have available carryforward losses for an equivalent amount resulting from the aforementioned deductions (unless previously used to offset other taxable income).

**Taxation of non-resident corporate investors on gains upon disposal of shares**

In case a non-resident corporate investor (non-treaty protected) derives income from the disposal of an important participation (i.e. representing at least 10% of the share capital) in a Luxembourg company within six months of its acquisition, said capital gain will be subject to CIT in Luxembourg unless a tax treaty provides otherwise.

Non-resident investors are not subject to the aforementioned capital gains tax upon disposal of shares in a Luxembourg Société d'Investissement à Capital Variable (SICAV), Société d'Investissement en Capital à Risque (SICAR), and Société de gestion de Patrimoine Familial (SPF).

**Interest income**

Under Luxembourg accounting and tax principles, interest income is recognised on an accrual basis and is fully subject to tax at the effective combined CIT rate of 29.22% (for Luxembourg City).
**Transparent entities**
From a Luxembourg tax perspective, a transparent entity is seen as having no legal personality distinct from that of its partners (those transparent entities are commonly referred to as ‘partnerships’) for CIT and net wealth tax purposes, although it may be regarded as a separate legal entity from a civil/corporate law point of view. Provided that the partnership carries out a commercial activity, however, it may be liable to municipal business tax on its own.

**Foreign income**
A Luxembourg tax resident company is liable for CIT on its worldwide income. Foreign-source income is therefore taxable in Luxembourg, unless a DTT provides for an exemption.

Dividends from foreign subsidiaries are taxed when received, except where exempt as mentioned above (under conditions, the exemption method applies in many DTTs of Luxembourg). Profits of a foreign branch that are not exempt by means of a DTT may benefit from a foreign tax credit. Any foreign taxes paid in excess of the tax credit are deductible as expenses. Luxembourg is using the exemption method in most of its DTTs.

**Deductions**

**Depreciation**
Depreciation rates must be consistent with economic reality. The depreciation must be calculated on the total acquisition cost, bearing in mind the normal life of the asset and the estimated residual value. As generally provided by the Luxembourg tax law, the accounting depreciation should be followed for tax purposes.

Depreciation normally is calculated using the straight-line method. However, the declining-balance method is permitted for fixed assets, other than buildings and intangible assets. The depreciation rate may not, however, exceed three times the rate applicable according to the straight-line method, or 30% (four times the applicable rate in the case of assets used exclusively for scientific and technical research, or 40%).

It is permissible to change from the declining-balance method to the straight-line method, but the opposite is not allowed.

In the event of a sale of a depreciated asset, the net book value at the moment of the disposal must be compared with the sales price of that asset. If this comparison indicates a profit, corresponding income tax may be due unless the sales price is reinvested in eligible assets. Capital losses are deductible.

Under certain conditions, fixed assets with a value of less than EUR 870 or an economic life that is not in excess of one year can be expensed fully in the year of acquisition. Special accelerated depreciation on 80% of the cost of fixed assets is available for assets that protect the national environment, save energy in Luxembourg, or permit the development of workplaces for handicapped workers, under certain conditions.

**Goodwill**
Goodwill is generally amortised over a five-year maximum period. It can, however, be amortised for a period longer than five years if this period does not exceed the useful economic life of this asset. The Luxembourg tax treatment will follow the applicable accounting treatment.

**Start-up expenses**
Formation expenses can either be directly charged to the profit and loss account of the year in which they are incurred or depreciated on a straight-line basis over a five-year maximum period. The accounting treatment is followed for Luxembourg tax purposes.
Interest payments
Interest payments are, in principle, deductible to the extent they comply with the arm’s-length principle (see Transfer pricing in the Group taxation section).

Non-deductibility of the interest payments may arise in case they depend on the profits realised by the company or are derived from loans structured in the form of bonds or similar securities. Also, the deductibility will be limited in cases where the company is considered as being thinly capitalised (see Thin capitalisation in the Group taxation section).

Bad debt
Provisions for bad debts are generally tax deductible.

Charitable contributions
Gifts for scientific, charitable, or public purposes to institutions of general interest are deductible, subject to a maximum of 20% of the net income or up to an amount of EUR 1 million (the minimum being EUR 120), with a possibility to spread the deduction over two years in case of excess.

Shareholdings
Expenses linked to a shareholding qualifying for the participation exemption, including write-downs in the value of the shareholding booked as a consequence of a dividend distribution, are not deductible, up to the amount of the exempt dividend. Recapture rules may apply in the event of disposal of the shareholding. Basically, the effect of this rule is that the proceeds will become taxable up to the amount of the aggregate expenses and write-downs in relation to the participation deducted during the year of disposal and the previous years. The qualifying shareholding is exempt from net wealth tax.

Severance payouts or ‘golden handshakes’
Severance payouts or ‘golden handshakes’ are deductible for CIT and municipal business tax purposes, up to EUR 300,000.

Fines and penalties
Fines and penalties suffered by the taxpayer are not considered as operating expenses and are therefore not tax deductible.

Taxes
Several taxes are deductible in determining income subject to CIT, including the registration duties and real estate tax. Also, certain taxes are credited against the computed amount of income tax owed, including taxes withheld from Luxembourg dividend income received, tax withheld abroad from dividend and interest income received by a Luxembourg corporation (subject to limitations), and investment tax credits (see the Tax credits and incentives section). Foreign taxes are also deductible as expenses if not otherwise credited.

The main non-deductible taxes are CIT, municipal business tax, and net wealth tax, as well as interest and penalties for late payment of said taxes.

Net operating losses
Net operating losses can be carried forward for an unlimited period but cannot be carried back.

Payments to foreign affiliates
Royalties, management service fees, and interest charges paid to foreign affiliates by a Luxembourg company are deductible items, provided they are equal to what the company would pay an unrelated entity for comparable services (application of the arm’s-length principle).
**Group taxation**

Luxembourg permits tax unity. Generally, the conditions to qualify for tax unity include that:

- each company is a fully taxable company that is resident in Luxembourg (the top entity may be a Luxembourg PE of a fully taxable non-resident company)
- at least 95% of each subsidiary’s capital is directly or indirectly held by the head of the fiscal unity
- each company’s fiscal year starts and ends on the same date, and
- tax unity is requested jointly by the top company and each subsidiary that becomes a member of the group.

Tax unity lasts for a five-year period (minimum), and the taxable income/loss of the tax unity is computed as the sum of the taxable income/loss of each integrated entity. Tax losses incurred before the consolidation period may be offset only against tax profits of the company that incurred the loss. Tax losses that are sustained by a group member during the consolidation period are offset against the tax profits of the other group members. Tax losses arising during the consolidation period that remain after the consolidation remain attributed to the parent company.

**Transfer pricing**

The arm’s-length principle restated under the new transfer pricing legislation in Article 56 of the LITL provides that when:

- an enterprise participates, directly or indirectly, in the management, control, or capital of another enterprise, or where
- the same individuals participate, directly or indirectly, in the management, control, or capital of two enterprises

and where, in either instance, the two enterprises are, within their commercial or financial relations, subject to conditions made or imposed that differ from those that would be made between independent enterprises, the profits of these enterprises are to be determined under conditions prevailing between independent enterprises and taxed in consequence.

In the absence of specific domestic transfer pricing guidelines, Luxembourg largely follows the transfer pricing guidelines issued by the OECD. The arm’s-length principle is to be applied to both domestic and cross-border transactions between related entities.

As far as transfer pricing documentation is concerned, under the new legislation, taxpayers are required by virtue of Paragraph 171 of the General Tax Law of 22 May 1931 (AO) to (i) disclose their transactions with related parties and (ii) document their compliance with the arm’s-length principle. No specific guidelines are provided on the nature and extent of the documentation required, which should depend on the circumstances of the case under consideration. However, as Luxembourg is an OECD country, these documentation requirements will be aligned with the OECD guidelines on transfer pricing documentation requirements, currently under revision.

There are no specific transfer pricing methods prescribed to determine the arm’s-length nature of an inter-company transaction and, thus, taxpayers and Luxembourg tax authorities should follow the transfer pricing methods provided for in the OECD transfer pricing guidelines.

In terms of the burden of proof, Luxembourg tax authorities have to prove that there is an erosion of the taxable base in Luxembourg, whereas the taxpayer has to prove that the inter-company transactions did not result in a reduction or cancellation of taxes. The absence of proper documentation could result in a reversal of the burden of proof.
towards the taxpayer. The statute of limitations is generally five years from the end of the year in which the tax liability arises. This period may be extended if a deferred payment is granted. In case of tax evasion or fraud, the statute of limitations can be extended up to ten years. There are no specific penalties in relation to transfer pricing in Luxembourg, but the penalty regime under the corporate tax will be applicable.

In Luxembourg, taxpayers can file advance pricing arrangements (APAs) with the Luxembourg tax authorities. An administrative fee in the amount of EUR 10,000 is due to the Luxembourg tax authorities for the filing of the APAs. Generally, unilateral APAs have been mostly concluded in Luxembourg between taxpayers and Luxembourg tax authorities; however, there have also been a few cases of bilateral APAs.

For intra-group financing on-lending transactions, specific guidelines are provided for in two circulars issued by the Luxembourg tax authorities in 2011. According to the Circular LITL No. 164/2 of 28 January 2011, the internationally acceptable arm's-length principle should be applied to determine the compensation of Luxembourg companies that are principally engaged in financial on-lending transactions. The remuneration of the Luxembourg company should be determined based on the functions performed, assets employed, and risks assumed. A written clearance (i.e. unilateral APA) from the Luxembourg tax authorities on the set of criteria for the determination of the transfer pricing for the financial on-lending transactions can be obtained, provided that the Luxembourg company meets certain substance and equity at risk requirements. In respect of the equity at risk requirement, the Luxembourg company must be at risk for an amount equal to, at least, either (i) 1% of the nominal value of the loan intermediated or (ii) EUR 2 million. In addition, the arm's-length remuneration has to be documented by way of a transfer pricing analysis.

**Thin capitalisation**
No thin capitalisation ratio is specifically provided by the Luxembourg tax law.

In practice, the tax authorities apply an 85:15 debt-to-equity ratio for the intra-group financing of participations. Should the 85:15 ratio not be complied with by the taxpayer, the surplus of interest can be re-qualified by the tax authorities as a hidden distribution of profits that would be non-deductible and potentially subject to a 15% WHT.

**Controlled foreign companies (CFCs)**
Luxembourg tax law does not provide for CFC rules.

---

**Tax credits and incentives**

**Foreign tax credit**
See Foreign income in the Income determination section for a description of the foreign tax credit regime.

**Inbound and capital investment incentives**
Luxembourg tax law provides for various incentives, with specific requirements, in the areas of risk capital, audiovisual activities, environmental protection, research and development (R&D), professional training, and recruitment of unemployed persons.

The most commonly used incentives are the investment tax credits. Luxembourg tax law provides for two types of investment tax credits.

First, a tax credit is available that amounts to 12% of the increase in investments in tangible depreciable assets made during the tax year. The increase in investment over a given tax year is computed as the difference between the current value of all qualifying assets and the reference value allocated to the same type of assets.
Independently, the company may benefit from a 7% tax credit on the first EUR 150,000 of qualifying new investments and a 2% tax credit on the amount of new investments exceeding EUR 150,000 in tangible depreciable assets as well as investments in sanitary and central heating installation in hotel buildings and investments in buildings used for social activities. The above 7% and 2% rates are increased to 8% and 4% for investments eligible for special depreciation (i.e. investments favouring the protection of the environment, the realisation of energy savings, or the creation of employment for handicapped workers). However, certain investments are excluded from the credit calculation, including investments in real property, intangible assets, and vehicles (unless specifically allowed by the law).

Domestic law requires that investments be physically operated in Luxembourg in order to be eligible for the incentive, unless the investment consists of shipping vessels operating in international waters. In addition, the tax benefit of the tax credit is limited to investments that are made within a Luxembourg business establishment and that are intended to be used permanently in Luxembourg.

Further to the CJEU decision dated 22 December 2010 (Tankredeerei, C-287/10), the Luxembourg Tax Authorities issued a Circular letter confirming that the investment tax credit must be granted to any investment used within the EU and EEA member states.

**Intellectual property (IP) regime**

An IP regime is applicable to qualifying IP rights acquired or developed after 31 December 2007. This regime provides for an 80% tax exemption of the net income deriving from the use and the right to use qualifying IP rights, under certain conditions. Qualifying IP rights include patents, trademarks, design, domain names, models, and software copyrights.

An 80% deduction of net deemed income is also available under certain conditions for self-developed patents, which are used internally by the taxpayer.

The net capital gain realised upon disposal of the qualifying IP rights also benefits from the 80% exemption.

Finally, qualifying IP rights may be fully tax exempt for net wealth tax purposes under certain conditions.

**R&D incentives**

Luxembourg entities involved in innovative and R&D activities can benefit from financial support in addition to the specific IP tax regime and general tax incentives.

Innovation loans may be granted by the Société Nationale de Crédit et d'Investissement and may carry a fixed interest rate lower than the market rate. Financial support may also be granted in the form of cash grants or interest subsidies.

R&D projects or programmes receive financial support up to a maximum eligibility (percentage of costs eligible for the incentives) depending on the size of the beneficiary (private research companies or organisations) as follows:

- Large (25% to 100% depending on the investment).
- Mid-size (35% to 100%).
- Small (45% to 100%).

These incentives are available for:

- experimental development
- experimental development and cooperation
- industrial research
Luxembourg

- industrial research and cooperation, or
- fundamental research.

Innovation in process and organisation and investment in innovation pools can benefit from financial support of between 15% and 35% (50% for public research companies).

Promotion and development of innovation pools can benefit from financial support of up to 50% for private organisations or 75% for public research companies.

Research regarding technical feasibility can benefit from financial support of up to 40% or 50% if prior to experimental development and up to 65% or 75% if prior to experimental research.

**Other incentives by entity**

**Investment funds**
Investment funds resident in Luxembourg generally are exempt from CIT, municipal business tax, and WHT on dividends. These investment funds are subject to the previously described subscription tax and to the general registration duty regime.

**Financial participation company (Soparfi)**
A Soparfi (Société de Participation Financière) is neither a specific type of company nor a special tax regime. It is rather used to refer to resident companies that hold and manage the shareholdings of subsidiaries. As any Luxembourg resident company, a Soparfi is subject to CIT, municipal business tax, and net wealth tax; it benefits from Luxembourg’s DTTs, EU Directives (e.g. Parent Subsidiary Directive), the domestic participation exemption on dividends received, and capital gains on qualifying participations.

**Private wealth management company (Société de gestion du Patrimoine Familial or SPF)**
The SPF has been tailored to enter the private sphere of individuals for the purpose of wealth management. Its corporate objective is restricted to the acquisition, holding, management, and disposal of financial assets, to the exclusion of any commercial activity. As a general rule, an SPF is exempt from Luxembourg taxation on income and net wealth tax in Luxembourg. A yearly subscription tax of 0.25% is due on the basis of paid-up capital, share premium, and excessive debts. Subscription tax, however, is capped at EUR 125,000. No WHT applies on dividends distributed by an SPF. Non-resident investors are not taxed in Luxembourg on dividends paid by an SPF or on capital gains realised on shares in an SPF.

**Securitisation companies (SCs)**
An SC is a company that carries out securitisation activities or participates in securitisation transactions. SCs are subject to normal corporate taxation based on their net accounting profit (i.e. gross accounting profits minus expenses). However, the commitment to remunerate the holders of securities (both capital and debt) issued by the SC qualifies as interest on debt even if paid as return on equity. SCs are not subject to net wealth tax in Luxembourg.

**Venture capital vehicle (Société d’Investissement en Capital à Risques or SICAR)**
The SICAR is an entity mainly used for private equity investments. Incorporated under a corporate form, the SICAR is subject to income tax at the normal rate with the benefit of an exemption on income and gains (e.g. dividends, capital gains, liquidation proceeds, interest) from transferable securities qualifying as investments in risk capital as well as income arising from investments in liquid assets pending their investment in risk capital for a maximum of 12 months. In addition, it can benefit from the European directives and DTTs. SICARs are exempt from net wealth tax. Under the form of a limited partnership, the SICAR is treated as a tax transparent entity, and investors are taxed
According to the rules of their country of residence. SICARs treated as tax transparent entities do not benefit from the European directives and DT Ts. The SICAR mainly targets qualified or informed investors (i.e. ‘professional’ investors).

**Financial services companies**
Banks, securities depositaries, insurance and reinsurance companies, as well as other financial service companies, may benefit from specific regulations when establishing their taxable basis for CIT (e.g. provision for the neutralisation of unrealised exchange gains, general banking risk provision, provision for guarantee of deposits, mathematical reserves, and/or catastrophe reserves).

**Shipping companies**
Luxembourg-resident shipping companies are not subject to municipal business tax and can benefit from investment tax credits and accelerated depreciation (even for used assets).

---

**Withholding taxes**

Dividends paid by a Luxembourg fully taxable company to its ‘corporate’ shareholders resident in a treaty country, which hold or commit themselves to hold a participation of at least 10% in the Luxembourg company (or shares with an acquisition price of at least EUR 1.2 million) for an uninterrupted period of at least 12 months, may be exempt from WHT (see Note 1 below for more details).

The following taxes are withheld on payments made. The WHT due on dividends paid to residents of a treaty country cannot exceed the non-treaty rate.

Notes

These notes are not extensive. The full text of the DTT should be checked for a comprehensive view on the conditions of application of reduced rates.

1. Under Luxembourg domestic law, no WHT is levied on dividends paid by a Luxembourg qualifying subsidiary to an entity that is:
   - a collective entity falling within the scope of the Parent Subsidiary Directive
   - a Luxembourg resident joint-stock company, which is fully taxable and does not take one of the forms listed in the LITL
   - a PE of a collective entity falling under the previous categories
   - a collective entity that is resident in a country with which Luxembourg has concluded a DTT and is fully liable to a tax corresponding to the Luxembourg CIT, or a domestic PE of such an entity
   - a Swiss resident joint-stock company that is subject to Swiss CIT without benefiting from any exemption
   - a joint-stock company or a cooperative company that is resident in an EEA member state (other than an EU member state) and is fully liable to a tax corresponding to the Luxembourg CIT, or
   - a PE of a joint-stock company or of a cooperative company that is resident in an EEA member state (other than an EU member state), and
   - at the date on which the income is made available, the beneficiary has been holding or undertakes to hold, directly, for an uninterrupted period of at least 12 months, a participation of at least 10%, or with an acquisition price of at least EUR 1.2 million in the share capital of the income debtor.

   Qualifying shareholders need to be fully taxable collective entities subject in their country of residence to a tax similar to that imposed by Luxembourg. As a general rule, this requirement is met if the foreign tax is compulsorily levied at an effective rate of at least 10.5%, on a basis similar to the Luxembourg one.

2. Interest paid to non-residents generally is not subject to WHT in Luxembourg. However, interest that represents a right to profit participation on a bond may be assimilated to a dividend and subject to WHT. Further analysis should be made to determine the applicable reduced rate on the basis of the treaty (i.e. pursuant to dividend or interest clause). The WHT that may be due as a consequence of the EU Savings Directive (Council Directive 2003/48/EC dated 3 June 2003) is not mentioned.

3. Royalties paid to non-residents are not subject to WHT in Luxembourg, whether the companies are associated or not.

4. A WHT of 10% is withheld on defined interest income paid by a Luxembourg paying agent to resident individuals. Interest indirectly cashed through investment funds are out of the scope of this WHT.

5. DTTs have been concluded with Albania, Andorra, Botswana, Brunei, Croatia, Cyprus, Kuwait, Kyrgyzstan, Oman, Serbia, Ukraine, and Uruguay, but are not yet in force. New DTTs with Czech Republic, Estonia, and Singapore were signed, but domestic transposition procedures are still pending.

6. The recipient company (other than a partnership, as the case may be) holds at least 10% of the Luxembourg company's capital.

7. The recipient company (other than a partnership, as the case may be) holds at least 25% of the Luxembourg company's capital.

8. The recipient company directly or indirectly owns at least 30% of the Luxembourg company's capital and with an investment equivalent to at least 300,000 United States dollars (USD).

9. The beneficiary of the dividends is a company (other than a partnership, as the case may be) that has directly held a participation of at least 10% of the distributing company's capital for an uninterrupted period of at least 12 months preceding the decision to distribute the dividend.

10. The recipient a company (with the exception of general partnerships, limited partnerships, and cooperative societies) whose direct participation, held since the beginning of its financial year, in the capital of the company (with the exception of general partnerships, limited partnerships, and cooperative societies) paying the dividends is at least 25% or has an acquisition price of at least 250 million francs. The provisions of paragraph 1 (a) shall also apply where the dividends are paid to two or more companies (with the exception of general partnerships, limited partnerships, and co-operative societies) the sum of whose participations, held since the beginning of their respective financial years, in the capital of the company (with the exception of general partnerships, limited partnerships, and co-operative societies) paying the dividends is at least 25% or has an acquisition.
11. The beneficiary of the dividends is a company (other than a partnership, as the case may be) that has held a participation of at least 10% in the distributing company's capital for an uninterrupted period of at least 12 months.

12. The rate of WHT is 5% if the beneficial owner is a company that directly or indirectly owns at least 10% of the capital of the company paying the dividends and made an investment in the capital of the company paying the dividends of more than EUR 100,000, or the equivalent in Georgian currency. No WHT is levied when the beneficiary company directly or indirectly owns at least 50% of the capital of the company paying the dividends and made an investment in the capital of the paying company of more than EUR 2 million, or the equivalent in Georgian currency.

13. No WHT is levied if the recipient company (other than a partnership) holds at least 10% of the Luxembourg company's capital or a participation with an acquisition price of at least EUR 1.2 million.

14. The recipient company holds at least 25% of the Luxembourg company's voting shares during the period of six months immediately before the end of the accounting period in which the distribution of profits takes place.

15. The recipient company (other than a partnership) holds at least 15% of the Luxembourg company's capital.

16. No WHT is levied when the beneficiary of the dividend is a company (other than a partnership) that has directly held a participation of at least 10% (or with an acquisition price of at least EUR 1.2 million) of the distributing company's share capital for an uninterrupted period of at least 12 months. The rate of 5% of WHT applies if said participation has been held for less than 12 months.

17. The recipient company (other than a partnership) holds at least 20% of the Luxembourg company's capital.

18. The beneficiary of the dividends is a company (other than a partnership) that has directly held a participation of at least 10% of the distributing company's capital for an uninterrupted period of at least 24 months (for Poland) / at least 12 months (for Sweden) preceding the payment date of the dividend.

19. The recipient company holds at least 10% of the Luxembourg company's capital and made an investment in the capital of the paying company of more than EUR 80,000, or the equivalent in roubles.

20. The recipient company (other than a partnership) holds at least 25% of the Luxembourg company's capital for an uninterrupted period of at least one year preceding the payment date of the dividend.

21. The 5% WHT applies if the beneficial owner is a company (other than a partnership) that directly holds at least 10% of the Luxembourg company's capital. No WHT is levied if the beneficial owner is a company that is a resident of the other contracting state and that directly holds, for an uninterrupted period of two years, at least 10% of the capital of the company paying the dividends, or if the beneficial owner is a pension fund.

22. A 5% WHT is levied on dividend distributions where the beneficial owner is a company that holds at least 10% of the voting power of the paying company. No WHT is levied when the US company has directly held, during an uninterrupted period of two years preceding the payment date of the dividend, at least 25% of the voting rights of the paying company and certain conditions regarding the nature of activities performed by the distributing company are met. The rate of 5% of WHT applies where the recipient company directly or indirectly owns at least 50% of the share capital of the paying company or has contributed more than USD 10 million, or the equivalent in Luxembourg or in Vietnamese currency, in the capital of the company paying the dividends. The rate of 10% of WHT applies where the beneficial owner is a company that directly or indirectly holds at least 25% but less than 50% of the capital of the company paying the dividends and has contributed not more than USD 10 million, or the equivalent in Luxembourg or Vietnamese currency, in the capital of the company paying the dividends.

23. The 15% WHT applies if the beneficial owner is a collective investment vehicle treated as a body corporate in Taiwan. The 10% WHT applies in all other cases.

---

**Tax administration**

**Taxable period**
The taxable period for Luxembourg fully taxable resident entities follows the financial year (i.e. accounting year) of the company.

Companies generally use the calendar year for accounting purposes but may, in practice, apply a different accounting year. The taxable period would, in such cases, correspond to this different accounting year.

**Tax returns**
Companies must file their tax returns by 31 May of each year following the calendar year during which the income was earned.

Assessments are issued after the end of the tax year and normally can be finalised within five years, although the delay may extend to ten years if the declaration is found to
be incomplete or inexact, with or without the intention of fraud. Once issued, the tax assessment notice is, in principle, final (unless new facts come to light).

A self-assessment procedure applies to Luxembourg resident companies. Tax assessments are issued by the tax authorities immediately upon receipt of the tax return, based on the taxable profit reported by the company. The tax authorities may then reassess or request more information on the return within the period of five years that follows the reception of the tax return.

Luxembourg companies are free to choose the currency in which they wish to prepare their commercial accounts. Luxembourg companies that expect to conduct most of their business in a currency other than euros will therefore generally opt to use that ‘foreign’ functional currency to draw up their financial statements. In particular, this will save such companies from having to recognise, for accounting purposes, foreign exchange gains and losses that do not reflect the economic reality of their business.

Nevertheless, as a general rule, Luxembourg taxpayers in such a situation have until now been required to file their tax returns in euros, basing these returns on euro-denominated tax balance sheets. In order to avoid the foreign exchange differences that result from the preparation of this euro-denominated tax balance sheet and that do not reflect the economic reality, the use of a ‘foreign’ functional currency for tax purposes has already been tolerated by the tax administration for many years. Luxembourg taxpayers have been allowed, upon request, to determine their taxable basis solely in a ‘foreign’ functional currency, and then only having to convert the final basis figure into euros. This has averted the need to establish a euro-denominated tax balance sheet simply for tax filing purposes.

Circular L.G.-A n°60, issued by the Luxembourg tax authorities on 16 June 2014, formalises this well-established practice and provides a clear framework.

Payment of tax
Quarterly tax advances must be paid. These payments are fixed by the tax administration on the basis of the tax assessed for the preceding year or on the basis of the estimate for the first year. This estimate is given by the company pursuant to the request of the Luxembourg tax authorities.

Final payment of CIT must be paid by the end of the month that follows the month of reception by the company of its tax assessment.

Topics of focus for tax authorities
Further to the introduction of a comprehensive legal framework in this respect, Luxembourg tax authorities focus increasingly on transfer pricing matters, and the methods used to determine the arm’s-length remuneration of Luxembourg-based companies are being closely assessed by the Luxembourg tax authorities.

Other issues
Implementation of the Foreign Account Tax Compliance Act (FATCA)
FATCA has become a highly controversial set of information reporting rules designed to prevent and detect tax evasion by United States (US) persons. It reflects and promotes a global trend towards greater tax transparency and increased worldwide efforts to combat tax fraud in many sectors of the financial world. It also builds the basis for other international developments in this respect, such as the Common Reporting Standard (CRS) initiated by the OECD.

Even though FATCA has originated in the United States, it affects thousands of non-US entities. In general terms, FATCA imposes a 30% WHT on US-source income for
Luxembourg

payments made to non-compliant foreign entities regardless of whether they have US clients/investors or not.

Luxembourg signed an Intergovernmental Agreement (IGA) Model 1 with the United States on 28 March 2014 under the terms of which FATCA will be applied in Luxembourg. It is expected that the IGA will be soon ratified by the Luxembourg parliament.

Based on the IGA, Luxembourg financial institutions (i.e. depositary and custodian institutions, certain insurance companies, and investment entities that do not benefit from an exemption) have to comply with some due diligence and registration duties. In addition, they will have to first report on FATCA to the Luxembourg tax authorities by 31 July 2015 (with respect to financial accounts existing in 2014) even though they do not have any US reportable accounts (in this case, a nil report is required). The Luxembourg tax authorities will then automatically exchange those information with the US Internal Revenue Service (IRS) by 30 September 2015. This reporting will repeat annually.

Not only Luxembourg banks, insurance companies, or funds have obligations under FATCA. Even other entities that fall within the definition of investment entities (certain holding companies, securitisation vehicles, etc.) might be subject to full FATCA obligations despite the fact that they have neither US investments nor US investors. Therefore, in order to be aware of its FATCA obligations, each entity has to analyse its FATCA status. If the entity being an in-scope financial institution does not comply with its FATCA obligations as implemented under Luxembourg law, it risks being subject to local penalties in addition to the 30% WHT risk mentioned above.

It is worth noting that the IGA provides in its Annex II with some deemed-compliant categories (e.g. Collective Investment Vehicle, Sponsored Investment Entity, Investment Advisors and Investment Managers) under which Luxembourg financial institutions, should they qualify for one of these status, are subject to lighter FATCA obligations.
Significant developments

Tax incentives for the tax year 2015
On 17 December 2014, the Legislative Assembly approved certain tax incentives proposed by the Chief Executive of Macau in the Budget for the financial year 2015. The key tax incentives include the following:

- The tax-free income threshold for complementary (corporate) tax will be increased from 32,000 Macanese patacas (MOP) to MOP 300,000 for income derived in the tax year 2014. Taxable income over MOP 300,000 is taxed at 12%. To help small and medium-sized enterprises (SMEs) to survive in the challenging economy, it has been further proposed for the tax-free income threshold in the tax year 2014 be expanded to MOP 600,000 in the ‘Revised Budget for the financial year 2015’ presented to the Legislative Assembly on 1 April 2015. This furtherance of the tax-free income threshold from MOP 300,000 to MOP 600,000 in the Revised Budget is subject to approval by the Legislative Assembly.
- The standard MOP 3,500 reduction in property tax liabilities will continue to be available in the tax year 2015 for both self-use and rental properties. This incentive does not apply to corporate and Macau non-residents.
- Restaurants will continue to be exempt from tourism tax in the tax year 2015.
- Insurance policies written or renewed in the tax year 2015 and banking transactions in the tax year 2015 will continue to be exempt from stamp duty.
- Admission tickets for performances, exhibitions, and entertainment programs will continue to be exempt from stamp duty in the tax year 2015.
- Commercial and industrial operations will continue to be exempt from the annual industrial tax in the tax year 2015.

Tax information exchange agreements (TIEAs)
The government of Macau signed TIEAs with the governments of the United Kingdom of Great Britain and Northern Ireland and Guernsey on 3 September 2014 and with the government of the Argentine Republic on 5 September 2014. Together with the five comprehensive tax arrangements/agreements that Macau has signed with Belgium, Cape Verde, the People’s Republic of China, Mozambique, and Portugal, Macau has enlarged the network of agreements to implement the internationally agreed standards on transparency and exchange of information for tax purposes through the signing of a total of 20 double taxation agreements (DTAs) or TIEAs to date.

The TIEAs with the United Kingdom of Great Britain and Northern Ireland, Guernsey, and the Argentine Republic will become effective upon completion of the necessary ratification procedures by the respective jurisdictions.

Agreement between the United States (US) government and the Macau SAR government to facilitate the implementation of the Foreign Account Tax Compliance Act (FATCA)
On 30 November 2014, Macau and the United States finished negotiation and reached in substance an intergovernmental agreement (IGA) that will facilitate compliance with US FATCA. The formal IGA will be executed soon. FATCA is an anti-tax evasion
regime enacted by the United States to detect US taxpayers who use accounts with non-US financial institutions to conceal income and assets from the US Internal Revenue Service (IRS). Under the IGA, financial institutions in Macau are required to register and conclude separate individual agreements with the US IRS. Under these agreements, these institutions shall seek the consent of their account holders who are US taxpayers for reporting their account information to the US IRS annually.

Financial institutions in Macau should assess their relevant FATCA compliance implications for their operation and clientele to prepare for the upcoming implementation.

The consensus reached under the IGA demonstrated Macau’s commitment to enhance tax transparency in the international community.

---

**Taxes on corporate income**

Complementary tax is imposed on the worldwide income earned by Macau-registered entities, irrespective of where their residence or headquarters are situated and irrespective of the nature of the income. The exception to the foregoing is rental income from leasing of immovable properties located in Macau, which is taxed separately under the property tax regime.

Generally, if a foreign entity is engaged in commercial/industrial activities and/or rendering services in Macau, the resultant gain from such commercial/industrial activities and/or services rendered will be subject to complementary tax.

According to the Macau Complementary Tax Law, complementary tax is imposed on a progressive rate scale ranging from 3% to 9% for taxable profits below or equal to MOP 300,000 and 12% for taxable profits over MOP 300,000. Taxable profits below MOP 32,000 are exempt from tax.

According to the Budget for the financial year 2015 approved by the Legislative Assembly (2015 Budget), the tax-free income threshold for complementary tax has been increased from MOP 32,000 to MOP 300,000 for income derived in the tax year 2014 (taxable income in excess of MOP 300,000 is taxed at 12%). To help SMEs survive in the challenging economy, it has been further proposed for the tax-free income threshold in the tax year 2014 be expanded to MOP 600,000 in the ‘Revised Budget for the financial year 2015’ presented to the Legislative Assembly on 1 April 2015. This furtherance of the tax-free income threshold from MOP 300,000 to MOP 600,000 in the Revised Budget is subject to approval by the Legislative Assembly. The changes in the tax-free income threshold and the tax brackets are subject to approval by the Legislative Assembly on an annual basis, unless such amendments are written into the relevant tax laws.

---

**Types of taxpayers and associated tax bases**

**Group A taxpayers**

Taxpayer entities whose registered capital reached MOP 1 million, or whose average taxable profits reached MOP 500,000 per year in three consecutive years, will automatically become Group A taxpayers in the tax year following the year in which the relevant notification is issued by the Macau Finance Bureau (MFB). A taxpayer entity can also elect to become a Group A taxpayer by filing a Group A declaration form. Profits of Group A taxpayers are assessed based on the actual accounting income after making necessary tax adjustments.

**Group B taxpayers**

Group B taxpayers refer to any individual or any other form of companies not mentioned above and those taxpayers that do not keep detailed accounting records. Profits of Group
B taxpayers are assessed on a deemed basis if the reported income is below the internal parameters set by the MFB for taxpayers in similar industries.

**Corporate residence**

Corporate residence is generally determined by reference to the place of establishment.

**Permanent establishment (PE)**

There is no specific definition of PE in the Macau Complementary Tax Law. Technically speaking, there are two major criteria for determining whether a foreign entity should be subject to complementary tax, and the key phrases are ‘engaging in commercial/industrial activities’ and/or ‘rendering services in Macau’. These phrases are also not defined. Generally, if a foreign entity is engaged in commercial/industrial activities and/or rendering services in Macau, the resultant gain from such commercial/industrial activities and/or services rendered will be subject to complementary tax.

**Other taxes**

**Value-added tax (VAT)**

There is no VAT regime in Macau.

**Customs duties/import tariffs**

Apart from consumption tax imposed on tobacco and spirits entering into Macau, there are no customs duties/import tariffs in Macau.

**Consumption tax (excise duty)**

Consumption tax is imposed only on tobacco and spirits entering into Macau.

There are two methods for determining the amount of consumption tax payable, by quantity or by value. The former method of assessment is based on the weight or volume of goods and the latter is based on the price of the goods imported into Macau. The rate of consumption tax varies depending on the classification of the imported goods.

**Property tax**

Property tax is imposed annually on the owner of buildings situated in Macau. This is first payable after acquiring a property or upon the expiry of the property tax exemption period, if applicable. Different exemption periods are granted, depending on the location of the property. Additional exemption periods may apply in special cases.

For leased properties, property tax is charged at 10% on the actual rental income, and by application, a maximum deduction based on 10% of the rental income derived to cover repair and maintenance expenses incurred will be granted, if approved by the MFB.

For self-use properties, property tax is charged at 6% on the official ratable value as established by the appointed committee of the MFB. A deduction of 10% of the official ratable value to cover repair and maintenance expenses will be automatically granted for self-use property. If the property is not occupied, the owner can apply for an exemption from property tax, the approval of which is entirely at the discretion of the MFB.

According to the 2015 Budget, there is a standard MOP 3,500 reduction in the property tax liabilities assessed in the tax year 2015 for both self-used and rental properties. This incentive does not apply to corporate and Macau non-residents.
Macau

**Stamp duty**
Stamp duty is payable on certain types of documents and stampable transactions at a small fixed amount or at rates ranging from 0.1% to 10% on the value represented by the documents and transactions.

The charge to stamp duty has been extended to property transfers and the irrevocable transfer of certain assets. Stamp duty at progressive rates ranging from 1% to 3% is payable on transfer of immovable property with a surcharge of 5% on the duty payable, resulting in effective stamp duty rates of 1.05% to 3.15%. The irrevocable transfer of certain assets without consideration is subject to a 5% stamp duty.

Insurance policies, written or renewed, and banking transactions have been exempt from stamp duty since 2005. This exemption has been approved by the Legislative Assembly and will continue to be available in the tax year 2015.

Admission tickets for performances, exhibitions, and any kind of entertainment programmes are exempt from stamp tax for the tax year 2015, as approved by the Legislative Assembly. This exemption, if extended, will be published by the Macau government on an annual basis.

**Special Stamp Duty (SSD)**
The transferor of a residential property, commercial property, office, car-parking space, or property under construction is subject to SSD at 20% on the value of the property if the property is resold within a year of its purchase. The SSD rate is reduced to 10% if the resale takes place between one and two years after the purchase. The SSD is also applicable to transfers of an 80% or more shareholding interest in a Macau company that has properties.

**Buyer Stamp Duty (BSD)**
A company, an entrepreneur, or a non-Macau resident acquiring a residential property in Macau is subject to BSD at a flat rate of 10%, on top of the existing Stamp Duty and SSD, if applicable.

**Professional (Salaries) Tax**
Professional Tax is payable by anyone receiving income from employment services performed in Macau or from a Macau employment. In Macau, the Professional Tax reporting, withholding, and remittance obligations rest with the employer.

**Social security fund contribution**
Social security fund contribution in the total amount of MOP 45 per month is payable for resident employees. The employer contributes two-thirds of the amount (i.e. MOP 30) and the employee contributes one-third of the amount (i.e. MOP 15).

**Payroll taxes**
There is a pay-as-you-earn (PAYE) system, similar to those used in other countries, which is applicable to salaried individuals only. The employing entity is obligated to report and collect the amount of professional tax payable from its employees each month and remit such payments to the MFB before the 15th day of the month following the quarter-end for local resident employees and foreign employees with valid work visas.

**Annual industrial tax**
The annual industrial tax has been exempted for the tax year 2015 and has been exempted on an annual basis by the Macau government since 2002.

Under the Industrial Tax Code, all commercial or industrial operations carried out in Macau are subject to industrial tax at the beginning of each year. The amount of the tax
is dependent upon the nature of the business. The table below is an illustration of the tax amounts applicable to certain types of businesses in Macau.

<table>
<thead>
<tr>
<th>Type of business</th>

</tbody>
</table>

**Special gaming tax**
Special gaming tax is levied at 35% on the gross gaming revenue derived by gaming concessionaires authorised to carry on the operation of games of chance in Macau under Law 16/2001.

**Tourism tax**
Tourism tax is imposed at the rate of 5% on bills of services, excluding telecommunication and laundry services, and service charges of up to 10% rendered in Macau by establishments such as hotels, guest houses, dancing halls, night clubs, massage/sauna parlours, gymnasiums, karaoke, and the like. Such tax is generally borne by consumers.

Restaurants are exempt from tourism tax in the tax year 2015 and have been exempt, via an exemption published on an annual basis by the Macau government, since 2002.

**Motor vehicle tax**
Motor vehicle tax is imposed on the sale of new motor vehicles to consumers and the importation of new motor vehicles for self-use. Exemptions are available to certain persons and organisations and for certain specific usages. Generally, motor vehicle tax is levied based on the listed selling prices as registered with the MFB. The rate of motor vehicle tax varies depending on the type of motor vehicle and its value.

**Land rent**
Land rent is payable by lessees of leasehold land in Macau on an annual basis according to the amount specified in the relevant lease contract.

According to the 2015 Budget, land rent below MOP 100 shall not be collected by the MFB in the tax year 2015. However, any such amount already collected shall not be refunded.

**Branch income**
Branch income is subject to tax at the same rate as that for corporations. The taxable income is ascertained based on branch accounts.

**Income determination**
The paragraphs below describe the tax acceptable treatments under the prevailing Complementary Tax Law and are for reference only.

**Inventory valuation**
Inventory should be stated at actual cost, and conformity between book and tax reporting is required. Market selling price or replacement cost is allowed only in special circumstances, and prior approval of the Director of the MFB is required for adoption of such inventory valuation methods. The write-down of inventory values is not permitted.
Macau

**Capital gains**
Gains or losses from the realisation of capital assets of a corporate taxpayer are treated as current revenue or expense items for complementary tax purposes.

**Dividend income**
Dividends from all sources are subject to complementary tax in the hands of a recipient incorporated in Macau unless the dividends were paid out of profits that have been taxed at the corporate level in Macau. Where dividends to shareholders are paid out of profits of a Macau entity that have not been taxed in Macau, complementary tax will technically be charged on the dividend distribution to the shareholders.

**Interest income**
Interest income received by or accrued to a corporate taxpayer in Macau is subject to complementary tax.

**Foreign income**
Companies incorporated in Macau are subject to complementary tax on worldwide income, wherever received or credited. There are no provisions in the Macau Complementary Tax Law that allow foreign income to be deferred for tax purposes. Currently, double taxation relief is available under the respective DTAs that Macau has with Cape Verde, the People’s Republic of China, Mozambique, and Portugal.

**Deductions**
Please note that the assessor is empowered to disallow any business expenses (e.g. entertainment, travelling) where the amount incurred is considered to be excessive.

**Depreciation**
An initial allowance of 20% is granted on buildings. The rates of tax depreciation are detailed in Decree-Law No.4/90/M, dated 5 March 1990. The Decree-Law prescribes the maximum annual tax depreciation rates and the number of years of asset life for different asset classes under the straight-line method. For illustration, the maximum depreciation rates and the maximum useful life currently applicable to the general types of assets are set out below:

<table>
<thead>

* At the discretion of the authorities.

In the case of commercial and industrial buildings, depreciation is not allowed for the value attributable to the cost of the freehold land. Where the value of the freehold land cannot be determined from the total cost of land and buildings, a portion equal to 20% is deemed to be attributable to the land value for the purpose of determining the value of buildings to be depreciated.

Depreciation can be claimed either on a prorated basis in accordance with the prescribed annual rates for assets that are not acquired at the beginning of the financial year or on an annual basis.

The cost of repairs and maintenance exceeding 10% of the acquisition cost of the asset in a given year is deemed to be an expense of a capital nature and should be capitalised and depreciated over the remaining life of the asset.

**Goodwill**

Cost of acquisition of goodwill/amortisation of goodwill is generally deductible to the extent it is incurred in the generation of assessable profits.

**Interest expenses**

There is no thin capitalisation rule in Macau. However, the MFB may assess the reasonableness of the interest rate charged for interest expense paid to related parties.

**Bad debts**

The amount provided against doubtful trade receivables is an allowable tax deduction, but the provision cannot exceed 2% of the total receivables, except in the case of banks, where the minimum provisions required under the local banking regulations are fully tax-deductible.

Debts considered uncollectible may be written off only when adequate proof can be shown, usually by way of bankruptcy court proceedings.

**Charitable contributions**

A deduction of up to 0.2% of the company’s turnover is allowable for donations to charitable organisations recognised by the tax authority.

**Pension expenses**

The employer’s contribution to the staff provident fund legally registered in Macau is fully tax-deductible, up to 15% of the employees’ basic salary.

**Fine and penalties**

Tax fines are not deductible.

**Taxes**

Taxes, except for complementary tax and taxes paid on corporate profits, are generally deductible to the extent they are incurred in the generation of assessable profits.
Other significant items

- An amount provided against stock obsolescence of up to 3% of the total stock value at year-end is allowed as a tax deduction.
- Losses arising from insurable risks are not allowable as a tax deduction.
- Staff social welfare expenses paid for the benefit of employees, for example canteens and libraries, are fully tax-deductible.

Net operating losses
Agreed tax losses can be carried forward for three consecutive years for Group A taxpayers. Group B taxpayers are not allowed to carry their tax losses forward to future years. Tax losses cannot be carried back in Macau.

Payments to foreign affiliates
The regulations make no specific mention of royalties and service fees paid to foreign affiliates. The MFB generally monitors the deductibility of such payments. Payments to foreign service providers for consulting services or construction-related services are not deductible if such consulting contracts are not properly registered in Macau.

Group taxation
There is no provision for group taxation in Macau.

Transfer pricing
There is no transfer pricing provision in the Macau tax regime.

Thin capitalisation
There is no thin capitalisation provision in the Macau tax regime.

Controlled foreign companies (CFCs)
There are no CFC rules in the Macau tax regime.

Tax credits and incentives

Foreign tax credit
There is no foreign tax credit provision in the Macau Complementary Tax Law. Foreign tax credit is only available under the relevant provisions of the comprehensive tax arrangements/agreements that Macau has entered into with the People’s Republic of China, Portugal, Mozambique, and Cape Verde, respectively.

Capital investment incentives
A 50% reduction in complementary tax and stamp duty on certain transactions, as well as exemptions from annual industrial tax (currently exempt for all taxpayers) and property tax (up to periods prescribed by the MFB), are allowable for taxpayers in the manufacturing industry (as defined in the Decree-Law) whose capital investment is aimed at the introduction of new products or high technology, improvement of productivity, and increase in exports of goods to new markets.

Where profits are retained in reserves and reinvested in installation of new equipment within the following three financial years, the reinvested reserves can be deducted from taxable profits, provided that the reinvested reserves are attributable to profits earned from normal business operations and the investment is considered to be beneficial for the economic development of Macau.
**Offshore services business incentives**
Profits derived by approved offshore institutions from prescribed offshore service-related activities are exempt from all forms of taxes, such as complementary tax, annual industrial tax (currently exempt for all taxpayers), and stamp duties.

**Incentives for owners of touristic facilities**
Additional incentives, such as an extended property tax exemption period, exemption from annual industrial tax (currently exempt for all taxpayers), reduction in stamp duty, as well as acceleration of depreciation for complementary tax purposes, are available to owners of facilities that qualify as touristic facilities.

**Withholding taxes**
Currently, there is no provision in the Macau Complementary Tax Law for the withholding of taxes from payments made by domestic corporations to overseas companies.

**Tax administration**

**Taxable period**
The Macau tax year is on a calendar-year basis.

**Tax returns**
Assessments are made by the MFB upon review of the tax returns, which must be lodged before 31 March or 30 June of each year for Group B or Group A taxpayers, respectively.

**Payment of tax**
A provisional tax payment calculated based on the declared taxable profit for a Group A taxpayer or final assessed profit for a Group B taxpayer is payable in two equal instalments, in September and November. However, if the amount is not greater than MOP 3,000, payment will be requested in one lump sum amount in September. For Group A taxpayers, a final tax assessment will be issued upon completion of the tax assessment by the MFB and will be due around a month’s time after issuance.

**Tax audit process**
There is no specific tax audit cycle in Macau. The MFB is empowered by the Macau Complementary Tax Law to carry out a tax audit whenever the information provided by a taxpayer in its tax return is considered unclear or insufficient, and subsequent replies to the MFB’s queries, if any, are considered inadequate.

**Statute of limitations**
The statute of limitations period is five assessment years from the relevant year of assessment for both Group A and Group B taxpayers.

**Topics of focus for tax authorities**
The MFB generally focuses on the deductibility of expenses (e.g. staff costs, provisions, depreciation, management fees, payments made to overseas service providers, bad debts, donations).

**Other issues**

**Choice of business entity**
A foreign company conducting business (except for short-term projects) in Macau is obligated to set up a legal establishment, which can be in the form of a company or a branch.
Macau

There are two types of Macau companies: companies limited by shares and companies limited by quotas. The capital and corporate governance requirements for a company limited by shares are higher than a company limited by quotas, and, in general, a company limited by quotas is used by investors that are not in regulated industries.

**Exchange of information**

Law 20/2009 is the legislation that governs the exchange of information by Macau with other tax jurisdictions within the scope of bilateral tax treaties or arrangements. Its objective is to promote the transparency of the Macau tax administration and to demonstrate Macau’s willingness to cooperate with treaty partners in combating tax avoidance or tax evasion activities.

The information to be exchanged under Law 20/2009 is strictly confined to information collected for tax purposes only, and includes the following:

- Information collected within the jurisdiction of the MFB.
- Information collected by the MFB from financial institutions that are governed by the Macau Financial System Act and offshore institutions that are governed by the Macau Offshore Law (the Institutions).

So far, Macau has concluded TIEAs or DTAs that comply with the latest internationally agreed standards with 20 different tax jurisdictions. The following tables summarise the TIEAs and DTAs that Macau has signed, and the TIEAs and DTAs that are in negotiation:

**TIEAs have been signed by Macau with the following countries:**

- Argentine Republic
- Australia
- Denmark
- Faroe Islands
- Finland
- Greenland
- Guernsey
- Iceland
- India
- Jamaica
- Japan
- Malta
- Norway
- Sweden
- United Kingdom of Great Britain and Northern Ireland

**TIEAs are in negotiation with the following countries:**

- Germany
- Ireland
- New Zealand

**DTAs have been signed by Macau with the following countries:**

<table>
<thead>
<tr>
<th>Treaty partners</th>

</tr>
</thead>
<tbody>
<tr>
<td>Belgium</td>
<td>Not yet effective</td>
</tr>
<tr>
<td>Cape Verde</td>
<td>11 January 2011</td>
</tr>
<tr>
<td>The Mainland of China</td>
<td>1 January 2004 (Note that the first protocol and the second protocol became effective on 15 September 2010 and 8 October 2011, respectively)</td>
</tr>
<tr>
<td>Mozambique</td>
<td>11 January 2011</td>
</tr>
</tbody>
</table>
DTAs are in negotiation with the following jurisdictions:

- Hong Kong
- Vietnam

It is believed that more comprehensive DTAs or TIEAs will be signed between Macau and other tax jurisdictions in the near future to demonstrate Macau’s willingness to continue to cooperate with the Organisation for Economic Co-operation and Development (OECD) countries in combating tax avoidance or evasion activities.

As the information of a Macau taxpayer is becoming more transparent under comprehensive DTAs or TIEAs, it is important for Macau companies with cross-border transactions to perform periodic tax health checks to ensure that tax planning arrangements, if any, that have been put in place in the past, remain technically defensible. As Macau offshore companies continue to be a focus of investigations for many tax jurisdictions, it is important to ensure that such companies have adequate commercial substance in Macau and the companies’ transfer pricing policies are supported by appropriate transfer pricing documentation and transfer pricing studies.
**Macedonia**

**Significant developments**

A new Corporate Income Tax (CIT) Law was promulgated by the Parliament in July 2014. The main purpose of the new CIT Law is to restore the previous corporate taxation concept, applicable prior to fiscal year (FY) 2009.

In the period between FY 2009 and FY 2013, CIT was payable separately on non-deductible expenses (on an annual basis) and on financial profit (only if distributed).

By means of the new CIT Law, CIT is payable on the profit realised for the current year, as determined according to the accounting standards, adjusted for the amount of non-deductible expenses incurred during the fiscal year. The accumulated profit realised for the period FY 2009 to FY 2013 is subject to taxation at the moment of distribution.

The CIT rate remains at 10%.

The new CIT Law is effective as of 1 January 2015 for determination of the taxable profit for FY 2014.

Apart from restoring the concept of taxation as described above, the most significant CIT developments are as follows:

- Uncollected receivables arising from loans (or transactions that are considered loans in their economic substance) that are not repaid in the year of granting are considered as taxable expenses. On the other hand, taxpayers are allowed to reduce their tax base in the tax period when such receivable is partially or fully collected.
- The tax base is decreased by the amount of dividend income from domestic residents, under condition that such income was taxed at the level of the payer.
- The tax base is decreased for the amount of reinvested profit for development purposes of the taxpayer, subject to the fulfilment of certain conditions.
- A three-year financial loss carryforward period is available to taxpayers, subject to the fulfilment of certain conditions.

**Taxes on corporate income**

Generally, all resident and non-resident legal entities operating through a permanent establishment (PE) are liable to pay CIT in Macedonia.

Macedonian resident entities are taxed on their worldwide income. Non-resident entities are taxed on the profit realised through their PE in Macedonia. Non-business organisations (including governmental bodies) are taxed on income from their business activities (if any).

The CIT rate is 10%.
According to the new CIT Law, the tax base for CIT is the profit realised for the current year, as determined according to the accounting standards, adjusted for the amount of non-deductible expenses incurred during the fiscal year. The new CIT Law is effective as of 1 January 2015 for determination of the profit for FY 2014.

Under the previous CIT legislation, there were two separate tax bases for CIT, which were subject to filing of two separate tax returns. In the period between FY 2009 and FY 2013, CIT was payable separately on non-deductible expenses (on an annual basis) and on financial profit (only if distributed). By means of the newly promulgated CIT Law, the accumulated profit realised for the period FY 2009 to FY 2013 is subject to taxation at the moment of distribution. Taxpayers are obligated to cover the losses from previous years prior profit distribution.

CIT is not payable on received dividend income from domestic taxpayers, under condition that such income was taxed at the level of the payer.

**Simplified tax regime for companies**

Companies (except companies that provide banking, financial, and insurance services, as well as services in the field of games of chance and entertainment games) can choose to benefit from the simplified tax regime based on their overall annual income. Provided other criteria prescribed in the CIT Law are met, companies will qualify for the simplified tax regime if their overall annual income from all sources is between 3 million Macedonian denars (MKD) and MKD 6 million. These companies will pay 1% CIT on their overall income from all sources as stated in their income statement and financial statements for the respective calendar year.

Provided their overall annual income in the following three years is within the above range, companies under the simplified tax regime cannot request to be excluded from the simplified tax regime.

Under the simplified tax regime, exemption from CIT is available for companies with an overall annual income from all sources of up to MKD 3 million.

**Local income taxes**

There are no local government taxes levied on corporate income.

**Corporate residence**

A company is resident in Macedonia for tax purposes if it is established or maintains its headquarters in the territory of Macedonia. Foreign legal entities with headquarters abroad are non-residents for tax purposes, but their Macedonian branches are liable for tax on any profit generated in the territory of Macedonia if they are considered as a PE for the foreign legal entity in Macedonia.

**Permanent establishment (PE)**

Generally, a PE is a fixed place of business through which the business of an enterprise is wholly or partly carried on, either directly or through a dependent agent.

More specifically, the domestic law provides that a PE may include a place of management, a branch office, an office, a factory, a workshop, mining activities, or any other place of extraction of natural resources.

A building site or construction or installation project, as well as related supervision activities, may constitute a PE if it lasts longer than six months.

Furthermore, the provision of services, including consulting services with regard to one or several related projects, is deemed to give rise to a PE if such activities last longer than
Macedonia

90 continuous days within any 12-month period. If one or several persons establish a PE as per above, any other non-related project on which they are working on becomes part of the PE, irrespective of its duration.

The PE should be registered as a corporate taxpayer at the beginning of its activity in the country for the purposes of obtaining a tax number.

Other taxes

Value-added tax (VAT)

In general, the VAT regulations are in line with the provisions of the sixth European Union (EU) VAT directive.

The standard VAT rate is 18%. This rate applies to overall turnover and imports of goods and services. A lower rate of 5% applies to supplies of certain goods and services, such as supply of food for human consumption; food for livestock; drinking water from public supply systems; computers and software; agricultural material and equipment; baby products; school supplies (e.g. school backpacks, notebooks, pencils); pharmaceutics and medical equipment; publications, such as books, pamphlets, newspapers, and other printed material, except for publications mainly used for advertising purposes; transport of passengers; and accommodation services, bed and breakfast services, as well as half-board and full-board services provided by hotelkeepers in the country, etc.

All taxpayers whose total annual turnover exceeds MKD 1 million or whose total supplies, as projected at the beginning of the business activity, will exceed this amount, are liable to register for VAT purposes. Prior to 1 January 2015, the minimal threshold for mandatory VAT registration was MKD 2 million.

Residents that do not meet the criteria above may voluntarily register for VAT purposes at the beginning of each calendar year.

The standard VAT period is one calendar month. However, if the total turnover in the previous calendar year did not exceed MKD 25 million, the tax period is the calendar quarter. Under the recent amendments applicable as of July 2014, the VAT period for voluntary VAT registered taxpayers has changed from calendar year to calendar quarter.

A taxpayer is obligated to submit a VAT return for each tax period within 25 days following the end of the relevant tax period.

Customs duties

Customs duties generally apply to most products imported into Macedonia. The customs rates under the most favoured nation treatment for agricultural products are up to 31%, whereas the customs rates for industrial products are below 23%.

Macedonia has signed trade agreements with Turkey, Ukraine, and European Free Trade Association (EFTA) member states. The country is a member state to the Central European Free Trade Agreement (CEFTA) and has signed a Stabilisation and Association Agreement with the European Community.

The import of industrial products with preferential origin and certain raw precious metals is exempt from customs duties.

According to the Stabilisation and Association Agreement 2001 between Macedonia and the European Union, products with Macedonian origin can generally be exported into EU countries free of customs duties.
**Excise duties**

Excise duties are levied with respect to a limited number of goods produced or imported in Macedonia. Petroleum products, alcohol and alcoholic beverages, tobacco products, and passenger motor vehicles are subject to an excise duty at a flat or percentage rate. The excise period is one calendar month, and excise duty is payable within 15 days as of the end of the calendar month. The excise duty for alcohol beverages and tobacco goods is levied by way of purchasing excise stamps.

The amount of excise duty for petroleum products depends on the type of petroleum product and is payable per kilo/litre.

Alcohol and alcoholic beverages are taxable per litre/percentage of alcohol. Some categories of alcoholic beverages (e.g. wine) are subject to no excise duty. Maximum excise duty payable is up to MKD 340 per litre on pure alcohol.

The excise duty for tobacco products is combined and is calculated both per unit/kilo and as a percentage from the retail price as follows:

- MKD 21.37 per cigar and 0% from its retail price.
- MKD 1.503 per cigarette and 9% from its retail price. If the combined excise is under the amount of MKD 1.553 per piece, the minimum excise will be applied in that amount.
- MKD 1,550 per kilo smoking tobacco and 0% from its retail price.

As of July 2014 up to July 2023, the rate of the specific and minimum excise duty on cigars will increase gradually every year.

The excise duty for passenger motor vehicles is calculated as a percentage of the market value or the custom value of the vehicle. It ranges from 0% for vehicles valued up to 3,000 euros (EUR) to 18% for vehicles valued above EUR 30,000.

**Property tax**

Property tax is paid annually on the ownership of real estate, including land (agricultural, construction, forest, and pastures) and buildings (residential buildings or flats, business buildings and business premises, administrative buildings and administrative premises, buildings and flats for rest and recreation, and other construction facilities, as well as installations constructed on the buildings or below and permanently attached to the buildings).

The person liable for property tax is the legal entity or the individual owner of the property. If the owner is not known or cannot be reached, the person liable for property tax is the user of the property. A property taxpayer may also be the taxpayer who usufructs the property; and, if the property is owned by several persons, each of them is a property taxpayer proportionately for the portion owned. A property taxpayer is also the legal entity who uses real estate owned by the state and the municipality.

The property tax base is the market value of the real estate. The market value of the real estate is determined in accordance with the methodology prescribed by the government.

Property tax rates are proportional and range from 0.10% to 0.20%. The rates may be determined on the basis of the type of the property. As an exception, property tax rates on agricultural land not used for agricultural production may be increased outside the above range (i.e. from three to five times in relation to the basic rates).

The amount of the rates is decided by the Municipal Councils.
Macedonia

**Transfer tax**
The transfer of the right to ownership of real estate for or without compensation, as well as other means of acquiring real estate for or without compensation, between legal entities or natural persons is subject to transfer tax.

The person liable for transfer tax is the seller of the real estate. As an exception, a taxpayer may also be the buyer of the real estate if agreed in the sale and purchase agreement. When replacing real estate, the taxpayer is the party that replaces the real estate of greater value.

When selling real estate in bankruptcy and executive procedure, as well as when realising agreements on mortgage, the taxpayer may be the buyer of the real estate.

In the case of transfer of ownership of an ideal share in real estate, taxpayers are each of the owners separately.

The tax base is the market value of the real estate at the moment the tax liability arises.

When replacing real estate, the tax base is the difference between the market values of the real estate being replaced.

When selling real estate in bankruptcy and executive procedure, the tax base is the attained selling price.

The market value is determined by a special municipal commission in accordance to the methodology prescribed by the government.

Tax rates are proportional and range from 2% to 4%. The tax rates are determined by the municipal councils by way of decision.

There are certain exemptions from transfer taxes available for specifically determined cases (i.e. transfer of shares, sale of securities, the first sale of residential premises for the first five years from the end of their construction, etc.).

**Stamp taxes**
Stamp taxes are not payable in Macedonia.

**Social security contributions and payroll taxes**
Employers are obligated to calculate and withhold from employees’ gross salary and pay into the accounts of respective funds the compulsory social security contributions and personal income tax (PIT). The current level of the compulsory social security contributions is as follows:

- Pension and disability insurance: 18%.
- Health insurance: 7.3%.
- Employment insurance: 1.2%.
- Additional health insurance: 0.5%.

The legislation prescribes the minimum and the maximum base for calculation of the social security contributions.

The Public Revenue Office (PRO) is the authorised body to control the calculation and the payment of the compulsory social contributions and PIT on salaries. All employers send their calculations to the PRO that controls them and, if correct, issues a declaration of acceptance that is used by the banks to perform the payment of the social contribution, PIT, and net salaries.
Garbage collection fee
A garbage collection fee is payable for immovable property, depending on the type of property and on the surface area used. It is calculated on the basis of a tariff and is collected together with the bills for water usage.

Companies and individuals are liable for paying communal taxes for usage of certain rights and services (mainly for usage of the urban space in the municipalities, posting commercials, etc.).

Branch income
Branch offices are registered in the Trade Registry. Branches are subject to CIT in accordance with the general statutory provisions. The foreign parent company is fully liable for the obligations of its established branch office in Macedonia.

A foreign company that is entitled to carry out commercial activities pursuant to its national legislation may establish a commercial representative office in Macedonia. Representative offices are not legal entities and may not carry out any commercial activities. Representative offices are not subject to CIT.

Income determination
Capital gains, as well as income from dividends, interest, rent, and royalties are treated as ordinary income of the taxpayer and are included in its general taxable base in accordance with accounting rules and standards. Dividend income received from domestic taxpayers is excluded from the tax base under condition that such income was taxed at the level of the payer.

Inventory valuation
There are no provisions in the tax legislation regarding inventory valuation.

Deductions
The CIT Law exhaustively lists the expenses that are not recognised for CIT purposes and are part of the CIT base.

Hidden profit distribution
The following transactions with shareholders or their related parties are considered as hidden profit distribution subject to CIT:

• Sales of goods/services on terms below the market price.
• Purchase of goods/services on terms above the market price.
• Providing loans with an interest lower than the market one.
• Arrangements under which gains are realised by the shareholders or their related parties.

Unjustified shortages are also taxed as hidden profit distribution if not reimbursed from the salary of the authorised person.

Some of the transactions above may be regulated under the transfer pricing provisions in the CIT Law as well. It seems that the purpose of these provisions is to tax the non-fair transactions with shareholders and their related parties that do not fall under the ‘related-party’ definition as per the CIT Law.
Non-business-related expenses
Expenses that are not related to the business activity of the taxpayer are taxable.

Depreciation
Corporate taxpayers can apply depreciation methods and rates as well as perform impairment of their fixed assets under applicable accounting standards without any tax consequences.

Goodwill
There are no specific provisions in the tax legislation with regard to goodwill.

Start-up expenses
There are no specific provisions in the tax legislation with regard to start-up expenses.

Interest expenses
Interest paid on non-business related credits of the taxpayer, as well as interest on credits for purchase of passenger vehicles, furniture, carpets, works of art, and decorative objects, is a taxable expense. Interest on business-related credit is also taxable, provided it falls under the thin capitalisation or transfer pricing rules (see Thin capitalisation or Transfer pricing in the Group taxation section for more information).

Uncollected receivables from loans
Uncollected receivables arising from loans (or transactions that are considered loans in their economic substance) that are not repaid in the year of granting are considered as taxable expenses. On the other hand, taxpayers are allowed to reduce their tax base in the tax period when such receivable is partially or fully collected.

Impairment and write-off of receivables
Impairment of receivables is not taxable for banks, saving institutions, and insurance companies if impaired in accordance to the methods prescribed by law. As to other corporate taxpayers, impairment of receivables is a taxable expense if not based on an effective court decision or reported and confirmed as debts in liquidation or bankruptcy procedure.

Write-off of receivables is a taxable expense for all corporate taxpayers.

The taxpayers are entitled to a tax credit for the tax paid on collected impaired receivables in the year of collection.

Charitable contributions
Donations and sponsorships expenses are taxable if not pursuant to the manner, the conditions, and the procedure set forth in the Law on Donations and Sponsorships in Public Activities. If compliant with the law requirements as per above, donations are taxable if the annual amount borne by the taxpayer exceeds 5% of its overall revenue, whereas sponsorship expenses are taxable if above 3% of the overall revenue of the taxpayer.

Compensation expenses
Employees' related expenditures (e.g. organised transportation to/from work, organised food [cantina], business trip allowance, field allowance, family separation allowance, one-off severance payment, retirement allowance, annual holiday allowance, anniversary awards) are taxable if paid over the amount prescribed by law and collective agreement.

Voluntary pension insurance contributions are taxable if their annual amount per employee exceeds four average monthly gross salaries paid out in the previous calendar year.
The monthly allowances and expenses to the managing board members are tax-deductible, up to 50% of the average gross monthly salary paid out in the country in the previous year.

**Insurance expenses**

Personal insurance premiums paid for members of the management board and the employees (if not paid out of their salary) are taxable expenses. Only the collective insurance of the employees for work-related injuries is a non-taxable expense for corporate taxpayers.

**Entertainment expenses**

Expenses for gifts, business dinners, recreation, and entertainment are taxable, up to 90% of the annual amount borne by the taxpayer.

**Scrapping**

Expenses for scrapping exceeding the standards for the particular industry set forth in the rulebook on the standardised amounts of debris, scrap, waste, wreckage, and scattering of goods and specific products are taxable. Scrapping expenses caused by *vis major* or an uncontrollable event are not taxable.

**Fines, penalties, and taxes**

Fines and tax penalties, penalty interest on unpaid public duties, and expenses for enforced payments, as well as withholding tax (WHT) borne by the taxpayer on behalf of third parties, are taxable.

**Net operating losses**

The new CIT Law stipulates that the loss realised in the income statement for the year, adjusted for the amount of non-deductible expenses, can be carried forward against future profits for a maximum period of three years as of the year when the profit has been realised.

The financial loss can be carried forward only in cases where the accumulated losses have been offset by the taxpayer according to the provisions from the Macedonian Companies Law and if approval by the tax authorities has been obtained.

Loss carrybacks are not allowed under the Macedonian tax legislation.

**Payments to foreign affiliates**

There are no specific provisions in the tax legislation with regard to payments towards foreign affiliates.

**Group taxation**

There are no tax consolidation provisions in Macedonia.

**Transfer pricing**

The transfer pricing provisions cover not only the expenses but also the revenues resulting from related party transactions. If the taxpayer incurs expenses/realises revenues from transactions with related parties that are higher/lower than the market level, the difference between the market price and the transfer price shall be considered as a taxable expense or understated revenue. Consequently, this difference would be subject to CIT.

The cost plus method, in addition to the comparable uncontrolled price method, are applicable. No reference is made to other methods accepted by the Organisation for Economic Co-operation and Development (OECD).
Macedonia

The part of the interest paid on loans to related parties that exceeds or is below the interest payable between unrelated parties is considered taxable.

Penalty interest imposed between related parties shall be considered as a taxable expense.

Transfer pricing rules do not apply on expenses for interest under credits and penalty interest paid to related parties that are banks or financial institutions.

Upon request by the Macedonian tax authorities, companies should provide enough documentation as evidence that the transactions with related parties were in line with the ‘arm’s-length principle’.

**Thin capitalisation**
A proportional part of the interest related to a loan received from a non-resident shareholder, who directly holds at least 25% of the capital in the company, that exceeds three times its share in the equity in the company will be taxable during a tax period. Thin capitalisation rules do not apply to loans received from banks or other financial organisations. Also, thin capitalisation rules do not apply for newly established companies within the first three years of operation.

**Controlled foreign companies (CFCs)**
There are no CFC rules in Macedonia.

---

**Tax credits and incentives**

**Foreign tax credit**
The taxpayer is allowed a tax credit for the tax paid on foreign income abroad, up to the amount of tax payable for that income in Macedonia. However, a tax credit for the WHT paid abroad is allowed only if a double tax treaty (DTT) is in place.

**Reinvested profit**
The new CIT Law introduces a possibility for decreasing the tax base for the year for the amount of profit reinvested for development purposes of the local taxpayer. The amounts from the reinvested profit that would be recognised for the purposes of the above tax relief cover investments both in tangible and intangible assets, except for some explicitly listed types of assets intended for administrative purposes.

In order to be able to utilise the above tax relief, the taxpayers must maintain ownership over the assets purchased with the reinvested profit for a period of five years as of the day of their purchase.

**Technological industrial development zones**
A taxpayer that is a registered user within a technological industrial development zone is exempt from CIT payment for a period of ten years from the commencement of the performance of the activity in the zone under terms and conditions and according to a procedure determined with the Law on Technological Industrial Development Zones.

---

**Withholding taxes**
All domestic legal entities and domestic physical persons that are registered for carrying out an activity, as well as foreign legal entities or physical persons that are non-residents but have a PE in Macedonia, are obligated to withhold tax when paying certain types of income to a foreign legal person and to pay the tax withheld to a respective suspense account simultaneously with the payment of the income.
The WHT rate is 10% and is applied on the following forms of incomes payable abroad:

- Dividends.
- Interest.
- Royalties.
- Income from entertainment or sporting activities in Macedonia.
- Income from management, consulting, financial services, or services related to research and development.
- Income from insurance or reinsurance premiums.
- Income from telecommunications services between Macedonia and a foreign country.
- Income from the lease of immovable property in Macedonia.

As an exception, WHT is not applicable to the following forms of income:

- The after-tax profit of a PE transferred to its foreign headquarters.
- Interest from bonds issued or guaranteed by the government.
- Interest on deposits in banks located in Macedonia.
- Income from transactions in state securities on the international financial markets.

If a DTT is in place, WHT shall be payable in accordance with the provisions from the DTT. Taxpayers are obligated to obtain approval from the Macedonian tax authorities prior to applying the tax rates from the DTT.

Macedonia has signed DTTs with the 45 countries listed in the chart below:

**Notes**

1. The lower rate applies to dividends paid out to a foreign company that controls at least 10% of the share capital of the payer of the dividends.
2. The lower rate applies to dividends paid out to a foreign company that controls at least 25% of the share capital of the payer of the dividends.
3. The zero rate applies to dividends paid out to pension funds.
4. These DTTS are still not in force.
5. The DTT with Federal Republic of Yugoslavia now applies both to Serbia and Montenegro.
6. The zero rate applies to dividends paid out to recognised pension funds and to foreign companies that continuously control at least 25% of the share capital of the payer of the dividends for 12 months before the dividends payment. The 5% rate applies to dividends paid out to foreign company that controls at least 10% of the share capital of the payer of the dividends. The 10% rate applies to dividends paid out in all other cases.
7. The tax rate of 10% for royalties payments applies only for utilisation or right to utilise cinematographic films and films or tapes for radio and television transmission. The 5% rate applies on all other cases.
8. The DTT concluded between the Socialist Federal Republic of Yugoslavia (SFRY) and Belgium is still applicable for Macedonia.
9. The zero rate applies to dividends paid out to pension schemes and to foreign companies that continuously control at least 25% of the share capital of the payer of the dividends for 12 months before the dividends payment. The 5% rate applies to dividends paid out to foreign company that controls at least 10% of the share capital of the payer of the dividends. The 15% rate applies to dividends paid out in all other cases.
10. The zero rate applies on interest paid on loans or prolonged credit paid from one enterprise to another enterprise and, on interest paid to the other contracting state, to one of its political divisions or municipalities or public entities of that state.
11. The zero rate applies in case the beneficial owner of the interest is the government, political or municipality subdivision; the Indian Reserve Bank, the Indian Export-Import Bank, and National Housing Bank; or any other institution based on additional agreement via exchange of letters by the authorised institutions.
12. The 10% rate applies on gross income from royalty or income from technical services (compensation for managerial, technical, and consulting services, income from services of technical and consulting personnel that is different from the income derived under article 14 and article 15 of the DTT).
13. The zero rate does not apply to income from lottery, races and horse races, card games, and other games of chance.
14. The 5% of the gross amount of dividends applies if the beneficial owner directly holds at least 70% of the share capital of the company paying the dividend. 10% applies if the beneficial owner directly holds at least 25% but less than 70% of the share capital of the company paying the dividend. 15% applies in all other cases.
Tax administration

Taxable period
The taxable period for which CIT is determined covers one calendar year.

Tax returns
Taxpayers are obligated to calculate and pay CIT on the basis of a CIT return, which must be submitted to the Public Revenue Office by the end of February of the following year or, if filed electronically, by 15 March of the following year.

Taxpayers who distribute profit arising from FY 2009 to FY 2013 are obligated to calculate and pay CIT on the basis of a tax return on profit distribution, which should be submitted to the tax authorities up to the date of profit distribution.

Small taxpayers who fall under the simplified tax regime are obligated to calculate and pay the tax due on the basis of a tax return on overall income, which should be submitted to the tax authorities by the end of February of the following year or, if filed electronically, by 15 March of the following year.

Payment of tax
Corporate taxpayers are obligated to pay monthly CIT advance payments during the year within 15 days of the end of each month.

Monthly CIT advance payments are calculated as one-twelfth of the CIT obligation for the previous calendar year, increased by the index of cumulative retail price growth as determined by the State Statistical Bureau.

The difference between the advance payments and the final CIT liability as determined in the CIT return should be paid within 30 days as of the deadline for submission of the CIT return. Daily penalty interest of 0.03% is due on late tax payments.

In case the sum of monthly advance payments exceeds the final tax liability in the CIT return, the taxpayer may request for a refund of overpaid tax. The tax should be refunded within 60 days as of the date of submitting the request. If the taxpayer does not ask for a tax refund, the overpaid amounts will be considered as advance payment for the following period.

Tax audit process
The tax audit may include one or more taxes, one or more fiscal periods, or only certain tax issues. The extent of the tax audit is determined solely by the tax authorities and is based on their estimation of risk in respect of the specific taxpayer. VAT audits are commonly conducted when VAT refund is requested by the taxpayer, and, in this case, the tax audit is usually limited in the area of VAT. The advance notice for tax audit for big taxpayers and concerns is four weeks, whereas the advance notice for all other taxpayers is two weeks. In cases where the tax authorities find that it would represent an obstacle for the tax audit, an advanced notice will not be given to the taxpayer.

Statute of limitations
The statute of limitations is five years as of the end of the calendar year in which the tax event occurred. In case of tax evasion, the statute of limitations is ten years as of the end of the calendar year in which the tax event occurred.

Topics of focus for tax authorities
There are currently no topics of particular focus for the tax authorities.
Macedonia

Other issues

Choice of business entity
The Macedonian Trade Companies Law provides for the following types of entities:

- General partnerships.
- Limited partnerships.
- Limited liability companies.
- Joint stock companies.
- Limited partnerships by shares.
- Foreign business entities may register a branch office or a representative office in Macedonia.
**Significant developments**

**Taxation of residents**
New entities carrying on industrial, artisan, agricultural, mining, transportation, tourism, or hotel activities are exempt from payment of corporate income tax (CIT) and the minimum tax during the first two years of activities.

**Registration fees**
Registration fee rates are now 0.5% to 5% (instead of 0.5% to 6%), depending on the nature of the transaction. The rate of 5% is applicable mainly on transfers of assets (4% before) and transfers of business (6% before).

**Group taxation**
For entities subject to the actual tax regime, a parent-subsidiary regime option is established by which the net dividends received by the parent company from its subsidiary are excluded from the tax base of the parent company. However, a non-deductible forfeit fee of 5% of the amount of dividends paid must be added back to the parent company tax base.

**Withholding tax (WHT) on purchase of local products from non-registered suppliers**
Purchases of goods and services from non-registered suppliers by a registered taxpayer are subject to WHT at a rate of 5% payable to the tax authorities within 15 days following the month of payment of the suppliers.

**Value-added tax (VAT)**
Any suppliers not registered as VAT vendors engaged in a public market transaction are subject to VAT at a rate of 8%, which is representative of income tax. VAT is withheld by the public treasury and paid directly to the tax authorities.

**Taxes on corporate income**

**Taxation of residents**
Resident corporate entities are subject to CIT based on realised worldwide income.

A corporate entity having an annual turnover of less than 20 million Malagasy ariary (MGA) is subject to CIT at a rate of 5% of 70% of turnover, with a minimum tax of MGA 16,000.

A corporate entity registered in Madagascar and having an annual turnover exceeding MGA 20 million is subject to CIT at a rate of 20%.

The tax payable cannot be less than 5/1,000 of turnover plus a fixed amount of MGA 100,000 for taxable persons carrying on agricultural, artisan, transportation, industrial,
hotel, or mining activities. The minimum tax cannot be less than 5/1,000 of turnover plus MGA 320,000 for other activities.

New entities carrying on industrial, artisan, agricultural, mining, transportation, tourism, or hotel activities are exempt from payment of CIT and the minimum tax during the first two years of activities.

**Taxation of non-residents**

Only Madagascar-source income is taxable for non-residents.

Revenue of foreign businesses that do not have a permanent establishment (PE) in Madagascar is subject to WHT at a rate of 10% of any income realised in Madagascar.

**Local income taxes**

No other local income taxes are applicable in Madagascar.

---

**Corporate residence**

Companies are considered resident in Madagascar if they are registered in Madagascar or have a legal existence in Madagascar.

**Permanent establishment (PE)**

While there is no definition of PE in the Madagascar tax law, companies usually are required to have a legal existence when they carry out business in Madagascar or have revenue from ownership of assets in Madagascar.

---

**Other taxes**

**Value-added tax (VAT)**

The VAT rate is 20%, and the VAT rate on export is 0%. VAT input is recoverable under certain conditions.

VAT is applicable to all transactions realised in Madagascar by a VAT vendor. Services are considered to be performed in Madagascar if such services are used in Madagascar or invoiced to a taxpayer established in Madagascar.

Business engaged in e-commerce is subject to VAT.

Transport companies are allowed to claim VAT input on gasoline used for land transportation. The objective is to reduce the impact of cost of oil and gas on transportation fees.

Any corporate entity or individual person who realises an annual turnover exceeding MGA 200 million is a VAT vendor. For a business realising annual revenue less than MGA 200 million, VAT vendor registration is an option.

A foreign company that has no PE in Madagascar but renders services to a Madagascar taxpayer must appoint a tax representative to collect and pay VAT on its behalf. Otherwise, the beneficiary of the services must collect and pay VAT on behalf of the foreign supplier.

All transactions made by a VAT vendor with a non-VAT vendor must be done via the banking system when the value of the transaction exceeds a threshold fixed by Decree.
Any suppliers not registered as VAT vendors engaged in public market transactions are subject to VAT at a rate of 8%, which is representative of income tax. VAT is withheld by the public treasury and paid directly to the tax authorities.

**Customs and import tax**
The importation of goods is subject to payment of customs and import tax payable to the customs office.

In addition, Gasynet fee, corresponding to 0.5% of the cost, insurance, and freight (CIF) value of goods, is applicable on importation of goods.

**Excise duty**
Excise duty applies on a range of goods and services, such as tobacco, alcohol, lighters, and communication by mobile phones. Excise duty rate ranges from 7% to 325% or a fixed amount per litre or per unit.

**Real estate ownership tax**
Real estate ownership tax is imposed annually at the rate of 5% to 10% on the rental value of the property. Land ownership is also taxable at a rate depending on the nature of the land.

**Registration fees**
Registration fees are applicable to transfers of title ownership (e.g. sales, donations) of movable and immovable assets, to transfers of interests, to share capital increases, and to lease agreements.

Registration fee rates are 0.5% to 5%, depending on the nature of the transaction. The rate of 5% is applicable mainly on transfers of assets and transfers of business.

**Payroll tax**
Salary income taxes, called *Impôt sur les Revenus Salariaux et Assimilés* (IRSA), are levied at a rate of 20% on the total taxable remuneration of employees, including salaries, allowances, and benefits in kind. Employers are responsible for withholding and paying salary income taxes on behalf of employees.

**Social security contributions**
Employers must contribute to *Caisse Nationale de Prévoyance Sociale*, Madagascar’s national social security fund, which includes pensions and accident insurance. The contribution is capped at 13% of eight times the legal minimum salary per employee.

**Health contributions**
Employers must contribute to the health system assessment at a rate of 5% of the total amount of taxable remuneration of its employees. The contribution may or may not be capped at 5% of eight times the legal minimum salary per employee, depending on the health system organisation where the company is affiliated.

**Tax on insurance contracts**
All insurance or life annuity conventions concluded with a company, insurance firm, or with any other Madagascan or other insurer are subject to an annual tax on insurance contracts at a rate of 3% to 20% levied on the insurance premiums.

**Branch income**
The tax on branch income is the same as for corporate income. The branch income tax base is the income realised by the branch in Madagascar.
Madagascar

**Income determination**

**Inventory valuation**
There are no provisions for valuing inventories or determining inventory flows in Madagascar. The tax treatment will follow the accounting treatment.

**Capital gains**
There is no provision for capital gains in Madagascar, except for capital gains on the sale of real estate by an individual. Capital gains made by a company on the sale of assets and interests are considered as normal business income that is subject to CIT.

**Dividend income**
Dividends received by a company are considered as business income subject to CIT.

Certain dividends from a subsidiary may be excluded from CIT (see Dividends exclusion in the Group taxation section).

**Stock dividends**
Stock dividends are unusual, but they are considered as business income that is subject to CIT.

**Interest income**
Interest income received by a resident taxpayer from another entity established in Madagascar is subject to WHT at a rate of 20%. Revenue already subject to WHT is no longer taxable to CIT.

**Foreign income**
Foreign income earned by corporate bodies situated in Madagascar is considered as normal business income subject to CIT unless a tax treaty is established and indicates otherwise. There is no provision for tax deferral in Madagascar.

**Deductions**

**Depreciation**
The amount of deductible depreciation should not exceed the amount that is calculated according to the following rates of depreciation provided by the law:

<table>
<thead>
<tr>
<th>Asset</th>
<th>Depreciation rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Industrial buildings</td>
<td>5</td>
</tr>
<tr>
<td>Plant and machinery</td>
<td>10</td>
</tr>
<tr>
<td>Mining exploration and development (licence)</td>
<td>33</td>
</tr>
<tr>
<td>Transportation (car)</td>
<td>20</td>
</tr>
<tr>
<td>Transportation (utility cars, vans, trucks)</td>
<td>25</td>
</tr>
<tr>
<td>Computers</td>
<td>25</td>
</tr>
<tr>
<td>Electricity generators</td>
<td>10</td>
</tr>
</tbody>
</table>

With the exception of buildings, it is also possible to practise a graduated depreciation. In this case, the annual depreciation corresponds to 30% of the net book value of the asset.

In case of loss, depreciation of assets can be deferred and carried forward to the next financial years until absorption.

**Goodwill**
There is no provision concerning deductibility of goodwill in the Madagascar tax code.
**Start-up expenses**
There is no specific tax provision on start-up expenses. Accounting rules are applicable for the profit and loss recognition.

Start-up and prospecting expenses for the installation of an overseas establishment, as well as the costs of running such a foreign establishment, for the first three years are tax deductible. However, the amounts deducted must be reported, in equal amounts, to the taxable income of the five consecutive years from the fifth year following the creation of the foreign establishment.

**Interest expenses**
Interest expenses are deductible. However, interests on inter-company loans are subject to thin capitalisation rules (see [Thin capitalisation in the Group taxation section for more information](#)). In addition, interest on inter-company loans is not deductible if the loan agreement is not documented by a written agreement submitted according to registration procedures.

**Bad debt**
To be tax-deductible, provisions for doubtful debt must be subject to justification of existence of amicable or judicial settlement.

**Charitable contributions**
Payments made for the benefit of educational, social, or cultural recognised public associations; accredited bodies for scientific research; or for the promotion and creation of businesses for achievement of planned economic and social development are deductible within the limits of 0.5% of annual turnover.

Gifts in kind or in cash granted in case of natural calamities and donations in cash granted to a corporation established by decree for the interest of the nation are also deductible.

Any other charitable contributions are not deductible.

**Deductible wages**
Salaries and wages that are not included in salary income taxes or not declared to [Caisse Nationale de Prévoyance Sociale](#) are not deductible.

**Fines and penalties**
Fines and penalties are not deductible for CIT purposes.

**Taxes**
Except for CIT, taxes in relation to business in Madagascar are deductible.

Third-party taxes borne by the company are not tax-deductible.

**Net operating losses**
Accumulated loss can be carried forward for the next five financial years following the period in which the loss occurs. Carryback of losses is not permitted in Madagascar.

**Payments to foreign affiliates**
For branches, the deductible amount of overhead that the head office can charge to the branch is limited to 1% of the turnover of the branch.

For interest on inter-company loans, only interest calculated on twice the amount of the share capital, at a rate practised by the Central Bank plus two points, is deductible.
Madagascar

**Payments to foreign companies established in a country having a very favourable fiscal regime**
Payments made to a foreign company established in a country having a very favourable fiscal regime are not tax deductible unless there is proof of effectiveness of the services and reasonability of the amount.

---

**Group taxation**
There is no provision regarding group taxation in Madagascar, except for the following:

For entities subject to the actual tax regime, a parent-subsidiary regime option is established by which the net dividends received by the parent company from its subsidiary are excluded from the tax base of the parent company. However, a share of fees and expenses, uniformly fixed at 5% of the amount of dividends paid, must be reintroduced in the tax base.

**Transfer pricing**
There is a provision in the tax law allowing the tax authority to claim a tax adjustment in cases where the transactions between a Madagascar entity and a foreign entity controlling or controlled by the Madagascar entity are not concluded at fair market value.

The following transfer pricing methodologies are acceptable:

- Methods of comparable prices on the free market.
- Resale price method.
- Cost plus method.
- Transactional method on net margin.
- Transactional method on profit split.

Effectiveness of services and fair market value must be justified by appropriate documentation.

**Thin capitalisation**
Under Malagasy tax law, deductible inter-company financial interest cannot exceed the interest calculated on twice the share capital at the rate of the Central Bank of Madagascar plus two points (the rate of the Central Bank of Madagascar is 9.5%).

Inter-company loan agreements must be submitted according to registration formalities within two months from the execution date. Failure of submission of an inter-company loan agreement according to registration formalities implies non-deductibility of interest on the inter-company loan.

**Dividends exclusion**
Dividends received by a shareholder holding more than 75% share capital from its subsidiary are excluded from business revenue subject to income tax.

**Controlled foreign companies (CFCs)**
There is no special provision in relation to CFCs in Madagascar.

---

**Tax credits and incentives**
The following activities benefit from a special tax and/or customs regime:
Microfinance activity
Microfinance benefits are available for entities specialising in lending money on the basis of small or medium scale value. Entities duly licensed to practise microfinance activities are exempt from CIT during the first five years. After this period, the microfinance company is subject to CIT at a rate of 20%.

Free zone (free trade zone)
Free-zone law is available for industrial and other service providers that export all of their products. If eligible under the free-zone law, a CIT exemption is provided during the first two to five years and a reduced CIT of 10% is levied thereafter. Exemption from customs duties on importation is also provided.

Companies investing in renewable energy, tourism, industrial, civil work and construction, and transformation
Companies investing in renewable energy, tourism, industrial, civil work and construction, and transformation can benefit from a tax reduction equal to the tax calculated on 50% of the amount of investment that they realised during the related tax year. The right to reduction that can be used for the tax year cannot exceed 50% of tax actually due. The balance is carried forward with the same limitation to subsequent years, until clearance.

Big investment mining
A mining company committing to invest more than 50 million United States dollars (USD) is considered a big investment mining company. The big investment mining law provides a minimum income tax exemption, a reduced CIT rate for the transformation entity (i.e. the entity in charge of processing the extracted minerals), exemption from custom and importation duties, and VAT reimbursement on locally purchased equipment and investments.

Petroleum code
The petroleum code provides a custom and importation duties exemption for hydrocarbon research, exploration, and exploitation activities.

Leasing law
The leasing law provides that leasing activities can benefit from CIT exemption and reduction of tax rate during the first four years.

Foreign tax credit
Except under a tax treaty, there is no foreign tax credit rule under Malagasy tax law.

Withholding taxes
WHTs are levied as follows:

- Purchases of goods and services from non-registered suppliers by a registered supplier are subject to WHT at a rate of 5% payable to the tax authorities within 15 days following the month of payment of the supplier.
- Impôt sur les revenus des capitaux mobiliers (IRCM): WHT on interest of 20% is applicable on financial loan interest. However, interest paid to banks, financial institution, and foreign financial organisation is exempt.
- WHT of 20% is applicable on remuneration of a member of a board of directors or a single director.
- Income tax for non-resident entity: Management fees, royalties, technical and assistance fees, licence fees, equipment rental fees, and any income realised by foreign suppliers is subject to WHT at a rate of 10%.

Madagascar has signed two tax treaties.
**Tax administration**

**Taxable period**
The financial year may be spread over any period of 12 months. There is no need to obtain prior authorisation in order to close the financial year on a date other than 31 December or 30 June.

**Tax returns**
CIT returns are due before 15 May each year for companies whose financial year ends at 31 December, before 15 November each year for companies whose financial year ends at 30 June, and no later than the 15th day of the fourth month from the date of closing of the financial year for all other year-ends.

**Payment of tax**
CIT is payable bimonthly in provisional instalments. The balance is payable before 15 May each year for companies whose financial year ends at 31 December, before 15 November each year for companies whose financial year ends at 30 June, and within four months from the date of closing of the financial year for all other year-ends.

Taxpayers can decide to suspend the payment of bimonthly income tax instalments, but they must pay a penalty of 80% if the final tax due is more than the previous year’s income tax.

WHT on foreign services is payable to the tax authorities within one month of the date of payment.

WHT on interest and on payments to members of boards of directors are payable before 15 May each year for companies whose financial year ends at 31 December, before 15 November each year for companies whose financial year ends at 30 June, and no later than the 15th day of the fourth month from the date of closing of the financial year for all other year-ends.

**Tax audit process**
The tax authority carries out audits of a selection of tax returns, usually at the taxpayer’s place of business. Audits may be carried out at any time prior to the expiration of the statute of limitations.

During tax audit, tax authorities can access all the taxpayer data available on servers, terminals, and any supporting systems.

After examination of available information, the tax authority issues a notice of assessment, and the taxpayer has 30 days after the date of reception of the notice of assessment to answer and submit its written objection to the tax authority. If the tax authority confirms its assessment, the taxpayer has two options:

i. 15 days from the confirmation of assessment, the taxpayer may request the opinion of the Tax Administrative Appeal Commission (CFRA). 30 days from the CFRA opinion, the Director of Tax Audit issues the final decision. The decision of that body may be further appealed to the Court (State Council) within 30 days.

---

</tbody>
</table>
ii. 30 days from the confirmation of assessment, the taxpayer may file a claim to the tax authorities. The Director of Tax will issue the final decision. Ultimately, decisions of the Director of Tax may be further appealed to the Court (State Council) within 30 days.

**Statute of limitations**
The tax limitation period is three years.

**Topics of focus for tax authorities**
Areas where tax authorities usually claim adjustment are:

- VAT reverse on foreign services.
- Completeness of VAT output on revenue.
- Sales without invoices.
- Expenses without invoices.
- Employees' remuneration not subject to salary tax.
- Payment to non-registered suppliers.

Significant developments

Effective 1 October 2014, the income tax rate applicable to mobile telecommunication companies was reduced from 33% to 30%.

Taxes on corporate income

Malawi does not have separate legislation for the determination of taxable income of different types of legal persons. Taxation of all income is included in the Taxation Act.

Section 11 of the Taxation Act defines income as the total amount in cash or otherwise, including any capital gain, received by or accrued to a person in any year or period of assessment from a source within or deemed to be within Malawi. The taxpayer’s assessable income excludes any amount exempt from tax under this act.

Income deemed to arise in Malawi

The liability for Malawi tax is based on whether the income is sourced from Malawi, irrespective of the residence of the recipient of such income. Certain transactions may be deemed to be from a source within Malawi even if carried out outside Malawi. Section 27 of the Taxation Act limits the income that may be deemed to have arisen in Malawi to the following:

- Remuneration for services rendered or work performed in Malawi.
- Remuneration for services rendered or work performed in or out of Malawi where the amount may be claimed as a tax-deductible expense by a permanent establishment (PE) in Malawi.
- Amounts incurred, claimed, or claimable in connection with a PE in Malawi.
- Realised exchange gains and losses arising in connection with a PE in Malawi or foreign exchange assets and liabilities held in Malawi.
- Capital gains and losses realised with respect to tangible property located in Malawi and interests in companies incorporated in Malawi.

Notes

1. In the case of a mining company, an additional resource rent tax of 10% is levied on profits after tax if the company’s rate of return exceeds 20%. The basis for calculating rate of return has not been defined.
2. Agricultural produce processing has been designated as a priority industry.

**Non-resident tax**

Non-resident tax is payable on income due to a non-resident at the rate of 15% of the gross income.

Any income payable to a person who is not resident in Malawi (i.e. who has not been in Malawi for an aggregate period of 183 days) arising from a source within Malawi is liable to a final WHT of 15% of the gross of such income. Non-resident tax is applicable where the recipient of the income does not have a PE in Malawi from which the income emanated.

Non-resident tax may not be withheld on income of residents of countries that have a standing double tax agreement (DTA) with Malawi, subject to the provisions of the specific DTAs. For details of applicable WHT rates, see the Withholding taxes section.

Currently, the following countries have a DTA with Malawi: Denmark, France, Norway, South Africa, Sweden, Switzerland, and the United Kingdom.

**Local income taxes**

There are no local income taxes in Malawi.

**Corporate residence**

A corporate entity is considered a resident for tax purposes in Malawi if it has a PE in Malawi.

**Permanent establishment (PE)**

The Taxation Act defines a PE as ‘an office or other fixed place of business through which business activity is carried on’. This short definition is wide in scope. Care must be exercised when considering this definition in situations that may be affected by a DTA. Each DTA contains a specific and far more detailed definition of what constitutes a PE.

**Other taxes**

**Value-added tax (VAT)**

VAT is applicable on taxable goods and services. There are three classes of supplies for VAT: taxable supplies (at the rate of 16.5%), zero-rated supplies, and exempt supplies.

A taxable person can claim input VAT on inputs used in making taxable supplies.

A taxable person should complete VAT returns and make VAT payment, where applicable, on a monthly basis within 25 days after the end of the month.

Zero-rated supplies include exercise books, fertilisers, motor vehicles for the transport of goods, and salt.

The following supplies are tax exempt: machinery, financial services, bread, and newspapers.

**Customs duties**

Customs duty is applicable on goods imported into Malawi. The basis for calculating duty is cost, insurance, and freight (CIF). There are three types of import duties: customs
duty, import excise, and import VAT. The rate of custom duty varies from product to product.

The following are the customs and excise measures that are effective in Malawi:

- Returning residents will have to clear, duty free, a motor vehicle owned for more than 12 months under CPC 430.
- Duty free on importation of diagnostic and laboratory reagent under CPC 405 by Health Institutions.
- Removal of VAT on imported goods on water supply.
- Removal of duty on imported electronic fiscal devices.
- Removal of taxes applicable on large buses with seating capacity of more than 45 passengers (including the driver).
- Reintroduction of the Industrial Rebate System. This is a major relief to the manufacturing sector; however, given the abuse of the scheme in the past and the Minister's intimation, it will be subject to serious monitoring by the Malawi Revenue Authority (MRA). Taxpayers will be required to register with the MRA.
- Other measures are in alignment with the Common Market for Eastern and South Africa (COMESA) and South African Development Community (SADC) tariff structures.

**Excise duties**
Domestic excise is chargeable on certain goods manufactured in Malawi and on certain services, such as alcoholic drinks, tobacco, and cell phone airtime. The rate of excise varies depending on the goods and services.

**Tobacco levy**
Buyers of tobacco must pay a levy of 0.2% for every kilogram of tobacco bought.

**Property taxes**
There are no property taxes in Malawi.

**Transfer taxes**
There are no transfer taxes in Malawi.

**Stamp duties**
Stamp duties apply on certain documentation.

**Turnover tax**
Turnover tax is applicable for businesses with a turnover between 2 million Malawian kwachas (MWK) and MWK 6 million. The turnover tax rate is 2% of turnover.

**Resource rent tax for miners**
Miners pay resource rent tax of 10% on after-tax profits if the rate of return exceeds 20%. Since introduction of this tax, there has not been clear administrative guidance on its applicability, like a formula for the determination of the tax.

**Payroll taxes**
Under pay-as-you-earn (PAYE) regulations, the employer is required to withhold tax from employees' salaries and remit to the tax authority on their behalf. There are penalties for non-compliance with the regulatory requirements.

**Social security contributions**
Under the National Pension Scheme (NPS), an employee contributes a minimum of 5% of the pensionable emoluments while the employer contributes at least 10% of the employee's pensionable emoluments. Contributions by the employer are tax deductible up to a maximum of 15% of the employee's pensionable emoluments while those made by the employee are not.
**Fringe benefits tax (FBT)**

A fringe benefit is defined as any asset, service, or other benefit in kind provided by or on behalf of an employer to an employee if such benefit includes an element of personal benefit to the employee. The employer providing such benefits is liable for payment of FBT. FBT is charged at the rate of 30% of the taxable figure.

Take note that a benefit need not be wholly for personal use in order to be considered for FBT.

Note as well that no benefit in cash, no matter what it is termed as, can be treated as a fringe benefit. All monies paid in cash (rather than in kind) should be considered for PAYE deduction.

However, subsistence allowances, given to employees working out of their duty station for instance, presumably to cater wholly, exclusively, and necessarily for their needs, such as accommodation, meals, transport, etc., ought not be taxed. This applies also for reimbursement of expenses incurred in business.

Every employer shall register for FBT within the month in which one begins to provide fringe benefits.

The sums due as FBT shall be remitted to the MRA in quarterly instalments not later than 14 days after the end of each quarter of a period of 12 months ending 30 June, and remittance should be accompanied with a duly completed FBT return in Form FBT 2.

Note that the value for FBT should not be included in the employee’s certificate of gross emoluments.

**Assessment of housing fringe benefits**

The taxable value of a housing fringe benefit is the greatest of (i) 10% of salary where the house is unfurnished, (ii) 12% of salary if furnished, or (iii) the rental value.

Where the house occupied by the employee is owned by the employer, the taxable value is reduced by 50%.

**Motor vehicles**

FBT is applicable on motor vehicles allocated for use by members of staff and does not include pool cars or cars that are strictly commercial in nature.

The taxable value is 15% of the original cost of the vehicle.

**School fees (for children/dependants)**

50% of the cost to the employer for school fees is a taxable benefit, where payment is made directly to the educational institution. Education allowances payable to employees are not subject to FBT as the allowance is considered part of normal salary and taxable as such.

**Utilities, household items, vacations, travel, and domestic services**

The taxable value of utilities (e.g. electricity, water, and telephone expenses), household items, vacations, travel, and domestic services (e.g. gardener, cook, house boy, guard, nanny) is the entire cost to the employer. Except that for a house owned by the employer, the cost of a gardener, security guard, and watchman shall not constitute a taxable benefit.

**Interest free loans and loans given at interest lower than the commercial rate**

Where an employer gives a loan to an employee that is interest free or bears interest that is lower than the predetermined commercial rate, the difference between the interest offered and the commercial rate is a taxable benefit.
Malawi

**Branch income**

There is a 35% tax on taxable income of a branch of a foreign company, except for cell phone operators, who pay tax at the rate of 38%. Locally incorporated companies pay tax at the rate of 30%, except for cell phone operators, who pay tax at the rate of 33%.

No dividend WHT is applicable on repatriation of profits.

**Income determination**

**Inventory valuation**

Inventory is stated at cost or net realisable value (i.e. market price) for tax purposes. There is no specific requirement for the valuation of cost. The only legal emphasis is consistency in the application of the selected method. This means that one cannot change from one valuation method to another over different tax periods.

**Capital gains**

The tax basis for capital gains is the cost of the asset adjusted by the applicable consumer price index (inflation index). Once determined, the taxable gain is subject to corporate tax at the rate applicable to the particular entity.

Capital gains arising from the disposal of personal and domestic assets not used in connection with trade are exempt from corporate tax.

Capital gains arising from the sale of shares held for more than one year traded on the Malawi Stock Exchange are not taxable.

**Rollover relief**

If a business asset is sold and the taxpayer acquires a qualifying replacement asset, the taxpayer may claim rollover relief. This means that the taxpayer does not immediately pay the tax on the gain. Instead, the cost of the replacement asset is reduced by the amount of the gain. The taxpayer must declare this in the tax return.

A qualifying replacement asset is an asset similar to, or related in service or use to, the asset disposed of. The replacement asset must be acquired within 18 months of the disposal giving rise to the gain.

**Dividend income**

Dividend income is exempt from corporate tax; however, dividends received from Malawi sources are subject to a 10% dividend WHT, which is a final tax. Note that although the word ‘final’ has not been defined, it is applied as meaning that dividend WHT suffered may not be offset against an income tax liability.

**Interest income**

Interest is added to the other income categories and taxed at a rate applicable to the person that earns the income. There is a mandatory WHT on interest earned from financial institutions unless the earner is exempted.

**Foreign exchange gains and losses**

Foreign exchange gains realised on foreign currency assets or liabilities are taxable.

Foreign exchange losses realised on foreign currency assets or liabilities are tax deductible.

Unrealised gains and losses are carried forward until realised and then included in income or allowable expenditures. The maintenance of records that accurately track
unrealised exchange rate adjustments from year to year is necessary to ensure correct tax computations.

**Tax-exempt income**
The following are common examples of other tax-exempt income:

- The income of agricultural, mining, and commercial institutions or societies not operating for private pecuniary profit or gain of the members.
- The income of clubs, societies, and associations formed, organised, and operated solely or principally for social welfare or civic improvement or other similar purpose, provided that the income of such bodies may not be divided among or used for the benefit of the members or shareholders.
- The income of ecclesiastical, charitable, and educational institutions of a public character.

**Foreign income**
Generally, income whose source is not Malawi is not taxable in Malawi.

---

**Deductions**

Taxable income is calculated by deducting allowable items from assessable income. Section 28 of the Taxation Act defines tax-allowable deductions as any expenditures and losses (not being of a capital nature) wholly, exclusively, and necessarily incurred by the taxpayer for the purpose of trade or in the production of income.

**Capital allowances**
Capital allowances (i.e. depreciation allowances) are applicable as stipulated in the Taxation Act at various rates.

Capital allowances, which are available to companies and individuals in business, are allowed as follows:

<table>
<thead>
<tr>
<th>Asset</th>
<th>Initial</th>
<th>Investment</th>
<th>Annual</th>
</tr>
</thead>
<tbody>
<tr>

</tbody>
</table>

**Notes**

1. The 100% investment allowance is available only on new and unused qualifying assets, as indicated above, belonging to and used by a manufacturer or farmer. The rate for used qualifying assets is 40%. The investment allowance is claimable only in the first year of use.
2. Where an investment allowance is claimed, the initial allowance is not allowed to be claimed on the same asset. The initial allowance is claimable only in the first year of use.
3. Annual allowances at the above rates are based on cost less investment and initial and annual allowances previously granted.
4. Investment allowance on plant and machinery excludes motor vehicles intended or adapted for use on roads.
5. A 20% annual allowance is standard, but the Commissioner General may vary the amount.
6. No initial allowance is granted on private motor vehicles. These include saloons, sedans, station wagons, and double cabin pickups. However, the restriction does not apply where the motor vehicle is used for hiring purposes.
7. The building must be newly constructed at a cost of no less than MWK 100 million.
Malawi

On disposal, assets are subject to balancing charges (capital gains) or balancing allowances.

If an asset is subject to extensive use, such as machinery working double shifts, so that its expected economic life is reduced, the Commissioner General may agree to increase the rates of annual allowances.

Lease, patent, trademark, and copyright premium
The tax-deductible amount of a premium paid for the right of use or occupation of land or buildings, plant or machinery, patent design, trademark, copyright, or any other property of a similar nature is one of the following:

• The amount of premium or consideration divided by the number of years for which the right of occupation or use is granted.
• Where the period for which the right of occupation or use is granted exceeds 25 years, the deduction is one-twenty-fifth of the premium or consideration.

The premium is tax deductible only where the asset or right with respect to which the premium or consideration is paid is used for the generation of income. If a taxpayer acquires ownership of the asset or right, no further deduction of the premium or consideration is allowed from the date ownership is acquired.

Goodwill
The legislation does not prescribe treatment for goodwill. It has been the practice that goodwill is not deductible for tax purposes.

Pre-operating expenditures
A manufacturer may claim as a deduction any expenditure incurred in the course of establishing the business, provided that the following are true:

• The expenditure was incurred not more than 18 months before commencing business.
• The expenditure would have been allowed as a deduction if it had been incurred after commencing business.

Interest expenses
Interest that arises out of financing operations is allowable, while interest due to late payment of a debt is not allowable.

Bad debt
Specific bad debts are tax deductible and taxable in the following year. Bad debts written off are allowable and taxable upon eventual recovery.

Charitable contributions
Donations to approved charities and approved non-profit institutions formed for the purpose of social welfare, civic improvement, educational development, or other similar purposes are deductible. The minimum individual donation allowable is MWK 500. The minimum donation for other approved charities is MWK 250. In both cases, there is no maximum donation.

Social contributions
50% of social contributions towards construction of hospitals and schools, and sponsorship of school sports activities, are tax deductible.

Research and development (R&D) expenditures
Research expenditures are fully allowable as a deduction if they are for ‘experiments and research relating to trade’.
**Malawi**

**Pension contributions**
The tax-allowable amount of ordinary pension contributions made by an employer to an approved pension fund is subject to limitations. The limit with respect to each employee is the lowest of one of the following *per annum*:

- The actual contribution.
- Up to 15% of employee’s annual salary.

**Fines and penalties**
Fines and penalties are not tax deductible in any way.

**Taxes**
Taxes are not allowed as deductible expenses, except where they are local taxes.

**Net operating losses**
Current taxable income may be offset against net operating losses brought forward, and current operating losses may be increased by net unexhausted trading losses brought forward. Manufacturers and taxpayers in the agricultural industry may carry losses forward indefinitely, while other taxpayers may carry losses forward for only six years. Net operating losses may not be carried back.

**Payments to foreign affiliates**
A deduction is allowed for payments to foreign affiliates if such payments are expended wholly, exclusively, and necessarily for the production of income or for the purposes of trade, and it can be demonstrated that the transaction is at arm’s length.

**Group taxation**
Group taxation is not permitted in Malawi.

**Transfer pricing**
There are transfer pricing regulations in Malawi. There is also a tax anti-avoidance provision that is used to check transactions between related parties. If transactions between related parties result in profits that are lower than what would be expected if the company was trading with an independent party, then the tax authorities can challenge the transaction.

**Thin capitalisation**
There are no thin capitalisation rules in Malawi.

There are no restrictions on the level of external borrowings. If a Malawi company wants to borrow money from a foreign entity (whether or not a bank), it will require exchange control approval. In such instances, Reserve Bank does not consider the debt-to-equity ratio. It looks at the terms and conditions to see that they are what would be commonly available on the open market between unrelated parties. As you can see, this is an anti-transfer pricing measure.

If a new application is made for exchange control approval of foreign ownership (normally this is when there is a new business/investment into Malawi), Reserve Bank will look at the external-debt-to-local-equity ratio. There are no fixed rules, but Reserve Bank does not normally like external debt to be more than twice equity (i.e. 1:2 equity to external debt). It does give approval for external ownership where the proportion of external debt is higher than this as it looks at each proposal on its own merit. The applicant would have to justify the higher level of external debt in such a case.

**Controlled foreign companies (CFCs)**
There is no CFC regime in Malawi.
Malawi

**Tax credits and incentives**

*Foreign tax credit*
Malawi does not have a provision for recognition of a foreign tax credit because the taxation regime is based on source.

*Export allowances*
Exporters, including those manufacturing in bond, are entitled to claim additional tax allowances for non-traditional exports:

- On the export of non-traditional products, there is a 25% tax allowance on taxable income derived from exports.
- There is a 25% transport tax allowance on international transport costs for non-traditional exports. Traditional exports are tea, coffee, cane sugar, and unmanufactured tobacco and tobacco refuse.

Export allowances may not be claimed in respect of exports from mining operations.

*Investment allowance*
There is a 100% investment allowance on new and unused industrial buildings, plant, and machinery for taxpayers in the manufacturing industry. A 40% investment allowance for used versions of the same items is also applicable.

*Farming operations*
Farming operations receive a 100% allowance with respect to expenditures incurred during any year of assessment on the following:

- Stumping, levelling, and clearing of land.
- Work in connection with the prevention of soil erosion.
- Boreholes.
- Wells.
- Aerial and geophysical surveys.
- Water control work, including any canal, channel, dyke, furrow, and any flood control structure, whether or not of a permanent nature.
- Water conservation work, meaning any reservoir, water dam, or embankment constructed for the impounding of water. In the case of water conservation work, the Taxation Act limits the amount deductible to amounts actually paid, where the farmer incurs a liability in terms of any law relating to natural resources.

Where a farmer derives taxable income from growing timber, the farmer may elect that the taxable income is determined in accordance with the following rules:

- Carryforward the cost of planting the timber until the timber reaches maturity.
- Add annually to the cost of planting the timber an amount calculated as 5% of the cost of planting the timber until the timber reaches maturity.
- When the timber is sold, a proportionate amount of the total of the carryforward cost and annual added cost is deducted from the proceeds.
- In each year of assessment, the annual added cost is treated as taxable income in the hands of the farmer.

A farmer may not deduct any expenditure that has been recovered through a subsidy or claim a capital allowance on any assets where the expenditure has been recovered through a subsidy.

*Mining operations*
Mining operations receive a 100% allowance with respect to mining expenditures incurred during any year of assessment. Mining expenditures are defined as capital...
expenditures incurred in Malawi by a person carrying on or about to carry on mining operations in Malawi:

- In searching for or in discovering and testing or in winning access to deposits of minerals.
- In the acquisition of or of rights in or over such deposits, other than the acquisition from a person who has carried on mining operations in relation to such deposits.
- In the provision of plant and machinery and industrial buildings that would have little or no value to such person if the mine ceased to work.
- On the construction of any buildings or works that would have little or no value if the mine ceased to be worked.
- On development, general administration, and management prior to the commencement of mining operations.

Persons engaged in mining operations are not entitled to claim the export tax allowance on non-traditional exports or the 15% transport tax allowance on international transport costs for non-traditional exports.

### Withholding taxes

**Dividend WHT**

Dividend WHT is a final tax and is charged at 10%. The dividend is not included in the taxpayer’s taxable income, and the WHT is not deducted from the taxpayer’s tax liability.

Malawi

Notes

1. See Non-resident tax in the Taxes on corporate income section.

WHT exemption
There is WHT exemption on local supplies for compliant resident taxpayers. A ‘compliant taxpayer’ is defined as one that has settled all their tax liabilities with the tax authorities, including customs and excise.

Tax administration

Taxable period
The taxable period for income tax is a 12-month period ending on 30 June of each year. For businesses whose year-end is 31 July and 31 August, the applicable tax year-end is the preceding 30 June, while all the years ending in the subsequent months have the following 30 June as a year-end.

Tax returns
Income tax returns are due within 180 days after the end of the financial year.

Payment of tax
Tax is payable in quarterly instalments within 25 days of the month following the end of the quarter, with the balance of the tax being paid upon submission of the return.

Penalties
A penalty for late submission of returns is MWK 200,000.

Tax audit process
The target for the tax authorities is to audit 30% of the taxpayers in any fiscal year. This translates to approximately three years per audit cycle.

Statute of limitations
There is no statute of limitations in Malawi, except for the mandatory seven-year period for keeping records.

Topics of focus for tax authorities
The tax authorities have recently focussed on transfer pricing and have consequently established a unit responsible for this. All multinationals are under scrutiny to check if they are dealing at arm's length with related entities.

Commissioner General’s power to increase taxable income
The Commissioner General is empowered to increase the taxable income and liability of a taxpayer when of the opinion that the main purpose or one of the main purposes of a transaction was the avoidance or reduction of tax or where the main benefit that might have been expected to accrue from a transaction was the avoidance or reduction of tax.
Significant developments

New incentives under 2015 Budget
On 6 April 2015, the Ministry of International Trade and Industry announced the details of four new incentives proposed under the 2015 Budget. They are:

- Incentives for less developed areas.
- Incentives for industrial area management.
- Capital allowance to increase automation in labour intensive industries.
- Incentives for establishment of a principal hub.

Please refer to the Tax credits and incentives section for details.

Taxes on corporate income

For both resident and non-resident companies, corporate income tax (CIT) is imposed on income accruing in or derived from Malaysia. The current CIT rates are provided in the following table:

<table>
<thead>
<tr>
<th>Type of company</th>
<th>Chargeable income (MYR)</th>
<th>CIT rate YA 2015 (%)</th>
<th>CIT rate YA 2016 (%)</th>

Petroleum income tax

Petroleum income tax is imposed at the rate of 38% on income from petroleum operations in Malaysia. An effective petroleum income tax rate of 25% applies on income from petroleum operations in marginal fields with effect from 30 November 2010. No other taxes are imposed on income from petroleum operations.

Local income taxes

There are no other local, state, or provincial government taxes on income in Malaysia.
Malaysia

Corporate residence
A company is tax resident in Malaysia in a basis year (normally the financial year) if, at any time during the basis year, the management and control of its affairs are exercised in Malaysia. Generally, a company is regarded as resident in Malaysia if at any time during the basis period for a year of assessment, at least one meeting of the Board of Directors is held in Malaysia concerning the management and control of the company.

Permanent establishment (PE)
Generally, a non-resident entity is regarded as having a PE in Malaysia if it has a fixed place of business in Malaysia, where the business of the entity is wholly or partly carried on. A non-resident company may also be deemed to have a PE in Malaysia under certain circumstances, such as the following:

- It is represented by a dependent agent in Malaysia who has the authority to conclude contracts on its behalf and who has repeatedly exercised that authority.
- It carries on supervisory activities in Malaysia for six/nine months in connection with a construction, installation, or assembly project.

Other taxes

Goods and services tax (GST)
The GST has been implemented from 1 April 2015 at the standard rate of 6% and replaces the sales and service tax regime. Businesses making taxable supplies where the annual sales turnover exceeds MYR 500,000 must register for GST, which is administered by the Royal Malaysian Customs Department.

In line with the GST implementation in 2015, the Malaysian government has proposed for incentives to be given. For corporate entities, the incentives include:

- Reduction of the corporate income tax (CIT) rate by 1% (refer to the Taxes on corporate income section) from year of assessment 2016.
- Accelerated capital allowance (ACA) for expenditure incurred on purchase of information and communication technology (ICT) equipment and software (years of assessment 2014 to 2016).
- Deduction for expenditure incurred on GST related training of employees in accounting and ICT (years of assessment 2014 and 2015).
- Financial assistance of MYR 150 million for the purchase of accounting software by small and medium enterprises (SMEs) (years of assessment 2014 and 2015).

Import duties
Import duties are levied on goods that are subject to import duties and imported into the country. Import duties are generally levied on an ad valorem basis but may also be imposed on a specific basis. The ad valorem rates of import duties range from 2% to 60%. Raw materials, machinery, essential foodstuffs, and pharmaceutical products are generally non-dutiable or subject to duties at lower rates.

Excise duties
Excise duties are imposed on a selected range of goods manufactured and imported into Malaysia. Goods that are subject to excise duty include beer/stout, cider and perry, rice wine, mead, un-denatured ethyl alcohol, brandy, whisky, rum and tafia, gin, cigarettes containing tobacco, motor vehicles, motorcycles, playing cards, and mahjong tiles.

The rate of excise duties vary from a composite rate of MYR 0.1 per litre and 15% of the value for certain types of spirituous beverages, to as much as 105% of the value of motorcars (depending on engine capacity).
**Property tax**
Property tax is levied on the gross annual value of property as determined by the local state authorities.

**Real property gains tax (RPGT)**
RPGT is charged upon gains from disposals of real property, which is defined as:

- any land situated in Malaysia, as well as any interest, option, or other right in or over such land, or
- shares in a real property company (RPC), which is a controlled company holding real property or shares in another RPC or a combination of both, where the total defined value is not less than 75% of its total tangible assets.

RPGT is imposed on companies as follows:

<table>
<thead>
<tr>
<th>Holding period from date of acquisition</th>
<th>RPGT rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Up to three years</td>
<td>30</td>
</tr>
<tr>
<td>In the fourth year</td>
<td>20</td>
</tr>
<tr>
<td>In the fifth year</td>
<td>15</td>
</tr>
<tr>
<td>Exceeding five years</td>
<td>5</td>
</tr>
</tbody>
</table>

**Stamp duty**
Malaysia imposes stamp duty, which is payable by the buyer/transferee, on chargeable instruments. Some examples are provided as follows:

<table>
<thead>
<tr>
<th>Transaction type</th>
<th>Value chargeable</th>
<th>Stamp duty rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Sale/transfer of properties (excluding stock,</td>
<td>Market value</td>
<td>1 to 3</td>
</tr>

<td>0.3</td>
</tr>
<tr>
<td>securities</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Service/loan agreements</td>
<td>Value of services/loans</td>
<td>0.5</td>
</tr>
</tbody>
</table>

**Windfall profit levy**
A levy is imposed on crude palm oil and crude palm kernel oil where the price exceeds MYR 2,500 per ton in Peninsula Malaysia, and MYR 3,000 per ton in the states of Sabah and Sarawak.

**Contract levy**
A levy of 0.125% on contract works having a contract sum above MYR 500,000 is imposed on every registered contractor by the Construction Industry Development Board.

**Social security contributions**
There are no social security taxes in Malaysia.

**Human resource development levy**
Employers engaged in the manufacturing and services sectors that employ more than a specified number of employees must contribute to the Human Resource Development Fund (HRDF). The levy required to be paid is at the rate of 1% of the employees’ monthly wages on a monthly basis.

**Payroll taxes**
Under the Monthly Tax Deduction scheme, employers are required to deduct the prescribed amount of tax from employees’ salaries each month, to be remitted to the tax authorities not later than the 15th day of each calendar month.
Malaysia

**Branch income**

Tax rates on branch profits of a company are the same as CIT rates. No tax is withheld on transfer of profits to a foreign head office.

**Income determination**

**Inventory valuation**

Inventories are generally stated at lower of cost or net realisable value. Cost may be determined using one of several methods (e.g. unit cost, average cost, or first in first out [FIFO]), as long as the basis used is consistent for each year.

**Capital gains**

Generally, gains on capital assets are not subject to tax, except for gains arising from the disposal of real property situated in Malaysia, which is subject to RPGT (see the Other taxes section for more information).

**Dividend income**

Malaysia is under the single-tier tax system. Dividends are exempt in the hands of shareholders. Companies are not required to deduct tax from dividends paid to shareholders, and no tax credits will be available for offset against the recipient’s tax liability. Corporate shareholders receiving exempt single-tier dividends can, in turn, distribute such dividends to their own shareholders, who are also exempt on such receipts.

**Stock dividends**

A Malaysian corporation may distribute bonus shares tax-free to shareholders.

**Interest income**

Interest income accruing in or derived from Malaysia or received in Malaysia from outside Malaysia is subject to CIT. However, exemption is provided on interest income received in Malaysia from outside Malaysia. Other exemptions granted include interest income earned by a non-resident person from deposits placed in designated financial institutions in Malaysia.

**Foreign income**

Under the Income Tax Act 1967, a Malaysian tax-resident company and a unit trust are not taxed on their foreign-sourced income, regardless of whether such income is received in Malaysia. However, income of a resident company from the business of air/sea transport, banking, or insurance is assessable on a worldwide basis.

Taxation on a worldwide basis does not apply when income attributable to a Labuan business activity of a Labuan branch or subsidiary of a Malaysian bank is subject to tax under the Labuan Business Activity Tax Act 1990. This exception will not apply if the Labuan entity has made an irrevocable election to be taxed under the Income Tax Act 1967 in respect of its Labuan business activity.

In respect of Malaysian-owned banks, insurance companies, and *takaful* (Islamic insurance) companies, the profits of newly established branches abroad or remittances from new subsidiaries abroad are tax exempt for five years, provided that the applications to establish branches or subsidiaries abroad are received by the Central Bank of Malaysia no later than 31 December 2015.

Relief from double taxation is available by means of a bilateral credit if there is a governing tax treaty or unilateral relief where there is no treaty. The relief is restricted to the lower of Malaysian tax payable or foreign tax paid if there is a treaty, or one-half of the foreign tax paid if there is no treaty.
Undistributed income of foreign subsidiaries is not taxable.

**Deductions**

**Capital allowance**
Capital allowance (tax depreciation) on industrial buildings, plant, and machinery is available at prescribed rates for all types of businesses. Initial allowance is granted in the year the expenditure is incurred and the asset is in use for the purpose of the business. Annual allowance at the prescribed rates calculated on cost is given for every year during which the asset is in use at the end of the basis year for the purposes of the business. The following are examples of capital allowance rates currently available:

<table>
<thead>
<tr>
<th>Qualifying asset</th>
<th>Initial allowance (%)</th>
<th>Annual allowance (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Industrial building, whether constructed or purchased</td>
<td>10</td>
<td>3</td>
</tr>
<tr>

<td>20</td>
<td>20</td>
</tr>
<tr>
<td>General plant and machinery</td>
<td>20</td>
<td>14</td>
</tr>
<tr>
<td>Furniture and fixtures</td>
<td>20</td>
<td>10</td>
</tr>
<tr>
<td>Office equipment</td>
<td>20</td>
<td>10</td>
</tr>
<tr>
<td>Motor vehicles *</td>
<td>20</td>
<td>20*</td>
</tr>
<tr>
<td>Small value assets of less than MYR 1,300 (subject to a maximum total cost of MYR 13,000)</td>
<td>-</td>
<td>100</td>
</tr>
</tbody>
</table>

* Restrictions apply on maximum qualifying capital expenditure.

Accelerated capital allowance is available for certain types of industrial building, plant, and machinery, some of which includes buildings used as a warehouse, buildings used as a school or an educational institution, computers, information technology equipment, environmental protection equipment, waste recycling equipment, and plant and machinery used in specific industries.

**Goodwill**
Cost of acquisition of goodwill/amortisation of goodwill is not deductible, as these expenses are capital in nature.

**Start-up expenses**
In general, start-up expenses incurred before the commencement of a trade, profession, or business are capital in nature, as they were expended to put the person in a position to earn income. However, there are specific deductions allowed, such as incorporation expenses and recruitment expenses (conditions apply).

**Interest expenses**
Interest expense is allowed as a deduction if the expense was incurred on any money borrowed and employed in the production of gross income or laid out on assets used or held for the production of gross income. Where a borrowing is partly used to finance non-business operations, the proportion of interest expense will be allowed against the non-business income.

**Bad debt**
Debts must be specifically identified and reasonably estimated to be irrecoverable to qualify for a tax deduction.

**Donations to charitable institutions**
A deduction is allowed for cash donations to approved institutions (defined) made in the basis period for a year of assessment. The deduction is limited to 10% of the aggregate income of that company for a year of assessment.
Malaysia

**Fines and penalties**
Fines and penalties are generally not deductible.

**Taxes**
Taxes on income are generally not deductible, whereas indirect taxes are deductible.

**Net operating losses**
The carryforward of business losses and capital allowances is not available for deduction in subsequent years of assessment if the company does not meet the conditions of a shareholders' continuity test. However, per policy issued by the Ministry of Finance, these conditions currently apply only to dormant companies. Carryforward of business losses and capital allowances is unlimited in time for non-dormant companies.

Current-year business losses may be utilised against all sources of income. Utilisation of carried-forward losses is restricted to income from business sources only. Utilisation of capital allowance is also restricted to income from the same underlying business source.

Currently, there are no provisions to carry back losses to prior years of assessment.

**Payments to foreign affiliates**
A Malaysian company can claim a deduction for royalties, management service fees, and interest charges paid to foreign affiliates, provided that these are made at arm's length and the relevant withholding taxes (WHTs), where applicable, have been paid.

**Group taxation**
A company that qualifies for group relief may surrender a maximum of 70% of its adjusted loss for a year of assessment to one or more related companies if the following conditions are met by both the claimant and surrendering companies:

- Both must be resident and incorporated in Malaysia.
- Each has paid-up capital of ordinary shares exceeding MYR 2.5 million at the beginning of the basis period.
- Both have the same (12-month) accounting period.
- They are 'related' throughout the basis period for a particular year of assessment as well as the 12 months preceding that basis period.
- Both are not currently enjoying specific stipulated incentives, such as pioneer status, investment tax allowance, reinvestment allowance, etc.

'Related company' is defined by the Income Tax Act 1967 and involves the application of a two-tier test. The companies are regarded as 'related' if:

- either company owns at least 70% of the ordinary share capital of the other company or a third company owns at least 70% of each of the companies, and
- the holders of ordinary shares are entitled to at least 70% of the distributable profits and assets of the company on winding up.

Companies that wish to avail themselves of group relief must make an irrevocable election to surrender or claim the tax loss in the return to be filed with the Inland Revenue Board for that year of assessment.

**Transfer pricing**
The Director General of Inland Revenue (DGIR) is empowered to make adjustments on transactions of goods and services if the DGIR is of the opinion that the transactions were not entered into on an arm's-length basis.
The transfer pricing rules that apply to controlled transactions (defined, including financial assistance) specify the methods to determine the arm’s-length price and the circumstances under which the DGIR may re-characterise transactions. The advance pricing arrangement rules that apply only to cross-border transactions outline the application procedures for unilateral, bilateral, or multilateral advance pricing arrangements.

**Thin capitalisation**
Under the provision for thin capitalisation, the portion of the interest charge that relates to the amount of financial assistance that is excessive is disallowed as a deduction. However, the implementation of specific rules relating to this provision has been further deferred to 31 December 2015.

**Controlled foreign companies (CFCs)**
There are no CFC rules in Malaysia.

---

**Tax credits and incentives**
Malaysia has a wide variety for incentives covering the major industry sectors. Tax incentives can be granted through income exemption or by way of allowances. Generally, when income is exempted, any dividends paid out of such exempt income are not taxable in the hands of the shareholders. Where incentives are given by way of allowances, any unutilised allowances generally may be carried forward indefinitely to be utilised against future statutory income. The following are the major types of incentives available in Malaysia.

**Pioneer status (PS) and Investment tax allowance (ITA)**
Companies in the manufacturing, agricultural, hotel, and tourism sectors, or any other industrial or commercial sector, that participate in a promoted activity or produce a promoted product may be eligible for either PS or ITA.

PS is given by way of exemption from CIT on 70% of the statutory income for five years and the remaining 30% is taxed at the prevailing CIT rate. ITA is granted on 60% qualifying capital expenditure incurred for a period of five years to be utilised against 70% of the statutory income, while the balance 30% is taxed at the prevailing CIT rate.

A company that intends to undertake reinvestment before expiration of its PS or ITA status may opt for reinvestment allowance, provided it surrenders its PS or ITA status.

The PS and ITA incentives are enhanced for the following types of projects:

<table>
<thead>
<tr>
<th>Qualifying industry</th>

</table>

Notes
1. Tax relief period (in terms of years).
2. Statutory income.
3. Qualifying capital expenditure.

Special incentive schemes

Reinvestment allowance
A resident company in operation for not less than 36 months that incurs capital expenditure to expand, modernise, automate, or diversify its existing manufacturing business or approved agricultural project is entitled to reinvestment allowance as follows:

- The allowance is given for 15 years from the first year of claim.
- An allowance of 60% of QCE incurred to be utilised against 70% of statutory income. The remaining 30% is taxed as the prevailing CIT rate.
- The 70% restriction does not apply to projects that achieved the level of productivity as prescribed by the Minister of Finance.
- The allowance will be withdrawn if the asset for which the allowance is granted is disposed of within five years.

Approved service projects
A resident company undertaking a project approved by the Minister of Finance in the transportation, communications, utilities, and services subsectors may enjoy the following incentives:

- Investment allowance of 60% of QCE incurred within five years to be utilised against 70% statutory income.
- Alternatively, income tax exemption of 70% of statutory income for a period of five years.
- Buildings used solely for the purposes of such projects qualify for an industrial building allowance.

Export incentives
A resident company engaged in manufacturing or agriculture that exports manufactured products, agricultural produce, or services is entitled to allowances between 10% and 100% of increased exports (subject to satisfying prescribed conditions), which is deductible at up to 70% of statutory income.
Incentive for industrial area management
Newly established or existing companies, incorporated under the Companies Act 1956 and approved by a local authority for management of industrial estates, are given 100% income tax exemption of statutory income for five years, commencing from the date the company commences its specified activities (for applications from 1 January 2015 to 31 December 2017).

The company must undertake specified management, upgrading, and maintenance activities that comprise at least 70% of their annual income.

Regional operations
Principal hub
A principal hub is a locally incorporated company that uses Malaysia as a base for conducting its regional and global businesses and operations through management, control, and support of key functions, such as management of risk, strategic decisions, finance, and human resources. CIT exemption at tiered rates (0%, 5%, or 10%) is given for a period of up to ten years, subject to conditions being met (for applications from 1 May 2015 to 30 April 2018).

Other available non-fiscal incentives available include:

- No equity/ownership conditions.
- Foreign exchange administration flexibilities and expatriate positions.
- Customs duty exemption for raw materials, components, or finished products brought into free zones, licensed and bonded warehouses for production or repackaging, cargo consolidation, and integration before distribution to its final customers for goods-based companies.

With effect from 1 May 2015, the operational headquarters, international procurement centre, and regional distribution centre incentives cease upon the principal hub incentive coming into effect.

International trading company
International trading companies are exempt for five years on income equivalent to 20% of increased export value, up to a maximum of 70% of statutory income. To qualify for the incentive, the company must meet the following three conditions:

- Be incorporated in Malaysia, with 60% Malaysian ownership.
- Achieve minimum annual sales of MYR 10 million, not more than 20% of which may be derived from the trading of commodities.
- Use local services (banking, finance, and insurance) and infrastructure (local ports and airports) in its operations.

Financial services sector
Islamic securities
Tax deductions are allowed for expenses incurred in the issuance of Islamic securities, including Islamic Securities based on the Wakalah principle, approved by the Securities Commission or the Labuan Financial Services Authority, until year of assessment 2015 only.

Islamic banking and takaful business
Effective from year of assessment 2007 until year of assessment 2016, full income tax exemption for ten years is granted to:

- Islamic banks licensed under the Islamic Financial Services Act 2013, on income from Islamic banking business conducted in international currencies.
Malaysia

- *Takaful* (Islamic insurance) companies licensed under the Islamic Financial Services Act 2013, on income from *takaful* business conducted in international currencies.

**Islamic fund management**
Full income tax exemption is available on statutory income on management fees received by resident fund management companies for managing funds of foreign and local investors established under Syariah principles (until year of assessment 2016). Such funds must be approved by the Securities Commission.

**Special purpose vehicle (SPV) for Islamic financing**
An SPV established solely for the purpose of issuance of Islamic securities under the Syariah principles (approved by the Securities Commission or established under the Labuan Companies Act 1990) is not subject to income tax and is not required to comply with administrative procedures under the income tax law. The company that establishes the approved SPV is deemed to be the recipient of the SPV's income and will be taxed accordingly, but that company will be allowed a deduction for the cost of issuance of Islamic securities.

**Islamic stock broking company**
Establishment expenditure incurred prior to the commencement of an Islamic stock-brokering company is allowed as a deduction, provided the company commences business within two years from the date of approval. Applications must be received by the Securities Commission before 31 December 2015.

**Agro-sukuk, retail sukuk, and retail bonds**
A company that issues *agro-sukuk*, *retail sukuk*, and retail bonds approved by the Securities Commission or the Labuan Financial Services Authority is eligible for double deduction on certain expenses and stamp duty exemption, subject to meeting certain conditions. This incentive is available until year of assessment 2015.

**Treasury management centre (TMC)**
A locally incorporated company providing centralised treasury management services to its group of related companies (within or outside the country) in Malaysia may enjoy the following incentives (for applications until 31 December 2016):

- Income tax exemption of 70% of statutory income from qualifying treasury services rendered to related companies for five years.
- WHT exemption on interest payments on overseas borrowings from overseas used for qualifying activities.
- Stamp duty exemption on loan and service agreements for qualifying activities.
- Expatriates working in the TMC are taxed only on the portion of their chargeable income attributable to the number of days they are in Malaysia.

**Tun Razak Exchange (TRX) (formerly known as Kuala Lumpur International Financial District)**
The TRX is a joint property development comprising office towers for finance and banking, residences, and retail spaces in Kuala Lumpur. To accelerate the development of the TRX, the following incentives have been given:

- Stamp duty exemption on loan and service agreements for TRX Marquee status companies.
- Industrial building allowance and accelerated capital allowance for TRX Marquee status companies.
- Income tax exemption of 70% of statutory income for five years for property developers in TRX.
- Additional 50% tax deduction of rental payment incurred by TRX Marquee status companies for buildings used for business in TRX.
Malaysia

• Deduction of relocation cost incurred by TRX Marquee status companies to relocate to TRX.

It is also proposed that a full ten-year income tax exemption be given for TRX Marquee status companies.

**Business Trust (BT)**
BT is established under the Capital Market and Services Act 2007 and is a hybrid structure that combines elements of a company with elements of a unit trust. The BT is given income tax treatment similar to that of a company. The following incentives are given on a one-off basis at the initial stage of establishment of the BT:

• Stamp duty exemption on instruments of transfer of businesses, assets, or real properties acquired for instruments executed from 1 January 2013 but not later than 31 December 2017.
• The disposer of real properties or shares in RPCs to BT is given RPGT exemption for disposal of real properties or shares in RPCs from 1 January 2013 but not later than 31 December 2017.

**Real estate investment trusts (REIT)/Property trust fund (PTF)**
REIT/PTFs are vehicles that mobilise funds from unit holders comprising individuals and companies for investments in the property sector and related assets. REIT/PTFs are exempted from tax on all income, provided that at least 90% of their total income is distributed to unit holders. If the 90% distribution condition is not complied with, all income will be taxed at the prevailing income tax rate at the REIT/PTF level and tax credit will be claimed by the unit holders on distributions received from the REIT/PTF.

Unit holders are taxed as follows:

<table>
<thead>
<tr>
<th>Unit holders</th>

</tr>
<tr>
<td>Institutional investor (pension fund, collective investment scheme, or other person approved by the Minister of Finance)</td>
<td>10% (until 31 December 2016)</td>
</tr>
</tbody>
</table>

Other incentives available are:

• Real property gains tax and stamp duty exemptions on disposal/transfer of real property to an REIT/PTF.
• Tax deduction given for consultancy, legal, and valuation service fees incurred on the establishment of an REIT.

**Foreign fund management company**
A foreign fund management company providing fund management services to foreign clients is taxed at a concessionary rate of 10% in respect of income derived from the management of foreign funds, while income arising from services rendered to clients in Malaysia is taxed at the prevailing CIT rate.

A foreign fund management company is a Malaysian incorporated company licensed under the Capital Markets and Services Act 2007. Its activities are regulated by the Securities Commission.
Export of financial services
Income tax exemption on statutory income for a period of five years is granted to Malaysian banks, insurance companies, and takaful companies on profits of newly established branches overseas or income remitted by new overseas subsidiaries. Applications to establish new branches or subsidiaries overseas should be received by the Central Bank of Malaysia not later than 31 December 2015.

Venture capital company (VCC)
A VCC investing in a venture company (VC), which is not the VCC’s related company at the point of first investment, will be given a deduction on the value of investment made in a VC. Where the deduction is not claimed, the VCC is eligible for the following income tax exemption on income from all sources, other than interest income from savings or fixed deposits, and profits from Syariah-based deposits:

<table>
<thead>
<tr>
<th>Conditions</th>
<th>Exemption period</th>
</tr>
</thead>
<tbody>
<tr>
<td>• At least 70% of invested funds is invested in VC, or • At least 50% of invested funds is invested in VC in the form of seed capital.</td>
<td>10 years</td>
</tr>
</tbody>
</table>

Petroleum sector
The following incentives are provided for petroleum operations:

• Accelerated capital allowance on qualifying capital expenditure incurred from year of assessment 2010 to 2024 for petroleum operations in marginal fields.
• Investment allowance of 60% of qualifying capital expenditure to be utilised against 70% statutory income for a period of ten years.
• Exemption for a portion of chargeable income from marginal fields resulting in a reduction of the effective tax rate from 38% to 25% for petroleum operations in marginal fields.

Special economic regions
The following special economic regions were launched as part of the Malaysian government’s plan for regional growth and development:

<table>
<thead>
<tr>
<th>Economic region</th>
<th>Location</th>
<th>Year of launch</th>
</tr>
</thead>
<tbody>
<tr>
<td>Iskandar Malaysia (formerly known as Iskandar Development Region [IDR]) <a href="http://www.iskandarmalaysia.com.my">www.iskandarmalaysia.com.my</a></td>
<td>Southern Johor</td>
<td>2006</td>
</tr>
<tr>
<td>Sabah Development Corridor <a href="http://www.sedia.com.my">www.sedia.com.my</a></td>
<td>Western, central, and eastern regions of Sabah</td>
<td>2008</td>
</tr>
</tbody>
</table>

Special incentives, on top of the existing incentives given by the Malaysian government, will be customised for the purpose of each economic region. At present, special legislation has been enacted only in respect of Iskandar Malaysia (IM) to grant the following exemptions/incentives:

<table>
<thead>
<tr>
<th>Entity</th>
<th>Incentive</th>
</tr>
</thead>
<tbody>
<tr>
<td>IDR status company</td>
<td>10 years income tax exemption on statutory income from the provision of qualifying services to a person situated within designated nodes in the IDR or outside Malaysia. Operations to commence before 31 December 2015.</td>
</tr>
</tbody>
</table>
### Entity | Incentive
--- | ---
Developer | Income tax exemption on statutory income from the disposal of rights over land in designated nodes (until year of assessment 2015). Income tax exemption on rental or disposal of buildings in designated nodes (until year of assessment 2020).
Development manager | Income tax exemption on statutory income from the provision of management, supervisory, and marketing services to an approved developer (until year of assessment 2020).
Non-resident service provider | Income tax and WHT exemptions on income from technical fees, interest, or royalties received from approved developers in IDR designated nodes or IDR status companies.
Individuals working in IDR | A qualified knowledge worker is taxed at the rate of 15% on chargeable income from employment with a designated company engaged in a qualified activity (e.g. green technology, educational services, healthcare services, creative industries, financial advisory and consulting services, logistics services, tourism) in that specified region. Employment must commence between 24 October 2009 and 31 December 2015.

### Incentive for less developed areas
To enhance the special incentive package available in the economic corridors to include more less developed areas, the following incentives are given to existing companies expanding to less developed areas or newly established companies (for applications from 1 January 2015 to 31 December 2020):

- 100% income tax exemption for up to 15 years of assessment (5+5+5) commencing from the first year of assessment statutory income is derived, or
- income tax exemption of 100% of qualifying capital expenditure (ITA) that can be offset against 100% statutory income for ten years.

The company must undertake manufacturing or services activities in less developed areas that create employment and rural development.

The other incentives available for less developed areas are:

- Stamp duty exemption on transfer or lease of land or building.
- WHT exemption on fees for technical advice, assistance, or services, or royalty relating to manufacturing and services activities, up to 31 December 2020.
- Import duty exemption on raw materials and components, machinery, and equipment that are not produced locally and used directly in the manufacturing or services activity.

### Information and communication technology
**MSC Malaysia**

MSC Malaysia is Malaysia’s initiative for the global information technology (IT) industry and is designed to be the research and development (R&D) centre for industries based on IT. It is an information communication technology hub equipped with high-capacity global telecommunications and logistics networks. MSC Malaysia is also supported by secure cyber laws, strategic policies, and a range of financial and non-financial incentives for investors. It is managed by the Multimedia Development Corporation (MDeC), a ‘one-stop shop’ that acts as the approving authority for companies applying for MSC Malaysia status.

MSC Malaysia status is awarded to both local and foreign companies that develop or use multimedia technologies to produce or enhance their products and services as well as for process development. MSC Malaysia companies are eligible for incentives, which include the following:
Malaysia

- PS (five + extendable by five years) of 100% on statutory income or ITA of 100% for five years for a new company or existing company on its additional income.
- Eligibility for R&D grants (for majority Malaysian-owned MSC Malaysia company).
- Exemption from indirect taxes on multimedia equipment.
- Unrestricted employment of local and foreign knowledge workers.
- Freedom to source funds globally for investments.
- Protection of intellectual property and cyber laws.
- No censorship of the internet.
- Globally competitive telecommunication tariffs and services guarantees, world-class physical and IT infrastructure, and excellent R&D facilities.

Offshore trading through websites in Malaysia

Income received by companies undertaking offshore trading (buying and selling of foreign goods to non-residents) via websites in Malaysia is taxed at a reduced rate of 10% for a period of five years. The approval of the Minister of Finance must be obtained.

**Green incentives**

**Renewable energy source**

Companies engaged in generating energy from renewable sources (biomass, hydropower, or solar power) can enjoy the following incentives for applications received before 31 December 2015:

- full income tax exemption on statutory income for ten years, or
- ITA of 100% QCE against 100% statutory income for five years.

**Energy conservation**

Companies undertaking contracting service activities to conserve usage of energy can enjoy the following incentives for applications received before 31 December 2015:

- full income tax exemption on statutory income for ten years, or
- ITA of 100% QCE against 100% statutory income for five years.

**Biotechnology industry**

Companies undertaking biotechnology activity with approved bionexus status from Malaysian Biotechnology Corporation Sdn Bhd will be eligible for the following incentives:

- Full income tax exemption on statutory income for ten years from the first year in which the company derives statutory income or ITA of 100% on QCE incurred for a period of five years.
- Concessionary tax rate of 20% on statutory income from qualifying activities for ten years upon expiry of the tax exempt period.
- Accelerated industrial building allowance (over ten years) for buildings used solely for the purpose of its new business or expansion project.
- Exemption of import duty and sales tax on import of raw materials and machinery.

**Research and development (R&D)**

**Contract R&D company**

Companies that provide R&D services to third parties are eligible for:

- full exemption of their statutory income for a period of five years (extendable by five years), or
- ITA of 100% of QCE incurred within a period of ten (extendable by ten years) to be utilised against 70% of statutory income.
R&D company
The ITA incentive is also available to companies undertaking R&D services for their group and third parties.

In-house R&D
Companies undertaking in-house R&D projects are eligible for ITA at the rate of 50% of QCE incurred within a period of ten years (extendable by ten years) to be utilised against 70% of statutory income.

Commercialisation of resource-based R&D findings
A company that invests for the sole purpose of financing a project on commercialisation of resource-based and non-resource based (for applications until 31 December 2017) R&D findings (which is wholly owned by a public research institute or public institute of higher learning in Malaysia) is given a deduction equivalent to the value of that investment.

The subsidiary undertaking the commercialisation of R&D findings is granted 100% tax exemption on statutory income for ten years.

Other incentives

Shipping
A tax-resident person (including a partnership) carrying on shipping business using Malaysian ships is given income tax exemption of 70% of statutory income, determined on a per ship basis. The balance of 30% of statutory income is deemed to be total income chargeable to tax.

Incentives for Mines Wellness City (MWC)
The Malaysian Investment Development Authority has issued guidelines on incentives for MWC:

<table>
<thead>
<tr>
<th>Incentive</th>
<th>Application period</th>
</tr>
</thead>
<tbody>
<tr>
<td>Operator</td>
<td>PS of 70% of statutory income for five years for income from qualifying activities in MWC.</td>
</tr>
<tr>

</tr>
<tr>
<td></td>
<td>Stamp duty exemption of 50% on instrument of transfer/lease of land/building.</td>
</tr>
</tbody>
</table>

Profit oriented private schools and international schools
The following incentives are given to profit oriented private schools and international schools (for applications received by 31 December 2015):

- 70% income tax exemption for a period of five years, or
- ITA of 100% on qualifying capital expenditure incurred within five years to be offset against 70% of statutory income.
Capital allowance for increased automation
Manufacturing companies that have been in operation for at least 36 months are eligible for the following incentives, where they have incurred expenditure in automation equipment used directly in the manufacturing activities and resulting in reduced man hours and increased productivity:

- For high labour intensive industries (rubber products, plastics, wood, furniture and textiles industries): 200% automation capital allowance on first MYR 4 million QCE (years of assessment 2015 to 2017).
- Other industries: 200% automation capital allowance on first MYR 2 million QCE (years of assessment 2015 to 2020).

*Foreign tax credit*
See Foreign income in the Income determination section for a discussion of the foreign tax credit regime.

**Withholding taxes**
Corporations making payments of the following types of income are required to withhold tax at the rates shown in the table below. See Note 5 for other sources of income subject to WHT.

Malaysia

Notes

* Treaties pending ratification

Restricted tax treaties dealing with taxation of specific transport operations in international traffic have also been signed with Argentina and the United States.

1. Dividends:
   • Malaysia has no WHT on dividends in addition to tax on the profits out of which the dividends are declared. Some treaties provide for a maximum WHT on dividends should Malaysia impose such a WHT in the future.

2. Interest:
   • Interest on loans given to or guaranteed by the Malaysian government is exempt from tax.
   • Interest paid to a non-resident by a commercial or merchant bank operating in Malaysia is also exempt from tax.

3. Royalty:
   a. Approved royalty payments under certain treaty provisions are exempt from WHT.
   b. Royalty income received by non-resident franchisors under franchised education scheme programmes by the Ministry of Education is exempted from tax.
   c. Royalty does not include payments in respect of the operation of oil or gas wells, or the extraction of mineral deposits or other natural resources.
   d. Royalty does not include amount paid in respect of motion picture films or of tapes for radio or television broadcasting.
   e. Royalty does not include natural resource royalties.
   f. Royalty does not include royalty paid in respect of (literary or artistic copyrights - Norway only) or of motion picture films or of tapes for television (or radio - Thailand only) broadcasting, or of the operation of a mine, oil well, quarry, or any other place of extraction of natural resources or of timber or other forest produce.

4. Special classes of income:
   • Contract payments to non-resident contractors in respect of services under a contract project are subject to a 13% deduction of tax (10% on account of the contractors' tax liability and 3% on account of their employees' tax liability). This deduction of tax at source does not represent a final tax, which is determined upon the filing of the tax return.
   • Payments made to non-residents in respect of the provision of technical services performed in Malaysia and rental of movable properties are subject to a 10% WHT (unless exempted under statutory provisions for purpose of granting incentives).

5. Other income:
   • WHT is also applied in respect of income of a non-resident from sources other than the following:
     • Sources shown in the preceding table.
     • A business source.
     • An employment source.
   • The rate of WHT on such income is 10%. This is applicable on payments made to residents of all the treaty partners listed, except for certain countries (including Germany, Turkmenistan, Bosnia and Herzegovina, Senegal, and Jordan) where the respective tax treaties have provided for such type of income to be taxed only in the contracting state in which the recipient is resident.

Tax administration

Taxable period
Assessment of income is on a current-year basis. A company is taxed on income from all sources (whether business or non-business) arising in its financial year ending in the calendar year that coincides with that particular year of assessment. For example, a company that closes its accounts on 30 June of each year is taxed on income earned during the financial year ending on 30 June 2015 for year of assessment 2015.

Tax returns
Under the self-assessment system, companies are required to submit a return of income within seven months from the date of closing of accounts. Particulars required to be specified in the return include the amount of chargeable income and tax payable by the company. The tax return is deemed to be a notice of assessment and is deemed served on the company upon the date the tax return is submitted.

'E-filing' or online filing of tax returns via the Internet is available. E-filing is encouraged by the Inland Revenue Board.

Payment of tax
Tax payable under an assessment upon submission of a tax return is due and payable by the last day of the seventh month from the date of closing of accounts.
Companies are required to furnish estimates of their tax payable for a year of assessment no later than 30 days before the beginning of the basis period (normally the financial year). However, a newly established company with paid-up capital of MYR 2.5 million or less that meets with certain specified conditions is exempted from this requirement for two years, beginning from the year of assessment in which the company commences operation. A revised estimate can be submitted in the sixth and ninth months of the basis period for a year of assessment.

Companies are then required to pay tax by monthly instalments (based on the estimates submitted) commencing from the second month of the company’s basis period.

A company commencing operations in a year of assessment is not required to furnish estimates of tax payable or to make instalment payments if the basis period for the year of assessment in which the company commences operations is less than six months.

**Tax audit process**
The tax authorities have issued a Tax Audit Framework that outlines the rights and responsibilities of audit officers, taxpayers, and tax agents in respect of a tax audit. A tax audit may cover a period of one to three years of assessment determined in accordance with the audit focus. The years of assessment to be covered in a tax audit may, however, be extended depending on the issues identified during an audit.

**Statute of limitations**
Additional assessments can be made within five years (previously six years prior to 1 January 2014) after the expiration of the relevant year of assessment. This time limit is not applicable where fraud, wilful default, or negligence has been committed.

**Topics of focus for tax authorities**
Some issues that the tax authorities have focused on recently include:

- Deductibility of certain expenses (e.g. entertainment, provisions, management service fees, allocated expenses from foreign related counterparts).
- The correctness of tax incentive claims.

**Other issues**

**Intergovernmental agreements (IGAs)**
On 30 June 2014, Malaysia and the United States (US) reached an agreement in substance on a Model 1 IGA to implement the Foreign Account Tax Compliance Act (FATCA). Accordingly, Malaysia has been included in the US Treasury's list of jurisdictions that are treated as having an IGA in effect with the United States. The IGA is expected to be signed before 30 June 2015.

Under the IGA, reporting Malaysia-based financial institutions will provide the Malaysian Inland Revenue Board with the required information of accounts of US persons. The information of which will then be exchanged between the Malaysian and US tax authorities.
Significant developments

The following are some of the more significant developments that were introduced in Maltese tax law during the course of 2014 and in the first months of 2015:

- The agreement concluded between the Republic of Malta and the United States (US) to improve international tax compliance and to implement the Foreign Account Tax Compliance Act (FATCA) (the ‘Agreement’) entered into force on 26 June 2014. Furthermore, on 18 November 2014, the FATCA Regulations were accordingly issued implementing the said intergovernmental agreement (IGA). Guidelines on the implementation and interpretation of the FATCA Regulations and the said Agreement have accordingly been issued by the Maltese Inland Revenue Department.
- Partnerships may henceforth elect to be treated as companies for Maltese tax purposes.
- Maltese tax law has been updated so that the Maltese participation exemption will not apply on dividends in cases where tax deductibility was availed of in another European Union (EU) member state. This reflects the recent changes to the EU Parent Subsidiary Directive and enters into force on 1 January 2016.
- The possibilities of income tax consolidation and value-added tax (VAT) grouping are contemplated in Maltese tax law. Rules covering the precise terms and conditions of such income tax consolidation and VAT grouping are still to be issued.
- Some changes have been introduced in respect of the taxation of gains arising on the transfer of Maltese immovable property.
- A self-disclosure scheme has been effective during a number of months during 2014, providing for the possibility of regularisation of the past tax position in respect of certain eligible assets.
- In terms of EU developments relating to regional aid, certain tax credits for qualifying industries, particularly the manufacturing sector, have been reduced.
- A number of new double taxation treaties (DTTs) have been concluded by Malta, including those with Mexico and Liechtenstein.

Taxes on corporate income

Companies are subject to income tax at a flat rate of 35%. There is no corporate tax structure separate from income tax.

A company incorporated in Malta is considered as both domiciled and resident in Malta and is consequently taxable on a worldwide basis. A non-Maltese incorporated company that is resident in Malta through management and control is subject to Maltese tax on income arising in Malta and on income received in/remitted to Malta.

Petroleum profits tax

Petroleum profits tax is levied as income tax with similar deductions being allowed in respect of incurred expenditure. In the case of a Production Sharing Contract signed after 1 January 1996, any petroleum profits are taxed at the standard corporate tax rate of 35%. However, all other petroleum profits are subject to a 50% tax rate.
**Insurance profits tax**
Insurance profits tax is levied as income tax and subject to the normal standard tax rate of 35% as other corporate profits; however, the manner in which such profits are ascertained is subject to a number of detailed rules that take into account the special nature of the insurance industry. In the case of non-resident companies, the computation is applied with reference only to business carried on in or from Malta.

**Shipping profits tax**
A tonnage tax system is applicable under Maltese law. Such regime covers profits from shipping activities as defined under the applicable regulations that are derived by qualifying Maltese-flagged and EU/European Economic Area (EEA) vessels as well as non-EU/EEA vessels satisfying certain additional rules. Furthermore, qualifying ship management activities are also entitled to the tonnage tax system.

**Corporate residence**
All companies incorporated in Malta are considered to be both domiciled and resident in Malta. Other bodies of persons (including companies incorporated overseas) are considered to be resident in Malta when the control and management of their business are exercised in the country.

**Permanent establishment (PE)**
Although Maltese tax legislation contains a number of references to the term ‘permanent establishment’, the term is not defined by Maltese legislation. Indeed, in terms of Maltese domestic tax law, a non-resident is, in principle, subject to Maltese tax on income arising in Malta, irrespective of the existence or otherwise of a PE in Malta (naturally subject to any DTT provisions that would apply if in conflict with Maltese tax law).

In the event the Maltese Revenue is required to interpret such a term, reference would typically be made to the definition contained in the Organisation for Economic Co-operation and Development (OECD) Model Convention.

**Other taxes**

**Value-added tax (VAT)**
Supplies of goods and services in Malta are subject to VAT at the standard rate of 18% (7% on accommodation in hotels and licensed premises; 5% on supply of electricity, the importation of works of art, collector’s items and antiques, certain confectionery, medical accessories, printed matter, and items for exclusive use by the disabled). Exports to countries outside the European Union, food, and certain other goods and services are exempt from VAT and provide a right to credit of VAT remitted.

**Customs duties**
Goods imported from outside the European Union may be subject to customs duties. A Customs Code provides for customs procedures and concepts, which are based on European Community requirements.

**Excise duties**
Excise duties are chargeable on certain energy products, certain alcoholic drinks, certain manufactured tobacco products, and mobile telephony services.

**Property taxes**
Maltese tax legislation does not contain any wealth taxes or other similar taxes on property, save for the property transfers tax outlined below.
**Property transfer taxes**

Transfers of immovable property situated in Malta are generally subject to a final withholding tax (WHT), which, in most cases, is charged on the transfer value of the property. In terms of the recently issued Budget Measures Implementation Act, 2015, in the case of transfers of Maltese immovable property made on or after 1 January 2015, the WHT on such transfer should, in general, be 8% or 10% (the latter rate applying in the case where the property was acquired before 1 January 2004). Certain other rates of WHT may apply in specific circumstances.

**Stamp duty**

Stamp duty is charged on, among other transactions, transfers of immovable property (5% for both residents and non-residents) and marketable securities (2%; 5% in the case of transfers of shares in property companies). Furthermore, in the event that the market value of shares held by a person is reduced following a change in the company's issued share capital or voting rights and the value shifts onto the other shareholders, the transferor would be deemed to have transferred the said value to the transferee(s) and such value shifting may be subject to a stamp duty liability (although certain exceptions/exemptions may apply).

Maltese legislation also provides for the possibility of a stamp duty exemption in a number of instances, subject to the satisfaction of certain conditions. Some of the more commonly availed of exemptions include the acquisition or disposal of marketable securities by or in the following: (i) licensed collective investment schemes; (ii) licensed persons providing management, administration, safekeeping or investment advice to collective investment schemes; (iii) companies being owned as to more than 50% by non-Maltese residents and satisfying certain other conditions; and (iv) a company that carries on or intends to carry on more than 90% of its business outside of Malta.

**Employer’s social security contributions**

Employers are obligated to pay social security contributions at the rate of 10% of the individual employee's salary and at fixed rates of 41.83 euros (EUR) per week for annual salaries exceeding EUR 21,749, provided the employee is born on or after 1 January 1962 (note that the employee is also required to pay an equivalent weekly amount).

**Payroll taxes**

In terms of the Final Settlement System (FSS) rules, an employer is required to withhold income tax and social security contributions at source from the employees' salaries. Such deductions of tax/social security should be forwarded by the employer to the Maltese Revenue within specific timeframes.

**Branch income**

The tax rate on branch income for branches set up in Malta is the same as that for Maltese resident companies. Other than the tax charged on a branch's income, no tax is withheld on transfers of profits to the head office.

**Income determination**

**Inventory valuation**

Inventory valuations are generally made at the lower of cost or market value. In general, the book and tax methods of inventory valuation will conform. However, the last in first out (LIFO) method is not accepted for taxation purposes. Obsolescence is accepted where proven, but there are no provisions to take into account the effects of monetary inflation on the inventory valuation.
Capital gains
Tax is chargeable on capital gains realised on the transfer of immovable property (real estate), shares and other securities, business, goodwill, business permits, copyrights, patents, trade names, trademarks, any other intellectual property (IP), interests in a partnership, and beneficial interests in a trust.

In respect of transfer of Maltese immovable property, a WHT system applies (see Property transfer taxes in the Other taxes section).

Furthermore, similarly to the stamp duty situation set out above, in the event that the market value of shares held by a person is reduced following a change in the company’s issued share capital or voting rights and the value shifts onto the other shareholders, the transferor will be deemed to have transferred the said value to the transferee(s) and such value shifting may be subject to a tax on capital gains (although certain exceptions/exemptions may apply).

No tax is levied on investments that yield a fixed rate of return. A tax exemption applies in certain instances and subject to the satisfaction of certain conditions on the capital gain arising on the transfer of shares in a company listed on a recognised stock exchange other than shares held in certain collective investment schemes. If the capital gain arising on the transfer of listed shares is subject to tax, then special rules apply with respect to the calculation of the gain and such gain will be subject to tax separately at the rate of 15%.

Subject to the satisfaction of certain conditions, if the asset is transferred between group companies, no loss or gain is deemed to arise from the transfer. Note that a provision exists that brings to charge the transfer of shares in property companies (as specifically defined) that were originally subject to intra-group tax deferral when the transferor and the transferee cease to be members of the original group within six years from the date of such intra-group transfer.

Gains realised from the transfer of other assets fall outside the scope of the tax. Gains arising outside Malta and derived by a company that is either not domiciled or not ordinarily resident in Malta are not subject to tax. There are also a number of exemptions provided in the law. For example, capital gains realised by non-residents on transfers of units in Maltese collective investment schemes, similar investments relating to linked long-term insurance business and shares, or securities in Maltese companies (except for companies holding certain Maltese immovable property) are exempt from tax.

Rollover relief
Rollover relief is granted with respect to capital assets used in a business for a period of at least three years and which are transferred and replaced within one year by an asset used solely for similar business purposes (i.e. no tax is chargeable on the capital gain). In such instances, the cost of acquisition of the new asset is reduced by the gain on the transfer of the previous asset that would otherwise have been taxable.

Maltese tax law also provides for the surrendering and claiming of allowable losses between companies that form part of the same group (see the Group taxation section for more information) as well as for reorganisation relief, subject to certain specific conditions.

Dividend income
Dividends received by one resident company from another, whether or not a subsidiary, are taxable on the gross amount in the recipient’s hands. If the distributed profits have been taxed, no further tax should be chargeable to the recipient company. However, for resident shareholders, if the corporate rate of tax in the year in which the profits are earned is lower than that in the year in which they are distributed, an amount equivalent
to the difference in rates (topping up) is payable. If the distribution is made from untaxed income, the dividend will be tax-free in the hands of the recipient company.

Dividends and gains on disposal of shares received by a corporate investor from a non-resident company (or from a non-resident limited partnership), as well as profits from a PE, including a foreign branch, may qualify for a participation exemption in Malta, subject to the satisfaction of certain statutory conditions.

The participation exemption may also apply to gains upon the disposal of equity holdings in Maltese-resident entities. Distributions of taxed income by Maltese-resident companies are not subject to further tax under the full imputation system.

Stock dividends
A Maltese company may distribute bonus shares from profits, whether of an income or capital nature, and from share premium and capital redemption reserves. When bonus shares represent a capitalisation of profits, they are deemed to be dividends for tax purposes. Such bonus shares are subject to tax in the recipients’ hands, gross of any tax paid at the corporate level on the relative profits, but tax credits equivalent to the gross-up of tax are available to stockholders.

Interest income
Interest is chargeable to tax under the provisions of Article 4(1)(c) of the Income Tax Act and subject to the standard corporate tax rate. Nevertheless, in the event the receipt of interest falls within the definition of ‘investment income’ as established by Maltese tax legislation, a WHT of 15% may be generally applicable. Furthermore, in the case of interest income payable to non-Maltese residents, such interest should be exempt from Maltese tax, subject to the satisfaction of certain statutory conditions.

Rental income
Corporates (and also individuals) in receipt of income from the rental of residential property have the option to apply a final 15% tax on the gross rental income (other tax rates may apply in specific circumstances).

Otherwise, the rental income is subject to normal rates of tax, but special tax deduction rules apply.

Foreign income
A company is taxable on its worldwide income when it is ordinarily resident and domiciled in Malta. A company that is either not ordinarily resident or not domiciled in Malta is taxable on its foreign income only insofar as such income is remitted to/received in Malta. Foreign tax is relieved by way of tax credits. This may occur under the terms of a DTT. Where no treaty exists, the foreign tax can be relieved through a system of unilateral relief. Relief for underlying tax is also granted with respect to dividend income, either in terms of a DTT or as unilateral relief. Such relief may be available if, among other things, evidence of tax paid abroad is produced.

Profits of Malta resident companies are subdivided for Maltese tax purposes into five accounts: the Immovable Property Account, the Final Tax Account, the Maltese Taxed Account, the Untaxed Account, and the Foreign Income Account. The last of these includes, among other things, taxable profits of Maltese-resident companies resulting from foreign investments; profits of a foreign PE; and profits resulting from foreign investments, assets, or liabilities of an onshore bank licensed in Malta. Income allocated to the Foreign Income Account for which no evidence of tax paid abroad is available can qualify for a flat-rate foreign tax credit of 25%.

The Immovable Property Account includes profits and income derived directly or indirectly from immovable property situated in Malta. The Final Tax Account includes, among other items, profits that have been subject to a final tax at source or were exempt...
from tax and such exemption is extended to shareholders upon a distribution of such profits. The Maltese Taxed Account includes any other taxed profits while the Untaxed Account represents the difference between the distributable profits and the profits allocated to the other taxed accounts.

Under Malta’s system of taxation of dividends, shareholders receiving distributions from the Maltese Taxed Account and/or the Foreign Income Account may be entitled to a tax refund of part or the full tax paid by the distributing Maltese company on such profits being distributed. The tax refund may be either a six-sevenths refund, a five-sevenths refund, a two-thirds refund, or a full refund of the tax suffered by the Maltese distributing company on the distributed profits. The type of the tax refund depends on the nature of the income to be distributed.

**Deductions**

The basic condition for deductibility of expenses is that deductions are allowable only with respect to expenditures that are wholly and exclusively incurred in the production of income. However, the Maltese Income Tax Act also provides a number of exceptions whereby specific expenses of a capital nature may also be tax deductible, subject to the satisfaction of the statutory conditions applicable thereto. The following are some further comments on specific items of expenditure.

**Depreciation and depletion**

Tax depreciation is computed on the straight-line method. The rate of depreciation on plant and machinery varies according to the category of the plant and machinery in question.

Maltese tax law prescribes the minimum number of years over which items of plant and machinery are to be depreciated as follows:

<table>

</tbody>
</table>
The wear and tear rate on industrial buildings and structures (including hotels and car parks) may not exceed 2% per annum. New acquisitions of industrial buildings and structures are entitled to a concurrent extra 10% allowance in the year of acquisition. Tax depreciation is not required to conform to book depreciation.

The total allowances over the asset’s useful life may not exceed 100% of its cost. If a surplus arises on disposal of a tax-depreciated asset, it is either added to the year’s income or utilised to reduce the cost of any replacement. If the asset has been under-depreciated, a balancing allowance is granted.

No deduction is available for the depletion of natural resources.

The rules on tax deductions for wear and tear of plant and machinery provide for certain specific treatment in particular situations, including, among other things, the following:

- To establish the cost of an asset when it is transferred between related companies, the lower of the actual cost of the asset or the tax written-down value adjusted by any balancing charge or allowance incurred by the transferring company should be applied.
- Deductions for wear and tear are allowed only where proper records and documentation have been kept that support the cost of the respective assets.
- A proportional deduction is allowed where an asset is used partly in the production of income and partly for other purposes.

**Goodwill**

In the event that goodwill were to fall within the purport of IP for the purposes of the tax deductibility rules under Maltese tax law, then it may possibly be argued that an expenditure on goodwill may be tax deductible. However, this would need to be analysed on a case-by-case basis.

**Start-up expenses**

Certain pre-trading expenses (i.e. staff training, advertising, salaries/wages) are also allowed as a deduction, subject to the satisfaction of the following conditions:

i. The expenditure is incurred not more than 18 months before the commencement of the trade or business.

ii. The expenditure is not deductible in ascertaining the trading or business income of the person carrying on such trade or business but would have been so deductible under (i) above had it been incurred after that time.

In the event the above conditions are satisfied, such expenditure is treated as incurred on the day on which the trade or business is first carried on by the person.

**Interest expenses**

Interest on any borrowed money is an allowable deduction if it is paid on capital employed in acquiring income. The expense is allowable even though the borrowing would have been made for a capital purpose, but it is deductible only against the income derived in the same year from the employment of that capital. This special rule is in addition to the deduction for interest paid on money due on revenue account (such interest should be deductible under the general rule of deductibility), such as interest on trade debts or charged on normal business overdraft facilities. There is a restriction in respect of interest deductibility where the relevant advance is in connection with the financing of Maltese immovable property and subject to certain other conditions.

**Bad debt**

Bad debts incurred in any trade, business, profession, or vocation are allowed in the year they become bad if proved to the satisfaction of the tax authorities. No deduction is given for provisions for bad debts and for bad debts incurred in activities other than a
trade, business, profession, or vocation. Any bad debt that is later recovered is deemed as income for the year in which it is received.

**Charitable contributions**
The general rule is that charitable contributions are not deductible for Maltese tax purposes unless expressly provided for by law.

**Fines and penalties**
The general rule is that fines and penalties are not deductible for Maltese tax purposes. Nevertheless, there is an exception to this general rule that provides that interest paid or payable by any person in terms of the Maltese VAT Act will be treated as expenses incurred in the production of the income of that person for income tax purposes.

**Taxes**
The typical interpretation is that taxes suffered are not deductible for Maltese tax purposes, although certain exceptions may possibly apply.

**Other significant items**
Capital expenditures on scientific research, patents, and IP rights are written off over a number of years. In the case of scientific research, a deduction may be granted at 150% of the expenditure.

The Income Tax (Deductions) Rules of 2001 provide for specific conditions on deductions with respect to the use of cars and the payment of employee compensation. The cost on which capital allowances on certain motor vehicles may be claimed is restricted to EUR 14,000. Deductions for lease payments on cars are restricted in a manner that corresponds with the stated restriction of EUR 14,000 that applies to capital allowances on owned cars. With respect to payment of employee compensation, the Deduction Rules require that in order for employee compensation to be allowed as a deduction for tax purposes in the hands of the employing company, it must have been duly accounted for. In particular, the employee compensation must have been reported on the appropriate forms and within the statutory time limit to the Office of Inland Revenue. The rules also provide for restrictions on deductibility of emoluments with respect to the payment of certain fringe benefits to employees.

**Net operating losses**
Net operating losses may be carried forward indefinitely until absorbed. There is no carryback of losses, not even in terminal years. Unabsorbed capital allowances may be carried forward only against the same underlying source of income. Where the source ceases to exist, any remaining balance of unabsorbed capital allowances is lost.

**Payments to foreign affiliates**
There are no restrictions on the deductibility of royalties, interest (except for interest, discount, or premium that are in any manner connected to Maltese immovable property and subject to the satisfaction of certain other statutory conditions, in which case, the interest/discount/premium should not be tax deductible in Malta), and service fees paid to foreign affiliates as long as the particular expenses are considered to be incurred in the production of the particular income and satisfy the applicable statutory conditions. Interest, discount, premium, or royalties derived by non-residents are exempt from tax, subject to the applicable statutory requirements.

**Group taxation**
Two companies that for tax purposes are resident exclusively in Malta, where one company is a 50% plus subsidiary of the other or both are 50% plus subsidiaries of a third Malta-resident company, qualify as members of a group of companies. Allowable losses may be surrendered by a company to another company within the group.
where both companies have concurrent accounting periods and form part of such group throughout the entire basis year for which this relief is claimed; however, such surrendering of losses may not occur where the surrendering or claimant company is carrying on the business of insurance. The possibility of income tax consolidation has been introduced in Maltese tax law; however, rules covering the precise terms and conditions of such tax consolidation are still to be issued.

**Transfer pricing**
Malta does not operate a sophisticated transfer pricing regime. There are some general anti-avoidance provisions and brief references to transactions at arm’s length. However, the Maltese tax authorities will typically still consider it desirable that transactions between residents and non-residents broadly adhere to the arm’s-length principle, that is, prices that would have been concluded between independent enterprises. However, no specific rules are available on the manner in which an arm’s-length price is to be established.

**Thin capitalisation**
The Maltese tax regime does not contain thin capitalisation rules.

**Controlled foreign companies (CFCs)**
No anti-CFC rules or legislation are applicable in Malta.

---

**Tax credits and incentives**

**Foreign tax credit**
A credit for foreign taxes may be applied against the Maltese tax charge (see Foreign income in the Income determination section for more information).

**Inbound investment**
Investments by foreigners may be readily repatriated together with profits.

The Malta Enterprise Act and other related legislation provide a comprehensive package of incentives for inbound investment. These incentives are reserved for enterprises carrying on certain activities in Malta, mainly manufacturing activities. The focus is on high-value-added activities, and approval of a project’s eligibility for benefits by the Malta Enterprise may be required. In general, eligibility does not depend on whether the company produces for the local or for export markets. The main tax incentives include the following:

- Enterprises carrying out qualifying activities, which mainly include manufacturing activities, qualify for investment tax credits whereby a percentage of qualifying expenditures are off-set against the tax charge (not against taxable income). The Investment Aid (July 2014) Regulations, 2014 (the 'Regulations') were issued on 24 October 2014, and guidelines in this regard have been published by Malta Enterprise. Such guidelines form the basis of the new investment aid scheme that will be in force between 1 July 2014 and 31 December 2020. The Regulations apply to qualifying undertakings, which may benefit from investment tax credits in respect of certain qualifying activities, which are quantified as a percentage of qualifying expenditure incurred in terms of the guidelines. The tax credits range between 15% and 35% of the qualifying expenditure for projects commencing before 31 December 2017 and between 10% and 30% for projects commencing between 1 January 2018 and 31 December 2020, depending on the undertaking’s size.
- Certain tax credits and special incentives may be available, subject to certain conditions. These tax credits are calculated on the basis of specific expenditures incurred by a company, while the special incentives grant tax exemptions on all or part of the chargeable income in specified circumstances.
• No further tax is charged on distributions from profits that had previously been taxed at a reduced rate. This benefit is also extended to amounts that were not subject to tax on account of the investment allowance, investment tax credits, and specific tax credits/special incentives.

The combination of certain tax treaties and Maltese domestic law lowers the Maltese tax rate on certain companies receiving certain industrial assistance (i.e. mainly assistance in terms of the Malta Enterprise Act, Business Promotion Act, and Business Promotion Regulations) to 15%.

**International business profits**

Other Maltese tax considerations that may be relevant in an international business context include the following:

• A beneficial tax regime is available in respect of collective investment schemes.

• The Maltese fiscal implications relative to trusts and private foundations vary, depending on a number of circumstances, including: (i) the particulars of the parties involved (e.g. domicile or residence of the trustees/administrator or beneficiaries), (ii) the act or event under review (e.g. the settlement of property, transfers of beneficial interests, distributions of trust/foundation assets), and (iii) the nature of the trust/foundation assets. Furthermore, in certain circumstances, tax transparency provisions are set out in the law, particularly so as to allow, among other things, the application of tax exemptions that would have applied to beneficiaries if there was no trust relationship or foundation.

• An option exists for a step-up in the cost of acquisition of assets situated outside Malta (including companies) effecting a change in domicile or residence or becoming Maltese companies as a result of cross-border mergers.

**Withholding taxes**

Domestic corporations paying certain types of income are subject to deduction of tax-at-source obligations as follows:

<table>

Notes

Treaties relating to international air and shipping traffic are in force with Switzerland and the United States.

The numbers in parentheses refer to the following notes:

1. No WHT is imposed on dividends distributed by Maltese companies (except for distributions of untaxed income to resident persons other than companies, refer to Note 5) because no additional tax is imposed on distributions other than the tax charged on the company with respect to the distributed profits. Malta makes no distinction between portfolio and substantial holdings. Under Maltese law, the dividend is grossed up by a figure representing the tax imposed on the company’s profits when these were originally earned thereby. Under Malta’s full-imputation system of taxation of dividends, the corporate tax is assimilated with the shareholder’s personal income tax with respect to the dividend. In the shareholder’s hands, the dividend is taxed at the gross amount, and the relevant amount of corporate tax offsets the shareholder’s tax liability on income from all taxable sources with no further tax liability being imposed on the shareholder in respect of such dividends.

2. Withholding of tax may be required only where the interest is debenture interest or interest on any other loan advanced to a corporation for capital purposes. The WHT is, in effect, a prepayment of the recipient’s final liability because a reassessment on income is made upon the submission of returns. Any resulting overpayment is refunded.

3. Interest and royalty income derived by non-residents is exempt from tax in Malta as long as certain conditions are complied with (e.g. they are not effectively connected to a PE of the recipient situated in Malta).

4. On the basis that Malta operates the full-imputation system of dividends, dividends are not subject to further tax when distributed by a company registered in Malta to a non-Maltese resident. Furthermore, if the rate provided under the Dividends Article in the respective treaty provides for a lower rate than the Maltese corporate tax rate incurred by the company on the respective profits (standard corporate tax rate of 35%), then this may result in a refund of Maltese tax in terms of Malta’s full imputation system (such a refund situation may arise in the treaties with Austria, Bulgaria, Kuwait, Libya, and Romania). In a number of treaties, the rate of deduction and of tax is reduced to 15% in the case of companies enjoying certain tax incentives. See also Note 1 with respect to Malta’s full-imputation system of taxation of dividends.

5. Distributions of dividends by a Maltese company where the dividend represents a distribution of untaxed income attracts a 15% WHT where the shareholder is (i) a Maltese resident other than a company, (ii) a non-resident person who is directly or indirectly owned and controlled by, or acts on behalf of, a Maltese domiciled and ordinarily-resident individual, or (iii) an EU/EEA individual who has declared that at least 90% of worldwide income is derived from Malta.

---

**Tax administration**

**Taxable period**

The year of assessment is a calendar year, but a company may obtain authorisation from the Maltese Revenue to have a different year end (i.e. other than 31 December).

**Tax returns**

An income tax return for income earned during the previous year must be filed for every year of assessment. The tax return for a company must be submitted by the later of nine months following the end of the financial year or by 31 March following the year of assessment (however, in recent years the Commissioner for Revenue has provided concessionary extensions to such statutory deadlines in the case where the tax return is submitted electronically). Penalties are incurred on late filing of returns. The tax return submitted by the company is a self-assessment, and the Commissioner for Revenue will not raise an assessment unless the Commissioner is not in agreement with the self-assessment.
Payment of tax
Companies pay tax in the currency in which their share capital is denominated.

During the basis tax year, a company is generally required to make provisional tax (PT) payments every four months. In general, the PT payments are based on the last self-assessment filed by the company, and payments are divided into three instalments of 20%, 30%, and 50%, respectively. Any tax liability that is still due at the tax return date after deducting all tax credits must be settled immediately with the submission of the return. Interest at 0.75% per month is charged on any unpaid tax.

In certain instances, especially for companies with mostly international operations, PT may not be payable, and the tax payment is normally paid on the earlier of the date profits are distributed or 18 months after the end of the relative accounting period.

Tax audit process
The Maltese Inland Revenue is entitled to raise an investigation and notify the taxpayer in writing that the department is initiating a tax enquiry. In such investigations, the taxpayer will typically be required to provide information and supporting documentation in respect of queries raised by the Revenue. The taxpayer has a right to appoint a representative on their behalf.

Statute of limitations
An assessment (as from year of assessment 1999) may be issued by the Maltese Revenue no later than six years from the end of the respective tax year. In the event of non-full disclosure or wilful incorrect/misleading information, the aforesaid prescription period will not apply.

In respect of the payment of tax, additional tax, interest, or any penalty, an action may be taken during any time from the date on which it becomes due and payable up to eight years from that date or, where an assessment in respect thereof has been made, from the date on which that assessment becomes final and conclusive.

Topics of focus for tax authorities
We are not aware of any particular topics of focus by the Maltese tax authorities. One might say that typically the Maltese Revenue is particularly wary with respect to activities and transactions concerning immovable property situated in Malta.

Other issues

US FATCA
The agreement concluded between the Republic of Malta and the United States to improve international tax compliance and to implement the FATCA (the ‘Agreement’) entered into force on 26 June 2014. Furthermore, on 18 November 2014, the FATCA Regulations were accordingly issued implementing the said IGA. Guidelines on the implementation and interpretation of the FATCA Regulations and the said Agreement have been issued by the Maltese Inland Revenue Department.

---

**Significant developments**

**Base erosion and profit shifting (BEPS)**

In order to discourage artificial structures, the Mauritius Revenue Authority (MRA) is following closely the development around BEPS in order to strengthen the domestic tax legislation. For instance, in cases where multinational companies use Mauritius as mere holding companies following treaty shopping, Mauritius has introduced additional substance requirements.

The MRA awaits Organisation for Economic Co-operation and Development (OECD) recommendations for further action.

---

**Taxes on corporate income**

A corporation resident in Mauritius is subject to tax on its worldwide income. A non-resident corporation is liable to tax on any Mauritius-source income, subject to any applicable tax treaty provisions.

Corporations are liable to income tax on their net income, currently at a flat rate of 15%.

Mauritius has a credit system of taxation whereby foreign tax credit is given on any foreign-source income declared in Mauritius on which foreign tax of similar character to Mauritian tax has been imposed.

All corporate bodies incorporated in Mauritius (except companies holding a Category 2 Global Business Licence and certain approved funds and associations) are subject to income tax. This applies to all associations and other registered bodies. Income derived by local partnerships is shared and taxed in the hands of the partners. Foreign corporations carrying on business, or having a place of business, in Mauritius are also liable to income tax on income derived from Mauritius. Resident sociétés are not liable to corporate tax.

**Société** means a société formed under any enactment in Mauritius and includes:

- a société de fait or a société en participation
- a limited partnership
- a joint venture, and
- a société or partnership formed under the law of a foreign country.

Income tax is payable on total net income before distribution at the following rates:

<table>
<thead>
<tr>
<th>Entity</th>
<th>Rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Global Business Category 1 (GBC1) companies and offshore trusts (see below)</td>
<td>15</td>
</tr>
<tr>
<td>Freeport operators or Private Freeport Developers carrying on Freeport activities</td>
<td>Exempt</td>
</tr>
<tr>
<td>other than providing goods and services on local markets</td>
<td></td>
</tr>
</tbody>
</table>
Mauritius

<table>
<thead>
<tr>
<th>Entity</th>
<th>Rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Global Business Category 2 (GBC2) companies (see below)</td>
<td>Exempt</td>
</tr>
<tr>
<td>All other companies</td>
<td>15</td>
</tr>
</tbody>
</table>

Global Business Category 1 (GBC1) companies are liable to tax at the rate of 15%. However, they are entitled to a foreign tax credit equivalent to the higher of 80% of the Mauritius tax chargeable or the actual tax suffered abroad in respect of foreign-source income. The maximum effective tax rate is therefore 3%.

Global Business Category 2 (GBC2) companies incorporated under the laws of Mauritius are exempt from income tax and are not tax residents for treaty purposes. For more information, see the Tax credits and incentives section.

**Alternative minimum tax (AMT)**

AMT is repealed as of 1 July 2015.

**Special levies**

**Banks**

All banks are required to pay a special levy calculated according to their book profit and their operating income derived during, or its chargeable income in respect of, the preceding year. ‘Operating income’ means the sum of net interest income and other income before deducting non-interest expense.

The rates of the special levy on banks are as follows:

<table>
<thead>
<tr>
<th>Year of assessment commencing</th>
<th>Rates</th>
</tr>
</thead>
<tbody>
<tr>
<td>1 January 2014 and 1 January 2015</td>
<td>Segment A: 10% of chargeable income; Segment B: 3.4% on book profit; 1.0% on operating income</td>
</tr>
<tr>
<td>1 July 2015, 1 July 2016, and 1 July 2017</td>
<td>Segment A: 10% of chargeable income; Segment B: 3.4% on book profit; 1.0% on operating income</td>
</tr>
</tbody>
</table>

Segment A: Banking transactions with residents.

Segment B: Banking transactions with non-residents and corporations holding a Global Business Licence.

Except where the levy is computed on chargeable income, no levy shall be paid in a year where in the preceding year:

- the bank incurred a loss, or
- the book profit of the bank did not exceed 5% of its operating income.

**Telephony service providers**

Providers of public fixed or mobile telecommunication networks and services (including information and communication services, such as value added services and mobile internet), commonly known as ‘operators’, are liable to a solidarity levy. The solidarity levy is calculated according to the book profit and turnover for the preceding income year of the operator. The applicable rates are as follows:

Years of assessment commencing 1 January 2014, 1 January 2015, 1 July 2015, 1 July 2016, and 1 July 2017: 5% of the book profit and 1.5% of the turnover of the operator.
‘Book profit’ means the profit derived by an operator from all its activities and computed in accordance with International Financial Reporting Standards (IFRS).

No levy is to be paid in a year where, in the preceding year, the operator incurred a loss or the book profit of the operator did not exceed 5% of its turnover.

**Corporate Social Responsibility (CSR) Fund**

Every year, a company has to set up a CSR Fund equivalent to 2% of its chargeable income of the preceding year to implement a CSR Programme in accordance with its own CSR framework.

Note that the following entities are not subject to the CSR regulations:

- A company holding a GBC1 Licence under the Financial Services Act.
- A bank holding a banking licence under the Banking Act, in respect of its income derived from its banking transactions with non-residents or with corporations holding a Global Business Licence under the Financial Services Act.
- An Integrated Resort Scheme (IRS) company referred to in the Investment Promotion (Real Estate Development Scheme) Regulations 2007.
- A non-resident société, a foundation, a trust, or a trustee of a unit trust scheme.

The CSR Fund is either disbursed by the company on its own CSR framework or remitted to the MRA if not expensed fully.

A company has to submit, as an annex to its return of income, a statement showing the amount of CSR spent and the details of CSR projects implemented by the company during the income year.

Please also note the following:

- Any amount underpaid (not exceeding 20% of the Fund provided) in respect of a year can be carried forward to the following year to form a part of the CSR Fund for that following year, and the remaining amount should be remitted to the MRA.
- Any amount overpaid compared to the amount provided can be carried forward (in an amount not exceeding 20% of the amount provided) and offset in equal instalments against any amount to be remitted in respect of the five succeeding years. The carryforward does not apply to any excess arising in respect of more than two consecutive years.
- The CSR Fund in respect of a year includes any amount brought forward to that year.
- The CSR Fund shall apply in all respects to a resident société, other than a resident société holding a Global Business Licence under the Financial Services Act, and its net income shall be deemed to be its chargeable income and any distribution of its net income shall, for the purposes of the CSR Fund, be deemed to be dividends.

**Local income taxes**

Local income taxes levied by local administration, such as urban councils, do not exist in Mauritius.

**Corporate residence**

Under domestic law, a company is resident in Mauritius for tax purposes if it is incorporated in Mauritius or centrally managed or controlled in Mauritius.

A company not incorporated in Mauritius is resident in Mauritius only if it is centrally managed and controlled in Mauritius.
Mauritius

In the absence of a tax treaty, any income derived from the following is taxed in Mauritius:

- Any business carried on wholly or partly in Mauritius.
- Any contract wholly or partly performed in Mauritius.

A GBC2 company is not considered a resident in Mauritius for the purposes of double taxation treaties (DTTs).

Under a tax treaty, a company is considered a resident in Mauritius if it is incorporated in Mauritius or if its effective management is in Mauritius.

**Permanent establishment (PE)**

Generally, a PE is created under a tax treaty if one of the following criteria is met:

- Branch, office, factory, workshop, or installation used for extraction of natural resources.
- Building site, construction, installation, assembly, or supervisory services where the activity on the site lasts for a minimum of six months or 12 months, depending on the tax treaty.

**Other taxes**

**Value-added tax (VAT)**

VAT is charged by VAT-registered entities at the standard rate of 15% on all goods and services supplied by them in Mauritius (except those taxed at 0%), other than the following exempt supplies (not an exhaustive list):

- Bread, wheat, and cereal flours (excluding wheat flour).
- Medical, hospital, and dental services, including clinical laboratory services, services provided in a health institution, and veterinary services.
- Educational and training services provided by institutions approved by the Mauritius Qualification Authority.
- Construction of building for residential purpose, provided letter of intent relating to an IRS was issued prior to 1 October 2006.
- Sale or transfer of an immovable property, a building or part of a building, apartment, flat, or tenement.
- Banking services, except:
  - services provided to merchants accepting credit/debit card
  - services in respect of safe deposit locker, and issue and renewal of credit/debit cards
  - services for keeping and maintaining customer’s accounts, and
  - services supplied by a bank holding a banking licence under Banking Act 2004 in respect of its banking transactions with non-residents and corporations holding a Global Business Licence.

As of 1 July 2015, an entity should register for VAT if turnover exceeds 6 million Mauritian rupees (MUR) a year. However, certain service providers (e.g. accountants and auditors, attorneys and solicitors, consultants, surveyors, valuers) should register for VAT irrespective of their turnover.

VAT-registered persons with annual taxable turnover exceeding MUR 10 million should submit their VAT return monthly and electronically by the end of the month following the end of the taxable month. Otherwise, VAT return filing is completed quarterly (i.e. within 20 days following the end of a taxable quarter). The taxable quarter is a period of three months ending at the end of March, June, September, or December. Also, where the VAT-registered persons are filing pay-as-youearn (PAYE) returns electronically
under the Income Tax Act, they are required to file the VAT returns electronically by the end of the month following the taxable period.

**Customs duties**
Customs duty is levied on commodities imported into Mauritius. The rate of duty applicable is the rate in force under the Customs Tariff Act at the time the bill of entry is validated at the Customs.

A number of exemptions and concessions are available to industries, organisations, and persons under the Customs Tariff Act.

**Excise taxes**
An excise duty is levied at the time of importation on selected commodities, which includes spirits, vehicles, and petroleum products at corresponding prescribed rates. A levy is also chargeable on some specified excisable goods, whether the goods are for home consumption or not, at corresponding prescribed rates.

**Campement site tax**
Per the Land (Duties and Taxes) Act, every owner of a campement site situated in a specified zone is subject to an annual tax known as the campement site tax, varying between MUR 2 to MUR 6 per square metre.

The tax shall be payable to the authorised officer on or before 31 July in every year.

**Land transfer tax**
Per the Land (Duties and Taxes) Act, land transfer tax is levied on the transfer of land (excluding the value of any building thereon) and is payable by the transferor at the rate of 5%.

Land transfer tax is also payable at the above rates by the transferor upon transfer of the shares of a company owning immovable properties, based on the value of shares or property, whichever is the lower.

**Leasehold tax**
Per the Land (Duties and Taxes) Act, leasehold tax is levied on the registration of a deed of transfer of leasehold rights in state land. Both the lessor and the lessee are liable to leasehold tax (in equal proportion) at the rate of 20% on the open market value of the leasehold right at the time of transfer.

**Registration duty**
The Registration Duty Act provides for a duty at an effective rate of 5% of the sum of money paid as a condition of an exchange of immovable property, or a division in kind of immovable property, where such sum does not exceed MUR 100,000.

The transfer of shares of a company other than those listed on the Stock Exchange of Mauritius or traded on the secondary market is subject to registration duty if the company holds immovable property.

The following transactions are not subject to registration duty:

- A transfer of immovable property from ascendant to descendant (or vice versa).
- A transfer of property made to a company holding a letter of approval for the implementation of a project under the Real Estate Development Scheme, provided that the transferor holds shares in the company equivalent to at least the value of the land transferred.
- A transfer of immovable property or shares between companies forming part of a group of companies, as defined in the Companies Act 2001.
Mauritius

- A transfer of immovable property where such transfer takes place between companies having the same shareholders for the sole purpose of merging.

**Stamp duty**
Stamp duty is levied and paid to the Registrar General on every document at the time of registration, transcription, inscription, or erasure of inscription. Stamp duty varies from MUR 25 to MUR 1,000.

**Social security contributions**

**National Pensions Fund (NPF)**
Contributions to the NPF are payable by the employer at 6% of cash remuneration, up to a maximum remuneration of MUR 15,710 per month. Employees contributed to the NPF at 3%, subject to a maximum amount of MUR 471 per month.

**National Savings Fund (NSF)**
Employers are required to contribute 2.5% of remuneration to the NSF, subject to a maximum of MUR 393 per month per employee, and to pay a monthly levy of 1.5% of basic salaries and wages of every employee. Employees are required to pay a 1% levy, subject to a maximum amount of MUR 157 per month.

**Payroll taxes**
Every employer has to register with the MRA as an employer and has to withhold income tax from the emolument of the employee at the time the emolument is made available to the employee.

The employer has to remit the amount withheld within 20 days from the end of the month in which the tax was withheld. Where the employer has 25 or more employees, the PAYE return and tax withheld should be remitted electronically. In cases where the employer has less than 25 employees, the PAYE return and tax withheld may be remitted electronically.

Failure to comply with the above entails a penalty of 5% of the unpaid tax and an interest of 1% per month or part of the month during which the tax remained unpaid.

**Branch income**
Tax rates on branch income are the same as on corporate profits. No tax is withheld on the remittance of profits by way of dividend to a head office.

**Income determination**

**Inventory valuation**
Inventories should be valued at the lower of historical cost or net realisable value. The last in first out (LIFO) basis of valuation is not allowed for tax purposes.

Conformity is required between book and tax reporting. Where the MRA is not satisfied that the basis of valuation is acceptable (e.g. where the LIFO basis has been applied), it will make such adjustment as it believes is appropriate to determine the profits arising from the business carried on.

**Capital gains**
There is no tax on capital gains in Mauritius. However, certain transactions are taxed as ordinary business profit instead of capital gains. Where a transaction is in the nature of trade, the MRA may take the view that it is an ordinary trading transaction and assess the gains derived as income.
Any gains derived from the sale of shares held for less than six months are classified as trading income and are therefore taxed as ordinary income.

Gains realised from the sale of any property or interest in property acquired in the course of a business, as part of a profit-making undertaking or scheme, are taxable as ordinary income.

**Dividend income**
Companies, whether resident or not, are exempt from tax on dividends received from resident companies.

Dividend income received from abroad by a company resident in Mauritius (non-GBC1 company) is subject to tax at the rate of 15%. Credit for any foreign tax withheld is given, subject to documentary evidence provided to the MRA.

Dividend income received from abroad by a GBC1 company is subject to tax at an effective rate of 3%.

**Stock dividends**
A resident company can distribute stock dividends (bonus shares) proportionately to all of its shareholders. Stock dividends *per se* or convertible into cash are not taxable in the hands of the recipient. Dividends in kind (i.e. other than cash or shares) are treated as taxable benefits.

**Interest income**
Interest income received by resident companies (non-GBC1 companies) is liable to tax at the rate of 15%.

A GBC1 company receiving interest income from abroad is liable to tax at the effective rate of 3%.

Interest income paid by any person, other than by banks or non-bank deposit-taking institutions under the Banking Act, to individuals and non-residents is liable to withholding tax (WHT) at the rate of 15% (final tax).

**Foreign income**
Resident corporations are taxed on their worldwide income, but tax credit and treaty relief is generally available in order to avoid double taxation (see Foreign tax credits in the Tax credits and incentives section for more information).

Undistributed income of foreign subsidiaries is not subject to any special taxation as long as the income of the foreign subsidiary before distribution is not included in the accounts of the local parent company. Dividends paid by the foreign subsidiary to the local parent company will, however, be taxable to the latter, whether or not such dividends are actually received in Mauritius.

**Deductions**

**Depreciation**
Annual allowance rates vary between 5% and 100% of base value (unless stated otherwise), as per the following table:

<table>
<thead>
<tr>
<th>Capital expenditure incurred on</th>
<th>Rate of annual allowance</th>
</tr>
</thead>
<tbody>
<tr>
<td>Industrial premises, excluding hotels</td>
<td>Percentage of Base value Cost</td>
</tr>
<tr>

</tr>
<tr>
<td>Acquisition or improvement of any other item of a capital nature that is subject to depreciation under the normal accounting principles</td>
<td>5</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Tax depreciation need not conform to book depreciation. Depreciation is generally recaptured on disposal or sale when balancing charges or allowances are computed.

**Goodwill**

Goodwill amortised under normal accounting principles is not allowed as an expense for tax purposes. However, the cost amount can be capitalised, and an annual allowance of 5% of cost can be claimed.

**Leasing agreements**

There has been a substantial increase in leasing activity over the last decade. Where an asset is transferred under a financial lease agreement, the lessee is entitled to capital allowances on the value of the asset, including finance charges, as if it was an outright sale by the lessor.

On the other hand, the lessor cannot capitalise the leased assets in its books, and no capital allowance is claimed on the assets leased. However, the lessor is taxable on the interest income derived from the assets leased.

There are no special rules for operating leases.

**Set-up costs**

Set-up costs are not deductible for tax purposes as they are considered as pre-operational expenses.

**Interest expenses**

Expenditure incurred on interest is deductible, provided it is incurred in respect of capital employed exclusively in the production of income.

A request can be made by the tax authorities to support any claim made in respect of interest expense by a certificate from a qualified auditor certifying that the amount of
interest claimed has been incurred on capital employed exclusively in the production of gross income.

Interest paid by a GBC1 company to a non-resident is exempt from corporate tax.

The tax authorities may refuse to allow a deduction on expenditure incurred as interest where it is found that:

- the interest is payable to a non-resident who is not chargeable to tax on the amount of the interest, or
- the interest is not likely to be paid in cash within a reasonable time.

**Bad debt**
A provision for bad or doubtful debt is generally not deductible unless a court ruling has been obtained against the debtor.

**Charitable contributions**
Donations/gifts, whether to charitable institutions or not, are not deductible for tax purposes.

**Fines and penalties**
Fines and penalties are not deductible for tax purposes as they are expenses not exclusively incurred for the production of gross income.

**Taxes**
Income taxes and foreign taxes paid are not normally deductible; however, some taxes (e.g. municipal taxes relating to buildings, land transfer tax, irrecoverable input VAT) are deductible.

**Other significant items**
A bank or an approved financial institution may claim as deductions any irrecoverable loans due by a company in liquidation in respect of which winding-up procedures have started or by a company in receivership.

**Net operating losses**
Losses made in an accounting year are carried forward for a maximum of five years.

A company may claim to carry forward to an income year any loss it incurred in any former income year, provided the company can demonstrate a 50% continuity of shareholding at the end of those income years. Losses resulting from capital allowances can be carried forward indefinitely. Loss carrybacks are not permitted.

Where a company takes over another company engaged in manufacturing activities, or two or more companies engaged in manufacturing activities merge into one company, any unrelieved loss of the acquiree may be transferred to the acquirer in the income year in which the takeover takes place, on such conditions relating to safeguard of employment as may be approved by the Minister of Finance.

**Payments to foreign affiliates**
Royalties, interest, and service fees payable to foreign affiliates are allowed as expenses, provided they correspond to actual expenses incurred, are reasonable, and do not exceed what would be paid under an arm’s-length agreement. There are certain limitations if the recipient of the interest is not liable to Mauritius tax. Royalties paid to non-residents by GBC1 companies, banks out of their foreign-source income as defined in the Income Tax Act, and trusts are tax-exempt.
Mauritius

**Group taxation**

There are no group taxation provisions in the Mauritius tax legislation other than the transfer of losses by tax incentive companies, sugar factory operators, subsidiaries located in the Island of Rodrigues, and manufacturing companies upon their take-over (see Net operating losses in the Deductions section for more information).

**Transfer pricing**

Mauritius does not have any specific transfer pricing legislation. However, it does contain an arm’s-length provision requiring transactions between related parties to reflect a commercially objective value, which would be the amount charged for the services were the parties not connected.

**Thin capitalisation**

Mauritius does not have specific thin capitalisation legislation; however, it does have other anti-avoidance provisions as described below:

If a company has issued debentures to each of its shareholders, subject to the number, the nominal value, or paid-up value of the shares in that company, any interest paid on debentures and claimed as a deductible expense may be disallowed and treated as a dividend.

**Controlled foreign companies (CFCs)**

There are no CFC rules under Mauritius tax legislation.

**Tax credits and incentives**

**Global Business Category 1 and 2 companies**

A GBC1 company can trade with a Mauritian resident as well as non-residents. Transactions made with a Mauritian resident are taxed at the rate of 15%, whereas transactions with non-residents are taxed at an effective tax rate of 3%.

The registration and application of GBC1 companies should be submitted to the Financial Services Commission (FSC) through a duly licensed Management Company on a prescribed form accompanied by the following:

- The certified supporting documents.
- The applicable processing fees and relevant fees.

A GBC1 company is tax resident in Mauritius and may apply for a Tax Residence Certificate (TRC) from the Director General of the MRA should this be required by the tax authorities in the jurisdiction in which the company is conducting its business.

Investors may benefit from an extensive network of DTTs. Entities holding a GBC1 Licence wishing to avail to the benefits of a DTT must obtain a TRC issued by the MRA.

A GBC1 company is encouraged to have more substance in Mauritius by ascertaining the following:

- It has at least two directors, resident in Mauritius, of sufficient calibre to exercise independence of mind and judgment.
- It maintains, at all times, its principal bank account in Mauritius.
- It keeps and maintains, at all times, its accounting records at its registered office in Mauritius.
- It prepares, or proposes to prepare, its statutory financial statements and causes or proposes to have such financial statements to be audited in Mauritius.
In addition to the requirements mentioned above, when determining whether a corporation is managed and controlled from Mauritius, the Commission shall also consider whether a corporation meets at least one of the following criteria:

- The corporation has or shall have office premises in Mauritius.
- The corporation employs or shall employ on a full-time basis, at the administrative/technical level, at least one person who shall be resident in Mauritius.
- The corporation’s constitution contains a clause whereby all disputes arising out of the constitution shall be resolved by way of arbitration in Mauritius.
- The corporation holds, or is expected to hold, within the next 12 months, assets (excluding cash held in a bank account or shares/interests in another corporation holding a Global Business Licence) that are worth at least 100,000 United States dollars (USD) in Mauritius.
- The corporation’s shares are listed on a securities exchange licensed by the Commission.
- The corporation has, or is expected to have, a yearly expenditure in Mauritius that can be reasonably expected from any similar corporation that is controlled and managed from Mauritius.

The above is in force as of 1 January 2015.

A GBC1 company can apply for a TRC to show substance in Mauritius. The TRC is generally issued within a period of seven days from the date of application, provided that the person has submitted the return required under the Income Tax Act 1995.

A GBC2 company is required to have, at all times, a registered agent in Mauritius. Only a management company shall act as the registered agent of a company holding a GBC2 Licence. A GBC2 company is defined as a resident corporation conducting business outside Mauritius and can engage in activities other than the following:

- Banking.
- Financial services.
- Holding, managing, or otherwise dealing with a collective investment fund or scheme as a professional functionary.
- Providing registered office facilities, nominee services, directorship services, secretarial services, or other services for corporations.
- Providing trusteeship services by way of business.

An applicant for a GBC2 Licence must submit the following forms/documents to the FSC through a management company:

- The application form, duly filled in and signed.
- The certified supporting documents.
- The applicable processing fees and relevant fees.

The fees payable to the FSC for registering a GBC1 and a GBC2 company are as follows:

<table>
<thead>
<tr>
<th>Fee</th>
<th>GBC1 (USD)</th>
<th>GBC2 (USD)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Processing</td>
<td>500</td>
<td>100</td>
</tr>
<tr>
<td>Annual Licensing</td>
<td>1,750</td>
<td>235*</td>
</tr>
</tbody>
</table>

* This amount excludes the annual registration fee of USD 65, or such other fee as the Registrar of Companies may determine, payable to the Registrar of Companies.

The TRC is renewable on an annual basis and issued in two formats, one specific to India and one general for any other country.
A GBC2 company is a limited liability company incorporated in Mauritius. However, GBC2 companies are exempt from Mauritius tax and are not required to file tax returns. GBC2 companies are therefore not able to access the tax treaty network of Mauritius.

**Companies in the Freeport zone**
The income of a Freeport operator derived from Freeport activities is exempt from income tax, except for income that is derived from goods or services provided on the local market.

**Income tax exemption for vessel owners**
Owners of foreign vessels registered in Mauritius are exempt from income tax on income derived from the operation of such vessels, including any income derived from the chartering of such vessels. Owners of local vessels registered in Mauritius are also exempt to the extent that the income is derived from deep-sea international trade only.

**Foreign tax credits**
Generally, double taxation is avoided by means of unilateral credit relief for foreign tax paid. The net amount of foreign income that has borne tax is grossed up at the foreign rate of tax, and the foreign tax paid is allowed as a credit against the Mauritius tax payable. However, the tax credit cannot exceed the Mauritius tax referable to the relevant foreign income. Unused credit is not refunded.

Regarding foreign income derived from countries with which Mauritius has DTTs, a tax credit is given for foreign tax in accordance with the treaties. There are clauses in the DTTs that provide that income arising from certain specified foreign sources is to be exempt from Mauritius tax.

Mauritius has signed DTTs with 41 countries (see the Withholding taxes section for a listing).

The following treaties await ratification: Gabon, Kenya, Malta, Nigeria, Russia, and Rwanda, and South Africa (renegotiating).

The following treaties await signature: Burkina Faso, Cabo Verde, Ghana, Morocco, and Malta.

The following treaties are being negotiated: Algeria, Canada, Czech Republic, Greece, Hong Kong, Lesotho, Malawi, Montenegro, Portugal, Republic of Iran, Saudi Arabia, St. Kitts and Nevis, Tanzania, Vietnam, and Yemen.

A GBC1 company may, in the absence of evidence of payment of foreign tax, claim as tax credit (presumed tax credit) an amount equal to 80% of the Mauritius tax chargeable on the foreign-source income. The presumed tax credit may also be claimed by a bank against the tax payable on income derived from banking transactions with non-residents and with GBC1 and GBC2 companies.

In the case of foreign dividends, the general tax credit includes foreign tax imposed on the profits out of which the dividends are paid (underlying tax), provided that the shareholding in the foreign company is at least 5%.

Mauritius also allows a tax-sparing credit under its local tax legislation.

**Withholding taxes**
There is no WHT in Mauritius for payments made by GBC companies to non-residents not carrying out any business in Mauritius. There is no WHT on dividends received from resident companies and on payments made by a company having an annual turnover...
of less than MUR 6 million. The table below shows the rates of WHT applicable for the following payments:

<table>
<thead>
<tr>

### Notes

1. Same rate as under domestic law.
2. 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that directly holds at least 10% of the capital of the company paying the dividends; 10% of the gross amount of the dividends in all other cases.
3. 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that directly holds at least 10% of the capital of the company paying the dividends; 15% of the gross amount of the dividends in all other cases.
4. 8% of the gross amount of the dividends if the beneficial owner is a company that directly holds at least 25% of the capital of the company paying the dividends; 10% of the gross amount of the dividends if the beneficial owner is a company that holds less than 25% of the capital of the company paying the dividends; 15% of the gross amount of the dividends in all other cases.
5. 5% of the gross amount of the dividends if the beneficial owner is a company that directly holds at least 15% of the capital of the company paying the dividends; 10% of the gross amount of the dividends if the beneficial owner is a company that directly holds at least 10% of the capital of the company paying the dividends; 15% of the gross amount of the dividends in all other cases.
6. 10% of the gross amount of the dividends if the beneficial owner is a company that directly holds at least 10% of the capital of the company paying the dividends; 15% of the gross amount of the dividends in all other cases.
7. If the beneficial owner of the dividends is a resident of the other contracting state, the tax so charged shall not exceed 15% of the gross amount of the dividends. However, if the beneficial owner is a company (other than a partnership) that holds at least 10% of the voting power of the company paying the dividends, the dividends shall be exempt from tax in the contracting state of which the company paying the dividends is a resident.
8. 10% of the gross amount of the interest if the beneficial owner is a financial institution, an insurance company, or an investment company receiving income from financial investments; 15% in all other cases.
9. 10% of the gross amount of the interest if it is received by any financial institution (including an insurance company); 15% in all other cases.
10. 5% of the gross amount of the royalties received as consideration for the use of, or the right to use, any copyright of literary, artistic, or scientific work, excluding cinematograph films, tapes, or discs for radio or television broadcasting. 15% is applicable on the gross amount of the royalties in any other case.
11. 10% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that controls, directly or indirectly, at least 25% of the voting power in the company paying the dividends. 20% is applicable on the gross amount of dividends in all other cases.
12. 5% of the gross amount of dividends if the beneficial owner is a company holding at least (directly or indirectly) 25% of the shares of the company paying the dividend. 10% applies on the gross dividend in all other cases.

### Tax administration

#### Taxable period

Companies are assessed for a year beginning 1 July and ending 30 June on their income for the preceding year ending 30 June. Where a company closes its accounts at a date
other than 30 June, it may elect to adopt as a basis year the accounting year ending in
the 12-month period preceding the year of assessment.

**Tax returns**
Every company, both taxpayer and non-taxpayer, must file a return of its income on
the basis of the income year preceding the year of assessment. The return must be filed
within six months of the financial year-end.

**Payment of tax**
Any tax due should be paid when the return is filed and within the six months deadline.

**Advance Payment System (APS)**
Every company (except non-resident trusts and non-resident partnerships) having gross
income exceeding MUR 410 million or that has taxable income is required to submit
an APS statement and pay any tax for the quarter immediately following the end of the
accounting year.

Tax under APS can be calculated based on the following:

- 25% of taxable income for the accounting year immediately preceding the
  commencement of that quarter or
- the actual taxable income of the current quarter.

The APS statement shall be filed and tax (if any) shall be payable within three months
from the end of the quarter.

**Penalties**
If timely payment is not made, a penalty representing 5% of the amount of tax due is
payable. In addition, interest at the rate of 0.5% of the tax unpaid for each month or
part of a month is payable until the tax is paid. A penalty of MUR 2,000 for each month
or part of a month is also prescribed for failure to file a return, subject to a maximum of
MUR 20,000.

**Tax audit process**
Tax audits are carried out on a sample basis throughout the year. Generally, the audits
are fairly detailed, but more protracted enquiries are carried out into cases where fraud
is suspected.

**Statute of limitations**
While there is no statutory time limit for recovering tax already assessed, the Director
General is barred from making an assessment for a period beyond three years preceding
the current tax year.

**Topics of focus for tax authorities**
The MRA pays special attention to the arm’s-length nature of any transactions between
related parties and evidence of foreign tax suffered predominantly for GBC1 companies
in respect of their claim for actual foreign tax credit.

**Other issues**

**United States (US) Foreign Account Tax Compliance Act (FATCA)**
On 27 December 2013, the government of the Republic of Mauritius and the government
of the United States of America signed an Agreement for the Exchange of Information
Relating to Taxes (the Agreement) to set the legal framework to enable exchange of tax
information between the two countries. This was followed by the signing of another
agreement known as the Inter-Governmental Agreement (Model 1 IGA) to improve
international tax compliance and to implement FATCA. Both agreements have been
Mauritius

The Agreement provides for exchange of tax information (upon request, spontaneous and automatic) between Mauritius and the United States. The IGA provides for the automatic reporting and exchange of information in relation to accounts held with Mauritius financial institutions by US persons and the reciprocal exchange of information regarding financial accounts held by Mauritius residents in the United States.

The MRA has issued guidance notes (available on MRA’s website) to provide practical assistance to financial institutions, businesses, their advisers, and officials dealing with the application of FATCA.
Significant developments

There have not been any significant changes to the corporate tax system in Mexico since the approval of the major tax reform enforced in January 2014. Some of the relevant and related developments are as briefly described as follows:

Fiscal Certainty Agreement
In February 2014, the Mexican Executive Branch announced a unilateral agreement aimed to create fiscal stability and certainty to taxpayers, whereby the Mexican government committed, among others, to the following actions:

- Not proposing new federal taxes nor increasing the rates of existing federal taxes until the end of the current administration's term, which is 30 November 2018.
- Not limiting or eliminating the existing tax benefits or tax exemptions in regards to federal taxes until the end of the current administration's term, which is 30 November 2018.

Electronic accounting reporting
As of 2015, Mexican tax residents are required to submit to the Mexican Collection Agency certain accounting information. Filing obligations for various groups of taxpayers apply for the periods beginning:

- 2015: Financial system institutions and taxpayers with taxable income of 4 million Mexican pesos (MXN) or more.
- 2016: Taxpayers with taxable income of less than MXN 4 million, taxpayers engaged in agricultural, forestry, farming, or fishing activities (Primary Sector), non-profit entities, and taxpayers that obtain their Federal Taxpayers Registry in 2014 and 2015.

The Revenue Administration Service (Servicio de Administracion Tributaria or SAT) has reported that the electronic accounting files can be delivered through the Tax Mailbox (Buzón Tributario) as well as through the SAT’s website.

Those taxpayers in the financial sector and corporations and individuals whose income exceeds MXN 4 million will have to send the information regarding their accounting catalogue with a grouping code and the trial balance for the months of January and February 2015.

When using the Tax Mailbox, taxpayers will have to confirm their email, check the files to validate the form and syntax so they are sent correctly, and they must verify that their digital signature is valid.

Auxiliary accounting entities generated for transactions as from 1 July 2015 must deliver to the SAT when the authority requires them, at a later date of 3 September 2015 for corporations and 7 September 2015 for individuals.
Mexico

**Relevant transactions disclosure**
Starting in 2015, all taxpayers are subject to reporting relevant transactions on a quarterly basis. Relevant transactions are defined as share acquisitions or dispositions, extraordinary transaction with related parties, and corporate reorganisations, among others.

**Value-added tax (VAT) refund preferences and benefits to specific sectors**
The Mexican tax authority has established timing preferences for VAT refunds for taxpayers engaged in agricultural, forestry, farming, or fishing activities (Primary Sector) to the extent that certain requirements are met by these taxpayers. This advantage comes as a response to the private sector’s petitions to reduce the excessive scrutiny in VAT claims processes and to speed up the refunds. Likewise, certain VAT benefits in terms of exemption and credit have been granted to taxpayers engaged in the nutritional supplements sector, construction services, and registered ship owners and naval operators. The benefits to these sectors are available from 2014 and were released through a Presidential Decree published 26 March 2015.

**Concluding Agreements**
The Prodecon is a decentralised Mexican government organisation that acts as the Ombudsman of Mexican taxpayers providing advice and issuing recommendations to the tax authorities. In recent years Prodecon’s Concluding Agreements have become more common and have had a positive impact for taxpayers when it comes to reconciling differences with the tax authority in regards to an audit and controversial assessments.

The agreement applies when a taxpayer is dissatisfied with the authority’s tax assessment as a result of an audit. The taxpayer then should file a petition to the Prodecon, noting the facts, omissions, and support elements to expose its defending arguments. The Prodecon then notifies the authority and proposes an agreement to settle the difference and conclude the audit without further procedures. The authority has 20 days to indicate whether or not it accepts the terms that arise in the Conclusive Agreement.

**Double Taxation Treaties (DTTs)**
DTTs with Malta, Peru, and the United Arab Emirates became effective within the last 12 months. Additionally, comprehensive agreements for the exchange of tax information with Aruba and Gibraltar were signed. Please refer to the Group taxation section and Payments to non-residents in the Withholding taxes section for the complete list of exchange of information agreements and DTTs.

---

**Taxes on corporate income**

**Federal corporate income tax (CIT)**
CIT applies to Mexican resident taxpayers’ income from worldwide sources, as well as to foreign residents on the income attributed to their permanent establishments (PEs) located in Mexico.

The federal CIT rate is 30%.

All corporate entities, including associations of a civil nature, branches, etc., are subject to the tax rules applicable to Mexican corporations (unless specifically ruled out, such as not-for-profit organisations).

Taxpayers engaged exclusively in agriculture, livestock, fishing, and forestry activities are subject to a reduction of 30% of their tax liability.
Provisions to recognise the effects of inflation for tax purposes in the areas of monetary assets and liabilities (annual monetary adjustment) and depreciable assets are provided in the income tax law, even though recent inflation rates have been decreasing.

Once a corporation has paid its CIT, after-tax earnings (i.e. earnings arising from the after-tax earnings account, Cuenta de Utilidad Fiscal Neta or CUFIN) may be distributed to the shareholders with no tax charge at the corporate level. A withholding tax (WHT) on dividend payments to resident individuals or foreign residents (including foreign corporations) applies at the rate of 10%; this WHT does not apply to distributions of profits subject to corporate-level tax prior to 2014. If a corporation makes a distribution out of earnings that for any reason have not been subject to CIT, such as distributions of book earnings (i.e. not yet recognised for tax purposes in Mexico), the corporation will also be subject to CIT on the grossed-up distributed earnings (gross-up factor is 1.4286).

Tax paid on dividends distributed in excess of CUFIN can be credited against the CIT of the year or in the two fiscal years following the year in which the tax on the non-CUFIN distributions was paid. The CUFIN of the tax years in which the credit is applied must be reduced by an amount equal to the grossed-up dividend distribution.

**Local income tax**

There are no state taxes on corporate net income.

---

**Corporate residence**

The federal tax code provides that corporations are deemed residents in Mexico if the principal centre of administration or the effective place of management is located in Mexico. A specific definition of 'tax resident' in any tax treaty overrides domestic law definitions, provided the taxpayer is eligible to apply the treaty.

When a company ceases to be a Mexican resident in terms of the Mexican federal tax code or any tax treaty, it is deemed to be liquidated for tax purposes. In such cases, a notification is required at least 15 days before the change, and the CIT return must be filed with the Mexican tax authorities within 15 working days following the date on which the change of tax residency takes place.

**Permanent establishment (PE)**

The income tax law considers a PE to be any place in Mexico where business activities or services are carried out or rendered by non-residents, such as agencies, offices, mining exploration sites, or any other place of exploration, extraction, or exploitation of natural resources, regardless of the length of time involved.

A foreign insurance company could also be considered as having a PE when it engages in activities consisting of insuring risk or collecting premiums (with the exception of reinsurance activities) in Mexico through a party other than an independent agent.

Sites used for display, storage, or purchasing facilities; inventories imported in-bond to be processed by a third party; short-term construction services; and offices to carry out auxiliary or preliminary activities and information gathering or scientific research are not considered to create a PE in Mexico. Non-residents may also keep merchandise in bonded warehouses (including merchandise delivered for importation into Mexico) without being considered as having a PE.

Starting in 2015 and based on the new Hydrocarbons Law, foreign residents are deemed to have a PE when conducting certain oil and gas activities in Mexico for more than 30 days. This implies that the foreigner would need to satisfy all enrolment, compliance, documentation, withholding, and tax filing and payment obligations applicable to Mexican branches of foreign residents.
A non-resident is not considered to have a PE in Mexico as a result of the legal or economic relationships maintained with companies carrying out certain inventory processing activities (i.e., Maquiladoras) that process goods or merchandise maintained in Mexico by the non-resident by using assets provided by the non-resident or any related party, as long as certain requirements are met. The requirements include the conditions that the non-resident be resident in a tax treaty country and that the Maquiladora complies with the transfer pricing provisions provided in the Mexican income tax law.

Maquila operations are generally defined as those with the following characteristics:

- Raw materials are supplied by a foreign resident (with which a Maquila contract is in place) and are temporarily imported to be processed, transformed, or repaired and are subsequently exported, including, for these purposes, virtual import-export operations.
- The Maquila is also permitted to import goods in accordance with the permanent importation regime. Additionally, local purchases are allowed, as long as such goods are consumed in production and/or exported with the temporarily-imported inventory.
- The processing, transformation, or repair of goods must be performed with temporarily-imported machinery and equipment (M&E) that is the property of the foreign principal. In this regard, the foreign principal must own at least 30% of such M&E. It is important to mention that this M&E may not have previously been owned by the Maquila or by any other Mexican related party.

Companies that were operating under an IMMEX program (Maquiladoras/in-bond processing companies) prior to 31 December 2009 (grandfathering rule) were not obligated to comply with the rule requiring that 30% or more of the M&E used in the Maquila operation be owned by the foreign principal; however, beginning in 2014, all Maquiladoras are subject to the new Maquiladora rules. In this regard, a two-year period is established for Maquiladoras operating under the grandfathering rule to comply with this requirement on a prospective basis.

Parties resident abroad and engaged in Maquila operations through shelter Maquila companies may not be considered as creating a PE in Mexico when certain requirements are met and certain information is provided to the Mexican Tax Administration in relation to the gross revenues earned and income taxes paid by its non-Mexican related party. This PE protection is limited to four years.

A definition of PE in any tax treaty overrides domestic law definitions where the taxpayer is eligible to apply the corresponding tax treaty.

### Other taxes

#### Value-added tax (VAT)

VAT is payable at the general rate of 16% on sales of goods and services, as well as on lease payments and imports of goods and services. The sale of medicines, as well as the sale of most food products, is zero-rated. The principal VAT-exempt transactions are the sale of land, credit instruments (including equity shares), residential construction, interest paid by banks, medical services, education, salaries and wages, rentals of residential property, and the sale of non-amortisable participation certificates on real estate investment trusts (REITs), provided specific requirements are satisfied.

As of January 2015, temporary imports under IMMEX and similar programs are subject to the general 16% VAT rate. Such imports may qualify for VAT relief when obtaining special certification from the tax authorities related to the adequate control of such imports. The relief is applied in the form of an immediate VAT credit when clearing
customs, which means that the temporary import is done on a cashless basis for VAT. Companies not covered by the certification may apply the same cashless treatment if they post a bond as payment guarantee.

The VAT law also taxes sales in Mexico of temporarily imported goods by non-residents to (i) other non-residents, (ii) Maquiladoras, or (iii) companies in the automotive industry.

The 0% VAT rate, which generally means that no VAT is payable, is applicable to a substantial number of transactions, including the sale of books, magazines, and newspapers published by the taxpayer, the exportation of goods and certain services (including some Maquiladora activities intended for exportation), the sale of certain basic foodstuffs, agricultural goods and services, sales and rentals of farm M&E, and other specified transactions.

VAT paid by business enterprises on their purchases and expenses related to VATable activities (including activities subject to the 0% VAT rate) may usually be credited against their liability for VAT they collect from customers on their own sales, services rendered, etc. The input VAT credit on goods or services of a general nature, or those not specially identified with either taxable or exempt activities for VAT purposes, is computed based on a VAT ratio proportional to the VATable versus VAT activities (taxable and exempt) carried out by the taxpayer. Creditable VAT paid on purchases and expenses in excess of VAT collected from customers is recoverable via either a refund, offset against other Federal taxes, or a credit against subsequent VAT liabilities.

VAT is a ‘cash basis’ tax, with few exceptions (e.g. VAT on some types of interest must be paid on an accrued basis); consequently, only the receipt of payment for goods or services triggers the output VAT liability, and an input VAT credit may be claimed only when the taxpayer pays VAT to its providers of goods and services. VAT is calculated for each calendar month as a final tax. In addition, VAT overpayments may be used to offset the tax liabilities arising from other federal taxes.

VAT must generally be withheld by Mexican residents acquiring or leasing tangible goods from non-residents if such foreign residents do not have a PE in the country to which income is attributed. Mexican business entities are required to withhold VAT on payments to individuals or entities for services consisting of ground transportation of goods. Mexican corporations must also withhold VAT on commissions paid to individuals, as well as on independent services rendered by Mexican individuals, and on tangible goods leased from individuals.

An information return related to the VATable activities carried out by the taxpayer must be filed on a monthly basis. Definitive monthly VAT payments are required by the 17th day of the immediately following month.

**Customs duties/import tariffs**

Mexico’s commercial conditions provide an excellent business and investment opportunity. Mexico is a member of the World Trade Organization (WTO), the Asia-Pacific Economic Cooperation Mechanism (APEC), and the Organisation for Economic Co-operation and Development (OECD).

Mexico lies in a strategic geographical location for international trade, sharing borders with the United States (US) and representing an easy entry to the rest of Latin America, while also facing Europe and Asia.

Mexico has signed multiple Free Trade Agreements (FTAs), which provide for preferential duty rates on foreign trade operations with many more countries. FTAs signed by Mexico include the North American Free Trade Agreement (NAFTA) and agreements with the European Union (EU), the European Free Trade Association...
Mexico

(EFTA), and Japan, among many other countries. Most FTAs provide 0% duty rates for almost 90% of the goods to be imported into Mexico.

General Import Duty rates range from 0% to 35%, but most imports fall within the range of 3% to 20% (exceptionally, certain food products, shoes, and textiles pay higher duties).

In general, temporary imports are exempt from customs duties (except for fixed assets in certain transactions). For VAT payments on temporary imports, see above.

**Excise tax**
The excise tax law (Impuesto Especial Sobre Producción y Servicios or IEPS) levies substantial federal excise rates on the importation and/or sale of certain taxable items, such as gasoline (% variable), beer (26.5%), wine (26.5% to 53%), spirits (53%), and cigarettes and other tobacco products (160% plus an additional quota), and on certain services related to these activities, such as commission, mediation, and distribution of excise taxable items, as well as services for raffles and gambling (30%). Excise tax is also applicable to certain telecommunications services (3%).

The excise tax law applies to soft drinks at MXN 1 per litre and to ‘junk’ food at an 8% rate. In both cases, the excise tax is payable by the producer or importer.

In general terms, goods are exempt from IEPS when exported. The input IEPS paid by exporters on their purchases is not creditable, and that tax becomes an additional cost.

IEPS is payable (output tax) and creditable (input tax) on a cash basis. It is payable on the date that the charge invoiced is collected from the client and can be credited when the respective payment is made to the supplier. On imports, IEPS is creditable when paid at the customs offices.

In certain cases, the IEPS legislation allows taxpayers that are not subject to this tax to credit IEPS paid on the acquisition and/or the importation of certain goods.

There is a specific procedure to calculate the tax for beer producers, bottlers, and importers; however, the tax can never be lower than 26.5%.

Among other obligations, IEPS taxpayers must file information returns before the Mexican Tax Administration, periodically.

**Property taxes**
Annual taxes on real property are levied by the Federal District and all the states at widely varying rates applied to values shown in the property tax records. Assessed values have increased substantially recently in the Federal District and some other areas.

**Title transfer taxes**
The transfer of real estate is, almost without exception, subject to a variable transfer tax at rates averaging 3% to 4%. The tax is levied by most states and the Federal District.

**Stamp taxes**
There are no stamp taxes in Mexico.

**Compulsory profit sharing**
Although not a tax, every business unit with employees (irrespective of the type of organisation) is required to distribute a portion of its annual profits among all employees, except general directors and managers. The amount distributable to the employees is 10% of an adjusted taxable income. The main difference between the taxable income and the profit sharing base is that the tax losses cannot be applied against the profit sharing base.
No profit sharing is paid during the first year of operations. Also, special rules apply for personal service entities and for entities deriving their income from rental activities, both of which can limit their profit sharing payment to the equivalent of one month of regular salary.

The profit sharing amount paid out is a deductible item for CIT purposes, provided certain requirements are met.

**Vehicle taxes**
There is no federal tax on the ownership of vehicles; however, the states may impose a similar tax.

Tax is still levied on the acquisition of new vehicles. This tax is payable in addition to the VAT on the purchase. Note that some vehicles considered as 'hybrid' (e.g. battery assisted vehicles) are not subject to the new vehicle acquisition tax.

**Payroll taxes**
Most Mexican States levy a relatively low tax on salaries and other income earned by employees, which is payable by the employer (e.g. Mexico City imposes a 2% payroll tax payable by the employer).

**Social security contributions**
Employers and employees are required to make contributions to the social security system. These contributions are based on the daily salary plus any other compensation paid to the employee.

**Branch income**
Mexican branches of foreign corporations (i.e. PEs) are generally subject to the same tax rules as Mexican corporations, with some exceptions. Such exceptions include that branches may deduct pro rata allocations of head office expenses, provided certain requirements are satisfied (such as the existence of an applicable tax treaty and a comprehensive agreement for the exchange of tax information between the relevant territory and Mexico), but may not deduct remittances to their head offices, even when such remittances are classified as royalties, fees, commissions, services, or interest.

In general terms, profit distributions to the head office (other than those regarded as a return to the head office of the capital invested into the branch, which are reflected in their 'remittances accounts') either in cash or in kind from branches or other PEs are subject to the statutory corporate tax rate on the grossed-up distribution, unless the remittance is made from the CUFIN account balance (i.e. the after-tax earnings account).

From 2014, branches are also subject to the 10% tax on profit distributions, which can be reduced or eliminated based on any applicable tax treaty provision.

**Income determination**

**Recognition of income**
Income is generally recognised on an accrual basis. However, the service revenues of civil entities that render professional services (e.g. law and accounting firms) are reported on a cash basis.
Inventory valuation
The costing system to be used will be the incurred cost system, based on historic costs or pre-determined costs. If the requirements provided in the regulations of the income tax law are met, the direct cost system (based on historical costs) may be used.

Inventory may be determined by any of the following methods:

- First in first out (FIFO).
- Identifiable costs.
- Average cost.
- Retail.

The FIFO method must be applied to each type of merchandise and each movement. The monetary FIFO method may not be used. Taxpayers selling goods that are identifiable by serial numbers, at a cost exceeding MXN 50,000, must determine their inventory by the identifiable cost method.

Once elected, a method is compulsory for five years and can be changed only if the requirements established in the regulations of the income tax law are fulfilled. The monetary results of the change in method are amortised over the following five years.

For accounting purposes, different methods and certain variations can be adopted. However, a record of the differences must be maintained, and such difference will not be taxable or deductible.

The cost of imported goods may be deducted (and included in the cost of goods sold) only if it can be supported that the goods were legally imported into the country.

Capital gains
Capital gains are taxed as follows.

Securities
Gains on securities are included in regular taxable income.

The tax basis of shares of Mexican corporations sold may be increased by the inflation adjustment applicable for the holding period.

When computing the tax basis of the shares, there are certain items to be considered, such as: (i) the movement in the after-tax earnings account (CUFIN) of the issuing company (including the possible negative CUFIN effects), as adjusted for inflation, (ii) the unamortised prior years' tax losses at the date of the sale, (iii) tax losses arising prior to the date on which the shares were acquired and amortised during the holding period, and (iv) any capital reductions of the issuing company.

When the sum of: (i) the CUFIN balance at the date of acquisition of the shares, (ii) the capital reductions paid, (iii) the unamortised prior years' tax losses at the date of the sale, and (iv) the negative CUFIN balance of the issuing corporation is higher than the sum of: (i) the CUFIN balance at the date of the sale and (ii) the tax losses arising prior to the date on which the shares were acquired, and amortised during the shares' holding period, the difference must be subtracted from the tax basis of the shares to be disposed of (potentially resulting in the shares' tax basis being equal to zero).

When the aforementioned difference exceeds the tax basis of the shares disposed of, this excess (restated by inflation) must be subtracted from the tax basis of the shares in any subsequent share sale by the same taxpayer, even if the shares are issued by a different company.
The aforementioned procedure allows the average cost (tax basis) of the shares to be determined, which is then updated and considered as the acquisition cost for future sales.

A different but simpler procedure is available (optionally) for computing the tax basis of shares held during a period of 12 months or less.

Deduction of losses arising from the sale of shares is limited to the value of gains from similar transactions in the same or the following ten fiscal years. Losses may not be deducted by non-residents selling shares.

A gain from the sale of shares is considered Mexican-source income when the transferred shares are issued by a Mexican resident or when more than 50% of their book value arises directly or indirectly from immovable property located in Mexico, including cases where the shareholding is structured in different levels.

In general terms, the sale by non-residents of shares issued by a Mexican company is subject to a 25% WHT applicable to the gross amount of the transaction (i.e. without deductions). However, there may be the option for gains realised by non-residents on the sale of shares issued by a Mexican company to be taxed by applying the 35% rate to the net gain (i.e. the value of the transfer less the tax basis of the shares). The tax rate for these purposes is generally the same as the top bracket rate for individuals, unless a lower tax treaty rate is applicable.

This net income election is available only if the foreign shareholder is resident of a country that is not considered a ‘preferred tax regime jurisdiction’ (tax haven) or a country with a territorial tax system. The non-resident seller must have previously appointed a representative in Mexico and have a public accountant assigned to issue a statutory tax audit report on the transfer of shares. The public accountant issuing the respective report must specify the accounting value of the shares sold and explain the factors used in determining the sales price and the market value of the shares if shares are sold between related parties.

The representative is jointly liable for the tax on the sale of shares, even when the statutory report is issued by a public accountant.

The tax authorities may authorise the deferral of taxes that would otherwise be triggered by the transfer of shares in a group reorganisation (the authorisation must be obtained prior to the share transfer). The price used on the transaction must be at arm’s length. The tax deferred, adjusted for inflation, is due upon the sale of the originally transferred shares outside the same interest group. An interest group consists of shareholders that have over 50% common voting stock of the companies.

In principle, authorisations for tax deferral are not granted if the party acquiring or selling the shares is resident in a tax haven or is a resident of a country that has not signed a comprehensive exchange of information agreement with Mexico. However, in the latter case, an authorisation may still be granted if the taxpayer provides documentation to the Mexican tax authorities stating that the taxpayer has authorised the foreign tax authorities to provide information to the Mexican authorities regarding the operation in question.

If the share sale qualifies as an exempt reorganisation under tax treaty rules, the non-resident must appoint a legal representative in Mexico prior to the sale and file a notice with the Mexican Tax Administration informing them of such appointment and the details of the reorganisation process intended to be carried out. Additionally, certain formal requirements are established in the regulations of the Mexican income tax law that must be satisfied when carrying out this type of transaction.
Mexico

Tax treaty rules (optionally) override domestic law rules when the seller resides in a tax treaty country.

**Shares sold through the stock market**
Capital gains realised on (i) the sale of shares issued by Mexican companies, (ii) securities exclusively representing such shares, (iii) shares issued by foreign companies quoted in the Mexican stock market, and (iv) derivative financial operations referenced to stock indexes and/or to the aforementioned shares, when the sale is conducted in stock markets or in derivative markets recognised under the Securities Market Law, are subject to a 10% income tax rate.

The applicable income tax on the gain obtained must be withheld by the broker/intermediary; however, there is no obligation to make this withholding if the investor is a resident in a country with which Mexico has signed a tax treaty to avoid double taxation and provides the broker with a sworn statement explaining said situation and providing their registration number or tax ID issued by the proper authorities in their country. If this is not provided, the income tax must be withheld.

In certain cases, the 10% income tax on the sale of such shares does not apply, but the general treatment (i.e. 25% on the gross or alternatively 35% on the gain as above mentioned) must be applied.

**Real estate**
In determining the taxable gain of real estate, the cost basis of land and buildings may be adjusted (i.e. increased) for tax purposes on the basis of the period of time for which the assets have been held. This adjustment is performed by applying inflation adjustment factors to the net undepreciated balance. Similar rules apply to non-residents electing to pay tax on net income by appointing a legal representative in Mexico. The rate of tax on the net gain is 35% (or lower treaty rate). Otherwise, the 25% final WHT on gross income applies to non-residents.

**Machinery and equipment (M&E)**
Gains or losses from the disposal of machinery, equipment, and other fixed assets are also calculated after adjusting the basis in these assets, by applying inflation factors to the net undepreciated balance.

**Inflationary gain or loss**
Taxpayers are required to calculate an adjustment for inflation (resulting in additional taxable income or deductible expense) on an annual basis by applying the percentage increases in the National Consumer Price Index (NCPI) to the value of essentially all liabilities, reduced by monetary assets, including bank balances, investments (except in shares), and some debt and receivables.

**Dividend income**
Dividends received by Mexican corporations from other Mexican corporations need not be included in gross income. Dividend income must be included within the recipient corporation's CUFIN.

No further corporate-level taxes apply on dividends distributed out of the CUFIN. However, non-CUFIN distributions (i.e. distributions that for any reason have not been subject to CIT) are subject to tax at the level of the distributing company at the general income tax rate on the grossed-up distribution at the effective rate of 42.86%. This tax is creditable in the year of payment or two subsequent years.

**Interest income**
Interest received by Mexican corporations is generally subject to tax on an accrual basis and included in gross income (see also Inflationary gain or loss above).
Foreign income
A Mexican corporation is taxed on foreign-source income when earned. Double taxation is reduced, or possibly eliminated, by means of foreign tax credits. However, the undistributed profits of a foreign subsidiary are not subject to Mexican tax until dividends are paid, with the exception of companies with investments in entities located in a tax haven or income subject to preferred tax regimes (PTRs) (discussed below), in which case income is generally taxable even if no distributions are received from those entities.

Investments in tax havens (income subject to PTRs)
Investments in tax havens include those made directly or indirectly in entities, branches, real property, shares, bank accounts, or investment accounts, and any kind of participation in entities, trusts, joint ventures, or investment funds, as well as in any other similar legal entities created or incorporated in accordance with foreign law and located in a tax haven, and including those that are carried out through an intermediary.

A business, entity, trust, or joint venture is considered to be located in a tax haven when it has a physical presence, an address, a post office box, or effective management in a tax haven, or when its bank account is held in or through financing entities located in a tax haven.

Unless it can be demonstrated that the taxpayer does not have management control of the foreign investments, the taxpayer must include the income generated through such entities or foreign vehicles in the proportion that corresponds to their direct or indirect participation in the capital of the entity or vehicle.

Income and profits subject to PTRs are taxed separately. This income cannot be combined with other taxable income or losses and it is not considered for purposes of making advance income tax payments. Tax applicable to this type of income is payable together with the annual CIT return.

The classification of a PTR is not based on the location of the investment but on the tax effectively paid on the income generated abroad. An investment is considered subject to a PTR if the income is not subject to tax or tax paid abroad is less than 75% of the income tax that would have been incurred and paid in Mexico if the income had been taxed under Mexican rules.

In general, interest income and the annual inflationary adjustment made to liabilities of the investment in the tax haven are included in taxable income without subtracting the annual inflationary adjustment on receivables. However, the annual inflationary adjustment on receivables may be subtracted from interest income earned, provided an information return is filed.

Tax on investments in a PTR is determined by applying the general CIT rate to taxable income. Additionally, net operating loss carryforwards associated with an investment in a PTR may be amortised against the tax profit of the following tax years arising from investments in a PTR, and tax deductions related to the investment may also be applied, as long as accounting records pertaining to those investments are available and the annual information return on the investments is filed on time.

Undistributed income from investments in entities located in a PTR need not be immediately included in taxable income (under the provisions discussed above) in certain particular cases (e.g. income arising from qualified active business activities in accordance with the applicable legislation and in the case of passive income from indirect investments in a tax haven when certain strict conditions are met).

Income earned in a PTR will be taxed until its distribution where the PTR income arises from a business activity. This treatment will not be applicable, however, if income such
Mexico

as interest, dividends, royalties, certain capital gains, and rents (i.e. passive income) represent more than 20% of the total income generated.

Other specific cases of income on which the tax may apply until distribution include the case of share transfers within the same group and for income derived from royalties and interest that do not represent a tax deduction for Mexican tax residents, to the extent that certain specific requirements are satisfied.

Maquiladoras

As discussed in the Corporate residence section, companies operating under an IMMEX program (Maquiladoras/in-bond processing companies) are considered to not have a PE in Mexico. This is the case for the non-resident principal that owns the M&E and inventory, to the extent it is a resident of a country that has a tax treaty in force with Mexico, complies with all the terms and requirements of the treaty, satisfies any mutual agreements between Mexico and its treaty partner, and complies with the transfer pricing provisions provided in the law.

Revenues associated with productive activities must be derived solely from Maquila activities. Additionally, the rules on M&E ownership are consistent with the IMMEX decree definition (i.e. 30% or more of the M&E used in the Maquila operation must be owned by the foreign principal).

The effective income tax rate on Maquila profits is 30%.

In terms of transfer pricing, only the safe harbour and advance pricing agreement (APA) alternatives are applicable to Maquilas.

On 26 December 2013, a Presidential Decree was published in Mexico’s Official Gazette that grants the following benefits to the Maquiladora industry:

- An additional deduction for 47% of tax-exempt benefits paid to employees involved in the relevant Maquila operation (since 2014, the Mexican tax law limits this deduction to 53% of tax-exempt benefits). Maquiladoras applying this benefit should inform the Mexican tax authorities of the amount of the benefit granted, and how it was determined, in a report due March of each taxable year.
- For Maquiladoras operating under the grandfathering rule applicable to Maquiladoras established prior to 2010 (i.e. not obligated to comply with the rule requiring that 30% or more of the M&E used in the Maquila operation be owned by the foreign principal), the decree establishes a two-year period to comply with this requirement on a prospective basis.
- For sales of goods that are located in Mexico between a foreign resident and a Maquiladora that are taxed at the 16% VAT rate, the Maquiladora may credit the VAT in the same month of the sale if certain certification requirements are met. Starting in 2015, this benefit applies if a certification is secured.

Additionally, among other rules, the Miscellaneous Tax Regulations (MTRs) include further guidance in connection with the Maquiladora industry, as follows:

- Revenues associated with productive activities must derive solely from Maquila activities. In this regard, this rule provides that such revenues may also include those obtained for other Maquila services rendered to related parties resident abroad and other miscellaneous income, provided that the Maquila’s books clearly identify every type of income and related expenses.
- Income relating to the manufacture and distribution of finished goods for resale cannot be considered as ‘solely derived from Maquila manufacturing activities’, but enforcement of this rule was deferred until 1 July 2014. Therefore, until such date, Maquiladoras could have considered that their total income qualified as income derived solely from the Maquila activities, provided that their books clearly identify
each type of activity and related income. Entities in this situation should have discontinued or spun off the non-Maquila activities by 1 July 2014.

• The MTRs also provided that a foreign principal may still apply safe harbour protection relating to PE immunity contemplated in the 2013 Income Tax Law, provided that the foreign principal is resident in a country with which Mexico has a DTT and the principal is fully compliant with any treaty requirements applicable to its Mexican activities.

Deductions

The applicable deduction requirements must be complied with no later than the last day of the tax year to which the deduction applies, although the invoice supporting the expense may be provided up to the date on which the tax return for the period in question is filed (or comes due). An expense invoice must contain a date within the year for which the deduction is claimed.

Deductions for certain business expenses are limited in the case of business meals and use of company owned cars.

Depreciation and amortisation

Straight-line depreciation is permitted at the rates specified in the law (i.e. estimated lives for assets are 20 years for buildings, 3.3 years for computers, 4 years for cars, 10 years for certain M&E, etc.), and the deduction may be increased by applying the percentage increases in the NCPI from the month in which the asset was originally acquired. When an asset is disposed of or becomes useless, the remaining under depreciated historical cost may also be deducted, after application of the appropriate inflation adjustment factor to the under depreciated historical cost.

Intangible assets for the exploitation of goods that are in the public domain, or for rendering public services under concession, are considered deferred assets (i.e. not deducted as incurred). Therefore, these assets are subject to amortisation for income tax purposes.

Specific annual depreciation rates are established for goods used in certain industries.

Goodwill

Goodwill is a non-deductible item for Mexican tax purposes, and the corresponding input VAT (if any) will not be creditable.

Start-up expenses

Start-up expenses incurred prior the commencement of operations may be amortised at the rate of 10% per year, after applying the adjustment factors.

Interest expenses

In general terms, interest expenses are deductible items if, among others, the principal is invested in the main activity of the Mexican taxpayer, withholding obligations are complied with, informative returns disclosing information related to the loan and transactions carried out with related parties are filed, thin capitalisation rules (3:1 debt-to-equity ratio) are satisfied, the transaction is at arm's length, and the interest does not fall into the deemed dividend criteria (see the rules for the deductibility of interest payments at the end of this section).

Bad debts

Bad debts may be deducted on the earlier of the date in which the debt prescribes or the date in which the taxpayer substantiates the practical impossibility of collection, as defined by the law, among other detailed rules.
Mexico

Charitable contributions
The maximum amount for deductible donations is limited to 7% of the taxable income of the previous year.

Fines and penalties
In general terms, fines and penalties are non-deductible items for income tax purposes, except interest for underpayment of taxes.

Taxes
In general, all federal, state, and local taxes levied on a company (not including those required to be withheld from other parties) represent deductible expenses for CIT purposes, with the following exceptions:

- CIT.
- Federal VAT and excise tax when the company is entitled to credit the tax.
- Taxes on acquisitions of fixed assets and real estate, which must be capitalised and deducted as part of the total cost of such assets to be depreciated.

Net operating losses
Subject to certain limitations, losses incurred in prior years by a business may be carried forward and deducted from income earned over a subsequent ten-year period. Net operating loss carrybacks are not allowed.

Losses carried forward may be increased by the percentage increase in the NCPI between the seventh and 12th months of the fiscal year in which they are incurred and thereafter up to the sixth month of the fiscal year in which they are applied.

In the case of entities engaged in activities related to the exploration and production of hydrocarbons in maritime waters at depths of 500 metres or more, net operating losses (following the same adjustment rules mentioned above) may be used to reduce their taxable income within the following 15 years.

Tax loss carryforwards are non-transferable; however, they can be used by the surviving entity in a merger, with certain restrictions. In the case of a spin-off, tax loss carryforwards can be divided between the surviving entity and the spun-off entities in proportion to the following:

- Inventories and accounts receivable transferred in the case of commercial entities.
- Fixed assets transferred, in all other cases.

Current tax legislation limits the utilisation of tax losses in changes in ownership, with certain exceptions and limitations.

Payments to foreign affiliates
Taxable income and authorised deductions must be determined on the basis of prices that would be agreed with independent parties in comparable transactions (arm’s-length values).

For this purpose, taxpayers must secure and maintain contemporaneous documentation supporting transactions with related parties residing abroad, demonstrating that income and deductions are based on market values. This documentation must be prepared per type of transaction and must include all operations carried out with related parties.

Domestic transactions must also be supported by the application of a recognised transfer pricing method selected in accordance with the preferred ordering methods determined in the legislation.
Payments made to residents of tax havens (or PTRs) are considered non-deductible unless it can be demonstrated that the price of the transaction is the same that would have been set between or among unrelated parties in comparable transactions. Unless the contrary is demonstrated, it is assumed that operations with companies, entities, or trusts resident in a PTR are carried out between or among related parties and that prices are not set as they would be in comparable operations between or among independent parties.

The sales price of shares (other than publicly traded shares) sold to a related party must be set at market value and the transaction must be supported by the corresponding contemporaneous transfer pricing documentation.

Payments to non-residents of a prorated portion of expenses (i.e. allocations of expenses) are not deductible for Mexican corporations.

A deduction for expenses that are also deducted by another related entity is not allowed unless the corresponding income is included in the related entity’s taxable income in the same or in a subsequent tax year.

**Technical assistance, royalties, and interest payments**
In order to be deductible, payments of technical assistance fees and for the transfer of technology or royalties must be made directly to companies with the required technical capabilities to provide the corresponding service and should correspond to services actually received.

A deduction for technical assistance, interest, or royalty payments (including those related to M&E leases) is not allowed when paid to a foreign entity that controls or is controlled by the Mexican entity and (i) when and to the extent that the recipient is a transparent entity whose owner or owners are not subject to tax in its jurisdiction, (ii) the recipient country of tax residence considers the payment to be disregarded, or (iii) the recipient does not include the payment as part of its taxable income under its jurisdiction’s rules.

**Group taxation**

The income tax law contains a chapter that allows certain holding companies to file a consolidated income tax return with their majority-owned subsidiaries. Tax consolidation is applicable for CIT purposes but not for other taxes (e.g. VAT) or compulsory employee profit sharing.

The current income tax law repealed the tax consolidation rules that were in effect until December 2013, but also introduced a new simplified tax consolidation (deferral) regime.

Due to the repeal of the former tax consolidation regime, the new law provides three options for computing the deferred consolidated income tax benefit, which will be payable over a five-year period. MTRs provide an additional option and other rules for computing the deferred tax.

The principal requirements for a company to qualify as a holding company for the current tax consolidation regime are that it must be a Mexican tax resident with no more than 80% of its shares owned by other companies, regardless of their country of residence. Shares that qualify as placed among the general investing public and non-voting shares are not considered for this purpose.

Where more than 80% of the holding company’s shares are held by a foreign corporation, the above qualifying rule precludes the possibility of filing a consolidated
return for a Mexican group, for companies that would otherwise qualify. However, there is an exception in cases where the foreign corporation that owns the shares of the Mexican holding company is a resident in a country that has executed a comprehensive agreement for the exchange of tax information with Mexico.

As of January 2015, Albania, Argentina, Aruba, Australia, Austria, Bahamas, Bahrain, Barbados, Belgium, Belize, Bermuda, Brazil, Canada, Cayman Islands, Chile, China, Colombia, Cook Islands, Costa Rica, the Czech Republic, Denmark, Ecuador, Estonia, Finland, France, Georgia, Germany, Ghana, Gibraltar, Greece, Guernsey, Hong Kong, Hungary, Iceland, India, Indonesia, Ireland, Isle of Man, Italy, Japan, Jersey, the Republic of Korea, Kuwait, Latvia, Liechtenstein, Lithuania, Luxembourg, Malta, Moldova, the Netherlands, the Netherlands Antilles, New Zealand, Norway, Panama, Poland, Portugal, Qatar, Romania, Russia, Samoa, Singapore, Slovak Republic, South Africa, Spain, Sweden, Switzerland, Ukraine, the United Kingdom, the United States, and Uruguay have agreements of this nature with Mexico; other agreements or tax treaties that might contain such an agreement are awaiting ratification or being negotiated.

The Mexican Tax Administration must authorise the application of the consolidation regime, and written consent of the legal representative of each of the companies must be filed before 15 August of the year prior to the first year of consolidation to request the proper authorisation. Special tax accounts should be kept by each of the companies of the group.
