• The possibility for the cantons to apply super deductions for research and development (R&D) expenditure.
• The abolition of the issuance stamp tax on equity contributions.
• Various other innovations, like harmonised regulations with respect to the partial taxation of dividends and the disclosure of hidden reserves.

All of these innovations will replace the current tax privileges, whereas transition regulations will apply (see Privileged cantonal tax regimes in the Tax credits and incentives section).

Corporate tax reform III is likely to enter into force no earlier than 2018.

Value-added tax (VAT) law changes
A partial revision of the Swiss VAT act is currently subject to parliamentary debates. The draft law contains, amongst others, the following suggested changes:
• Foreign companies generating a total turnover of at least 100,000 Swiss francs (CHF) per year in Switzerland and abroad shall be subject to Swiss VAT. This will, however, allow them to recover related Swiss input VAT.
• Foreign online retailers generating a turnover of more than CHF 100,000 per year with tax exempt deliveries to Switzerland due to the low value of the goods (i.e. less CHF 200 per shipment) shall be subject to Swiss VAT.

The suggested changes are likely to enter into force no earlier than 2017.

Taxes on corporate income

Resident companies are subject to Swiss corporate income tax (CIT) on their taxable profits generated in Switzerland. CIT is levied at the federal, cantonal, and communal level. Foreign-source income attributable to foreign permanent establishments (PEs) or real estate property located abroad is excluded from the Swiss tax base and only taken into account for rate progression purposes in the cantons that apply progressive tax rates.

Non-resident companies may be subject to Swiss CIT if they are (alternatively) partners of a Swiss business, have a PE in Switzerland, own real estate property in Switzerland, have loan receivables secured by a mortgage on Swiss real estate property, or deal with or act as a broker of Swiss real estate property. Non-resident companies are taxed on their income generated in Switzerland only (see the Branch income section).

Federal level
Switzerland levies a direct federal CIT at a flat rate of 8.5% on profit after tax. Accordingly, CIT is deductible for tax purposes and reduces the applicable tax base (i.e. taxable income), resulting in a direct federal CIT rate on profit before tax of approximately 7.83%. At the federal level, no corporate capital tax is levied.

Cantonal/communal level
In addition to the direct federal CIT, each canton has its own tax law and levies cantonal and communal income and capital taxes at different rates. Therefore, the tax burden of income (and capital) varies from canton to canton. Some cantonal and communal taxes are imposed at progressive rates.

Overall tax rates
As a general rule, the overall approximate range of the maximum CIT rate on profit before tax for federal, cantonal, and communal taxes is between 11.5% and 24.2%, depending on the company's location of corporate residence in Switzerland.

Corporate residence

A company is considered resident in Switzerland if its domicile is in Switzerland. Residency is also linked to the place of effective management, which may be the centre from which day-to-day activities are directed or the place from which managerial decisions are taken.

Permanent establishment (PE)
For Swiss tax law purposes, the term 'permanent establishment' means a fixed place of business through which the business activity of an enterprise is wholly or partly carried out. In particular, PEs are branches, factories, workshops, sales agencies, permanent representations, mines and other places of extraction of natural resources, as well as building or construction sites that last at least 12 months. This definition is generally in line with the criteria according to the current Article 5 paragraph 2 of the OECD Model Tax Convention on Income and Capital.
Other taxes

Value-added tax (VAT)
As a matter of principle, proceeds of sales and services conducted in Switzerland are subject to VAT at the standard rate of 8%. Goods for basic needs are subject to VAT at the rate of 2.5%. These rates include a temporary increase that went into effect on 1 January 2011 and will remain applicable until 31 December 2017. On 1 January 2018, if no extension or change is enacted, the rates should decrease from 8% to 7.6%, and from 2.5% to 2.4%. Services in connection with the provision of lodging are subject to VAT at the rate of 3.8% (limited until 31 December 2017).

Any person, regardless of legal form, objects, and intention to make a profit, is liable to VAT if that person carries on a business and is not exempt from the tax liability. A person carries on a business if one independently performs a professional or commercial activity with the aim of sustainably earning income from supplies and acts externally under one’s own name. Persons who are taxable must register with the Swiss Federal Tax Administration of their own accord in writing within certain deadlines. Anyone who in Switzerland generates less than CHF 100,000 in turnover within a year from taxable supplies is exempt from the aforementioned liability. A registered taxpayer generally is entitled to offset the amount of VAT charged by suppliers or paid on imports against the VAT payable.

The VAT rates are dependent on the goods sold or the services provided. Some supplies are just exempt from the tax without credit (e.g. hospital treatment, cultural services, insurance and reinsurance turnovers, specific turnovers in the field of money and capital transactions) and some supplies are fully exempt from the tax (e.g. supply of goods that are transported or dispatched directly abroad). The difference relates to the fact that the input VAT related to supplies exempt from the tax without credit cannot be deducted, whereas supplies exempt from the tax are fully eligible for input VAT deduction.

Customs duties
All goods arriving in Switzerland from abroad are generally subject to customs duty and import VAT. The customs duty is calculated on the gross weight of imported goods, where category-specific weight rates apply. Products like alcoholic drinks, tobacco products, food, and textiles are typical categories of higher duty rates. Furthermore, imported goods are subject to import VAT of generally 8%. A reduced rate of 2.5% applies on certain goods (e.g. food, non-alcoholic beverages, books, magazines, pharmaceutical products).

Excise taxes
In Switzerland, various excise taxes are levied. To name a few, the following excise taxes are levied at the federal level:

- VAT (see above).
- Petroleum tax.
- Performance-related Heavy Vehicle Fee.
- National road tax (motorway tax sticker).
- Beer excise tax/Tax on alcohol.
- Tobacco excise tax.

Property taxes
With regard to the ownership and the transfer of real estate property in Switzerland, property taxes may apply. Depending on the location of the real estate property, ownership related property taxes are levied at the cantonal and/or communal level or do not exist at all.

In case of the sale of real estate property, real estate transfer tax and taxes on the capital gain may apply.
At the federal level, capital gain realised on the sale of real estate property is subject to ordinary CIT. At the cantonal and communal level, depending on the canton concerned, capital gain realised is either subject to the ordinary CIT (dualistic method) or subject to a special real estate capital gain tax (monistic method).

It is at the discretion of the authority of the cantons to decide how real estate capital gains shall be taxed within their territory.

**Securities transfer tax**
Swiss securities transfer tax (often known as ‘securities turnover tax’ or ‘transfer stamp tax’) is levied on the transfer of Swiss or foreign securities, in which Swiss security dealers participate as contracting parties or as intermediaries. The ordinary tax rate of Swiss securities transfer tax is 0.15% for securities issued by a tax resident of Switzerland and 0.3% for securities issued by a tax resident of a foreign country.

Swiss security dealers are defined as any person professionally engaged in the buying or selling of securities for one’s own account or for another person, including Swiss banks and other Swiss bank-like institutions. The definition also includes companies holding taxable securities whose book value exceeds CHF 10 million and remote members of a Swiss stock exchange.

Taxable securities include, but are not limited to, shares and bonds. Options and many other derivative instruments are not subject to Swiss securities transfer tax. However, the exercise of such financial instruments or derivatives may result in a taxable transfer of a security.

Various transactions are exempt from the Swiss securities transfer tax. Generally, no Swiss securities transfer tax is levied in the case of a merger or a reorganisation in which a Swiss security dealer is involved and taxable securities (including participations) are transferred. Furthermore, the like-kind exchange of a participation by a Swiss security dealer is also exempt from the Swiss securities transfer tax. This is particularly important for holding companies, which may qualify as Swiss security dealers.

**Issuance stamp tax**
Issuance stamp tax (often known as ‘capital duty’) on the issuance and the increase of the equity of Swiss corporations is levied at the rate of 1% on the fair market value of the assets contributed, with an exemption on the first CHF 1 million of capital paid in, whether it is made in an initial or subsequent contribution.

A multitude of transactions qualify for an issuance stamp tax exemption. In particular, special tax provisions allow for most reorganisations to take place on a tax neutral basis. In addition, an existing non-resident company may generally transfer assets to Switzerland without incurring Swiss issuance stamp tax. However, if the company was formed abroad and re-domiciled to Switzerland exclusively or mainly in order to avoid Swiss stamp taxes, issuance stamp tax may apply.

The issuance of Swiss bonds and money market instruments is not subject to Swiss issuance stamp tax.

In addition, the conversion of certain contingent convertible bonds (CoCos) into equity will also not trigger Swiss issuance stamp tax on the newly created equity. In more detail, this relief applies to CoCos according to the Swiss banking law only; other convertible bonds will still trigger Swiss issuance stamp tax if converted into equity.

**Capital tax**
Corporate capital tax is only levied at the cantonal and the communal level (not at the federal level). It is based on a corporation's equity (i.e. the taxable equity corresponds to the sum of nominal capital, paid in surplus, retained earnings, other equity reserves,
and, according to Swiss thin capitalisation rules, potential deemed equity). The ordinary capital tax rates vary between 0.001% and 0.525%, depending on the company's location of corporate residence in Switzerland. Reduced capital tax rates usually apply for companies subject to a special cantonal tax regime (e.g. holding companies, domicile companies, mixed trading companies).

The cantons are allowed to foresee in their tax law that CIT is creditable against a corporation's capital tax. As of 1 May 2016, the following cantons have implemented such credit system: Argovie, Appenzell Innerrhoden, Bern, Basel-Land, Geneva, Neuchâtel, St. Gallen, Solothurn, Schwyz, Thurgau, and Vaud.

**Payroll taxes**

**Wage tax withholding (tax at source)**

Employees meeting certain criteria (e.g. Swiss tax resident foreign nationals without a permanent residence permit, non-Swiss tax resident individuals) are subject to wage tax withholdings. In such case, it's the employer's obligation to withhold the appropriate wage tax on the employee's gross salary. The wage taxes cover the employee's federal, cantonal, and communal taxes as well as church tax (if applicable) (see the Taxes on personal income section of Switzerland's Individual tax summary at www.pwc.com/taxsummaries).

**Social security contributions**

Employers, in general, are required to account for social security contributions on the salaries of their employees. If the employee is subject to the Swiss social security system, the following compulsory social security contributions are concerned (see the Other taxes section of Switzerland's Individual tax summary at www.pwc.com/taxsummaries):

- Old age, survivors', and disability insurance (10.25%; the employee's share is one half).
- Unemployment insurance/supplementary unemployment insurance (approximately 2.2%; the employee's share is one half).
- Family compensation fund (1% to 3%; fully employer financed).
- Occupational accident insurance (approximately 0.17%; fully employer financed).
- Occupational pension scheme (2nd pillar) (contributions depend on pension plan; the employee's share is usually half of the total contribution, where the employer bears the other half).

**Branch income**

Foreign legal entities having a branch in Switzerland become subject to limited taxation in Switzerland. Such branches generally qualify as PEs in line with the OECD Model Tax Convention on Income and Capital. The branch's income is, in general, subject to the same CIT rules that apply for Swiss corporations. It is worth noting that there is no Swiss withholding tax (WHT) on profit transfers from the Swiss branch to its foreign head office.

**Income determination**

The statutory accounts of a Swiss company (or in the case of a non-resident company, the branch accounts) serve as the basis for determining taxable income. There are generally very few differences between statutory profit and taxable profit apart from the participation relief for dividend income and capital gains (see below), adjustments required by the tax law, and the usage of existing tax loss carryforwards (see Net operating losses in the Deductions section).
Inventory valuation
Swiss CIT treatment does, in principle, follow underlying Swiss statutory accounting treatment. Inventory valuation is therefore determined according to the accounting rules of the Swiss code of obligations. As the Swiss code of obligations, hence the Swiss accounting rules, favour the prudence principle, a valuation allowance is allowed to be recorded on the inventory in excess of the actual devaluation of the inventory due to a lower market value (see Obsolete inventory provision in the Deductions section). Such valuation allowance is accepted for tax purposes at up to a maximum of one-third of the inventory’s acquisition costs or its productions costs, respectively its lower market value.

Accordingly, the maximum inventory value represents the inventory’s acquisition costs or its production costs. In case these costs exceed the inventory’s market value at the balance sheet date, the latter lower market value must be applied. In order to determine the inventory’s acquisition or production cost, various methods exist.

It is at the corporate taxpayer’s discretion to determine which method shall apply (e.g. weighted average method, first in first out [FIFO], last in first out [LIFO], highest in first out [HIFO]).

Participation relief
Participation relief is the name generally attributed to the tax relief on qualifying dividend income and capital gains from the disposal of a subsidiary. Participation relief is not an outright tax exemption, but rather a tax abatement mechanism. It is therefore also commonly referred to as ‘participation deduction’ or ‘participation exemption’.

Participation relief is a percentage deduction from CIT that is equal to net participation income divided by taxable income. Net participation income consists of the gross participation income from qualifying dividends and (usually) qualifying capital gains less related administration and financing costs and any depreciation of the participation that is linked to the dividend distribution. In most cases, participation relief results in a full exemption of participation income from CIT, or one close thereto. Note that participation relief may be diluted in certain cases (e.g. if tax loss carryforwards are offset).

The participation relief on dividend income is mandatory at the federal CIT as well as at the cantonal/communal level. The participation relief on capital gains is voluntary for cantonal/communal tax purposes, but nevertheless implemented by all cantonal tax acts. Specific privileged cantonal/communal tax regimes may foresee more favourable rules for dividend income and capital gains than the participation relief (see Privileged cantonal tax regimes in the Tax credits and incentives section).

Dividend income
Dividends qualifying for participation relief are those from participations representing at least 10% of the share capital or 10% of profits and reserves of another company or those having a market value of at least CHF 1 million. Note that there is neither a minimum holding period nor a requirement that the dividend paying subsidiary is liable to income tax in its jurisdiction of residence.

Capital gains
Capital gains derived from the disposal of a qualifying participation are generally entitled to participation relief if the following conditions are cumulatively met:

- The participation sold was owned by the company for a period of at least one year.
- The participation sold constitutes at least 10% of the share capital or 10% of profits and reserves of the underlying subsidiary. If a residual participation is less than 10% due to a previously qualifying partial sale, further participation relief on a capital gain is only possible if the residual participation’s market value at the beginning of the year amounted to at least CHF 1 million.
It is noteworthy that capital gains are only entitled to participation relief to the extent the sales price exceeds the original investment costs (commonly also referred to as ‘acquisition costs’) of the participation, whereas the so-called ‘recaptured depreciation’ (i.e. the amount of former depreciations) is taxable.

**Interest income**
Interest income earned is taxable income. It is of no relevance whether the payment of the interest was made by a related party (affiliated company or shareholder) or by a third party (see Interest expense in the Deductions section).

**Foreign exchange gains**
Realised foreign exchange gains in relation to a transaction (transaction gains) are included in the tax basis of a corporation as taxable. Realised and, as a result of the prudence principle of the Swiss accounting rules, unrealised transactional foreign exchange losses are tax deductible. Based on a federal court decision in 2009, foreign gains (or losses) resulting from the translation of financial statements in a foreign (functional) currency to Swiss franc (presentation currency) are not taxable (respectively tax deductible).

**Foreign income**
Swiss tax resident corporations are basically taxed on their worldwide income. However, income attributable to a foreign PE (i.e. a PE outside of Switzerland) is not taxed in Switzerland. It may only be taken into account to determine the applicable tax rate, in case progressive tax rates apply. The same rule applies for income from real estate property situated abroad.

Dividends, interest, and royalties from Swiss or foreign sources are included in taxable income. However, in certain cantons, special methods of assessment may apply for dividend and other income originating outside Switzerland. For dividend income, a relief generally is available at the federal income tax level as well as at the cantonal/communal level (see Participation relief above). The irrecoverable portion of foreign WHT of most treaty countries can be credited against the related Swiss income taxes on the same income. Foreign WHT of non-treaty countries generally is not creditable, but is deductible for income tax purposes.

There are no controlled foreign company (CFC) rules in Switzerland. Consequently, undistributed income of foreign subsidiaries is usually not taxed in Switzerland (see Controlled foreign companies [CFCs] in the Group taxation section).

**Deductions**
The statutory accounts of a Swiss company are the basis for determining taxable income. To be tax deductible, an expense has to be booked in the statutory accounts accordingly.

Generally, all business expenses that are booked in the statutory accounts are tax deductible, assuming they are economically/commercially justified from a tax perspective. If an expense is not a justifiable business expense in the sense of the tax law, it will be added back to taxable income. Examples typically include excessive depreciation, non-justified payments to related parties (e.g. hidden profit distributions), etc.

**Depreciation and amortisation**
Maximum depreciation/amortisation rates allowed for tax purposes are issued by the Swiss Federal Tax Administration. Higher depreciation/amortisation is allowed for tax purposes if the taxpayer can prove that such higher depreciation/amortisation is required (not only allowed) from a statutory accounting perspective. Some cantons
follow the federal guidelines, whereas some cantons apply their own (more liberal)
depreciation/amortisation rates.

The following summary of the rates specified by the Swiss Federal Tax Administration
provides the general range of tax-accepted depreciation:

<table>
<thead>
<tr>
<th>Assets</th>
<th>Declining-balance (%)</th>
<th>Straight-line (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Commercial buildings:</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Buildings alone</td>
<td>4</td>
<td>2</td>
</tr>
<tr>
<td>Buildings and land combined</td>
<td>3</td>
<td>1.5</td>
</tr>
<tr>
<td>Equipment:</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Office furniture and equipment</td>
<td>25</td>
<td>12.5</td>

<td></td>
</tr>
<tr>
<td>Motor vehicles</td>
<td>40</td>
<td>20</td>
</tr>
<tr>
<td>Intangible assets</td>
<td>40</td>
<td>20</td>
</tr>
</tbody>
</table>

Some cantons (e.g. Basel-City, Bern, Grisons, Zurich) take a more liberal approach and
even permit, for tax purposes, an immediate write-down of certain assets (including
fixed assets) to 20% or nil of the purchase price in the first year, provided that such
write-downs do not, in the aggregate, result in a drastic decline in taxable income
or even a tax loss. For tax purposes, such immediate write-downs must be booked
in the statutory accounts and generally disclosed in the tax return. As the cantonal
tax authorities are responsible for assessing not only cantonal/communal CIT but
also federal CIT, the immediate write-down will typically be accepted for federal CIT
purposes as well.

**Goodwill**

Only acquired goodwill (derivative goodwill) may be capitalised in the statutory
accounts and be amortised. Amortisation is generally allowed straight-line over five
years. Special limitations apply to acquired shares, where the purchase price for these
shares partly represents inherent goodwill.

**Start-up expenses**

The Swiss code of obligations does not contain any specific Swiss statutory accounting
provision with regard to start-up expenses. For Swiss statutory accounting purposes,
start-up expenses shall be expensed as incurred. For Swiss CIT purposes, business
related start-up expenses as booked in the statutory profit and loss statement are likely
fully tax deductible.

**Interest expense**

Interest paid by a corporation to a third party is a deductible business expense. Interest
paid to related parties (affiliated company or shareholder) has to reflect the fair market
rate and is subject to limitations (see Thin capitalisation in the Group taxation section).

With respect to related parties, the Swiss Federal Tax Administration annually issues safe
harbour interest rates to be used on loans denominated in Swiss franc on the one hand
and in foreign currencies on the other hand. The corporation may deviate from these
safe harbour rates as long as it can prove that the rates used are at arm’s length and more
appropriate in the present case. The cantons usually follow these federal guidelines.

The safe harbour rules for loans denominated in Swiss franc applicable as of 1 January
2016 are as follows:

<table>
<thead>
<tr>
<th>For loans to related parties</th>
<th>Minimum interest rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Financed from equity</td>
<td>0.25</td>
</tr>
</tbody>

<td>Made to holding and asset administration companies</td>
<td></td>
</tr>
</tbody>
</table>

* In calculating the amount of the maximum interest permissible from a tax perspective, any potentially existing hidden equity (under Swiss thin capitalisation rules) has to be considered.

**Bad debt provision**

Based on a longstanding practice in Switzerland, it is admissible to set up a statutory accounting provision for specific impaired receivables, which will be accepted for income tax purposes. Unlike most other countries, it is also possible to account for an additional (‘lump sum’) bad debt provision of 5% on all domestic and 10% on all foreign receivables (i.e. a provision in addition to the provision for specific impaired receivables), except for inter-company receivables and receivables to the public, enabling the taxpayer to defer the related tax liability until this provision has been released. Some cantons, such as Zurich, accept an even higher reserve (i.e. 10% on domestic and 20% on foreign receivables). This additional bad debt provision may have the character of a ‘hidden’ (i.e. undisclosed) reserve and is appropriate because the Swiss statutory accounting standards favour prudence over true and fair view accounting principles.

**Obsolete inventory provision**

Similarly to the bad debt provision, it is possible to account for a ‘hidden’ (i.e. undisclosed) reserve on a company’s inventory. This provision, which must also be booked in the statutory accounts, is accepted for tax purposes (similar to the bad debt provision). Specifically, a company may book a provision for specific obsolete inventory as well as a general provision of 33.3% of the inventory value after deduction of the obsolete inventory.

**Charitable contributions**

At the federal level, charitable contributions of up to 20% of the net profit (after tax) of a company are tax deductible, provided certain criteria are met. In particular, the charitable contribution has to be remitted to (i) Swiss legal entities that are exempt from taxation based on their public welfare or exclusively charitable objective or to (ii) the Swiss Federation, a Swiss canton or municipality, or their agencies (‘Anstalten’). The cantons usually apply the same rules and similar thresholds.
Sponsoring contributions are only tax deductible if commercially justified (without specific thresholds).

**Royalties**
Royalty payments are generally deductible for tax purposes as long as the royalty rate is at arm’s length.

**Costs of employee share plans and stock option plans**
The cost of employee share plans and stock option plans are generally deductible, assuming the employees eligible for the plan are employed by the Swiss company. The same holds true for the recharge of costs for plans covering local employees.

**Costs for job-related training and continuing education of employees**
As far as they are recognised as an expense in the statutory books, costs incurred for job-related training and continuing education of employees are generally tax deductible.

**Fines and penalties**
Under Swiss tax law, tax fines are not tax deductible. The potential tax deductibility of other fines or penalties has to be analysed with respect to the specific case.

**Tax expenses**
Corporate income and capital taxes paid to the federal government, as well as to the cantons and the municipalities, are tax deductible. Indirect taxes (e.g. real estate transfer tax) are tax deductible as well.

**Net operating losses**
Tax losses can be carried forward for a maximum of seven years and can be offset against the taxable income of the following seven years. There is no carryback of tax losses in Switzerland.

**Payments to foreign affiliates**
Management and services fees paid by a Swiss company to a related party are generally tax deductible as long as the fees are at arm’s length.

---

**Group taxation**
Tax is levied on each corporation as a separate entity. A parent company and its Swiss subsidiaries are taxed separately, and only the dividends from the subsidiaries (but not their profits) are taxable in the parent company’s hands. However, usually for dividend income, participation relief is applicable (see Participation relief in the Income determination section). For income and capital taxes, no rules on group taxation exist.

**Transfer pricing**
So far, Switzerland has not introduced specific transfer pricing regulations. There is, however, an increasing awareness of the issue and concern on the part of the Swiss tax authorities that taxpayers may transfer profits without economic justification either to countries with strict transfer pricing rules and documentation requirements in order to avoid challenges by the respective local tax authorities or to offshore locations. In this context, Swiss tax authorities take an increasing interest in a company’s transfer pricing position in order to defend their own position. Some cantonal, as well as the federal, tax authorities have started to particularly focus on low risk/low profit entities located in Switzerland.

Switzerland follows the OECD Guidelines as closely as possible and recognises the arm’s-length principle based on interpretation of actual legislation. To clarify transfer pricing issues, Switzerland offers an informal procedure for agreeing to pricing policies in advance.
Thin capitalisation
Swiss thin capitalisation rules are, in general, only applicable for related parties. In case of a thin capitalisation, the related party debts can be treated as taxable equity. The respective circular letter issued by the Swiss Federal Tax Administration provides for debt-to-equity ratios as safe harbour rules. As an example, the debt-to-equity ratio is generally fixed at 6:1 for finance companies (safe harbour). Interest paid on loans that exceed the relevant ratios are generally not tax deductible; further, these interests may be deemed as a hidden distribution subject to Swiss WHT. There are no limitations on the financing of Swiss corporations by independent third parties (e.g. banks).

Interest rates paid to affiliated companies are also subject to periodically fixed safe harbour interest rates (see Interest expense in the Deductions section). The tax deduction of interest in excess of the permitted safe harbour rate may be disallowed and treated as a hidden distribution subject to Swiss WHT.

Controlled foreign companies (CFCs)
In Switzerland, no CFC or ‘subject to tax’ rules exist. Foreign companies are therefore recognised for Swiss tax purposes if they are managed and controlled offshore and are not set up purely for the reason of avoiding Swiss taxes.

Tax credits and incentives
Generally, cantons offer competitive income tax rates for cantonal and communal tax purposes. Depending on the specific cantonal and communal tax location in Switzerland, the ordinary overall (federal, cantonal, and communal) CIT rates applicable on profit before tax may vary between 11.5% and 24.2% (see the Taxes on corporate income section). The cantons continually try to improve their attractiveness as business locations. It is at the sole discretion of the cantons to credit CIT against the capital tax to reduce the overall tax burden (see Capital tax in the Other taxes section).

As a further example, the canton of Nidwalden introduced a tax relief for certain licence income (so-called ‘licence box’), whereupon net licence income from the use of intangible assets is taxed separately at a reduced CIT rate of one-fifth of the regular cantonal/communal rate.

In addition, many cantons offer tax incentives for newly established companies or for expansion investments, such as tax holidays or significant tax relief for cantonal and communal tax purposes for up to ten years. In some less centric cantons and for specific economic development regions, a tax holiday may even be granted for federal CIT purposes if certain conditions are met.

Privileged cantonal tax regimes
Many cantons offer privileged corporate tax regimes. Upon request, it is usually possible to get an up-front confirmation from the relevant cantonal tax authorities that the planned business activities of a taxable entity are meeting the requirements as foreseen by the relevant cantonal tax laws for a specific privileged tax regime.

As part of the corporate tax reform III, which is likely to enter into force no earlier than 2018, the privileged cantonal tax regimes shall be replaced with new measures, and transition regulations will have to be observed (see Corporate tax reform III in the Significant developments section).

Holding company tax regime
A qualifying holding company is exempt from all cantonal/communal CIT (with the exception of income from Swiss real estate, which is subject to tax after deduction of typical mortgage expenditures on such real estate).
Consequently, a holding company is, in principle, only subject to an effective income tax rate of 7.83% (i.e. federal CIT rate) prior to participation relief for qualifying dividends and capital gains. Further, usually a reduced capital tax rate at the cantonal/communal level applies.

Companies that meet the following conditions are eligible for the holding company tax status:

- The primary purpose of the company must be to hold and to manage long-term equity investments in subsidiaries, and this purpose must be stated in the by-laws.
- The company must not be engaged in a commercial activity in Switzerland.
- The company must pass an alternative asset or income test, whereby either two-thirds of the company's assets must consist of substantial shareholdings or participations or two-thirds of total income of the company must consist of participation income (dividend income or capital gains) from such shareholdings and participations.

An advance confirmation is obtainable from the cantonal tax authorities clarifying that a specific company will qualify for the criteria of the holding company status as foreseen by the relevant cantonal tax laws prior to forming such holding company.

**Domicile company tax regime**

Companies that only carry out administrative functions in Switzerland but have no commercial activities are typically eligible for the domicile company tax status.

Insofar as a company fulfils the above-mentioned criteria, it may apply with the cantonal tax authorities for taxation based on the domicile company tax regime, which, if applicable, has the following implications at the cantonal/communal CIT level:

- A modest portion of foreign-source income (i.e. from 0% to 15%) is subject to tax in accordance with the importance of the administrative function in Switzerland.
- Income from qualifying participations (including dividends, capital gains, and re-evaluation gains) is usually tax exempt (whereas losses deriving from qualifying participations usually are not tax deductible).
- All income from Swiss sources is taxed at ordinary rates.
- Expenditures that are justified for business purposes are deductible from the income to which they have a business correlation.
- Reduced capital tax rates usually are applicable.

The conditions to qualify as a domicile company vary from canton to canton. This is particularly the case with regard to determining the percentage of income from foreign sources subject to tax in Switzerland and to the definition of exactly what type of income is considered foreign-source income.

A domicile company can be expected to be subject to an effective tax rate of 7.83% to 11% on foreign-source income.

**Mixed trading company tax regime**

The mixed trading company tax status, which is very similar to the domicile company tax status, was given different names by the cantons. Internationally, it is most often referred to as the ‘mixed trading company’ tax status.

Contrary to a company benefiting from the classical domicile company tax status, a company benefiting from the mixed trading company tax status is allowed to undertake limited commercial activities in Switzerland. As a general rule, at least 80% of the income from commercial activities of a mixed trading company must derive from non-Swiss sources (i.e. a maximum of 20% of income may be linked to Swiss sources). Many cantons additionally require that at least 80% of the costs must be related to activities undertaken abroad.
Insofar as a company will fulfil the above mentioned criteria, it may apply with the relevant cantonal tax authorities for an advance confirmation that it will be entitled to the mixed trading company tax status. Depending on the concrete Swiss activity and infrastructure, the portion subject to cantonal and communal income taxes generally varies between 5% and 25% of the foreign-source income and is normally higher than it is for domicile companies. The exact portion, based on the specific business activities of a company, needs to be clarified with the responsible cantonal tax authorities.

**Foreign tax credit**
Swiss tax resident corporations may suffer foreign non-recoverable WHTs on dividend, interest, and royalty income derived from foreign sources. As such foreign-source income is generally subject to income taxation in Switzerland, a double taxation occurs. In case a double tax treaty (DTT) exists and in order to reduce or to eliminate double taxation, Switzerland usually applies the credit method. Specific conditions and formalities will need to be met to benefit from foreign tax credits.

**Withholding taxes**
This section shall provide a general overview and an indication of the residual WHT on outbound payments from Switzerland. There might be certain exceptions or further reductions available in the DTT, which, for the sake of clarity, are not reflected in the table below. Accordingly, the table below does not replace a thorough assessment of a specific case based on the applicable DTT in force.

The statutory rate of Swiss WHT is 35%. Relief, if any, is generally granted by refund. With respect to qualifying related companies, a mere notification/reporting procedure may be requested for the fraction of the Swiss WHT exceeding the residual WHT. The table further below shows the residual/remaining tax for the recipient. Credit for the unrelieved portion of Swiss WHT may be available in the country of the recipient.

In Switzerland, there is no WHT on interest deriving from regular loan agreements. Swiss WHT of 35% is only levied on interest paid by banking institutions (or paid by entities tax-wise qualified as ‘banking institutions’) to non-banks, interest on bonds, and interest on bond-like loans. The residual rates in the table below show the standard treaty rates and do not reflect further reliefs available in certain DTTs (e.g. on traded bonds or other traded securities).

Many of the DTTs concluded between Switzerland and other jurisdictions contain a full relief if dividends or interest is paid to governments (including political subdivisions and other governmental institutions), central banks, or pension funds.

Note that in the DTTs concluded between Switzerland and other jurisdictions, the reduced WHT for substantial holdings usually is only available if the recipient of the dividend is a corporate body (e.g. not taxed as a partnership).

Interest paid on CoCos and on write-off bonds (bonds with claim waiver) of systematically important banks is exempt from Swiss WHT. The WHT exemption is restricted to bonds issued by the respective institutions between 2013 and 2016. These bonds must, furthermore, fulfil specific criteria in order to benefit from the WHT exemption. According to a draft of the WHT act reform, it is the intention of the Swiss Federal Council that, under certain conditions, bail-in bonds, issued by the respective institution between 2017 and 2021, shall be exempt from Swiss WHT as well.

**Capital contribution principle**
The capital contribution principle allows the repayment of qualifying shareholders’ capital contributions without deduction of Swiss WHT at the level of the distributing company and without income tax implications at the level of Swiss individual
shareholders (holding the shares as private assets). In general, the capital contribution principle applies for premiums, additional paid-in capital, and contributions into the reserves of a company without increasing the nominal share capital.

**Treaties in force (as of 1 May 2016)**

* Bilateral Agreements (in particular Article 15 of the Savings Agreement) between Switzerland and the European Union (EU) apply since 1 July 2005 and provide the following benefits:

Upon request, Swiss WHT on dividends paid by a Swiss subsidiary company to its EU parent company may be reduced to 0% (reduction at source) and is only subject to a notification/reporting procedure, provided the following conditions are cumulatively met:

- Direct minimum holding of 25% of the subsidiary’s capital for at least two years.
- Both companies are subject to CIT.

Upon request, WHT on interest and royalty payments made between associated companies or their PE resident, respectively situated in Switzerland and the European Union, may be reduced to 0% (reduction at source) in the source state, provided the following conditions are cumulatively met:

- Direct minimum holding of 25% for at least two years (parent/subsidiary) or direct holding by a third company of minimum 25% in the capital of both companies for at least two years (sister companies).
- Both companies are subject to CIT.

The application of the Bilateral Agreements is subject to foreign and Swiss misuse conditions.

DTTs between Switzerland and EU countries with more favourable tax treatment of dividend, interest, and royalty payments remain unaffected.

Notes

1. There is no Swiss WHT on royalties, licences, and similar fees payable by Swiss individuals or corporations (provided that the dealing at arm’s-length principle is met).
2. The statutory Swiss WHT rate of 35% is levied but refunded, provided that the respective earnings are declared as income for tax purposes.
3. Between Swiss group companies, Swiss WHT of 35% is usually fully refundable. Furthermore, in many cases, the tax liability can be met by the notification/reporting procedure. For this purpose, a direct investment of at least 20% in the share capital of the payer of the dividend is required.
4. 20% minimal shareholding plus foreign investment of at least 200,000 United States dollars (USD).
5. Only applicable if holding period is at least 12 months.
6. 15% residual tax for companies with more than 10% shareholding if the company receiving the dividend is directly or indirectly controlled by a shareholder not resident in the European Union or Switzerland and cannot prove that the company is not set up only to benefit from the 0% WHT on dividends.
7. 0% WHT if minimum shareholding is at least 50% for at least six months. 5% WHT if minimum shareholding is at least 10% for at least six months.
8. New DTT between Switzerland and Cyprus, in force since 15 October 2015, applicable as of 1 January 2016.
9. 5% WHT if the shareholding of 10% was held less than two years; 0% WHT if the shareholding of 10% was held longer than two years.
10. Only applicable if holding period is at least 24 months.
11. 5% WHT if dividend recipient is a corporate body; 10% WHT if dividend recipient is an individual.
12. 20% minimal shareholding plus foreign investment of at least CHF 200,000.
13. 10% WHT for shareholdings between 20% and 50%; 7% WHT for shareholdings of more than 50%.
14. Full relief if paid to a related entity in the form of a corporation.
15. New DTT between Switzerland and Estonia, in force since 16 October 2015, applicable as of 1 January 2016.
16. New DTT between Switzerland and Iceland, in force since 6 November 2015, applicable as of 1 January 2016.
17. 0% WHT if certain criteria are met.
18. Switzerland levies a WHT on interest paid on bonds issued in Switzerland and on bank accounts with Swiss banks. Generally, no WHT is levied on interest paid on loans. However, from a Swiss WHT perspective, a loan may be requalified as a bond under certain circumstances.
19. New DTT between Switzerland and Argentina, in force since 27 November 2015, applicable as of 1 January 2015 (retroactive effect).
Tax administration

Taxable period
The tax year is the business year. Thus, the basis for corporate taxation is the applicable accounting period, which may end at any date within a calendar year.

Tax returns
The tax system for corporate income and capital taxes is based on taxpayers’ declarations, with subsequent assessments being issued by the tax authorities on the basis of the tax returns filed. The tax return has to be filed annually (an exemption exists in the first business year in case an extended business year shall apply). The filing deadlines vary from canton to canton (usually between six and nine months after the close of the business year). Companies are initially assessed on a provisional basis, with the final assessments being issued after the tax base was either subject of a tax audit or declared final by the authorities.

Payment of tax
Unless instalment payments are specifically requested, federal, cantonal, and communal taxes on income and capital are, in most cantons and for federal tax purposes, payable only upon receipt of a demand based on a provisional or final assessment.

Note that cantonal exceptions apply. As an example, based on the date of maturity of the respective tax year (30 September), the canton of Zurich levies late payment interest to the extent that the full (final) tax amount had not been paid in time (independent from any earlier provisional tax invoices). About one month before the due date, a (provisional) tax bill based on the latest tax return filed or the assessment of the preceding period is sent to the taxpayer. Payment is usually made in two or three instalments. If the entire amount is paid up front, a discount may be granted.

The provisional federal CIT is usually due by 31 March of the year following the tax period at question. The due date of the final federal CIT and the provisional or final cantonal CIT varies.

Tax audit process
Swiss CIT law does not outline specifics of the tax audit process. At first, the tax authorities review the tax return and its enclosures as filed by the taxpayer. Such review is usually desk-related work. The competent tax authorities are obligated and entitled to clarify all relevant information necessary to assess taxpayers on a true and complete base. The tax authorities may request further information/documentation or may inspect the taxpayer’s premises.

Statute of limitations
As a general rule, the right to assess a taxpayer in relation to corporate income and capital taxes expires five years after the end of the corresponding tax period (relative statute of limitations). Under certain conditions (e.g. where the relative statute of limitations is interrupted), the absolute statute of limitations of 15 years applies.

In case of tax fraud (‘Steuerbetrug’) or tax evasion (‘Steuerhinterziehung’; e.g. where specific information was not available to the tax inspector at the time of the assessment), finally assessed tax periods can be reopened. The statute of limitations to reopen finally assessed tax periods is ten years after the end of the corresponding tax period.

Topics of focus for tax authorities
The Swiss tax authorities do not communicate specific topics of focus. The tax authorities do normally start their assessment with reviewing the tax return and its enclosures as filed by the taxpayer (see Tax audit process above).
Other issues

Reorganisations
Most corporate reorganisations (e.g. mergers, de-mergers, transfer of business assets within a group of companies, vertical and horizontal spin-off of business or part of business, share-for-share transactions and cross-border reorganisations where the Swiss tax residence is maintained, and like-kind exchange of participations) are typically possible without triggering adverse Swiss tax consequences (tax neutrality). In addition, special rules provide for a legal framework to tax neutrally substitute assets and qualifying shareholdings. For reorganisations, it is best practice to apply for advance tax rulings with the competent tax authorities.

Foreign Account Tax Compliance Act (FATCA)
In 2013, Switzerland and the United States (US) signed a bilateral FATCA agreement. The FATCA agreement will help Swiss financial institutions by means of simplifications in the implementation of the US FATCA legislation. The FATCA agreement and the implementing Swiss act entered into force on 2 June 2014 and 30 June 2014, respectively.

The FATCA agreement shall ensure that accounts held by US persons with Swiss financial institutions are disclosed to the US tax authorities either with the consent of the account holder or through ordinary administrative assistance channels (no automatic information exchange).

Automatic information exchange
In view of the OECD's developments on a new standard for the automatic exchange of information, Switzerland will switch to an automatic exchange of information between the competent authorities on a reciprocal basis.

Switzerland has signed respective agreements with the following partner states on the automatic information exchange (as of 1 May 2016): Australia, Canada, EU (the agreement is applicable for all EU member states), Guernsey, Iceland, Isle of Man, Japan, Jersey, Norway and South Korea. Currently, none of these agreements has been enacted. The first automatic exchange of information between Switzerland and its partner states shall, however, occur in 2018.

WHT agreements
Switzerland has concluded WHT agreements with the United Kingdom and Austria that define a final WHT procedure for the future and a tax-related regularisation of the past related to investment income of foreign bank clients. According to the Swiss government, the long-term effect of these bilateral agreements is equivalent to the automatic exchange of information in the area of investment income.

Significant developments

New real property transfer tax regime
A new real property transfer tax regime in Taiwan has taken effect starting from 1 January 2016. As a result of the implementation of the new real property transfer tax regime, luxury tax will no longer be levied on sales of land or building starting from 1 January 2016. See Real property transfer tax in the Other taxes section for more information.

Amendments to the Mergers and Acquisitions (M&A) Act
The Legislative Yuan passed amendments to the M&A Act, which came into effect on 8 January 2016. See Tax concessions on merger in the Tax credits and incentives section for more information.

Amendments to the Statute for Industrial Innovation (SII)
The Legislative Yuan passed amendments to the SII, with goals to enhance the competitive advantage of domestic industries. The amendments are effective from 1 January 2016 to 31 December 2019 and include research and development (R&D) incentives.

R&D incentives
To encourage continued investment in innovative R&D activities and to meet the actual needs of different industries and achieve policy results, the amendments to the SII provide another alternative for companies to claim an R&D credit of 10% of qualifying R&D expenses against income tax payable within a period of three years, starting from the current year. In addition, to facilitate the circulation and application of innovative R&D results, and to promote industrialisation of innovative technologies, where individuals/companies derive income from transfer or license of their self-developed intellectual property (IP), the amendments also allow the individuals/companies to either deduct qualifying R&D expenses up to 200% (capped at corresponding income received) within the current year or claim R&D tax credits against income tax payable.

Tax treaties
Within the past year, Taiwan’s tax treaty network has increased to include treaties with China, Japan, and Canada, all of which have been signed, but have not yet come into effect.

Taxes on corporate income
The corporate income tax (CIT) rate in Taiwan is 17%.
Resident companies in Taiwan are taxed on their worldwide income as follows:

<table>
<thead>
<tr>
<th>Taxable income (TWD*)</th>
<th>Tax thereon</th>
</tr>
</thead>
<tbody>
<tr>
<td>Up to 120,000</td>
<td>Exempt</td>
</tr>
</tbody>
</table>
A non-resident company is taxed on income derived from Taiwan sources. A non-resident company with a fixed place of business (FPOB) or business agent in Taiwan is taxed similarly to a resident company (i.e. subject to filing of an annual CIT return based on the same CIT rate provided above). A non-resident company having no FPOB or business agent in Taiwan is subject to withholding tax (WHT) at source on its Taiwan-sourced income. WHT rates on dividends, interest, and royalties may be reduced if the recipient is a tax resident of a tax treaty country and the relevant treaty provides for a reduced rate. See the Withholding taxes section for more information.

**Tonnage tax system**
A qualifying enterprise having its head office in Taiwan engaged in maritime transportation may elect to be taxed under the tonnage tax system, where a lump sum tax is calculated on the net tonnage of their fleet. Once the application is approved, the enterprise must remain under the tonnage tax system and cannot switch to the regular tax system at its discretion for ten consecutive years. Furthermore, loss carryforwards and tax incentives are not eligible under the tonnage tax system.

**Profit retention tax**
An additional 10% profit retention tax is imposed on any current earnings of a corporation that remain undistributed by the end of the following year. Taiwan branches of foreign companies are not subject to profit retention tax.

**Imputation tax system**
Taiwan operates an imputation tax system to eliminate double taxation on earnings of a corporation. The 17% CIT and 10% profit retention tax already paid by the corporation can be distributed to the resident individual shareholders as tax credits to offset against their individual income tax. However, the tax credits distributable to shareholders are subject to certain limitations. Currently, the imputation tax credit is reduced by one-half. Non-resident shareholders may credit the 10% profit retention tax previously paid by the investee company against the dividend WHT where the dividends are distributed from retained earnings that have already been subject to the 10% profit retention tax. Please note that credit for profit retention tax from dividend WHT is calculated based on a prescribed formula and subject to a ceiling. The ceiling is one-half of the original amount. That is, the ceiling of 10% profit retention tax creditable against dividend WHT is computed as ‘dividends distributed from retained earnings where 10% profit retention tax has already been levied’ x 10% x 50%.

**Income basic tax (IBT)**
All Taiwan resident companies, as well as non-resident companies with an FPOB or business agent in Taiwan, should calculate IBT if they earn certain income that is tax-exempt. The basic income of a company is the amount calculated in accordance with a formula stipulated by the government, with a deduction of TWD 500,000. The IBT rate is 12%. If the IBT amount is greater than the regular CIT amount, taxpayers must pay income tax based on the regular CIT amount plus the difference between the IBT amount and the regular CIT amount. On the other hand, if the regular CIT amount is greater than the IBT amount, no special action is required.
**Corporate residence**

A company is a resident of Taiwan for CIT purposes if it is incorporated in Taiwan. A non-resident company that has an FPOB or business agent in Taiwan is obligated to file a CIT return in Taiwan on its Taiwan-sourced income.

**Permanent establishment (PE)**

The term ‘permanent establishment’ only exists in the underlying double tax agreements (DTAs) signed with Taiwan. Taiwan domestic tax regulations only refer to an FPOB and business agent, which generally follows the definitions of an FPOB and agency PE in the Organisation for Economic Co-operation and Development (OECD) Model Tax Convention.

---

**Other taxes**

**Business tax**

All sales of goods and services in Taiwan, as well as the importation of goods into Taiwan, are subject to business tax. There are two types of business tax systems: value-added tax (VAT) and gross business receipts tax (GBRT).

Sellers and service providers are generally obligated to pay business tax for the sales of goods or services within Taiwan unless the law provides otherwise. For importation of goods, the business tax will be paid by the goods receivers or buyers via customs. For importation of services sold by foreign companies to Taiwanese buyers, business tax shall be paid by the service buyers. However, if the foreign service purchased is under TWD 3,000 per transaction, business tax shall not apply. Furthermore, the service buyer (corporate entity) will not be required to pay business tax if it is exclusively engaged in taxable transactions subject to either 5% or 0% VAT.

**Value-added tax (VAT)**

VAT is applicable to general industries, and the VAT rate is 5%. Under the VAT system, each seller collects output VAT from the buyer at the time of sale, deducts input VAT paid on purchases from output VAT, and remits the balance to the tax authority.

**Gross business receipts tax (GBRT)**

GBRT is applicable to specified industries (e.g. financial institutions, small businesses). For investment trust companies, securities and futures firms, short-term commercial paper enterprises, and pawnshops, the rate is 2%. The GBRT rate on revenues derived from the core business operations of banks and insurance enterprises is 5%. For re-insurance enterprises, the rate is 1%.

**Customs duties**

Taiwan uses the Customs Cooperation Council Nomenclature (CCCN) to classify goods and set duty rates. The customs duty is payable by the consignee or the holder of the bill of lading for imported goods, and is based on the dutiable value or the volume of goods imported.

**Commodity tax**

Commodity tax (excise duty) is levied on certain commodities, as specified in the Commodity Tax Act (including rubber tyres, beverages, cement, plate glass, oil and gas, electrical appliances, and vehicles), at the time when such goods are dispatched from a factory or when imported. Tax rates vary from 8% to 30% and are applicable to different types of commodities based on the value of the goods or its volume in specific circumstances.

</tbody>
</table>

**Property tax**
Land and buildings are annually assessed for tax based on their officially assessed values as determined by the government authorities at the applicable rate. The land value tax rate ranges from 1% to 5.5% of the assessed land value. The building tax rate for commercial properties is 3% to 5% of the assessed value, and the rate for non-commercial properties is 1.2% to 3.6% of the assessed value.

**Land value increment tax (LVIT)**
The sale of land is currently subject to LVIT and payable by the seller. The tax is levied on the increase in the government-assessed value of the land during the ownership period, adjusted for inflation, at regular progressive rates ranging from 20% to 40%, or a special rate of 10%.

**Real property transfer tax**
The new real property transfer tax regime is applicable to all properties acquired on or after 1 January 2016, as well as those bought on or after 2 January 2014 if held for less than two years. The taxable base is the market value of the properties reduced by related costs, expenses, and the increase in government-assessed land value for LVIT purposes. A rate of 17% will apply on Taiwanese corporate taxpayers; whereas, a tax rate of 35% or 45% will apply on profit-seeking enterprises with foreign head offices located outside of Taiwan (i.e. Taiwan branch), depending on whether the property is held for more than or less than one year.

LVIT will remain unchanged by the implementation of the new real property transfer tax regime on property transactions. The total amount of land value increment is deducted from real estate transaction income to avoid double taxation. The old property tax regime still applies to properties purchased prior to 2 January 2014, or those bought on or after 2 January 2014 if held for more than two years, where only gain from sale of buildings is subject to CIT assessment, while gain from sale of land is exempt from CIT assessment, and LVIT applies to increment in government-assessed value of land instead.

**Deed tax**
Currently, transactions of immovable property involving sale, creation of Dien, exchange, bestowal, partition, or acquisition of ownership by virtue of possession are subject to deed tax. The deed tax rates range from 2% to 6%, depending on the types of transactions involved.

**Stamp tax**
Stamp taxes are imposed on each copy of the following documents executed within the territory of Taiwan (with the following respective tax rates):

- Monetary receipts must have a revenue stamp of 0.4% of the amount received per piece. However, a receipt for the money deposited by the bidder requires a revenue stamp of 0.1% of the amount received per piece.
- Contract or deed for the sale or purchase of movable property must have a revenue stamp of TWD 12 per piece.
Taiwan

- Contractual agreement under which one party agrees to complete a specific piece of work for the other party for consideration must have a revenue stamp of 0.1% of the contract price.
- Contract for the sale, transfer, and partition of real estate must have a revenue stamp of 0.1% of the contract price.

**Securities transaction tax**
Tax is levied on securities transactions at the rate of 0.3% on gross proceeds from the sale of domestic shares. Trading in corporate bonds and financial bonds issued by Taiwan companies is temporarily exempt from securities transaction tax assessment.

**Luxury tax**
A 10% luxury tax applies to the sale of passenger cars, private jets, and helicopters valued at TWD 3 million or more, as well as to the sale of yachts that are at least 30.48 metres (100 feet) long. Preserved wildlife products (including turtle shells, hawksbill, coral, ivory, furs, and their products), high-end furniture, and non-refundable memberships worth TWD 500,000 or more are also taxed at 10%.

As of 1 January 2016, luxury tax is no longer levied on sales of real estate properties.

**Payroll taxes**
There are no payroll taxes other than those for social security contributions outlined below.

**Social security contributions**
There are compulsory social security programs that require contributions from employers and employees based on monthly insured salary, which is capped at various amounts for labour insurance, health insurance, and pensions. Taiwan social security programs include the following:

- Labour Insurance Program: Where a company hires five or more employees, it is obligated to insure all employees (including domestic and foreign employees) under the labour insurance program run by the government. Companies with less than five employees may also apply for labour insurance coverage for their employees. The premium rate for ordinary insurance is 9% on the employee’s monthly insured salary up to TWD 43,900, with an additional 1% levied for unemployment insurance. The employer is required to contribute 70% of this premium.
- National Health Insurance (NHI) Program: The premium rate for each insured person is set at 4.69% of a domestic/foreign employee’s monthly insured salary up to TWD 182,000. The employer is required to contribute 60% of this premium. Further, the employer bears the cost of both the employee itself and that of the average dependant, which amounts to 1.61 headcount per employee. Further, when the ‘monthly taxable salaries actually paid by the employer’ exceeds the ‘monthly insured salaries’ (e.g. due to bonus paid), a 2% supplementary NHI premium will also be imposed on the excess amount and borne by the employer.
- Labour Pension Program: An employer needs to make monthly contributions to a domestic employee’s individual pension account set up with the Labour Insurance Bureau. The monthly contribution rate borne by the employer should be at least 6% of the employee’s monthly insured salary up to TWD 150,000.

**Branch income**
A non-resident company whose head office is located outside of Taiwan must keep separate books for its branch in Taiwan. A head office or regional headquarters’ general and administrative expenses may be allocated to the branch under certain conditions. CIT is assessed only on the branch’s profits. A Taiwan branch should complete an annual CIT return.
A Taiwan branch of a foreign company may remit after-tax profits to its foreign head office without further tax due.

**Motion picture leasing**

A foreign motion picture’s branch in Taiwan can deem 45% of its revenue from leasing of motion pictures as cost. However, if a foreign enterprise with no branch office in Taiwan leases motion pictures through agents, 50% of the revenues can be deemed as taxable income.

**Deemed profit method**

A non-resident company that is engaged in international transportation, construction contracting, provision of technical services, or machinery and equipment leasing within Taiwan, and where the cost and expenses are proven to be difficult to calculate, may apply for advance approval from the National Tax Administration (NTA) to adopt the deemed profit method to determine the taxable income as 10% or 15% of the gross revenues. This will effectively reduce the WHT rate to 2% or 3% on gross revenues once the approval is obtained from the NTA.

**Income determination**

A Taiwan resident company is taxed on its net income, which is defined as gross annual income after deduction of costs, expenses, losses, and taxes. Except for certain exempt items, income from all sources, including offshore and onshore, is subject to CIT.

A non-resident company is only taxed on its Taiwan-sourced income. Article 8 of the Income Tax Act and the related Guideline defines the types of income that should be regarded as sourced from Taiwan. For example, fees received by a non-resident company for service performed entirely outside of Taiwan are exempt from income tax assessment, subject to supporting evidentiary documents.

**Inventory valuation**

Inventory must be valued at cost. If cost exceeds the net realisable value, the latter may be used as the valuation basis. Cost may be determined by the first in first out (FIFO), moving average, weighted average, specific identification, or any other method approved by the tax authorities. Conformity between financial and tax reporting is not required.

**Capital gains**

Gains on the disposal of fixed assets are taxable as current-year income of the company, with the exception of gains on the sales of land under the old real estate taxation regime. Capital gains on disposal of Taiwanese marketable securities and futures by resident companies and non-resident companies with an FPOB or business agent in Taiwan are exempt from CIT assessment, but are liable for IBT of 12%, with an exemption amount of TWD 500,000. Capital losses may be deducted against capital gains and carried forward for five years. 50% of capital gains can be tax exempt should the securities be held for more than three years. In addition, securities transaction tax is levied on the sales proceeds (see the Other taxes section).

**Dividend income**

Dividends received from resident investee companies by a resident corporate shareholder are not included in taxable income. In addition, the imputation tax credit derived from the dividend income of the investee corporation can be distributed to domestic corporate shareholders, but this tax credit cannot be used to offset the domestic corporation's income tax liability; rather, the tax credits must be recorded in a separate book until they are further distributed to the resident individual shareholders of the domestic corporation.
Taiwan

Dividends received from foreign subsidiaries are taxable, but credits are given for the WHT paid offshore, limited to the incremental tax liability that would result if the dividends were added to the Taiwan corporate shareholder's taxable income and taxed at the Taiwan CIT rate.

**Interest income**
Interest received on commercial paper and certain other interest-bearing financial instruments is subject to WHT of 10% and 15%/20% for resident and non-resident taxpayers, respectively (see the Withholding taxes section). This income should be reported as current-year income, and the WHT paid can be deducted against the income tax payable.

**Royalties and technical service fees**
Non-resident companies who receive royalties for licensing patents both registered in Taiwan and overseas, trademarks registered in Taiwan, and computer software copyright licensed to Taiwan companies, or who receive technical service fees in relation to construction of factories/plant/power plants to Taiwan companies incorporated as companies limited by shares, can apply for income tax exemption by obtaining advance approval from both the Industrial Development Bureau and the tax authorities. For licensing of patents and technical service fees, the Taiwan licensee company needs to be engaged in designated industries. The amendments to the relevant regulation governing the applicable criteria are effective retroactively for contracts concluded after 1 January 2011.

**Foreign income**
Taiwan adopts a worldwide tax system to tax its resident companies (including the Taiwan subsidiaries of foreign companies). In theory, taxation on foreign investment income of a Taiwanese company is deferred until cash is repatriated to Taiwan. However, given Taiwan also taxes undistributed profits based on net income shown on the income statement (see Profit retention tax in the Taxes on corporate income section), foreign investment income may still be taxed in Taiwan before cash is repatriated back to Taiwan.

**Deductions**

**Depreciation**
Depreciation on all fixed assets other than land, including premises, plants (buildings), and equipment, which are used to generate income, is allowed as a deduction. The straight-line, fixed percentage on diminishing book value, sum-of-years-dig, unit-of-production, and working-hour methods are acceptable depreciation methods to the tax office. The useful lives of typical assets are shown below:

<table>
<thead>
<tr>
<th>Asset category</th>
<th>Useful life</th>
</tr>
</thead>
<tbody>
<tr>
<td>Computer equipment</td>
<td>3</td>
</tr>
<tr>
<td>Furniture and fixtures</td>
<td>5</td>
</tr>
<tr>
<td>Automobile</td>
<td>5</td>
</tr>
<tr>
<td>Building</td>
<td>50</td>
</tr>
</tbody>
</table>

With the approval of the tax authority, a company may revalue its fixed assets each time the government's wholesale price index increases by 25% over the base period. A company's base period is established at the time of purchase of fixed assets or at such time when a company revalues its fixed assets. Any increase in fixed assets may then be depreciated for tax purposes.
**Goodwill**

Goodwill is commonly realised from merger and acquisition, which should follow the purchase method as defined under Taiwan Generally Accepted Accounting Principles (GAAP) or International Financial Reporting Standards (IFRS). Goodwill should be amortised for 15 years if a valuation report is issued by a creditable professional valuation firm and the net identifiable assets are valued separately. However, in practice, the amortisation of goodwill is frequently challenged by the Taiwan tax authority.

**Start-up expenses**

Start-up expenses during the start-up period can be deducted in the year incurred. The start-up period is from the preparatory stage to the date the business starts to generate significant revenue from its primary business operation.

**Interest expenses**

Interests on loans that are used for business purposes are deductible in the year incurred. However, for a loan from a non-financial institution, the interest rate shall not exceed 15.6% per annum. As for interest on inter-company loans, the deductible amount is subject to the thin capitalisation rule and transfer pricing regulations (see the Group taxation section).

**Bad debt**

Actual losses on bad debts are allowed for deduction when certain legal proceedings or time requirements have been satisfied. The loss should first be charged against the bad debt provision, which should not exceed either 1% of accounts receivable and notes receivable outstanding, or the actual average bad debt ratio for the past three years.

**Charitable contributions**

Charitable contributions to support national defence, troop morale, contribution to government of any level, and donation made with special approval of the Ministry of Finance (MOF) are not subject to any tax limit. Donations to other parties are subject to prescribed limits under the relevant regulations.

**Fines and penalties**

Fines and penalties arising from violation of various tax laws are generally not deductible.

**Taxes**

All taxes, other than income tax, are generally deductible, unless where such taxes are related to tax-exempt income. The tax associated with the acquisition of real estate should be included in the cost of the land or building.

**Net operating losses**

A company's net operating losses can be carried forward for ten years. Losses cannot be carried back.

**Payments to foreign affiliates**

Royalties, interest, and service fees paid to a foreign affiliate are subject to WHT. Royalties or service fees paid to a foreign entity may be tax-exempt if certain requirements are met and prior approval is obtained.

**Group taxation**

Group enterprises meeting certain criteria under the Financial Holding Company Act and Business Mergers & Acquisitions Act may file consolidated tax returns for the Taiwan parent and its first tier Taiwan subsidiaries. For other enterprises, group taxation is not permitted. The Taiwan parent is eligible to file consolidated tax returns if it continuously holds over 90% of the shares of the subsidiaries for 12 months in a tax year.
Taiwan

Transfer pricing
Transfer pricing regulations were established to constrain multinational corporations from leaving their profits in countries with lower tax rates. For applicable companies, the disclosure of related-party transactions in the CIT return and the preparation of a transfer pricing report is required. Upon request, the transfer pricing report will have to be submitted to the Taiwan tax authority within one-month of notice. The transfer pricing report must demonstrate the company’s good faith effort to comply with the assessment rules. Without proper reason, failure to comply with such rules will result in additional tax payable and financial penalties. The types of transactions governed by these regulations include the following: transfer of tangible assets, use of tangible assets, transfer of intangible assets, use of intangible assets, rendering of services, use of funds, business restructuring, and other types of transactions prescribed by the MOF.

If related-party transaction amounts exceed certain thresholds laid out below, an advance pricing agreement (APA) with the tax authority may be obtained to eliminate risk of intercompany prices being challenged. The criteria for applying for an APA are as follows:

- The total amount of the controlled transaction covered under the APA is at least TWD 500 million or the annual amount of such controlled transaction is at least TWD 200 million.
- There has been no significant act of tax evasion in the past three years.
- The required documentation for the APA application has been well prepared, including the transfer pricing report.
- Other criteria specified by the MOF are satisfied.

Thin capitalisation
Deductible interest expense on inter-company loans is capped at a prescribed debt-to-equity ratio of 3:1. The thin capitalisation rule generally applies to profit-seeking enterprises, except banks, credit cooperatives, financial holding companies, bills finance companies, insurance companies, and securities companies.

Controlled foreign companies (CFCs)
Currently, profits of overseas subsidiaries held by Taiwan companies are not subject to 17% CIT in Taiwan until such profits are repatriated to Taiwan as dividend income.

Tax credits and incentives
Certain tax incentives are provided to investors if they are located in prescribed areas, such as science parks, economic processing zones, free-trade-zones, etc. Other tax credits are granted to qualifying companies that invest in specific businesses or industries promoted by the government, such as biotech.

Research and development (R&D) tax incentives
Under the Statute for Industrial Innovation (SII), R&D credits are available for up to 15% of qualified R&D expenses incurred, with the maximum amount of tax credit capped at 30% of the tax payable for the year in which the expenses were incurred, including the 10% profit retention tax.

Effective from 1 January 2016 to 31 December 2019, amendments to the SII provide another alternative for companies to claim an R&D credit of 10% of qualifying R&D expenses against income tax payable within a period of three years, starting from the current year. In addition, to facilitate the circulation and application of innovative R&D results, and to promote industrialisation of innovative technologies, where individuals/companies derive income from transfer or license of their self-developed IP, the amendments also allow the individuals/companies to either deduct qualifying R&D
expenses of up to 200% (capped at corresponding income received) within the current year or claim R&D tax credits against income tax payable.

Moreover, according to the Statute for Development of Small and Medium Enterprises (SMEs), enterprises qualifying as SMEs may elect one of the following methods to calculate R&D credits, subject to the 30% cap mentioned above:

• 15% of qualified R&D expenses for the current year, with credits limited to the same year, or
• 10% of qualified R&D expenses for the current year, which can be carried forward for two ensuing years if the 30% cap mentioned above is exceeded.

According to Regulation Governing R&D Investment Tax Credit (ITC) Available to Profit-seeking Enterprises, a single annual application for R&D ITC should be made with the central competent authorities within four months prior to the CIT return filing due date. Information relating to R&D ITC should be provided with the CIT return.

**Tax concessions on merger**

A number of tax incentives are available under the M&A Act to encourage M&A activities in Taiwan. Certain taxes, including business tax, deed tax, IVIT, securities transaction tax, and stamp tax, may be exempted or deferred in case of acquisitions, mergers, or corporate divisions (including spin-offs) that meet certain conditions.

After the merger, spin-off, or acquisition, any tax concession previously enjoyed by the merged entities will continue to be applicable to the surviving or newly-created company. However, it is required to manufacture the same products or provide the same services that were originally approved for tax concessions by the merged entities in order to continue the concessions obtained previously.

The unexpired and unutilised net operating losses of the participating entities prior to the merger or spin-off may be carried over to the surviving or newly-created entity according to the percentage of shareholding in the surviving or newly-created company held by all shareholders of the participating entities.

Income tax exemption is available if the shares acquired by a company as a result of transfer of its entire or substantial portion of business or assets to another company, or due to spin-off, is greater than 80% of the consideration of the entire transaction, and all the shares so acquired have been transferred to the shareholders of the transferor.

**Free-trade-zones**

According to the Statute for the Establishment and Management of Free-trade-zones, foreign companies or their branch offices in Taiwan that apply for establishment in the free-trade-zone or delegate companies already established in the free-trade-zone to store and/or perform simple processing in the free-trade-zone and sell goods to customers within and outside of Taiwan shall be exempted from CIT. However, in the event that the annual domestic sales exceed 10% of the total annual domestic and foreign sales, the portion in excess shall not be exempted from CIT.

**Foreign tax credit**

Taiwan uses the credit method to avoid double taxation of income. Foreign taxes paid on foreign-sourced income may be credited against a company’s total Taiwan income tax liability. However, the credit is limited to the incremental taxes derived from the foreign-sourced income.
## Withholding taxes

Resident corporations paying certain types of income are required to withhold tax as follows:

<table>

**Notes**

1. For non-resident enterprises, a 15% WHT applies to interest income derived from short-term bills, securitised certificates, corporate bonds, government bonds, or financial debentures, as well as interest derived from repurchase transactions involving these bonds or certificates. The rate in all other cases is 20%, unless reduced under a tax treaty.
2. Royalties received by foreign enterprises that are specially approved in advance by the government are exempt from income tax.
3. A rate of 10% applies for shareholders that are companies (other than partnerships) with at least a 25% shareholding.
4. 7% of the gross amount of the interest arising in a territory and paid on any loan of whatever kind granted by a bank of the other territory.
5. The WHT rate on technical service fees is reduced to 7.5%.
6. The total tax burden of CIT and dividends tax is not to exceed 40% of the total profits of the company.
7. A rate of 5% applies for shareholders with at least a 10% shareholding.
8. A rate of 5% applies for the use of (or the right to use) industrial, commercial, or scientific equipment.
9. A rate of 10% applies for shareholders with at least a 20% shareholding.
A rate of 10% applies to all types of interests, except a rate of 15% applies for interest derived from real estate investment trusts and real estate asset trusts in Taiwan. Tax exemption applies to interests paid to public institutions of the other territory as mutually agreed between the competent authorities of both territories.

A rate of 5% applies for shareholders with at least a 25% shareholding.

A rate of 15% applies to all types of interests, except a rate of 10% applies for interest received by any financial institution (including an insurance company). Tax exemption applies to interests paid to the authority of the other territory as mutually agreed between the competent authorities of both territories.

A rate of 15% applies for shareholders/creditors that are a collective investment vehicle and treated as a body corporate for tax purposes.

**Tax treaties**

Tax treaties entered into with Australia, Austria, Belgium, Denmark, France, Gambia, Germany, Hungary, India, Indonesia, Israel, Italy, Kiribati, Luxembourg, Macedonia, Malaysia, Netherlands, New Zealand, Paraguay, Senegal, Singapore, Slovakia, South Africa, Swaziland, Sweden, Switzerland, Thailand, the United Kingdom, and Vietnam relate to corporate and individual income tax.

Treaties with Canada, the European Union, Germany, Israel, Japan, Korea, Luxembourg, Macau, Netherlands, Norway, Sweden, Thailand, and the United States (US) relate to certain earnings from the operation of ships and/or aircraft.

**Tax administration**

**Taxable period**
The tax year in Taiwan runs from 1 January to 31 December. Businesses may request approval from the local collection authority to file CIT returns using a fiscal year-end other than 31 December.

**Tax returns**
Tax returns are filed on a self-assessment basis. CIT returns are due no later than five months after the end of the tax year.

**Payment of tax**
Tax is paid on a self-assessment basis in two instalments. The first payment is based on 50% of the tax liability of the prior year's tax return and is made in the ninth month of the enterprise’s fiscal year. However, if the taxpayer meets certain requirements, it may self-assess the provisional tax based on the taxable income of the first half of the current fiscal year and deduct income taxes paid overseas against the provisional income tax payable if corresponding income is consolidated in the provisional tax return. The second payment is made at the time of filing the annual tax return. The returns are subsequently reviewed by the tax authorities, and a final assessment is issued.

Any overpaid tax as a result of the tax collection authority’s mistake shall be refunded to the taxpayer within two years of the tax authority's acknowledgement of such mistake, and shall not be subject to the original five-year period for applying for refund where the taxpayer is responsible for the mistake.

**Tax audit process**
Taiwan does not have a fixed audit cycle. Tax audit can be carried out any time prior to the expiration of the statute of limitations. Companies may be selected for audit if certain criteria are met.

**Statute of limitations**
The statute of limitations in Taiwan is five years from the tax return filing date if the return is filed on time. Where a taxpayer fails to file an annual tax return within the statutory deadline or evades tax by fraud or any other unrighteous means, the statute of limitations is extended to seven years.
Taiwan

**Tax ruling system**
Corporate taxpayers may file an advance tax ruling application with the tax authorities, together with the relevant supporting documents, to clarify their tax position before initiating the specific transaction. The tax authorities are obligated to issue a response within six months after submitting the application.

**Recent focus of Taiwan tax authorities**
The tax authorities have developed sophisticated and comprehensive tax audit techniques and approaches over the years. The following sets out some of the common items frequently challenged or audited by the tax authorities:

- Management fees allocated from the foreign parent company or affiliates: The tax authorities frequently question the economic substance of the services rendered, the allocation method, and the availability of sufficient documents to support the tax deduction claim.
- Amortisation of goodwill: The tax authorities frequently challenge the valuation report supporting the calculation of goodwill and whether the transaction itself should give rise to goodwill.
- Amortisation of business rights: The tax authorities have taken a more conservative view, which limits ‘business rights’ to those explicitly authorised by laws (e.g. those regulated under certain public utilities act).
- Eligibility for R&D tax credits.
- WHT compliance.
- Transfer pricing compliance.
- Business tax audit.

**Other issues**

**US Foreign Account Tax Compliance Act (FATCA)**
A Model 2 Intergovernmental Agreement (IGA) is treated as ‘in effect’ by the US Treasury as of 23 June 2014. The United States and Taiwan have reached an agreement in substance, and Taiwan has consented to disclose this status. In accordance with this status, the text of such IGA has not been released and financial institutions in Taiwan are allowed to register on the FATCA registration website consistent with the treatment of having an IGA in effect, provided that the jurisdiction continues to demonstrate firm resolution to sign the IGA as soon as possible.
Significant developments

The government of the Republic of Tajikistan introduced some changes in the requirements for tax residency certificates, which become effective from 1 January 2016. The requirements specify that tax residency certificates must to be apostilled or legalised.

Also, a new article regulating taxation of professional participants of securities markets was introduced and became effective from 1 January 2016.

Taxes on corporate income

All Tajik legal entities are subject to corporate income tax (CIT) in Tajikistan. Tajik residents are taxed on their worldwide income. Non-residents are subject to CIT in Tajikistan only on Tajikistan-source income. Non-residents operating through a permanent establishment (PE) are generally subject to the same CIT provisions.

From 1 January 2015, CIT is computed by applying the statutory 24% rate to taxable income (14% for enterprises producing goods), which is calculated based on gross income decreased by allowed deductions and losses carried forward from previous periods. CIT liability may not be less than 1% of aggregate income.

The gradual reduction of CIT rates is expected to reach 23% (13% for enterprises producing goods) in 2017.

Simplified tax system

The simplified tax system for small business entities (hereinafter ‘tax under the simplified system’) is a special tax regime, under which income tax for small business legal entities or income tax for individual entrepreneurs shall be paid under the simplified procedure. The simplified tax regime is applied by the small businesses until aggregate annual income does not exceed 500,000 Tajikistan somoni (TJS).

Taxpayers who pay the tax under the simplified system are not liable for:

- Income tax, except for withholding tax (WHT).
- Road tax.
- Income tax from revenues of the individual entrepreneur, functioning according to the certificate, except for WHT.
- Value-added tax (VAT), except for the import VAT and reverse-charge VAT.

The tax base for applying tax under the simplified system is the aggregate income. For activities related to production of goods, the tax rate is 5%; for other activities, the tax rate is 6%.

Local income taxes

There are no local income taxes in Tajikistan.
Corporate residence

Legal entities formed under Tajik law, as well as legal entities whose effective control (management) is in Tajikistan, are recognised as residents for CIT purposes.

Permanent establishment (PE)

Under general provisions of the Tax Code, any activity carried out through a fixed place on the territory of Tajikistan, including activity performed through a dependent agent, regardless of duration of such activities, will create a PE of a non-resident.

Further, a non-resident legal entity having business activities in Tajikistan may also create a PE in the following cases:

- ‘Services PE’: a non-resident enterprise renders services in Tajikistan through employees or other personnel engaged by the non-resident for such purposes, provided that these activities continue for more than 90 calendar days within any consecutive 12-month period.
- ‘Construction PE’: a construction site, assembly facility, performance of supervisory activities (connected with such objects), or project works/design works.
- ‘Agency PE’: a non-resident will be considered as having a PE in cases where a resident or non-resident has the contractual authority to represent the non-resident’s interests in Tajikistan (i.e. act and/or sign contracts on behalf of the non-resident).

Other taxes

Value-added tax (VAT)

VAT is generally assessed on taxable turnover, which includes goods and services. The current VAT rate is 18%. Individuals and businesses are required to register as VAT payers if the taxpayer’s taxable turnover exceeds a threshold of TJS 500,000 for the preceding 12-month period.

Generally, the Tax Code exempts the following from VAT: goods and services that are not provided in Tajikistan under the place of supply rules; sale, transfer, or rent of real property; financial services; certain medical services; and certain other goods and services.

For goods, the place of supply is determined as the initial point of transportation. Services are generally considered to be provided at the place of business of the service provider or the actual place where services are rendered. However, certain types of services are considered to be provided at the location of the buyer. Such services include legal, marketing, consulting, accounting, etc.

A VAT refund is generally available for qualified exporters if input VAT exceeds assessed VAT.

VAT returns, together with issued and received invoices, are filed monthly, not later than the 15th day of the month following the reporting month. Payments are due by the same date.

Customs duties

The tariff rates established by the government, ranging from 0% to 15%, are applied on an ad valorem basis, at a specific rate, or via a combination of the two. The tax rate of 0% is granted to certain types of goods (e.g. some types of printed publication, unwrought wool, gaseous hydrocarbons, electricity).
Note that Tajikistan is signatory to several free trade agreements, primarily among the following Commonwealth of Independent States (CIS) countries: Russia, Belarus, Kazakhstan, and Kyrgyzstan.

**Customs fees**
Customs clearance can't be performed without certification of goods, for which importer should pay a fee based on the time spent by a certification specialist. Fees for customs clearance range from approximately 10 United States dollars (USD) to USD 450, depending on customs value.

**Excise taxes**
Excise tax is assessed on beverages, tobacco products, fuel, tyres, passenger automobiles, jewellery, and mobile communications. Excise tax rates are established by the government.

**Property taxes**
Property tax is divided into two taxes, which are paid based on the taxable base.

**Land tax**
A tax on land plots is paid annually based on the rates established by the Tajikistan government applied to the area of the land plot, which vary depending on the location of the land plot.

**Real estate tax**
Tax on real estate is paid annually and applies to immovable real property, such as buildings, houses, and flats. The real estate tax rate varies from 3% to 12% and also depends on territory coefficients.

**Transfer taxes**
There are no transfer taxes in Tajikistan.

**Stamp taxes**
There are no stamp taxes in Tajikistan.

**Payroll taxes**
There are no payroll taxes borne by an employer other than social tax (see below).

**Social tax**
An employer is obligated to make social tax payments at the rate of 25% of salary. In addition to an employer’s portion, 1% social tax is withheld from employee’s income.

**Road tax**
The formula for calculating road tax is total deductions of the reporting year multiplied by the 1% tax rate (0.25% for trade companies). If actual deductions do not exceed 70% of gross income, the tax base for road tax is 70% of gross income. It is contemplated that the tax will be eliminated in 2017.

**Vehicle tax**
Vehicle tax is computed as a percentage of the calculation index applied for horsepower of the vehicle engine. The percentage ranges from 2.5% to 15%.

**Branch income**
In addition to CIT, PEs are subject to branch profit tax at the rate of 15% of net profit after CIT, unless a lower rate is prescribed by an applicable double tax treaty (DTT).
**Income determination**

Income tax is assessed on taxable income, which is the difference between gross income and allowed exemptions and deductions.

**Inventory valuation**

Inventory accounting for tax purposes follows inventory accounting for financial reporting purposes. Public companies are required to apply International Financial Reporting Standards (IFRS). Other legal entities may apply IFRS or National Accounting Standards.

For tax purposes the following inventory methods are permitted: last in first out (LIFO), first in first out (FIFO), and weighted average. For public companies, there can be a mismatch between the tax method and the book method, as LIFO is not permitted under IFRS. For other legal entities, the tax method will match the book method if the tax accounting follows National Accounting Standards.

**Capital gains**

In general, capital gains on securities are taxed as business profits.

**Dividend income**

Under the Tax Code, dividends are defined as any distribution of income or property of a legal entity between its shareholders. Dividends should be included in annual aggregate income.

**Inter-company dividends**

Inter-company dividends received by a resident parent company from a resident subsidiary are exempt from annual aggregate income.

**Interest income**

The Tax Code defines interest income as income received from any fees associated with a debt obligation, including tax liability, payments for any loans, and contributions on deposit (accounts). Interest income is subject to CIT in Tajikistan and should be included in annual aggregate income.

**Foreign income**

Tajik residents are taxed on their worldwide income. Non-residents are subject to CIT in Tajikistan only on Tajikistan-source income. There are no provisions in the Tax Code for tax deferral.

*For information about Controlled foreign company (CFC) provisions, see the Group taxation section.*

**Deductions**

In general, all business expenses (e.g. materials, payroll) are allowed as a deduction if the expenses are connected with the earning of income, not of a capital nature, and supported by proper documentation.

**Depreciation**

The deduction for costs related to fixed assets generally is made through depreciation at rates ranging from 7% to 20% using the declining-balance method.

**Goodwill**

There are no special provisions for goodwill deduction in the Tax Code; however, goodwill is not deductible in accordance with the general rules on intangible assets amortisation.
Start-up expenses
Start-up expenses are not deductible. However, in case of registration of a branch, the head office can deduct expenses related to the creation of such branch.

Interest expenses
Interest deductibility is generally limited to three times the refinancing rate of the National Bank of Tajikistan (currently 8%). For certain entities, additional limitations may apply.

Bad debt
A taxpayer is allowed a bad debt deduction in cases where the income associated with such bad debt is already recognised for CIT purposes. Bad debts are deductible when they are written-off in the accounting books. Special provisions apply for banks and other financial institutions.

Charitable contributions
Charitable contributions are limited to 10% of taxable income.

Fines and penalties
Fines and penalties paid to the budget of Tajikistan and other states are not deductible.

Taxes
Taxes paid to the budget of Tajikistan and other states are deductible, except for CIT and individual income tax.

Other significant items
Among other deductions specifically mentioned in the Tax Code are research and development (R&D), repair expenses, and geological and geophysical expenses.

Non-deductible expenses
Non-deductible expenses specifically mentioned by the Tax Code include meals and entertainment, personal expenses, passenger vehicles, and non-business expenses.

Net operating losses
Net operating losses may be carried forward for three years but may not be carried back.

Payments to foreign affiliates
No special provisions for deduction of payments to foreign affiliates exist in the Tax Code; consequently, general rules for deductibility of expenses should apply.

Group taxation
There are no rules permitting grouping for tax purposes in Tajikistan.

Transfer pricing
Under Tajikistan market pricing (transfer pricing) provisions, tax authorities have the right to adjust prices. The following transactions are subject to control and further feasible (potential) adjustment:

- Transactions between related parties.
- Barter transactions.
- Foreign trade agreements (contracts) where one of the parties is resident of a tax haven.
- Transactions where one of the participants receives tax benefits or tax incentives.
- Where the price of goods (services, works) deviates by more than 30% from the market price for identical (homogeneous) goods (services, works).
**Thin capitalisation**
There are no thin capitalisation rules in Tajikistan; however, interest deductibility is limited as described in the Deductions section.

**Controlled foreign companies (CFCs)**
The Tax Code contains CFC provisions, according to which, income received by the resident's subsidiary (more than 10% ownership) registered in countries with privileged taxation should be included in the income of the resident.

**Tax credits and incentives**

**Foreign tax credit**
Taxes paid outside Tajikistan may be credited against the same types of taxes in Tajikistan if appropriate supporting documents are provided. The amount of credit may not exceed the amount of tax assessed in respect of such income at the rates applicable in Tajikistan.

**Free Economic Zones (FEZs)**
Four FEZs were established by the government of Tajikistan to offer reduced taxes and customs fees to both foreign and domestic businesses located in these zones. Tax incentives include FEZs of Sogd, Panj, Ishkoshim, and Dangara. The legislation for the FEZs has been modified several times since the start of the process, but current law requires a minimum investment of USD 500,000 for manufacturing companies, USD 50,000 for trading companies, and USD 10,000 for consulting and service companies, before being eligible for the preferential tax treatment.

**CIT exemptions**
An exemption from CIT is available for taxpayers that have made a certain amount of investments into chartered capital of a production company, as follows:

- Two-year exemption if volume of investments is up to USD 200,000.
- Three-year exemption if volume of investment is from USD 500,000 up to USD 2 million.
- Four-year exemption if volume of investment is from USD 2 million up to USD 5 million.
- Five-year exemption if volume of investment exceeds USD 5 million.

**Tax benefits for poultry farms and combined feed producers**
New tax benefits are available for poultry farms and producers of combined feed for birds and animals if such producers will attract foreign investments of not less than USD 16 million. Tax benefits include a 12-year exemption from:

- Income taxes.
- VAT.
- Road tax.
- Property tax.
- Import VAT and customs duties.

The statute of limitation period is extended for the period of use of tax benefits.

**Witholding taxes**
Tajikistan-source income of non-residents is subject to WHT at its source at the rates shown in the following table:
### Types of income at source of payment

<table>
<thead>
<tr>
<th>Types of income at source of payment</th>
<th>Tax rate (%)</th>
</tr>
</thead>
<tbody>
<tr>

Notes

1. A rate of 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that directly holds at least 15% of the capital of the company paying the dividends; 10% of the gross amount of the dividends in all other cases.
2. A rate of 5% of the gross amount of the dividends if the recipient is an enterprise (except a partnership) that directly holds at least 25% of the capital of the company paying the dividends; 10% of the gross amount of the dividends in all other cases.
3. A rate of 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that directly holds 10% of the capital of the company paying the dividends; 15% of the gross amount of the dividends in all other cases.
4. A rate of 10% of the gross amount of the dividends if the beneficial owner is a legal entity and directly holds no less than a 30% stake in the company paying the dividends; 15% of the gross amount of the dividends in all other cases.
5. A rate of 5% of the gross amount of the dividends if the beneficial owner is a company that holds at least 50% of the share capital of the company paying the dividends; 15% of the gross amount of the dividends in all other cases.
6. A rate of 0% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that directly holds at least 75% of the capital of the company paying the dividends; 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that directly holds at least 25% of the capital of the company paying the dividends; 10% of the gross amount of the dividends in all other cases.
7. A rate of 5% of the gross amount of the royalties paid for the use of or the right to use software, or industrial, commercial, or scientific equipment; 10% of the gross amount of the royalties in all other cases.

8. A rate of 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that directly holds at least 25% of the share capital of the company paying the dividends; 10% of the gross amount of the dividends in all other cases.

9. A rate of 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that directly holds at least 25% of the share capital of the company paying the dividends; 15% of the gross amount of the dividends in all other cases.

10. A rate of 5% of the gross amount of the dividends if the beneficial owner is a company that directly holds at least 25% of the share capital of the company paying the dividends; 10% of the gross amount of the dividends in all other cases.

11. A rate of 5% of the gross amount of the dividends if the beneficial owner is a person who directly holds at least 25% of the share capital of the company paying the dividends; 10% of the gross amount of the dividends in all other cases.

12. A rate of 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that directly holds at least 20% of the capital of the company paying the dividends; 15% of the gross amount of the dividends in all other cases.

13. Interest arising in Tajikistan and paid to the government of Turkey or to the Central Bank of Turkey shall be exempt from Tajikistan tax; interest arising in Turkey and paid to the government of Tajikistan or to the National Bank of Tajikistan shall be exempt from Turkish tax.

14. Different rates apply depending on the beneficial owner.

15. Interest can be exempt if the beneficial owner of the interest is a bank or pension scheme, subject to certain conditions.

---

**Tax administration**

**Taxable period**
The Tax Code prescribes a calendar year as the tax year.

**Tax returns**
Annual CIT declarations are due by 1 April in the year following the tax year-end.

Taxpayers are required to submit their estimated calculation of monthly advance payments of CIT.

**Payment of tax**
With respect to CIT, advance payments are due every 15th day of the month. Payment of any outstanding CIT liabilities is required not later than 10 April following the reporting tax period.

The settlement of minimum income tax should be done by 10 April following the reporting tax period in cases where it exceeds CIT liability.

**Fines and interest penalties**
The fine for failure to file a tax return ranges from a minimum amount of 1 calculation index (CI), which is currently TJS 40, to a maximum fine of 100 CI, or TJS 4,000. The amount of the fine depends on the taxpayer’s category and should be assessed based on each ten days of delay. In the absence of tax returns, the tax authorities are entitled to assess taxes based on any information available.

Fines may be assessed in the amount of 10% to 20% of the understated tax liabilities. In severe cases, a violation may be considered a criminal offence.

A fine for failure to withhold and remit tax may be assessed in the amount of 3 to 200 CI (approximately TJS 120 to TJS 8,000) of the tax not withheld.

Interest penalties may apply to late tax payments in the amount of 0.08% of the underpaid tax amount, for each day of tax underpayment.

**Tax audit process**
Tajikistan tax authorities have the right to conduct regular tax audits (once per year for planned tax audits). Generally, there are two types of audits:
• Planned tax audits. Planned tax audits are conducted according to the list of entities that fall under tax audit, published by the competent authority.
• Unplanned tax audits. Reorganisation or liquidation of a legal entity, the expiration of the contract on subsoil use, validation of the VAT amount that is charged for a return, etc., may trigger an unplanned tax audit.

Documentary tax audits may be further subdivided into comprehensive (i.e. covering all taxes), thematic (covering only specific type of taxes), or cross-check (covering only transactions with a particular counterparty). Comprehensive and thematic audits may be conducted once a year.

The first planned documentary tax audit of a small business, implementing the simplified tax system, can be carried out only after 24 full calendar months from the date of its registration.

The tax authority sends or presents a notice of a tax audit to a taxpayer no later than ten working days before the start of the documentary tax audit unless otherwise provided in the Tax Code.

The period of tax audits, specified in issued orders, shall not exceed 30 working days from the date of receipt of the order, unless otherwise provided in the Tax Code.

**Statute of limitations**
Taxpayers are allowed to make changes to prior period tax returns within the statute of limitations (three years). No fines should apply to corrections in this case.

**Topics of focus for tax authorities**
The tax authorities are currently paying particular attention to deals involving sale of shares and participation interests.

---

**Other issues**

**Adoption of IFRS**
In accordance with the governmental Resolution of the Republic of Tajikistan concerning International Standards of Financial Statements, the Ministry of Finance of the Republic of Tajikistan shall adopt IFRS through a step-by-step approach. Starting from 2011, juridical legal entities should apply IFRS; however, National Accounting Standards may still be applicable by companies, except for public companies.

Accounting policies and practices are being revised in light of the legal requirement that companies adopt IFRS and International Accounting Standards. Such revised accounting policies should be adopted by companies’ boards of directors and disseminated to all the accounting units with clear instructions on how to introduce and follow the new policies and procedures.
**Significant developments**

As introduced by the Finance Act 2015, the period for the change in control rule has been reduced to two years (from three years); consequently, realisation of assets and liabilities triggers when underlying ownership changes by more than 50% compared to ownership during the previous two years.

A new Value-added Tax (VAT) Act was passed by the Parliament in November 2014 and assented by the President in January 2015. It came into effect from 1 July 2015 and replaced the old VAT Act 1997. See the description of VAT in the Other taxes section for a summary of changes under the new Act.

A new Tax Administration Act 2015 (TAA 2015) was assented by the President in May 2015 and came into effect from 1 August 2015. The intention of the TAA 2015 was to consolidate provisions relating to tax administration with a view to ease tax enforcement and administration. Changes brought in by the TAA 2015 have been incorporated into this summary.

Please note that this summary is current as of 1 June 2016. There are changes in the tax legislation (the Finance Act 2016) announced in June 2016 that are effective 1 July 2016. Please visit the Worldwide Tax Summaries website at www.pwc.com/taxsummaries to see any significant corporate tax developments that occurred after 1 June 2016.

**Taxes on corporate income**

A Tanzanian resident is taxed on worldwide income, irrespective of source. Non-residents are taxable on income with a source in Tanzania.

Income tax is charged at a rate of 30% on income of a resident corporation and of a permanent establishment (PE) of a non-resident corporation or 5% of turnover for technical and management service providers to mining, oil, and gas entities (deducted by way of withholding tax [WHT]). Certain payments to non-residents are subject to tax at the relevant non-resident WHT rates (see the Withholding taxes section for the relevant rates).

Gain from the disposal of investments in Tanzania is subject to income tax where such investments fall within the source rules, and, in such a case, the gain will be taxed at a rate of 30%.

**Reduced rate for newly listed companies**

A reduced corporate tax rate of 25% applies for three consecutive years for companies newly listed on the Dar es Salaam Stock Exchange (DSE). To qualify, at least 30% of the company’s shares must be issued to the public.

**Alternative minimum tax**

Alternative minimum tax applies at a rate of 0.3% to the turnover of companies with perpetual unrelieved tax losses for the current and preceding two income years. Exemption
applies to (i) agricultural companies and (ii) companies engaged in provision of health or education.

**Local income taxes**
There are no local income taxes levied by local authorities. Please see Local taxes in the Other taxes section for a description of the local service levy based on turnover.

**Corporate residence**
A company is tax resident if it is incorporated or formed under the laws of Tanzania or if the management and control of its affairs is exercised in Tanzania.

**Permanent establishment (PE)**
A non-resident entity has a PE in Tanzania if it carries on business in Tanzania. This includes a place where a person (i) is carrying on business through a dependent agent; (ii) has used or installed, or is using or installing, substantial equipment or machinery; and (iii) is engaged in a construction, assembly, or installation project for six months or more, including a place where a person is conducting supervisory activities in relation to such a project.

**Other taxes**

**Value-added tax (VAT)**
VAT is chargeable on all taxable goods and services supplied in, or imported into, mainland Tanzania. The standard rate of VAT is 18%, but the export of goods and certain services is eligible for zero rating. Businesses with an annual taxable turnover of more than 100 million Tanzanian shillings (TZS) must register for VAT.

There is also mandatory registration for professional services providers (e.g. lawyers and accountants) and government entities/institutions carrying on economic activity. A non-resident who carries on economic activity in mainland Tanzania without a fixed place and makes taxable supplies in excess of the VAT registration threshold is required to appoint a VAT representative.

For imported goods, VAT is payable at the time of importation together with any customs and excise duties. VAT payable with respect to capital goods (as defined), which are imported or purchased in Tanzania, may be deferred, subject to certain procedures being followed. The Commissioner for VAT has the discretion to register (as intending traders) investors whose projects have not commenced production but who wish to be VAT-registered in order to reclaim the tax they incur on start-up costs.

For imported services, VAT is accounted for by registered businesses through a ‘reverse-charge’ mechanism, such accounting is only relevant where a taxpayer has exempt supplies of 10% or more of total supplies.

Depending on the industry, there are a number of exempt supplies. These include (this list is not exhaustive):

- Agricultural implements, agricultural inputs, livestock, basic agricultural products and foods for human consumption; implements for fisheries and bee-keeping; dairy equipment, maize flour, and wheat flour.
- Food, clothing, and shoes donated to non-profit organisations for free distribution to orphanages or schools for children with special needs in mainland Tanzania.
- Goods imported by non-profit organisations for the provision of emergency and disaster relief (conditional).
- Goods imported by religious organisations for the provision of health, education, water, and religious services (conditional).
Tanzania

- Educational services provided by a relevant approved educational institution; education materials.
- Laboratory equipment and reagents imported by a registered educational institution and to be used solely for educational purposes.
- Goods eligible for relief under the East African Customs Management Act (where imported by a registered and licensed explorer or prospector for exclusive use in oil, gas, or mineral exploration or prospecting activities).
- Various goods imported by a natural gas distributor (including compressed natural gas [CNG] plants equipment, natural gas pipes, transportation and distribution pipes, CNG storage cascades, CNG special transportation vehicles, natural gas metering equipment, CNG refuelling of filling, gas receiving units, flare gas system, condensate tanks and leading facility, system piping and pipe rack, and condensate stabiliser).
- Healthcare, medicine, or pharmaceuticals products, not including food supplements or vitamins; articles designed for people with special needs; funeral services.
- Firefighting vehicles imported by the government and firefighting equipment.
- Sale of vacant land.
- Lease, license, hire, or other form of supply, to the extent that it is a supply of the right to occupy and reside in residential premises.
- Water (except bottled or canned water or similarly presented water).
- Solar equipment (in particular, solar panels, modules, solar charger controllers, solar inverters, solar lights, vacuum tube solar collectors, and solar batteries). Wind generators and liquid elevators are no longer included in the list of exemptions (unlike the 1997 Act).

A business that only makes exempt supplies is unable to register for VAT and, consequently, unable to recover the VAT incurred on inputs.

Export of goods and certain services is zero-rated (i.e. taxable at a rate of 0%).

Registered businesses must submit VAT returns, and pay any tax due, on a monthly basis.

The new VAT Act has broadened restrictions on claiming input tax. For example, one cannot claim VAT paid on entertainment, sporting, social, or recreational clubs or associations, nor on spare parts and repair or maintenance costs in respect of passenger vehicles.

The input tax claim time limit is six months. However, this time limit starts to run not only by reference to the date of the tax invoice/fiscal receipt but also by reference to the date of the time of supply.

Input tax incurred in the six months prior to VAT registration can be claimed no later than in the third VAT return submitted following registration.

A company with taxable supplies of more than 90% of total supplies is entitled to full input tax credit.

A company with taxable supplies less than 10% of total supplies is not entitled to claim any input tax incurred.

A company with taxable supplies between 10% and 90% of total supplies is entitled to partial input tax recovery. Only one apportionment method, namely the average method can be used. Imported services are not taken into account as supplies when determining the allowance of input tax for partial exemption purposes.

Businesses entitled to VAT refunds can claim any remaining credit six months after a refund first became due, subject to all intervening returns being rendered. Any claim for a VAT refund must be supported by an auditor’s certificate. Businesses in a consistent refund position (e.g. exporters) can apply for approval to lodge their refund claims on a monthly basis.
Zanzibar has its own VAT Act, but it is similar to the Mainland Tanzania Act.

**Customs duties**

Tanzania is a member of the East African Community, which became a Customs Union on 1 January 2005 on the implementation of the East African Customs Union Protocol. This protocol provides for a common external tariff (CET), elimination of internal tariffs, rules of origin, anti-dumping measures, a common customs law, and common export promotion schemes.

The import duty rates applicable under the CET are as follows:

<table>
<thead>
<tr>
<th>Category</th>
<th>Rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Raw materials, capital goods, agricultural inputs, pure-bred animals, medicines</td>
<td>0</td>
</tr>
<tr>
<td>Semi-finished goods</td>
<td>10</td>
</tr>
<tr>
<td>Finished final consumer goods</td>
<td>25</td>
</tr>
<tr>
<td>Machinery and spare parts imported by licensed mining companies and used in mining activities</td>
<td>0</td>
</tr>
<tr>
<td>Machinery, spares, and inputs imported by licensed company for direct use in oil, gas, and geothermal exploration</td>
<td>0</td>
</tr>
</tbody>
</table>

Tanzania is also a member of the Southern African Development Community (SADC). Where goods are subject to a lower rate of duty from another trade bloc, such as the SADC, the lower duty rate applies until such a time as the trading arrangements between the trading blocs are harmonised.

**Excise duties**

Excise duty rates apply as follows:

<table>
<thead>
<tr>
<th>Item</th>
<th>Rate for FY 2015/16 (TZS)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Sugared mineral water, sugared carbonated drinks, and sugared aerated water</td>

### Fuel levy
Fuel levy is charged on petroleum and diesel at a rate of TZS 313 per litre.

### Petroleum levy
Petroleum levy is charged on petrol and diesel at TZS 100 per litre and on kerosene at TZS 150 per litre.

### Stamp duty
Examples of instruments giving rise to stamp duty obligations include conveyances, leases, share transfers, and issue and transfer of debentures. For most of these instruments, the applicable stamp duty rate is 1% of the consideration.

### Infrastructure levy
A new tax called the ‘infrastructure levy’ was introduced with effect from 1 July 2015 (referred to as the ‘Railway Development Levy’ in Tanzania). The levy applies at the rate of 1.5% of the value of imported goods (cost, insurance, and freight [CIF]). The levy is not applicable to imported goods that have relief or exemption under the East African Community Customs Management Act 2004 (EACCMA 2004) and goods in transit.

### Payroll taxes and social security contribution
Apart from individual income tax (deducted at source by the employer), payroll taxes include:

- Skills and development levy at 5% of payroll cash costs.
- 20% social security contribution, which is normally split equally between employer and employee (i.e. 10% each).
- Workers compensation fund tariff charged at 1% or 0.5% of cash sums paid to employees. The tariff is effective 1 July 2015 and payable on a monthly basis (1% for private sector and 0.5% for public sector).

### Gaming tax
Under the recently introduced gaming tax, gaming prize winners are taxed at 18% of the prize offered.
Local taxes

Property taxes
The local government levies a property tax based on the value of a premises. The rates vary depending on the value and location of the property.

Service levy
The local government is entitled to charge a 0.3% service levy based on turnover generated in the relevant district.

Cess levy
For agricultural produce and livestock, there is a cess levy, currently capped at 5% of the producer price.

Branch income

The income tax liability of a person with a PE in Tanzania is calculated as if the person and the PE are independent but as if the PE is resident in Tanzania. The income of the PE is taxed at the normal income tax rate for entities, namely 30% on net income or 5% of turnover for technical and management service providers to mining, oil, and gas entities.

The PE is also subject to a tax on 'repatriated income', which applies at a rate of 10% (the same rate as a company would withhold on dividends).

In certain circumstances, business activities of the head office may be attributed to the branch. Arrangements between a PE and head office generally are not recognised, other than the transfer of an asset or liability between the two. Amounts derived (or payments received) and expenditures incurred (or payments made) that relate to assets held by, or liabilities owed by, the business of the PE are attributed to the PE.

Income determination

Subject to any provision to the contrary in the Income Tax Act, income is to be calculated in accordance with generally accepted accounting principles (GAAP). Local GAAP is in accordance with International Financial Reporting Standards (IFRS). Corporations must apply an accrual basis of accounting.

Inventory valuation
Trading stock is valued at the end of the year at the lower of cost and market value. No explicit method is stated for determining inventory cost, and, so far, for tax purposes, such cost will match the cost determined in accordance with GAAP. Special rules apply for the valuation of long-term work in progress.

Capital gains
There is no separate capital gains tax in Tanzania. Instead, income tax is charged on the taxable profit arising on a gain arising from the realisation of an ‘investment asset’ (a term that [subject to certain exceptions] includes shares, interests in land and buildings, and a beneficial interest in a non-resident trust). The gain is determined as the difference between costs incurred and sale proceeds.

Dividend income
Dividend payments are taxed by way of WHT, and this is a final tax. The normal rate of WHT on dividends is 10%.
Tanzania

Where a dividend is paid by a resident corporation to another resident corporation holding 25% or more of shares and voting rights in the corporation paying the dividend, the WHT rate is 5%.

Dividends paid by a company listed on the DSE are subject to 5% WHT (regardless of whether they are paid to a resident or non-resident).

In a case where the recipient itself then pays a dividend to a non-resident shareholder, the corporation paying the dividend is entitled to a proportionate deduction of WHT credit withheld on the dividends it had received.

**Interest income**
Interest income is treated as income from investment. The term ‘interest’ is defined as payment for the use of money and includes payment made or accrued under a debt obligation that is not a repayment of capital, as well as any gain realised by way of a discount, premium, swap payment, or similar payment.

Interest income is taxed by way of WHT at 10%.

**Foreign income**
A resident person’s foreign-source income or loss (from employment, business, and investment) is calculated as that person’s worldwide income or loss less any income sourced in Tanzania and plus any loss sourced in Tanzania.

A resident person may claim a foreign tax credit on any foreign tax paid by the person on foreign income. However, such credit should not exceed the Tanzanian tax rate applicable to that income. Any unrelieved amount of foreign tax credit may be carried forward (subject to ‘change in control’ provisions as detailed in the Group taxation section). An election may be made to relinquish foreign tax credit and claim a deduction for the amount of foreign income tax.

There are no provisions for the deferral of the taxation of foreign income.

**Deductions**

In calculating taxable profit, deductions are allowed for revenue expenditures incurred wholly and exclusively in the production of income, with some statutory exceptions. For capital expenditures, there are specific tax depreciation allowances.

There are special rules with regard to the valuation of trading stock and long-term contracts and in relation to the treatment of instalment sales and finance leases.

There is ring-fencing of mining or petroleum operations by reference to the relevant mining or petroleum licence area.

**Depreciation**
The categories of depreciable assets and their tax depreciation rates are set out in the table below.

Expenditures on plant and machinery are generally written off on a reducing-balance basis at rates of 37.5%, 25%, or 12.5%, depending on the category of the asset. Certain plant and machinery for manufacturing, fish farming, and tourist hotels benefit from a 50% allowance in the first year, with the normal rates applying to the remaining balance in subsequent years. There is an immediate write-off of expenditures on plant and machinery used in agriculture.
Expenditures on buildings qualify for a depreciation allowance of 5% per year on a straight-line basis. For intangible assets, the write-off is over the useful life of the asset.

Apart from the immediate write-off of plant and machinery, agricultural businesses also benefit from the immediate write-off of agricultural improvement expenditures (including the costs of clearing land, excavating irrigation channels, and planting perennial crops or tree bearing crops). Buildings, structures, dams, water reservoirs, fences, and similar works of a permanent nature used in agriculture, livestock, or fish farming are written off on a straight-line basis over five years.

A 100% capital deduction applies to capital expenditure (i) by mining companies on prospecting, exploration, and development and (ii) on petroleum prospecting and exploration.

**Depreciation allowances rates**

<table>

<td>100</td>
</tr>
</tbody>
</table>

**Interest in land**

Interest in land does not qualify for depreciation allowance as it is excluded from the definition of ‘depreciable asset’.

**Goodwill**

Goodwill does not qualify for depreciation allowance as it is excluded from the definition of ‘depreciable asset’.
Tanzania

**Start-up expenses**
Start-up expenses are deductible to the extent that they meet the general deduction criteria (i.e. they are revenue in nature and were incurred wholly and exclusively in the production of income). The definition of ‘business’ includes a prospective business.

**Interest expenses**
Interest expenses are deductible on an accrual basis, subject to thin capitalisation rules as detailed in the Group taxation section.

**Bad debt**
In order to claim relief for a bad debt, it is necessary to demonstrate that all reasonable steps have been taken to pursue payment and that there is a reasonable belief that the debt claim will not be satisfied.

**Charitable contributions**
The Income Tax Act allows deduction for contributions made:

i. to charitable institutions (approved by the Commissioner to operate as such) and social development projects
ii. under Section 12 of the Education Fund Act 2001, or
iii. to local government authorities under statutory obligations to support community developments projects.

The deduction available under item (i) above is restricted to 2% of the company’s taxable income before such deduction.

**Fines and penalties**
Fines and similar penalties payable to a government or a political subdivision of any country for the breach of any law or subsidiary legislation are not deductible.

**Taxes**
Taxes payable under the Income Tax Act 2004 are not deductible.

**Net operating losses**
There is no limit on the carryforward period for tax losses. However, there is ring-fencing of tax losses as follows:

- Losses from agricultural business can only be offset against profits derived from agricultural business.
- Losses from one mining licence area can only be offset against profits from the same mining licence area.
- Losses from one petroleum licence area can only be offset against profits from the same petroleum licence area.
- Foreign-source losses can only be offset against foreign-source profits.
- Losses on investments can only be offset against investment income.
- Foreign-source losses on investments can only be offset against foreign-source investment income.

In certain circumstances, tax losses may be forfeited on a change in the underlying control of an entity.

Tax losses can be carried back only in long-term contracts in a case where a contract is completed and a person has unrelieved losses for that period or a previous period that is attributable to the long-term contract. These losses can then be carried back to a previous year of income and treated as unrelieved loss for that year.
Payments to foreign affiliates
Payments to foreign affiliates are deductible to the extent they are wholly and exclusively incurred in the production of the company's income. The deduction is subject to transfer pricing provisions as detailed in the Group taxation section.

Group taxation
There are no provisions for tax consolidation or group relief in Tanzania.

Transfer pricing
With respect to transactions between related parties, there is an obligation to ‘quantify, apportion, and allocate amounts’ for income tax purposes on an arm’s-length basis. The Transfer Pricing Regulations and Guidelines require a taxpayer with related-party transactions to have transfer pricing documentation in place at the time of filing the tax return and provide this within 30 days from the date of request by the Tanzania Revenue Authority (TRA).

Thin capitalisation
There is a thin capitalisation restriction on the amount of deductible interest for what are termed ‘exempt-controlled resident entities’, where the debt-to-equity ratio exceeds 7:3. There are specific definitions of ‘debt’ and ‘equity’ for the purposes of thin capitalisation.

Controlled foreign trusts and corporations
There are provisions that relate to the treatment of unallocated income of controlled foreign trusts and corporations.

Change in control provisions
The change in control provisions are triggered at the moment the underlying ownership of an entity changes by more than 50% as compared to any time during the previous two years. Where there is such a change, the consequences are that:

• the accounting period of the entity is split at the point of such a change, so that the parts of the year of income before and after the change are treated as separate years of income, and
• there is deemed realisation of assets and liabilities at market values.

In certain cases, such a change can also result in the forfeiture of unutilised tax losses and tax credits.

The Commissioner has to be notified immediately before and after the change in control has occurred.

Other anti-avoidance provisions
Other anti-avoidance provisions exist to address the following:

• Income or dividend stripping arrangements.
• Income splitting.

Tax credits and incentives

Foreign tax credit
See Foreign income in the Income determination section for a description of the foreign tax credit regime.
Tanzania

**Agriculture, manufacturing, mining, and tourism incentives**

Tax incentives by way of generous capital deduction provisions are given for specific sectors, namely agriculture, manufacturing, mining, petroleum, and tourism. See the Deductions section for more information.

**Export processing zones (EPZs) and special economic zones (SEZs)**

There are special benefits for EPZs and SEZs. Included in the benefits available to a person licensed to carry on business in an EPZ, as well as to SEZ investors selling in export markets, are a ten-year income tax holiday and WHT holiday, subject to a requirement to export at least 80% of production.

Notes

1. The domestic WHT rate applies unless the DTT rate is lower, in which case the lower DTT rate applies.

2048 Tanzania PwC Worldwide Tax Summaries
2. The lower rate applies if the beneficial owner is a company that controls, directly or indirectly, at least 15% of the voting power in the company paying the dividends; otherwise, the higher rate applies.
3. The lower rate applies if the recipient is a company that owns at least 25% of the shares of the company paying the dividends; otherwise, the higher rate applies.
4. The lower rate applies if the recipient is a company that owns at least 25% of the shares of the company paying the dividends during the six month period immediately preceding the date of payment of the dividends; otherwise, the higher rate applies.
5. The lower rate applies if income is exempt from tax in Zambia.
6. The domestic rate applies in the absence of a rate specified in the DTT.

**Tax administration**

**Taxable period**
While the year of income for tax purposes is the calendar year, an entity may apply to use its own accounting period rather than the calendar year.

**Tax returns**
A statement of estimated tax payable, which contains an estimate of the chargeable income and the tax payable thereon, is due for submission within three months from the beginning of the accounting period. A final tax return must be furnished within six months from the end of the accounting period.

WHT returns must be submitted every half year. The due date for filing the WHT return is 30 days after each six-month calendar period (e.g. the January to June return is due by 30 July).

A late filing penalty applies monthly at an amount equal to the higher of (i) TZS 225,000 or (ii) 2.5% applied to unpaid tax. If estimated tax is significantly underestimated, a penalty may also apply.

**Payment of tax**
Instalment tax is payable in four equal instalments not later than three months, six months, nine months, and 12 months from the beginning of the accounting period. Final tax is payable on the date on which the final return is due for submission, namely six months after the end of the accounting period.

WHT is due seven days after the month of deduction.

Interest on late payment is charged at the Bank of Tanzania discount rate.

**Tax audit process**
The normal practice is for the TRA to carry out a review every two or three years.

**Statute of limitations**
There is a five-year time limit for the TRA to adjust an income tax return filed by a taxpayer. The five years runs from the due date of filing the final tax return.

**Topics of focus for tax authorities**
Currently, the topics of particular focus for the TRA include transfer pricing, VAT compliance, WHT on payments to both residents and non-residents, and compliance on payroll taxes.

**Functional currency**
Taxable income and deductible expenditure is quantified in Tanzanian shillings. Upon request by the taxpayer, the Commissioner has the power, by notice in writing, to permit quantification in a foreign currency convertible to Tanzanian shillings.
Significant developments

The corporate income tax (CIT) rate of 20%, which was previously reduced to this rate on a temporary basis, has now been made official under the Revenue Code for accounting periods beginning on or after 1 January 2016.

Furthermore, the rates for companies with low paid-in capital and income have been changed.

Taxes on corporate income

Thailand incorporated companies are taxed on worldwide income. A foreign incorporated company is taxed on its profits arising from or in consequence of the business carried on in Thailand.

The CIT rate is 20%.

A foreign company not carrying on business in Thailand is subject to a withholding tax (WHT) on certain types of assessable income (e.g. interest, dividends, royalties, rentals, and service fees) paid from or in Thailand. The rate of tax is generally 15%, except for dividends, which is 10%, while other rates may apply under the provisions of double tax treaties (DTTs).

Rates for companies with low paid-in capital and income

Companies and juristic partnerships with a paid-in capital not exceeding 5 million Thai baht (THB) at the end of any accounting period and income from the sale of goods and/or the provision of services not exceeding THB 30 million in any accounting period will be subject to tax at the following rates:

For accounting periods beginning on or after 1 January 2015 but no later than 31 December 2016:

<table>

Reduced rates for certain banking transactions
Banks are subject to tax at the rate of 10% on their profits derived from lending to non-
Thai residents from foreign currency funds obtained from non-Thai sources (so-called
‘out-out’ business).

Petroleum income tax
Taxation on income from petroleum operations is imposed on petroleum concessionaire
companies by the Petroleum Income Tax Acts (PITA). Companies taxed under the PITA
are exempt from taxes and duties on income imposed under the Revenue Code and
under any other laws. The exemption applies so long as the company pays taxes and
duties on income subject to the PITA or on dividends paid out of income subject to the
PITA.

Petroleum companies are taxed at the rate of 50% of their annual net profit from
petroleum operations, including profit from the transfer of their concession interests and
other activities incidental to petroleum operations. Deductions are allowed for ‘ordinary
and necessary’ business expenses, as well as depreciation of capital expenditure,
petroleum royalties, and other charges. Certain types of expenses are specifically
disallowed for deduction, including interest.

Local income taxes
There are no local government taxes on income in Thailand.

Corporate residence
Corporate residence is determined by the place of incorporation. A company
incorporated under the laws of Thailand is a resident company.

A company incorporated abroad is subject to CIT in Thailand if it is considered to
be carrying on business in Thailand. The term ‘carrying on business in Thailand’ is
broad and, subject to the provisions of DTTs, includes the presence of an employee,
representative, or go-between that results in a foreign corporation deriving income or
gains in Thailand.

Other taxes

Value-added tax (VAT)
The standard rate of VAT is 10%, but the rate is currently reduced to 7% until 30
September 2016. VAT is levied on the sale of goods and the provision of services. Exports
are zero-rated, while a number of goods and services are exempt (e.g. basic groceries,
education, healthcare, interest, leasing of immovable property, sale of real estate).

Customs duties

Basis of taxation
Customs duties are imposed under the Customs Act and the Customs Tariff Decree.
Customs duties are collected on both imports and a limited number of exports.
Classification of imports is based on the Harmonized Commodity Description and
Coding System (the so-called ‘Harmonized System’). Thailand has adopted the
Association of Southeast Asian Nations (ASEAN) Harmonized Tariff Nomenclature
(‘AHTN’) 2012, which is based on the Harmonized System 2012, as its import tariff
omenclature.

Duties are levied on a specific or an ad valorem basis, whichever is higher, and the
applied ad valorem duties range between 0% and 80%. Exemptions from import duties
are available on particular items of goods as prescribed in the Customs Tariff Decree.
Thailand

Preferential duty rates are available on imported goods from countries that have a preferential free trade agreement (FTA) with Thailand.

Currently, Thailand has FTAs with the following countries:

- ASEAN member states (Singapore, Vietnam, Malaysia, Indonesia, Philippines, Cambodia, Laos, Myanmar, and Brunei)
- Australia
- Chile
- India
- Japan
- New Zealand
- Peru

Also, as a member of ASEAN, Thailand has preferential trade agreements with the following countries:

- Australia and New Zealand
- China
- India
- Japan
- Korea

Generally, the value of imports is based on their cost, insurance, and freight (CIF), whereas exported goods are based on their free on board (FOB) amount.

Thailand has implemented the World Trade Organization (WTO) Valuation Agreement. The primary basis for the customs value is the transaction value, which is the price actually paid or payable for the goods when sold for export, subject to adjustments for certain elements that are considered to form a part of the value for customs purposes or that can be deducted from the value of the imported goods (e.g. the cost of transportation after the importation, duties and taxes associated with the import).

Elements that may need to be added include royalties and licence fees that are related to the goods and paid as a condition of sale, proceeds from subsequent resale in the importing country, and the value of goods or services supplied by the buyer, such as design or development fees related to the imported goods. If the declared price is evidently low or is unlikely to be the true value of such goods, Thai Customs will likely dispute the declared price.

**Customs controls and procedures**

Customs procedures for goods arriving in Thailand in any manner are similar to those existing in most other countries. An importer is required to file an entry form together with other requisite documents, including a bill of lading, invoice, and packing list via the e-Customs system.

Customs duties are due upon the arrival of the vessel carrying the imported goods, and goods may be stored in a bonded warehouse for a period not exceeding 60 days. Landing and storage charges must be paid before the goods are released.

**Customs incentives schemes**

Various customs incentives schemes, each with its own specific conditions and duty privileges, are available in Thailand, including the following:

- Duty and tax compensation (‘tax coupons’).
- Duty drawback under Section 19 bis for imported raw materials used in export production.
- Duty drawback for re-export in the same state under Section 19.
• Free zones (Customs or Industrial Estate Authority of Thailand Free Zones).
• Manufacturing bonded warehouses.
• General bonded warehouses.
• Board of Investment (BOI) promotion.

**Offences and penalties**
Although, technically, an offence against the customs law is a criminal offence, in practice, legal procedures are usually concerned with the recovery of tax arrears and fines. Offences include non-compliance with customs procedures, false declarations, and the most serious offence of smuggling and evasion of customs duties. Statutory penalties are as prescribed by the relevant provisions of the Customs Act. Where Customs and the offender agree to settle the case at the Customs level (i.e. waiver of prosecution), the penalties would be in accordance with the settlement criteria as prescribed by the Director-General of the Customs Department. This is typically two times the duty and one times the VAT shortfall. For import licensing errors and offences related to smuggling, the penalties are based on a multiple of the value of the goods.

**Excise tax**

**Basis of taxation**
Excise tax is a form of consumption tax that is imposed on the sale of a selected range of services and goods (whether manufactured locally or imported) that are considered ‘luxuries’. The tax liability arises on locally manufactured goods when leaving the factory and at the time of importation for imported goods.

Below is an outline of the formula for the *ad valorem* rate on commodities subject to excise tax in Thailand. However, specific rates apply on some commodities. Tax rates are based on *ad valorem* or a specific rate, whichever is higher.

\[
\text{Excise tax payable} = (\text{CIF} + \text{ID}) \times \left(\frac{\text{ETR}}{1 - (1.1 \times \text{ETR})}\right)
\]

Where:
- CIF: Landed CIF price.
- ID: Amount of import duty.
- ETR: Excise tax rate % (in schedule).

Note that the above formula does not apply to alcoholic beverages, for which a different specific calculation will apply.

The excise tax computation method may be changed due to a possible revision of the excise tax base to suggested retail price for all excise products. However, the draft regulation is still under consideration by the Council of State and there is no exact timeline to conclude this draft.

* Source: The Excise Department website

In addition to the excise tax, an interior tax is also levied by the Excise Department at a rate of 10% of excise tax payable. Other taxes, such as Health Tax and Thai Public Broadcasting Service (TPBS tax or TV tax), may apply to certain specified products in the categories of cigarettes and alcoholic beverages.

The manufacturer of the products must file a return and remit the tax due prior to taking the goods from the factory or bonded warehouse. If a VAT liability arises before the goods are taken out of such locations, the manufacturer must file a return and remit the excise tax to the Excise Department within 15 days from the end of the month.

**Stamp duty**

Stamp duty is levied on 28 different types of documents and instruments, including contracts for hire of work, loans, share transfers, leases of land or buildings, and insurance policies. The rate of stamp duty varies depending on the type of agreement, but ranges from THB 1 per THB 1,000 of value on most contracts and agreements to a fixed amount per instrument on most commercial and other documents. Unstamped documents are not admissible as evidence in a civil lawsuit, and the surcharge can be as high as 600% of the duty for failure to pay the stamp duty on a timely basis.

**Specific business tax**

Specific business tax is collected at fixed rates on the gross revenue of certain businesses not subject to VAT. Commercial banking, similar financial businesses, and the sale of immovable property are taxed at 3% and life insurance at 2.5%.

The rate of specific business tax has been reduced to 0.01% for certain revenue derived by commercial banks and finance, securities, and credit foncier businesses, as well as businesses that have regular transactions similar to commercial banking.

An additional 10% of the tax is levied as municipality tax.

**Capital taxes**

There are no capital taxes in Thailand.

**Payroll taxes**

An employer is responsible for withholding personal income tax (PIT) from all salaries and benefits paid to or on behalf of an employee and remitting such tax to the Revenue
Department within seven days from the end of the month in which the salaries and benefits were paid.

**Social security contribution**
Contributions are levied at the rate of 5% of the monthly salary of each employee, subject to a maximum levy per employee of THB 750 per month. These contributions are payable by both the employer and employee.

**Local taxes**
There are currently three major local taxes. However, it should be noted that the house and land tax and the local development tax below are planned to be revoked and replaced by a new land and building tax. The taxes currently in effect are as follows:

**House and land tax**
House and land tax is levied annually at the rate of 12.5% of the assessed economic rental income.

**Local development tax**
Local development tax is levied annually at rates ranging between 0.25% and 0.95% of the value of land assessed by local authorities. This tax does not apply if the property is subject to the house and land tax.

**Signboard tax**
Signboard tax is levied annually on certain commercial signs or billboards at varying rates according to size and language used. The rates per 500 square centimetres are THB 3 if all words are in Thai, THB 20 if both Thai and foreign words are used, and THB 40 if only foreign words are used or if the Thai words are below the foreign words.

**Branch income**
Branches of foreign corporations are subject to CIT on locally earned profits only. Branch profits remitted to the foreign head office are subject to an additional tax at the rate of 10%. However, this is a tax on the disposition of profits abroad and is not limited to remittances. For example, a credit of profit to the head office account in the books is held to be a disposition of profit abroad even though no remittance of funds takes place.

**Income determination**

**Inventory valuation**
Inventory is valued at the lower of cost or market price. Any recognised method of ascertaining the cost price may be used, but a change in the method may only be made with the prior approval of the Director-General of the Revenue Department.

**Capital gains**
There is no specific legislation governing capital gains. All capital gains earned by a Thai company are treated as ordinary revenue for tax purposes. Capital gains on the sale of investments derived from or in Thailand by a foreign company not carrying on business in Thailand are subject to a tax of 15%, withheld at source by the purchaser, unless otherwise exempt under a DTT.

The following income earned by a foreign company not carrying on business in Thailand is subject to 15% WHT:

- Interest on bonds/debentures issued by state enterprises.
- Difference between the redemption price and the initial sale price of bonds issued by the government, state enterprises, and specified institutions.
Thailand

- Gains on the transfer of bonds issued by the government, state enterprises, and specified institutions.

**Dividend income**
Dividends received from a Thai company by a company listed on the Stock Exchange of Thailand are exempt from tax. Dividends received by a non-listed company from other Thai companies are also exempt from tax, provided that the company receiving the dividends holds at least 25% of the total voting shares without any cross-shareholding in the company paying the dividend and that the shares have been held for at least three months before and three months after the dividends were received.

In other cases, where one Thai company receives dividends from another Thai company, one-half thereof is exempt from tax also on the condition that the shares have been held for at least three months before and three months after the dividends were received.

Dividends received from a company incorporated abroad are exempt from tax if the Thai company receiving the dividends holds at least 25% of the shares with voting rights of the company paying the dividends for a period of not less than six months before the date on which the dividends are received and the dividends are derived from the net profit in the foreign country taxed at a rate of not less than 15%. In the event that a 'special law' in a particular foreign country provides a reduced tax rate or exemption for the net profit, the limited company that receives the dividends is still eligible for the tax exemption.

The share of profits received by a Thai company or a foreign company carrying on business in Thailand from an unincorporated joint venture carrying on business in Thailand is exempt from tax.

**Stock dividends**
Stock dividends are taxable to the recipient as ordinary income.

**Interest income**
Interest is taxable as income on the accrual basis.

**Foreign income**
Thailand incorporated companies are taxed on worldwide income. The Revenue Code does not describe how foreign income received by a Thailand incorporated company is taxed, but the Revenue Department regards foreign branch income as taxable when earned and foreign dividend income as taxable when received. Double taxation is relieved by way of a credit against the tax chargeable in Thailand (see Foreign tax credit in the Tax credits and incentives section).

**Deductions**

**Depreciation, amortisation, and depletion**
Deductions for depreciation are allowed as a percentage of cost. If the rate of deduction adopted by a company under its own accounting method is lower than the maximum percentage of cost permitted, a deduction will be allowed only at the rate adopted by the company. The straight-line basis is the method most commonly used by companies, but any generally accepted basis, such as sum-of-the-years-digits or double-declining method, is permitted. The maximum permitted rates are shown below:

<table>
<thead>
<tr>
<th>Asset</th>

Thailand

### Asset Maximum permitted rate (%)

- **Cost of acquisition of depletable natural resources**: 5
- **Cost of acquisition of lease rights:**
  - If there is no written lease agreement or if there is a written lease agreement containing a renewal clause whereby continual renewals are permitted: 10
  - Percentage rate equals 100 divided by the sum of years of the original and renewable lease periods
  - If there is a written lease agreement containing no renewal clause or containing a renewal clause but restricting renewable periods to a definitely limited duration: 10
  - Percentage rate equals 100 divided by the sum of years of the original and renewable lease periods
- **Cost of acquisition of the right in a process, formula, goodwill, trademark, business licence, patent, copyright, or any other right:**
  - If the period of use is unlimited: 10
  - If the period of use is limited: Percentage rate equals 100 divided by the number of years of use
- **Other assets not mentioned above, excluding land and inventory**: 20

### Special depreciation methods for certain assets

- Machinery and equipment for research and development (R&D) may initially be depreciated at 40% of cost, with the remaining balance being depreciated at the above maximum rate of 20% per annum.
- Computer hardware and software may be depreciated within three accounting periods.

### Special depreciation method for small companies

Companies and juristic partnerships with fixed assets, excluding land, with a value of no more than THB 200 million and with no more than 200 employees are entitled to use the following special depreciation methods:

- Machinery and equipment may initially be depreciated at 40% of cost, and the remaining balance will then be depreciated at the maximum rate of 20%.
- Computer hardware and software may initially be depreciated at 40% of cost, and the remaining balance can then be depreciated within three accounting periods.
- Factory buildings may initially be depreciated at 25% of cost, and the remaining balance will then be depreciated at the maximum rate of 5%.

### Start-up expenses

Start-up expenses, such as incorporation expenses and registration fees, are deductible when the expenses are incurred.

### Interest expenses

Interest on money borrowed for the purpose of acquiring profit or for the purpose of the business is deductible. Interest incurred in respect of the construction or installation of fixed assets that require a period of time before they are ready for their intended use is considered to be capital expenditure.

### Bad debts

Bad debts written off are deductible, provided that they are consistent with the rules, procedures, and conditions prescribed by the Ministerial Regulations.

### Charitable contributions

Donations to specified charities or for public benefit are deductible in the amount actually paid but not exceeding 2% of net profit. Donations for education or sport are also deductible in the amount actually paid but not exceeding 2% of net profit.
Thailand

Donations to support certain educational or recreational programmes are allowed a double deduction for tax. Donations made to sports entities from 1 January 2016 to 31 December 2018 are also allowed a double deduction for tax.

**Fines and penalties**
Fines, penalties, and surcharges paid under the Revenue Code are not deductible.

**Taxes**
In general, all taxes are deductible except CIT and VAT (in certain cases) and any related penalties and surcharges thereon.

**Other significant items**
Non-deductible expenses include, but are not limited to, the following:

- Expenses in the nature of provisions.
- Contributions to any fund (except for an approved provident fund).

**Net operating losses**
Losses may be carried forward for the following five accounting periods. The carryback of losses is not permitted. A change in control of a loss-making company does not impact its loss carried forward status.

**Payments to foreign affiliates**
A Thailand incorporated company may claim a deduction for royalties, management service fees, and interest charges, provided they are expended exclusively for the purpose of generating profit or for the purpose of the business in Thailand and are determined on an arm’s-length basis.

**Group taxation**
Group taxation is not permitted in Thailand.

**Transfer pricing**
Thailand will soon introduce specific transfer pricing provisions into the income tax law. One of the expected provisions is to make transfer pricing disclosure at the time of tax filing mandatory.

At present, related-party transactions are governed under the general provisions of the tax law, which require companies to transact on an arm’s-length basis, as well as the transfer pricing guidelines.

The transfer pricing guidelines are in the form of a Departmental Instruction (no. Paw 113/2545) and do not have the status of legislation. This instruction provides internal directives to Revenue officials to adhere to when conducting transfer pricing audits, reviews, or investigations. It also provides guidelines to taxpayers on setting arm’s-length prices for their transactions with related parties.

The instruction authorises the use of both traditional transaction methods (i.e. comparable uncontrolled price, resale price, and cost plus methods), as well as transactional profit methods, in order to determine the market price of a transaction. Although taxpayers are technically expected to consider using traditional transaction methods before resorting to using a transactional profit method, no one method is preferred in practice.

The instruction also defines the term ‘market price’, describes the transfer pricing documentation requirements, and allows taxpayers to apply for advance pricing agreements (APAs) in respect of any related-party transaction.
To address the APA process, the Revenue Department has issued separate APA guidelines. At present, Thailand accepts only bilateral APAs and limits the period covered to three to five accounting periods. Only a company or partnership incorporated in Thailand, which enters into intra-group transactions with affiliates who are residents of Thailand’s treaty partners, may apply for an APA.

Once the specific transfer pricing provisions are enacted, it is expected that there will be additional subordinate regulations to provide further details of the transfer pricing requirements in Thailand.

**Thin capitalisation**
There are no thin capitalisation rules. However, for certain businesses or as part of the conditions for granting tax incentives, a certain debt-to-equity ratio may be required.

**Controlled foreign companies (CFCs)**
There are no tax provisions in respect of CFCs.

---

**Tax credits and incentives**

**Board of Investment (BOI) tax incentives**
The BOI, by virtue of the Investment Promotion Act, provides tax incentives to certain activities within the following categories:

- Agriculture and agricultural products.
- Mining, ceramics, and basic metals.
- Light industry.
- Metal products, machinery, and transportation equipment.
- Electronic industry and electrical appliances.
- Chemicals, paper, and plastics.
- Services and public utilities.

The tax incentives available include the following:

- Exemption from import duties on imported machinery.
- Exemption from import duties on raw and essential materials imported for manufacturing for export.
- Exemption from CIT equal to or more than the amount of the investment, excluding the cost of land and working capital, for up to eight years, depending on the promoted activity.
- Exclusion of dividends derived from promoted enterprises from taxable income during the period of exemption from CIT.

**Incentives by category**
Under the 2015 BOI promotion scheme, focus is placed on the activities and the importance of the activities. Tax incentives are categorised under four categories (A1 to A4) and non-tax incentives under two categories (B1 and B2), as below:

<table>
<thead>
<tr>
<th>Group</th>
<th>CIT exemption</th>
<th>Import duty exemption on machinery</th>
<th>Import duty exemption on raw materials for export</th>
<th>Non-tax incentives</th>
</tr>
</thead>
<tbody>

</tr>
</tbody>
</table>

Additional incentives based on the value of a project (merit-based incentives) have been launched in order to motivate the investor to invest or spend on activities that will benefit the country or the industry as a whole.

**Merit on research and development (R&D)**

R&D merit-based incentives will depend on the investment made or expenses incurred by investors in R&D for their business, the provision of advance training to employees, or the development of local suppliers. The investment or expenses are as follows:

<table>
<thead>
<tr>
<th>Investment on</th>
<th>Additional investment cap (% of investment or expenses incurred)</th>
</tr>
</thead>
<tbody>
<tr>
<td>R&amp;D, whether in-house, outsourced in the country, or in cooperation with educational or research institutions abroad</td>

<td>100</td>
</tr>
<tr>
<td>Product or packaging design, whether in-house or outsourced in the country as approved by the BOI</td>
<td>100</td>
</tr>
</tbody>
</table>

Additional years of tax exemption will be added to the standard tax incentives received as follows:

<table>
<thead>
<tr>
<th>Investment/expenditure based on the sales revenue in the first 3 years</th>
<th>Additional period of tax exemption with cap based on amount of investment (in total, maximum period is 8 years)</th>
</tr>
</thead>
<tbody>
<tr>
<td>1% or ≥ THB 200 million</td>
<td>1 year</td>
</tr>
<tr>
<td>2% or ≥ THB 400 million</td>
<td>2 years</td>
</tr>
<tr>
<td>3% or ≥ THB 600 million</td>
<td>3 years</td>
</tr>
</tbody>
</table>

**Merit on decentralisation**

As the zoning scheme has been abolished, investment promotion zones have been included as a decentralisation merit to businesses that include any of the following 20 provinces with low average income:

- Kalasin, Chaiyaphum, Nakhon Phanom, Nan, Bung Karn, Buri Ram, Phrae, Maha Sarakham, Mukdahan, Mae Hong Son, Yasothon, Roi Et, Si Sa Ket, Sakhon Nakhon, Sa Kaew, Sukhothai, Surin, Nong Bua Lamphu, Ubon Ratchatani, and Amnatcharoen.

Additional incentives for enterprises located in these 20 provinces include the following:

- Three additional years of CIT exemption. However, reduction of 50% of CIT for five years after the end of the tax holiday will be granted to projects with activities in Group A1 and A2.
• Double deduction from taxable income of the cost of transportation, electricity, and water supply for ten years from the date on which revenue was first derived from the promoted activity.
• Deduction from net profit of 25% of the project’s infrastructure installation or construction costs in addition to normal depreciation; such deduction can be made from the net profit of one or several years within ten years from the date on which revenue was first derived from the promoted activity.

**Merit on industrial area development**
One additional year of CIT exemption will be granted to projects located within an industrial estate or promoted industrial zone. However, the total period of CIT exemption will not exceed eight years.

**Research and development (R&D) incentives**

**Tax incentives given to R&D contractors**
R&D is a promoted activity under the Investment Promotion Act, which prescribes the criteria and conditions to be followed by an R&D contractor.

Tax incentives given are as follows:

• CIT exemption on income derived from the provision of R&D services as stated in the investment promotion certificate (qualified R&D services) for eight years with no cap.
• Exemption from import duty on imported machinery and raw materials for manufacturing for export.
• Exclusion of dividends derived from promoted enterprises from taxable income during the period of CIT exemption.

The R&D services must be of a description that is:

• Basic research: Activities that are conducted to explore new knowledge from basic natural phenomena and factual observation.
• Applied research: The application of basic knowledge to solve or develop a concept for commercial purposes.
• Pilot development: Activities performed to magnify a production scale from basic research and applied research.
• Demonstration development: To verify a technology and production process and to demonstrate the level of integrity of such process and viability on a commercial scale production in both quality control and cost estimation.

**Tax benefits under the Revenue Code**
According to the Revenue Code, an additional 100% deduction for tax is allowed in respect of expenditure on R&D for technology and innovation (including product and process innovation) when hiring government agencies or the private sector, as approved by the Director-General of the Revenue Department, provided the R&D is incurred in Thailand.

In addition to the above, a further 100% tax deduction is granted for R&D expenses paid from 1 January 2015 to 31 December 2019 with threshold amounts depending on the revenue of the company.

**Regional operating headquarters (ROH)**
ROH means a company organised under the Thai law providing administrative, technical assistance, or supporting services to its domestic or overseas affiliated enterprises or branches in at least three countries other than Thailand with a paid-in capital of at least THB 10 million on the last day of any accounting period.
Tax incentives available to ROH are currently under two packages. However, since 14 November 2015, the privileges under the second package are no longer available to new applicants.

The criteria for ROH are:

- Company formed under Thai law with a minimum paid-up capital of THB 10 million.
- Provision of qualified services to qualified affiliates (companies with at least 25% common group ownership) in at least three countries other than Thailand.
- Income from services provided to, or royalties received from, overseas affiliates must be at least 50% of the total income of the ROH company (reduced to one-third for the first three years).

The following corporate tax incentives are still available to existing and new applicants under the first package, provided all of the criteria are met:

- 10% income tax on net profit from ROH services provided to foreign and domestic affiliates.
- 10% income tax on net profit from qualified royalties and interest income from lending borrowed funds to domestic and foreign affiliates.
- Corporate and domestic WHT exemptions on dividends received from affiliates.
- Exemption from WHT on dividends paid to foreign corporate shareholders on net profit arising from ROH qualified income.

**International headquarters (IHQ)**

An IHQ is defined as a company incorporated under the law of Thailand for the purpose of providing managerial, technical, or supporting services or financial management to its associated enterprises or branches situated in Thailand or abroad. This includes carrying on a business as an international trade centre (see *International trade centre below*), which has been approved as an IHQ.

The criteria for an IHQ are:

- A company formed under Thai law with minimum paid-up capital of THB 10 million.
- Managerial, technical, or supporting services (and financial management in the case of treasury centres, as stated below) must be provided to foreign affiliates (companies with at least 25% common group ownership, directly or indirectly).
- Operating expenses related to IHQ activities of at least THB 15 million per year.

The tax concessions are:

- 10% CIT on net profit from qualified services provided to domestic affiliates and royalties derived from domestic affiliates.
- Full CIT exemption on net profit from qualified services provided to foreign affiliates, royalties and dividends derived from foreign affiliates, and capital gains from the transfer of shares in foreign affiliates (under conditions).
- WHT exemption on dividends paid to foreign corporate shareholders from the net profit derived from the income exempt from tax.
- Expatriates employed by the IHQ can choose to be taxed at a flat rate of 15% from the date on which the IHQ becomes qualified until the date on which the IHQ is no longer qualified or the employment is terminated.

Please note the following:

- A qualified IHQ will be granted tax privileges for 15 accounting periods.
- The total income subject to tax at the 10% rate must not exceed the total income from qualified services and royalties that are both exempt from tax.
• If an IHQ lacks any of the qualifications in any accounting period, the right to the tax privileges will be suspended only for that accounting period.

**Treasury centre (TC)**

An IHQ that has obtained a TC licence from the Bank of Thailand can request approval from the Revenue Department for the tax concessions available when carrying on the business of financial management for its associated enterprises or branches situated in Thailand or abroad.

Financial management includes:

1. Financial management of a TC permitted under the law governing exchange control.
2. Borrowing and lending of Thai currency ('Baht') in the following cases:
   a. Funds borrowed from Thai financial institutions or affiliates in Thailand.
   b. Lending of funds obtained from operations under 1 or 2 (a) in Thai currency to affiliates in Thailand.

The tax concessions are:

• WHT exemption on interest paid to foreign companies not carrying on business in Thailand on loans borrowed for re-lending to affiliates.
• Exemption from specific business tax on remuneration received from financial management provided to affiliates.
• Other tax concessions available for the TC activities are the same as for IHQ noted above.

A qualified IHQ will be granted tax privileges for 15 accounting periods.

The criteria are the same as noted above for an IHQ.

If a TC lacks any of the qualifications in any accounting period, the right to the tax privileges will be suspended only for that accounting period.

**International trade centre (ITC)**

An ITC is defined as a company established under the law of Thailand and engaged in the business of buying and selling goods, raw materials, and parts, including providing services relating to international trade to foreign juristic entities. Services relating to international trade include procuring goods, maintaining goods awaiting delivery, packaging, transporting goods, providing insurance for goods, providing advice, including technical services and training relating to goods, and providing other services as prescribed by the Director-General of the Revenue Department.

An IHQ is entitled to obtain approval to carry on a business as an ITC and enjoy the same tax concessions.

The criteria for ITC are:

• Company formed under Thai law with a minimum paid-up capital of THB 10 million.
• Operating expenses related to ITC activities of at least THB 15 million per year.

The tax concessions are:

• Exemption from CIT on income from buying and selling goods abroad without importing such goods into Thailand (out-out), including income from services relating to international trade provided to foreign juristic entities and received in or from a foreign country.
• WHT exemption on dividends paid to foreign corporate shareholders from the net profit derived from the income exempt from tax.
Thailand

- Expatriates employed by the ITC can choose to be taxed at a flat rate of 15% from the date on which the ITC becomes qualified until the date on which the ITC is no longer qualified or the employment is terminated.

A qualified ITC will be granted tax privileges for 15 accounting periods.

If an ITC lacks any of the qualifications in any accounting period, the right to the tax privileges will be suspended only for that accounting period.

**Foreign tax credit**

A Thai company can use foreign tax paid on business income or dividends as a credit against its CIT liability. However, the credit cannot exceed the amount of Thai tax on the income.

### Notes

1. The zero rate applies to a recipient company listed on the Stock Exchange of Thailand and any other limited company that holds at least 25% of the total shares with voting rights in the company paying the dividend without any cross shareholding.
2. The 1% rate applies to interest paid to all resident corporations other than banks or finance companies, except where interest arises from bonds or debentures.
3. The progressive rate is in accordance with the PIT schedule.
4. The 10% rate applies to interest paid to a recipient that is a bank or financial institution (including an insurance company).
5. The 10% rate applies to interest paid (i) to a recipient that is a bank or financial institution (including an insurance company) or (ii) with respect to indebtedness arising as a consequence of a sale on credit of any equipment, merchandise, or services.
6. The 5% rate applies to royalties paid for the use of, or the right to use, any copyright of literary, artistic, or scientific work.
7. The 5% rate applies to royalties paid for the use of, or the right to use, any copyright of literary, artistic, or scientific work, excluding cinematograph films and films, tapes, or discs for radio or television broadcasting.
8. The 5% rate applies to copyright royalties and other like payments in respect of the production or reproduction of any literary, dramatic, musical, or artistic work, excluding royalties with respect to motion picture films and works on film or videotape for use in connection with television.
9. The 10% rate applies to royalties paid for the use of, or the right to use, any copyright of literary, artistic, or scientific work, or for the use of, or the right to use, industrial, commercial, or scientific equipment.

10. The 10% rate applies to interest paid (i) to a recipient that is a bank or financial institution (including an insurance company); (ii) in connection with the sale on credit of any industrial, commercial, or scientific equipment; or (iii) in connection with the sale on credit of any merchandise by one enterprise to another enterprise.

11. The 5% rate applies to royalties paid for the use of or the right to use any copyright of literary, dramatic, musical, artistic, or scientific work, including software, cinematograph films or films, or tapes used for radio or television broadcasting; and the 10% rate applies to royalties paid for the use of or the right to use industrial, commercial, or scientific equipment or for information concerning industrial, commercial, or scientific experience.

12. The 5% rate applies to royalties paid for the alienation or the use of or the right to use any copyright of literary, artistic, or scientific work, including cinematograph films or films or tapes used for radio or television broadcasting, and the 10% rate for the alienation of any patent, trademark, design, or model, plan, secret formula, or process.

13. The 8% rate applies to royalties paid for the use of, or the right to use, industrial, commercial, or scientific equipment. The 10% rate applies to royalties paid in all other cases.

14. The 5% rate applies to interest paid on loans or credits granted for four years or more with the participation of a financing public institution to a statutory body or to an enterprise in relation to the sale of any equipment or to the survey, the installation, or the supply of industrial, commercial, or scientific premises and of public works. The 10% rate applies to interest paid to any financial institution.

15. The zero rate applies to royalties paid to a contracting state or state-owned company with respect to films or tapes, and the 5% rate to royalties for the alienation or the use of or the right to use any copyright of literary, artistic, or scientific work.

16. The zero rate applies to interest paid to any financial institution wholly owned by the other contracting state, a ‘land’, a political subdivision, a local authority, or a local administration thereof, and in particular, in the case of the Federal Republic, by the Deutsche Bundesbank or the Kreditanstalt für Wiederaufbau, and in the case of Thailand, by the Bank of Thailand. The 10% rate applies to interest paid to a recipient that is a bank or financial institution (including an insurance company).

17. The 10% rate applies to (i) interest paid to a bank or financial institution (including an insurance company) and (ii) interest paid with respect to indebtedness arising as a consequence of a sale on credit of any equipment, merchandise, or services, except where the sale was between persons not dealing with each other at arm’s length.

18. The 5% rate applies to royalties paid for the use of or the right to use any copyright of literary, artistic, or scientific work and the 10% rate for the use or the right to use any patent, trademark, design, or model, plan, secret formula, or process.

19. A new DTT between Thailand and India entered into force on 5 January 2016 and will be effective from the tax year commencing on 1 January 2017.

20. The 10% rate applies to (i) interest paid to any financial institution (including an insurance company) and (ii) interest paid with respect to indebtedness arising as a consequence of a sale on credit of any equipment, merchandise, or services, except where the sale was between persons not dealing with each other at arm’s length.

21. The 5% rate applies to royalties paid for the use of or the right to use any copyright of literary, artistic, or scientific work, including software, and motion pictures and works on film, tape, or other means of reproduction for use in connection with radio or television broadcasting, and the 10% rate for the use of or the right to use industrial, commercial, or scientific equipment or any patent.

22. The 5% rate applies to royalties paid for the use of or the right to use any copyright of literary, artistic, or scientific work, excluding cinematograph films or films or tapes used for radio or television broadcasting.

23. The zero rate applies to interest paid to any financial institution wholly owned by the other contracting state, a ‘land’, a political subdivision, a local authority, or a local administration thereof. The 10% rate applies to interest paid to a recipient that is a bank or financial institution (including an insurance company).

24. The zero rate applies to interest paid to any financial institution wholly owned by the government. The 10% rate applies to interest paid to a recipient that is a bank or financial institution (including an insurance company).

25. The 5% rate applies to royalties paid for the use of or the right to use any copyright of literary, artistic, or scientific work, including software and motion pictures and works on film, tape, or other means of reproduction for use in connection with radio or television broadcasting, and the 10% rate for the use of or the right to use any patent, trademark, design, or model, plan, secret formula, or process.

26. The 5% rate applies to royalties paid for the use of, or the right to use, any copyrights of literary, artistic, or scientific work, while the 10% rate applies to royalties paid for the consideration for any services of a managerial or consultancy nature, or for information concerning industrial, commercial, or scientific experience.

27. The 10% rate applies to royalties paid for the use of or the right to use any copyright; or the use of, or the right to use, any industrial, scientific, or commercial equipment; or the use of, or the right to use, any motion picture film, or film or videotape or any other recording for use in connection with television, or tape or any other recording for use in connection with radio broadcasting; or the reception of, or the right to receive, visual images or sounds, or both, transmitted to the public by satellite or, cable, optic fibre, or similar technology; or the use in connection with television or radio broadcasting, or the right to use in connection with television or radio broadcasting, visual images or sounds, or both, transmitted by satellite or cable, optic fibre, or similar technology.

28. The 5% rate applies to royalties paid for the use of, or the right to use, any copyright of literary, artistic, or scientific work, and the 10% rate applies to royalties paid for the use of or the right to use industrial, commercial, or scientific equipment.

29. The 10% rate applies to (i) interest paid to a bank or financial institution (including an insurance company) and (ii) interest from a loan or debt claim that is guaranteed by the government.
30. The zero rate applies to royalties paid to a contracting state or a state-owned company with respect to films or tapes. The 5% rate applies to royalties paid for the alienation or the use of or the right to use any copyright of literary, artistic, or scientific work.

31. In case of interest arising in Thailand, the 10% rate applies to interest paid to a Philippines financial institution (including an insurance company). In the case of interest arising in the Philippines, the 10% rate applies in respect of public issues of bonds, debentures, or similar obligations.

32. The zero rate applies to royalties paid to a contracting state or a state owned company with respect to films or tapes. The 5% rate applies to royalties paid for the alienation or the use of or the right to use any copyright of literary, artistic, or scientific work, excluding cinematograph films or tapes used for television or broadcasting.

33. The 10% rate applies to interest paid to the following recipients: (i) in the case of a resident of Russia, any institution having a licence to carry on banking operations; and (ii) in the case of a resident of Thailand, any financial institution (including an insurance company).

34. A new DTT between Thailand and Singapore entered into force on 15 February 2016 and will be effective from the tax year commencing on 1 January 2017.

35. The 10% rate applies to interest if (i) the interest is paid to a beneficial owner that is a financial institution or an insurance company; or (ii) the interest is paid with respect to indebtedness arising as a consequence of a sale on credit of any equipment, merchandise, or services, except where the sale was between persons not dealing with each other at arm’s length.

36. The 5% rate applies to royalties paid for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematograph films, or films or tapes used for radio or television broadcasting. The 8% rate applies to royalties paid for the use of, or the right to use, any patent, trademark, design or model, plan, secret formula or process, or for the use of, or the right to use, industrial, commercial, or scientific equipment.

37. The 10% rate applies to royalties paid for the use of, or the right to use, any copyright of literary or artistic work, including motion pictures, live broadcasting, film, tape, or other means of the use or reproduction in connection with radio and television broadcasting, and for the use of, or the right to use industrial, commercial, or scientific equipment.

38. The 5% rate applies to royalties paid for the use of, or the right to use, any copyright of literary, dramatic, musical, artistic, or scientific work, excluding cinematograph films or films or tapes used for radio or television broadcasting. The 8% rate applies to royalties in consideration of financial leasing for the use of, or the right to use, industrial, commercial, or scientific equipment.

39. The 5% rate applies to royalties paid for the alienation or the use of, or the right to use, any copyright, artistic, or scientific work, excluding cinematograph films or films or tapes used for radio or television broadcasting, and the 10% rate for the alienation of any patent, trademark, design or model, plan, secret formula, or process.

40. The 5% rate applies if the recipient holds at least 25% of the capital of the company paying the dividend.

41. The 5% rate applies to royalties paid for the use of, or the right to use, any copyright of literary, artistic, or scientific work.

42. The zero rate applies to interest paid to any other financial institution established and owned by the government to promote trade and investment. The 10% rate applies to interest paid to a recipient that is a bank or financial institution (including an insurance company).

43. The 5% rate applies to royalties paid for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including software, motion pictures, and works on film, tape, or other means of reproduction for use in connection with radio or television broadcasting. The 8% rate applies to royalties paid for the use of, or the right to use, industrial, commercial, or scientific equipment.

---

**Tax administration**

**Taxable period**

The tax year for a company is its accounting period, which must be of 12 months’ duration. However, it may be less than 12 months in the case of the first accounting period after incorporation, the accounting period of dissolution, or after approval for a change in the accounting period has been received from the Revenue Department and the Business Development Department.

**Tax returns**

The tax system is one of self-assessment. A company prepares and files its tax returns by the due dates and at the same time pays the taxes calculated to be due. The annual CIT return is due 150 days from the closing date of the accounting period.

**Payment of tax**

CIT is paid twice in each year. A half-year return must be filed within two months after the end of the first six months of an accounting period. The tax to be paid is computed on one-half of the estimated profit for the full accounting period, except for listed companies, banks, certain other financial institutions, and other companies under prescribed conditions where the tax is based on the actual net profit for the first six
months. The balance of the tax due is payable within 150 days from the closing date of the accounting period, together with the annual tax return. Credit is given for the amount of tax paid at the half-year.

**Tax audit process**
If, within a period of two years from the date of filing a tax return, the assessment officer has reason to believe that false or inadequate information has been declared in a return, the assessment officer has the power to issue a summons requesting the presence of the person responsible, or a witness, for examination, and to order either of them to produce accounts or other relevant evidence, provided that advance notice of seven days is given. The subsequent examination of the books and records is normally carried out at the company's offices if it is inconvenient to transfer all the documents to the tax office. After completion of the examination, the assessment officer has the power to adjust the amounts previously assessed or included in a return on the basis of the evidence, and issue a further assessment for tax together with penalties and surcharges, or adjust the amount of losses available for carryforward.

Tax audits may cover the previous five accounting periods from the date of filing a tax return with the approval of the Director-General if the assessment officer has evidence of an intention to evade tax or in the case of a claim for a refund of tax. However, under the Civil and Commercial Code, the Revenue Department can assess tax for up to ten years.

**Statute of limitations**
The statute of limitations for tax is ten years.

**Topics of focus for tax authorities**
Topics of focus for tax authorities currently include the following:

- Deductibility of management service fees or expenses allocated to Thailand by foreign affiliates.
- International inter-company transactions and transfer pricing.

**Other issues**

**United States (US) Foreign Account Tax Compliance Act (FATCA)**
The intergovernmental agreement (IGA) between the United States and Thailand regarding the US FATCA was signed on 4 March 2016. The agreement will enter into force on the date of Thailand's written notification to the United States that Thailand has completed its necessary internal procedures for entry into force.

The US Treasury has previously treated the IGA to be ‘in effect’ since 30 June 2014 when the United States and Thailand reached an agreement in substance and Thailand consented to disclose this status. In accordance with this status, financial institutions in Thailand were allowed to register on the FATCA registration website consistent with the treatment of having an IGA in effect.
**Significant developments**

There have been no significant corporate tax developments in Timor-Leste during the past year.

**Taxes on corporate income**

Timor-Leste residents are subject to income tax on worldwide taxable income, where taxable income is essentially the difference between gross income and allowable deductions. Non-residents are generally subject to income tax on Timor-Leste-source income attributed to a permanent establishment (PE) (*see the Branch income section for more information*). Non-residents without a PE may be subject to a 10% withholding tax (WHT) (*see the Withholding taxes section for more information*).

The income of companies is generally subject to corporate income tax (CIT) at a flat rate of 10%.

**Industry-specific CIT rates**

The rate of CIT for oil and gas contractors is 30%, while sub-contractors are subject to CIT at the flat rate of (generally) 6%.

Supplemental Petroleum Tax (SPT) also applies for oil and gas contractors and is imposed on 'accumulated net receipts' using a specific formula. SPT is deductible for CIT calculation purposes.

Separate tax arrangements apply for petroleum activities in the Joint Petroleum Development Area (JPDA) (*see the Other issues section*).

**Local income taxes**

There are no local taxes on income in Timor-Leste.

**Corporate residence**

The definition of a corporate resident (resident legal person) covers a wide range of entities, such as companies, partnerships, trusts, governmental institutions, and unincorporated associations incorporated, formed, organised, or established in Timor-Leste.

**Permanent establishment (PE)**

A PE is defined as a fixed place of business through which the business of a person is wholly or partly carried on, including:

- A place of management.
- A branch.
- A representative office.
- An office.
Timor-Leste

- A factory.
- A workshop.
- A mine, an oil or gas well, a quarry, or any other place of extraction of natural resources, including any place of drilling for mineral exploration.
- A fishery, place where animal husbandry is conducted, farm, plantation, or forest.
- A construction, installation, or assembly project.
- The furnishing of a service through employees or other personnel, if conducted for more than 60 days in any 12-month period.
- A natural or legal person acting as a dependent agent.
- An agent or employee of a non-resident insurance company, if the agent or employee collects premiums or insures risks in Timor-Leste.

**Other taxes**

**Sales tax**
Sales tax is imposed on the sales tax value of:

- taxable goods imported into Timor-Leste and
- taxable goods sold or taxable services provided in Timor-Leste on or after the date specified by Parliament.

Taxpayers liable for sales tax include the following:

- A taxpayer who imports taxable goods into Timor-Leste.
- A taxpayer who sells taxable goods in Timor-Leste.
- A taxpayer who provides taxable services in Timor-Leste.

The rates of sales tax are 2.5% for taxable goods imported into Timor-Leste and 0% for the sale of taxable goods and provision of taxable services in Timor-Leste.

**Services tax**
Services tax is imposed at 5% on any gross consideration of more than 500 United States dollars (USD) received by a taxpayer for the provision of hotel, restaurant and bar, or telecommunication services.

**Import duties**
Import duty applies to imported goods (except for specifically exempted goods) at 2.5% of the ‘customs value’ of the goods. Customs value is the fair market value, including cost, insurance, and freight (CIF), as stated in the General Agreement on Tariffs and Trade (GATT) rules.

The following goods are exempted from import duty:

- Goods accompany a person arriving in Timor-Leste from another territory (limitations apply).
- Imports of the type exempted under specific international conventions.
- Goods re-imported in the same condition as when they were exported.
- Goods, other than alcohol or tobacco, imported by registered charitable organisations, registered under any law of Timor-Leste, provided the goods are to be used for charitable purposes of humanitarian assistance and relief, education, or health care.
- Other goods for temporary admission, if the importer has provided security for the import duty in the prescribed manner.
- Goods for consumption by international staff of the United Nations Integrated Mission in East Timor or members of peace keeping forces from contingent countries, provided the goods are sold in conformity with prescribed rules of sale.
- Certain infant and female hygiene products.
• Other goods imported into Timor-Leste as personal goods accompanying a traveller and where the import duty that would be imposed on the import would be USD 10 or less.

**Excise tax**
Excise tax is imposed on excisable goods where removed from a warehouse by a registered manufacturer for consumption in Timor-Leste or imported into Timor-Leste.

Below is the list of excisable goods and the respective rates of excise tax:

<table>
<thead>
<tr>
<th>Goods</th>
<th>Excise tax rate</th>
</tr>
</thead>
<tbody>
<tr>
<td>Beer</td>
<td>USD 1.90/litre</td>
</tr>
<tr>
<td>Wine, vermouth, fermented beverages (such as cider)</td>
<td>USD 2.50/litre</td>
</tr>
<tr>
<td>Ethyl alcohol (other than denatured) and other alcoholic beverages</td>
<td>USD 8.90/litre</td>
</tr>
<tr>
<td>Gasoline, diesel fuel products, and other petroleum products</td>
<td>USD 0.06/litre</td>
</tr>
<tr>
<td>Tobacco and tobacco products</td>
<td>USD 19.00/kg</td>
</tr>
<tr>
<td>Cigarette lighters</td>
<td>12% of the excise value</td>
</tr>
<tr>
<td>Smoking pipes</td>
<td>12% of the excise value</td>
</tr>
<tr>
<td>Arms and ammunition</td>
<td>200% of the excise value</td>
</tr>
<tr>
<td>Motor cars and small passenger vehicles (with an excise value exceeding USD 70,000)</td>
<td>35% of the excise value</td>
</tr>
<tr>
<td>Private boats and aircraft</td>
<td>20% of the excise value</td>
</tr>
</tbody>
</table>

Note that the excise value of excisable goods imported into Timor-Leste is the total of the customs value and any import duty imposed. The excise value of excisable goods manufactured in Timor-Leste is their fair market value at the time of removal from the manufacturer’s warehouse.

Goods on the above list are excisable goods, other than:

• goods imported into Timor-Leste that are exempt from import duty, or
• goods exported from Timor-Leste within 28 days after their production or import, as long as the taxpayer liable to excise tax submits to the Banking and Payments Authority documentary proof of the export of goods.

**Property taxes**
To date, there are no taxes on property in Timor-Leste.

**Transfer taxes**
There are no transfer taxes in Timor-Leste.

**Stamp duties**
There is no stamp duty in Timor-Leste.

**Payroll taxes**
An employer paying taxable wages shall withhold Wage Income Tax (WIT) at a rate of 10% from those wages and remit the WIT on monthly basis.

An annual WIT return is due by the last day of the March following the end of the relevant tax year. Information on WIT withheld must also be provided to each employee on an annual basis or on termination of employment.

**Social security contributions**
There are no social security or similar contribution requirements in Timor-Leste.
**Branch income**

The taxable income of a non-resident carrying out business activities through a PE is calculated by reference to:

- the income attributable to the PE
- any sales of goods or merchandise of the same or similar kind as those sold through the PE, and
- any other business activities carried on in Timor-Leste of the same or similar kind as those effected through the PE.

Other principles for determining the taxable income of a PE in Timor-Leste include the following:

- Profit is calculated as if the PE was a Timor-Leste entity engaged in the same or similar activities under the same or similar conditions and dealt with wholly independently from the non-resident person of which it is a PE.
- Subject to this, deductions may be claimed for expenses incurred for the purposes of the business activities of the PE, including head office expenditures, whether incurred in Timor-Leste or elsewhere.
- No deductions may be claimed for amounts paid or payable by the PE to its head office or to another PE of the non-resident person, other than towards the reimbursement of actual expenses incurred by the non-resident person to third parties, by way of:
  - royalties, fees, or other similar payments
  - compensation for any services (including management services) provided to the PE, and
  - interest on money lent to the PE (except for banking businesses).

**Income determination**

Taxable business profits are determined on the basis of net profit for financial accounting purposes in accordance with International Financial Reporting Standards (IFRS), subject to certain modifications in the Tax and Duties Act (TDA). In general, income is assessable when 'receivable', while expenses are deductible when 'payable'. A taxpayer with turnover of less than USD 100,000 may, however, elect to pay tax on a cash basis.

Gross income is defined widely to mean “any realised increase in economic capacity in whatever name or form which can be used for consumption or to increase the wealth of the taxpayer other than wages that are subject to Wages Income Tax (WIT)”.

The gross income for a tax year is the total amount earned by the taxpayer, including, but not limited to, business income, property income, lottery prizes or awards, and refunds of tax payments previously deducted as an expense.

**Inventory valuation**

There are no specific provisions dealing with inventory valuation in Timor-Leste. This is because a deduction is allowed for the cost of inventory incurred during the tax year even if the inventory is on hand at the end of the year.

**Capital gains**

Gains and losses arising from the alienation of assets are generally assessable and deductible as ordinary income and subject to tax at the standard CIT rate.

**Dividend income**

Dividends are tax exempt in the hands of Timor-Leste residents.
**Interest income**
Interest income is generally assessable as ordinary income and subject to tax at the standard CIT rate.

**Exempted income**
The following income is tax exempt:

- Any aid or donations, provided that the donor and recipient do not have any business or control relationship.
- Gifts received by a religious, educational, or charitable organisation, provided that the donor and recipient do not have any business or control relationship.
- Assets (including cash) received by a resident in exchange for shares or a capital contribution.
- Any amount paid by an insurance company to a resident in connection with accident or life.

**Foreign income**
Under the worldwide income principle, a resident taxpayer is required to calculate income that is not only Timor-Leste sourced but also foreign sourced. In the case that the foreign-sourced income is taxed at source, Timor-Leste allows a foreign tax credit for the particular tax year (see Foreign tax credit in the Tax credits and incentives section).

With regard to profits retained in controlled foreign companies (CFCs), Timor-Leste does not currently have any arrangements to otherwise deem the repatriation of the profit.

**Deductions**
The taxable income of residents and non-residents who have a PE in Timor-Leste shall be determined on the basis of gross income reduced by:

- expenditure and losses incurred from the alienation of assets or the discharge of debt in the conduct of a taxable business activity
- expenditure incurred in deriving any other amounts included in gross income
- any loss on disposal of an asset other than assets held on personal account
- contributions to an approved pension fund, and
- bad and doubtful debts (subject to various tests - see Bad debt below).

**Depreciation and amortisation**
‘Depreciable assets' include any tangible movable property with a useful life exceeding one year that is wholly or partly used for taxable business activities. ‘Intangible assets' include property, other than tangible movable property or immovable property, with a useful life exceeding one year that is used for taxable business activities.

There are provisions for election of either straight-line or double-declining methods, the pooling of assets, and de minimis exceptions. However, the rate of tax depreciation/amortisation (for non-petroleum operations) is set at 100%, meaning that taxpayers are, in effect, entitled to a full and up-front deduction. In circumstances where the asset is only partly used for the conduct of taxable business activities, the deduction is reduced by the proportion of its non-taxable business use.

**Goodwill**
There are no specific provisions dealing with the treatment of goodwill. We expect that the treatment should follow that under IFRS.
Timor-Leste

**Start-up expenses**
There are no specific provisions dealing with the treatment of start-up expenses. However, assuming that the start-up expense is incurred to derive income, we expect that start-up expense should be deductible.

**Interest expenses**
Interest expenditure is not deductible unless incurred by a financial institution.

**Bad debt**
Bad debts are not deductible without passing all of the following tests:

- The debt was previously included in taxable income.
- The debt was written off in the accounts during the relevant tax year.
- There are reasonable grounds for believing that the debt will not be recovered.

The above tests do not apply to banks, which are entitled to deduct provisions for doubtful debt where determined in accordance with the prudential requirements prescribed by instruction of the Banking and Payments Authority.

**Charitable contributions**
Donations are not deductible if the donations are exempt from income tax in the hands of the recipient.

**Fines and penalties**
Penalties for violation of law and regulation are not deductible.

**Taxes**
Timor-Leste or foreign income tax is not deductible.

**Deductions not allowed or conditional deductions**
The following expenses are also not deductible to a resident or non-resident with a PE in Timor-Leste:

- The distribution of profits in whatever name or form.
- Expenses incurred for the personal benefit of a taxpayer, a taxpayer’s dependents, shareholders, partners, or members.
- Reserves, other than as provided for under the TDA.
- Excessive compensation paid by a legal person to a member of the legal person, or paid between associates.
- Salaries paid to a partner in a partnership.
- A bribe, or any similar payment.
- Expenditure or losses incurred to the extent recoverable under an insurance policy or a contract of indemnities.

**Net operating losses**
Losses from previous years may be carried forward indefinitely. However, the carried forward loss from the disposal of assets may only be utilised against gains arising from the disposal of assets. Foreign-sourced losses may only be offset against foreign-sourced income of that particular country.

The carryback of losses is not allowed.

**Payments to foreign affiliates**
Excessive payments or compensation to ‘members of a legal person’ or payments between associates for work performed should not be deductible. The TDA, however, does not elaborate on the meaning of ‘excessive’.
**Group taxation**

Companies, etc. are taxable on a stand-alone basis (i.e. there is no grouping or ability to transfer tax losses).

**Transfer pricing**

Excessive payments or compensation to ‘members of a legal person’ or payments between associates for work performed should not be deductible. The TDA, however, does not provide specific guidance on how to determine arm’s-length pricing on related-party transactions or any other general transfer pricing principles.

**Thin capitalisation**

Currently, there are no ‘thin capitalisation’ or similar rules in Timor-Leste (noting that interest is not deductible, except for financial institutions).

**Controlled foreign companies (CFCs)**

Timor-Leste does not have any CFC regulations.

---

**Tax credits and incentives**

**Foreign tax credit**

A resident taxpayer is entitled to a credit for any foreign income tax paid in respect of foreign-source income. The foreign tax credit is calculated separately for each foreign country from which income is derived by a taxpayer. The value of such tax credits is limited to the value of the Timor-Leste income tax payable on that income. There is no deduction or carryforward of any excess foreign tax credit.

---

**Withholding taxes**

WHT is imposed on the following payments by residents to a resident:

<table>
<thead>
<tr>
<th>Type of payment</th>
<th>WHT rate (%)</th>
<th>Final/non-final tax</th>
</tr>
</thead>
<tbody>
<tr>
<td>Dividends</td>
<td>0</td>
<td>Final</td>
</tr>
<tr>
<td>Interest</td>
<td>0</td>
<td>Not final</td>
</tr>
<tr>
<td>Royalties</td>
<td>10</td>
<td>Not final, except where paid to an individual</td>
</tr>
<tr>
<td>Rent (land and building)</td>
<td>10</td>
<td>Not final, except where paid to an individual</td>
</tr>
<tr>
<td>Prize and winnings</td>
<td>10</td>
<td>Not final</td>
</tr>
<tr>
<td>Construction/building activities</td>
<td>2</td>
<td>Final</td>
</tr>
<tr>
<td>Construction consulting services</td>
<td>4</td>
<td>Final</td>
</tr>
<tr>
<td>Air and sea transportation</td>
<td>2.64</td>
<td>Final</td>
</tr>
<tr>
<td>Mining and mining support services</td>
<td>4.5</td>
<td>Final</td>
</tr>
</tbody>
</table>

* The default position is that such amounts will be a final tax. The income recipient can elect to have these payments for services not subjected to final tax by submitting a notification letter to the Timor-Leste Revenue Service.

Payments of Timor-Leste-source income made by a resident to a non-resident are subject to WHT at 10%. Timor-Leste has not entered into any double taxation treaties (DTTs).

Where WHT is applied as a final tax, the taxed income is not included in the recipients’ taxable income for income tax purposes. Accordingly, expenses incurred in deriving income that is subject to final tax are not deductible for income tax purposes.
Timor-Leste

**Tax administration**

**Taxable period**
The standard tax year is the calendar year, although different accounting year-ends can be granted upon application.

**Tax returns**
CIT returns are to be filed annually by the 15th day of the third month following the year end.

Service tax, excise tax, sales tax, and WHT are to be filed monthly by the 15th day of the following month.

**Payment of tax**
CIT due shall be settled to the Banking and Payments Authority or another entity nominated by the Timor-Leste Revenue Service by the date of filing (see above).

Service tax, excise tax, sales tax, and WHT should be settled to the Banking and Payments Authority or another entity nominated by the Timor-Leste Revenue Service by the 15th day after the end of the following month.

**Penalties**
If a taxpayer fails to deliver the tax form on time, it shall be liable to an additional tax of USD 100. If a taxpayer fails to deliver all or part of any tax due by the due date, that taxpayer shall be liable to an additional tax of 5% of the amount due plus an additional 1% of the tax due on the 15th day of each month following the due date and:

- if the failure was due to gross carelessness on the part of the person, further additional tax of 25% of the tax that remains unpaid, or
- if the failure was due to a deliberate attempt to avoid payment of tax, further additional tax of 100% of the tax that remains unpaid.

If a taxpayer has understated the tax due in the tax form, that taxpayer shall be liable to an additional tax of 15% and:

- if the understatement was due to gross carelessness on the part of the taxpayer, further additional tax of 25% of the tax understated, or
- if the understatement was due to a deliberate attempt to avoid payment of tax, further additional tax of 100% of the tax understated.

**Tax audit process**
Assessments may occur upon the following:

- The delivery of a tax return form and payment.
- After receipt of a return where the Commissioner believes a return is incorrect.
- Where a taxpayer fails to file a return.

Assessments may be amended according to the following events:

- By the taxpayer upon delivery to the Commissioner of an amended assessment.
- Via a taxpayer request to the Commissioner.
- Via specific amendment by the Commissioner.

**Statute of limitations**
The Timor-Leste Revenue Service may issue an assessment notice or amend an assessment notice only within five years from the date of filing of the return. In the event of a deliberate tax evasion or fraud, there is no time limit for the issuance of an assessment notice.
Topics of focus for tax authorities
Based on our experience, the Timor-Leste tax authorities are focussing on the timely remittance of the tax obligations. From an industry perspective, the oil and gas sector continues to be a focus. Finally, there have been numerous challenges of tax concessions granted on a contractual basis, including by government agencies.

Other issues

Taxation of petroleum operations
The taxation of petroleum operations in Timor-Leste is partly covered by the TDA. However, the TDA operates only to modify the taxation of petroleum activities pursuant to a number of legacy tax regimes. These modifications apply to contractors, sub-contractors, and any other parties receiving income from the supply of goods or services to a contractor or sub-contractor.

A contractor is defined as a person with whom the responsible Ministry or Designated Authority, as the case may be, has made a petroleum agreement. A sub-contractor includes any person supplying goods or services directly or indirectly to a contractor in respect of petroleum operations.

Specific provisions for the taxation of petroleum operations include:

- A CIT rate for contractors of 30% on taxable income, while sub-contractors will generally be taxed on a final WHT basis at a rate of 6% (although see JPDA below).
- No tax on branch profit remittances (although see JPDA below).
- Where ‘net receipts’ exceed specified levels, an SPT can apply.
- The ‘ring fencing’ of income and expenditure within the contract area.
- Modified deductibility rules, including around the deductibility of interest for contractors and a modified depreciation regime.
- A specific WHT regime.
- A specific transfer pricing and associated anti-avoidance provision.

Special tax regime for the Joint Petroleum Development Area (JPDA)
The JPDA is a geographical area in the Timor Sea known to be rich in hydrocarbon deposits. The JPDA covers the ‘Annex F’ Production Sharing Contracts (PSCs) (see below) known as Bayu-Undan (including the Elang Kakatua and Kakatua North fields) PSCs, and Greater Sunrise. The JPDA also covers a number of non-Annex F PSCs.

Pursuant to the Timor Sea Treaty (TST), the JPDA is technically within the taxation jurisdiction of both Timor-Leste and Australia and therefore falls under the joint control and management of Timor-Leste and Australia. ‘Annex F’ of the TST refers to the PSCs with commercial discoveries at the time of the TST signing and so imbeds a number of historical tax principles.

Control of the JPDA is exercised by a ‘Joint Authority’ containing representation from Australia and Timor-Leste. The petroleum activities covering the exploration, development, processing, transportation, and marketing of hydrocarbons are carried out pursuant to PSCs entered into between the designated authority and the oil company in question.

Under the TST, revenue from the JPDA PSCs is split 90% for Timor-Leste and 10% for Australia. Accordingly, for tax calculation purposes, business profits or losses of an entity carrying on business in the JPDA are reduced by the ‘reduction percentage’ of 90% for Timor-Leste and 10% for Australia. This effectively means that the tax rates applied by Timor-Leste and Australia are at 90% and 10% of their respective national level.
For Timor-Leste, these tax rates are generally 30% for all participants with PEs and an 8% or 20% final WHT for non-residents (according to the PSC). A 10% value-added tax (VAT) also applies.

The tax regime as outlined under ‘Taxation of petroleum operations’ above also applies in the JPDA (except for ‘Annex F’ PSCs). This is, however, with a number of important modifications, including the exclusion of the service tax, excise tax, sales tax, import duty, and WIT.
Significant developments

Finance Act No. 2 of 2015 and Finance Act, 2016 contained the following amendments to the tax regime:

• Increase in business levy from 0.3% to 0.6% and green fund levy from 0.1% to 0.3% of gross sales and receipts (effective 21 January 2016).
• Decrease in value-added tax (VAT) to 12.5% and a reduction in the list of zero-rated items (effective 1 February 2016), as well as an increase in the VAT registration threshold to 500,000 Trinidad and Tobago dollars (TTD) (effective 1 January 2016).
• VAT zero-rating of new and used (not older than four years) electric vehicles not exceeding 179 kilowatts and hybrid vehicles not exceeding 1799 cc, imported for private and commercial use between 1 January 2015 to 1 January 2020.
• Tax credit of 25% on the face value of bonds not exceeding TTD 5,000 issued in accordance with the National Tax Free Saving Bonds Regulations, where the maturity date is five, seven, or ten years (effective 1 January 2015).

Taxes on corporate income

A Trinidad and Tobago resident corporation is taxed on worldwide income. A non-resident company engaged in business in Trinidad and Tobago is taxed only on income directly or indirectly accruing in or derived from Trinidad and Tobago.

The standard corporation tax rate is 25%, but this varies in the case of certain classes of companies. The current corporation tax rates are as follows:

<table>
<thead>
<tr>
<th>Type of company</th>
<th>Corporation tax rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Ordinary companies</td>
<td>25</td>
</tr>
<tr>
<td>Petrochemical companies</td>
<td>35</td>
</tr>
<tr>
<td>Life insurance companies</td>
<td>15</td>
</tr>
<tr>
<td>Petroleum production companies (petroleum profits tax)</td>
<td>50</td>
</tr>
<tr>
<td>Petroleum production companies (deep sea)</td>
<td>35</td>
</tr>
</tbody>
</table>

Business levy

Corporations are subject to a business levy at the rate of 0.6% of gross revenue or receipts where the levy exceeds the corporation tax liability. Exemption is available for certain companies, including petroleum companies and companies whose annual turnover is less than TTD 360,000. The levy is a non-deductible expense for corporation tax purposes.

Green fund levy

A green fund levy of 0.3% on gross income is applicable to companies and partnerships doing business in Trinidad and Tobago. This levy is payable quarterly and is neither a deduction in computing chargeable income nor a credit against corporation tax due.
Trinidad and Tobago

Unemployment levy
Only petroleum companies remain liable to the unemployment levy, at the rate of 5% of taxable profits. No set-off for prior-year losses is permitted in computing the liability.

Supplementary petroleum tax (SPT)
SPT is chargeable on the gross income (derived from the sale of crude oil) less royalties and overriding royalties paid on the crude oil sold. The tax is computed separately in respect of land and marine operations and is a quarterly tax based on the actual gross income for each quarter.

The SPT is deductible in arriving at profits subject to petroleum profits tax.

Corporate residence
Corporate residence is determined by reference to the location of the central management and control of the business of a company.

Permanent establishment (PE)
A non-resident company is subject to corporation tax on its income derived from trading within Trinidad and Tobago. A company is deemed to be engaged in or carrying on trade or business in Trinidad and Tobago if it has an office or place of business or has a branch or agency within Trinidad and Tobago. The local legislation does not make any reference to the term ‘permanent establishment’; however, this term is used generally in the treaty context. Subject to the terms of specific double taxation treaties (DTTs), a non-resident company will have a PE in Trinidad and Tobago where:

- it has a fixed place of business in Trinidad and Tobago through which the business of the company is wholly or partly carried on, or
- it has an agent acting on behalf of the company and that agent has the authority to bind the company.

The term ‘fixed place of business’ has been generally defined to include a place of management, a branch, office, factory, a workshop, an installation or structure for the exploration of natural resources, or a building, construction, or installation project.

Most treaties outline circumstances under which a company will not be deemed to have a PE, and these include where the activities of the company are merely of a preparatory or auxiliary nature.

Other taxes
Value-added tax (VAT)
VAT is applicable to a wide range of goods and services. The standard rate applicable to commercial supplies effective 1 February 2016 is 12.5% (previously 15%).

Basic food items and agricultural supplies are zero-rated, as are crude oil, natural gas, and exported goods and services. Hotel accommodation and yachting services to non-residents are zero-rated.

A number of services, including financial services, real estate brokerage, residential rentals, and educational services, are exempt. However, certain financial services are subject to a transaction tax at a rate of 15%. Imported inputs of highly capital-intensive manufacturers are exempt from VAT.

The VAT registration threshold for companies making commercial supplies is TTD 500,000 for a 12-month period.
Customs duties
Customs duties are imposed at varying rates on imports and manufactured goods according to classification in Schedules to the Customs Act. The basis is the cost, insurance, and freight (CIF) value of the goods at the time of import. However, there is a provision for exemptions in relation to specific goods.

Excise taxes
Excise taxes are imposed at varying rates on certain manufactured goods, including tobacco, alcohol, and petroleum products.

Property taxes
The Property Taxes Act, which was amended by Finance Act 2 of 2015 to place a moratorium on the payment of the tax from 1 January 2010 to 31 December 2015, became fully operational on 1 January 2016. The Minister of Finance has indicated that the current land and property valuation assessment rolls are incomplete. The government is currently in the process of updating the assessment rolls, which should be completed by 2017; consequently, the Property Taxes Act will be fully implemented in that year.

In the interim, the Minister has advised that Property Taxes payable for income year 2016 will be at the old rates and values under the Land & Building Taxes Act (prior to 2010). Therefore, all 2016 property tax liabilities will be the same as in 2009.

Stamp duty
Stamp duty is levied on instruments of all types (e.g. deeds of conveyance, mortgages, debentures, trust deeds, leases, insurance policies, annuity policies, agreements, share transfers). The rate of stamp duty varies from TTD 25 on a trust deed to up to 10% on property conveyances.

Hotel accommodation tax
Hotels are subject to a hotel accommodation tax at a rate of 10% of the value of the accommodation.

Insurance premium tax
A tax at the rate of 6% has been imposed on insurance premiums in respect of general insurance contracts. Life insurance and reinsurance premiums are exempt.

Payroll taxes
Under the pay-as-you-earn (PAYE) system, an employer is required to deduct income tax on emoluments paid to employees. 'Emoluments' is widely defined to include all salary, wages, overtime, bonus, remuneration, perquisites, lodging, stipend, commission or other amounts for services, directors' fees, retiring allowance, and pensions.

Social security contributions
There is a social security tax, referred to as National Insurance, that is deducted at source at varying rates. The maximum rate is TTD 332.40 per week for monthly income over TTD 12,000, which is payable TTD 221.60 by the employer and TTD 110.80 by the employee.

There is also a health surcharge that is deducted at source. The maximum liability is TTD 8.25 for every week worked.

Branch income
A branch is subject to Trinidad and Tobago taxation on all income directly or indirectly accruing in or derived from Trinidad and Tobago. The tax rates applicable on branch profits are the same as on corporate profits. In addition, branch profits, after deduction
of corporation tax and reinvestments, are subject to withholding tax (WHT) at the rate of 5%. This may be varied by the provisions of any applicable DTTs.

**Income determination**

**Inventory valuation**
Inventories are generally stated at the lower of cost or market value. Cost may be determined by the first in first out (FIFO) or the average cost method. The last in first out (LIFO) and base stock methods are not generally accepted for tax purposes.

**Capital gains**
Gains on the disposal of chargeable assets within 12 months of acquisition are subject to tax at standard corporation tax rates. Capital gains are not otherwise taxable, except for the application of the balancing allowance on depreciable assets. See Depreciation in the Deductions section for capital gains information on the sale of tax-depreciable assets.

**Dividend income**
Dividends received by a Trinidad and Tobago company from both domestic subsidiaries and other domestic corporations are exempt from corporation tax and business levy but are subject to green fund levy.

**Stock dividends**
A Trinidad and Tobago corporation can distribute a dividend of common stock (bonus issue) proportionately to all resident common stockholders on a tax-free basis.

**Interest income**
Interest income received by a Trinidad and Tobago company is generally taxable.

**Foreign income**
A company resident in Trinidad and Tobago is subject to tax on its worldwide income. There is no deferral regime in Trinidad and Tobago.

**Deductions**

**Depreciation**
Tax depreciation rates (wear-and-tear allowances) have been standardised by statute. Fixed assets are to be classified into one of four classes:

<table>
<thead>
<tr>
<th>Asset class</th>
<th>Depreciation rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Class A: Buildings and improvements</td>
<td>10</td>
</tr>
<tr>
<td>Class B: Motor vehicles, furniture and fittings, plant and machinery</td>
<td>25</td>
</tr>
<tr>
<td>Class C: Heavy equipment, motor lorries, trucks, and computer equipment</td>
<td>33.3</td>
</tr>
<tr>
<td>Class D: Extra heavy equipment, airplanes</td>
<td>40</td>
</tr>
</tbody>
</table>

The allowance is calculated at the rate applying to aggregate expenditure incurred on assets within the class on a declining-balance basis.

Accelerated tax depreciation is allowed to manufacturers in the form of an initial allowance at the rate of 90% on capital expenditure on plant and machinery. The allowance is to be claimed in the year that the asset is first brought into use. For those companies engaged in the production of sugar, petroleum, or petrochemicals, or enjoying concessions under the Fiscal Incentives Act, the rate is 20%.
Gains on the sale of tax-depreciable assets are taxable as ordinary income (i.e. a balancing charge) but only when the written-down value of the assets of a class goes into credit. Prior to this, the proceeds of sale are credited to the particular class, thereby reducing the written down value of the class. Tax depreciation is not required to conform to book depreciation.

**Petroleum operations**
A company engaged in the petroleum production business is entitled to capital allowances on tangible costs and intangible drilling and development costs as follows:

- Tangible and intangible capital exploration expenditure incurred during 1 January 2014 to 31 December 2017 may be deducted in full (100%) in the year incurred.
- Tangible and intangible exploration and development expenditure: An initial allowance at 50%, a year-two allowance at 30%, and a year-three allowance at 20% computed on the expenditure incurred.
- A company engaged in exploration activities in a deepwater block is granted an uplift of 140% of capital expenditure incurred on drilling of exploration wells, on which capital allowances can be computed.

There is no timing in respect of claiming of allowances (e.g. on achievement of commercial production). A claim for capital allowances cannot be deferred.

**Goodwill**
Goodwill expense is generally not allowable in arriving at chargeable income.

**Start-up expenses**
No specific rules exist in respect of start-up expenses, but, generally, these expenses are not deductible.

**Interest expenses**
Interest expenses incurred by a company in the production of its income are generally allowed as deductions. However, in the case of interest payable or paid by the company, there are certain restrictions that exist in the taxing Acts, as well as in practice by the tax authority, that could restrict a company's ability to deduct interest paid or payable in its computation of tax for a particular year of income. The criteria laid down by the legislation for the deductibility of interest are:

- The sums borrowed are wholly and exclusively incurred in the production of income.
- The interest is revenue in nature.
- The interest income earned is either chargeable to tax or exempt under the Trinidad and Tobago legislation.
- Where the interest payment is being made to a non-resident, the payer has accounted for and paid over WHT to the Board of Inland Revenue (BIR).

**Bad debt**
A specific provision for bad debt will be deductible for tax purposes where:

- it is in respect of a revenue expenditure
- it is made in accordance with acceptable accounting principles
- it is specific, and
- it becomes bad in the year in which the claim is made.

**Charitable contributions**
Charitable contributions under deeds of covenant to approved charities are deductible, up to a maximum of 15% of total income.

**Fines and penalties**
Fines and penalties are not generally deductible.
Trinidad and Tobago

**Taxes**
Other than SPT, taxes or levies are not generally deductible in arriving at taxable profit.

**Other significant items**
Contributions by local insurance companies to ‘catastrophe reserve funds’ are deductible for tax purposes, up to the value of 20% of net premium income from property insurance business.

**Net operating losses**
A trading loss may be carried forward indefinitely to be set-off against future profits. Loss carrybacks are not permitted.

A limited form of group loss relief exists, whereby current year losses may be surrendered to a claimant company within a group, except that the claimant’s tax liability cannot be reduced by more than 25%. Such companies must be resident in Trinidad and Tobago.

**Payments to foreign affiliates**
A corporation engaged in business in Trinidad and Tobago may claim a deduction for royalties, interest, and service charges paid to foreign affiliates, provided the appropriate WHT is deducted and properly accounted for. For interest to be deductible for tax purposes, the funds borrowed must have been utilised in the production of income and the recipient must be subject to tax in Trinidad and Tobago or otherwise specifically exempt from local tax.

Deduction for management charges (as this term is defined) paid to a non-resident is restricted to the lower of the management charges or 2% of deductible outgoings and expenses, exclusive of the charges. Tax depreciation allowances may not be treated as an expense for this purpose. WHT may also be applicable to management charges paid to non-resident persons.

**Group taxation**
There is no provision for group taxation in Trinidad and Tobago; however, a limited form of group loss relief is available (see Net operating losses in the Deductions section).

**Transfer pricing**
There are no specific transfer pricing rules in Trinidad and Tobago. However, the legislation empowers the tax authority to disregard any transactions that it views as artificial or fictitious. This general power has been utilised by the tax authority in dealing with related parties and large multinational companies to evaluate whether transactions are at arm’s length.

**Thin capitalisation**
There are no thin capitalisation rules in Trinidad and Tobago.

**Controlled foreign companies (CFCs)**
There is no CFC rules in Trinidad and Tobago.

**Tax credits and incentives**

**Foreign tax credit**
Double taxation is avoided or mitigated by means of foreign tax credits.
Tax holidays

Fiscal Incentives Act, 1979
An approved enterprise, which must be a locally incorporated resident corporation, may be granted an exemption from corporation tax for a period of up to ten years, depending on the category under which it is approved. Exemption may be total or partial. Subject to approval, profits may be distributed tax free to shareholders, except in the case of certain non-resident shareholders, where the relief is restricted to the amount of tax that exceeds their liability in their country of residence. Net losses during the tax holiday period (i.e. the excess of total losses over total profits) may be carried forward for set-off without limitation for five years from the end of the tax holiday period, after which the normal set-off provisions for losses apply. As of 1 January 2007, the tax holiday in respect of corporation tax is no longer granted.

Approved tourism projects
Under the Tourism Development Act 2000, approved tourism development projects, including hotels, are granted a tax holiday for periods of up to seven years. In addition, a carryover from a tax exemption period is permitted of any loss arising out of the operation or renting of an approved tourism project to be written off against profits in accordance with normal income tax loss provisions, subsequent to the tax holiday period. An approved tourism project means a project declared to be so by the government.

Approved mortgage and other companies
The profits of an approved company are exempt from corporation tax. The exempt profits, when distributed to shareholders, are exempt from corporation tax and income tax. Expenses incurred in the course of the approved mortgage business remain fully deductible.

Free Zone
The profits of an approved company operating in a designated Free Zone are free from corporation tax. In addition, payments to non-residents are free of WHT. Approved activities include manufacturing.

Other allowances/incentives

Promotional expenses
Promotional expenses incurred by local firms to promote the expansion of existing markets and/or the creation of new ones for the export of specified services or locally produced goods are tax deductible as an expense at 150% of the actual outlay. Tax-deductible promotional expenses are defined as those expenses incurred in respect of specified services or goods produced in Trinidad and Tobago. This includes such items as advertising in foreign markets and participation in trade fairs and missions.

Scholarship allowance
Companies can deduct the actual expenses incurred in granting scholarships to nationals who are not employees, directors, or associates of directors of the company for tertiary education.

Production company allowance
An allowance equal to 150% of actual expenses incurred in respect of the company’s own audio, visual, or video productions for educational or local entertainment, or local culture, is available.

Allowances are granted in respect of each of the following activities, based on the actual expenditure incurred but not exceeding TTD 2 million in aggregate:

• Art and culture allowance.
Trinidad and Tobago

- Sportsman/sporting activity allowance.
- Audio, visual, or video production allowance.
- Promoting the fashion industry.

**Child care/Home work facility**
A deduction is allowed for the actual cost incurred in setting up a facility for dependents of employees who are minors, up to a maximum of TTD 500,000 for each facility, subject to an aggregate sum of TTD 3 million in any year.

**Wear and tear allowances**
A 130% wear and tear allowance is available for expenditure incurred in compressed natural gas (CNG) related initiatives.

A 150% wear and tear allowance is available on the expense incurred in relation to solar heaters, wind turbines, and photovoltaic systems.

**Training allowance**
A company is allowed to claim as a deduction 150% of expenses incurred in the training and retraining of the employees of the company.

**Allowance for engagement of energy service companies**
Where a company incurs expenditure in engaging another company certified as an energy service company for the purpose of carrying out an energy audit for the design of energy saving systems and the installation of the energy saving systems, the company shall be entitled to an allowance equal to 150% of the expenditure actually incurred.

Where the certified energy service company has acquired plant and machinery for the purpose of conducting energy audits, they shall be allowed an allowance of 75% of the cost incurred in the year of acquisition.

---

**Withholding taxes**
WHT is imposed at varying rates up to 15%, depending on the nature of the payment, the status of the payee, and the applicability of DT Ts. The tax treaty rate in some instances is now higher than the statutory rate. In such cases, the lower statutory rate applies. The rates below have been adjusted to reflect these reductions:

<table>

Notes

1. Individuals.
2. Corporations. The lesser rate applies to parent companies.
3. The lesser rate applies to companies, other than investment companies, that control at least 10% of the voting power.
4. The rate is 10% of the gross amount if interest is paid to a resident of France; it is 0% if the interest is paid to the French government or to any agency or instrumentality of the French government.
5. The rate is 10% of the gross amount if the interest is paid to a bank that is a resident of Germany, 0% where interest is paid to certain stated governmental institutions, and 15% of the gross amount in all other cases.
6. The rate is 10% of the gross amount if the interest is paid to a bank that is a resident of Sweden, 0% where interest is paid to certain specified governmental institutions, and 15% of the gross amount in all other cases.
7. The rate is 15% of the gross amount if the interest is paid to a bank or financial institution in the United States (US) that does not have a PE in Trinidad and Tobago, 0% where the interest is paid to the US government or to any agency or instrumentality wholly owned by the US government, and 20% of the gross amount in all other cases.
8. The rate applies to patent royalties.
9. The rate applies to copyright royalties and similar payments.
10. The rate applies to royalties paid in respect of the operations of mines or quarries or of the extraction or removal of natural resources.

Tax administration

Taxable period
The tax year is the calendar year. Companies are assessed by reference to their accounting period, which for tax purposes cannot exceed 12 months other than in the year of cessation of the business.

Tax returns
The taxpayer is required to file a tax return with the BIR by 30 April following the end of the fiscal period. An automatic six-month grace period is allowed, following which a penalty is imposed of TTD 1,000 for every six months or part thereof that the return remains unfiled.

Payment of tax
Corporation tax, business levy, and green fund levy are payable quarterly in advance on 31 March, 30 June, 30 September, and 31 December. Any balance of tax due is payable on or before 30 April of the following year. Instalments of corporation tax are based on an estimate of the current year’s liability or on the actual chargeable profits for the previous year, whichever is greater. If the current year’s estimate is lower, the company may apply to the BIR to reduce its quarterly instalment. The levy liabilities are based on the actual receipts for the quarter.

Tax audit process
Tax audits are conducted by the BIR. There is no specific timeframe to conduct an audit, but, generally, companies are selected for varying reasons, including where large refunds are claimed. The BIR usually notifies the company of the intended audit and requests that the books and records be made available for inspection. An assessment is generally raised after the audit.
Statute of limitations
A company carrying on business in Trinidad and Tobago is required to keep proper accounts and records and is required to retain these accounts for a period of at least six years after the completion of the transactions, acts, or operations to which they relate or three years after the filing of its return (whichever is later).

Topics of focus for tax authorities
The following issues are currently the focus of the tax authorities:

- Transfer pricing.
- CARICOM tax planning structures.
- Management and other fees paid to non-resident persons.

Other issues
US Foreign Account Tax Compliance Act (FATCA)
Trinidad and Tobago is a signatory to FATCA and is due to commence compliance in 2016.
Significant developments

The significant changes indicated in Tunisia’s 2016 finance law are as follows:

- Companies incorporated during fiscal year (FY) 2016 that realise a turnover of less than the following amounts are exempt from corporate tax for three years:
  - 600,000 Tunisian dinars (TND) for primary activities.
  - TND 300,000 for services.
- Non-resident companies considered as having a permanent establishment (PE) that does not register with the tax administration are subject to a discharge withholding tax (WHT) at the rate of 15%.

Taxes on corporate income

Tunisian-resident companies are subject to corporate tax in Tunisia on the basis of profits generated from PEs located in Tunisia and those attributable to Tunisia by virtue of a double tax treaty (DTT). Non-Tunisian-resident companies are subject to corporate tax on the basis of their Tunisian-sourced income.

PEs of non-Tunisian-resident companies are subject to corporate tax in the same way and under the same conditions as Tunisian-resident companies. However, certain particularities, related mainly to deductions, exist (see the Branch income section).

Corporate tax is also due by non-resident, non-PE companies on Tunisian-sourced income through WHTs.

Corporate tax is broadly levied on the total net income resulting from the statutory financial statements of the company, duly adjusted according to the specific tax rules.

Positive/negative items of income are taxed/deducted based on the accrual basis. Income items accruing in a tax period where the above principle is not met are not allowed for tax deduction nor taxed in that tax period. Tax deduction/taxation is correspondingly deferred to the future tax periods where the principle will be met.

Income items have to be certain in their occurrence and objectively determined or determinable in their amount.

Corporate tax rates

The general corporate tax rate is 25%. However, specific rates are foreseen for specific sectors of activity. Indeed, corporate tax is due at the rate of:

- 10% for:
  - companies carrying out craft activities, agricultural and fishing activities, and fitting out fishing boats
• trading groups of retail businesses organised as service cooperatives, governed by
  the general cooperation legislation
• service cooperatives formed between producers for the wholesale of their
  production
• consumer cooperatives governed by the general cooperation legislation, and
• wholly exporting companies created as of 1 January 2013 that entered into
  production no later than December 2014.
• 35% for:
  • certain domestic financial institutions
  • offshore financial institutions governed by the code related to financial services
    destined to non-residents, and this only for the benefits derived from services
    provided to non-resident persons
  • investment companies
  • insurance and reinsurance companies
  • debt collection companies
  • telecommunication companies
  • companies rendering services to companies operating in the oil and gas field
  • companies operating in the production and the transport of hydrocarbons and
    governed by particular conventions, as well as companies operating in the transfer
    of hydrocarbons via pipeline, and
  • companies operating in the oil refining sector and the wholesale of hydrocarbon
    products.

**Minimum corporate tax**
A minimum corporate tax is due at the rate of 0.2% of the local turnover, including
value-added tax (VAT), in case:

• the company realises losses or
• the corporate tax due at the rate of 25% or 35% is less than the minimum corporate
tax of 0.2% of the local turnover, including VAT.

However, the minimum corporate tax is reduced to 0.1% of the turnover of companies
subject to corporate tax at the rate of 10% (e.g. exporting companies after expiry of the
ten-year tax holiday period) and companies selling products subject to the government
homologation of prices with a gross margin not exceeding 6%.

The minimum corporate tax is not due by companies benefiting from the whole
exemption of profits deriving from exploitation (e.g. companies established in the
regional development zones, companies operating in the agricultural sector) during the
period of tax holidays. These latter are fixed by decree.

The minimum corporate tax is deductible against the corporate tax due during the
following year, up to the fifth year, without resulting in a corporate tax less than the
minimum mentioned above.

**Example**
A company realises the following:

<table>
<thead>
<tr>
<th>(TND)</th>
<th>Fiscal year (N)</th>
<th>Fiscal year (N+1)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Total revenues</td>
<td>1,000,000</td>
<td>1,500,000</td>
</tr>
<tr>
<td>Losses</td>
<td>100,000</td>
<td>0</td>
</tr>
<tr>
<td>Profits</td>
<td>0</td>
<td>16,000</td>
</tr>
<tr>
<td>Corporate tax</td>
<td>1,000,000 * 0.2% = 2,000</td>
<td>16,000 * 25% = 4,000</td>
</tr>
<tr>
<td>Minimum corporate tax</td>
<td>2,000</td>
<td>1,500,000 * 0.2% = 3,000</td>
</tr>
</tbody>
</table>
**Tunisia**

<table>
<thead>
<tr>
<th>(TND)</th>
<th>Fiscal year (N)</th>
<th>Fiscal year (N+1)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Deduction of the precedent minimum corporate tax</td>
<td>-</td>
<td>1,000 (the precedent minimum corporate tax is deductible in the limit of 1,000 = 4,000 - 3,000)</td>
</tr>
<tr>
<td>Corporate tax due</td>
<td>2,000</td>
<td>3,000 (corresponding to the minimum corporate tax)</td>
</tr>
</tbody>
</table>

**Local income taxes**
For a description of local taxes, see Vocational training tax, Local authority tax (LAT), and Hotels tax in the Other taxes section.

**Corporate residence**
A company is tax resident in Tunisia if it is registered or has its effective place of management therein.

**Permanent establishment (PE)**
No definition of PE is given by the Tunisian domestic law. In practice, the Tunisian tax authorities refer to the definitions given by DTTs.

**Other taxes**

**Value-added tax (VAT)**

**VAT scope and rates**
VAT is levied under the Tunisian VAT Code and is due on all transactions taking place in Tunisia. The sale of goods is considered as taking place in Tunisia, and subject to VAT, if the goods sold are delivered in Tunisia. The sale of services is considered as taking place in Tunisia, and subject to VAT, if the services sold are exploited or used in Tunisia.

The standard rate of VAT is 18%. Lower rates of 6% and 12% apply to specifically designated operations.

Some operations, products, or services are out of the scope of VAT in Tunisia, and some others are expressly exempt from VAT.

Some goods and services may be acquired VAT free, based on a certificate delivered for the purpose by the relevant tax authorities. This exemption is granted mainly to wholly exporting companies, oil and gas companies, their contracts, and their subcontractors.

Registration for VAT purposes may be either obligatory or optional.

Voluntary registration is allowed where persons:

- carry out activities that are outside the scope of the Tunisian VAT, in which case the option has to be a full option, which means that all the activities carried out by these persons will be subject to VAT, or
- carry out operations that are exempt from VAT and that are destined for export, or supply products and services that are exempt from VAT to persons liable to VAT, in which case the option may be a partial or a full option.

**Output VAT**
Output VAT is calculated on the basis of the amount of the invoice excluding VAT.
Input VAT
Individuals and companies that are subject to VAT may deduct the input VAT incurred on the purchase of goods and services necessary to carry out activities subject to VAT.

VAT declaration
VAT is declared and paid on a monthly basis.

Refunds
If the input VAT exceeds the output VAT, the VAT credit resulting from the difference between the input VAT and the output VAT may be reimbursed on the basis of a written request made to the tax authorities.

The VAT credit is refundable if it arises from:

- exportation operations of goods and services, sales made to clients allowed to acquire goods and services VAT-free, and WHT made on the remunerations paid to companies that are neither resident nor established in Tunisia (such VAT credit is refundable if it is shown at least on one monthly tax return)
- investments destined for the carrying out of new projects as provided for in the Tunisian Incentives Investment Code (such VAT credit is refundable if it is shown on at least three successive monthly tax returns)
- suspension of activity (such VAT credit is refundable after a tax audit), or
- other operations (such VAT credit is refundable if it is shown on at least six successive monthly tax returns).

In order to benefit from the refund of VAT credits, the taxpayer has to file supporting documents, such as declarations relating to exportation of goods, documents proving that the service rendered by the Tunisian taxpayer was used or consumed outside Tunisia, authorisations to sell VAT-free, and WHT certificates.

To benefit from the refund of VAT credits, the taxpayer must already have submitted all tax returns and paid all taxes due at the time of submission of the request for the refund.

An advance payment of 15% of the VAT credit is to be paid to the taxpayer as soon as the taxpayer presents the request for refund if the VAT credit arises from operations other than export, suspension of activity, and operations of companies that are neither resident nor established in Tunisia. This rate is to be increased to 50% if the taxpayer is a company of which the financial statements are subject to legal audit, and to 100% if the VAT credit is originated from exports.

Time limits
The taxpayer may claim the VAT credit within three years starting from the date from which the VAT credit becomes refundable.

Customs duties/Import tariffs
Import VAT
Importation of goods and services are subject to import VAT unless:

- the imported good is expressly exempt, such as for:
  - fresh milk, uncondensed and unsweetened, whether skimmed or full-fat
  - milk flour
  - devices intended for use by physically disabled persons
  - pure-bred breeding animals
  - equipment with nothing similar manufactured locally, expressly designated, or
  - boats destined to maritime navigation and fishing, and other pleasure boats, or
  - the importer benefits from the acquisition of goods necessary to its activity VAT-free (e.g. oil and gas companies).
Tunisia

Customs duties
Customs duties are due on importations other than those made from the European Union (EU).

Some equipment expressly designated by the Tunisian domestic law is exempt from customs duties, whether imported from EU countries or not.

Customs duties are not due in cases where the importer is expressly exempt, even if the goods are imported from outside the European Union.

For temporary importation of equipment, the customs duties due are to be calculated in proportion to the period spent in Tunisia. 1/60 of the total customs duties are due per month spent in Tunisia.

Excise taxes
There are no provisions for excise taxes in Tunisia.

Property taxes
A real estate tax (RET) is calculated by the relevant municipalities and is notified annually to the taxpayers at the beginning of the civil year.

For companies subject to the payment of the local authority tax (LAT) (see below) and in case the LAT paid over the year is less than the RET notified by the municipalities, then the differential is due and is payable as complementary LAT. In other words, the RET constitutes a minimum of due LAT per year.

Transfer taxes
The registration of some operations is compulsory. In these cases, the registration fees are expressly determined by the Registration and Stamp Fees Code.

Registration remains optional for certain operations. In case of optional registration, the registration fees due to be paid are equal to TND 20 per page and per copy.

In case of compulsory registration, the fees due depend on the nature of the transaction and the goods involved.

Some transactions are subject to proportional registration fees, for example:

- 5% on the transfer of immovable properties. However, this rate is reduced to 3% for the acquisition of social housing from real estate developers for the portion exceeding TND 150,000.
- 2.5% for the transfer of goodwill (fonds de commerce).

Transactions that are not subject to proportional registration fees, as well as transactions for which registration is optional, are subject to insignificant fixed registration fees (TND 20 per page).

Stamp duties
Stamp duties are due, in general, on certain contracts expressly designated, as well as invoices, unless the customer is expressly exempt.

In general, stamp duties range from TND 0.5 for invoices, to TND 2 per page for contracts, to TND 60 for passports.

Certain documents are expressly exempt from stamp duties, mainly judgments, checks, etc.
Payroll taxes
There are no payroll taxes applicable in Tunisia other than those mentioned below.

Social security contributions
The Tunisian social security system is financed by contributions from both employers (16.57%, reduced to 0.5% for wholly exporting companies) and employees (9.18%) based on salaries. Employers collect and pay the social security contributions from each wage-earner.

Contributions for Accident and Professional Insurance are collected in the same manner.

Social logging tax
Employers established in Tunisia, regardless of being liable or not to income tax, are subject to a social logging tax, calculated at 1% of the gross amount of salaries paid to its employees, including benefits in kind.

The social logging tax is filed on the monthly tax return through which VAT and other direct taxes, except corporate tax, are filed.

This tax is payable monthly before the 28th day of the following month.

Vocational training tax
Entities subject to corporate tax are subject to vocational training tax, calculated at 2% of the gross amount of salaries paid to its employees, including benefits in kind. The rate of this tax is 1% for industrial companies.

This tax is payable monthly before the 28th day of the following month.

Local authority tax (LAT)
LAT is payable by entities subject to corporate tax, except entities operating in the tourism sector. The tourism sector is defined as accommodation, entertainment, tourist transportation, thermals, congressional tourism, companies managing hotels and entertainment centres, and travel agencies.

If a company is engaged in several activities, some of which are subject to LAT and the remaining are not subject to LAT, the taxable base to be considered is constituted only by the turnover of the activities that are subject to LAT.

The LAT is paid to the local authority at the rate of:

- 0.2% of the total turnover of the entity, with a minimum calculated on the basis of the number of square metres of construction used by the entity.
- 0.1% of the turnover deriving from exportation as defined by the legislation in force.

LAT is payable monthly before the 28th day of each month.

Hotels tax
The hotels tax is due by entities that work with tourists; provide accommodation, food, and beverages; or organise leisure activities for clients. The tax is calculated at 2% of the gross turnover generated from the tourism and relating activities.

This tax is payable monthly before the 28th day of the following month.

Tourism Sector Development Fund (FDCST) tax
The FDCST tax is a tax that is paid by entities operating in the tourism sector. The tax is calculated at 1% of the turnover, excluding VAT, generated from tourism and relating activities.
**Branch income**

The income attributable to a PE corresponds to:

- the revenues generated directly by the PE further to the exercise of its activity
- the revenues corresponding to works carried out by it, even if invoiced by the head office, and
- the revenues that would have been realised by an independent company carrying out the same business, in case the activity of the PE is provided for free.

The following charges are deductible for the purpose of the determination of the taxable results of a PE:

- All the charges incurred directly by this PE and necessary for its proper functioning. These charges have to be supported by proper documentation.
- Direct charges incurred by the head office exclusively for the PE and supported by proper documentation.
- A proportion of the indirect charges (real central administration costs) incurred by the head office. The proportion admitted for deduction is most often calculated on the basis of the turnover of the Tunisian branch against the global turnover of the head office. The deduction is limited to 10% of the Tunisian turnover in case the head office is resident of a state that did not conclude a DTT with Tunisia.

**Income determination**

**Inventory valuation**

Inventory is valued at cost.

**Capital gains**

According to the provisions of article 11 of the Income and Corporate Tax Code, “the net income of a company is determined as the result of all the operations undertaken by the company, including mainly the transfer of assets…” Consequently, capital gains, if any, arising from the transfer of assets will be considered as taxable income and will be subject to corporate tax.

Capital gains are calculated as the difference between the sale price, which is supposed to be equal to the fair market value, and the net book value.

In the particular case of goodwill (fonds de commerce) generated internally, capital gains will be equal to the total sale price, as goodwill, other than derived from acquisitions, has no value on the books of the company.

All tangible and intangible transaction assets have to be valued at their fair market value.

The goodwill (fonds de commerce) generated internally, even if not booked as an asset of the company, also has to be valued at fair market value.

**Particular case of capital gains resulting from mergers**

Capital gains arising from the transfer of assets, other than inventories, on the occasion of a merger operation are deductible from the taxable income of the merged company and are to be added back to the taxable income of the absorbing company at up to 50% of their amount, spread out over five years.

**Dividend income**

Dividends distributed by Tunisian-resident companies to non-resident, non-establishment companies, to non-resident individuals, and to resident individuals are
subject to corporate tax paid through a discharging WHT at the rate of 5% of its total amount.

Dividends distributed by non-resident companies are subject to tax in Tunisia, unless otherwise provided for by the DTTs concluded by Tunisia.

**Interest income**
Interest income arising from Tunisia or outside is part of the taxable results of the company, unless expressly exempt by the law (e.g., interests on deposits in foreign currencies).

**Royalty income**
Royalty income, except that derived from exports, is part of the taxable results of the company.

**Foreign income**
Foreign income derived from services that are realised outside Tunisia are part of the taxable income (see the Tax credits and incentives section).

---

**Deductions**

**Depreciation**
Depreciation expenses of fixed assets that are owned by the company and within the limit of the depreciation expense calculated according to the straight-line method are deductible for the purpose of determination of taxable income at a maximum depreciation rate fixed by decree.

Buildings may be depreciated according to the accounting legislation. However, the tax deductible depreciation expense must not exceed the depreciation expense calculated at a maximum depreciation rate of 5%, according to the straight-line method. Extra depreciation expenses are to be added back to the taxable base subject to corporate tax.

Equipment and machinery may be depreciated according to the accounting legislation. However, the tax deductible depreciation expense must not exceed the depreciation expense calculated at a maximum depreciation rate of 15%, according to the straight-line method. Extra depreciation expenses are to be added back to the taxable base subject to corporate tax.

The equipment and machinery depreciation rate may be increased by 50% if the equipment is used at least 16 hours a day, or doubled if used 24 hours a day, but the tax deductible depreciation expense must not exceed the depreciation expense calculated at a maximum depreciation rate of 15%, according to the straight-line method, multiplied by 1.5 or by 2, depending on whether the equipment will be used 16 or 24 hours a day.

Depreciation expenses of assets exploited under leasing contracts are also deductible for the purpose of determination of taxable income. In fact, even if assets exploited under leasing contracts are not owned by the company, they are booked as assets in the balance sheet and depreciated accordingly over a minimum period fixed by decree, as follows:

<table>
<thead>
<tr>
<th>Asset exploited under leasing contracts</th>
<th>Minimum period (years)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Constructions</td>
<td>7</td>
</tr>
<tr>
<td>Machinery and equipment</td>

</tr>
<tr>
<td>Transportation equipment</td>
<td>3</td>
</tr>
</tbody>
</table>
Goodwill

Goodwill (fonds de commerce) amortisation expenses are not tax deductible for the purpose of the determination of taxable income.

Start-up expenses

The maximum amortisation expense allowed for deduction is equal to 100% of the start-up expenses.

Interest expenses

Interest expenses (commissions, bank charges, interest loans, etc.) relating to loans contracted by the company and necessary for its proper functioning are tax deductible.

Interest expenses on shareholders current account are tax deductible within the limit of the maximum rate of 8%, provided that the capital is fully paid and the amount to be remunerated shall not exceed 50% of the capital; the rate of 8% is not applied to banks.

Bad debt

Provisions for bad debts are tax deductible within the limit of 50% of the taxable result (after deduction of non-taxable revenues and add-back of non-deductible charges).

The deduction of bad debts is subject to the presentation of a detailed statement of the concerned creditors while filing the annual corporate tax return, as well as court cases against the creditors in order to claim payment.

Provisions for bad debts that are initially constituted tax-free and become groundless during an exercise (e.g. by the covering of the debt totally or partially) are taxable.

Charitable contributions

Charitable contributions are either deductible:

• totally, in cases where they are granted to proprietary organisms, the list of which is fixed by decree, or
• within 0.2% of the revenue, in other cases.

The deduction of charitable contributions is subject to the presentation of a detailed statement of the beneficiaries while filing the annual corporate tax return of the year during which these charitable contributions were granted.

Fines and penalties

Transactions, fines, and any other penalties for violating legal provisions are not tax deductible. However, contractual penalties (for late payment for example) remain tax deductible.

Taxes

All taxes due by the company are considered as tax-deductible charges, except corporate tax.

Note that when the tax due by non-resident, non-PEs on royalties is borne by a Tunisian-established company (the debtor), then the correspondent charge is not tax deductible.

Net operating losses

Under the Tunisian tax legislation, tax losses are divided into two categories: operating losses and deferred depreciation.

Operating losses are to be carried forward for five years, starting from the year following the one during which they were booked.
Deferred depreciation is to be carried forward indefinitely, starting from the year following the one during which they were booked.

With regard to the Tunisian tax legislation, operating losses cannot be carried back.

**Payments to foreign affiliates**

See Transfer pricing in the Group taxation section.

---

**Group taxation**

Companies belonging to the same group have the possibility, if certain requirements are met, to opt for the tax consolidation regime.

The tax consolidation regime allows the determination of one taxable basis given by the algebraic sum of the taxable profits/losses determined by each of the companies participating in the scheme, with apportionment in relation to the corporate tax rate applicable to each company in comparison with the corporate tax rate applicable to the consolidating entity.

The tax consolidation regime is applicable for a minimum period of five years, renewable by tacit agreement for a five-year period each time.

The election to the tax consolidation scheme is subject to the prior authorisation of the Ministry of Finance if certain conditions are met:

- The mother company has to be listed on the Tunisian Stock Exchange. In case the mother company is not listed on the Tunisian Stock Exchange, it has to undertake to be listed by no later than the end of the year following the first year during which the tax consolidation regime comes into effect; this deadline may be extended by one additional year.
- Participations held by the mother company in the capital of the other group-companies electing to the tax consolidation regime, whether directly or indirectly, have to be equal to at least 75% of the capital of each company during the whole period of the tax consolidation scheme.
- Companies electing to the tax consolidation regime have to be resident in Tunisia.
- Companies electing to the tax consolidation regime have to be subject to corporate tax. According to the tax law in force, companies benefitting from tax holidays during a certain period of time may elect to the tax consolidation scheme even if no minimum tax is due.
- Companies electing to the tax consolidation scheme have to consider the same opening and closing dates for the fiscal years covered by the scheme.

The taxable result of each group-company participating in the tax consolidation scheme is determined according to the common law. However, and unlike the general rules applicable to the determination of the taxable result, interests generated by sums of money deposited in inter-company current accounts are not taken into consideration for the purpose of determination of the taxable base subject to corporate tax.

Deferred depreciation and operating losses generated by a group-company prior to the tax consolidation scheme entering into effect are to be carried forward at the level of the same company.

Taxable results of companies subject to the same corporate tax rate as the mother company are to be considered for their whole amount, whereas taxable results of companies subject to corporate tax rates different from the one applicable to the mother company are to be reprocessed. In fact, in this latter case, only a portion of the taxable
result is to be considered for the sake of computation of the consolidated tax. This portion is determined according to the following formula:

\[
\text{Taxable base} \times \frac{\text{corporate tax rate applicable to the company}}{\text{corporate tax rate applicable to the mother company}}
\]

Once the taxable results of the group-companies are added together, they are to be reprocessed by the mother company as follows:

- Add back provisions for bad debts booked and deducted by a group-company, before the tax consolidation scheme enters into effect, for doubtful receivables from the other group-companies.
- Add back benefits reinvested by a group-company in the capital of another group-company after tax consolidation scheme enters into effect, unless they are reinvested lately within the receiving entity itself.
- Deduct remission of debts by a group-company to the benefit of another group-company, both of them participating in the tax consolidation scheme.

Corporate tax is calculated at the rate applicable to the consolidating entity on the basis of the consolidated taxable result calculated (as outlined previously). However, a minimum corporate tax equal to 0.2% of the total gross turnover (see the Taxes on corporate income section) of the group-companies participating in the tax consolidation scheme remains due in case the taxable results show a deficit or in case the minimum corporate tax is greater than the one calculated by applying the corporate tax rate applicable to the consolidating company to the consolidated taxable profit.

All pre-payments, WHTs, instalments, and tax surpluses generated by a group-company before the election to the tax consolidation scheme are creditable against the corporate tax to be paid by the consolidation entity. The surplus, if any, remains deductible from corporate tax due in the subsequent years.

**Transfer pricing**

According to the Tunisian tax legislation, where there is evidence for the tax authorities of the existence of commercial or financial business transactions between a company and other dependent companies, which, for the determination of their value, are based on rules that differ from those governing relations between independent companies and which result in the reduction of taxable benefits, the tax department is allowed to add back to the taxable result of the invoicing company the differential between the benefits that would have been realised if the practiced prices were in line with the arm’s-length principle and those actually accounted for by the company.

The burden of proof is on the tax department.

**Thin capitalisation**

Projects may be financed by shareholders’ equity, shareholders’ loans, or external debts. Interest due on shareholders’ loans is tax deductible within the limit of an interest rate of 8%, provided that the following conditions are met:

- The capital is fully paid-up.
- The amount of the sums put at the disposal of the company must not exceed 50% of the capital.

In case shareholders’ loans exceed 50% of the share capital, then interests due in the part exceeding 50% are not tax deductible.

**Controlled foreign companies (CFCs)**

There is no provision in Tunisia for CFCs.
Tax credits and incentives

In order to harmonise investment legislation with general economic objectives, the Incentives Investment Code (IIC) has been promulgated.

The IIC provides a number of incentives applicable to all projects covered by the code and approved by the competent government institutions and specifically developed in the following sectors:

- Agriculture and fisheries.
- Manufacturing industries.
- Public works.
- Tourism.
- Handicrafts.
- Transport.
- Education and learning.
- Professional training.
- Cultural production and industries.
- Promotion of young people and children’s education.
- Healthcare.
- Environmental protection.
- Property promotion.
- Other non-financial activities and services.

The IIC foresees common and specific incentives.

The considered common incentives are detailed as follows:

- Deduction by an entity from the taxable base of profits reinvested by subscribing to initial capital or to capital increases in companies operating under the IIC, within the limit of 35% of its net taxable profits, and within the limit of the minimum corporate tax rate, which means that the corporate tax cannot be less than 20% of what it would have been without deducting the considered profits.

  The main conditions for benefiting from the aforementioned incentives are that the:
  - subscribing company keeps its accounts in accordance with Tunisian accounting standards
  - new shares must be issued for the subscribed amount
  - registered subscribed capital may not be reduced during the five years following 1 January of the year following the reinvestment, except for the purpose of absorbing losses
  - subscribing company must join to its corporate tax return a certificate proving that the capital in which they subscribed is entirely paid
  - subscribed shares must not be sold before the end of the two years following the payment of the capital, and
  - reinvested profits have to be posted in a ‘special investment reserve account’ under the liabilities in the balance sheet before the final date for filing the corporate tax return relating to the year during which the benefits were reinvested and deducted.

- Deduction from the taxable base of profits reinvested in the company itself (activities extension), provided the respect of the minimum tax rate condition of 20% and the following other conditions:
  - The reinvested profits have to be posted in a ‘special investment reserve account’ under the liabilities in the balance sheet before the final date for filing the corporate tax return relating to the year during which the benefits were reinvested and deducted.
Tunisia

- The benefits posted in the ‘special investment reserve account’ have to be incorporated/included in the capital of the company before the end of the year during which the reserve was posted/booked.
- An investment plan is to be joined to the income tax return.
- The investment must be realised before the end of the year during which the reserve was posted/booked.
- The assets acquired must not be transferred during at least two years after the date of the start of production.
- The registered capital must not be reduced during the five years following the date of the incorporation of the reinvested benefits in the capital, except for the purpose of absorbing losses.

The IIC foresees specific advantages that apply to:

- Exportation activities.
- Investments in regional development zones.
- Agricultural development.
- Environmental protection.
- Research and development (R&D) and technological development.
- Small enterprise and trade development.
- Investments of support (learning, training, etc.).

**Wholly exporting activities**
The following are considered as wholly exporting companies:

- Companies with products totally destined to be sold outside Tunisia.
- Companies providing services totally utilised/exploited outside Tunisia.
- Companies working exclusively with wholly exporting companies as defined above.
- Companies working exclusively with financial and banking institutions working mainly with non-Tunisian resident persons.
- Companies set up in the Economical Free Zones in Tunisia.

Note that wholly exporting companies may commercialise locally, during a given year, up to 30% of the turnover of the previous year without losing the status of a wholly exporting company.

Profits derived from exportation by companies that have already obtained an investment certificate from the relevant authorities (the Agency of Promotion of the Investment in the particular case of industrial companies) before 1 January 2014 and that entered into production during 2014 may benefit from the deduction of the benefits derived from exportation operations during the first decade of activity, and this starting from the first exportation operation.

In addition to the above mentioned deduction, the company may also benefit from the deduction of other profits in connection with exportation during the first decade of activity.

The concerned profits are detailed as follows:

- Investment allowances granted under the legislation of investment incentives, allowances of upgrading granted under an approved upgrade program, and allowances granted within the frame of support to the export operations.
- Capital gains derived from the sale outside Tunisia or to other wholly exporting companies of tangible assets used to carry out the exportation activity, excluding constructions, lands, and goodwill (fonds de commerce).
- Realised exchange profits in connection with the exportation activity.
- Remission of debt for the benefit of the wholly exporting companies.
However, all the other profits (financial interests, rentals, etc.) remain subject to corporate tax at the rate of 25%.

After the expiry of this period, profits derived from the main activity are to be subject to corporate tax at the rate of 10% and all other revenues will be subject to corporate tax at the rate of 25%.

Wholly exporting companies that obtained the investment certificate as of 1 January 2013 and that entered into production no later than December 2014 are subject to corporate tax at the rate of:

- 10% of the basis of the benefits derived from exportation, and
- 25% on the basis of the benefits derived from local sales as well as the other profits (see the Taxes on corporate income section concerning the minimum corporate tax).

Wholly exporting companies also benefit from:

- Exemption from VAT on purchases based on a certificate delivered for the purpose by the relevant tax authorities, to be presented by the Tunisian entity to its suppliers, and the exemption from VAT on sales based on a certificate delivered for the purpose by the relevant tax authorities, to be presented by the client to the Tunisian entity.
- Exemption from other indirect taxes, including customs duties.
- Exemption from professional training tax, registration fees, stamp duties, and social logging tax.

However, they remain subject to the payment of the following insignificant taxes and duties only:

- Taxes and duties to passenger cars.
- The single compensation tax on road transport.
- Taxes on real estate: calculated on the number of square metres of construction used by the entity.
- Taxes and duties by virtue of services rendered directly in compliance with the current legislation.
- LAT (see the Other taxes section).

**Regional development zones activities**

The IIC provides that investments in certain activities (industry, tourism, handicraft, and certain other services) carried out by entities established in regional development zones benefit from a number of tax advantages, detailed as follows:

- Deduction from the taxable profits of the entity of the profits derived from the investments in the regional development zones during a period of:
  - Five years, in case the investments are realised in the development zones enumerated in category one.
  - Ten years, in case the investments are realised in the development zones enumerated in category two.
  - Ten years, in case the investments are realised in the development zones of priority. During the second decade of activity, the deduction is reduced to 50% of the profits generated on the investments.

In addition to the above mentioned deduction, companies carrying out investment in regional development zones may also benefit from the deduction of other profits in connection with the main activity during the first decade of activity.

The concerned profits are detailed as follows:
Tunisia

- Investment allowances granted under the legislation of investment incentives, allowances of upgrading granted under an approved upgrade program, and allowances granted within the frame of support to the export operations.
- Capital gains derived from the sale of tangible assets used to carry out the exportation activity, excluding constructions, lands, and goodwill (*fonds de commerce*).
- Realised exchange profits in connection with the exportation activity.
- Remission of debt for the benefit of the wholly exporting companies.

Other benefits include:

- Deduction from the taxable profits of the revenues reinvested in the subscription to initial capital or to capital increases in these companies, up to 100% of the taxable result and without any minimum tax. However, the deduction is subject to the remaining conditions listed under the common incentives section.
- Exemption from social logging tax and vocational training tax.

**Support activities**
The supporting investments activities are defined as being the following:

- Training of children.
- Education.
- Teaching.
- Scientific research.
- Professional training.
- Cultural production and co-ordination of young people.
- Healthcare services.

The investments made by institutions for these considered activities give entitlement to the following tax incentives:

- Exemption from customs duties and taxes with a similar effect.
- Suspension of VAT and consumption duty for imported equipment with no locally manufactured equivalent that is necessary for the realisation of the investments, as well as suspension of VAT on equipment manufactured locally.

**Foreign tax credit**
In the absence of DTTs, corporate tax (or any WHT in connection with) paid outside Tunisia is not deductible from the tax due in Tunisia.

However, in the presence of DTTs, in cases where profits derived from outside Tunisia were subject to corporate tax in Tunisia, the foreign tax, if any, is deductible, but only up to the corresponding Tunisian tax on these profits.

**Withholding taxes**
The payments of certain remunerations are subject to corporate WHT in Tunisia.

The WHT is an advance payment of corporate tax and is thus deductible from the corporate tax due by the invoicing entity. To this end, the paying entity shall withhold the tax at the appropriate rate. It shall then issue a WHT certificate to the invoicing company to enable the latter to use the certificate as proof of the payment at the moment of filing its corporate tax return. The paying entity subsequently pays the withheld amount to the tax authorities.

The withheld tax is to be declared and repaid by the paying entity each month before the 28th day of the following month.
The rates of the WHT differ according to the nature of the goods/services and the rates applicable within the framework of the DTTs.

Applicable WHT rates in Tunisia are as follows:

- 15% of the gross amount of the invoices related to fees, commissions, brokerage fees, rentals, payment of non-commercial activities (non-commercial activities include especially independent scientific, literary, artistic, educational, or teaching activities, such as independent activities of physicians, dentists, lawyers, consultants, architects, engineers, accountants, etc.).

  This rate is reduced to 5% for fees (including those paid for non-commercial activities) and hotel rentals when these amounts are paid to entities subject to corporate tax and individuals who keep proper accounts in accordance with the Tunisian accounting principles.

  This rate is reduced to 2.5% for fees, commissions, rentals, and non-commercial remunerations deriving from exportation, in accordance with the legislation in force.

- 15% on performance bonus paid to distributors of goods.

- 20% on interest and director’s attendance allowance. This does not include interest on deposits and bonds in foreign currency or convertible dinars.

- 5% on bank loans extended by non-Tunisian resident banks.

- 2.5% on the sales price indicated in a real estate sale, in case the seller is an individual.

- 1.5% on payments exceeding TND 1,000 (including VAT) made for the acquisition of goods and services necessary to the activity and that are not subject to a specific WHT rate.

  This rate is reduced to 0.5% in case the remunerations are derived from exportation, in accordance with the legislation in force, or payment is made to companies subject to corporate tax at the rate of 10%.

- 15% on other payments made to non-Tunisian tax resident persons.

- Dividends distributed by Tunisian-resident companies to non-resident, non-establishment companies, to non-resident individuals, and to resident individuals are subject to corporate tax paid through a discharging WHT at the rate of 5% of its total amount.

- 25% on payments made to persons resident in tax havens.

- 25% on lottery and gambling gain.

**DTT rates**

Note that the following interest WHT rates are applicable to interest payable to non-resident, non-PE companies and financial institutions according to DTTs concluded by Tunisia.

The DTT rate is applicable in case it is lower than the domestic law, provided that the beneficiary of the payment provides the corresponding tax residency certificate. In case of failure, the domestic law will be applied.

**Notes**

1. 10% of the gross amount of the royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work. 15% of the gross amount of the royalties for cinematographic films and TV films, patents, trademarks, designs or models, plans, secret formulae, or processes; technical and economical studies; information concerning industrial, agricultural, commercial, or scientific experience; and the use of or the right to use industrial, commercial, or scientific equipment.

2. 11% of the gross amount of the royalties for the use of, or the right to use, any copyright of literary, artistic or scientific work, including cinematographic films and films for TV broadcasting, patents.
10% of the gross amount of the royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films and films, tapes, or discs for radio or television broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; the use of or the right to use, industrial, commercial, or scientific equipment; and technical and economical studies.

9. 5% of the gross amount of royalties for the right to publish any literary, artistic or scientific work, patents, trademarks, designs or models, plans, secret formulae or processes; information in respect of industrial, commercial or scientific experience; the use of or the right to use industrial, commercial or scientific equipment; and cartoons, films, and videos for TV broadcasting.

8. 15% of the gross amount of royalties for the right to publish any literary, artistic or scientific work, including cinematographic and films and tapes, or discs for radio or television broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; the use of or the right to use industrial, commercial, or scientific equipment; and technical and economical studies.

7. 15% of the gross amount of royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films and films, tapes, or discs for radio or television broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; the use of or the right to use industrial, commercial, or scientific equipment; and technical and economical studies.

6. 5% of the amount of the royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic and films and tapes, or discs for radio or television broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; the use of or the right to use industrial, commercial, or scientific equipment; and technical and economical studies.

5. 10% of the gross amount of the royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films and films, tapes, or discs for radio or television broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; the use of or the right to use industrial, commercial, or scientific equipment; and technical and economical studies.

4. 20% of the gross amount of the royalties for the use of, or the right to use, licences, cinematographic films, and films and discs for radio or television broadcasting and the use of, or the right to use, industrial, commercial, scientific equipment, or port facilities; however, since the 20% treaty rate is higher than the 15% common law rate, the latter will be applied. 15% of the gross amount of royalties for all the other cases, namely: the use of, or the right to use copyrights, patents, trademarks, designs or models, plans, secret formulae, or processes; and information concerning industrial, commercial, or scientific experience. However, royalties paid for the use of, or the right to use, copyrights of literary, dramatic, musical, or artistic work, except royalties in respect of cinematographic films and films and discs for TV broadcasting, are taxable in the state of residence and thus cannot be subject to tax nor to any WHT in connection with the state in which they arise.

3. 15% of the gross amount of royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films, patents, trademarks, designs or models, plans, secret formulae, or processes; information concerning industrial, commercial, or scientific experience; the use of, or the right to use, industrial, commercial, or scientific equipment; and technical assistance realised in the state of source.

2. 15% of the gross amount of royalties for the use of, or the right to use, licences, patents, trademarks, designs or models, plans, secret formulae, or processes; information concerning industrial, commercial, or scientific experience; the use of, or the right to use, industrial, commercial, or scientific equipment, or port facilities; however, since the 20% treaty rate is higher than the 15% common law rate, the latter will be applied. 15% of the gross amount of royalties for all the other cases, namely: the use of, or the right to use copyrights, patents, trademarks, designs or models, plans, secret formulae, or processes; and information concerning industrial, commercial, or scientific experience. However, royalties paid for the use of, or the right to use, copyrights of literary, dramatic, musical, or artistic work, except royalties in respect of cinematographic films and films and discs for TV broadcasting, are taxable in the state of residence and thus cannot be subject to tax nor to any WHT in connection with the state in which they arise.

1. 15% of the gross amount of royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films, patents, trademarks, designs or models, plans, secret formulae, or processes; information concerning industrial, commercial, or scientific experience; the use of, or the right to use, industrial, commercial, or scientific equipment, or port facilities; however, since the 20% treaty rate is higher than the 15% common law rate, the latter will be applied. 15% of the gross amount of royalties for all the other cases, namely: the use of, or the right to use copyrights, patents, trademarks, designs or models, plans, secret formulae, or processes; and information concerning industrial, commercial, or scientific experience. However, royalties paid for the use of, or the right to use, copyrights of literary, dramatic, musical, or artistic work, except royalties in respect of cinematographic films and films and discs for TV broadcasting, are taxable in the state of residence and thus cannot be subject to tax nor to any WHT in connection with the state in which they arise.

information in respect of industrial, commercial, or scientific experience; and economical and technical studies. 10% of the gross amount of the royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; and economical and technical studies. 9% of the gross amount of the royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; and economical and technical studies. 8% of the gross amount of the royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; and economical and technical studies. 7% of the gross amount of the royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; and economical and technical studies. 6% of the gross amount of the royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; and economical and technical studies. 5% of the gross amount of the royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; and economical and technical studies. 4% of the gross amount of the royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; and economical and technical studies. 3% of the gross amount of the royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; and economical and technical studies. 2% of the gross amount of the royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; and economical and technical studies. 1% of the gross amount of the royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; and economical and technical studies. 0% of the gross amount of the royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; and economical and technical studies.
plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; the use of, or the right to use, industrial, agricultural, commercial, scientific equipment, or port facilities; and technical and economical studies and technical assistance.

28. 10% of the gross amount of royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films and films, tapes, or discs for radio or television broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; the use of, or the right to use, industrial, commercial, or scientific equipment; and technical and economical studies and technical assistance in respect of the use of, or the right to use, the equipments, rights, and information mentioned above.

29. 5% of the gross amount of royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; and the use of, or the right to use, the equipments, rights, and information mentioned above.

30. Royalties are subject to tax in the state of residency of the beneficiary. However, the non-exclusive taxation right attributable to the state of residency does not prohibit the taxation of such royalties in the state in which they arise in cases where the legislation of that state allows such taxation and according to its legislation. Remunerations paid for the following are considered royalties and thus are subject to tax in the state in which they arise: the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films, patents, trademarks, designs or models, plans, secret formulae, or processes; the use of, or the right to use, industrial, commercial, or scientific experience; and the use of, or the right to use, the equipments, rights, and information mentioned above.

31. 10% of the gross amount of the royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films and films, tapes, or discs for radio or television broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; the use of, or the right to use, industrial, commercial, or scientific equipment that is not considered as an asset in the meaning of Article 6 of the present treaty.

32. 15% of the gross amount of royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films and films, tapes, or discs for radio or television broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes; the use of, or the right to use, industrial, agricultural, commercial, or scientific experience; and economical and technical studies and technical assistance.

33. 10% of the gross amount of royalties for copyrights, patents, trademarks, designs or models, plans, secret formulae, or processes; studies and information in respect of industrial, commercial, or scientific experience; the use of, or the right to use, industrial, commercial, or scientific equipment; and cinematographic films and video tapes for TV broadcasting.

34. 5% of the gross amount of royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films and films, tapes, or discs for radio or television broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; and the use of, or the right to use, industrial, agricultural, commercial, or scientific equipment; except chartering of ships and aircraft used for the international transport.

35. 5% of the gross amount of royalties for remunerations paid for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films and films, tapes, or discs for radio or television broadcasting, patents, trademarks, software, designs or models, plans, secret formulae, or processes.

36. 5% of the amount of the royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, excluding cinematographic and films for TV and radio broadcasting. 15% of the amount of the royalties for the use of, or the right to use, cinematographic films, films for TV and radio broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; the use of, or the right to use, industrial, commercial, or scientific equipment; and the use of, or the right to use, industrial, commercial, or scientific equipment.

37. 10% of the gross amount of royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience, and technical and economical studies and technical assistance related to these information; and the use of, or the right to use, industrial, commercial, or scientific equipment.

38. 18% of the gross amount of royalties for the use of, or the right to use patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; and the use of, or the right to use, industrial, commercial, or scientific equipment; however, since the 18% treaty rate is higher than the 15% common law rate, the latter will be applied.

39. 10% of the gross amount of royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films and films, tapes, or discs for radio or television broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; and the use of, or the right to use, industrial, commercial, or scientific equipment.

40. 7.5% of the gross amount of royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films and films, tapes, or discs for radio or television broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; and the use, of or the right to use, industrial, commercial, or scientific equipment.

41. 15% of the gross amount of royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films and films, tapes, or discs for radio or television broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; the use of,
or the right to use, industrial, agricultural, commercial, or scientific equipment; and technical and economical studies.

42. Royalties are only taxable in the contracting state in which they arise in cases where the legislation of that state allows such taxation and according to its legislation for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films and films for TV broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; the use of, or the right to use, industrial, commercial, scientific equipment or port facilities; and economical and technical studies and economical assistance.

43. 15% of the gross amount of the royalties for copyright of literary, artistic, or scientific work, including cinematographic films and films, tapes or discs for radio or television broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience and profits from any ownership, depending from the productivity, the use, or the alienation of that ownership. 10% of the gross amount of the royalties for the use of, or the right to use, industrial, commercial, or scientific equipment other than vessels and aircraft used for international transport, and technical studies paid from public funds or political subdivisions or local authorities or technical assistance for the use of the ownership of the rights above mentioned, in case the technical assistance is realised in the state of source.

44. 7.5% of the gross amount of royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films and films, tapes, or discs for radio or television broadcasting, patents, trademarks, designs or models, plans, secret formulae, or processes, and the use of, or the right to use, industrial, commercial, or scientific equipment and port facilities, except remunerations paid for vessels and aircraft used in international transport.

45. These rates are applicable, in certain cases, to the loans extended by the Central Bank.

46. 5% for loans extended by banks and not represented by bonds or other debt securities.

47. 0% for loans granted by financial institutions, the capital of which is held up to 100% by the Chinese state.

48. 0% for loans granted by financial institutions, the capital of which is held at least up to 50% by the Ethiopian state, its political subdivisions, or local authorities.

49. 0% for loans granted by the Deutsche Bundesbank, Kreditanstalt für Wiederaufbau, and the Deutsche Gesellschaft für wirtschaftliche Zusammenarbeit GmbH. (Entwicklungsgesells.)

50. 0% for loans granted by financial institutions, the capital of which is held up to 100% by the state of Iran.

51. 0% for loans granted by financial institutions, the capital of which is totally held by the Italian state or its local authorities.

52. 0% for loans granted by financial institutions, the capital of which is held up to 100% by the state of Kuwait.

53. 0% for loans granted by financial institutions, the capital of which is totally held by the state of Lebanon, its political subdivisions, or local authorities.

54. 0% for loans granted by companies, the capital of which is totally held by the state of Lebanon, its political subdivisions, or local authorities.

55. 7.5% for loans guaranteed or granted by financial institutions and the reimbursement period of which exceeds five years.

56. 7.5% as long as the tax legislation of the Netherlands provides that interest paid by a company resident in the Netherlands to a company resident in Tunisia is exempt from any WHT.

57. 0% for loans, the reimbursement period of which exceeds seven years.

58. 5% for loans, the reimbursement period of which exceeds seven years, and 10% in the other cases.

59. 2.5% for bank loans, as long as the Tunisian domestic tax legislation provides that interest paid on bank loans extended by non-established banks is subject to a 2.5% WHT rate, and 5% for the above mentioned bank loans in cases where an increase of the WHT rate is applicable to interest paid to non-established banks.

60. 0% for loans granted by financial institutions, provided that the reimbursement period exceeds seven years.

61. 5% of the gross amount of royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematography and films for TV and radio broadcasting; the use of, or the right to use, patents, trademarks, designs or models, plans, secret formulae, or processes; information in respect of industrial, commercial, or scientific experience; and the use of, or the right to use, industrial, commercial, or scientific equipment.

62. According to the DTIs concluded by Tunisia, dividends are subject to the listed WHT tax rates, knowing that the rate provide by the domestic law is fixed at 5%.

63. The lower rate applies in cases where the beneficiary has equity participation of 25%.

64. The lower rate applies in cases where the beneficiary has equity participation of 10%.

65. The lower rate applies in cases where the beneficiary has equity participation of 50%.

66. The lower rate applies in cases where the beneficiary has equity participation of 25%, except for investment companies and real estate investment companies.

67. Certain DTIs foresee that in case companies resident of a contracting state have a PE in the other contracting state (state of source), the latter may levy WHT on profits made by the PE as a taxation on dividend.
**Tax administration**

**Taxable period**
Under Tunisian law, both the accounting year and tax year follow the calendar year. However, derogation is possible if prior authorisation is obtained from the Ministry of Finance.

**Tax returns**
Tunisian-established companies have the obligation to file monthly tax returns, an annual corporate tax return, and an annual Employer’s Declaration.

Monthly tax returns include WHTs, VAT, LAT, social logging tax, and professional training tax, and must be filed each month before the 28th day of the following month. Filing and payment take place simultaneously.

The annual tax return is the corporate tax return, which must be filed before 25 March of the following year. The deadline for filing the corporate tax return is moved to 25 June for public liability companies and private liability companies subject to statutory audit. Filing and payment take place simultaneously.

The Employer’s Declaration has to be filed each year before 28/29 February of the following year. This declaration must list all fees and salaries paid or incurred, even if not yet paid, to service suppliers and employees during the concerned year. No payment is due in connection with this filing, but fees not listed on this declaration are not recognised as deductible costs.

**Payment of tax**
Corporate tax is paid through:

- WHTs applied on certain payments and operated by the debtor on behalf of the taxpaying entity.
- Beginning from the second year of activity, three provisional instalments, each calculated at 30% of the total corporate tax due for the previous year. The instalments fall due on 28 June, 28 September, and 28 December.
- An annual tax return.

Both WHTs and provisional payments of income tax are creditable against the annual/final tax due.

Filing and payment take place simultaneously.

The most common process is the filing in person at the tax office. In this case, payment is made in cash or by check.

However, companies with turnover exceeding TND 1 million are constrained to file their tax returns electronically. Electronic filing remains optional for other companies. In this case, payment is made through bank transfer.

**Tax audit process**
Tax controllers may proceed either with a preliminary tax audit or an in-depth tax audit.

**Preliminary tax audit**
In case of a preliminary tax audit, the taxpayer under control is not notified prior to starting the audit. However, the tax authority has the obligation to send an information request concerning the tax findings. The taxpayer has to reply within 20 days.
The tax audit is conducted in the offices of the tax administration and deals with the documents made available to them (tax returns, registered contracts, etc.). However, preliminary tax audits can never deal with the taxpayer’s accounts.

The results of the tax control are notified in writing to the taxpayer within a tax audit report, whereby the outcome of the audit activity must be detailed and the findings, if any, must be illustrated and motivated. The tax report is to be notified to the taxpayer within 90 days from the expiry date to reply to the information request (see above).

Indeed, the taxpayer has the possibility to answer to the tax audit report within 45 days starting from the day following the date of receipt of the report. Failing that, the taxpayer will receive a tax assessment notice that brings forth requests for payment of taxes and penalties to the taxpayer. In cases where the taxpayer answers to the notification of the results of the tax audit and brings additional explanations, clarifications, and documents to the tax auditors, they will be constrained to examine the evidence provided by the taxpayer and answer to the taxpayer’s opposition within six months from the day following the notification date.

Once the taxpayer receives the answer of the tax authorities to the taxpayer’s opposition, the taxpayer will have the possibility to file a second opposition within 15 days from the day after the notification day in cases where the taxpayer still disagrees with some or all the points raised by the tax controllers.

Once the second answer is filed by the taxpayer, there will be no other written correspondences with the tax auditors.

In cases where the tax administration agrees to the clarifications, explanations, arguments, and documents provided by the taxpayer, then the tax audit will be closed. However, in cases where the tax administration still disagrees with some or all the evidence provided by the taxpayer, then the taxpayer will receive a tax assessment notice and will have to pay the notified taxes. The tax assessment notice has to take into consideration the taxpayer’s observations enclosed in the first and the second opposition filed by the taxpayer.

Further to the receipt of the tax assessment notice, the taxpayer may make an appeal to the relevant court.

A preliminary tax audit does not prevent an in-depth tax audit of the same period and the same taxes.

**In-depth tax audit**

In case of an in-depth tax audit, the taxpayer under control is notified 15 days prior to starting the audit. This period may be extended to a maximum period of 60 days.

In-depth tax audits deal with the accounts of the taxpayer under control (in cases where the taxpayer has the obligation to maintain accounts according to the accounting legislation into force) as well as any other evidence (presumptions, registered contracts, etc.).

In-depth tax audits take place, as a general rule, on the business premises of the taxpayer. However, and upon the request of the taxpayer or the tax controllers, the tax audit can be conducted in the tax authorities’ office. In this case, books, records, and any other documentation deemed necessary to the tax auditors to complete the audit have to be moved to the tax auditors’ office.

In-depth tax audits last for:
Tunisia

- six months, in case the taxpayer under control is constrained by the law to maintain accounts, and
- one year, in the other cases.

At the end of this period, the tax audit must come to an end and the tax auditors must draw up a tax audit report to be sent to the taxpayer, whereby the outcome of the audit activity must be detailed and the findings, if any, must be illustrated and motivated.

Once the tax audit report is sent to the taxpayer, the procedure of response and deadlines are the same as for preliminary tax audits.

**Statute of limitations**
The period open for tax audit, unless it was subject to a previous in-depth tax audit, is:

- Four years in case of partial omission; an omission is considered as partial in cases where the tax return is filed but the taxable base is not determined properly or in cases where the WHT rates applied to payments made to third parties are lower than the rates provided by the law.
- Ten years in case of total omission; an omission is considered as total in cases where the tax return is not filed at the date when the company becomes under tax control.

The four-year period and the ten-year period begin to run from 1 January (in cases where the fiscal year coincides with the calendar year) of the year following the completion of sales, earnings, receipt, or disbursement of any sum to be taxed.

**Topics of focus for tax authorities**
The tax authorities primarily focus on extraordinary transactions (e.g. mergers, restructuring, suspension of business). After introducing a transfer pricing provision as a part of the 2009 law, the tax authorities are increasing their attention towards transactions concluded between affiliated companies.

**Significant developments**

### New Action Plan

Action Plan of 2016 was published by the Turkish government. According to the new Action Plan, the following changes were expected to be made by the end of 2016:

- The New Income Tax Law, which combines the Corporate Income Tax Law and the Income Tax Law, will become effective.
- The Tax Procedure Law will be revised.
- New tax incentives related to energy efficiency will be implemented.
- Banking and insurance transactions tax (BITT) exemption will apply to loans granted for the purpose of funding machinery and equipment investments of Turkish companies engaged in the manufacturing industry.

The below developments have been made within the scope of this Action Plan since the beginning of 2016.

- The New Income Tax Law was proposed by the government to the Parliament on 5 January 2016. The Draft Law is expected to be finalised and published by the end of 2016.
- The new regulation that has been published in the Official Gazette dated 1 January 2016 introduced that the BITT exemption applies to loans granted for the purpose of funding machinery and equipment investments of Turkish companies engaged in the manufacturing industry.

### Research and development (R&D) Reform Package benefits

On 1 March 2016, a new R&D Law No. 6676 was enacted to broaden current incentive mechanisms for R&D and innovation activities. The following supports and incentives are introduced by the new law:

- Design activities (and 'design centre' definition) are included in the scope of incentives and supports.
- Incentives for R&D and design centres will be enhanced.
- The minimum number of full-time R&D personnel required to establish an R&D centre will be reduced (to be determined by the Council of Ministers) with respect to certain sectors.
- Additional incentives for R&D personnel, who graduated from basic sciences and work in R&D centres, will be provided.
- Incentives to strengthen industry-industry and university-industry cooperation will be extended.
- To shorten the project duration and minimise the project costs, additional customs duty exemption is made available for the products purchased from abroad.
- Thematic technology development zones for strategic sectors will be established.
- The time spent out of technology development zones and R&D and design centres will also be included in the scope of incentives and supports.
Deemed-interest deduction on cash injection as capital

On 7 April 2015, a new tax incentive has been introduced to the Corporate Tax Law (CTL) where a deemed-interest deduction up to the rate of 50% on cash injection as capital is allowed for tax purposes. Subsequently, by virtue of Council of Ministers Decree no: 2015/7910 (Decree’) dated 30 June 2015, such rate has been re-determined between 0% and 75% for various situations.

Taxes on corporate income

Corporations are liable for corporate income tax (CIT) at a rate of 20% on net profits generated, as adjusted for exemptions and deductions and including prior-year losses carried forward, to a limited extent.

According to Turkish tax legislation, income taxation differs significantly based on the taxpayer’s place of residence. Resident entities are subject to tax on their worldwide income, whereas non-resident entities are taxed solely on the income derived from activities in Turkey.

Local income taxes

There are no provincial or municipal taxes on corporate income in Turkey.

Corporate residence

If both the legal and the business headquarters of a company are located outside Turkey, the company is regarded as a non-resident entity for Turkish tax purposes. If one of these headquarters is located within Turkey, the company is regarded as a resident entity for Turkish tax purposes.

Note that there is no distinction between CIT and value-added tax (VAT) registration in Turkey. Therefore, corporations or permanent establishments (PEs) are liable for all taxes (e.g. CIT, VAT, withholding tax [WHT], stamp tax) once they are registered for tax purposes in Turkey.

Permanent establishment (PE)

Unlike the provisions of the Organisation for Economic Co-operation and Development (OECD) Model Tax Convention on Income and on Capital, there is no minimum period of presence in Turkey before a presence is regarded under the Turkish tax legislation as a PE. In this regard, we believe that the PE evaluation should be made for each case depending on the merit of the cases, both from a local legislation perspective and from a treaty (if applicable) perspective.

Other taxes

Value-added tax (VAT)

Deliveries of goods and services are subject to VAT at rates varying from 1% to 18%. The general rate is 18%.

VAT payable on local purchases and on imports is regarded as ‘input VAT’, and VAT calculated and collected on sales is considered ‘output VAT’. Input VAT is offset against output VAT in the VAT return filed at the related tax office. If output VAT is in excess of input VAT, the excess amount is paid to the related tax office. Conversely, if input VAT exceeds output VAT, the balance is carried forward to the following months to be offset against future output VAT. With the exception of a few situations, such as exportation and sales to an investment incentive holder, there is no cash refund to recover excess input VAT.
Turkey

Turkish VAT principles contain a ‘reverse-charge VAT mechanism’, which requires the calculation of VAT by resident entities on payments to persons in foreign countries. Under this mechanism, VAT is calculated and paid to the related tax office by the resident entity. The resident entity treats this VAT as input VAT and offsets it in the same month. This VAT does not create a tax burden for the resident or non-resident entity, except for its cash flow effect on the former if there is insufficient output VAT to offset the input VAT.

VAT is also collected at the point of import. The VAT rate is the same rate as the one that is applied for transactions in the country of origin. The base for VAT is the value of the goods for customs tax purposes plus any kind of tax payable at the point of import and all the expenses incurred until the single administrative document is registered.

Reduced rates
For the deliveries and services mentioned in List No. I (e.g. agricultural products such as raw cotton, dried hazelnuts, supply and leasing of goods within the scope of the Finance Leasing Law), the reduced rate is 1%.

For the deliveries and services mentioned in List No. II (e.g. basic food stuffs, textiles, books and similar publications), the reduced rate is 8%.

Foreign trade: imports and exports
Importation of goods and services is a taxable transaction, whether or not the importation is made for business purposes. Export transactions are exempt from VAT, and credit and refund is available for input VAT for the export goods.

Importation of goods and services
For VAT purposes, any importation of goods or services into Turkey is a taxable transaction, regardless of the status of the importer or the nature of the transaction. To equalise the tax burden on importation and domestic supply of goods and services, VAT is levied only on the importation of goods and services that are liable to tax within Turkey. Accordingly, any transaction exempt in Turkey may also be exempt on import. The VAT on importation is imposed at the same rates applicable to the domestic supply of goods and services. In the case of importation, the taxable event occurs at the time of actual importation. Importation of machinery and equipment under an investment incentive certificate (IIC) is exempt from VAT.

Banking and insurance transactions tax (BITT)
The transactions being performed by licensed banks and insurance companies are generally exempt from VAT but are subject to BITT at a rate of 5% in general (although some transactions are subject to 1% or 0% BITT), which is due on the gains of such corporations from their transactions.

The purchase of goods and services by banks and insurance companies are subject to VAT, but this is considered an expense or cost item. Therefore, it is not recoverable (i.e. for VAT purposes by offsetting against the output VAT) in the hands of these corporations.

Special consumption tax
There are four main product groups that are subject to special consumption tax at different tax rates, depending on the GTIP numbers (tariff numbers):

- Petroleum products, natural gas, lubricating oil, solvents, and derivatives of solvents.
- Automobiles and other vehicles, motorcycles, planes, helicopters, yachts.
- Tobacco and tobacco products, alcoholic beverages.
- Luxury products.
Unlike VAT, which is applied on each delivery, special consumption tax is charged only once (except for some activities, such as production).

**Customs and foreign trade**

Following the changes in Turkish economic policy in the 1980s, there has been rapid growth in the foreign trade volume of Turkey.

Turkey is a member of the World Trade Organization (WTO) and World Customs Organization (WCO). Turkey signed a 'Customs Union Agreement' with the European Union (EU) on 1 January 1996 and has amended its customs code and legislation in line with those of the EU customs code.

According to the Customs Union Agreement, with the exception of certain goods (e.g. agricultural products), no customs tax is incurred on trade between Turkey and the European Union as long as the goods are imported to Turkey with an A.TR movement certificate proving that the goods are in free circulation in the European Union.

In order to harmonise its foreign trade, Turkey has also signed several Free Trade Agreements (FTAs) with the trade partners of the European Union.

The Turkish Customs Code is very similar to that of the EU, and its aim is to harmonise the customs practices of Turkey with EU customs practices.

The Turkish Customs Code defines the 'Turkish Customs Territory' as the territory of the Republic of Turkey including the territorial waters, the inland maritime zone, and the airspace of Turkey.

The Turkish Customs Code has also brought into force the customs regimes with economic impact that have been in use in the EU countries for a long time. The import taxes, VAT, other taxes, and funds are collected at the time of importation. The main tax collected at customs is the import tax. The import tax differs according to the classification of the commodity and to the country of origin.

VAT is also collected at the point of import. The VAT rate is the same rate as the one that is applied for the transactions in the country of origin. The base for VAT is the value of the goods for customs tax purposes plus any kind of tax payable at the point of import and all the expenses incurred until the single administrative document is registered.

The VAT rates are 1%, 8%, and 18%, varying according to the type of goods imported.

In addition, if the import transaction is not conducted in cash, there is a special Resource Utilisation Support Fund (RUSF), which should be also paid during importation. RUSF is a special kind of fund applied to importations on a credit basis. According to the RUSF legislation, any importation conducted on credit (if the payment related to the importation is not paid before the actual importation) is subject to a special payment of 6% of the value of the goods to be imported. The important criteria are payment term and whether it is a cash payment or payment on credit.

Dumping and anti-dumping duties are collected at the point of import.

In certain cases, such as temporary importation or inward processing, the customs administration shall require a kind of guarantee letter to secure the taxes. The amount of this guarantee shall cover all the taxes payable in the case of an importation.

There is no customs tax on trade between the EU and Turkey except for certain products (e.g. agricultural products). However, it is crucial that the imported goods are imported together with an A.TR Movement Certificate proving that the goods are in free circulation.
Turkey

In the case of FTAs, the goods must be imported with a EUR.1 certificate, giving proof of their country of origin in order to benefit from the FTA.

Turkey applies the Common Customs Tariff of the EU to third countries, except for agricultural products.

Property taxes
Buildings and land owned in Turkey are subject to an annual real estate tax at different rates.

Stamp tax
Stamp tax applies to a wide range of documents, including, but not limited to, agreements, financial statements, and payrolls. Stamp tax is levied as a percentage of the value stated on the agreements at rates varying between 0.189% and 0.948%.

Salary payments are subject to stamp tax at a rate of 0.759% over the gross amounts, whereas a lump-sum stamp tax is calculated for certain types of documents, such as the printed copies of the financial statements.

Resource Utilisation Support Fund (RUSF)
According to the RUSF legislation, any importation conducted on credit (if the payment related to the importation is not made before the actual importation) is subject to a special payment of 6% of the value of the goods to be imported.

Additionally, foreign loans obtained by Turkish resident individuals or legal entities (except for banks or financial institutions) are subject to RUSF, depending on the currency denomination and the maturity. RUSF is applicable at the following rates:

- 3% over the interest amount for the Turkish lira (TRY) denominated loan, regardless of the maturity of the loan.
- Varies between 0% and 3% over the principal amount of the foreign currency denominated loan and gold-based loans, depending on the maturity.
- 0% in the case of locally obtained loans.

Note that special exemptions may apply in cases where one is investing in certain industries.

Payroll taxes
In accordance with the Turkish tax regulations, all employees working under a resident employer are included into the local payroll. The employer withholds taxes and other duties on income at source, and the employees receive the net amount after the deductions. The income tax and the stamp tax should be declared by the employers filing the withholding tax return.

The social security premium and the unemployment premiums should be declared by the employers filing the social security premium declaration on a monthly basis.

Income tax, stamp tax, social security contribution, and unemployment premiums are the legal deductions from the salary.

Social security contributions
Social security contributions for both the employer and the employee total 34.5% of an employee’s salary; 14% for the employee and 20.5% for the employer. In addition to social security payments, unemployment contribution is 3% of the salary, 1% for the employee and 2% for the employer.
The social security ceiling is determined as TRY 10,705.50 for the period 1 January 2016 through 31 December 2016.

**Branch income**

Branches are taxed solely on the income derived from activities in Turkey since they are regarded as non-resident entities for Turkish tax purposes. Branch profits are subject to Turkish CIT at the rate of 20%.

The branch profit transferred to headquarters (i.e. upstream income repatriation) is subject to dividend WHT at a rate of 15%, which might be reduced if there is a bilateral tax treaty between Turkey and the country of which the principal is a resident for income tax purposes. See the Withholding taxes section for a list of countries with which Turkey has an applicable tax treaty.

**Income determination**

**Inventory valuation**

The weighted average and first in first out (FIFO) methods are allowed for calculating the value of year-end stock or goods sold. Last in first out (LIFO) is not permitted. Stock-count deficits are recorded as disallowable expenses, whereas stock-count surpluses are treated as income at year-end for CIT purposes. Necessary VAT adjustments should also be made accordingly.

**Capital gains**

No separate rules exist with respect to capital gains taxation in Turkey. Capital gains and losses are included in the determination of taxable corporate income.

See Capital gains exemption in the Tax credits and incentives section for information about an incentive that can reduce the effective CIT rate on capital gains in certain instances.

**Dividend income**

In dividend distribution’s between Turkish resident companies, the dividend payer is exempt from WHT and the recipient is exempt from CIT.

**Interest income**

In principle, all interest income is subject to tax. Interest income on bank deposits denominated in both Turkish lira and foreign currency is subject to WHT. Interest income is recorded at gross, and any WHT incurred on this income is offset against CIT calculated.

**Foreign income**

In principle, foreign-sourced income is taxable in Turkey. However, foreign-sourced dividend income may also be subject to a participation exemption if certain conditions are fulfilled. A participation exemption for capital gains generated from a foreign subsidiary may also be available in Turkey, under certain conditions.

Other foreign-sourced income, such as royalties and interest, is fully taxable in Turkey. Partial relief from taxation is granted insofar as the foreign tax paid does not exceed the rate of tax payable for the same income in Turkey.

Although undistributed income of foreign subsidiaries should not be taxable in Turkey, controlled foreign company (CFC) rules should also be taken into consideration in this respect. See Controlled foreign companies (CFCs) in the Group taxation section for more information.
Turkey

**Deductions**

Turkish CIT legislation allows a deduction for all the “ordinary and necessary expenses paid or incurred for the generation and sustenance of income during the taxable year in carrying on any trade or business”.

The general principle for tax deductibility is that the payment should be a necessary business expense and it should be properly documented in accordance with the relevant provisions of the Turkish transfer pricing regulations and those in the local tax procedural law.

**Depreciation and amortisation**

Fixed assets are subject to depreciation at rates determined by the Turkish Ministry of Finance (MoF), based on their useful life.

Intangible assets (i.e. licence, franchise, copyright, etc.) and goodwill are depreciated over 15 years and five years, respectively. Additionally, leasehold improvement is depreciated based on lease period.

Depreciation can be calculated by applying either the straight-line or declining-balance method (limited to 50%), at the taxpayer's discretion. The taxpayer may also change the option from declining-balance to straight-line (but not vice versa) at any time during the life of the asset. The applicable rate for the declining-balance method is twice the rate of the straight-line method, subject to certain limitations. Furthermore, in special cases, the tax authorities may determine higher depreciation rates.

Intangible assets are amortised by the straight-line method over their estimated useful lives, if objectively determinable.

Profits or losses on disposal of fixed assets (i.e. the difference between the proceeds and the written-down values) are included in taxable income in the year of disposal. If the renewal of disposed-of assets is considered necessary by the owners of the business concern, the profit accrued may be retained for a certain amount of time. After the purchase of new fixed assets, the profits may be offset against the depreciation of the new assets.

**Start-up expenses**

Start-up expenses are considered as deductible expenses as incurred. Also, the taxpayer has the option to capitalise such expenses and to depreciate them over five years at equal amounts.

**Interest expenses**

According to the amendments to the CTL, it is envisaged to make some changes regarding the deductibility of the finance expenses of companies.

A portion, yet to be determined by the Council of Ministers, of interest and similar expenses incurred on foreign resources will not qualify for deduction for CIT purposes. According to the arrangement:

- credit institutions, financial institutions, financial leasing, factoring, and financing companies shall not be subject to finance cost restrictions
- cost restrictions shall apply exclusively to the portion of liabilities that exceed a company's shareholder's equity
- restrictions shall not exceed 10% and the rate may be amended per industry by the Council of Ministers, and
- restrictions shall not apply to interest rates and similar payments added to investment costs.
Deemed-interest deduction on cash injection as capital

The Law No: 6637, which has been published in the Official Gazette dated 7 April 2015, introduced a new concept of tax incentives where Turkish resident companies are allowed a deemed-interest deduction on cash injection as capital from the corporate tax base of the relevant year.

Turkish resident companies, except for those that operate in banking, finance, and insurance sectors, will be able to benefit from such incentive.

According to the new incentive, the deductible interest amount will be calculated as follows:

- The latest ‘annual weighted average interest rate applied to loans provided by banks’ that is announced by the Central Bank of Turkey (14.65% for 2015) will be applied to the capital increases paid in cash and cash part of initial capital for new established entities.
- Only 50% of the calculated amount can be deducted from the CIT base.

In order to benefit from this deduction, the company should have taxable profit (i.e. the companies that have carryforward tax losses or current year tax losses are not able to benefit from this deduction).

The following capital increase alternatives are not included on the calculation or determination of the deduction amount:

- Capital increase made from capital in kind items (e.g. via real estate).
- Capital increase made during mergers, acquisitions, or spin-offs.
- Capital increase made from internal sources (e.g. legal reserves) that are booked under shareholders’ equity.
- Capital increase made via borrowing from shareholders.

By the Decree of Council of Ministers (no: 2015/7910), the Council of Ministers has re-determined the deemed interest deduction rate for the following cases:

a. Publicly traded companies (listed in Borsa Istanbul [BIST]): For the companies that are publicly traded in BIST at the last day of the year in which the 50% interest deduction is benefited, the rate would be increased by:
   - 25 points if the publicly traded rate of nominal/value or the amount of registered shares of the company is 50% or less (totally 75%).
   - 50 points if more than 50% of the nominal/registered shares of the company is traded in BIST (totally 100%).

b. Capital increase for investments with investment incentives: In case the capital increase made in cash has been used for investments on manufacturing or industrial plants, purchase of machines or equipments required for such plants, or lands or states for building of such plants, the 50% rate has been increased by 25 points.

c. Other companies: Any company that is not subject to 0% or falls under category (a) and (b) will benefit from a 50 points deduction.

The Decree reduced the rate to 0% for the capital increases made for the following cases:

- The income of company consists at least 25% of passive income (e.g. interest, dividends, rental income, license fees, capital gains obtained from sales of marketable securities).
- At least 50% of the total assets of the company consists of affiliate marketable securities, shares, and subsidiary companies.
- Invest capital or provide a loan to another company, which are limited only with the corresponding capital increase made in cash amount.
Turkey

- Investment in real estate companies (limited only with the corresponding investment amount).

**Bad debt**
Bad and doubtful accounts receivable are deductible under certain conditions. Amounts of the receivables collected afterwards are added to the profits of the year in which they are collected.

**Charitable contributions**
Donations to listed charities and for construction of schools, hospitals, and scientific research organisations are deductible at up to 5% of the company's gross profit.

**Pensions and employee termination benefits**
Payments for pensions and employee termination benefits are deductible for CIT purposes under certain conditions.

**Fines and penalties**
In principle, fines and penalties incurred due to the wrong-doings of the taxpayer or its employees are not tax deductible.

**Taxes**
Essentially, the CIT itself and VAT are, subject to certain exceptions, not deductible for CIT purposes.

Fees and duties paid in relation to assets of the company are, in principle, deductible in determining taxable corporate income.

**Net operating losses**
Corporate losses may be carried forward for five years. Losses cannot be carried back.

**Payments to foreign affiliates**
Charges for royalties and interest by foreign affiliates may be deductible for CIT purposes, provided that transfer pricing and thin capitalisation rules are followed (see the Group taxation section for more information).

**Group taxation**
Consolidation of the accounts of group companies for tax purposes is not allowed in Turkey since each company is regarded as a separate taxpayer.

**Transfer pricing**
The CTL includes transfer pricing regulations, using the OECD’s guidelines as a basis. If a taxpayer enters into transactions regarding the sale or purchase of goods and services with related parties in which prices are not set in accordance with the arm’s-length principle, the related profits are considered to have been distributed in a disguised manner through transfer pricing. Such disguised profit distribution through transfer pricing is not accepted as deductible for CIT purposes. The methods prescribed in the law are the traditional transaction methods described in the OECD's transfer pricing guidelines.

**Thin capitalisation**
According to local thin capitalisation regulation, if the ratio of the borrowings from shareholders or from persons related to the shareholders exceeds triple the shareholders' equity of the borrower company at any time within the relevant year, the exceeding portion of the borrowing will be considered thin capital and the corresponding interest will not be deductible. Accordingly, the ratio of loans received from related parties...
to shareholders’ equity must be no more than 3:1 in order to eliminate Turkish thin capitalisation issues.

**Controlled foreign companies (CFCs)**
A CFC is a company established abroad with at least 50% of the organisation controlled directly or indirectly by tax-resident companies and real persons by means of separate or joint participation in the capital, dividends, or voting rights. A CFC also must meet certain conditions (e.g. 25% or more of its gross revenue must be comprised of passive income, it must be subject to an effective income tax rate lower than 10% for its commercial profit in its home country, gross revenue of the subsidiary established abroad must be more than the foreign currency equivalent of TRY 100,000 for the related fiscal year).

The CFC’s profit is included in the CIT base of the controlling resident corporation at the rate of the shares controlled, irrespective of whether it is distributed.

**Tax credits and incentives**

**Foreign tax credit**
A partial relief from income taxation is granted for the foreign tax paid that does not exceed the rate of tax payable for the same income in Turkey.

**Participation exemption for dividends**
There is an unconditional CIT and dividend WHT exemption for dividend income between Turkish companies. If a Turkish company has a shareholding in a foreign company, this dividend income is exempt from CIT, under certain conditions.

**Exemption for income from foreign construction and repair activities**
The profit from construction and repair activities carried out by Turkish corporations in foreign countries may be exempt from CIT in Turkey under the Turkish CTL. It should be noted that if loss occurs from these activities, it is not possible to deduct this loss amount from the income generated through domestic activities since deduction of a loss relating to foreign activities that are exempt from CIT in Turkey is not allowed for deduction.

**Capital gains exemption**
For capital gains generated from the sale of shares in a company, a 75% CIT exemption is applicable under certain conditions. This partial exemption may also be applicable for the capital gains derived from the alienation of real estate investments under certain conditions.

In the event a foreign subsidiary is sold by a Turkish company, a CIT exemption at the rate of 100% is applicable under certain conditions.

**Investment incentives**
The investment incentive system comprises the following elements.

**Priority Investment Projects**
Based on the investment incentive system, certain investment projects (e.g. testing centres; R&D projects; pharmaceutical, tourism, cultural, education, and railway investments) are deemed as ‘Priority Investment Projects’.

**General incentive practices**
Excluding the subjects of investments that do not meet the requirements, all investments above the minimum fixed investment amount will benefit from incentive elements, regardless of regional location.
Regional incentive practices
The industries categorised by region in the relevant Decree will benefit from incentive elements under the conditions determined for each relevant region.

Large-scale investments
Incentives are granted to all large-scale investments, although incentive size will vary depending on the investment’s regional location.

Strategic investments
The related legislation defines strategic investments as well as different incentive ratios and periods for strategic investments. A new committee to be established will decide which investments are strategic within the scope of the defined criteria.

Based on the related legislation, investments in production of products that are highly dependent on imports and meet all the following criteria will be regarded as strategic investments:

• Minimum fixed investment amount should be more than TRY 50 million.
• Total domestic production capacity for a given product that is the matter of investment should be below the import amount.
• Added value to be generated with the investment should be at least 40%.
• The total import amount realised related to the invested product within the last year should be more than 50 million United States dollars (USD).

There are six main components of the investment regulation:

• Reduced CIT rate.
• VAT exemption.
• Exemption for social security premium (employer’s portion).
• Customs duty exemption.
• Interest support.
• Allocation of land for investments.

Free trade zones
Free trade zones are special sites that lie geographically within the country but are deemed to be outside the customs territory. In these regions, the normal regulations related to foreign trade and other financial and economic areas are either inapplicable, partly applicable, or superseded by new regulations.

In general, activities such as manufacturing, storage, packing, general trading, banking, insurance, and trade may be performed in Turkish free trade zones. Goods moving between Turkey and the zones are treated, for all purposes, as exports or imports. However, operations within the zones are subject to the supervision of the zone management (and customs authorities), to whom regular activity reports must be submitted. Consequently, there is a requirement for zone users to maintain full accounting records (in Turkish) with respect to their activities. These accounting requirements extend to inventory records. Customs duty is levied on any unexplained inventory losses as though the goods had been imported into the country.

The right to operate in a free trade zone is conferred by an operating licence obtained from the Undersecretariat for Foreign Trade, which reviews the application for conformity with the objectives and types of activity specified by the Economic Affairs Coordination Council.

Portfolio investment income
Under the WHT regime introduced on 1 January 2006, certain portfolio investment income (e.g. capital gains derived from listed equities acquired after 1 January 2006 or capital gains or interest from Turkish local government bonds issued after 1 January...
2006) derived by eligible entities are subject to 0% WHT. However, the WHT rate is 10% for other resident and non-resident entities. In the case of repo income, 15% WHT should be applied for all non-resident investors (the provisions of double tax treaties [DTTs] are reserved).

Furthermore, 0% WHT is applicable for all type of investors with respect to capital gains derived from listed equities on the Istanbul Stock Exchange (ISE) purchased after 1 January 2006 (excluding securities investment trust shares), income derived from transactions on equity index futures carried out under Turkdex, warrants with underlying of equities traded on ISE, and participation shares of investment funds that intensively invest in listed shares (equity intensive funds).

Under the *Communiqué No: 277 of Income Tax Law*, the following qualify for the eligibility criteria for 0% WHT:

- Turkish resident capital corporations (limited liability companies, joint stock companies, and commandite companies whose capital is divided into shares).
- Non-resident corporations that have the same characteristics as Turkish capital corporations.
- Turkish investment funds (regulated in accordance with the Capital Markets Board).
- Non-resident investment funds similar to Turkish investment funds.
- Those non-residents similar to Turkish investment funds and trusts that engage in investment in securities and other capital markets instruments as their only business in Turkey to derive income and capital gains from these instruments and to exert the rights attached to these instruments.

Under the aforementioned *Communiqué*, the investor should be an institutional portfolio investor. However, what is meant by ‘institutional’ is not crystal clear. It seems to us that the intention of the MoF is to treat all non-resident portfolio investors (other than the individuals) as institutional portfolio investors. The *Communiqué* does not have a principle based approach; rather, it enlists a number of ‘institutional investor’ examples, such as limited liability partnerships (LLPs), sovereign funds, investment funds, investment institutions, and investment companies.

In terms of interest income from deposits, the WHT rates on interest income from bank deposits (excluding interbank deposits and money market operations of intermediaries) differ depending on the currency (Turkish lira or the foreign exchange) and maturity, which are as follows:

- Interest income derived from foreign exchange deposit:
  - In current call accounts and deposit accounts with maturity of less than six months (including six months): 18%.
  - In deposit accounts with maturity of less than one year (including one year): 15%.
  - In accounts with maturity of more than one year: 13%.
- Interest income derived from a Turkish lira deposit:
  - In current call accounts and deposit accounts with maturity of less than six months (including six months): 15%.
  - In deposit accounts with maturity of less than one year (including one year): 12%.
  - In accounts with maturity of more than one year: 10%.

The withholding will be applied by local intermediary banks, brokerage houses, or local custodian banks, instead of the conventional self-declaration mechanism, and this withholding will be the final taxation in Turkey for both non-residents and Turkish individuals.

On the other hand, certain portfolio investment income (e.g. capital gains from unlisted shares) is taxed under permanent tax rules. In some cases, a non-resident fund may need to file a tax return within 15 days following the sale of securities and subject to a
32% effective tax rate. However, DTTs may provide relief except in special cases. Certain income, such as interest and dividends, are usually taxed via the WHT regime, so no filing is required for a non-resident investor.

Moreover, Turkish corporate bonds that are issued after 1 January 2006 and sold outside of Turkey are not taxed under the WHT regime, and rather taxed as per permanent tax rules. The WHT rates on interest income from such corporate bonds issued by all type of resident corporations (including Turkish banks and corporations) vary depending on the maturities of the bonds and are regressive. The WHT rates are as follows (please note that DTT provisions are reserved):

- 10%, if maturity is under one year.
- 7%, if the maturity is between one and three years (including one year).
- 3%, if the maturity is between three and five years (including three years).
- 0%, if the maturity is five or more than five years (including five years).

The interest income derived from bonds that are issued by the Turkish Treasury outside of Turkey (i.e. Eurobonds) is subject to a 0% WHT. Capital gains derived by non-residents from Turkish Eurobonds issued by the Treasury are exempt from capital gains taxation.

The responsibility to apply this WHT belongs only to the issuer of the corporate bond, regardless of the fact that a payment agent exists or not, and the WHT liability of the issuer is not disregarded even if the payment agents make any withholding.

**Research and development (R&D) activities**

In the last decade, the Turkish Parliament has enacted several regulations to provide incentives for R&D activities in Turkey. Tax incentives and support mechanisms that are provided to companies carrying out R&D and innovation activities in Turkey are as follows:

- **R&D legislation:**
  - Law No. 5520 on Corporate Income Tax.
  - Law No. 5746 on Support of R&D Activities.
  - Law No. 4691 on Technology Development Zones.
- **Institutions providing cash supports on project basis:**
  - Scientific and Technological Research Council of Turkey (TÜBİTAK).
  - Turkish Technology Development Foundation (TTGV).
  - Ministry of Science, Industry and Technology.
  - Small and Medium Industry Development Organization (KOSGEB).
  - Development Agency.
  - European Commission.

**Law No. 5520 on Corporate Income Tax (Article 10/1-a)**

**R&D deduction (100%)**

All eligible innovation and R&D expenditures made in R&D and innovation projects approved by the MoF can be deducted from the CIT base at a rate of 100% as an R&D deduction.

**Law No. 5746 on Support of R&D Activities**

**R&D deduction (100%)**

All eligible innovation and R&D expenditures made in technology centres, R&D centres (which must employ at least 30 full-time equivalent R&D personnel), R&D and innovation projects supported by governmental institutions, foundations established by law, or international funds can be deducted from the CIT base at a rate of 100%.
**Income tax exemption (80%-90%-95%)**
The salaries of R&D and support personnel, at a rate of 95% for the personnel with a PhD degree or master’s degree on basic sciences, 90% for the personnel with a master’s degree or undergraduate degree on basic sciences, and 80% for others, is exempt from income tax.

**Social security premium support (50%)**
Half of the employer portion of social security premiums for R&D and support personnel (maximum of 10% of number of full-time R&D personnel) will be funded by the MoF for each R&D and support personnel.

**Stamp tax exemption**
The documents prepared for the R&D activities, including the payrolls of R&D and support personnel, are exempt from stamp tax.

**Law No. 4691 on Technology Development Zones**

**CIT exemption**
The profits derived from the software activities or products developed as a result of the R&D activities in technoparks are exempt from CIT.

**Income tax exemption (100%)**
The salaries of R&D and support personnel carrying out R&D and software development activities in technoparks are exempt from income tax until 31 December 2023. The salary for the activities other than software development and R&D activities cannot benefit from income tax exemption.

**Social security premium support (50%)**
Half of the employer portion of social security premiums for R&D and support personnel (maximum of 10% of number of full-time R&D personnel) will be funded by the MoF for each R&D and support personnel.

**Stamp tax exemption (only on payrolls)**
The payrolls prepared for the R&D activities are exempt from stamp duty.

**VAT exemption**
Deliveries of software and services (system management, data management, business applications, internet, mobile and sector applications, military command control applications) arising from software development activities by the companies operating in technoparks are exempt from VAT until 31 December 2023.

**Withholding taxes**
There is no WHT on payments to resident corporations by other resident corporations, except for a 3% WHT on progress payments to contractors, both domestic and foreign, within the scope of construction work spanning more than one calendar year.

The local WHT rates are as follows:

<table>
<thead>
<tr>
<th>Income derived by non-resident individuals or corporations not constituting a PE in Turkey</th>
<th>WHT (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Rental from immovable assets</td>
<td>20</td>
</tr>
<tr>
<td>Leasing of goods (within the scope of the conditions regulated under Turkish Financial Leasing Law No. 3226)</td>
<td>1</td>
</tr>
<tr>
<td>Royalties (e.g. on patents, copyrights, licence)</td>
<td>20</td>
</tr>
<tr>
<td>Professional services</td>
<td>20</td>
</tr>
</tbody>
</table>

</table>

* See Portfolio investment income in the Tax credits and incentives section.

** Income derived from the redemption of participation certificates that continuously invest at least 51% of their assets in equities that are registered on the ISE are not subject to WHT if they are held for at least one year.

Income derived from participation shares of investment funds that intensively invest in listed shares (equity intensive funds) are subject to 0% WHT.

*** WHT on interest income derived from time deposits depends on the currency (i.e. Turkish lira or foreign currency deposits) and the maturity (see Portfolio investment income in the Tax credits and incentives section).

Please refer to the following tables for local WHT on dividends, interest, and royalties, respectively.

**Turkish WHT on dividends**

Dividend distributions to individuals and to non-resident persons who are shareholders are subject to WHT at a local rate of 15%. This rate might be reduced for non-resident shareholders in the presence of a tax treaty. Please note that dividend distributions to resident entities and branches of non-resident entities are not subject to WHT.

Notes

1. The local rate is 15% for dividends. Unless a lower rate is stated in the Agreement, the local rate is applied.
2. As per the provisions of the protocol amending the agreement, the rate may be (partially or wholly) reduced:
   - For the Netherlands: to 10%, as long as, under the provisions of the Netherlands Company Tax Act and to the future amendments thereto, a company that is a resident of the Netherlands is not charged tax with respect to dividends the company receives from a company that is a resident of Turkey.
   - For Belgium: to 10%, as long as, under the provisions of the Belgian laws and of the future amendments thereto, a company that is a resident of Belgium is not charged tax with respect to dividends the company receives from a company that is a resident of Turkey.
   - For Austria: to 5%, if the beneficial owner is a company (other than a partnership) that directly holds at least 25% of the capital of the company paying the dividends, provided that such dividends are exempt from tax in Austria.
   - For Ireland: to 5%, where the beneficial owner is a company (other than a partnership) that directly holds at least 25% of the voting power of the company paying the dividends. 15% in all other cases.
3. Subject to 5% of the gross amount of the dividends if the recipient is the government, or a public institution that is wholly owned by the government or its political subdivisions, or local authorities of the United Arab Emirates.
4. The tax rate shall be 15% where the amount of the Turkish tax imposed on the income of the company paying dividends is less than 40% of such income derived in the accounting period ending immediately before the date when such dividends become payable.

5. The income should be subject to full corporate taxation in the hands of the Turkish tax-resident subsidiary.

6. The provisions for WHT at source are effective for amounts paid or credited on or after 1 January 2010.

7. If the beneficial owner of the dividends is a resident of Saudi Arabia, the tax so charged shall not exceed 5% of the gross amount of the dividends provided: (i) the beneficial owner is a company (other than a partnership) that directly holds at least 20% of the capital of the Turkish company paying the dividends or (ii) the beneficial owner is a central bank or an entity that is wholly owned by the government.

8. In case of Turkey, the tax rate shall not exceed 5%, to the extent that they are paid out of profits that have been subject to full rate of CIT in Turkey (i.e. without benefiting from tax exemption).

9. The rate of the income tax shall not exceed 5% if it is derived by the Government Pension Fund (Statens Pensjonsfond) or by the Government Social Security Fund (Sosyal Guvenlik Fonu), provided that such dividends are exempt from tax in the contracting state where the beneficial owner is a resident.

10. The treaty-reduced rate of 5% shall apply if such dividends are exempt from tax in the contracting state of which the beneficial owner is a resident.

11. As per the provisions of the agreement, the rate may be reduced to 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that directly holds at least 20% of the capital of the company paying the dividends, provided that a relief from Swiss tax is granted for such dividends by way of an abatement of the profits tax in proportion corresponding to the ratio between the earnings from participations and the total profits or by way of an equivalent relief.

12. As per the provisions of the agreement, the rate may be reduced to (i) 5% of the gross amount of the dividends if the Turkish company (other than a partnership) that directly holds at least 10% of the capital of the Australian company receives the dividends or (ii) 5% of the gross amount of dividends that are subject to Turkish Corporate Income Tax at the full rate if the Australian company (other than a partnership) that directly holds at least 25% of the capital of the Turkish company receives the dividends. Regardless of these, if the dividends are taxed in Australia, Turkey could tax the dividends at a rate not exceeding 15%.

13. As per the provisions of the agreement, the dividends paid by a company that is a resident of Malta to the Turkish resident beneficial owner shall be exempt from any tax in Malta that is chargeable on dividends in addition to the tax chargeable in respect of the profits of the company. Furthermore, Malta tax chargeable with respect to distributed profits of the company shall not exceed 15% of the gross amount if the distributed profits consist of gains or profits earned in any year in respect of which that company is in receipt of any benefit under the provisions regulating aids to industries in Malta, provided that the receiving company submits returns and accounts to the taxation authorities of Malta in respect of its income liable to Malta tax for the relative year of assessment.

Notes

1. The local rate of 10% will be applied in the event a higher rate is stipulated in the agreement.
2. Provisions for WHT at source are effective for amounts paid or credited on or after 1 January 2010.
3. A rate of 10% if the loan or other debt claim is for a period exceeding two years; 15% in all other cases.
4. A rate of 10% if the loan is taken for a period exceeding two years; 15% in all other cases.
5. A rate of 10% if the loan/credit is taken from a financial institution; 15% in all other cases.
6. A rate of 10% if the loan is taken from a bank or a financial institution; 15% in all other cases.
7. A rate of 10% if the credit/loan is taken from a bank, financial or savings institution, insurance company; 15% in all other cases.
8. A rate of 7.5% if the loan is taken from a financial institution; 10% in all other cases.
9. A rate of 10% if the interest is the result of a loan provided/given by a bank or if the interest is paid in return for an article of merchandise, or equipment given to the contracting state on credit; 15% in all other cases.
10. A rate of 10% if the loan is taken from a financial institution, including insurance companies; 15% in all other cases.
11. A rate of 10% for the use of, the right to use, or the sale (contingent on the productivity, use, or disposition) of any copyright of literary, artistic, or scientific work, including royalties in respect of motion pictures and works on film, tape, or other means of reproduction for use in connection with radio or television broadcasting, any patent, trademark, design or model, plan, secret formula, or process, or for information concerning, industrial, commercial, or scientific experience; 5% for the use of or the right to use industrial, commercial, or scientific equipment.
12. A rate of 5% for the use of industrial, commercial, or scientific equipment; 10% in all other cases.
13. A rate of 15% for patent, trademark, design or model, plan, secret formula or process, or for information concerning industrial, commercial, or scientific experience; 10% for the use of or the right to use any copyright of literary, artistic, or scientific work including cinematographic films and recordings for radio and television.
14. A rate of 5% in respect of a loan/credit made, guaranteed, or insured for the purposes of promoting export by the Oesterreichische Kontrollbank AG or a similar Turkish public entity the objective of which is to promote the export; 10% if the interest is derived by a bank; 15% in all other cases.
15. If the beneficial owner of the ‘income from debt claims’ is a resident of Saudi Arabia, the tax so charged shall not exceed 10% of the gross amount of income.
16. A rate of 10% in respect of a loan or other debt claim for a period exceeding two years or if the interest is received by a financial institution; 15% in all other cases.
17. Interest arising in one of the contracting states and paid to the government of Turkey or the Central Bank of Turkey shall be exempt from income taxes in the contracting state. Similarly, interest arising in the Republic of Turkey and paid to the government or the Central Bank of the other contracting state shall be exempt from income taxes in Turkey.
18. Interest arising in Turkey and paid to the government of Canada or to the Bank of Canada shall be exempt from Turkish tax. Similarly, interest arising in Canada and paid to the government of Turkey or to the Central Bank of Turkey (Türkiye Cumhuriyet Merkez Bankası) shall be exempt from Canadian Tax.
19. The rate of the income tax shall not exceed (i) 10% if the interest is paid to a bank (also note that in the case of Turkey, a lower rate of 0% may apply for eligible financial institutions' and banks' loans under the domestic regulation) or (ii) 5% if the interest is paid to the Norwegian Government Pension Fund (Statens Pensjonsfond), the Norwegian Guarantee Institute for Export Credits (Garantiinstituttet for Eksportkreditt), the Turkish Social Security Fund (Sosyal Guvenlik Fonu) and the Eximbank of Turkey (Türkiye İhracat Kredi Bankası); 15% in all other cases.
20. The rate of the income tax shall not exceed 10% if the interest is paid to a bank (also note that in the case of Turkey, under the domestic regulation, a lower rate of 0% may apply for the loans provided by eligible financial institutions and banks); 15% in all other cases. The interest shall be exempt from income taxes in the contracting state where it arises, if the payment is made to the government of Turkey, to the Central Bank of Turkey (Türkiye Cumhuriyet Merkez Bankası), to the government of New Zealand, or to the Reserve Bank of New Zealand.
21. A rate of 5% of the gross amount of the interest paid in respect of a loan or credit made, guaranteed, or insured for the purposes of promoting export by an Eximbank or similar institution, the objective of which is to promote the export; 10% if the interest is derived by a bank; 10% in all other cases.

22. A rate of 15% from the use of, or the right to use, trademarks; 10% in all other cases.

23. A rate of 5% in respect of loans or credits that are guaranteed, insured, and provided for the purposes of promoting export by the Finnish Export Credit or FINNVERA and the Turkish public institutions the objective of which is to promote exports; 10% if the interest is derived by a bank; 15% in all other cases.

24. A rate of 10% if the payment is made to a bank; no taxation arises if the payment is made to the Central Bank of Mexico; no taxation arises if the payment is made to Banco Nacional de Comercio Exterior, S.N.C., Nacional Financiera, S.N.C., or Banco Nacional de Obras y Servicios Publicos S.N.C where the maturity of loan is more than three years; 15% in all other cases.

25. For the interest income derived by governments or central banks of the contracting states, no WHT applies.

Anti-tax haven provisions
According to the law, all sorts of payments made to corporations (including branches of resident corporations) that are established or operational in countries that are regarded by the Turkish Council of Ministers to undermine fair tax competition (through taxation or other practices) may be subject to taxation in Turkey through withholding at a rate of 30%.

In the meantime, the Turkish Council of Ministers has not yet determined which countries receiving payments are considered ‘tax havens’.

Tax administration
All Turkish taxes are imposed under laws drafted by or with the involvement of the Turkish MoF and are promulgated by the Turkish Parliament. The central government, acting through the MoF, imposes most of them, although local authorities have certain rights over some minor transaction charges. Tax procedures are governed by the Turkish tax procedural law.

Taxable period
The taxable period is the calendar year. Note that a different fiscal year is also allowed.

Tax returns
A self-assessment system is used in Turkey.

In principle, residents and non-resident entities having a PE in Turkey are obligated to be registered for all taxes in Turkey (e.g. CIT, VAT, WHT, stamp tax) and file annual CIT returns.

The last date of submission of the CIT return is the 25th day of the fourth month following the fiscal year-end. This date will be 25 April if CIT returns are filed on a calendar-year basis.

Payment of tax
Taxable income is declared on a quarterly-basis as advance tax on the 14th day of the second month following each quarter, and corresponding tax is payable on the 17th day of the same period. Advance CIT paid is offset against the final (i.e. fiscal year-end) CIT calculated in the annual CIT return.

The last date of payment of CIT is the 30th day of the fourth month following the fiscal year-end.

Tax audit process
The tax authorities in Turkey do not have a regular audit cycle for every taxpayer. Tax audits are usually performed based on selection through risk assessment software, where they can conduct either sector-specific or issue-specific audits.
**Statute of limitations**
The Turkish tax system is based on self-assessment, and there is no procedure to agree the filed tax returns with the tax authorities that can prevent further inspections. Tax returns filed by companies remain open to tax inspection until the end of the five-year statute of limitations according to the provisions of Turkish Tax Procedural Law.

**Topics of focus for tax authority**
The tax authority has recently inspected companies for the following topics:

- Transfer pricing.
- Capital decrease.
- Loss compensation fund.
- Partial spin-off.
- Thin capitalisation.

**Corporate income tax certification**
In Turkey, a special kind of tax control mechanism is established called ‘corporate income tax certification’. Under this mechanism, the tax authority accepts accounts and tax returns of taxpayers whose accounts are audited and certified by Sworn Fiscal Advisors (SFAs) to be true and correct unless proved to be incorrect. On the other hand, the MoF has announced that those companies that do not have their tax returns certified as such will be on the priority list for tax inspection. The Ministry sets standards of work to be done for any taxpayer wanting to use an SFA. At the end of each year, SFAs have to prepare a comprehensive report to be submitted to the MoF and to certify the accuracy of the CIT return.

The work is carried out over the statutory financials that are subject to tax calculations. Note that this service is not of a ‘statutory audit’ nature, technically it is ‘non-audit assurance’ work.

The tax certification process helps to identify and take corrective measures against erroneous applications that may otherwise be detected only upon a tax investigation by the Turkish MoF.

**Other issues**

**Intergovernmental agreements (IGAs)**
Following the negotiations between Turkey and the United States, Turkey has been included on the list of jurisdictions that have reached agreement in substance as of 3 June 2014, and Turkey was regarded among the countries that will sign the Model 1 IGA. On and after 3 June 2014, Turkey and the United States had further negotiations and infrastructure tests, which were finalised by the beginning of July 2015, and the agreement was signed on 29 June 2015.

The agreement is almost in-line with the latest version of the Model 1 IGA and Annexes (version: 6 July 2014). By the agreement, if Turkey could not finalise the internal legal procedures before 30 September 2015, the Internal Revenue Service (IRS) agreed to continue to treat each Turkish financial institution as complying with the Foreign Account Tax Compliance Act (FATCA) and not subject to FATCA withholding to the extent that Turkey: (i) notifies the IRS that the internal procedures could not be finalised by 30 September 2015, along with the related information about the reasoning of such delay, and (ii) provides guarantee that the internal procedures issues will be resolved within a reasonable period, not after 30 September 2016. Accordingly, it is now possible that Turkish financial institutions will be able to make the fiscal year 2014 reporting by 30 September 2016 (along with fiscal year 2015) if the above mentioned clause is applied.
Turkey, as a member of G-20 and OECD has officially stated that it will be in compliance with OECD’s Common Reporting Standards (CRS). Accordingly, the model agreement has been translated into Turkish, and Turkish tax authorities are working to determine the regulatory steps to be taken along with implementation requirements. However, there is no agreement signed with other countries yet. Also, there is no local law or secondary legislation currently in force.

**For up-to-date information**

For up-to-date information on the most recent and significant developments in Turkish tax regulations, please refer to the tax bulletins added to our tax portal, Vergi Portali, which can be accessed at Vergiportal.com.
**Significant developments**

As per recent amendments to the tax legislation of Turkmenistan, entities that submit simplified financial statements are permitted to pay the corporate income tax (CIT) biannually in the form of advance payments. The advance payments are calculated based on the tax result of the prior period. Calculation of the advance amounts for the first month of the biannual period should reflect the taxes of the last month of the prior biannual tax period and the advance payments for the remaining five months shall be calculated based on the 1/6 ratio of the tax amount of the prior biannual period for each remaining month.

Starting from 1 May 2016, new customs tariffs for automobiles (under nomenclature codes of 8702, 8703, 8704, and 8705) are introduced. New tariff rates vary depending on the age of automobiles, and rates are applied on a progressive scale. For instance, customs duties for brand new cars and cars less than one-year old are established as 2% from customs value as well as an additional 0.1 United States dollars (USD) per cubic centimetre of engine volume. However, for cars with an age of more than three years but less than four years, the tariff rate is established as 50% and USD 1.5 per cubic centimetre of engine volume.

**Taxes on corporate income**

Residents of Turkmenistan are subject to CIT on worldwide income; non-residents are subject to CIT only in respect of their Turkmenistan-sourced income. The CIT base is determined as gross income less allowable deductions.

Branches of foreign legal entities are subject to a 20% CIT, whereas Turkmen legal entities are subject to an 8% CIT (or 2% CIT in cases where the company qualifies as a small or medium enterprise).

Companies involved in oil and gas operations are subject to a 20% CIT, irrespective of the legal status/ownership structure.

Entities where the government holds more than 50% of shares are subject to CIT at the rate of 20%.

**Special purpose duty for improvement of urban and rural territories**

A special duty aimed at improving urban and rural territories is imposed on registered entities (e.g. legal entities and branches). The duty applies at 1% of the taxable base for CIT purposes. Generally, contractors and subcontractors operating under the umbrella of the petroleum law may be exempt from this duty.

**Contributions to Agriculture Development and Ashgabat City Development Funds**

The contributions to the Agriculture Development Fund and Ashgabat City Development Fund are outside of the general tax legislation (Tax Code) and are provided for by
specific decrees. Permanent establishments (PEs)/branches of foreign legal entities are subject to these contributions on the same terms as local legal entities.

Contribution to the Ashgabat City Development Fund only applies to entities located in Ashgabat City.

The base for the contributions is comprised of the accounting income. The contribution rate for the Agriculture Development Fund is 3%, and the contribution rate for the Ashgabat City Development Fund is 0.5%.

Generally, contractors and subcontractors operating under the umbrella of the petroleum law may be exempt from these contributions.

Corporate residence

Legal entities are treated as residents for CIT purposes if they are established in accordance with Turkmenistan law or their place of effective management is located in Turkmenistan.

Permanent establishment (PE)

The general definition of a PE under domestic legislation is similar to the one per the Organisation for Economic Co-operation and Development (OECD) model convention. A PE is a permanent place of the foreign legal entity in Turkmenistan through which it, fully or partially, conducts entrepreneurial (commercial) activity, including that through an authorised person.

Other taxes

Value-added tax (VAT)

VAT is generally payable at the rate of 15%. A zero-rate applies to exports of goods (except for oil and gas) and international transport services. Generally, contractors operating under the umbrella of the petroleum law may be exempt from this tax.

The tax base is sales turnover including excise tax. If a sale is made by state-fixed prices, then the tax base is the respective sales turnover including VAT and excise tax. The amount of input VAT incurred may be offset against the amount of output VAT. The amount of input VAT related to capital expenditures should be capitalised.

Customs duties

The import of goods into Turkmenistan is generally subject to 2% customs duty. The taxable base is determined as the customs value of imported goods. There is a list of certain items that are subject to specific customs duty (i.e. around 50 items), and the rates of specific customs duties may vary from 5% (e.g. products from cement) to 100% (e.g. carbonic acid) depending on the type of imported goods. In most cases, the customs duty is set on an ad valorem basis. There is also a customs clearance fee of 0.2% from the customs value of imported goods.

Excise taxes

Excise tax is paid on goods or products that are considered in the list of excised goods or products. Normally, excised goods consist of alcoholic beverages, tobacco products, and automobiles. Excise rates vary based on the type of goods as well as by domestic production or import.

Property tax

Property tax in Turkmenistan generally applies at the rate of 1% on the average annual net book value of fixed assets and average annual value of tangible assets.
used for business purposes and located in Turkmenistan. Generally, contractors and subcontractors operating under the umbrella of the petroleum law may be exempt from this tax.

**Transfer taxes**

There are no transfer taxes in Turkmenistan.

**Stamp taxes**

Although state duties of various amounts set forth by the government may apply to certain actions (e.g. branch registration), there is no unified stamp tax/duty mechanism as normally practiced in other countries.

**Subsurface-use tax**

Subsurface-use taxpayers are legal entities and individual entrepreneurs extracting natural resources and using land or subsoil waters for the extraction of chemical products. This tax does not normally apply to contractors and subcontractors operating under the umbrella of the petroleum law.

Taxable operations include the sale of natural resources extracted by taxpayers and utilisation of natural resources for consumption. Tax rates vary depending on the goods being extracted. Natural or associated gas extraction is taxed at 22%, and crude oil extraction is taxed at 10%. Tax rates for other mineral resources vary depending on profitability (internal rate of return) from 0% to 50%.

**Payroll taxes**

Employers are obligated to withhold 10% personal income tax (PIT) as well as 2 manats (TMT) special purpose duty for improvement of urban and rural territories from employees' salaries and compensations and pay it to the State Budget on monthly basis.

**Pension insurance payments**

Pension insurance is payable by employers at 20% of the total remuneration provided to local employees. Additional 3.5% obligatory professional pension insurance is levied on employers with respect to employees who work under hazardous conditions. Employees may participate in a voluntary pension insurance, the minimum rate for which is established at 2% of total remuneration. Income paid to expatriate employees should not be subject to the pension insurance payments.

**Advertising levy**

An advertising levy is imposed on the amount of expenses on commercial advertising and is to be paid quarterly at the rate of 3% to 5%, depending on the location of the payer within Turkmenistan. Generally, contractors operating under the umbrella of the petroleum law may be exempt from this levy.

**Branch income**

Branches pay CIT at the rate of 20%.

Branches are taxed on profits received from activities in Turkmenistan. The gross income is reduced for expenses incurred (both inside and outside of Turkmenistan) in relation to the activities in Turkmenistan. The procedure for determining the taxable base for branches is generally similar to the one for Turkmen legal entities.

Branches subject to the standard tax regime also pay and file returns with respect to the other taxes described in this summary.
**Income determination**

**Inventory valuation**
Inventory is valued at cost, including costs relating to its acquisition. The law permits the use of the weighted average or first in first out (FIFO) methods for tax purposes.

**Capital gains**
Capital gains are taxable as normal business income in Turkmenistan.

**Dividend income**
Generally, dividend income received by residents and non-residents from Turkmen taxpayers is subject to taxation at the source of payment at the rate of 15%.

Dividend income received by residents from non-Turkmen taxpayers is subject to CIT.

**Inter-company dividends**
The Tax Code provides for relief from economic double taxation of inter-company dividends.

The withholding tax (WHT) rate on dividends payable by Turkmen legal entities to their foreign shareholders may be reduced under applicable double tax treaties (DTTs).

Technically, Turkmen branches of foreign legal entities may also be subject to 15% WHT on repatriation of income to their head offices. However, if the head office collects the income from its clients directly to its bank account abroad, the mechanism of collecting the dividend tax is unclear.

**Interest income**
Turkmenistan-sourced interest income received by non-residents that do not have PEs in Turkmenistan is subject to WHT of 15%. The above rate may be reduced under the applicable DTTs.

Interest income received by residents is subject to CIT.

**Foreign income**
A resident company is subject to tax on its worldwide income (including capital gains). There are no provisions for tax deferrals in Turkmenistan tax legislation.

**Deductions**
In general, taxpayers may deduct expenses paid or accrued during the year in connection with their business and aimed at income generation. All expenses must be substantiated by documentary proof.

The deduction of certain expenses is subject to specific ceilings. Such expenses include representation expenses, which are deductible at up to 1% of gross income. Furthermore, deductible norms for business travel expenses are established periodically by the government.

**Depreciation**
Tax depreciation is based on accounting depreciation. Depreciation is accrued based on the straight-line method. Accelerated depreciation is also allowed based on specific consent of the Ministry of Finance. A Presidential Decree establishes the maximum depreciation rates, ranging from 5% to 25%, for five different groups of assets.

Generally, for the purposes of CIT, depreciation accrued is deductible. Fixed assets acquired free of charge as well as assets of non-commercial legal entities, budget
organisations, and public associations should be excluded from depreciable assets for CIT purposes, even if they are used for generating income.

Fixed assets provided under operational lease shall be depreciated by the lessor. Fixed assets provided under financial lease shall be depreciated by the lessee.

**Goodwill**
There are no provisions for goodwill in Turkmenistan tax legislation.

**Start-up expenses**
Pre-incorporation costs are generally non-deductible.

**Interest expenses**
Interest expense occurring from debt instruments of any kind should be deductible for CIT purposes, provided that the purpose of the underlying debt relates to the entrepreneurial activity of the taxpayer.

Interest expense incurred by a foreign legal entity abroad and recharged to its branch in Turkmenistan is generally not deductible unless specifically addressed by applicable DTTs.

**Bad debts**
The Tax Code permits a taxpayer to include provisions for uncollectable debts as well as losses incurred as a result of expiration of the collection period for accounts receivable.

**Charitable contributions**
There are no specific restrictions on deductibility of charitable contributions. However, they may be disallowed under the general restriction of non-business related deductions.

**Repair and maintenance expenses**
Deductible expenditures for the repair of fixed assets shall be comprised of the cost of spare parts and consumable materials used for repair, remuneration of employees carrying out the repairs, and other expenditures associated with such repairs, including payments to third parties for the purpose of such repairs.

**Research and development (R&D) expenses**
R&D costs (including those that produced no positive result) shall be subject to deduction from gross revenue, except for costs associated with the purchase of fixed assets, their installation, and other costs of a capital nature.

**Fines and penalties**
Fines, penalties, and other financial sanctions (except for tax-related ones) are deductible for CIT purposes.

**Taxes**
For CIT purposes, the following taxes are deductible: property tax; subsurface-use tax; levies established by the Tax Code (except the special-purpose duty for the improvement of urban and rural territories); accrued amounts of VAT in selling goods, performing work, and rendering of services; and amounts of excise tax included in the price of sold excisable goods by manufacturers of such goods.

**Net operating losses**
Loss is defined as excess of allowable deductions over gross revenue. Losses shall be carried forward and deducted in subsequent tax (reporting) periods, but not for more than three years. Losses cannot be carried back.
Payments to foreign affiliates
Administrative and management expenses incurred by the head office of a branch in Turkmenistan are not deductible at the branch level.

Group taxation
There is no group taxation in Turkmenistan.

Transfer pricing
The Turkmenistan Tax Code contains provisions concerning state supervision of transfer pricing. According to these rules, the tax authorities monitor and control transfer pricing of certain types of transactions, including transactions between related parties, foreign trade operations, and transactions where the tax authorities during tax audits perceive considerable deviation from the market price (i.e. more than 20%).

Thin capitalisation
There are no provisions for thin capitalisation in Turkmenistan tax legislation.

Controlled foreign companies (CFCs)
Turkmenistan tax legislation does not have provisions covering CFC rules.

Tax credits and incentives
Tax and investment incentives may be negotiated on a case-by-case basis. The President has often issued special decrees granting taxation exemptions and other privileges to specific investors. However, since adopting a new edition of the Tax Code in 2004, such practice has been significantly reduced.

Foreign tax credit
Foreign tax credits are available to tax residents of Turkmenistan based on the provisions of the respective tax treaties. The tax credited shall not exceed the tax liability computed in accordance with Turkmenistan regulations.

Withholding taxes
Turkmenistan-source income generated by a foreign legal entity that has no PE in Turkmenistan generally is subject to WHT at the source of payment at 15% (6% for income from the lease of sea vessels and aircraft).

Relief may be available for WHT if a foreign entity is a resident of a country that has a valid DTT with Turkmenistan and if the foreign entity complies with certain administrative procedures.

Currently, Turkmenistan has only a few DTTs in force. Turkmenistan is a successor to a number of DTTs concluded by the USSR, while some treaties were concluded and ratified by the government of Turkmenistan. The countries listed below are considered to have valid tax treaties with Turkmenistan:

* USSR treaties honoured by Turkmenistan.

Notes

1. 5% where beneficial owner holds at least 25% of the authorised capital of the company paying the dividends.
2. 0% where one of the following conditions is met: (i) interest paid to the government of the other contracting state or interest paid in respect of a loan guaranteed by that other state or by an institution authorised by that state; (ii) interest from commercial debt-claims relating to instalment payments for supplying merchandise, goods, or services; (iii) interest on loans, not represented by bearer instruments, from banks; or (iv) interest on cash deposits, not represented by bearer instruments, with banks, including public credit institutions.
3. 5% where beneficial owner is a company (other than a partnership) that directly holds at least 25% of the capital of the company paying the dividends.
4. Interest arising in a contracting state and paid to, or on loans guaranteed or insured by, the government or a local authority thereof, the Central Bank, or any financial institution wholly owned by the government of the other contracting state, shall be exempt from tax in the first-mentioned state.
5. Interest on bank credits and loans and interest on commercial credits arising from sources located in one of the states and received by a resident of the other state shall not be taxable in the first state.
6. 0% where the loan is guaranteed by the governments, Central Bank, or National Bank of the contracting states.
7. 0% where the loan has been guaranteed by the state or by an organisation authorised by it for that purpose.
8. 0% where interest is paid by government, a political sub-division, or a local authority of the other contracting state.
9. Interest paid by government, ministries, other governmental institutions, municipalities, Central Bank, and other banks wholly owned by the government of the other contracting state shall be exempt from tax.
10. 0% where the recipients of the interest are governments of contracting states or any governmental body, as well as the Central Banks (‘the bank of banks’ of a contracting state), a state export or import credit underwriting organisation, or another similar organisation to which, in accordance with the law of a contracting state, the relevant rights were delegated.
**Tax administration**

**Taxable period**
The taxable period comprises a calendar year (i.e. 1 January to 31 December).

**Tax returns**
Reports are generally filed quarterly within the month following the reporting quarter. Annual income tax declaration and financial statements of branches of foreign legal entities are due by 20 March of the year following the reporting one.

Tax agents must file WHT reports not later than the 20th day of the month following the one when the respective tax liability occurred.

**Payment of tax**
Advance CIT payments under the standard tax regime are made before the 13th and 28th days of each month (unless agreed otherwise with tax authorities). Final payments upon results of the first quarter, first half-year, nine months, and tax year are made within five days from the reporting deadlines.

Under the Petroleum Law tax regime, CIT is reported and paid once annually based on dates indicated in the respective Product Share Agreement (PSA).

**Tax audit process**
Tax audits may be of two types: ‘cameral’ (preliminary) and ‘documentary’.

Cameral tax audits are performed at the location of tax authorities within 30 days after submission of tax returns and financial statements with the aim of monitoring their accuracy and completeness. The tax authorities may request the taxpayer to amend the tax return(s) if they have revealed mistakes or inconsistencies therein.

Documentary tax audits are conducted based on tax authorities order aimed at verification of the tax returns submitted by the taxpayer. During such audits, the tax authorities review the accounting records, copies of tax returns, and source documents as required. Tax authorities are to notify the taxpayer about the upcoming tax audits at least five days prior to the start of the audit. However, in cases when there is sufficient evidence of tax evasion, the tax authorities may initiate the tax audit without prior notice.

Scheduled documentary tax audits are usually carried out once in three years. There can also be un-scheduled tax audits (e.g. in case of liquidation of the enterprise) and counter tax audits (to review transactions with the enterprise’s supplier/customer, which is under the scheduled tax audit).

In cases when tax violations are revealed during tax audits, taxpayers should make necessary corrections to address those and pay respective taxes/obligatory payments and late payment interest within five days after the tax authority’s decision is released. If accomplished within the deadline, the tax authority’s decision on applying penalty may be cancelled. If not accomplished, the unpaid taxes/obligatory payments and late payment interest are to be withdrawn from the (i) taxpayer’s bank accounts (by issuing a tax liability claim without acceptance), (ii) taxpayer’s debtors (by issuing a tax liability claim on the debts payable to taxpayer), or (iii) taxpayer’s property (by issuing a tax liability claim upon decision of the court).

**Statute of limitations**
Statute of limitations for tax purposes is five years.
Turkmenistan

**Topics of focus for tax authorities**
The tax administration environment in Turkmenistan is form-driven. Therefore, the quality of documentation supporting the deductions should be of particular importance.

Cross-border transactions are normally scrutinised by tax authorities during statutory tax audits in view of WHT and reverse charge VAT implications.

Another area of focus for tax authorities is the deductions taken by Turkmenistan branches of foreign legal entities in respect of expenses incurred by their head offices abroad.

**Other issues**

**United States (US) Foreign Account Tax Compliance Act (FATCA)**
An intergovernmental agreement (IGA) with the United States is treated as ‘in effect’ by the US Treasury as of 3 June 2014. The United States and Turkmenistan have reached an agreement in substance and Turkmenistan has consented to disclose this status. In accordance with this status, the text of such IGA has not been released and financial institutions in Turkmenistan are allowed to register on the FATCA registration website consistent with the treatment of having an IGA in effect, provided that Turkmenistan continues to demonstrate firm resolve to sign the IGA as soon as possible.
Significant developments

Effective 1 July 2015, the following amendments were made to the Income Tax Act (ITA) and the Value-added Tax (VAT) Act.

**Income tax**
It is now mandatory for every local authority, government institution, or regulatory body to require a taxpayer identification number (TIN) from any person applying for a licence of any form of authorisation necessary for conducting business in Uganda.

The threshold for presumptive tax payable by small business taxpayers has increased from 50 million Ugandan shillings (UGX) to UGX 150 million while at the same time having the base tax rate decrease from 3% to 1.5%.

Taxpayers are now denied a deduction for any expenditure above UGX 5 million in one transaction on goods and services where the supplier does not have a TIN.

The definition of a branch now includes, from the perspective of petroleum and mining operations: “the furnishing of services, including consultancy services, through employees or personnel engaged by the person for such purpose, but only if activities of that nature continue for the same or a connected project for a period or periods aggregating more than 90 days in any 12-month period”.

A definition of immovable property has been included. Immovable property is now defined to include a mining right, petroleum right, mining information, or petroleum information.

Payments made to non-resident suppliers for the provision of services rendered, be it onshore or offshore, are subject to withholding tax (WHT) at a rate of 15%.

The debt-to-equity ratio for thin capitalisation purposes has been revised from 1:1 to 1.5:1. The thin capitalisation rules have been extended to apply to all interest-bearing debt of a foreign-controlled resident company. Further, the thin capitalisation restrictions now apply to branches of non-resident companies. These provisions do not apply if, at all times during the year, the amount of the debt does not exceed the arm’s-length debt amount. Arm’s-length debt amount is defined as the amount of debt that a financial institution that is not related to the company would be prepared to lend to the company having regard to all the circumstances of the company.

The exemption from the 6% WHT on the supply or importation of petroleum products, plant and machinery, human or animal drugs, scholastic materials, and raw materials was removed. These items are now subject to WHT at a rate of 6% unless the buyer is exempt from WHT.
The WHT rate on the payment of re-insurance premiums to non-resident persons has decreased from 15% to 10%. Similarly, the WHT rate applicable to non-resident contractors for provision of services to licence in respect of mining or petroleum operations has decreased from 15% to 10%.

Taxpayers providing passenger transport services or freight transport services using vehicles with a load capacity of more than two tonnes are required to pay an advance tax before renewal of their operational licence.

The type of reorganisations that are entitled to roll-over relief for capital gains purposes are now defined in the ITA.

The provisions for taxation of petroleum operations in Uganda were amended, and special provisions for taxation of mining operations were introduced in the ITA.

Further, the income of Global Fund for AIDS, Malaria, and Tuberculosis is now exempt from income tax.

**Value-added tax (VAT)**
The annual turnover threshold for VAT registration has increased from UGX 50 million to UGX 150 million.

The threshold for cash basis accounting has increased from UGX 200 million to UGX 500 million.

The following organisations are now listed under the schedule of Public International Organisations who qualify for diplomatic benefits under the VAT Act:

- Global Fund for AIDS, Malaria, and Tuberculosis.
- Uganda Red Cross Society.

Compact bulbs with a power connecting cap at the end are now subject to VAT at a tax rate of 18%.

The supply of cereals grown and milled in Uganda are now zero-rated.

There are a number of significant VAT amendments for the mining and petroleum sector. These include the following:

- Definition of a licensee, contractor, mining operations, petroleum operations, and petroleum agreement.
- A licensee undertaking mining or petroleum operations or any other person undertaking the construction of a petroleum pipeline is now allowed to apply for voluntary VAT registration regardless of whether they are making any taxable supplies.
- A contractor or licensee is now allowed to claim input tax credit for the VAT on imported services.
- A licensee can now seek a refund when its input credit exceeds its output liability for a period.
- All VAT on supplies of goods or services to a licensee is deemed paid such that the licensee does not incur any VAT on its supplies.

**The Tax Procedures Code Act**
The Tax Procedures Code Act was published on 19 October 2014. The Act provides a Code to regulate the procedures for the administration of specified tax laws in Uganda. The main purpose of the Act is to:

- harmonise and consolidate the tax procedures under existing tax laws, and
• to provide for related matters.

As to date, the Act has not yet been gazetted and is therefore not yet under operation.

**Proposed 2016 amendments**

There are various proposed amendments to income tax, VAT, excise duty, and other levies as continued in the respective amendments bills. The amendments, if adopted as law, will generally come into effect 1 July 2016. These include the following.

**Income tax**
The Bill proposes the following amendments:

• An amendment to make it clear that the ability to carry forward tax losses is subject to the change in control provisions.
• Introduction of WHT as the mode for collection of tax from a non-resident person who derives rent from sources in Uganda.
• An amendment to the limitation of benefit clause to introduce, among others, the concept of beneficial ownership in order for a non-resident person to benefit from a tax exemption or reduced tax rate under a double taxation agreement (DTA).
• A specific WHT requirement in relation to payments to non-residents who derive income from sources in Uganda from international carriage and telecommunications services.
• The inclusion of the International Centre for Research in Agroforestry (ICRAF) and the International Potato Centre as listed institutions in the First Schedule to the ITA. This means that the income of these entities will be exempt from income tax.
• The removal of clinics as a separate category of business subject to specific rates of presumptive tax on turnover below UGX 50 million.
• Various amendments affecting petroleum operation include an updated definition of the term ‘licensee’ to cover persons undertaking upstream and midstream petroleum activities by reference to the correct respective piece of legislation, repeal of the definition of ‘petroleum exploration information’, and limitation of deductions of expenditure for exploration licenses issued after 31 December 2015, among others.

**VAT**

In respect to VAT, persons undertaking midstream operations in the petroleum sector (such as refining, conversion, transmission, and storage) will be entitled to apply for voluntary VAT registration regardless of whether they are currently making taxable supplies.

LED lamps and bulbs, which are exempt from import duty in accordance with the Fifth Schedule of the EAC Customs Management Act, will be specifically excluded from the normal parallel exemption for import VAT. This means that the import of such items will be subject to the standard VAT at 18%.

The Bill introduces a special treatment for VAT on taxable supplies made by a supplier to a contractor executing an aid-funded project, whereby:

• the VAT on the supply is deemed to have been paid by the contractor to the supplier, and
• the supplier does not account for the deemed VAT payment as output tax.

A person providing business process outsourcing (BPO) services will be entitled to claim an input tax credit for VAT incurred on imported services.

The Bill proposes to remove the supply of solar power from the list of exempt supplies in the Second Schedule to the VAT Act.
The Bill extends the current exemption for supplies to the contractors and subcontractors of hydro power projects to now also encompass solar power and geothermal power projects.

The Bill proposes to add the following to the list of agricultural machinery, tools, and implements that are exempt from VAT: hullers, oil presses, grain dryers, manure spreaders, fertiliser distributions, transplanters, juice presses and crushers, among others.

**Excise duty**
The Bill proposes a number of excise duty amendments, including the following:

- Manufacturers will be able to claim a refund of excise duty that was previously paid on excisable goods that are converted into approved healthcare or medical products.
- Specialised hospital furniture will be exempted from the 10% excise duty on furniture as introduced in 2015. In addition, the existing .09 United States dollars (USD) per minute duty on incoming international calls will be removed.

The table below shows goods where excise duty will be amended:

<table>
<thead>
<tr>
<th>Goods</th>
<th>Excise duty</th>
</tr>
</thead>
<tbody>
<tr>
<td>Soft cap</td>
<td>UGX 50,000 per 1,000 sticks</td>
</tr>
<tr>
<td>Cigars, cheroots, and cigarillos containing tobacco</td>
<td>200%</td>
</tr>
<tr>
<td>Smoking tobacco, whether or not containing tobacco constituents</td>
<td>200%</td>
</tr>
<tr>
<td>in any portion</td>
<td></td>
</tr>
<tr>
<td>Homogenised or reconstituted tobacco</td>
<td>200%</td>

<td>UGX 780 per litre</td>
</tr>
<tr>
<td>Specialised hospital furniture</td>
<td>Nil</td>
</tr>
<tr>
<td>Other furniture</td>
<td>10%</td>
</tr>
<tr>
<td>Ready to drink spirits</td>
<td>80%</td>
</tr>
</tbody>
</table>

**Stamp duty**
The Bill proposes to increase stamp duty on the following items:

<table>
<thead>
<tr>
<th>Item</th>
<th>Stamp duty</th>
</tr>
</thead>
<tbody>
<tr>
<td>Exchange of property</td>
<td>1% to 2%</td>
</tr>
<tr>
<td>Transfer of property</td>
<td>1% to 2%</td>
</tr>
<tr>
<td>Fixed base rate</td>
<td>UGX 5,000 base rate to UGX 10,000</td>
</tr>
</tbody>
</table>

**Finance Act**
The amendment proposes to impose import duty on lubricants, un-denatured alcohol, steel, steel products, electronics, paper, and paper products diapers. Further, the amendment proposes to increase the environmental levy on used clothes, shoes, and other articles from 15% to 20%.

In addition, the Bill proposes to waive all tax arrears owed by Savings and Credit Cooperative Organisations (SACCOs) as at 31 December 2015 and also repeal the fees under the Mining Act 2003 to the extent prescribed under the Finance Acts of 2013 and 2014. Presumably, this means that the fees that applied immediately prior to 1 July 2013 are still in effect.
**Taxes on corporate income**

A resident company is taxed on its income from all geographical sources. A non-resident company is only subject to Uganda income tax on income derived from sources in Uganda.

The income tax rate applicable to the chargeable income of companies is 30%, with the exception of:

- Mining companies.
- Non-resident air transport, shipping, and some telecommunication services.
- Resident companies whose turnover does not exceed UGX 150 million.

Chargeable income is gross income for the year less the total deductions allowed under the ITA.

**Mining companies**

The income tax rate applicable to mining companies is calculated according to the following specified formula:

Annual tax rate = 70 minus (1500/x), where x is the ratio of the company’s chargeable income to the gross revenue for the year.

Note that the derived tax rate is subject to a minimum tax rate of 25% and a maximum tax rate of 45%.

**Non-resident air transport, shipping, and some telecommunications services**

Non-resident ship operators, charterers, and air transport operators who derive income from carriage of passengers who embark, or cargo or mail that is embarked, in Uganda, as well as road transport operators who derive income from carriage of cargo or mail that is embarked in Uganda, are taxed at the rate of 2%.

A non-resident person who carries on the business of transmitting messages by cable, radio, optical fibre, or satellite communication and derives income through transmission of such messages by apparatus established in Uganda, whether or not such messages originated from Uganda, is taxed on one’s gross income at a rate of 5%. Similarly, a non-resident person who derives income from providing direct-to-home pay television services to subscribers in Uganda is taxed on one’s gross income at a rate of 5%.

**Resident companies with turnover of less than UGX 150 million**

A rate of 1.5% of turnover is used to determine income tax payable by a resident company whose turnover is between UGX 50 million and UGX 150 million, subject to certain thresholds.

However, on application to the Commissioner, a resident company with a turnover of less than UGX 150 million may be taxed at 30%.

This category excludes professionals, public entertainment services, public utility services, or construction services.

**Local income taxes**

There are no other income taxes in Uganda.
Corporate residence

A company is resident in Uganda for a year of income if it meets one of the following criteria:

- Is incorporated or formed under the laws of Uganda.
- Has its management and control exercised in Uganda at any time during the year of income.
- Undertakes the majority of its operations in Uganda during a year of income.

Permanenent establishment (PE)

A PE (branch) means a place where a person carries on business, and includes:

- A place where a person is carrying on business through an agent, other than a general agent of independent status acting in the ordinary course of business as such.
- A place where a person has, is using, or is installing substantial equipment or substantial machinery.
- A place where a person is engaged in a construction, assembly, or installation project for 90 days or more, including a place where a person is conducting supervisory activities in relation to such a project.
- The furnishing of services, including consultancy services, by an enterprise of a contracting state through employees or other personnel engaged in the other contracting state, provided that such activities continue for the same or a connected project for a period or periods aggregating more than four months within any 12-month period.

Other taxes

Value-added tax (VAT)

VAT is governed by the VAT Act and administered by the Uganda Revenue Authority (URA). VAT is charged at the rate of 18% on the supply of most goods and services in the course of business in Uganda. Specified goods and services, as well as exports outside of Uganda, attract a zero rate of tax.

Some supplies are exempt from VAT, the main categories being government subsidies, some unprocessed foodstuffs, financial services, health and life insurance, re-insurance services, unimproved land, leases and sale of certain residential properties, betting and gaming, education, medical and health services, social welfare services, pesticides, petroleum products subject to excise duty, and power generated by solar.

Zero rating is preferable to exemption because the VAT on costs incurred in making a zero-rated supply can be recovered while those incurred in making an exempt supply cannot be recovered.

The zero-rated supplies include the supply of goods and services exported from Uganda; the supply of drugs and medicines; the supply of seeds, fertilisers, pesticides and hoes; the supply of leased aircraft, aircraft engines, spare engines, spare parts for aircraft, and aircraft maintenance equipment.

The annual threshold for VAT registration is UGX 150 million. Persons who make supplies that are VATable and whose turnover exceeds UGX 150 million are required to register for VAT with the URA. VAT-registered persons are required to:

- Charge VAT whenever they make supplies that are VATable.
- File monthly returns before the 15th day of the month following the reporting month.
Credit for input tax
A person making exempt, zero-rated, and standard supplies can recover all the input VAT if the exempt supplies are less than 5% of the total supplies. However, if the exempt supplies are more than 5% but less than 95%, the person is required to recover only a portion of the VAT input tax corresponding to the percentage of the taxable supplies. If the exempt supplies exceed 95%, the person cannot recover any input VAT.

Imported services
The VAT Act defines a supply of service to mean any supply that is not a supply of goods or money, including the performance of services for another person.

There is no definition of imported services in the local legislation. However, the tax authorities generally consider an imported service to be one provided by a person normally resident outside Uganda who is not required to register for VAT in Uganda. According to Regulation 14 of the VAT Regulations 1996, any person who imports a service into the country must account for VAT on such a service. The Regulations require the person importing the service to account for the VAT at the time when performance of the service is completed, when payment for the service is made, or when the invoice is received from the foreign supplier, whichever is earliest.

The tax on such imported services is computed at the rate of 18% of the cost of the service. VAT-registered companies are no longer required to prepare self-billed tax invoices, thus they are unable to claim the VAT paid as input tax; however, a contractor or licensee in the petroleum and mining industry is able to claim an input tax credit for the reverse charge VAT paid on imported services. Further, if the importer of the services is not registered for VAT, the importer is required to calculate and pay the VAT to the URA.

Failure to pay VAT on non-exempt imported services is tantamount to lack of compliance with the law, and a penalty of 2% per month, compounded, may apply.

VAT representative for non-resident persons
The VAT Act provides for the appointment of a VAT representative by a non-resident person who may be required by the Commissioner to register for VAT in Uganda but has no fixed place of business. If the non-resident person does not appoint the VAT representative within 30 days after being required to register for VAT, the Commissioner may appoint the representative for the non-resident person. The VAT representative of the non-resident person shall be a person who is ordinarily residing in Uganda, may be an agent for more than one non-resident person, and will have the responsibility for doing all things required of the non-resident person under the VAT Act.

Customs duties
Many goods imported into Uganda are subject to customs duties. However, exemptions are available to various classes of plant and machinery imported into Uganda. The rates of duty are provided by the East African Community common external tariff code. Certain products imported from the East African Community and the Common Market for Eastern and Southern Africa (COMESA) region enjoy special custom duty rates. Imported items are classified according to the nomenclature established under the international convention on the harmonised commodity description and coding system. Duties range from 0% to 60%, depending on the item imported.

Excise duties
Excise duties are imposed on goods considered luxuriant. Examples include locally manufactured soft drinks, cigarettes, alcoholic drinks, and spirits. A schedule of some of the rates is provided below:
<table>
<thead>
<tr>
<th>Goods</th>
<th>Excise duty</th>
</tr>
</thead>
<tbody>
<tr>

</tbody>
</table>

Property taxes
Property taxes are administered by the local authorities annually. They are based on the value of the property as assessed by the local authorities.

Stamp duties
Stamp duty is charged on a number of transactions at varying rates. Stamp duty is charged at 1% of the total value for a number of instruments, including hire purchase agreements, composition deeds, leases, exchange of property, conveyance, transfers, share warrants, gifts, and agreements relating to deposit of title deeds.

Stamp duty of 0.5% is incurred on formation of a company, capital-raising activities (e.g. increase of share capital), debentures, equitable mortgages, and mortgage deeds.

Stamp duty of 1% applies on transfer of shares.

No stamp duty is charged on the increase of share capital where it is in fulfilment of a condition precedent for acquiring loan funds for a development project or where it is made on becoming public through the stock exchange.

Stamp duty of UGX 5,000 is also charged in a number of various other instruments.
**Turnover taxes**
Every promoter of gaming and pools promoted within Uganda and every principal agent of a promoter of gaming and pools promoted outside Uganda is liable to tax at 15% of the total amount of money received or the total amount of bets.

**Environmental levies**
Environmental levies are charged on every person who imports motor vehicles that are eight years old or older. Levies are also imposed on the importation of used household appliances. The levy on motor vehicles is 20% of the value of the vehicle as determined for customs duty purposes. Levies on electrical appliances range from UGX 20,000 to UGX 50,000 per item, depending on the nature of the item.

**Payroll taxes**
The employer is required to withhold tax on employment income from their employees and pay it to the tax authorities. The tax is normally borne by the employee. Where the employer fails to withhold tax as required, the employer becomes liable for the taxes but may recover the same from the employees.

**Social security contributions**
An employer is obligated to make contributions to the national social security fund for each employee, amounting to 10% of their gross pay.

**Branch income**
Tax is imposed on the income of a non-resident company derived from running a branch in Uganda. The chargeable income of a branch in Uganda is taxed at the corporation tax rate of 30% after deduction of allowable expenses.

In addition to corporation tax, branches are subject to extra tax at a rate of 15% on any repatriated income for a year of income. The repatriated income is calculated using the A + (B - C) - D approach. Where A is the net assets at the beginning of the year, B is the net profit for the year, C is the tax charge for the year, and D is the net assets at the end of the year.

**Income determination**
In arriving at chargeable income (taxable income), one has to go through the process of adjusting profits by taking into account deductions allowed and deductions not allowed.

**Inventory valuation**
A taxpayer is allowed a deduction for the cost of trading stock disposed of during the year, which is determined by adding to the opening value of the trading stock the cost of trading stock acquired during the year and subtracting the closing value of stock. The opening value of the stock is the closing value for the previous year or, where the taxpayer commenced business during the year, the market value at the time of commencement of the business of the trading stock acquired prior to commencement. The closing stock valuation method is the lower of cost or market value. Trading stock is allowed to be valued using either the absorption costing or prime cost method. The stock valuation method chosen may not be changed, except with written permission of the Commissioner.

**Capital gains**
Capital gains are included in and taxed together with the business income at a rate of 30%. There is no separate capital gains tax. Capital gains arise on disposal of non-depreciable business assets as well as sale of shares.
**Uganda**

**Dividend income**
The general rule is that dividend income is taxable as part of business income at a rate of 30%. Dividend income is also subject to WHT at the rate of 15%. The WHT paid in respect of the dividend income is creditable where the income is subject to the corporation tax rate of 30%. The WHT rate for dividend payments to resident persons is 15%. For dividends paid out by companies listed on the stock exchange to individuals, the rate is 10%.

Dividend income is exempt from tax if the recipient company directly or indirectly controls the paying company through ownership of 25% or more of the voting power of the paying company.

**Interest income**
The general rule is that interest income is taxable as part of business income at a rate of 30%. Interest income is also subject to WHT at the rate of 15%. The WHT paid in respect of the interest income is creditable where the income is subject to the corporation tax rate of 30%. Also, interest income earned with respect to government securities is subject to tax at 20% as a final tax.

**Rental income**
Companies are required to disclose their rental income separately from other business income. Taxable rental income is the net income after allowing for any expenditures and losses in respect of the rental income derived. The rate of tax applicable is 30%.

**Foreign income**
Foreign income is taxable on resident recipients, and tax suffered in the country where it is sourced (if any) is creditable, subject to the provisions of any DTAs. This credit is limited to the amount of Ugandan tax payable on that income.

There are no provisions for deferring tax on income earned abroad by tax residents.

---

**Deductions**
The ITA sets out the following conditions for deductibility of an expense:

- There must be an expenditure or loss.
- The expenditure or loss must be incurred by a person during the year of income.
- The expenditure must be incurred in the production of income included in gross income.

A taxpayer who is accounting for tax purposes on an accrual basis derives income when it is receivable by the taxpayer and incurs expenditure when it is payable by the taxpayer.

An amount is treated as payable by the taxpayer when all the events that determine liability have occurred and the amount of the liability can be determined with reasonable accuracy, but not before economic performance with respect to the amount occurs. Economic performance occurs:

- with respect to the acquisition of services or property, at the time the services or property are provided
- with respect to the use of property, at the time the property is used, or
- in any other case, at the time the taxpayer makes payment in full satisfaction of the liability.

Contingent liabilities are not tax-deductible in Uganda.
Depreciation
A deduction is allowed for the depreciation of the person’s depreciable assets, other than minor assets, in accordance with the appropriate applicable rates. The ITA allows a taxpayer a deduction for the depreciation of their depreciable assets on a reducing-balance basis. Depreciable assets are classified in four classes as follows:

<table>
<thead>
<tr>
<th>Class</th>
<th>Assets included</th>
<th>Rate of tax depreciation (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Computers and data handling equipment.</td>

</table>

Industrial building allowance
A company is eligible for an industrial building allowance on its industrial and commercial buildings at a tax rate of 5% per annum on a straight-line basis. The industrial building allowance will be granted on the actual cost incurred in constructing the buildings.

An industrial building is defined to mean any building that is wholly or partly used, or held ready for use, by a person in manufacturing operations, research and development into improved or new methods of manufacture, mining operations, an approved hotel business, an approved hospital, or approved commercial buildings.

Goodwill
An intangible asset is amortisable over its useful life. To the extent that the useful life of the underlying asset that gives rise to goodwill can be determined, then the goodwill maybe deductible over the useful life of the asset.

Start-up expenses
A company setting up business for the first time or engaged in the initial public offer at the stock market will be entitled to a tax deduction for all its start-up costs that are of capital nature that would otherwise not be tax-deductible under the ordinary tax rules. The start-up costs will be allowed as tax-deductible costs over a period of four years on a straight-line basis at the rate of 25% per annum.

Interest expenses
Interest is deductible if the interest is incurred in respect of a debt obligation by the company in the production of income included in the company’s gross income. Interest arising from non-trade-related debt obligation is not deductible. Deferred interest is deductible when paid.

Interest charged before capital investment is put to use has to be capitalised. Interest incurred after capital investment is put to use is allowed as a deduction.

If the company is foreign controlled, then the interest arising from the loan in excess of one and a half times the company's equity will not be allowed (see Thin capitalisation in the Group taxation section for more information).
**Bad debt**
A deduction is allowed for bad debt only if:

- the amount was included in the person’s income in the year of income
- it is in respect of money that was lent in the ordinary course of business by a financial institution in the production of income, or
- the amount of the debt claim was in respect of a loan granted to any person by a financial institution for the purpose of farming, forestry, fish farming, beekeeping, animal and poultry husbandry, or similar operations.

For the bad debt to be deductible, the taxpayer must demonstrate to the URA that reasonable steps to collect the debt were taken and that the taxpayer failed to recover the debt. In relation to a financial institution, it should be a debt in respect of which a loss reserve held against presently identified losses or potential losses, and which is therefore not available to meet losses that subsequently materialise, has been made.

**Charitable contributions**
Charitable donations are deductible if made to amateur sporting associations; religious, charitable, or educational institutions of public character; trade unions; and other similar associations that have been issued with a written ruling by the Commissioner currently in force stating that it is an exempt organisation. The donations should not exceed 5% of the person’s chargeable income.

**Meals, refreshments, and entertainment**
Expenses for meals, refreshments, and entertainment are deductible only where the value is included in the employment income of the employees or is excluded from employment income owing to the fact that it is provided on equal terms to all workers.

**Pension expenses**
Employers are allowed a deduction for the contributions made to pension schemes on behalf of their employees. Employees, on the other hand, do not get a deduction for the contributions they make to pension funds.

**Payment for directors**
Directors are treated as employees, so expenses incurred in respect of directors are deductible expenses.

**Bribes, kickbacks, illegal payments**
Non-business expenses are not tax-deductible, including those of a private nature.

**Fines and penalties**
No deduction is allowed for any fine or similar penalty paid to a government or its subdivision for breach of any law.

**Taxes**
No deduction is allowed for income tax payable in Uganda or in a foreign country.

**Other significant items**
No deduction is allowed for the following other expenditures:

- Any expenditure or loss of a domestic or private nature.
- Any expenditure or loss of a capital nature.
- Any expenditure or loss recoverable under insurance contract or indemnity.
- Any contribution or similar payment made to a retirement fund by the employee or for the benefit of any other person (e.g. National Social Security Fund [NSSF] contributions).
- Any premium or similar payment made in respect of a life insurance policy for the life of the person paying the premium or on the life of some other person.
• Any income appropriated to a reserve fund or capitalised in any way.
• The amount of pension paid to any person.

Net operating losses
A deduction is allowed for any assessed tax losses carried forward from previous years of income. Such tax losses are carried forward and deducted against future taxable profit of the business in the subsequent years of income. The losses can be carried forward indefinitely. There is no ring-fencing of losses except in the following circumstances:

• Where, during a year of income, there has been a change of 50% or more in the underlying ownership of a company, as compared with its ownership one year previously, the company is not permitted to deduct an assessed loss in the year of income or in subsequent years, unless the company, for a period of two years after the change or until the assessed loss has been exhausted if that occurs within two years after the change,
• continues to carry on the same business after the change as it carried on before the change and
• does not engage in any new business or investment after the change where the primary purpose of the company or the beneficial owners of the company is to utilise the assessed loss so as to reduce the tax payable on the income arising from the new business or investment.
• In cases where losses relate to farming, the assessed farming loss can only be deducted from farming income of the taxpayer in the following year and not from any other income.

There is no provision for carryback of losses in Uganda.

Payments to foreign affiliates
Payments to foreign affiliates are deductible as long as they are charged at an arm’s length and incurred in the production of income.

Group taxation
There are no specific provisions in the law covering groups, so companies in a group do not get any special treatment for tax purposes in Uganda.

Transfer pricing
The transfer pricing regulations apply to controlled transactions if a person who is a party to the transactions is located in and is subject to tax in Uganda and the other person who is a party to the transaction is located in or outside Uganda.

The URA Practice Note issued on 14 May 2012 gives details on the transfer pricing documentation to be maintained by the taxpayer. These include company details and transaction details, including agreements and the pricing methodology used in determining the arm’s-length price.

In addition, the anti-avoidance provisions contained in Sections 90 and 91 of the ITA require transactions between associates to be at an arm’s-length. These are the provisions that are often applied by the URA in instances where they are of the view that a non-resident person may be transferring profits from Uganda.

Thin capitalisation
Where a company intends to finance some of its Uganda operations by use of foreign debt, the ITA provides for thin capitalisation rules in Uganda, and the safe harbour debt-to-equity ratio is 1.5:1.
The thin capitalisation rules are provided for in Section 89(1) of the ITA. According to this Section, where a foreign-controlled resident company, other than a financial institution, has a debt-to-equity ratio in excess of 1.5:1 at any time during the year of income, a deduction is disallowed for the interest paid by the company during that year on that part of the debt that exceeds the 1.5:1 ratio for the period the ratio was exceeded.

These provisions do not apply if, at all times during the year, the amount of the debt does not exceed the arm’s-length debt amount. Arm’s-length debt amount is defined as the amount of debt that a financial institution that is not related to the company would be prepared to lend to the company having regard to all the circumstances of the company.

**Controlled foreign companies (CFCs)**
Uganda does not have a CFC regime.

---

**Tax credits and incentives**

**Foreign tax credit**
A resident taxpayer is entitled to a foreign tax credit for any foreign income tax paid by the taxpayer in respect of foreign-source income included in the gross income of the taxpayer. The foreign tax credit allowed is subject to the income tax rate (i.e. 30%) in Uganda.

**Tax holidays for exporters**
A tax holiday of ten years is available to exporters who export at least 80% of their produce of finished goods, subject to certain conditions.

**Scientific research expenditure, training expenditure, and mineral exploration expenditure**
A 100% allowance is available for scientific research expenditure, training expenditure, and mineral exploration expenditure in the year of expenditure.

**Incentives for the importation of plant and machinery**
Plant and machinery is exempt from customs duty on importation. Additionally, a VAT deferral facility is available where VAT is deferred on importation of plant and machinery and subsequently waived upon approval by the relevant authorities.

**Employment incentives**
A deduction of 2% of income tax payable is granted to any employer who can prove to the URA that at least 5% of their employees on a full-time basis are people with disabilities.

**Other incentives**
Income derived from agro processing is exempt from income tax, subject to certain conditions.

---

**Withholding taxes**

**Payments to non-resident persons**
According to Section 83(1) of the ITA, a tax is imposed on every non-resident person who derives any dividend, interest, royalty, rent, natural resource payment, or management charge from sources in Uganda. WHT at a rate 15% therefore applies on gross dividend payments, interest, management fees, and royalty payments in respect of non-treaty countries.

However, Section 83(5) exempts interest paid by a resident company in respect of debentures that:
• were issued by the company outside Uganda for the purpose of raising a loan outside Uganda
• were widely issued for the purpose of raising funds for use by the company in a business carried on in Uganda or the interest is paid to a bank or a financial institution of a public character, and
• the interest is paid outside Uganda.

A ‘debenture’ is defined in the ITA as any form of debt, including debenture stock, mortgage stock, loan, loan stock, or any similar instrument acknowledging indebtedness, whether secured or unsecured. The term ‘widely issued’ is also specifically defined.

Also, the rate of WHT on interest derived by a non-resident person from government securities is 20%.

Payment of re-insurance premiums to non-resident persons is subject to WHT at a rate of 10%. The requirement to withhold tax does not apply to the African Reinsurance Corporation and PTA Reinsurance Company.

**Payments to resident persons**
The rate of 15% also generally applies to payments of dividends and interest to resident persons, except in the following circumstances, where different rates apply:

• Dividends paid to a company controlling 25% or more of the voting powers: 0%.
• Dividends paid by companies listed on the Ugandan Securities Exchange to individuals: 10%.
• Interest on government securities: 20%.
• Interest paid by a natural person, paid to a financial institution (other than from government securities), paid by a company to an associated company, and interest that is exempt in the hands of the recipient: 0%.

There is no WHT on royalty payments to resident persons unless the payments are made by a government institution, local authority, company controlled by the government, or a ‘designated payer’.

**Double taxation agreements (DTAs)**
A taxpayer may benefit from the provisions of a DTA that Uganda has with another country. Please find below a table showing the countries with which Uganda has DTAs and the applicable WHT rates on various categories of income.

According to Section 88(2) of the ITA, the terms of the international agreement to which Uganda is a party prevails over the provisions of ITA in case the terms of the international agreement are inconsistent with the provisions of the Act.

Uganda

Note

1. With respect to the Uganda/Netherland DTA, the rate applicable on dividends is 15%, except where the investment is new or is an expansion of the current investment made after the DTA entered into (10 September 2006).

For new investments and expansions of current investment, the rates are:
- 0% if the beneficiary holds at least 50% of the shares in the company paying the dividends.
- 5% if the beneficiary holds less than 50% of the shares in the company making the payment.

**Tax administration**

**Taxable period**
A normal period of 12 months is known as a year of income. This spans from 1 July to 30 June. On application, a taxpayer may be allowed to use a substituted year of income, which is a 12-month period other than the normal year of income.

**Tax returns**
The ITA provides for two provisional returns within a 12-month period (financial year). The first provisional return is due within the first six months of the accounting year while the second is due by the end of the 12th month of the accounting year.

The Self-Assessment Return (SAR) is due by the end of the sixth month after the end of the accounting year.

Electronic filing has been introduced for all tax returns.

**Payment of tax**
For all companies, a system of provisional payments on account, based on estimated profits, is in place. The first payment of 50% is due by the end of the sixth month of the accounting period and the second payment is due by the end of the 12th month. The balance is expected to be paid together with the SAR.

**Tax audit process**
In most cases, audits are initiated by the URA, which notifies the taxpayer of the records they need to prepare before commencement of the audit. The URA then reviews the records. This is normally done at the premises of the taxpayer, where the URA can obtain the necessary clarifications from the bookkeepers.

The audit findings are then communicated to the taxpayer subsequent to whom an assessment is raised. If the taxpayer does not agree with the objection decision, they may appeal to the Tax Appeals Tribunal or to the high court.

**Statute of limitations**
The ITA requires a taxpayer to maintain records for at least five years after the end of the year to which the records relate.

The VAT Act provides for records to be maintained for six years after the end of the tax period to which they relate.

**Topics of focus for tax authorities**
The focus of the URA keeps shifting but is generally based on the risk analysis of the information availed to them. Currently, the focus is on transfer pricing and the application of reduced tax rates in respect to DTAs.
Significant developments

New tax rules
In December 2015, the Parliament of Ukraine passed laws on improvement of tax legislation. As a result, a number of changes to the corporate income tax (CIT), value-added tax (VAT), and other taxes became effective from 1 January 2016.

Starting from 1 January 2016, taxpayers report and pay CIT quarterly. The adopted amendments cancel advance CIT monthly payments (which applied in 2015); however, advance payments on dividends (ATD) still exist.

Professional advice is recommended before deciding on the actual impact of any of the tax provisions.

Taxes on corporate income

CIT applies to taxable profits earned by resident entities in Ukraine and abroad and non-residents with a permanent establishment (PE) in Ukraine. Resident entities are taxed on their worldwide income. Non-resident entities are taxed on their Ukrainian-source income.

Ukraine’s standard CIT rate is 18%.

Withholding tax (WHT), at a rate of 15%, applies to the majority of income payments for non-residents, unless an exemption is given under a double taxation treaty (DTT). Ukraine has 70 effective DTTs in place. See the Withholding taxes section for more information.

Special CIT rates for insurance and gambling activities

Insurance activities
Insurance companies pay special CIT of 0% and 3% on their income. Long-term life insurance premiums, pension insurance premiums, and voluntary medical insurance premiums are subject to the 0% rate; the 3% rate applies to all other insurance premiums received by the company. Such amounts of CIT of 0% or 3% paid from insurance premiums reduce taxable profit of an insurance company, which is subject to the standard 18% rate.

Gambling activities
Organisation of lotteries and operating of gambling machines are subject to the 10% rate; the 18% rate applies to bookmaker and other gambling activities (including casinos). Contrary to CIT for insurance companies, amounts of CIT of 10% or 18% paid from gambling income does not reduce taxable profit of a company engaged in gambling activities (standard 18% rate is applied to the full amount of the taxable profit).
Ukraine

*Local income taxes*
No CIT is levied at the regional or local level, except simplified (unified) tax (see the Tax credits and incentives section for a description of simplified [unified] tax).

*Corporate residence*
Corporate residence is determined by the place of incorporation.

*Permanent establishment (PE)*
The Ukrainian definition of a PE generally follows the PE definition from the Organisation for Economic Co-operation and Development (OECD) Model Tax Convention, but with stronger agency tests.

In particular, a non-resident’s PE is defined as a fixed place of business through which the business activity of a non-resident entity is wholly or partly carried out in Ukraine. A PE includes, among other things, a place of management, affiliate, office, server, etc.

The Tax Code contains the concept of a service PE whereby the provision of services (apart from the provision of personnel), including consultancy services, by a non-resident through its employees or other personnel in Ukraine, shall constitute a Ukrainian PE of this non-resident, provided such activities (within the framework of one project) last more than six months in any 12-month period.

A construction site in Ukraine may also give rise to a taxable presence of a non-resident in Ukraine in the form of a PE if the length of the construction activities exceeds six months.

The Tax Code also provides for the concept of a non-dependent agent, which means, specifically, a Ukrainian agent acting on behalf of more than one non-resident in the ordinary course of its business should not constitute a PE in Ukraine.

Still, there is a list of exclusions from the PE definition. In particular, according to the Tax Code, auxiliary and preparatory services of a non-resident should not result in the creation of a PE; however, in practice, the Ukrainian tax authorities usually interpret the term ‘business activity’ in a very broad sense, and, without DTT protection, may consider any type of activity as giving rise to a taxable presence (i.e. a PE) of a foreign entity in Ukraine.

*Other taxes*

*Value-added tax (VAT)*
There are three VAT rates: 20%, 7%, and 0%.

The rate of 20% applies to almost all transactions subject to VAT except specific transactions subject to 7% and 0% VAT.

The reduced rate of 7% applies to supply and import of registered medicines and specific medical goods, as well as medicines, medical goods, and medical equipment allowed to be used in clinical trials.

The 0% VAT rate applies to the export of goods. The 0% rate also applies to the supply of international transport services (confirmed by a single international shipping document), toll manufacturing services (if the finished goods are then exported from Ukraine), and certain other services.
Provision of services to a non-resident is not considered to be zero-rated. Such services are subject to 20% VAT or considered to be outside the scope of VAT (effectively exempt with no right to claim input VAT), depending on the place of supply as determined by the legislation.

Transactions that are subject to VAT include the following:

- The supply of goods and services when the place of supply is in Ukraine, including when the supply is made free of charge without consideration.
- Transfer of the object of a financial lease to the lessee.
- The importation of goods into Ukraine.
- Exportation of goods.
- International transportation services.

Transactions that are not subject to VAT include the following (among others):

- The issue, sale, and exchange of securities.
- The transfer of property from a lessor to a lessee under an operating lease and the return of property upon expiration of the operating lease (other than in the course of import operations).
- Interest/commission element of lease payments under financial lease agreements.
- Provision of financial loans and bank guarantees.
- Insurance and reinsurance services supplied by licensed insurers and services of insurance/reinsurance agents and brokers.
- Payment of royalties.
- Reorganisation of a legal entity (merge, spin-off, accession, division, and change of legal form).
- Transit of cargo and passengers through the Ukrainian territory and services related to such transit.
- Supply and import of goods and services within international technical assistance projects or import of humanitarian aid.

**VAT registration**

Tax registration as a VAT payer is compulsory if the volume of an entity’s taxable transactions exceeds the compulsory registration threshold. The current registration threshold is 1 million Ukrainian hryvnias (UAH) for the past 12 consecutive months. An entity qualifying as a taxable entity should register with the tax authorities at the place of its location and obtain a VAT registration number.

Voluntary VAT registration is available prior to achievement of the mentioned threshold. The application for VAT registration may be submitted simultaneously with the application for the state registration of the business entity.

There is no mechanism for a non-resident to register for VAT purposes without a PE in Ukraine. Accordingly, any Ukrainian VAT incurred by a non-resident is non-recoverable.

**Electronic VAT administration**

A special electronic administration system, which includes VAT accounts for all VAT payers in the State Treasury, is used for settlement of VAT to the budget. Both VAT output and VAT input should be reflected in this system. For these purposes, VAT accounting documents (VAT invoices) are issued electronically and are subject to mandatory registration by tax authorities.

The aim of this system is to make VAT input of the customers (i.e. VAT payers) guaranteed by payment of VAT liabilities by the suppliers. VAT input on domestic purchases can be recognised by the taxpayer only if the supplier issued a duly registered VAT invoice. In order to register a VAT invoice, the supplier should have sufficient balance in the electronic VAT administration system (e.g. sufficient amount of input
VAT). Otherwise, it may be required to transfer cash to the VAT account (i.e. to prepay its VAT liabilities).

**VAT recovery and refunds**
Generally, VAT incurred by a registered entity on the purchase and/or importation of goods and services used for the purpose of its own business (except for VAT incurred in relation to exempt supply) may be recovered by way of a credit against output VAT. If the VAT credit exceeds VAT output, a VAT refund is available in the form of a cash payment.

VAT refunds should be performed in a chronological order based on sequence of claims reflected in two registers maintained by the tax authorities and published on their official website. One register is prescribed for eligible exporters, while claims made by other taxpayers are reflected in the second register.

A VAT refund should be provided within 40 calendar days following the deadline for submission of the VAT return.

**VAT returns**
VAT returns must be filed by the taxpayer on a monthly basis in electronic form. Monthly tax returns are due within 20 calendar days following the end of the reporting month. The amount of tax payable is assessed on the basis of tax returns and is due within ten calendar days following the deadline for filing the relevant tax returns.

VAT liabilities are paid to the budget through a special VAT account based on the registers submitted to the State Treasury by the tax authorities.

**Customs duty**
Customs duty is payable by the importer upon import of the goods into Ukraine. Customs duty rates are established by the Customs Tariff. Currently, there are two duty rates: relieved and full rates. Relieved rates of duty apply to goods originating from World Trade Organization (WTO) countries and countries that have granted Ukraine ‘most favoured nation’ trade status. Full rates of duty apply to the goods originating from all other countries or where the country of origin cannot be determined (is unknown).

Starting 1 January 2016, Ukraine cancelled the additional import fee that was temporarily introduced in February 2015 (10% for agricultural products and 5% for other products).

Ukraine has concluded free-trade agreements (FTAs) with all countries/members of the European Union (EU), Commonwealth of Independent States (CIS), European Free Trade Association (EFTA) countries, and such countries as Georgia, Macedonia, and Montenegro. These agreements allow many goods to be imported into Ukraine duty-free (or with reduced rates of duty), subject to compliance with preferential rules of origin.

Due to political issues, Russia and Ukraine currently suspended the FTA between each other and introduced an embargo on import of selected goods (mostly on agrarian products and foods).

Russia also introduced some transit restrictions on goods coming from Ukraine.

Ukraine has no export duties except on natural gas, scrap metal, livestock, rawhide, barley, and certain oil seeds.

**Excise taxes**
Excise tax applies to certain goods imported to or produced in Ukraine. Excisable goods include ethyl alcohol, alcoholic beverages, beer, tobacco and tobacco products, cars, car bodies, motorbikes, electricity, liquefied gas, petrol, diesel fuel, other fuel material, and electric power.
The rates of excise tax can be *ad valorem* (a percentage of the value of the goods), specific (in monetary units per unit of goods), or combined.

A special local 5% excise tax applies to retail sales of alcoholic drinks, beer, and tobacco products, and of EUR 0.042 per 1 litre of fuel (i.e. petrol, diesel fuel, or gas).

Starting March 2016, Ukraine introduced a special electronic administration system for excise tax on fuel (one month testing period following full implementation). This system is aimed to control income and outcome flows of fuel in the market. The system requires entities to issue and register excise accounting documents (excise invoices) electronically on each sale operation of the fuel.

**Tax on real estate other than land plots (real estate tax)**

Owners of residential and non-residential property in Ukraine (both individuals and legal entities, including non-residents) are subject to local real estate tax (RET). The tax base is determined based on the size of the living space of a real estate asset.

Some types of property are exempt from RET, for example:

- Industrial buildings (i.e. production buildings, workshops, storehouses of industrial entities).
- Buildings and facilities of agricultural producers, which are intended for use for agricultural activity.
- Non-residential premises that are used by small and medium business entities, conducting their activities at ‘small architectural structures’ (e.g. kiosks, stalls, pavilions) and markets.
- Property owned by state authorities and the non-profit organisations established by them, etc.

The RET rate is set by the local government but generally cannot exceed 3% of the minimal salary per square metre (for 2016, the maximum is UAH 41.34 per square metre).

RET paid by legal entities is available as a credit against CIT liabilities.

**Land tax**

Land tax is a local tax and assessed annually for the following year and is paid monthly in equal instalments by the owners or users of the land. The rate of land tax depends on the category, location, and the existence of a state valuation for each particular land plot.

**Transport tax**

Starting from 1 January 2016, a local transport tax shall be charged on owners of passenger cars with an average market value exceeding 750 minimal salaries (i.e. UAH 1.03 million) and not older than five years.

A tax of UAH 25,000 for each car per year shall be paid by the car owner.

**Stamp duty**

Stamp duty is imposed on certain actions, including the notarisation of contracts and the filing of documents with the courts. In most cases, the amounts involved are nominal.

Operations carried out at commodity exchanges and the sales of real estate incur a stamp duty of 1%.

**Special Pension Fund charges**

The following special charges are payable to the State Pension Fund:
Ukraine

- 3%, 4%, or 5% charge on the value of a new car, which is first subject to registration with the state authority (state traffic inspectorate), depending on the said value (for the year 2016, the following criteria is applicable: up to UAH 219,450, 3%; above UAH 219,450, but not more than UAH 385,700, 4%; above UAH 385,700, 5%).
- 1% charge on the acquisition of real estate payable by individuals and legal entities that purchase real estate.
- 7.5% charge on mobile communication services.
- 10% charge based on the value of precious metal contained in jewellery during its marking on the public enterprises of assay control.
- 2% charge on the amount of foreign currency purchased in cash by individuals.

**Charges on environmental pollution**
Environmental pollution charges (ecological taxes) are imposed on any legal entity that discharges contaminants into the environment (air or water) or disposes of waste. The actual rate depends on the type and toxicity of each contaminant.

Charges on environmental pollution are deductible for CIT purposes.

**Charge for subsoil usage (rent)**
Companies engaged in extracting mineral resources in Ukraine, regardless of the form of their ownership, are liable for a charge for use of subsoil.

Rent payment for subsoil use is calculated as follows:

\[
\text{Rent} = \text{Value of extracted mineral resource} \times \text{Cost of respective unit of extracted mineral resource} \times \text{Tax rate} \times \text{Adjustment coefficient}
\]

The value of extracted mineral resources is determined as the greater of the following two calculation methods:

- The actual taxpayer’s selling prices.
- The taxpayer’s costs increased by the established profitability coefficient.

Specific rules apply in determining the selling prices for extraction of oil, condensate, natural gas, and iron ore.

Adjustment coefficients may apply to the rent payment for subsoil use rates depending on the type of minerals and conditions of extraction. For example, coefficient 0.25 will be applied to the tax rate for iron ore extracted by underground mining methods with a depth of over 300 metres for the enrichment of magnetite iron content of less than 35%.

In 2016, tax rates for oil and condensate are 45% (if explored from a depth of less than 5,000 metres) and 21% (if explored from a depth of more than 5,000 metres), for natural gas are 29% (if explored from a depth of less than 5,000 metres) and 14% (if explored from a depth of more than 5,000 metres), and for iron ore are 8%.

Charges for the use of subsoil are deductible for CIT purposes.

**Payroll taxes**
Employers and other business entities that pay income to individuals are defined as tax agents and are responsible for withholding personal income tax (PIT), military tax, and mandatory unified social contribution (USC) and remitting them to the state.

**Unified social contributions (USCs)**
Employers (including representative offices of foreign companies in Ukraine) are required to pay USC in respect of their employees. USC applies to all salaries paid through the payroll of a Ukrainian entity or a Ukrainian representative office of a foreign entity, as well as remuneration paid to individuals under civil agreements.
Starting from 2016, the general USC rate (payable by the employer) is 22% (except for special decreased rates for contributions regarding disabled people, etc.), which applies to gross remuneration. The USC accrued by the employer is deductible for CIT purposes.

The taxable base for contributions (both employee and employer) is capped. For 2016, the cap is set at 25 times the subsistence minimum set for able-bodied individuals (based on the subsistence minimum valid as of 1 January 2016, the cap is UAH 34,450 per month).

Employees are relieved from paying of USC starting from 1 January 2016.

**Other local taxes**
According to the Tax Code, there are other local taxes that may be levied at the discretion of the local authorities (i.e. vehicle parking place duties, tourism duty).

**Branch income**
Domestic branches or other separate units are not treated as separate taxpayers for CIT purposes.

In Ukraine, it is not currently possible to register a branch of a foreign legal entity. A foreign company may set up a representative office in Ukraine, which is similar to an unincorporated branch. A non-resident company conducting business activities via a representative office is deemed to carry out business in Ukraine through a PE and may be subject to CIT at the standard rate unless protected by a DTT. When a foreign company conducts business in Ukraine through a PE, the taxable income should be determined on the same basis as for domestic entities. If the PE has no separate accounts, the taxable income may be determined as 30% of the sales proceeds attributed to the PE (the income derived in respect of activities in Ukraine).

Distributions made by a PE (from after-tax income) to its head office should not trigger any further taxation in Ukraine, provided that the head office is in a jurisdiction that has an effective DTT with Ukraine.

**Income determination**
The Tax Code determines taxable profits as net profits before tax (NPBT) as per accounting records, either Ukrainian statutory or International Financial Reporting Standards (IFRS), and adjusted for ‘tax differences’.

Taxpayers with prior year annual income equal to or less than UAH 20 million (net of indirect taxes) may opt out of making the adjustments. Note that they do remain eligible for loss carryforward allowances (see the Deductions section).

**Inventory valuation**
A taxpayer is entitled to adopt any of the methods of inventory valuation prescribed by financial accounting rules, namely: the first in first out (FIFO) method, weighted average methods, identified cost of unit of goods, normative cost, or sale price. The last in first out (LIFO) method does not apply in Ukraine.

**Capital gains on the sale of property**
Income from the sale of property (including buildings and land plots) should be recognised according to financial accounting rules.
Ukraine

**Income from securities**
Profit from trading in securities is taxable at the standard CIT rate. Incurred losses are non-deductible, but may be carried forward to offset future profits from trading in securities without any limitations.

The same rules apply for both listed and non-listed securities.

**Dividend income**
Dividends received by a Ukrainian entity from another Ukrainian entity (CIT payer or person operating within group 4 of the simplified [unified] tax regime) are exempt from CIT. Dividends received by Ukrainian companies from foreign companies are not exempt from CIT.

Companies paying dividends are required to pay advance CIT on payment of dividends (ATD) at the standard rate, unless the dividends are paid to individuals or out of received dividends (with some other exceptions). ATD applies only to the portion of dividends that exceeds profits of the respective dividend year for which CIT is already paid.

ATD can be used to meet subsequent CIT liabilities. If ATD is not used in the year the dividend is paid, it is carried over to future years, but cannot be refunded.

**Interest income**
Interest received by taxpayers is included in their taxable income on a general basis according to financial accounting rules.

**Rent/royalties income**
Income from rent/royalties received by taxpayers is included in their taxable income on a general basis according to financial accounting rules.

**Foreign exchange gains/losses**
Realised and non-realised foreign exchange gains/losses are generally treated as taxable income/deductible expenses according to financial accounting rules.

**Other significant items**
Ukrainian tax legislation does not provide special tax treatment for bribes, kickbacks, or illegal payments.

There are no special tax accounting rules for interest-free loans or financial aid from non-residents.

**Foreign income**
Foreign income is taxed under the general rules, and there are no special rules regarding anti-deferral or unremitted earnings.

---

**Deductions**

**Depreciation and amortisation**
Assets whose values are more than UAH 6,000 that have a useful life exceeding one year are required to be depreciated for tax purposes. Depreciation is determined on a monthly basis and is computed using the following methods:

- Straight-line.
- Reducing balance.
- Method of accelerated reduction of a residual value.
- Cumulative.
The production-based method of amortisation is not allowed for tax purposes.

Fixed assets are divided into 16 groups according to their statutory minimal useful life. The useful life of fixed assets may be extended by a taxpayer.

There are no special rules prescribed for tax accounting of repair costs. Ukrainian statutory or IFRS rules should apply.

The following intangible assets may be amortised using one of the above mentioned methods over the period of an asset’s lifetime as defined in the documents certifying the rights to the intangibles and considering the minimum period set by the law:

- Rights to use natural resources.
- Rights to use property.
- Rights on intangible assets.
- Technology, know how (not less than five years).
- Copyrights (not less than two years).
- Other intangible assets.

Taxpayers are entitled to set the amortisation period of the intangible assets on their own, but it must not be less than two years and not more than ten years of continuous operation (this only applies when the documents establishing the right to use do not specify a term for the use).

**Goodwill**
Amortisation of goodwill is not permitted (i.e. not deductible) for tax purposes.

**Organisational and start-up expenses**
There is no limitation for deduction of organisational and start-up expenses incurred prior to the entity’s registration (accounting rules should apply).

**Research and development (R&D) expenses**
R&D expenses are deductible according to financial accounting rules.

**Interest expenses**
Interest paid is generally deductible for CIT purposes, but the deduction of interest expense in favour of non-resident related parties is limited according to the thin capitalisation rules (see Thin capitalisation in the Group taxation section).

**Bad debt**
Based on the current wording of the Tax Code of Ukraine, bad debts could be treated as non-deductible.

**Loan loss provisions (LLPs)**
Banks and other financial institutions create LLPs according to IFRS.

The deductibility of the LLPs is restricted to the lower of the following limits:

- 20% (25% for 2016) of the total value of assets subject to provisioning, and
- the credit risk limit set by the National Bank of Ukraine (other authority for financial institutions).

Only debts that qualify as bad debts under the Tax Code can be written-off at the expense of the LLPs for tax purposes. The amount of the LLPs used for the write-off of non-qualifying debts should be added back to increase the taxable profits (decrease the loss).
Because of the new rules effective from 1 January 2015, the Tax Code also prescribes the transitional provisions for the LLPs. The positive (negative) difference between the LLPs calculated according to the previous edition of the Tax Code as of the end of 2014 and under the new rules as of 1 January 2015 can be carried forward over the next three years in equal parts.

**Other reserves (provisions)**
Provisions for vacation and salary payments are allowed. Other provisions for future costs (i.e. warranty, contingent liabilities, etc.) are disallowed. Respective expenses covered by these provisions (except vacation and salary payments) are deductible when incurred.

**Charitable contributions**
Only 70% of payments for goods or services to non-profit organisations (except budgetary ones) is tax deductible.

The deductibility of the costs of goods or services supplied for free to non-profit organisations is limited by 4% of the previous year’s net profit.

**Pension expenses**
The obligatory Ukrainian social security insurance contributions, including state pension contributions charged on payroll expenses, are deductible for employers.

There are no limitations prescribed for the deduction of the employer’s payment to non-state pension organisations (financial accounting rules should apply).

**Payment for directors**
Payments (including bonuses) relating to business are normally deductible payments.

**Fines and penalties**
There are no limitations prescribed for deduction of fines and penalties (financial accounting rules should apply).

**Taxes**
CIT, PIT, WHT/remittance taxes, and VAT incurred on purchases are not deductible. VAT is deductible if it cannot be offset against output VAT. Other taxes are generally deductible in full.

**Other significant items**
There is no requirement to prove the connection of costs to the company’s ‘business activities’. The exception is the need to differentiate between business and non-business fixed assets.

General requirements for the documentation of the transactions for accounting needs (i.e. contracts, acts of acceptance, etc.) will apply for the substantiation of expenses for tax purposes.

**Net operating losses**
Losses can be carried forward without limitations.

Ukrainian tax legislation does not provide for refunds for losses carried back.

**Payments to foreign affiliates**
The following rules need to be followed with regard to payments to foreign affiliates:

- Only 70% of payments for goods or services to residents of low tax jurisdictions is tax deductible.
• Deduction of royalties paid to a non-resident is limited to royalty income plus 4% of net income of the previous year.
• Royalties paid to (i) non-beneficial owners, (ii) low tax jurisdictions, (iii) non-residents that are exempt from tax on royalties in the country of their residence, and (iv) non-residents for trademarks originated from Ukraine are not tax deductible.

The above limitations can be waived if a taxpayer confirms the market level of payments in accordance with the transfer pricing rules (even if the transactions are not controlled for transfer pricing purposes).

**Group taxation**

In Ukraine, each legal entity is taxed individually.

**Transfer pricing**

The transfer pricing rules apply for CIT purposes only. The list of controlled transactions for transfer pricing purposes is as follows:

- Business transactions that have an impact on taxable profits, with related party non-residents of Ukraine.
- Cross-border business transactions on sale of goods through non-resident commissionaires.
- Business transactions that have an impact on taxable profits, with residents of jurisdictions determined by the Cabinet of Ministers of Ukraine (CMU) on the following criteria:
  - States (territories) where the CIT rate is less than the Ukrainian rate by 5%.
  - States that do not have international agreements with Ukraine containing provisions on exchange of information.
- If within a chain of business transactions between related parties (tax resident of Ukraine and a non-resident), the ownership before transferring from one counterparty to another transfers to a non-related intermediary, these cross-border transactions between related parties are considered to be controlled if such intermediary does not perform significant functions, does not use significant assets, and does not bear significant risks in respect of such transactions.

Transactions with the same counterparty are considered as controlled if the total annual amount of the transactions with one counterparty (calculated according to accounting rules) exceeds UAH 5 million (net of indirect taxes), provided the total annual income (calculated according to accounting rules) of the taxpayer from any types of activity exceeds UAH 50 million (net of indirect taxes).

Some transactions are considered at arm’s length (i.e. transactions in which prices are subject to state regulation, transactions subject to mandatory valuation, transactions in which prices are determined by auction, transactions on forced sale of collateral, etc.) if the conditions of transactions meet respective legislation requirements.

There are five methods for determining the market price:

- Comparable uncontrolled price (CUP).
- Resale price method.
- Cost plus method.
- Net profit (margin) method.
- Profit split method.

The CUP method is the primary transfer pricing method to be used over all other methods. If this method is not relevant and there is an equal reliability of the ‘resale
Ukraine

price’ method or the ‘cost plus’ method as well as the net profit (margin) method or profit split method, the first two methods are given a priority.

The CUP method should be applied for cross-border transactions (with the residents of the jurisdictions established by the CMU) with commodities quoted on the commodity exchange; otherwise, the profitability of all counterparties involved in the chain of business transactions has to be disclosed.

For transfer pricing control purposes, the following sources of information can be used:

• Information regarding comparable transactions of the taxpayer, as well as one’s counterparty, with non-related parties.
• Any publicly available sources of information that provide information on comparable transactions.

All taxpayers with controlled transactions with one counterparty exceeding UAH 5 million (net of indirect taxes) should file a report on controlled transactions by the first of May (each year) of the year following the reporting year.

All taxpayers performing controlled transactions should have transfer pricing documentation. Transfer pricing documentation, substantiating the arm’s-length nature of prices, should be submitted only upon the request of the tax authorities within one month after receiving the request. Transfer pricing documentation should be prepared in Ukrainian in any format (either one document or a set of documents); however, the precise rules regarding the content of the documentation have to be followed.

The tax authorities will monitor the transfer pricing documentation provided without the involvement of the taxpayer.

The Tax Code of Ukraine also provides for a specialised transfer pricing audit (the tax authorities are not allowed to examine pricing in controlled transactions during normal full-scope tax audits). Its duration cannot exceed 18 months, but prolongation is possible for another 12 months. Every six months of the transfer pricing audit, the tax authorities should update the taxpayer with the status of the transfer pricing audit.

The tax authorities cannot conduct more than one transfer pricing audit of one controlled transaction within one calendar year (for each transaction), although other (non-transfer pricing) tax audits can be conducted during this period. The statutory limitation period for transfer pricing assessments is seven years.

The Tax Code of Ukraine defines the following penalties for non-compliance with transfer pricing rules:

• 3% of the controlled transaction value for the failure to file transfer pricing documentation (limited to 200 minimum salaries [UAH 275,600] for all controlled transactions).
• 1% of the controlled transaction value for the failure to declare the controlled transaction in the report on controlled transactions (limited to 300 minimum salaries [UAH 413,400] for all unreported controlled transactions).
• 300 minimum monthly salaries (UAH 431,400) for failure to file (or late filing) the report on controlled transactions.

Payment of such penalties does not exempt the taxpayer from the obligation to file a transfer pricing report and/or transfer pricing documentation.

Large taxpayers have the right to enter into Advance Pricing Agreements (APAs) with the State Fiscal Service of Ukraine in order to agree on certain terms of controlled transactions in advance.
**Thin capitalisation**

The following rules apply to legal entities whose debts to non-resident related parties exceed equity by 3.5 times (10 times for financial institutions/leasing companies):

- The deduction of interest expense for these taxpayers is limited by the amount of 50% of earnings before interest, taxes, depreciation, and amortisation (EBITDA).
- The non-deductible portion of interest can be carried forward indefinitely. However, each following year the residual amount of such interest should be reduced by 5%.
- For the purposes of thin capitalisation rules, debt includes any loan, deposit, repo transactions, financial leasing, and any other indebtedness, regardless of its legal form.

**Controlled foreign companies (CFCs)**

There are no specific CFC rules in Ukraine, but significant development of local legislation in this area is expected in 2016 (i.e. implementation of some initiatives from the base erosion and profit shifting [BEPS] action plan).

**Treatment of inter-company items**

Ukrainian tax legislation provides the following treatment for inter-company items:

- Dividends received by a Ukrainian entity from another Ukrainian entity (CIT payer or person operating within group 4 of the simplified [unified] tax regime) are exempt from CIT. Dividends received by Ukrainian companies from foreign companies are not exempt from CIT.
- There is no limitation for the deduction of expenses in relation to the financing of management bodies, including holding companies.
- The deduction of cost-sharing and similar intra-group payments, other than remuneration for services actually rendered, is not specifically limited for CIT purposes (accounting rules should apply).

In addition to the above:

- The deduction of royalties paid to non-residents is limited to royalty income plus 4% of net income of the previous year.
- Royalties paid to (i) non-beneficial owners, (ii) low tax jurisdictions, (iii) non-residents that are exempt from tax on royalties in the country of their residence, and (iv) non-residents for trademarks originated from Ukraine are not tax deductible.
- The above limitations for royalties can be waived if a taxpayer confirms the market level of payments in accordance with the transfer pricing rules (even if the transactions are not subject to these rules).
- Transactions for the receipt (provision) of financial aid between a taxpayer and its branches and other separate units without legal entity status located in Ukraine shall not affect their taxable income or deductible expenses.
- Interest on loans is limited (see Thin capitalisation above).

**Tax credits and incentives**

Currently, the Tax Code does not provide for any significant incentives for CIT payers in certain industries/activities.

**Simplified (unified) tax regime**

Entities and individuals (i.e. private entrepreneurs) are entitled to use a simplified (unified) tax regime (with exemption from CIT) if certain requirements are met.

Groups 1 and 2 of the simplified (unified) tax regime are available for private entrepreneurs only, and group 3 for both private entrepreneurs and legal entities.
Ukraine

(depending on the types of activities, the level of income [only up to UAH 5 million, except agricultural producers], and the number of employees’ criteria).

This regime foresees a low effective tax rate (up to 10% of the minimal salary per month for a private entrepreneur or up to 5% of turnover for a private entrepreneur/an entity of the third group) and easier reporting for small businesses. However, specific types of business activities are prohibited under this tax regime (inter alia, transactions with certain excisable products, exploration/production/sale of precious metals and stones, company management and communication services).

Taxpayers of group 1 may not use cash recorders in their activity. Taxpayers of group 2 and 3 are obligated to start using cash recorders from the quarter following the one when their turnover exceeds UAH 1 million.

The group 4 classification of the simplified (unified) tax regime is available for qualified agricultural producers.

Agricultural producers are entitled to use a very favourable tax regime (with exemption from CIT), provided certain requirements are met. The main criterion requires that income from the sale of their own agricultural products constitutes not less than 75% of their total gross revenue of the previous tax (reporting) year.

Under this regime, the amount of tax due depends on the size of the agricultural land plot owned or rented by the agricultural producers. Starting from 1 January 2016, the tax rates vary from 0.16% to 5.4%, apply to the normative monetary value of one hectare of agricultural land, and depend on the type of such land.

**Foreign tax credit**

Tax residents are allowed a credit for foreign taxes paid on income received abroad, provided there is a DTT between Ukraine and the relevant foreign state. The amount of foreign tax credit is limited to the amount of Ukrainian tax that would arise from the equivalent income in Ukraine. To claim a tax credit, the taxpayer requires an official confirmation of payment issued by the relevant foreign tax authority.

**Withholding taxes**

WHT must be remitted to the authorities no later than the date when the payment is made to the income recipient.

Passive income (dividends, interest, royalties) from Ukrainian sources that is paid to non-resident entities is generally subject to 15% WHT. Other payments, including payments for engineering services, lease payments, and agency and brokerage fees, are also subject to 15% WHT, but payments for most other services are not subject to withholding.

A 15% WHT rate applies to income on the sale of real estate and on profits from the sale of securities.

Payments for freight services (including sea freight) are subject to 6% WHT.

WHT rates may be reduced under a relevant tax treaty.

The non-resident recipient of income sourced in Ukraine must also be considered the beneficial owner of such income in order to benefit from the reduced tax rates under relevant tax treaties. According to the Tax Code, agents, nominee holders, and other intermediaries in respect of received income cannot be beneficial owners of income sourced in Ukraine, and, therefore, are not entitled to favourable treaty provisions.
Payments to non-resident persons for advertising services are not subject to withholding. However, the resident payer is required to pay, from its own funds, a 20% remittance tax based on the value of such services.

A resident payer is similarly required to pay, from its own funds, a 12% remittance tax if a payment is made to a foreign insurer or reinsurer whose rating of financial reliability does not meet the requirements set by the authorised state agency. Otherwise, 0% or 4% rates apply.

As taxes on advertising and insurance are levied on a resident party, they cannot be relieved using a tax treaty.

**Notes**

1. The ownership threshold for the non-portfolio rate is 10%, 20%, 25%, or 50%, depending on the specific provisions in the treaty.
2. Several treaties contain a rate of 0% on interest paid to or guaranteed by a government or one of its agencies.
3. If more than one rate is shown, this means that the rate will depend on the type of royalties paid.
4. The 18% rate applies to dividends from privileged shares or other fixed payments on shares, as well as to disguised employment income. Dividends received from a Ukrainian legal entity CIT payer (other than collective investment arrangement) are subject to the 5% rate.
5. The lower rate applies to interest paid on certain credit sales and on loans granted by a financial institution.
6. The treaties with Japan, Malaysia, and Spain were entered into by the USSR before it dissolved. Ukraine will continue to honour these treaties, unless they are superseded.
7. The lower rate applies to interest paid in connection with the sale on credit of any industrial, commercial, or scientific equipment, unless the indebtedness is between associated enterprises.
8. The 0% rate applies if the investor holds at least 50% of the capital of the company paying the dividends and the capital invested is at least 1 million United States dollars (USD); the payer of dividends should not operate in the field of gambling, show business or an intermediation business, or in auctions.

9. The 0% rate will apply if a French company or companies hold, directly or indirectly, at least 50% of the capital of the Ukrainian company, and the aggregate investments exceed 5 million French francs.

10. The lower rate applies to interest paid on any loan granted by a bank.

11. The 0% rate applies if the investor directly holds at least 50% of the capital of the company paying the dividends, and the capital invested is at least USD 300,000.

12. The 10% rate applies if the company receiving the dividend has, for an uninterrupted period of two years before the dividend is paid, owned at least 25% of the capital stock of the company paying the dividends.

13. The 5% rate applies if the capital invested is at least USD 50,000.

14. The 0% rate applies if the Swedish company directly holds at least 25% of the voting power of the company paying the dividends and at least 50% of the Swedish company is held by Swedish residents.

15. The 0% rate applies only if the royalties are taxable in the United Kingdom.

16. The 10% rate applies if the company receiving the dividend directly owns at least 25% of the capital stock of the company paying the dividends.

17. The 5% rate applies if the investor (other than partnership) being a beneficial owner holds at least 25% of the capital of the company paying the dividends.

18. The 5% rate applies if the investor, being a beneficial owner, holds at least 20% of the capital of the company paying the dividends.

19. The 5% rate on dividends applies if the investor holds at least 20% of the capital of the company paying the dividends or the capital invested is at least 100,000 euros (EUR). The 5% rate on royalties applies in relation to royalties on trademarks, patents, or know-how.

20. The 5% rate applies in the case of interest paid in connection with the sale on credit of industrial, commercial, or scientific equipment or on any loan granted by a bank.

---

**Tax administration**

**Taxable period**

The reporting year for companies generally follows the calendar year. The exception is for qualified agricultural manufacturers (other than on simplified [unified] tax), whose reporting period starts from 1 July of the current reporting year and ends on 30 June of the next reporting year.

**Tax returns**

Tax returns for CIT should generally be submitted on a quarterly basis, but some taxpayers will have to submit them annually (newly established, agricultural producers, and taxpayers with prior year annual income equal to or less than UAH 20 million [net of indirect taxes]).

Monthly returns (e.g. VAT) must be filed within 20 calendar days following the end of the respective reporting month.

Quarterly returns are due within 40 calendar days following the last day of the reporting quarter.

Annual returns (CIT) are due within 60 calendar days following the last day of the reporting year.

Taxpayers also have to submit financial statements to the tax authorities.

Resident companies and non-resident entities with a PE in Ukraine must keep records that comply with the tax rules.

**Payment of tax**

Taxes payable assessed on the basis of tax returns are due within ten calendar days following the deadline for filing the relevant tax returns.

Monthly advance CIT payments (MATP) introduced in 2013 are eliminated starting from 1 January 2016. As an exception, taxpayers will be required to pay an advance
Ukraine

CIT payment in the amount of 2/9 of the tax liability for three quarters of 2016 by 31 December 2016.

Penalties
The tax authorities will charge significant penalties for late filing, late payment, or understating tax liabilities.

Late payment of tax may result in a penalty in the amount of 10% of the underpaid amount for delays of up to 30 calendar days (20% if the delay exceeds this).

If the tax liabilities are understated, the amount of penalty depends on the frequency of violations (i.e. understatement of CIT and VAT liabilities, overstatement of VAT refunds) during a period of 1,095 consecutive calendar days. In particular: 25% for the first violation, 50% for the second violation and each subsequent violation related to the same taxes.

In addition to these penalties, late payment interest (LPI) is calculated by the application of a rate of 120% per annum of the prime rate of the National Bank of Ukraine, effective from the actual date of underpayment on the amount of additionally assessed tax liabilities for the whole period of underpayment.

If a taxpayer fails to withhold tax when required, a penalty of up to 75% of the deficient tax is imposed.

Potential criminal responsibility could be claimed against the taxpayer’s management if the total amount of additional tax liabilities assessed by the tax authorities during the tax audit exceeds 500 times the minimal salary (UAH 725,000 starting from May for 2016). There are several options to close such criminal proceedings (the procedure should be properly managed from the legal perspective).

Tax audit process
The tax authorities may carry out scheduled audits once a year. Taxpayers must be notified of the audit in writing at least ten days in advance. In addition, the tax authorities may perform out-of-schedule audits in certain circumstances (e.g. if a taxpayer does not file tax returns on a timely basis or is reorganised or liquidated).

The tax authorities have the right to audit a taxpayer’s accounting, correctness, and completeness of the calculation of NPBT according to the Ukrainian statutory or IFRS rules.

Transfer pricing audits are conducted on a separate basis.

Statute of limitations
Under Ukrainian tax legislation, a three year statute of limitations applies (1,095 days) on any outstanding Ukrainian tax liability, starting from the date a tax return is due to be filed and/or the date the tax is due to be paid, if assessed by the tax authorities. There is no limit on the statute of limitations in which an assessment may be made if a taxpayer has deliberately evaded taxation (if proven in court) or when a taxpayer fails to file a return.

The statute of limitations for transfer pricing controlled operations is seven years (2,555 days).

Tax advice
Tax advice may be sought from the tax authorities, who are required to issue such clarifications. Tax advice is not legally binding and may be challenged in court. A taxpayer may use the tax advice as guidance on the methodology to be applied by the
taxpayer. In practice, the tax advice often does not provide solid protection against future assessment of tax, but does protect from penalties.

**Topics of focus for tax authorities**
The tax authorities are focusing on the following major areas with regard to corporate taxpayer compliance with the tax rules effective before 1 January 2015:

- The business nature of any taxpayer’s deductible expenses and their proper documenting for tax purposes.
- The deductibility of marketing, advertising, and promotional expenses.
- The deductibility of expenses that could be treated as financing of personal needs of individuals (e.g. housing, travel allowance, cost of education).
- Losses carried forward.
- Proper payment of advance CIT (either general or connected to payments of dividends).
- The deductibility of the fees paid for services from non-residents.
- Compliance with transfer pricing regulations.
- VAT refund issues.

Currently, a limited number of tax audits were conducted for the period after 2015. It is expected that the tax authorities will further focus their attention to the proper calculation of the tax base for CIT in accordance with the accounting rules (including timely documenting of expenses and their proper allocation between the periods) and proper application of tax differences, described above.

**Other issues**

**Exchange controls**
The key issues regarding Ukraine’s current exchange control regulations are as follows:

- Trade-related settlements between residents and non-residents can be made in foreign currency and Ukrainian hryvnia.
- Payments in foreign currencies in the territory of Ukraine are subject to a National Bank of Ukraine (NBU) licence, except for payments for goods, works, services, and payment of salaries in the temporarily occupied territory of Ukraine.
- Salaries to Ukrainian staff must be paid in Ukrainian currency (but expatriate employees can be paid in hard currency). Expatriates are unable to receive hard currency (local) salaries in Ukrainian bank accounts.
- Foreign loans must be registered with the NBU before funds are remitted to Ukraine.
- The maximum allowable interest rates for foreign fixed rate loans in hard currency (inclusive of any fees and charges due under the loan agreement) are 9.8% per annum for loans up to one year; 10% per annum for loans for one to three years; and 11% per annum for loans over three years. For loans with floating interest rates, the maximum allowable interest rate is three months of the USD London Interbank Offered Rate (LIBOR) plus 7.5%.
- Proceeds from exports must be credited to the exporter’s Ukrainian bank account in general within 180 days (within 90 days until 8 June 2016, we expect this to be prolonged) from the date of customs clearance (for goods) or the date of signing the act of acceptance (for services). Similarly, prepaid goods must be imported and cleared through customs in general within 180 days (within 90 days until 8 June 2016, we expect this to be prolonged) of payment. Failure to do so will result in a fine of 0.3% of the amount due or paid for each day of delay, but not more than the debt itself.
- Until 8 June 2016 (with possible prolongation), Ukrainian companies are generally obligated to exchange at the local market 75% of their foreign currency proceeds received from abroad (this restriction does not apply to making foreign investments into Ukraine starting from 11 May 2016). In order to enforce this limitation, the NBU
introduced a ban on offsetting receivables/payables in (i) hard currencies (e.g. US dollars, euros, Russian rubles [RUB]) regardless of the amount and (ii) other foreign currencies in the amount exceeding USD 500,000 under one agreement.

- Payments by Ukrainian business entities for services rendered by non-residents for amounts exceeding EUR 50,000 (annually) require confirmation from the Foreign Markets Monitoring Centre (FMMC) that the fee for the services does not exceed market prices. Provided the relevant documentation is in place, this should not delay payment. However, the process cannot be taken lightly, because no payment will be permitted if the FMMC rejects an application.
- Banks are required to report all requests for advance payments exceeding USD 50,000 to the NBU and cannot perform them for at least three operational days after informing the NBU. The NBU may reject such applications, in which case no payment can be made. The restriction does not apply to advance payments via a letter of credit, confirmed by a first-grade bank. Advance payments under import contracts exceeding USD 500,000 generally may be performed only via a letter of credit.
- Ban on purchase of hard currency at the expense of UAH loan funds (except purchase by individuals in order to repay a debt under retail hard currency loans).

A number of foreign currency transactions may be undertaken only if an individual licence has been obtained from the NBU. At the same time, the NBU introduced a ban on the transfer of foreign currency under most of the NBU’s individual licences until 8 June 2016 (this may be further prolonged). As an exception, legal entities are still allowed to transfer funds under an NBU individual licence in the amount not exceeding USD 50,000 per month per licence.

Additionally, the following key limitations continue to apply until 8 June 2016 (with possible prolongation) within the ‘stabilisation package’, enforced by the NBU:

- The NBU introduced a ban on remittance of funds to foreign investors due to:
  - proceeds from the sale of corporate rights, decrease of the charter capital, or withdrawal from legal entities
  - the sale of Ukrainian securities (except state bonds and other bonds via a stock exchange), and
  - the payment of dividends (recently, the National Bank of Ukraine has issued a letter, according to which it plans to lift the current ban on payment of dividends (26 April 2016); however, this ban is still effective).
- The NBU prohibited remittance of foreign currency by resident guarantors (except based on an NBU individual licence).
- Residents may not undertake early repayment of loans/financial aid in foreign currency under agreements with non-residents.
- Ukrainian residents (except for individuals) cannot purchase foreign currency if they have more than USD 25,000 on their current and/or deposit accounts as well as on special balance accounts as a security under warranties/letters of credit in all banks (with certain exceptions).
- The purchase of cash foreign currency is allowed in an amount not exceeding the equivalent to UAH 6,000 per day in one bank (with certain exceptions).
- The transfer of foreign currency abroad by individuals is allowed in the amount not exceeding (with certain exceptions):
  - UAH 15,000 per day without opening a bank account.
  - UAH 150,000 per month from a bank account.
- Withdrawal of cash from bank accounts is limited to:
  - UAH 500,000 per day in Ukrainian hryvnia.
  - The equivalent of UAH 50,000 in foreign currency.
- Transfers from abroad may be paid in foreign currency in the amount not exceeding the equivalent to UAH 150,000 per day. If the amount of transfer exceeds this threshold, it should be credited to the bank account in foreign currency.
**Choice of business entity**

Generally, a limited liability company is the most widely used corporate vehicle in Ukraine for both residents and non-residents. A limited liability company has a simple registration procedure, is inexpensive, and is easy to maintain. It also provides more flexibility in terms of repatriating dividends from Ukraine.

There is no statutory fee for the state registration of newly established legal entities and individual entrepreneurs.

**Business and tax treatment of intellectual property (IP)**

Ukrainian laws concerning IP rights provide for a rather developed background for IP usage. Economic rights of authors and neighbouring rights owners may be assigned or licensed. Moral rights are not transferable. Tax treatment for IP transactions is subject to separate analysis on a case-by-case basis since the Ukrainian tax legislation provides different approaches depending on the nature of the concluded agreement. For instance, the transfer of IP may be treated as a sale of non-tangible assets, the provision of services, or a royalty agreement.

For tax purposes, the term 'royalty' does not include payments for the use of computer programs by the end user or for purchasing electronic copies of IP for final consumption.

**Mergers and acquisitions (M&A) from a business and tax perspective**

There are no specific laws regulating public takeovers or mergers in Ukraine.

The Ukrainian Tax Code provides some guidance on the tax regime for corporate mergers and acquisitions. CIT consequences of such transactions will depend on their accounting in accordance with the financial accounting rules. No VAT refund for the newly established company will be available in cash for 12 months after the transaction.

**Legal regime of the Occupied Territory**

Temporarily (for ten years), there is an established free customs zone on the territory of Crimea, which means that all goods delivered to/from Crimea will be subject to customs clearance by the Ukrainian customs authorities.

The general rules are as follows:

- Goods delivered from the mainland of Ukraine to Crimea are subject to customs clearance with payment of export duty (if any) and 0% VAT. For tax purposes, such supplies will be considered as an export.
- Goods delivered from Crimea to the mainland of Ukraine are subject to general import procedures with payment of import duty and VAT.
- Delivery of goods in both directions is subject to veterinary, phytosanitary, ecological, and other state control measures.

**Legal regime of the anti-terrorism operation**

Temporarily, for the period of the anti-terrorism operation, there are certain specific regulations in respect of legal entities and individuals residing and/or doing business in the territory of the anti-terrorism operation (certain areas of Donetsk and Luhansk regions). These rules include, in particular:

- Moratorium on penalties under loan obligations.
- Moratorium on audits by the state authorities.
- Release from payments for state and/or municipal property.
- Release from penalties for non-obtainment of foreign currency under export transactions within 180 (90) days (see Exchange controls above).
United States (US) Foreign Account Tax Compliance Act (FATCA) rules compliance

The United States and Ukraine have reached an agreement in substance with regard to implementing the US FATCA under Model 1 Intergovernmental Agreement (IGA), and Ukraine has consented to disclose this status. On 26 June 2014, Ukraine was included into the US Internal Revenue Services (IRS) list of the countries with the IGA being treated ‘as effective’ until it is officially signed by the parties. In accordance with this status, the text of such IGA has not been released and financial institutions in Ukraine are allowed to register on the FATCA registration website consistent with the treatment of having an IGA in effect, provided that the jurisdiction continues to demonstrate firm resolve to sign the IGA as soon as possible.

These developments further follow the Resolution of the Cabinet Ministers dated 22 April 2015 approving the text of the IGA and authorising the Ministry of Finance to sign it.

Under the IGA between Ukraine and the United States, Ukrainian financial institutions are obligated to annually report to the local competent authorities information about financial accounts held in Ukraine by US taxpayers or foreign entities in which US taxpayers hold a substantial ownership interest. This information will be further transferred to the US IRS.
**Significant developments**

There is a growing trend of tax reforms in the Middle East region, and this may result in changes to the tax laws in the United Arab Emirates (UAE).

**Value-added tax (VAT)**
The Gulf Cooperation Council (GCC) (of which the United Arab Emirates is a member state) is in the process of approving a common legal framework for the introduction of a VAT system. See Value-added tax in the Other taxes section for more information.

**Municipality fee**
In addition to a charge of 15 dirham (AED) per room per night, the Emirate of Abu Dhabi has introduced a municipality fee to be levied on hotel stays at a rate of 4% on the total value of the invoice starting 1 June 2016. See Municipal or property tax in the Other taxes section for more information.

**Taxes on corporate income**
The United Arab Emirates is a federation of seven Emirates: Abu Dhabi, Dubai, Sharjah, Ajman, Umm Al-Qaiwain, Ras Al-Khaimah, and Fujairah.

Currently, the United Arab Emirates does not have a federal corporate income tax (CIT) regime; however, most of the Emirates introduced income tax decrees in the late 1960s, and taxation is therefore determined on an Emirate-by-Emirate basis.

Under the Emirate-based tax decrees, CIT may be imposed on all companies (including branches and permanent establishments [PEs]) at rates of up to 55%. However, in practice, CIT is currently only enforced in respect of corporate entities engaged in the production of oil and gas or extraction of other natural resources in the United Arab Emirates.

In addition, some of the Emirates have their own specific banking tax decrees, which impose CIT on branches of foreign banks at the rate of 20%.

**Corporate residence**
Tax residence under the tax decrees of the various Emirates is based upon the French concept of territoriality. Basically, the French territoriality concept taxes profits based on territorial nexus and does not tax profits earned outside the country.

**Permanent establishment (PE)**
For non-resident companies, the CIT liability will depend on the existence of any kind of PE. Most of the Emirate tax decrees include a definition of a PE that generally includes
United Arab Emirates

a branch, management or other fixed place of business, and presence through an agent that has and habitually exercises authority to conclude contracts on behalf of such corporation. The definitions need to be considered on a case-by-case basis under the relevant and applicable tax decree.

Other taxes

Value-added tax (VAT)
There is currently no VAT or similar tax system in the United Arab Emirates. The Gulf Cooperation Council (of which the United Arab Emirates is a member state) is in the process of approving a common legal framework for the introduction of a VAT system. This common VAT framework will form the basis for a national VAT system that will be implemented in each of the GCC states. Each member state would still be required to issue its own national VAT legislation, and will have the authority to determine specific VAT rules in certain areas.

The objective of the common VAT framework is to introduce a standard fully fledged VAT system in each member state. Accordingly, VAT would be charged on importation and on supply of goods and services at each stage of the supply chain.

The UAE Minister of State for Financial Affairs announced in February 2016 that VAT is expected to be introduced at a rate of 5% with some limited exemptions on items such as basic food items, healthcare, and education. The planned implementation date for the United Arab Emirates is 1 January 2018, but the law and details of the VAT system have yet to be published.

Customs duties
Generally, a customs duty of 5% is imposed on the cost, insurance, freight (CIF) value of imports. Other rates may apply to certain goods, such as alcohol and tobacco, and certain exemptions may also be available.

Excise taxes
Currently, there are no separate excise taxes levied in the United Arab Emirates. The GCC member states have been discussing the possible introduction of excise taxes applicable to certain commodities, but there is no official announcement on implementation date.

Municipal or property tax
Most Emirates impose a municipality tax on properties, mostly by reference to the annual rental value. It is generally the tenants’ obligation to pay the tax. In some cases, separate fees are payable by both tenants and property owners. For example, in the Emirate of Dubai, the municipality tax on property is currently imposed at 5% of the annual rental value for tenants or at 5% of the specified rental index for property owners.

Further, a registration fee may also be levied on transfer of ownership of land or property. For example, a land registration fee is levied in the Emirate of Dubai at a rate of 4% of the sale value of the property (a cost generally shared between the buyer and seller), payable to the Dubai Land Department. In Dubai, the registration fee may also apply on the transfer of shares in real property holding companies.

These levies are imposed and administered differently by each Emirate.

In addition to a charge of AED 15 per room per night, the Emirate of Abu Dhabi has introduced a municipality fee to be levied on hotel stays at a rate of 4% on the total value of the invoice starting 1 June 2016. Hotels and similar establishments are responsible for collecting and remitting such fee to the Abu Dhabi Tourism and Culture Authority.
United Arab Emirates

*Stamp taxes*
Currently, there are no separate stamp taxes levied in the United Arab Emirates.

*Hotel tax and tourism levies*
Most Emirates impose a hotel tax of 5% to 10% on the value of hotel services and entertainment. In addition, there may be tourist fees/charges of up to 10% levied for undertaking certain tourist/entertainment activities (e.g. events and shows).

These levies are imposed and administered differently by each Emirate.

A Tourism Dirham fee is levied in the Emirate of Dubai. This is a charge on hotel guests and tenants of hotel apartments ranging from AED 7 to AED 20 per room per night. In the Emirate of Abu Dhabi, a tourism fee of 6% is levied on the cost of the total stay.

*Payroll taxes*
Since there is currently no personal income tax (PIT) or payroll tax regime in the United Arab Emirates, there is no withholding obligation of PIT on the employers.

*Social security contributions*
There is a social security regime in the United Arab Emirates that applies to UAE and GCC national employees only. In most Emirates, and for a UAE national employee, social security contributions are calculated at a rate of 17.5% of the employee’s gross remuneration as stated in the employment contract, regardless of free trade zone (FTZ) tax holidays. Out of the 17.5%, 5% is payable by the employee and the remaining 12.5% is payable by the employer. For other GCC nationals working in the United Arab Emirates, employee contributions are determined in accordance with social security regulations of their home country.

The liability to withhold is on the employer.

These levies and rates may be administered differently by each Emirate, and the Emirate government may also make additional contributions.

*Branch income*
As each Emirate has a different CIT decree, the decree of each Emirate must be consulted to determine the treatment of branches of foreign corporations.

In certain Emirates, branches of foreign banks are governed by special banking tax decrees, where they are taxed at 20% of their adjusted taxable income.

*Income determination*
The tax decrees of the various Emirates levy taxation on financial accounting profits. The tax decrees may provide for additional adjustments in specific situations. Currently, these adjustments may not be too relevant given that CIT is not imposed for most companies (except for upstream oil and gas companies and branches of foreign banks having operations in the Emirate) in the United Arab Emirates.

*Deductions*
Deductions are determined based on accounting principles and the tax decrees of the various Emirates. Currently, these deductions may not be too relevant given that CIT is not imposed for most companies (except for upstream oil and gas companies
United Arab Emirates

and branches of foreign banks having operations in the Emirate) in the United Arab Emirates.

Group taxation

The United Arab Emirates does not currently permit group taxation.

Tax credits and incentives

The United Arab Emirates has many free trade zones that offer numerous incentives in the form of tax holidays/exemptions from CIT, PIT, and customs duties.

Free trade zones (FTZs)
Currently, there are over 30 FTZs (and business parks) in the United Arab Emirates, each having its own regulations. Businesses (and their employees) established in FTZs are generally eligible for guaranteed tax holidays for 15 to 50-year (generally renewable) periods. The FTZs also offer exemption from customs duties. The laws granting these holidays and exemptions are not consistent across the various FTZs. Each FTZ therefore needs to be considered separately.

Withholding taxes

There are currently no withholding taxes (WHTs) applicable in the United Arab Emirates.

Tax treaty network

UAE national individuals and UAE resident corporate taxpayers have access to an extensive and growing tax treaty network. These treaties may not be immediately relevant for obtaining relief from UAE taxation (as the UAE does not levy WHT or other forms of non-resident taxation); however, they may continue to allow for relief from tax in foreign countries. For completeness, the treaties currently in force are listed in the Withholding taxes section of the United Arab Emirates’ Corporate tax summary at www.pwc.com/taxsummaries.

Tax administration

Most companies operating in the United Arab Emirates (except upstream oil and gas companies and branches of foreign banks) are currently not required to file tax returns in the United Arab Emirates.
Significant developments

Extensive and far reaching reforms to the United Kingdom’s (UK’s) corporate tax system have been made in recent years. The reforms have a stated aim of “creating a tax system that is easy to understand, simple to engage with, and hard to evade, [and] successfully supports investment in business, as well as those who work hard and save” (Financial Secretary to the Treasury, December 2015). The main areas of reform have included:

- Reductions in the rate of corporation tax.
- Redefining the corporate tax base, including aspects of the Organisation for Economic Co-operation and Development (OECD) base erosion and profit shifting (BEPS) project.
- Policy and practice concerning tax evasion and unacceptable tax avoidance.
- Administration and collection, including plans for increased use of digital systems.

Because the UK legislative process can lag behind the announcement of proposals, certain changes are already law, others are very likely, or practically certain, to become law, whilst others are issues announced for wider consultation and future enactment into law.

Most of the reforms to tax rules are announced in November/December and March each year before becoming law in the Finance Act, usually in the following July. In November 2015 and March 2016, the government announced further reforms to be included in the 2016 legislative process, together with proposals and consultations for reform. These changes are anticipated to become law in September or October 2016. Any reforms of significance, and proposals for important reforms, included in those processes, are discussed below.

The information included below assumes the continuance of the UK’s membership in the European Union (EU).

Changes that have taken effect in the past year

Reforms that took effect in the past year include:

- Annual Investment Allowance is 200,000 pound sterling (GBP) from 1 January 2016.
- For acquisitions of goodwill and customer-related intangible assets on or after 8 July 2015, tax deductions for amortisation, and certain other charges, have been abolished.
- Bank levy is reduced from January 2016. An 8% supplementary tax is charged on bank profits above GBP 25 million from 1 January 2016.
- A range of specific and narrow anti-avoidance rules were introduced.
- Her Majesty’s Revenue and Customs (HMRC) were granted additional powers aimed at accelerating tax payments where payments are disputed or delayed.
- Legislation came into force on 18 March 2016 introducing a new country-by-country (CbC) reporting requirement for certain large groups for accounting periods commencing on or after 1 January 2016.
United Kingdom

Changes enacted but not yet in force
The rate of corporation tax will reduce to 19% from April 2017, and it is proposed to reduce to 17% from April 2020.

From no earlier than 1 April 2017, a reduced rate of corporation tax for businesses based in Northern Ireland may be introduced.

Consultations and proposals - ongoing
The most significant proposals, which include announced proposals and those in draft legislation, and those subject to consultations include:

• Introduction of earlier dates for quarterly instalment payments of corporation tax for the largest of companies (broadly, over GBP 20 million in taxable profits). Payments will be required in the third, sixth, ninth, and 12th months for accounting periods starting on or after 1 April 2019.
• Introduction from April 2017 of an apprenticeship levy of 0.5% of total payroll costs of employers in excess of GBP 3 million per annum.
• Continued reform of the collection of unpaid or disputed tax liabilities.
• Proposed reform effective from April 2016 of the treatment of company distributions received by individuals, focused on discouraging transactions that result in advantageous capital extraction of profits, rather than income.
• Apart from Diverted Profits Tax (DPT), regarded by many as a BEPS-related measure, and the commitment to introduce reporting to HMRC of specified ‘country-by-country template’ information (BEPS Action 13) for accounting periods beginning on or after 1 January 2016, the United Kingdom is currently implementing a number of recommendations arising from the G20/OECD BEPS Action Plan. Legislation to address hybrid mismatch arrangements (BEPS Action 2) will be introduced in 2016 to take effect from 1 January 2017. There is also to be reform to the patent box, including closure of the existing arrangement to new entrants from 30 June 2016 (BEPS Action 5). See the Tax credits and incentives section for more information.
• Proposed introduction from 1 April 2017 of new interest deductibility rules (BEPS Action 4), including a fixed expense ratio of 30% of UK earnings before interest, taxes, depreciation, and amortisation (UK EBITDA) and a group ratio rule for highly geared groups.
• Introduction of UK withholding tax (WHT) on a wider range of royalty payments with effect from Royal Assent of the Finance Bill (estimated September/October 2016).
• Revised loss utilisation rules from April 2017 to allow more flexible use of losses carried forward, but with a restriction on the utilisation of losses to 50% of the relevant profits. The restriction will apply only to profits in excess of GBP 5 million. For banks, the maximum loss offset will be limited to 25%.
• Introduction of anti-avoidance provisions in respect of hybrid mismatches from 1 January 2017.
• The European Union has adopted amendments to the Directive on the mandatory automatic exchange of information (AEOI) in the field of taxation to require the mandatory exchange of cross-border tax rulings and advance pricing arrangements (APAs). EU member states, including the United Kingdom, must implement legislation to comply with the Directive by 31 December 2016 to be effective from 1 January 2017.
• The European Union has published an anti-tax-avoidance package, including a draft anti-tax-avoidance Directive, and a further proposed amendment to the Directive on mandatory AEOI in the field of taxation to enable coordinated implementation within the European Union of BEPS Action 13 CbC reporting requirements. The draft anti-tax-avoidance Directive sets out minimum standards for rules to address six key international tax and BEPS-related issues: (i) deductibility of interest; (ii) exit taxation; (iii) a ‘switch over’ clause to ensure taxation of dividends and capital gains from companies in low-tax, non-EU countries; (iv) a general anti-abuse rule (GAAR); (v) controlled foreign company (CFC) rules; and (vi) a framework to tackle hybrid
mismatches. At this stage, it is unclear whether and to what extent the proposals will be adopted and what the impact will be in the United Kingdom.

- The Finance Bill 2016, once finalised, will include changes applicable for accounting periods starting on or after 1 April 2016 to the definition of ‘transfer pricing guidelines’ within the UK legislation so as to formally incorporate the revisions to the OECD transfer pricing guidelines as recommended in Actions 8-10.

- The European Union has re-launched a consultation about working towards a common consolidated corporate tax base (CCCTB) to harmonise the corporate tax base (but generally not corporate tax rates) across the European Union. It is not clear whether the United Kingdom will adopt any final proposal, nor when it will take effect.

- Additional tax incentives for the creative sectors.

- A range of specific and narrow anti-avoidance rules.

- Further reforms regarding collection of taxes, application of penalties, and related issues focused on tax evasion. This includes the introduction of a corporate criminal offence of facilitating tax evasion, and the introduction of a 60% automatic penalty for transactions subject to the GAAR.

- Plans to move all tax reporting, compliance, and payments onto a digital platform by 2020.

---

**Taxes on corporate income**

Resident companies are taxable in the United Kingdom on their worldwide profits (subject to an opt-out for non-UK branches), while non-resident companies are subject to UK corporate tax only on the trading profits attributable to a UK permanent establishment (PE) plus UK income tax. In practice, for many companies, the application of a wide range of tax treaties, together with the dividend exemption, makes the UK corporate tax system more like a territorial system.

**General corporation tax rates**

The normal rate of corporation tax is 20% for the year beginning 1 April 2016. This rate will fall to 19% for the year beginning 1 April 2017, and to 17% for the year beginning 1 April 2020.

Where the taxable profits can be attributed to the exploitation of patents, a lower effective rate of tax applies. For 2016/17, the rate is 11%, reducing to 10% from 1 April 2017. Profits can include a significant part of the trading profit from the sales of a product that includes a patent, not just income from patent royalties. This scheme will change from June 2016 (see Patent box in the Tax credits and incentives section for more information).

**Special corporation tax regimes**

Apart from the four specific exceptions noted below, there are no special regimes for particular types or sizes of business activity; in general, all companies in all sectors are subject to the same corporate tax rates and rules. However, certain treatments and reliefs do vary according to size, including transfer pricing, research and development (R&D) credits, and some targeted anti-avoidance rules.

For large companies, there are some additional compliance and reporting requirements. Some elements of HMRC’s organisational structure and approach to avoidance and compliance are arranged by size of business (e.g. Large Business Strategy).

**Oil and gas company regime**

Profits that arise from oil or gas extraction, or oil or gas rights, in the United Kingdom and the UK Continental Shelf (‘ring-fence profits’) are subject to tax in the United Kingdom in accordance with rates applicable in 2006, i.e. a full rate of 30% and a small profits rate of 19%. Such activities also attract 100% capital allowances on most capital
expenditure. A supplementary tax charge of 10% (20% before 1 January 2016) applies to 'adjusted' ring fence profits in addition to normal corporation tax.

**Life insurance company regime**

Life insurance businesses are also taxed under a special regime, which effectively includes different corporate tax rates as well as special rules for quantifying profits.

**Tonnage Tax regime**

Companies that are liable to corporation tax and operate qualifying ships that are strategically and commercially managed in the United Kingdom can choose to apply Tonnage Tax in the place of corporation tax. Tonnage Tax is an alternative method of calculating corporation tax profits by reference to the net tonnage of operated ships. The Tonnage Tax profit replaces the tax-adjusted profit/loss on a shipping business and certain related activities, as well as the chargeable gains/losses made on Tonnage Tax assets. Any other profits are taxable under the normal corporate tax regime.

**Banking sector**

A supplementary tax was introduced from 1 January 2016 at 8% on profits in excess of GBP 25 million. Also, loss utilisation is restricted for banks; trading losses can be set against only 50% of profits in a period (reducing to 25% from 2017).

**Petroleum revenue tax (PRT)**

In effect, PRT is abolished for periods ending after 31 December 2015; it is proposed that, from that date, PRT is reduced to 0%. For earlier periods, a tax of 35% was levied on profits accruing from oil and gas extracted in the United Kingdom and in the UK territorial sea and continental shelf in respect of fields given development consent before 16 March 1993. Older fields were, in practice, outside the scope of PRT. PRT, if paid, is deductible in computing corporation tax on the company's total profits.

**Income tax for non-resident companies**

A non-resident company is subject to UK corporation tax only on the trading profits of a UK PE. Any other UK-source income received by a non-resident company is subject to UK income tax at the basic rate, currently 20%, without any allowances (subject to any relief offered by a double tax treaty [DTT], if applicable). This charge most commonly arises in relation to UK rental income earned by a non-resident landlord (NRL). The United Kingdom therefore operates an NRL scheme that requires the NRL's letting agent or tenants to withhold the appropriate tax at source unless they have been notified that the NRL has applied for and been given permission to receive gross rents.

**Diverted Profits Tax (DPT)**

DPT is separate from other corporate taxes. It is levied at 25% (or 55% in the case of UK ring fence operations, i.e. broadly oil extraction operations) on diverted profits (as defined) and may apply in two circumstances:

- where groups create a tax benefit by using transactions or entities that lack economic substance (as defined), and/or
- where foreign companies have structured their UK activities to avoid a UK PE.

Companies are required to notify HMRC if they are potentially within the scope of DPT within three months of the end of the accounting period to which it relates (extended to six months for the first year). The legislation is complex and subjective in places, and has the potential to apply more widely than might be expected.

**Local income taxes**

There are no local or provincial taxes on income, although powers are in place to introduce a reduced rate of corporation tax in Northern Ireland.
Corporate residence

UK incorporated companies are generally treated as UK resident. However, companies resident in the United Kingdom under domestic law, but treated as solely resident in a different country under that country's DTT with the United Kingdom, are not treated as UK resident for the purposes of UK domestic tax law.

Additionally, subject to the above exception, companies incorporated overseas are also treated as UK resident if their central management and control is situated in the United Kingdom. This means if the place of the highest form of control and direction over a company's affairs, as opposed to decisions on the day-to-day running of the business, is in the United Kingdom.

Permanent establishment (PE)

For non-resident companies, the liability to corporation tax depends on the existence of any kind of PE through which a trade is carried on. The meaning of PE for UK tax purposes is set out in statute; it is largely based on the OECD Model Tax Convention definition, but is not identical in all respects. Subject to the terms of the relevant DTT, a non-resident company will have a PE in the United Kingdom if it either:

- has a fixed place of business in the United Kingdom through which the business of the company is wholly or partly carried on, or
- an agent acting on behalf of the company has and habitually exercises authority to do business on behalf of the company in the United Kingdom.

A fixed place of business includes (but is not limited to) a place of management; a branch; an office; a factory; a workshop; an installation or structure for the exploration of natural resources; a mine, oil or gas well, quarry, or other place of extraction of natural resources; or a building, construction, or installation project. However, a company is not regarded as having a UK PE if the activities for which the fixed place of business is maintained or which the agent carries on are only of a preparatory or auxiliary nature (also defined in the statute).

The OECD, under Action 7 of its BEPS Action Plan, has recommended a widening of the scope of the PE definition in Article 5 of the OECD Model Tax Convention. It is intended that the amended definition will be incorporated into bilateral double taxation conventions via a multilateral instrument, which is to be concluded by 31 December 2016. Furthermore, the EU anti-tax-avoidance package includes a recommendation that encourages member states to amend treaty definitions of PE to reflect the OECD recommendations. The United Kingdom has not yet, however, announced any changes to the domestic statutory definition of PE to reflect the OECD recommendations.

Special rules exist to explain how the PE's profits should be evaluated for UK tax purposes (see the Branch income section for more information).

Other taxes

Value-added tax (VAT)

The standard VAT rate of 20% applies to most goods and services, apart from domestic fuel and power and certain other reduced-rate supplies, which are subject to VAT at 5%.

Most exports, most food, most public transport, books and publications, and certain other essential goods and services are zero-rated. Some supplies are exempt, the main categories being the grant of certain interests in land, insurance, financial services, betting and gaming, education, certain sports services, cultural services, and health and welfare. Zero-rating is preferable to exemption because the VAT on costs incurred in
making a zero-rated supply can be recovered while that incurred in making an exempt supply cannot.

VAT is chargeable on the supply of most goods and services made in the United Kingdom by ‘taxable persons’ in the course of business, when their taxable turnover exceeds the registration thresholds. Taxable persons include individuals, companies, partnerships, clubs, associations, or charities.

Taxable persons who are not normally resident in the United Kingdom, do not have a business establishment in the United Kingdom, and, in the case of companies, are not incorporated in the United Kingdom, but who make taxable supplies, sales to unregistered persons in the United Kingdom, or acquisitions of goods in the United Kingdom above the relevant limits, may be required to register and account for VAT in the United Kingdom.

If the value of taxable supplies is over a specified limit, registration for VAT is compulsory unless the taxable supplies made are wholly or mainly zero-rated, in which case it is possible to apply for exemption from registration. A zero VAT registration threshold applies for businesses not established in the United Kingdom.

The rules applying to VAT and territoriality are different to those applying to direct tax in that they derive from the principles of the place of supply in EU law, as enshrined in European Commission (EC) VAT Directives. Having determined that a supply of goods or services has taken place, the second condition to be determined, if the transaction is to fall within the scope of UK VAT, is whether the supply takes place within the United Kingdom. The place of supply rules are different for goods and for services. A person or business belonging outside the United Kingdom, with no place of business in the United Kingdom, may, nevertheless, be liable to UK VAT registration where the place of supply of those goods or services is in the United Kingdom.

For goods, the basic rule is that a supply of goods is taxable in the territory where those goods are physically located at the time of supply. Hence, if goods are supplied in the United Kingdom by a non-established taxable person, there will still be a liability for VAT purposes, and the person must register for VAT in the United Kingdom if the taxable supplies exceed the current UK VAT registration thresholds. A zero VAT registration threshold applies for businesses not established in the United Kingdom.

For services, the basic rule is that services are treated as made where the customer ‘belongs’ or is established for VAT purposes, and the customer is responsible for accounting for the VAT due via the reverse-charge procedure. However, this is subject to a number of special rules and exceptions. Determining where a business is established for VAT purposes is based on EU law criteria.

For business-to-consumer (B2C) supplies, the basic rule is that services are treated as made where the supplier ‘belongs’ or is established for VAT purposes. B2C supplies of telecommunications, broadcasting, and electronic services are taxed where the customer is located or is normally resident.

**VAT returns and payments**

VAT returns must be completed at preset intervals (usually every three months). Larger companies may be required to file monthly returns or make monthly payments on account. All businesses are required to file VAT returns online and make electronic payments. Smaller enterprises can apply for annual returns. VAT returns are usually required to be filed 30 days after the end of the period.

Annual accounting is available for taxable persons with annual turnover (taxable supplies, excluding VAT) not exceeding GBP 1,350,000.
Cash accounting is available for taxable persons with annual turnover (taxable supplies, excluding VAT) not exceeding GBP 1,350,000.

In addition, a flat rate scheme operates for small businesses and is intended to simplify VAT accounting procedures.

**Customs and excise duties**

Many goods imported into the United Kingdom from outside the European Union are subject to customs duties. The rates of duty are provided by the EU’s Common Customs Tariff and vary widely.

Excise duties are chargeable on most hydrocarbon oil products, alcoholic drinks, and tobacco products imported into or produced in the United Kingdom. Examples include the following:

<table>
<thead>
<tr>
<th>Products</th>
<th>Excise duty (GBP)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Road fuels</td>
<td>0.5795 per litre</td>
</tr>
<tr>
<td>Cigarettes</td>
<td>196.42 per thousand (plus 16.5% of the retail price)</td>
</tr>
<tr>
<td>Tobacco (hand rolling)</td>
<td>198.10 per kg</td>
</tr>
<tr>
<td>Wines (5.5% to 15%)</td>
<td>2.78 per litre</td>
</tr>
<tr>
<td>Spirits</td>
<td>27.66 per litre of pure alcohol included</td>
</tr>
</tbody>
</table>

As announced at Budget 2016, the government will introduce legislation in Finance Bill 2017 to encourage the reformulation of drinks that are high in added sugar by levying a unit charge on UK producers and importers of such drinks. There will be an exemption for smaller producers. HMRC will consult on the detail in summer 2016, and the levy will come into effect in 2018.

**Stamp taxes**

Stamp duty is charged at 0.5% on instruments effecting sales of shares. Agreements to sell shares usually attract stamp duty reserve tax (SDRT) at 0.5%. The liability to SDRT may be cancelled by paying the stamp duty due on a stock transfer form (or other transfer instrument) executed in pursuance of the agreement. Stamp duty is not usually charged on an issue of shares, but is charged at a higher rate of 1.5% on an issue of shares in bearer form. Issues or transfers of shares to clearance services or depositary receipt systems may attract SDRT at 1.5% (stamp duty at 1.5% may be payable on instruments effecting transfers of shares to such services or systems).

Acquisitions of non-residential or mixed land and buildings in England, Wales, and Northern Ireland are charged stamp duty land tax (SDLT) at rates of up to 5%. Acquisitions of residential property by companies and similar non-natural persons and by individuals acquiring second homes are charged at rates of up to 15% (whereas acquisitions by individuals who do not own any other properties or who are replacing their main residence are capped at 12%). Grants of new commercial leases are charged SDLT at 1% of the net present value of the rents payable in excess of GBP 150,000 up to GBP 5 million and 2% of the net present value in excess of GBP 5 million. SDLT is also payable at up to 5% on any premium paid. Grants of residential leases are charged at 1% of the net present value of the rents payable in excess of GBP 125,000 plus up to 15% on any premium paid.

Land and buildings in Scotland are subject to Scottish land and building transactions tax (LBTT) in place of SDLT. Rates are graduated up to 12%, which applies to a transaction value for residential properties in excess of GBP 1 million.
Annual tax on enveloped dwellings (ATED) and related capital gains tax charge
An annual tax on enveloped dwellings is charged on the acquisition and holding of high-value residential properties (property over GBP 500,000) through a company or other ‘non-natural’ person. Broadly, this will be based on the 1 April 2012 value, in bands starting at GBP 500,000 and increasing to GBP 20 million. The charge on a property worth GBP 20 million or more cannot exceed GBP 218,200 per annum. The minimum charge is GBP 3,500 for a property valued at GBP 500,000.

In addition, a disposal of such a property or an interest in such a property by a company or other non-natural person will be subject to capital gains tax at 28% on any gains accruing after 5 April 2013. Relief will be available from ATED and the capital gains tax extension for most property used for commercial, charitable, or public use.

Bank levy
A bank levy takes the form of an annual tax on certain liabilities of most UK-based banks and building societies. The tax is levied at the following annualised rates:

- From 1 January 2016: 0.18% of a bank’s short-term relevant liabilities and 0.09% of long-term equity and liabilities.

Staged reductions down to 0.105% and 0.05% by 2021 are proposed.

The levy is not charged on the first GBP 20 billion of chargeable liabilities and is not deductible for corporation tax purposes.

Insurance premium tax (IPT)
IPT at the standard rate of 9.5% (increased to 10% from 1 November 2016) applies to premiums for most general insurance, such as for buildings and contents and motor insurance, where the insured risk is in the United Kingdom. Life assurance and other long-term insurance remain exempt, though there are anti-avoidance rules surrounding long-term medical care policies. As an anti-avoidance measure, a higher rate of 20% applies to insurance sold by suppliers of specified goods or services, e.g. mechanical breakdown insurance, travel insurance (irrespective of supplier), insurance sold with TV and car hire, and ‘non-financial’ guaranteed asset protection (GAP) insurance sold through suppliers of motor vehicles or persons connected with them. Further anti-avoidance rules affect administration or similar fees connected with contracts of insurance, charged under separate contracts by brokers and other intermediaries.

Airport passenger duty
Individuals leaving the United Kingdom by air are obligated to pay a duty, which, in practice, is invariably included in the cost of the air ticket. Typically, such taxes are borne by employers in respect of employee’s business travel. Further, significantly higher rates apply for travel in certain ‘executive jets’.

Environmental taxes
There are several environmental taxes, including the following.

Landfill tax
The landfill tax is a tax on waste disposal in landfill sites. The standard rate increased to GBP 84.40 per tonne from 1 April 2016. The reduced rate for inert waste is GBP 2.65 per tonne.

Climate change levy
The climate change levy is a tax on energy used in the United Kingdom, such as electricity, gas, coal, etc., and is charged at rates that depend on the nature of the fuel used. There are reduced rates and exclusions from the charge, e.g. supplies to domestic
or charitable users, renewable source energy, and energy-intensive sectors committing to specific emissions/energy-saving measures.

**Aggregates levy**  
The aggregates levy is a tax on the extraction or importation of sand, gravel, and crushed rock for commercial exploitation in the United Kingdom. The rate of tax is GBP 2.00 per tonne.

**Carbon Reduction Commitment**  
The Carbon Reduction Commitment is a mandatory scheme for large businesses with financial, reputational, and behavioural drivers aimed at improving energy efficiency.

**Employers’ national insurance contributions (NICS)**  
Employers are obligated to pay NICS based on a percentage of each employee’s earnings. For the year ending 5 April 2017, the rate is 13.8% on all earnings above GBP 156 per week. Businesses are exempt from the first GBP 3,000 per annum (maximum) of this liability.

**Payroll taxes**  
Other than employers’ NICS, there are no other payroll taxes, the burden of which falls on the employer. Employers are, however, responsible for deducting the employees’ income tax liability at source, through the pay-as-you-earn (PAYE) system. The employer may also be required to deduct other amounts from pay (e.g. court orders).

**Apprenticeship levy**  
It is proposed that, from 1 April 2017, employers will pay 0.5% of their total payroll in excess of GBP 3 million to create a fund to support apprenticeships. Full details are not yet available.

**Pension protection fund levy**  
All defined benefit pension schemes pay a levy, based on pension fund liabilities and the financial risk of the employing company. This levy funds a compensation fund for pensioners and employees of failed schemes.

**Local municipal taxes**  
Local taxes are not based on income, but rather are levied on the occupiers of business property by reference to a deemed annual rental (or ‘rateable’) value for the property concerned. These taxes (known as ‘rates’) are administered by regional local government authorities rather than central government. The amounts paid are deductible for corporation tax purposes, provided they meet all the usual requirements for deductibility.

---

**Branch income**

Tax rates on the profits of UK PEs of non-resident corporations are the same as for domestic corporations.

There are specific rules setting out how the PE’s profits should be evaluated for UK tax purposes, which broadly seek to treat the business as if it were a standalone company. Financing arrangements between the branch and head office must be disregarded, and there are special rules for banks to stop under-performing loans being allocated to the UK branch in a way that is considered unacceptable and similar potential manipulations. However, a deduction is given for a proportion of head office costs.

Tax is not generally withheld on transfers of profits from a UK PE to the head office. However, there are proposals in Finance Bill 2016 to amend the rules for deduction of UK income tax at tax at source on royalty payments made after Finance Bill 2016.
receives Royal Assent (expected October 2016), which could result in tax being withheld on royalty payments made by a foreign company in connection with activities carried on through a UK PE.

**Taxable income determination**

A UK resident company is taxed on its worldwide total profits.

Total profits are the aggregate of (i) the company's net income from each source and (ii) the company's net chargeable gains arising from the sale of capital assets.

The main sources of income are (i) profits of a trade, (ii) profits of a property business, (iii) non-trading profits (or losses) from loan relationships, mainly interest receivable or payables, (iv) non-trading gains (or losses) on most intangible fixed assets, and (v) non-exempt dividends or other company distributions. The amount of income for sources (i) to (iv) is measured based on the company's accounts, with specific adjustments. Taxable income from non-exempt dividends and calculating chargeable gains or income from other sources is based on actual amounts.

The rules for measuring the gross income are different for each category, and there are subtle differences in the rules about tax deductions and how gains are calculated. Because of this continuing reliance on taxing companies on a 'source-by-source' basis, it is difficult to explain the rules about income determination and deductions as two wholly separate topics.

**Basic rules for accounts-based sources**

The main source of profits is often from trading. A company’s trading profits are based on its worldwide profit before tax in its accounts. Adjustments are made for non-trading receipts (such as dividends from other companies and income from property) and non-deductible expenditure (such as capital expenditure). Depreciation for tax purposes (known as capital allowances) is calculated and substituted for the depreciation charged in the accounts. A number of other statutory adjustments are made; three important ones are that pension contributions, deferred pay, and benefits in kind are broadly deductible only when paid, that a deduction is available for the notional cost of certain share awards to employees, and that, where certain acquired intangibles (but, in particular, not goodwill and customer-related intangible assets acquired on or after 8 July 2015) are not depreciated in the accounts, a 4% flat-rate deduction can usually be claimed. There are many other adjustments.

Similar principles apply in relation to the calculation of profits of a property business.

Financial profits from a company's trading and non-trading loan relationships and related matters are usually based on the accounts, and the distinction between 'capital' and 'revenue' receipts and deductions is not relevant. Instead, all credits and debits in the accounts are aggregated in order to find the net profit or deficit. Certain statutory adjustments have to be made, which include an interest capping limitation ('debt cap').

For traders, any profit or loss on loan relationships, and/or on intangibles, is generally included within the trading profits. If the company doesn't have a trade, then loan relationships and intangibles are treated as a separate source of income or loss.

**Income losses**

Where a loss arises in respect of a particular source of income, there are detailed rules regarding the possible offset of the loss. Carryback and sideways reliefs are often allowed within limits; carryforward is generally allowed and carried forward losses do not time expire. Losses can also be utilised by other group companies *(see the Group taxation section)*.
More specifically, dealing with the main sorts of income losses,

- trading losses may be set off against any other source of profit or gains in the same year, may be carried back one year (three years on the cessation of the trade) against any other source of profit or gain, or may be carried forward without time limit against profits of the same trade only
- property losses may also be set off against any other source of profit or gains in the same year, or may be carried forward without time limit against profits of any sort; they cannot, however, be carried back, and
- non-trading deficits (i.e. interest and financing losses) can again be set off against any other source of profit or gains in the same year, may be carried back one year against non-trading credits (i.e. interest and financing profits), or may be carried forward without time limit against non-trading profits.

Non-trading companies may deduct non-capital management expenses incurred in managing their investments from their total profits. Any excess management expenses can be carried forward without limit to set against profits in future years.

While income losses can generally be offset against capital gains of the same accounting period, capital losses are never available for offset against any type of income.

There are complex anti-avoidance rules that restrict the utilisation of all types of losses where there is a change in ownership of the company. Specific rules can also deny or limit loss relief or deductions arising from brought forward losses or potential losses where certain conditions are met.

Proposals were made in March 2016 for significant reform to the treatment of losses from April 2017. These include:

- allowing losses to be more flexibly set off against other income, including against taxable income of other UK group companies, and
- for companies with profits over GBP 5 million, restricting the utilisation of losses brought forward to 50% of the current year profits in excess of that amount.

**Inventory valuation**

In general, the book and tax methods of inventory valuation will conform. In practice, inventories are normally valued for tax purposes at the lower of cost or net realisable value. A first in first out (FIFO) basis of determining cost where items cannot be identified is acceptable, but not the base-stock or the last in first out (LIFO) method.

**Capital gains**

Gains on capital assets are taxed at the normal corporation tax rates. The chargeable gain (or allowable loss) arising on the disposal of a capital asset is calculated by deducting from gross proceeds the costs of acquisition and subsequent improvements, plus the incidental costs of sale and indexation allowance. Indexation allowance compensates for the increase in costs based on the percentage rise (if any) in the UK retail prices index to the date of disposal. Indexation allowance is, however, limited; it cannot create or increase a capital loss, it can only reduce or eliminate a chargeable gain. Generally, these calculations must be done in sterling, so any foreign exchange gains and losses will be taxed (or relieved) on disposal.

Special rules apply to assets held at 31 March 1982.

Most acquisitions and disposals between UK group companies are treated as made on a no gain no loss basis (i.e. at base cost plus indexation). Otherwise, acquisitions from, or disposals to, affiliates are treated as made at fair market value, as are other acquisitions or disposals not at arm’s length.
Capital losses are allowed only as an offset to capital gains. An excess of capital losses over capital gains in a company’s accounting period may be carried forward without limitation but may not be carried back. There is no ability to surrender capital losses to fellow group members, but gains or losses arising on a particular asset can be allocated to another group member. So, the capital losses of one company can sometimes be set against the gains of a fellow group member in the same or subsequent period.

There is a good deal of anti-avoidance legislation concerning the computation of chargeable gains, notably to stop losses being created or gains avoided where assets are depreciated by intra-group transactions, or where losses are ‘bought in’ from third parties.

Gains realised on certain types of assets can be deferred where all or most of the proceeds are reinvested in other assets of those types within a specified period (generally three years). The ‘rolled-over’ gain then crystallises as and when the latter assets are sold. At present, the main asset categories qualifying for roll-over are land and buildings used for a trade.

Most disposals by trading groups of shareholdings of 10% or more are exempt from tax. The main exceptions will be those of non-trading subsidiaries or subgroups, or of companies acquired within the previous year. Note that gains on goodwill and other intangibles acquired after March 2002 are taxed as income, not as capital gains.

**Dividend income**
Most foreign and UK dividends received by UK companies are exempt from corporation tax; however, one of several criteria has to be met, but these are widely drawn (one test, for example, is that the recipient controls the payer). For non-exempt, foreign-source dividends, double tax relief (DTR) will be available on a dividend-by-dividend basis. It is unusual for companies to be taxed on UK dividends because of the breadth of the exemption; however, where they are taxed, there is no concept of DTR for UK dividends.

**Realised and unrealised exchange gains/losses**
Unrealised exchange gains and losses tend to arise on debts and derivatives; they are then taxed or allowed, together with realised amounts, on an accounts basis in the same way as other debits and credits arising out of loan relationships. Where gains or losses arise on other payables or receivables, to a trader or property investor, they will again generally be taxed or allowed on an accounts basis. For a trader, the taxable or allowable amount will become simply part of the trading profit or loss; for other companies, it will become a separate source of taxable profit (a ‘non-trading credit’) or loss (a ‘non-trading deficit’).

Where unrealised differences arise on other capital assets, they will not generally be taxable or allowable at that stage; instead, the exchange difference becomes part of the computation and is effectively taxed or allowed when the asset is disposed of and any difference is realised.

**Partnership income**
In broad terms, if companies participate in UK partnerships (whether general partnerships, limited partnerships, or limited liability partnerships [LLPs]), they will be taxed on a flow through basis. This will, in very broad terms, mean that UK corporate partners will be taxed on trading, property, or financing income as it arises in the partnership accounts, and on non-exempt dividends on a receipts basis. There are specific anti-avoidance provisions in respect of LLPs with both corporate and individual partners.

When considering overseas entities, the UK authorities will not be bound by how the entity is classified in its country of origin. Case law has determined a number of matters that should be considered when establishing whether a non-UK entity should be taxed.
in the United Kingdom as if it were a company or a partnership. HMRC also maintains a public list of non-UK entities and the decisions it has previously made regarding their classification. However, if the parties have flexibility regarding the constitution of such entities, then their classification may be viewed differently, either by HMRC or the courts. This area is complex; consequently, specialist advice should be sought.

**Foreign income**
In principle, the United Kingdom taxes on a worldwide basis, although non-UK branch profits can be exempted from UK taxation by election. The election applies to all accounting periods starting after the election is made and to all the branches of the company (so it cannot be made on a PE-by-PE basis). The election is irrevocable and has the effect of exempting all profits of the branch, including gains (other than for close companies). Equally, relief for branch losses will be denied. Profits will be measured by reference to DTTs, or, in absence, OECD principles. Certain businesses may not elect to exempt profits (e.g. life insurance, shipping and aircraft operations, and most investment activity).

Where no election is made, profits from non-UK branches are computed and taxed in the normal way for UK tax resident companies. However, UK tax will generally be reduced by credit for local direct taxes paid, either under a treaty or via the UK’s unilateral relief rules (see Foreign tax credit in the Tax credits and incentives section for more information).

**General rules for deductions**
As noted above, the UK tax system requires taxable profits to be calculated by aggregating (i) the company’s net income from each source and (ii) the company’s net chargeable gains arising from the sale of capital assets. This approach gives rise to a particularly complicated regime so far as deductions are concerned. Expenses are usually allocated to the source of income (or occasionally by reference to income generally) or to the particular gain to which they relate. The rules governing their deductibility differ according to whether the expense relates to a capital gain or to income, and, indeed, according to the particular source of income concerned. For example, there is a considerable difference in the manner in which tax relief is given for expenses incurred by companies trading in property as compared to those that invest in property. The regime also has a large number of specific rules dealing with particular types of deductions that take priority over the more general rules for each type of income.

We have therefore set out the general rule for trading expenses, being the most common category, and, following that analysis, considered some specific common exceptions.

**General rules for trading expenses**
A trading company is generally permitted to deduct expenses that are incurred wholly and exclusively for the purposes of the company’s trade, provided those costs are not capital in nature and are charged to the profit and loss account. There is a significant amount of case law surrounding whether expenses have been incurred wholly and exclusively for the purposes of a company’s trade and whether they are capital or not.

Relief is generally given in the period the expenses are accrued in the accounts, subject to some specific exceptions. In particular, contributions to a registered pension scheme are only allowed on a ‘paid’ basis, with some further provisions under which some contributions may be spread over a number of years; and if bonuses and other staff costs are paid out more than nine months after the end of the accounting period in which they are accrued, they are only allowed on a paid basis.

The general rule is made subject to a range of specific statutory provisions, some of which allow deductions and others of which limit them; some of the more important of these are discussed below, but there are many others. One example is that the costs of business entertainment cannot generally be deducted.
Depreciation and amortisation

Depreciation of fixed assets (other than of goodwill and other assets within the intangible fixed asset regime, see below) is not allowable as a deduction from any source of income. However, traders, and most non-traders, are instead allowed specified rates of annual deduction in respect of specified classes of assets, together referred to as ‘capital allowances’, that are deducted in calculating trading income for traders and (broadly) against income derived from the use of the fixed assets for non-traders.

Capital allowances for machinery and equipment can be disclaimed in whole or in part, thereby deferring allowances.

In the period of expenditure, capital allowances are available, generally at 18% of the cost of machinery and equipment acquired for use in a trade or property rental business; thereafter, capital allowances are taken generally at 18% per annum on the reducing-balance basis. With some exceptions, the rate of capital allowances for machinery and equipment with an expected useful life when new of at least 25 years is 8%. This 8% rate also applies to certain integral features in buildings and thermal insulation.

All businesses, regardless of size, can claim an annual investment allowance of 100% on the first GBP 200,000 per year of most qualifying expenditure from 1 January 2016 (previously GBP 500,000). This is restricted to a single allowance for groups of companies or associated businesses.

Capital allowances are given on cars at rates dependent on emission levels.

Enhanced allowances, typically at a rate of 100%, are available for expenditure on certain energy saving plant and other specific categories. The products and technologies supported by this regime are reviewed and updated regularly.

No capital allowance is normally allowed on buildings, apart from certain machinery and equipment embodied in the fabric of the buildings. In some buildings (e.g. hotels, retail, offices), such deductions may be significant.

Capital allowances may also be available in respect of the cost of the acquisition of mineral assets and extraction, generally at the rates of 10% and 25%.

Excess capital allowances are generally recaptured on disposal. The recapture is calculated on a ‘pool’ basis for most machinery and equipment, in which case there is no recapture unless the sale proceeds exceeds the total tax written down value of the pooled assets.

Where assets are leased, capital allowances are generally available to the lessor rather than the lessee. The rate of capital allowance of most plant or machinery leased to non-residents is generally restricted to 8%, but in some cases to nil.

Intangible fixed assets

A special regime applies to intangible assets, such as patent rights, know-how, and trademarks, and (prior to 8 July 2015) goodwill. Royalties are generally deductible on an accounts basis, and, except in relation to ‘grandfathered’ assets owned by the group on 31 March 2002, the accounts’ amortisation of intangible assets is also deductible (with an option to take a flat 4% deduction even if not amortised in the accounts). Traders will take the deductions in computing trading income; non-traders will create a ‘non-trading loss on intangible fixed assets’ that can be relieved as a loss against any profits of the year, carried back one year, or carried forward indefinitely.

With effect for acquisition of goodwill and customer-related intangibles on or after 8 July 2015, amortisation, impairment, and certain other charges will not be deductible.
for tax. Subsequent profits and losses on disposals of such goodwill remain taxable/deductible.

Income costs relating to R&D are normally deductible in any event, but there is a special incentive connected with R&D that generally allows additional tax relief (see the Tax credits and incentives section for more information).

**Management expenses**

Holding companies and companies with investment business can deduct expenses if they are expenses of managing the company's investment business and are not capital in nature. Such costs would typically include audit fees, directors' costs, rent, local rates, and office costs. These costs can be set against any sources of profit the company may have, including gains and financing income.

If the company has inadequate income, excess expenses can be surrendered as group relief or carried forward to set against future income, with no time limit.

Many of the specific rules on the deduction of trading expenses also apply to management expenses. Many rules giving traders specific deductions for certain costs also apply, but this is not always the case.

**Employee share schemes**

The actual and deemed costs of an employing company for the deemed cost of providing shares or options to employees is usually deductible, depending on the nature of the share plan and the accounting. This will generally allow a deduction to a subsidiary company whose employees receive shares or options in the parent company.

**Funding costs**

Funding costs (primarily fees and interest) are broadly deductible on an accounts basis, even if capital in nature, but subject to thin capitalisation constraints (with no explicit safe harbours) and a worldwide interest cap based on the group's external debt levels (but see the proposal to replace this from April 2017 below). This extends to foreign exchange deductions relating to debts owed and receivable.

Traders will generally take the deductions in computing trading income (which is also accounts based). Deductions relating to loans not used for trading purposes will give rise to 'non-trading deficits' that, if not group relieved, can be offset against profits of that year generally, carried back one year (against that year's funding profits), or carried forward indefinitely against non-trading profits.

There are complex and specific rules dealing with financial instruments, derivatives, cross-border transactions, etc.

There is a proposal to introduce, from 1 April 2017, a fixed ratio limiting corporate tax deductions for net interest expense to 30% of UK EBITDA, and a group ratio rule for highly geared groups. This is subject to consultation, but will replace the worldwide interest cap and will often operate to reduce the amount of tax deduction achieved by UK taxpayers.

**Bad debts, provisions, and reserves**

Provisions for future costs can be deducted for tax purposes if they:

- are in respect of allowable revenue expenditure
- are made in accordance with acceptable accounting practice
- do not conflict with any statutory rule governing the timing of relief (e.g. in relation to payment of staff costs), and
- are estimated with sufficient accuracy.
United Kingdom

This rule extends to bad debts on trading account. Generally, however, bad debts are dealt with under the ‘loan relationships’ rules for financing costs and financing income. The rules there, however, are broadly the same; if the bad debt can be identified specifically enough to allow a bad debt provision that satisfies UK accounting standards, it should be deductible.

**Charitable donations**
Most donations to charities by companies are deductible.

**Fines, penalties, and bribes**
Any payments that constitute a criminal offence (e.g. a bribe) are not deductible for tax. Fines and penalties imposed for breaking the law are also not deductible, although a deduction is usually available for legal costs incurred in defending such an action. Usually, there is no deduction for civil penalties, interest, and similar surcharges (e.g. relating to VAT). Fines for regulatory breaches are not allowed for tax, but the costs of compensating customers, etc. are usually deductible.

Damages that are compensatory rather than punitive (e.g. damages for defamation payable by a newspaper company) are often deductible, as are payments for breach of contract. Payments to employees for wrongful dismissal, etc. are usually deductible.

**Taxes**
Local municipal taxes (business rates) may be deducted from taxable income.

**Net operating and capital losses**
See Income losses above for a description of the treatment of income losses and capital losses.

**Payments to foreign affiliates**
There are no special rules for payments to foreign affiliates, so their tax treatment follows the basic rules for deductions set out above. The transfer pricing rules will impose an arm’s-length price.

**Group taxation**
Each individual corporate group member is required to submit their own tax return on a stand-alone basis, with the exception of the election available with respect to VAT (discussed below). However, there are a variety of ways in which one’s relationship with fellow group members is recognised in the UK tax system for the purposes of corporation tax, VAT, SDLT, and stamp duty.

**Corporation tax**
The corporation tax system includes a number of measures that advantage UK members of qualifying groups, all of which are subject to anti-avoidance measures.

Operating taxable profits and losses arising in the same period can usually be offset between UK resident 75% affiliates within a worldwide group. This extends to offsetting the UK profits attributed to a UK PE of a non-UK resident group member. There are some restrictions, primarily where one of the two companies is not an economic 75% subsidiary of the group or is subject to arrangements under which it might leave the group.

Intra-group transfers of capital assets between UK companies, including UK PEs, are normally tax-free, though the definition of group for these purposes is slightly different than the definition of group relief for losses. This treatment is also extended to intra-group transfers of loan relationships, derivatives, and intangibles. There is generally a ‘degrouping’ charge if the transferee company leaves the group within six years.
There is no automatic offset of capital gains and losses where these arise in different group companies, but it is normally possible for offset to be arranged either by actual transfer of the asset prior to disposal or by election.

A UK resident group company is potentially able to claim group relief for income losses of a non-UK subsidiary that is resident in the European Economic Area (EEA) or has incurred the relevant losses in a PE within the EEA, provided that all possibilities of non-UK relief for the losses have been exhausted and future relief is unavailable.

In addition, the corporation tax system also has a number of measures that seek to prohibit groups unfairly manipulating the tax system by shifting profits between group members (either internationally or within the United Kingdom) in a way that is considered unacceptable.

A debt cap limits the aggregated UK tax deductions group members may claim for finance costs to the level of a group's external finance expense, although proposals have been made to replace this with a fixed ratio interest expense limit.

**VAT**

Group companies can, subject to certain requirements, elect to account for VAT as if they were one taxable person; where this is done, no VAT is charged on intra-group supplies of goods or services. The registration is made in the name of the representative member, who is responsible for completing and rendering the single return on behalf of the group. All the companies are jointly and severally liable for any VAT debts. VAT grouping is subject to detailed anti-avoidance provisions.

**Stamp duty and SDLT**

Transfers of shares or real estate within worldwide 75% groups are generally exempt from stamp duty or SDLT, respectively. For SDLT, the relief can be retrospectively withdrawn in certain circumstances, primarily where the transferee leaves the group within three years of the transfer.

**Transfer pricing and thin capitalisation**

The United Kingdom has widely drafted transfer pricing rules that are intended to apply to almost any kind of transaction made or imposed between related parties that gives rise to:

- a provision that differs from one that would have been made between third parties and
- a UK tax advantage (potential or actual) to one or more of the parties.

These rules apply to UK-to-UK transactions as well as cross-border transactions.

The regime therefore applies not only to the provision of products and services but also to finance arrangements, including both the rate of return charged and the amount of loan principal (or equivalent) made available. It is therefore the mechanism by which the UK’s revenue authorities address the issue of thin capitalisation. Currently, unlike many other territories, the United Kingdom does not currently operate any ‘safe harbours’ of any kind in relation to the amount of debt or interest (or equivalents) it considers demonstrates that a UK company or group is not thinly capitalised. However, HMRC have announced the introduction of a new UK interest deductibility rule in line with the OECD BEPS Action 4 recommendations as part of the business tax roadmap. This was followed on 12 May 2016 by a consultation document setting out proposals for the detailed operation of the regime.

Note that the United Kingdom also has a debt cap regime that limits the amount of finance expense for which a UK tax deduction will be available by reference to the worldwide group's external finance expense. In addition, the United Kingdom is
United Kingdom

currently consulting on implementation of OECD recommendations to limit the tax
deductibility of interest, and the European Commission has presented a proposal for EU
rules to restrict the tax deductibility of interest as part of its anti-tax-avoidance package.

Parties are considered related for the purpose of transfer pricing rules where either one
controls the other or both are under common control. Control here is not confined to
situations in which one party is the majority shareholder in the other. Effectively, control
exists where one party has the power to ensure that the affairs of another party are
conducted in accordance with the first party's wishes. The concept is also subject to two
important extensions:

• The rules apply to many joint venture companies where two parties each have an
  interest of at least 40%.
• There are attribution rules to trace control relationships through a number of levels
  in determining whether parties are controlled for the purposes of the transfer pricing
  rules.

In addition, the regime restricts interest deductions to an arm’s-length basis where a
financier and persons who collectively control a company or a partnership have ‘acted
together’ in relation to the financing arrangements of that company or partnership. The
financier (usually a bank) can then be taken as controlling the company or partnership,
and the loan becomes subject to transfer pricing limitations.

There are a number of exemptions that essentially exclude small or medium-sized
enterprises (SMEs) and dormant companies from the regime.

The effect of the rules is to require an arm’s-length provision to be substituted for the
actual one, thereby increasing the party's UK tax liability and cancelling out the UK tax
advantage that would otherwise have arisen.

Where both parties to the transaction are UK taxpayers, the disadvantaged party will
generally be entitled to claim a compensating adjustment (except where the transaction
falls within the transfer pricing regime because of the ‘acting together’ provisions), but
only after the UK adjustment has been made. The legislation also provides that parties
may make balancing payments to each other in such circumstances, of any amount up
to the transfer pricing adjustment, which will neither be taxable for the recipient nor tax
deductible for the payer.

Where the disadvantaged party is outside the UK tax net, they can pursue a claim for
relief under the relevant DTT if it provides a mechanism for such relief; where the
adjustment in the United Kingdom is to reduce a deduction for an amount paid under
deduction of UK tax, the compensating adjustment rules should allow the overseas party
to reclaim any WHT paid on the disallowed amount, subject to time limits and other
criteria.

UK taxpayers are required to self-assess their compliance with this arm’s-length
principle. Companies and partnerships must therefore identify and make transfer
pricing adjustments when submitting their tax returns. This is the case even where the
disadvantaged party would be entitled to claim a compensating adjustment equal to the
transfer pricing adjustment. An important implication of this approach is the potential
for interest and penalties if the adjustment made is subsequently held to be wrong.

**Controlled foreign companies (CFCs)**

Under the CFC regime, a UK resident company may be taxed on a proportion of the
profits of certain UK-controlled, non-resident companies in which the resident company
has an interest. The overall intention is to tax profits that have been artificially diverted
from the United Kingdom.
Broadly, profits of a non-UK resident CFC will be taxed, using normal corporation tax rates and rules, on the persons controlling the CFC if (i) the profits pass through the CFC ‘gateway' and (ii) are not exempt.

The ‘gateway’ is a series of tests that identify profits that are, broadly, artificially diverted from the United Kingdom. One of the most important tests is ‘main purpose’. For example, where profits arise in the CFC under any arrangements a main purpose of which is to achieve a UK tax or duty advantage, those profits will be taxed in the United Kingdom. A range of other tests may capture other profits.

Various exemptions exist for companies coming into the regime for the first time, CFCs with low profits or low margins, and CFCs in excluded territories, usually those territories with corporation tax rates similar or above UK rates.

There is a special exemption for intra-group financing profits that can result in an exemption of between 75% and 100% of the financing profits on qualifying loans.

---

**Tax credits and incentives**

**Foreign tax credit**
The United Kingdom has an extensive network of DTTs. Unilateral relief is generally available, in any event, to credit overseas tax paid on non-UK source profits against the UK tax on the same profits; while the relevant treaty might sometimes extend that relief, their main function for UK companies is to limit overseas WHTs that would otherwise be payable on passive income.

The United Kingdom has a complex regime allowing ‘underlying’ tax relief in respect of foreign dividends, so that tax suffered at lower levels can be relieved (at least in part) where dividends flow to the United Kingdom via a chain of companies. This exemption is of limited application because most foreign dividends are exempt from tax.

**Enhanced capital allowances**
A variety of tax incentives are given in the form of enhanced tax depreciation allowances (known as capital allowances, *see Depreciation and amortisation in the Taxable income determination section*). Some of these incentives are given by reference to the expenditure concerned and others by reference to the size of the company incurring that expenditure.

For example, a full write-off can be claimed in the year of expenditure on a range of ‘green' products and technologies. The list of items supported in this way is reviewed annually. It includes designated energy saving equipment, designated environmentally beneficial plant and machinery, and cars with low emissions.

**Annual investment allowance**
All businesses, regardless of size, can claim an annual investment allowance of 100% on the first GBP 200,000 tranche *per annum* of capital expenditure incurred on most qualifying expenditure from 1 January 2016 (previously GBP 500,000). This is restricted to a single allowance for groups of companies or associated businesses.

**Research and development (R&D) incentives**
SMEs, as defined, are entitled to a deduction equal to 230% of the qualifying expenditure on R&D in the year in which it is incurred, which can be surrendered for a cash payment (at a rate of GBP 33.35 for each GBP 100 of qualifying R&D spend) by companies that are trading at a loss or have not yet started to trade.
United Kingdom

Large companies are granted an ‘above the line’ tax credit of 10% of their qualifying expenditure. This is mandatory from 1 April 2016, replacing the previous 130% additional deduction.

**Patent box**
Where the taxable profits can be attributed to the exploitation of patents, a lower effective rate of corporation tax applies. For 2016/17, the rate is 11%, reducing to 10% from 1 April 2017. Profits can include a significant part of the trading profit from the sales of a product that includes a patent, not just income from patent royalties. This scheme will close to new entrants from June 2016 (but will continue until 2021 for existing taxpayers), when a new arrangement will be introduced. The new scheme will focus more on UK-based activities and meet revised OECD principles.

**Other incentives**
A deduction equal to 150% of the qualifying expenditure on the remediation of contaminated or derelict land is given in the year incurred, which can be surrendered for a cash payment (at a rate of GBP 24 for each GBP 100 of qualifying land remediation spend) by companies that are trading at a loss.

There are special tax reliefs available for certain expenditure on UK film production, high-end television, animation, video games, and proposals for additional deductions and tax credits for certain theatre sector activities.

There are no tax holidays and no foreign investment incentives in the United Kingdom.

---

**Withholding taxes**

Under UK domestic law, a company may have a duty to withhold tax in relation to the payment of either interest or royalties (or other sums paid for the use of a patent). The circumstances in which such a liability arises are discussed below.

There is no requirement to deduct WHT from dividends. Therefore, dividends may always be paid gross, regardless of the terms of the applicable DTT.

Please note, however, that this is not an exhaustive list of all the deductions that might be required to be made in respect of UK tax from payments made to or by companies. In particular, non-resident companies that are subject to UK income tax on UK-source rental profits (see the Taxes on corporate income section for more information) will find their letting agent or tenants are obligated to withhold the appropriate tax at source (currently 20% without any allowances) from their rental payments unless the recipient has first applied and been given permission to receive gross rents under the NRL scheme. Two other important examples are the UK’s deduction at source regime for entertainers and sportsmen, and the scheme under which payments to unregistered subcontractors working on big building projects may need to have tax deducted at source.

**Interest WHT**
As a general rule, UK domestic law requires companies making payments of interest to withhold tax at 20%. However, there are a number of exceptions to this general rule. The key exclusions are:

- Payments of interest by UK resident companies if the beneficial owner of the interest is also a UK resident company, or a UK PE, provided the interest concerned will be taxed in the United Kingdom as part of the PE’s trading profits.
- Payments of interest on a quoted Eurobond.
- Payments of interest that qualify for exemption under the EU Interest and Royalties Directive.
- Payments of interest paid to or by a UK bank (or a UK branch of a foreign bank).
• Payments of 'short' interest. This is, broadly speaking, interest on loans that will not be in place for more than a year. However, the definition can be contentious, and detailed advice should be taken on this if intending to utilise this exemption.
• Payments of interest that do not ‘arise’ in the United Kingdom. Whether a payment constitutes UK-source interest is a complex issue, and specialist advice needs to be taken if seeking to use this exception.
• With effect from 1 January 2016, payments of interest on private placement debts (widely defined) of UK companies.

If none of these exceptions apply, a payment of interest must be made after the deduction of WHT unless (or until) HMRC has given authorisation that the payment may be made gross (or with a reduced rate of WHT) because of the applicability of treaty relief for the recipient.

**Royalties WHT**
UK domestic law requires companies making payments of patent, copyright, and design royalties that arise in the United Kingdom to deduct WHT at 20%. In addition, there is also the possibility that other royalties that arise in the United Kingdom may also be subject to the same rate of WHT if they constitute ‘qualifying annual payments’, so specialist advice will be needed to clarify this. However, certain types of royalties, such as film royalties and equipment royalties, will generally not be subject to UK WHT.

Unlike the rule regarding interest, a company may make a royalty payment gross of WHT (or subject to a reduced rate of WHT under a treaty) without prior clearance having been given by HMRC if they reasonably believe at the time the payment is made that the payee is entitled to relief under the treaty. However, if that belief is later found to be incorrect, HMRC may direct that the payment must be made net of WHT, with the WHT paid to HMRC, and the payer may be subject to interest and penalties in respect of the WHT that should have been withheld (even if their belief was reasonable).

It is proposed that, with effect from Royal Assent of the Finance Act 2016 (anticipated October 2016) (and earlier for cases involving avoidance), a wider class of royalties, including trademarks and brand names, will be subject to deduction of income tax at source.

**Double taxation treaties (DTTs)**
The tables below set out the rates of WHT applicable to the most common payments of dividends, interest, and royalties under UK domestic law where such a liability arises and the reduced rates that may be available under an applicable DTT. Please refer to specific treaties to ensure the values are up to date.

**Dividends**
There is no requirement to deduct WHT from dividends. Therefore, dividends may always be paid gross, regardless of the terms of the applicable DTT.

Until 5 April 2016, a tax credit was available to UK resident individual shareholders on dividends received. Some DTTs (i.e. Belgium, Italy, Luxembourg, and Sweden) allowed a partial tax credit to certain non-resident shareholders, which resulted in a repayable credit of 1/360th of the dividend.

**Interest**
WHT applies only to ‘annual interest’ (i.e. excluding interest on certain short-term loans). Banks and similar financial institutions are also normally able to pay annual interest to non-UK residents free of WHT. In addition, most of the UK treaties provide for a zero-rate of withholding on interest paid to governmental and quasi-governmental lenders. Such exemptions are not separately indicated in the tables below.

Notes

UK domestic law generally charges WHT on patent, copyright, and design royalties, although there can be definitional uncertainties. Many treaties allow reduced rates for a wider range of royalties. These are mentioned in this table, even though there may be no UK WHT applied under domestic law.

1. 3% for news; 5% for copyright; 10% industrial; 15% other royalties.
2. Lower rate for loans from banks and financial institutions.
3. Higher rate applies if recipient controls more than 50% of payer.
4. Lower rate applies to copyright royalties.
5. 0% on loans between businesses.
6. Lower rate applies to industrial, commercial royalties.
7. Specific additional conditions apply for lower rate.
8. Lower rate applies for equipment royalties.
9. Lower rate applies to films, TV, and radio.

---

**Tax administration**

**Taxable period**
Companies are assessed by reference to accounting periods. Normally, the accounting period is the period for which the company makes up its accounts. However, an accounting period for corporation tax purposes cannot exceed 12 months, so companies preparing statutory accounts for longer than 12 months need to prepare more than one corporation tax return.

**Tax returns**
Companies must file their statutory accounts and tax return within one year from the end of the accounting period; the return must include a self-assessment of the tax payable, eliminating the need for assessment by HMRC (though HMRC retains assessing powers for certain cases where it is not satisfied with the return, or where the company fails to make a return).

**Electronic filing requirements**
Returns must be filed online, and such returns must be filed in a specified format that is machine readable by the tax authorities. The accompanying accounts must also be in iXBRL format.

**Payment of tax**
For smaller companies, corporation tax is payable nine months and one day after the end of the accounting period to which it relates (i.e. before the return must be filed). For larger companies and groups, a system of quarterly payments on account (based on estimated profits) is in place, with the first payment being due in the seventh month of the accounting period concerned. A company will generally be considered large for this purpose in any accounting period in which it has taxable profits in excess of GBP 1.5 million (that limit being reduced by reference to the number of companies under common control, where relevant).

From 2017, the largest companies with profits over GBP 20 million will have earlier quarterly payments dates, with tax due in the third, sixth, ninth, and 12th months of the period concerned.

**Penalties**
The UK tax system can impose numerous penalties for failing to adhere to the self-assessment system. These include penalties for late filing of returns, failing to maintain appropriate records, submitting an incorrect return, making errors in certain documents sent to HMRC, unreasonably failing to report errors in assessments by HMRC, and failing to respond to a notice of enquiry from the tax authorities within the specified time limit.

**Other filing requirements**
Large companies (those with turnover greater than GBP 200 million or balance sheet assets over GBP 2 billion) are required to notify HMRC of the identity of their senior accounting officer, who must certify annually that the accounting systems are adequate for the purposes of accurate tax reporting. Penalties are chargeable on the officer and the company for careless or deliberate failure to meet these obligations.

Certain tax planning and structuring transactions and arrangements must be disclosed to HMRC either before or on implementation of the transaction under the Disclosure of Tax Avoidance Schemes (DOTAS) regime. This scheme covers most taxes and is a reporting system only, with responsibility placed on taxpayers and advisors to report. HMRC are not required to respond to the reporting, and this is not an advance clearance
or approval process. It is a reporting mechanism only, and, on occasions, new legislation has been introduced to block specific arrangements reported.

**Tax audit process**
The UK corporate tax process is one of self-assessment. Following filing of the tax return, HMRC has a period of (usually) 12 months in which to raise formal enquiries. These can range from simple information requests to detailed technical challenges over treatments adopted in the tax return.

These enquiries are often settled between the taxpayer company and HMRC by exchange of information and correspondence. Where agreement cannot be reached, arbitration or litigation may be necessary.

HMRC has certain powers to demand information and, in some circumstances, to enter premises to obtain documents, etc. These powers are rarely used, and there are no routine visits by HRMC officials to taxpayer premises.

**General anti-abuse rule (GAAR)**
The GAAR applies to income tax, corporation tax, capital gains tax, petroleum revenue tax, inheritance tax (IHT), SDLT, and ATED, but not VAT. It is targeted at changing behaviour of taxpayers who enter what might be considered to be abusive tax avoidance arrangements. The process includes a quasi-judicial review of the arrangements, the outcome of which must be used as evidence in any related tax litigation.

The government has stressed that the GAAR is only intended to apply to abusive tax avoidance arrangements, which are measured by reference to various indicators, some of which are subjective.

**Statute of limitations**
For companies that are members of medium or large groups, there is generally a period of one year after the statutory filing dates for the tax authorities to start an enquiry into any aspect of the return. For other companies, enquiries can be started up to 12 months after the date of actual filing. These periods are extended for returns submitted after the filing deadline, that are amended by the taxpayer, or where an issue is subsequently discovered that was not sufficiently disclosed within the standard period. Longer periods apply in the event of inadequate disclosure or deliberate misfiling.

**Other issues**

**Adoption of International Financial Reporting Standards (IFRS)**
IFRS is mandatory for the consolidated financial statements of listed UK companies.

All companies have the choice of adopting IFRS or adopting the new UK Generally Accepted Accounting Principles (GAAP) - FRS 102 - for their non-consolidated (solus) accounts. Many groups therefore continue to apply UK GAAP in their solus accounts.

The previous form of UK GAAP has been abolished for all periods beginning on or after 1 January 2015. From that time, UK companies will have a choice of either using full IFRS or the FRS 102 for their accounts. UK companies that are subsidiaries will also have an option to prepare accounts under either IFRS or FRS 102 methodologies with reduced disclosures. There are also additional accounting options available for small companies and micro entities. However, the options available to a company are subject to the requirements of the UK Company Law framework for consistency of GAAP within a group.
**Intergovernmental agreements (IGAs) and cooperation**

The United Kingdom has a wide range of international agreements, alongside DT Ts, for the exchange of information about taxpayers. In addition, the United Kingdom seeks to take a participative role in the European Union and within the OECD with regard to the development of international tax principles.

The United Kingdom has implemented the United States (US) Foreign Account Tax Compliance Act (FATCA) arrangements with effect from June 2014. The FATCA legislation is being introduced by the US authorities to prevent tax evasion by US citizens who use offshore accounts, and UK-based financial institutions must comply with its requirements or face suffering WHTs on interest or dividends from US corporations.

**UK tax legislation**

Announcements of proposed new legislation generally occur at least once a year. The main announcement is made on Budget Day (generally in March), when tax rates are set for the coming year. Other announcements can be made at other times and, subject to becoming approved and adopted law, can apply from a specified date. The new legislation is then included in an annual Finance Act, which is normally finalised in July. Much of the legislation introduced in recent years has been due to challenges under the EC treaty, or as a result of the tax planning being notified under the UK’s tax avoidance disclosure regulations. In the year of a general election, there may be additional Budget Days and Finance Acts.
Significant developments

The Consolidated Appropriations Act, 2016, signed into law by President Barack Obama on 18 December 2015, permanently extended numerous temporary tax provisions that had expired on 31 December 2014, extended others for five years, through 31 December 2019, and extended others for two years, through 31 December 2016, all retroactive to 1 January 2015.

The general business incentives that were permanently extended include the following provisions:

- Increased Section 179 expensing limit of 500,000 United States dollars (USD) with USD 2 million phaseout threshold and expanded definition of Section 179 property (see the Deductions section for a description of the Section 179 deduction).
- Research credit.
- Subpart F exception for active financing income (see the Income determination section for a description of Subpart F income).
- 15-year straight-line cost recovery for qualified leasehold improvements, restaurant buildings and improvements, and retail improvements.
- Wage credit for employers of active-duty military members.
- Enhanced charitable deduction for contributions of food property.
- Treatment of some dividends of regulated investment companies (RICs).
- RICs considered qualified investment entities under the 1980 Foreign Investment in Real Property Tax Act.
- Special rules for qualified small business stock.
- Reduction in S corporation recognition period for built-in gains tax (see the Taxes on corporate income section for a description of S corporations).

The general business incentives that were extended for five years include the following:

- 50% bonus depreciation.
- Look-through treatment of payments between related controlled foreign companies (CFCs) under the foreign personal holding company rules.
- New markets tax credit.
- Work opportunity tax credit.

The general business incentives that were extended for two years include the following:

- Seven-year recovery period for motor sports entertainment complexes.
- Special expensing provision for qualified film and television productions.

Making permanent a substantial number of expired tax provisions in the extenders package will provide increased tax certainty for many businesses. At the same time, other provisions that were not made permanent in this legislation will face a more challenging environment to secure further extensions. Congress is expected to review both permanent and temporary tax provisions in the future as part of comprehensive tax reform. The permanent extension of the research credit and 21
other temporary provisions is now part of the federal budget baseline, which could favourably affect future tax reform legislation required to be revenue neutral, since such provisions no longer will have to be paid for.

Also, the Surface Transportation and Veterans Health Care Choice Improvement Act of 2015, P.L. 114-41, signed into law by President Obama on 31 July 2015, changed the due date for Form 1065, US Return of Partnership Income, from 15 April to 15 March, and the due date for Form 1120, US Corporation Income Tax Return, from 15 March to 15 April. Note that the due date for Form 1120S, which is filed by subchapter S corporations, remains 15 March. These changes are effective for the 2016 tax years of partnerships and subchapter C corporations (i.e. for the 2017 filing season).

**Taxes on corporate income**

In the United States, resident corporations are taxed based on worldwide income. Generally, a foreign corporation engaged in a US trade or business is taxed at regular US corporate tax rates on income from US sources that is effectively connected with that business and at 30% on US-source income not effectively connected with that business.

The US corporate income tax (CIT) rate is based on a progressive rate schedule; however, an alternative minimum tax (AMT) provides for a flat rate with fewer deductions.

</tbody>
</table>

The 39% tax rate applies to taxable income between USD 100,000 and USD 335,000 to eliminate the benefit of the 15% and 25% rates, and the 38% tax rate applies to taxable income between USD 15,000,000 and USD 18,333,333 to eliminate the benefit of the 34% rate. Special rules apply to personal service corporations and personal holding companies.

**Alternative minimum tax (AMT)**

An AMT is imposed on corporations other than S corporations (see below) and small C corporations (generally those with no three year average annual gross receipts exceeding USD 7.5 million). The tax is 20% of alternative minimum taxable income (AMTI) in excess of a USD 40,000 exemption amount (subject to a phase out). AMTI is computed by adjusting the corporation’s regular taxable income by specified adjustments and ‘tax preference’ items. Tax preference or adjustment items could arise, for example, if a corporation has substantial accelerated depreciation, percentage depletion, intangible drilling costs, or non-taxable income.

**S corporations**

Corporations with 100 or fewer shareholders, none of whom may be corporations, that meet certain other requirements may elect to be taxed under Subchapter S of the Internal Revenue Code (IRC or ‘the Code’) and are thus known as S corporations. S
United States

corporations are taxed in a manner similar, but not identical, to partnerships (i.e. all tax items [e.g. income, deductions] flow through to the owners of the entity). Thus, S corporations generally are not subject to US federal income tax.

**Gross transportation income taxes**
Foreign corporations and non-resident alien individuals are subject to a yearly 4% tax on their US-source gross transportation income (USSGTI) that is not effectively connected with a US trade or business. Transportation income is any income derived from, or in connection with, (i) the use (or hiring or leasing) of any vessel or aircraft, or (ii) the performance of services directly related to the use of any vessel or aircraft.

**Local income taxes**
CIT rates vary from state to state and generally range from 1% to 12% (although some states impose no income tax). The most common taxable base is federal taxable income, which is modified by state provisions and generally is allocated to a state on the basis of a three-factor formula: tangible assets and rental expense, sales and other receipts, and payroll. State and municipal taxes are deductible expenses for federal income tax purposes.

**Corporate residence**
A corporation organised or created in the United States under the law of the United States or of any state is a domestic corporation. A domestic corporation is a resident corporation even though it does no business or owns no property in the United States.

**Permanent establishment (PE)**
A PE generally is defined as a fixed place of business.

**Other taxes**

**Sales taxes**
No provisions exist for a sales tax or value-added tax (VAT) at the federal level. However, sales and use taxes constitute a major revenue source for the 45 states that impose such taxes and the District of Columbia. Sales and use tax rates vary from state to state and generally range from 2.9% to 7.25% at the state level. Most states also allow a ‘local option’ that permits local jurisdictions, such as cities and counties, to impose an additional percentage on top of the state-level tax and to keep the related revenues.

In general, a sales tax is a tax applied to the retail sale of tangible personal property and certain services. Although the form of the tax may vary, it is usually imposed either directly upon the retail sale of the taxable item, on the gross receipts from the sales of taxable items, or on the person engaged in the business of making retail sales of taxable items. The use tax compliments the sales tax and is usually assessed on purchases made out of state and brought into the jurisdiction for use, storage, or consumption. Typically, either a sales tax or a use tax can be assessed on a transaction, but not both.

**Customs duties and import tariffs**
All goods imported into the United States are subject to entry and are dutiable or duty-free in accordance with their classification under the applicable items in the Harmonized Tariff Schedule of the United States. The classification also identifies eligibility for special programs and free trade agreement preferential duty rates.

When goods are dutiable, *ad valorem*, specific, or compound duty rates may be assessed. An *ad valorem* rate, which is the type of rate most often applied, is a percentage of the value of the merchandise, such as 7% *ad valorem*. A specific rate is a specified amount per unit of weight or other quantity, such as 6.8 cents per dozen. A compound rate is...
a combination of both an *ad valorem* rate and a specific rate, such as 0.8 cents per kilo plus 8% *ad valorem*. Customs requires that the value of the goods be properly declared regardless of the dutiable status of the merchandise.

Liability for the payment of duty becomes fixed at the time an entry is filed with US Customs and Border Protection (CBP). The obligation for payment is upon the person or firm in whose name the entry is filed, the importer of record.

**Excise taxes**
Excise taxes are generally imposed by the federal and state governments on a wide range of goods and activities, including gasoline and diesel fuel used for transportation, air travel, manufacturing of specified goods, and indoor tanning services.

The excise tax rates are as varied as the goods and activities upon which they are levied. For example, the excise imposed on indoor tanning services is 10% of the amount paid for the services while the excise imposed on the sale of coal mined in the United States is the lower of USD 1.10 per ton or 4.4% of the sale price.

**Property taxes**
Most states, and some cities, impose a variety of property taxes on both real and personal property.

**Stamp taxes**
No provisions exist for a stamp tax at the federal level. However, state and local governments frequently impose stamp taxes at the time of officially recording a transaction based upon the value of real estate. The sales tax on real estate may be a stamp tax on the documents recording the transfer of the real estate.

**Capital gain taxes**
On current transactions, the long-term capital gains tax rate is the same as the tax rates applicable to ordinary income. Thus, the maximum rate is 35%, excluding the additional phase out rates. However, differences may arise where AMT is imposed.

**Accumulated earnings tax**
Corporations (other than S corporations, domestic and foreign personal holding companies, corporations exempt from tax under Subchapter F of the Code, and passive foreign investment companies) accumulating earnings and profits for the purpose of avoiding shareholder personal income tax (PIT) are subject to a penalty tax in addition to any other tax that may be applicable. The accumulated earnings tax is equal to 15% of ‘accumulated taxable income’. Generally, accumulated taxable income is the excess of taxable income with certain adjustments, including a deduction for regular income taxes, over the dividends paid deduction and the accumulated earnings credit. Note that a corporation can justify the accumulation of income, and avoid tax, based on its reasonable business needs.

**Personal holding company tax**
US corporations and certain foreign corporations that receive substantial ‘passive income’ and are ‘closely held’ may be subject to personal holding company tax. The personal holding company tax is 15% of undistributed personal holding company income and is levied in addition to the regular tax.

**Payroll taxes**
Employers are subject to federal unemployment insurance tax (FUTA) of 6.2% on the first USD 7,000 of wages paid to employees meeting certain criteria. In addition, states impose workers’ compensation insurance tax at varying rates depending on state law and the nature of employees’ activities. For 2016, employers also are subject to social security contributions tax of 7.65% (including 1.45% Medicare tax) on the first
USD 118,500 (no change from 2015) of wages paid to employees and 1.45% of Medicare tax on any wages in excess of USD 118,500 (no change from 2015).

**Environmental tax**
Importers, manufacturers, and sellers of petroleum or other ozone-depleting chemicals (ODC) are subject to an environmental tax calculated per weight of the ODC used in the manufacture of the product. The tax is determined under an exact or table method provided in the instructions to Form 6667. If the weight cannot be determined, the tax is 1% of the entry value of the product.

**Other state and municipal taxes**
Other taxes that states may impose, in lieu of or in addition to taxes based on income, include franchise taxes and taxes on the capital of a corporation. State and municipal taxes are deductible expenses for federal income tax purposes.

**Branch income**
Tax rates on branch profits are the same as on corporate profits. The law also imposes a 30% branch profits tax in addition to US corporate level income taxes on a foreign corporation’s US branch earnings and profits for the year that are effectively connected with a US business. The taxable base for the branch profits tax is increased (decreased) by any decrease (increase) in the US net equity of the branch. The branch profits tax on profits may be reduced or eliminated entirely if a relevant treaty so provides (subject to strict ‘treaty shopping’ rules). The purpose of the branch profits tax is to treat US operations of foreign corporations in much the same manner as US corporations owned by foreign persons.

With certain exceptions, a 30% (or lower treaty rate) branch profits tax also will be imposed on interest payments by the US branch to foreign lenders. In addition, the tax will apply if the amount of interest deducted by the branch on its US tax return exceeds the amount of interest actually paid during the year.

**Income determination**

**Inventory valuation**
Inventories generally are stated at the lower of cost or market on a first in first out (FIFO) basis. Last in first out (LIFO) may be elected for tax purposes on a cost basis only and generally requires book and tax conformity.

The tax law requires capitalisation for tax purposes of several costs allocable to the manufacturing process that frequently are expensed as current operating costs for financial reporting (e.g. the excess of tax depreciation over financial statement depreciation).

**Capital gains**
Gains or losses on the sale or exchange of capital assets held for more than 12 months are treated as long-term capital gains or losses. Gains or losses on the sale or exchange of capital assets held for 12 months or less are treated as short-term capital gains or losses. The excess of net long-term capital gain over net short-term capital loss is considered net capital gain. Capital losses are allowed only as an offset to capital gains. An excess of capital losses over capital gains in a tax year may be carried back three years and carried forward five years to be used against (offset) capital gains.

For dispositions of personal property and certain non-residential real property used in a trade or business, net gains are first taxable as ordinary income to the extent of the depreciation/cost recovery, with any remainder generally treated as capital gain. For
other trade or business real property, net gains generally are taxed as ordinary income to the extent that the depreciation or cost recovery claimed exceeds the straight-line amount, with any remainder treated as capital gain.

An exception to capital gain treatment exists to the extent that losses on business assets were recognised in prior years. A net loss from the sale of business assets is treated as an ordinary loss. Future gains, however, will be treated as ordinary income to the extent of such losses recognised in the five immediately preceding years.

**Dividend income**
A US corporation generally may deduct 70% of dividends received from other US corporations in determining taxable income. The dividends received deduction is increased from 70% to 80% if the recipient of the dividend distribution owns at least 20% but less than 80% of the distributing corporation. Generally, dividend payments between US corporations that are members of the same affiliated group (see the Group taxation section) are deferred or eliminated until a transaction with a third party occurs. With minor exceptions, a US corporation may not deduct dividends it receives from a foreign corporation.

**Stock dividends**
A US corporation can distribute a tax-free dividend of common stock proportionately to all common stock shareholders. If the right to elect cash is given, all distributions to all shareholders are taxable as dividend income whether cash or stock is taken. There are exceptions to these rules, and extreme caution must be observed before making such distributions.

**Interest income**
Interest income is generally includible in the determination of taxable income.

**Rental income**
Rental income is generally includible in the determination of taxable income.

**Royalty income**
Royalty income is generally includible in the determination of taxable income.

**Partnership income**
The income (loss) of a partnership passes through to its partners so that the partnership itself is not subject to tax. Thus, each partner generally accounts for their distributive share of the partnership’s taxable income.

**Foreign income (Subpart F income) of US taxpayers**
Generally, a US corporation is taxed on its worldwide income, including foreign branch income earned and foreign dividends when received. Double taxation is avoided by means of foreign tax credits. Alternatively, a deduction may be claimed for actual foreign taxes that are paid. In the case of foreign subsidiaries that are more than 50% owned (by vote or value) by US shareholders (commonly known as controlled foreign companies or CFCs), certain types of undistributed income will be taxed currently to the US shareholders (Subpart F income). Generally, Subpart F income includes income that is easily transferred to a low-tax jurisdiction.

Income from certain passive foreign investment companies (where 75% or more of the income is passive or at least 50% of the assets held produce passive income) also is subject to current taxation. Current taxation occurs if the corporation elects to be a qualified electing fund (QEF) or there are actual distributions. If a QEF election is not made and the corporation makes an actual distribution, the distribution will be treated as an excess distribution to the extent it exceeds 125% of the average of the distributions made with respect to the stock over the three immediately preceding years. The excess distribution is spread over the taxpayer’s holding period, and the amount allocated to
United States

each year in the holding period is subject to tax at the highest marginal tax rate in effect for that year. This deferred tax amount also is subject to an interest charge. The interest charge is designed to pay the benefit of the tax deferral that arises out of having an overseas investment that pays no US income taxes.

**Deductions**

**Depreciation and amortisation**

Depreciation deductions are allowances that may be taken for capital outlays for tangible property. For property placed in service after 1986, capital costs must be recovered by using the modified accelerated cost recovery system (MACRS) method. Depending on the type of tangible property, the general cost recovery periods are three, five, seven, ten, 15, 20, 27.5, and 39 years (31.5 years for property placed in service before 13 May 1993). The cost recovery methods and periods are the same for both new and used property. Most tangible personal property is in the three, five, or seven year class. Property placed in the three, five, seven, or ten year class is depreciated by first applying the 200% declining-balance method and then switching to the straight-line method at such a time as when use of the straight-line method maximises the depreciation deduction. Property in the 15 or 20 year class is depreciated by using the 150% declining-balance method and later switching to the straight-line method. An election may be made to use the alternative depreciation system (basically, the straight-line method over prescribed lives). Residential rental property generally is depreciated by the straight-line method over 27.5 years. Non-residential real property is depreciated by the straight-line method over 39 years (31.5 years for property placed in service before 13 May 1993).

An election to use the straight-line method over the regular recovery period or a longer recovery period also is available. Alternatively, taxpayers may elect to use the 150% declining-balance method over the regular recovery period for all property other than real property. This method is required for AMT purposes.

For most tangible personal and real property placed in service in the United States after 1980 but before 1 January 1987, capital costs were recovered using the accelerated cost recovery system (ACRS), which applied accelerated methods of cost recovery over periods specified by statute. The general ACRS recovery periods were three, five, ten, 15, 18, and 19 years.

Special rules apply to automobiles and certain other 'listed' property. Accelerated depreciation deductions can be claimed only if the automobile is used 50% or more for qualified business use as defined in related regulations. Further, for automobiles placed in service after 1986, the allowable yearly depreciation deduction cannot exceed specific dollar limitations.

Separate methods and periods of cost recovery are specified by statute for certain tangible personal and real property used outside the United States.

Rapid amortisation may be allowable for certain pollution control facilities.

Tax depreciation is not required to conform to book depreciation. Tax depreciation generally is subject to recapture on the sale or disposition of certain property, to the extent of gain, which is subject to tax as ordinary income.

The cost of most intangible assets is generally capitalised and amortisable rateably over 15 years.
Section 179 deduction
Corporations can elect to expense, up to a statutory amount per year, the cost of certain eligible property used in the active conduct of a trade or business. This is commonly referred to as the Section 179 deduction.

The 2003 tax cuts temporarily increased the maximum dollar amount that may be deducted under Section 179 from USD 25,000 to USD 100,000. The 2003 tax cuts also increased the phase-out amount from USD 200,000 to USD 400,000. These amounts have been further modified and extended several times on a temporary basis, increasing up to a high of USD 500,000 and USD 2 million, respectively, for tax years beginning in 2010 and 2011, and then to USD 125,000 and USD 500,000, respectively, for tax years beginning in 2012, before reverting to the permanent amounts of USD 25,000 and USD 200,000, respectively, for tax years beginning in 2013 and thereafter. The American Taxpayer Relief Act of 2012, signed into law on 2 January 2013, increases the maximum amount and phase-out threshold in 2012 and 2013 to the levels in effect in 2010 and 2011 (USD 500,000 and USD 2 million, respectively). The Tax Increase Prevention Act of 2014, signed into law on 19 December 2014, extended the USD 500,000 and USD 2 million amounts to tax years beginning in 2014. The Consolidated Appropriations Act, 2016, signed into law on 18 December 2015, extended the USD 500,000 and USD 2 million amounts permanently, retroactive to 1 January 2015; beginning in 2016, the limitation amount will be indexed for inflation.

In addition, the deduction under this election is limited to the taxable income of the business.

Bonus depreciation
A 50% special first year depreciation allowance (i.e. bonus depreciation) applies (unless an election out is made) for new MACRS property with a recovery period of 20 years or less, certain computer software, water utility property, and certain leasehold improvements acquired after 31 December 2007. The special allowance applies for regular income tax and AMT purposes. No AMT adjustment is made if the special allowance is used. The special allowance does not apply to property that must be depreciated using the alternative depreciation system or to ‘listed property’ not used predominantly for business. The special allowance reduces basis before regular depreciation is figured. Additionally, claiming bonus depreciation on automobiles may affect the first year depreciation limits on such automobiles.

The Tax Increase Prevention Act of 2014, signed into law on 19 December 2014, extended 50% bonus depreciation through 31 December 2014 (31 December 2015 for long-production-period property [LPPP] and certain aircraft).

The Act extended for one year, to property placed in service before 1 January 2015 (1 January 2016 in the case of certain longer-lived property and transportation property), the provision allowing a corporation to elect to accelerate AMT credits in lieu of bonus depreciation.

The Consolidated Appropriations Act, 2016, signed into law on 18 December 2015, extended bonus depreciation as follows:

- 40% for property acquired and place in service during 2018.
- 30% for property acquired and place in service during 2019.

The Act also modified the AMT rules beginning in 2016 by increasing the amount of unused AMT credits that may be claimed in lieu of bonus depreciation.
Depletion
For natural resource properties other than timber and certain oil and gas properties, depletion may be computed on a cost or a percentage basis.

Cost depletion is a method of depletion applied to exhaustible natural resources, including timber, which is based on the adjusted basis of the property. Each year, the adjusted basis of the property is reduced, but not below zero, by the amount of depletion calculated for that year. The current year cost depletion deduction is based on an estimate of the number of units that make up the deposit and the number of units extracted and sold during the year.

Percentage depletion is a method of depletion applied to most minerals and geothermal deposits, and, to a more limited extent, oil and gas. Percentage depletion is deductible at rates varying from 5% to 25% of gross income, depending on the mineral and certain other conditions. Percentage depletion may be deducted even after the total depletion deductions have exceeded the cost basis. However, percentage depletion is limited to 50% (100% for oil and gas properties) of taxable income from the property (computed without allowance for depletion). Generally, percentage depletion is not available for oil or gas wells. However, exceptions exist for natural gas from geopressurised brine and for independent producers of oil and gas.

Goodwill
The cost of goodwill generally is capitalised and amortisable rateably over 15 years.

Start-up expenses
Generally, start-up expenditures must be amortised over a 15-year period; however, certain taxpayers may elect to deduct some expenses in the tax year in which the trade or business begins.

US manufacturing deduction
Over the last several decades, various tax incentive systems have been enacted in the United States to encourage exports and were later repealed, including the extraterritorial income (ETI) regime, which was repealed as a result of a World Trade Organization (WTO) ruling that the ETI regime favoured US goods and violated the national treatment provisions of the General Agreement on Tariffs and Trade. In response, the United States enacted the American Jobs Creation Act of 2004, which introduced a phase-out repeal of ETI and introduced the domestic production activities deduction under Section 199, seeking to compensate US manufacturers for the loss of ETI benefits.

Under Section 199, taxpayers are allowed a 9% deduction for qualified production activities (QPA) income (subject to a taxable income limitation). The deduction is available to all taxpayers actively engaged in QPA. For corporate taxpayers, the deduction generally will mean a federal income tax rate of 31.85% on QPA income. Importantly, the deduction also applies in calculating the AMT. There is a limit on the amount of the deduction equal to 50% of W-2 wages allocable to QPA (subject to a specific effective date), and the deduction is not allowed for taxpayers that incur a loss from their production activities or have an overall loss (including a carryover loss) from all activities.

A taxpayer’s QPA income is calculated using the following formula: domestic production gross receipts less the sum of cost of goods sold allocable to such receipts and other expenses, losses, or deduction that are properly allocable to such receipts.

Interest expenses
Interest expenses generally are deductible but may be limited by thin capitalisation rules (see Thin capitalisation in the Group taxation section).
**Bad debt**
Bad debt resulting from a trade or business may be deducted in the year the debt becomes worthless. Determining the date the debt becomes worthless may present difficulty.

**Charitable contributions**
Deductions for allowable charitable contributions may not exceed 10% of taxable income computed without regard to certain deductions, including charitable contributions themselves. Deductions for contributions so limited may be carried over to the five succeeding years, subject to the 10% limitation annually.

**Employee benefit plans (pension plans and expenses)**
Through the Code, the government provides incentives for employers to provide retirement benefits to workers, including employee benefit, qualifying profit-sharing, or stock bonus plans. Usually, the employer will be allowed a current deduction for any contributions made to the fund, and the employee’s tax liability will be deferred until the benefit is paid. For-profit, non-government employers generally have two types of available plans, which generally are subject to the reporting and disclosure requirements set forth under the Employee Retirement Income Security Act of 1974 (ERISA).

The first category of employee benefit plans is the defined benefit plan, or more commonly known as a pension plan, to which an employer contributes money, on an ongoing basis, to cover the amount of retirement income owed to retired employees under the plan (which will vary based on years of service, average salary, and/or other factors). Any investment gains or losses will not affect the amount of benefits paid to participants but will affect the amount an employer needs to contribute in order to cover its obligation.

The second category of employee benefit plans is the defined contribution plan, or more commonly known in the United States as a ‘401(k) plan’, to which an employer’s contributions (if any) are allocated amongst the separate accounts of participating employees, who also may contribute to their respective accounts. Investment gains or losses and the history of contributions will affect the value of a participant’s account at retirement but will not affect an employer’s contributions since the employer is not obligated to ensure any specified level of benefit in the plan.

Non-profits, including churches and government entities, have similar employee benefit plans, except different requirements apply. Small employers and self-employed individuals also have similar options available but are subject to different requirements.

**Fines and penalties**
No deduction generally is allowed for fines or penalties paid to the government for violation of any law.

**Bribes, kickbacks, and illegal payments**
An amount paid, directly or indirectly, to any person that is a bribe, kickback, or other illegal payment is not deductible.

**Taxes**
State and municipal taxes are deductible expenses for federal income tax purposes.

**Other significant items**

- No deduction generally is allowed for a contingent liability until such liability is fixed and determinable.
- Costs incurred for entertainment must meet strict tests in order to be deductible. The deduction for business meal and entertainment expenses is 50% of the expenses
incurred. There are also limitations on the deductibility of international and domestic business travel expenses.

- Royalty payments, circulation costs, mine exploration and development costs, and other miscellaneous costs of carrying on a business are deductible, subject to certain conditions and limits.
- Depending on the taxpayer’s tax accounting method, research and experimental (R&E) expenditures may be deducted as incurred or treated as deferred expenses and amortised over a period of not less than 60 months; however, in general, the method used must be consistently applied.

**Net operating losses (NOLs)**
An NOL is generated when business deductions exceed gross income in a particular tax year. Depending on current tax law, an NOL may be carried back to offset past income and possibly obtain a refund or carried forward to offset future income. Generally, a loss may be carried back two years and, if not fully used, carried forward 20 years. For state tax purposes, carryback and carryforward provisions are often similar to the federal provisions, except that several states do not permit any carrybacks or carryforwards.

Special rules surrounding NOLs may apply if a taxpayer is located in a qualified disaster area.

Special rules also apply relating to specified liability losses.

Complex rules may limit the use of NOLs after a reorganisation or other change in corporate ownership. Generally, if the ownership of more than 50% in value of the stock of a loss corporation changes, a limit is placed on the amount of future income that may be offset by losses carried forward.

**Payments to foreign affiliates**
A US corporation generally may claim a deduction for royalties, management service fees, and interest charges paid to foreign affiliates to the extent the amounts are actually paid and are not in excess of what it would pay an unrelated entity (i.e. are at arm’s length). In addition, US withholding on these payments may be required.

**Group taxation**
An affiliated group of US ‘includible’ corporations, consisting of a parent and subsidiaries directly or indirectly 80% owned, generally may offset the profits of one affiliate against the losses of another affiliate within the group by electing to file a consolidated federal income tax return. A foreign incorporated subsidiary may not be consolidated into the US group, except for certain Mexican and Canadian incorporated entities. A partnership may not be included in a consolidated return, even if it is 100% owned by members of an affiliated group, since a partnership is not a corporation. However, a member’s earnings that flow through from a partnership are included as part of the consolidated group’s taxable income or loss. Filing on a consolidated (combined) basis is also allowed (or may be required or prohibited) in certain states.

Sales, dividends, and other transactions between corporations that are members of the same group generally are deferred or eliminated until such time as a transaction occurs with a non-member of the group. Losses incurred on the sale of members of the group are disallowed under certain circumstances.

**Transfer pricing**
Transfer pricing regulations govern how related entities set internal prices for the transfers of goods, intangible assets, services, and loans in both domestic and international contexts. The regulations are designed to prevent tax avoidance among related entities and place a controlled party on par with an uncontrolled taxpayer by
requiring an arm’s-length standard. The arm’s-length standard generally is met if the results of a controlled transaction are consistent with results that would have been realised if uncontrolled taxpayers had engaged in a similar transaction under similar circumstances. If a company is not in compliance with the arm’s-length standard, the Internal Revenue Service (IRS) may raise taxable income and tax payable in the United States. After a transfer pricing adjustment, a multinational company may face double tax, paying tax twice on the same income in two countries. Multinational companies may request competent authority relief from double taxation through a tax treaty.

In order to avoid potential transfer pricing penalties, one avenue available to companies may be to obtain an advance pricing agreement (APA) with the IRS, unilaterally, or with the IRS and another tax authority, bilaterally, covering inter-company pricing.

**Thin capitalisation**

Thin capitalisation rules may apply to disallow interest payments related to excess debt and to re-characterise such payments as dividends. The interest expense deduction can be limited and suspended if more than 50% of the adjusted taxable income of a thinly-capitalised corporation (with similar rules for a corporate partner in a partnership) is sheltered by interest paid to a related party (or paid to a third-party but guaranteed by the related party) who is not subject to US tax on the income.

**Controlled foreign companies (CFCs)**

Under the Subpart F regime, a CFC is any foreign corporation with respect to which more than 50% of either the voting power of all classes of stock entitled to vote or the total value of all classes of the corporation’s stock is owned by US shareholders on any day during the foreign corporation’s tax year.

**Tax credits and incentives**

**Foreign tax credit (FTC)**

Generally, in any year, a taxpayer can choose whether to take as a credit (subject to limitation) or as a deduction foreign income, war profits, and excess profit taxes paid or accrued during the tax year to any foreign country or US possession. An FTC reduces US income tax liability dollar for dollar, while a deduction reduces the US income tax liability at the marginal rate of the taxpayer. For taxpayers with NOLs, the FTC is of no value in such year. However, a benefit might be received either in an earlier year (through a refund of previously paid taxes) or a later year (through a reduction of future taxes). It also should be noted that a taxpayer has an ability to switch from credit to deduction (or from deduction to credit) at any time in a ten-year period commencing when the foreign taxes were paid or accrued. Generally, an FTC may be carried back one year and, if not fully used, carried forward ten years.

In addition, the FTC goes beyond direct taxes to include foreign taxes paid ‘in lieu of’ a tax upon income, war profits, or excess profits, which would otherwise generally be imposed. It also includes deemed-paid (indirect) taxes paid for certain US corporate shareholders of non-portfolio foreign corporations when actual or deemed dividends are received. Furthermore, the FTC system has numerous limitations to mitigate the potential abuses of the credit by the taxpayer.

**General business credit**

Various business credits are available to provide special incentives for the achievement of certain economic objectives. In general, these credits are combined into one ‘general business credit’ for purposes of determining each credit’s allowance limitation for the tax year. The general business credit that may be used for a tax year is limited to a tax-based amount. In general, the current year’s credit that cannot be used in a given year because of the credit’s allowance limitation may be carried back to the tax year preceding the current year and carried forward to each of the 20 years following the current year.
United States

In general, the current year business credit is a combination of the following credits, some of which were extended, retroactively to 1 January 2015, for two years, five years, or permanently as part of the Consolidated Appropriations Act, 2016, and others of which expired at the end of 2014, but still may be renewed retroactively by Congress:

- Investment credit.
- Work opportunity credit.
- Alcohol fuels credit.
- Research credit.
- Low-income housing credit.
- Enhanced oil recovery credit.
- Disabled access credit for certain eligible small businesses.
- Renewable electricity production credit.
- Empowerment zone employment credit.
- Indian employment credit.
- Employer social security credit.
- Orphan drug credit.
- New markets tax credit.
- Small employer pension plan start-up cost credit for eligible employers.
- Employer-provided child care credit.
- Railroad track maintenance credit.
- Biodiesel fuels credit.
- Low sulphur diesel fuel production credit.
- Marginal oil and gas well production credit.
- Distilled spirits credit.
- Advanced nuclear power facility production credit.
- Non-conventional source production credit.
- New energy efficient home credit.
- Energy efficient appliance credit.
- A portion of the alternative motor vehicle credit.
- A portion of the alternative fuel vehicle refuelling property credit.
- Hurricane Katrina housing credit.
- Hurricane Katrina employee retention credit.
- Hurricane Rita employee retention credit.
- Hurricane Wilma employee retention credit.
- Mine rescue team training credit.
- Agricultural chemicals security credit for eligible businesses.
- Differential wage payment credit.
- Carbon dioxide sequestration credit.
- A portion of the new qualified plug-in electric drive motor vehicle credit for vehicles that will vary based on the date of purchase.

**Employment credits**

A ‘work opportunity tax credit’ is available through 2019 for employment of certain types of workers. ‘Creditable’ wages generally are the first USD 6,000 of wages paid to each qualified employee for the year. The credit is 40% of creditable wages, for a maximum credit of USD 2,400.

**Research credit**

The research credit under Section 41 is available for companies that make qualified research expenditures (QREs) to develop new or improved products, manufacturing processes, or software in the United States. The credit was enacted in 1981 on a temporary basis to help increase R&E spending in the United States. Since then, the research credit has been extended on a temporary basis about 16 times, but was extended, retroactively to 1 January 2015, on a permanent basis as part of the Consolidated Appropriations Act, 2016.
The research credit generally is computed by calculating current-year QRE over a base. The base is calculated using either the regular research credit (RRC) method or the alternative simplified credit (ASC) method. Under the RRC method, the credit equals 20% of QREs for the tax year over a base amount established by the taxpayer in 1984 to 1988 or by another method for companies that began operations after that period.

The ASC equals 14% (for the 2009 tax year and thereafter) of QREs over 50% of the average annual QREs in the three immediately preceding tax years. If the taxpayer has no QREs in any of the three preceding tax years, the ASC may be 6% of the tax year’s QREs. The taxpayer must make a timely ASC election on Form 6765 attached to an originally filed return filed by the due date for that return (including extensions), or, pursuant to final regulations published in February 2015, an amended return (subject to certain limitations).

Taxpayers using the RRC also may take a 20% credit for incremental payments made to qualified organisations for basic research. For tax years ending after 8 August 2005, taxpayers also may take the Energy Research Consortium Credit, which provides a 20% credit for expenditures on qualified energy research undertaken by an energy research consortium.

The deduction for R&E expenditures under Section 174 must be reduced by the entire amount of the credit unless an election is made to reduce the amount of the credit.

Inbound investment incentives
There generally are no specific incentives related to inbound investment at the federal level, other than certain portfolio debt and bank deposit exceptions. The portfolio debt exception enables non-residents and foreign corporations to invest in certain obligations (which must meet certain statutory requirements to qualify as ‘portfolio debt’) in the United States without being subject to US income (or withholding) tax on the interest income. Certain state and local benefits may also be available.

Qualified private activity bonds
Interest income received on certain qualified private activity bonds generally is exempt from federal income tax. This enables a business enterprise to issue the bonds at a lower interest rate.

Other tax incentives
State and local governments provide numerous incentives to encourage business and, thus, employment in their jurisdictions.

Withholding taxes
Under US domestic tax laws, a foreign person generally is subject to 30% US tax on its US-source income. US persons making payments (‘withholding agents’) to foreign persons generally must withhold 30% of the payment amount as tax withheld at source on payments, such as dividends and royalties, made to foreign persons. In other situations, withholding agents may apply reduced rates or be exempted from withholding tax (WHT) at source when there is a tax treaty between the foreign person’s country of residence and the United States.

The United States has entered into various income tax treaties with countries in order to avoid double taxation of the same income and to prevent tax evasion. The table below, from IRS Publication 901 (Rev. April 2013), summarises the benefits resulting from these treaties.

Notes

* Please note the tax rates and associated footnotes appearing in the ‘Royalties’ column in the table address three types of royalties, as denoted in the most recent IRS publication. These three are industrial royalties, motion picture and television copyright royalties, and ‘other’ copyright royalties. The slashes ‘/’ between each figure and associated footnote(s) are meant to demarcate these three types of royalties, respectively.

1. No US tax is imposed on a dividend paid by a US corporation that received at least 80% of its gross income from an active foreign business for the three-year period before the dividend is declared.
2. The reduced rate applies to dividends paid by a subsidiary to a foreign parent corporation that has the required percentage of stock ownership. In some cases, the income of the subsidiary must meet certain requirements (e.g. a certain percentage of its total income must consist of income other than dividends and interest). For Italy, the reduced rate is 10% if the foreign corporation owns 10% to 50% of the voting stock (for a 12-month period) of the company paying the dividends. For Japan, dividends received from a more than 50% owned corporate subsidiary are exempt if certain conditions are met.
3. The exemption or reduction in rate does not apply if the recipient has a PE in the United States and the property giving rise to the income is effectively connected with this PE. Under certain treaties, the exemption or reduction in rate also does not apply if the property producing the income is effectively connected with a fixed base in the United States from which the recipient performs independent personal services. Even with the treaty, if the income is not effectively connected with a trade or business in the United States by the recipient, the recipient will be considered as not having a PE in the United States under IRC Section 894(b).
4. The exemption or reduction in rate does not apply if the recipient is engaged in a trade or business in the United States through a PE that is in the United States. However, if the income is not effectively connected with a trade or business in the United States by the recipient, the recipient will be considered as having a PE in the United States to apply the reduced treaty rate to that item of income.
5. Interest determined with reference to the profits of the issuer or one of its associated enterprises is taxed at 15%.
6. Contingent interest that does not qualify as portfolio interest is treated as a dividend and is subject to the rates under those columns, as appropriate.
7. The exemption applies only to interest on credits, loans, and other indebtedness connected with the financing of trade between the United States and the CIS member. It does not include interest from the conduct of a general banking business.
8. The tax rates in the US treaty with the former USSR still apply to the following countries: Armenia, Azerbaijan, Belarus, Georgia, Kyrgyzstan, Moldova, Tajikistan, Turkmenistan, and Uzbekistan.
9. The rate in column 2 applies to dividends paid by a regulated investment company (RIC) or a real estate investment trust (REIT). However, that rate applies to dividends paid by a REIT only if the beneficial owner of the dividends is an individual holding less than a 10% interest (25% in the case of Portugal, Spain, and Tunisia) in the REIT.
10. The rate is 8% for copyrights of scientific work.
11. The rate is 5% for interest beneficially owned by a bank or other financial institution (including an insurance company) or paid due to a sale on credit of any industrial, commercial, or scientific equipment, or of any merchandise to an enterprise.
12. The rate is 10% if the interest is paid on a loan granted by a bank or similar financial institution. For Thailand, the 10% rate also applies to interest from an arm's-length sale on credit of equipment, merchandise, or services.
United States

13. This is the rate for royalties for the use of, or the right to use, industrial, commercial, and scientific equipment. The rate for royalties for information concerning industrial, commercial, and scientific know-how is subject to the rate in column 5 ("other royalties").

14. The rate is 15% for copyrights of scientific work.

15. Amounts paid to a pension fund or employee benefit organisation that are not derived from the carrying on of a business, directly or indirectly, by the fund or organisation are exempt.

16. The rate in column 2 applies to dividends paid by a RIC. Dividends paid by a REIT are subject to a 30% rate.

17. An election can be made to treat this interest income as if it were industrial and commercial profits taxable under article 8 of this treaty.

18. The rate is 4.9% for interest derived from (i) loans granted by banks and insurance companies and (ii) bonds or securities that are regularly and substantially traded on a recognised securities market. The rate is 10% for interest not described in the preceding sentence and paid (i) by banks or (ii) by the buyer of machinery and equipment to the seller due to a sale on credit.

19. The rate is 15% (10% for Bulgaria; 30% for Germany and Switzerland) for contingent interest that does not qualify as portfolio interest.

20. The rate is 15% for interest determined with reference to (i) receipts, sales, income, profits, or other cash flow of the debtor or a related person, (ii) any change in the value of any property of the debtor or a related person, or (iii) any dividend, partnership distribution, or similar payment made by the debtor to a related person.

21. Interest received by a financial institution is tax exempt. For Venezuela, the rate is 4.95% if the interest is beneficially owned by a financial institution (including an insurance company).

22. The rate in column 2 applies to dividends paid by a RIC or REIT. However, that rate applies to dividends paid by a REIT only if the beneficial owner of the dividends is (i) an individual (or pension fund in the case of France or New Zealand) holding not more than a 10% interest in the REIT, (ii) a person holding not more than 5% of any class of the REIT's stock and the dividends are paid on stock that is publicly traded, or (iii) a person holding not more than a 10% interest in the REIT and the REIT is diversified.

23. Interest paid or accrued on the sale of goods, merchandise, or services between enterprises is exempt. Interest paid or accrued on the sale on credit of industrial, commercial, or scientific equipment is exempt.

24. Dividends received from an 80%-owned corporate subsidiary are exempt if certain conditions are met.

25. Exemption does not apply to amount paid under, or as part of, a conduit arrangement.

26. Interest is exempt if (i) paid to certain financial institutions, or (ii) paid on indebtedness from the sale on credit of equipment or merchandise.

27. Amounts paid to a pension fund that are not derived from the carrying on of a business, directly or indirectly, by the fund are exempt. This includes amounts paid by a REIT only if the conditions in footnote 31 are met. For Sweden, to be entitled to the exemption, the pension fund must not sell or make a contract to sell the holding from which the dividend is derived within two months of the date the pension fund acquired the holding.

28. The rate in column 2 applies to dividends paid by a RIC or REIT. However, that rate applies to dividends paid by a REIT only if the beneficial owner of the dividends is (i) an individual or a pension fund holding not more than a 10% interest in the REIT, (ii) a person holding not more than 5% of any class of the REIT's stock and the dividends are paid on stock that is publicly traded, or (iii) a person holding not more than a 10% interest in the REIT and the REIT is diversified. Dividends paid to a pension fund by a RIC, or a REIT that meets the above conditions, are exempt. For Sweden, the pension fund must also satisfy the requirements in footnote 30.

29. The exemption does not apply if the recipient of the gain is an individual who is present in the United States for more than 119 days during the year.

30. The rate applies to dividends paid by a REIT only if the beneficial owner of the dividends is (i) an individual holding less than a 10% interest in the REIT, (ii) a person holding not more than 5% of any class of the REIT’s stock and the dividends are paid on stock that is publicly traded, or (iii) a person holding not more than a 10% interest in the REIT and the REIT is diversified.

---

**Tax administration**

**Taxable period**

US corporate taxpayers are taxed on an annual basis. Corporate taxpayers may choose a tax year that is different from the calendar year. New corporations may use a short tax year for their first tax period, and corporations may also use a short tax year when changing tax years.

**Tax returns**

The US tax system is based on the principle of self-assessment. A corporate taxpayer is required to file an annual tax return (generally Form 1120) by the 15th day of the fourth month following the close of its tax year. A taxpayer can obtain an additional six month extension of time to file its tax return. Failure to timely file may result in penalties.

Payment of tax

A taxpayer’s tax liability generally is required to be prepaid throughout the year in four equal estimated payments and fully paid by the date the tax return is initially due for that year. However, because a corporation that expects its tax liability for the tax year to exceed the small sum of USD 500 (based on its tax liability for the preceding year), almost all corporations are required to pay their full estimated tax liability for the year in their four estimated tax payments. For calendar year corporations, the four estimated payments are due by the 15th day of April, June, September, and December. For fiscal year corporations, the four estimated payments are due by the 15th day of the fourth, sixth, ninth, and 12th month of the tax year. Generally, no extensions to pay are allowed. Failure to pay the tax by the due dates as indicated above can result in estimated tax and late payment penalties and interest charges.

The instalment payments must include estimates of regular CIT, AMT, environmental tax, and, for foreign corporations, the tax on gross transportation income. To avoid a penalty, corporations must calculate the instalment payments based on at least 25% of the lesser of (i) the tax shown on the current tax return or (ii) the prior year’s tax liability, provided that the tax liability was a positive amount in the prior year and that such year consisted of 12 months. However, corporations with taxable income of at least USD 1 million (before use of NOLs or capital loss carryforwards) in any of the three preceding years are not permitted to calculate the instalment based payment on the prior year’s tax liability, except in determining the first instalment payment. Instead, such corporations must calculate the instalment payments based on the tax shown on the current tax return.

Penalties

Civil and criminal penalties may be imposed for failing to follow the Code when paying US taxes. The civil penalty provisions may be divided into four categories: delinquency penalties; accuracy-related penalties; information reporting penalties; and preparer,
promoter, and protester penalties. Many, but not all, have exception provisions to cover reasonable cause. In addition, many have provisions directing how the penalties interact with the other penalties.

These four main civil penalty categories may further be divided. First, the delinquency penalties may be divided into failure to file, failure to pay, and failure to make timely deposits of tax. Failure to make timely deposits of tax applies to taxpayers required to make instalment payments and WHT payments.

Second, the penalties relating to the accuracy of tax returns are divided into the negligence penalty, the substantial understatement penalty, substantial overstatement of pension liabilities, substantial estate or gift tax valuation underestimate, and the valuation penalties. These penalties are also coordinated with the fraud penalty to eliminate any stacking of the penalties. Again, like other provisions, the fraud penalty is not intended to be imposed as a stacked penalty.

The third category of penalties is the information reporting penalties. These penalties may be imposed upon those who only have a duty to report information to the IRS.

The fourth and final major categories of civil penalties are the preparer, promoter, and protester penalties. Currently, the most notable of these is the return preparer penalty for which there is a penalty for a position on a return for which the preparer did not have substantial authority. Also included in this provision is a penalty for wilful or reckless attempt to understate the tax liability of another person. Additionally, return preparer penalties may be imposed for failure to furnish a copy of a return or claim for refund to the taxpayer, sign the return or claim for refund, furnish his or her identifying number, or file a correct information return.

Other promoter and protestor penalties include a penalty for promoting abusive tax shelters, aiding and abetting the understatement of tax liability, and filing frivolous income tax returns. Additionally, a court may award sanctions and costs if a person institutes or maintains a proceeding primarily for delay, takes a position that is frivolous, or unreasonably fails to pursue available administrative remedies.

In addition to these major civil penalties, international tax-related penalties for failures other than timely and accurate filing (e.g. wilful failure to report international boycott activity, failure of an agent to furnish a notice of a false affidavit relating to the WHT on dispositions of US real property interests, failure of a US person to furnish information relating to CFCs and controlled foreign partnerships, failure of a US person to report foreign bank accounts) exist. Pension and employee benefit related tax penalties exist that protect the policy reasons for the tax incentives, including, most notably, early withdrawal of pension funds. Another group of specialised penalties apply to exempt organisations.

Criminal penalties exist for situations when the failures to stay within the tax system are more egregious. Although applicable to corporate taxpayers, they are applied more frequently to individuals.

In addition to the penalty provisions, interest at statutory rates generally applies to underpayments of tax.

**Tax audit process**

Generally, the US tax system is based on self-assessment; however, many large and mid-size businesses are under continuous audit by the IRS and state tax authorities. The audits may include the entire list of taxes for which the business is liable. Smaller business and persons with lower incomes are generally subject to audit on a random basis.
Statute of limitations
The IRS generally has three years after an original return is filed to assess income taxes. A return will be deemed to have been filed on its due date, even if the return is actually filed on an earlier date.

Topics of focus for tax authorities
Currently, the IRS is focused on abusive payments related to contribution to capital of a corporation, domestic manufacturing deduction, foreign earnings repatriation, FTC generators, repairs vs. capitalization change in accounting method, research credit claims, transfer of intangibles/offshore cost sharing, WHTs, and employee classification.

Tax shelter
Treasury regulations require taxpayers to disclose transactions determined to be abusive or possibly abusive. Current information on these transactions, known as listed and reportable transactions, is available from the IRS website (www.irs.gov).

Accounting for income taxes
For US federal tax purposes, the two most important characteristics of a tax method of accounting are (i) timing and (ii) consistency. If the method does not affect the timing for including items of income or claiming deductions, it is not an accounting method and generally IRS approval is not needed to change it. In order to affect timing, the accounting method must determine the year in which an income or expense item is to be reported.

In general, in order to establish an accounting method, the method must be consistently applied. Once an accounting method has been adopted for federal tax purposes, any change must be requested by the taxpayer and approved by the IRS. Changes in accounting methods cannot be made through amending returns. The two most common methods of accounting are the accrual basis and cash basis methods.

Other issues
Tax accounting and internal controls
Accounting Standards Codification (ASC) 740, Income Taxes (formerly known as Financial Accounting Standards Board [FASB] Statement No. 109, Accounting for Income Taxes) addresses how companies should account for and report the effects of taxes based on income. ASC 740’s principles and requirements apply to domestic and foreign entities in preparing financial statements in accordance with US generally accepted accounting principles (GAAP), including not-for-profit entities with activities that are subject to income taxes. This scope includes: (i) domestic federal (national) income taxes (US federal income taxes for US enterprises) and foreign, state, and local (including franchise) taxes based on income; and (ii) an enterprise’s domestic and foreign operations that are consolidated, combined, or accounted for by the equity method.

In recent years, controls around the accounting for income taxes have been a critical source of material weaknesses in companies’ internal controls over financial reporting. Accounting for income taxes also has been a primary reason for restating financial statements. Management should ensure that its judgments and estimates are reasonable (e.g., assessing the need for a valuation allowance on deferred taxes) and that the underlying internal control processes are reliable.

United States

Corporate reorganisations
In general, a corporate reorganisation involving a merger, acquisition, or consolidation is a taxable event under the general recognition provisions of the Code. However, a corporate reorganisation that meets certain statutory and judicial requirements may qualify as a tax-free transaction, with gain or loss generally not recognised or deferred to a later date.

Foreign Account Tax Compliance Act (FATCA)
FATCA was enacted in 2010 to prevent and detect offshore tax evasion. While the name may imply that FATCA is directed at financial institutions, many global companies outside the financial services industry may be affected if they have entities in their worldwide network falling under the purview of FATCA, or have operational areas that make or receive payments subject to FATCA.

Multinational enterprises that are withholding agents were already obligated to report, withhold on payments, and document payees, but FATCA requires changes to these activities. FATCA mandates that multinational businesses evaluate entity payees differently, engage in withholding on certain gross proceeds transactions (a change from historic processes), as well as report different information to the IRS.

The withholding provisions of FATCA began 1 July 2014. Compliance with FATCA may require changes to existing systems and processes across business units and regions, the renewal of policies and day-to-day practices, and new tasks, such as registering with the IRS.

To mitigate certain foreign legal impediments to FATCA compliance, intergovernmental agreements (IGAs) also have been negotiated (with more to come) between the US Treasury and foreign governments. Under certain IGAs, including most of the IGAs signed thus far, information will be exchanged directly between the IRS and local governments. This obligates entities in IGA jurisdictions to report information to their government that may not have been required or permitted in the past.

Assessing FATCA’s impact will require identifying whether an IGA may apply to the entity or payment stream at issue. Provisions in the final FATCA regulations or, if applicable, an IGA that provides more favourable results may be utilised. This likely will increase the complexity of the process, due in part to the multiple paths to compliance (e.g. regulations or an IGA). The regulators have focused on having consistent requirements in each IGA, but there are noticeable differences in the agreements signed to date.

US possessions
Puerto Rico, American Samoa, Guam, the Commonwealth of the Northern Mariana Islands, and the US Virgin Islands have their own independent tax departments. Accordingly, they have their own rules. See the Puerto Rico summary for more information about Puerto Rico taxation.
Significant developments

National Budget for years 2015 to 2019 - Law N° 19,355

The law approving the 2015 to 2019 Budget includes tax amendments and became effective as of 1 January 2016. The most significant provisions include the following:

• Extension of the consideration of Uruguayan source (thus subject to corporate, personal, and non-residents income tax) of the following:
  • Advertising services rendered from outside Uruguay by independent service suppliers to corporate income tax (CIT) payers.
  • Mediation, leasing, use, transfer of use, or transfer of federative rights, image rights, and similar of athletes registered in resident sports entities, regardless of the registration period or permanence in Uruguay.
  • Restriction on the increased deduction of salary expenses in the calculation of CIT when the taxpayer has enjoyed investment promotion benefits (granted according to the employment indicator).

• For purposes of deducting CIT expenses, only those that comply with the formalities set for value-added tax (VAT) or those that are expressly excepted of these formalities by the Tax Office, in view of the company’s line of business, would be considered properly documented. It is worth mentioning that the Administrative Court had recently interpreted that the fact that certain expenses do not comply with such formalities do not restrict their deductibility (as far as they could be proved).

• For purposes of the deduction from gross income, tax losses from previous years will be updated based on the Consumption Inflation Index for fiscal years beginning on or after 1 January 2016. The same criterion applies to the determination of the inflation adjustment and for updating values of fixed assets.

• Extension to substitutes and those responsible for tax obligations of third parties of the fine for late payment of 100%, the presumption of intent to defraud, and the crime of misappropriation, currently foreseen for withholding and collection agents (in the case of taxes withheld and not payed).

• Establishes that the income limit set for investment exemptions provided by CIT law will not apply to companies of collective passenger transport that accomplish regular services under concession or permission.

• Consideration that absorption of liabilities in net wealth tax (NWT) will include all assets located outside Uruguay, exempt assets, excluded goods and non-taxable goods of any origin and nature, ending longstanding discussions on the matter.

• Empowers the Executive Branch to exempt from NWT the assets of credit management companies focused exclusively in productive microfinance operations.

• Exclusion from property transfer tax of the transmissions of taxable assets that take place as a result of the replacement or removal of trustees.

• Suspension of status bar limitation for taxes that are the subject of tax benefits under the Investment Promotion Law until the end of the deadlines to comply with the conditions that correspond or the deadline for use (whichever is greater). It also provides that in the event of non-compliance of the above, the course of the prescription would be interrupted by notification of the decision to revoke all or part of the benefits granted or the Comisión de Aplicación (COMAP) resolution declaring
Uruguay

the default of commitments assumed by the beneficiary for the purposes of the recalculation of taxes.

**Tax treaties**
During 2015, a tax information exchange agreement (TIEA) with Faeroe Islands entered into force (as of 19 February 2015), as well as one subscribed with Sweden (as of 17 April 2015).

Furthermore, a TIEA with Brazil and a double tax treaty (DTT) with Luxembourg have been ratified by the Uruguayan government. A TIEA with South Africa and a DTT with Singapore have been signed and are under Uruguayan Parliament discussion. In April 2016, a DTT with Chile was signed.

These agreements will enter into force once the contracting states exchange the corresponding ratification notes.

---

**Taxes on corporate income**

Net income derived from business activities conducted in Uruguay, obtained by legal entities resident in Uruguay and non-residents operating through a permanent establishment (PE) in Uruguay, is taxed at a CIT rate of 25% under the source principle (i.e. the territorial system of taxation). Accordingly, Uruguay taxes only income that is derived from activities conducted within its borders, income generated from property located in Uruguayan territory, or income derived from the economic use of rights within its territory (see **Foreign income in the Income determination section for an exception to this principle**).

In order to determine the net taxable income, all accrued expenses that are necessary for the generation of Uruguayan-source income and that are duly documented are allowed as deductions. Additionally, taxpayers are able to deduct expenses from their gross income if such expenses are subject to taxation (either foreign or local taxation) in the hands of their counterpart. A compulsory proportional deduction must be calculated when the taxation in the hands of their counterpart is lower than 25% (CIT rate).

A 12% withholding tax (WHT) is imposed on Uruguayan-sourced income obtained by non-residents, except in cases where the income is obtained through the operations of a PE in Uruguay (see the **Withholding taxes section for more information**).

**Trading companies**

Uruguayan corporations that sell and buy foreign goods and/or services from Uruguay (which are not physically introduced to the country, in the case of goods; or which are not economically used in Uruguay, in the case of services) may determine the net Uruguayan-source income on a notional basis of 3% of the gross margin (difference between the selling price and the purchase price). This gross margin has to be compliant with transfer pricing rules (in line with Organisation for Economic Co-operation and Development [OECD] guidelines). The applicable effective CIT rate is 0.75% (25% x 3%).

**Local income taxes**

No taxes on corporate income may be levied by municipal authorities or other local governments.

---

**Corporate residence**

Legal entities are deemed to be resident in Uruguay when they are incorporated according to the local legislation.
Permanent establishment (PE)
The concept of PE in the Uruguayan tax legislation follows, in general terms, the definition provided in the OECD Model Tax Convention, although it has some special clauses that may be found in the United Nations (UN) Model Tax Convention. From a Uruguayan law perspective, the term PE means a fixed place of business through which the business of an enterprise is wholly or partly carried on in Uruguay. The term PE especially includes: (i) places of management; (ii) branches; (iii) offices; (iv) factories; (v) workshops; (vi) mines, oil or gas wells, quarries, or any other place of extraction of natural resources; (vii) buildings, constructions, installation projects, or the management activities associated to them, when they last more than three months; and (viii) services, including consultancy services, rendered by a non-resident through employees or other hired personnel by the company for that purpose, to the extent that such activities are developed (in relation with the same or a connected project) during a period or periods exceeding, in total, six months within any 12-month period. Please note that item (viii) constitutes an exception to the OECD model and is based on the provisions of the UN model.

Other taxes

Value-added tax (VAT)
Uruguayan VAT is levied at a general rate of 22% on the provision of services and on the circulation of goods within the limits of the Uruguayan territory. The import of goods and value-added in regard to the construction of immovable assets are also within the scope of this tax.

The following items are either subject to a reduced 10% VAT rate or exempt from VAT entirely.

Items subject to the 10% VAT rate:

- Food and medicines.
- Hotel services.
- Health services.
- The first sale of immovable assets.

Items exempt from VAT:

- Milk.
- Books.
- Magazines.
- Agricultural machinery.
- Certain bank services.
- Accessories.

Exports are zero rated for VAT purposes. VAT on purchases of the exporters can be recovered in the form of credit certificates that can be (i) used to pay other taxes, (ii) used to pay social security contributions, or (iii) endorsed to suppliers who can pay their own national taxes or their own social security contributions.

This tax requires monthly payments and may require monthly or annual tax returns, depending on the qualification of the taxpayer.

Customs duties

- Consular duty: 2% (applied to the cost, insurance, and freight [CIF] import value). Capital goods with a destination in the industrial, agricultural, and fisheries sectors are exempt.
Uruguay

- Customs services duty: a scale flat duty, with a limit of 50 United States dollars (USD).
- Customs extraordinary duty: a scale flat duty, with a limit of USD 600.
- Global customs duty (TGA): depends on the origin of goods. If they come from Mercosur, the TGA is generally zero (some goods still apply the payment of the TGA). If not, it varies depending on the type of product, with a maximum rate of 20%, with exceptional levels that range from 23% to 35% (corresponding mainly to certain types of shoes, sugar, and automotives). For goods classified as capital goods or information and telecommunication goods, there is a special regime.

All imports and exports duties are applied on the ‘customs value’ (in general, in imports it is considered as CIF and in exports as free on board [FOB]).

On imports, VAT is also applicable according to the following detail:

- Goods subject to the general VAT rate (22%):
  - ‘Import VAT’ at the rate of 22%.
  - ‘Advanced payment import VAT’ at a rate of 10%.
- Goods subject to the reduced VAT rate (10%):
  - ‘Import VAT’ at the rate of 10%.
  - ‘Advanced payment import VAT’ at a rate of 3%.

The tax base of VAT on imports is the customs value plus the customs duties.

Additionally, some goods are also subject to an ‘advanced payment import on account of CIT’ at a rate of 4% or 15%, depending on the type of good, which can be deducted from the amount of CIT for the fiscal year.

**Export duties**

Exports are not subject to any taxes, and there are almost no prohibitions regarding the type of goods to be exported. On the contrary, several instruments are offered to promote exports, such as the reimbursement of taxes. *For VAT on exports, please see VAT above.*

The exporter may also recover internal taxes that are added to the cost of the products exported. The amount to be reimbursed is a percentage of the FOB value set by the Executive Power for each product.

Additionally, temporary admission consists of the import of raw materials, pieces, motors, package material, and other industrial input without import duties or taxes. To be subject to this customs duties exemption, the company has to export the finished goods within 18 months from the introduction of the exempt goods or materials. The subsequent local sale of such finished goods is not entitled to this benefit.

**Excise tax (IMESI)**

In general, excise tax applies on the first transaction effected in the domestic market by manufacturers or importers of goods. Exports are not taxable.

Excise tax rates vary for each item, and they are generally fixed by the government within maximum parameters established by law.

Goods subject to the highest rates are alcoholic beverages (from 20.20% to 80%, depending on the alcohol degree), tobacco (from 28% to 70%), lubricants (from 5% to 39%) gasoline, fuel, and other petroleum products (from 5% to 133%).

This tax requires monthly payments and/or tax returns.
**Net wealth tax (NWT)**
All types of legal entities and business enterprise owners are subject to an annual NWT at a rate of 1.5% on the value of net assets. This tax also follows the source principle, whereby only assets located or economically used in Uruguay are taxable. Taxpayers may deduct from the NWT the CIT of the same fiscal year; however, the deduction is currently capped at 1% of the NWT.

The deduction of liabilities from the amount of taxable assets to determine the NWT basis is limited to: (i) the average of debts with local financial institutions, (ii) debts with suppliers of goods (except imports) and services, (iii) taxes not yet due, (iv) debts with governments, international credit offices of which Uruguay is a member and with foreign state financial institutions that lend funds for long-term productive projects, and (v) debts documented in debentures and obligations, if their emission is done in a public offering and such papers are quoted in a stock exchange.

**Property taxes**
Regarding taxes of relevance for those doing business in Uruguay, please see Net wealth tax (NWT) above. There are additional property taxes of less significance, levied by Municipal authorities (e.g. Contribución Inmobiliaria) and by National authorities (e.g. Primary School Tax [Impuesto de Primaria]).

Note that the Primary School Tax levied on rural assets has been re-established.

**Tax on real estate transfer (ITP)**
A tax on real estate transfer applies to the transfer of immovable assets. Transfer is defined in an ample sense, as a sale, a cession of the right to use, a transfer of inheritance rights, etc.

Both parties to the transfer contract are subject to this tax at a rate of 2% on the property's tax value (according to a National Register, a value generally lower than market value). When the property is transferred without payment, the beneficiary pays tax at a rate of 4% on the property tax valuation, except in instances where the property is transferred to direct heirs or legatees, who pay this tax at a rate of 3%.

**Stamp taxes**
Stamp taxes are not applicable in Uruguay.

**Tax of control of corporations (ICOSA)**
Upon the set-up of a corporation, a tax is payable at a 1.5% rate on a notional basis amount, which is determined annually by the authorities. For fiscal year 2016, the amount of this tax (lump sum) is 28,134 Uruguayan pesos (UYU).

This tax is also due annually for corporations at the end of each fiscal year, at a rate of 0.75% on said notional amount. Even though this tax can be deducted from the NWT, the excess cannot be refunded, acting as a minimum NWT payment. For fiscal year 2016, the amount of this tax (lump sum) is UYU 14,067.

**Payroll taxes**
Individual income taxes applicable on employees' remunerations must be withheld by the employer.

**Social security contributions**
The Uruguayan Social Security regime states that hiring personnel under a dependency relationship implicates the obligation (both for employer and employee) of making contributions over the compensations that constitute the taxable basis.

Taxable basis consists of all earning that in a regular and permanent basis, in cash or kind, susceptible to pecuniary appreciation, is perceived by the dependant personnel, in
concept of remuneration and product of its personal activity in the frame of the working relationship. As a general rule, any compensation originated in activities carried out in Uruguay is subject to social security contributions.

The social security contribution rates are applicable on gross remunerations, according to the following percentages:

<table>
<thead>
<tr>
<th>Contribution</th>
<th>Employer contributions (%)</th>
<th>Employee contributions (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Retirement contributions *</td>
<td>7.5</td>
<td>15</td>
</tr>
<tr>
<td>Health insurance</td>
<td>5</td>
<td>3/4.5/5/6/6.5/8 **</td>
</tr>
<tr>
<td>Labour restructuring fund</td>
<td>0.125</td>
<td>0.125</td>
</tr>
<tr>
<td><strong>Total social security contributions</strong></td>
<td>12.625</td>
<td>18.125 to 23.125</td>
</tr>
</tbody>
</table>

* Both employer and employee retirement contributions rates are applicable, up to the monthly amount of UYU 131,430 (until 31 December 2016); the exceeding amount will be exempt.
** May vary depending on whether the employee is married and whether they have children.

**Branch income**

CIT is imposed at a rate of 25% on net income derived from business activities carried out in Uruguay. A 7% WHT is imposed on profits remitted or credited to a home office. Profits paid or credited to a non-resident home office will not be subject to WHT when they are paid out of non-taxable income for CIT purposes.

Furthermore, those profits and/or losses derived from financial operations between the branch and its home office will be disregarded for Uruguayan tax purposes (i.e. not taxed in case of income or not deductible in case of costs and/or expenses).

**Income determination**

**Inventory valuation**

Replacement cost is permitted for tax purposes, as well as the first in first out (FIFO), last in first out (LIFO), or average cost methods, irrespective of the inventory valuation method used for accounting purposes.

**Capital gains**

Capital gains are treated as ordinary income for CIT purposes.

As a general rule, capital gains are calculated as the selling price minus the fiscal cost (usually acquisition cost updated by certain inflationary indexes) of goods being sold. In certain cases, not all the fiscal cost may be deductible, depending on the application or not of the compulsory proportional deduction mentioned previously in the Taxes on corporate income section.

Furthermore, for certain capital gains, there are special ways of determining the taxable income (e.g. based on notional income).

Bearer title transfer capital gains are subject to a 12% tax rate, applicable to a notional 20% of the transfer price (or 20% of market value of the titles transferred if there is no price). The same tax treatment applies to capital gains derived from the transfer of nominative titles.

**Dividend income**

Dividends received from local subsidiaries are exempt. Dividends received from foreign subsidiaries are out of the scope of this tax since they are considered foreign-sourced, thus non-taxable, income.
Interest income
Uruguayan-sourced interest income, derived by companies resident in the country, is subject to CIT under the general regime (i.e. taxed at 25%).

Foreign income
Uruguayan legal entities (CIT payers) and non-residents operating through a PE in Uruguay are only subject to tax on income from Uruguayan sources under the territorial system of taxation. Hence, foreign-source income is not subject to tax.

However, there is an exception to this principle, as follows. When a CIT payer obtains income as a consequence of rendering technical services outside the limits of Uruguayan territory to another CIT payer and such technical services are used by the recipient to obtain its income subject to CIT, the income obtained by the company rendering the services will be subject to CIT, even when foreign sourced. Technical services are those rendered in the fields of management, technical administration, or advice of any kind.

Income derived from activities performed, assets located, or rights utilised outside Uruguay, regardless of the nationality, domicile, or residence of the parties participating in the transactions and the place where the transaction agreements are subscribed, is not subject to CIT.

Income adjustment for inflation
An income adjustment for inflation has been in force since 1 January 1981 and is calculated by multiplying the variation in the wholesalers’ price index for the financial year by the difference between:

1. total assets at the beginning of the year (excluding fixed assets) and
2. total liabilities at the beginning of the year.

Under an inflation scenario, if (1) is higher than (2), then an inflation loss adjustment is deducted from gross income. However, if (2) is higher than (1), then an inflation gain adjustment is added.

New tax regulations, effective for fiscal years ended as of 31 December 2015, disallow Uruguayan taxpayers to calculate tax inflation adjustment in their CIT return if inflation is below 10%.

Deductions
As a general rule, accrued and duly documented expenses that are necessary to obtain and preserve gross taxable income are tax deductible. On the contrary, those expenses associated with deriving or preserving income not subject to CIT are not deductible from the taxable basis. Furthermore, for CIT purposes, all costs and expenses will be subject to the compulsory proportional deduction mentioned in the Taxes on corporate income section (with some exceptions).

Depreciation and depletion
Straight-line depreciation over useful life is mandatory. Specific rates exist for the following cases: (i) 2% per year for urban buildings, (ii) 3% per year for rural buildings, and (iii) not less than 10% per year for new vehicles. Other rates are accepted if economically justified. No conformity between book and tax depreciation is required.

Percentages for depletion computed on the cost of natural resource properties are allowed in accordance with generally accepted criteria.
Depreciation and depletion percentages are computed on the historical cost of fixed assets revaluated at year-end, based on the variation of the wholesalers’ price index. Capital gains derived from the revaluation of fixed assets are not taxable income.

**Goodwill**
When transferring a business or a business unit, the difference between selling price and fiscal costs of the assets being transferred constitutes 'goodwill'. This goodwill constitutes an asset for the buyer and must not be depreciated, neither for CIT nor NWT purposes.

**Start-up expenses**
Start-up expenses should be depreciated within a period of three to five years. The taxpayer may elect the number of years to depreciate those expenses within those period limits.

**Interests expenses**
Interests expenses, as well as other costs and expenses, are subject to the compulsory proportional deduction mentioned in the Taxes on corporate income section.

When companies derive both income subject to CIT and either income exempt or not included in CIT (e.g. from a foreign source), interest expenses associated to the former (i.e. deductible interest) will be determined by applying a proportion based on assets.

**Bad debt**
As a general rule, only those debts that are at least 18 months old will be deductible as ‘bad debts’. However, national rules allow deductions under some other special situations.

**Charitable contributions**
Deductibility of charitable contributions will depend on the organisations receiving them.

Furthermore, there is a special regime to certain charitable contributions under which the contributor may deduct 25% of the contribution and the other 75% will be recovered through credit certificates that may be used to pay taxes (with certain limitations).

**Fines and penalties**
Fines and penalties generated from unduly paid taxes are not deductible for CIT purposes.

**Taxes**
CIT and NWT are not deductible.

**Net operating losses**
Losses may be carried forward and deducted from the net taxable income of the following five years, once adjusted for inflation. There are no loss carrybacks.

**Payments to foreign affiliates**
All accrued expenses that are necessary for the generation of Uruguayan-source income and that are duly documented are allowed as deductions. Additionally, a taxpayer may deduct expenses from its gross income if such expenses are subject to taxation (either via foreign or local taxation) in the hands of the other party. A compulsory proportional deduction must be calculated when the taxation in the hands of the counterpart is lower than 25% (CIT rate).
Group taxation

Group taxation is not permitted in Uruguay.

Specific dispositions regarding the existence of an ‘administrative economic unit’ are included in NWT law, but only for agricultural and/or farming investments for determining the application of NWT exemption and corresponding NWT rates (i.e. group taxation is still not permitted).

Transfer pricing

As a general principle, transfer pricing rules are applicable to international transactions between related parties. However, Uruguayan legislation has extended the scope of these regulations to transactions carried out with low-tax or no-tax jurisdictions or regimes (either international or domestic) and to certain operations through third-party intermediaries. Domestic transactions with Uruguayan free zone (FZ) users fall under this category.

The definition adopted by the law for related parties is quite broad. Such a relationship is configured when both parties are subject (directly or indirectly) to the management or control of the same individuals or legal entities, or when they have power of decision to direct or define the taxpayer’s activities due either to their participation in capital interest, the level of their credit rights, or their functional or any other type of influence (whether contractual or not).

Regarding transfer pricing administration rules, the Executive Power can enter into advance pricing agreements (APAs) with taxpayers, which cannot cover more than three fiscal years. Furthermore, strong penalties are provided for failure of compliance with transfer pricing formal duties and with other formal documentation requirements.

Thin capitalisation

There are no thin capitalisation rules in Uruguay.

Controlled foreign companies (CFCs)

There are no CFC rules in Uruguay other than those applicable to individuals.

Tax credits and incentives

Foreign tax credit

There is no foreign tax credit regime in Uruguay for CIT purposes, except for that provided in the DTTs currently in force.

CIT reduction for income reinvested in fixed assets

40% of income reinvested in the purchase of (i) industrial and agricultural machinery, (ii) vehicles and installations, (iii) computers, (iv) telecommunications equipment, and (v) some assets for the tourism industry is exempt from CIT.

20% of income reinvested in the construction and expansion of industrial, agricultural, and tourism buildings is exempt from CIT (limited to 40% of net taxable income in the year of expenditure).

The joint amount of said investments can be deducted from the taxable basis, with a limit of 40% of the annual net profit, once the amount of other exemptions has been deducted. The excess can be deducted (with the same limitations) in the following two tax periods. It is important to mention that income exempt by these provisions cannot be distributed and must be retained as a reserve account, which ultimately can only be capitalised.
Uruguay

For fiscal year-ends initiated on 26 September 2014 onwards, the abovementioned CIT benefit will be exclusively applicable to taxpayers whose income in the immediately preceding fiscal year to which the investment is executed does not exceed approximately UYU 30 million. This limitation is not applicable to professional cargo transport companies.

**NWT exemption**

Movable fixed assets directly connected to the industrial cycle and equipment for data processing are exempt from NWT.

All assets directly associated to the development of agricultural and/or farming activities will be exempt from NWT as long as the owners are individuals or companies with nominative shares also owned by individuals. As a consequence of the elimination of the Rural Real Estate Concentration Tax (ICIR), this NWT exemption has been modified. According to Law N° 19,088, this exemption will apply only in cases where the referred assets do not exceed 12 million ‘index units’ (approximately UYU 38,733,600 as of 30 November 2015).

**Investment Law (IL) - Law N° 16,906**

Uruguay has modified the IL, achieving a better framework for local and foreign investments carried out in the country. To obtain tax benefits, the IL requires that enterprises obtain a government statement in this regard. The Bureau of Investor Assistance is in charge of monitoring the correct compliance of these projects.

The IL grants two types of benefits:

**Automatic benefits**

This kind of benefit is only for manufacturing, extractive, or farming/ranching activities, and includes:

- Exemption from NWT for chattel property directly engaged in the production cycle and data-processing equipment.
- Exemption from VAT and CIT paid on the importation of such goods, and reimbursement of VAT in the case of locally purchased items.

**Discretionary benefits**

Benefits that may be obtained at the discretion of the Executive Power for any type of business activity (not cumulative with automatic benefits) include:

- VAT and CIT exemptions (among other taxes) on importation of fixed assets items.
- NWT exemptions: permanent for chattel property items, for a period of eight years for construction work in Montevideo (capital city), and for a period of ten years in the rest of the country.
- VAT reimbursement on local purchase of goods and services for civil construction work.
- Increased deductions for CIT in respect of fees and remunerations related to technological developments.
- Exemption from CIT, depending on the nature and size of the project to be carried out. The Executive Power takes into account the following criteria to grant this benefit:
  - Addition of technology to improve competitiveness.
  - Contribution to export growth and diversification.
  - Contribution to geographic decentralisation.
  - Improvement of technological investigation, innovation, and development.
  - Generation of employment.
Transitory increase of tax benefits
Based on the IL and its regulations (by way of decree), the government decided to temporarily increase the benefits granted under such regime. This provides an excellent opportunity for tax savings for companies making investments in fixed assets.

In particular, it increased by 10% the exemption of CIT, based on the matrix of indicators for investment projects submitted between 1 December 2015 and 31 December 2016, provided that 75% of the project’s committed investment is executed before 31 December 2017. In addition, 120% of the investment amount made between 1 December 2015 and 31 December 2016 may be used for the purpose of computing the exempt CIT amount.

Auto-saving ‘direction’ benefit
The auto-saving ‘direction’ benefit allows a company to deduct from the CIT basis the amount of the capital increase that occurred as a consequence of the reserves capitalisation or of the in-kind distribution of shares, for an amount equivalent to the investment carried out with the investor's own funds. The amount of the CIT deduction and the period(s) to which said exemption will apply is granted by the government through a statement issued by the Executive Power.

Free zones (FZs)
Following the approval of the FZ law in 1987, this system has become an important tool for attracting investments to Uruguay.

It has been utilised for carrying out traditional activities in the FZs (warehousing, logistics, and distribution), for the provision of services (software, finance, call centres, etc.), and for manufacturing activities such as cellulose pulp and leather production. In a clear sign of stability, none of the administrations in office over the last three decades has modified the basics of the FZ system.

The law defines FZs as privately or publicly owned isolated and fenced off areas of Uruguayan territory determined by the Executive Branch with the purpose of carrying out all types of manufacturing, commercial, and service activities within the zone, while enjoying tax exemptions and other benefits envisaged in the law.

Companies in these areas cannot carry out industrial, trading, or service activities in the non-FZ Uruguayan territory, except for services expressly authorised by the government (listed below) but are allowed to render all types of services within the FZs or to third countries.

FZ users are allowed to render the following services to the non-FZ Uruguayan territory:

- International call centres, except for those whose main destination is the non-FZ Uruguayan territory.
- E-mail, distance learning, electronic signature certificate issuance.
- Software production, technology consulting, and related training services. (*)
- Accounting, administration, and management services rendered to related companies who carry out port and shipping logistics activities, if said services are lower than 20% of the total income obtained during the fiscal year. (*)
- Processing of film material and data. (*)

(∗) The provision of these services is subject to the general tax system, not to the tax holidays.

In order to operate in/from the FZ, certain requirements must be fulfilled from an 'economic substance' perspective (i.e. there must be an actual economic activity developed in the FZ). In this sense, some modifications were introduced to the FZ Law to determine which substantial activities can be developed outside the FZ.
Uruguay

FZ users are exempt from all current and future national taxes, including those taxes for which a specific legal exemption is required, in connection with the activities performed within the FZs. The Uruguayan government guarantees all the exemptions and benefits granted by the law for the term of their contracts. FZs can be located outside or inside the cities; it depends on the kind of FZ.

Social security taxes, as well as certain WHTs, are excluded from the exemption. WHT on payments of dividends made by these companies to their non-resident shareholders are exempt.

**CIT exemption widened for trading activities with transit of goods through Uruguay**

The CIT Act establishes a tax exemption for non-residents on income derived from activities performed in Uruguayan customs areas, port customs areas, customs deposits, and FZs, with goods of foreign origin declared in transit or stored in the referred areas. This exemption applies to the extent that such goods are in transit (not having as origin or as destination the Uruguayan customs territory). This exemption also applies on a percentage of the sales that have as final destination the Uruguayan internal market. This tax benefit has been widened and, while originally applicable only to non-residents, is now available for tax residents in Uruguay. In addition, these activities with goods deposited in the country can be performed from outside Uruguay.

**Industrial park incentives**

Individuals or legal entities that establish industrial parks within Uruguayan territory, as well as companies located within such industrial parks, are entitled to CIT exemption for their industrial equipment, excise tax and VAT exemption on the acquisitions of such goods, and other benefits.

**Holding companies**

Uruguayan legal entities holding shares in non-resident entities or investing in assets not located in Uruguay are not subject to tax (due to the application of the source principle).

**Tax benefits for Shared Service Centre (SSC) activities**

Activities carried out by SSCs are granted relevant tax benefits under certain conditions.

For these purposes, an SSC is defined as a subsidiary of a multinational group that provides to its related parties, on an exclusive basis, advisory and data processing services, used exclusively outside Uruguay.

Tax benefits granted include the exemption of CIT of 90% of the income derived from the promoted activities and exemption of NWT on the assets involved for five or ten fiscal year-ends, depending on specific compulsory requirements that must be fulfilled. To have access to the five year-end tax benefits, an SSC must comply simultaneously with the following conditions:

- Generate at least 150 new direct qualified jobs at the end of the first three year-ends, jobs that must be preserved until the end of the fifth year-end.
- Implement a training plan with a minimum budget of 10 million ‘index units’ (approximately UYU 29,566,000) for the Uruguayan citizen employees during the whole first three year-ends, which must be for new projects.

The tax exemption period will be extended to ten years when (i) the minimum number of jobs exceeds 300 at the end of the first five year-ends and remains until the end of the exemption period and (ii) the referred training expense exceeds twice the aforementioned amount in the course of the first six year-ends.
Industry-specific incentives

Printing industry incentives
Companies that print books and educational material are exempt from the NWT and VAT.

Long distance services and call centres
Companies developing long distance services and call centre activities have special benefits regarding CIT (from 70% to 100% exemption).

Condo Hotels
Companies running a Condo Hotel have special benefits regarding CIT (from 70% to 100% exemption), among other taxes. There are also exemptions and other tax benefits granted on behalf of the promoting company.

Electric power industry incentives
Companies that generate electric power from non-traditional energy sources have special benefits regarding CIT (from 40% to 90% exemption).

Machinery industry incentives
Companies that build and/or assemble (under certain conditions) machinery with agricultural purposes have special benefits regarding CIT (from 50% to 90% exemption).

Shipping industry incentives
Imports of material, supplies, and equipment required for the construction, maintenance, and repair of shipyards or vessels are exempt from VAT. The shipbuilding industry has special benefits regarding CIT (from 50% to 100% exemption).

Water and air transportation incentives
The income of water and air transportation companies is tax exempt. In the case of foreign companies, the exemption is subject to reciprocal treatment. The government may exempt from CIT companies engaged in transportation by land, subject also to the conditions of reciprocal treatment.

Forestry plantation incentives
Income derived from forestry plantations up to July 2007 is tax exempt. Income derived from new forestry plantations is also tax exempt, but under strict conditions, such as wood quality.

Software industry incentives
Software production and related services are exempt from CIT as long as either the final product or the related services are entirely used in a foreign country.

Electronic industry incentives
The production of electronic devices has special benefits regarding CIT (from 50% to 100% exemption).

Tourism industry incentives
Investments in the tourism industry have tax benefits related to CIT, VAT, and NWT, as follows:

- Deduction of up to 40% of CIT in investments made in the fiscal year in hotel equipment and equipment for improving entertainment and information services to tourists and deduction of up to 20% of CIT in investments made in construction and expansion of hotel buildings, with the limits mentioned in previous sections (40% of the annual net profit, once the amount of other exemptions has been deducted).
- VAT refund included in local acquisitions of goods and services for construction, improvement, or expansion of tourist complexes.
Uruguay

- VAT exemption on import of goods for construction, improvement, or expansion of tourist complexes.
- The list of operations included in the concept of exports of services for VAT purposes (thus zero-rated) was broadened to include, among others, services related to accommodation that hotels, apartments, and rural tourism establishments provide to tourists.
- NWT exemption for ten years on investments in infrastructure and civil work for construction, improvement, or expansion of tourist complexes.
- NWT exemption for four years on fixed assets investment for tourist complexes.
- 50% exemption of import duties on materials and goods for construction, improvement, or expansion as well as fixed assets of tourist complexes.

**Withholding taxes**

All Uruguayan-sourced income obtained by non-residents (other than those obtained through a PE in Uruguay) is taxed at flat rates of up to 12% on gross income, with some exceptions. This tax is basically collected by way of WHT.

The exceptions are as follows:

- Interest on deposits in local currency for terms exceeding one year is taxed at 3%.
- Interest on public bonds is not taxed.
- Dividends paid or credited by CIT payers are taxed at 7%, provided they are derived from taxable income.

Although the Uruguayan tax law follows the source principle, technical services (defined as services rendered in the fields of management, technical administration, or advice of any kind) rendered in another country by non-residents but associated with taxable income obtained by the local user in Uruguay are considered to be Uruguayan sourced for tax purposes and subject to WHT. However, when the taxable income obtained by the local user of the service does not exceed 10% of its total income, then only 5% of the service fee paid or credited abroad will be subject to non-resident WHT. Therefore, in these cases, the effective WHT rate is only 0.6% (5% x 12%). In those cases where the local taxpayer receiving the service does not obtain any taxable income, the service received will be entirely associated to foreign-source income and thus not subject to WHT.

This WHT should be declared and paid to the Tax Office on the month following the one in which the tax is withheld.

For those countries with which Uruguay has entered DTTS, the maximum WHT rates are the following (in those cases where the maximum WHT provided by the DTT is higher than the internal law WHT, the latter will be applicable):

<table>

Notes

1. Source country may tax at a rate not higher than 5%. However, if the beneficial owner is a company resident in the other contracting state and holds at least 75% of the capital of the company distributing dividends, then the WHT will be 0%.

2. Will depend on the kind of royalty paid.

3. Source country may tax at a rate not higher than 15%. However, if the beneficial owner is a company resident in the other contracting state and holds at least 25% of the capital of the company distributing dividends, then the WHT will be 5%.

4. Source country may tax at a rate not higher than 15%. However, if the beneficial owner is a company resident in the other contracting state and holds at least 10% of the capital of the company distributing dividends, then the WHT will be 5%.

5. Source country may tax at a rate not higher than 10%. However, if the beneficial owner is an entity, other than an individual, resident in the other contracting state and holds at least 10% of the capital of the company distributing dividends, then the WHT will be 5%.

6. Source country may tax at a rate not higher than 10%. However, if the beneficial owner is a company resident in the other contracting state and holds at least 25% of the capital of the company distributing dividends, then the WHT will be 5%.

7. Source country may tax at a rate not higher than 15%. However, if the beneficial owner is a company resident in the other contracting state and directly holds at least 25% of the capital of the company distributing dividends, then the WHT will be 10%.

8. Source country may tax at a rate not higher than 15%. However, if the beneficial owner is a company resident in the other contracting state and holds at least 20% of the capital of the company distributing dividends, then the WHT will be 5%.

9. Source country may tax at a rate not higher than 10%. However, if the beneficial owner is an entity, other than partnerships, resident in the other contracting state and holds at least 25% of the capital of the company distributing dividends, then the WHT will be 5%.

---

**Tax administration**

**Taxable period**

The taxable period may be chosen by the company. However, certain sectors or industries have mandatory fiscal year closing dates.

**Tax returns**

CIT and NWT are self-assessed and their tax returns are filed by the end of the fourth month following the date of the year-end.

**Payment of tax**

Income and capital taxes are paid monthly by way of advanced payments, which are calculated on the basis of the previous year’s tax. The difference between the advanced tax payments and the total annual tax calculated at fiscal year-end is paid by the end of the fourth month after the fiscal year-end.

**Tax audit process**

The taxpayer has the right to appeal an Administrative Act to the Tax Bureau and, simultaneously, to the Executive Branch in an administrative process. Both appeals must be filed jointly within ten days from the notification of the administrative act. If both appeals are tacitly (not expressly resolved within a period of 150 days) or expressly rejected, the taxpayer has the right to appeal to a special court through a judicial proceeding.

**Statute of limitations**

The statute of limitations in Uruguay is five years, which can be extended to ten years in the case of: (i) tax fraud, (ii) not complying with Tax Office registration, (iii) lack
of communication of a taxable event, or (iv) not submitting a tax return (among other cases).

**Topics of focus for tax authorities**

There are several topics the tax authorities are currently focusing on.

One of the newest topics of interest for the tax authorities concerns ‘transfer pricing’ rules and their impact on multinational companies operating in Uruguay.

During the last few years, important investments have been made by the government to automate processes and improve assistance to taxpayers.

---

**Other issues**

**Bank secrecy and identification of title holders**

In 2011/12, Uruguay introduced relevant modifications to internal law that may impact corporate taxpayers.

The inclusion of the request of information by a treaty partner has been approved as one of the hypotheses under which banking secrecy can be lifted.

The identification of holders of bearer titles representing the capital of entities domiciled or doing business in Uruguay is mandatory. In this regard, Law N° 18,930 includes the compliance of certain obligations for identification purposes. This obligation relies on the holders, who must identify themselves with the Central Bank of Uruguay, providing not only their identity but also the percentage of their participations in the entity.

Information shall be kept by the Central Bank of Uruguay and subject to secrecy, although the National Tax Office, anti-money laundering authorities, penal and family courts, and related entities may access them in certain cases.

The duty of identification applies to all entities domiciled in Uruguay and to companies incorporated abroad, provided that they act in Uruguay through a PE or if their management is carried out in Uruguay.

Significant developments

There have been a number of amendments introduced in the tax legislation of Uzbekistan during the past year. Below we describe the most notable changes effective as of 1 January 2016.

- The unified tax payment (UTP) rate for micro-firms and small enterprises engaged in services is decreased from 6% to 5%.
- The property tax rate for legal entities is increased from 4% to 5%.
- Mobile operators became taxable on excess profits through differentiated corporate income tax (CIT) rates. Thus, CIT rates were set as follows:
  - Profitability lower than 20%: Standard CIT rate of 7.5%.
  - Profitability higher than 20%: 50% CIT rate charged on profits exceeding the 20% level of profitability.

Taxes on corporate income

Resident corporations pay CIT on their worldwide income, whereas non-residents (i.e. foreign legal entities that have a permanent establishment [PE] in Uzbekistan or have income from sources in Uzbekistan not associated with a PE) pay CIT on income resulting from activities/sources in Uzbekistan.

Non-resident corporations are taxed directly at the level of their Uzbek PE, if there is one, or via withholding tax (WHT) at the source of payment of the Uzbek-source income.

CIT is charged on taxable profit calculated as a difference between gross income and deductible expenses reduced by applicable incentives granted by the Tax Code, other laws, or presidential decrees.

The CIT rate is set annually by presidential decree. In 2016, enterprises (i.e. legal entities) are generally subject to CIT at the rate of 7.5%. Commercial banks are subject to CIT at the rate of 15%.

As of 1 January 2016, companies providing mobile services became taxable on excess profits through differentiated CIT rates. Thus, CIT rates were set as follows:

- If profitability is lower than 20%, the CIT rate is 7.5%.
- If profitability is higher than 20%, 50% of the CIT rate is charged on profits exceeding the 20% level of profitability.

See the Withholding taxes section for WHT rates applicable in Uzbekistan.
Uzbekistan, Republic of

**Unified tax payment (UTP)**
An optional UTP regime is available for micro-firms and small businesses. For these taxpayers, the UTP replaces the CIT, value-added tax (VAT), water-use tax, IDT (see *Local income taxes below*), mineral tax, and other local taxes and duties.

Excise and customs duties remain applicable for this group of taxpayers (unless a specific exemption applies). However, micro-firms and small businesses producing excise-liable goods or engaged in subsurface extraction may not opt for the UTP regime.

UTP is obligatory for companies engaged in catering, retail, and wholesale. Agriculture companies may opt to pay a unified land tax instead of all other taxes.

As of 1 January 2016, the general UTP rate is 5%.

**Local income taxes**
There is a local tax on accounting profit (less CIT), an infrastructure development tax (IDT), which is charged at a maximum rate of 8%.

IDT is reported jointly with CIT on a quarterly basis.

**Corporate residence**
For Uzbek tax purposes, corporations are classified as resident or non-resident. A resident corporation is a legal entity that passed state registration in Uzbekistan (i.e. Uzbek legal entity). Other legal entities are regarded as non-resident corporations for tax purposes.

**Permanent establishment (PE)**
PE is defined by the Tax Code as “any place through which a non-resident carries out entrepreneurial activity in the Republic of Uzbekistan, including activity carried out through an authorised person. PE is also existent where a non-resident carries on entrepreneurial activity for 183 days (or more) in any consequent 12-month period ending in the current tax period”.

**Other taxes**

**Value-added tax (VAT)**
Legal entities are subject to VAT, which is applied to taxable turnover and taxable imports. The rate for taxable turnover is 20%. This rate also applies to taxable imports, for which the tax base is determined as the customs value plus import duties and excise tax (on excise-liable goods). Export of goods for hard currency is generally zero-rated. Insurance and most types of financial services are exempt from VAT.

VAT is reported quarterly by micro-firms and small enterprises and monthly by other categories of taxpayers.

**Customs duties**
Import of certain goods to Uzbekistan is subject to customs duties. The taxable base is determined as the customs value of imported goods. Rates of customs duties vary from 5% to 70%, depending on the type of imported goods. There is also a customs clearance fee of 0.2% from the customs value of imported goods.

**Excise taxes**
Legal entities producing or importing excise-able goods (e.g. cigarettes, jewellery, petrol, alcohol drinks) are subject to excise tax. Rates vary from 2% to 200%, depending on...
the type of goods produced/imported. The taxable base is determined as the value of produced/imported goods, excluding VAT. Excise tax is reported quarterly.

**Property taxes**
The property tax rate is 5% for legal entities. The tax is computed annually, based on the net book value of the fixed assets, adjusted for the effect of revaluation, which should be performed annually on 1 January, and the value of overdue construction-in-progress. The rate is doubled for equipment not installed in due time.

A charge of 0.25% of the historic value of outdated equipment is collected from legal entities (except for micro-firms and small enterprises) for exploitation of fully depreciated equipment.

Newly opened enterprises are exempt from property tax for a period of two years from their date of registration, unless such enterprises have been created on the basis of production facilities or assets of existing enterprises. There is also a rate reduction benefit available to companies engaged in production and export of goods (work, services).

Property tax is reported annually.

Obligatory revaluation of fixed assets is to be performed by micro-firms and small enterprises once every three years (other categories of enterprises that are subject to this requirement should perform revaluation every year).

The Tax Code provides for the list of certain non-taxable property, mostly including public service facilities (e.g. waterwork facilities), gas and heat distribution lines, railways and highways, and machinery and equipment in use for more than ten years.

**Land tax**
Enterprises, including foreign legal entities operating in Uzbekistan via a PE, owning land plots or rights of their use are subject to land tax or land lease payment annually. Land tax is charged at fixed fees that vary depending on the quality, location, and level of water supply of each land plot. Land lease payment is charged at negotiable rates; however, the minimum amount cannot be less than the land tax rate for the respective land plot. Land tax and land lease payment are computed based on the area of the land in use.

**Transfer taxes**
There are no transfer taxes in Uzbekistan.

**Stamp duties**
According to Uzbek legislation, stamp duty is an obligatory payment charged for performance of legal actions and/or issuance of legal documents. The following actions, among others, are subject to stamp duties: filing claims, performing notary actions, civil registration, state registration of a legal entity, obtaining licences/permits to carry out certain activities, etc.

The rates of stamp duties generally vary from 0.5 to 20 times minimum monthly wage (MMW), depending on the type of action executed. For instance, duty for filing a claim depends on the amount of claim. If the amount is less than 20 MMW, the duty comprises 5% of this amount; if the amount exceeds 80 MMW, the duty is 20% of this amount. Duty for notarisation of copies of documents for legal entities is 2% of the MMW per each page of the document. Duty for registration of legal entities with foreign investment comprises five times the MMW plus 500 United States dollars (USD).
Turnover taxes
There are three mandatory contributions that are charged on the enterprise’s gross annual turnover (less VAT and excise tax):

- Road fund to be imposed at a rate of 1.4%.
- Pension fund at a rate of 1.6%.
- Educational and medical institutions fund (for reconstruction, capital repair, and equipment) at a rate of 0.5%.

The taxable base (and tax rate in exceptional cases) for these mandatory contributions may differ depending on the type of activity of a company. Turnover taxes are reported quarterly.

Micro-firms and small enterprises paying taxes under the standard tax regime (except enterprises producing excisable goods and extracting mineral products subject to subsurface use tax) are no longer subject to obligatory contributions to the above-designated funds.

Water-use tax
Enterprises (including PEs) using water in their production are subject to water-use tax. The tax rate is set by the Cabinet of Ministers and depends on the source of water consumption (i.e. surface or underground). Water-use tax is calculated based on the volume of the water consumed. Water-use tax is reported annually.

Unified social payment (USP)
Employers are subject to USP assessed on total payroll cost related to local and expatriate staff. This payment is collected by the tax authorities. The rate of USP is 25% (15% for micro-firms, small enterprises, and farms).

Income of foreign personnel paid to non-resident legal entities as part of secondment fees under personnel provision agreements is subject to USP. The taxable base for calculation of USP on such income shall be the income of foreign personnel provided, but not less than 90% of the secondment fee payable under the personnel provision agreement. As of 1 January 2016, USP is reported monthly.

Payroll taxes
In addition to USP, employers are responsible for withholding personal income tax (PIT) and pension fund contributions from salaries and remitting them to the state budget.

Taxes of subsurface users
In addition to standard taxes, subsurface users (i.e. legal entities and individuals exploring and extracting natural resource) are subject to subsurface users’ specific taxes, as listed below:

Subsurface use tax (royalty)
Subsurface use tax is charged on volume of produced (extracted) natural resources that are ready for sale or transfer (including free of charge) and consumption for internal purposes. The taxable base is determined as the average weighted sales price.

<table>
<thead>
<tr>
<th>Business activity</th>
<th>Tax rate examples</th>
</tr>
</thead>
<tbody>
<tr>
<td>Extraction of natural resources</td>
<td>natural gas 30%, precious stones 24%, oil 20%, gold 5%, silver 8%</td>
</tr>
<tr>
<td>Utilisation of by-products received during the extraction of natural resources</td>
<td>30% of tax rate applicable to main natural resources extracted</td>
</tr>
</tbody>
</table>

Subsurface use tax is reported quarterly.
Excess profits tax
Excess profits tax is assessed on the difference between the selling price of the extracted natural resources (as per the list) and the statutory price set by the legislation. Excess profits tax is not payable by entities operating under production sharing agreements.

The list of natural resources and goods subject to excess profits tax includes copper, cement, natural gas, polyethylene granules, and clinker. Excess profits tax is paid at 50% of the taxable base.

Signing and commercial discovery bonuses
Signing and commercial discovery bonuses are one-off payments to the state budget. The signing bonus is payable for the right to engage in exploration and extraction of natural resources and range from 100 to 10,000 times the MMW, depending on the type of minerals. The commercial discovery bonus is paid for each field where a subsurface user discovers the natural resources and comprises 0.1% from the cost of the proved reserve volume.

Branch income
There is no concept of a ‘branch’ of a foreign legal entity in the Uzbek legislation. Instead, such entities use a PE registration to perform business activities without establishing an Uzbek company.

In addition to CIT, non-residents operating in Uzbekistan via PE pay so-called ‘net profits tax’ assessed at 10% on accounting profit less CIT.

Income determination
Inventory valuation
Uzbek legislation permits the application of the weighted average cost method (AVECO) and the first in first out (FIFO) method for the valuation of inventory for tax purposes.

Capital gains
Capital gains arising from the disposal of tangible and intangible assets are calculated as the difference between the selling price and the net book value of an asset. The capital gain is included in taxable profits (unless specifically exempt), and the capital losses are deductible (only if the disposed asset had been used for business purposes for three or more years). This is applicable to Uzbek legal entities and PEs of foreign legal entities.

Capital gains of non-resident companies are subject to WHT at 20% as ‘other’ income. The obligation to withhold and pay the tax on income of a non-resident of the Republic of Uzbekistan is levied on the buyer of the property, a tax agent.

In the absence of the documents supporting the acquisition price, WHT on capital gains from the sale of property shall be assessed based on the sales price.

Dividend income
Dividends paid by a domestic subsidiary are subject to 10% WHT at the source. The net dividends received by its domestic parent company are then excluded from its CIT base. Such net dividends received by a foreign parent company are taxed in accordance with the respective country’s internal legislation or double tax treaty (DTT) provisions (if Uzbekistan has a DTT with this country).

Income of non-residents subject to WHT (including income in the form of dividends, interest, and royalties) is to be paid without withholding of WHT at source or with application of a reduced WHT rate as provided by a tax treaty, provided that there is a
tax certificate confirming that non-residents are registered for tax purposes in the state with which Uzbekistan has the effective tax treaty (with certain exemptions). Such WHT exemption/rate reduction used to be granted through a preliminary approval by the Uzbek tax authorities.

See the Withholding taxes section for a list of countries with which Uzbekistan has an applicable tax treaty.

**Interest income**
Interest income is subject to 10% WHT at the source. The net interest income received by companies is then excluded from its CIT base. Such net interest income received by foreign companies is taxed in accordance with the respective country’s internal legislation or DTT provisions (if Uzbekistan has a DTT with this country). Similar to other types of income of non-residents subject to WHT (including income in the form of dividends and royalties), interest income is to be paid without withholding of WHT at source or with application of a reduced WHT rate by automatic application of a DTT, provided that there is a relevant residence certificate.

See the Withholding taxes section for a list of countries with which Uzbekistan has an applicable tax treaty.

**Foreign income**
Gross foreign income of a resident corporation (e.g. income from its foreign branch) should be included in its aggregate income on an accrual basis, regardless of remittance date. Expenses incurred abroad in relation to such foreign income can be deducted, subject to provisions of the Uzbek Tax Code. Foreign income tax paid on such income should be credited against the Uzbek CIT only if this branch is registered in a country with which Uzbekistan has a DTT. There are no deferrals for foreign income to be recognised for Uzbek tax purposes.

**Deductions**
The tax base for CIT purposes varies significantly from the computation of taxable profits in most Western jurisdictions. Expenditures such as entertaining, benefits in-kind, and business trip allowances exceeding the statutory norms (that are generally low) are non-deductible.

There are additional costs that cannot be deducted by PEs of foreign legal entities, such as interest on head office loans; commission fees charged by the head office; and royalty, administrative, and management expenses of the head office incurred outside Uzbekistan. However, PEs are eligible to deduct expenses incurred outside of Uzbekistan if they directly relate to their business in Uzbekistan.

**Depreciation and amortisation**
For tax purposes, depreciation/amortisation is calculated with application of rates defined by the Tax Code. If depreciation for accounting purposes is charged at higher rates (compared with the Tax Code rates), the difference is treated as a temporary difference for CIT purposes (i.e. deducted in future periods).

Depreciation is calculated from a month following the month when the asset was put into use until it is fully depreciated, disposed, or written off. The maximum annual depreciation rates applicable to different types of fixed assets are outlined in the table below.

<table>
<thead>
<tr>
<th>Depreciable item</th>
<th>Rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Buildings and other structures</td>
<td>5</td>
</tr>
</tbody>
</table>
Depreciable item | Rate (%)  
--- | ---  
Cars, tractors, special equipment, computers and related hardware | 20  
Lorries, buses, special cars and trucks, industrial machinery and equipment, agricultural machinery and equipment, oil extraction and mining equipment, office furniture | 15  
Railway, river and air transport vehicles, thermo-technical equipment, turbines, electric and diesel drives, power supply and communication lines, pipelines | 8  
Depreciable assets not mentioned above | 15

For statutory accounting purposes, fixed assets can be depreciated using one of the following methods:

- Straight-line method.
- Production method.
- Double-declining-balance method.
- Sum-of-the-years’ (cumulative) method.

Intangible assets, including leases and other property rights, are amortised over the shorter of an asset’s useful life or the period of activity of the enterprise. Where an asset’s useful life cannot be determined, the asset can be amortised over five years.

Expenses related to geological exploration and developmental works necessary for the extraction of natural resources are deductible for CIT purposes through depreciation at the rate of 15% per annum.

**Goodwill**

For tax purposes, expenses incurred for acquisition of goodwill should be deductible through monthly amortisation charges at norms calculated by the taxpayers based on historical cost of goodwill and its useful life.

**Start-up expenses**

Current legislation does not provide specific guidance on tax treatment of start-up expenses. However, as per Uzbek accounting legislation, certain types of start-up expenses (e.g. expenses for acquisition of right for production, right for rendering services and carrying out works, right to use economic or other privileges) can be considered as expenses for procurement of intangible assets and, respectively, can be deducted through monthly depreciation charges.

**Interest on short-term loans**

Interest is deductible, except for interest on overdue/delayed loans (i.e. ‘penalty interest’) and interest capitalised in the value of fixed assets (i.e. in cases where a loan was obtained to purchase fixed assets).

**Bad debt**

Bad debts are deductible for tax purposes in cases where they are recognised in accordance with Uzbek accounting legislation. Otherwise, such expenses should be considered as non-deductible. According to the current Uzbek legislation, arrears are recognised as bad debts upon expiration of three-years from their due date.

**Charitable contributions**

Charitable contributions are generally treated as non-deductible expenses and added-back to the taxable base.

However, taxable income can be reduced for the amount of charitable contributions to ecological and charitable foundations and cultural, medical, educational, and municipal institutions, not exceeding 2% of the taxable income.
Fines and penalties
Fines and penalties are considered as non-deductible expenses.

Taxes
Generally, taxes are deductible for CIT purposes. The exceptions are the infrastructure development tax based on after-tax profits and the ‘net profits tax’ for PEs.

Other tax losses
In cases where goods or services are sold below cost (or given for free), the revenue should be adjusted for tax purposes to the cost or purchase price of the goods or services.

Production wastes and defects within statutory norms, and losses resulting in force-majeure circumstances, are generally deductible.

Losses from the disposal of fixed assets also may be deducted if the fixed asset has been used for three or more years.

Net operating losses
Tax losses may be carried forward for a period of five years, allowing a reduction of taxable income of the respective year by up to 50%. Loss carrybacks are not permitted.

Payments to foreign affiliates
There are no special tax provisions regarding deductibility of payments to foreign affiliates for services provided. They may be deducted in full if the general deductibility criteria are met (see Transfer pricing in the Group taxation section).

Group taxation
There is no provision for consolidation of income or losses by related companies for tax purposes in Uzbekistan. A foreign legal entity that has several PEs in Uzbekistan may not consolidate those for tax purposes.

Transfer pricing
The transfer pricing concept in the Uzbek Tax Code is limited to a couple of paragraphs stating that tax authorities may adjust prices used by interrelated parties if these prices differ from the prices that would have been used in transactions with independent parties. There is no further guidance for application of this rule, which gives rise to different interpretation by tax authorities and taxpayers.

Thin capitalisation
Effective legislation does not provide for thin capitalisation rules, except for debt-to-equity ratios set up by the Central Bank of Uzbekistan (CBU) for commercial banks.

 Controlled foreign companies (CFCs)
Uzbek tax legislation currently does not provide for any CFC rules or regulations. In January 2015, a draft law was introduced proposing amendments/additions to the Tax Code in respect of taxation of CFCs to serve as an anti-avoidance measure; however, as of 1 April 2016, the law was not yet adopted.

Tax credits and incentives
The current tax legislation offers tax incentives for enterprises in oil and gas exploration/development projects, enterprises engaged in the production and export of goods for foreign currency (when export share exceeds 15%), and companies rendering certain services.
In 2013, a Special Industrial Zone (Djizzak) was created in Djizzak region for a preliminary term of 30 years with potential prolongation. During that period, special customs and tax regimes and benefits will be in force within its territory.

There are also two other economic zones established earlier: the Free Industrial Economic Zone in the Navoi region and the Special Industrial Zone in Angren (established in 2012) that grant certain customs and tax exemptions and other benefits to legal entities registered in their territories.

**Incentives for oil and gas exploration and extraction companies**

Foreign companies carrying out oil and gas exploration works, as well as their foreign contractors/subcontracts engaged in such works, are exempt from payment of all forms of taxes and contributions to non-budget funds during the exploration period. Additionally, import by these companies of equipment, material, and technical resources and services necessary for the exploration and related works is exempt from customs duties.

Resident corporations supplying materials and rendering services to foreign companies carrying out oil and gas exploration are exempt from VAT.

Furthermore, if foreign companies carrying out oil and gas exploration form joint venture companies for extraction of oil and gas at respective fields, such companies are granted a seven-year CIT holiday starting from the date of commencement of extraction.

**Incentives for carrying out export activities**

Enterprises exporting goods (works, services) of their own production for freely convertible currency may apply reduced rates of CIT as follows:

- If export share of total sales ranges from 15% to 30%, the effective rate shall be reduced by 30%.
- If export share of total sales is 30% or more, the effective tax rate shall be reduced by 50%.

This incentive is applied likewise in regards to property tax as follows:

- If export share ranges from 15% to 30%, the property tax rate is reduced by 30%.
- If export share is 30% or more, the property tax rate is reduced by 50%.

The incentive in both cases is subject to a restriction that it does not apply to wholesale/retail sale or intermediary companies, nor to revenues from the export of specific items such as cotton fibre, oil, gas, precious metals, etc.

Producers can also defer payment of their import VAT in respect of material and technical resources used for production of goods to be exported. The deferral is granted for up to 90 days without application of any interest.

**Incentives for service companies**

Micro-firms and small enterprises engaged in certain types of activity are exempt from CIT and UTP until 1 January 2017. These types include, without limitation, leasing, insurance, auditing/bookkeeping services, and repair of footwear and leather goods.

**Exemptions from customs payments**

There are certain customs exemptions offered by the legislation for the following:

- Technological equipment imported by foreign investors as their charter fund contribution.
• Technological equipment imported under projects for creation of new or the modernisation of existing production facilities (with appropriate certificates issued by an authorised bank).
• Property imported for production needs by foreign investors and enterprises with foreign investment with foreign participation in the equity of not less than 33%.

**Foreign tax credit**
In accordance with international tax treaties of the Republic of Uzbekistan, legal entities/residents of Uzbekistan can obtain tax relief in respect of CIT paid outside of Uzbekistan. Depending on the provisions of a particular DTT, a credit or exemption may be claimed. In order to claim tax relief, legal entities should provide a copy of the tax payment order, confirmation from a competent tax authority, or any other document confirming payment of the tax outside of Uzbekistan.

**Withholding taxes**
WHT is to be withheld and remitted to the state budget by entities paying income to non-residents if these entities qualify under a tax agent definition (i.e. by [i] Uzbek legal entities and [ii] non-residents operating in Uzbekistan via PE).

Income of non-residents subject to WHT (including income in the form of dividends, interest, and royalties) is to be paid without withholding of WHT at source or with application of a reduced WHT rate as provided by the tax treaty (with certain exemptions), provided that there is a tax certificate confirming that non-residents are registered for tax purposes in the state with which Uzbekistan has the effective tax treaty. Such WHT exemption/rate reduction used to be granted through a preliminary approval by the Uzbek tax authorities.

The domestic WHT rates are as follows:

<table>
<thead>
<tr>
<th>Payment</th>
<th>WHT (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Dividends and interest</td>
<td>10</td>
</tr>
<tr>
<td>Insurance and reinsurance payments</td>
<td>10</td>
</tr>
<tr>
<td>Freight</td>
<td>6</td>
</tr>
<tr>
<td>Royalties, services (including management, consulting services), rents, other income</td>
<td>20</td>
</tr>
</tbody>
</table>

**Double taxation treaty (DTT) relief**
Foreign legal entities that do not carry on activities in Uzbekistan through a PE are subject to WHT on income from sources in Uzbekistan, subject to the terms of a relevant DTT. Uzbekistan has enforced DTTs with 52 countries.

DTTs in force establish WHT rates as follows:

<table>
<thead>
<tr>
<th>Recipient</th>
<th>Dividends (%)</th>
<th>Interest (%)</th>
<th>Royalties (%)</th>

Notes

1. Where the beneficial shareholder owns not less than 10% of the voting shares.
2. Where the beneficial owner holds at least 10% of the capital of the paying entity.
3. Where royalties are paid for patents, trademarks, know-how, etc.
4. Where royalties are paid for copyrights on literature, cinema, musical works, etc.
5. Where royalties are paid for secret formulas, processes, or know-how.
6. Where royalties are paid for computer software, patents, designs, models, or plans.
7. Where one of the following conditions is met:
   a. recipient is a local authority or corporate body constituted under public law, including the central bank of the state, or interest is paid by the local authorities or corporate bodies
Uzbekistan, Republic of

b. interest is paid in respect to debt claims or loans, guaranteed, insured, or aided by the state or on behalf of the state

c. interest is paid in respect to credit sales of industrial, commercial, or scientific equipment, goods and merchandise, or provision of services by an enterprise to another enterprise, or

d. interest is paid in respect to a loan of any kind granted by a bank.

8. Where the beneficial shareholder owns no less than 25% of the capital of the paying entity.

9. Where the recipients of the interest are governments of contracting states or any governmental body (such interest is exempt from WHT).

10. Where royalties are paid in respect to use or the right to use industrial, commercial, or scientific equipment.

11. Where the beneficial shareholder owns no less than 20% of the voting shares.

12. Where the interest is received by any financial institution (including insurance companies).

13. Under the provisions of the Netherlands’ Company Tax Act and the future amendments thereto, a company that is a resident of the Netherlands is not charged to Netherlands company tax with respect to dividends the company receives from a company that is a resident of Uzbekistan.

14. If and as long as the Netherlands, under its national legislation, levies no WHT on interest or royalties paid to a resident of Uzbekistan, the WHT rate for interest and royalty income paid at source in Uzbekistan shall be reduced to 0%.

Tax administration

Taxable period
The taxable period for CIT is a calendar year.

Tax returns
CIT is reported quarterly before the 25th day of the month following the reporting quarter, with an annual return due by 25 March following the reporting year for enterprises with foreign investment and 15 February following the reporting year for other categories of CIT payers. PEs report on CIT once a year prior to 25 March following the reporting year.

Payment of tax
Uzbek enterprises, including enterprises with foreign investment, are required to make advance instalments of CIT in each quarter based on estimated profits in the quarter. The instalments are payable by the tenth day of each month. Final quarterly payments based on actual profit figures are payable no later than the filing deadline for the quarterly tax returns (which is the 25th day of the month following the period of assessment). In case the final quarterly payment is more than 10% higher than advance instalments made in this quarter, tax authorities have the right to recalculate the advance instalments based on the actual quarterly profit figures and charge late payment interest accordingly.

Final CIT payment should be made no later than the date set as the deadline for annual return submission.

Payment of CIT by a PE is made annually within a month after the filing deadline.

Tax audit process
Scheduled statutory tax audits are to be carried out once in three years (once in four years for micro-firms, small enterprises) by the tax authority of the district where the enterprise is registered (i.e. district tax inspectorates). However, in certain cases, the tax audit is undertaken by the State Tax Committee, which is the highest tax authority.

The tax audits are aimed at verification of the tax returns submitted by the taxpayer. Normally, the tax authorities will review the accounting records, copies of tax returns, and source documents as required.

There can also be un-scheduled tax audits (e.g. in case of liquidation of the enterprise) and counter tax audits (e.g. to review transactions with the enterprise’s supplier/customer who is under the scheduled tax audit).

In case of tax breaches revealed during tax audits, taxpayers should remove tax violations and pay respective taxes/obligatory payments and late payment interest
within 30 days after the tax authority's decision is released. If accomplished within the deadline, the tax authority's decision on applying penalty may be cancelled. If not accomplished, the unpaid taxes/obligatory payments and late payment interest are to be withdrawn from (i) the taxpayer's bank accounts (by issuing tax liability claim without acceptance), (ii) the taxpayer's debtors (by issuing tax liability claim on the debts payable to taxpayer), or (iii) the taxpayer's property (by issuing tax liability claim upon decision of the court).

Another form of monitoring accuracy and completeness of fulfilment of tax liabilities imposed by the tax authorities is ‘cameral control’, which is performed at the time of tax returns submission. The tax authorities may require the taxpayer to amend the tax return(s) if they have revealed mistakes or inconsistencies therein. The amended tax returns should be filed within ten days.

**Statute of limitations**
The statute of limitations for tax purposes in Uzbekistan is set to five years.

**Topics of focus for tax authorities**
There are no officially announced areas of focus during tax audits. In practice, the tax authorities usually focus on currency control, cash discipline, deductibility of expenses for CIT purposes, and taxes on resources (e.g. excess profits tax, subsurface use tax).

**Other issues**

**Intergovernmental agreement (IGA) on the Foreign Account Tax Compliance Act (FATCA)**
On 3 April 2015, an IGA between the Government of the United States of America and the Government of the Republic of Uzbekistan to Improve International Tax Compliance and to Implement FATCA was signed. More than 60 countries around the world have concluded IGAs on FATCA with the United States, while, as per a statement by the US Embassy in Uzbekistan, Uzbekistan is the first country in Central Asia to sign an IGA on FATCA with the United States.

The IGA will ensure compliance with US tax laws for US citizens working in Uzbekistan. According to the FATCA regulations, foreign financial institutions (FFIs) (i.e. all financial institutions outside of the United States) are faced with disclosure requirements regarding their account holders who are US persons. This means that FFIs in Uzbekistan are obligated to periodically transmit information on financial accounts held by US persons to the US Internal Revenue Service (IRS) or face a 30% WHT on payments made from the United States. In order to fulfil this obligation, FFIs should implement procedures to ensure information collecting systems are in place and required information in respect to US investors is duly reported to the US IRS.
**Significant developments**

**Amendment of the Venezuelan Income Tax Law (VITL)**
The VITL was amended by Decree published in the Extraordinary Official Gazette N° 6,210 dated 30 December 2015. The amendment entered into force on 31 December 2015 and will be applicable to fiscal years started after that date. The primary changes introduced in the amendment comprise the following:

- Modification of the criterion to determine income availability in certain transactions, where some categories of income previously considered available on a cash basis are now to be taxed on an accrual basis.
- Elimination of the deduction recapture rule for deductions taken in a given tax year and not paid in the following taxable year.
- A 40% tax rate on net income from banking, financial, insurance, or re-insurance activities carried out by entities domiciled in Venezuela.
- Elimination of the tax rebates for new investments.
- Elimination of the inflation adjustment mechanism for taxable income determination for major or ‘special taxpayers’.

**Enactment of Tax on Large Financial Transactions Law**
Decree N° 2,169 was published in the Extraordinary Official Gazette N° 6,210 dated 30 December 2015 and entered into force on 1 February 2016. The Decree created a tax imposed on certain financial transactions performed by the denominated ‘special taxpayers’ or the entities related to such ‘special taxpayers’. The rate applicable to the taxable transactions is 0.75%. None of this tax will be deductible for a taxpayer’s income tax purposes. See the Other taxes section for additional information.

**Taxes on corporate income**
Corporations resident in Venezuela are subject to corporate income tax (CIT) on their Venezuelan and foreign-source income, whereas corporations resident abroad with a permanent establishment (PE) in Venezuela are levied CIT on only their Venezuelan and foreign-source income attributable to said PE. Corporations are able to claim any similar taxes paid abroad on foreign-source income as a tax credit. Non-resident corporations without a PE are subject to CIT only on Venezuela-source income.

Corporate income is taxed at the following progressive rates based on tax units (TU) (see below) (i.e. Tariff 2):

<table>
<thead>
<tr>
<th>Taxable income (TU)</th>
<th>Rate (%)</th>
<th>Subtract (TU)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Over 0</td>
<td>15</td>
<td>0</td>
</tr>
<tr>
<td>2,000</td>
<td>22</td>
<td>140</td>
</tr>
<tr>
<td>3,000</td>
<td>34</td>
<td>500</td>
</tr>
</tbody>
</table>
Tax units (TU)
The 1994 Income Tax Law reform established the concept of a taxable unit as an element that reduces the negative effects created by inflation on the determination of the tax rates. The tax code established the initial TU at 1 bolívar fuerte (VEF), with annual basis adjustments according to the variation on the consumer price index (CPI) from the previous year. For 2015, TU was VEF 150. For 2016, TU is VEF 177.

Additional rates and considerations
Income for oil exploitation and certain related activities is taxed at a flat rate of 50%. Related activities are comprised of those such as refinery, transportation, and purchases for the exports of hydrocarbons and by-products for exploitation. Joint venture corporations are also subject to a 50% CIT rate.

The above indicated regime does not apply to corporations engaged in the exploration and exploitation of non-associated gas (and the processing, refining, transportation, distribution, commercialisation, and exportation of the gas and its components) or companies exclusively engaged in the refining of hydrocarbons or improvement of extra heavy oil, which are subject to Tariff 2.

As a consequence of the amendment of the Law enacted on 31 December 2015, net income from banking, financial, insurance, and re-insurance activities carried out by entities domiciled in Venezuela is subject to a 40% flat rate.

Local income taxes
See Municipal business licence tax in the Other taxes section for a description of local taxes on income.

Corporate residence
According to the Venezuelan tax code, the following companies are regarded as resident:

- Companies incorporated in Venezuela and registered with the Mercantile Registry as established by commercial law.
- Foreign companies registered to be domiciled in Venezuela as branches duly registered with the Mercantile Registry.

The following companies are non-residents but subject to Venezuelan taxes:

- Foreign companies that provide technical assistance, technological services, royalty items, and professional services from abroad.
- Foreign banks granting loans to local companies.
- Foreign companies leasing goods to local companies.
- Foreign companies deriving income from economic activities carried out in Venezuela or from assets in Venezuela.

Permanent establishment (PE)
According to the VITL, generally, a passive party is deemed to be carrying out operations in Venezuela through a PE when:

- The passive party owns, directly or through an agent, employee, or representative in the Venezuelan territory;
  - an office, fixed place of business, or an activity centre where its activities are totally or partially carried on
  - management headquarters, branches, offices, factories, shops, facilities, warehouses, stores, construction, installations, or assembling works, when the duration thereof exceeds six months, or
Venezuela

- agencies or representatives authorised (according to the VITL) to contract in the name of or on behalf of the passive party.
- The passive party performs, directly or through an agent, employee, or representative in the Venezuelan territory, professional, artistic activities.
- The passive party possesses, directly or through an agent, employee, representative, or other contracted personnel in the Venezuelan territory, other work places where the operations are wholly or partially performed.

Any agent acting independently shall be excluded from this definition, except if such representative has the power to conclude contracts in the name of the principal.

Other taxes

Value-added tax (VAT)
Federal VAT (Impuesto al Valor Agregado or IVA) is a one-time tax payable by the ultimate consumer of all types of products and services. However, each business entity involved in the process, from the sale of raw materials to the production and distribution of finished products to the ultimate consumer, is required to include the tax on its products to customers (output tax) and to pay the tax on its purchases or imports of goods and services (input tax), crediting the amounts paid against the amounts due on its own activities. The net amount payable by each entity is considered to represent a tax on the value added.

In general, VAT does not represent an additional cost to business enterprises because even though all types of business enterprises, including government departments and agencies (with some exceptions), are required to accept charges of the tax by suppliers on their purchases of goods and services, such amounts are normally deductible from the liability of the business enterprises for the tax on their bills to customers.

There are exceptions, principally when the sales of an enterprise are exempt from VAT, in which case the enterprise is treated as the final consumer and must absorb any VAT charges on its purchases except insofar as its activities are subject to the zero rate (see below). However, input tax paid on goods or services used to produce items that are exempt from VAT may be deducted for CIT purposes.

Taxable transactions
In general, VAT is payable on all sales, rental, and importation of goods, and rendering of services executed or used in the country, although a number of significant exceptions are provided by law.

Sales of goods
The law defines a sale as any transmission of tangible goods, including those made on a conditional basis or through an irrevocable trust. The taxable amount of a sale includes the sale price as well as other amounts charged to the purchaser for other taxes, duties, interest, or surcharges of whatever nature. VAT becomes payable when the goods are invoiced or shipped to the customers or when the price is paid in full or in part.

Exempt sales include the following:
- Certain foods and other products for human consumption.
- Fertilisers as well as any natural gas used in the manufacturing thereof.
- Some products for animal consumption.
- Medicine.
- Products derived from hydrocarbons and some raw materials intended to improve the quality of gasoline.
- Wheelchairs.
- Books, magazines, newspapers, and the paper used in producing these products.
• Vehicles, aircraft, and trains for passenger transport.
• Machinery and equipment for agribusiness.
• Scientific equipment purchased by the government.

Services
Taxable services are those rendered within Venezuela by one person to another on an independent basis, transportation of passengers or goods, agency activities, technical assistance, and transfer of technology. VAT is payable to service providers at the time the invoice is issued, the service is rendered, or the fee becomes demandable, whichever comes first. The taxable amount includes not only the price of services, but also charges to the customers for other taxes, interest, etc.

Exempt services include the following:
• Domestic land and maritime transportation of passengers.
• Educational services.
• Accommodations for students and persons with disabilities.
• Healthcare and dental services, surgery, and hospitalisation.
• Theatres, sports, and cultural events.
• Food services for employees and students.
• Certain utilities (e.g. electricity, water).
• Housecleaning.
• Transport services for hydrocarbon-derived fuels.
• Services involving livestock, poultry, and other minor species, including breeding and production.

Exports
Exports are zero-rated. Consequently, VAT is not payable on exports, including exports of in-bond processing companies, technical fees to foreign residents, and sales to in-bond processing companies and companies that export their entire production. Sale of natural hydrocarbon by joint ventures regulated by the Hydrocarbon Law to the National Oil Company (PDVSA) and affiliated companies are also taxable at 0%. Though exporters do not collect VAT on export sales, they may recover VAT charges on their purchases of goods and services by means of a refund certificate. This certificate may be used to pay other tax obligations. If such exporters carry out sales in the country, they will be entitled to recover only input VAT related to foreign sales.

Additionally, a zero rate applies to independent personal services provided by residents in Venezuela that are used solely by and for the benefit of persons abroad without a PE or fixed base in Venezuela.

Tax rates
The rate may change every year, within the range of 8% to 16.5%. Currently, the general VAT rate is 12%.

A 15% VAT applies to the sale and imports of luxury products (e.g. vehicles valued at 40,000 United States dollars [USD] or more, motorcycles valued at USD 20,000 or more, nickel or token game machines, aircraft used for recreational or sport purposes, jewellery valued at TU 2,500 or more).

An 8% VAT applies to the following transactions:
• Goats, sheep, and minor species for slaughter or breeding.
• Meats in their natural state, or refrigerated, frozen, or salted meats, or meats in brine of goats, sheep, and poultry.
• Shortening.
Venezuela

- Rendering of professional services to any government entity, in any level or branch of government, provided such services do not involve any commercial transactions but rather predominantly intellectual work or efforts.
- Domestic air passenger transportation.

**Payment and collection**
Excess VAT charged or chargeable to customers over VAT paid to vendors or customs authorities (Servicio Nacional Integrado de Administración, Aduana y Tributaria or SENIAT), including the correspondent payment, must be remitted to SENIAT within the first 15 days of the following month.

**Customs duties**
As a general rule, the importation of goods into Venezuela is subject to customs duties. These duties are generally levied on the cost, insurance, and freight (CIF) value of the product being imported, excluding VAT.

Customs duty rates generally range from 5% to 35%. The duty rates vary depending on the product involved. In general, import tariffs are 5% for capital goods, 10% to 15% for raw materials and intermediate goods, and 15% to 35% for finished products. In addition, all imports are subject to customs handling charge, a duty import, and VAT.

With regard to procedural aspects, the Master Customs Law establishes two modes of customs declaration: (i) the anticipated informative declaration, only applicable to imports, and (ii) the definitive declaration for customs regime, also known as the single customs declaration. In this regard, it establishes that entities with competence for the issuance of permits and licences are to issue the corresponding documents, at least 25 business days in advance to the arrival of the merchandise, in order for importers to register the advanced informative customs declaration.

Additionally, an element has been created, named Authorised Economic Operator, who will be the company domiciled in the country, involved in the international logistic chain, which will serve as the substitute of simplified control procedures and customs clearance. With regard to the sanctioning system, pecuniary penalties applicable to transporters, porters, consolidating companies, and customs agents, as well as those applicable to infringements committed in the customs declaration of merchandise, have been increased.

**Excise taxes**

**Tax on alcohol and alcoholic beverages**
In general terms, the manufacture, commercialisation, and importation of alcohol and alcoholic beverages are subject to excise taxes. The Law of Tax on Alcohol and Alcoholic Beverages provides for three main types of excise taxes:

- Tax on the national production and importation of alcohol and alcoholic beverages, which is established on the basis of TU per litre and varies depending on the type of product.
- Additional excise tax per litre for national and imported beer and for other alcoholic beverages is levied on the sale of those products to the public, which is also provided on the basis of TU per litre, depending on the type of product.
- In addition to the above, another excise tax is imposed on the importation or local sale of national and imported alcoholic beverages to the public, which is levied on the sales price and provided on the basis of a percentage on the price of sale to the public depending on the type of product, as follows: 15% for beer, 35% for natural wines, and 50% for other beverages up to 50 grade on the Gay-Lussac scale.
The Alcohol and Alcoholic Species Tax Law specifies the time of payment of the tax as follows: (i) for importers, at the moment the merchandise is nationalised and (ii) for producers, upon withdrawal of the products from the establishment.

**Tax on cigarettes and manufacturing of tobacco**
The importation and national production of cigarettes and tobacco, fine cuts, and other tobacco derivatives to be consumed in Venezuela is subject to an excise tax. This proportional tax is levied at a rate of 70% on the retail price of cigarettes, tobacco, and its derivatives. As per the Cigarette and Tobacco Manufacturing Tax Law, produced and imported taxable products for zones under the Territorial Customs Regime, duty free shops, and special development regions shall also be subject to tax.

The time of payment of tax on cigarettes and manufacturing of tobacco is as follows: (i) for national production, before the products are removed from the manufacturing establishments and (ii) for imports, at the time of customs declaration.

**Urban Property Tax**
The Urban Property Tax is a local or municipal tax payable by any person who owns property rights or any other real rights on urban real estates. The taxable basis is the value of the urban real estate. For these purposes, the fair market value of the real estate is provided as a point of reference. The applicable rate varies according to each municipality.

**Public registry tax**
Commercial companies are registered with the Mercantile Registry Office and are subject to a tax levied upon incorporation of a company and registration of capital increases. The tax is 1% of the amounts of subscribed or increased capital.

The sale of a going concern is also registered in the Mercantile Registry Office and is subject to a tax levied upon the total amount of the sell. The tax is 2% of the amount.

**Stamp duties**
The Stamp Duties Law establishes a number of stamp duties on the issuance of official documents (e.g. certificates, permits, authorisations, registrations). Stamp duties may be levied at fixed amounts (ranging from TU 0.01 to TU 10,000) or at a rate based on the value of the transaction or work in question and vary depending on the jurisdiction.

**District Capital stamp tax**
The District Capital stamp tax on subscribed or increased capital of companies is 2%.

**Tax on Large Financial Transactions**
Taxpayers for the purposes of the Tax on Large Financial Transactions comprise:

- Entities qualified as ‘special taxpayers’ by the tax authorities, for payments made from their accounts in banks or financial institutions and payments that do not involve financial institutions (debt offsetting, debtor or creditor substitution, and debt forgiveness).
- Entities related to those qualified as ‘special taxpayers’ for the above-indicated transactions.
- Individuals and entities acting on behalf of ‘special taxpayers’ for the above-indicated transactions.

The tax applies, among others, to the following transactions:

- Debits made in bank accounts, or any other deposit instrument, held in financial entities.
- Transfer of securities as of the second endorsement.
- Acquisition of cashier’s check.
Venezuela

- Cross-border payments
- Payments of debts obligations (even if not executed through the formal financial system).

The applicable rate is 0.75% on the total bank debit or taxable transaction.

Certain transactions involving state-issued securities, payments of taxes, and transfer of funds among same-holder accounts are exempted from this tax.

The tax is not deductible for Venezuelan income tax purposes.

The tax due shall be determined on a daily basis.

**Gift tax**

Overall, the Inheritance and Donations Tax Law, published on 1999, stipulates the taxes attributable to inheritances left by individuals. Nonetheless, this Law provides regulation about donations, which are significant to corporations. Subject to payment of the gift tax are the beneficiaries of gifts in the form of movable or real property, rights, or shares located in the country.

For tax calculation purposes, the progressive tax rate (up to 55%) set forth in the Law will be applied to the donated good. Both donors and donees are jointly liable for the tax generated from the gift.

The gift tax is applicable from the time in which the donors manifest before the National Treasury their will to donate and must be paid before the registration of any document formalising or evidencing the authenticity of the gift. Should the donation not be perfected due to express will of the donor or rejection on the part of the donee, the obligation to pay the tax will be eliminated and reimbursement may be requested of the amounts paid in this connection.

Under the transfer pricing rules contained in the VITL, the tax authorities are empowered to impute income in inter-company transactions at a price reflecting the fair market value of the property being transferred.

Before the introduction of transfer pricing rules, under the Inheritance and Donations Tax Law, the tax authorities could and still can presume in transactions involving a sale, assignment, barter, or transfer, the existence of a donation if, for instance, the price stipulated in such transaction does not reflect the real value of the property being transacted. In such a case, a gift tax may be imposed on the difference between the fair market value of the property being transacted and the consideration received in return.

Also, a cancellation of a debt gives rise to gift tax issues. In this regard, the Inheritance and Donations Tax Law provides that the total or partial forgiveness or cancellation of a loan must be viewed as a gift and, as such, is subject to gift tax.

**Windfall tax on oil production**

The windfall tax on oil companies is provided in the following terms:

- The contribution on extraordinary oil prices is a 20% tax on the difference in price when the internationally quoted price per barrel exceeds the budgeted price per barrel (for purposes of the Venezuelan Annual Budget Law), provided that the quoted price per barrel is equivalent or lower than USD 80 per barrel (i.e. the maximum basis is the difference between USD 80 per barrel and the current budgeted price of USD 55).
- The contribution on exorbitant oil prices is comprised of the following:
• 80% tax on income generated by quoted oil prices between USD 80 and USD 100 per barrel (i.e. 80% on the range from USD 80 to USD 100 quoted price per barrel).
• 90% tax on the difference in the quoted oil prices between USD 100 and USD 110 per barrel.
• 95% tax on the difference over the threshold of USD 110 per barrel.

The tax is payable by oil companies exporting with sale purposes. Also, the mixed companies (empresas mixtas) created in accordance with the Master Hydrocarbons Law that sell oil and by-products to PDVSA, or any of its affiliates, are also obligated to pay the above described tax.

On the other hand, tax exemption is provided for the following cases:

• For mixed companies when their activities are the result of the performance of projects for new developments of reservoirs, enhanced production, or projects to remEDIATE production, declared as such by the Ministry of the Popular Power for Petroleum and Mining, until they have recovered their total investment. Parameters to determine the volumes exempted are to be separately established by the aforesaid Ministry by Resolution.
• Exports executed in connection with cooperation or financing international agreements.

The tax is payable on a monthly basis in foreign currency. Other terms of payments are to be regulated by Resolution.

Additionally, USD 80 per barrel is the maximum price to be used as the calculation basis for the payment of royalties, extraction tax, and export registration tax provided for in the Master Hydrocarbons Law.

**Hydrocarbons Organic Law**

The state is entitled to 30% of the volume of hydrocarbons extracted from any deposit, by way of royalties. The National Executive can reduce this within certain limits, when it is shown that certain types of deposits are not economically exploitable.

Persons conducting activities related to hydrocarbons must pay the following taxes:

**Surface tax**
For the portion of the surface area granted that is not under development, the equivalent of TU 100 for each square kilometre or portion of a square kilometre for every elapsed year is due as a surface tax. This tax will increase annually by 2% during the first five years and 5% during the following years.

**Tax on own consumption**
10% of the value of each cubic metre of hydrocarbon by-products produced and consumed as fuel in wholly-owned operations, based on the price of the end consumer, is due as a tax. In the case that said product fails to be sold in a domestic market, the Ministry of Energy and Mines shall provide the price.

**General consumption tax**
For every litre of hydrocarbon by-products sold in the domestic market, a tax is due at the rate of between 30% and 50% of the price paid by the end consumer, whose aliquot should be implemented annually between the two extremes under the Budget Law. This levy to be paid by the end consumer should be withheld at the supply source, to be handed over to the National Treasury on a monthly basis.

The National Executive may waive, in whole or in part, by the time specified, the general consumption tax, in order to encourage certain activities of public or general interest.
The National Executive can also reinstate this levy to its original level when the causes for the waiver cease to exist.

**Gaseous Hydrocarbons Organic Law**
The Gaseous Hydrocarbons Organic Law establishes a system of royalties, determinable by the volumes of gaseous hydrocarbons extracted from any deposit and not re-injected. The state is also entitled to a 20% share for this item.

The Law also provides that additional legislation may oblige these entities to pay taxes on hydrocarbons consumed, such as fuel. However, no additional regulations have been enacted for enforcement of this obligation.

Additional taxes are provided for in the licence agreements, which vary for each particular case.

**Science, technology, and innovation contribution**
The Law on Science, Technology, and Innovation (LOCTI), establishes a mandatory contribution to be paid by companies that obtained, in the previous fiscal year, over TU 100,000 in gross income.

The kind of companies that are required to pay this contribution are stock companies, limited liability companies, partnerships, communities, irregular associations, associations, foundations, and PEs or fixed bases located inside or outside the national territory with current activities in Venezuela.

Contributions established in the LOCTI are as follows:

- Contributions made from companies related to bingos and casinos activities, alcoholic drinks, or tobacco: the companies engaged in activities related to bingos and casinos, alcoholic drinks, or tobacco must contribute annually the equivalent of 2% of gross income.
- Contributions made by private companies engaged in hydrocarbon or mining activities: the companies that are engaged in hydrocarbon activities, including gaseous hydrocarbons, or mining activities, must contribute the equivalent amount of 1% of gross income.
- Contributions made by companies engaged in other economic activities: these companies must contribute annually the equivalent of 0.5% of gross income.
- The company that performs activities with two different percentages will apply the highest one.

The National Fund for Science, Technology, and Innovation (FONACIT) is the entity responsible for the administration, collection, control, verification, and qualitative and quantitative determination of the contributions.

The contribution must be paid to FONACIT during the second quarter after the end of the corresponding fiscal year.

**Contribution to support Organic Law on Sports, Physical Activity, and Physical Education**
The purpose of the Organic Law on Sports, Physical Activity, and Physical Education (Sports Law) is to establish the public service nature of physical education and the promotion, organisation, and administration of sports and physical activity, as well as their organisation as an economic activity with social aims.

The provision of the Sports Law are of a public nature and are applicable to the public national, state, and municipal administration and organisations, and also to individuals and legal entities that conduct any activity related to the practice, promotion,
organisation, sponsorship, administration, or any economic activity associated with sports or physical activities and education.

The Sports Law creates the National Fund for the Development of Sports, Physical Activity, and Physical Education, which will be constituted with the contributions made by companies or other public or private organisations that perform economic activities for profit in the country; by donations, gifts, or any other special contribution made by the Republic, the states, the municipalities, or any other public or private entity; and by the revenue produced by such funds.

The contribution is 1% of the annual net of accounting profit and is payable by all companies or other public or private organisations that perform economic activities within the country and obtain an annual net or accounting profit of more than TV 20,000. Up to 50% of the contribution can be for the implementation of the taxpayer’s own projects, provided the respective project follows the guidelines to be issued by the National Sports Institute, which will be updated every two years.

**Anti-drugs contribution**

The Organic Drug Law stipulates that any company employing 50 or more employees must make an annual contribution from their operating profit equivalent to 1%. On the other hand, corporations with the specifications mentioned before but that are dedicated to the manufacture or import of alcohol beverages, tobacco, or their mixtures are required to make a contribution equivalent of 2% from their operating profit. Under the definitions established by this Law, operating profit can be understood as the result from subtracting the operating expenses from the income profit in accordance with the accepted Venezuelan general accounting principles.

This contribution will be collected by the National Anti-Drug Fund (FONA) within 60 continuous days counted from the end of the fiscal year.

Note that this contribution can be retrieved if the company performs:

- prevention programs and projects intended for the company employees and their family environment
- prevention programs for children and adolescents, or
- programs to fight drug trafficking.

**Payroll taxes and other contributions**

Contributions applicable to resident companies in Venezuela:

### Notes

1. As of 1 March 2016, the minimum monthly salary amount is VEF 11,577.81.
2. The employer’s contribution to social security depends on the company’s risk qualification (minimum risk, middle risk, or maximum risk).
3. Regarding Instituto Nacional de Capacitación y Educación Socialista (INCES) contribution, the employer must contribute 2% of the total wages and salaries paid to employees.
4. Employers are also required to withhold 0.5% of the annual profit-sharing bonus paid to employees.
5. According to the Ley Orgánica del Sistema de Seguridad Social (LOSSS), the general rule for contribution basis for the new systems may not exceed ten minimum salaries. The transition rules establish a contribution basis of five metropolitan minimum salaries for urban workers for social security purposes. No cap is expressly established in the transition rules for the housing system and work, security, and health regime.
6. The basis of calculation of the housing contributions is the ‘Integral Salary’. The Integral Salary is a concept established in the Organic Labour Law, and it comprises the following payments: commissions, gratifications, profit sharing bonuses, vacation bonus as well as surcharges for holidays, overtime, night shifts, among others, all of which are made to the employee and correspond to the services rendered by the individual.
7. Contributions to be made to this regime are exclusively for the employer and vary depending on the risk associated to the company. A company’s risk is to be determined by the Instituto Nacional de Prevención, Salud y Seguridad Laborales (INPSASEL).
8. Ley Orgánica de Prevención, Condiciones y Medio Ambiente de Trabajo (LOPCYMAT) regulations do not establish a cap for the contribution. However, as mentioned, the LOSSS establishes a maximum of the minimum urban salaries. For this reason, there are several contrary interpretations on whether a cap should be applied in this case.

### Other contributions (see above)

### Notes

1. Ley Orgánica de Ciencia, Tecnología e Innovación (LOCTI).
2. Ley Orgánica de Drogas (LOD).
3. 2% in the case of companies that manufacture or import alcohol beverages or tobacco. 1% for companies that employ 50 or more employees.

### Municipal business licence tax

Companies and business entities, as well as individuals and unincorporated companies, are subject to municipal tax on gross income from industrial or trade activities carried on in the municipality during the fiscal year. The rates range from 0.1% to 10.0%, depending on the activity and the municipality.
Other municipal taxes
Municipalities also tax vehicles, public entertainment, legal bets, and commercial advertisements. There are also various municipal tariffs and fees.

Branch income
Branches of foreign corporations are subject to the same tax rules as Venezuelan corporations. Inter-branch income and deductions must be eliminated. The positive difference between a branch’s annual book and taxable income is deemed to be remitted to the branch’s head office (branch profits tax). Such remittances are subject to the 34% flat dividend tax (see Dividend tax in the Income determination section for more information) regardless of whether there is an actual payment unless the branch can provide proof of reinvestment of its profits for a five-year period. If such proof is established, no deemed remittance is assumed.

A Venezuelan taxpayer has to recognise, annually on an accrual basis, income generated in a company or other legal entity it controls that is located in a jurisdiction with low fiscal taxation (JLFT). Further, investments in a JLFT must be declared to the SENIAT.

Income determination

Inventory valuation
Inventories may be valued at cost or the lower of cost or market value. Any method generally accepted for accounting purposes can be accepted for tax purposes.

Capital gains
Capital gains are taxable as ordinary income, and capital losses are deductible from ordinary income. Note that capital losses resulting from the sale of stock, capital reduction, or liquidation of a company are only deductible if they meet one of the following conditions:

- The cost of the capital stock was not in excess of the price quoted on a stock exchange or an amount with a reasonable relationship to the book value of the capital stock.
- The holding period of the investment was for at least two years immediately preceding the date of the sale.
- The stockholder proves that the company selling the shares carried on economic activities for at least two years preceding the date of sale.

At present, the tax law contains two different rulings relevant to the deductibility of losses incurred through operations on the Venezuelan Stock Market, one of which has been described above. The second ruling pertains to income obtained from operations on the local market. This income is subject to a final 1% tax that is withheld at the source. Losses in this kind of operation are not deductible against other income. Corporate shareholders not domiciled in Venezuela may not deduct such losses from other taxable income other than dividends arising from Venezuelan sources.

Gains upon liquidation or reduction of capital are taxable to the liquidating entity.

Dividend income
A dividend tax is levied at a flat rate of 34% on the positive difference between book income and tax income generated after 2000. Book income is understood to be that approved at a shareholders’ meeting and based on the financial statements prepared pursuant to generally accepted accounting principles (GAAP). To determine the applicable difference, a last in first out (LIFO) method applies. The tax is triggered when a dividend is paid and shall be remitted via withholding. Withholding is to be made at
the moment a dividend is declared or credited to the account of a recipient. The 34% (domestic) rate can be mitigated under tax treaties.

Dividends obtained from companies incorporated or resident abroad or incorporated abroad and resident in Venezuela are taxed at a flat 34% rate.

**Stock dividends**
Dividends of stock are subject to payment of the aforementioned dividend tax. Moreover, stock dividends are subject to an advanced payment of dividend tax equivalent to 1% of the dividend distributed. Stock dividends have no cost for tax purposes.

**Interest income**
Unless the debtor can prove otherwise, any sum paid by a debtor in excess of the principal is deemed to be interest. As a general rule, interest is sourced in Venezuela if it is derived from activities carried out in Venezuela or from property located in Venezuela. Specifically, interest is deemed to be derived from activities carried out in Venezuela if the loan principal is used or enjoyed in the country. Interest received by non-resident corporations is therefore subject to Venezuelan income tax if the loan is granted or invested in Venezuela.

Interest paid on loans granted by non-resident financial institutions is subject to a final withholding tax (WHT) at source at a rate of 4.95% on gross income. Interest paid to other non-resident legal entities is subject to tax at a rate of 34% applied to 95% of the gross income.

**Foreign income**
Extraterritorial income is subject to Venezuelan CIT based on the concept of worldwide income taxation, according to which:

- Resident companies must pay a tax on total income whether from national or foreign source.
- Non-resident companies with PE in Venezuela will pay tax on their income, whether of national or foreign source, attributable to the Venezuelan PE.
- Non-resident companies will pay taxes on their income originated or caused in Venezuela.
- Resident companies as well as non-resident companies with PE in Venezuela may credit the tax paid abroad for earnings of an extraterritorial source against the income tax payable in Venezuela, subject to limitations.
- In general terms, taxation of foreign-source income is ruled by domestic provisions on taxation of territorial-source income. Foreign-source dividends are taxable when dividends are received. However, in case of investments located in a JLFT, anti-deferral rules in the international fiscal transparency regime apply (see below).

**Foreign technical assistance and services**
Taxable income of foreign taxpayers providing technical assistance or technological services from abroad to individuals or entities that use them in Venezuela or assign them to third parties is presumed to be 30% of gross income for technical assistance fees and 50% of gross income for technological service fees. If the contract does not specify the proportion in which the services are rendered, the law provides that 60% of the technical assistance and technological service fees are deemed to be rendered abroad (i.e. foreign-source), with the other 40% deemed to be rendered in Venezuela. The law also provides that 75% of the entire income related to technological services and 25% of that related to technological assistance is rendered abroad if not otherwise specified in the contract. See the Withholding taxes section for more information.

**International fiscal transparency regime**
A regime of international fiscal transparency is created for the purpose of establishing special standards of fiscal control, governing capital investments in countries classified
as a JLFT, or tax havens. Under certain conditions, a Venezuelan taxpayer may be required to recognise income generated in its JLFT subsidiary on an accrual basis in its tax return.

**Inflation adjustment**

A system for the adjustment of non-monetary assets, non-monetary liabilities, and shareholder's equity has been established. ‘Non-monetary assets’ include land, construction, machinery, vehicles, installations, inventories, and investments other than in securities (e.g. bonds and stocks).

There are two phases to the adjustments: (i) initial adjustments and (ii) annual adjustments. Both phases are mandatory adjustments for taxpayers engaged in commercial and industrial operations, and in the exploitation of mines and hydrocarbons. The annual adjustment is optional for taxpayers performing non-business activities.

The following taxpayers are excluded from the inflation adjustment: (i) taxpayers engaged in banking, financial, insurance, and reinsurance activities and (ii) taxpayers designated by the tax authorities as ‘special taxpayers’.

For those taxpayers subject to inflation accounting for tax purposes, the inflation adjustment is based on the National Consumer Price Index (NCPI).

**Initial adjustment**

The initial adjustment on depreciable fixed assets requires a registration tax of 3% on the amount of the adjustment.

The initial adjustment must be filed at the closing date of any fiscal year ending after 1 January 1993. This adjustment is applicable to all non-monetary assets and non-monetary liabilities.

The initial adjustment is calculated by applying the variations between the NCPI prevailing in the month in which the non-monetary assets were acquired and the month corresponding to the initial adjustment. Assets acquired before 1950 are deemed to have been acquired in January 1950.

A registry tax of 3% is applied exclusively to the initial revaluation adjustment of depreciable fixed assets. For payment, taxpayers must be registered with the Asset Revaluation Registry, maintained by the tax administration. The resulting tax may be paid in three consecutive annual instalments, beginning on the date of registration.

Companies in the pre-operating stage, deemed to end with the first invoice, must determine and pay a 3% tax once the pre-operating period has ended.

Depreciation or amortisation on the revaluation adjustment is allowed, based on the original estimated life of the asset.

**Annual adjustment**

The annual adjustment is applied each year in determining taxable income. The adjustment factor must be applied to the following balance sheet items at the closing date of the fiscal year. The resulting adjustment will increase or decrease taxable income.

<table>

</tr>
</tbody>
</table>

**Notes**

1. Tax initial equity is defined as the difference between assets and liabilities at the beginning of the tax year, less accounts receivable from administrators, affiliated companies, and related companies. In order to determine the initial tax equity, assets not located in the country, as well as goods, debts, and liabilities entirely applied to the production of deemed, exempt, or exonerated income, are excluded.
2. Inventories are to be valued at historical cost for purposes of applying the NCPI. The provisions of the VITL detail the procedures for applying the NCPI. The revaluation of inventories in the tax year is included as part of the initial inventories of the following year.
3. The annual revaluation adjustment of fixed assets is considered part of the cost when the assets are sold.

Net losses arising from the annual adjustment that have not been offset cannot be carried forward.

Gains or losses originating from the adjustment of accounts receivable or investments, as well as debts and liabilities in foreign currency or with a re-adjustability clause, are deemed to be carried out during the fiscal year in which they become demandable, collected, or paid, whichever comes first.

**Deductions**

**Depreciation and amortisation**

Companies may deduct depreciation of tangible fixed assets and amortisation of intangible fixed assets that are used in the production of income. Depreciation is generally computed on a straight-line basis although any other generally accepted method for accounting purposes is also accepted. Depreciation is not allowed on real estate used as rental property. Depreciation on the stepped-up portion of assets revalued by any method other than the inflation adjustments (see the Income determination section) is not permitted. In principle, useful lives of assets shall be consistent with the parameters used in accordance with accounting principles. Although domestic standards provide that tables with depreciation and amortisation rates to be applied by taxpayers may be provided via the Income Tax Rules, such a table has not been provided to date.

**Goodwill**

Deduction of the amortisation of goodwill is allowed for income tax purposes. Deduction of the cost basis for purposes of calculating the capital gain on the sale is also allowed for income tax purposes.
**Organisational and pre-operating expenses**
Domestic income tax regulations do not provide for specific guidance as to the treatment of organisational and pre-operating expenses. The accepted practice is to follow GAAP.

**Interest expenses**
Interest paid on a loan, the principal of which is invested to generate income, is deductible.

**Bad debt**
Losses arising from bad debts are deductible, provided:

- the loan concerned was granted as part of the taxpayer’s business
- the amount of the debt was previously included in the taxpayer’s gross revenue (except in the case of loans granted by financial institutions or by employers to their employees), and
- either the debtor and the debtor’s guarantors are insolvent or the amount of the loan does not justify collection expenses.

**Charitable contributions**
Deductions for allowable charitable contributions are limited to 10% of taxable income (before deducting contributions) when taxable income does not exceed TU 10,000. When taxable income exceeds TU 10,000, charitable contributions are limited to 8% of taxable income. For oil extraction companies, the deduction is limited to 1% of the pre-contribution tax amount.

**Fines and penalties**
Income tax regulations do not expressly provide for the treatment of fines and penalties; however, such expenses are not deductible as they do not meet the normality and necessity requirements.

**Taxes**
Municipal, state, and local taxes are deductible in determining taxable income. Corporate taxes are not deductible.

**Other significant items**
Payments required by the labour law, such as profit sharing (generally between 15 days and four months’ salary) and severance indemnity accruals, are also deductible. In cases of unjustified dismissals, double severance indemnities must be paid. However, accruals for such additional indemnities are generally not deductible until paid.

Corporate tax deduction of employees’ compensation and professional fees is subject to compliance with the taxpayer’s obligations as employer as provided for in the Law, which entail, among others, withholding obligations.

**Net operating losses**
Losses may be carried forward for three years. During the three-year term, the amount of losses available to carry forward cannot exceed 25% of the tax period’s taxable income. Carryforward losses derived from the inflation adjustment have been eliminated. Losses may not be carried back. Foreign losses may be offset only against foreign profits.

**Payments to foreign affiliates**
A Venezuelan corporation may claim a deduction for royalties and technical assistance and for technical service fees paid to foreign affiliates, subject to the following conditions:

- Income tax payable by the recipient is withheld at the source.
- Transfer pricing requirements are met.
Venezuela

- In the case of technical assistance and technological services fees, the expenses may be deducted if such services cannot be otherwise provided in Venezuela.

Foreign companies domiciled in Venezuela are allowed to deduct royalties paid to parent companies or foreign affiliates (see the Withholding taxes section for more information). Branches of foreign companies, however, may not deduct such payments to head offices or related parties.

**Group taxation**

Group taxation is not possible in Venezuela.

**Transfer pricing**

Taxpayers that carry out operations with related parties abroad must calculate their income, costs, and deductions by applying a defined methodology of transfer pricing. This regime is applicable to imports, exports, and interest paid to recipients abroad as well as technical assistance, technological services, and royalty fees.

**Thin capitalisation**

Thin capitalisation rules limit the deduction of interest from debt with related parties in excess of a 1:1 debt-to-equity ratio. Under these rules, if the average of a taxpayer's debt (with related and unrelated parties) exceeds the average amount of its equity for the respective fiscal year, the excess debt is treated as equity for income tax purposes. Consequently, the ability to deduct interest on related-party loans may be affected.

**Controlled foreign companies (CFCs)**

Venezuelan tax legislation does not provide for CFC rules but does provide for international fiscal transparency rules where income from investments in a JLFT must be recognised on an accrual basis (see Foreign income in the Income determination section).

**Tax credits and incentives**

**Foreign tax credit**

Foreign income tax paid on taxable foreign income may be offset by the payable Venezuelan tax, up to the proportion of Venezuelan payable tax related to foreign-source income. Taxpayers must keep documentation of foreign tax. No carryforward rules are provided for in domestic regulations.

**Other incentives**

Customs duty incentives are also available, such as drawbacks on the import of materials used for exporting products. This may take the form of a tax refund certificate issued by the Ministry of Finance. The certificate is a negotiable bond and will be accepted by the Treasury Funds Office for payment of national taxes. Determination of the amount of the refund will take into account the import duties effectively paid at the time the materials used in the manufacture of the exported product were received in Venezuela.

**Withholding taxes**

Resident corporations making certain types of payments must withhold taxes. T2 refers to Tariff 2. These include the following:

<table>
<thead>
<tr>
<th>Type of payment</th>
<th>Resident (%) (1)</th>
<th>Non-resident (%)</th>
</tr>
</thead>
<tbody>
<tr>

<td>N/A</td>
<td>N/A</td>
</tr>
</tbody>
</table>

### Notes

1. WHTs constitute prepayments against final tax liabilities as determined by the income tax return when filed.
2. Includes commissions earned in instances other than through a dependent relationship (e.g. employer/employee). Commissions are subject to withholdings in the same manner as salaries and wages.
3. The rates for non-residents are similar to those rates applicable for payments to a non-domiciled corporation not resident in a treaty country and rendering services from abroad with no PE in Venezuela.
4. Excludes payments exempted under international shipping agreements.
5. Withholding applicable only on the excess on profits taxed at the corporate level (see Dividend income in the Income determination section).

### Tax treaties

There are currently comprehensive treaties for the avoidance of double taxation with the following countries:

<table>
<thead>

Notes

1. Domestic rate applicable to payments to non-resident corporations.
2. The 4.95% rate applies to non-resident financial institutions, and the Tariff 2 on 90% on the gross income in all other cases of non-resident entities.
3. The 5% rate applies when the beneficial owner is a company that holds at least 15% of the capital of the company paying the dividends, and the 15% rate applies in all other cases.
4. The 4.95% rate applies to interest paid to banks, and the 10% rate applies in other cases.
5. The 5% rate applies when the beneficial owner is a company that holds at least 5% of the capital of the company paying the dividends, and the 10% rate applies in all other cases.
6. The 5% rate applies to interest paid to banks, and the 15% rate applies in other cases.
7. The 5% rate applies when the beneficial owner is a company that holds at least 25% of the capital of the company paying the dividends, and the 15% rate applies in all other cases.
8. The 5% rate applies to payments for the use or the right to use copyrights on scientific work, software, trademarks or for the use or the right to use any type of equipment or transportation vehicles. The 10% rate applies in all other cases.
9. The 10% rate applies when the beneficial owner is a company that holds at least 20% of the capital of the company paying the dividends, and the 15% rate applies in all other cases.
10. The 10% rate applies when the beneficial owner is a company that holds at least 25% of the capital of the company paying the dividends, and the 15% rate applies in all other cases.
11. The 5% rate applies to artistic copyright, computer software, patent, and industrial, commercial, and scientific royalties. The 10% rate applies in all other cases.
12. The 5% rate applies when the beneficial owner is a company that holds at least 10% of the capital of the company paying the dividends, and the 10% rate applies in all other cases.
13. The 5% rate applies to interest paid to banks, and the 10% rate applies in other cases.
14. The 5% rate applies when the beneficial owner is a company that holds at least 15% of the capital of the company paying the dividends, and the 10% rate applies in all other cases.
15. The 10% rate applies to royalties, and the 5% rate applies to technical assistance.
16. No withholding applies when the beneficial owner is a company that holds at least 10% of the capital of the company paying the dividends. The 5% rate applies in all other cases. The 15% rate applies to a resident of Venezuela who receives from a company that is a resident of France dividends that would give the right to a tax credit (avoir fiscal) if they were received by a resident of France and shall have the right to a payment from the French Treasury of an amount equal to this tax credit (avoir fiscal), subject to deduction of the tax.
17. The 10% rate applies when the beneficial owner is a company that holds at least 10% of the capital of the company paying the dividends, and the 15% rate applies in all other cases.
18. The 20% rate applies to royalties, and the 10% rate applies to technical assistance.
19. The 7% rate applies to literary, artistic, and scientific work copyright royalties, and the 10% rate applies in other cases.
20. The 5% rate applies to interest in the case of banks, and the 10% rate in other cases.
21. The 5% rate applies to royalties paid for the use of industrial, commercial, or scientific equipment. The 10% rate applies in other cases.
22. The 4.95% rate applies to interest in the case of banks and insurance companies. The 10% rate applies to the aforesaid entities when the payment is carried out by banks. The 15% applies in other cases.

23. No withholding applies when the beneficial owner is a company whose capital is totally or partially divided into shares and controls at least 25% of the capital of the company paying the dividends. The 10% rate applies in other cases.

24. The 5% rate applies to patent royalties and to industrial, commercial, and scientific equipment royalties, the 7% rate applies to trademark royalties, and the 10% rate applies to literary, artistic, and scientific work copyright royalties.

25. The 5% rate applies if the beneficial owner is a company that directly controls at least 10% of the company paying the dividends.

26. The 12% rate applies in the case of royalties, and the 9% rate applies to technical assistance.

27. The 12% rate applies in the case of royalties, and the 10% rate applies to technical assistance.

28. The 10% rate applies when the beneficial owner is a company that holds at least 10% of the capital of the company paying the dividends and has invested in this company not less than the equivalent to USD 100,000. The 15% rate applies in all other cases.

29. The 15% rate applies to royalties, and the 10% rate applies to technical assistance.

30. No withholding applies when the beneficial owner is a company whose capital is totally or partially divided into shares and controls at least 25% of the capital of the company paying the dividends. The 10% rate applies in other cases.

31. The 4.95% rate applies to interest in the case of banks. The 10% rate applies in other cases.

32. The 5% rate applies when the beneficial owner is a company that holds at least 25% of the capital of the company paying the dividends. The 10% rate applies in all other cases.

33. The 10% rate applies to literary, artistic, and scientific work copyright royalties, and the 7% rate applies in other cases.

34. No withholding applies when the beneficial owner is a company that holds at least 25% of the capital of the company paying the dividends. The 10% rate applies in other cases.

35. The 15% rate applies to royalties, and the 10% rate applies to technical assistance.

36. The 5% rate applies if the beneficial owner is a company that owns at least 10% of the voting stock of the company paving the dividends. The 15% rate applies in other cases.

37. The 4.95% rate applies to interest to financial institutions (including insurance companies), and the 10% applies in other cases.

38. The 5% rate applies to industrial, commercial, and scientific equipment royalties, and the 10% rate applies in other cases.

39. The 5% rate applies if the beneficial owner is a company that controls at least 10% of the capital of the company paying the dividends. The 10% rate applies in other cases.

The treaty with Brazil has been published in the Official Gazette and signed by the contracting parties but has not entered into force since diplomatic notes have not been exchanged.

Treaties with additional countries are being negotiated.

**Tax administration**

**Taxable period**

Taxable years may not exceed 12 months, but the first year may be less than 12 months. Taxpayers engaged in commercial, industrial, or service activities may choose a taxable year that does not coincide with the calendar year. A taxpayer that makes such an election may only change it after obtaining prior authorisation from the tax authorities. All other taxpayers are required to conform their taxable year to the calendar year.

**Tax returns**

Final tax returns must be filed within three months following the end of the tax year or at the date indicated on the corresponding calendar for those designated as a ‘special taxpayer’ by the tax authorities. The system is one of self-assessment.

**Payment of tax**

The total amount of tax due must be paid at the time of filing the annual return. Estimated tax payments must be paid consecutively in six monthly instalments. Companies engaged in mining, hydrocarbon exploitation, and related activities must make 12 equal monthly estimated tax payments.
Penalties
Fines for omitted taxes when assessed as a result of tax audits range from 100% to 300% of the omitted tax. The tax authorities generally assess the average fine (200%) unless aggravating or mitigating circumstances apply.

Fines are reduced to 30% if assessment is accepted within a specific timeframe.

Fines are adjusted according to the value of the Tax Unit.

Late payment interest is 1.2 times the average banking lending rate considering the six major banks.

Tax audit process
According to the Master Tax Code, the tax administration is entitled to review the existence of a taxpayer’s liability, whether it has been reported or not. In exercising this power, the tax administration is entitled to obtain and verify information in connection with a determined tax liability. Verifications may be carried out on the basis of available information or on a presumptive basis if concrete information is not available.

Statute of limitations
According to the Master Tax Code, the statute of limitations for tax liabilities is six years starting to run on 1 January of the year following the tax period involved. Regarding taxes that are assessed by periods (e.g. income tax and VAT), it is understood that the taxable event occurs at the end of such period. Exceptionally, the statute of limitations is extended to ten years in any of the following circumstances: (i) the taxpayer fails to declare the taxable event or submit the relevant returns; (ii) the taxpayer does not comply with its obligation to register with the tax administration; (iii) the tax administration was not able to become aware of the taxable event; (iv) the taxpayer has extracted from the country property that is subject to the payment of the tax liability or if the tax liability is related to taxable events occurring abroad; or (v) the taxpayer does not keep its accounting in accordance with the relevant standards.

Topics of focus for tax authorities
Tax audits are generally focused on ‘special taxpayers’. The main subjects of focus of tax audits on corporate taxpayers are related to compliance of formal obligations for direct and indirect taxes and transfer pricing.

Exchange control
In January 2003, the Venezuelan government and the Venezuelan Central Bank (VCB) restricted the free trade of foreign currency and established an Exchange Control Regime, which is currently administered by the VCB and the National Center of Foreign Commerce (CENCOEX). On 10 March 2016, a new dual foreign exchange system was enacted by Exchange Agreement No 35, which provides the following:

- **DIPRO**, a protected exchange rate that is set at VEF 10 to USD 1 for, among other transactions, imports of food, medicines, basic goods for the country, and for payments of the foreign public debt.
- **DICOM** (also called the complementary dollar system), a floating complementary exchange rate that will fluctuate with the market. This system will apply to most other areas, such as sale foreign currency by basic industries and non-oil public entities, international institutions with which international agreements have been entered into, where the DICOM exchange rate will be reduced by 0.25%. It also applies to Venezuelan tourists and, in general, to transactions not specified in Exchange Agreement No 35.
- A reduction of 0.25% will apply to any of the exchange rates applicable to sales of foreign currency derived from hydrocarbon exports and/or sales by the PDVSA derived from financing, financial instruments, cash capital contributions, asset sales, hydrocarbon exports and/or sales, dividends received, debt collection, service provision, and any other sources.
- The Marginal Currency System (SIMADI) provided in Exchange Agreement No 33 dated 10 February 2015, is to continue to operate temporarily until its replacement in a maximum term of 30 days after the enactment of Exchange Agreement No 35.
- Exchange Agreement No 26, which provides for the Supplementary System for the Administration of Foreign Currency (SICAD) auction process at the awarded exchange rate carried out on a call-to-tender basis, limited to entities and sectors specified in the invitations to tender, was not abrogated.

The Law on the Currency Exchange Regime and Currency Exchange Violations is in effect, thereby establishing the actions that constitute exchange crimes and their respective penalties. Said penalties may be both criminal and pecuniary.
Significant developments

As of 1 January 2016, the standard corporate income tax (CIT) rate has been reduced from 22% to 20%.

Some of the other recent changes to the tax system have focused on easing the administrative burden placed on companies (e.g. the requirements for quarterly corporate tax filing and the submission of excessive supporting documents with value-added tax [VAT] returns have been relaxed).

CIT reductions and other favourable legislative changes in recent years are impacting the state budget and leading to strong audit and enforcement activities. A focus point of tax audits has been tax incentives.

Vietnam’s transfer pricing environment continues to develop, with a steady increase in tax audit activity in this area. In late 2015, specialist transfer pricing teams were established in the tax authorities in four key provinces (Ho Chi Minh City, Hanoi, Binh Duong, Dong Nai), which will be tasked, inter alia, with conducting transfer pricing focused investigations of companies, as well as dealing with Mutual Agreement Procedure cases and Advance Pricing Agreements (APAs). Vietnam’s APA regime continues to emerge, with three official submission made to date (all bilateral) and these now being under review.

An amended law on VAT, special sales tax (SST), and tax administration was approved in April 2016 and becomes effective from 1 July 2016. A welcome change is the interest on late tax payment reduces from 0.05%/day to 0.03%/day (approximately from 18% to 11% per annum). Less favourable changes include a tougher anti-avoidance rules for SST purposes, which will result in a higher taxable price in many instances, and the removal of the ability to obtain VAT refunds where taxpayers have accumulated input VAT outstanding for 12 months or more (except for exporters and taxpayers that have new investment projects). Detailed guidance on changes is in process.

Please note that Vietnam and the United States (US) have signed a tax treaty. While the treaty is still to be ratified in each country, it will likely be an incentive to direct investment from the United States.

Taxes on corporate income

Standard rates

All taxes are imposed at the national level. The standard CIT rate is 20% as of 1 January 2016 (previously 22%). Enterprises operating in the oil and gas industry are subject to CIT rates ranging from 32% to 50%, depending on the location and specific project conditions. Enterprises engaging in prospecting, exploration, and exploitation of
mineral resources (e.g. silver, gold, gemstones) are subject to CIT rates of 40% or 50%,
depending on the project’s location.

There is no concept of tax residency for CIT. Business organisations established under
the laws of Vietnam are subject to CIT and taxed on worldwide income. 20% CIT shall be
applicable to foreign income. There are no provisions for tax incentives for such income.

Foreign organisations carrying out business in Vietnam without setting up a legal entity
in Vietnam and/or having Vietnam-sourced income are considered foreign contractors,
irrespective of whether the services are performed inside or outside Vietnam. Payments
to foreign contractors are subject to Foreign Contractor Tax (FCT), which consists of VAT
and CIT elements. See the Withholding taxes section for more information.

**Preferential rates**
Preferential CIT rates of 10%, 15%, and 17% are available where certain criteria are met.
See the Tax credits and incentives section for more information.

**Calculation of taxable profits**
Taxable profit is the difference between total revenue, whether domestic or foreign
sourced, and deductible expenses (see the Deductions section), plus other assessable
income.

Taxpayers are required to prepare an annual CIT return that includes a section for
making adjustments between accounting profits and taxable profits.

**Local income taxes**
There are no local, state, or provincial income taxes in Vietnam.

**Corporate residence**
There is no concept of tax residency for CIT. Enterprises established under the law
of Vietnam are subject to CIT in Vietnam. In addition, Vietnam has a broadly worded
‘permanent establishment’ definition.

**Permanent establishment (PE)**
In Vietnam, a PE is defined as “a fixed place of business through which a foreign
enterprise carries out part or the whole of its business or production activities in
Vietnam. The PE of a foreign enterprise shall include:

- A branch, an operating office, a factory, a workshop, means of transportation, a mine,
an oil and gas field, or any place relating to the exploitation of natural resources in
Vietnam.
- A building site; a construction, installation, or assembly project.
- An establishment providing services, including consultancy services, through its
employees or other persons.
- An agent for a foreign enterprise.
- A representative in Vietnam where [one] has authority to sign contracts under
the name of the foreign enterprise, or where [one] does not have authority to sign
contracts under the name of the foreign enterprise but regularly delivers goods or
provides services in Vietnam.”

Foreign enterprises with their PEs in Vietnam shall pay tax on the taxable income earned
in Vietnam (irrespective of whether it relates to the PE) and on the taxable income
generated out of Vietnam and related to operations of the PEs.
Vietnam

Where a treaty on avoidance of double taxation to which Vietnam is a signatory contains different provisions relating to PE, such treaty shall apply (see the Withholding taxes section for a list of countries with which such treaties exist).

**Other taxes**

**Value-added tax (VAT)**

VAT applies to goods and services used for production, trading, and consumption in Vietnam (including goods and services purchased from non-residents), with certain exemptions. Depending on the category of goods or services, the VAT rates are as follows:

- A 0% rate applies to exported goods/services, including goods sold to overseas/non-tariff areas and consumed outside Vietnam/in the non-tariff areas, goods processed for export or in-country export (subject to conditions), goods sold to duty free shops, certain exported services, construction and installation carried out for export processing enterprises, and aviation, marine, and international transportation services.
- A 5% rate applies generally to areas of the economy concerned with the provision of essential goods and services. This includes clean water, teaching aids, books, unprocessed foodstuffs, medicine and medical equipment, husbandry feed, various agricultural products and services, technical/scientific services, rubber latex, sugar and its by-products, social housing, and certain cultural, artistic, and sport services/products.
- The 10% 'standard' rate applies to activities not specified as exempt or subject to the 0% or 5% rate.

**Activities not subject to output VAT**

A separate category includes supplies not subject to output VAT, but related input VAT can, nevertheless, be claimed. This category includes the following:

- Compensation, bonus, subsidies (except those provided in exchange for certain services).
- Transfers of emission rights and various financial revenues.
- Certain services rendered by a foreign organisation that does not have a PE in Vietnam where the services are rendered outside of Vietnam, including repairs to means of transport, machinery, or equipment, advertising, marketing, promotion of overseas investment and trade, brokerage activities for the sale of overseas goods and services, training, and certain international telecommunication services.
- Sales of assets by non-business organisations or individuals not registered for VAT.
- Transfer of investment projects.
- Sale of agricultural products that have not been processed into other products or have only been through preliminary processing.
- Capital contributions in kind.
- Certain asset transfers between a parent company and its subsidiaries or between subsidiaries of the same parent company.
- Collections of compensation/indemnities by insurance companies from third parties.
- Collections on behalf of other parties that are not related to the provision of goods/services (e.g. if company A purchases goods/services from company B but pays to company C, and, subsequently, company C pays to company B, then the payment from company C to company B is not subject to VAT).
- Commissions earned by (i) agents selling services, including postal, telecommunications, lottery, airlines/bus/ship/train tickets, at prices determined by principals; and (ii) agents for international transportation, airlines, and shipping services entitled to 0% VAT; or (iii) insurance agents.
- Commissions from the selling of exempt goods/services.
- Lending or return of machinery, equipment, goods.
• Goods exported and then re-imported back to Vietnam due to sales returns by overseas customers.

**Exempt goods and services**
There are stipulated categories of VAT exemptions, including goods/services provided by individuals having annual revenue of 100 million Vietnamese dong (VND) or below, transfer of land use rights, various financial services, capital assignments, certain types of insurance, medical services, education, printing/publishing, public transportation, export of unprocessed natural resources, etc.

When a supply cannot be readily classified based on the tax tariff, VAT must be calculated based on the highest rate applicable for the particular range of goods that the business supplies.

Taxpayers must file VAT returns on a monthly basis by the 20th day of the subsequent month or on a quarterly basis by the 30th day of the subsequent quarter (for companies with prior year annual revenue of VND 50 billion or less).

**Customs duties**
Import duty rates are classified into three categories: ordinary rates, preferential rates, and special preferential rates.

Preferential rates are applicable to imported goods from countries that have most-favoured-nation (MFN, also known as normal trade relations) status with Vietnam. The MFN rates are in accordance with Vietnam’s World Trade Organization (WTO) commitments and are applicable to goods imported from other member countries of the WTO.

Special preferential rates are applicable to imported goods from countries that have a special preferential trade agreement with Vietnam. Vietnam has such free trade agreements with various countries, including the ASEAN member states, Japan, China, India, Korea, Chile, Australia, and New Zealand, and has finished conclusion of negotiations with the Customs Union of Russia, Belarus, Kazakhstan.

Import duty exemptions are provided for encouraged projects and goods imported in certain circumstances.

Export duties are charged only on a few items, basically certain natural resources. Rates range from 0% to 40%.

**Special sales tax (SST)**
SST is a form of excise tax that applies to selected goods and services (see below). For goods, SST is charged at the production or importation stage. Imported goods (except for various types of petrol) are subject to SST at both import and selling stages. The SST paid at importation will be creditable against SST paid at the selling stage.

The SST rates are as follows:

<table>

**Property taxes**

Foreign investors generally pay rental fees for land use rights. The range of rates is wide depending upon the location, infrastructure, and the industrial sector in which the business is operating.

In addition, owners of houses and apartments have to pay land tax under the law on non-agricultural land use. The tax is charged on the specific land area used based on the prescribed price per square metre at progressive tax rates ranging from 0.03% to 0.15%.

**Stamp taxes**

Certain assets, including houses, land, automobiles and motorcycles, etc., that are subject to registration of ownership are subject to stamp duty. The stamp duty rates vary depending on the asset transferred.

**Natural resources tax (NRT)**

NRT is payable by industries exploiting Vietnam’s natural resources, such as petroleum, minerals, forest products, seafood, and natural water. Natural water used for agriculture, forestry, fisheries, salt industries, and sea water for cooling purposes may be exempt from NRT, provided that certain conditions are satisfied. The tax rates vary depending on the natural resource being exploited, ranging from 1% to 40%, and are applied to the production output at a specified taxable value per unit. Various methods are available for the calculation of the taxable value of the resources, including cases where the commercial value of the resources cannot be determined. Crude oil, natural gas, and coal gas are taxed at progressive tax rates depending on the daily average production output.

**Environment protection tax (EPT)**

EPT is an indirect tax that is applicable to the production and importation of certain goods deemed detrimental to the environment, the most significant of which are petroleum and coal. The tax is calculated as an absolute amount on the quantity of the goods.
The tax rates are as follows:

<table>
<thead>
<tr>
<th>Goods</th>
<th>Unit</th>
<th>Tax range (VND)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Petrol, diesel, grease, etc.</td>
<td>litre/kg</td>

<td>kg</td>
<td>500 to 1,000</td>
</tr>
</tbody>
</table>

* Excludes plastic bags used for packaging or that are ‘environmentally friendly’.

**Payroll taxes**

**Social insurance (SI) contributions**
The level of compulsory SI contribution is 26% of total salary, of which 18% is the employers’ obligation and the remaining 8% is the employees’ obligation. The salary subject to SI contribution is the salary stated in the labour contract, but is capped at 20 times the minimum regional salary (the minimum salary is currently VND 1,150,000 and the minimum regional salary varies from VND 2,150,000 to VND 3,100,000, depending on each region; these minimum salaries are subject to change).

**Health insurance (HI) contributions**
HI contribution rates are 4.5% of total salary, with two-thirds contributed by the employer and one-third by the employee.

**Unemployment insurance (UI) contributions**
The employer and employee UI contributions are 1% on gross salary each. The employee contribution is capped at 20 times the minimum salary.

**Branch income**
Branches of foreign entities are subject to the same CIT regime as entities incorporated in Vietnam.

**Income determination**

**Inventory valuation**
At present, there are no provisions for valuing inventories or determining inventory flows. The tax treatment follows the accounting treatment.

**Asset revaluation**
Gains from the revaluation of assets for the purposes of capital contribution or transfer upon division, demerger, consolidation, merger, or conversion of business are subject to the standard CIT rate.

**Capital gains**
Gains made by a foreign investor on the transfer of an interest (as opposed to shares) in a limited liability company are subject to the standard CIT rate. The assignee is required to withhold the tax due from the payment to the assignor and account for this to the tax authorities.

Gains earned by a foreign investor from selling securities (i.e. bonds, shares of public joint-stock companies, irrespective of whether they are listed or non-listed) are subject to CIT at a deemed rate of 0.1% of the sales proceeds. The standard CIT rate will apply
to any gains earned by a foreign company (not incorporated in Vietnam) upon a sale of shares in a non-public joint-stock company.

**Dividend income**
Dividends received from investments in other companies in Vietnam are from after tax profits and are not subject to CIT.

**Interest income**
Interest income is subject to the standard CIT rate and is not entitled to tax incentives (including preferential tax rate and exemption/reduction).

**Other significant items**
The following other income items are subject to the standard CIT rate and are not entitled to tax incentives (including preferential tax rate and exemption/reduction):

- Income from transfer of real estate.
- Income from royalty, leasing of assets.
- Income from transfer of assets.
- Income from trading of foreign currency.
- Reversal of provisions, except for reversal of provisions for inventory devaluation, financial investment loss, bad debts, warranties, and salary.
- Collected written-off debts.
- Unidentified payables.
- Difference between penalties and compensation for breaching economic contracts.
- Gain from the revaluation of assets.
- Income from the transfer of projects and the rights to exploit, explore, and process minerals.
- Income from selling scrap, which is not directly related to tax incentivised activities.
- Exchange gains on revaluation of payables denominated in foreign currencies at the end of the fiscal year.

**Foreign income**
Foreign income, under the domestic tax law, is subject to the standard CIT rate with tax credits available (see Foreign tax credit in the Tax credits and incentives section).

Foreign income shall be taxed when earned. There are no provisions for tax deferral or preferential tax rates for foreign income.

**Deductions**

**Depreciation and amortisation**
Tax depreciation may differ from accounting depreciation. Depreciation in excess of the rates specified in the regulations on tax depreciation is not deductible. These regulations specify maximum and minimum permissible effective lives for various classes of assets, including intangibles. Current straight-line tax depreciation rates are as follows:

<table>
<thead>
<tr>
<th>Assets</th>
<th>Rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Buildings</td>
<td>2 to 16.67</td>
</tr>
<tr>
<td>Office equipment</td>
<td>10 to 20</td>
</tr>
<tr>
<td>Automobiles</td>
<td>3.33 to 16.66</td>
</tr>
<tr>
<td>Machinery and equipment</td>
<td>5 to 33.33</td>
</tr>
<tr>
<td>Intangible assets</td>
<td>Not more than 5</td>
</tr>
<tr>
<td>Goodwill</td>
<td>33.33</td>
</tr>
</tbody>
</table>
**Start-up expenses**
Pre-establishment expenses (i.e. expenses for setting up a company) and certain expenses (i.e. training, advertising before establishment, costs for the research stage, relocation cost) can be amortised over a period of up to three years from the commencement of operations. In order for pre-establishment and pre-operating expenses to be deductible for CIT purposes, supporting documents to substantiate the fact that these pre-operating expenses were necessarily and legitimately incurred for the establishment of the company should be available.

**Interest expenses**
Interest on loans corresponding to the portion of charter capital not yet contributed as scheduled is not deductible.

Interest on loans from non-economic and non-credit organisations exceeding 1.5 times the interest rate set by the State Bank of Vietnam is not deductible.

**Bad debt**
Provisions for bad debts are deductible if the provision is made in accordance with the guidance by the Ministry of Finance. Certain conditions must be satisfied in order to set up a provision for bad debts (e.g. the debts must be supported by original documentation, there must be confirmation from clients of the overdue amounts, the debts must be overdue under the terms of an economic contract). In the absence of satisfying the necessary conditions, the provision for bad debts will generally not be deductible until incurred and supported by invoices.

**Charitable contributions**
Donations are generally non-deductible, except certain donations for education, health care, natural disasters, building charitable homes for the poor, or scientific research.

**Fines and penalties**
Administrative penalties and fines are specifically considered non-deductible.

**Taxes**
Creditable input VAT, CIT, and other fees/charges are not deductible for CIT purposes.

**Other significant items**
The following other expenditures are specifically stated to be non-deductible:

- Employee remuneration expenses that are not actually paid or are not stated in a labour contract, collective labour agreement, or the financial regulations of the company.
- Staff welfare (including certain benefits provided to family member of staff) exceeding a cap of one month's average salary.
- Provisions for severance allowance (except for companies not subject to mandatory unemployment insurance contributions) and payments of severance allowance in excess of the prescribed amount per the Labour Code.
- Contributions to voluntary pension funds and the purchase of voluntary pension for employees exceeding VND 1 million per month per person.
- The portion of costs of raw materials, materials, fuel, or goods that are used in excess of reasonable consumption levels.
- Reserves for research and development (R&D) that is not in accordance with the prevailing regulations.
- Provisions for stock devaluation, bad debts, financial investment losses, product warranties, or construction work that are not in accordance with the prevailing regulations.
- Unrealised foreign exchange gain/losses due to the revaluation of foreign currency items other than account payables at the end of a financial year.
Vietnam

- Management expenses allocated to PEs in Vietnam by the foreign company's head office that are not in accordance with the regulations.
- Certain expenses directly related to the issuance, purchase, or sale of shares.

From 2015, the cap on the tax deductibility of advertising and promotion (A&P) expenses has been abolished.

For certain businesses (e.g. insurance companies, securities trading, lotteries), the Ministry of Finance provides specific guidance on deductible expenses for CIT purposes.

**Net operating losses**
Losses may be carried forward fully and consecutively for a maximum of five years. Carryback of losses is not permitted.

**Payments to foreign affiliates**
There are no special restrictions on the deductibility of royalties, loan interest, and service fees paid to foreign affiliates (except for those paid by branches). However, the payment must be defendable on an arm's-length basis as required by transfer pricing regulations (see Transfer pricing in the Group taxation section). Certain contracts for the transfer of technology and foreign loans must be registered with the competent authorities.

**Group taxation**
There is no provision for any form of consolidated filing or group loss relief in Vietnam.

**Transfer pricing**
Vietnam has transfer pricing regulations that outline various situations where transactions will be considered as being between related parties and the mechanisms for determining the market ‘arm’s length’ transaction value (e.g. comparable uncontrolled price, cost plus, resale price, comparable profits, profit split).

Under the wide ranging definition of associated parties, the control threshold is lower than in many other countries (20%), and the definition also extends to certain significant supplier, customer, and funding relationships between otherwise unrelated parties. Vietnam’s transfer pricing rules also extend to domestic related-party transactions.

Compliance requirements include an annual declaration of related-party transactions and transfer pricing methodologies used, which is required to be filed together with the annual CIT return.

Companies that have related-party transactions must prepare and maintain contemporaneous transfer pricing documentation, which is required to be submitted to the tax authorities within 30 working days of a request, in Vietnamese. There are no de minimis rules for documentation.

All Vietnamese taxpayers with related-party transactions (including domestic transactions) can apply for an Advance Pricing Agreement (APA) to cover either one or more of their transactions with related parties.

**Thin capitalisation**
There are no thin capitalisation requirements in the tax legislation. However, the level of permitted debt funding will be limited by virtue of licensing requirements. The maximum amount of debt funding is the difference between the licensed investment capital and charter capital.
Controlled foreign companies (CFCs)
Vietnam does not have any CFC legislation.

Tax credits and incentives

Foreign tax credit
In respect of Vietnamese enterprises earning income from overseas investment, CIT (or a kind of tax with a nature similar to CIT) paid in a foreign country or paid on behalf by its partner in the country receiving the investment (including tax levied on the dividend) is allowed to be creditable. The credit shall not exceed the CIT amount payable in Vietnam.

The foreign income tax that is entitled to exemption or reduction in accordance with the foreign law shall also be credited.

Inbound investment incentives
Tax incentives are granted based on regulated encouraged sectors, encouraged locations, and size of the projects. The sectors that are encouraged by the Vietnamese government include education, health care, sport/culture, high technology, environmental protection, scientific research, infrastructural development, and computer software manufacturing. The encouraged locations include qualifying economic and high-tech zones, certain industrial zones, and difficult socio-economic areas. Large manufacturing projects with investment capital of more than VND 6 trillion disbursed within three years of being licensed can also qualify for CIT incentives if:

- the minimum revenue is VND 10 trillion per annum by the fourth year of operations at the latest, and
- the minimum headcount is 3,000 by the fourth year of operations at the latest.

The preferential incentive rate applied for large manufacturing projects can be extended for a maximum additional 15 years if the project manufactures goods having ‘international competitiveness’ whose revenue exceeds VND 20,000 billion per annum within five years from the first year of revenue generation, or whose average head count is over 6,000.

Large manufacturing projects include projects with investment capital of VND 12 trillion or more, disbursed within five years of being licensed (excluding those related to the manufacture of products subject to special sales tax or those exploiting mineral resources) and using technologies appraised in accordance with relevant laws.

Further, new investment projects engaging in manufacturing industrial products prioritised for development will be entitled to CIT incentives if the products support:

- the high technology sector, or
- the garment, textile, and footwear; information technology (IT); automobiles assembly; or mechanics sector and were not produced domestically as of 1 January 2015, or, if produced domestically, they meet the quality standards of the European Union (EU) or equivalent.

The two preferential rates of 10% and 17% for 15 years and 10 years, respectively, are available starting from the commencement of operating activities. From 1 January 2016, enterprises entitled to the pre-2016 preferential CIT rate of 20% will enjoy the rate of 17% instead. When the preferential rate expires, the CIT rate reverts to the standard rate. Certain socialised sectors (e.g. education, health) enjoy the 10% rate for the life of the project.

Business expansion projects are now entitled to CIT incentives if any of the following criteria are met:
Vietnam

- Additional fixed assets costing at least VND 20 billion (or VND 10 billion if the projects are in certain specified regions with difficult socio-economic conditions) are invested.
- There is at least a 20% increase in the value of fixed assets compared with the period before expansion.
- There is at least a 20% increase in the designed capacity compared with the period before expansion.

Investment projects are allowed to access more favourable tax incentives available under an amended or new law on CIT for the remaining project period, from tax year 2015. This entitlement is specifically applicable to the following cases:

- Expansion projects licensed or implemented during the period from 2009 to 2013 that were not previously entitled to any CIT incentives.
- Investment projects commencing operations in industrial zones during the period from 2009 to 2013 that were not previously entitled to any CIT incentives.
- Investment projects located in areas that were not previously designated as encouraged.

**Tax holidays**

Investors may be considered for tax holidays and reductions. The holidays take the form of a complete exemption from CIT for a certain period beginning immediately after the enterprise first makes profits, followed by a further period where tax is charged at 50% of the applicable rate. However, where the enterprise has not derived profits within three years of the commencement of operations, the tax holidays/tax reduction will start from the fourth year of operation. Criteria for eligibility to these holidays and reductions are set out in the CIT regulations as follows:

- Four years of tax exemption and nine subsequent years of 50% reduction shall be applied to:
  - Income earned by enterprises carrying out new investment projects entitled to 10% CIT.
  - Income earned by enterprises carrying out new investment projects in the socialised sectors and difficult socio-economic areas.
- Four years of tax exemption and 50% tax reduction for five subsequent years shall be given to income earned by enterprises carrying out new investment projects in the socialised sectors and in regions not included in the list of difficult socio-economic areas.
- Two years of tax exemption and four subsequent years of 50% reduction shall be applied to:
  - Income earned by enterprises from carrying out new investment projects in regions with difficult socio-economic conditions.
  - Income earned by enterprises from carrying out new investment projects, including production of high-grade steel, production of energy saving products, production of machinery or equipment used to serve agricultural, forestry, fishery, or salt production, production of irrigational equipment, production and refinement of foodstuff for cattle, poultry, or aquatic products, and development of traditional trades.
  - Income earned by enterprises that carry out new investment projects in industrial zones (except for industrial zones located in regions with favourable socio-economic conditions).

**Employment incentives**

Additional tax incentives may be available for engaging in manufacturing, construction, and transportation activities that employ several female staff and/or ethnic minorities. CIT reduction must correspond with the actual payment for those employees.
Research and Development (R&D) Fund
Business entities in Vietnam are allowed to set up a tax deductible R&D Fund. Enterprises can appropriate up to 10% of annual profits before tax to the fund. Various conditions apply.

Withholding taxes
Foreign Contractor Tax (FCT) is withheld on payments to foreign contractors.

Payments to foreign contractors
FCT on payments to foreign contractors applies where a Vietnamese contracting party (including a foreign-invested enterprise incorporated in Vietnam) contracts with a foreign party that does not have a licensed presence in Vietnam, irrespective of whether the services are provided in Vietnam or overseas.

This FCT generally applies to payments derived from Vietnam, except for the pure supply of goods (i.e. where the responsibility, cost, and risk relating to the goods passes at or before the border gate of Vietnam and there are no associated services performed in Vietnam), services performed and consumed outside Vietnam, and various other services performed wholly outside Vietnam (e.g. certain repairs, training, advertising, promotion).

In addition, certain distribution arrangements where foreign entities are directly or indirectly involved in the distribution of goods or provision of services in Vietnam are subject to FCT (e.g. where the foreign entity retains ownership of the goods; bears distribution, advertising, or marketing costs; is responsible for the quality of goods or services; makes pricing decisions; or authorises/hires other Vietnamese entities to carry out part of the distribution of goods/provision of services in Vietnam).

Foreign contractors can apply to be deduction-method VAT payers if they adopt the Vietnamese accounting system. If accounting records are adequate, the foreign contractor will pay CIT on actual profits, but otherwise on a deemed-profit basis.

For direct (non-deduction-method) foreign contractors, VAT and CIT will be withheld by the contracting party at deemed rates. Various rates are specified according to the nature of the contract performed. For CIT, the FCT rate varies from 0.1% to 10%. For VAT, the FCT rate can also range from 3% to 5%. The VAT withheld by the contracting party is an allowable input credit in its VAT return.

A summary of VAT and CIT FCT rates follow:

</tbody>
</table>

Notes

1. VAT will not be payable where goods are exempt from VAT or where import VAT is paid.
2. Where the contract does not separate the value of goods and services.
3. The supply of goods and/or services to the oil and gas industry is subject to the standard 10% VAT rate. Certain goods or services may be VAT exempt or subject to 5% VAT.
4. Where aircraft and vessels cannot be manufactured in Vietnam.
5. International transportation is subject to 0% VAT.
6. Software licences, transfer of technology, and transfer of intellectual property (IP) rights are VAT exempt.
7. Certain types of insurance are exempt from VAT (see Exempt goods and services under VAT in the Other taxes section).

Interest

The FCT applied to interest payments to an overseas lender is 5%. Interest on pre-1999 loans may be exempt from FCT. Offshore loans provided by certain government or semi-governmental institutions may obtain an exemption from the interest FCT where a relevant double tax agreement (DTA) or inter-government agreement (IGA) applies.

Interest earned from bonds (except for tax-exempt bonds) and certificates of deposit are subject to 5% FCT. The sale of bonds and certificates of deposits are subject to deemed tax of 0.1% of the gross sales proceeds.

Royalties, licence fees, etc.

A 10% royalty FCT applies in the case of payments made to a foreign party for transfers of technology or software licence, unless the transfers are contributed as part of legal capital (akin to equity). Transfers of technology are defined very broadly. Certain contracts for the transfer of technology must be registered with the competent authorities.

Management fees and head office charges

FCT applies on management fees and head office charges at the rates applicable to services (see above).

Cross-border leases

A Vietnam-based lessee is required to withhold tax from payments to an offshore lessor. 5% VAT and 5% CIT is applicable to the rental charge if it is an operating lease. If it is a finance lease, the interest portion will be exempt from VAT and subject to 10% CIT.

Tax treaties

The above FCT rates may be affected by a relevant DTA.

Notes

1. The treaty is not yet in force.
2. In most cases, the limits set by the DTA are higher than the present FCT rates under domestic law; consequently, the domestic rates will apply.
3. Interest derived by certain government bodies is exempt from FCT.
4. Royalty FCT rates vary for certain types of royalties.

**Tax administration**

**Taxable period**
The standard tax year is the calendar year. However, different accounting year-ends can be used if approval is obtained from the authorities.

**Tax returns**
The annual final CIT return and the audited financial statements must be filed within 90 days from the end of the financial year.

**Payment of tax**
Enterprises are required to make quarterly provisional CIT payments (no later than the 30th day of the next quarter) based on estimates. If the provisional quarterly CIT payments account for less than 80% of the final CIT liability, the shortfall in excess of 20% is subject to late payment interest (currently as high as 18% per annum), counting from the deadline for payment of the fourth quarter CIT liability.

Final payment of CIT is due with the final CIT return (i.e. the 90th day of the following financial year).

**Penalties**
There are detailed regulations setting out penalties for various tax offences. These range from relatively minor administrative penalties to tax penalties amounting to various multiples of the additional tax assessed.

In practice, imposition of penalties has been arbitrary and inconsistent. However, in recent periods there has been a much tougher stance adopted by the tax authorities. Hence, where tax is paid late (e.g. as a result of a tax audit investigation), there is a significant likelihood of penalties being imposed.
**Tax audit process**
Tax audits are carried out regularly and often cover a number of tax years. Prior to an audit, the tax authorities send the taxpayer a written notice of time and scope of the audit inspection.

**Statute of limitations**
The general statute of limitations for imposing tax is ten years (effective 1 July 2013) and for penalties is five years. Where the taxpayer does not register for tax or commits evasion liable to criminal prosecution, the tax authorities can collect unpaid tax and penalties at any time.

**Topics of focus for tax authorities**

**Transfer pricing**
Transfer pricing is commonly discussed in the press, and the enterprises that are attracting the attention of the tax authority are generally multinational companies that have many inter-company transactions, have reported losses for many years, and/or are expanding businesses.

**Documentation of expenses**
The tax authorities are strictly reviewing the documentation of expenses, including contracts, invoices, evidence of work done/benefit received, etc. Insufficient documentation is resulting in disallowance of input VAT credit/refund and CIT deductibility.

**FCT on supply of goods**
The customs authority has been requested to provide the tax authority with information of companies engaged in in-country import/export transactions in an effort to collect under-declared FCT arising from these transactions. In addition, there are some tax rulings issued by the tax authority stating that existence of a warranty clause in a contract for the supply of goods by foreign suppliers, irrespective of whether the warranty services have been actually provided, creates an FCT exposure.

**Secondment arrangements**
We have seen the tax authority seek to impose FCT on reimbursements of expatriate remuneration costs by Vietnamese entities. Companies need to ensure that supporting documents are available to show amounts have been reimbursed at cost.

**Other issues**

**Foreign investment restrictions**
In several fields, foreign investment will not be licensed or will only be licensed under special conditions. The List of Conditional Investment Sectors include television, production and publishing cultural products, telecommunication, transportation by all means, cigarette production, exploring and processing natural resources, real-estate business, education, and medical services and distribution.

**Exchange controls**
All buying, selling, lending, and transfer of foreign currency needs to be made through credit institutions and other financial institutions authorised by the State Bank of Vietnam (SBV).

Outflow of foreign currency by transfer is authorised for certain transactions, such as payments for imports and services abroad, refund of loans contracted abroad and payment of interest accrued thereon, transfer of profits and dividends, and revenues from transfer of technology.
Vietnam

All monetary transactions in Vietnam must be undertaken in Vietnamese dong. Exceptions are applicable to payments for exports made between principals and their agents, and payments for goods and services purchased from institutions authorised to receive foreign currency payments such as for air tickets, shipping and air freight, insurance, and international communications.

**Forms of doing business**
According to the Law on Enterprises, a foreign-invested enterprise may be established as either a single member limited liability or a limited liability with more than one member, a joint-stock company, or a partnership.

**Intellectual property (IP)**
IP rights are protected by the Civil Code (1995 and 2005), the Law on Intellectual Property (2005), and a host of subordinate legislation.

Vietnam is signatory to the Paris Convention, the Madrid Agreement on International Trademark Registration, and the Patent Cooperation Treaty, and is a member of the World Intellectual Property Organisation. Vietnam has entered into an agreement on copyrights with the United States. According to the Vietnam-US Bilateral Trade Agreement, Vietnam is further under the obligation to adhere to the Berne Convention.
**Significant developments**

Since the 2016 Budget, the following measures have been put in place:

- Capital allowances for implements, plant, and machinery used in the generation of electricity have been increased from 25% to 50% with effect from 1 January 2016.
- The carryover period of losses for entities involved in the generation of electricity using wind and solar power, excluding wood, has been extended from five years to ten years.
- A holder of a mining licence shall pay a mineral royalty at the rate of 9% for open cast mining operations and 6% for underground mining operations. For more information, see Mineral Royalty Tax in the Taxes on corporate income section.
- With effect from 1 July 2015, the corporate income tax (CIT) rate for mining operations has increased from 0% to 30%, with a variable profit tax of up to 15%. This effectively re-instates the CIT position applying before 1 January 2015.
- CIT applicable on mineral processing companies was revised from 30% to 35%, and variable profit tax on mineral processing was abolished.
- From 1 January 2016, Property Transfer Tax (PTT) will apply at the rate of 5% of the realised value in respect of land and shares. This was previously 10%.
- From 1 January 2016, withholding tax (WHT) will apply at 15% on management and consultancy services provided by resident consultants. This was previously 0%.

**Taxes on corporate income**

Under the Income Tax Act, Zambia has a source-based system for the taxation of income. Income deemed to be from a Zambian source is generally subject to Zambian income tax. Zambian residents are also subject to income tax on interest and dividends from a source outside Zambia.

A non-Zambian resident enterprise with a Zambian permanent establishment (PE) will be subject to CIT on its Zambian-source income. If there is no PE, Zambian-source income of the non-Zambian resident may still be subject to WHT (see the Withholding taxes section).

The standard CIT rate applicable to the income of companies (and other persons other than individuals) is 35%.

The following sources of income are subject to different CIT rates:

<table>
<thead>
<tr>
<th>Source of income</th>
<th>CIT rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Electronic communications networks or service licensees (income in excess of 250,000 Zambian kwacha [ZMW])</td>
<td>40</td>
</tr>
<tr>
<td>Farming</td>
<td>10</td>
</tr>
<tr>
<td>Export of non-traditional products</td>
<td>15</td>
</tr>
<tr>
<td>Production of organic fertiliser and chemical manufacture of fertiliser</td>
<td>15</td>
</tr>
</tbody>
</table>
The rates applicable for mining operations (excluding industrial minerals) are as follows:

<table>
<thead>
<tr>
<th>Tax on mining operations* (excluding industrial minerals**)</th>
<th>1 January 2015 to 30 June 2015</th>
<th>From 1 July 2015</th>
</tr>
</thead>
<tbody>
<tr>
<td>CIT rate</td>
<td>0%</td>
<td>30%</td>
</tr>
<tr>
<td>Additional variable profits rate</td>
<td>0%</td>
<td>a - (ab/c)***</td>
</tr>
</tbody>
</table>

The rates applicable for mining operations for industrial minerals are as follows:

<table>
<thead>
<tr>
<th>Tax on mining operations* for industrial minerals</th>
<th>1 January 2015 to 30 June 2015</th>
<th>From 1 July 2015</th>
</tr>
</thead>
<tbody>
<tr>
<td>Additional variable profits rate</td>
<td>a - (ab/c)***</td>
<td>a - (ab/c)***</td>
</tr>
</tbody>
</table>

The CIT rate of 35% is applicable on income from mineral processing****.

Notes

* Mining operations means an operation carried out under a mining right, excluding an operation carried out under a mineral processing licence only or an exploration licence.

** Industrial minerals include rocks or minerals other than gemstones, base metals, energy minerals, or precious metals used in their natural state or after physical or chemical transformation, including barites, dolomite, feldspar, fluor spar, graphite, gypsum, ironstone when used as a fluxing agent, kyanite, limestone, pyrophyllite, salt, sand, clay, talc, laterite, gravel, potash, potassium minerals, granite, marble, clay, silica, diatomite, kaolin, bentonite, or quartz.

*** a = 15%; b = 8%; and c = the percentage ratio of the assessable income to gross sales.

**** Mineral processing means the practice of beneficiating or liberating valuable minerals from their ores, which may combine a number of unit operations, such as crushing, grinding, sizing, screening, classification, washing, froth floatation, gravity concentration, electrostatic separation, magnetic separation, leaching, smelting, refining, calcining, and gasification or any other processes incidental thereto.

Reductions in CIT rates apply to a company operating under a priority sector declared under the Zambian Development Agency Act (ZDA Act), 2006.

Reduced CIT rates apply in some other cases, including certain companies listed on the Lusaka Stock Exchange.

**Mineral Royalty Tax**

From 1 January 2016, Mineral Royalty Tax applies to holders of mining licences as follows:

<table>
<thead>
<tr>
<th>Description</th>
<th>Rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>On norm value of minerals/precious metals under licence:</td>

</tr>
</tbody>
</table>
**Description**

<table>
<thead>
<tr>
<th>Description</th>
<th>Rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Open cast mining operations</td>
<td>9</td>
</tr>
</tbody>
</table>

**Local income taxes**

There are no income taxes imposed by the local authorities on businesses.

**Corporate residence**

A person other than an individual will be resident in Zambia if it is incorporated or formed under the laws of Zambia or if the central management and control is exercised in Zambia.

**Permanent establishment (PE)**

Broadly, a non-Zambian resident may have a Zambian PE if it has a fixed place of business in Zambia or if it has a dependent agent that has and habitually exercises the authority to conclude contracts in Zambia.

The Zambian definition of a PE is generally similar to the Organisation for Economic Co-operation and Development (OECD) definition and contains a similar list of activities that are included and excluded from the definition of a fixed place of business.

The definition of a PE includes the furnishing of services, including consultancy services, by an enterprise through employees or other personnel present in Zambia for a period or periods exceeding, in aggregate, 90 days in any 12-month period commencing or ending in the fiscal year concerned.

Where a relevant double tax treaty (DTT) is in force, the definition of a PE in the treaty should take precedence over the Zambian domestic legislation in a case where the non-Zambian resident enterprise does not have a PE under the treaty definition.

**Other taxes**

**Value-added tax (VAT)**

The VAT rate is 16% and is applicable to supplies of standard-rated goods and services.

The export of goods from Zambia is zero rated. However, the supply of standard-rated services from a Zambian place of business is subject to VAT at 16% whether the customer is a Zambian resident or a non-Zambian resident.

Standard-rated goods imported to Zambia are subject to import VAT at 16%.

The supply of standard-rated services to customers in Zambia by a non-Zambian supplier is subject to VAT. The non-Zambian supplier can appoint a local tax agent to account for this as output VAT; this procedure enables the Zambian customer to reclaim the corresponding input VAT. Otherwise, the Zambian VAT-registered customer would be required to account for the output VAT referred to as 'reverse charge VAT'; in this instance, however, there is no mechanism for the Zambian customer to recover reverse charge VAT.

**Customs duties**

Goods imported into Zambia are generally subject to customs duties.

**Excise taxes**

Certain goods and services, such as alcoholic drinks, tobacco, and mobile communications talk time, are subject to excise duty at the following rates.
Zambia

<table>
<thead>
<tr>
<th>Item</th>
<th>Rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Alcoholic drinks:</td>
<td></td>
</tr>
<tr>
<td>Less than 80% by volume</td>
<td>60</td>
</tr>
<tr>
<td>80% or higher by volume</td>
<td>125</td>
</tr>
<tr>
<td>Tobacco</td>
<td>145</td>
</tr>
<tr>
<td>Telephone airtime</td>
<td>15</td>
</tr>
</tbody>
</table>

**Property taxes**

Zambia does not have a property tax other than Property Transfer Tax (see below).

**Property Transfer Tax (PTT)**

PTT applies to the value of the transfer of land and buildings in Zambia and transfer of shares issued by a company incorporated in Zambia.

The rate of PTT is 5% with effect from 1 January 2016 (previously 10%) and is payable on the open market value (or normal value of shares if greater). The PTT liability is payable by the vendor.

PTT also applies on the transfer of a mining right at the rate of 10%.

**Stamp taxes**

Zambia does not have a stamp tax.

**Turnover taxes**

Turnover tax applies to certain businesses where the turnover is less than ZMW 800,000 per annum. The applicable rate is 3% of turnover. Income that is subject to turnover tax will not be subject to income tax or VAT.

The definition of ‘turnover’ for turnover tax purposes has been amended to clearly exclude interest, rental income, dividends, and royalties.

**Registration taxes**

The Patents and Companies Registration Agency (PACRA) applies a registration fee of 2.5% to increases and reductions in the authorised share capital of companies incorporated in Zambia.

**Payroll taxes**

Employers are required to deduct income tax arising on any emoluments under the ‘Pay As You Earn’ (PAYE) regulations.

**Social security contributions**

Both employers and employees are required to make contributions to the National Pension Scheme Authority (NAPSA). The contribution rate for 2016 is 5% of the employee’s total earnings (a total 10% contribution from both the employer and employee). This contribution is applicable to a maximum of ZMW 843.97 per employee per month (i.e. a total of ZMW 1,687.94 from both the employer and employee per month).

**Provincial/local taxes other than income taxes**

Businesses are required to make contributions to local councils (e.g. Lusaka City Council).

**Branch income**

There is no specific legislation concerning the calculation of branch income.
In general, both Zambian resident companies and Zambian branches are required to prepare financial statements under International Financial Reporting Standards (IFRS). The accounting profit is adjusted to determine taxable profits for each source of income according to the same rules used for determining taxable income of Zambian resident companies. The normal CIT rate applies as described in the Taxes on corporate income section.

WHT applies on profits distributed by branches of foreign companies at the rate of 15%.

Income determination

As noted below, Zambian CIT rules set out a number of sources of income that are subject to CIT. Income from each source is calculated separately, and a CIT liability arises on each source with no ability to offset a loss from one source against income from another source.

Business income

Business gains or profits from a Zambian source are taxable by reference to a charge year. This charge year runs from 1 January to 31 December; however, entities can apply to the Zambia Revenue Authority (ZRA) to have their accounts prepared for a different year end.

Inventory valuation

In calculating business income, IFRS should be followed for CIT purposes, including the determination of stock valuation.

Capital gains

Zambia does not have a capital gains tax, and, except where provided otherwise in the Income Tax Act, capital gains are not subject to tax.

Dividend income

All dividend income (from both Zambian and non-Zambian sources) of a Zambian resident company is subject to CIT as a separate source.

In the case of dividend income received from another Zambian resident company, the WHT deducted on the payment of the dividend should represent the ‘final tax’, and the Zambian resident company receiving the dividend is not subject to an additional CIT liability.

Interest income

All interest income (from both Zambian and non-Zambian sources) of a Zambian resident company is subject to CIT as a separate source.

In the case of interest income from a Zambian source, the taxable amount for the recipient company is inclusive of the WHT deducted on the payment of the interest. The WHT is available as a credit for offset against the final CIT liability of the recipient Zambian resident company.

Rental income

Zambian-source rental income of a Zambian resident company is subject to CIT as a separate source.

WHT arises at 10% on rental payments. This is the final tax for a landlord, which will not be subject to a further CIT liability.
Zambia

Royalty income
Zambian-source royalty income (which is very widely defined for these tax purposes) of a Zambian resident company is subject to CIT as a separate source, together with premiums or any like consideration for the use of any Zambian property.

The taxable amount for the recipient company is inclusive of the WHT deducted on the payment of the royalty. The WHT is available as a credit for offset against the CIT liability of the Zambian resident recipient company.

Partnership income
Where a business is carried on in partnership, the income to which each partner is entitled in a period is ascertained under the Zambian income tax rules, and each partner is assessed and charged separately. Accordingly, a partnership is broadly transparent for Zambian income tax purposes.

Unrealised gains/losses
Unrealised gains are not taxable, and, similarly, unrealised losses are not tax deductible.

Foreign currency exchange gains/losses
Foreign exchange gains are only taxable to the extent that they are revenue rather than capital in nature, in which case they are not taxed until they are realised. Foreign exchange losses are only deductible to the extent that they are revenue in nature and realised. By exception, foreign exchange losses of a capital nature incurred on borrowings used for the building and construction of an industrial or commercial building are deductible.

Other significant items
Other sources of income that are taxed under separate source include annuities and hedging income.

Foreign income
As noted above, Zambia operates a source system of income tax. Zambian residents are only subject to income tax on non-Zambian source dividends and interest income.

There are no specific anti-avoidance rules preventing deferral of non-Zambian source income, although it should be noted that Zambia has a general anti-avoidance rule.

Deductions
Expenses are generally deductible against taxable income from the same source, provided that they are not of a capital nature and are incurred wholly and exclusively for the purposes of a business.

Provisions can only be deducted to the extent that they are specific. Even if a provision complies with IFRS, it will be disallowed (and any reversal of the provision will not be taxed) to the extent it is considered to be general in nature.

Depreciation and amortisation
Depreciation and amortisation are not deductible as they relate to capital expenditure.

Zambia has a system of capital allowances that provides for deductions in ascertaining business income. These are calculated at annual rates on qualifying capital expenditure, which currently apply as follows:
<table>
<thead>
<tr>
<th>Category of qualifying expenditure</th>
<th>Rate of allowance (calculated on a straight-line basis)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Industrial buildings</td>
<td>Investment allowance of 10% *</td>
</tr>
<tr>
<td></td>
<td>Initial allowance of 10% *</td>
</tr>
<tr>
<td></td>
<td>Annual wear and tear allowance of 5% *</td>
</tr>
<tr>
<td>Other commercial buildings</td>
<td>Annual wear and tear allowance of 2%</td>
</tr>
<tr>
<td>Implements, machinery, and plant - farming, manufacturing, tourism, generation of electricity, and leasing</td>
<td>Annual wear and tear allowance of 50%</td>
</tr>
<tr>
<td>Commercial vehicles</td>
<td>Annual wear and tear allowance of 25%</td>
</tr>
<tr>
<td>Non-commercial vehicles</td>
<td>Annual wear and tear allowance of 20%</td>
</tr>
<tr>
<td>Patents, designs, trademarks, and copyrights</td>
<td>Premium allowance on straight-line basis over the life of period for which the right is granted</td>
</tr>
<tr>
<td>Mining expenditure</td>
<td>Mining deductions of 25%</td>
</tr>
<tr>
<td>Farm improvements</td>
<td>Farm improvement allowance of 100%</td>
</tr>
<tr>
<td>Construction and improvement of commercial and industrial buildings by person approved under the ZDA Act (see the Tax credits and incentives section)</td>
<td>Improvement allowance of 100%</td>
</tr>
</tbody>
</table>

* For industrial buildings, the investment allowance and the initial allowance can both be claimed in the year in which the building is put into use, together with the wear and tear allowance for that year.

**Goodwill**

Goodwill is not deductible as it is a capital expense.

**Start-up expenses**

A deduction is allowed for preliminary business expenses in the charge year in which that business commences, provided that the expenditure was incurred within 18 months before the commencement and provided that the expense would have been deductible if it had been incurred after the commencement.

There are special rules for prospecting expenditure in an area in Zambia over which a mining right has been granted. These enable the shareholders of the company undertaking the prospecting to claim a deduction for the prospecting expenditure, provided certain conditions are met.

**Interest expenses**

Interest expenses are deductible, provided that the loan or advance was obtained for capital employed wholly and exclusively for business purposes (or in the production of another source of income).

Note, however, that incidental costs of obtaining finance, such as commitment and guarantee fees and any other incidental costs of a similar nature, are not deductible.

**Bad debt**

A specific bad debt is deductible if it can be proved that it is bad or likely to become bad.

No deduction is allowed for impairment provisions/bad debt incurred by banks and financial institutions for debts that are secured against collateral.

**Charitable contributions**

A payment to a public benefit organisation that is approved by the Zambian government or owned by the Zambian government is deductible.
**Pension expenses**
Payments made by an employer by way of a contribution to an approved fund established for the benefit of employees are deductible. Note that special rules apply for the deductibility of lump sum payments and payments in arrears. Payments to non-approved pension funds are not deductible.

**Payments to directors**
Payments to directors are deductible, provided they are incurred wholly and exclusively for the purposes of a business (or other source of income). A payment could, however, be disallowed if it is deemed to be merely a domestic or personal expense.

**Research and development (R&D) expenses**
All revenue expenditure on experiments or research relating to a business is deductible. A deduction against business income is also allowed for a contribution to a scientific or educational society or institution, which is required to be used solely for industrial research or scientific experimental work connected with the business. However, capital expenditure on research is disallowed unless it qualifies for capital allowances.

**Bribes, kickbacks, and illegal payments**
Bribes, kickbacks, and illegal payments would normally be disallowed on the basis that they are not wholly and exclusively for the purposes of a business.

**Fines and penalties**
A penalty arising under the Income Tax Act is specifically disallowed. Other fines and penalties may be disallowed on the basis that they are not wholly and exclusively for the purposes of a business.

**Taxes**
Zambian CIT is not deductible. Other tax liabilities suffered should be deductible, provided they are revenue expenses and wholly and exclusively incurred for the purposes of the business (or other source of income). See the Tax credits and incentives section regarding credits for non-Zambian tax suffered on non-Zambian source income.

**Other significant items**
Other specific rules concerning expenses considered to be allowable include the following:

- Deductions for costs of an employer to establish and administer an approved share option scheme.
- Deductions for technical education.
- Deductions for Mineral Royalty Tax payments.
- A fixed deduction of ZMW 100,000 for employing a person with a disability.

Other items specifically disallowed include the following:

- A loss or expense that is recoverable under an insurance contract or indemnity.
- Expenditure on the provision of entertainment, hospitality, or gifts.

Benefits provided that are incapable of being turned into money or money's worth (e.g. the use of cars and accommodation provided by the employer) give rise to taxable business income of the employer.

Note that special rules apply for determining the gains or profits of an insurance business.

**Net operating losses**
Losses can be carried forward to set against profits of the same source. Normally, losses are available to carry forward for a period of five years after the charge year in which the
loss was incurred. In the case of a person carrying on a mining operation or hydro, wind, solar, and thermo power generation, the loss carryforward period is ten years.

A loss incurred by a person in a charge year from mining operations shall be deducted from 50% of the income of the person from the mining operation. This was previously allowed to be deducted against 100% of the income until 1 July 2015.

There is no ability to carry back losses.

Losses arising from one source cannot be set against income arising from another source.

**Payments to foreign affiliates**

Certain ‘loans to effective shareholders’ may give rise to CIT liabilities. Note that transfer pricing rules may also apply (see Transfer pricing in the Group taxation section).

---

**Group taxation**

There are no special CIT rules for groups of companies. Accordingly, CIT returns cannot be prepared on a consolidated basis for group purposes. Losses arising in one group company cannot be set against profits of another group company.

**Transfer pricing**

Transfer pricing rules apply to transactions between associated persons and require that transactions are undertaken on an arm’s-length basis. Otherwise, the associated person benefiting from a reduction in income as a consequence of any non-arm’s-length terms will have its CIT computation adjusted as if the transactions had been undertaken on an arm’s-length basis.

OECD transfer pricing guidelines are generally accepted as the appropriate basis to determine arm’s-length terms.

**Thin capitalisation**

There are specific thin capitalisation rules. These relate to the issue of securities to an associated person, which require that the transaction is undertaken at an arm’s-length rate by reference to:

- the appropriate level or extent of the issuing company’s overall indebtedness
- whether the amount issued would have been provided as a loan on an arm’s-length basis, and
- the rate of interest and other terms that would apply to such an arm’s-length loan.

The debt-to-equity ratio of the borrowing party is an important test to determine whether there should be a thin capitalisation restriction. However, there is no defined debt-to-equity ratio in legislation or published guidance. This should be determined by reference to normal practice that would be adopted by two independent parties on the open market with respect to the particular situation.

An exception applies to a company carrying on mining operations. In this case, the mining company’s interest expense is restricted to the extent that its loans, in aggregate, exceed a 3:1 debt-to-equity ratio. For mining companies only, this thin capitalisation restriction applies to interest payable to both connected and unconnected parties.

**Controlled foreign companies (CFCs)**

Zambia does not have a CFC regime.
Tax credits and incentives

The ZDA Act 2006 offers a range of tax incentives in the form of allowances, exemptions, and concessions for companies making investment in Zambia that meet certain criteria.

The fiscal benefits arising from qualifying investment licenses are as follows:

- 0% CIT for five years from the date of commencement of operations.
- 0% tax on dividends for a period of five years starting from the date of commencement of operations.

Foreign tax credit

Domestic legislation provides that, where a DTT is in force and the other territory has taxing rights to a source of foreign income, a tax credit will be available to reduce the Zambian tax liability by the amount of non-Zambian tax suffered.

Where income is received from a source where there is no applicable DTT, unilateral relief should be available to offset foreign tax against Zambian tax arising on the foreign income.

In the case of both treaty relief and unilateral relief, the tax credit cannot exceed the amount of Zambian tax arising on the foreign income before the reduction.

Withholding taxes

Payments of the following items of Zambian-source income may be subject to WHT. The relevant rates under domestic legislation are as follows:

<table>
<thead>
<tr>
<th>Category of payment</th>
<th>Rate on payment to Zambian resident (%)</th>
<th>Rate on payment to non-Zambian resident (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Dividends</td>
<td>15 (1)</td>
<td>15 (1)</td>
</tr>
<tr>
<td>Interest</td>
<td>15</td>
<td></td>
</tr>
<tr>

<td>0</td>
<td>20</td>
</tr>
<tr>
<td>Public entertainment fees to entertainers/sports persons</td>
<td>0</td>
<td>20</td>
</tr>
</tbody>
</table>

Notes

1. 0% if paid by a mining company.
2. 15% if paid by a mining company to its shareholders.
3. 0% rate only applies on dividends paid by companies listed on the Lusaka Stock Exchange to individual shareholders; otherwise, the normal 15% rate applies.

The WHT liability arises by reference to the date of payment or, if earlier, the date of accrual (i.e. the date the recipient has a legal right to claim the payment). WHT is due to be paid within 14 days of the month of this date.

Zambia has DTTs in force with the following territories, which generally provide reduced rates of WHT as follows:
## Zambia

### Notes

1. The non-resident recipient must own at least 25% of the share capital of the capital of the Zambian company.
2. The revised Zambia-Netherlands treaty was signed on 15 July 2015 but is not yet in force. This lower rate applies if the beneficial owner is a company that directly holds at least 10% of the capital of the company paying the dividends, or if the beneficial owner is a pension fund.
3. These old treaties do not follow the OECD model, and, accordingly, their application to particular circumstances must be confirmed.
4. This lower rate applies to the treaty that was signed between the two states, which entered into force effective 1 January 2016.
5. The rate of 8% shall apply in the case of payment of royalties in respect of any copyright of scientific work, patent, trade mark, design or model, plan, secret formula or process, or information concerning industrial, commercial, or scientific experience.
6. The lower rate applies to the treaty that was signed between the two states in July 2015; the status of which is still pending.
7. The lower rate applies to the treaty that was signed between the two states in December 2015; the status of which is still pending.
8. This rate applies where the dividends are paid out of income (including gains) derived directly or indirectly from immovable property within the meaning of Article 6 of the treaty.

In all cases, advance clearance must be obtained to obtain the treaty benefit and take advantage of any reduced rate of WHT or tax exemption.

It may be possible to obtain confirmation that management and consultancy fees can be paid without deduction of WHT by reference to the provisions of the relevant treaty. For treaties following the OECD model, the article concerning 'Income Not Expressly Mentioned' is generally taken to be relevant.
Zambia

**Tax administration**

**Taxable period**
CIT is determined by reference to a charge year, being the period of 12 months ending on 31 December.

**Tax returns and payment of tax**
The CIT rules require the submission of a quarterly provisional tax return and the quarterly payments of tax for each tax charge year. The provisional returns and provisional tax payments must be based on an estimate of taxable income for the current charge year.

The quarterly returns and tax payments for the 2016 tax charge year are due as follows:

- 1st quarter return due 31 March 2016 (or 5 March 2016 if submitted manually).
- 2nd quarter return due on 30 June 2016.
- 3rd quarter return due on 30 September 2016.
- 4th quarter return due on 31 December 2016.

By concession, the ZRA allows a 14 day grace period for the payment of taxes. Accordingly, each quarterly payment can be made on the 14th of the month following the end of each quarter.

The final tax return needs to be submitted by 30 June following the end of the tax year in the case of an electronic return. This must be accompanied by any balance of tax that remains unpaid. For example, the final tax return for the 2015 tax charge year must be submitted by 30 June 2016.

In the case of a manually filed tax return, the tax return needs to be submitted by 5 June following the end of the tax year. For example, the final tax return for the 2015 charge year, if submitted manually, must be submitted by 5 June 2016.

**Tax audit process**
The Commissioner General of the ZRA has wide powers to require any person to attend to be examined at a time and place specified by notice, where it is determined that person is able to impart information necessary for the purposes of the Income Tax Act.

Furthermore, the Income Tax Act empowers the Commissioner General of the ZRA to access any type of information required for tax purposes held by legal practitioners, accountants, and financial institutions.

**Statute of limitations**
Save for cases of fraud or wilful deceit, no assessment can be made for any charge year after six years from the end of the charge year.

**Topics of focus for tax authorities**
The ZRA is devoting a significant amount of time to transfer pricing, and this is expected to be an increasing focus of scrutiny.

**Other issues**

**Advanced income tax**
Advanced income tax may apply at 6% on the value of commercial imports. This can be credited against the importer’s CIT liabilities on submission of the annual tax return.
Exchange controls
The exchange monitoring regulations and local currency regulations in Zambia were abolished in March 2014.

Previously, there had been regulations that were imposed by the Bank of Zambia requiring that transactions in foreign currency had to be monitored under an electronic reporting system.

Choice of business entity
A non-Zambian resident company can establish a Zambian business as either a branch or a foreign company subsidiary (i.e. a Zambian registered limited liability company).

Adoption of IFRS
Zambia has adopted IFRS and this forms the basis of CIT computations (subject to adjustment for tax rules as noted throughout this summary).
**Significant developments**

Nothing has as yet been published, but the government is seriously considering the introduction of Special Economic Zones in the near future (likely to be effective 1 January 2017).

The laws covering transfer pricing have been expanded to cater for the inclusion of Organisation for Economic Co-operation and Development (OECD), as well as United Nations (UN), guidelines.

**Taxes on corporate income**

The corporate income tax (CIT) rate for companies (other than mining companies with special mining leases, but including branches) continues unchanged at 25.75%. This rate includes a base rate of 25% plus a 3% AIDS levy.

Zimbabwe presently operates on a source-based tax system. This means that income from a source within, or deemed to be within, Zimbabwe will be subject to tax in Zimbabwe unless a specific exemption is available. The specific circumstances of a transaction should always be considered to determine whether the transaction gives rise to taxation in Zimbabwe.

Income earned by foreign companies from a source within, or deemed to be within, Zimbabwe will be subject to tax in Zimbabwe. In such a case, one should determine whether the foreign entity is obligated to register a local entity. A company is required to register a branch if it has established a place of business or is otherwise considered to be trading in Zimbabwe. A local subsidiary company may be registered as an alternative to a branch operation.

Non-residents who do not have a place of business in Zimbabwe may, however, be subject to withholding tax (WHT). See the Withholding taxes section for additional details.

**Local income taxes**

There are no local income taxes payable in Zimbabwe.

**Corporate residence**

Currently, the Zimbabwean tax system is based on source and not on residency. Zimbabwe is moving towards a residence-based taxation system, but the details are still to be announced. Income derived, or deemed to be derived, from sources within Zimbabwe is subject to tax. Under the proposed new legislation, the place of effective management concept may be used for a residence-based tax. Note that this new Income Tax Act is still being drafted, and there is no certainty as to when it will become law.
Source is the place where income originates or is earned, not the place of payment. If goods are sold pursuant to a contract entered into within Zimbabwe, the source of income is deemed to arise in Zimbabwe, regardless of the place of delivery or transfer of title.

Certain types of income arising outside Zimbabwe may, in the hands of a domestic company, be deemed to arise in Zimbabwe and be taxed as such. Examples include interest and certain copyright royalties arising outside Zimbabwe. Where the income is deemed to be from Zimbabwe, relief of the foreign tax suffered, up to a maximum of the Zimbabwe tax, may be allowed as a tax credit.

**Permanent establishment (PE)**
In the event that Zimbabwe has entered into a double taxation agreement (DTA) with the country where the foreign company resides, the entity will only be taxable in Zimbabwe if it operates through a PE, which, in most cases, includes a fixed place of business. The establishment of a local entity or branch will usually create a PE, although the provisions of the related tax treaty should be considered. If a PE exists, only the portion of the income attributable to the PE will be subject to tax in Zimbabwe.

Otherwise, and except for the PE concept embodied in the tax treaties, corporate residence is of little tax significance (i.e. there is no legislation in the Zimbabwe Income Tax Act [Act] that deals with the term ‘permanent establishment’).

**Other taxes**

**Value-added tax (VAT)**
VAT is a transaction tax, and the implications will vary for different transactions. Some transactions are taxed at a rate of 15% or 0% while other transactions are exempt from VAT. Input tax deductions may be claimed, subject to certain provisions. Advice on VAT implications of specific transactions related to corporate operations should be obtained prior to execution of transactions.

VAT is levied on every taxable supply by a registered person. A taxable supply means any supply of goods or services in the course or furtherance of a taxable activity. A taxable activity means any activity that is carried on continuously or regularly in Zimbabwe that involves the supply of goods or services for consideration.

VAT is payable on all imports for local consumption into Zimbabwe, subject to certain exemptions (e.g. in terms of a technical assistance agreement, donations to the state, goods of which the local supply is zero-rated). Import VAT is payable on the import value plus the applicable customs duty.

A company/branch is required to register for VAT if it supplies goods or services on a regular basis for consideration and if its taxable supplies (standard-rated and zero-rated supplies) exceed 60,000 United States dollars (USD) in any 12-month period.

A registered VAT vendor is entitled to deduct input tax credits paid in the course of taxable supplies made to such person, provided that a tax invoice is available to support the input tax deduction. It is also important to take note of deemed input tax deductions and prohibited input deductions. Import VAT paid may only be deducted as input tax if the import was in furtherance of a taxable activity and the required documentation (e.g. stamped customs entries) is held by the importer.

VAT returns are due by the 25th day following the month to which the VAT relates.

It is mandatory for all registered taxpayers (i.e. everyone that has a tax Business Partner Number) to use electronic fiscal registers (EFRs) that can be linked to the Zimbabwe
Revenue Authority (ZIMRA). Penalties of up to USD 25 per day per point of sale may be imposed.

**Customs duties**
Zimbabwe is a member of the Southern African Development Community (SADC) as well as the Common Market for Eastern and Southern Africa (COMESA). Customs duties are payable according to the general customs tariffs that are legislated for in Zimbabwe. Preferential duty rates apply on imports from SADC or COMESA countries, while goods may be imported free of customs duties from Namibia in terms of the Zimbabwe-Namibia Free Trade Agreement.

25% surtaxes have been imposed on a number of imported goods (including footwear, clothing, and certain foodstuffs) in order to protect the local manufacturing sector.

A security deposit is required by Customs on all temporary importations of equipment to cover import VAT and customs duties (if applicable).

It is possible to import goods that are subject to customs duties into registered Customs’ bonded warehouses, where goods are kept for later use. In this case, the payment of duties may be deferred until the goods are taken out of the bonded warehouse for home consumption or acquitted if the goods are subsequently exported.

**Excise duties**
Excise duties are levied on local production of excisable products and are included on most excisable products imported from other countries. Examples of the excise products and applicable rates include the following:

- Cigarettes: 40% + USD 7 per 1,000 sticks.
- Spirits: USD 2 per litre.
- Wine: USD 0.50 per litre.

Excise and fuel levies are also levied on petrol, diesel, and illuminating kerosene.

**Property taxes**
Property taxes are levied by cities, towns, and rural councils. Each of these bodies conducts periodic valuations of the properties in their area and annually set out a ‘rates schedule’ based on a percentage of the valuations. These may alter each year depending upon the entities budgetary requirements for funds. Valuations of the properties are usually based on estimates as there are very few qualified property valuators operating in Zimbabwe at present.

**Transfer duty**
Transfer duty is payable on the acquisition value of property purchased at the following rates:

<table>
<thead>
<tr>
<th>Value of the property (USD)</th>
<th>Rate of transfer duty</th>
</tr>
</thead>
<tbody>
<tr>
<td>0 to 5,000</td>
<td>USD 400</td>
</tr>
<tr>
<td>5,001 to 20,000</td>
<td>2% of the value above USD 5,000</td>
</tr>
<tr>
<td>20,001 to 50,000</td>
<td>3% of the value above USD 20,000</td>
</tr>
<tr>
<td>50,001 and above</td>
<td>4% of the value above USD 50,000</td>
</tr>
</tbody>
</table>

Transfer duty is normally payable by the buyer, but the agreement for the sale of the property will determine the person liable to pay these costs. In addition, conveyance costs of up to 4% (plus 15% VAT) must be added on.
**Stamp duty**

Certain transactions may attract stamp duty. The amount of stamp duty payable will differ and will be based on the nature of every individual transaction.

The basic transactions can be summarised as follows:

<table>
<thead>
<tr>
<th>Transaction</th>
<th>Stamp duty</th>
</tr>
</thead>
<tbody>
<tr>
<td>Bonds</td>
<td>0.4% (USD 0.40 for every USD 100 or part thereof)</td>
</tr>
<tr>
<td>Brokers notes - purchase of securities</td>
<td>0.25% (USD 0.25 per every USD 100 or part thereof)</td>
</tr>
<tr>
<td>Brokers notes - purchase/sale of any movable property other than a security</td>
<td>0.10% (USD 0.10 per every USD 100 or part thereof)</td>
</tr>
<tr>
<td>Brokers notes - purchase/sale of any immovable property</td>
<td>1% (USD 1.00 per every USD 100 or part thereof)</td>
</tr>
<tr>
<td>Off market share transfer instruments</td>
<td>2% or USD 2</td>
</tr>
<tr>
<td>Cheques</td>
<td>0.05% (USD 0.05)</td>
</tr>
</tbody>
</table>

Tax advice should be obtained for major transactions in respect of the transactions mentioned above in order to ensure that the correct stamp duty implications are considered.

**Capital gains tax**

It should be noted that capital gains tax is payable in Zimbabwe on the disposal of immovable property or shares that are held in listed (on the Zimbabwean Stock Exchange) or unlisted companies at the following rates:

**Acquired pre-February 2009**

- Listed securities: 1% of proceeds.
- Property: 5% of proceeds.
- Unlisted securities: 5% of proceeds.

**Acquired post-February 2009**

- Listed securities: 1% of proceeds.
- Property: 20% of capital gain.
- Unlisted securities: 20% of capital gain.

**Payroll taxes**

Zimbabwe operates a pay-as-you-earn (PAYE) system that is called the ‘Final Deduction System’ (FDS). This is based on the presumption that all employers must register for PAYE (both local and foreign-based employers), and that they are responsible for calculating, collecting, and paying the correct amount of PAYE every month to ZIMRA. Tax audits are carried out periodically (every year or two) to test the payroll systems.

The full burden of collecting the correct tax is placed on the employer, and, because of this, there is no requirement for employees to file annual tax returns in respect of employment income.

**Social security contributions**

Zimbabwe has a limited social security system. The National Social Security Scheme (NSSS) contributions are payable at the same rate of 3.5% of basic salary by the employer and employee, with a salary cap set at USD 700 per month.

**Manpower training levy**

Subject to some exceptions, employers are required to pay a 1% monthly training levy (on the gross wage bill) to the Zimbabwe Manpower Development Authority.
Zimbabwe

**Workmen's compensation**
Under the Workmen's Compensation Act, employers are required to contribute to a fund that provides cash benefits for industrial injury, disability, and death. Contribution rates are supposed to vary according to inherent occupational risk, from less than 2% in most low-risk commercial/administrative occupations to 11% for high-risk sectors.

**Standards Development Fund**
With a few exceptions, employers are required to pay 0.5% of their quarterly gross wage bill to the Standards Development Fund. The amount is payable on all payments made by the employer on behalf of the employee, including medical aid and pension contributions.

**Branch income**
Branch income that is received or has accrued from a source within, or deemed to be within, Zimbabwe is taxable in Zimbabwe in terms of the normal corporate tax rules.

A branch is regarded as an extension of its foreign head office. A branch may therefore not deduct fees paid to its foreign head office (unless a tax treaty makes provision for such deduction) as it is argued that a branch cannot transact with itself. Reimbursement of actual expenses may, however, be deducted, subject to the normal deduction rules.

A 15% WHT is imposed on any payments made in respect of head office charges.

The amount of fees charged by the head office to the Zimbabwe branch is also subject to a limitation, usually based on a maximum of 1% of total expenditure (excluding the charge itself and any capital allowances). Exchange control regulations also limit the remittability of administration and management fees to 2% of turnover.

Note that the move from a source-based system to a residence-based system may affect the level of profits that are attributed to Zimbabwe. These laws are still pending, and no date of implementation has been given.

**Income determination**
The Act tax base for CIT is taxable income rather than profits. The source and nature of the income determines whether the amount is taxable or not. In addition to amounts received or accrued from actual Zimbabwean sources, there are deeming provisions that bring income from foreign sources into Zimbabwean taxable income.

In general, all receipts from a Zimbabwe source are taxed, excluding amounts that are proven by the taxpayer as being capital receipts. Most expenditure items and some specified exemptions are deductible against income. Capital expenditure is generally not deductible, with amounts on specific items being deductible by way of annual allowances spread over a period.

**Inventory valuation**
The legislation permits three methods of inventory valuation: historic cost, cost of replacement, or net realisable value. Standard cost based on first in first out (FIFO) is normally used for accounts valuations and is an accepted basis for tax purposes. Last in first out (LIFO) is not permitted for tax or for accounting purposes. The tax valuation may differ from the accounting valuation; this is a rare occurrence in Zimbabwe but is acceptable.

**Capital gains**
See Capital gains tax in the Other taxes section.
Dividend income
Dividends received from Zimbabwe incorporated companies are tax exempt. When received from non-Zimbabwe companies, they are taxed at a flat rate of 20%; however, relief is granted by allowing any foreign tax suffered as a tax credit (up to a maximum of the 20% local rate of tax).

Interest income
Interest accruing to Zimbabwe resident companies from ‘financial institutions’ is subject to a 15% WHT and thereafter is exempt from CIT (the WHT becomes a final tax). Interest from other local or foreign sources is included in gross income and is taxed at the normal CIT rate. Relief will be granted for any foreign tax paid, up to the maximum Zimbabwe tax rate.

Partnership income
The partnership itself is not taxed directly; however, the taxable income of the partnership is calculated in the same way as corporate income and is then allocated amongst the partners in accordance to their agreed profit sharing ratios. This income is taxed in their hands at the basic CIT rate.

Rent/royalties income
Rents and royalties are generally treated as normal taxable income and are taxed at the basic CIT rate. Rent arising in respect of land and buildings situated outside of Zimbabwe, however, is exempt from local tax.

Foreign income
Where income (including business profits) is deemed to be from a Zimbabwe source, it will form a part of the local company’s taxable income and will be subject to tax at the basic CIT rate. Relief in respect of foreign taxes suffered will be granted unless it is clear that the true source of the income is, in fact, Zimbabwe.

Deductions
The Act makes provisions for specific deductions. Some of the deductions (e.g. the deduction of foreign exchange losses, development and exploration costs, hire purchase allowances, and manufacturing allowances) can be more complex.

Capital allowances
The cost (including finance charges) of machinery, implements, and other articles used by the taxpayer in the production of income is deductible in four equal annual allowances. No apportionment is required where the asset was held for less than 12 months.

Industrial buildings (including hotels) constructed and used by the taxpayer in the production of income qualify for an initial allowance of 25% of construction cost in the year they enter service. Thereafter, an annual allowance of 25% is deductible for each year following the year of construction. Additions to existing buildings (not alterations or repairs) qualify for the same deductions. It is important to note that the allowance is calculated on the cost of construction and not the cost of acquisition. In the latter case, the allowances are set at 5% of the cost.

A mining exploration expenditure incurred before commencement of production is deductible in full in the first year of production against income derived from the mine. Subsequent development expenditure is presently written off in the year expended.

Capital allowances may also be deducted with respect to leasehold improvements.

A recovery or recoupment of allowances previously claimed should be included in the gross income of a taxpayer in the event that the allowance is recovered or recouped by way of disposal. The recoupment is calculated on the capital allowances previously granted.
Zimbabwe

**Goodwill**
Goodwill is currently not deductible for tax purposes in Zimbabwe.

**Start-up expenses**
Start-up expenses may be deducted if incurred within 18 months of commencement of business and not considered to be capital in nature.

**Interest expenses**
Zimbabwe has thin capitalisation rules based on a 3:1 debt-to-equity ratio. A portion of the overall interest may be disallowed if this ratio is exceeded.

**Bad debt**
Bad debts written off may be claimed, but not a provision for bad debts.

**Charitable contributions**
Donations (with varying maximum limits) made to specified charities and educational bodies may be claimed.

**Entertainment expenses**
Entertainment expenses are not deductible for tax purposes.

**Fines and penalties**
Fines and penalties are not deductible for tax purposes.

**Taxes**
Taxes are generally not allowed as a deduction against income unless they form a part of a cost of an allowable expense (e.g. VAT incurred on an expense line that may not be claimed as input tax).

**Net operating losses**
Assessed tax losses may be carried forward (but not backwards) for up to six years, provided the company continues to trade. This restriction does not apply to mining companies. Tax laws do not allow for losses to be transferred to other group companies, and anti-avoidance provisions may be triggered by transactions designed to transfer or exploit assessed losses.

Assessed losses are reduced in the event of a compromise agreement with creditors.

**Payments to foreign affiliates**
The law prohibits the deduction of amounts incurred in excess of specified limits in respect of management and general administration expenses, as well as interest. This applies to branches or subsidiaries of both local and foreign companies.

The limit on management and general administration expenses is based on such expenses exceeding 1% and 0.75%, respectively, for a company already in production and prior to production of total tax-deductible expenses.

**Group taxation**
No taxation of combined operations is allowed in Zimbabwe, including where operations are conducted by more than one company.

**Transfer pricing**
Effective 1 January 2014, transfer pricing legislation was introduced under a provision titled ‘tax avoidance’. This legislation does not detail any parameters or requirements that corporations should follow, nor has ZIMRA issued any practice notes.
This legislation was enhanced with effect from 1 January 2016 to enable the use of the OECD and UN guidelines in respect of cross-border transactions.

It is important to note that, in addition to cross-border transactions between connected persons being examined, the law also covers internal (domestic) transactions between connected persons.

**Thin capitalisation**
The limit on the deductibility of interest is based on a company incurring interest charged by a subsidiary, a fellow subsidiary, or a holding company when the debt-to-equity ratio exceeds 3:1.

**Controlled foreign companies (CFCs)**
Zimbabwe currently has no CFC rules.

---

**Tax credits and incentives**

It has been announced by the Minister of Finance that Zimbabwe is moving away from taxation incentives; however, the following are still available.

Note that this is a high-level summary, and certain conditions should be met in order to utilise these incentives.

<table>
<thead>
<tr>
<th>Person for whom incentive is available and duration of incentive</th>
<th>Tax incentive</th>
<th>Tax treatment for normal taxpayers</th>
</tr>
</thead>
<tbody>
<tr>
<td>Taxpayers operating at designated growth point areas.</td>
<td>The capital allowance is calculated as 25% of the cost of construction of a commercial or industrial building in growth point areas in the year when the building enters service and 25% during the three years that follow the year of construction.</td>
<td>Capital allowances are calculated as 25% of the cost of construction of industrial building in the year when the building enters service and 25% during the three years that follow the year of construction.</td>
</tr>
<tr>
<td>Taxpayers operating at designated growth point areas.</td>

</tr>
<tr>
<td>Industrial park developer.</td>
<td>First five years: Taxed at 0%. Thereafter: Taxed at normal rate.</td>
<td>Taxed at 25%.</td>
</tr>
</tbody>
</table>

**Foreign tax credit**
Where foreign income is taxed in Zimbabwe, a tax credit (limited to the amount of local tax suffered) will be set off against the local tax liability.
Withholding taxes

WHTs are applicable where dividends and royalties or similar payments are declared or distributed to non-Zimbabwean residents (and Zimbabwean residents in some instances).

Dividends

Dividends declared by a Zimbabwean company to a non-resident holding company will be subject to non-resident shareholders tax (NRST), a WHT. NRST is payable at a rate of 15% unless treaty relief is available. Dividends from companies listed on the Zimbabwe Stock Exchange have a rate of 10%. NRST is payable within ten days after declaration of the dividend.

Interest

WHT of 15%, calculated on the gross amount of interest, is payable on interest accruing to any person resident in Zimbabwe. This applies to interest arising from a registered banking institution or unit trust scheme. The tax withheld is a final tax, and the financial institution is responsible to withhold the tax.

Non-resident investors, however, are currently exempt from any WHT on interest.

Royalties or similar payments

WHT on royalties are payable once a Zimbabwean company pays a royalty to a non-Zimbabwean resident. WHT is levied at a rate of 15% and is payable within ten days of the date of payment. The WHT falls due upon accrual (i.e. when payable), and actual payment is not a factor.

A royalty includes payment for the use or right to use any patent or design, trademark, copyright, model, pattern, plan, formula or process, or any other property or right of a similar nature. It also includes the imparting of any scientific, technical, industrial, or commercial knowledge or information for use in Zimbabwe. The nature of the amount payable should therefore be carefully considered in order to determine whether the relevant amount represents a royalty.

Fees

Fees are defined to include amounts that are technical, managerial, administrative, or consultative in nature; costs are paid externally. There are some exceptions, but the definition is broad and brings in most costs that may be charged to a Zimbabwean person.

WHT is levied at a rate of 15% and is payable within ten days of the date of payment.

Summary of WHT payable

The non-residents WHT rates and treaty relief for Zimbabwean DTAs can be summarised as follows. It should be noted that the tax treaties contain certain requirements that should be met before the reduced tax rate may be applied.

The definitions of dividends, interest, and royalties in the various treaties should also be considered.

<table>

United Kingdom | 5 | N/A | 10 | 10 |

* Applies to unlisted companies. The rate for companies listed on the Zimbabwe Stock Exchange is reduced to 10%.

‘N/A’ means that the provisions of the tax treaty limited the rate to a rate that is higher than the local Zimbabwean rate. It should be noted that a treaty can only provide tax relief and cannot impose a higher tax rate.

These are payable within ten days of the date of distribution or accrual.

Zimbabwe has either negotiated, or is currently negotiating, tax treaties with the following countries:

- Botswana
- Democratic Republic of the Congo
- Indonesia
- Iran
- Jamaica
- Namibia
- Serbia and Montenegro
- Seychelles
- South Africa
- Tanzania
- Tunisia
- Zambia

**Tax administration**

**Taxable period**
The tax year-end is 31 December each year. Applications may be made for a different year-end if good reasons are given (e.g. to comply with the international group year-end). In the first year of trade, a longer or shorter period than 12 months may be accepted to tie in with a future year-end.

**Tax returns**
The CIT return is due by 30 April in the following tax year.

**Payment of tax**
Zimbabwe regulates the payment of CIT on four dates during the course of the current tax year; these are referred to as Quarterly Payment Dates (QPDs). The first payment of 10% is due by 25 March of the respective tax year. The second payment of 25% is due by 25 June of the respective tax year. The third payment of 30% is due by 25 September of the respective tax year. The fourth payment of 35% is due by 20 December of the respective tax year.

All taxes are expected to have been paid by the 25th day of December. If there is an adjustment after the year-end accounts have been finalised, a top-up payment must be made. There is no set date for this. However, in practice, this payment should not be more than 10% of the annual tax liability. ZIMRA often imposes a 10% per annum interest charge on any underpayments of QPDs.

WHT payments are due within ten days from the date of distribution or accrual.

**Tax audit process**
Tax audits do not, at present, have a set cycle; however, the aim is to establish a three-year cycle in the future.
Zimbabwe

Statute of limitations
The statute of limitations is generally three years unless ZIMRA considers that there is fraud or misrepresentation involved. In those circumstances, there is no set limit on how far back ZIMRA can go, but they usually do not go beyond six years in practice.

Topics of focus for tax authorities
ZIMRA is focused on ensuring that all compliance issues are in order and that VAT and payroll taxes have been correctly calculated.

Anti-avoidance
Current Zimbabwe legislation contains basic anti-avoidance sections that empower the Commissioner General to disregard the implications of a transaction or scheme if it can be proven that:

- such a transaction or scheme had been entered into to avoid or postpone the payment of any duty or levy imposed by the Act
- it was entered into or carried out by means or in a manner that would not normally be employed in the entering into or carrying out of a transaction, operation, or scheme of the nature of the transaction, operation, or scheme in question, or
- it has created rights or obligations that would not normally be created between persons dealing at arm's length under a transaction, operation, or scheme of the nature of the transaction, operation, or scheme in question.

The Commissioner General may, at the Commissioner General’s sole discretion, impose this legislation on any transaction or scheme, which will place the burden of proof on the taxpayer to prove that any/all of the requirements noted above will not be applicable to the transaction or scheme.

Note that the anti-avoidance sections have been amended to include transfer pricing legislation effective from 1 January 2014 (see Transfer pricing in the Group taxation section).

Other issues
Exchange control
Zimbabwe has been operating a multi-currency system since February 2009. The Zimbabwe dollar (ZWD) was demonetarised effective April 2009. This has had a significant impact on the country’s exchange control regulations.

The Exchange Control Handbook in Zimbabwe is not available to the public; only banking institutions have access to these regulations.

Transactions that involve the transfer of funds to countries outside Zimbabwe are generally subject to bank approval.

The issue of shares in a Zimbabwe company to persons residing outside of Zimbabwe requires specific exchange control approvals. A limit of 49% is available for non-residents. A 51% local shareholding by indigenous persons is a requirement. Applications may be made for increased levels; each case will be decided on its own merits.
Global Tax Contacts
With offices in 157 countries and more than 41,000 people, we are the first choice tax provider globally\(^1\). The strength of the PwC network, combined with the depth and breadth of our services, gives us a leading position in the professional services marketplace.

As tax codes become increasingly complex and the related risks become more challenging to manage, we help our clients to:

- understand and comply with their legal and regulatory obligations for taxation
- plan their affairs so as to be tax efficient in the business or other financial decisions they make
- understand the tax risks they face and the effectiveness of their organisation’s internal controls relating to tax, and
- resolve tax disputes through domestic law and/or treaty-based dispute resolution mechanisms.

\(^{1}\) Senior tax buyers name PwC as their first choice tax provider globally. These results are based on an independent survey of 4,335 primary buyers of tax services globally, conducted by research agency Jigsaw Research (Q1-Q4 2015).
The advice we provide to clients is based on our Global Tax Code of Conduct (www.pwc.com/taxcodeofconduct). In particular, we apply the following principles:

1. Tax advice that results in positions taken in a client’s tax return must be supported by a credible basis in tax law.

2. No tax advice relies for its effectiveness on any tax authority having less than the relevant facts. Advice that a PwC firm gives includes consideration of, and is based on the assumption that the client will make, relevant disclosures that both comply with the law and enable tax authorities to make further enquiries should they wish to do so.

3. Tax advice is given in the context of the specific facts and circumstances as provided by the client concerned and is appropriate to those facts and circumstances.

4. Tax advice involves discussion of the wider considerations involved, as appropriate in the circumstances, including economic, commercial, and reputational risks and consequences arising from the way stakeholders might view a particular course of action.

5. PwC firms advise clients of appropriate options available to them under the law having regard to all of the principles contained in this code.

We expect all of our people to apply these principles to the way they work, and we encourage them to consult whenever they are in doubt.

We take pride in our role as an essential and productive part of global tax administration and compliance. Our policy specialists advise regulators, governments, corporations, and supra-national bodies worldwide on the technical and practical aspects of developing and implementing tax policy initiatives.

*PwC is the first choice tax provider globally.*
To give the best advice on indirect taxation, we believe you need to work closely with the people devising it. At PwC, we do this. We have a thorough knowledge of indirect taxes from every perspective – we appreciate that indirect taxes can be very different depending on which industry sector you work in. Across the world, our indirect tax and customs specialists work closely with PwC industry specialists to really understand the specific issues in your sector, and give you advice with genuine insight. And because the implications of indirect taxes can be so important to your business, we customise the support we give you, and use the latest technology, to provide you with what you need, wherever you are and whenever you need us. We can assist you with strategy, risk, process, and margin improvement.

If you’re operating across borders or competing in multiple jurisdictions, complying with local tax laws, reporting requirements and statutory filings – not to mention staying on top of new legislative developments – is more than a full-time job for your tax department.

But compliance is only half of the equation. In a world of intensified global competition, the key to business success is keeping your tax strategy agile and aligned with your corporate strategy – while keeping an eye on your worldwide effective tax rate.

PwC’s leading international tax professionals\(^2\) have the resources, experience and local competencies to help companies like yours address your cross-border needs. With our legal, transfer pricing, tax controversy, and indirect tax teams, we are superbly qualified to assist you with all aspects of your international taxation needs. In addition, our geographic networks, such as our EU Direct Tax Group, Latin American Tax Group, and International Tax Desks, can provide you with the up-to-date analytical tax insight you need to achieve your business goals, both locally and globally.

\(^2\) Senior tax buyers name PwC as their first choice provider for international corporate tax structuring services globally. These results are based on an independent survey of 1,753 primary buyers of international corporate tax structuring tax services globally, conducted by research agency Jigsaw Research (Q1-Q4 2015).

Legal Services

With 2,600 corporate lawyers in more than 85 countries

Global Leader, Legal Services
Leon Flavell
PwC Singapore
+44 20 7212 1945
leon.flavell@sg.pwc.com

We understand that one size doesn’t fit all when it comes to legal services. With over 2,600 corporate lawyers in 85 countries, we’re able to tackle problems in a way that is genuinely specific to your business. As well as specialist legal advice, we also offer day-to-day general counsel support. We support businesses with teams drawn from the range of skills within the PwC global network. Depending on your legal issues, we might include tax advisers, human capital consultants, corporate finance specialists, actuaries, management consultants, or accountants. We’ll put together whatever it takes to give you a creative solution in the least possible time.

Mergers and Acquisitions

An international network of almost 1,200 specialists, experienced in every type of transaction

Global Leader, Mergers and Acquisitions
Mark Boyer
PwC US
+1 202 414 1629
mark.boyer@us.pwc.com

Whether you're buying, selling, or merging, it is important to manage risk with tax due diligence and to increase tax efficiencies with deal structuring, thereby maximising value associated with a transaction. With a leading international network of 1,200 Mergers and Acquisitions (M&A) specialists, experienced in every type of transaction, we know how to help you evaluate, structure, and finance the transaction to your best advantage. Our M&A Tax specialists support you through every stage of the deal continuum. They work closely with our transactions services, corporate finance, and legal teams, so that all aspects of the transaction are considered by experienced specialists.

---

3 Senior tax buyers name PwC as their first choice provider for mergers and acquisitions services globally. These results are based on an independent survey of 1,565 primary buyers of mergers and acquisitions tax services globally, conducted by research agency Jigsaw Research (Q1-Q4 2015).

PwC’s Global People and Organisation practice brings together an unmatched combination of 10,000 people with industry, business, talent, strategy, HR, analytics, and technology expertise in one team across 138 countries. Together we build tailored people and organisation solutions to help our clients achieve their strategic ambitions - with a deep understanding of their uniqueness, and grounded in rigorous analysis and data-driven insight - to create lasting, differentiated value.

We help clients to implement organisational transformation, improve the effectiveness of their workforce, develop and move talent around their business, and manage their human capital risks. We work from people strategy through to organisational execution.

We think being effective is about more than just knowledge; it’s about having an insight into what could happen next.

Global Leader, Tax Controversy and Dispute Resolution
David Swenson
PwC US
+1 202 414 4650
david.swenson@us.pwc.com

By giving you insight into your company’s risks and exposures across different territories and disciplines, we can be the effective option to help you deal with tax disputes, audits, and examinations, from prevention through to management and resolution. Our specialists also use their experience to help businesses put in place consistent and defensible practices and policies, so they know what to expect in the future. PwC’s leading Tax Controversy and Dispute Resolution network brings together former revenue authorities and government officials, accountants, economists, international tax litigators, and industry sector specialists, in all areas of direct and indirect tax, as well as customs duties, employment taxes, and tax fraud. We think being effective is about more than just knowledge; it’s about having an insight into what could happen next, so we build strong relationships with governments and policy makers worldwide. That way, we’re close to the people who are setting the dispute agenda, and know how to work with them to get the right results.

4 Senior tax buyers name PwC as their first choice provider for tax controversy and dispute resolution services globally. These results are based on an independent survey of 2,113 primary buyers of tax controversy and dispute resolution services globally, conducted by research agency Jigsaw Research (Q1-Q4 2015).

**Tax Controversy and Dispute Resolution**

www.pwc.com/taxsummaries  Global Tax Contacts  2351
Our leading Tax Policy and Administration network provides insight into today’s policy trends and issues worldwide. There are a number of elements to this, which include:

- helping our clients to understand and comply with their fiscal and regulatory obligations in relation to tax,
- helping our clients maximise value for all stakeholders over time on the basis of full disclosure and in compliance with our Global Tax Code of Conduct ([www.pwc.com/taxcodeofconduct](http://www.pwc.com/taxcodeofconduct)), being transparent about our role when dealing with stakeholders,
- using our knowledge and experience, without being paid by or representing clients, constructively to assist policy makers in both developed and developing countries improve the efficiency and effectiveness of their tax systems, and
- being seen as acting fairly, openly, and consistently with all stakeholders such that we are trusted by all parties.

For this purpose, ‘stakeholders’ include, as well as our clients, revenue authorities, governments, legislators, governmental departments and their officials, non-governmental organisations, supra-national bodies, regulators, the media, professional bodies, and trade associations.

Our specialist knowledge and expertise in these areas sits mainly with the members of our network and tax country leaders. For assistance in tax policy and administration matters, please do not hesitate to contact us.

---

5 Senior tax buyers name PwC as their first choice provider for tax strategy/policy advice globally. These results are based on an independent survey of 2,371 primary buyers of tax strategy/policy advice globally, conducted by research agency Jigsaw Research (Q1-Q4 2015).

</table>
In a fast changing world, we’re helping clients build a tax function for the future. Our complete approach to tax management brings together tax function design, technology, and compliance delivery. By aligning your tax and tax technology strategies with your commercial goals, the tax function will become a strategic business asset, adding value across the organisation.

Understanding your organisation’s challenges, goals, and needs is just the start. Successful change will require re-engineering ‘end-to-end’ processes, not just the final outputs.

We can work with you to:

- Meet the challenges of complex multi-tax reporting and compliance obligations.
- Design and execute the right tax and tax technology strategies to manage tax risks in a rapidly changing and increasingly transparent global environment.
- Take full advantage of the opportunities presented by a technology and data-enabled world.

Transfer Pricing

Extensive experience in dealing with revenue authorities around the world

Global Leader, Transfer Pricing
Isabel Verlinden
PwC Belgium
+32 2 710 4422
isabel.verlinden@be.pwc.com

With over 3,100 transfer pricing professionals, including more than 300 partners, across 111 countries, we are the world’s leading transfer pricing adviser. Our professionals come from diverse backgrounds – including law, economics, business, accounting, engineering, and government – to provide balanced, interdisciplinary perspectives.

We adopt globally coordinated approaches with in-depth local knowledge to provide tailored transfer pricing solutions. From strategy to execution, we help you build up seamlessly compliant and sustainable transfer pricing infrastructure. Our technology solutions are proven to help you decrease the time spent on manual processes across the entire finance organization, mitigate enterprise risk, and enhance operational tax productivity.

With the international tax evolution around various global tax initiatives, we closely monitor tax developments around the world to provide practical insight to you.

---

6 Senior tax buyers name PwC as their first choice provider for transfer pricing services globally. These results are based on an independent survey of 2,561 primary buyers of transfer pricing tax services globally, conducted by research agency Jigsaw Research (Q1-Q4 2015).

Value Chain Transformation

Creating sustainable business change

Global Leader, Value Chain Transformation
Dennis Muntslag
PwC Netherlands
+31 0 887 927 282
dennis.muntslag@nl.pwc.com

Companies need to transform how they operate, while creating the capacity to grow. PwC’s Value Chain Transformation (VCT) integrates our capabilities to evaluate company operating models to unlock levers that drive sustained performance. Effective and globally aligned operating, financial, legal, and tax platforms can result in sustainable benefits.

VCT helps you to align and optimise key elements to improve profitability, efficiency, controls, and visibility throughout the value chain. Our deep industry experience in key sectors and our international network of 500 cross-disciplinary VCT specialists allows us to manage the complexity involved in cross-border business transformation and help clients build the foundation for sustainable growth.

Worldwide Tax Summaries – Corporate Taxes 2016/17 represents the combined efforts of more than 500 local PwC tax specialists in over 150 countries and territories. While too numerous to name individually, we thank them for their efforts in preparing this guide.

To obtain regularly updated information on the corporate and individual tax rules in operation in over 150 countries, please visit Worldwide Tax Summaries Online at www.pwc.com/taxsummaries.

To download an eBook version of Worldwide Tax Summaries - Corporate Taxes 2016/17, please visit www.pwc.com/taxsummaries/ebook.

Prior-year editions of Worldwide Tax Summaries – Corporate Taxes (dating back to 2010/11) are available in the Archives section on Worldwide Tax Summaries Online.

To contact the editorial team, please email us at worldwide.tax.summaries@us.pwc.com.
Essential tax tools, on desktop and mobile

**WWTS online**
The fully mobile online version of WWTS offers quick access to information about corporate and individual tax systems in over 150 countries, updated regularly by local PwC tax specialists.

- Fully responsive design that reshapes to fit any screen/device.
- Easy printing of an entire summary or printing of select topics across multiple countries.
- Real-time updates to the quick charts.
- Comparison of key data between two countries using the quick compare feature.

**WWTS eBook**
This guide is also available for download in ePub or PDF format for most digital devices (e.g. desktops, laptops, tablets, smartphones).

For free and easy access to WWTS online, as well as the ePub or PDF version of this guide or prior guides, visit www.pwc.com/taxsummaries.

WWTS is also available in the iBooks store for iOS device users.

To add WWTS online to your Android or iOS mobile device home screen, open www.taxsummaries.pwc.com on your device’s browser, tap the share icon, select ‘Add to Home screen’, and tap ‘Add’.

www.pwc.com/taxsummaries
The world’s taxes at your fingertips

If you are responsible for managing taxes in a business that trades or operates across a number of different countries, you will recognise how much of a challenge it can be trying to keep on top of the corporate tax rates and rules in each of them, notwithstanding the fact that these frequently change.

*Worldwide Tax Summaries – Corporate Taxes 2016/17* is a useful reference tool, to help you manage taxes around the world. It offers quick access to information about corporate tax systems in 155 countries worldwide, in an easily digestible format.

Written by local PwC\(^1\) tax specialists in each country, this guide covers recent changes in tax legislation as well as key information about income taxes, residency, income determination, deductions, group taxation, credits and incentives, withholding taxes, indirect taxes, and tax administration, up to date (unless otherwise stated) as of 1 June 2016. Also included is a global directory of PwC contacts organised by their tax speciality area.

Visit our mobile friendly online version, which is updated regularly throughout the year, at [www.pwc.com/taxsummaries](http://www.pwc.com/taxsummaries).

\(^1\)“PwC” is the brand under which member firms of PricewaterhouseCoopers International Limited (PwCIL) operate and provide services. Together, these firms form the PwC network. Each firm in the network is a separate legal entity and does not act as agent of PwCIL or any other member firm. PwCIL does not provide any services to clients. PwCIL is not responsible or liable for the acts or omissions of any of its member firms nor can it control the exercise of their professional judgment or bind them in any way.
