Two companies that for tax purposes are resident exclusively in Malta, where one company is a 50% plus subsidiary of the other or both are 50% plus subsidiaries of a third Malta-resident company, qualify as members of a group of companies. Allowable losses may be surrendered by a company to another company within the group where both companies have concurrent accounting periods and form part of such group throughout the entire basis year for which this relief is claimed; however, such surrendering of losses may not occur where the surrendering or claimant company is carrying on the business of insurance. The possibility of income tax consolidation is contemplated in Maltese tax law; however, rules covering the precise terms and conditions of such tax consolidation are still to be issued.

**Transfer pricing**
Malta does not operate a sophisticated transfer pricing regime. There are some general anti-avoidance provisions and brief references to transactions at arm’s length. However, the Maltese tax authorities will typically still consider it desirable that transactions between residents and non-residents broadly adhere to the arm’s-length principle, that is, prices that would have been concluded between independent enterprises. However, no specific rules are available on the manner in which an arm’s-length price is to be established.

**Thin capitalisation**
The Maltese tax regime does not contain thin capitalisation rules.

**Controlled foreign companies (CFCs)**
No anti-CFC rules or legislation are applicable in Malta.
**Tax credits and incentives**

**Foreign tax credit**
A credit for foreign taxes may be applied against the Maltese tax charge (see Foreign income in the Income determination section for more information).

**Inbound investment**
Investments by foreigners may be readily repatriated together with profits.

The Malta Enterprise Act and other related legislation provide a comprehensive package of incentives for inbound investment. These incentives are reserved for enterprises carrying on certain activities in Malta, mainly manufacturing activities. The focus is on high-value-added activities, and approval of a project’s eligibility for benefits by the Malta Enterprise may be required. In general, eligibility does not depend on whether the company produces for the local or for export markets. The main tax incentives include the following:

- Enterprises carrying out qualifying activities, which mainly include manufacturing activities, qualify for investment tax credits whereby a percentage of qualifying expenditures are off-set against the tax charge (not against taxable income). The Investment Aid (July 2014) Regulations, 2014 (the ‘Regulations’) were issued on 24 October 2014, and guidelines in this regard have been published by Malta Enterprise. Such guidelines form the basis of the investment aid scheme that is in force until 31 December 2020. The Regulations apply to qualifying undertakings, which may benefit from investment tax credits in respect of certain qualifying activities, which are quantified as a percentage of qualifying expenditure incurred in terms of the guidelines. The tax credits range between 15% and 35% of the qualifying expenditure for projects commencing before 31 December 2017 and between 10% and 30% for projects commencing between 1 January 2018 and 31 December 2020, depending on the undertaking’s size.

- Certain tax credits and special incentives may be available, subject to certain conditions. These tax credits are calculated on the basis of specific expenditures incurred by a company, while the special incentives grant tax exemptions on all or part of the chargeable income in specified circumstances.

- No further tax is charged on distributions from profits that had previously been taxed at a reduced rate. This benefit is also extended to amounts that were not subject to tax on account of the investment allowance, investment tax credits, and specific tax credits/special incentives.

The combination of certain tax treaties and Maltese domestic law lowers the Maltese tax rate on certain companies receiving certain industrial assistance (i.e. mainly assistance in terms of the Malta Enterprise Act, Business Promotion Act, and Business Promotion Regulations) to 15%.

**International business profits**
Other Maltese tax considerations that may be relevant in an international business context include the following:

- Maltese tax law provides for a beneficial tax treatment in respect of securitisation vehicles and similarly to re-insurance special purpose vehicles.

- A beneficial tax regime is available in respect of collective investment schemes.

- The Maltese fiscal implications relative to trusts and private foundations vary, depending on a number of circumstances, including: (i) the particulars of the parties involved (e.g. domicile or residence of the trustees/administrator or beneficiaries), (ii) the act or event under review (e.g. the settlement of property, transfers of beneficial interests, distributions of trust/foundation assets), and (iii) the nature of the trust/foundation assets. Furthermore, in certain circumstances, tax transparency provisions are set out in the law, particularly so as to allow, among other things, the
application of tax exemptions that would have applied to beneficiaries if there was no trust relationship or foundation.

• An option exists for a step-up in the cost of acquisition of assets situated outside Malta (including companies) effecting a change in domicile or residence or becoming Maltese companies as a result of cross-border mergers.

Other tax credits
A tax credit for micro enterprises is provided under the Micro Invest Scheme. The credit is of a maximum of EUR 30,000 over three consecutive years. Such tax credit is increased to a maximum of EUR 50,000 over three consecutive years to self-employed women, businesses that are majority owned by women, and start-ups established in Gozo.

Withholding taxes
Domestic corporations paying certain types of income are subject to deduction of tax-at-source obligations as follows:

<table>
<thead>

Malta

Notes

Treaties relating to international air and shipping traffic are in force with Switzerland and the United States (US).

The numbers in parentheses refer to the following notes:

1. No WHT is imposed on dividends distributed by Maltese companies (except for distributions of untaxed income to resident persons other than companies, refer to Note 5) because no additional tax is imposed on distributions other than the tax charged on the company with respect to the distributed profits. Malta makes no distinction between portfolio and substantial holdings. Under Maltese law, the dividend is grossed up by a figure representing the tax imposed on the company's profits when these were originally earned thereby. Under Malta's full-imputation system of taxation of dividends, the corporate tax is assimilated with the shareholder's personal income tax with respect to the dividend. In the shareholder's hands, the dividend is taxed at the gross amount, and the relevant amount of corporate tax offsets the shareholder's tax liability on income from all taxable sources with no further tax liability being imposed on the shareholder in respect of such dividends.

2. Withholding of tax may be required only where the interest is debenture interest or interest on any other loan advanced to a corporation for capital purposes. The WHT is, in effect, a prepayment of the recipient's final liability because a reassessment on income is made upon the submission of returns. Any resulting overpayment is refunded.

3. Interest and royalty income derived by non-residents is exempt from tax in Malta as long as certain conditions are complied with (e.g. they are not effectively connected to a PE of the recipient situated in Malta).

4. On the basis that Malta operates the full-imputation system of dividends, dividends are not subject to further tax when distributed by a company registered in Malta to a non-Maltese resident. Furthermore, if the rate provided under the Dividends Article in the respective treaty provides for a lower rate than the Maltese corporate tax rate incurred by the company on the respective profits (standard corporate tax rate of 35%), then this may result in a refund of Maltese tax in terms of Malta's full imputation system (such a refund situation may arise in the treaties with Austria, Bulgaria, Kuwait, Libya, and Romania). In a number of treaties, the rate of deduction and of tax is reduced to 15% in the case of companies enjoying certain tax incentives. See also Note 1 with respect to Malta's full-imputation system of taxation of dividends.

5. Distributions of dividends by a Maltese company where the dividend represents a distribution of untaxed income attracts a 15% WHT where the shareholder is (i) a Maltese resident other than a company, (ii) a non-resident person who is directly or indirectly owned and controlled by, or acts on behalf of, a Maltese domiciled and ordinarily-resident individual, or (iii) an EU/EEA individual who has declared that at least 90% of worldwide income is derived from Malta.

Tax administration

Taxable period

The year of assessment is a calendar year, but a company may obtain authorisation from the Maltese Inland Revenue to have a different year-end (i.e. other than 31 December).

Tax returns

An income tax return for income earned during the previous year must be filed for every year of assessment. The tax return for a company must be submitted by the later of nine months following the end of the financial year or by 31 March following the year of assessment (however, in recent years, the Commissioner for Revenue has provided concessionary extensions to such statutory deadlines in the case where the tax return is submitted electronically). Penalties are incurred on late filing of returns. The tax return submitted by the company is a self-assessment, and the Commissioner for Revenue will not raise an assessment unless the Commissioner is not in agreement with the self-assessment.

Payment of tax

Companies pay tax in the currency in which their share capital is denominated.

During the basis tax year, a company is generally required to make provisional tax (PT) payments every four months. In general, the PT payments are based on the last self-assessment filed by the company, and payments are divided into three instalments of 20%, 30%, and 50%, respectively. Any tax liability that is still due at the tax return date after deducting all tax credits must be settled immediately with the submission of the return. Interest at 0.54% per month is charged on any unpaid tax.
In certain instances, especially for companies with mostly international operations, PT may not be payable, and the tax payment is normally paid on the earlier of the date profits are distributed or 18 months after the end of the relative accounting period.

**Tax audit process**
The Maltese Inland Revenue is entitled to raise an investigation and notify the taxpayer in writing that the department is initiating a tax enquiry. In such investigations, the taxpayer will typically be required to provide information and supporting documentation in respect of queries raised by the Revenue. The taxpayer has a right to appoint a representative on their behalf.

**Statute of limitations**
An assessment may be issued by the Maltese Inland Revenue no later than six years from the end of the respective tax year. In the event of non-full disclosure or wilful incorrect/misleading information, the aforesaid prescription period will not apply.

In respect of the payment of tax, additional tax, interest, or any penalty, an action may be taken during any time from the date on which it becomes due and payable up to eight years from that date or, where an assessment in respect thereof has been made, from the date on which that assessment becomes final and conclusive.

**Topics of focus for tax authorities**
The Maltese Inland Revenue is following closely international tax developments, such as the OECD Base Erosion and Profit Shifting (BEPS) initiative and the Anti-Tax Avoidance Package, and is also involved in discussions/representations on such matters in various fora.

**Other issues**

**US Foreign Account Tax Compliance Act (FATCA)**
The agreement concluded between the Republic of Malta and the United States to improve international tax compliance and to implement the FATCA (the ‘Agreement’) entered into force on 26 June 2014. On 18 November 2014, the FATCA Regulations were accordingly issued implementing the said intergovernmental agreement (IGA). Guidelines on the implementation and interpretation of the FATCA Regulations and the said Agreement have been issued by the Maltese Inland Revenue.

Furthermore, the Exchange of Information (United States of America) (FATCA) (Amendment) Order was enacted in 2015.

By virtue of LN 384 of 2015 entitled the ‘Cooperation with Other Jurisdiction on Tax Matters (Amendment) Regulations, 2015’, the EU Council Directive 2014/107/EU of 9 December 2014 amending Directive 2011/16/EU as regards mandatory automatic exchange of information in the field of taxation (DAC2) and the CRS have been accordingly implemented into Maltese legislation, with effect from 1 January 2016.

Guidelines on the implementation and interpretation of the DAC2 and CRS have also been issued by the Maltese Inland Revenue.
Significant developments

The conclusion of the negotiations on the India-Mauritius double taxation treaty (DTT) and the signing of the Protocol has ended an era of uncertainty. Investors have been re-assured of their tax positions for investments made prior to 1 April 2017, as these will remain exempt in India irrespective of when these are being disposed of.

The taxability of gains in India, as amended under the Protocol, applies only to shares, and it would appear that investments in mutual funds, derivatives, and debt instruments will not be impacted and will continue to be exempt from tax in India.

The effect of the Protocol on other jurisdictions that investors have traditionally used for investing into India cannot be ignored. For example, the exemption from tax on the sale of shares under the India-Singapore DTT Protocol is also likely to be void as this provision is specifically linked to the India-Mauritius DTT.

Overall, the Protocol has set new challenges around investing into India and may ultimately affect returns from investments. However, the reduced withholding tax (WHT) of 7.5% on interest payments may present new opportunities for Mauritius, as this is the lowest rate under any DTT that India has signed.

Taxes on corporate income

A corporation resident in Mauritius is subject to tax on its worldwide income. A non-resident corporation is liable to tax on any Mauritius-source income, subject to any applicable tax treaty provisions.

Corporations are liable to income tax on their net income, currently at a flat rate of 15%.

Mauritius has a credit system of taxation whereby foreign tax credit is given on any foreign-source income declared in Mauritius on which foreign tax of similar character to Mauritian tax has been imposed.

All corporate bodies incorporated in Mauritius (except companies holding a Category 2 Global Business Licence and certain approved funds and associations) are subject to income tax. This applies to all associations and other registered bodies. Income derived by local partnerships is shared and taxed in the hands of the partners. Foreign corporations carrying on business, or having a place of business, in Mauritius are also liable to income tax on income derived from Mauritius. Resident sociétés are not liable to corporate tax.

Société means a société formed under any enactment in Mauritius and includes:

- a société de fait or a société en participation
- a limited partnership
• a joint venture, and
• a société or partnership formed under the law of a foreign country.

Income tax is payable on total net income before distribution at the following rates:

<table>
<thead>
<tr>
<th>Entity</th>
<th>Rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Global Business Category 1 (GBC1) companies and offshore trusts (see below)</td>
<td>15</td>
</tr>
<tr>
<td>Freeport operators or Private Freeport Developers carrying on Freeport activities other than providing goods and services on local markets</td>
<td>Exempt</td>
</tr>
<tr>
<td>Global Business Category 2 (GBC2) companies (see below)</td>
<td>Exempt</td>
</tr>
<tr>
<td>All other companies</td>
<td>15</td>
</tr>
</tbody>
</table>

Global Business Category 1 (GBC1) companies are liable to tax at the rate of 15%. However, they are entitled to a foreign tax credit equivalent to the higher of 80% of the Mauritius tax chargeable or the actual tax suffered abroad in respect of foreign-source income. The maximum effective tax rate is therefore 3%.

Global Business Category 2 (GBC2) companies incorporated under the laws of Mauritius are exempt from income tax and are not tax residents for treaty purposes. For more information, see the Tax credits and incentives section.

**Alternative minimum tax (AMT)**

AMT is repealed as of 1 July 2015.

**Special levies**

**Banks**

All banks are required to pay a special levy calculated according to their book profit and their operating income derived during, or its chargeable income in respect of, the preceding year. ‘Operating income’ means the sum of net interest income and other income before deducting non-interest expense.

The rates of the special levy on banks are as follows:

<table>
<thead>
<tr>
<th>Year of assessment commencing</th>
<th>Rates</th>
</tr>
</thead>
<tbody>
<tr>
<td>1 July 2015, 1 July 2016, and 1 July 2017</td>
<td>Segment A: 10% of chargeable income; Segment B: 3.4% on book profit; 1.0% on operating income</td>
</tr>
</tbody>
</table>

Segment A: Banking transactions with residents.

Segment B: Banking transactions with non-residents and corporations holding a Global Business Licence.

Except where the levy is computed on chargeable income, no levy shall be paid in a year where in the preceding year:

• the bank incurred a loss, or
• the book profit of the bank did not exceed 5% of its operating income.

**Telephony service providers**

Providers of public fixed or mobile telecommunication networks and services (including information and communication services, such as value added services and mobile internet), commonly known as ‘operators’, are liable to a solidarity levy. The solidarity levy is calculated according to the book profit and turnover for the preceding income year of the operator. The applicable rates are as follows:
Mauritius

Years of assessment commencing 1 July 2015, 1 July 2016, and 1 July 2017: 5% of the book profit and 1.5% of the turnover of the operator.

‘Book profit’ means the profit derived by an operator from all its activities and computed in accordance with International Financial Reporting Standards (IFRS).

No levy is to be paid in a year where, in the preceding year, the operator incurred a loss or the book profit of the operator did not exceed 5% of its turnover.

**Corporate Social Responsibility (CSR) Fund**

Every year, a company has to set up a CSR Fund equivalent to 2% of its chargeable income of the preceding year to implement a CSR Programme in accordance with its own CSR framework.

Note that the following entities are not subject to the CSR regulations:

- A company holding a GBC1 Licence under the Financial Services Act.
- A bank holding a banking licence under the Banking Act, in respect of its income derived from its banking transactions with non-residents or with corporations holding a Global Business Licence under the Financial Services Act.
- An Integrated Resort Scheme (IRS) company referred to in the Investment Promotion (Real Estate Development Scheme) Regulations 2007.
- A non-resident société, a foundation, a trust, or a trustee of a unit trust scheme.

The CSR Fund is either disbursed by the company on its own CSR framework or remitted to the Mauritius Revenue Authority (MRA) if not expensed fully.

A company has to submit, as an annex to its return of income, a statement showing the amount of CSR spent and the details of CSR projects implemented by the company during the income year.

Please also note the following:

- Any amount underpaid (not exceeding 20% of the Fund provided) in respect of a year can be carried forward to the following year to form a part of the CSR Fund for that following year, and the remaining amount should be remitted to the MRA.
- Any amount overpaid compared to the amount provided can be carried forward (in an amount not exceeding 20% of the amount provided) and offset in equal instalments against any amount to be remitted in respect of the five succeeding years. The carryforward does not apply to any excess arising in respect of more than two consecutive years.
- The CSR Fund in respect of a year includes any amount brought forward to that year.
- The CSR Fund shall apply in all respects to a resident société, other than a resident société holding a Global Business Licence under the Financial Services Act, and its net income shall be deemed to be its chargeable income and any distribution of its net income shall, for the purposes of the CSR Fund, be deemed to be dividends.

**Local income taxes**

Local income taxes levied by local administration, such as urban councils, do not exist in Mauritius.

**Corporate residence**

Under domestic law, a company is resident in Mauritius for tax purposes if it is incorporated in Mauritius or centrally managed or controlled in Mauritius.
A company not incorporated in Mauritius is resident in Mauritius only if it is centrally managed and controlled in Mauritius.

In the absence of a tax treaty, any income derived from the following is taxed in Mauritius:

- Any business carried on wholly or partly in Mauritius.
- Any contract wholly or partly performed in Mauritius.

A GBC2 company is not considered a resident in Mauritius for the purposes of DTTs.

Under a tax treaty, a company is considered a resident in Mauritius if it is incorporated in Mauritius or if its effective management is in Mauritius.

**Permanent establishment (PE)**

Generally, a PE is created under a tax treaty if one of the following criteria is met:

- Branch, office, factory, workshop, or installation used for extraction of natural resources.
- Building site, construction, installation, assembly, or supervisory services where the activity on the site lasts for a minimum of six months or 12 months, depending on the tax treaty.

---

**Other taxes**

**Value-added tax (VAT)**

VAT is charged by VAT-registered entities at the standard rate of 15% on all goods and services supplied by them in Mauritius (except those taxed at 0%), other than the following exempt supplies (not an exhaustive list):

- Bread, wheat, and cereal flours (excluding wheat flour).
- Medical, hospital, and dental services, including clinical laboratory services, services provided in a health institution, and veterinary services.
- Educational and training services provided by institutions approved by the Mauritius Qualification Authority.
- Construction of building for residential purpose, provided letter of intent relating to an IRS was issued prior to 1 October 2006.
- Sale or transfer of an immovable property, a building or part of a building, apartment, flat, or tenement.
- Banking services, except:
  - services provided to merchants accepting credit/debit card
  - services in respect of safe deposit locker, and issue and renewal of credit/debit cards
  - services for keeping and maintaining customer’s accounts, and
  - services supplied by a bank holding a banking licence under Banking Act 2004 in respect of its banking transactions with non-residents and corporations holding a Global Business Licence.

As of 1 July 2015, an entity should register for VAT if turnover exceeds 6 million Mauritian rupees (MUR) a year. However, certain service providers (e.g. accountants and auditors, attorneys and solicitors, consultants, surveyors, valuers) should register for VAT irrespective of their turnover.

VAT-registered persons with annual taxable turnover exceeding MUR 10 million should submit their VAT return monthly and electronically by the end of the month following the end of the taxable month. Otherwise, VAT return filing is completed quarterly (i.e. within 20 days following the end of a taxable quarter). The taxable quarter is a period of...
Mauritius

three months ending at the end of March, June, September, or December. Also, where the VAT-registered persons are filing pay-as-you-earn (PAYE) returns electronically under the Income Tax Act (ITA), they are required to file the VAT returns electronically by the end of the month following the taxable period.

**Customs duties**
Customs duty is levied on commodities imported into Mauritius. The rate of duty applicable is the rate in force under the Customs Tariff Act at the time the bill of entry is validated at the Customs.

A number of exemptions and concessions are available to industries, organisations, and persons under the Customs Tariff Act.

**Excise taxes**
An excise duty is levied at the time of importation on selected commodities, which includes spirits, vehicles, and petroleum products at corresponding prescribed rates. A levy is also chargeable on some specified excisable goods, whether the goods are for home consumption or not, at corresponding prescribed rates.

**Campement site tax**
Per the Land (Duties and Taxes) Act, every owner of a campement site situated in a specified zone is subject to an annual tax known as the campement site tax, varying between MUR 2 to MUR 6 per square metre.

The tax shall be payable to the authorised officer on or before 31 July in every year.

**Land transfer tax**
Per the Land (Duties and Taxes) Act, land transfer tax is levied on the transfer of land (excluding the value of any building thereon) and is payable by the transferor at the rate of 5%.

Land transfer tax is also payable at the above rates by the transferor upon transfer of the shares of a company owning immovable properties, based on the value of shares or property, whichever is the lower.

**Leasehold tax**
Per the Land (Duties and Taxes) Act, leasehold tax is levied on the registration of a deed of transfer of leasehold rights in state land. Both the lessor and the lessee are liable to leasehold tax (in equal proportion) at the rate of 20% on the open market value of the leasehold right at the time of transfer.

**Registration duty**
The Registration Duty Act provides for a duty at an effective rate of 5% of the sum of money paid as a condition of an exchange of immovable property, or a division in kind of immovable property, where such sum does not exceed MUR 100,000.

The transfer of shares of a company other than those listed on the Stock Exchange of Mauritius or traded on the secondary market is subject to registration duty if the company holds immovable property.

The following transactions are not subject to registration duty:

- A transfer of immovable property from ascendant to descendant (or vice versa).
- A transfer of property made to a company holding a letter of approval for the implementation of a project under the Real Estate Development Scheme, provided that the transferor holds shares in the company equivalent to at least the value of the land transferred.
• A transfer of immovable property or shares between companies forming part of a group of companies, as defined in the Companies Act 2001.
• A transfer of immovable property where such transfer takes place between companies having the same shareholders for the sole purpose of merging.

**Stamp duty**
Stamp duty is levied and paid to the Registrar General on every document at the time of registration, transcription, inscription, or erasure of inscription. Stamp duty varies from MUR 25 to MUR 1,000.

**Payroll taxes**
Every employer has to register with the MRA as an employer and has to withhold income tax from the emolument of the employee at the time the emolument is made available to the employee.

The employer has to remit the amount withheld within 20 days from the end of the month in which the tax was withheld. Where the employer has 25 or more employees, the PAYE return and tax withheld should be remitted electronically. In cases where the employer has less than 25 employees, the PAYE return and tax withheld may be remitted electronically.

Failure to comply with the above entails a penalty of 5% of the unpaid tax and an interest of 1% per month or part of the month during which the tax remained unpaid.

**Social security contributions**

**National Pensions Fund (NPF)**
Contributions to the NPF are payable by the employer at 6% of cash remuneration, up to a maximum remuneration of MUR 15,710 per month. Employees contributed to the NPF at 3%, subject to a maximum amount of MUR 471 per month.

**National Savings Fund (NSF)**
Employers are required to contribute 2.5% of remuneration to the NSF, subject to a maximum of MUR 393 per month per employee, and to pay a monthly levy of 1.5% of basic salaries and wages of every employee. Employees are required to pay a 1% levy, subject to a maximum amount of MUR 157 per month.

**Branch income**
Tax rates on branch income are the same as on corporate profits. No tax is withheld on the remittance of profits by way of dividend to a head office.

**Income determination**

**Inventory valuation**
Inventories should be valued at the lower of historical cost or net realisable value. The last in first out (LIFO) basis of valuation is not allowed for tax purposes.

Conformity is required between book and tax reporting. Where the MRA is not satisfied that the basis of valuation is acceptable (e.g. where the LIFO basis has been applied), it will make such adjustment as it believes is appropriate to determine the profits arising from the business carried on.

**Capital gains**
There is no tax on capital gains in Mauritius. However, certain transactions are taxed as ordinary business profit instead of capital gains. Where a transaction is in the nature of
Mauritius

trade, the MRA may take the view that it is an ordinary trading transaction and assess the gains derived as income.

Any gains derived from the sale of shares held for less than six months are classified as trading income and are therefore taxed as ordinary income.

Gains realised from the sale of any property or interest in property acquired in the course of a business, as part of a profit-making undertaking or scheme, are taxable as ordinary income.

**Dividend income**
Companies, whether resident or not, are exempt from tax on dividends received from resident companies.

Dividend income received from abroad by a company resident in Mauritius (non-GBC1 company) is subject to tax at the rate of 15%. Credit for any foreign tax withheld is given, subject to documentary evidence provided to the MRA.

Dividend income received from abroad by a GBC1 company is subject to tax at an effective rate of 3%.

**Stock dividends**
A resident company can distribute stock dividends (bonus shares) proportionately to all of its shareholders. Stock dividends *per se* or convertible into cash are not taxable in the hands of the recipient. Dividends in kind (i.e. other than cash or shares) are treated as taxable benefits.

**Interest income**
Interest income received by resident companies (non-GBC1 companies) is liable to tax at the rate of 15%.

A GBC1 company receiving interest income from abroad is liable to tax at the effective rate of 3%.

Interest income paid by any person, other than by banks or non-bank deposit-taking institutions under the Banking Act, to individuals and non-residents is liable to WHT at the rate of 15% (final tax).

**Foreign income**
Resident corporations are taxed on their worldwide income, but tax credit and treaty relief is generally available in order to avoid double taxation (*see Foreign tax credits in the Tax credits and incentives section for more information*).

Undistributed income of foreign subsidiaries is not subject to any special taxation as long as the income of the foreign subsidiary before distribution is not included in the accounts of the local parent company. Dividends paid by the foreign subsidiary to the local parent company will, however, be taxable to the latter, whether or not such dividends are actually received in Mauritius.

**Deductions**

**Depreciation**
Annual allowance rates vary between 5% and 100% of base value (unless stated otherwise), as per the following table:
Tax depreciation need not conform to book depreciation. Depreciation is generally recaptured on disposal or sale when balancing charges or allowances are computed.

**Goodwill**
Goodwill amortised under normal accounting principles is not allowed as an expense for tax purposes. However, the cost amount can be capitalised, and an annual allowance of 5% of cost can be claimed.

**Leasing agreements**
There has been a substantial increase in leasing activity over the last decade. Where an asset is transferred under a financial lease agreement, the lessee is entitled to capital allowances on the value of the asset, including finance charges, as if it was an outright sale by the lessor.

On the other hand, the lessor cannot capitalise the leased assets in its books, and no capital allowance is claimed on the assets leased. However, the lessor is taxable on the interest income derived from the assets leased.

There are no special rules for operating leases.

**Set-up costs**
Set-up costs are not deductible for tax purposes as they are considered as pre-operational expenses.

**Interest expenses**
Expenditure incurred on interest is deductible, provided it is incurred in respect of capital employed exclusively in the production of income.

A request can be made by the tax authorities to support any claim made in respect of interest expense by a certificate from a qualified auditor certifying that the amount of
Mauritius

Interest claimed has been incurred on capital employed exclusively in the production of gross income.

Interest paid by a GBC1 company to a non-resident is exempt from corporate tax.

The tax authorities may refuse to allow a deduction on expenditure incurred as interest where it is found that:

- the interest is payable to a non-resident who is not chargeable to tax on the amount of the interest, or
- the interest is not likely to be paid in cash within a reasonable time.

**Bad debt**
A provision for bad or doubtful debt is generally not deductible unless a court ruling has been obtained against the debtor.

**Charitable contributions**
Donations/gifts, whether to charitable institutions or not, are not deductible for tax purposes.

**Fines and penalties**
Fines and penalties are not deductible for tax purposes as they are expenses not exclusively incurred for the production of gross income.

**Taxes**
Income taxes and foreign taxes paid are not normally deductible; however, some taxes (e.g. municipal taxes relating to buildings, land transfer tax, irrecoverable input VAT) are deductible.

**Other significant items**
A bank or an approved financial institution may claim as deductions any irrecoverable loans due by a company in liquidation in respect of which winding-up procedures have started or by a company in receivership.

**Net operating losses**
Losses made in an accounting year are carried forward for a maximum of five years.

A company may claim to carry forward to an income year any loss it incurred in any former income year, provided the company can demonstrate a 50% continuity of shareholding at the end of those income years. Losses resulting from capital allowances can be carried forward indefinitely. Loss carrybacks are not permitted.

Where a company takes over another company engaged in manufacturing activities, or two or more companies engaged in manufacturing activities merge into one company, any unrelieved loss of the acquiree may be transferred to the acquirer in the income year in which the takeover takes place, on such conditions relating to safeguard of employment as may be approved by the Minister of Finance.

**Payments to foreign affiliates**
Royalties, interest, and service fees payable to foreign affiliates are allowed as expenses, provided they correspond to actual expenses incurred, are reasonable, and do not exceed what would be paid under an arm’s-length agreement. There are certain limitations if the recipient of the interest is not liable to Mauritius tax. Royalties paid to non-residents by GBC1 companies, banks out of their foreign-source income as defined in the ITA, and trusts are tax-exempt.
**Group taxation**

There are no group taxation provisions in the Mauritius tax legislation other than the transfer of losses by tax incentive companies, sugar factory operators, subsidiaries located in the Island of Rodrigues, and manufacturing companies upon their take-over (see Net operating losses in the Deductions section for more information).

**Transfer pricing**

Mauritius does not have any specific transfer pricing legislation. However, it does contain an arm’s-length provision requiring transactions between related parties to reflect a commercially objective value, which would be the amount charged for the services were the parties not connected.

**Thin capitalisation**

Mauritius does not have specific thin capitalisation legislation; however, it does have other anti-avoidance provisions as described below:

If a company has issued debentures to each of its shareholders, subject to the number, the nominal value, or paid-up value of the shares in that company, any interest paid on debentures and claimed as a deductible expense may be disallowed and treated as a dividend.

**Controlled foreign companies (CFCs)**

There are no CFC rules under Mauritius tax legislation.

**Tax credits and incentives**

**Global Business Category 1 and 2 companies**

A GBC1 company can trade with a Mauritian resident as well as non-residents. However, any trading with residents should be only incidental to the main operations with non-residents and should be subject to the Financial Services Commission’s (FSC’s) approval.

Transactions made with a Mauritian resident are taxed at the rate of 15%, whereas transactions with non-residents are taxed at an effective tax rate of 3%.

The registration and application of GBC1 companies should be submitted to the FSC through a duly licensed Management Company on a prescribed form accompanied by the following:

- The certified supporting documents.
- The applicable processing fees and relevant fees.

A GBC1 company is tax resident in Mauritius and may apply for a Tax Residence Certificate (TRC) from the Director General of the MRA should this be required by the tax authorities in the jurisdiction in which the company is conducting its business.

Investors may benefit from an extensive network of DTTs. Entities holding a GBC1 Licence wishing to avail to the benefits of a DTT must obtain a TRC issued by the MRA.

A GBC1 company is encouraged to have more substance in Mauritius by ascertaining the following:

- It has at least two directors, resident in Mauritius, of sufficient calibre to exercise independence of mind and judgment.
- It maintains, at all times, its principal bank account in Mauritius.
Mauritius

- It keeps and maintains, at all times, its accounting records at its registered office in Mauritius.
- It prepares, or proposes to prepare, its statutory financial statements and causes or proposes to have such financial statements to be audited in Mauritius.

In addition to the requirements mentioned above, when determining whether a corporation is managed and controlled from Mauritius, the Commission shall also consider whether a corporation meets at least one of the following criteria:

- The corporation has or shall have office premises in Mauritius.
- The corporation employs or shall employ on a full-time basis, at the administrative/technical level, at least one person who shall be resident in Mauritius.
- The corporation’s constitution contains a clause whereby all disputes arising out of the constitution shall be resolved by way of arbitration in Mauritius.
- The corporation holds, or is expected to hold, within the next 12 months, assets (excluding cash held in a bank account or shares/interests in another corporation holding a Global Business Licence) that are worth at least 100,000 United States dollars (USD) in Mauritius.
- The corporation’s shares are listed on a securities exchange licensed by the Commission.
- The corporation has, or is expected to have, a yearly expenditure in Mauritius that can be reasonably expected from any similar corporation that is controlled and managed from Mauritius.

A GBC1 company can apply for a TRC to show substance in Mauritius. The TRC is generally issued within a period of seven days from the date of application, provided that the person has submitted the return required under the ITA 1995.

A GBC2 company is required to have, at all times, a registered agent in Mauritius. Only a management company shall act as the registered agent of a company holding a GBC2 Licence. A GBC2 company is defined as a resident corporation conducting business outside Mauritius and can engage in activities other than the following:

- Banking.
- Financial services.
- Holding, managing, or otherwise dealing with a collective investment fund or scheme as a professional functionary.
- Providing registered office facilities, nominee services, directorship services, secretarial services, or other services for corporations.
- Providing trusteeship services by way of business.

An applicant for a GBC2 Licence must submit the following forms/documents to the FSC through a management company:

- The application form, duly filled in and signed.
- The certified supporting documents.
- The applicable processing fees and relevant fees.

The fees payable to the FSC for registering a GBC1 and a GBC2 company are as follows:

<table>
<thead>
<tr>
<th>Fee</th>
<th>GBC1 (USD)</th>
<th>GBC2 (USD)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Processing</td>
<td>500</td>
<td>100</td>
</tr>
<tr>
<td>Annual Licensing</td>
<td>1,750</td>
<td></td>
</tr>
</tbody>
</table>

* This amount excludes the annual registration fee of USD 65, or such other fee as the Registrar of Companies may determine, payable to the Registrar of Companies.
The TRC is renewable on an annual basis and issued in two formats, one specific to India and one general for any other country.

A GBC2 company is a limited liability company incorporated in Mauritius. However, GBC2 companies are exempt from Mauritius tax and are not required to file tax returns. GBC2 companies are therefore not able to access the tax treaty network of Mauritius.

Companies in the Freeport zone
The income of a Freeport operator derived from Freeport activities is exempt from income tax, except for income that is derived from goods or services provided on the local market.

Income tax exemption for vessel owners
Owners of foreign vessels registered in Mauritius are exempt from income tax on income derived from the operation of such vessels, including any income derived from the chartering of such vessels. Owners of local vessels registered in Mauritius are also exempt to the extent that the income is derived from deep-sea international trade only.

Foreign tax credits
Generally, double taxation is avoided by means of unilateral credit relief for foreign tax paid. The net amount of foreign income that has borne tax is grossed up at the foreign rate of tax, and the foreign tax paid is allowed as a credit against the Mauritius tax payable. However, the tax credit cannot exceed the Mauritius tax referable to the relevant foreign income. Unused credit is not refunded.

Regarding foreign income derived from countries with which Mauritius has DTTs, a tax credit is given for foreign tax in accordance with the treaties. There are clauses in the DTTs that provide that income arising from certain specified foreign sources is to be exempt from Mauritius tax.

Mauritius has signed DTTs with 43 countries (see the Withholding taxes section for a listing).

The following treaties await ratification: Gabon, Kenya, Nigeria, Russia, and Morocco.

The following treaties await signature: Burkina Faso, Cabo Verde, and Jersey.

The following treaties are being negotiated: Algeria, Canada, Czech Republic, Gibraltar, Greece, Hong Kong, Lesotho, Malawi, Montenegro, North Sudan, Portugal, Republic of Iran, Saudi Arabia, Spain, St. Kitts and Nevis, Tanzania, Vietnam, and Yemen.

A GBC1 company may, in the absence of evidence of payment of foreign tax, claim as tax credit (presumed tax credit) an amount equal to 80% of the Mauritius tax chargeable on the foreign-source income. The presumed tax credit may also be claimed by a bank against the tax payable on income derived from banking transactions with non-residents and with GBC1 and GBC2 companies.

In the case of foreign dividends, the general tax credit includes foreign tax imposed on the profits out of which the dividends are paid (underlying tax), provided that the shareholding in the foreign company is at least 5%.

Mauritius also allows a tax-sparing credit under its local tax legislation.

Withholding taxes
There is no WHT in Mauritius for payments made by GBC companies to non-residents not carrying out any business in Mauritius. There is no WHT on dividends received from
resident companies and on payments made by a company having an annual turnover of less than MUR 6 million. The table below shows the rates of WHT applicable for the following payments:

<table>
<thead>
<tr>

### Tax administration

#### Taxable period

Companies are assessed for a year beginning 1 July and ending 30 June on their income for the preceding year ending 30 June. Where a company closes its accounts at a date other than 30 June, it may elect to adopt as a basis year the accounting year ending in the 12-month period preceding the year of assessment.

#### Tax returns

Every company, both taxpayer and non-taxpayer, must file a return of its income on the basis of the income year preceding the year of assessment. The return must be filed within six months of the financial year-end.

#### Payment of tax

Any tax due should be paid when the return is filed and within the six months deadline.

#### Advance Payment System (APS)

Every company (except non-resident trusts and non-resident partnerships) having gross income exceeding MUR 10 million or that has taxable income is required to submit an APS statement and pay any tax for the quarter immediately following the end of the accounting year.

**Notes**

1. The domestic rate of WHT on dividends is 0%. For completeness, the treaty rates that would apply if the domestic rate was higher are provided.
2. Same rate as under domestic law.
3. 10% of the gross amount of the interest if the beneficial owner is a financial institution, an insurance company, or an investment company receiving income from financial investments; 15% in all other cases.
4. 10% of the gross amount of the interest if it is received by any financial institution (including an insurance company); 15% in all other cases.
5. 5% of the gross amount of the royalties received as consideration for the use of, or the right to use, any copyright of literary, artistic, or scientific work, excluding cinematograph films, tapes, or discs for radio or television broadcasting. 15% is applicable on the gross amount of the royalties in any other case.
Mauritius

Tax under APS can be calculated based on the following:

- 25% of taxable income for the accounting year immediately preceding the commencement of that quarter or
- the actual taxable income of the current quarter.

The APS statement shall be filed and tax (if any) shall be payable within three months from the end of the quarter.

**Penalties**
If timely payment is not made, a penalty representing 5% of the amount of tax due is payable. In addition, interest at the rate of 0.5% of the tax unpaid for each month or part of a month is payable until the tax is paid. A penalty of MUR 2,000 for each month or part of a month is also prescribed for failure to file a return, subject to a maximum of MUR 20,000.

**Tax audit process**
Tax audits are carried out on a sample basis throughout the year. Generally, the audits are fairly detailed, but more protracted enquiries are carried out into cases where fraud is suspected.

**Statute of limitations**
While there is no statutory time limit for recovering tax already assessed, the Director General is barred from making an assessment for a period beyond three years preceding the current tax year.

**Topics of focus for tax authorities**
The MRA pays special attention to the arm's-length nature of any transactions between related parties and evidence of foreign tax suffered predominantly for GBC1 companies in respect of their claim for actual foreign tax credit.

**Other issues**

**United States (US) Foreign Account Tax Compliance Act (FATCA)**
On 27 December 2013, the government of the Republic of Mauritius and the government of the United States of America signed an Agreement for the Exchange of Information Relating to Taxes (the Agreement) to set the legal framework to enable exchange of tax information between the two countries. This was followed by the signing of another agreement known as the Inter-Governmental Agreement (Model 1 IGA) to improve international tax compliance and to implement FATCA. Both agreements have been published in the Government Gazette No. 61 of 5 July 2014 as GN 135 of 2014. Both the Agreement and the IGA entered into force on 29 August 2014.

The Agreement provides for exchange of tax information (upon request, spontaneous and automatic) between Mauritius and the United States. The IGA provides for the automatic reporting and exchange of information in relation to accounts held with Mauritius financial institutions by US persons and the reciprocal exchange of information regarding financial accounts held by Mauritius residents in the United States.

The MRA has issued guidance notes (available on MRA’s website) to provide practical assistance to financial institutions, businesses, their advisers, and officials dealing with the application of FATCA.

**Corporate Reporting Standards (CRS)**
Mauritius signed the Organisation for Economic Co-operation and Development (OECD) Convention on Mutual Administrative Assistance in Tax Matters in June 2015 and, as a
member of the Early Adopters Group, the country had initially planned to implement the CRS early. The effective date of 1 January 2016 was subsequently deferred to 1 January 2017, and the first reporting will now start from 31 July 2018.

The Mauritius ITA was amended to enact the CRS, and the MRA is the competent authority to administer the process. Under the CRS, financial institutions (FIs) will need to report accounts held by non-residents to the MRA, which will be used for eventual exchange with other jurisdictions. In line with the OECD commentaries and handbook on the CRS, the MRA published a set of guidance notes in April 2016 (MRA Guidance Notes) to help identify which FIs have reporting obligations as well as set out the type of financial information and accounts that will need to be reported.
In autumn 2015, Congress approved modifications to the tax regime applicable to the 2016 fiscal year. The following reforms entered into force on 1 January 2016.

**Accelerated deduction**
Companies, including those dedicated to transportation infrastructure and those that invest in hydrocarbon-related activities and the generation of electricity, and individuals engaged in entrepreneurial or professional activities who have obtained revenues in the prior tax year of up to 100 million Mexican pesos (MXN) can apply an accelerated deduction for investments in new fixed assets that were acquired in the last quarter of the 2015 tax year, or in 2016 or 2017.

**Tax Profit Accounts for Investments in Renewable Energy**
Taxpayers dedicated exclusively to the generation of energy from renewable sources or efficient energy through co-generation systems and that have fully deducted their investments shall establish an account designated as a ‘Tax Profit Account for Investments in Renewable Energy’, which will allow for the distribution of dividends without payment of corporate income tax (CIT). This exception does not apply to the withholding tax (WHT) applicable to individuals who are resident in Mexico or abroad.

**Thin capitalisation in the electricity industry**
To determine the amount of debt that exceeds three times the accounting net equity of the taxpayer (under the thin capitalisation rule), debts incurred for the purpose of investment in infrastructure related to the generation of electricity are excluded from the calculation.

**Reinvestment of profits**
Individual shareholders of companies that reinvest profits generated from 2014 to 2016 are entitled to a reduction in tax on dividends of up to 5% to the extent such profits are distributed beginning in 2019.

**Repatriation of capital**
Legal entities (and individuals) that, in the first six months of 2016, repatriate, through the financial system, resources maintained outside of Mexico until 2014 shall be considered to have met their formal tax obligations, so long as they pay the respective tax within 15 days of the date of repatriation (without fees or fines) and satisfy other requirements, including that such investment remain in Mexico for three years.

**Related-party transactions**
As of the 2016 tax year, those taxpayers who are required to present an informational return with respect to their tax status (a DISIF for its acronym in Spanish) are required to present information relating to transactions carried out with related parties by 31 December of the year following the tax year in which the transaction occurred, by way of the following returns:
• Master Informational Return: Including information related to the multifunctional business group.
• Local Informational Return: Including information relating to the taxpayer and related-party transactions.
• Country-by-Country Informational Return: Including information on a tax jurisdictional level, based on the jurisdictions in which the multinational group operates, so long as the taxpayer is the controlling multinational company, a Mexican tax resident, or a foreign resident with a permanent establishment (PE) in Mexico and has been designated as the party responsible for presenting the tax return.

**Tax deconsolidation**
Companies that, until 2013, consolidated with their subsidiaries for tax purposes are entitled to reduce their deferred tax by crediting against the consolidated tax the tax on dividends paid between members of the group, and to reduce by up to 50% the consolidated tax by applying losses (valued at 15%) incurred by the controlled entities. Companies that exercise this option must meet several requirements, including participating for five years in a real-time verification program implemented by the Revenue Administration Service (Servicio de Administracion Tributaria or SAT).

In addition, the controlling company that incurred losses upon the alienation of shares issued by a controlled company and did not reverse such losses for purposes of calculating the deferred tax is entitled to rectify their tax status over ten payments.

**Fiscal Certainty Agreement**
The Mexican Executive Branch announced a unilateral agreement aimed to create fiscal stability and certainty to taxpayers, whereby the Mexican government committed, among others, to the following actions:

• Not proposing new federal taxes nor increasing the rates of existing federal taxes until the end of the current administration’s term, which is 30 November 2018.
• Not limiting or eliminating the existing tax benefits or tax exemptions in regards to federal taxes until the end of the current administration’s term, which is 30 November 2018.

**FIBRA-E investment structure for the energy industry in Mexico**
The FIBRA-E provides vehicles for investment by both investors and the general public that offer significant tax and economic advantages similar to the Master Limited Partnership (MLP) structures used in other countries (the main difference being the FIBRA-E does not allow for a tax deferral on the capital gain triggered by contribution of assets). This structure effectively permits a deferral of income tax of up to 5% of the taxable profits on the activity and eliminates the Mexican dividend WHT on distributions pertaining to the designated activities.

The FIBRA-E will be required to invest in entities (qualifying companies) that engage in, operate, and generate their revenues from one of the following ‘exclusive activities’:

• Those provided in Article 2 of the Hydrocarbons Law, not including the recognition, seismic testing, exploration, and production of hydrocarbons and the transfer, commercialisation, or sale to the public of hydrocarbons.
• The generation, transmission, and distribution of electricity.
• Investment projects involving contracts between the public and private sectors for the provision of services to the public sector or final user, provided that the projects are in operation at the time of the investments made and have a remaining term of at least seven years. The investment projects can be in any of the following areas:
  • Roads, highways, railways, and bridges.
  • Urban transportation systems.
  • Ports, maritime terminals, and port facilities.
  • Civilian airfields, excluding those with private services.
Mexico

- Growth of the nation’s telecommunications network.
- Public safety and social regeneration.
- Drinking water, drainage, sewerage, and waste water treatment.

---

**Taxes on corporate income**

**Federal corporate income tax (CIT)**

CIT applies to Mexican resident taxpayers’ income from worldwide sources, as well as to foreign residents on the income attributed to their PEs located in Mexico.

The federal CIT rate is 30%.

All corporate entities, including associations of a civil nature, branches, etc., are subject to the tax rules applicable to Mexican corporations (unless specifically ruled out, such as not-for-profit organisations).

Taxpayers engaged exclusively in agriculture, livestock, fishing, and forestry activities are subject to a reduction of 30% of their tax liability.

Provisions to recognise the effects of inflation for tax purposes in the areas of monetary assets and liabilities (annual monetary adjustment) and depreciable assets are provided in the income tax law, even though recent inflation rates have been decreasing.

Once a corporation has paid its CIT, after-tax earnings (i.e. earnings arising from the after-tax earnings account, Cuenta de Utilidad Fiscal Neta or CUFIN) may be distributed to the shareholders with no tax charge at the corporate level. A WHT on dividend payments to resident individuals or foreign residents (including foreign corporations) applies at the rate of 10%; this WHT does not apply to distributions of profits subject to corporate-level tax prior to 2014. If a corporation makes a distribution out of earnings that for any reason have not been subject to CIT, such as distributions of book earnings (i.e. not yet recognised for tax purposes in Mexico), the corporation will also be subject to CIT on the grossed-up distributed earnings (gross-up factor is 1.4286).

Tax paid on dividends distributed in excess of CUFIN can be credited against the CIT of the year or in the two fiscal years following the year in which the tax on the non-CUFIN distributions was paid. The CUFIN of the tax years in which the credit is applied must be reduced by an amount equal to the grossed-up dividend distribution.

**Local income tax**

There are no state taxes on corporate net income.

---

**Corporate residence**

The federal tax code provides that corporations are deemed residents in Mexico if the principal centre of administration or the effective place of management is located in Mexico. A specific definition of ‘tax resident’ in any tax treaty overrides domestic law definitions, provided the taxpayer is eligible to apply the treaty.

When a company ceases to be a Mexican resident in terms of the Mexican federal tax code or any tax treaty, it is deemed to be liquidated for tax purposes. In such cases, a notification is required at least 15 days before the change, and the CIT return must be filed with the Mexican tax authorities within 15 working days following the date on which the change of tax residency takes place.
Permanent establishment (PE)
The income tax law considers a PE to be any place in Mexico where business activities or services are carried out or rendered by non-residents, such as agencies, offices, mining exploration sites, or any other place of exploration, extraction, or exploitation of natural resources, regardless of the length of time involved.

A foreign insurance company could also be considered as having a PE when it engages in activities consisting of insuring risk or collecting premiums (with the exception of reinsurance activities) in Mexico through a party other than an independent agent.

Sites used for display, storage, or purchasing facilities; inventories imported in-bond to be processed by a third party; short-term construction services; and offices to carry out auxiliary or preliminary activities and information gathering or scientific research are not considered to create a PE in Mexico. Non-residents may also keep merchandise in bonded warehouses (including merchandise delivered for importation into Mexico) without being considered as having a PE.

Based on the Hydrocarbons Law, foreign residents are deemed to have a PE when conducting certain oil and gas activities in Mexico for more than 30 days. This implies that the foreigner would need to satisfy all enrolment, compliance, documentation, withholding, and tax filing and payment obligations applicable to Mexican branches of foreign residents.

A non-resident is not considered to have a PE in Mexico as a result of the legal or economic relationships maintained with companies carrying out certain inventory processing activities (i.e. Maquiladoras) that process goods or merchandise maintained in Mexico by the non-resident by using assets provided by the non-resident or any related party, as long as certain requirements are met. The requirements include the conditions that the non-resident be resident in a tax treaty country and that the Maquiladora complies with the transfer pricing provisions provided in the Mexican income tax law.

Maquila operations are generally defined as those with the following characteristics:

• Raw materials are supplied by a foreign resident (with which a Maquila contract is in place) and are temporarily imported to be processed, transformed, or repaired and are subsequently exported, including, for these purposes, virtual import-export operations.
• The Maquila is also permitted to import goods in accordance with the permanent importation regime. Additionally, local purchases are allowed, as long as such goods are consumed in production and/or exported with the temporarily-imported inventory.
• The processing, transformation, or repair of goods must be performed with temporarily-imported machinery and equipment (M&E) that is the property of the foreign principal. In this regard, the foreign principal must own at least 30% of such M&E. It is important to mention that this M&E may not have been previously owned by the Maquila or by any other Mexican-related party.

Companies that were operating under an IMMEX program (Maquiladoras/in-bond processing companies) prior to 31 December 2009 (grandfathering rule) were not obligated to comply with the rule requiring that 30% or more of the M&E used in the Maquila operation be owned by the foreign principal; however, beginning in 2014, all Maquiladoras are subject to the new Maquiladora rules. In this regard, a two-year period is established for Maquiladoras operating under the grandfathering rule to comply with this requirement on a prospective basis.

Parties resident abroad and engaged in Maquila operations through shelter Maquila companies may not be considered as creating a PE in Mexico when certain requirements
Mexico

are met and certain information is provided to the Mexican Tax Administration in relation to the gross revenues earned and income taxes paid by its non-Mexican-related party. This PE protection is limited to four years.

A definition of PE in any tax treaty overrides domestic law definitions where the taxpayer is eligible to apply the corresponding tax treaty.

Other taxes

Value-added tax (VAT)

VAT is payable at the general rate of 16% on sales of goods and services, as well as on lease payments and imports of goods and services. The sale of medicines, as well as the sale of most food products, is zero-rated. The principal VAT-exempt transactions are the sale of land, credit instruments (including equity shares), residential construction, interest paid by banks, medical services, education, salaries and wages, rentals of residential property, and the sale of non-amortisable participation certificates on real estate investment trusts (REITs), provided specific requirements are satisfied.

Temporary imports under IMMEX and similar programs are subject to the general 16% VAT rate. Such imports may qualify for VAT relief when obtaining special certification from the tax authorities related to the adequate control of such imports. The relief is applied in the form of an immediate VAT credit when clearing customs, which means that the temporary import is done on a cashless basis for VAT. Companies not covered by the certification may apply the same cashless treatment if they post a bond as payment guarantee.

The VAT law also taxes sales in Mexico of temporarily imported goods by non-residents to (i) other non-residents, (ii) Maquiladoras, or (iii) companies in the automotive industry.

The 0% VAT rate, which generally means that no VAT is payable, is applicable to a substantial number of transactions, including the sale of books, magazines, and newspapers published by the taxpayer, the exportation of goods and certain services (including some Maquiladora activities intended for exportation), the sale of certain basic foodstuffs, agricultural goods and services, sales and rentals of farm M&E, and other specified transactions.

VAT paid by business enterprises on their purchases and expenses related to VATable activities (including activities subject to the 0% VAT rate) may usually be credited against their liability for VAT they collect from customers on their own sales, services rendered, etc. The input VAT credit on goods or services of a general nature, or those not specially identified with either taxable or exempt activities for VAT purposes, is computed based on a VAT ratio proportional to the VATable versus VAT activities (taxable and exempt) carried out by the taxpayer. Creditable VAT paid on purchases and expenses in excess of VAT collected from customers is recoverable via either a refund, offset against other Federal taxes, or a credit against subsequent VAT liabilities.

VAT is a ‘cash basis’ tax, with few exceptions (e.g. VAT on some types of interest must be paid on an accrued basis); consequently, only the receipt of payment for goods or services triggers the output VAT liability, and an input VAT credit may be claimed only when the taxpayer pays VAT to its providers of goods and services. VAT is calculated for each calendar month as a final tax. In addition, VAT overpayments may be used to offset the tax liabilities arising from other federal taxes.

VAT must generally be withheld by Mexican residents acquiring or leasing tangible goods from non-residents if such foreign residents do not have a PE in the country to which income is attributed. Mexican business entities are required to withhold VAT
on payments to individuals or entities for services consisting of ground transportation of goods. Mexican corporations must also withhold VAT on commissions paid to individuals, as well as on independent services rendered by Mexican individuals, and on tangible goods leased from individuals.

An information return related to the VATable activities carried out by the taxpayer must be filed on a monthly basis. Definitive monthly VAT payments are required by the 17th day of the immediately following month.

**Customs duties/import tariffs**
Mexico's commercial conditions provide an excellent business and investment opportunity. Mexico is a member of the World Trade Organization (WTO), the Asia-Pacific Economic Cooperation Mechanism (APEC), and the Organisation for Economic Co-operation and Development (OECD).

Mexico lies in a strategic geographical location for international trade, sharing borders with the United States (US) and representing an easy entry to the rest of Latin America, while also facing Europe and Asia.

Mexico has signed multiple Free Trade Agreements (FTAs), which provide for preferential duty rates on foreign trade operations with many more countries. FTAs signed by Mexico include the North American Free Trade Agreement (NAFTA) and agreements with the European Union (EU), the European Free Trade Association (EFTA), and Japan, among many other countries. Most FTAs provide 0% duty rates for almost 90% of the goods to be imported into Mexico.

General Import Duty rates range from 0% to 35%, but most imports fall within the range of 3% to 20% (exceptionally, certain food products, shoes, and textiles pay higher duties).

In general, temporary imports are exempt from customs duties (except for fixed assets in certain transactions). For VAT payments on temporary imports, see above.

**Excise tax**
The excise tax law (Impuesto Especial Sobre Producción y Servicios or IEPS) levies substantial federal excise rates on the importation and/or sale of certain taxable items, such as gasoline (% variable), beer (26.5%), wine (26.5% to 53%), spirits (53%), and cigarettes and other tobacco products (160% plus an additional quota), and on certain services related to these activities, such as commission, mediation, and distribution of excise taxable items, as well as services for raffles and gambling (30%). Excise tax is also applicable to certain telecommunications services (3%).

The excise tax law applies to soft drinks at MXN 1 per litre and to ‘junk’ food at an 8% rate. In both cases, the excise tax is payable by the producer or importer.

In general terms, goods are exempt from IEPS when exported. The input IEPS paid by exporters on their purchases is not creditable, and that tax becomes an additional cost.

IEPS is payable (output tax) and creditable (input tax) on a cash basis. It is payable on the date that the charge invoiced is collected from the client and can be credited when the respective payment is made to the supplier. On imports, IEPS is creditable when paid at the customs offices.

In certain cases, the IEPS legislation allows taxpayers that are not subject to this tax to credit IEPS paid on the acquisition and/or the importation of certain goods.

There is a specific procedure to calculate the tax for beer producers, bottlers, and importers; however, the tax can never be lower than 26.5%.
Mexico

Among other obligations, IEPS taxpayers must file information returns before the Mexican Tax Administration periodically.

**Property taxes**
Annual taxes on real property are levied by Mexico City and all the states at widely varying rates applied to values shown in the property tax records. Assessed values have increased substantially recently in Mexico City and some other areas.

**Title transfer taxes**
The transfer of real estate is, almost without exception, subject to a variable transfer tax at rates averaging 3% to 4%. The tax is levied by most states and Mexico City.

**Stamp taxes**
There are no stamp taxes in Mexico.

**Payroll taxes**
Most Mexican states levy a relatively low tax on salaries and other income earned by employees, which is payable by the employer (e.g. Mexico City imposes a 2% payroll tax payable by the employer).

**Social security contributions**
Employers and employees are required to make contributions to the social security system. These contributions are based on the daily salary plus any other compensation paid to the employee.

**Compulsory profit sharing**
Although not a tax, every business unit with employees (irrespective of the type of organisation) is required to distribute a portion of its annual profits among all employees, except general directors and managers. The amount distributable to the employees is 10% of an adjusted taxable income. The main difference between the taxable income and the profit sharing base is that the tax losses cannot be applied against the profit sharing base.

No profit sharing is paid during the first year of operations. Also, special rules apply for personal service entities and for entities deriving their income from rental activities, both of which can limit their profit sharing payment to the equivalent of one month of regular salary.

The profit sharing amount paid out is a deductible item for CIT purposes, provided certain requirements are met.

**Vehicle taxes**
There is no federal tax on the ownership of vehicles; however, the states may impose a similar tax.

Tax is still levied on the acquisition of new vehicles. This tax is payable in addition to the VAT on the purchase. Note that some vehicles considered as 'hybrid' (e.g. battery assisted vehicles) are not subject to the new vehicle acquisition tax.

**Branch income**

Mexican branches of foreign corporations (i.e. PEs) are generally subject to the same tax rules as Mexican corporations, with some exceptions. Such exceptions include that branches may deduct pro rata allocations of head office expenses, provided certain requirements are satisfied (such as the existence of an applicable tax treaty and a comprehensive agreement for the exchange of tax information between the relevant
teritory and Mexico), but may not deduct remittances to their head offices, even when such remittances are classified as royalties, fees, commissions, services, or interest.

In general terms, profit distributions to the head office (other than those regarded as a return to the head office of the capital invested into the branch, which are reflected in their ‘remittances accounts’) either in cash or in kind from branches or other PEs are subject to the statutory CIT rate on the grossed-up distribution, unless the remittance is made from the CUFIN account balance (i.e. the after-tax earnings account).

Branches are also subject to the 10% WHT on profit distributions, which can be reduced or eliminated based on any applicable tax treaty provision.

**Income determination**

**Recognition of income**
Income is generally recognised on an accrual basis. However, the service revenues of civil entities that render professional services (e.g. law and accounting firms) are reported on a cash basis.

**Inventory valuation**
The costing system to be used will be the incurred cost system, based on historic costs or pre-determined costs. If the requirements provided in the regulations of the income tax law are met, the direct cost system (based on historical costs) may be used.

Inventory may be determined by any of the following methods:

- First in first out (FIFO).
- Identifiable costs.
- Average cost.
- Retail.

The FIFO method must be applied to each type of merchandise and each movement. The monetary FIFO method may not be used. Taxpayers selling goods that are identifiable by serial numbers, at a cost exceeding MXN 50,000, must determine their inventory by the identifiable cost method.

Once elected, a method is compulsory for five years and can be changed only if the requirements established in the regulations of the income tax law are fulfilled. The monetary results of the change in method are amortised over the following five years.

For accounting purposes, different methods and certain variations can be adopted. However, a record of the differences must be maintained, and such difference will not be taxable or deductible.

The cost of imported goods may be deducted (and included in the cost of goods sold) only if it can be supported that the goods were legally imported into the country.

**Capital gains**
Capital gains are taxed as follows.

**Securities**
Gains on securities are included in regular taxable income.

The tax basis of shares of Mexican corporations sold may be increased by the inflation adjustment applicable for the holding period.
When computing the tax basis of the shares, there are certain items to be considered, such as: (i) the movement in the after-tax earnings account (CUFIN) of the issuing company (including the possible negative CUFIN effects), as adjusted for inflation, (ii) the unamortised prior years' tax losses at the date of the sale, (iii) tax losses arising prior to the date on which the shares were acquired and amortised during the holding period, and (iv) any capital reductions of the issuing company.

When the sum of: (i) the CUFIN balance at the date of acquisition of the shares, (ii) the capital reductions paid, (iii) the unamortised prior years' tax losses at the date of the sale, and (iv) the negative CUFIN balance of the issuing corporation is higher than the sum of: (i) the CUFIN balance at the date of the sale and (ii) the tax losses arising prior to the date on which the shares were acquired, and amortised during the shares' holding period, the difference must be subtracted from the tax basis of the shares to be disposed of (potentially resulting in the shares' tax basis being equal to zero).

When the aforementioned difference exceeds the tax basis of the shares disposed of, this excess (restated by inflation) must be subtracted from the tax basis of the shares in any subsequent share sale by the same taxpayer, even if the shares are issued by a different company.

The aforementioned procedure allows the average cost (tax basis) of the shares to be determined, which is then updated and considered as the acquisition cost for future sales.

A different but simpler procedure is available (optionally) for computing the tax basis of shares held during a period of 12 months or less.

Deduction of losses arising from the sale of shares is limited to the value of gains from similar transactions in the same or the following ten fiscal years. Losses may not be deducted by non-residents selling shares.

A gain from the sale of shares is considered Mexican-source income when the transferred shares are issued by a Mexican resident or when more than 50% of their book value arises directly or indirectly from immovable property located in Mexico, including cases where the shareholding is structured in different levels.

In general terms, the sale by non-residents of shares issued by a Mexican company is subject to a 25% WHT applicable to the gross amount of the transaction (i.e. without deductions). However, there may be the option for gains realised by non-residents on the sale of shares issued by a Mexican company to be taxed by applying the 35% rate to the net gain (i.e. the value of the transfer less the tax basis of the shares). The tax rate for these purposes is generally the same as the top bracket rate for individuals, unless a lower tax treaty rate is applicable.

This net income election is available only if the foreign shareholder is resident of a country that is not considered a ‘preferred tax regime jurisdiction’ (tax haven) or a country with a territorial tax system. The non-resident seller must have previously appointed a representative in Mexico and have a public accountant assigned to issue a statutory tax audit report on the transfer of shares. The public accountant issuing the respective report must specify the accounting value of the shares sold and explain the factors used in determining the sales price and the market value of the shares if shares are sold between related parties.

The representative is jointly liable for the tax on the sale of shares, even when the statutory report is issued by a public accountant.

The tax authorities may authorise the deferral of taxes that would otherwise be triggered by the transfer of shares in a group reorganisation (the authorisation must be
obtained prior to the share transfer). The price used on the transaction must be at arm’s length. The tax deferred, adjusted for inflation, is due upon the sale of the originally transferred shares outside the same interest group. An interest group consists of shareholders that have over 50% common voting stock of the companies.

In principle, authorisations for tax deferral are not granted if the party acquiring or selling the shares is resident in a tax haven or is a resident of a country that has not signed a comprehensive exchange of information agreement with Mexico. However, in the latter case, an authorisation may still be granted if the taxpayer provides documentation to the Mexican tax authorities stating that the taxpayer has authorised the foreign tax authorities to provide information to the Mexican authorities regarding the operation in question.

If the share sale qualifies as an exempt reorganisation under tax treaty rules, the non-resident must appoint a legal representative in Mexico prior to the sale and file a notice with the Mexican Tax Administration informing them of such appointment and the details of the reorganisation process intended to be carried out. Additionally, certain formal requirements are established in the regulations of the Mexican income tax law that must be satisfied when carrying out this type of transaction.

Tax treaty rules (optionally) override domestic law rules when the seller resides in a tax treaty country.

**Shares sold through the stock market**

Capital gains realised on (i) the sale of shares issued by Mexican companies, (ii) securities exclusively representing such shares, (iii) shares issued by foreign companies quoted in the Mexican stock market, and (iv) derivative financial operations referenced to stock indexes and/or to the aforementioned shares, when the sale is conducted in stock markets or in derivative markets recognised under the Securities Market Law, are subject to a 10% income tax rate.

The applicable income tax on the gain obtained must be withheld by the broker/intermediary; however, there is no obligation to make this withholding if the investor is a resident in a country with which Mexico has signed a tax treaty to avoid double taxation and provides the broker with a sworn statement explaining said situation and providing their registration number or tax ID issued by the proper authorities in their country. If this is not provided, the income tax must be withheld.

In certain cases, the 10% income tax on the sale of such shares does not apply, but the general treatment (i.e. 25% on the gross or alternatively 35% on the gain as above mentioned) must be applied.

**Real estate**

In determining the taxable gain of real estate, the cost basis of land and buildings may be adjusted (i.e. increased) for tax purposes on the basis of the period of time for which the assets have been held. This adjustment is performed by applying inflation adjustment factors to the net undepreciated balance. Similar rules apply to non-residents electing to pay tax on net income by appointing a legal representative in Mexico. The rate of tax on the net gain is 35% (or lower treaty rate). Otherwise, the 25% final WHT on gross income applies to non-residents.

**Machinery and equipment (M&E)**

Gains or losses from the disposal of machinery, equipment, and other fixed assets are also calculated after adjusting the basis in these assets, by applying inflation factors to the net undepreciated balance.
**Mexico**

**Inflationary gain or loss**
Taxpayers are required to calculate an adjustment for inflation (resulting in additional taxable income or deductible expense) on an annual basis by applying the percentage increases in the National Consumer Price Index (NCPI) to the value of essentially all liabilities, reduced by monetary assets, including bank balances, investments (except in shares), and some debt and receivables.

**Dividend income**
Dividends received by Mexican corporations from other Mexican corporations need not be included in gross income. Dividend income must be included within the recipient corporation's CUFIN.

No further corporate-level taxes apply on dividends distributed out of the CUFIN. However, non-CUFIN distributions (i.e. distributions that for any reason have not been subject to CIT) are subject to tax at the level of the distributing company at the general income tax rate on the grossed-up distribution at the effective rate of 42.86%. This tax is creditable in the year of payment or two subsequent years.

**Interest income**
Interest received by Mexican corporations is generally subject to tax on an accrual basis and included in gross income (*see also Inflationary gain or loss above*).

**Foreign income**
A Mexican corporation is taxed on foreign-source income when earned. Double taxation is reduced, or possibly eliminated, by means of foreign tax credits. However, the undistributed profits of a foreign subsidiary are not subject to Mexican tax until dividends are paid, with the exception of companies with investments in entities located in a tax haven or income subject to preferred tax regimes (PTRs) (*discussed below*), in which case income is generally taxable even if no distributions are received from those entities.

**Investments in tax havens (income subject to PTRs)**
Investments in tax havens include those made directly or indirectly in entities, branches, real property, shares, bank accounts, or investment accounts, and any kind of participation in entities, trusts, joint ventures, or investment funds, as well as in any other similar legal entities created or incorporated in accordance with foreign law and located in a tax haven, and including those that are carried out through an intermediary.

A business, entity, trust, or joint venture is considered to be located in a tax haven when it has a physical presence, an address, a post office box, or effective management in a tax haven, or when its bank account is held in or through financing entities located in a tax haven.

Unless it can be demonstrated that the taxpayer does not have management control of the foreign investments, the taxpayer must include the income generated through such entities or foreign vehicles in the proportion that corresponds to their direct or indirect participation in the capital of the entity or vehicle.

Income and profits subject to PTRs are taxed separately. This income cannot be combined with other taxable income or losses and it is not considered for purposes of making advance income tax payments. Tax applicable to this type of income is payable together with the annual CIT return.

The classification of a PTR is not based on the location of the investment but on the tax effectively paid on the income generated abroad. An investment is considered subject to a PTR if the income is not subject to tax or tax paid abroad is less than 75% of the income tax that would have been incurred and paid in Mexico if the income had been taxed under Mexican rules.
In general, interest income and the annual inflationary adjustment made to liabilities of the investment in the tax haven are included in taxable income without subtracting the annual inflationary adjustment on receivables. However, the annual inflationary adjustment on receivables may be subtracted from interest income earned, provided an information return is filed.

Tax on investments in a PTR is determined by applying the general CIT rate to taxable income. Additionally, net operating loss carryforwards associated with an investment in a PTR may be amortised against the tax profit of the following tax years arising from investments in a PTR, and tax deductions related to the investment may also be applied, as long as accounting records pertaining to those investments are available and the annual information return on the investments is filed on time.

Undistributed income from investments in entities located in a PTR need not be immediately included in taxable income (under the provisions discussed above) in certain particular cases (e.g. income arising from qualified active business activities in accordance with the applicable legislation and in the case of passive income from indirect investments in a tax haven when certain strict conditions are met).

Income earned in a PTR will be taxed until its distribution where the PTR income arises from a business activity. This treatment will not be applicable, however, if income such as interest, dividends, royalties, certain capital gains, and rents (i.e. passive income) represent more than 20% of the total income generated.

Other specific cases of income on which the tax may apply until distribution include the case of share transfers within the same group and for income derived from royalties and interest that do not represent a tax deduction for Mexican tax residents, to the extent that certain specific requirements are satisfied.

**Maquiladoras**

As discussed in the Corporate residence section, companies operating under an IMMEX program (Maquiladoras/in-bond processing companies) are considered to not have a PE in Mexico. This is the case for the non-resident principal that owns the M&E and inventory, to the extent it is a resident of a country that has a tax treaty in force with Mexico, complies with all the terms and requirements of the treaty, satisfies any mutual agreements between Mexico and its treaty partner, and complies with the transfer pricing provisions provided in the law.

Revenues associated with productive activities must be derived solely from Maquila activities. Additionally, the rules on M&E ownership are consistent with the IMMEX decree definition (i.e. 30% or more of the M&E used in the Maquila operation must be owned by the foreign principal).

The effective income tax rate on Maquila profits is 30%.

In terms of transfer pricing, only the safe harbour and advance pricing agreement (APA) alternatives are applicable to Maquilas.

Under a Presidential Decree published in Mexico’s Official Gazette, the following benefits are also granted to the Maquiladora industry:

- An additional deduction for 47% of tax-exempt benefits paid to employees involved in the relevant Maquila operation (since 2014, the Mexican tax law limits this deduction to 53% of tax-exempt benefits). Maquiladoras applying this benefit should inform the Mexican tax authorities of the amount of the benefit granted, and how it was determined, in a report due March of each taxable year.
- For Maquiladoras operating under the grandfathering rule applicable to Maquiladoras established prior to 2010 (i.e. not obligated to comply with the rule
Mexico

requiring that 30% or more of the M&E used in the Maquila operation be owned by the foreign principal), the decree establishes a two-year period to comply with this requirement on a prospective basis.

- For sales of goods that are located in Mexico between a foreign resident and a Maquiladora that are taxed at the 16% VAT rate, the Maquiladora may credit the VAT in the same month of the sale if certain certification requirements are met. This benefit applies if a certification is secured.

Additionally, among other rules, the Miscellaneous Tax Regulations (MTRs) include further guidance in connection with the Maquiladora industry, as follows:

- Revenues associated with productive activities must derive solely from Maquila activities. In this regard, this rule provides that such revenues may also include those obtained for other Maquila services rendered to related parties resident abroad and other miscellaneous income, provided that the Maquila’s books clearly identify every type of income and related expenses.
- Income relating to the manufacture and distribution of finished goods for resale cannot be considered as ‘solely derived from Maquila manufacturing activities’.
- The MTRs also provided that a foreign principal may still apply safe harbour protection relating to PE immunity contemplated in the 2013 Income Tax Law, provided that the foreign principal is resident in a country with which Mexico has a double tax treaty (DTT) and the principal is fully compliant with any treaty requirements applicable to its Mexican activities.

**Deductions**

The applicable deduction requirements must be complied with no later than the last day of the tax year to which the deduction applies, although the invoice supporting the expense may be provided up to the date on which the tax return for the period in question is filed (or comes due). An expense invoice must contain a date within the year for which the deduction is claimed.

Deductions for certain business expenses are limited in the case of business meals and use of company-owned cars.

**Depreciation and amortisation**

Straight-line depreciation is permitted at the rates specified in the law (i.e. estimated lives for assets are 20 years for buildings, 3.3 years for computers, 4 years for cars [the deductibility threshold for cars has been raised from MXN 130,000 to MXN 175,000, starting from 2016], 10 years for certain M&E, etc.), and the deduction may be increased by applying the percentage increases in the NCPI from the month in which the asset was originally acquired. When an asset is disposed of or becomes useless, the remaining undepreciated historical cost may also be deducted, after application of the appropriate inflation adjustment factor to the undepreciated historical cost.

Starting from 2016, companies, including those dedicated to transportation infrastructure and those that invest in hydrocarbon-related activities and the generation of electricity, who have obtained revenues in the prior tax year up to MXN 100 million, can apply an accelerated depreciation (i.e. lump-sum deduction) for investments in new fixed assets that were acquired in the last quarter of the 2015 tax year, or in 2016 or 2017. The accelerated depreciation rate varies from around 60% to 90% depending on the type of assets and the year of acquisition (i.e. 2016 or 2017).

Intangible assets for the exploitation of goods that are in the public domain, or for rendering public services under concession, are considered deferred assets (i.e. not deducted as incurred). Therefore, these assets are subject to amortisation for income tax purposes.
Specific annual depreciation rates are established for goods used in certain industries.

**Goodwill**
Goodwill is a non-deductible item for Mexican tax purposes, and the corresponding input VAT (if any) will not be creditable.

**Start-up expenses**
Start-up expenses incurred prior to the commencement of operations may be amortised at the rate of 10% per year, after applying the adjustment factors.

**Interest expenses**
In general terms, interest expenses are deductible items if, among others, the principal is invested in the main activity of the Mexican taxpayer, withholding obligations are complied with, informative returns disclosing information related to the loan and transactions carried out with related parties are filed, thin capitalisation rules (3:1 debt-to-equity ratio) are satisfied, the transaction is at arm’s length, and the interest does not fall into the deemed dividend criteria (see the rules for the deductibility of interest payments at the end of this section).

**Bad debts**
Bad debts may be deducted on the earlier of the date on which the debt prescribes or the date on which the taxpayer substantiates the practical impossibility of collection, as defined by the law, among other detailed rules.

**Charitable contributions**
The maximum amount for deductible donations is limited to 7% of the taxable income of the previous year.

**Fines and penalties**
In general terms, fines and penalties are non-deductible items for income tax purposes, except interest for underpayment of taxes.

**Taxes**
In general, all federal, state, and local taxes levied on a company (not including those required to be withheld from other parties) represent deductible expenses for CIT purposes, with the following exceptions:

- CIT.
- Federal VAT and excise tax when the company is entitled to credit the tax.
- Taxes on acquisitions of fixed assets and real estate, which must be capitalised and deducted as part of the total cost of such assets to be depreciated.

**Net operating losses**
Subject to certain limitations, losses incurred in prior years by a business may be carried forward and deducted from income earned over a subsequent ten-year period. Net operating loss carrybacks are not allowed.

Losses carried forward may be increased by the percentage increase in the NCPI between the seventh and 12th months of the fiscal year in which they are incurred and thereafter up to the sixth month of the fiscal year in which they are applied.

In the case of entities engaged in activities related to the exploration and production of hydrocarbons in maritime waters at depths of 500 metres or more, net operating losses (following the same adjustment rules mentioned above) may be used to reduce their taxable income within the following 15 years.

Tax loss carryforwards are non-transferable; however, they can be used by the surviving entity in a merger, with certain restrictions. In the case of a spin-off, tax loss
carryforwards can be divided between the surviving entity and the spun-off entities in proportion to the following:

- Inventories and accounts receivable transferred in the case of commercial entities.
- Fixed assets transferred, in all other cases.

Current tax legislation limits the utilisation of tax losses in changes in ownership, with certain exceptions and limitations.

**Payments to foreign affiliates**

Taxable income and authorised deductions must be determined on the basis of prices that would be agreed with independent parties in comparable transactions (arm’s-length values).

For this purpose, taxpayers must secure and maintain contemporaneous documentation supporting transactions with related parties residing abroad, demonstrating that income and deductions are based on market values. This documentation must be prepared per type of transaction and must include all operations carried out with related parties.

Domestic transactions must also be supported by the application of a recognised transfer pricing method selected in accordance with the preferred ordering methods determined in the legislation.

Payments made to residents of tax havens (or PTRs) are considered non-deductible unless it can be demonstrated that the price of the transaction is the same that would have been set between or among unrelated parties in comparable transactions. Unless the contrary is demonstrated, it is assumed that operations with companies, entities, or trusts resident in a PTR are carried out between or among related parties and that prices are not set as they would be in comparable operations between or among independent parties.

The sales price of shares (other than publicly traded shares) sold to a related party must be set at market value, and the transaction must be supported by the corresponding contemporaneous transfer pricing documentation.

Payments to non-residents of a prorated portion of expenses (i.e. allocations of expenses) are not deductible for Mexican corporations.

A deduction for expenses that are also deducted by another related entity is not allowed unless the corresponding income is included in the related entity’s taxable income in the same or in a subsequent tax year.

**Technical assistance, royalties, and interest payments**

In order to be deductible, payments of technical assistance fees and for the transfer of technology or royalties must be made directly to companies with the required technical capabilities to provide the corresponding service and should correspond to services actually received.

A deduction for technical assistance, interest, or royalty payments (including those related to M&E leases) is not allowed when paid to a foreign entity that controls or is controlled by the Mexican entity and (i) when and to the extent that the recipient is a transparent entity whose owner or owners are not subject to tax in its jurisdiction, (ii) the recipient country of tax residence considers the payment to be disregarded, or (iii) the recipient does not include the payment as part of its taxable income under its jurisdiction’s rules.
**Group taxation**

The income tax law contains a chapter that allows certain holding companies to file a consolidated income tax return with their majority-owned subsidiaries. Tax consolidation is applicable for CIT purposes but not for other taxes (e.g. VAT) or compulsory employee profit sharing.

Companies that, until 2013, consolidated with their subsidiaries for tax purposes are entitled to reduce their deferred tax by crediting against the consolidated tax the tax on dividends paid between members of the group, and to reduce by up to 50% the consolidated tax by applying losses (valued at 15%) incurred by the controlled entities.

The current income tax law repealed the tax consolidation rules that were in effect until December 2013, but also introduced a new simplified tax consolidation (deferral) regime.

Due to the repeal of the former tax consolidation regime, the new law provides three options for computing the deferred consolidated income tax benefit, which will be payable over a five-year period. MTRs provide an additional option and other rules for computing the deferred tax.

The principal requirements for a company to qualify as a holding company for the current tax consolidation regime are that it must be a Mexican tax resident with no more than 80% of its shares owned by other companies, regardless of their country of residence. Shares that qualify as placed among the general investing public and non-voting shares are not considered for this purpose.

Where more than 80% of the holding company’s shares are held by a foreign corporation, the above qualifying rule precludes the possibility of filing a consolidated return for a Mexican group, for companies that would otherwise qualify. However, there is an exception in cases where the foreign corporation that owns the shares of the Mexican holding company is a resident in a country that has executed a comprehensive agreement for the exchange of tax information with Mexico.

As of May 2016, Albania, Argentina, Aruba, Australia, Austria, Bahamas, Bahrain, Barbados, Belgium, Belize, Bermuda, Brazil, Canada, Cayman Islands, Chile, China, Colombia, Cook Islands, Costa Rica, the Czech Republic, Denmark, Ecuador, Estonia, Finland, France, Georgia, Germany, Ghana, Gibraltar, Greece, Guernsey, Hong Kong, Hungary, Iceland, India, Indonesia, Ireland, Isle of Man, Italy, Japan, Jersey, the Republic of Korea, Kuwait, Latvia, Liechtenstein, Lithuania, Luxembourg, Malta, Moldova, the Netherlands, the Netherlands Antilles, New Zealand, Norway, Panama, Poland, Portugal, Qatar, Romania, Russia, Samoa, Singapore, Slovak Republic, South Africa, Spain, St. Lucia, Sweden, Switzerland, Turkey, Ukraine, the United Kingdom, the United States, and Uruguay have agreements of this nature with Mexico; other agreements or tax treaties that might contain such an agreement are awaiting ratification or being negotiated.

The Mexican Tax Administration must authorise the application of the consolidation regime, and written consent of the legal representative of each of the companies must be filed before 15 August of the year prior to the first year of consolidation to request the proper authorisation. Special tax accounts should be kept by each of the companies of the group.

There are some entities that are non-qualifying entities for inclusion in the new consolidation regime, such as non-profit entities, credit institutions, insurance corporations, trusts, auxiliary credit institutions, stock exchange entities, foreign exchange houses and capital investment companies, non-resident companies, companies in liquidation, civil or social associations, cooperatives, and *maquiladoras*. 
In general terms, the current consolidation regime allows an individual company to offset losses against profits of other companies in the same group during a three-year deferral period.

The deferred income tax must be paid by each of the entities of the group on the same date on which they are required to file their annual income tax return for the year following that in which the three-year deferral period concludes. The deferred income tax will be paid updated with the accumulated inflation adjustment from the month in which the tax was deferred to the month in which the tax is paid.

The deferral benefit must be paid before the three-year deferral period if:

- a member leaves the consolidated group
- the ownership percentage is reduced, or
- the group is deconsolidated.

**Transfer pricing**

Mexican transfer pricing legislation is based on the OECD principles. This has resulted in the implementation of transfer pricing guidelines that are in line with the global economy and market liberalisation.

In general terms, from a Mexican transfer pricing perspective, all related-party transactions (including certain joint-venture relationships) must be reported at arm’s length.

Those taxpayers who are required to present an informational return with respect to their tax status (a DISIF for its acronym in Spanish) are required to present information relating to transactions carried out with related parties by 31 December of the year following the tax year.

Local legislation allows the selection of both traditional methods and profit-based methods consistent with the OECD guidelines. However, the legislation requires a strict ordering for the application of a method, starting with the comparable uncontrolled price (CUP) method (other methods can only be used if the CUP method is justifiably inapplicable).

Mexican legislation is generally ‘form over substance’ oriented; consequently, contractual terms remain relevant when defining the economic substance of the transactions subject to the transfer pricing analysis.

Reliable financial information is not always publicly available for Mexican entities. Hence, reliance is often placed on foreign information, which is then adjusted to properly reflect local market conditions and render the transactions in question more comparable.

**Thin capitalisation**

Interest generated by excess debt lent by a related party is non-deductible for CIT purposes. Excess debt is defined as more than three times the value of shareholders’ equity (i.e. a 3:1 debt-to-equity ratio) as per the taxpayer’s Mexican Generally Accepted Accounting Principles (GAAP) or International Financial Reporting Standards (IFRS) balance sheet.

In principle, all liabilities are considered in determining the annual average liabilities for purposes of calculating the ratio and thereby the disallowed interest expense amount. However, certain liabilities incurred for construction, operation, or maintenance of the productive infrastructure associated with the strategic areas of Mexico may be excluded from this computation.
Taxpayers may also be able to obtain a ruling from the Mexican Tax Administration in order to apply a higher financial leverage (i.e. not the 3:1 debt-to-equity ratio), owing to the characteristics of their activities. Also, the thin capitalisation rules do not apply to the financial and electricity sectors.

In addition, taxpayers are entitled to use the sum of the average balances of the capital contributions account (CUCA) and the CUFIN to determine the 3:1 debt-to-equity ratio instead of shareholders’ equity. Taxpayers that opt for this tax equity computation must continue to use it for at least five years. This alternative computation is mandatory for those taxpayers that do not account for capital following Mexican GAAP.

Specific provisions dealing with the disallowance of interest expenses for debt financing structured though back-to-back loans should also be closely observed.

**Controlled foreign companies (CFCs)**
*See Foreign income in the Income determination section for a description of the taxation of undistributed profits of foreign subsidiaries.*

---

**Tax credits and incentives**

**Foreign tax credit**
The income tax law allows Mexican corporations and individuals a foreign tax credit on income from foreign sources. The law provides that taxpayers may credit against their Mexican income tax liability the amount of income tax paid in foreign countries on their foreign-source income, as long as such income is subject to income tax in Mexico.

In general, credit is available in respect of foreign income taxes directly withheld from foreign-source income or paid with a tax return filed in the foreign country in the name of the Mexican resident or by a foreign branch of a Mexican corporation. However, in the case of dividends or distributions of profits received from corporations resident in a foreign country, when a Mexican corporation owns at least 10% of the capital of the foreign corporation for six months prior to the dividend, a deemed-paid credit can also be taken for the proportionate part of the underlying foreign CIT paid by that corporation, corresponding to the dividend or distribution of profits received. In calculating the amount of income subject to Mexican tax in these cases, the dividend or distribution must be grossed up to include the proportionate amount of tax paid by the foreign corporation. This credit is also allowed on tax paid on a second holding tier, provided certain requirements are met, which include mainly the existence of an exchange of information agreement between Mexico and the country of source.

The foreign tax credit will be allowed up to the effective Mexican rate of tax on the taxable income (tax result) shown by the annual return under a per country and per income type limitation. Taxpayers who are not in a position to take full credit for the taxes paid to a foreign country on foreign-source income are allowed a ten-year carryforward of such excess foreign taxes, provided certain compliance requirements are met and the credit is limited to the corporate tax rate of 30%.

The Mexican tax authorities have internal criteria that they follow to determine whether or not a foreign tax is considered as an income tax for purposes of applying the tax credit.

**Duty-deferral programs**
A deferral program is an authorisation provided by the Mexican Ministry of Economy to those companies importing raw materials or fixed assets to manufacture finished products within Mexico for export.
In addition to the benefits described for CIT purposes in the Income determination section, Maquiladoras under the IMMEX program are entitled to the following customs benefits:

• No payment of import duties for temporarily imported raw materials, as long as they are exported.
• Temporarily imported raw materials and fixed assets will not be subject to VAT when the Mexican entity importing the goods obtains a VAT certification (see VAT in the Other taxes section) from the tax authorities related to the adequate control of such imports or posts a bond guaranteeing the VAT payment until the goods are exported.

Another program allowing preferential duty rates is the Sectorial Relief Program (known as PROSEC), which allows manufacturers to apply lower duty rates on the import of raw materials and machinery required for their productive processes, regardless of their country of origin and regardless of if they are for the Mexican market or for export. These programs were created by the federal government in order to establish competitive tariff conditions for Mexican manufacturers needing to import raw materials and fixed assets from non-NAFTA or trade partner countries.

Companies in Mexico that carry out import operations with values of MXN 300 million per semester, or IMMEX companies, can take advantage of significant customs and administrative benefits if registered into the ‘Certified Company Registry’ (authorised by the Ministry of Finance). In addition, companies that comply with certain requirements regarding controls and security within their supply chain, regardless of the MXN 300 million obligation, can also obtain the ‘Certified Company Registry’; this specific type of registry is known as New Scheme of Certified Companies (NEEC for its acronym in Spanish), which is different from the newer VAT certification for IMMEX companies mentioned before.

In general terms, the main benefits provided by the Certified Company Registry allows simplified procedures to process imports and exports, including the reduction in time and number of reviews when clearing goods at customs facilities.

Research and development (R&D) incentives
An income tax incentive for taxpayers involved in certain technological R&D projects carried out during the year allows a cash subsidy to be yearly determined by the tax authorities, based on a budget to be approved by the Mexican Congress.

Employment incentives
An incentive offers a credit equivalent to 100% of the income tax corresponding to the salary paid to workers/employees with certain types of disabilities.

An additional deduction, equivalent to 25% of the salary paid to such workers/employees, is also available.

Both benefits cannot be applied in the same fiscal year.

Incentives for investments in movie production
A limited credit is applicable for investments in movie production activities through an immediate tax credit, which is capped at 10% of the total income tax of the prior year, provided certain requirements are met.

Incentives for investments in theatre production
A limited credit is applicable for investments in theatre production activities through an immediate tax credit, which is capped at 10% of the total income tax of the prior year, provided certain requirements are met.
Incentives for Real Estate Investment

Several tax benefits exist for qualifying real estate investment trusts (i.e. Mexican REITs or FIBRAS) in Mexico.

Capital Investment

There are certain incentives to encourage risk capital investments in Mexico.

Other Incentives

Certain other specific and limited tax incentives are available for taxpayers engaged in certain activities (e.g. those engaged in air or sea transportation of goods or passengers with respect to aircraft and ships with a federal government commercial concession or permit; in the agricultural and forestry sectors; and in-bond warehouses with respect to real property used for the storage, safeguarding, or conservation of goods or merchandise).

Taxpayers dedicated exclusively to the generation of energy from renewable sources or efficient energy through co-generation systems and that have fully deducted their investments shall establish an account designated as a 'Tax Profit Account for Investments in Renewable Energy', which will allow for the distribution of dividends without payment of CIT.

Individual shareholders of companies that reinvest profits generated from 2014 to 2016 are entitled to a reduction in tax on dividends of up to 5% to the extent such profits are distributed beginning in 2019.

Withholding Taxes

Payments to Mexican Residents

Payments to resident corporations and PEs in Mexico are generally not subject to WHT.

Payments by resident corporations to resident individuals are subject to WHT as follows:

<table>
<thead>
<tr>
<th>Payment</th>
<th>WHT (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Wages, salaries, and other remuneration</td>
<td>0 to 35</td>
</tr>
<tr>
<td>Fees:</td>
<td></td>
</tr>
<tr>
<td>Members of boards of directors and advisory boards</td>
<td>35.0</td>
</tr>
<tr>
<td>Other professional fees</td>
<td>10.0</td>
</tr>
<tr>
<td>Lease payments on real property</td>
<td>10.0</td>
</tr>
<tr>
<td>Interest on securities (1)</td>
<td>0.6</td>
</tr>
<tr>
<td>Interest on non-qualified securities</td>
<td>20.0</td>
</tr>
<tr>
<td>Dividends</td>
<td>10.0</td>
</tr>
<tr>
<td>Miscellaneous types of income of individuals, usually sporadic payments</td>
<td>20.0</td>
</tr>
</tbody>
</table>

Note

1. WHT on interest paid by financial institutions to Mexican resident investors is generally set at 0.6% of the invested capital.

Payments to Non-Residents

Income tax must usually be withheld from payments to non-resident corporations and individuals. In the case of non-tax treaty countries, the statutory withholding rates are as noted below.

Income tax of 40%, with no deductions, must be withheld on most payments made to foreign-related parties located in tax havens, in lieu of the tax provided in the domestic
law for non-tax haven residents. This is not applicable in certain cases, such as on income not subject to Mexican taxation in accordance with the regular provisions for income earned by non-residents from a source of wealth located in Mexico, income from dividends, and certain types of interest, including interest payments made to foreign banks. In these cases, the regular provisions of the domestic law should be applied to determine the income tax withholding.

Additionally, revenues for intermediation services, including commissions for brokerage, agents, distribution, and assignment, and generally all income from the negotiation of third-party interests, are also subject to 40% WHT when paid to tax haven related residents. The 40% may be reduced if the beneficiary resides in a country with which Mexico has signed a comprehensive exchange of information agreement.

Non-residents’ wages and salaries are taxed on the basis of a 12-month earnings period at the following income tax withholding rates:

<table>
<thead>
<tr>
<th>Taxable income (MXN)</th>
<th>WHT (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>From 0</td>
<td>0</td>
</tr>
<tr>
<td>125,900</td>
<td>15</td>
</tr>
<tr>
<td>1,000,000 and above</td>
<td>30</td>
</tr>
</tbody>
</table>

The above mentioned rates are also applicable to retirement fund payouts.

However, no tax arises on compensation (wages, salaries, or fees other than board fees) paid by a non-resident with no establishment in Mexico (even if not subject to tax) to which the services relate, provided the individual remains in Mexico for fewer than 183 days (consecutive or not) in any 12-month period.

The tax, when applicable, is withheld if the income is paid by a resident (or a non-resident with a PE in Mexico). Otherwise, the tax is generally payable within 15 working days of the associated payment, by the party earning the Mexican-sourced income.

Statutory withholding rates (not mentioned above) under local legislation are as follows:

<table>
<thead>
<tr>
<th>Payment</th>
<th>WHT (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Professional fees for services rendered in Mexico</td>
<td>25</td>
</tr>
<tr>
<td>Lease of real property</td>

<tr>
<td>Other income (forgiven debts, indemnifications, rights to participate in business, investments, etc.)</td>
<td>35</td>
</tr>
</tbody>
</table>

Notes

1. The non-resident may elect to pay tax at a rate of 35% (see Note 11 below for the rate applicable thereafter) on the net taxable profit in the case of (i) time-sharing services, (ii) share sales, (iii) sales of real property, (iv) activities of sportsmen/artists, and (v) derivative stock and debt transactions, provided that the non-resident recipient of the income has a legal representative resident in Mexico and to the extent that the following specific requirements are met:
   - For time-sharing services, the resident legal representative must keep the audited financial statements of the taxpayer available for inspection by the Mexican Tax Administration.
   - For share sales, a tax opinion issued by a registered public accountant is required.
   - For shares and debt-for-equity swap transactions, this election is available only where the foreign taxpayer is not a resident of a country classified as a tax haven or a country with a territorial tax system. It should be noted that there is an option to defer Mexican income tax arising from the sale of shares within the same group due to a corporate reorganisation, provided certain conditions are met and that no legal representative is required for sales of real property by public deed.

2. The sale of shares through the Mexican Stock Exchange is subject to a 10% WHT. When the investor is a resident in a country with which Mexico has signed a tax treaty, such withholding will not apply if certain requirements are satisfied.

3. The applicable WHT rate (based on the WHT rates for interest) for debt-derivative transactions is applied on a net basis. However, if the transaction is liquidated in kind, the applicable WHT rate (on the same net basis) is 10%.

4. Interest payments to non-residents are exempt from Mexican income tax when they are paid on the following:
   - Loans to the federal government or to the Bank of Mexico (Central Bank) or bonds issued by the latter organisation to be acquired and paid abroad.
   - Loans for three or more years granted or guaranteed by duly registered financial entities that promote exports through special financing.
Mexico

- Preferential loans granted or guaranteed by foreign financial entities to institutions authorised to receive tax-deductible donations in Mexico, provided these institutions are properly registered and use the funds for purposes consistent with their status.
- Loans derived from bonds issued by the federal government or the Bank of Mexico placed on a recognised national stock exchange, to the extent the beneficial owner is a foreign resident.

5. A 4.9% WHT rate is applicable when the interest is paid to banks resident in countries with which Mexico has signed a tax treaty.

6. The 4.9% WHT rate applies, provided the placement is handled through banks or brokerage firms resident in a country with which Mexico has signed a tax treaty if there is compliance with the information requirements established in the general rules issued by the Ministry of Finance. If there is failure to comply with these requirements, the 10% WHT rate applies. The 4.9% and 10% WHT rates mentioned in the preceding paragraphs do not apply, and instead a 35% WHT rate is applicable to interest, when the direct or indirect beneficiaries of the interest, either individually or jointly with related parties, receive more than 5% of the interest arising from the instrument in question, and are either (i) holders of more than 10% of the voting shares of the issuing company, either directly or indirectly, either individually or jointly with related parties, or (ii) business entities holding more than 20% of their shares, either directly or indirectly, either individually or jointly with parties related to the issuer.

7. The 4.9% WHT rate is applicable to interest payments made to foreign financial institutions in which the Mexican federal government or the Mexican Central Bank has equity participation.

8. The WHT rate is applied to the gross amount of the payment.

9. The non-resident taxpayer may elect to pay 35% tax on the net profit if the taxpayer has a resident legal representative and so advises the customer, who then makes no withholding. When business activities last for more than 183 days, the foreign taxpayer is deemed to have a PE in Mexico for tax purposes and is taxed in the same manner and subject to the same rules as a local resident corporation or branch.

10. The 21% federal rate is applied only in the case of non-qualifying prizes (i.e. income derived from prizes that is subject to a state tax that exceeds a rate of 6%).

11. The statutory WHT rates mentioned above may be reduced by applying tax treaty provisions. During the last two decades, Mexico has embarked on a policy of negotiating a network of tax treaties with its principal trading and investment partners (see table below).

12. The 10% WHT on dividend payments to foreign residents does not apply to distributions of profits subject to corporate-level tax prior to 2014. If a corporation makes a distribution out of earnings that for any reason have not been subject to CIT, such as distributions of book earnings (i.e. not yet recognised for tax purposes in Mexico), the corporation will also be subject to CIT on the grossed-up distributed earnings (gross-up factor is 1.426).

As of January 2016, the treaties with the following countries are pending ratification while waiting for the completion of specific formalities by the respective governments in order to become effective, have not been published yet in the Official Gazette, or are under negotiation: Argentina, Costa Rica, Guatemala, Jamaica, Lebanon, Malaysia, Morocco, Nicaragua, Oman, Pakistan, Philippines, Saudi Arabia, Slovenia, Thailand, and Venezuela.

As of January 2016, tax treaties with the countries listed in the following table have been published in the Official Gazette and are in force.

The WHT rates negotiated under the tax treaties are as follows:

<table>

The applicable tax rates on dividends paid abroad in accordance with the tax treaties executed by Mexico are detailed below; however, under domestic law, no withholding is applied on distributions of profits subject to corporate-level tax generated prior to 2014, when the 10% dividend WHT started applying.

There are certain specific cases of interest paid to parties resident abroad that might be exempted by certain tax treaties (e.g. interest paid to a pension fund or paid by a bank, interest paid on certain loans.

www.pwc.com/taxsummaries
The Tax Reform gives the Mexican tax authorities the ability to require that the foreign-related party provide a sworn statement through a legal representative that the item of income for which a treaty benefit is claimed would otherwise be subject to double taxation.

1. This rate applies when the recipient corporation that is the beneficial owner of the dividend (except for civil partnerships) directly owns at least 10% of the capital of the distributing corporation. In the case of Barbados, Hungary, and South Africa, the specific exclusion of civil partnerships is not included.

2. This rate applies where the company that is the beneficial owner of the dividends directly or indirectly owns at least 25% of the capital of the distributing company.

3. This rate applies where the company that is the beneficial owner of the dividends (except for civil partnerships) directly owns at least 25% of the capital of the company distributing the dividends.

4. This rate applies where the recipient corporation that is the beneficial owner of the dividend owns at least 10% of the voting shares of the paying corporation. The Mexico-US tax treaty contains a most-favoured nation clause.

5. This rate applies where a company that is the beneficial owner of the dividends (except for civil partnerships) directly owns at least 10% of the voting shares of the company distributing the dividends.

6. This rate applies where a company that is the beneficial owner of the dividends owns at least 20% of the voting shares of the company paying the dividends.

7. This is the maximum WHT rate for dividends, with no distinction for substantial holdings. In the case of Ecuador and India, the tax payable on dividends paid to residents in Mexico must not exceed a limit established in the treaty.

8. The 5% rate applies when a company that is the beneficial owner of the dividends owns at least 25% of the voting shares of the company paying dividends during the six months prior to the end of the tax period in which dividends are paid. Under certain particular rules and provided this ownership requirement is satisfied, dividend payments are only subject to tax in the country of residence of the recipient of the dividends.

9. No withholding applies when more than 50% of the shares of the recipient corporation are owned by residents of France or Mexico or when the beneficial owner of the dividend is a resident individual. Accordingly, the WHT applies to dividends when more than 50% of the recipient corporation’s shares are owned by residents of other countries. However, the WHT must not exceed 5% when the party receiving the dividend is the effective beneficiary of said dividend. Dividends paid by a company resident in France to a resident of Mexico, other than a company that directly or indirectly holds at least 10% of the capital stock of the first-mentioned company, may also be taxed in France, in accordance with the law of France, but if the recipient of the dividends is the beneficial owner, the tax thus charged must not exceed 15% of the gross amount of the dividends.

10. The 5% rate applies where the company that is the beneficial owner of dividends directly or indirectly owns at least 10% of the capital of the company distributing the dividends. There is a 10% tax rate that applies when these same ownership requirements are satisfied, but the company paying dividends is a resident of Israel (provided dividends are paid from earnings taxed in Israel at a tax rate lower than the regular corporate tax rate in Israel).

11. The applicable tax rate on the gross amount of the dividends when the recipient company (beneficial owner) (except for civil partnerships) directly holds at least 10% of the capital of the corporation paying the dividend must not exceed 5% in the case of Luxembourg and 8% in the case of Mexico. The protocol of the Mexico-Luxembourg tax treaty states that this rate might be reviewed in the future by the contracting states if the WHT is not fully creditable, and can be adjusted under the principle of avoiding double taxation, provided the adjusted WHT rate is not lower than 5%.

12. Dividends paid by a company resident in Mexico to a company resident in the Netherlands (which is the beneficiary of said dividends) are subject to a maximum tax of 5% on the gross amount of the dividends if the beneficial owner is a company that directly or indirectly owns at least 10% of the capital of the company paying said dividends. However, as long as a company resident in the Netherlands is not subject to Dutch income tax on dividends received from a company resident in Mexico under the terms of the Dutch income tax law and any future amendments thereto, the dividends mentioned in the preceding paragraph may only be taxed in the Netherlands (not in Mexico).

13. The Mexico–New Zealand tax treaty contains a most-favoured nation clause that may be applicable in the future.

14. The exemption on dividend WHT is not applicable in the case of deemed dividends.

15. To the extent certain requirements provided in the Protocol are met, the WHT may be reduced to 0%.

16. The 10% rate applies to loans from banks.

17. The 5% WHT rate is applicable to interest paid to banks.

18. The 5% rate applies to interest on loans from banks, insurance companies, and retirement and pension plans.

19. The 10% rate applies to interest on loans from banks, insurance companies, and securities regularly and substantially traded on a recognised national stock exchange.

20. The 4.9% rate applies to interest on loans from banks and insurance companies and to interest on securities regularly and substantially traded on a recognised national stock exchange.

21. In the case of the Netherlands, the 5% rate applies to interest on loans from banks and to interest on securities regularly and substantially traded on a recognised national stock exchange. In the case of Spain and the United Kingdom, the 5% rate extends to interest paid to insurance companies.
22. The 10% rate applies to interest paid by financial institutions and interest paid to the original seller of M&E.
23. The 10% rate on interest applies in the case of interest paid to the original seller of M&E and interest paid by banks.
24. The 10% rate applies to interest on loans from banks and to interest derived from bonds or securities that are regularly and substantially traded on a recognised securities market, as well as to interest paid by the purchaser of M&E to a beneficial owner that is the seller of the M&E.
25. The 10% rate applies to interest on loans from banks and insurance companies, to interest on securities regularly and substantially traded on a recognised national stock exchange, to interest paid to the original seller of M&E in a sale on credit, and to interest paid by banks.
26. The 5% rate is applicable to interest on loans granted by banks and insurance companies, securities traded on a recognised securities market, and the sale on credit of M&E.
27. It is understood that the definition of royalties applies to any type of payment received for the provision of technical assistance services. The 15% rate applies to royalties arising from the use of, or right to use, trademarks.
28. The original rate is 15% but has been reduced to 10% as long as the Netherlands does not impose a WHT.
29. The reduced WHT rate results from the application of the most-favoured nation clause.
30. The 5% rate applies to industrial, commercial, and scientific equipment.
31. The 10% rate also applies to fees for technical assistance, which are payments of any kind, other than those mentioned in Articles 14 and 15 of the treaty as consideration for managerial or technical or consultancy services, including the provision of services of technical or other personnel.
32. This rate applies where the company that is the beneficial owner of the dividends directly owns at least 25% of the capital of the distributing company.
33. The treaty broadly defines royalties and includes payments related to certain software.
34. This rate applies where the company that is the beneficial owner of the dividends directly or indirectly owns at least 10% of the capital of the distributing company.
35. The 5% rate applies on the gross amount of the interest paid to, among others, banks and insurance institutions.
36. Treaty being renegotiated.
37. The protocol of this treaty has already been renegotiated, but is not yet enforced.
38. The 4.9% rate applies on the gross amount of the interest paid to banks and pension funds or pension schemes; the 10% rate applies on the gross amount of the interest paid in any other case.
39. The 5% rate applies on the gross amount of the interest paid to and by banks; the 10% rate applies on the gross amount of the interest in all other cases.
40. The 5% rate applies on the gross amount of the interest if the beneficial owner of the interest is a bank; the 10% rate applies on the gross amount of the interest in all other cases.
41. The 10% rate applies on the gross amount of the interest if it is paid to a bank; the 15% rate applies on the gross amount of the interest in all other cases.

---

**Tax administration**

**Taxable period**

In general terms, the taxable period in Mexico is the calendar year.

**Tax returns**

Corporate taxpayers are required to file annual CIT returns for the preceding calendar year by 31 March of the following year.

Thereafter, taxpayers meeting certain size criteria or belonging to a group that, as a whole, meets these criteria must submit a tax-compliance informative return in the month of July of the following year.

In lieu of submitting the tax-compliance informative return, business taxpayers meeting certain size criteria may elect to file a tax-compliance audit report on an annual basis with the Mexican Audit Administration. This audit report covers all federal taxes other than customs duties and consists of audited financial statements and detailed schedules, together with a report by the auditor stating that no irregularities were observed in respect of the taxpayer’s compliance with its federal tax liabilities. This report must be filled electronically, and the auditor must be an independent certified public accountant (CPA) registered with the Mexican Audit Administration. The amount of detailed information required to be filed, and the auditor’s responsibility in connection therewith, is significant.

Employees’ profit sharing payments are generally due by 31 May of the year following that in which the corresponding profit was obtained.
Information returns must also be filed not later than 15 February each year, reporting on, amongst others, the following activities performed in the immediately preceding year:

- Payments made to parties resident abroad.
- Loans received from or guaranteed by non-residents.
- Transactions conducted through a business trust.
- Parties to which the taxpayer makes payments and withholds income tax.
- Parties to which the taxpayer has made donations.
- Parties to which the taxpayer has paid dividends, and the value of such payments.
- Transactions carried out with suppliers and clients, either local or overseas.

Taxpayers making salary payments are also required to file information returns reporting salaries paid and salary credit paid in the immediately preceding calendar year.

An annual information return must be filed on investments made or held in a tax haven. This must be filed in February of the immediately following year.

An information return on transactions carried out with non-resident-related parties must be filed together with the annual CIT return (no later than March of the following year).

Additionally, all taxpayers are subject to reporting relevant transactions on a quarterly basis (share acquisitions or dispositions, extraordinary transaction with related parties, corporate reorganisations, among others).

**Payment of tax**

Corporate taxpayers are required to make estimated payments of CIT by the 17th day of each month based on their estimated taxable income at the end of the previous month and calculated principally by applying the profit factor to the cumulative monthly gross income. The profit factor is determined by dividing the taxable profit by gross income shown in the annual return for the preceding year, or, if no profit factor is to be found in that annual return, the factor appearing in the year preceding that and so on, up to five years, with certain adjustments. For this purpose, gross income includes nominal income, excluding inflationary adjustments. The balance of CIT for the year is due at the same time as the annual return.

Special procedures are provided for computing advance CIT payments and for obtaining authorisation to reduce the amounts of monthly advances after the sixth month of the year. No advance payments or adjustments thereto are required in the first year of operations.

**Tax audit process**

In general terms, for taxpayers that elected to file a tax-compliance audit report, the tax audit (tax inspection) may start with a review of the audit report prepared by the independent CPA. At this point, the tax authorities may finish the audit if they are satisfied with the information provided by the CPA; otherwise, tax authorities may initiate a direct review on the taxpayer either at the tax authority's offices or at the taxpayer's facilities. Tax authorities may request several documents from the taxpayer and third parties that carried out transactions with the audited taxpayer.

Tax audits should be concluded within the following 12 months after the audit was initiated. The period to conclude tax audits for taxpayers that are either part of the financial system or consolidated for tax purposes is 18 months. In cases where the Mexican tax authorities request information to tax authorities from foreign jurisdictions, the period to conclude the audit is two years. The above periods might be suspended under certain circumstances (e.g. a judicial recourse or appeal initiated by the taxpayer).
against the tax authorities). Upon conclusion of the audit, the tax authorities should issue either a notification explaining tax underpayments observed during the audit process or a notification of conclusion if no issues remain open at the end of the inspection.

Finally, tax authorities should issue a notification of assessment within the six months after the conclusion of the tax audit. At this point, all underpayments claimed by the tax authorities become due.

**Concluding Agreements**

The Prodecon is a decentralised Mexican government organisation that acts as the Ombudsman of Mexican taxpayers, providing advice and issuing recommendations to the tax authorities. In recent years, Prodecon's Concluding Agreements have become more common and have had a positive impact for taxpayers when it comes to reconciling differences with the tax authority in regards to an audit and controversial assessments.

The agreement applies when a taxpayer is dissatisfied with the authority's tax assessment as a result of an audit. The taxpayer then should file a petition to the Prodecon, noting the facts, omissions, and support elements to expose its defending arguments. The Prodecon then notifies the authority and proposes an agreement to settle the difference and conclude the audit without further procedures. The authority has 20 days to indicate whether or not it accepts the terms that arise in the Conclusive Agreement.

**Statute of limitations**

In general, the right of the tax authorities to collect taxes, review tax returns, or claim additional tax expires five years after the date the respective return is filed. However, in cases where the taxpayer has not secured a federal tax registration number, has no accounting records, has failed to keep accounting records for the required five-year period, or has not filed a tax return, the statute of limitations expires in ten years. Similarly, the period for claiming a refund of overpaid tax expires after five years.

**Topics of focus for tax authorities**

Although there are no formal written communications from the tax authorities dealing with their topics of focus, in recent years the tax authorities have focused audits on transactions with non-residents, inter-company transactions, transfer pricing, social security contributions, and customs duties, among other areas.

**Other issues**

**Relevant transactions disclosure**

All taxpayers are subject to reporting relevant transactions on a quarterly basis. Relevant transactions are defined as share acquisitions or dispositions, extraordinary transaction with related parties, and corporate reorganisations, among others.

**Cash deposits reporting**

Financial institutions are required to report, by 15 February of each year, to the SAT the information on customers making monthly cash deposits in excess of MXN 15,000.

**International Financial Reporting Standards (IFRS) adoption**

All companies listed on the Mexican Stock Exchange are required to submit annual consolidated financial statements accompanied by the opinion of a Mexican independent CPA. These financial statements must be prepared in conformity with IFRS and cover three years. Financial institutions and insurance companies must also file audited financial statements with the appropriate regulatory agency.
The elective adoption of IFRS in Mexico for other companies presents great challenges and opportunities. Changing from Mexican Financial Reporting Standards (MFRS) to IFRS requires companies to review their financial reporting procedures and criteria. Major changes in the requirements often have a ripple effect, impacting many aspects of a company’s information reporting organisation.

Nevertheless, the benefits to Mexican companies in reporting under IFRS are numerous. Among the greatest of these is the opening up of the Mexican Stock Market to overseas investors. By adopting IFRS, investors are able to compare two companies on different sides of the world with greater ease, and thus it is hoped that the change will encourage investment in Mexican companies.

Adoption of IFRS is not a straightforward process, and it will require time and effort on the part of the adopting entities to be able to ensure a smooth transition from MFRS to IFRS and ensure that the changes and benefits from this transition are duly implemented.

**Foreign Account Tax Compliance Act (FATCA) intergovernmental agreement (IGA)**

FATCA was enacted in 2010 by the US Congress to target non-compliance by US taxpayers using foreign accounts. FATCA requires foreign financial institutions (FFIs) to report to the US Internal Revenue Service (IRS) information about financial accounts held by US taxpayers or by foreign entities in which US taxpayers hold a substantial ownership interest.

Mexico signed an IGA with the US Treasury on 19 November 2012 under which Mexican financial institutions are required to report US-owned account information directly to the Mexican tax authority, rather than to the US IRS. The Mexican tax authority will then share that information with the US IRS.

The IGA provides that the United States will reciprocate with the sharing of information.

Mexican tax authorities have issued a set of administrative rules for banks and other financial and related entities to comply with the FATCA IGA.

---

**Significant developments**

There have been no significant corporate tax developments in Moldova during the past year.

---

**Taxes on corporate income**

Resident companies generally must calculate their taxable base for corporate income tax (CIT) purposes on their worldwide income. Permanent establishments (PEs), unlike resident companies, are only required to calculate their taxable base for CIT purposes on income sourced in Moldova.

The CIT rate is 12%. If the Moldovan Tax Authority (MTA), applying indirect methods, re-assesses the income amount compared to the declared gross income, a 15% CIT rate may be applied to the excess amount.

Individual entrepreneurs are subject to progressive rates of 7% for annual income up to 29,640 Moldovan lei (MDL) and 18% for annual income exceeding MDL 29,640.

Farming enterprises are subject to a 7% CIT rate.

Small and medium companies that are not registered as value-added tax (VAT) payers may opt for a special CIT regime of 3% on their turnover (under specific conditions).

---

**Local income taxes**

There is no separate CIT at the local level. CIT is distributed between the national state budget and local budgets depending on the establishment of the entity and its subdivisions in accordance with the existing rules.

---

**Corporate residence**

According to Moldovan tax law, a tax resident is a legal entity organised or managed in Moldova or that has its main place of business in Moldova. In practice, tax residency is determined by the place of incorporation.

---

**Permanent establishment (PE)**

Based on the Moldovan tax law, a PE is a fixed place of business through which a non-resident carries out, wholly or partly, either directly or through a dependent agent, entrepreneurial activity in the territory of Moldova.

Due to the regulatory environment in Moldova, as well as certain difficulties in operating a PE in Moldova, foreign enterprises operating through a PE in Moldova are not common.
Other taxes

Value-added tax (VAT)
The standard VAT rate in Moldova is currently 20%. It is generally applied to local supplies of goods and services as well as to goods subject to import and services subject to the reverse charge mechanism.

Apart from the above, certain types of supplies are subject to reduced VAT rates. For instance, local supplies of bread and bakery products; milk and dairy products; and specific phytotechnical, horticultural, and zootechnical products are subject to the reduced 8% VAT rate.

A number of supplies are subject to the 0% VAT rate (i.e. VAT exempt with the right to exercise the input VAT deduction), including international transportation and exports of goods or services. Certain supplies are subject to VAT exemptions, including financial services and the sale or rental of dwellings and land.

Starting from 1 May 2015, companies no longer have liability to calculate and pay VAT on supply of services or goods performed at the value below cost or below customs value.

Input VAT
Input VAT incurred on acquisitions of goods and/or services may be deducted, provided it is incurred by a VAT registered payer to perform VATable supplies within its business activity.

If input VAT relates to acquisitions destined to perform mixed supplies (i.e. both VATable and VAT-exempt ones), the input VAT deduction right is exercised on a pro-rata basis.

VAT refunds
Should a company register a deductible input VAT exceeding its output VAT, this balance can be partially refunded only if the company carries out a specific range of business activities (e.g. export supplies, international transportation services, production of bakery and dairy products, leasing activity). Otherwise, such VAT amount may be carried forward to the following months, offset against the company's future output VAT liabilities.

Additionally, VAT payers performing capital investments in Moldova may be entitled to refund the recoverable VAT related to these kinds of capital investments, provided such assets are used for product manufacture, service supply, and execution of works.

Companies investing in manufacturing buildings as of 1 May 2015 also have the right to benefit from VAT refund. The refund is allowed only for buildings put into use and used according to their destination.

The possibility to refund the VAT against future obligations to the national public budget is also now available, at the request of taxpayers not having debts to the national public budget.

VAT administration
A company is required to register for VAT purposes if the total turnover within the last 12 consecutive months reached the threshold of MDL 600,000. Also, as of 1 May 2015, companies can follow voluntary registration for VAT purposes if they only intend to perform taxable supplies.

All VAT payers registered for VAT purposes must submit electronic tax returns. VAT liabilities must be declared and settled monthly no later than the 25th day of the month following the reporting one.
Generally, VAT payers are required to issue VAT invoices for the VATable supplies performed, as well as to keep detailed records of their acquisitions and supplies in the correspondent VAT ledgers, according to a set of specific rules.

Additionally, all companies registered as VAT payers are required to register their VAT invoices with a taxable basis exceeding MDL 100,000 in the general electronic register of VAT invoices within ten working days from the date of issuing (with some specific exceptions).

VAT payers are entitled to a deduction of the amount of VAT paid to suppliers for material values and services purchased in Moldova if the VAT invoice is not registered by the seller in the register only on condition that the tax authorities are duly informed of such non-registration of VAT invoice.

**Customs duties**
Moldova's current customs framework is regulated by the Customs Code, Law on Customs Tariff, International Agreements concluded by Moldova to date, and by other legal acts.

Customs duties include customs procedural taxes, customs taxes, VAT, and excise duties. In general, any kind of goods and means of transport may enter and leave the territory of Moldova without any restriction. However, certain limitations specifically provided by the legislation are in force, which cover goods and means of transport crossing the border by breaching state security, public order, environment, etc.

Note that there are also some environmental pollution taxes related to specific packaging and goods that importers should pay.

**Customs regimes**
Definitive and suspensive customs regimes are provided under Moldovan law.

Definitive customs regimes refer to import and export, while suspensive customs regimes comprise transit, bonded warehouse, inward processing relief (with suspension), processing under customs control, temporary admission, and outward processing relief.

**Customs valuation**
Under Moldovan customs legislation, the customs valuation is generally performed in accordance with the customs valuation principles in the General Agreement on Tariffs and Trade (GATT).

The customs value is determined based on one of the six provided valuation methods (i.e. transaction value, transaction value of identical goods, transaction value of similar goods, deductive value, computed value, and reserve method). If the first method is not applicable, then the second method should be applied and so forth.

**Preferential tariff treatment**
Moldova has concluded free trade arrangements (FTAs) to date with most of the Commonwealth of Independent States (CIS) countries and is also a Central European Free Trade Agreement (CEFTA) contracting state. A preferential tariff treatment is granted for specific categories of goods, depending on their origin and in accordance with the FTAs to which Moldova is a party.

Also, further to the Association Agreement with the European Union (EU), the customs duties on goods originating in the other party are eliminated. The origin of goods can be proven with an EUR.1 movement certificate or an origin declaration.

Customs duties applicable on imports performed in the Republic of Moldova are eliminated, except for products free of customs duties within the limits of the tariff
Moldova

quotas. In case these limits are exceeded, the most-favoured-nation customs duty rate shall apply.

Customs duties applicable on imports performed in the European Union are eliminated, except for the following products:

- Products free of customs duties within the limits of the tariff quotas. In case these limits are exceeded, the most-favoured-nation customs duty rate shall apply.
- Products subject to entry price for which the \textit{ad valorem} component of the import duty is exempted.
- Products subject to the anti-circumvention mechanism.

Elimination of the customs duties on some specific categories of goods will be gradually made.

\textbf{Favourable tariff treatment}

A favourable tariff treatment presumes a reduction or an exemption from customs duty upon import of specific goods into Moldova, depending on their type or final destination, according to domestic customs law or international agreements to which Moldova is a party.

Moldovan customs law provides the following exemptions, among others, from customs duty:

- Goods imported by individuals for personal use, not exceeding a specific threshold.
- Goods released in Moldova under transit, bonded warehouse, or inward processing relief regimes.
- Moldovan goods previously exported and released back within a three-year term in the same status, as well as compensatory products obtained under outward processing relief.
- Certain movable goods imported by legal entities carrying out leasing activities for the purpose of paying off their contractual liabilities derived from lease agreements concluded with Moldovan individuals or legal entities.
- Goods imported by legal entities for non-commercial purposes whose customs value does not exceed 100 euros (EUR).

Also, starting from 1 May 2015, the following have been exempted from customs duties:

- Samples of goods with customs value not exceeding EUR 22 for one import operation.
- Aircraft, helicopters, locomotives, multiple units for railways providing public transportation of passengers, and parts thereof (only certain tariff headings as provided by law).
- Certain vehicles imported free of charge (donation), regardless of the exploitation term, for certain special purposes.

\textbf{Customs administration}

Moldovan customs legislation provides for:

- the concepts and procedures of post clearance audit
- the obligation of individuals and companies to maintain the necessary documents for customs control for five years, and
- the obligation of individuals and companies that perform external trade transactions to maintain the related documents for the purposes of post clearance audit for five years.

The Customs Service of Moldova uses procedures for issuing binding tariff and binding origin information. Additionally, companies may use the electronic procedure
of customs clearance for the export of goods, as well as specific simplified customs procedures.

As of 1 May 2015, some concepts are introduced and adjusted related to the inspection system applied by the customs authorities (i.e. application for action, small amount delivery, blue corridor, subsequent inspection).

**Excise duties**

Excise duties apply to the production and import of cars, tobacco, alcohol, petrol and lubricants, and other goods. Special excise rates for each type of excisable goods are established in the tax code. The rates are widely variable and are based on multiple factors. The excise duty rates are generally indicated as a percentage applied to the value of goods or as a fixed amount for a certain quantity of excisable goods. However, for specific types of excisable duties, mixed excise duty rates are applicable.

The following are liable for excise duties:

- Any individual or legal entity producing and/or processing excisable goods in the territory of Moldova.
- Any individual or legal entity importing excisable goods, unless there is no specific exemption provided.

Businesses or individuals that produce and/or process excisable goods in the territory of Moldova (or intend to do so) must possess excise duty certificates, which must be granted by the tax authorities before these operations are actually carried out. It is mandatory for individuals or businesses, upon submitting the relevant applications to the tax authorities, to attach the details of the excise premises.

Under certain circumstances, excise duty exemptions may apply. Some excise-liable goods are subject to mandatory excise stamp marking and labelling.

**Tax on immovable property**

Tax on immovable property is a local tax paid on real estate (i.e. land and/or construction on the land) by the property owner or owner of material rights. Residents and non-residents owning real estate located in the territory of Moldova have similar obligations.

The 0.1% rate on immovable property used for entrepreneurial activity is applied either on the property’s estimated value (if such exists) or on its book value, while the maximum tax rate on property used for agricultural activities is 0.1% of the property’s book value.

Tax rates for real estate housing, including villages (communes) from Chisinau and Balti municipalities, are generally higher than for real estate housing from other municipalities.

Separate rates are applicable for agricultural land with construction buildings on it.

Tax on immovable property is paid in equal instalments on 15 August and 15 October for property owned before 30 June. For property acquired after 30 June, the tax is paid by 25 March.

Companies and individual entrepreneurs who own immovable property will be obligated to declare the immovable property tax by 25 July of the current fiscal period.

In the event of an owner change during the fiscal year, the previous owner may request recalculation of the real estate tax in proportion to the period in which they were subject to taxation.
Moldova

Transfer taxes
Transfer taxes may be applied for notary acts performed by authorised notaries and other persons empowered by law. Transfer taxes are applied upon authentication by a notary of sale-purchase agreements regarding plots of land; transfers of houses into private property; alienation agreements of houses, apartments, garages, and other constructions; authentication of mortgage agreements; and other evaluative contracts.

Stamp taxes
According to the law on state tax, stamp tax (state duty) is the amount charged by specifically authorised state bodies from individuals and legal entities for the exercise of certain actions or issuance of legal documents of interest to them.

Stamp taxes may be applied for, but not limited to, the following:

- Claims submitted to courts of justice.
- Registration of civil status documents.
- Issuance of passports to Moldovan citizens and other related documentation.
- Residence registration.
- Redemption of goods from the state.
- Registration of mortgage, for issue of extracts from the Real Estate Register.
- Notary acts (i.e. for notarisation of sale-purchase agreements of immovable assets).
- Application of the apostil.

Payroll taxes
Salaries and other remunerations provided by an employer to its employees are subject to personal income tax (PIT). Thus, an employer is liable to withhold and pay PIT from employees' taxable income, as follows:

- 7% for annual income up to MDL 29,640 (limit applicable for 2015).
- 18% for annual income that exceeds MDL 29,640 (limit applicable for 2015).

Also, there are available deductions, each resident taxpayer being allowed to claim a personal allowance and allowance for spouse of MDL 10,128 a year and allowance for each dependant of MDL 2,256.

Social security contributions
Employers must pay social security contributions of 23% of their employees' gross salary and other recompense to the Social Security Fund. Employees pay an individual contribution in the amount of 6% of their gross salary and other recompense (the percentage applies to an annual base capped at MDL 270,000). The legislation provides an annual fixed social security contribution for other categories of taxpayers in an amount approved for each year (e.g. MDL 6,372 applicable as of 28 April 2015).

Companies should generally submit reports on social security contributions on a monthly basis (under certain exceptions). The social security contribution due by both employer and employee must be transferred by the employer to the budget no later than the 25th day of the month following the reporting one.

A fine equal to double the amount of social security contributions is applied in case of diminishing or hiding the salary funds and other remuneration and the related social security contributions.

Health insurance contributions
The mandatory health insurance contribution, computed as a percentage of wages and other remuneration, as of 28 April 2015, is established at 4.5% for each payer category (employers and employees). The legislation also provides for an annual fixed amount of health insurance contribution paid by other categories of taxpayers in an amount approved for each year (e.g. MDL 4,056 applicable in 2015).
The mandatory health insurance contributions must be declared quarterly by the end of the month following the reporting quarter. The mandatory health insurance contribution due by both employer and employee must be transferred to the budget at the moment of payment of salary and other remunerations.

A fine equal to the amount of contributions is applied in case of diminishing or hiding the salary funds and other remuneration, from which the compulsory health insurance contributions are due.

**Local taxes and duties**
Local taxation in Moldova refers to the application of the following main types of taxes and duties:

- **Taxes on the following natural resources:**
  - Water.
  - Mineral exploration.
  - Geological exploration.
  - Mining operations.
  - Usage of underground areas for the construction of underground structures not related to mining operations.
  - Exploitation of underground structures within the performance of entrepreneurial activity, not related to mining operations.
  - Standing wood.
- **Tax on immovable property.**
- **Duty for the right to perform local auctions and lotteries.**
- **Tax on advertising placement and tax on advertising devices.**
- **Fee for the right to use local symbols.**
- **Land improvement duty.**
- **Tax for commercial and/or services providing units.**
- **Parking tax.**
- **Hotel room occupancy tax.**
- **Resort fee.**

Local authorities are authorised to establish the levels of tax rates for local taxes.

**Road taxes**
Road taxes are fees collected for the use of roads and/or protection zones of the roads outside the locality limits.

The system of road taxes includes the following:

- Tax for the use of roads by vehicles registered in Moldova.
- Tax for the use of roads of Moldova by vehicles not registered in Moldova (vignette).
- Tax for the use of roads by the vehicles with total mass, axle loads, or dimensions exceeding the admitted limits.
- Tax for the use of road protection zones outside the localities for carrying out construction or installation works.
- Tax for the use of road protection zones outside the locality limits for placing outdoor advertisements.
- Tax for the use of road protection zones outside the locality limits for placing roadside service objects.

Depending on the type of road tax, the tax law establishes the taxable person, deadlines for payment of the road tax, tax rates, exemptions (e.g. a legal entity or an individual shall pay road tax on vehicles registered in Moldova (i) on the date of state registration of vehicle or (ii) on the date of the vehicle inspection/annual technical testing of the vehicle).
Moldova

Road tax rates for the use of roads by vehicles registered in Moldova vary depending on the type of vehicle and its specific characteristics (engine capacity, weight, etc.).

The fixed tax rates for vignette vary from EUR 4 to EUR 50, depending on the period the vehicle stays in the territory of Moldova.

**Branch income**

**Branches**
Moldovan law does not distinguish between branches of non-resident companies and local companies established by a foreign investor. A non-resident’s branch is established and registered in Moldova as a legal enterprise fully owned by the foreign investor. As such, it is subject to the same tax regime as local incorporated companies.

On the other hand, the concept of a tax PE does exist in Moldova. Generally, the PE of a non-resident entity will be subject to CIT in Moldova on any profits attributable to that PE. Since there is no local concept of a legal branch that is not a legal entity, non-residents do not typically intentionally operate in Moldova through a taxable PE.

**Representative offices**
Representative offices are often established by non-resident entities as a first step to operating in Moldova. According to the tax law, a representative office can engage only in auxiliary or preparatory activities. A representative office can perform only a limited range of activities without being considered a PE of the non-resident.

All representative offices must submit, by 25 March of the year following the reporting year, the required Tax Reporting Statement on the activity conducted during the year concerned.

**Income determination**

Resident legal entities are taxed on their worldwide income, while non-resident entities are taxed on their Moldovan-source income. Taxable income is computed as accounting profit adjusted in accordance with tax legislation.

**Inventory valuation**
Under the National Accounting Standards, the following inventory valuation methods are mandatory: specific identification, first in first out (FIFO), and weighted average cost.

Assets are generally valued at their acquisition cost, production cost, or market value.

**Capital gains**
Taxable gain is generally calculated as 50% of the difference between the sale price and the fiscal value of the capital assets (i.e. all costs related to the acquisition of capital assets). This taxable portion of the capital gain is then taxed at the normal tax rates.

This capital gain should be included in the total gross amount of income for the year in which the capital assets were sold (alienated). Capital gains may be decreased by capital losses registered in the current or previous year. Some examples of capital assets include shares, plots of land, options to purchase or sell capital assets, etc.

**Dividend income**
Starting with profits earned in 2012, dividends paid by Moldovan legal entities to other Moldovan legal entities are taxed with the applicable final 6% withholding tax (WHT),
while the distribution of dividends from profit earned during the period between 2008 and 2011 remain subject to the previously applicable final WHT of 15%.

Dividends received by Moldovan legal entities from foreign legal entities are included in taxable income and taxed at the applicable 12% CIT rate. According to Moldovan legislation, the beneficiary of such dividends is entitled to a credit for the tax paid in the foreign country, within certain limits.

**Interest income**
In general, the interest income derived by legal entities is included in the total taxable amount and taxed at the applicable 12% CIT rate, unless a specific exemption is provided (e.g. interest from state bonds).

**Exchange gains and losses**
Revenues obtained from foreign exchange differences are to be included in taxable income. Foreign exchange losses are CIT deductible in the period they are incurred.

In certain circumstances (e.g. high depreciation of the national currency), foreign exchange differences should be capitalised to the value of assets in relation to which the expenses were incurred.

**Non-taxable revenues**
Moldovan tax law provides for the following main types of non-taxable revenues:

- Contributions to the capital of an entity.
- Income earned while benefiting from income tax incentives.
- Money received from special funds in the form of grants from government-approved programmes.
- Income from reversing impairment losses on depreciation of fixed and other assets.
- Income obtained under international projects and grants that contribute to the long-term development of education and research.

**Foreign income**
Resident legal entities are taxed on their worldwide income. The legal entities, under certain conditions, can benefit from tax credits provided under a double tax treaty (DTT) or can apply for unilateral tax credits against income tax paid in any foreign country if this income is subject to taxation in Moldova. Such tax credit shall not exceed the amount that would have been estimated at the CIT rate applicable in the given tax period. Otherwise, there is no specific tax deferral regime.

**Deductions**
As a general rule, expenses incurred by a company are deductible for CIT purposes only if they are deemed as ordinary and necessary, aimed at deriving taxable income, and justified with adequate supporting documentation.

The rate of deductible expenses for business purposes (ordinary and necessary) that are not adequately supported by necessary documentation is 0.2% from taxable income.

**Depreciation and amortisation**
Fixed assets are subject to CIT depreciation under the diminishing-balance method if their useful economic life exceeds one year and acquisition costs exceed MDL 6,000.

According to the fiscal law, fixed assets are divided into five categories of property. These categories are set out according to specific rules, mainly on the assets' useful life (i.e. the number of years during which the assets' utilisation generates economic advantages;
the useful life for each type of depreciating asset is regulated by governmental decision. The depreciation rates vary as follows:

- First category (e.g. buildings): 5%.
- Second category (e.g. constructions): 8%.
- Third category (e.g. roads, certain equipment): 12.5%.
- Fourth category (e.g. industrial equipment): 20%.
- Fifth category (e.g. cars, computers, furniture): 30%.

Intangible assets are subject to CIT amortisation according to the straight-line method. Moldovan tax law does not contain specific provisions regarding the useful life for intangible assets for tax purposes.

**Goodwill**

According to the National Accounting Standards, goodwill is not recognised as an intangible asset.

**Start-up expenses**

According to the National Accounting Standards, start-up expenses incurred by companies (e.g. stamp taxes paid upon company registration, drawing up of registration documents, manufacture of stamp) are not recognised as an intangible asset. Therefore, such expenses are to be treated as current expenses.

**Interest expenses**

Different CIT deductibility rules apply for interest on loans used for carrying out operational activities and for loans used for investment activities performed on an occasional basis.

As a general rule, deductions for interest expenses are allowed for CIT purposes, provided such expenses are deemed as ordinary and necessary for carrying out the activities of the business. Expenses should also be incurred for the purposes of obtaining taxable income and justified by adequate backup documentation.

If the interest paid by a Moldovan company relates to its operational or day-to-day activities, the related expenses are deductible for CIT purposes, taking into account the following:

- Interest expenses incurred by businesses, based on loan agreements, for the benefit of individuals and legal entities (except financial institutions, micro-financing organisations, and leasing companies), are deductible for CIT purposes within a specific limit established by law. Specifically, such interest expenses are deductible up to the limit of the average weighted interest rate on credit loans offered by banks to legal entities, depending on the period of the loan and its currency (e.g. different limits are applied for loans in Moldovan lei and those in foreign currency).
- If the loan is obtained for the purpose of acquiring/building fixed assets, the related interest expense should be capitalised to the initial fiscal value of such assets until they are put into exploitation. The deductibility of such interest expense is capped at the above limit. The excess difference is treated as a non-deductible expense for CIT purposes.

If interest relates to an investment activity, the interest expense is deductible for CIT purposes within the limit of the income derived from the investment.

**Bad debt**

Bad debts are deductible for CIT purposes, provided certain conditions are fulfilled and justifying documents are made available.
Charitable contributions
Charity and sponsorship expenses are deductible for CIT purposes if borne for the benefit of public authorities and public institutions financed from the state budget, as well as non-profit organisations and family-type foster homes within certain conditions, at up to 2% of taxable income.

Fines and penalties
Fines and penalties related to CIT, related to other taxes and due payments to the state budget, or for violations of legal acts are not deductible for CIT purposes.

Taxes
CIT incurred in line with requirements of the Moldovan tax law is not deductible for CIT purposes.

Other taxes are generally deductible for CIT purposes, except those paid on behalf of another person.

Other significant items
Among others, the following expenses are also generally deductible for CIT purposes:

- Research and development (R&D) expenses incurred during the fiscal year as current expenses, should certain conditions be met.
- Business trip expenses, protocol expenses, and expenses on insurance of business entities, within the limits approved by the government.
- Waste, spoilage, and perishability expenses, within the threshold approved by the company’s manager.
- Leasing companies are allowed to deduct provisions to cover claims related to non-recovery of lease rates and interest rates up to 5% from the weighted average balance from the account receivables, provided certain conditions are met.
- Financial institutions are allowed to deduct loss loan provisions of assets and conditional commitments, calculated according to International Financial Reporting Standards (IFRS).
- Micro-finance organisations are allowed to deduct loss loan provisions, calculated according to requirements established by the National Commission on the Financial Markets.

Non-deductible expenses
Among others, the following expenses are generally not deductible for CIT purposes:

- Expenses not adequately supported by necessary documentation, except the 0.2% rate as mentioned above.
- Provisions, except for financial institutions, micro-finance organisations, and leasing companies as mentioned above.
- Losses incurred from transactions between affiliated parties.

Fiscal losses
Fiscal losses may only be carried forward in three equal instalments for three consecutive years following the year the losses were incurred, provided the company records taxable income. If the company recorded fiscal losses for more than one year, such losses are carried forward in the order in which they arose. Fiscal losses are recorded on off-balance-sheet accounts.

Losses may not be carried back.

Payments to foreign affiliates
A Moldovan legal entity generally may deduct expenses related to payments to foreign affiliates to the extent that these amounts were actually paid and are not in excess of what it would have paid to an unrelated entity (i.e. arm’s length). However, the payer
Moldova

is required to hold documentary evidence for the actually performed transactions. Still, certain types of expenses may follow general rules of deductibility that would limit their amount (e.g. interest expenses on loan agreements).

**Group taxation**

Moldovan tax law does not provide for group taxation.

**Transfer pricing**

Currently, transfer pricing regulations in Moldova are at an initial development stage. However, according to the 2015 to 2017 Medium Term Tax Policy of the Moldovan government, as well as the available draft law, formal transfer pricing documentation requirements are expected to be introduced in the Moldovan tax law in the near future.

Moldova is currently not an Organisation for Economic Co-operation and Development (OECD) member country, and the domestic law does not provide for any reference to the possibility of applying the OECD Transfer Pricing Guidelines.

As a general rule, under Moldovan tax provisions, transactions concluded between related persons are taken into consideration only if the interdependence of these persons does not influence the outcome of the transaction. The arm’s-length principle applies to transactions with both resident and non-resident related parties.

With reference to the transactions carried out by Moldovan companies with related parties, Moldovan tax law provides the following specific provisions:

- No deduction is allowed for losses incurred on the sale or exchange of property, performance of work, or supply of services between related parties, carried out either directly or through intermediaries (regardless of whether the transaction price corresponds to the market value).
- No deduction is allowed for expenses incurred in relation to related parties if no justification is available for payments and if such expenses do not represent necessary and ordinary business expenses.

In accordance with Moldovan tax law, a company is considered the taxpayer’s related party if one of the following conditions exists:

- The company controls the taxpayer.
- The company is controlled by the taxpayer.
- Both the company and the taxpayer are under common control of a third party.

From a tax perspective, control is the ownership (either directly or through one or more related persons) of 50% or more in value of the capital or voting power of one of the companies. For this purpose, an individual will be treated as owning all equity interest that is directly or indirectly owned by members of one’s family.

Two individuals are related parties if they are spouses or relatives up to the fourth degree.

**Thin capitalisation**

Moldovan tax law does not provide for a specific thin capitalisation regime.

The deductibility of interest expenses follows the deductibility regime as described under Interest expenses in the Deductions section.

**Controlled foreign companies (CFCs)**

Moldovan tax law does not contain CFC provisions.
Tax credits and incentives

Foreign tax credit
Income tax paid in any foreign country, if this income is subject to taxation in Moldova, is allowed for tax credit, provided that the taxpayer submits a document that justifies payment (withholding) of the income tax outside of Moldova, certified by the competent body of the respective foreign country, with its translation into the state language.

The amount of tax credit for any taxable year should not exceed the amount that would have been estimated at the rate applicable in Moldova with regard to this income.

A tax paid in a foreign country should be creditable for the year in which the income is taxable in Moldova.

Free entrepreneurial zones (FEZs)
FEZs are territories where domestic and foreign investors can carry out entrepreneurial activities on preferential terms (i.e. favourable tax, customs, visa, and other regimes). There are currently seven FEZs in Moldova.

The following types of activities may be carried out in an FEZ:

• Production of goods preferentially for export, excluding alcohol and alcoholic products.
• Sorting, packing, marking, and other similar operations of goods transiting the customs territory of Moldova.
• External commercial activities.
• Other supportive activities.

There is also an international free port (Giurgiulesti International Free Port) and airport (Marculesti International Free Airport) with status similar to FEZs that can benefit from specific tax and customs incentives.

FEZ incentives
For the 2015 year, the following CIT incentives for FEZ investors have been maintained:

• Entities that are established in the FEZ and export goods and services from the FEZ outside the customs territory of Moldova or deliver the produced goods to other FEZ residents for goods to be exported are entitled to apply only 50% of applicable CIT rate on such gains. For other cases, the CIT rate is 75% of the established one.
• The income obtained from export of goods (services) originating from the FEZ outside the customs territory of Moldova or from supply of the produced goods to other FEZ residents for goods to be exported is CIT exempted for a period of three years, provided that the FEZ residents invested in the fixed assets of their enterprises and/or in development of the infrastructure of the FEZ capital equivalent to at least 1 million United States dollars (USD).
• The income obtained from export of goods (services) originating from the FEZ outside the customs territory of Moldova or from supply of the produced goods to other FEZ residents for goods to be exported is CIT exempted for a period of five years, provided that the FEZ residents invested in the fixed assets of their enterprises and/or in development of the infrastructure of the FEZ capital equivalent to at least USD 5 million.

From a VAT standpoint, goods and services supplied in the FEZ from abroad, from the FEZ outside the customs territory of Moldova, in the FEZ from other areas of Moldova, and those supplied to residents of other FEZs are subject to 0% VAT (with some exceptions).
Moldova

According to the customs provisions, goods are introduced into the FEZ with no VAT or customs duty and are not subject to economic policy measures, according to specific criteria. However, certain taxes in specific situations might be incurred by residents of the FEZ. Investors in the FEZ are guaranteed and protected from changes in legislation for a general period of up to ten years, while under certain conditions this period may be extended to 20 years.

**Withholding taxes**

**Residents**

Resident legal entities making payments to individuals (other than salary payments) must withhold and pay WHT to the MTA at the following rates:

- **Preliminary WHT:**
  - 7% preliminary withholding of payments made for the benefit of resident individuals, unless such payments are tax exempt.
  - 15% preliminary withholding from interests.

The beneficiary deducts (i.e. recovers) the amount of preliminary WHT from annual income tax due.

- **Final WHT:**
  - 10% final withholding of an individual’s income derived from leasing, rent, and usufruct of movable and immovable property.
  - 6% final withholding of dividends paid out to individuals, except for dividends for the profits received between 2008 and 2011, for which the WHT rate is 15%.
  - 15% from the amount withdrawn from the share capital related to the increase arisen from the distribution of net profit and/or other sources identified as equity among shareholders (associates) throughout the 2010 to 2011 fiscal period, in accordance with the share capital venture quota.
  - 2% from payments performed for the benefit of individuals, other than individual entrepreneurs and farmers, on income obtained from supplying phytotechnical, horticultural, and zootechnical products, except natural milk.

The tax charged to residents under this paragraph is a final one and exempts the recipient of such income from including it into gross income, as well as from declaring it.

The following tax treatment applies to royalty payments to residents:

- Practicing entrepreneurial activity: no WHT at source is applied.
- Resident individuals: a final WHT of 12% is applied, without including such income in the gross income of individuals (except royalty income of individuals aged 60 and over in the field of literature and art).

Additionally, according to Moldovan tax law, each payer of earnings should pay to the state budget a tax of:

- 18% of gambling earnings.
- 18% of promotional campaigns if the earned amount exceeds 10% of the personal allowance but does not exceed MDL 50,000.
- 25% of promotional campaigns if the earned amount equals or exceeds MDL 50,000.

Also, earnings from promotional campaigns and/or lottery earnings are considered non-taxable income sources if the value does not exceed 10% of the personal allowance (MDL 10,128 as of 1 May 2015).
Non-residents
The following WHT rates apply upon payments to non-residents:

- 6% for dividend payouts, except for dividends for the profits received between 2008 and 2011, for which the WHT rate is 15%.
- 15% from the amount withdrawn from the share capital related to the increase arisen from the distribution of net profit and/or other sources identified as equity among shareholders (associates) throughout the 2010 to 2011 fiscal period, in accordance with the share capital venture quota.
- 12% for other revenues.

Double tax treaties (DTTs)
The DTTs in force between Moldova and other countries may provide for more favourable tax rates than those provided by the local provisions. For their application, the foreign beneficiary of such income should provide the paying entity with its fiscal residency certificate before the payments are actually made.

Currently, Moldova has 48 operational DTTs, as outlined below:

* If multiple rates are listed, then the WHT rate to be applied is subject to fulfilment of specific criteria provided by the DTT.

---

**Tax administration**

**Taxable period**
The tax year for CIT purposes is the calendar year. For new business entities, the fiscal year is considered the period beginning with the registration date until the end of the calendar year.

For WHT and VAT purposes, the fiscal period is the calendar month starting the first day of the month.

**Tax returns**
An annual CIT return must be submitted to the MTA by 25 March of the year following the reporting year.

WHT liabilities must be declared and settled monthly no later than the 25th day of the month following the reporting one.

Companies are also liable to submit specific annual tax reports on WHT and PIT withheld with disclosure on the beneficiaries of the income provided no later than 25 January following the reporting year.

Farming enterprises and individual entrepreneurs with an annual average number of employees not exceeding three and not registered as VAT payers must submit a unified annual tax return, provided certain conditions are met.

**Adjusted tax returns**
Taxpayers who discover that the tax return previously submitted contains an error are able to submit an adjusted tax return, provided that no written decision was issued by the tax authority in order to initiate a tax audit and the related tax period is not covered by a tax control.

Late interest payments will not be applicable in amounts higher than the tax liability resulting from the adjusted tax return submitted, and no fines will be applicable if the tax duties are paid before the announcement of a tax audit.
A fine will not apply in certain circumstances of fiscal violations specified by law, and, if already established, it will be entirely cancelled if no additional tax liabilities arise.

Companies that have miscalculated the taxes, and this was not detected in the previous tax audit, are absolved from fines and late interest payments for violations identified within the repeated tax audit.

Companies keeping the accounting records and preparing financial reports under IFRS or under the National Accounting Standards will not be fined for violation of accounting and record keeping for a period of up to two years from the date of implementation (transition) to those standards in case such violation represents an obstacle for performing tax audit.

**Payment of tax**
Taxpayers must declare and pay the applicable CIT by 25 March of the year following the reporting year. Taxpayers are also required to pay interim CIT, no later than 25 March, 25 June, 25 September, and 25 December, amounts equal to 25% of either the total estimated value of the CIT due for the current fiscal period or the total value of the calculated CIT for the previous fiscal period.

**Fines and penalties**
The MTA is entitled to apply a fine of 30% of the diminished tax liabilities (including CIT ones).

Under the tax law, the MTA is entitled to apply a fine in the amount of the undeclared tax if it is a result of tax evasion.

Taxpayers who settle amounts as assessed by the MTA within three business days and have no other outstanding liabilities may benefit from a 50% reduction of the fines applied by the tax authorities.

In addition, certain special provisions regarding tax evasion apply. The term ‘tax avoidance’ is defined under Moldovan tax law as diminishing the tax liabilities by more than MDL 30,000 by means of including in accounting, tax, or financial documents deliberately distorted data on income or expenses or by hiding other objects of taxation. Should the amount of the tax due exceed MDL 30,000, the tax evasion is regarded as a criminal offence. According to the Moldovan Criminal Code, legal entities can be punished for tax evasion with a fine up to MDL 120,000 and preclusion from performing certain activities or winding-up.

Among the most important fines and sanctions for non-compliance with applicable tax law, the following are worth mentioning:

- The fine for the performance by the taxpayer of an economic activity with the issuance of a bill without using the existing cash register is MDL 5,000.
- The fine for the failure to provide the VAT invoice in accordance with the tax law is MDL 3,600 for each VAT invoice but capped to MDL 72,000. The same fines are applicable for failure to register the fiscal invoice in the general electronic register managed by the tax authorities.
- The fine for hindering the execution of a tax audit by not providing access to production, storage, commercial, or other facilities is MDL 10,000.

The fine for submitting a tax return containing unauthentic information is MDL 1,000 for each tax return, capped to MDL 7,000.

**Tax audit process**
The rules governing the tax audit process are stated in the tax code. Generally, the tax audit duration and frequency depends on its type. For instance, a tax audit performed
Moldova

at the taxpayer premises should not exceed two months and should be performed no
more than once per year for the same taxes and duties, except for specific circumstances
provided by law.

Also, a tax audit can be performed on a more frequent basis within certain specific
circumstances (e.g. refund of VAT and other taxes, reorganisation).

A repeated tax audit for already audited periods can be performed in a number of cases,
for instance:

- In case the results of previous controls are inconclusive, incomplete, or not
  satisfactory.
- If certain circumstances are identified that attest to the existence of tax
  infringements.
- In case of reorganisation or liquidation.

Statute of limitations
Under the general tax rule, the Moldovan tax authorities can assess tax liabilities no
later than four years after the last date established for the submission of the relevant
tax report or for the settlement of that tax liability (if submission of the tax report is
not required). This limitation term does not apply in case of tax-related crimes or non-
submitting of the corresponding tax returns.

Topics of focus for tax authorities
There are no specific topics of focus for the tax authorities. Generally, it depends on the
nature of the taxpayer and the specifics of the activity it performs. The main criterion for
selection of a company to be subject to a tax audit is a risk based one.

Rulings
The law does not provide for the possibility of obtaining binding rulings. However,
comfort letters can be obtained.

Taxpayers that inadequately computed tax liabilities due to incorrect written
explanations issued by the MTA may not be subject to sanctions (i.e. fines and late-
payment penalties). Tax liabilities may still be recomputed by the MTA. Written
explanations are issued by the MTA free of charge and may remain valid for an indefinite
period of time, unless cancelled by new legislation or other rulings. Such explanations
are generally issued by the Moldovan competent authorities during a period of up to one
month.

Other issues
The legislation and the approach of the state authorities in Moldova related to corporate
taxation have been and are expected to be subject to changes.

Taxpayers should seek professional advice on specific issues, given that only limited
interpretations have been issued by the MTA.

US Foreign Account Tax Compliance Act (FATCA)
On 30 June 2014, the US Treasury announced that an intergovernmental agreement
(IGA) was ‘in effect’, and, on 26 November 2014, the US Treasury and Moldova signed
the Agreement for Cooperation to Facilitate the Implementation of FATCA, based on
IGA Model 2. Due to the fact that the IGA is not ratified, it cannot be applied in Moldova
because it would counter legislation currently applicable in Moldova.
**Significant developments**

**Tax Amnesty Law adopted for the second time**
On 7 August 2015, the Mongolian Parliament adopted a new legislation offering amnesty from tax obligations and administrative penalties for individuals and companies that voluntarily disclose previously undeclared incomes, properties, and others, as well as get officially registered at the state registration, social insurance, and tax authorities, within the deadline of 20 February 2016.

As a preliminary result of the law adoption, incomes and properties of 34.7 trillion Mongolian tugrik (MNT) have been disclosed. Further, taxes of MNT 8.3 trillion and fines and penalties of MNT 2.5 trillion have been forgiven.

**New Value-Added Tax (VAT) Law entered in force**

Under the new law, a number of new tax principles were adopted, such as an electronic VAT system, 20% tax refund to individual VAT payers, and a nationwide promotion lottery for VAT individual payers.

**Capital City Tax Law introduced**
On 19 June 2015, the Mongolian Parliament passed the Capital City Tax Law in order to promote development of the capital city by increasing its budget revenue. The law entered into force from 1 October 2015.

This indirect tax is imposed on all types of alcoholic drinks and tobacco, as well as services of hotels, resorts/camps, restaurants, and night clubs.

The Ulaanbaatar City Council has set a current tax rate of 1%, which is the highest rate permitted under the ceiling determined by the law.

**Anticipated reforms in tax legislations and transfer pricing rules**
Under the second tax reform program, the Ministry of Finance and the tax authorities have developed a number of draft legislations, such as draft laws on General Taxation, Corporate Income Tax (CIT), and Personal Income Tax (PIT), and draft regulations on transfer pricing rules.

We expect that the draft laws may be adopted in May or June 2016. Substantial policy changes, such as advanced rules on transfer pricing, thin capitalisation, and anti-avoidance, are included in the draft laws.

The new transfer pricing regulations define covered transactions more specifically, introduce tools for analysing transfer pricing, determine transfer pricing documentation requirements, and establish other important rules.
Mongolia

**Taxes on corporate income**

Mongolian resident economic entities are taxable on aggregate annual income earned worldwide. Non-resident economic entities carrying out business activities in Mongolia are taxable on the income earned in the territory of Mongolia and from Mongolian sources.

Mongolian CIT is levied at the following rates, using a progressive-rate scale that ranges from 10% to 25%, as follows:

- 10% applies to the first MNT 3 billion of annual taxable income.
- 25% applies to any excess of MNT 3 billion of annual taxable income.

However, the income described in the chart below is excluded when determining the annual taxable income and is taxed at different tax rates on a gross basis:

<table>
<thead>
<tr>
<th>Source of income</th>
<th>Applicable tax rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Dividends</td>
<td>10</td>
</tr>
<tr>
<td>Royalties</td>
<td>10</td>
</tr>
<tr>

<tr>
<td>Sale of immovable property</td>
<td>2</td>
</tr>
<tr>
<td>Sale of rights (e.g. mining licences, special activity licences, and other rights granted by the authorised organisations for conducting specific activities)</td>
<td>30</td>
</tr>
</tbody>
</table>

**Local income taxes**

CIT is levied at the state level in Mongolia. There are no local corporate income taxes.

**Corporate residence**

A resident legal entity is an economic entity formed under the laws of Mongolia or a foreign economic entity that has its place of management in Mongolia. There has not been further development of this concept, so it cannot be assumed that the standard place of effective management or control test will apply.

A non-resident company is a foreign economic entity that conducts its business in Mongolia and earns income from Mongolian sources.

**Permanent establishment (PE)**

Although there is a theoretical possibility to establish a branch of a foreign entity in Mongolia, it is currently not practically possible due to uncertainties in the law related to the legal status of such entity, filing procedures, etc.

It is also possible to register a PE in Mongolia with the tax authorities, although neither the legal status nor respective taxation rules are clear. According to the draft law on CIT, which is under Parliament discussion at this moment, PEs can be created in Mongolia only by non-residents from those countries that have double tax treaties (DTTs) with Mongolia.

**Other taxes**

**Value-added tax (VAT)**

According to the new VAT Law, effective from 1 January 2016, a person (covering legal entities, individuals, and PEs) whose sales income has reached MNT 50 million or
more has to be registered as a VAT withholding. The threshold for voluntary registration is MNT 10 million of sales income. A sale of fixed assets is not considered for the VAT registration thresholds.

VAT at the rate of 10% is imposed on the supply of goods, services, and works imported, exported, and sold in Mongolia.

One of specific features of the Mongolian VAT legislation is that works and services received from a non-resident (irrespective of whether they are supplied in Mongolia or not) are subject to VAT under the reverse-charge procedure (the RC VAT).

**Customs duty**
A flat customs tariff of 5% applies with respect to most goods imported into Mongolia, except for information technology, medical equipment, and pure-bred livestock, which are zero rated.

Export duties apply to certain exported goods, such as unprocessed camel wool, wood, and wooden materials.

**Excise tax**
Excise tax is levied on goods manufactured in or imported into Mongolia, such as tobacco, alcohol, gasoline and diesel fuel, and passenger vehicles. Excise tax is also levied on the physical units of special-purpose technical devices and equipment used for betting games and gambling and on the activities of individuals and legal entities that conduct such activities. The excise tax rate on the goods varies between MNT 290 and MNT 265,000, and for special-purpose technical devices and equipment it varies between MNT 4.3 million and MNT 116 million per unit according to the origin and type.

The excise tax rates for gasoline and diesel that are produced in Mongolia are as follows:

- **Gasoline:**
  - MNT 0 to MNT 15,950 per tonne (up to 90 octane).
  - MNT 0 to MNT 17,400 per tonne (above 90 octane).
- **Diesel:** MNT 0 to MNT 21,750 per tonne.

For imported gasoline and diesel, the excise tax rates vary between MNT 0 and MNT 850,000, depending on the port of import.

**Immovable property tax**
Immovable property tax is an annual tax that varies between 0.6% and 1%, depending on the decisions made by the local representatives’ committee, on the value of the immovable property that is owned. For tax purposes, the value used is the value registered with the government registration authority. If the property is unregistered, the insured value is used. In the absence of either a registered or insured value, the accounting value is used.

This tax does not apply to property owned by persons and financed through the state budget, to any dwelling houses, or to any buildings and construction for public use.

**Transfer taxes**
Transfer of rights is treated as sale of right in practice and taxed at 30% under CIT Law.

In the case of transfers of property, stamp duty will be applied.

**Stamp duty**
Under the Law of Mongolia on State Stamp Duties, there are 45 types of activities subject to stamp duties, including the following:
Mongolia

- Settlement of a legal dispute by a court.
- Court involvement in arbitration.
- Notary services.
- Consulate services.
- State registration services for legal entities.
- Registration services for foreign invested economic entities and representative offices of foreign organisations.
- Other specific activities that need permissions and rights from the state authorities.

The amount of duty varies depending on the types of services or activities involved.

**Fees and taxes applicable to the extractive industry**

A range of fees and other taxes are payable for activities in the extractive industry. The primary ones include the following:

- Mining License Fee that is agreed to up front and stated in the mining licence.
- Royalties that are paid on the sale of mining products. The rate depends on the product being mined and the level of processing being performed in Mongolia.
- Water Pollution Fee.
- Air Pollution Fee.
- Land Use Fee.
- Natural Resources Usage Fee.

**Payroll taxes**

**Social insurance contribution by employer**

Employers’ social insurance contribution depends on the industry type and is subject to rates between 11% and 13%, which is comprised of 7% for pension, 0.8% for benefits, 2% for health, 0.2% for unemployment, and 1% to 3% for industrial accident and occupational disease insurance. Employer charges are not capped. Social insurance taxes paid by employers are deductible in determining taxable income.

The employer should also withhold social insurance taxes (10%) from employees and submit returns electronically and by paper before the 5th day of the following month on a monthly basis. Payments should be made before the end of the month to the social insurance fund account.

**Branch income**

The repatriation of profits from branches of foreign legal entities is subject to branch profits tax at a rate of 20%.

Please note that it appears it is no longer possible for foreign legal entities to establish a branch in Mongolia. However, the above provision remains in place for branches that were previously established in Mongolia.

**Income determination**

**Inventory valuation**

There is no specific provision in the tax law for inventory valuation.

**Capital gains**

Capital and ordinary transactions are treated in the same way for tax purposes (i.e. included in annual taxable income). An exception is provided for income from sales of immovable property, which is subject to tax of 2% on gross sales proceeds.
Taxation of capital gains of non-residents is not clear. The CIT Law could be interpreted in a way that the net gain from disposal of shares in a Mongolian company should be subject to CIT. However, since there is no mechanism in practice for non-resident companies to declare income in Mongolia and show the basis for the taxable gain, only withholding tax (WHT) (20% on the gross payment) charged at source of payment is available. No mechanism for taxation of capital gains currently exists if the transaction takes place between two non-residents that have no taxable presence in Mongolia.

**Dividend income**
Dividend income earned by a Mongolian resident entity is subject to WHT of 10%. Dividend income to be remitted out of the country to a foreign tax resident is subject to WHT at 20% but may be reduced by an applicable DTT.

**Interest income**
Interest income is subject to a special income tax of 10%. Interest income to be remitted out of the country to a foreign tax resident is subject to WHT at 20% but may be reduced by an applicable DTT.

**Partnership income**
There is no transparent partnership concept in Mongolia. Partnership income is treated as income of a legal entity and is subject to CIT.

**Rental income**
Rental income is included in taxable income for tax determination.

**Royalty income**
Royalty income is taxed at a special rate of 10%. Royalty income to be remitted out of the country to a foreign tax resident is subject to WHT at 20% but may be reduced by an applicable DTT.

**Unrealised currency exchange gains/losses**
Unrealised currency exchange gains are not considered as taxable income, and, at the same time, unrealised losses are not deductible from taxable income.

**Foreign income**
Mongolian legal entities pay tax on their worldwide income. Unremitted earnings are taxed the same as ordinary earnings.

Credit relief is available with respect to foreign tax on income arising from countries that have DTTs with Mongolia, capped at the level of Mongolian tax that would have been due on the same income in Mongolia.

**Deductions**
Expenses mostly associated with generating aggregate annual income are deductible for CIT purposes (provided proper documentation is in place), and a list of these expenses is provided in the legislation. Expenses not on this list are not deductible.

**Accrued expenses**
Accrued expenses are deductible.

**Contingent liabilities**
Contingent liabilities are not deductible.
Mongolia

**Depreciation and amortisation**

Depreciation of fixed assets and amortisation of intangibles are deductible within the limits provided in tax legislation. A straight-line method is used and the years of usage are determined for tax purposes.

**Goodwill**

There is no specific provision in the tax law regarding the deductibility of goodwill.

**Organisational and start-up expenses**

Organisational and start-up expenses are not deductible.

**Interest expenses**

Interest expenses are deductible. However, there are limits with respect to the deductibility of interest expense. *See Thin capitalisation in the Group taxation section for more information.*

**Bad debt**

Bad debt provisions are not deductible. There is no clear guidance in the tax legislation as to whether bad debt is deductible or not; however, in practice, the tax authorities disallow deductibility of bad debt.

**Charitable contributions**

Charitable contributions are not deductible, except for donations to the fund of vocational training.

**Pension expenses**

Compulsory pension insurance premiums paid to the Social Security Authority of Mongolia are deductible. Additional voluntary insurance premiums are deductible but shall not exceed 15% of taxable income. Pension provisions or internal pension fund expenses are not deductible.

**Payment for directors**

If a payment for directors is a salary payment on which social insurance and PIT is levied, it is considered as deductible.

**Bribes, kickbacks, and illegal payments**

Bribes, kickbacks, and illegal payments are not in the list of permitted deductions. Per anti-corruption law, monetary amounts involved with respect to such payments will be confiscated and criminal proceedings will be instituted.

**Fines and penalties**

Fines and penalties are not deductible for tax purposes.
**Taxes**
Certain taxes paid by a taxpayer, as well as social contributions of employers, are generally deductible for tax purposes.

**Tax losses**
Tax losses generally may be carried forward for up to two years. However, the annual amount of carried forward losses deductible from taxable income may not exceed 50% of the taxable income in the tax year.

Legal entities involved in the infrastructure and mining industries may carry forward 100% of their losses for up to four to eight years, depending on their investment period and based on government regulations.

There is no provision for the carryback of losses.

**Payments to foreign affiliates**
Deductibility of payments to foreign affiliates depends on the nature of the payment, as follows:

- Interest payments are deductible but with restrictions (i.e. thin capitalisation rule may apply, interest paid on loans for construction of buildings and installation of equipment needs to be capitalised during that period).
- Dividend payments are not deductible.
- Technical assistance service payments are deductible.
- Payments for other services are deductible.

**Group taxation**
There are no rules permitting grouping for tax purposes in Mongolia.

**Transfer pricing**
Transfer pricing provisions are addressed in the CIT Law and the General Tax Law of Mongolia.

Per the CIT Law of Mongolia, if the following relation is present with a taxpayer, then it is considered as 'a related party':

- Holds 20% or more of the common stock.
- Has the right to receive 20% or more of the dividends or distributions.
- Has the right to appoint 20% or more of the management of the economic entity or is otherwise able to determine its policies.

If related parties have sold or transferred goods, performed work, or rendered services among themselves below or above fair market value, the tax authority shall determine gross taxable income of such goods, work, and services based on value involving transactions of similar goods, work, and services among non-related parties.

The General Tax Law provides for a broader definition of related entities for transfer pricing purposes, which is “entities authorised to directly and indirectly participate in management, control, and property rights of any foreign and Mongolian legal entities”. Per Article 48.3 of the General Tax Law, “if prices, payments, and fees (hereinafter the ‘price’) used in cooperative production, in the provision of technical services, in sending human resources, in purchase and sales transactions between related entities abroad and Mongolia are higher or lower than fair market value, then the fair market value method shall be used in order to determine taxable income”.

www.pwc.com/taxsummaries
Mongolia

Thin capitalisation
A thin capitalisation rule applies to direct shareholders, and interest paid in excess of the 3:1 debt-to-equity ratio is not deductible and is treated as a dividend. This is applied on an investor-by-investor basis as opposed to the company as a whole; no restriction applies to interest that is not paid to an investor.

Controlled foreign companies (CFCs)
There are no special CFC rules in Mongolia.

Tax credits and incentives
At present, the following types of incentives exist in Mongolia:

- Tax stabilisation of certain taxes per investment made (see below).
- Interest on government notes payable (bonds) is exempt from CIT.
- Income earned from the production and/or sale of produced equipment and spare parts intended for the activities of small or medium-sized production businesses in the territory of Mongolia is exempt from CIT.
- Income earned from the sale of a technique or equipment that economises natural resources, reduces environmental contamination, and is nature-oriented is exempt from CIT.
- Tax losses incurred by a business entity involved in the infrastructure and mining sector in a given tax year shall be deducted from taxable income for four to eight consecutive years after such tax year. The period will depend on the size of the investment, as defined from time to time by the responsible government agency.
- In the event that a business entity or a citizen has been found to have made a donation of up to MNT 1 million to support non-governmental organisations founded by citizens having developmental disabilities, such amount shall be deducted from taxable income of such business entity or citizen for the given tax year.
- A 50% tax reduction is available from CIT for an economic entity that produces or grows the following products:
  - Cereal, potatoes, and vegetables.
  - Milk.
  - Fruits and berries.
  - Fodder plants.
- Free Trade Zones (FTZs) have a special regime in terms of tax and customs (see below).

Foreign investment incentives

Tax stabilisation
The Law on Investment provides tax incentives, including exemptions from tax, tax credits, possibility to use accelerated depreciation for tax purposes, tax loss carryforward, and deduction of employee training costs from taxable income.

The Law also provides a ‘stabilisation certificate’ in order to create a more stable tax environment in Mongolia. By obtaining a stabilisation certificate, investors can stabilise applicable rates of the following taxes:

- CIT.
- Customs duties.
- VAT.
- Minerals royalties.

The holder of a stabilisation certificate can stabilise tax rates for a period from five to 18 years, depending on amount of investment, industry of investment, and geographic location of investment in Mongolia (see Stabilisation certificate terms below). Under the
valid period of a stabilisation certificate, investors also have the right to apply effective
tax rates provided in general legislation if such rates are more beneficial for investors.

The criteria of issuing a stabilisation certificate are:

- the total investment amount specified in the business plan and feasibility study
  reaches thresholds specified in the stabilisation certificate terms (see below)
- an environmental impact assessment should be carried out
- the investment should create new permanent jobs, and
- the investment should introduce innovative technology.

An investor who made an investment in tobacco and alcohol related activities cannot
benefit from tax stabilisation.

If certain conditions are met, the stabilisation certificate period may be extended by 1.5
times for some projects.

The conditions are that the projects:

- produce products that substitute for imported products or export-oriented products
  that are important for the long-term social and economic development of Mongolia,
  that will require investment of more than MNT 500 billion, and have a development
  period of more than three years, or
- produce value-added, processed products for export.

In addition to above, the law provides for incentives with respect to customs duty
(exemption) and VAT (zero-rate) on imported equipment and machinery during the
construction period of specific projects, as below:

- Construction of a factory for processing construction materials, petroleum,
  agricultural products, and products intended for export.
- Nano, bio, and innovation technology plant construction.
- Construction of power plants and railroads.

**Stabilisation certificate terms**

For the mining, heavy industry, and infrastructure sectors, a stabilisation certificate is
issued as follows:

<table>
<thead>
<tr>
<th>Investment amount (MNT in billions)</th>
<th>Stabilisation certificate terms (years)</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Central Region</td>
</tr>
<tr>
<td>30 to 100</td>
<td>Ulaanbaatar Region</td>
</tr>
<tr>
<td>100 to 300</td>
<td>5</td>

### Free Trade Zones (FTZs)

#### Establishing FTZs

According to the FTZ Law, FTZs can be established not only at the border ports but also in qualifying regions proposed by the government. The Parliament will decide the proposed plan.

FTZs are under state protection. A joint free border trade zone covering multiple countries’ borders can be established and will be regulated through international agreements between the governments.

#### Tax and customs regime

**CIT**

Businesses that have invested 500,000 United States dollars (USD) or more in the FTZs operating to improve infrastructures, such as energy and heating sources, pipeline networks, clean water supplies, wastewater sewage, auto roads, railways, airports, and basic communication lines, shall receive a CIT discount equal to 50% of their invested capital in the FTZ.

For businesses with more than USD 300,000 invested in building warehouses, loading and unloading facilities, hotels, tourist camps, or manufacturers of export and import-substituted goods in the FTZ shall receive a CIT discount equal to 50% of their invested capital in the FTZ.

Loss-making entities in the FTZs can carry forward their losses reflected on their CIT return up to five years from the time of becoming fully operational to reduce their future tax payable.

Entities using innovated and enhanced technology in their businesses shall be fully exempted from CIT for the first five years from the time of starting operation in the FTZs.

**VAT**

Goods imported to the FTZs are not subject to VAT. If goods are to be transferred from the customs territory to the FTZs, there will also be no VAT on those goods, and any previously paid VAT will be reimbursed accordingly based on related documents.

There will be a 0% rate on VAT for domestic goods to be transferred from the customs territory to the FTZs.

In addition to purchases per Article 38.1.4 of the Law on Custom Tax and Tariff (which refer to goods for passengers’ personal use), purchases in the FTZ of up to MNT 3 million made by passengers are exempt from VAT when entered into the customs territory.
There will be no VAT imposed on goods and services manufactured and sold by registered individuals and businesses in the FTZs.

**Customs and excise**
Goods imported to the FTZs are not subject to customs and excise taxes. If goods are to be transferred from the customs territory to the FTZs, there will be no customs and excise taxes on those goods, and any of these taxes previously paid will be reimbursed accordingly based on related documents.

In addition to purchases per Article 38.1.4 of the Law on Custom Tax and Tariff (which refer to goods for passengers’ personal use), purchases in the FTZ of up to MNT 3 million made by passengers are exempt from customs tax when entered into the customs territory.

Any goods, except purchases made by passengers as mentioned above, are subject to customs and related taxes as required in the regulation when transferred from the FTZs to the customs territory.

Goods exported from the FTZs are not subject to taxation.

**Land payments and property taxes in the FTZ**
Individuals and businesses may request a land possession and usage right in the FTZs through either project bid or auction.

Entities operating in trade, tourism, and hotel sectors in the FTZs are fully exempted from land possession and usage right payment for the first five years from commencement of operation. This payment is further reduced up to 50% for the following three years.

Businesses operating to improve infrastructures in the FTZs, such as energy and heating sources, pipeline networks, clean water supplies, wastewater sewage, auto roads, railways, airports, and basic communication lines, will be fully exempted from land payment for the first ten years from start of operation.

Buildings and facilities built and registered in the FTZs are fully exempted from the immovable property tax.

**Foreign tax credit**
A foreign tax credit is available for foreign taxes paid up to the amount of the Mongolian tax liability that would have been due on the same amount based on an applicable DTT.

**Withholding taxes**
Dividends, interest, and royalties paid, and payments made for goods sold and work/services provided (directly or electronically), to non-residents are subject to WHT at a 20% rate. Interest provided to non-residents on bonds issued by Mongolian commercial banks and listed on the domestic or foreign stock exchange are subject to WHT at 10%.

Dividends, interest, and royalties paid to resident companies and individuals are all subject to WHT at 10%.

**Current DTTs**

Notes

1. 5% if the recipient is a company (excluding partnerships) and directly owns at least 10% of the capital of the company paying dividends.
2. 5% if the beneficial owner is a company (excluding partnerships) and directly or indirectly holds at least 10% of the capital of the company paying dividends.
3. 5% if the beneficial owner is a company that directly or indirectly controls at least 10% of the voting power in the company paying dividends.
4. 5% if the beneficial owner is a company (excluding partnerships) and directly owns at least 10% of the company.
5. 5% if the beneficial owner is a company (excluding partnerships) and directly owns at least 25% of the capital of the company paying dividends.
6. No tax if dividends paid to the government/certain public bodies.
7. 5% if the beneficial owner is a company and directly or indirectly holds at least 10% of the capital of the company paying dividends.
8. 7% if interest is paid to a bank that is the beneficial owner of the interest and carrying on a bona fide banking business.
9. 5% if the beneficial owner is a company and directly owns at least 25% of the capital of the company paying dividends.
10. 5% if interest is received by a bank or a similar financial institution.
11. 5% if the beneficial owner of the royalties in the meaning of any patent, trademark, design or model, plan, secret formula or process, or for information concerning industrial, commercial, or scientific experience; 10% in all other cases.
12. 5% if the beneficial owner of the royalties in the meaning of copyright royalties and other payments for production or reproduction of any literary, dramatic, and other work, royalties for the use of, or the right to use, computer software or any patent, or for information concerning industrial, commercial, or scientific experience; 10% in all other cases.
**Tax administration**

**Taxable period**
The tax year is the calendar year.

**Tax returns**
Companies must submit a quarterly return by the 20th day of the month following the end of each quarter and an annual return by 10 February after the end of the tax year.

A withholding must prepare and submit a quarterly return of the tax deducted by the 20th day of the first month of the following quarter and an annual return by 10 February after the end of the tax year.

**Payment of tax**
A taxpayer shall pay the taxes due in advance by the 25th day of each month in accordance with the payment schedule based on the previous year. Year-end settlement is made by 10 February of the following year (along with the annual tax statement).

In practice, the Mongolian tax authorities allow concessions as follows:

Where total tax paid exceeds the tax liability, the excess may be credited against other taxes due or credited against future tax payments. The overpayment also may, theoretically, be refunded; however, the practice of refunding in Mongolia is not clear or consistent.

An economic entity or organization that has withheld tax from a payment of dividends, royalties, sale of rights, or a payment of income to a taxpayer should transfer the WHT to the tax authorities within seven working days. Tax withheld relating to the sale of immovable property should be transferred to the tax authorities within ten working days.

**Tax audit process**
The tax audit cycle is not clearly stated in the tax laws. However, the regular cycle in Mongolia is three to five years in practice, and it is very common if the company requests a refund from tax authorities or liquidates its company. Moreover, a tax audit can come anytime if the tax authorities suspect some risk or misuse of the legislation or receive information from a trustworthy source about tax evasion.

**Statute of limitations**
The statute of limitations in Mongolia is five years for tax arrears, fines, and penalties. However, the dispute settlement timeframe shall not pertain to payment of tax, fine, and penalty debts.

**Topics of focus for tax authorities**
The tax authorities normally focus their attention on issues like understatement of income, overstatement of expenses, and withholding obligations of taxpayers.

Another hot topic in Mongolia right now is transfer pricing. The transfer pricing concept is at a very early stage of development. Currently there is very limited (if any) established practice or commonly understood methodology being applied by the tax authorities. Nevertheless, the basic principle governing Mongolian transfer pricing rules is that transactions between related parties should be undertaken at fair market value.

PE is also becoming one of the focus areas of the tax authorities. Although it is possible for PEs to be registered as taxpayers, the filing requirements and the payment of tax are still in question.

Significant developments
There have been no significant corporate tax developments in Montenegro during the past year.

Taxes on corporate income
Entities operating in Montenegro are subject to a 9% corporate profit tax (CPT).

Resident taxpayers are taxed on their worldwide profit. Non-resident taxpayers are taxed on their Montenegrin-sourced income or income attributed to their Montenegrin permanent establishment (PE). Non-residents are also subject to withholding tax (WHT) on income sourced in Montenegro (see the Withholding taxes section for more information).

Local income taxes
No local (i.e. municipality) corporate income taxes exist in Montenegro.

Corporate residence
A legal entity is considered to be a tax resident if it is incorporated in Montenegro. In addition, a foreign corporation may also be deemed a Montenegrin tax resident if the corporation has a place of effective management in Montenegro. No explicit rules exist for determination of effective management. In practice, it usually is the place where key managerial decisions are made or where the board of directors sits.

Permanent establishment (PE)
Montenegrin tax legislation contains very basic PE rules following, in main features, the guidelines set out in the Commentary to the Organisation for Economic Co-operation and Development (OECD) Model Tax Treaty. PE is defined as a fixed place of business through which a non-resident carries out business in Montenegro. PE is deemed to exist in case of a non-resident having one of the following in Montenegro: place of management, branch office, office, factory, workshop, mine, gas or oil site, stone pit, or any other place of natural resources exploitation in Montenegro. A construction site constitutes a PE only if construction activities last longer than six months.

PE is not deemed to exist in case of a non-resident having storage of inventory in Montenegro only for the purpose of delivery of goods or having operations in Montenegro that are of a preparatory or auxiliary nature.

Other taxes
Value-added tax (VAT)
The main principles of the Montenegrin VAT are in line with the European Union (EU) Sixth Directive guidelines. Taxable supplies are subject to a general 19% VAT rate;
however, certain supplies are taxed at a reduced 7% rate (e.g. bread, milk, books, medicines, computers) and 0% rate (e.g. export of goods, supply of gasoline for vessels in international traffic).

In principle, the VAT base is comprised of consideration (in cash, goods, or services) received for supplies, including taxes, except VAT (e.g. customs, excise duty), and direct costs (e.g. commissions, cost of packing, transport). If the consideration is not paid in cash, or if an exchange of goods for services takes place, the tax base will be the market value of the goods or services received at the time of supply. The VAT base cannot be lower than the cost of goods sold.

Registration for VAT in Montenegro may be either voluntary or mandatory. Voluntary VAT registration is possible for small taxpayers who have not realised turnover exceeding 18,000 euros (EUR) in the last 12-month period. Once registered, a company may not apply for deregistration for at least three years. VAT registration is mandatory for an entity that realises turnover exceeding the EUR 18,000 threshold in any 12-month period.

VAT is calculated and paid on a calendar-month basis (i.e. a VAT return must be submitted and VAT liability cleared monthly). VAT calculated on imports is paid along with customs duties.

**Customs duty**

**Exports**

There are no export duties in Montenegro, nor is it forbidden to export any goods. Exceptionally, the Montenegrin government can impose quantity limitation of exports only in case of critical shortage of certain goods or for the purpose of protection of non-renewable natural resources, under certain conditions.

**Imports**

Customs duties are paid on goods imported into the customs territory of Montenegro in accordance with the rates and tariffs set forth in the Customs Tariffs, which is in line with the harmonised system of tariff codes prescribed by the World Trade Organization (WTO). Customs duties can be levied in two manners, as *ad valorem* or specific duty per unit of goods.

For agricultural and alimentary products, a combined duty has been determined, that is, both *ad valorem* and specific duty are charged simultaneously.

*Ad valorem* duties are prescribed within the scope from 0% to 30%. Specific duties range from EUR 0.04 per 1kg to EUR 1 per 1kg.

Customs rates stipulated by international agreements are only applied to goods of preferential origin from countries covered by such agreements. The most important free trade agreements that Montenegro signed are with the European Union, the European Free Trade Association (EFTA), the Central European Free Trade Agreement (CEFTA) states, Russia, Turkey, and Ukraine.

**Excise duty**

Legal entities that are importers or producers of the following products are subject to the excise duty:

- Alcohol and alcohol beverages.
- Tobacco products.
- Mineral oils, their derivatives, and substitutes.
- Mineralised water with sugar or aroma.
Excise duty can be prescribed as a fixed amount and/or as a certain percentage (*ad valorem*).

**Tax on coffee**
Tax on coffee is payable on coffee imported and produced in Montenegro. The tax rate varies from EUR 0.80/kg to EUR 1.30/kg, depending on the type of the coffee. Tax on coffee is also payable for products and beverages that contain coffee. The tax rate for these products is EUR 2.50/kg for one kg of net coffee contained in the final product.

**Property tax**
Property tax is payable by legal entities who own or have user rights over real estate located in Montenegro. The annual tax is levied at proportional rates, ranging from 0.25% to 1% on the market value of assets as of 1 January of the current year. In case of acquisition of new property, the taxpayer is obligated to submit a tax return to the tax authorities within 30 days from the acquisition date (i.e. registration return for property tax) and to declare annual property tax by the submission of annual returns. Tax is payable in two instalments, based on decisions issued by the tax authorities.

**Property transfer tax**
Transfer tax of 3% is payable on the acquisition of ownership rights over immovable property.

The taxable base is the market value of the immovable property at the time of the acquisition. A taxpayer (i.e. the acquirer of immovable property) is obligated to self-assess a tax liability, submit a tax return, and settle a tax liability within 15 days from the contract date.

**Stamp taxes**
No stamp taxes are in place in Montenegro.

**Payroll tax**
Employment income includes all receipts paid or provided to an individual based on employment (salaries, pensions, benefits in kind, insurance premiums, benefits, and awards above the non-taxable thresholds). Income generated through other types of personal engagements similar to employment (e.g. temporary jobs) is also considered employment income.

While employees are the taxpayers, the employer is responsible for calculating and withholding personal income tax (PIT) on behalf of its employees.

Employment income is subject to WHT at a flat rate of 9%. Gross salary exceeding EUR 720 is subject to 15% PIT. The 15% rate applies to the part of the salary exceeding EUR 720, while the 9% rate applies to the part of the salary below (and including) EUR 720.

**Social security contributions**
Social security contributions for pension and disability insurance, health insurance, and unemployment insurance are calculated and withheld by an employer from the salary paid to an employee. Unlike the other two types of social security contributions, pension and disability insurance contributions are subject to a specific annual cap (EUR 50,350 for 2016).

Social security contributions are payable by the employer and employee at different rates. The amount borne by the employer is treated as an operating cost while the portion payable by the employee is taken from the gross salary.

The rates paid by the employer are as follows:

- Pension and disability insurance 5.5%.
Montenegro

- Health insurance 4.3%.
- Unemployment insurance 0.5%.

The rates paid by the employee are as follows:

- Pension and disability insurance 15%.
- Health insurance 8.5%.
- Unemployment insurance 0.5%.

**Environmental charges**

Legal entities are subject to environmental charges for the following:

- Use of firing or electrical feed equipment with power greater than 1MW.
- Import of substances harmful to the atmosphere.
- Production or deposit of dangerous waste.
- Tax for use of road vehicles (vignettes).
- Charges for access to certain services that are of general interest (for use of mobile telephones, electricity, cable television connection, space denominated for consumers of tobacco products and acoustic devices).

**Branch income**

Non-residents carrying out business in Montenegro through a PE are taxed on their Montenegrin-source income at a rate of 9%. A branch is considered to be a PE.

**Income determination**

Taxable profit is calculated by adjusting the accounting profit (determined in accordance with International Financial Reporting Standards [IFRS] and accounting legislation) in accordance with the provisions of the CPT Law.

**Inventory valuation**

Inventory is valued by applying the average weighted cost method or the first in first out (FIFO) method. If another method is used for book purposes, an adjustment for tax purposes should be made.

**Capital gains**

Capital gains realised by the sale or transfer of real estate or other property rights, as well as shares and other securities, are subject to the 9% CPT rate.

Capital gains may be offset against capital losses occurring in the same period. A capital loss may be carried forward for five years.

**Dividend income**

Dividend income of the recipient is exempt from CPT in Montenegro if the distributor is a Montenegrin corporate taxpayer.

**Interest income**

Interest income is included in taxable profit and subject to 9% CPT.

**Foreign income**

A Montenegrin resident receiving foreign income is granted a tax credit in the amount of the tax paid abroad but limited to the amount that would be calculated using Montenegrin rates.
Montenegro

There are no provisions that provide for the possibility that taxation of income earned abroad may be deferred.

**Deductions**

**Depreciation**
Depreciable assets are tangible and intangible assets with a useful life of at least one year and an individual acquisition value of at least EUR 300.

Intangible and fixed assets are divided into five depreciation groups, with depreciation rates prescribed for each group (I - 5%, II - 15%, III - 20%, IV - 25%, and V - 30%). A straight-line depreciation method is prescribed for assets classified in the first group (real estate), while a declining-balance method is applicable for assets classified in the other groups.

**Goodwill**
Goodwill is determined according to IFRS and is subject to impairment. There are no other special provisions on goodwill.

**Start-up expenses**
There are no special provisions regarding treatment of start-up expenses. Therefore, they will be deductible if they are incurred for business purpose and properly documented under the general expense deductibility rule.

**Interest expenses**
Interest expenses are generally deductible if they are business related and properly documented. Also, interest and related cost of loans paid out to a creditor with the status of a related party are recognised as expenses only in the amount that does not exceed market interest rates between unrelated parties. The exceeding amount is not recognised as an expense, but it is included in the taxable profit and subject to 9% CPT.

Interest paid out to non-resident legal entities (unless it is revenue of a PE of a non-resident legal entity) is subject to WHT levied at 9%.

**Bad debt**
Write-offs and provisions for doubtful debts are considered deductible, provided that:

- written-off/provided receivables were previously included in the taxpayer's revenues
- doubtful debts were written-off as uncollectible, and
- proof of unsuccessful collection of these debts exists.

**Charitable contributions**
Charitable contributions for healthcare, scientific, educational, humanitarian, religious, environmental protection, and sports-related purposes are recognised for CPT purposes, up to a threshold of 3.5% of total revenue.

**Fines and penalties**
Penalty interest for late payment of taxes is not CPT deductible.

**Taxes**
The basic deductibility rule is that business expenses incurred for business purposes are CPT deductible. Following that rule, CPT Law provides for full deductibility of taxes.

**Other significant items**
The following expenditures are also recognised for CPT purposes, up to the prescribed threshold:
• Entertaining expenses, up to 1% of total revenue.
• Membership fees paid to chambers of commerce and other associations (except political parties), up to 0.1% of gross revenue unless the amount of the fees has been determined by law.
• Provisions for redundancy payments and jubilee awards recognised as expenditures, up to the amount prescribed by the labour law.
• Provisions made by banks and insurance companies, in an amount not exceeding the amount prescribed by the legislation that regulates operation of these entities.
• Provisions for special risks of brokers and dealers, up to the amounts prescribed by the securities law.
• Provisions for renewable natural resources, warranties for the sale of goods and services (guarantee period), and the expected loss from court process (delicate agreements) if accounted for in accordance with the accounting legislation.

**Net operating losses**
The taxpayer is entitled to carry forward losses incurred in an accounting period over the following five years. Carryback of losses is not allowed.

**Payments to foreign affiliates**
Supplies of goods or services from a foreign group entity not established in Montenegro to a Montenegrin entity must be valued at arm’s length. Excess expenses recorded over market value are treated as non-deductible expenses.

With respect to payment of charges of a PE, CPT Law provides that administrative costs charged by the non-resident head office are non-deductible for CPT at the level of PE.

**Group taxation**
Tax consolidation is permitted for a group of companies in which all of the members are Montenegrin residents and the parent company directly or indirectly controls at least 75% of the shares in the other companies. Each company files its own tax return, and the parent company files a consolidated tax return for the entire group.

Each company is taxed based on its contribution to the consolidated taxable profit (or loss) of the group.

Tax consolidation is binding for at least five years.

**Transfer pricing**
The difference between the transfer price and arm’s-length price is included in the taxable profit and is taxed accordingly. Parties considered to be related are the parties between whom special relations exist, which could directly impact the conditions or economical results of the transaction between them.

Methods permitted in determining arm’s-length price are the comparable uncontrolled price (CUP) method (as the primary method), resale minus method, or cost plus method.

There are no other rules or guidelines introduced apart from the above rules in respect to transfer pricing.

**Thin capitalisation**
There are no thin capitalisation provisions in place in Montenegro.

**Controlled foreign companies (CFCs)**
There are no CFC rules in Montenegro.
Montenegro

**Tax credits and incentives**

The CPT Law provides four tax incentives related to businesses: one for newly established businesses in non-developed municipalities, one for non-governmental organisations (NGOs), a discount for settling of CPT liability by the prescribed deadline, and a foreign tax credit.

**Tax exemption for newly established businesses in underdeveloped municipalities**

Newly established production companies located in underdeveloped municipalities are entitled to an eight-year tax exemption. The maximum amount of tax exemption for the period of eight years is limited to EUR 200,000.

The incentive is applicable to companies whose business units are established in underdeveloped regions. In that case, tax holiday is proportional to the amount of profit generated by such unit over the total profit for the period of eight years from establishment of the unit.

The tax incentive is not applicable to a taxpayer operating in the sectors of (i) primary production of agricultural products, (ii) transport, (iii) shipbuilding, (iv) fishery, (v) steel production, (vi) trade, and (vii) catering, except primary catering facilities.

**Tax exemption for NGOs**

NGOs registered for business activity are permitted to decrease the corporate tax base by EUR 4,000, with the condition that profit is used for realisation of the main goals of an NGO.

**Discount for settling CPT liability on time**

A discount of 6% that is applied on the amount of the calculated CPT liability is available to taxpayers that settle their CPT liability by the prescribed deadline (i.e. by 31 March of the current year for the tax liability of the previous year).

**Foreign tax credit**

Resident taxpayers are entitled to a tax credit up to the amount of corporate tax paid in another country on income realised in that country. This tax credit is equal to the tax paid in another country but may not exceed the amount of the tax that would have been paid in Montenegro.

**Withholding taxes**

Montenegrin CPT Law imposes WHT on income realised from a Montenegrin source and distributed to a non-resident. The scope of the WHT applies to dividends and profit distribution, capital gains, interest, royalties, intellectual property rights fees, and rental income, as well as fees for consulting, market research, and audit services.

Distributions of dividends and share of profits are also subject to WHT if the recipient is a Montenegrin resident (either an individual or legal entity).

The general WHT rate is 9%.

Application of a double tax treaty (DTT) may reduce or eliminate Montenegrin WHT. To qualify for the beneficial rates prescribed by the treaty, a non-resident must prove tax residency of a relevant treaty country and beneficial ownership over the income. In order to qualify for a preferential tax rate according to a DTT, a non-resident will need to provide the tax residency certificate filled out and stamped by the relevant authority of its country of residence.
Although Serbia is regarded as the legal successor of the Serbia and Montenegro State Union that ceased to exist in June 2006, the Republic of Montenegro, upon its Decision on Independence (dated 3 June 2006), continues to honour international treaties that were applicable in the State Union, including those executed by State Union’s legal predecessors (Federal Republic of Yugoslavia and Socialist Federal Republic of Yugoslavia, i.e. former Yugoslavia). However, a quite low statutory WHT rate of 9%, which was enacted after most of the treaties had been introduced, is usually more beneficial than treaty rates.

The list of the treaties is provided below:

Notes

1. If the recipient company owns/controls at least 25% of the equity of the paying company, the lower of the two rates applies.
2. A new DTT was signed with Egypt in 2005, but it is not applicable yet. Meanwhile, the old treaty is still applicable.
3. Instruments of ratification have not been exchanged between the two countries.
4. A tax rate of 5% will be applicable to literary, scientific, and work of art, films and works created like film, or other sources of reproduction tone or picture. A tax rate of 10% will be applicable to patents, petty patents, brands, models and samples, technical innovations, secret formulas, or technical procedure.
5. Only in cases when dividends are to be paid to Montenegrin residents. If paid to Malaysian residents, they are taxable at 9% in Montenegro.
6. A 5% rate is applicable for intellectual property and 10% rate for industrial property.
7. A 0% rate is applicable in cases when the income recipient is the government or government-owned banks.
8. A 5% rate is applicable in cases when the beneficial owner is a company that holds at least 5% of the capital of the payer of the income. In all other cases, a 10% rate applies.

**Tax administration**

**Taxable period**
The tax year in Montenegro is the calendar year.

**Tax returns**
Tax returns and supplementary documents (e.g. tax depreciation form) must be filed with the tax authorities by the end of March of the following year.

**Payment of tax**
CPT is paid by the end of March of the following year for the previous year. Alternatively, CPT may be paid in six annual instalments at the taxpayer’s request. A discount of 6% is applicable on the amount of the calculated CPT liability for the timely payment of the tax due (see the Tax credits and incentives section for additional information).

**Tax audit process**
There are no particular provisions regarding the audit cycle in Montenegro.

**Statute of limitations**
The right to assess taxes expires within five years after the end of the year in which the tax should have been assessed.

The right to collect taxes expires within five years after the end of the year in which tax has been determined.

**Topic on focus for tax authorities**
According to our best knowledge, the focus of the tax authorities is proper documenting of expenses and VAT. Apart from this, we are expecting that in the near future the focus of the tax authorities will be transfer pricing, following trends of the countries in the region.
Other issues

Foreign Account Tax Compliance Act (FATCA) intergovernmental agreement (IGA)
Montenegro and the United States reached an ‘agreement in substance’ on a Model 1 IGA and consented to this status as of 30 June 2014. In accordance with this status, the text of such IGA has not been released, and financial institutions in Montenegro are allowed to register on the FATCA registration website consistent with the treatment of having an IGA in effect, provided that the jurisdiction continues to demonstrate firm resolve to sign the IGA as soon as possible.

---

**Significant developments**

**New corporate income tax (CIT) rates**

Prior to 1 January 2016, the normal CIT rate in Morocco was 30% (10% for companies for which the taxable income was equal to or lower than 300,000 Moroccan dirham [MAD]). See the Taxes on corporate income section for the CIT rates applicable as of 1 January 2016 under Finance Law 2016.

**Minimum contribution carryforward**

Prior to 1 January 2016, companies were allowed to carry forward the minimum contribution (minimum of CIT) in order to offset against the difference between the CIT and minimum contribution of future years (with a limit of three years).

Finance Law 2016 cancels the possibility of the above carryforward as of 1 January 2016; consequently, the minimum contribution payable for a specific fiscal year becomes a final income tax.

**Tax penalties**

Finance Law 2016 provides for the application of new rates for penalties and late payment interest as of 1 January 2016. See the description of Penalties in the Tax administration section for more information.

---

**Taxes on corporate income**

In general, the Moroccan tax code considers that all revenues and capital gains generated in Morocco are subject to Moroccan taxation.

Companies are taxed on the difference between their trading income and expenditure. Business expenses incurred in the operation of the business are generally deductible unless specifically excluded.

The CIT rates are as follows:

<table>
<thead>
<tr>
<th>Taxable income (MAD)</th>
<th>From</th>
<th>To</th>
<th>CIT rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>0</td>
<td>300,000</td>
<td>10</td>
</tr>
<tr>
<td></td>
<td>300,001</td>
<td>1,000,000</td>
<td>20</td>
</tr>
<tr>
<td></td>
<td>1,000,001</td>
<td>5,000,000</td>
<td>30</td>
</tr>
<tr>
<td></td>
<td>5,000,001</td>
<td>and above</td>
<td>31</td>
</tr>
</tbody>
</table>

A higher CIT rate of 37% applies to leasing companies and credit institutions.

Non-resident companies can, under certain conditions, opt for an alternative tax at the rate of 8% of the amount of their contract, whatever the taxable income is.
Minimum contribution

CIT cannot be lower than a minimum contribution of 0.5% (or 0.25% for specific products) levied on the turnover and other specific revenues. The minimum contribution is not due during the first 36 months following the beginning of activities.

Prior to 1 January 2016, the minimum contribution paid in case of loss or the portion of minimum contribution that exceeded the amount of CIT could be offset against the portion of CIT that exceeded the minimum contribution until the third year.

Finance Law 2016 revokes the three-year carryforward for minimum contributions accrued as of 1 January 2016.

Local income taxes

There are no local taxes levied on income in Morocco.

Corporate residence

Companies, whether or not established in Morocco, are subject to CIT on all profits or income relating to property that they own, activities that they carry on, and profit-making transactions that they carry out in Morocco, even when these are of an occasional nature.

Permanent establishment (PE)

The notion of PE is not explicitly defined under Moroccan tax law.

However, the Moroccan tax authorities apply this concept for non-resident companies according to some determined criteria that are inspired from the various tax treaties that Morocco has signed with other countries.

Indeed, the question of whether an entity will be deemed to have a PE in Morocco is a question of fact, in particular, subject to having, in Morocco, any fixed place of business through which a foreign entity conducts industrial or commercial activity for an indefinite or substantial period of time.

The term fixed place of business includes, for instance, a place of management or operations, a branch, an agency, a premises used as a sales outlet, a construction of assembly project, or a purchasing office. Also, in some specific cases, a non-resident company may be deemed as having a PE if it operates in Morocco through a dependent agent.

Other taxes

Value-added tax (VAT)

VAT is levied under the Moroccan Tax Code and is due on all industrial, commercial, and handicraft transactions taking place in Morocco, as well as on importation operations.

The standard rate of VAT is 20%. Lower rates of 7%, 10%, and 14% apply to specifically designated operations.

The sale of goods is considered as taking place in Morocco, and thus subject to VAT, if the goods sold are delivered in Morocco.

The sale of services is considered as taking place in Morocco, and thus subject to VAT, if the services sold are consumed or used in Morocco.
Morocco

Two types of exemptions from VAT are provided. The first is an exemption with credit, equivalent to the zero tax concept. The second is an exemption without credit.

The zero-rated supplies include (but are not limited to) supplies of the following goods or services:

- Exported goods and services.
- Certain agricultural equipment supplied under prescribed circumstances.
- Investment goods recorded as fixed assets in the company accounting and acquired during the first 24 months following the beginning of activity.
- Offshore banks for certain specific operations, such as interest and commissions.
- Goods and services rendered to companies established in free trade zones (FTZs).
- Activities related to hydrocarbon exploration, etc.

Exempt supplies without deduction right include (but are not limited to) supplies of the following goods or services:

- Milk, sugar, bread, cereals.
- Fiscal stamps.
- Newspapers, books, documentaries.
- Interest on government loans.

**Customs duties**

Importation of goods in Morocco gives rise to payment of importation duties, the VAT on importation, and the special tax on importation called *Taxe Parafiscale à l’Importation* (TPI).

Customs duties are computed on the basis of the *ad valorem* value of the goods at the time of their entrance into Morocco.

Customs duties can be reduced if the imported products are covered by free trade agreements signed by Morocco or other specific regulatory dispositions.

Under Moroccan tax law, the importation operations are subject to VAT at the rate of 20%. Lower rates of 7%, 10%, and 14% apply to specifically designated importations.

The Moroccan tax law also offers some economical customs regimes that provide VAT exemptions with credit (equivalent to zero rate).

The TPI rate is 0.25% levied on the value of the imported goods.

**Excise taxes**

Excise taxes apply to specific products imported or produced in Morocco, such as tobacco, alcohol, and lubricants.

**Professional tax**

A professional tax is levied on individuals and enterprises that carry out a professional activity in Morocco.

The tax consists of a tax on the rental value of business premises (rented or owned) and fixed assets. The tax rates range from 10% to 30%, with exemption for the five first years of activity.

The rental value is exempted for the portion of cost exceeding MAD 50 million.
Registration duties
Registration duties are due on all written or verbal conventions, such as property transfer of real estate, shares, or rights; company set up; equity increase; and goodwill transfer.

The rates of registration duties range from 1% to 6%. A flat rate of MAD 200 is also applicable to specific operations and conventions.

The company set up and the capital increase are subject to registration duties at the rate of 1%.

The transfer of non-listed shares is subject to registration duties at the rate of 4%. However, a 6% rate is applicable to the transfer of shares of real estate companies.

The applicable rate for the transfer of goodwill is 6%.

Payroll taxes
Individual income tax on salaries is paid by way of withholdings made by resident employers.

Social security contributions
The only mandatory social security regime in Morocco is the one managed by the CNSS fund (Caisse Nationale de Sécurité Sociale).

The CNSS rates are as follows and apply to the gross salary, excluding exempted allowances and indemnities:

<table>
<thead>
<tr>
<th></th>
<th>Employee portion (%)</th>
<th>Employer portion (%)</th>

<td>2.26</td>
<td>4.11</td>
<td>-</td>
</tr>
</tbody>
</table>

Branch income
Non-resident entities are subject to income tax at normal CIT rates derived from all profits or income relating to property that they own, activities that they carry on, and profit-making transactions that they carry out in Morocco.

The taxation is levied to the portion of income allocable to the branch located in Morocco.

In addition, a 15% 'branch tax' applies to a non-resident’s after-tax profits. Some treaties may provide protection against the application of the branch tax.

For resident entities having branches in Morocco, the income is taxable in the hands of the head office at normal CIT rates.

Income determination

Inventory valuation
Cost of inventory must be determined in accordance with the first in first out (FIFO) or the average cost method. The last in first out (LIFO) method is prohibited.
**Capital gains**
Capital gains are taxable as a part of ordinary business income.

**Dividend income**
Dividends received by corporate shareholders from Moroccan-resident entities subject to CIT must be included in business profits of the recipient company, but the dividends are 100% deductible in the computation of taxable income.

The participation exemption in Morocco is also applicable to dividends derived from foreign subsidiaries.

**Interest income**
Interest income received from tax resident entities (other than financial institutions) is subject to a withholding tax (WHT) at the rate of 20%. The WHT is deductible from CIT.

**Rents/royalties income**
Rents and royalties income are taxable as a part of ordinary business income.

**Foreign income**
The income derived from activities carried out in a foreign country is not subject to taxation in Morocco unless the taxation is granted by treaty dispositions.

Note that the participation exemption in Morocco is also applicable to dividends derived from foreign subsidiaries.

---

**Deductions**

**Depreciation**
Fixed assets are normally depreciated according to their economic life duration according to the provision of the accounting regulation.

Depreciation is computed according to two methods: the straight-line method and the declining-balance method.

The tax regulation (through administrative guidelines) has provided indicative depreciation rates applicable when the company activity or the asset to be depreciated is specific or particular.

Indicative depreciation rates are as follows:

<table>
<thead>
<tr>
<th>Asset</th>
<th>Depreciation rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Business premises and buildings</td>
<td>4 to 5</td>
</tr>
<tr>
<td>Light construction (metal frame construction)</td>

<td>10 to 20</td>
</tr>
<tr>
<td>Computers and related items (printers) and programs, as well as vehicles (cars, trucks, vans, lifters)</td>
<td>20 to 25</td>
</tr>
<tr>
<td>Office furniture and software</td>
<td>20</td>
</tr>
<tr>
<td>Non-significant tools</td>
<td>30</td>
</tr>
</tbody>
</table>

**Goodwill**
Under Moroccan tax law, goodwill cannot be subject to amortisation. However, a decrease of the value of goodwill is allowed to be recorded through provisions.
**Start-up expenses**
The development as well as incorporation expenses shall be capitalised and depreciated for tax purposes over a period of five years.

The carryforward of any loss due to the above expenses is limited to a period of four years.

**Interest expenses**
Interest on loans granted by direct shareholders is deductible if the capital is fully paid in. Also, the deductible interest is limited to (i) the portion of the loan that does not exceed the share capital equity and (ii) the interest rate provided, annually, by the Ministry of Finance (2.53% in 2016).

**Bad debt**
Bad debts that are definitively non-recoverable (after all recovery procedures have been undertaken) are treated, from a tax point of view, as deductible losses.

**Charitable contributions**
Charitable contributions made by companies are deductible only if they are granted to foundations and societies explicitly provided by law.

The contributions made to the community enterprise are deductible at up to 0.2% of the company turnover.

**Fines and penalties**
Fines and penalties are not tax deductible expenses if they relate to infringements to legal and regulatory dispositions.

However, expenses relating to late payment penalties (calculated in accordance with the provisions of the law) should be tax deductible.

**Taxes**
Taxes constitute deductible expenses, except CIT itself and recoverable taxes.

**Net operating losses**
Tax losses may be carried forward for a period of four years from the end of the loss-making accounting period. However, the portion of a loss that relates to depreciation may be carried forward indefinitely.

A carryback mechanism is not allowed under Moroccan law.

**Payments to foreign affiliates**
Payments to foreign affiliates are allowed under Moroccan law. However, such payments should respect the arm’s-length principle and foreign exchange regulations.

**Group taxation**
Under Moroccan law, consolidation or group taxation is not allowed.

**Transfer pricing**
Morocco has a general provision within its tax legislation requiring transactions between related parties to be at arm’s length.

Where a Moroccan company is directly or indirectly connected with enterprises situated inside or outside Morocco, profits transferred indirectly to such enterprises, by means of increases or decreases in buying or selling prices or by any other means, must be included among taxable profits on the tax return.
In order to determine the amount to be included among taxable profits, Moroccan tax authorities will make comparisons with other similar companies carrying on normal business activities or by means of direct assessment based on information available to the tax authorities.

**Thin capitalisation**
No specific thin capitalisation rules exist in Morocco.

However, the tax law restricts the interest rate on debts issued by shareholders and the basis of calculating deductible interests.

Interest incurred is tax deductible if the shareholder’s capital is fully paid. Additionally, the sum of the shareholder loans generating deductible interests should not exceed the equity capital subscribed, and the applicable interest rate should not exceed the official rate calculated annually on the basis of six months treasury bills.

**Controlled foreign companies (CFCs)**
There are no provisions for CFCs in Morocco.

---

**Tax credits and incentives**
The Moroccan tax law provides several tax incentives for specific sectors of activities.

**Export companies**
Export companies are exempt from CIT on their profits related to their export turnover during the first five years following their first export transaction. These companies benefit from a reduced CIT rate of 17.5% in subsequent years.

**Hotel companies**
Hotel companies are fully exempt from CIT on their profits relating to foreign currency turnover for the first five years following their first accommodation operation in foreign currency. They also benefit from a reduced CIT rate of 17.5% on such profits for subsequent years.

**Mining companies**
Exporting mining companies, including those that sell products to export companies, benefit from a reduced CIT rate of 17.5%.

**Agricultural companies**

**Small-scale companies**
Agricultural companies with a turnover of less than MAD 5 million qualify for a total exemption of CIT. If such companies realise a turnover that exceeds MAD 5 million in year (n), they become liable to CIT in year (n), year (n+1), year (n+2), and year (n+3).

Moreover, such companies qualify for a reduced rate of 17.5% during the first five fiscal years following the first year during which they become liable to CIT.

**Medium and large-scale companies**
Finance Law 2014 provides for a progressive approach to tax medium and large-scale agricultural companies that realise a turnover exceeding MAD 5 million. As such, companies with a turnover exceeding MAD 35 million, MAD 20 million, or MAD 10 million should become liable to CIT, respectively, in 2016, 2018, and 2020.

Moreover, such companies qualify for a reduced rate of 17.5% during the first five fiscal years following the first year during which they become liable to CIT.
**Capital risk companies**
Capital risk companies are exempt from CIT on profits derived within the scope of their activities (these are profits related to purchases of companies’ shares that support such companies’ development and the sales of such shares thereafter).

**Hydrocarbon companies**
Companies holding hydrocarbon exploration and exploitation permits are exempt from CIT for ten years from the beginning of hydrocarbon regular production.

**Banks and holding companies located in offshore zones**
Banks and holding companies located in offshore zones benefit from a reduction in CIT for the first 15 years of operation.

Banks may opt for a minimum CIT of 25,000 United States dollars (USD) or pay the tax at a reduced rate of 10%.

Holding companies pay a flat tax of USD 500 during the first 15 years.

**Casablanca Finance City (CFC)**
A law was enacted in 2010 for the setting up of a finance area in Casablanca, called, Casablanca Finance City.

The CFC statute may be granted to specific financial institutions as well as non-financial institutions that offer such services as auditing, fiscal, legal, financial, actuarial, and human resources management advisory.

The above statute may also be granted to regional and international headquarters.

Entities established in Casablanca Finance City are exempt, for their export turnover, from CIT during the first five years following the date they obtain the CFC statute. These companies benefit, for the export turnover, from a reduced rate of 8.75% in subsequent years.

**Free trade zones (FTZs)**
The activities that must be necessarily performed by the companies established in the FTZs are mainly the following (the activities may vary for each FTZ):

- Food processing industries.
- Textile and leather industries.
- Metallurgic, mechanic, electric, and electronic industries.
- Chemical and special chemical industries.
- Services connected with the aforementioned activities.

Entities established in FTZs are exempt, for their export turnover, from CIT during the first five years. These companies benefit, for the export turnover, from a reduced CIT rate of 8.75% for the following 20 years.

Moreover, for entities established in FTZs, the dividends paid to non-residents relating to activities performed in the FTZ are totally exempted from the WHT on dividends.

**Listed shares**
Non-resident entities are exempt from capital gains derived from the sale of stocks listed on the Casablanca stock exchange, excluding the shares of real estate entities.

**Foreign tax credit**
Income tax paid on income earned from outside Morocco may be credited against CIT payable in Morocco if provided by treaty.
Morocco

**Withholding taxes**

**WHT on dividends**

The standard WHT rate on dividends is set at 15% according to the Moroccan law (unless reduced by treaty).

WHT does not apply to dividends paid to Moroccan companies subject to Moroccan CIT, subject to the delivery of a property attestation.

A branch tax of 15% applies to the net income transferred by the Moroccan branch to foreign entities (may be reduced by the tax treaty).

**WHT on interests**

The standard WHT on interest paid to non-resident entities is set at 10% as provided by the Moroccan law (unless reduced by treaty). However, the Moroccan law provides that interest on loans granted in foreign currency with a maturity exceeding ten years is exempt from WHT.

**WHT on services paid to non-resident entities**

According to the Moroccan tax code, all payments of all kinds of services rendered by non-resident entities are subject to WHT at the rate of 10%.

However, it shall be noted that treaty dispositions limit the scope of application of WHT only to remunerations that constitute royalties. Such dispositions overrule the domestic tax law provided by the Moroccan law.

**Treaty WHT rates**

Payments to non-resident corporations and individuals are subject to WHT, as shown below.

### Tax administration

#### Taxable period
The taxable period corresponds to 12 months. The first taxable period can be less than one year but should never exceed it.

#### Tax returns
CIT returns must be filed within three months following the closing of the fiscal year.

#### Payment of tax
Payment of tax is made during the fiscal year by way of four instalments of 25% each based on the CIT of the previous year.

In case the CIT of the year exceeds the sum of the four instalments, the company should proceed to tax regularisation along with the submitting of the taxable income return after three months following the closing of the fiscal year (i.e. 31 March for fiscal year corresponding to the calendar year). Otherwise, the exceeding tax amount should be offset against the following instalments without limitations.
Morocco

Penalties
Finance Law 2016 provides for the application of new rates for penalties and late payment interest, as of 1 January 2016, as follows:

In case of late tax return:

- 5% penalty in case the tax return is submitted within 30 days following the legal deadline, or in case of corrective return.
- 15% penalty in case the tax return is submitted after the above mentioned 30 days.
- 20% penalty in case of automatic taxation due to non-submission of tax return.

In case of late tax payment:

- 5% penalty in case the tax payment is made within 30 days following the legal deadline.
- 10% penalty in case the tax is paid after the above mentioned 30 days.
- 20% penalty in case of non-payment or late payment of VAT and other WHTs.
- 5% interest related to the first month late tax payment and 0.5% interest for the following months.

Statute of limitations
The statute of limitations runs until the end of the following fourth year. This period may be extended in case of deficits or credits.

Topics of focus of tax authorities
The topics of focus of tax authorities depend on each specific situation (sector of activity, company size, etc.). However, it is very common to find the following points:

- Transfer pricing.
- Tax treatment of provisions.
- Taxation of indemnities and benefits granted to employees.

Other issues

Exchange controls
Foreign investors are allowed, following the accomplishment of some formalities, to freely transfer abroad the whole proceeds of their investments in Morocco (i.e. dividends, shares sale price, and liquidation income under the condition that the initial investment is realised in one of the foreign currencies listed by the Moroccan Central Bank).

However, some specific transfers of funds into and out of Morocco are subject to prior authorisations from the exchange control office.

Choice of business entity
The legal vehicles used by foreign companies for the purpose of setting up a business in Morocco are the branch and the subsidiary.

Under subsidiary form, the foreign entities generally opt for the corporation (SA) or the limited liability company (SARL).

The SARL is most adequate for companies with low investment capital while the SA is most appropriate for companies that are investing an important amount of capital. In general, the rules relating to the organisation and functioning of an SARL are more flexible than those required for an SA.
**Significant developments**

**Regulation of the specific tax regime and tax benefits for mining activity**

The Decree no. 28/2015 of 28 December did not bring changes or clarifications in relation to Law no. 28/2014 of 23 September.

Recalling some changes in the new regime, namely the tax on mining production (TMP), article 4.1 of this regulation establishes that the value of mining product is determined by the price of the last sale by the taxable person, which must match with the price of reference in the international market, or, if there was no sale, is determined by the price of reference in the international market.

This regulation reduced the rates for mining products, being 8% for diamonds, 6% for precious metals, precious stone and semi-precious stone, and heavy sand, 3% for base metals, coal, and others, and 1.5% for sand and stone. Such rates can be reduced to 50% when the products are used in Mozambique for the development of local industry.

The settlement of the TMP is now performed on the tenth day of the month that follows the production.

There are also changes regarding the rate of the surface tax (ST), which is based on the type of mining title and year of activities, with exception of the mining concession for mineral water that has an amount of 85,000 Mozambican meticais (MZN) per mining title.

The additional settlement for the TMP and ST must be done within 30 days from the tax settlement.

At the end of each year, the taxpayer must report the yearly profit for each mining title, separately.

According to this regulation, the holder of the mining title also pays the tax on mining resource rent (TMRR), and, for its deduction, the concessionaire must provide information to the tax authorities on the accumulated net cash flows, corresponding to the taxable income.

The applicable rate for TMRR is 20%.

At the beginning of the fiscal year, each taxpayer must prepare a forecast to TMRR that must be regularly updated and presented by 31 May of the fiscal year. The TMRR is paid in two instalments (50% in August and 50% in November), based on the forecast.

It was expected that this regulation would bring more details about the calculation of TMRR, which was not the case.
Regulation of the specific tax regime and tax benefits for oil and gas operations

In accordance with the regulation of the specific tax regime and tax benefits for oil and gas operations, the obligation to pay the tax on oil production (TOP) is deemed to be at the time that the oil produced comes to the station defined in the concession agreement.

The settlement of the TOP is made by the taxpayer, which must submit the official form to the tax administration by the tenth day of the following month of the production, and, if the taxpayer fails to do so, the tax administration will make the necessary assessments based on the elements it has and the application of penalties established in article 22 of the mentioned regulation.

The TOP rates are the following: 10% for crude oil and condensate and 6% for natural gas and liquefied natural gas (LNG), which can be reduced by 50% in cases where the production is to be used for the development of local industry. It is considered local industry if the sale is for the national hydrocarbon company (ENH, E.P).

After the settlement made by the taxpayer, the tax administration shall evaluate the official model and can make corrections to it. If a correction is to be made, the tax administration has the prerogative to conduct an additional settlement, in which it must charge or cancel the calculated difference, and this amount must be corrected in 30 days from the tax assessment.

It is important to mention that the government has a period of time to notify the taxpayer to pay in kind, which is within 12 months in advance, starting from the first day of the month to which the tax relates, indicating the quantity of oil and delivery point.

In order to have benefits established in Law no. 27/2014 of 23 September, the taxpayer must apply to the Customs Services for the exemption. In this request, the applicant must attach the global list of the goods to import for the determination of eligible goods for the exemption.

The violation of this regulation is subject to impeditive sanctions (in case of violation of article 36 of Law no. 27/2014), suspensive sanctions (the practice of acts established in article 22.3 of the regulation), and extinctive sanctions.

Taxes on corporate income

Corporate entities and other entities with headquarters or permanent establishment (PE) in Mozambique are subject to corporate income tax (CIT) based on their worldwide income. On the other hand, corporate entities and other entities without headquarters or PE in Mozambique (i.e. non-resident entities) are only subject to CIT on the income earned in Mozambique.

CIT is levied on taxable profits, defined as accounting profits adjusted to comply with tax law rules, at a tax rate of 32%. For tax years ending prior to 1 January 2016, income arising from agricultural or cattle breeding activities was subject to a reduced rate of 10%.

Local income taxes

See Municipality taxes in the Other taxes section.

Corporate residence

Corporate residence is determined on the basis of a company’s place of incorporation or effective management. Thus, all companies with headquarters in Mozambique, as well
as any PE of non-resident entities, are considered tax residents and are liable for CIT on their worldwide income.

**Permanent establishment (PE)**

Under the relevant internal legislation, a non-resident entity is deemed to have a PE in Mozambique whenever any of the following circumstances exists:

- It has premises or other fixed places of business through which industrial, trading, agricultural, rendering of services, or similar activities are totally or partially carried out.
- It has an office, branch, plant, workshop, mines, quarries, oil or natural gas wells, or other places of extraction of natural resources.
- It has a construction, installation, or assembly site when the duration of works exceed six months, including the activities of coordination, inspection, and supervision connected to these sites.
- It has persons or hired personnel, acting and dealing in Mozambique, who are not independent agents in the terms of the law but rather acting on behalf of the company with legal capacity to conclude contracts on its behalf and its name within the scope of the company’s activities.

**Other taxes**

**Value-added tax (VAT)**

VAT is chargeable on the sale of most goods and services as well as on imports. The standard rate is 17%. Usually, VAT is recoverable by corporate entities, except for those engaged in special business activities (e.g. financial and insurance operations, leasing [exemption with restrictions], sale of immovable property, some exempt activities).

**Customs duties**

Customs duties are charged on importation of goods into Mozambique, and the applicable rates vary from 0% to 20%. Mozambique is part of the Southern African Development Community (SADC) protocol on commercial trade that exempts from customs duties some goods produced within the SADC region. However, in order to benefit from the exemption, the importer should provide proof of the origin of the said goods through the presentation of the certificate of origin of goods.

Mozambique also has signed agreements with the European Union (EU) based on which preferential rates are applicable on certain goods imported from such region.

**Excise taxes**

Excise duties are levied on certain goods manufactured locally or imported, which are identified in a specific table that is an integrant part of the Excise Duty Act and indicates the applicable rates. Amongst others, the said table includes goods such as tobacco, beer and other alcoholic beverages, vehicles, cosmetics, cloths, airplanes, boats, etc.

Examples of excise duty rates include the following:

- Alcoholic beverages: 40% (55% for wine of fresh grape).
- Tobacco: 75%.
- Air vehicle without engine: 35%.
- Boats and other recreational or sportive crafts: 35%.
- Cloths and respective accessories: 30%.

**Property transfer taxes (SISA)**

In Mozambique, a property transfer tax is charged on transfers of real estate, excluding the land, which is owned by the state. The rate of tax is 2% of the selling price of the
building. When the beneficiaries live in a country with a privileged tax regime, the applicable rate is 10%.

**Stamp duties and service charges**
Various documents require the payment of stamp duties. Service charges are payable for the performance of certain services for official purposes, such as those rendered by public notaries. These duties vary generally from 0.03% to 50% on the amount of the transaction supported by the document to be stamped. In some other cases, the stamp duty comprises fixed amounts, ranging from MZN 0.50 to MZN 5,000.

**Payroll taxes**
All remunerations paid to employees are subject to monthly withholding as per the definitive tax rates that are established in a specific schedule approved by law, depending on the gross amounts received and personal and family specific circumstances. The employer is obligated to withhold at source the tax due by the employees.

The monthly withholding rates vary from 0% to 32%, being withheld definitively at source.

The amounts withheld by the company shall be delivered to the tax authorities up to the 20th day of the following month.

The company is not allowed to support any taxes due by employees or third parties. In case any tax is paid by the company on behalf of employees, such cost will not be accepted as a deductible cost unless this is treated as part of the remuneration cost and taxed at the hands of the employee as employment income.

**Social security contributions**
Social security contributions are payable by employers and employees on monthly remuneration. The aggregate rate of contribution is 7%, with 4% paid by the employer and the remaining 3% by the employee.

**Municipality taxes**
Municipality taxes that should be considered for corporate purposes include the following:

**Municipality tax on real estate**
The municipality tax on real estate is levied annually on the value of immovable assets situated within the municipality and owned or possessed by corporate entities. Effective tax rates range from 0.4% (for housing purposes) to 0.7% (for office purposes or mixed activities) of the building value, depending on the municipality.

**Municipality tax on economic activities**
The municipality tax on economic activities is levied on commercial or industrial activities carried out within a municipal territory. The tax depends on the activity being carried out, adjusted by coefficients, which are based on the zone and total area of the premises in square metres. In Maputo, this tax is calculated based on the following formula:

\[
\text{Maputo tax on economic activities} = \text{Basis rate} \times \text{Index of category} \times \text{Index of location} \times \text{Index of area occupied}
\]

Where the basis rate is the applicable maximum amount of the national minimum salary (MZN 8,050 for the year 2015).

Where the index of the location varies from 1.3 to 1.5, depending on the location of the premises within the municipality.
Where the index of the area occupied varies from 1.2 to 1.5, depending on the nature of the activities and the space occupied by the premises.

**Municipal vehicles tax**
The municipal vehicles tax replaces the vehicles tax within the municipality and is levied on the use of specific vehicles (e.g. light and heavy vehicles less than 25 years old, motorcycles less than 15 years old, aeroplanes, and boats for private use). This tax is due by the owners who are residents of a municipality, regardless of the place of registration of the vehicle owned.

The rate varies, depending on specific criteria such as type of fuel, engine capacity, period of registration, and weight.

This tax must be paid between January and March or within 30 days after the acquisition of the vehicle.

**Branch income**

From a tax perspective, branches are liable for Mozambican CIT as a separate entity; consequently, the regime is the same that would apply to a Mozambican resident company. However, on the grounds that branches do not distribute dividends, the 20% withholding tax (WHT) does not apply to the after-tax profits arising in Mozambique.

**Income determination**

**Inventory valuation**
All inventory valuation methods generally accepted according to international accounting principles are permitted for tax purposes, provided that the method is:

- used by the taxpayer consistently and
- based on arm’s-length prices duly documented and effectively exercised.

Based on the above assumptions, last in first out (LIFO) and first in first out (FIFO) methods are allowed. Write-downs and depreciation of inventories are not allowed. Conformity between book and tax reporting is required.

**Capital gains**
Capital gains less any capital losses derived from the sale or disposal of tangible fixed assets, including insurance indemnities received in case of accident, are taxed as part of normal income. If a taxpayer reinvests the sale proceeds within three tax years following the year of sale, the gain may be deferred until the end of the third year. A three-year reinvestment period may be accepted, provided a prior application is submitted to the Minister of Finance. However, if the taxpayer does not realise the reinvestment, the CIT that was not assessed during the three-year period will be assessed, along with compensatory interest.

Capital gains arising from indirect transfers of participating interests of assets located in the country are subject to taxation. Capital gains resulting from the disposal of shares, participating interests, or rights in general, between non-residents, whether direct or indirect, free or for consideration, are taxable in Mozambique, provided the transaction involves assets located in the country.
Mozambique

**Dividend income**
In the case of resident companies, income arising from dividends is excluded from taxable income, provided that the shares that a resident company holds in another resident company represents at least 20% of the total capital and are held for at least two consecutive years (or with an undertaking to hold the shares for this period). The same applies to income arising from risk capital companies and holding companies (Sociedade Gestora de Participações Sociais or SGPSs) or from subsidiaries as a result of the application of technical reserves in insurance companies. However, in the case of holdings, the percentage of share capital decreases to 10% and shares should be held for at least one year.

If the shareholding falls outside the parameters indicated above, the tax withheld (20%) constitutes a payment on account. A tax credit corresponding to 62.5% of the CIT is attributable to the gross-up dividend.

**Interest income**
Interest is subject to 20% WHT. In the case of foreign entities, the WHT is considered as a definitive tax. In the case of resident entities, it is considered as an advance of the final tax.

Interests on treasury bonds and public debt bonds listed on the stock exchange are subject to definitive WHT at 20%.

**Foreign income**
Mozambican resident companies are taxed on the total income earned on a worldwide basis. Please note that there is no provision on tax deferral in Mozambique in relation to income earned abroad. Double taxation treaties (DTTs) allow tax paid abroad to offset Mozambican CIT. Mozambique has signed DTTs with Botswana, India, Italy, Macau, Mauritius, Portugal, South Africa, the United Arab Emirates, and Vietnam.

**Deductions**

**Depreciation**
Depreciation is a deductible cost for CIT purposes, according to the regulations of the CIT Code, subject to restrictive and specific rules.

The main legal principles regarding depreciation are as follows:

- The establishment of the applicable rates falls under the competence of the Ministry of Finance.
- The calculation is carried out on a straight-line basis in accordance with the rates applicable.

The main depreciation rates are:

<table>

</tbody>
</table>

### Notes

1. Subject to certain conditions set forth by the tax authorities.
2. Depreciation is only allowed in cases of effective reduction of value within the limits regarded as reasonable by the tax authorities.

### Accelerated depreciation

New immovable assets, used for the furtherance of the business, may be depreciated by increasing to 50% the normal depreciation rates approved by law. This benefit is also granted to rehabilitated immovable assets, machinery, and equipment used in agro-industrial activities, provided there is an investment project duly approved by the government.

### Goodwill

Although goodwill is considered for accounting purposes in Mozambique, there is no provision for goodwill in the tax legislation. Consequently, goodwill should be regarded as an intangible asset for tax amortisation purposes.

### Interest expenses

A basic principle regarding acceptance of costs and expenditures requires that these are necessary for the company’s/branch’s activity (i.e. indispensable to generate the profits and gains obtained by the company). This concept includes, among others, interest and other financial costs that are, in principle, also deductible for tax purposes unless the tax authorities assume that the interest rate applicable in one transaction is higher than the applicable rate applicable in the market, with the exceeding amount being subject to taxation.

Interest and other types of remuneration above the Maputo Interbank Offered Rate (MAIBOR) plus two percentage points at time of payment on the shareholders’ loans are not tax-deductible costs.

### Provisions

In Mozambique, companies are able to create all the provisions necessary and relevant for the normal course of business. However, for tax purposes, only the provisions listed below can be deducted as a cost:

- Bad debts.
Mozambique

- Depreciation of stock.
- Ongoing judicial procedures.
- Credit institutions/Insurance companies.
- Reconstruction of mines.
- Rehabilitation of land.

Any other provisions reflected in the company’s accounts will not be accepted as tax-deductible costs.

**Bad debt**
With regards to provisions for bad debts, companies are only allowed to deduct 1.5% per year (and 6% accumulated) of the provisions created for bad debts.

**Charitable contributions**
Donations can be deducted as costs for tax purposes, provided specific requirements are met and the beneficiaries thereof are:

- Social and cultural organisations that, acting without lucrative intent, carry out actions in art, education, science, health, preservation and restoration of cultural patrimony, or social activities: Donations can be deducted up to the limit of 5% of the previous year’s taxable income.
- The Mozambican state: Donations can be fully deducted.

It is important to note that this deduction is not applicable automatically, as it is necessary to present proof that the donation was previously communicated to and approved by the Ministry of Finance.

**Fines and penalties**
Fines and other penalties paid due to any infringement, which do not have a contractual basis, including interest, are not accepted as tax-deductible costs.

**Taxes**
Taxes paid in relation to the activities of a company are tax deductible, excluding CIT itself.

**Net operating losses**
Carryback of losses is not allowed in Mozambique. On the other hand, losses may be carried forward for a period of five consecutive years.

**Payments to foreign affiliates**
Any payments to non-residents are allowed as deductible expenses, provided that the amount does not exceed normal rates and that the taxpayer is able to prove that a business transaction was carried out with the non-resident company. The tax authorities may redetermine taxable income if, due to a special relationship between the Mozambican and non-resident companies, certain conditions existed that allowed a calculation of profit that differed from the profit that would have been calculated without the existence of such relationship (i.e. the arm's-length principle).

**Group taxation**
There are no group taxation provisions available in Mozambique. Each member of a group of companies preparing consolidated accounts for accounting purposes must file separate tax returns in order to be taxed on its profits on a stand-alone basis.

**Transfer pricing**
The tax authorities may proceed with the necessary corrections for assessing the profits for tax purposes whenever:
by virtue of special relations between the taxpayer and other entity, different conditions from those that should be normally agreed upon between independent entities have been established, and
• in consequence of those conditions, the profits for accounts purposes are different from those that would have resulted had such special relations not existed.

The corrections above shall be equally applicable whenever the profits for accounts purposes regarding non-resident entities are different from those that should have resulted if the non-resident entity were a separate entity carrying out similar activities in similar conditions and with total independence.

The corrections referred to above will also be applicable to entities that carry out activities simultaneously subject and not subject to the CIT Code, provided that similar evasion regarding such activities is verified.

Whenever these corrections are applicable to one taxpayer of CIT (Taxpayer 1) by virtue of special relations with another taxpayer of CIT or of individual income tax (Taxpayer 2), the adjustments reflecting the corrections made in the calculation of the profits for tax purposes of Taxpayer 1 shall be applicable in the assessment of the profits for tax purposes of Taxpayer 2.

The definition of ‘special relation’ has been introduced into the transfer pricing regime. However, specific transfer pricing regulations remain non-existent, although they are expected to be approved during this year.

**Thin capitalisation**
Where loans from related foreign corporations exceed twice the corresponding equity in the borrowing Mozambican corporation, the interest on the excess borrowing is not tax deductible. Thin capitalisation rules are in force.

According to the Mozambican thin capitalisation rules, subsidiaries are considered and treated as thinly capitalised companies if and to the extent that, as at any date of the tax period, any of their relevant debt-to-equity ratios exceed a factor of two.

‘Relevant debt-to-equity ratio’, within the context of the law, means the ratio between, on one hand, the amount of direct and indirect indebtedness of a Mozambican company towards a specially related non-resident, and on the other, the amount of equity that this non-resident holds in the Mozambican company.

A ‘specially related non-resident’, for these purposes, is an entity with special links with another, which includes any entity that:

• holds, either directly or indirectly, at least 25% of the share capital of the Mozambican company
• though holding less than 25%, has a significant influence on its management, or
• both taxpayer and non-resident entity are under control of the same entity, which has participation in their share capital, either directly or indirectly.

Under any of these circumstances, interest paid to such specially related non-residents is not allowed as a tax-deductible cost for the Mozambican company in the part that corresponds to the excessive indebtedness, unless the company can prove that it could have obtained the same level of indebtedness at comparable conditions from unrelated parties, taking into account the nature of its business, its sector of activity, dimension, and other relevant criteria.

**Controlled foreign companies (CFCs)**
In Mozambique, we do not have any specific provision regarding taxation of CFCs.
Tax credits and incentives

Foreign tax credit
Resident companies are allowed to deduct a credit correspondent to a tax paid abroad. The tax credit to be deducted should be equal to the lower of the amount of Mozambican corporate tax imputed to income obtained abroad or the amount of foreign tax effectively paid.

Inbound investment incentives
In addition to the guarantees of ownership and remittance of funds abroad, the Mozambican government also guarantees the concession of tax and customs incentives. The incentives vary depending on whether a company is starting a new venture or rehabilitating one and also on the nature of the project to be developed. The incentives discussed in this section are the generic benefits applicable to standard projects. Certain specific benefits also may be applicable depending on the activities of the industry for the investment project (e.g. agriculture, tourism, science and technology).

Exemption from import duties
An exemption from customs duties and VAT applies upon the importation of capital equipment, listed in Section K of the Customs Tariff Schedule.

Tax credit for investment
Investments in new fixed tangible assets used in the operations of an enterprise within the Mozambican territory may benefit from an investment tax credit equal to 5% to 10% of the total investment realised, for a period of five years. This investment tax credit is offset against CIT, up to the total amount of the tax assessment. This incentive does not apply when the investment in tangible fixed assets is with respect to the construction, acquisition, restoration, or extension of buildings, passenger vehicles, furnishings, and articles of comfort and decoration, leisure equipment, advanced technology, or other assets not directly associated with the production activity carried out by the enterprise. When the project is located outside Maputo City, this tax credit is increased to up to 10%.

Advanced technology incentive
The amount invested in specialised equipment classified as advanced technology, during the first five years from the date of commencement of activity, may be deducted from taxable income for purposes of calculating CIT, up to a maximum of 10% of taxable income.

Professional training incentive
Investment expenditures for professional training of Mozambican workers shall, up to a maximum amount of 5% of the taxable income (10% in case of professional training related to new/high technology equipment), be deductible from taxable income for the purposes of calculating CIT during the first five years from the date of the commencement of such activities.

Exploration incentives
During a period of five years counting from the date of exploration (i.e. the date the implementing company starts the activities approved under the investment project terms of authorisation), the following expenditures may be treated as deductible expenditures for purposes of calculating CIT:

- In the case of undertakings carried out in the City of Maputo, 110% of the value of expenditures for the construction and rehabilitation of roads, railways, airports, telecommunications, water supply, electric energy, and other works of public utility is deductible for tax purposes.
- In the case of undertakings carried out in the rest of the provinces, an amount equal to 120% of the expenditures referred to in the paragraph above is deductible for tax purposes.
• In the case of expenditures for the acquisition for personal ownership of works of art and other objects that are representative of Mozambican culture, as well as activities that contribute to the development of such works, 50% of the expenditures are deductible for tax purposes.

**Withholding taxes**

Any non-resident entity carrying out economic activities in Mozambique, without being registered as a taxpayer, is liable to a final and definitive 20% WHT that is applied on all income earned. An exception exists for (i) telecommunications and international transport, as well as the respective installation and assembly of equipment made by those same entities, (ii) construction and rehabilitation of production, transport, and distribution of electricity infrastructures in the rural zones under the public projects of rural electrification; and (iii) maritime vessels freight for fishing and coasting activities, all of which are subject to a 10% WHT rate.

Both Mozambican resident and non-resident recipients are liable to tax on dividends at a tax rate of 20%.

**Tax treaties**

In accordance with Mozambique’s DTTs, the following tax rates are applicable to dividends, interest, and royalties:

<table>
<thead>

Notes

1. The 8% rate applies if the recipient of the dividends is a company that has more than 25% of the share capital in the company that distributes the dividends.
2. The 10% rate applies if the recipient of the dividends is a company that has less than 25% of the share capital in the company that distributes the dividends.
3. The 15% rate applies in all other cases.
4. The 0% rate applies if the recipient of the dividends is a company that has more than 25% of the share capital in the company that distributes the dividends.
5. The 12% rate applies in all other cases.
6. Gains are only taxed in the other state if assets of the entity sold are composed of more than 50% immovable assets.

**Tax administration**

**Taxable period**

The tax year is, as a general rule, the calendar year. A different tax year may be applied (if previously authorised by the Ministry of Finance) for companies that carry out activities that justify a different year (e.g. held at more than 50% by a company with a different year) or non-resident companies with a PE in Mozambique.
Mozambique

**Tax returns**

CIT assessment must be prepared by the companies on annual returns, based on the accounting records and on adjustments prescribed by the tax regulations.

The submission of the annual tax return is due by the last working day of May for companies using the calendar year as their tax year. For companies with a tax year that is not coincident with the calendar year, the presentation of the tax return is due by the last day of the fifth month subsequent to the respective year-end.

**Payment of tax**

Mozambican companies and non-resident companies with a PE in Mozambique must pay CIT as follows:

- In three advance payments (based on 80% of the preceding tax year's CIT), due in May, July, and September of the respective tax year; or, if the tax year chosen is not coincident with the calendar year, in the fifth, seventh, and ninth months of the respective tax year.
- In three special advance payments (based on 0.5% of the preceding year's turnover less the advance payments made in previous years, which cannot be less than MZN 30,000 or more than MZN 100,000) due in June, August, and October of the respective tax year; or, if the tax year chosen is not coincident with the calendar year, in the sixth, eighth, and tenth months of the respective year.

Final tax should be paid by the last working day of May or the fifth month after the tax year-end in cases where a different tax year is adopted.

**Tax audit process**

The tax authorities may carry out an inspection whenever necessary. Normally, the inspection occurs after the taxpayer files a refund application or on a random basis.

**Statute of limitations**

The statute of limitations period is five years, but the company documents must be kept for ten years.

**Topics of focus for tax authorities**

Based on our experience and through assistance provided to several clients during audit reviews, we noted that the Inspectors are focusing their attention on the following aspects:

- Confirmation of the amounts reported on the monthly VAT forms and the annual tax return to determinate if the figures are the same or not or if there are non-declared sales.
- Confirmation of whether the non-deductible costs were added back to the tax computation for CIT purposes.
- Deductibility of VAT.
- Analysis of supplier invoices to confirm the right of deduction of VAT.
- Analysis of the company’s sales for verification of whether there are undisclosed sales.
- Authorisation for electronic invoicing.
- VAT on self-assessment.
- Mandatory books, namely, ledger (diário), day book (razão), and inventory and balance (inventário e balanço).
- WHT on payments to non-resident entities.
- Thin capitalisation.

Significant developments

A new Union Taxation Law 2016, Amended Income Tax Regulations, and Amended Commercial Tax Regulations were introduced and took effect from 1 April 2016.

A Special Goods Tax Law was introduced in April 2016 to replace the commercial tax on a list of special goods that are imported and/or purchased from local producers/manufacturers.

Taxes on corporate income

Foreign investors may register their companies under the Myanmar Companies Act (CA) or in conjunction with the Union of Myanmar Foreign Investment Law (MFIL). The differences between companies registered under the CA and the MFIL are in relation to their eligibility for tax incentives and longer land use terms, as well as minimum foreign share capital requirements.

Generally, resident companies are taxed on a worldwide basis, and as such, income from sources outside Myanmar is taxable. MFIL companies, although treated as resident companies, are taxed only on income derived from sources within Myanmar.

Non-resident companies are taxed only on income derived from sources within Myanmar. Income received from any capital assets within Myanmar and from any source of income within Myanmar is deemed to be income received within Myanmar. The income is generally subject to tax under the normal rules for residents, except that different tax rates applied prior to 1 April 2015. Upon the introduction of Union Taxation Law 2015, which became effective from 1 April 2015, the total income of non-resident companies is also taxable at the tax rate of 25%, which is aligned with the corporate tax rate applicable to resident companies.

A company registered under the MFIL is entitled to enjoy certain exemptions and relief from taxes (see the Tax credits and incentives section for details).

Local income taxes

There is no separate corporate income tax at the local level.
**Corporate residence**

A resident company is a company as defined and formed under the Myanmar CA 1913 or any other existing law of Myanmar.

A non-resident company is one that is not formed under the Myanmar CA 1913 or any other existing law of Myanmar. Generally, foreign branches are deemed to be non-resident companies.

**Permanent establishment (PE)**

Currently, there is no definition of a PE under the Myanmar Income Tax Act. In current practice, the Myanmar tax authorities seek to collect taxes from a non-resident foreigner on its income received from Myanmar by way of a withholding tax (WHT) mechanism, regardless of whether the foreigner has a PE in Myanmar or not. The term ‘PE’ may be defined in the tax treaties that Myanmar has with other countries. Subject to the relevant tax treaty, a foreigner who is tax resident of the treaty country may not be subject to Myanmar taxes if it does not have a PE in Myanmar.

**Other taxes**

**Value-added tax (VAT)**

There is no VAT in Myanmar.

**Commercial tax**

Commercial tax, at rates ranging from 0% to 8%, is levied as a turnover tax on goods and services. Generally, commercial tax is imposed at the rate of 5%. The commercial tax that a business charges and collects is known as output tax, which has to be paid to the Myanmar tax authorities. Commercial tax incurred on business purchases and expenses are known as input tax. Businesses that are registered for commercial tax can claim commercial input tax if certain conditions are satisfied.

Commercial tax is imposed on a wide range of specified goods and services produced or rendered within the country, based on the sales proceeds, and on imported goods (see Customs duties below for details).

All services are subject to 5% commercial tax except for 29 types of services that are specifically exempt from commercial tax (e.g. home rental services, life insurance, banking services, microfinance, public transportation).

No commercial tax is imposed if the sales or receipts from services for a financial year are not more than 20 million Myanmar kyats (MMK).

Commercial tax is zero-rated on all exports, except for electricity and crude oil.

Companies registered under the MFIL that have obtained permits from the MIC may, at the discretion of the MIC, be granted exemption from commercial tax on goods that are manufactured for export (see the Tax credits and incentives section for details).

**Special goods tax**

With effect from 1 April 2016, the Special Goods Tax Law was introduced to replace commercial tax on a list of 16 special goods that are imported and/or purchased from local producers/manufacturers. The special goods include cigarettes, tobacco leaves, Virginia leaves, cheroots, cigars, pipe tobaccos, beers, wine, alcoholic beverages, gem stones, teak, vans, saloons, sedans and estate wagons and coupe cars above 1800 cc (except double-cab 4 door pick-ups), petroleum, gasoline, diesel, and jet fuel, as well as natural gas. The special goods tax rates range from 5% to 120%.
Under the Special Goods Tax Law, only a manufacturer of special goods can claim and offset the special goods tax incurred on purchase of raw materials/semi-finished goods against the special goods tax charged on sale of special goods.

On top of special goods tax, commercial tax of 5% will also be imposed on the special goods (on the selling price inclusive of special goods tax) at the point of importation of special goods by the importer and the sale of special goods by the local producers/manufacturers.

**Customs duties**
Customs duty is levied under the Customs Tariff of Myanmar (2012) at rates of up to 40%.

Companies registered under the MFIL that have obtained permits from the Myanmar Investment Commission (MIC) may, at the discretion of the MIC, be given relief from customs duty on machinery, equipment, instruments, machinery components, spare parts and materials used during the period of construction or expansion, and on raw materials for the first three years of commercial production (see the Tax credits and incentives section for details).

**Excise duties**
Excise duty is levied on alcoholic drinks and is collected by the General Administration Department under the Ministry of Home Affairs.

**Property taxes**
Immovable property (land and buildings) situated within the Yangon development area is subject to property tax. However, as foreign ownership of land and immovable property is currently expressly prohibited, property tax is not relevant for foreign investors.

**Stamp duties**
Stamp duty is levied on various types of instruments, and some rates are given below:

- 3% of the amount or value of the consideration for conveyances of properties, for the sale or transfer of immovable property, plus an additional 2%.
- 0.3% of share value for the transfer of shares.
- 2% of the amount or value secured for bonds.
- 1.5% of the annual value of rent for lease agreements between one and three years, and 3% of the average annual value of rent and premium where the term of the lease agreement is more than three years.

**Capital gains taxes**
Capital gains tax is levied on gains from the sale, exchange, or transfer of capital assets (i.e. any land, building, vehicle, and any capital assets of an enterprise, which include shares, bonds, and similar instruments). Intangibles may fall within the definition of capital assets, and capital gains arising from such assets would also be taxable.

Capital gains from the sale, exchange, or transfer of capital assets in the oil and gas sector are taxed at different rates from those in other sectors.

Myanmar

Tax returns for capital gains must be filed within one month from the date of disposal of the capital assets. Capital gains tax payments are required to be made within one month from the date of disposal of the capital assets. The date of disposal refers to the date of execution of the deed of disposal or the date of delivery of the capital assets, whichever is earlier.

**Registration taxes**
There is a registration fee of MMK 1 million payable to the Directorate of Investment and Company Administration for setting up a company or a branch in Myanmar.

**Payroll taxes**
An employer is responsible for deducting income tax due from salaries at the time of payment to employees and must pay the amount within seven days from the date of deduction. If the employer fails to deduct and pay the tax, the employer is deemed to be a defaulter and held responsible for such payment. In addition, the employer is also responsible for filing the statement of annual salary within three months after the end of the income year, and failure to file by the stipulated deadline (i.e. 30 June every year) may result in a penalty of 10% of the amount of tax to be deducted on annual salaries.

**Social security contributions**
An employer with five or more employees is required to provide Social Security Scheme benefits to those workers, such as health and social care insurance and insurance against employment-related injuries.

The rates of contribution by employees and employers are 2% and 3% of the total salaries and wages, respectively. The contribution must be made in Myanmar kyats for all currencies that the salaries are paid in within 15 days of the following month, using the exchange rate prescribed by the Myanmar Foreign Trade Bank (MFTB) on the first day of the relevant month.

The maximum contribution is limited to MMK 9,000 by the employer and MMK 6,000 by the employee.

Contributions made by the employees are deductible for tax purposes in the hands of the employees. The employer is obligated to withhold the employees' contributions from their salaries.

**Branch income**
Generally, foreign branches are deemed to be non-resident companies. Non-resident companies are taxed only on income derived from sources within Myanmar. With effect from 1 April 2015, non-resident companies pay tax at the same rate as resident companies. This means a branch of a foreign company will pay tax at the 25% rate as opposed to the 35% rate chargeable in the past. The income is generally subject to tax under the normal rules for residents.

**Income determination**
Income is categorised as income from a profession, business, property, capital gains, other sources, and undisclosed sources, as well as income that has escaped tax assessment. Income from capital gains is assessed separately.

Tax is levied on total income, after the deduction of allowable expenditure and depreciation.
The Ministry of Finance, with the approval of the government, may, by notification, prescribe, amend, and add assessable income and rates of income tax.

**Inventory valuation**
There are no prescribed inventory valuation methods for tax purposes.

**Capital gains**
Income from capital gains is assessed separately. See Capital gains tax in the Other taxes section for details.

**Dividend income**
Myanmar has a one-tier corporate tax system, under which shares of profits received by a Myanmar taxpayer from an association of persons (i.e. partnerships, joint ventures, companies, etc.) are exempted from income tax.

**Interest income**
Interest income and income from movable property are treated as business income.

**Partnership income**
A partnership is taxed as an entity and not on the individual profit share of the partners. Partnership income is not taxed in the hands of the partners.

**Foreign income**
Resident companies are taxed on a worldwide basis, and, as such, income from sources outside Myanmar is taxable in Myanmar.

MFIL companies and non-resident companies are not taxed on their foreign income.

There is no deferral regime available to foreign income in Myanmar.

**Deductions**
In respect of business income, deductions are allowed for expenditure incurred for the purpose of earning income.

Non-deductible items include capital expenditure, personal expenditure, expenditure that is not commensurate with the volume of business, payments made to any member of an association of persons other than a company or a cooperative society, and inappropriate expenditure.

**Depreciation and amortisation**
Income from movable property is considered as business income, and depreciation allowance for the cost of such movable property can be deducted. Income from immovable property is generally computed in the same way as business income, except that no depreciation allowance can be deducted.

Technically, a taxpayer entity is required to claim tax depreciation on the qualifying assets used for its business purposes based on rates prescribed under the Myanmar Income Tax Law, using a prescribed tax depreciation claim form. A taxpayer is entitled to full year tax depreciation in the year the asset is acquired. On the other hand, no tax depreciation is allowed in the year the asset is disposed of.

With effect from 1 April 2016, the tax depreciation rates of fixed assets, as prescribed under the Amended Income Tax Regulations, are as follows:

- Buildings: 1.25% to 10%.
- Furniture and fittings installed in buildings: 5% to 10%.
Myanmar

- Machinery and plant: 5% to 10%.
- Various kinds of vehicles: 5% to 20%.
- Other fixed assets that are not prescribed: 5%.

**Goodwill**
There is no specific provision under the current Myanmar Income Tax Law governing the tax deductibility of goodwill.

**Start-up expenses**
There is no specific provision under the current Myanmar Income Tax Law governing the tax deductibility of start-up expenses. Generally, any operating expenses incurred before the commencement of business are not tax deductible. Myanmar tax authorities view pre-commencement expenses as capital in nature and not deductible for tax purposes. In current practice, capital expenditures incurred prior to the commencement of business should be allowed for tax depreciation where they relate to qualifying fixed assets.

**Interest expenses**
There is currently no specific provision in the Myanmar Income Tax Law indicating the tax treatment of interest expenses. In current practice, interest expenses and the related financing costs are likely deductible only in the year these expenses are incurred or paid, provided that the interest expenses incurred are commensurate with the volume of business or benefits that the taxpayer received. Interest expenses incurred before the commencement of business are not tax deductible or tax depreciable. Further, interest expenses on the loan in current practice should be deductible for Myanmar corporate income tax purposes when paid to the non-resident lender by a Myanmar corporate taxpayer only after the relevant WHTs on interest have been paid to the Myanmar tax authorities.

**Bad debt**
There is no specific provision under the current Myanmar Income Tax Law governing the tax deductibility of bad debt.

**Charitable contributions**
Deductible charitable donations are limited to those made to the approved charitable organisations/activities and are subject to an overall limitation of 25% of total income.

**Fines and penalties**
Fines and penalties are generally not deductible as they are not incurred in the production of business income.

**Taxes**
There is no specific provision under the current Myanmar Income Tax Law governing the tax deductibility of taxes paid.

**Net operating losses**

**Ordinary losses**
Losses from any source may be set off against income accruing from any other sources in that year, except where the loss is from capital assets or a share of loss from an association of persons. Losses that are not fully deducted in a year can be carried forward and set off against profits in the next three consecutive years.

There is no provision for the carrying back of losses.

**Capital losses**
Capital losses and a share of loss from an association of persons cannot be set off against income from other sources or carried forward.
Payments to foreign affiliates
A Myanmar corporation can claim a deduction for royalties, management service fees, and interest charges paid to affiliates, provided that these payments are commensurate with the volume of business.

Group taxation
There is no group taxation regime in Myanmar.

Transfer pricing regime
There are currently no transfer pricing rules in Myanmar.

Thin capitalisation rules
Generally, there is currently no specific safe harbour with respect to a debt-to-equity ratio in Myanmar. The Central Bank of Myanmar and the Myanmar tax authorities have recently indicated that Myanmar may introduce a debt-to-equity ratio in the near future. As of April 2016, there is no indicative timeline on when the ratio will be introduced.

Controlled foreign company (CFC) regime
There are currently no CFC rules in Myanmar.

Tax credits and incentives
Union of Myanmar Foreign Investment Law (MFIL) incentives
Under the new MFIL, companies registered under the MFIL that have obtained permits from the MIC are entitled to the following special benefits and tax incentives, which are granted at the MIC’s discretion:

1. Exemption from income tax for up to five consecutive years for an enterprise. The exemption may be extended for a further reasonable period, depending on the success of the enterprise.
2. Exemption or relief from income tax on profits of a business that are maintained in a reserve fund and subsequently re-invested in Myanmar.
3. The right to deduct depreciation of machinery, equipment, building, or other capital assets used in the business at rates prescribed by the MIC.
4. Relief from income tax for up to 50% of the profits accrued from the export of manufactured goods.
5. The right to pay income tax on the income of foreigners at the rates applicable to citizens residing within the country.
6. The right to deduct from taxable income research and development (R&D) costs that are necessary for the country.
7. The right to carry forward tax losses for up to three consecutive years, provided the losses are sustained within two years from the end of the tax exemption in (1) above.
8. Exemption or relief from customs duty and/or other internal taxes on imported machinery, equipment, instruments, machinery components, spare parts, and materials used in the business, which are required for use during the period of construction.
9. Exemption or relief from customs duty or other internal taxes on imported raw materials for the first three years of commercial production following the completion of construction.
10. If the investor increases the amount of investment and expands the business within the approved timeframe, it may enjoy exemption and/or relief from customs duty or other internal taxes on machinery, equipment, instruments, machinery components, spare parts, and materials that are imported for the expansion of business.
11. Exemption from commercial tax on goods that are manufactured for export.
Myanmar

Except for item (1) above, the other exemptions and reliefs are subject to discretion of the MIC.

Special economic zones (SEZs)
In addition to foreign investment under the MFIL, foreign investors may invest under the Myanmar Special Economic Zone Law of 2014 (Myanmar SEZ Law).

The Myanmar SEZ Law is a basic law for any SEZ within Myanmar. The main regulatory body handling foreign investment under the Myanmar SEZ Law is the Central Body for the Myanmar SEZ.

The Myanmar SEZ Law contains provisions relating to the exempted zone, business promoted zone, other zone, exempted zone business, other business, developers and investors, exemptions and reliefs, restrictions, duties of developers or investors, land use, banks and finance management and insurance business, management and inspection of commodities by the customs department, quarantine, labour and guarantee of non-nationalisation, dispute resolution, WHT, bank and financial management and insurance business, etc.

Incentives under the Myanmar SEZ Law include:

For investors:

- Income tax holidays for the first seven years starting from the date of commercial operation in respect of those investment businesses operated in an exempted zone or exempted zone businesses.
- Income tax holidays for the first five years starting from the date of commercial operation in respect of those investment businesses operated in a business promoted zone or other business in a promoted zone.
- 50% income tax relief for the investment businesses operated in an exempted zone and a business promoted zone for the second five-year period.
- For the third five-year period, 50% income tax relief on the profits of the business if they are maintained for re-investment in a reserve fund and re-invested therein within one year after the reserve is made.
- Exemption on customs duty and other taxes for raw materials, machinery and equipment, and certain types of goods imported for investors in exempted zones; whereas, for investors in prompted zones, exemption on customs duty and other taxes for the first five years in respect of machinery and equipment imported that are required for construction starting from the date of commercial operation, followed by 50% relief of customs duty and other taxes for a further five years.
- Carry forward of loss for five years from the year the loss is sustained.

For developers:

- Income tax holidays for the first eight years starting from the date of commercial operation.
- 50% income tax relief for the second five-year period.
- For third five-year period, 50% income tax relief on the profits of the business if they are maintained for re-investment in a reserve fund and re-invested therein within one year after the reserve is made.
- Exemption on customs duty and other taxes for raw materials, machinery and equipment, and certain types of goods imported.
- Carry forward of loss for five years from the year the loss is sustained.

Land use may be granted under an initial lease of up to 50 years and renewable for a period of an additional 25 years. Developers/investors may rent, mortgage, or sell land and buildings to another person for investment purposes within the term granted with the approval of the management committee concerned.
Investors seeking to register an entity under the SEZ need to obtain an investment permit from the relevant SEZ Management Committee.

**Foreign tax credit**
There is no provision for unilateral relief. Relief may be available pursuant to a tax treaty, but the application of the tax treaties is at the sole discretion of the Ministry of Finance.

---

**Withholding taxes**

Any person making the following payments is required to withhold income tax at the time of payment at the rates listed below. The tax withheld must be paid to the Inland Revenue Department (IRD) within seven days from the date of withholding.

Tax withheld from payments to residents will be set off against the tax due on their final assessments. Tax withheld from payments to non-resident companies is a final tax.

The application of the tax treaties is at the sole discretion of the Ministry of Finance. In general, it is suggested by the Company Circle Tax Office (CCTO) under the IRD that enquiries be made with the CCTO before deducting WHT from payments made to non-resident companies from treaty countries listed below.

For payments for procurement made within the country and for services rendered, or under contracts or agreements or any other agreement made by a state organisation, local authorities, co-operatives, partnership companies, or entities formed under any existing laws, the WHT rates are 2% if the payment is made to a resident and 3.5% if it is made to a non-resident.

Notes

1. There is no WHT on dividends, branch profits, and share of profits of an association of persons that have been taxed.
2. Exempt if paid to the government.
3. Lower rate for payments in connection with patents, designs, secret formulas/processes, or industrial, commercial, or scientific equipment/experience.
4. Lower rate if received by a bank or a financial institution.
5. The 5% rate applies for payments in connection with copyrights of literary, artistic, or scientific work, and the 10% rate applies to payments for services of a managerial or consultancy nature, and for information concerning industrial, commercial, or scientific experience.
6. Exempt if the amount is fair and reasonable.
Myanmar

**Tax administration**

**Taxable period**
The taxable period of a company is the same as its financial year (income year), which is from 1 April to 31 March. Income earned during the financial year is assessed to tax in the assessment year, which is the year following the financial year.

**Tax returns**
In general, annual income tax returns must be filed within three months from the end of the financial year, i.e. by 30 June of the financial year.

If a taxpayer discontinues one’s business, returns must be filed within one month from the date of discontinuance of business. The failure of a taxpayer to file income tax returns, knowing that assessable income has been obtained, is deemed to have ‘fraudulent intention’.

**Payment of tax**
Advance corporate tax payments are made in quarterly instalments before the end of the relevant quarter throughout the income tax year based on the estimated total income for the year. The advance payments and any taxes withheld are creditable against the final tax liability. The date for settling the final tax liability is specified in the notice of demand issued by the IRD.

**Tax audit process**
Under the Myanmar Income Tax Law, if it is found that there is a fraudulent intention to evade tax, the assessment or reassessment of income tax can be made at any time on the income that has escaped assessment of tax.

Failure by a taxpayer to file a return of income knowing that assessable income has been obtained, failure to comply with the notice of the IRD to submit accounts and documents, including the tax return and profit and loss accounts within the time prescribed, or submitting forged instruments and other documents are included within the meaning of fraudulent intention. If the tax authority in the course of investigation finds that a taxpayer has concealed income or particulars relating to income, the taxpayer may be permitted to fully disclose the facts within the specified time. In addition, the taxpayer must pay a penalty equal to 50% of the tax increased on account of the concealment. If the taxpayer fails to disclose the particulars within the specified time or discloses less than the income concealed, the taxpayer will also be subject to prosecution, in addition to paying the tax and penalty. If the taxpayer is found guilty, the taxpayer may be punishable with imprisonment for between three to ten years.

**Statute of limitations**
The statute of limitation to raise an assessment is three years after the financial year end. It does not apply in cases of fraudulent default. Mere filing of the income return and payment of advance tax in time does not constitute a final tax assessment.

**Topics of focus for tax authorities**
The following issues are currently being focused on by the tax authorities:

- Timely filing of tax returns and payment of taxes (i.e. corporate tax, commercial tax, and WHT).
- Stamp duty compliance (i.e. the application of the duty rates and timeliness of payment).
- Related-party transactions (e.g. payment of management fee to head office, shareholder loans).

Significant developments

2015 tax amendments
Income tax and value-added tax (VAT) amendments were enacted on 30 December 2015 and 29 December 2015, respectively, and entered into effect on those dates. The most significant amendments are listed below. See the Taxes on corporate income section for more information.

Corporate tax and withholding tax (WHT)

• Reduction of WHT rate on services from 25% to 10%.
• Non-mining corporate tax rate reduced from 33% to 32%, effective for financial years commencing on or after 1 January 2015.
• WHT on interest was introduced on cross-border loans and financing.
• WHT on royalties is now fixed at a rate of 10%.
• Taxability of disposal of oil and gas rights/licences (including the sale of shares in a company that owns such rights/licences).

Indirect taxes:

• The VAT threshold was increased to 500,000 Namibian dollars (NAD) per annum.
• Conditions and terms were introduced for allocation of import VAT (deferred payment) accounts.
• Introduction of mandatory security for import VAT accounts.

Taxes on corporate income

Namibia has a source-based tax system, which means that income from a source within Namibia or deemed to be within Namibia will be subject to tax in Namibia, unless a specific exemption is available.

Income earned by foreign companies from a source within or deemed to be within Namibia will be subject to tax in Namibia. In such cases, the foreign entity must determine whether it is obligated to register a local entity or branch. A foreign company is required to register a local company (local subsidiary) or an external company (branch) if it has established a place of business in Namibia.

In the event that Namibia has entered into a double tax agreement (DTA) with the country where the foreign company resides, such entity will only be taxable in Namibia if it has established a permanent establishment (PE) in Namibia. If a PE exists, only the portion of income attributable to the PE will be subject to tax in Namibia.

Non-residents who do not have a place of business in Namibia may, however, be subject to WHTs. See the Withholding taxes section for more information.
Calculation of taxable income

Gross income  The total amount, in cash or otherwise, received by or accrued to any person from a source within, or deemed to be within, Namibia, excluding receipts of a capital nature (provisions for specific inclusions in gross income and amounts deemed to be from a Namibian source exist).

Less: Exemptions  The Income Tax Act provides for certain amounts to be specifically exempt from tax.

Equals: Income

Less: Deductions  Expenditures and losses actually incurred to generate income may be deducted, provided that these expenses are not of a capital nature.

The Income Tax Act specifically provides for certain expenditures to be deductible and allows a deduction for capital allowances.

Only expenses incurred to generate 'income' may be deducted. Expenses incurred to generate income exempt from tax are not deductible. Apportionment should be considered when expenses are incurred to generate both income and exempt income.

Equals: Taxable income  Taxable income is taxed at the corporate tax rate as set out under the tax rate section below.

Tax rates
The corporate tax rates are summarised below:

<table>
<thead>
<tr>
<th>Entity</th>
<th>2015/16 tax rate (%)</th>

</tr>
</tbody>
</table>

Local income taxes
Namibia does not levy income taxes at the local, state, or provincial levels.

Corporate residence
The Namibian tax system is based on source and not on residency. Income derived or deemed to be derived from sources within Namibia are subject to tax.

The source is determined as the place where income originates or is earned, not the place of payment. If goods are sold pursuant to a contract entered into within Namibia, the source of income is deemed to arise in Namibia, regardless of the place of delivery or transfer of title.

Certain types of income arising outside Namibia may, in the hands of a domestic company, be deemed to arise in Namibia and be taxed as such. Examples are interest and certain copyright royalties arising outside Namibia.

Permanent establishment (PE)
The term ‘permanent establishment’ is not defined or recognised in the Income Tax Act, but it is included in all DTAs concluded with Namibia.
A PE includes a fixed place of business. The establishment of a local entity or branch will usually create a PE, although the provisions of the related tax treaty should be considered.

Except for the PE concept embodied in the tax treaties and WHT on service provisions, corporate residence is of little tax significance since transactions are taxed on a source basis.

For the list of DTAs, please see the Withholding taxes section.

**Other taxes**

**Value-added tax (VAT)**

VAT is a transaction tax, and the implications will vary for different transactions. Some transactions are taxed at a rate of 15% or 0% while other transactions are exempt from VAT. Input tax deductions may be claimed, subject to certain provisions.

VAT is levied on every taxable supply by a registered person. A taxable supply means any supply of goods or services in the course or furtherance of a taxable activity. A taxable activity means any activity that is carried on continuously or regularly in Namibia that involves the supply of goods or services for consideration.

VAT is payable on all imports for home consumption in Namibia, subject to certain exemptions (e.g. in terms of a technical assistance agreement, donations to the state, goods of which the local supply is zero-rated).

Import VAT is payable on the greater of the free on board (FOB) value plus 10% or the market value. The payment may be deferred in terms of an import VAT account registered with the Directorate of Inland Revenue to the 20th day of the month following the month of importation. Penalties of 10% per month or part of a month and 20% interest on outstanding import VAT, according to the Customs Asycuda reports on import VAT account numbers, are levied by the Directorate of Inland Revenue.

A company/branch is required to register for VAT if it supplies goods or services on a regular basis for consideration and if its taxable supplies (standard rated and zero-rated supplies) exceed NAD 500,000 in any 12-month period.

A registered VAT vendor is entitled to deduct input tax credits paid in the course of taxable supplies made to such person, provided that a tax invoice is available to support the input tax deduction. It is also important to take note of deemed input tax deductions and prohibited input deductions. Import VAT paid may be deducted only as input tax if the import was in furtherance of a taxable activity and the required documentation (e.g. stamped customs entries) is held by the importer.

VAT returns are due within 25 days following the month to which the VAT relates.

The Inland Revenue system automatically selects VAT periods for audits. An audit will focus on deposits made into bank statements and whether VAT was charged as required. It will also focus on whether tax invoices meet the criteria as set out in the VAT Act.

**Customs and excise duties**

Namibia is a member of the Southern African Customs Union (SACU), and customs duties are not levied on intra-SACU trade (i.e. between Botswana, Lesotho, Namibia, South Africa, and Swaziland).

Customs duties are payable according to the Common Customs Tariff of SACU on imports from outside SACU. Preferential duty rates apply on imports from Southern
Namibia, Republic of

African Development Community (SADC) countries, while goods may be imported free of customs duties from Zimbabwe in terms of the Namibia-Zimbabwe Free Trade Agreement.

Excise duties are levied on local production of excisable products (e.g. cigarettes, liquor, fuel) and are included on most excisable products imported from another SACU country in terms of the duty at source procedures. Identical excise duty rates are applied throughout the SACU. Importation of excisable products from outside the SACU is subject to customs duties and specific customs duties.

Current specific excise/customs duty rates for the above-mentioned products are as follows:

- Cigarettes: NAD 13.24/20 cigarettes.
- Spirits (whisky, rum, brandy, gin, vodka, etc.): NAD 161.47/litre AA.
- Petrol: 3.909 cents/litre.
- Diesel and biodiesel: 3.817 cents/litre.

Ad valorem excise/customs duties are levied on certain products (e.g. motor vehicles, perfumes) in addition to the normal customs duties.

Ad valorem excise/customs duty rates are as follows for the above-mentioned goods:

- Motor vehicles: \( \left( 0.00003 \times A \right) - 0.75 \)%, with a maximum of 25%, where 'A' is the recommended retail price, exclusive of VAT.
- Perfumes: 7%.

Customs fuel levies are payable on petrol, diesel, and illuminating kerosene. The current customs fuel levies are as follows:

- Petrol: NAD 0.12/litre.
- Diesel: NAD 0.10/litre.
- Illuminating kerosene (paraffin): NAD 0.47/litre.

Fuel levies payable to the Namibian Road Fund Administration (RFA) may be claimed back for certain non-road operations (e.g. mining, farming, construction) under certain conditions (e.g. 81.7 Namibian cents of the current RFA fuel levy of 104 Namibian cents used in mining operations may be claimed back from the RFA).

Surety in the form of a provisional payment, bank, or insurance guarantee is required by Customs on most temporary imports to cover import VAT and customs duties (if applicable).

It is possible to import goods that are subject to customs duties into registered Customs’ bonded warehouses, where goods are kept for later use. In this case, the payment of duties may be deferred until the goods are taken out of the bonded warehouse for home consumption or acquitted if the goods are subsequently exported.

Namibia has introduced the AsycudaWorld customs clearing system, which is a web-based, Java-enabled system enabled at most points of entry. A few land border posts still need to be linked to the system during 2016.

**Property taxes**

Property taxes are levied by municipalities based on municipal valuations of properties.
Transfer duty
Transfer duty is payable at 12% of the acquisition value where property is acquired by non-natural persons (a sliding scale applies to property purchases by natural persons). While it is normally payable by the buyer, the agreement for the sale of the property may determine the person liable to pay these costs.

Amendments to the Transfer Duty Act were proposed to include transfer duty on the sales of shares/members interest in property/mining right-owning entities. These amendments have not been enacted or promulgated per the Government Gazette.

Stamp duty
Certain transactions may attract stamp duty. The amount of stamp duty payable differs and is based on the nature of every individual transaction.

The basic transactions can be summarised as follows:

<table>
<thead>
<tr>
<th>Transaction</th>
<th>Stamp duty</th>
</tr>
</thead>
<tbody>
<tr>
<td>Agreements or contracts (other than those where duty is specifically provided for in the Act)</td>
<td>NAD 5</td>
</tr>
<tr>
<td>Lease agreement or lease</td>
<td>The stamp duty will be based on lease payments, together with additional considerations specified in the lease agreement</td>
</tr>
<tr>
<td>Transfer or issue of marketable securities and other share transactions</td>
<td>NAD 2 for every NAD 1,000 or part thereof of the value/consideration, depending on the specific transaction</td>
</tr>
<tr>
<td>Transfer deed relating to immovable property purchased</td>
<td>NAD 12 for every NAD 1,000 or part thereof of the value/consideration, depending on the specific transaction</td>
</tr>
<tr>
<td>Additional stamp duty of NAD 5 for every NAD 1,000 of debt secured is payable on the registration of a bond over immovable property.</td>
<td></td>
</tr>
</tbody>
</table>

Annual duty
Annual duty is levied in terms of the Companies Act at an amount of NAD 4 for every NAD 10,000 (or part thereof) of the issued share capital of a company, with a minimum duty of NAD 80 per annum. Issued share capital includes ordinary shares, share premium, and preference shares.

Since a branch does not issue share capital, the issued share capital of the head office will be used to calculate the annual duty payable in Namibia.

Employee taxes
Any remuneration paid by an employer to an employee will place an obligation on the employer to withhold employee taxes. The employee taxes are due on the 20th day of the month following the month during which the payment was made. The tax tables applicable to individuals are provided in the Taxes on personal income section of Namibia’s Individual tax summary at www.pwc.com/taxsummaries.

Late payment of employee taxes will result in penalties of 10% per month and interest of 20% per annum. Both penalties and interest are limited to the amount of tax outstanding.

Social security contributions
Social security contributions are payable by the employer for employees working in Namibia. Social security is based on a principle of 50/50 contributions from employers and employees. It is calculated at 0.9% of earnings, with a minimum monthly contribution of NAD 2.70 and a maximum monthly contribution of NAD 81 each (i.e.
Namibia, Republic of

the total maximum monthly contribution of both the employer and the employee will amount to NAD 162).

Workmen’s compensation
Under the Employees Compensation Act, employers are required to contribute to a fund that provides cash benefits for industrial injury, disability, and death. Contribution rates vary according to inherent occupational risk, from less than 1% in most low-risk commercial/administrative occupations to 8% for high-risk sectors (drilling, tunnelling, and rock-blasting). Employees whose annual remuneration exceeds NAD 81,300 are normally excluded from coverage.

Branch income
Branch income that is received or accrued from a source within, or deemed to be within, Namibia is taxable in Namibia based on the normal corporate tax rules.

A branch is regarded as an extension of its foreign head office. A branch may, therefore, not deduct fees paid to its foreign head office (unless a tax treaty provides for such a deduction), as it is argued that a branch cannot transact with itself. Reimbursement of actual expenses may, however, be deducted, subject to the normal deduction rules.

Transfer pricing rules apply to transactions between a branch and cross-border related parties.

Income determination

Inventory valuation
Inventory is valued at cost for tax purposes in Namibia.

The last in first out (LIFO) basis of valuation is only accepted if:

• written consent was obtained from the Minister of Finance before such taxpayer renders one’s income tax return for the first year of assessment for which the LIFO basis was adopted by the taxpayer, and
• various conditions are met by the taxpayer as determined by the Minister of Finance.

Capital gains
Other than profits on the sale of mining and petroleum licences/rights, and the transfer of any share/interest (whether directly or indirectly) in a company owning a mineral/petroleum licence or right, capital gains are not taxed in Namibia.

Mining and Petroleum licences/rights
The sale, donation, expropriation, cession, grant, or any other alienation or transfer of ownership of any share or member’s interest in a company that holds a mineral or petroleum licence/right, whether directly or indirectly, has been included in the definition of gross income. The definition also specifically includes a sale of shares in a company for a licence or right to mine minerals or oil and gas in Namibia.

Dividend income
Dividends received are exempt from tax. Non-resident shareholders tax (NRST) should be withheld on dividends declared to non-resident shareholders. For more information on NRST, see the Withholding taxes section.

Interest income
Namibian companies are taxed on interest received from a Namibian source. Persons other than Namibian companies are subject to a final WHT on interest from banks and
unit trusts. Interest paid to non-residents is now subject to WHT on interest. For more information, see the Withholding taxes section.

**Partnership income**

The relevant partners of a partnership are regarded as the responsible taxpayers and not the partnership itself.

In practice, the assessment of a partnership is treated like that of a private business. The partnership is first treated as a business entity on its own in terms of income and expenditure. The profit or loss at the end of the year is then allocated to the individual partners. If they derived a profit from the partnership, it is added to their other non-partnership income; or if the partnership made a loss, the partners have the right to deduct it from their non-partnership income.

**Rental income**

Companies are taxed on rental income received from a Namibian source.

**Royalty income**

Companies are taxed on royalty income received from a Namibian source.

**Foreign income**

Corporate tax in Namibia is determined on the source basis; consequently, only income from a Namibian source or deemed Namibian source is subject to corporate tax.

**Deductions**

**Capital allowances**

The cost (including finance charges) of machinery, equipment, and other articles used by the taxpayer to generate income is deductible in three equal annual allowances. No apportionment is allowed where an asset is held for less than 12 months.

Buildings used by the taxpayer to generate income qualify for an initial allowance of 20% of erection costs in the year they are first brought into use. Thereafter, an annual allowance of 4% is deductible for the 20 following years. Additions to existing buildings (not alterations, improvements, or repairs) qualify for the same 20% and 4% deductions. Note that the allowance is calculated on the cost of erection and not the cost of acquisition. The allowance is also only calculated for a period of 21 years from the date of erection.

Registered manufacturers can claim 20% of the erection costs of the building in the year it is first brought into use, and 8% for ten years thereafter (see Manufacturing in the Tax credits and incentives section).

Mining exploration and initial development expenditure incurred before commencement of mining production are deductible in full in the first year that income is generated from the mine. Subsequent developmental expenditures are written off in three equal annual allowances.

Capital allowances may also be deducted with respect to patents, trademarks, leasehold improvements, etc.

A recovery or recapture of allowances previously claimed should be included in the gross income of a taxpayer in the event that the allowance is recovered or recaptured by way of disposal, withdrawal from trade for non-trade purposes, or removal from Namibia. The recapture is calculated at the market value of the asset.
Namibia, Republic of

**Goodwill**
The amortisation of goodwill is not deductible for tax purposes and should be excluded from calculating taxable income.

**Start-up expenses**

**Mining**
The Income Tax Act allows exploration and initial development expenditure to be deducted in full during the year in which the mine commences with production. All exploration expenses incurred before the commencement of mining is therefore deferred until such time that the mine commences production.

**All other industries**
The general deduction formula determines that only expenses incurred in the production of income that are not of a capital nature may be claimed for tax purposes. The Income Tax Act defines income as ‘income in any year or period of assessment’.

**Interest expenses**
A deduction is allowed in respect of financing expenditure incurred in respect of any financing agreement for the acquisition of fixed assets utilised in ordinary trade activities.

The general deduction formula determines that only expenses incurred in the production of taxable income that are not of a capital nature may be claimed for tax purposes. Therefore, where the interest can be argued to be incurred in the production of income, the interest expense will be deductible.

Thin capitalisation legislation may be applied to interest paid on cross-border, related-party loans (see Thin capitalisation in the Group taxation section).

**Bad debt**
The Income Tax Act allows a specific deduction for bad debts, provided that the amount written off was previously included in the taxpayer’s income.

**Charitable contributions/donations**
A specific deduction for donations is allowed, provided that it is made to a registered welfare organisation or an approved educational institution. It is a further requirement that a certificate should be issued by the welfare organisation/educational institution in respect of the donation and submitted with the entity’s tax return in order for it to qualify as a deduction. However, this allowance may not create or increase a tax loss.

**Fines and penalties**
In terms of practise applied by Inland Revenue, tax penalties and fines are not deductible for tax purposes.

**Taxes**
Taxes levied on income are not allowed as a deduction.

**Net operating losses**
Assessed tax losses may be carried forward indefinitely if the company continues the same trade. Tax laws do not allow losses to be transferred to other members of a group, and anti-avoidance provisions may be triggered by transactions designed to transfer or exploit assessed losses.

If a company ceases to trade for a full fiscal year, its assessed losses are forfeited, regardless of subsequent activities. Assessed losses are also reduced in the event of a compromise agreement with creditors.
Namibian tax legislation does not provide for the carrying back of tax losses.

**Payments to foreign affiliates**
For information on payments to foreign affiliates, please refer to the Branch income section, Group taxation section, and Withholding taxes section.

---

**Group taxation**

No taxation of combined operations is allowed in Namibia where operations are conducted in a group.

**Transfer pricing**

Namibian transfer pricing legislation is aimed at enforcing the arm’s-length principle in cross-border transactions carried out between connected persons. It is based on guidance set out by the Organisation for Economic Co-operation and Development (OECD) Transfer Pricing Guidelines for multinational enterprises and tax administrations.

The objective of the transfer pricing legislation is to provide taxpayers with guidelines regarding the procedures to be followed in the determination of arm’s-length prices, taking into account the Namibian business environment. It also sets out the Minister of Finance’s views on documentation and other practical issues that are relevant in setting and reviewing transfer pricing in international agreements.

The transfer pricing legislation is essentially aimed at ensuring that cross-border transactions between companies operating in a multinational group are fairly priced and that profits are not stripped out of Namibia and taxed in lower tax jurisdictions. The legislation achieves this by giving the Minister of Finance (who essentially delegates to the Directorate of Inland Revenue) the power to adjust any non-market related prices charged or paid by Namibian entities in cross-border transactions with related parties to arm’s-length prices and to tax the Namibian entity as if the transactions had been carried out at market-related prices.

In terms of the normal penalty provisions of the Income Tax Act, the Directorate of Inland Revenue may levy penalties of up to 200% on any amount of underpaid tax. Consequently, the Inland Revenue may invoke such provisions in the event that a taxpayer’s taxable income is understated as a result of prices that were charged in affected transactions, which were not carried out at arm’s length. Further, interest will be charged on the unpaid amounts at 20% per annum.

**Thin capitalisation**

The Minister of Finance may, if any amount of financial assistance provided by a foreign connected person is excessive in relation to a company’s fixed capital (being share capital, share premium, accumulated profits, whether capital or not), disallow, for income tax purposes, the deduction of any interest or other charges payable by the Namibian person on the ‘excessive portion’ of the financial assistance provided by the foreigner.

There is no guidance that provides a definition for ‘excessive’. Therefore, each case should be considered on the basis of the facts provided. The 3:1 ratio is applied by the Bank of Namibia for exchange control purposes, and this guideline is therefore deemed suitable until otherwise determined by Inland Revenue.

**Controlled foreign companies (CFCs)**

CFC rules are not applicable in Namibia.
Tax credits and incentives

Foreign tax credit
A tax credit may be claimed in Namibia for foreign taxes paid on dividends, royalties, and similar income, limited to the amount of tax payable in Namibia. Proof of the taxes paid in the foreign jurisdiction should be provided to Inland Revenue in order to claim the tax credit.

Manufacturing
The following is a high-level comparison of the different tax treatments for normal companies and registered manufacturing companies. This description does not consider the specific conditions that should be met in order for these incentives to be utilised.

Note that only the building allowance and preferential tax rate (as set out below) may create or increase a tax loss.

Building allowance
A building allowance is deductible with respect to buildings used for purposes of trade.

For normal companies, the allowance is calculated as 20% of the cost of erection in the year in which the building enters service and 4% during the 20 years that follow.

For registered manufacturing companies, the allowance is calculated as 20% of the cost of erection in the year in which the building enters service and 8% during the ten years that follow.

Employee allowances
For normal companies, expenditures for remuneration and training of employees are deductible for tax purposes.

For registered manufacturing companies, an additional allowance of 25% of remuneration and training of employees that are directly engaged in the manufacturing process are deductible. However, this allowance may not create or increase a tax loss. Deductions sought for training should be approved by the government.

Export expenditure allowance
For normal companies, export expenditures incurred are deductible for tax purposes.

For registered manufacturing companies, an additional allowance of 25% of costs incurred in an export country, in order to export Namibian manufactured goods to such country, may be deducted. However, this allowance may not create or increase a tax loss.

Export allowance
Any taxpayer (not required to be a registered manufacturer) that derives income from the export of goods manufactured in Namibia, excluding meat or fish, may deduct an export allowance equal to 80% of the taxable income derived from the export of manufactured goods.

Gross profit derived from the export of manufactured goods as a percentage of total gross profit should be used to determine the percentage of taxable income that is used to calculate the export allowance. However, this allowance may not create or increase a tax loss.

Transport allowance
For normal companies, land-based transport costs (i.e. transport by road or rail) are deductible for tax purposes.
For registered manufacturing companies, an additional allowance of 25% of land-based transport cost in respect of material and components used in the manufacturing process or equipment imported for direct use in the manufacturing process may be deducted. However, this allowance may not create or increase a tax loss.

**Preferential tax rate**

For normal companies with a financial year commencing on or after 1 January 2015, the normal tax rate for companies other than mining companies or registered manufacturers is 32%.

The tax rate for a registered manufacturer for taxable income with respect to the manufacturing activity for which they are registered is 18%. This preferential rate is applicable for a period of ten years from registration as a manufacturer.

**Export Processing Zones (EPZs)**

In order to become an EPZ company, a particular entity must register with the EPZ governing body and obtain approval from Inland Revenue.

An EPZ company qualifies for the following benefits:

- The company is exempt from corporate tax.
- No VAT is payable on the sale of goods or services rendered in the zone.
- No VAT is payable on goods imported or manufactured in the zone.
- No customs or excise duty is payable on goods imported into the zone.
- No stamp duty or transfer duty is payable in relation to the transfer of movable or immovable property in the zone.
- A 75% refund of expenditures incurred in training Namibian citizens.
- Some of the provisions in the Labour Relations Act do not apply in the zone.

Enterprises must comply with the following requirements in order to qualify for EPZ status:

- Goods must be exported to countries other than countries in the SACU.
- Industrial employment must be created or increased.
- Namibia’s export earnings must be increased as a result of manufactured goods exported.

EPZ companies may not be involved in retail business operations.

**Withholding taxes**

WHTs are applicable where certain payments are made to non-Namibian residents.

**Dividends**

Dividends declared by a Namibian company to a non-resident holding company are subject to NRST, a WHT. NRST is payable at the standard rate of 10% if at least 25% of shares are held in the Namibian company, unless DTA relief is available. Where less than 25% of shares are held in the Namibian company, the NRST payable is 20%, unless DTA relief is available.

NRST is payable within 20 days after declaration of a dividend.

**Interest**

A WHT of 10%, calculated on the gross amount of interest, is payable on interest accruing to any person, other than a Namibian company, from a registered Namibian banking institution or unit trust scheme. The tax withheld is a final tax, and the financial institution is responsible to withhold the tax.
Namibia, Republic of

Namibian companies, however, are taxed on interest at the corporate tax rate.

It is the obligation of the financial institution to withhold the tax and pay such tax to the revenue authorities.

WHT of 10% is payable on the interest accruing or paid to a non-resident company. The WHT is payable within 20 days after the interest payment was made. Interest is deemed to be paid on the earlier of the date on which the interest is paid or becomes due and payable.

Treaty relief may be available.

**Royalties or similar payments**

WHT on royalties are payable when a Namibian company pays a royalty to a non-resident. WHT is levied at a fixed rate of 10% and is payable within 20 days after the end of the month during which the liability for payment is incurred.

A royalty includes payment for the use or right to use any patent or design, trademark, copyright, model, pattern, plan, formula, or process, or any other property or right of a similar nature. A royalty also includes the imparting of any scientific, technical, industrial, or commercial knowledge or information for use in Namibia. The nature of fees payable should therefore be carefully considered in order to determine whether the relevant amount represents a royalty. It also include payments made for the use or right to use industrial, commercial, or scientific equipment (i.e. rentals).

Treaty relief may be available.

**Services**

Any Namibian resident paying a management, consultancy, entertainment, or directors fee to a non-resident must withhold tax at 10%.

Management and consulting fees are specifically defined as: “any amount payable for administrative, managerial, technical, or consultative services or any similar services, whether such services are of a professional nature or not”.

A branch is specifically included in the definition of a resident.

The rate is subject to DTA relief, where applicable.

**Summary of WHT payable**

The WHT rates and treaty relief for Namibian DTAs can be summarised as follows. Note that the tax treaties contain certain requirements that should be met before the reduced tax rate may be applied.

The definitions of dividends, interest, and royalties in the various treaties should also be considered.

| Recipient | WHT (%) |  |  |  |  |  |
|------------|---------|---|---|---|---|
|            | Dividends | Interest | Royalties | Management, Directors fees administrative, technical, and consulting fees |
| Non-treaty | 10/20 (1) | 10 (2) | 10 | 10 |
| Treaty:     |          |         |     |     |
| Botswana    | 10       | 10      | 10 (7) | 10 |
| France      | 5/15 (3) | 10      | 10 | 0 |
| Germany     | 10/15 (3) | 0       | 10 | 0 |
India 10 10 10 10 10
Malaysia 5/10 (1) 10 5 5 10
Mauritius 5/10 (1) 10 5 0 10
Romania 10 to 15 (4) 10 5 0 10
Russian Federation 5/10 (5) 10 5 0 10
South Africa 5/15 (1) 10 10 0 10
Sweden 5/15 (3) 10 5 10 (7) 10
United Kingdom 5/10 (6) N/A 5 0 10

Notes
1. Lower rate applies where at least 25% of shares are held in the Namibian company. Higher rate applies otherwise.
2. Namibian companies are taxed at the corporate tax rate on interest received.
3. Lower rate applies where at least 10% of shares are held in the Namibian company. Higher rate applies otherwise.
4. Rate depends on shareholding.
5. Lower rate applies where at least 25% of shares are held in the Namibian company and recipient directly invested at least 100,000 United States dollars (USD) in the equity capital of the company paying the dividend. Higher rate applies otherwise.
6. 5% where at least 50% of shares are held in the Namibian company. 10% where at least 25% of shares are held in the Namibian company. 15% otherwise.
7. Local rates are lower than the 15% rate per the treaty.

Mining royalties
The Minerals (Prospecting and Mining) Act levies a royalty on minerals won or mined by a licence holder in Namibia, based on the table below:

<table>
<thead>
<tr>
<th>Group of minerals</th>
<th>Market value of minerals levied as a royalty (%)</th>
</tr>
</thead>
<tbody>
<tr>

Tax administration

Taxable period
The tax year for companies and close corporations is aligned with the financial year.

Tax returns
The income tax return is due within seven months after the financial year-end of the company and can be extended to five months after the seventh month due date, provided that no other prior year income tax returns are outstanding.

Payment of tax
The first provisional payment for income tax is due within six months from the commencement of the company's financial year (at least 40% of tax payable at year-end is paid on first submission). The second provisional payment is due on/before the last day of the respective tax year (at least 80% of tax payable at year-end is paid on second submission). The final provisional payment is due within seven months after the financial year-end of the company.

WHT on dividends are due within 20 days after declaration of the dividend.
Namibia, Republic of

WHT on royalties or similar payments are due within 20 days after the end of the month during which the liability for payment of the royalty was incurred.

WHT on services is payable to Inland Revenue within 20 days after the end of the month during which the amount was deducted or withheld.

WHT on interest is due within 20 days after the end of the month during which the interest was paid. Interest is deemed to be paid on the earlier of actual payment or when the interest becomes due and payable.

It is advised that if relief is available under the DTA, a nil form should still be submitted when payment is made to non-residents. The amount of DTA relief claimed should be disclosed on the form submitted.

**Penalties and interest**

The penalties and interest due for late submissions and payments can be summarised as follows:

<table>
<thead>
<tr>
<th>Tax area</th>
<th>Reason</th>
<th>Penalty</th>
<th>Interest (%)</th>
</tr>
</thead>
<tbody>

* Note that the Income Tax Act, Act 24 of 1981, contains an anti-avoidance section, Section 95, which enables the Receiver of Revenue to disregard the implications of a transaction or scheme if it can be proven that:

- such transaction or scheme had been entered into to avoid or postpone the payment of any duty or levy imposed by the Act
- such transaction or scheme was entered into or carried out by means or in a manner that would not normally be employed in the entering into or carrying out of a transaction, operation, or scheme of the nature of the transaction, operation, or scheme in question, or has created rights or obligations that would not normally be created between persons dealing at arm’s length under a transaction, operation, or scheme of the nature of the transaction, operation, or scheme in question, and
- such transaction or scheme was entered into or carried out solely or mainly for the purposes of the avoidance or the postponement of liability for the payment of any tax duty or levy.
The Receiver of Revenue can, at its sole discretion, impose Section 95 on any transaction or scheme, which will place the onus on the taxpayer to prove that any/all of the requirements noted above will not be applicable to the transaction or scheme.

**Tax audit process**

The tax audit process is a discretionary process instituted by Inland Revenue. Inland Revenue will inspect the validity of invoices and whether such expenses are deductible for tax purposes.

Generally, income tax audits are initiated on amounts being refunded to taxpayers, with the focus being on high-value refunds.

Subsequent to an audit, a letter will be sent to the taxpayer indicating changes made to the return of income.

In the event that the taxpayer agrees with the outcome, an assessment is issued. Where the taxpayer is not satisfied with the outcome, an objection may be lodged within 90 days.

**Statute of limitations**

There is no statute of limitation in respect of claiming a refund for excess income tax paid. Debts to the state prescribe after 30 years.

**Topics of focus for tax authority**

Topics of focus for the tax authority include import VAT, general compliance, the construction industry, and employee taxes.

**Significant developments**

The corporate tax system of the Netherlands contains a number of well-known features providing for an attractive investment climate, such as: the fiscal unity regime with tax consolidation for group companies, a full participation exemption for capital gains and dividends from qualifying participations, and several favourable tax regimes (e.g. for patent income, investment vehicles, and income from ocean shipping activities).

On 15 September 2015 (Budget Day), the Dutch Ministry of Finance published the 2016 Dutch Tax Package. The 2016 Dutch Tax Package has been reviewed and approved by the House of Representatives and by the Senate. It has been incorporated into Dutch law as of 1 January 2016.

One of the most important aspects of the Tax Package is the implementation of the recently approved amendments to the European Union’s (EU’s) Parent-Subsidiary Directive into national law. The amendments to the Directive include a new general anti-avoidance rule (GAAR) and the adoption of a specific clause to prevent double non-taxation as a result of mismatches in tax effects. The amendments to the Directive have been implemented into the Dutch tax system with effect as of 1 January 2016. All EU member states have had to implement this clause as of 1 January 2016. Therefore, similar rules now apply in the entire European Union.

The implementation of the GAAR resulted in only minor substantive changes to the Dutch corporate tax system. The participation exemption regime in the Dutch Corporate Income Tax (CIT) Act and the taxation of dividends in the Dividend Tax Act, as such, remain largely unaltered.

The wording of the substantial holding regime in the Dutch CIT Act has been adjusted slightly to reflect the wording of the GAAR of the Directive. Pursuant to the application of the substantial shareholding regime as it applies from 1 January 2016, an entity resident outside the Netherlands that holds a substantial shareholding (i.e. 5%) in a Dutch resident company will be subject to Dutch CIT if the holding is held with tax avoidance as one of the main purposes and without valid commercial reasons that reflect economic reality. These changes to the wording of the substantial holding regime, however, do not bring forth any significant changes in practice. Also, the wording of the Dividend Tax Act has been slightly amended to reflect the wording of the GAAR. Pursuant to the application of the legislative text as it applies per 1 January 2016, a co-op resident in the Netherlands is obligated to withhold dividend tax on dividends distributed to its members if tax avoidance is one of the main purposes of the arrangement and the arrangement has been put into place without valid commercial reasons that reflect economic reality. Valid commercial reasons may exist if the co-op has a sound economic relevance. Even though the phrasing of the law is changed to fit the GAAR, no significant changes in the current practice are intended in this respect.

In addition, the scope of the current minimal substance requirements has been broadened to include certain intermediate holding companies. In general, however, in this respect, no significant changes in the current practice have been intended.
The implementation of the new specific clause in the directive has led to an amendment of the participation exemption regime. The regime has been amended to include a specific phrase to prevent double non-taxation as a result of mismatches in tax effects. As of 1 January 2016, corporate taxpayers are ineligible to benefit from the operation of the participation exemption or participation credit for received distributed profits if and to the extent that such distributed profits are deductible by the subsidiary.

The 2016 Dutch Tax Package also included new obligations for transfer pricing documentation; it introduces a country-by-country (CbC) report, a master file, and a local file. In line with the Organisation for Economic Co-operation and Development’s (OECD’s) initiatives regarding base erosion and profit shifting (BEPS), this legislation aims to enable the Dutch tax authorities and other tax administrations to analyse potential transfer pricing risks and other risks that relate to calculating the tax base.

Further, the 2016 Dutch Tax Package included the introduction of a step-up in respect of cross-border mergers and demergers. The step-up should prevent profit reserves of foreign merging or demerging companies being brought under a Dutch dividend withholding tax (WHT) claim. It also included the obligation for foundations, associations, and government enterprises to pay tax on benefits from an interest as a limited partner in a limited partnership. Further, it introduced a reorganisation exemption for government enterprises.

On 16 September 2014, a proposal introducing CIT liability for public sector entities (public bodies or publicly owned entities) carrying out economic activities was published. The proposal contains a number of general exemptions that will apply for activities related to governmental tasks and activities. In addition, a number of specific exemptions for publicly funded education, academic hospitals, and seaports (with grandfathering rules) are included. The proposal is a reaction to the invitation of the European Commission (EC) to end the current system, which, according to the EC, is liable to have a distortive effect on the competition between public and private enterprises. The amendments have become effective as of 1 January 2016.

On 16 June 2014, the European Court of Justice (ECJ) decided that the Dutch fiscal unity regime violates EU law to the extent it denies a fiscal unity between a Dutch resident parent company and its Dutch resident subsidiaries because of a non-Dutch resident EU/European Economic Area (EEA) intermediary holding company and insofar as it disallows a fiscal unity between two Dutch resident ‘sister’ companies that are held through a joint non-Dutch resident EU/EEA parent company. In October 2015, a legislative proposal was published allowing a fiscal unity between Dutch entities that are linked through an EU/EEA entity. The proposal still has to be approved by the House of Representatives and by the Senate. In practise, it is already possible to request for such a fiscal unity based on a Decree by the State Secretary for Finance that was issued in December 2014.

In 2014, the EC opened an investigation to examine whether a specific, individual ruling issued by the Dutch tax authorities on the calculation of the taxable basis for CIT purposes complies with the EU rules on state aid. The EC has concluded that this ruling does, in fact, constitute state aid. The full decision and the arguments of the EC have not yet been published to the public. The Dutch Ministry of Finance has said that it does not agree with the EC’s decision and will appeal.

It is expected that the EC may also investigate other tax rulings. However, the EC has explicitly stated that it does not expect to encounter systematic irregularities in Dutch tax rulings.

With respect to the current BEPS discussion, the Netherlands underlines the importance of addressing the issues through international cooperation.
Netherlands

**Treaty developments**
The Netherlands pursue an active tax treaty policy in order to maintain and extend its wide tax treaty network. Most Dutch bilateral tax treaties are based on the OECD Model Tax Convention. The Netherlands has concluded bilateral tax treaties for the avoidance of double taxation on income and capital (DTCs) with over 90 countries worldwide.

The new DTC with Germany, signed on 10 August 2012, entered into force on 1 January 2016.

---

**Taxes on corporate income**

In general, a Dutch resident company is subject to CIT on its worldwide income. However, certain income can be exempted or excluded from the tax base. Non-resident entities only have a limited tax liability with regard to income from Dutch sources.

**Standard corporate income tax (CIT) rate**
The standard CIT rate is 25%. There are two taxable income brackets. A lower rate of 20% applies to the first income bracket, for taxable income up to 200,000 euros (EUR).

**Fiscal investment fund regime**
In general terms, under the existing fiscal investment fund regime, the CIT rate for fiscal investment funds is 0%, provided that their profit is made available to the shareholders and holders of certificates of participation no later than eight months after year end.

Fiscal investment funds may also invest in real estate development (or redevelopment) activities, provided that these activities take place through a subsidiary subject to Dutch CIT and the development (or redevelopment) activities are exercised for the benefit of real estate that is (or will be) forming part of the fund's own portfolio, an affiliated fiscal investment fund's portfolio, the portfolio of a company in which the fund or the affiliated fund has a substantial interest, or for the benefit of the subsidiary's own portfolio (‘project development’ subsidiary). Fiscal investment funds that invest in real estate are allowed to hold a taxable subsidiary that provides customary services in relation to the real estate held by the Dutch real estate investment trust (REIT). Examples are conference facilities or the exploitation of an in-house restaurant.

**Exempt investment fund regime**
The exempt investment fund regime exists next to the fiscal investment fund regime described above. In accordance with the exempt investment fund regime, investment funds as defined in the Dutch Financial Supervision Act (Wet op het financieel toezicht) that meet certain conditions can request an exemption from CIT. Apart from the exempt status for CIT purposes, the exempt investment fund is not obligated to withhold dividend WHT with regard to profit distributions to its shareholders.

**Innovation box regime**
A special regime applies with respect to profits, including royalties, derived from a self-developed intangible asset (developed after 31 December 2006). In this so-called innovation box, the taxpayer may opt, under certain conditions, for the application of a lower effective rate on taxable profits derived from these intangible assets. The effective tax rate of the innovation box is 5%.

The innovation box is applicable if at least 30% of the profits have been originated by the patent. Companies that have incurred certain qualified research and development (R&D) costs for the development of intellectual property (IP) for which no patent was granted are also entitled to the favourable effective tax rate. This is subject to the condition that these qualified R&D assets became part of the company's assets after 31 December 2007.
The lower effective tax rate of 5% only applies to positive income, allowing innovation losses to be taken into account in full. It is also possible to include profits from an intangible asset derived in the period between the patent application and the granting of the patent in the innovation box regime (not for R&D assets).

The outcomes of the OECD/G20's BEPS project may influence the Dutch innovation box regime. It is expected that the innovation box regime will be brought in line with the modified nexus approach as developed as a minimum standard in that project. Concrete proposals have yet to be proposed.

**Tonnage tax regime**

In order to stimulate entrepreneurs engaged in ocean shipping, a favourable regime (known as the Dutch tonnage tax regime) may be available to certain shipping companies. Under this regime, the taxable profit of a sea-going vessel is based on its registered net tonnage multiplied by a fixed amount of deemed profit per ton instead of the actual profits from the exploitation. The regime only applies to the calculation of the profit related to the qualifying shipping activities. These activities include operating vessels in international traffic (including transportation for the purpose of the exploitation of natural resources at sea), cable and pipe-laying activities at the bottom of the sea, and towing and dredging and connected activities. The profits from the qualifying activities are taxed at a deemed tonnage profit according to a five bracket regressive scale system. The tonnage tax regime applies upon request and for a fixed period of ten years or multiples of the ten-year period.

**Local income taxes**

There are no provincial or municipal corporate income taxes in the Netherlands.

**Corporate residence**

In the Netherlands, corporate residence is determined by each corporation’s facts and circumstances. Management and control are important factors in this respect. Companies incorporated under Dutch law are deemed to be residents of the Netherlands (although not with respect to certain provisions, such as the participation exemption and fiscal unity).

**Permanent establishment (PE)**

Non-resident companies that are neither incorporated nor effectively managed in the Netherlands are limited in their liability to tax in the Netherlands if they receive Dutch-source income. This could be, for instance, business income derived from a Dutch PE or permanent representative. The definition of a PE for Dutch tax purposes is largely inspired by the OECD Model Convention definition and commentary.

The concept of a PE is also of relevance for resident corporate taxpayers. The Netherlands provides international double taxation relief, amongst others, with respect to income attributable to business activities carried on through a PE abroad.

The outcomes of the OECD/G20's BEPS project may influence the definition of a PE to be included in new or newly renegotiated Dutch tax treaties. The Netherlands has announced that the outcomes of the final report on Action 7 ('Preventing the Artificial Avoidance of Permanent Establishment Status') have now become part of Netherlands' tax treaty policy.
Other taxes

Value-added tax (VAT)
VAT, known in Dutch as the Belasting over de Toegevoegde Waarde or BTW, is payable on sales of goods and on services rendered in the Netherlands as well as on the importation of goods and on the ‘intra-European’ acquisition of goods. There are three VAT rates, which are 21%, 6%, and 0%.

The main VAT rate is 21%.

The reduced 6% VAT rate is applicable on certain prime necessities (and also on certain energy-saving insulation activities on houses).

The special 0% VAT rate is applicable mainly to intra-EU supplies, exports, imports stored in bonded warehouses, services rendered in connection with the above, and certain other services.

The following are exempt from VAT:

- The supply of immovable property two years after putting it into use and lease. However, if the lessee’s use of the immovable property is 90% or more for input VAT-deductible purposes, the lessor and lessee may opt to be subject to VAT on rent, in which case the lessor may deduct the VAT charged in respect of the property.
- Medical, cultural, social, and educational services.
- Services provided by banks and other financial institutions in connection with payment transactions and the granting of credit facilities.
- Insurance transactions.
- Transactions in shares.

Customs and excise tax
Many goods imported to the Netherlands from outside the European Union are subject to customs and excise duties. The tariffs and rates that apply to the different goods vary widely and change regularly.

An excise tax is levied on certain consumer goods (e.g. cigarettes, cigars, mineral oils, alcoholic products). If the goods are used solely as raw materials, no excise tax is levied. The excise tax is refundable if the article is exported.

Immovable property tax
Municipalities impose an annual immovable property tax on the owners of immovable property. The rates depend on the municipality. The taxable basis is the market value of the immovable property. Please note that the (assessment of the) value is also of importance for CIT, as depreciation might be limited based on this value (see Limited depreciation of immovable property in the Deductions section).

Transfer tax on immovable property
Acquisition of economic or legal ownership of immovable property in the Netherlands is subject to a 6% transfer tax on market value. Some exemptions are available. Real estate transfer tax on dwellings is 2%.

Transfer tax on acquisition of shares in a real estate entity
The acquisition of shares in an entity that owns real estate may also be subject to transfer tax if that entity is characterised as a so-called real estate entity. The threshold for qualifying as a real estate entity is met if more than 50% of the assets of the entity consist of real estate and at least 30% consist of Dutch immovable property.

Stamp duty
There are no stamp duties in the Netherlands.
**Capital tax**
The Netherlands do not levy capital tax on capital transactions (e.g. issue or increase capital).

**Insurance tax**
An insurance tax is payable on insurance premiums if the insured is a resident of the Netherlands or if the insured object is in the Netherlands. The insurance tax rate is 21%. Several exemptions are available (e.g. insurances of ships and aircraft operated in international traffic are exempt from insurance tax). In certain situations, an insurer outside the European Union may be required to take on a tax representative in the Netherlands.

**Waste management contribution**
Companies annually bringing 50,000 or more kilograms of packing material on the market must pay a ‘waste management contribution’ (Afvalbeheersbijdrage). The amount payable varies to the total weight and type of packaging. The contribution aims to cover the costs of recycling package materials.

Producers and importers of packaging expecting to exceed the threshold must register with the Packaging Waste Fund (Afvalfonds Verpakkingen) upfront. In the current year, they must file an estimation of the expected total volume of packing material. The contribution is then provisionally calculated. Before 1 April of the next calendar year, the actual amount and type of packaging must be reported. The actual contribution payable is recalculated accordingly.

**Payroll taxes**
Employers must withhold wage tax from the employee’s gross salary and transfer the amount to the tax authorities. Employees may treat the withheld wage tax as an advance levy of income tax. The income tax due is settled with the withheld wage tax. *The tax tables applicable to individuals are provided in the Taxes on personal income section of the Netherlands’ Individual tax summary at www.pwc.com/taxsummaries.*

**Social security contributions**
Employers must withhold national insurance contributions from the employee’s salary at an aggregate rate of 28.15% calculated on the first EUR 33,715 of each employee’s gross salary and transfer the amount to the tax authorities. The employer bears the burden of the employee’s insurance contributions, which are also calculated by reference to the employee’s salary. Under circumstances, it may be required to pay or withhold a contribution based on the Health Care Insurance Act.

**Branch income**
Rates for Dutch branch profits are the same as for other corporate profits, but no tax is withheld on transfers of profits to the head office. The tax base is, in principle, calculated on the same rules as for Dutch-resident companies.

**Income determination**

**Inventory valuation**
In general, stock/inventory is stated at the lower of cost or market value. Cost may be determined on the basis of first in first out (FIFO), last in first out (LIFO), base stock, or average cost. The LIFO system may be used for commercial/financial and tax purposes.

There is no requirement of conformity between commercial/financial and tax reporting.
Netherlands

**Capital gains**
Capital gains are taxed as ordinary income. However, capital gains realised on disposal of shares qualifying for the participation exemption are tax exempt (see Dividend income below).

The gain on disposal of depreciable assets may be carried over to a special tax deferral reinvestment reserve but must then be deducted from the acquisition cost of the later acquired assets. Except in special circumstances, the reserve cannot be maintained for more than three consecutive years. If the reserve has not been fully applied after three years, the remainder will be liable to taxation.

Capital losses are deductible, unless attributable to the disposal of a shareholding qualifying for the participation exemption.

**Dividend income**
Subject to meeting the conditions for the participation exemption, a Dutch company or branch of a foreign company is exempt from Dutch tax on all benefits connected with a qualifying shareholding, including cash dividends, dividends in kind, bonus shares, hidden profit distributions, capital gains, and currency exchange results.

**Participation exemption**
The participation exemption will apply to a shareholding in a Dutch company if the holding is at least 5% of the investee's capital, provided the conditions are met.

As a general rule, the participation exemption is applicable as long as the participation is not held as a portfolio investment. The intention of the parent company, which can be based on particular facts and circumstances, is decisive. Regardless of the company's intention, the participation exemption also is applicable if the sufficient tax test (i.e. the income is subject to a real profit tax of at least 10%) or the asset test (i.e. the subsidiary's assets do not usually consist of more than 50% of portfolio investments) is met.

For portfolio investment participations not qualifying for the participation exemption, double taxation will be avoided by applying the tax credit method, unless the portfolio investment shareholding effectively is not subject to tax at all. For EU shareholdings, it is optional to credit the actual underlying tax.

On 15 September 2015, the Netherlands published a legislative proposal implementing the recent amendments to the EU's Parent-Subsidiary Directive. Because of this implementation, the participation exemption regime is amended to include a specific clause to prevent double non-taxation as a result of mismatches in tax effects. A corporate taxpayer will not be eligible for the participation exemption or participation credit for received distributed profits to the extent that such distributed profits are deductible by the subsidiary. The proposal was incorporated into Dutch law as of 1 January 2016. All EU member states have had to implement the changes by 1 January 2016. Therefore, similar rules apply throughout the European Union.

Dividends not qualifying under the participation exemption are taxable in full at the ordinary CIT rate.

Interests of 25% or more in a company of which the assets consist (nearly) exclusively of portfolio investments should be annually valued, as an asset, at the fair market value.

Costs related to the acquisition and disposal of a participation (e.g. legal fees, compensations, notary fees) are not deductible for corporate tax.

Losses arising from the liquidation of a (foreign) subsidiary are deductible for CIT, subject to certain conditions.
Note that a provision limits the deduction of excess interest on debts that are deemed to be related to the financing of participations (see Anti-abuse rules regarding interest and loans in the Deductions section).

Profits derived from a company that was created by converting a foreign PE only qualify for the participation exemption after they exceed the losses from the PE during the previous years insofar as those losses reduced the taxable profits in the Netherlands before 1 January 2012. Under certain circumstances, such as the alienation of (part of) the shares of the company, all non-recaptured losses will be added to the profits of the Dutch parent company at once. Note that the scope of these anti-abuse provisions has been extended by including situations in which a foreign intermediate holding company is interposed.

In April 2015, new legislation was adopted introducing the compartmentalisation doctrine, based on case law. The legislation has retroactive effect to 14 June 2013.

Based on the compartmentalisation doctrine, a taxpayer that derives income from a participation that first qualified but at a certain point in time no longer qualifies for the participation exemption, or vice versa, must attribute the income to the taxable and the tax-exempt period accordingly. The legislation applies to all changes in the application of the participation exemption regime irrespective of whether caused by a change in facts and circumstances or change in legislation. It applies to both capital gains and dividend distributions. Changes that occurred before 14 June 2013 are affected. However, if in favour of the taxpayer, changes caused by modification of legislation before 1 January 2007 are not taken into account. In April 2015, the Dutch State Secretary for Finance announced its willingness to limit the retroactive effects in such cases.

**Stock dividends**

Stock dividends are taxed as dividend income to the extent that they are paid out of earned surplus. They are not taxable if paid out of share premium (‘agio’), provided the share premium account was not created pursuant to a share-for-share merger, in which only Dutch companies were involved. In the case of a share-for-share merger, in which shares in foreign subsidiaries were contributed to a Dutch company, the Dutch company can distribute the difference between the fair market value and the paid-in capital of the subsidiaries being contributed as a stock dividend without triggering Dutch dividend WHT (step-up in basis), provided certain requirements are met.

**Work in progress**

Profits with regard to work in progress should be accounted before actual completion, to the extent that the work is completed. All project costs should be recognised in the year the costs occurred.

**Foreign income**

In general, a Dutch resident company is subject to CIT on its worldwide income. However, certain income can be exempted (e.g. due to the application of the participation exemption described above) or excluded from the tax base.

Certain foreign-sourced income (foreign branch income, real estate income, and other income) is ‘excluded’ from the Dutch taxable base. The so-called ‘object exemption’, a method to provide relief for international juridical double taxation in situations of Dutch companies with a PE abroad, is designed as a tax base adjustment instead of a real exemption. Consequently, losses of foreign PEs can no longer be offset against profits of the Dutch head office (except for final losses), but currency exchange results are still included in the tax base. Also, if the foreign activities cease, any losses upon ‘liquidation’ can, in principle, be deducted. For certain low-taxed passive PEs, the object exemption is replaced by a credit system.

Double taxation of foreign dividends, interest, and royalties is relieved by a tax credit provided by Dutch tax treaties or unilaterally if the payer of the income streams is
a resident of a developing country designated by Ministerial Order. If no treaty or unilateral relief applies, a deduction of the foreign tax paid is allowed in computing the net taxable income.

However, relief by exemption is given for dividends from foreign investments qualifying for the participation exemption, as discussed above. In that case, there is no Dutch tax to credit against taxes withheld in the subsidiary’s country of residence.

In most circumstances, the foreign dividend is exempt for Dutch CIT under the participation exemption, as previously discussed. As a consequence, foreign WHT cannot be credited, and the WHT constitutes a real cost for the companies concerned. A credit of the foreign WHT is granted against Dutch dividend WHT due on the distribution to foreign parents of the Dutch company. The credit amounts to a maximum of 3% of the gross dividend paid, to the extent that it can be paid out of foreign-source dividends received that have been subject to at least a 5% WHT and the foreign company is liable for CIT. This tax credit does not result in taxable income for CIT purposes.

Deductions

Depreciation, amortisation, and depletion
Generally, depreciation may be computed by a straight-line or a reducing-balance method or, in accordance with any other sound business practice, on the basis of historical cost. Depreciation is applied from the date the asset comes into use. Dutch tax law includes specific rules (see below) that potentially limit the depreciation of assets (e.g. immovable property, goodwill, and other fixed assets).

A depletion allowance for natural resources may be granted for tax purposes, when it conforms to sound business practice and is appropriate for accounting purposes.

Limited depreciation of immovable property
There are special provisions for depreciation of immovable property. A distinction is made between immovable property held for investment purposes and buildings used in a trade or business.

Investment property cannot be depreciated to an amount lower than the official property's fair market value for tax purposes, which is known as WOZ-waarde. In other words, a property will not be subject to depreciation unless the carrying amount of the building and the land on which it is located is higher than its value for tax purposes. This value is determined by the municipal tax authorities annually. As this value is based on the assumption that the property is free of lease, the value for tax purposes of commercial real estate may be lower than fair market value.

Alternatively, the depreciation of buildings employed in a trade or business is limited to 50% of the property’s value for tax purposes. It should still be possible to value immovable property at fair market value if this is demonstrably lower than the current book value. In addition, anti-abuse measures apply to prevent the division of land and buildings into separate legal entities or to related individuals.

Note that maintenance costs continue to qualify for tax relief and any maintenance-related value increase does not lead to a compulsory upward revaluation of the property. Moreover, a property is not required to be revaluated as its value increases due to market developments.

Depreciation of land is not permitted.
The sale of depreciated assets triggers tax on the difference between the sale price and the depreciated book value unless a reinvestment reserve is set up (see Capital gains in the Income determination section).

**Limited amortisation of goodwill and depreciation of fixed assets**
With regard to goodwill, the amortisation for tax purposes is limited to 10% of the purchase price per annum. Furthermore, the tax depreciation of other fixed assets (i.e. inventory, equipment) is limited to 20% of the purchase price or production costs per annum.

**Accelerated depreciation**
The law provides accelerated depreciation of several specific assets. Accelerated depreciation applies to investments in assets that are in the interest of the protection of the environment in the Netherlands and that appear on the so-called VAMIL (Vervroegde Afschrijving Milieu-investeringen) list. From 2011, the accelerated depreciation facility for investments in environment-improving assets is limited to 75% of the total (investment) costs. Prior to 2011, 100% of the investment costs were eligible for the facility.

Accelerated depreciation also is available for certain other designated assets (e.g. investments of starting entrepreneurs).

Also eligible for accelerated depreciation are certain investment made in new business assets in 2009, 2010, and 2011 and between 1 July 2013 and 31 December 2013. Certain conditions apply. Investment costs minus residual value of sea-vessels that are operated mainly from the Netherlands may be depreciated straight-line over five years. Instead of accelerated depreciation, these taxpayers may choose immediate taxation (see Tonnage tax regime in the Taxes on corporate income section).

**Anti-abuse rules regarding interest and loans**
Due to existing anti-abuse rules, the deduction for interest paid on intra-group debts relating to certain transactions is disallowed. However, if the taxpayer provides credible evidence of overriding commercial reasons for the transaction as well as the loan, or of taxation of the interest in the hands of the recipient at an effective tax rate that is considered adequate by Dutch standards, the interest may be deductible.

Furthermore, interest paid on certain profit participating loans will be qualified as a dividend and will not be tax deductible. Interest received upon these loans may meet the definitions for the participation exemption if the creditor also holds a qualifying participation in the debtor. Intra-group conduits may be denied a credit of foreign WHT with respect to royalties or interest received if no economic risk is deployed.

If the interest payment to a group company relates to a loan that is directly or indirectly granted by a group company in order to finance an acquisition or capital contribution, the interest will be deductible only if the loan and the underlying transaction are based predominantly on sound business considerations or if the interest received is effectively and sufficiently taxed by Dutch standards. When the debt ultimately is financed externally (outside the group) and a direct relationship exists between the internal debt and the ultimate external financing, it can be substantiated that there are sound business reasons for the loan. Furthermore, the use of tax losses or similar relief claims by the recipient of the inter-company interest may adversely affect the deductibility of the interest paid. Also, the law states that the interest deduction related to indebted dividend distributions, paid back capital, and capital contributions is not only possible in case of sound business reasons but also if the interest is taxed in the hands of the creditor at an effective tax rate that is considered adequate by Dutch standards. The latter requirement means that the interest needs to be subject to an effective tax rate of at least 10% over taxable profits determined according
to Dutch standards. For the determination of ‘a taxable base according to Dutch tax standards’, the tax base limitation for the innovation box is not taken into account.

If the taxpayer makes a reasonable case that the interest is taxable at an effective tax rate of at least 10%, the tax authorities, nevertheless, have the option to substantiate that either the liability or the corresponding transaction is not based on sound business reasons. The tax authorities also have the option to substantiate that the liability is incurred in order to compensate losses or other rights that were formed in that year or that will be formed shortly thereafter. This is also applicable to existing loans.

In addition, the deduction of interest (including costs and currency exchange results) on excess acquisition debt is restricted if the acquired company subsequently joins a Dutch fiscal unity with the taxpayer. The acquisition debt is considered excessive in so far as it exceeds 60% of the acquisition price. The interest expenses may only be deducted from the acquiring company’s ‘own profits’, meaning that the profits of the target company that was added to the fiscal unity are not taken into consideration. The restriction is not applicable if the interest on the debt does not exceed EUR 1 million. Contrary to the other existing interest deduction restrictions illustrated above, this measure also relates to interest on loans obtained from third parties.

Furthermore, a provision limits the deduction of excess interest on debts that are deemed to be related to the financing of participations. Under this rule, the taxpayer is deemed to have debt relating to the financing of participations to the extent that the average cost price of its participations exceeds its average equity. This is a mathematical test. However, a few exceptions apply. For example, the cost prices of the participations that at the time of the initial acquisition led to an extension of the operational activities of the group are not taken into account for the purpose of the mathematical test. The ‘participation debt’ calculated may consist of both loans from affiliated and third parties. The interest on the deemed participation debt is not deductible to the extent the amount of the interest exceeds EUR 750,000. The provision for excessive participation interest also contains a number of specific anti-abuse measures.

**Provision for bad debt**

It is possible to make a provision for future expenses with a cause existing on the balance sheet of the tax year in question. Therefore, a provision may be made for bad debts.

**Charitable contributions**

Charitable contributions are deductible if certain conditions are met. The gift must be documented in writing and contributed to a qualifying charity (ANBI or SBBI). The deductible amount may not exceed 50% of the taxable profits, with a maximum of EUR 100,000.

**Limited deductibility of costs relating to remuneration by way of shares**

Any remunerations by way of shares, profit-sharing certificates, option rights on shares, or similar rights are not deductible. However, grandfathering rules exist for situations where option rights have been granted to employees before 24 May 2006.

Costs related to so-called stock appreciation rights for employees that earn an income that exceeds EUR 500,000 are not deductible.

**Fines and penalties**

Most criminal fines and tax penalties are not tax deductible. This applies, for instance, to fines imposed by a Dutch criminal judge, administrative fines, disciplinary fines, and penalties from a European institution.
Taxes
Certain taxes, such as the tax on insurance transactions, are deductible. Tax paid on the transfer of immovable property must be included in the cost price and taken into account in the course of normal depreciation. The CIT itself is not deductible.

Other significant items
Deduction of certain expenses (e.g. costs for food, drink, and entertainment) paid by employers for employees are not deductible, in part. These costs are often referred to as mixed costs. The non-deductible portion is 0.4% of the total taxable wages of all employees but never less than EUR 4,400 per year. Alternatively, the employer may choose to deduct only 73.5% of the actual expenses.

Net operating losses
Tax losses can be carried back one year and carried forward nine years. This also applies to start-up losses.

With regard to losses arising in the years 2009, 2010, and 2011, corporate taxpayers may opt for a temporary extension of the carryback period for losses from one to three years. This option, however, also means that the maximum period for loss carryforward will be limited to six years (instead of nine). Furthermore, the extended measure is limited to EUR 10 million loss carryback per extra year.

Complex rules may prohibit the utilisation of net operating losses after a change of 30% or more of the ultimate control in a company. Furthermore, limitations exist on loss utilisation for holding/finance companies. Based on these rules, losses incurred by a mere holding or group finance company can be offset only against holding or finance income in preceding and following years, provided that certain strict conditions are met. These conditions are meant to counter tax planning, whereby the Dutch company concerned acquires (e.g. by way of equity contribution or exchange) other assets that enhance its income streams and its capacity to make use of the losses. Companies carrying out significant other activities (with 25 or more full-time employees) are, in principle, unaffected by these loss relief restrictions.

Payments to foreign affiliates
A Dutch corporation generally can claim a deduction for royalties, management service fees, and most other charges paid to foreign affiliates, to the extent that the amounts are not in excess of what it would pay an unrelated entity (i.e. arm's-length principle). Dutch companies are obligated to produce transfer pricing documentation describing the calculation of the transfer price and the comparability of the transfer price with third party prices.

Group taxation
Fiscal unity regime
A Dutch-resident parent company and its Dutch-resident subsidiaries (if the parent owns at least 95% of the shares) may, under certain conditions, file a tax return as one entity (fiscal unity). Group taxation is available for companies having their place of effective management in the Netherlands, both for Dutch tax and treaty purposes.

The main feature of the fiscal unity is that profits of one company can be offset against losses of another company forming part of that fiscal unity. Furthermore, inter-company transactions are eliminated.

In February 2010, the ECJ decided that the Dutch fiscal unity regime does not violate EU law (the freedom of establishment), insofar as it disallows a cross-border fiscal unity. However, the ECJ has not yet explicitly dealt with the effects of the fiscal unity regime, other than cross-border loss utilisation, such as the transfer of assets between group
companies without immediate taxation and the use of ‘final losses’. The Dutch Supreme Court will possibly deal with those issues at a later stage.

On 16 June 2014, the ECJ decided that the Dutch fiscal unity regime does violate EU law to the extent it denies a fiscal unity between a Dutch resident parent company and its Dutch resident subsidiaries because of a non-Dutch resident EU/EEA intermediary holding company and insofar as it disallows a fiscal unity between two Dutch resident ‘sister’ companies that are held by a non-Dutch EU/EEA parent company.

In October 2015, a legislative proposal was published allowing a fiscal unity between Dutch entities that are linked through an EU/EEA entity. It is not yet clear when the legislative proposal will become effective. In practise, it is already possible to request for such a fiscal unity based on a Decree by the State Secretary for Finance that was issued in December 2014.

**Transfer pricing rules**

Based on a general transfer pricing provision in the corporation tax law, all transactions between related parties must be at arm’s length. Furthermore, a specific transfer pricing provision exists with respect to the transactions of an interest and royalty conduit company. Dutch companies are obligated to produce transfer pricing documentation describing the calculation of the transfer price and the comparability of the transfer price with third party prices. If a transaction between related parties is not at arm’s length, the taxable income may be corrected by the tax authorities. Moreover, transactions that do not meet the arm’s-length test may constitute a contribution of informal capital or a hidden profit distribution.

On the basis of a decree of the State Secretary for Finance regarding transfer pricing, companies may request an advance tax ruling (ATR) and an advance pricing agreement (APA). An ATR may be requested on the classification of activities and an APA may be required on the classification of activities and the arm’s-length character of the transfer price.

As of 1 January 2016, the Netherlands implemented the OECD outcomes in the area of country-by-country (CbC) reporting. The new documentation obligations include the requirement for eligible taxpayers to produce a CbC report, a master file, and a local file.

**Thin capitalisation**

There are currently no thin capitalisation rules in the Netherlands.

**Controlled foreign companies (CFCs)**

Dutch tax law does not provide for specific legislation regarding CFCs. However, interests of 25% or more in a company of which the assets consist (nearly) exclusively of low-taxed portfolio investments should be annually valued, as an asset, at the fair market value. The participation exemption is not applicable to portfolio investment participations unless these participations are qualifying portfolio investment participations for the participation exemption. A portfolio investment participation can only qualify for the participation exemption if either the intention of holding the participation is not an investment intention or if the participation is, in itself, either subject to sufficient tax or if the participation holds sufficient qualifying assets. This rule prevents shareholders of low taxed portfolio investment participations from benefitting from the Dutch participation exemption because dividends not qualifying under the participation exemption are taxable in full at the ordinary CIT rate. Double taxation is avoided by applying the tax credit method, unless the portfolio investment shareholding effectively is not subject to tax at all. For EU shareholdings, it is optional to credit the actual underlying tax.
Tax credits and incentives

Foreign tax credit
See Foreign income in the Income determination section for a description of the foreign tax credit regime.

Small investments
There is a system of deductions for small investments, the so-called small scale investment deduction. To calculate this annual deduction, investments of more than EUR 450 each are totalled to determine the percentage of the deduction.

<table>
<thead>

Investments in energy-efficient assets
For investments in new energy-efficient business assets that meet the Energy List requirements, an additional deduction (EIA) from corporate income is available. The minimum investment amount per asset is EUR 2,500. The allowance equals 58% of the annual amount, with a maximum of EUR 118 million, of eligible energy investments. The right to the EIA is declared with the tax return, provided the investment is reported previously in good time to the Netherlands Enterprise Agency (www.rvo.nl). An investment can be reported in phases, but the minimum amount for notification is EUR 2,500.

Investments in environmental assets
For investments in certain new environmental improving assets that meet the Environment List requirements, an additional deduction (MIA) from corporate income is available. The minimum investment amount per asset is EUR 2,500. The allowance equals 36%, 27%, or 13.5% (depending on the ministerial classification of the assets) of the annual amount, with a maximum of EUR 25 million, of eligible environmental investments. The right to the MIA is declared with the tax return, provided the investment is reported previously in good time to the Netherlands Enterprise Agency. An investment can be reported in phases, but the minimum amount for notification is EUR 2,500.

New technology

Wage costs
Conducting certain R&D activities on applied new technology is subsidised by a reduction of wage tax to be paid on wages of employees engaged in R&D of technologically new products. The subsidy accrues to the employer when the employee is credited for the normal amount of wage tax. The subsidy is based on specific legislation (WBSO).

To obtain the relief under the R&D incentive programme, taxpayers must file an electronic/online application with the Netherlands Enterprise Agency. The taxpayer will receive an R&D declaration. The budget for this subsidy is fixed, so the amount of the subsidy is dependent on budget availability. Note that self-developed and utilised software falls within the scope of the R&D incentive under certain conditions.

As of 1 January 2016, the WBSO application for R&D includes not only salary costs but also other costs and expenses related to R&D. The benefit of the fiscal scheme is awarded in the form of a wage tax reduction. The benefit amounts to 32% of the first
Netherlands

EUR 350,000 of R&D costs (both salary and other costs and expenses). For start-ups, this amounts to 40%. For R&D costs above EUR 350,000, this amounts to 16%. The current limit is abolished. However, the maximum benefit cannot exceed the total amount of wage tax due. Instead of applying for the real costs and expenses (non-salary costs), the taxpayer may choose to take into account a fixed amount based on R&D hours. The fixed amount is EUR 10 per hour as long as the total R&D hours do not exceed 1,800 and EUR 4 for every hour above.

**Withholding taxes**

Dividends from Dutch corporations are generally subject to a 15% Dutch dividend WHT. In general, this does not apply to the Dutch cooperative (i.e. ‘co-op’) in a business driven structure, a widely used vehicle for holding and financing activities.

The Netherlands does not levy a WHT on interest and royalty payments.

Domestic corporations are required to withhold taxes as follows:

<table>

### Notes

1. A 0% WHT rate applies to payments to a resident corporation when its shareholding qualifies for the participation exemption and the shares form part of a company whose activities are carried on in the Netherlands. However, dividend WHT may be levied on certain profit participating loans.

2. The lower rate applies if the foreign company directly owns at least 25% of the capital of the Dutch company.

3. The 5% rate is applicable if the foreign company directly owns 10% of capital of the Dutch company. The 0% rate is applicable if the dividend originates from ordinary taxed profits and the dividend is tax exempt in the hands of the recipient.

4. Based upon the treaty concluded with former Yugoslavia.

5. Negotiations on (revisions of) tax treaties are currently pending with Angola, Aruba Australia, Belgium, Brazil, Chile, Colombia, Costa Rica, Curacao, France, Indonesia, Kenya, New Zealand, Poland, Saint Martin, Singapore, Slovak Republic, and Spain. The new or revised treaties with the Czech Republic and Ethiopia are signed but not yet effective.

6. Indicates that this country is a member state of the European Union. The EU Parent/Subsidiary Directive applies from 1 January 1992. According to the Directive, dividends paid by a Dutch company (BV or NV) to a qualifying parent company resident in another EU member state must be exempt from Dutch WHT, provided certain conditions are met. Among other things, the EU parent company must hold at least 10% of the Dutch dividend-paying company’s capital (or, in certain cases, voting rights) for a continuous period of at least one year. Please note that the Dutch tax legislation is more lenient with respect to the minimum holding; it only requires a holding of 5% at the moment of distribution. A provisional exemption from dividend WHT will apply from the start of the one-year holding period. The exemption will be cancelled retroactively if, following the dividend distribution, the one-year holding requirement is not actually met. The Dutch dividend-distributing company must provide to the Dutch tax authorities a satisfactory guarantee for the payment of dividend WHT that, but for the provisional exemption, would be due. The exemption is also applicable if the parent company is a resident of a EU member state and owns at least 10% of the (voting) shares in the Dutch company but only on the basis of reciprocity (Finland, Germany, Greece, Luxembourg, Spain, and United Kingdom). Should the WHT exemption not be available under the EU Parent/Subsidiary Directive, the treaty rate(s) set out in the right-hand side of the same column (following ‘or’) will apply.

7. The lower rate applies if the foreign company directly or indirectly owns at least 25% of the capital of the Dutch company.

8. The lower rate applies if the foreign company directly owns at least 10% of the capital of the Dutch company.

9. The 0% rate applies if the foreign company directly owns at least 50% of the capital of the Dutch company, or invested more than EUR 250,000 in the Dutch company or directly owns 25% of the capital of the Dutch company and has a statement indicating that the investment in Dutch capital is, directly or indirectly, guaranteed by the government of Belarus.

10. The 5% rate applies if the foreign company directly or indirectly owns at least 25% of the capital or at least 10% of the voting rights in the Dutch company.

11. The treaty is not applicable for Hong Kong and Taiwan.

12. The 5% of rate applies if the beneficial owner is a company (other than a partnership) that directly holds at least 10% of the capital of the payer company. The 10% rate applies if the beneficial owner is a pension fund that is resident in the Netherlands. The 15% rate applies in other cases.

13. The lower rate applies if the foreign company owns at least 25% of the voting rights in the Dutch company.
14. The 5% rate is applicable if the Italian company owns at least 50% of the voting shares in the Dutch company for a continuous period of at least 12 months prior to the date of the dividend. The 10% rate is applicable if the Italian company owns at least 10% of the voting shares in the Dutch company for the continuous period mentioned above. In other cases, the dividend WHT rate is 15%.

15. The 5% rate applies if the foreign company owns at least 10% of the voting shares of the Dutch company for a continuous period of at least six months immediately before the end of the book year in which the dividends were paid. No WHT is levied if the dividend is distributed directly or indirectly to the beneficial owner and the Dutch company distributes the dividends for a period of six months. Also, no WHT is levied if the foreign company is a pension fund.

16. The lower rate applies if the foreign company directly or indirectly owns at least 10% of the capital of the Dutch company.

17. The 0% rate is applicable if the foreign company directly or indirectly owns at least 50% of the capital of the Dutch company or if it has invested more than 1 million United States dollars (USD) in the Dutch company, insofar as the government of Kazakhstan has guaranteed the investment; the 5% rate applies if the recipient company owns at least 10% of the capital of the paying company.

18. These rates do not apply to dividend payments to Luxembourg “1929” holding companies.

19. In April 2015, the Netherlands signed into a new treaty with Malawi. In the new treaty, a 0% rate is only applicable to certain pension funds. The 5% rate is applicable only to shareholdings of at least 10%.

20. The 0% rate is applicable if the foreign company directly or indirectly owns at least 50% of the capital of the Dutch company and invested more than USD 300,000 in the Dutch company. The 5% rate is applicable if the foreign company directly owns 25% or more of the capital of the Dutch company. The 15% rate is applicable on portfolio investments.

21. The 15% rate is applied to the dividend paid to a company holding at least 25% of the paid-up capital in the Dutch company. In this latter case, the WHT rate will be reduced to: (i) 5% if the dividends received are subject to a profits tax in the other state of at least 5.5% on the dividend or (ii) 7.5% if the profits tax is less than 5.5%. The combined CIT of the other state and Dutch dividend WHT for participations of at least 25% must not exceed 8.3%. Depending on the tax percentage levied in the other state, the Dutch dividend WHT will be restituted accordingly.

22. The 15% rate is applicable only if the recipient of the dividend is the beneficial owner and directly owns 10% of the capital of the Dutch company. The 0% rate is applicable if the recipient of the dividend is the beneficial owner and directly owns at least 25% of the capital of the Dutch company.

23. The 5% rate is applicable if the recipient of the dividend is the beneficial owner and directly owns at least 25% in the capital of the Dutch company with a minimum investment of at least EUR 75,000.

24. The Netherlands applies the treaty with the former Soviet Union unilaterally to Kyrgyzstan, Tajikistan, and Turkmenistan.

25. The lower rate applies if the Spanish company owns 50% or more of the capital of the Dutch company or if the Spanish company owns 25% or more of the capital of the Dutch company and another Spanish company also owns 25% or more of that capital.

26. The 0% rate is applicable if the foreign company directly or indirectly owns at least 50% of the capital of the Dutch company or invested more than USD 300,000 in the Dutch company. The 5% rate is applicable if the foreign company directly owns 20% or more of the capital of the Dutch company.

27. The lower rate applies if the foreign company directly owns at least 10% of the voting rights in the Dutch company. On 8 March 2004, the Netherlands and the United States signed a protocol amending the applicable tax treaty. Based on this protocol, the WHT on dividends will be reduced to 0% if the receiving company owns 80% or more of the voting power of the distributing company, provided that certain other conditions are also met. This reduction of the dividend WHT has taken effect as of 1 January 2005.

28. The 5% rate is applicable if the foreign company directly owns 25% or more of the capital of the Dutch company. The 0% rate is applicable if the dividend for that company qualifies for the participation exemption in the Netherlands. The 15% rate is applicable to portfolio dividends.

29. The 5% rate is applicable if the foreign company directly or indirectly owns at least 50% of the capital of the Dutch company or invested more than USD 10 million in the Dutch company. The 7% rate applies to the foreign company owning, directly or indirectly, at least 25% of the capital of the Dutch company.

30. No dividend WHT is due if the share in the participation is at least 50% and at least USD 250,000 capital is paid in, in the participation. A dividend WHT of 5% is due if the share in the participation is at least 25%.

31. A dividend WHT of 5% is due if the share in the participation is at least 10%. No dividend WHT is due if the share in the participation is at least 50% and at least USD 2 million capital is paid in, in the participation.

32. Based upon most-favoured nation principle.

33. The 0% rate applies if a company controls at least 10% of the voting power of the Dutch company paying the dividends. The 15% rate applies to dividends arising from income from immovable property, distributed by certain tax exempt real estate investment vehicles (e.g. REITs or FBIs).

34. In case a Thai company holds at least a 25% share in a Thai company, the Dutch dividend WHT rate is 5%.

35. If a share of at least 50% is held by a company, no dividend WHT is due. If the share the company holds is less than 50%, 5% dividend WHT is due.

36. As of 29 December 2004, Switzerland and the European Union concluded a treaty in light of the EU Savings Directive. The treaty, amongst others, contains a clause that no dividend tax is withheld if certain requirements are met. The main requirements are that a shareholding of at least 25% is held directly for a period of at least two years and both corporations are not subjected to a special tax regime. Please note that even though the treatment of dividend appears to be equal to the treatment on the basis of the EU Parent-Subsidiary Directive, the Directive is, in fact, not applicable to Switzerland.
37. The 0% rate applies if the foreign company directly owns at least 5% of the capital of the Dutch company.
38. The 5% rate applies if the foreign company directly owns at least 25% of the capital of the Dutch company with a minimum investment of at least EUR 200,000 in the Dutch company.
39. The 0% rate applies if the foreign company directly owns at least 7.5% of the capital of the Dutch company.
40. The WHT rates are based on the Dutch ‘Belastingregeling voor het Koninkrijk’.
41. The WHT rates for the Caribbean Netherlands are based on the Dutch ‘Belastingregeling voor het land Nederland’.
42. No WHT is levied if the foreign company (beneficial owner) receiving the dividends directly holds at least 10% (15% threshold for the Panama Treaty) of the shares of the Dutch company, provided that the shares of the foreign company are regularly traded on a recognised stock exchange or at least 50% of the shares of the foreign company is owned by residents of either contracting state or by companies the shares of which are regularly traded on a recognised stock exchange. Also, no WHT is levied if the foreign company is a bank or insurance company, a state or political subdivision, a headquarter owning at least 10% of the shares of the Dutch company, or a pension fund.
43. The 0% rate applies if the foreign company directly owns at least 10% of the capital of the Dutch company, is a pension fund, or, as far as Switzerland is concerned, the beneficial owner is a social security scheme.
44. Because the treaty with Mongolia is not applicable anymore, the national WHT rate applies.

**Tax administration**

**Taxable period**
Generally, the tax year is equal to the calendar year. However, corporate taxpayers may deviate from this by adopting a different financial year.

**Tax returns**
Corporate taxpayers are required to file a tax return annually. The due date is generally five months after the end of the company's financial year. This filing due date may be extended upon request by the taxpayer.

The Dutch tax authorities generally make a provisional assessment before issuing the final assessment after a full examination of the return. The final assessment must be issued within three years following the financial year. This period is prolonged with the time of the extension for filing the tax return. The Dutch tax authorities may issue an additional assessment if it appears that the amount of CIT payable (as calculated in the final assessment) is too low.

During the current tax year, a provisional assessment can be issued on the basis of prior years’ taxable income or on an estimation provided by the taxpayer.

**Payment of tax**
The CIT assessed must be paid within two months of the date of the provisional or final assessment. Interest is payable on the CIT due. The interest is calculated from six months following the financial year. The minimum interest rate is 8%.

**Refund of tax unduly levied**
If a corporate taxpayer is entitled to a refund of Dutch CIT or WHT because the levy appeared to be in conflict with EU law, the Netherlands might be obligated to repay with interest for the period from the levy to the refund. The taxpayer must file a request at the Dutch tax authorities within six weeks after the refund.

**Interest on late payment dividend WHT**
Interest is calculated on late payments or refunds of Dutch dividend WHT.

**Tax audit process**
Corporate taxpayers might be subject to regular audits by tax inspectors. This forms part of the so-called vertical monitoring tasks of the national tax authorities. In recent years, there has been a tendency towards a more enhanced co-operation between tax authorities and taxpayers in the Netherlands (see Horizontal monitoring in this section below). Part of this trend is that there are to be less audits in retrospect.
Statute of limitations
Under certain conditions, the tax administration can impose an additional assessment within five years from the year in which the tax debt originated (if the filing due date was extended on request, this period is added). In case of income from abroad, the period for additional assessment is extended to 12 years. In 2013, the Dutch tax legislator published a proposal to reduce the period for the issuing of an additional assessment to three years after the tax return is received by the Dutch tax authorities. The same proposal also suggests extending that period to 12 years in case the taxpayer intentionally filed an incorrect tax return. The proposal is currently subject to amendments by the Dutch parliament. It is still unclear when or if this proposal will be adopted.

Advance pricing agreement (APA)/Advance tax ruling (ATR)
Taxpayers are able to obtain (legal) certainty concerning their CIT positions. They may request the Dutch tax authorities to conclude an APA with respect to the transfer pricing of controlled transactions. Taxpayers may also request the Dutch tax authorities to provide an ATR with respect to the CIT implications of a (contemplated) set of transactions.

Horizontal monitoring
If the taxpayer is willing, the Dutch tax authorities, in certain cases, shift their method from vertical monitoring to horizontal monitoring. Emphasis is placed on cooperation and on the responsibilities of the parties involved, instead of retrospective control. Horizontal monitoring is based on mutual trust, understanding, and transparency between the taxpayers and the Dutch tax authorities. It aims at reducing administrative burdens and providing legal certainty in advance. Taxpayers need to have a solid Tax Control Framework.

Topics of focus for tax authorities
The topics of focus for the Dutch tax authorities may vary.

Other issues

Foreign Account Tax Compliance Act (FATCA) intergovernmental agreement (IGA) with the United States (US)
The Netherlands signed an FATCA IGA with the United States on 18 December 2013. As of 1 July 2014, banks and insurers must be compliant with the FATCA provisions. This US-based legislation will be implemented in Netherlands' domestic law and will apply to all financial institutions worldwide. The FATCA IGA is based on the standard Model 1A IGA of 4 November 2013 and provides for specific exemptions.

Common Reporting Standard (CRS)
On 11 September 2015, the State Secretary for Finance published the draft law for implementation of the CRS. The amended EU Directive on Administrative Cooperation will also be implemented in the Netherlands through this law. The proposal entered into force on 1 January 2016.

Based on this law, financial service companies in the Netherlands must comply with certain administrative obligations and report information on foreign account holders to the Dutch tax authorities. This information may include account numbers and the balance on a bank account of foreign account holders.

Base erosion and profit shifting (BEPS)
According to the Netherlands, the BEPS issues should be addressed through international cooperation. As a member of the OECD, the Netherlands is an active participant in the BEPS project of the OECD and supporting its goals. As a consequence, the Netherlands will enact legislation when agreement is reached within the OECD.
Netherlands

on the BEPS project and all parties agreed to implement. One example of this type of legislation is the OECD CbC reporting implementation package that has been published in the OECD report on Action 13 in 2015. The Netherlands has implemented the OECD CbC reporting package that corresponds with the system and methods as prescribed in the OECD CbC reporting package.

**EU state aid**

In 2014, the EC opened an investigation to examine whether a specific, individual ruling issued by the Dutch tax authorities on the calculation of the taxable basis for CIT purposes complies with the EU rules on state aid. The EC has concluded that this ruling does, in fact, constitute state aid. The full decision and the arguments of the EC have not yet been published to the public. The Dutch Ministry of Finance has said that it does not agree with the EC’s decision and will appeal.

It is expected that the EC may also investigate other tax rulings. However, the EC has explicitly stated that it does not expect to encounter systematic irregularities in Dutch tax rulings.

Significant developments

Goods and services tax (GST) on online services

The Taxation (Residential Land Withholding Tax, GST on Online Services, and Student Loans) Act 2016 seeks to impose GST on digital products and other services (such as music, movie, and game downloads) purchased online by New Zealand consumers. The new law requires offshore sellers to register and pay GST from 1 October 2016.

The following measures have been introduced:

• Services and intangibles supplied remotely by an offshore supplier to New Zealand-resident consumers are treated as performed in New Zealand and therefore subject to GST.
• A wide definition of ‘services’ has been adopted, which includes both digital services and more traditional services such as legal and accounting services.
• The new rules only apply to business-to-consumer (B2C) transactions and not to business-to-business (B2B) transactions.
• From 1 October 2016, offshore sellers are required to register and return GST if their supplies of services to New Zealand-resident consumers exceed 60,000 New Zealand dollars (NZD) in a 12-month period.

In some situations, an ‘electronic marketplace’ or intermediary are required to register instead of the principal offshore supplier.

Debt remission

In February 2015, Inland Revenue released an Officials’ Issues Paper on related parties debt remission. The paper sought feedback on proposed legislative changes to make the debt remission rules more certain for taxpayers. The proposed legislative changes are intended to ensure that there should be no debt remission income for the debtor when the debtor is in the New Zealand tax base, including controlled foreign companies (CFCs) and New Zealand subsidiaries of foreign companies, and:

• they are members of the same wholly-owned group of companies, or
• the debtor is a company or partnership (including look-through companies and limited partnerships) and all of the relevant debt is owed to shareholders or partners in the debtor, and the relevant debt is remitted or capitalised pro-rata to ownership.

The changes are proposed to have retrospective application from the commencement of the 2006/07 tax year. The proposals have been included in the Taxation (Annual Rates for 2016-17, Closely Held Companies, and Remedial Matters) Bill, which was introduced to Parliament in May 2016.

Simplifying tax administration

The government is seeking to modernise tax administration and reduce compliance costs. A green paper has been released that considers simplifying tax for businesses and individuals. Its proposals include using existing business processes and technology to
calculate provisional tax and streamline the collection of pay-as-you-earn (PAYE) and GST. The paper also proposes providing online returns for individuals, pre-populated with all known income information, to simplify their filing obligations.

Inland Revenue is also seeking to improve its digital services for a better tax system, releasing a discussion document that puts forward three key proposals. First, Inland Revenue would work with third parties, such as banks and business software developers, so that tax interactions are built into a customer's regular transactions rather than managing tax separately at specific times of the year. Second, Inland Revenue would provide assistance to those who do not have access to digital technology or the skills or knowledge to use it. Finally, Inland Revenue would develop a process to move certain individuals and businesses to digital services where possible.

The government will be releasing detailed proposals on these areas over the next few years as it seeks to simplify and improve New Zealand's tax administration system.

**Double tax agreements (DTAs)**

**Samoa - New Zealand DTA**
A new DTA was signed with Samoa in July 2015 and entered into force on 23 December 2015. The new DTA replaces the existing tax information exchange agreement (TIEA) between New Zealand and Samoa. Under the new DTA, the withholding tax (WHT) rates are:

- 15% for dividends, or 5% for an investor who holds at least 10% of the shares in the company that pays the dividends.
- 10% for interest payments.
- 10% for royalties.

**DTAs under negotiation**
New Zealand is currently negotiating DTAs with China, Luxembourg, Norway, Portugal, and the United Kingdom.

New Zealand is also negotiating new protocols to amend existing treaties with Austria, Belgium, India, and the Netherlands.

---

**Taxes on corporate income**

New Zealand resident companies are taxed on their worldwide income, and non-resident companies (including branches) are taxed on New Zealand-sourced income.

The New Zealand corporate income tax (CIT) rate is 28%.

**Local income taxes**
There are no state or municipal income taxes in New Zealand.

---

**Corporate residence**
Residence is determined by place of incorporation, location of head office, centre of management, or by directors’ exercising control of the company in New Zealand.

**Permanent establishment (PE)**
Generally, DTAs to which New Zealand is a party define a PE by reference to a fixed place of business through which the company's business is carried on. A PE can also exist without a fixed place of business if the employees of the overseas company habitually
exercise an authority to conclude contracts in New Zealand or provide services in New Zealand for a period of time.

**Other taxes**

**Goods and services tax (GST)**

GST is a form of value-added tax (VAT) that applies to most supplies of goods and services. The narrow category of exempt supplies includes financial services. The rate applied to taxable supplies is currently 15% or 0%.

The 0% rate applies to a few supplies only, including exports and financial services supplied to other registered businesses. The 0% rate also applies to the sale of land between two registered parties if the purchaser acquires the land with the intention of using it to make taxable supplies and the land is not intended to be used as a principal place of residence for the purchaser or an associate.

There is also a ‘reverse charge’ mechanism that requires the self-assessment of GST on the value of certain services imported by GST registered persons.

Non-residents who do not make taxable supplies in New Zealand can register for GST, provided they meet certain criteria, allowing them to claim a refund for their input GST costs.

**Customs duties**

Customs duty is levied on some imported goods at rates generally ranging from 1% to 10%.

**Excise duty**

Excise duty is levied, in addition to GST, on alcoholic beverages (e.g. wines, beers, spirits), tobacco products, and certain fuels (e.g. compressed natural gas, gasoline). The excise duties are levied item-by-item at rates that vary considerably.

**Property taxes**

Local authorities levy tax known as ‘rates’ on land within their territorial boundaries. Rates are levied on properties based on the properties’ rateable value.

**Transfer taxes**

There are no taxes on the transfer of property in New Zealand.

**Stamp duty**

Stamp duty has been abolished in respect of instruments executed after 20 May 1999.

**Accident compensation levy**

A statutory-based scheme of accident insurance is funded in part by premiums payable by employers and employees.

Premiums paid by employers (including the self-employed) fund insurance for work-related accidents. Employers are liable to pay a residual claims levy and an employer levy. The employer levy payable is determined according to the industry or risk classification of the employer and the level of earnings of employees.

**Fringe benefit tax (FBT)**

Employers are subject to a tax-deductible FBT on the value of non-cash fringe benefits provided to their employees. Employers can elect to pay FBT at flat rates (for the 2016/17 income year, 49.25% on attributed benefits and 42.86% on pool benefits, i.e. those benefits that cannot be attributed to a particular employee) applied against the value of
the benefit or can attribute fringe benefits to individual employees and pay FBT based on each employee’s marginal tax rate.

Under the attribution option, the applicable FBT rate depends on the net remuneration (including fringe benefits) paid to the employee. The attribution calculation treats the fringe benefit as if it was paid in cash and calculates FBT as the notional increase in income that otherwise would have arisen.

The multi rates for the 2016/17 income tax year are:

<table>
<thead>
<tr>
<th>Net remuneration (NZD)</th>
<th>FBT rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>12,530 or less</td>
<td>11.73</td>
</tr>
<tr>
<td>12,531 to 40,580</td>
<td>21.21</td>
</tr>
<tr>
<td>40,581 to 55,980</td>
<td>42.86</td>
</tr>
<tr>
<td>Greater than 55,981</td>
<td>49.25</td>
</tr>
</tbody>
</table>

Fringe benefits include motor vehicles available for private use, loans at below prescribed interest rates, contributions to medical insurance schemes, and non-monetary employer contributions to superannuation schemes.

In relation to motor vehicles, employers can value a vehicle on an annual basis either using 20% of the cost price or market value (GST inclusive) of the vehicle (depending on whether the vehicle is owned or leased by the employer) or 36% of the vehicle’s tax written down value (GST inclusive). In each case, the FBT value must be reduced proportionately for whole days when the vehicle is not available for private use at any time.

FBT is also applicable to benefits received by an employee from a third party where there is an arrangement between the employer and the third party and where the benefit would be subject to FBT if it had been provided by the employer.

**Employer superannuation contribution tax (ESCT)**

Employers’ contributions to an approved superannuation fund (excluding foreign schemes) are subject to ESCT. This includes employer contributions to KiwiSaver (or other qualifying registered superannuation schemes).

ESCT is generally deducted at the employee’s relevant progressive rate based on the total salary or wages and employer superannuation cash contributions paid to the employee in the previous year.

<table>
<thead>
<tr>
<th>Salary or wages plus superannuation contributions (NZD)</th>
<th>ESCT rate (%)</th>

<td>57,601 to 84,000</td>
<td>30.0</td>
</tr>
<tr>
<td>Over 84,000</td>
<td>33.0</td>
</tr>
</tbody>
</table>

**Non-resident contractor’s tax (NRCT)**

New Zealand imposes an obligation to deduct NRCT on those making contract payments to non-residents in relation to certain contract activities undertaken in New Zealand. Contract activities generally relate to services but also include the granting of a right to use property in New Zealand. The NRCT rate is generally 15% (or 30% for individuals and 20% for companies if the relevant paperwork is not provided). Some contractors are eligible to apply for a certificate of exemption or a reduced rate certificate.

In additional to a certificate of exemption, no NRCT is required to be withheld if the non-resident has full relief from tax under a DTA and is present in New Zealand for no more than 92 days in a 12-month period.
Payments for contract work amounting to less than NZD 15,000 in a 12-month period are also exempt from NRCT. In such cases, contractors themselves are responsible for paying any New Zealand tax owed at the end of the year (provided there is no relief from tax under a DTA).

**Branch income**

A non-resident company is taxed on income generated by business wholly or partially carried on in New Zealand. Branch profits are subject to ordinary corporate rates of taxation, and there is no WHT on repatriated profits.

**Income determination**

**Inventory valuation**

Inventory must be valued by a cost-valuation method or, where market-selling value is lower than cost, may be valued at market-selling value. If the inventory is shares, it must be valued at cost. Cost is determined under New Zealand Generally Accepted Accounting Practice (NZ GAAP). Acceptable cost flow methods are first in first out (FIFO) or weighted-average cost. Some valuation concessions are available to small taxpayers.

**Capital gains**

There is no separate capital gains tax. However, the income tax legislation specifically includes various forms of gain that would otherwise be considered a capital gain within the definition of ‘income’. Taxable income includes gains on the sale of real estate in certain circumstances and on personal property where the taxpayer acquired the property for resale or deals in such property or where a profit-making purpose or scheme can be deemed or imputed.

**Dividend income**

Inter-corporate dividends paid between New Zealand resident companies are exempt where there is 100% common ownership.

**Dividends from a foreign company**

A dividend derived by a company resident in New Zealand from a foreign company is treated as exempt income unless it is:

- a dividend on a fixed rate share or a dividend for which the foreign company has received a tax deduction in its home jurisdiction, or
- a dividend from a portfolio foreign investment fund (FIF) (i.e. interests under 10%) that is exempt from FIF rules (e.g. an interest in an Australian listed company).

Dividends from foreign companies derived by taxpayers other than companies are taxable (generally with a credit for any foreign WHTs).

**Supplementary dividend tax credit regime**

Previously, the supplementary dividend tax credit regime (commonly referred to as FITC) ensured that foreign investors were not taxed at more than the New Zealand corporate tax rate by effectively rebating the New Zealand WHT to the extent that the dividend was fully imputed. As non-resident withholding tax (NRWT) rates have been reduced to nil on most fully imputed dividends, a supplementary dividend tax credit is generally no longer required.

The supplementary dividend tax credit regime applies only to fully imputed dividends paid to shareholders holding less than 10% of the shares in the company and NRWT rates of at least 15%.
New Zealand

Broadly therefore:

- only portfolio investors (i.e. those with less than 10% holdings) with NRWT rates of at least 15% will qualify for relief under the supplementary dividend rules, and
- a zero rate of NRWT applies to dividends paid to non-portfolio shareholders (i.e. shareholders with more than 10% holdings) and to any other dividends subject to lower tax rates, to the extent they are fully imputed.

The changes affect provisional tax calculations for taxpayers who take into account their anticipated supplementary dividend tax credits in calculating their provisional tax. Taxpayers should also consider the need to impute dividends where a tax treaty applies to reduce the NRWT rate.

**Stock dividends**

Bonus issues can be taxable or non-taxable. With a taxable bonus issue, the amount capitalised becomes available for tax-free distribution upon a subsequent share cancellation. With a non-taxable bonus issue, the amount capitalised is not available for tax-free distribution upon a subsequent share cancellation.

Shares issued under profit distribution plans (PDPs) are treated as taxable dividends.

**Interest income**

All interest derived by a company is income. The financial arrangement rules may require income for tax purposes to be recognised on an accrual basis. When this is not required (because the person is classified as a ‘cash basis’ person), interest income is recognised as and when it is received.

**Other significant items**

The taxation of debt and debt instruments is governed by the financial arrangements rules, a specific set of timing rules. Income or expenditure (including foreign exchange gains and losses) from financial arrangements must be recognised on an accrual basis (generally, yield to maturity or other commercially acceptable method). These rules do not apply to the income or expenditure of a non-resident if the financial arrangement does not relate to a business carried on in New Zealand.

**Foreign income**

A New Zealand corporation is taxed on foreign passive income as earned. Double taxation with respect to all types of taxable income, including interest, rents, and royalties, is avoided by the recognition of foreign tax credits.

New Zealand does not offer specific tax deferral rules.

**Deductions**

**Depreciation and depletion**

For tax purposes, depreciation of property can be computed under the diminishing-value method, the straight-line method, or a pooling method. The rates of depreciation depend on the following factors:

- Type of asset.
- Whether the asset is acquired new or second-hand (i.e. used).

Taxpayers must use the economic depreciation rates prescribed by Inland Revenue. Fixed-life intangible property (including the right to use land and resource consents) is depreciable on a straight-line basis over its legal life. Any depreciation recovered on the sale of an asset (up to its original cost) is taxable in the year of sale.
The double-declining-balance (diminishing value) method applies to most plant and equipment. Under the double-declining-balance method, equipment with an estimated useful life of ten years results in diminishing value depreciation deductions of 20% per annum (i.e. double the straight-line rate of 10% over the equipment's ten-year life). Buildings, certain motor vehicles, high-residual-value property, fixed-life intangible property, and property acquired prior to the introduction of the new rules cannot be depreciated under the double-declining-balance method.

The depreciation rate for buildings with an estimated useful life of 50 years or more is reduced to 0% as of the 2011/12 income year.

**Goodwill**
Goodwill is generally regarded as a capital asset, thus any payment for goodwill is non-deductible. There is a limited exception for payments made to preserve goodwill.

**Start-up expenses**
Expenses incurred by a company before the commencement of the business are generally regarded as outgoings of a capital nature and are therefore not deductible. However, certain expenditure on scientific research may be deductible, provided that it is incurred for the purpose of the company deriving assessable income.

**Research and development (R&D)**
R&D costs are tax deductible. Expenses written off as immaterial and not tested against certain asset-recognition criteria are not automatically deductible for tax purposes.

**Unsuccessful software development costs**
Taxpayers are allowed an upfront deduction for expenditure incurred on unsuccessful software development projects in the year that the development is abandoned.

**Interest expense**
Generally, interest incurred by most companies is deductible, subject to thin capitalisation rules (see the Group taxation section).

**Bad debt**
A company is allowed a deduction for bad debt in the income year in which the debt is physically written off by the company.

**Charitable contributions**
A company is generally allowed a deduction for charitable contributions it makes to an approved Inland Revenue donee organisation or a charity that performs its activities in New Zealand. The list of approved donee organisations is available on Inland Revenue's website. The deduction available for charitable contributions is limited to the company's net income for that income year.

**Entertainment expenditure**
Entertainment expenditure is generally only 50% deductible. However, entertainment expenditure incurred overseas is 100% deductible.

**Legal expenditure**
Legal expenditure is deductible if the expenditure is:

- incurred in deriving assessable or excluded income or
- incurred in the course of carrying on a business for the purpose of deriving assessable or excluded income.

However, the expenditure is not deductible if it is of a capital, private, or domestic nature.
New Zealand

Taxpayers with business-related legal expenditure of NZD 10,000 or less are able to deduct the full amount of the expenditure in the year it is incurred, whether or not it is capital in nature.

**Fines and penalties**
Generally, no deduction is available where a company has incurred expenditure on fines or penalties paid in breach of statute or regulation. Expenditure on other fines and penalties requires further evaluation before its deductibility can be determined.

**Taxes**
FBT is deductible, as is GST payable on the value of a fringe benefit.

**Net operating losses**
Losses may be carried forward indefinitely for offset against future profits, subject to the company maintaining 49% continuity of ownership. There is no loss carryback. Losses of a subsidiary are preserved on a spinout (i.e. when shares in the subsidiary are transferred to shareholders of its parent company).

**Payments to foreign affiliates**
A New Zealand corporation can claim a deduction for royalties, management service fees, and interest charges paid to non-resident associates, provided the charges satisfy the ‘arm’s-length principle’, which forms the basis of New Zealand’s transfer pricing regime.

**Group taxation**
Companies that are 66% or more commonly owned constitute a ‘group’. Group companies are able to offset losses by election as well as by subvention payment. A subvention payment is a payment made by the profit company to the loss company and cannot exceed the amount of the loss company’s loss. The payment is deductible to the profit company and assessable to the loss company. Certain companies subject to special bases of assessment (e.g. mining companies other than petroleum extraction companies) are excluded from the grouping provisions. Branches of non-resident companies may be included, provided they continue to carry on business in New Zealand through a fixed establishment.

Groups of resident companies that have 100% common ownership may elect to be subject to the consolidated group regime. The group is effectively treated as a single company and transfers of assets, dividends, interest, and management fees among members of the group are generally disregarded for tax purposes. The group files a single return and is issued a single assessment. Group members are jointly and severally liable for tax purposes, unless an election is made to limit the liability to one or more companies in the group.

Losses incurred by a dual-resident company are not available for offset by election or subvention payment.

**Transfer pricing**
The transfer pricing rules are based on Organisation for Economic Co-operation and Development (OECD) principles and require taxpayers to value all cross-border transactions with associates on an arm’s-length basis.

The transfer pricing rules apply to arrangements for the acquisition or supply of goods, services, money, intangible property, and anything else (other than non-fixed rate shares) where the supplier and acquirer are associated persons. Similar rules apply to the apportionment of branch profits.

Various methods are available for determining the ‘arm’s-length consideration’. The taxpayer is required to use the method that produces the most reliable measure of the
amount that independent parties would have paid or received in respect of the same or similar transactions. Inland Revenue has published guidelines that make it clear that documentation is required to support a taxpayer's transfer prices.

**Thin capitalisation**

‘Inbound’ thin capitalisation rules apply to New Zealand taxpayers controlled by non-residents, including branches of non-residents. The aim of the rules is to ensure that New Zealand entities or branches do not deduct a disproportionately high amount of the worldwide group’s interest expense. This is achieved by deeming income in New Zealand when, and to the extent that, the New Zealand entities in the group are thinly capitalised (i.e. excessively debt funded).

The Taxation (Annual Rates, Employee Allowances, and Remedial Matters) Act 2014 widens the inbound rules to include situations where non-residents are ‘acting together’ and to include trusts where the majority of settlements have come from non-residents or from entities subject to the thin capitalisation rules.

The ‘outbound’ thin capitalisation rules are intended to operate as a base protection measure to prevent New Zealand residents with CFC investments and certain FIF investments from allocating an excessive portion of their interest cost against the New Zealand tax base.

To reduce taxpayer compliance costs, the outbound thin capitalisation rules do not apply when the New Zealand taxpayer has 90% or more of their assets in New Zealand.

Further concessions are available under the ‘outbound rules’ to taxpayers who do not fall below this threshold. If the taxpayer’s interest deduction and dividends paid for fixed rate shares (the finance cost) is below NZD 1 million, no apportionment of deductible interest is required. If the finance cost is above NZD 1 million, but below NZD 2 million, the interest apportionment may be reduced.

An apportionment of deductible interest is required under the thin capitalisation rules when the debt percentage (calculated as the total group interest bearing debt/total group assets of a New Zealand entity or group) exceeds both:

- 60% (for ‘inbound’ thin capitalisation) or 75% (for ‘outbound’ thin capitalisation) and
- 110% of the worldwide group’s debt percentage.

The use of the debt-to-asset ratio differs from most thin capitalisation models, which apply to an entity’s debt-to-equity ratio. All interest (both related and unrelated party) is subject to apportionment.

Foreign-owned banks operating in New Zealand are subject to specific thin capitalisation rules that deem income if the bank does not hold a level of equity equivalent to 6% of their New Zealand banking risk-weighted assets. In addition, banks are required to have sufficient equity to equity fund offshore investments that do not give rise to New Zealand taxable income in full.

**Controlled foreign companies (CFCs)**

The CFC regime imposes New Zealand tax on the notional share of income attributable to residents (companies, trusts, and individuals) with interests in certain CFCs.

Central to the regime is the definition of a CFC. When five or fewer New Zealand residents directly or indirectly control more than 50% of a foreign company, or when a single New Zealand resident directly or indirectly controls 40% or more of a foreign company (unless a non-associated non-resident has equal or greater control), that company is a CFC. For interests that do not meet the definition of a CFC, the investment may be taxed under the FIF regime (see below).
New Zealand

Note that a person with an income interest in a CFC does not have attributed CFC income or losses if:

- the Australian exemption applies or
- the CFC passes an active business test.

If the exemptions do not apply, only the CFC's passive (attributable) income is subject to tax on attribution (on an accrual basis). However, no income attribution is required if a New Zealand resident has an income interest of less than 10% in the CFC.

**Active business test**
A CFC passes the active business test if it has passive (attributable) income that is less than 5% of its total income. For the purposes of the test, taxpayers measure passive and total income using either financial accounting (audited International Financial Reporting Standards [IFRS] or NZ GAAP accounts) or tax measures of income.

CFCs in the same country may be consolidated for calculating the 5% ratio, subject to certain conditions.

**Australian exemption**
A person with an interest in a CFC does not have attributed CFC income or a loss if the CFC is a resident in, and subject to income tax in, Australia and meets certain other criteria.

**Passive (attributable) income**
Attributable, or passive, income is income that is highly mobile and not location-specific (i.e. income where there is a risk that it could easily be shifted out of the New Zealand tax base).

The broad categories of attributable income are as follows:

- Certain types of dividend that would be taxable if received by a New Zealand resident company.
- Certain interest.
- Certain royalties.
- Certain rents.
- Certain amounts for financial arrangements.
- Income from services performed in New Zealand.
- Income from offshore insurance business and life insurance policies.
- Personal services income.
- Income from the disposal of revenue account property.
- Certain income related to telecommunications services.

Taxpayers must disclose interests in CFCs in their annual tax returns. Failure to disclose CFC interests can result in the imposition of penalties.

**Foreign investment funds (FIFs)**
The FIF regime is an extension of the CFC regime, which subjects persons with interests in certain foreign entities (which are not CFCs) to New Zealand tax. It also applies when the investor does not have a sufficient interest in a CFC to be taxed under that regime.

Common examples of investments classified as FIFs include foreign companies, unit trusts, foreign superannuation schemes, and life insurance policies issued by foreign entities not subject to New Zealand tax.

The FIF rules can be split into two regimes:

- The portfolio FIF rules, which apply to interests of less than 10% in a FIF.
New Zealand

- The non-portfolio FIF rules, which apply to interests of 10% or more that are outside the CFC rules.

**Portfolio FIF rules**
The portfolio FIF rules apply to interests of less than 10% in foreign companies, foreign superannuation schemes, and foreign life insurance policies issued by non-resident life insurers (if the CFC rules do not apply). However, a New Zealand resident does not generally have FIF income when:

- the total cost of FIF interests held by the individual does not exceed NZD 50,000
- the income interest is less than 10% in certain Australian Stock Exchange (ASX) listed companies or certain Australian unit trusts, or
- the CFC rules apply.

There are also exemptions for interests in certain foreign employment-related superannuation schemes. These include interests held by returning residents and new migrants acquired before the person became a New Zealand resident or within the first five years of New Zealand residence.

When an interest is exempt from the FIF rules, distributions are subject to tax on a receipts basis in accordance with normal principles.

The taxable income of a New Zealand resident with an interest in a FIF that does not qualify for one of the exemptions is calculated using one of the following methods:

- Fair dividend rate (FDR).
- Comparative value.
- Cost.
- Deemed rate of return.

The nature of the interest held and the availability of information restrict the choice of method.

Taxpayers must disclose interests in certain FIFs in their annual tax returns. Failure to disclose can result in the imposition of penalties.

**Non-portfolio FIF rules**
The active income exemption (which applies for CFCs) also includes certain non-portfolio FIFs. If the FIF fails the active business test, passive income will be attributed to the New Zealand shareholders. There is also an exemption for shareholders with a 10% or greater interest in a FIF that is resident and subject to tax in Australia.

When investors do not have sufficient information to perform the calculations required under the active business test (or choose not to apply the active business test), they will be able to use one of the attribution methods for portfolio FIF investments (see above).

**Tax credits and incentives**

**Foreign tax credits**
If a New Zealand resident company derives overseas income that is subject to New Zealand income tax, the company is generally allowed a credit for the foreign income tax paid in respect of that income. Generally, the credit is limited to the lesser of the actual overseas tax paid on the overseas income or the New Zealand tax applicable to the overseas income.

Foreign tax credits can only be used if the taxpayer is in a tax paying position. If foreign tax credits are not claimed in the current year, they are forfeited.
New Zealand

**Inbound investment incentives**

There are limited, specific tax incentives designed to encourage the flow of investment funds into New Zealand.

Legislation encourages foreign venture capital investment into unlisted New Zealand companies. Gains derived by certain non-residents from the sale of shares (held on revenue account and owned for at least 12 months) in New Zealand unlisted companies that do not have certain prohibited activities as their main activity are exempt from income tax. The rules apply to foreign investors who are resident in all of the countries with which New Zealand has a DTA (except Switzerland) and who invest into New Zealand venture capital opportunities.

**Capital investment incentives**

Investment allowances on fixed assets are not available.

**Trans-Tasman imputation**

Elective rules allow trans-Tasman groups of companies to attach both imputation credits (representing New Zealand tax paid) and franking credits (representing Australian tax paid) to dividends paid to shareholders.

The regime allows eligible wholly owned groups of Australian and/or New Zealand companies to group for imputation purposes only. Groups with both Australian and New Zealand members are known as trans-Tasman imputation groups (TTIGs). New Zealand companies within a trans-Tasman group maintain a separate ‘resident imputation subgroup’ account.

---

**Withholding taxes**

Resident corporations paying certain types of income are required to withhold tax on gross income, as shown in the table below.

<table>

Notes

1. Resident WHT applies to both interest and dividends. Unless the recipient corporation holds an exemption certificate, and if the recipient provides a tax file number, the default rate of the interest WHT is 28%. Recipients can elect for the rate of interest withholding to be 30%. The rate of interest WHT is 30% where the recipient does not provide a tax file number.

2. Resident corporations paying interest to non-associated, non-resident corporations and individuals need not withhold tax if they have approved-issuer status and the security under which interest is payable is registered with Inland Revenue. In this case, the resident corporation pays a 2% levy (tax deductible) on the interest payments instead of the WHT otherwise applicable.

3. Non-resident WHT is imposed on dividends at the following rates, regardless of the jurisdiction to which the dividends are paid:
   - 0% for fully imputed dividends paid to a shareholder holding 10% or more of the direct voting interests in the company and fully imputed non-cash dividends.
   - 15% for fully imputed cash dividends paid to a shareholder holding less than 10%.
   - 30% in most other cases, subject to any relief available under a DTA.

4. Net interest income is subject to reassessment at the company tax rate where the payer and the recipient are ‘associated persons’, but WHT is the minimum liability. Non-resident WHT is not imposed where the recipient of the interest has a fixed establishment in New Zealand.

5. The WHT on dividends is reduced from 15% to 5% for an investing company that has at least a 10% shareholding in the company paying the dividend. The rate reduces to 0% if the investing company holds 80% or more of the shares in the other company and meets other criteria. The WHT rate on interest is 10% but is reduced to 0% if it is payable to eligible financial institutions.

6. The WHT on dividends is reduced from 15% to 5% for an investor who holds at least 10% of the shares in the company that pays the dividend. The WHT rate on royalties is reduced from 15% to 10% generally, with a further reduced rate of 5% for royalties relating to copyright, computer software, and others.

7. The WHT on interest is reduced to 10% if the interest received is derived from loans granted by banks or insurance companies. In all other cases, 15%.

8. The WHT on dividends is reduced from 15% to 5% for an investing company that has at least a 10% shareholding in the company paying the dividend. The rate reduces to 0% if the investing company holds 50% or more of the shares in the other company and meets other criteria. The WHT rate on interest is 10% but is reduced to 0% if it is payable to eligible financial institutions.
9. The WHT rate on dividends is reduced from 15% to 0% for an investor who holds at least 10% of the voting power in the company paying the dividend (subject to certain conditions being met). The WHT rate on interest is 10% generally and 0% if it is payable to eligible financial institutions.

10. The 0% WHT rate applies where the foreign company owns at least 80% of the voting rights in the paying company (directly or indirectly) for 12 months prior to the date the dividend is paid. The 5% rate applies if the foreign company has a direct interest of at least 10% of the voting rights in the paying company.

11. The WHT rate on dividends will reduce from 15% to a maximum of 5% for an investor who holds at least 10% of the shares in the company that pays the dividend.

12. The standard WHT rate on dividends reduces to 5% for an investing company that has at least a 10% shareholding in the company paying the dividend.

13. The WHT rate on interest is reduced to 10% if it is received by a financial institution or it is paid with respect to debt arising from a sale on credit of any equipment, merchandise, or services. The WHT rate is reduced to 10% for certain types of royalty.

14. The WHT rate on dividends is reduced to 5% if the beneficial owner is a company holding at least 25% of the capital of the company paying the dividends and 15% in all other cases. The WHT rate on interest is reduced to 10% if the interest is paid to a bank and 15% in all other cases.

15. The WHT rate on dividends is 5% for an investor who holds at least 10% of the shares in the company that pays the dividend; 0% if the investor holds 80% or more of the shares in the company and meets other criteria; 15% in all other cases. The WHT rate on interest is 10% but is reduced to 0% if it is payable to eligible financial institutions.

16. The WHT rate on dividends is reduced to 5% if the beneficial owner is a company holding at least 50% of the voting power in the company paying the dividends and 15% in all other cases.

---

**Tax administration**

**Taxable period**

Tax returns are based on the fiscal year ending 31 March, although other fiscal year-ends are possible if permission is obtained.

**Tax returns**

The system is one of self-assessment, under which the corporation files an income tax return each year. For those not linked to a tax agent, returns must be filed by 7 July for balance dates between 1 October and 31 March, or by the seventh day of the fourth month following a balance date between 1 April and 30 September. The filing date for taxpayers linked to a tax agent is extended to 31 March of the following year.

**Payment of tax**

Terminal tax payment is due on 7 February for balance dates between 31 March and 30 September. For other balance dates, terminal tax payments are generally due on the seventh day of the 11th month following the balance date. The terminal tax due date is extended by two months for taxpayers linked to a tax agent.

Provisional tax payments are generally due in three instalments: (i) 28th day of the seventh month before the balance date, (ii) 28th day of the third month before the balance date, (iii) 28th day of the month following the balance date.

**Calculating provisional tax**

For the 2016/17 income year (i.e. year ending 31 March 2017), provisional taxpayers have the following four options:

- Where the 2015/16 return of income has been filed, 2016/17 provisional tax can be based on 105% of the 2015/16 residual income tax.
- Where the 2015/16 return of income has not been filed, due to an extension of time for filing, 2016/17 provisional tax can be based on 110% of the 2014/15 residual income tax, but only for the first two instalments. The final instalment must be calculated based on the first option above.
- Provisional tax can be based on a fair and reasonable estimate of the 2016/17 residual income tax.
- The GST ratio option.

The GST ratio option enables smaller taxpayers to align their provisional tax payments with their cash flow and reduce their exposure to use of money interest. The option is
intended to benefit those taxpayers with declining, seasonal, or fluctuating income. This option calculates provisional tax by reference to the taxpayer’s GST taxable supplies in the relevant provisional tax instalment period.

Taxpayers can also make voluntary payments. Such payments can be made to minimise exposure to use of money interest. A taxpayer choosing to estimate residual income tax is required to take reasonable care when estimating.

When the taxpayer’s return of income for the year is furnished, the provisional tax paid for that year is credited against the tax assessed. This results in either a refund or further tax to pay by way of terminal tax.

Where provisional tax paid is less than the amount of income tax deemed due on that instalment date, interest is imposed. If provisional tax is overpaid, interest is payable to the taxpayer. Interest is deductible for tax purposes by business taxpayers, and interest earned on overpaid provisional tax is gross income for tax purposes. As of 8 May 2016, the interest rate for unpaid tax is 8.27%, while the rate for overpaid tax is 1.62%.

**Tax pooling**
Taxpayers are able to pool their provisional tax payments with those of other taxpayers through an arrangement with a commercial intermediary. Tax pooling allows underpayments to be offset by overpayments within the same pool and *vice versa*.

**Tax penalties**
An initial late payment penalty of 1% applies if a tax payment is not made on the due date. A further 4% late payment penalty applies if the payment is not made within seven days of the due date. An incremental late payment penalty of 1% is then imposed monthly until payment is made.

Inland Revenue is required to notify a taxpayer the first time their payment is late rather than imposing an immediate late payment penalty. If payment is not made by a certain date, a late payment penalty will be imposed. Taxpayers will be entitled to one notification every two years. After receiving a first warning, Inland Revenue will not send further notifications for two years, and an initial late payment penalty will be imposed in the normal manner.

**Shortfall penalties**
Shortfall penalties, calculated as a percentage of the tax shortfall resulting from the action or position taken by the taxpayer in a tax return, may also apply.

There is a 50% discount on certain penalties where the taxpayer has a past record of ‘good behaviour’ and, in certain circumstances, a cap of NZD 50,000 on shortfall penalties for not taking reasonable care or for taking an unacceptable tax position.

**Tax audit process**
Inland Revenue maintains an active audit programme across all tax types and taxpayer profiles and regularly publishes information about their compliance focus. Often, Inland Revenue audits are preceded by a risk review where Inland Revenue requests information in order to evaluate the risk of non-compliance. Where this review detects an issue that requires further inspection, Inland Revenue will then advise that an audit will be commenced.

**Statute of limitations**
The general rule is that Inland Revenue has four years from the end of the New Zealand income tax year (31 March) in which the return is filed to re-assess the return, unless the return is fraudulent, wilfully misleading, or omits income of a particular nature or source.
**New Zealand**

**Topics of focus for tax authorities**
For multinational corporations, Inland Revenue highlights tax avoidance, transfer pricing, CFCs, and international financing arrangements as key risk areas, in tune with the OECD's current dialogue on the base erosion and profit shifting (BEPS) work. In particular, Inland Revenue is focussing on the following:

- **Transfer pricing:** lack of transfer pricing documentation, major downwards shifts in profitability, widely differing profits between local entities and their global group members, unsustainable levels of royalties or management fees, transactions with low or no tax jurisdictions, and chronically recurring losses.
- **CFCs:** technical compliance, possible New Zealand tax residency of CFCs through local management control or director decision making.
- **BEPS concerns:** taxation of digital goods and services provided over the internet, hybrid mismatches occurring as a result of variances in tax treatment between countries and misuse of tax treaties.
- **GST:** associated party transactions, non-routine transactions, and zero rating of goods or services.
- **Non-residents:** transactions with non-residents and non-resident contractors.

For small-to-medium sized enterprises (SMEs), Inland Revenue is focussing on GST errors, employer deductions, NRCT, and other minor filing errors.

Other key focus areas include the following:

- Aggressive tax planning.
- Central and local government.
- Life insurance providers.
- Trusts.
- Fraud and identity theft.
- Charities.
- The property sector.
- Under-reporting income and operating outside the system.

**Other issues**

**International Financial Reporting Standards (IFRS)**
The relationship between statutory accounting and taxable income is quasi-dependent. The year of final adoption for IFRS was 2007, and the impact on significant areas of tax law is provided in the Other issues section of New Zealand's Corporate tax summary at www.pwc.com/taxsummaries.

**United States Foreign Account Tax Compliance Act (US FATCA)**
The United States introduced FATCA in 2010. The Act comes into effect in stages from 1 July 2014. The rules require global financial institutions to report details of their US customers to the US Internal Revenue Service (IRS). FATCA aims to reduce tax evasion by US citizens who invest outside of the United States and then fail to declare the investments and the income from those investments.

The US Treasury and the New Zealand government have entered into an inter-governmental agreement (IGA) for the implementation of the rules, which came into force on 3 July 2014. Implementing FATCA under the IGA reduces compliance costs for New Zealand financial institutions by simplifying the reporting process and allowing them to report to and make arrangements directly with the New Zealand Inland Revenue rather than the US IRS. It also generally eliminates the prospect of 30% of payments being withheld, which would be a major business risk.

Significant developments
On 10 December 2015, the Congress of Nicaragua amended section 303 of Law 822 - Tax Law - by deferring the entry into force of the transfer pricing rules until 30 June 2017.

Taxes on corporate income
Nicaragua has a territorial income tax system under which only income generated in, or that causes effects in, Nicaragua is generally subject to income tax. The corporate income tax (CIT) is imposed on a corporation's profits, which consist of business/trading income, and passive income. Capital incomes and capital gains are subject to definitive withholding tax (WHT). General business expenses are allowed as a deduction in computing taxable income.

Corporate income tax (CIT) rate
CIT is levied only on domestic-sourced income at a flat rate of the higher of:

- 30% of net taxable income (i.e. gross taxable income less allowed deductions), or
- a definitive minimum tax of 1% on gross income obtained during the fiscal year.

If the company does not have net income, 30% of net income will not be greater than 1% of gross income.

The law establishes the following exceptions to the 1% definitive minimum tax:

- First three fiscal periods of recently incorporated entities. For tax purposes, the beginning of business operations is when a company generates taxable income.
- Taxpayers whose sales prices are controlled by the government.
- Taxpayers that ceased operations on account of force majeure.
- Investments subject to a period of development. The Treasury Ministry must approve such period.

Local income taxes
See Municipal sales and services tax in the Other taxes section.

Corporate residence
Legal entities considered as a tax resident must comply with one of the following criteria:

- Registered according to the Laws of Nicaragua.
- Have their fiscal domicile in the territory of Nicaragua.
- Have their place of management located in the territory of Nicaragua.

The legal forms permitted in Nicaragua to constitute a corporation are stock corporations or limited liability companies, either as subsidiaries or branches.
Permanent establishment (PE)
Law 822 has incorporated a definition of ‘permanent establishment’ into the Nicaraguan income tax regime. This term means a place through which a non-resident taxpayer wholly or partially carries on business, including, *inter alia*, the following: a place of management; a branch; an office or agent; a factory; a workshop; and a mine, an oil or gas well, a quarry, or any other place of extraction of natural resources.

Such definition also includes a building site or construction or installation project or connected supervision activities, but only if its duration exceeds six months; and the performance of consultancy services, provided that they exceed six months within an annual period.

A PE may also be created where a person other than an agent of independent status acts on behalf of a non-resident taxpayer if:

- this person has in Nicaragua authority to habitually conclude contracts or undertake acts in the name of the non-resident taxpayer, or
- even though this person does not have such authority, this person habitually maintains in Nicaragua a warehouse of goods or merchandise from which this person regularly delivers goods or merchandise in the name of the non-resident taxpayer.

These PE rules will not apply to a branch or PE of non-resident taxpayers operating business activities of marine and air transportation of cargo and passengers, as well as land cargo transportation.

Other taxes

Value-added tax (VAT)
The following transactions are subject to VAT when performed within Nicaragua:

- Supplies of goods.
- Supplies of services.
- Importations of goods.
- Exports of goods and services.

VAT is imposed at a 15% rate on the sale of goods, rendering of services, grant of use of assets, and import of goods. Export of goods and services are subject to a 0% rate.

VAT exemptions are available for certain items, including medicine, real estate transfer, sale of used goods, basic food products, credit instruments, tuition, and textbooks and educational supplies.

Taxpayers may recover VAT paid for the purchase of goods and services used to generate other goods and services subject to VAT. This is known as VAT liquidation, which is determined by subtracting VAT credits paid on transactions needed to generate taxable income for VAT purposes from VAT collected on the sales of goods or the rendering of services. Note that VAT paid on transactions to generate non-taxable income for VAT purposes are not allowed as VAT credits.

The exemption with right to deduct input VAT applies when:

- the input VAT is necessary in the business activity process for selling of goods or provision of services, and
- the tax is properly detailed in the invoice of a legal document.

VAT returns must be filed on a monthly basis, with payment due in full on the same day. Taxpayers registered as high taxpayers (with annual income greater than 60 million
Nicaraguan córdobas [NIO]) must present an advanced bi-weekly VAT return in the first five business days after the 15th day of each month and a definite return in the first 15 days of the following month.

**Selective consumption tax**
A selective consumption tax is applied to goods that are considered to be non-essential. The tax base is the cost, insurance, and freight (CIF) price for imported items, and the tax is levied and paid only at that stage (based on the list of products published as an appendix to Law 822).

**Customs duties**
Customs duties relate to the importation of any good within the Nicaragua territory for commercial purposes. The following taxes apply to imports, depending on the product:

- Import Custom Duties (DAI), which are the local tariff liens in the importation of goods agreed to in the Central American Import Tariff.
- Excise Tax (ISC), which is an indirect tax levied on selective consumption of goods (e.g. tobacco cigarettes).
- VAT.

**Temporary Admission for Active Processing (TAP) regime**
Exporters can apply for the TAP regime, which is designed to allow the importation of goods without payment of duties, import taxes, or other taxes, on condition of being transformed (i.e. subject to any subsequent operation) to be re-exported or exonerated.

**Transfer taxes**
Nicaragua’s tax system does not impose transfer taxes.

**Stamp taxes**
Stamp duty is levied on certain types of documents issued in Nicaragua.

**Payroll taxes**
The employer is responsible to withhold and pay employee income tax on a monthly basis through withholding income tax return Form IR-122, according to progressive tax rates.

**Social security contributions**
In principle, social charges apply to nationals and legal residents from the first day of employment on a monthly basis. Social security contributions are calculated upon the gross salary of the employee, as follows:

<table>
<thead>
<tr>
<th>Social security rates (%)</th>
<th>Pension</th>
<th>Family health</th>
<th>Healthcare</th>
<th>War victims</th>
<th>Total</th>
</tr>
</thead>
<tbody>
<tr>
<td>Employer</td>
<td>9.50</td>
<td>6.00</td>
<td>1.50</td>
<td>1.50</td>
<td>18.50</td>
</tr>
<tr>
<td>Employee</td>
<td>4.00</td>
<td>2.25</td>
<td>0</td>
<td>0</td>
<td>6.25</td>
</tr>
</tbody>
</table>

The employer must also pay 2% of its payroll, on a monthly basis, for Training Tax (INATEC).

**Municipal sales and services tax**
A monthly 1% tax is levied on all sales of goods and rendering of services in each of the municipalities of the country.

**Municipal registration tax**
An annual 2% tax is levied by each municipality on the average of income received in the months of October, November, and December of the previous year. In the case of the
Nicaragua

incorporation of a new establishment or enterprise, the municipal registration tax is 1% of the capital invested.

**Real estate municipal tax**
The real estate municipal tax is an annual tax that is levied at a rate of 1% on 80% of cadastral value, as recorded by the government. If the cadastral value is not available, the cost or fiscal appraisal value may be used.

**Branch income**
Branch income received is subject to the general CIT. The repatriation of income from the branch to the head office in the form of dividends, profits, capital gains, or any other form that suggests the income repatriated is an economic benefit is considered taxable.

**Income determination**
Taxable income is determined by the sum of all income derived from Nicaraguan sources, less allowable deductions, which generally include all expenses necessary to generate taxable income. Taxable income is computed according to International Financial Reporting Standards (IFRS) and modified, as required, by Nicaraguan income tax law.

**Inventory valuation**
Last in first out (LIFO), first in first out (FIFO), and the average cost methods are accepted for inventory valuation purposes. Tax authorities must authorise the change of a valuation method.

**Capital gains and losses**
Capital income and capital gains and losses are subject to definitive WHT and are not treated as ordinary taxable corporate income. The general rule is that capital income and capital gains for tax residents are subject to 10% WHT; however, the following exceptions apply:

- Capital gains derived from the sale or transfer of Nicaraguan shares that took place out of the territory of Nicaragua are subject to 5% WHT over the transaction value.
- Capital income derived from the lease of fixed assets and non-fixed assets for tax residents are subject to 7% and 5% WHT, respectively; in the case of tax non-residents, they are subject to 10.5% and 7.5% WHT, respectively.
- Capital gains derived from the transfer of assets subject to annotation in the public registry (e.g. real estate, vehicles) will be subject to a WHT based on the amount of the transaction, as follows:

<table>
<thead>
<tr>
<th>Good value (USD*)</th>
<th>WHT rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>From 0.01 to 50,000.00</td>
<td>1</td>
</tr>
<tr>
<td>From 50,000.01 to 100,000.00</td>
<td>2</td>
</tr>
<tr>
<td>From 100,000.01 to 200,000.00</td>
<td>3</td>
</tr>
<tr>
<td>From 200,000.01 or more</td>
<td>4</td>
</tr>
</tbody>
</table>

* United States dollars

**Dividend income**
Stock dividends paid by Nicaraguan entities to resident shareholders are subject to a 10% definitive WHT (15% in the case of non-resident shareholders).
**Interest income**

Interest received from a Nicaraguan source by residents of Nicaragua, as well as the interest gained by residents from deposits placed in the national financial system, is subject to a 10% WHT (15% in the case of non-residents).

Interest earned on government bonds and securities is considered taxable income subject to a 10% WHT.

The WHT will not apply if the beneficiary of the interest payment is included in the list of exempt International Credit Institutions and Agencies or Foreign Governments Development Institutions, provided in the Ministerial Agreement 24-2014, which requires that the beneficiary should request the Finance and Public Credit Ministry for the corresponding exemption recognition.

**Foreign income**

Business enterprises are subject to CIT only on Nicaraguan-source income.

---

**Deductions**

**Depreciation**

Depreciation must be computed using the straight-line method. Depending on the type of construction and the estimated life of fixed assets, annual rates for depreciation are as follows:

<table>
<thead>
<tr>
<th>Asset</th>
<th>Rate (%)</th>
</tr>
</thead>
<tbody>
<tr>

**Alternative method of depreciation**

Taxpayers under the TAP regime (see Customs duties in the Other taxes section) may, at their convenience, request a different depreciation rate (i.e. accelerated depreciation) from tax authorities. Used fixed assets acquired abroad may also be subject to a different depreciation rate.

**Goodwill**

Goodwill, meaning the excess paid over book value in a transaction, can be deductible for CIT purposes if the capital gain is considered in the seller’s CIT return. However, the tax authorities must authorise the tax periods in which the goodwill will be amortised.

**Start-up expenses**

Start-up expenses are amortised over a three-year period of time after the beginning of business operations.

**Interest expenses**

As a general rule, deduction of interest is allowed when derived from loans of financial institutions; however, the interest paid derived from loans of non-financial institutions will be deductible up to the amount resulting from applying the average lending rate of the national bank at the date of obtaining the loan, if fixed, or at the date of each payment, if variable.

In order for interest paid to a non-resident to be deductible, the corresponding 15% WHT must be withheld and paid.
Nicaragua

**Bad debt**
Corporations are allowed a deduction for receivables as an allowance for doubtful accounts as long as there is supporting documentation of the credit, identification documents of the debtor and creditor, and administrative and judicial collection proof.

**Charitable contributions**
A deduction is allowed, at up to 10% of the corporation's income, for charitable contributions made to the government and its institutions, the Red Cross, and other organisations.

**Compensation**
A deduction of up to 10% of the accumulated profits before this expense is allowed for payments made to employees as bonuses or in addition to their salaries or wages.

**Life insurance**
A deduction is allowed for employee insurance payments made.

**Fines and penalties**
Penalties or charges made by tax, customs, social security, or municipal authorities are not deductible for CIT purposes.

**Taxes**
In principle, income tax expense is not deductible for CIT purposes. Municipal or local taxes (i.e. real estate tax, monthly sales and services tax, annual registration tax) are deductible from CIT.

**Net operating losses**
Losses may be carried forward and deducted from future profits, for up to three years. The carryback of losses is not allowed.

**Payments to foreign affiliates**
Payments made from affiliates to foreign related parties are deductible for CIT purposes, provided the following requirements are met:

- The expenses (i.e. royalties, interest, and services) are needed to generate taxable income.
- The expenses are duly supported (e.g. agreements, invoices, payment receipts).
- The expenses are incurred within the fiscal period.
- The WHT is applied and paid to the tax authorities.

**Group taxation**
Group taxation is permitted only when previously approved by the tax authorities. The economic group must submit a business case to the tax administration justifying the economic reason of their request.

**Transfer pricing**
The Nicaragua tax system recognises transfer pricing as a method of trading. Law 822 regulates transfer pricing rules based on the Organisation for Economic Co-operation and Development (OECD) regulations (including contemporaneous documentation requirements) and will become effective on 30 June 2017.

**Thin capitalisation**
The Nicaragua tax system does not impose any form of thin capitalisation rules.

**Controlled foreign companies (CFCs)**
Nicaragua does not have any CFC rules.
Tax credits and incentives

Foreign tax credit
The Nicaragua tax system does not recognise any form of foreign tax credit.

Tourism incentives
Under present law, and on a case-by-case basis, new companies with tourist activities may request and the government may grant, during the facilities’ construction phase, total exemption of customs duties and partial or total CIT exemption for a maximum period of ten years.

Renewable energy incentives
The renewable energy sector is covered by a special law with tax benefits or exemptions in CIT, VAT, customs duties, and municipal tax.

Free trade zones (FTZs)
The Nicaraguan government amended Decree No. 46-91, and enacted Law 915/2015 - Export Free Trade Zone Law, which provides for several types of export free zones (e.g. for processing, industrial production, logistics and outsourcing services).

Although the new law does not bring major changes with respect to Decree No. 46-91, it has modified the tax exemption period to FTZ users, and, as of the publication of this new law (i.e. 16 October 2015), they will qualify for a ten-year income tax holiday, which can be extended for an additional ten years. Once the full tax exemption expires, qualifying companies will be entitled to a 60% exemption. These incentives are subject to the approval of the National Free Zone Commission.

Qualifying companies are entitled to exemptions from capital tax and stamp duties, indirect and excise taxes, export taxes on locally made products, municipal taxes, and the immovable property transfer tax and capital gains tax on the alienation of immovable property if they are closing their operations in the FTZ and the immovable property will remain there.

Raw materials, machinery, equipment, spare parts, samples, molds, and accessories required for the operation of companies in the FTZs are exempt from import duties.

Withholding taxes

Payments to residents
Dividend payments to resident shareholders (corporations or individuals) are subject to 10% WHT.

Payments of royalties to resident individuals or corporations are subject to 10% WHT.

Interest paid to a resident individual or legal entity is subject to 10% WHT.

Professional services provided by an individual are subject to 10% WHT.

Payments on the local acquisition of goods and services are subject to 2% WHT.

Payments to non-residents
Payments of dividends, interest, royalties, and service fees to non-resident corporations are subject to WHT, as follows:

<table>
<thead>
<tr>
<th>Payment</th>
<th>WHT rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Dividends</td>
<td>15</td>
</tr>
</tbody>
</table>
Nicaragua

<table>

</tr>
</tbody>
</table>

Payments of any kind of income to non-resident individuals are subject to WHT of 15%.

In principle, Nicaragua has not signed any agreement or treaty with any country to avoid double taxation.

Transactions with tax havens
Expenses that are paid by Nicaraguan residents to an individual or entity that is a resident of a tax haven are subject to a 17% WHT. For this purpose, a tax haven may be:

- a foreign territory where the income tax is ‘substantially’ lower than the Nicaraguan income tax
- a foreign country or territory that has been listed, for the corresponding taxable year, as an un-cooperative jurisdiction by the Global Forum on Transparency and Exchange on Information for Tax Purposes, or
- a foreign territory that is listed by the Nicaraguan Public Credit and Finance Ministry.

Tax administration

Taxable period
The standard tax year in Nicaragua is the calendar year (from 1 January to 31 December); however, companies can obtain authorisation from the tax authorities in order to change or have a different year-end: 31 March, 30 June, or 30 September.

Tax returns
Without exception, all corporations are required to file CIT returns for a fiscal year within the following three months after the fiscal year-end.

Payment of tax
Corporations shall pay fiscal-year income tax in monthly advance payments. The monthly payable amount is calculated as 1% of gross income.

Final CIT payment is due with the final CIT return (i.e. within the following three months after the fiscal year-end).

Tax audit process
The tax authority is entitled to conduct a tax audit of the taxpayer when considered necessary. The taxpayer has the obligation to submit before the tax auditor the corporate information and documents related to the generation of income.

Statute of limitations
The statute of limitation in Nicaragua is up to the last four fiscal ended periods.

Topics of focus for tax authorities
In Nicaragua, tax audits are determined randomly; however, high taxpayers or taxpayers who request reimbursement of tax credit are more likely to be audited. For corporate tax compliance, the tax authority normally seeks information in regards to taxpayer operations through the advance income tax returns.
Significant developments

A new list of pioneer industries and products has been approved
The federal government of Nigeria embarked on a review of the pioneer incentive scheme in order to address identified lapses, abuses, and loopholes. Under the scheme, eligible companies are exempted from corporate income tax (CIT) for three years, which may be extended for an additional one or two years. The Ministry of Industry, Trade, and Investment has now released a list of only 44 industries and products that are eligible for the pioneer status. Irrespective of the introduction of the new list, the Federal Executive Council is reviewing the pioneer incentive and has suspended all pending applications for the incentive. It is not clear how long this suspension will last before the regulator is allowed to consider new and pending applications.

Nigeria joins the Organisation for Economic Co-operation and Development (OECD) Convention on Mutual Administrative Assistance in Tax Matters
The Nigerian government ratified the Convention on Mutual Administrative Assistance in Tax Matters, an initiative of the OECD. The Convention is designed to facilitate exchange of information on tax matters between the tax jurisdictions of the signatory countries and is in force from 1 September 2015.

The ratification of the Convention is a significant step in the administration of taxes in Nigeria. This is likely to give the Federal Inland Revenue Service (FIRS) new lines of enquiry about the tax affairs of multinational companies operating in Nigeria. It also means that the FIRS must surrender itself for peer review and must meet a minimum standard of tax administration by global benchmark.

The new OECD base erosion and profit shifting (BEPS) action plans and its impact in Nigeria
The OECD released its final BEPS package containing measures that will significantly change existing international tax rules. The report is the result of a two-year work and extensive consultations with a broad range of stakeholders, including Nigeria, that participated in the OECD Committee on Fiscal Affairs.

It is expected that different countries will begin to take steps to implement the BEPS recommendations through changes to existing legislation. Although Nigeria is not a member of the OECD, the BEPS documents will have an impact on the Transfer Pricing Guidelines as contained in the Nigerian Transfer Pricing Regulations.

A new order has been issued to amend the approved list of taxes and levies
The Schedule to the Taxes and Levies (Approved List for Collection) Act has been amended in an official gazette issued in May 2015 by the Finance Minister. The new Order amends the existing list of taxes and levies to be collected by the three tiers.
Nigeria

of government and seeks to harmonise tax collection between the states and local governments. The changes are effective from 26 May 2015.

**Nigeria is set to ratify double tax treaties (DTTs) with South Korea, Spain, and Sweden**
The tax treaties with South Korea, Spain, and Sweden are still being ratified.

**Stamp duties payable on banking transactions**
The Central Bank of Nigeria has directed all deposit money banks and financial institutions to commence the charging of 50 Nigerian naira (NGN) on all receipts issued as an acknowledgement of banking transactions on electronic transfers and teller deposits of NGN 1,000 and above.

---

**Taxes on corporate income**

Resident companies are liable to CIT on their worldwide income while non-residents are subject to CIT on their Nigeria-source income.

The CIT rate is 30%, assessed on a preceding year basis (i.e. tax is charged on profits for the accounting year ending in the year preceding assessment).

Investment income paid by a Nigerian resident to a non-resident is sourced in Nigeria and subject to withholding tax (WHT) at source, which serves as the final tax.

In respect of business profits, a non-resident company that has a fixed base or a permanent establishment (PE) in Nigeria is taxable on the profits attributable to that fixed base. As such, it is required to register for CIT and file its tax returns. Any WHT deducted at source from its Nigeria-source income is available as offset against the CIT liability.

**Small company rates**

For small companies in the manufacturing industry and wholly export-oriented companies with turnover not exceeding NGN 1 million, the CIT rate is reduced to 20% in the first five calendar years of operation.

**Petroleum profit tax (PPT)**
PPT is a tax on the income of companies engaged in upstream petroleum operations in lieu of CIT.

The PPT rates vary as follows:

- 50% for petroleum operations under production sharing contracts (PSC) with the Nigerian National Petroleum Corporation (NNPC).
- 65.75% for non-PSC operations, including joint ventures (JVs), in the first five years during which the company has not fully amortised all pre-production capitalised expenditure.
- 85% for non-PSC operations after the first five years.

**Tertiary education tax**

Tertiary education tax is imposed on every Nigerian resident company at the rate of 2% of the assessable profit for each year of assessment. The tax is payable within two months of an assessment notice from the FIRS. In practice, many companies pay the tax on a self-assessment basis along with their CIT.

For companies subject to PPT, tertiary education tax is to be treated as an allowable deduction. For other companies, income/profit taxes are not deductible in arriving at
taxable income. Non-resident companies and unincorporated entities are exempt from tertiary education tax.

**Minimum tax**
Minimum tax is payable by companies having no taxable profits for the year or where the tax on profits is below the minimum tax. However, companies in the first four calendar years of business, companies engaged in the agriculture business, or companies that have foreign equity capital of at least 25% are exempt from minimum tax.

Minimum tax payable is calculated as follows:

- Where the turnover of the company is NGN 500,000 or below, minimum tax is the highest of:
  - 0.5% of gross profits
  - 0.5% of net assets
  - 0.25% of paid-up capital, or
  - 0.25% of turnover of the company for the year.

- Where the turnover is higher than NGN 500,000, minimum tax is the highest of the calculations listed above plus 0.125% of turnover in excess of NGN 500,000.

**Alternative tax on distribution**
There is a tax on distribution where a company pays a dividend in excess of its taxable profit. Such a company will be charged tax on the dividend paid as if the dividend is the taxable profit of the company for that year of assessment.

**Enforcement of advance CIT on interim dividends**
The new leadership at the FIRS has commenced the strict enforcement of advance CIT on interim dividends. Companies that declare interim dividends are required by the law to be subject to advance CIT at 30% of the interim dividend paid. The advance CIT is creditable against the final CIT computed at the end of the year.

**Alternative tax on deemed profit**
The law allows the FIRS to assess and charge companies to tax on a fair and reasonable percentage of turnover under the following circumstances:

- When the trade or business produces no assessable profits.
- When the trade or business produces assessable profits that, in the opinion of the Board of the FIRS, are less than might be expected to arise from that trade or business.
- When the true amount of the assessable profits of the company cannot be ascertained.

**Local income taxes**
CIT is payable only to the federal government. State governments collect income taxes of individuals and unincorporated entities, while local governments are only allowed to collect levies and rates but not income tax.

**Corporate residence**
A company is considered resident in Nigeria if such a company is registered or incorporated under the Companies and Allied Matters Act. This means that a company formed outside Nigeria under the laws in force in the foreign territory will be considered as a non-resident company for CIT purposes.

**Permanent establishment (PE)**
Fixed base is not defined but is generally considered to be a location with a degree of permanence. The following would generally not be considered to be a fixed base:
Nigeria

- The use of facilities solely for the purpose of storage or display of goods or merchandise.
- The use of facilities solely for the collection of information.

Other activities that could trigger a tax presence in Nigeria include a dependent agency arrangement, execution of a turnkey project, or artificial arrangements between related parties.

Other taxes

**Value-added tax (VAT)**
The standard VAT rate is 5%. The government has confirmed that this rate will not change in 2016.

Zero-rated items include non-oil exports, goods and services purchased by diplomats, and goods and services purchased for use in humanitarian donor-funded projects.

Exempt items include plants and machinery for use in export processing zones (EPZs) or free trade zones (FTZs), basic food items, medical products and services, pharmaceutical products, books and educational materials, and exported services. Commissions on stock market transactions are also exempted from VAT.

Government agencies and oil and gas companies are required to deduct at source VAT charged by their suppliers and remit it to the tax authority. All other organisations are required to collect VAT charged on their invoices from their customers for filing and payment to the tax authority.

The FIRS recently implemented a platform for auto tracking and remittance of VAT known as FIRS VAT-Collect. Some of the intended users of the system are domestic airlines (for instant remittance of VAT on their ticket sales) and other retailers. The effective compliance date for all domestic airlines to migrate to the VAT platform was September 2015.

**Customs duties**

Customs duties in Nigeria are levied only on imports. Rates vary for different items, typically from 5% to 35%, and are assessed with reference to the prevailing Harmonized Commodity and Coding System (HS code).

**Excise duties**

Excise duty is applicable on beer and stout, wines, spirits, cigarettes, and homogenised tobacco manufactured in or imported into Nigeria at 20%.

**Property taxes**

Property taxes in Nigeria are usually levied annually by the state government with varying rates depending on the state and the location of the property within the state.

The two major property taxes are governor’s consent fee and land registration fee. In Lagos (which is the economic hub of Nigeria), governor’s consent fee, land registration fees, and other levies payable to the state give rise to a total levy of 3% of the fair value of the land.

Also, Right of Occupancy fee and tenement rates are chargeable by state and local government authorities.

**Stamp duties**

Under the Stamp Duty Act, stamp duty is payable on any agreement executed in Nigeria, or relating, whatsoever, to any property situated in or to any matter or thing done in Nigeria. Instruments that are required to be stamped under the Stamp Duties Act must be stamped within 40 days of first execution.
Stamp duty is chargeable either at fixed rates or ad valorem (i.e. in proportion to the value of the consideration), depending on the class of instrument. Stamp duty is imposed at the rate of 0.75% on the authorised share capital at incorporation of a company or on registration of new shares.

All deposit banks and financial institutions are required to charge stamp duties of NGN 50 on every eligible transaction above NGN 1,000. There are exemptions for transactions between accounts held by the same bank customer and for salary accounts.

**Capital gains tax (CGT)**

Gains accruing to a chargeable person (individual or company) on the disposal of chargeable assets shall be subject to tax under the CGT Act at the rate of 10%. There is no distinction between long-term and short-term gains and no inflation adjustment to cost for CGT purposes.

All forms of assets, including options, debts, goodwill, and foreign currency, other than those specifically exempt, are liable for CGT. The gains on the disposal of shares are exempt from CGT.

CGT is applicable on the chargeable gains received or brought into Nigeria in respect of assets situated outside Nigeria.

Capital losses are not allowed as an offset against chargeable gains accruing to a person from the disposal of any assets.

**Information technology levy**

A company with an annual turnover of NGN 100 million or more is required to pay 1% of its profit before CIT as information technology tax. This levy is deductible for CIT purposes when paid (typically in the year of assessment following that in which the payment was made).

This tax is applicable to:

- Banking and other financial activities, including capital and money market operators, mortgage institutions, and micro-finance banks.
- Insurance activities, including brokerage.
- Pension fund administration, pension management, and related services.
- GSM service providers and telecommunication companies.
- Cyber and internet services providers.

**Levy on contracts awarded in the upstream oil and gas sector**

The Nigerian Content Development Act was introduced to increase the level of Nigerian participation in the oil and gas industry. The Act imposes a levy of 1% on every contract awarded in the upstream oil and gas sector of the economy. Any violation of the Act is liable for a fine of 5% of the contract value and may result in outright cancellation of the contract.

**Payroll contribution**

Under the Employee Compensation Act, all employers were required to contribute 1% of their payroll cost in the first two years of commencement of the Act (2010 to 2012). Subsequently, assessments were expected to be issued by the Nigeria Social Insurance Trust Fund, the body empowered to administer and implement the Act. In practice, a contribution of 1% of payroll continues to apply.

**Pension contributions**

Employers with at least 15 employees are required to participate in a contributory pension scheme for their employees. The minimum contribution is 18% of monthly emolument (with a minimum contribution of 10% by the employer and 8% by
Nigeria

the employee). If the employer decides to bear all the contribution, the minimum contribution is 20% of monthly emolument. Mandatory and/or voluntary contributions by the employers are deductible for CIT purposes.

**National Housing Fund (NHF) contributions**

NHF contributions are applicable to Nigerian employees earning a minimum of NGN 3,000 per annum. The employer is required to deduct 2.5% of basic salary from employees earning more than NGN 3,000 per annum and remit it to the Federal Mortgage Bank of Nigeria within one month of deduction.

**Branch income**

Except in rare circumstances, it is illegal for a non-resident company to operate through a branch in Nigeria. The Nigeria-source income of a non-resident company is taxable at the CIT rate of 30% (see the Taxes on corporate income section for more information).

**Income determination**

The following income is subject to CIT in Nigeria:

- Profits accruing in, derived from, brought into, or received in Nigeria in respect of any trade or business.
- Dividends, interest, royalties, discounts, charges, or annuities.
- Rent or any premium arising from the right granted to any person for the use or occupation of any property, where applicable.
- Any source of annual profits or gain not falling within the preceding categories.
- Fees, dues, and allowances (wherever paid) for services rendered.
- Any amount of profits or gains arising from the acquisition or disposal of short-term money instruments like federal government securities, treasury bills, treasury or savings certificates, debenture certificates, and treasury bonds.

**Inventory valuation**

The first in first out (FIFO) valuation method is commonly used. Average and standard cost methods are also allowed, but last in first out (LIFO) is not permitted. Other than the accounting requirement in the local generally accepted accounting principles (GAAP), there are no special statutory provisions for inventory valuation.

**Capital gains**

Capital gains are not subject to CIT, but may be subject to CGT. See Capital gains tax in the Other taxes section for more information.

**Dividend income**

Dividends received by a Nigerian resident company from another Nigerian resident company are taxable at source (see the Withholding taxes section for more information) and not subject to further tax.

Dividends received from non-resident companies are taxable except if repatriated into Nigeria through government approved channels (i.e. any financial institution authorised by the Central Bank of Nigeria to deal in foreign currency transactions).

Dividends received from small manufacturing companies are exempt for CIT purposes during the first five years of operation. Dividends from investments in wholly export-oriented businesses are also exempt.
**Stock dividends**
Stock dividends (bonus shares) are not taxable at source or included in the taxable income of the recipient company.

**Interest income**
Interest payable to a non-resident investor is liable to WHT at 10%, which is the final tax. Recipients who are resident in a country with a DTT with Nigeria enjoy a reduced rate of 7.5%. Interest received by a Nigerian company is liable to tax at the CIT rate of 30% with tax withheld at 10% available as an offset against the final tax liability.

Interest on government bonds is tax exempt. Interest on foreign currency domiciliary accounts is also exempt.

**Other significant items**
The following entities’ income or profit is exempt for CIT purposes:

- Statutory or registered friendly societies.
- Co-operative societies registered under any ecclesiastical, charitable, or education establishments of a public character.
- Profit of a company established within an EPZ or FTZ (see the Tax credits and incentives section).
- Profit of a registered trade union.
- Export profits, as long as proceeds are brought into Nigeria through government approved channels and invested in raw materials, spare parts, and plant and machinery (see Export incentives in the Tax credits and incentives section).

**Foreign income**
A Nigerian resident company is taxable on its worldwide income. On the other hand, a non-resident company is subject to tax only on income derived from Nigeria.

Dividends, interest, rents, and royalties earned abroad and brought into Nigeria through government-approved channels are exempt from Nigerian tax; otherwise, the income is taxable at the CIT rate of 30% and tertiary education tax at 2%. Government-approved channels mean the Central Bank of Nigeria and any bank or financial institution authorised to carry out foreign exchange transactions.

Taxable foreign income earned by a Nigerian tax resident entity cannot be legally deferred.

**Deductions**
Expenses are deductible for CIT purposes if they are wholly, reasonably, exclusively, and necessarily incurred for the business or trade.

**Depreciation**
Capital allowances are calculated on a straight-line basis. Capital allowances claimable in any year are restricted to two-thirds of assessable profits for all companies, except companies in the manufacturing and agricultural sectors, which are excluded from this restriction.

The following are the capital allowance rates on fixed assets (qualifying expenditures):

<table>
<thead>
<tr>
<th>Qualifying expenditure</th>

<td>50</td>
<td>25</td>
</tr>
<tr>
<td>Research and development (R&amp;D)</td>
<td>95</td>
<td>0</td>
</tr>
</tbody>
</table>

Notes

1. 95% initial allowance for plant used in agricultural production; others 50%.
2. 95% initial allowance is granted for motor vehicles used for public transportation if the company has a fleet of at least three buses; all other motor vehicles 50%.

The initial allowance is first deducted, and the balance is written off on a straight-line basis over a fixed period, depending on the rates of annual allowance. There is a requirement that assets not yet disposed of cannot be fully written off in the books. A nominal amount of NGN 10 per asset must be retained in the books till the assets are disposed of. However, where 95% has been claimed as an initial allowance, the 5% balance is the value that must be maintained in the books until the final disposal of the asset.

When assets are sold, the proceeds over the tax written-down value are taxed at 30% to the extent of the allowances already claimed.

**Goodwill**
There is no tax deduction for goodwill.

**Start-up expenses**
Start-up expenses are not specifically stated as non-deductible in the tax law, but, in practice, they are usually not allowed by the tax authority. This is based on the assumption that start-up expenses are not directly attributable to any taxable income of the company, which is a fundamental condition for tax deductibility of expenses.

**Interest expense**
Interest on money borrowed and employed in producing taxable income is a deductible expense. There is currently no thin capitalisation regulation in Nigeria, but general anti-avoidance rules are usually applied to limit deductible interest on related-party loans.

**Bad debt**
Bad debt incurred in the course of trade is deductible.

**Charitable contributions**
Donations are deductible, subject to the provisions of the law.

**Fines and penalties**
Any punitive payments for default or violation of law are expressly not deductible for CIT purposes. In practice, this is usually extended to include default surcharges and other avoidable fines.

**Taxes**
Any tax on income or profit is not deductible except where such tax was paid on profit earned outside Nigeria. In this case, if the source country has no DTT with Nigeria, the foreign tax paid is allowed as a deduction for CIT purposes. State and local taxes (business rates) and levies may be deducted from taxable income.

**Other significant items**
Other deductible expenses include the following:
- Sum payable by way of interest on capital borrowed.
- Rent for the period.
- Expenses incurred in respect of salary and wages.
- Expenses incurred for repair of assets.
- Liability incurred for purpose of trade.
- R&D costs.

**Net operating losses**
Losses can be carried forward indefinitely, except for insurance companies where losses can only be carried forward for four years. Losses made from one line of business cannot be relieved against another line of business. Losses cannot be carried back.

**Payments to foreign affiliates**
Payments considered to be artificial are not deductible for CIT purposes. Royalties, management fees, and technical fees require the approval of the National Office for Technology Acquisition and Promotion (NOTAP) for exchange control purposes and for tax deduction. NOTAP-approved royalties and technical fees are limited to a range of 1% to 5% of net sales, while management fees are limited to a range of 2% to 5% of profit before tax, and consultancy fees are limited to 5% of total project cost. Technical fees are limited to approved man-hour rates.

Trademark fees are disallowed where the trademark owner has more than 75% equity participation in the local company.

**Group taxation**
There are currently no provisions for group taxation, group relief, or group filing of tax returns in Nigeria. Each legal entity within a group is treated as distinct and separate for CIT purposes.

**Transfer pricing**
The transfer pricing regulations are applied in a manner consistent with the arm’s-length principle in Article 9 of the United Nations (UN) and OECD Model Tax Conventions on Income and Capital; and the OECD Transfer Pricing Guidelines for Multi-national Enterprises and Tax Administrations. However, where there are inconsistencies between the model conventions and the local legislation, the provisions of the relevant local tax laws shall prevail.

The rules cover all transactions between ‘connected taxable persons’, which is broadly defined to include individuals, PEs created by head offices, subsidiaries, associates, partnerships, joint ventures, and trusts to the extent that they participate directly or indirectly in the management, control, or capital of another, or both of which have common control, management, or shareholders. Specifically, the rules apply to sale and purchase of goods; lease or sale of tangible assets; licensing, transfer, or use of intangible assets; provision of services; lending or borrowing of money; manufacturing arrangements; and any transaction that may affect profit and loss or any other incidental matter.

The rules are applicable to both domestic and cross-border related-party transactions.

**Thin capitalisation**
Nigeria has no thin capitalisation rules. However, interest charged between related parties is expected to reflect arm’s-length transactions. The tax authority may disallow any related-party interest considered to be excessive.

Note that the tax authorities are currently considering introducing a formal thin capitalisation rule with a likely 3:1 debt-to-equity ratio.
Controlled foreign companies (CFCs)
There are no specific CFC rules in Nigeria.

Tax credits and incentives
Nigeria has various tax incentives intended to encourage investment in key sectors of the economy, as follows.

Tax holidays
Pioneer companies investing in specified industrial activities may, on application, be granted a tax holiday for three years initially, which may be extended for up to two years upon satisfaction of specified conditions. Examples of economic activities that may be granted a tax holiday include glass and glassware manufacturing, manufacturing of fertilisers, and steel manufacturing.

A new company that engages in the mining of solid minerals is exempt from tax for the first three years of its operation.

Rural location incentives
Certain incentives are available to companies located in rural areas. The incentives take the form of tax reductions at graduated rates for enterprises located at least 20 kilometres from available electricity, water, and tarred roads.

Export incentives
Export processing zones (EPZs) and free trade zones (FTZs) are locations within Nigeria designated by the government as free areas where export trade activities can be carried on free of tax and foreign exchange restrictions.

A company that is engaged in an approved manufacturing activity in an EPZ and incurs expenditures in its qualifying building and plant equipment is entitled to 100% capital allowance in that year of assessment.

In addition, a company that is 100% export oriented but located outside an EPZ will enjoy a three year tax holiday, provided the company is not formed by splitting up or reconstruction of an already existing business and the export proceeds form at least 75% of its turnover.

Profits of companies whose supplies are exclusively inputs to the manufacture of products for export are exempt from tax. Such companies are expected to obtain a certificate of purchase of the input from the exporter in order to claim tax exemption.

Where plant and machinery are transferred to a new company, the tax written down value of the asset transferred must not exceed 25% of the total value of plant and machinery in the new company. The company should also repatriate at least 75% of the export earnings to Nigeria and place it in a Nigerian domiciliary account in order to qualify for a tax holiday.

Profits of any Nigerian company in respect of goods exported from Nigeria are exempt from tax, provided that the proceeds from such exports are repatriated to Nigeria and are used exclusively for the purchase of raw materials, plant, equipment, and spare parts.

In order to streamline the administration of permissible taxes within the tax free zones, the Oil and Gas Free Zone Authority (OGFZA) has established the Free Zones Tax Administration (FZTA) Unit with effect from January 2015. Going forward, all tax matters relating to the free zones will be coordinated by the FZTA.
Gas utilisation incentives
Companies engaged in gas utilisation are entitled to:

- A tax-free period for up to five years.
- Accelerated capital allowance after the tax-free period.
- Tax-free dividends during the tax-free period.

Tourism incentives
25% of the income derived from tourism by hotels in convertible currencies is exempt from tax if such income is put in a reserve fund to be utilised within five years for expansion or construction of new hotels and other facilities for tourism development.

Interest incentives
Interest accruing on deposit accounts of a non-resident company is tax-exempt, provided the deposits are made by transfer of funds to Nigeria on or after 1 January 1990 and the depositor does not become non-resident after making the deposit while in Nigeria.

Interest on foreign-currency domiciliary accounts is also tax-exempt.

Interest on any foreign loans, and interest on any loan granted by a bank for the purpose of manufacturing goods for export, is exempt from tax as follows:

<table>
<thead>
<tr>
<th>Repayment period</th>
<th>Moratorium</th>
<th>Exemption (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Over 7 years</td>
<td>Not less than 2 years</td>
<td>100</td>

<td>Not less than 1.5 years</td>
<td>70</td>
</tr>
<tr>
<td>2 to 4 years</td>
<td>Not less than 1 year</td>
<td>40</td>
</tr>
</tbody>
</table>

Interest on any loan granted by a bank to a company engaged in agricultural trade, fabrication of local plant and machinery, or as working capital to any cottage industry is 100% tax free if the loan has a moratorium of not less than 18 months and the rate of interest is not more than the base lending rate.

Investment allowances
An investment allowance of 10% on the cost of qualifying expenditures in respect of plant and machinery is available as a deduction from assessable profits in the year of purchase. There is no restriction to the full claim of capital allowance in any year of assessment for companies in the mining, manufacturing, and agricultural sectors.

Foreign tax credit
Nigeria does not grant automatic tax credits to Nigerian companies for foreign tax on income derived from other countries. The Nigerian tax laws already provides for tax exemption for dividends, interest, and royalties.

Foreign tax credits are only granted based on the provisions of existing DTTs and partial credits as applicable to Commonwealth countries. In this regard, full tax credits are usually provided for in the DTTs. Tax credits for members of Commonwealth countries are granted at up to half the Nigerian CIT rate.

Withholding taxes
WHT is applicable on specified transactions as indicated below. There is no distinction between the WHT rates for resident companies or individuals and non-resident companies or individuals.

</tr>
</tbody>
</table>

The period for filing WHT is 21 days after the duty to deduct arose for deductions from companies.

The penalty for failure to deduct or remit tax is 10% of the amount not deducted/remitted.

Note that companies are required to submit, in electronic form, a schedule of all their suppliers for the month showing the tax identification number (TIN), address of the suppliers, the nature of the transaction, WHT deducted, and invoice number.

Double tax treaties (DTTs)

Nigeria has DTTs with the countries listed in the table below. Nigeria also has tax treaties with Kenya, Mauritius, and Poland; however, these treaties have not been ratified by the Nigerian National Assembly. The tax treaties with South Korea, Spain, and Sweden are still being ratified.

* The tax treaties with South Korea, Spain, and Sweden are still being ratified.
**Tax administration**

**Taxable period**
The taxable period is the fiscal year, which runs from 1 January to 31 December.

**Tax returns**
Companies are required to register for tax and file their audited accounts and tax computations with the FIRS within six months of their financial year end on a self-assessment basis or 18 months after incorporation (whichever comes first). A company may file an application for extension of filing tax returns for up to two months at the discretion of the FIRS.

Upon registration, a company is issued a TIN, which serves as the company’s file number for all federal taxes and future correspondence with the FIRS.

The company must file the following documents with the tax authority on an annual basis:

- Tax computation for the relevant year of assessment.
- The audited financial statements for the respective period; this should be in conformity with the International Financial Reporting Standards (IFRS).
- A duly completed and signed self-assessment form for CIT.
- Evidence of remittance of the income tax liability (partly or in full).

PPT is payable on an actual year basis. Estimated tax returns must be filed within two months of the fiscal year. Actual tax returns should be filed within five months after the end of the accounting period, that is, not later than 31 May.

**Assessment**
Nigerian companies file their tax returns based on a self-assessment system where the taxpayer prepares its annual returns and determines its tax liability. However, the FIRS may apply a best of judgment (BOJ) assessment where it is of the opinion that the tax returns filed are deliberately misstated or where no returns are filed within the stipulated period.

**Payment of tax**

**CIT**
A company that files its self-assessment within six months after the accounting year-end can apply to the FIRS in writing to pay its income tax in instalments. The maximum number of instalments the FIRS may approve is three. Evidence of the first instalment has to accompany the tax returns filed in order to qualify for the instalment payment. However, all payments have to be made not later than eight months after the financial year-end.

Assessments are made on a preceding year basis. This means that the financial statements for a period ended in 2015 will form the basis for the 2016 year of assessment.

**PPT**
Payments with respect to PPT in any accounting period of 12 months are made in 12 instalments, with a final 13th instalment (if there is an underpayment). The first instalment for the year is due by the end of March.

**Penalty for non-compliance**
Failure to file CIT returns attracts a penalty of NGN 25,000 for the first month and NGN 5,000 for each subsequent month of default. Late payment of CIT attracts a 10% penalty and interest at the commercial rate.
Late submission of PPT returns attracts an initial penalty of NGN 10,000 and NGN 2,000 for each day such failure continues, while late payment of tax attracts a penalty of 5% of the tax not paid.

**Tax audit process**
Generally, the tax authority will commence a desk examination of a taxpayer’s returns immediately after filing. This may be followed by a tax monitoring exercise whereby tax officers visit taxpayers to conduct an interview and on-site high level review of their tax affairs.

Random or specific tax audit may be carried out usually within six years of filing tax returns. In unusual cases, a back-duty tax investigation may be conducted for more than six years, especially where a tax fraud or wilful default is suspected.

In the past, tax audits took a long time to conclude, usually between three to five years. However, the tax authorities are seeking ways to improve the average turnaround time.

**New methodology for tax audit**
FIRS has now implemented an audit methodology that contains a dashboard for monitoring the progress of tax audits. Altogether there is a timescale of three months from commencement of audit to completion broken into one or two weeks for different activities (field work, initial report, reconciliation meetings, assessment). Colour green, amber, or red are used to indicate if everything is ‘on time’, ‘becoming due’, or ‘overdue’ respectively.

**Statute of limitations**
The tax authority may carry out a tax audit and issue an additional assessment within six years from the relevant tax year. However, the limitation does not apply in the event of a fraud, wilful default, or neglect by the company.

**Topics of focus for tax authorities**
The tax authorities are currently exploring ways to generate more tax revenue. As a result, certain areas of taxation, such as transfer pricing, filing of tax returns by PEs, and review of tax incentives and waivers have become a central focus for tax authorities.

There has been increased scrutiny by the FIRS on related-party transactions as a way of preventing taxpayers from shifting profits away from Nigeria. It is expected that transfer pricing audits are expected to be an area of focus in the next one to two years.

Further, for non-resident entities that create a PE in Nigeria, the tax authorities are focused on ensuring that they file full tax returns, including audited accounts as opposed to filing on a deemed-profit basis. It is expected that the expenses of these PEs will be scrutinised for tax deductibility.

The tax authorities at the federal and state levels are sealing up companies, putting up non-compliance stickers, and holding principal officers of organisations to public scrutiny and prosecution under the tax law for non-compliance in terms of tax default or failure to make timely payments or to file tax returns. On a related note, the Lagos state government has set-up a rapid tax prosecution unit to prosecute tax evaders with considerations to a jail term.
Significant developments

National Budget for 2016: Tax changes

The National Budget for 2016 included several changes in the Norwegian tax legislation. The main changes are the following:

- The tax rate is reduced from 27% to 25% as of the income year 2016 and applies to both individuals and enterprises. The special tax rate for petroleum companies and the resource rent tax for hydro power companies have been increased by two percentage points so that the marginal tax rates of 78% and 58%, respectively, are maintained.
- The rules for limitation of tax deductible internal interest expense have been tightened as of the income year 2016. The limit for tax deductible interest expense is reduced to 25% of the taxable earnings before interest, taxes, depreciation, and amortisation (EBITDA).
- The research and development (R&D) tax credit scheme (SkatteFunn) has been strengthened. The upper limit for annual deductible costs under the R&D scheme has been increased to 20 million Norwegian kroner (NOK) for self-developed R&D and NOK 40 million for R&D purchased from approved institutions.

The government’s follow-up of the proposed tax reform

In 2013, the government appointed a committee to propose changes in the Norwegian tax system (the Scheel Committee). On 7 October 2015, the government’s follow up of the Scheel Committee’s proposal for a Norwegian tax reform was published. The government states that, inter alia, the following amendments in tax law will be assessed in more detail:

- Reducing the corporate income tax (CIT) rate to 22% by the end of the income year 2018.
- Further tightening the intercompany interest limitation rules.
- Introduction of withholding tax (WHT) on royalties, interest, and certain rent payments.
- Amendments of the conditions for Norwegian corporate tax residence.

New tax rules for investments in security funds and taxation of security funds

New rules on taxation of security funds and income from such funds applies as of 2016. Under the former rules, investments in security funds owning at least one share were regarded as share investments regardless of the composition of securities in the fund. The new rules aim at taking into account the composition of the securities in the funds.

The amount of the distribution, which is to be considered as interest, should be calculated according to a set pattern based on the share of the interest bonds in the fund. The unitholders are taxed as follows:

- Distributions from security funds owning more than 80% shares are taxed as dividends.
• Distributions from security funds owning less than 20% shares are taxed as interest income.
• Distributions from security funds with a share interest between 20% and 80% will be split between dividend and interest income calculated on a pro rata basis based on the share interest in the fund.

The distribution will be tax deductible for the fund to the extent that it is regarded as an interest payment to the investor.

The taxation of the investor’s gain or loss upon realisation of investments in security funds is based on the composition of securities in the year of investment and realisation in the fund.

New Tax Administration Act
In December 2015, the government proposed a new Tax Administration Act. The goal is to unite the tax administration rules in one law and to secure an effective and good tax administration. There are some proposed changes to the rules. Amongst others, a five-year general time limit for reassessing tax assessments is proposed. The final date for implementation is planned to be 1 January 2017.

Taxes on corporate income
A Norwegian resident company is, as a starting point, subject to CIT on its worldwide income. Non-resident companies are, as a starting point, liable for CIT in Norway when engaged in a business that is either conducted in or managed from Norway.

CIT is assessed at a rate of 25%.

As a general rule, income is taxable when the right to receive it arises and costs are deductible when the liability to cover the costs arises. The actual payment is generally not relevant.

Petroleum tax regime
All upstream petroleum activity on the Norwegian Continental Shelf (NCS) is taxable to Norway.

Taxation is based on net income at a marginal tax rate of 78%, which is comprised of the ordinary 25% CIT rate and a 53% special tax. All income is subject to 25% CIT, while only income from offshore production and pipeline transportation of petroleum from the NCS (offshore tax regime) is subject to the additional 53% special tax. The ordinary and special tax rate was changed in 2016 (from 27% and 51%). Although the total tax rate remains the same, the changes result in that uplift has an increased value due to a deduction of 53% for uplift (see below).

All upstream activity on the NCS must be consolidated within the company. There is no ring fence per oil field, and tax consolidation against other activity is limited. Crude oil sales from most of the fields are taxed at a predetermined market price set by an official board (i.e. the norm price). In theory, a norm price may be imposed on gas sales, but this has not been implemented. Instead, an extensive reporting requirement was implemented in October 2012. Investments in installations for the exploitation and production of petroleum, as well as investments in pipelines, are depreciated linearly over six years.

An investment-based ‘supplementary depreciation’ (uplift) of 22% (5.5% per year for four years) is granted on investments in installations for the exploitation and production of petroleum, as well as investments in pipelines. The rate of uplift was reduced from 7.5% to 5.5% for investments made on or after 5 May 2013. However, according to special
transitional rules, the 7.5% rate may still apply in some cases. The uplift is deducted against the special tax base. Losses and unused uplift may be carried forward indefinitely with an annual interest. Both depreciation and uplift may be claimed from the year of the investment, regardless of whether title has passed or the asset has been taken into use. If the upstream activity on the NCS ceases, the tax value of losses carried forward and unused uplift may either be sold or compensated by the Norwegian state. Exploration costs are tax deductible as incurred. If a loss is created due to exploration costs, the taxpayer may claim that the tax value of such a loss is repaid in the year following the income year in which the loss was created.

Special rules apply as to the deductibility of net interest costs in the special tax basis (53%).

A special regime ensures that transfer of licences on NCS is tax exempt; there is no step up in the tax basis.

Note that income taxed under the special tax is exempted from dividend WHT.

The Oil Taxation Office has a high focus on transfer pricing.

**Hydro power tax regime**

The hydro power tax regime is applicable for the taxation of income derived from the production, sales, transfer, or distribution of hydro power.

Taxation is based on net income at a marginal tax rate of 58%, which is comprised of the ordinary 25% CIT rate and a 33% resource rent tax. All income is subject to 25% CIT, while only income from hydro power production is subject to the additional 33% resource rent tax.

The resource rent is calculated per hydro power plant. The gross income is, with some exceptions, calculated based on spot market price per hour multiplied by actual production. In addition, actual income from green certificates is included in the gross income. Deductible costs will be the same as for CIT; that is, expenses related to the power plant except for interest expenses, which are not deductible. Uplift is granted. Special rules apply to the depreciation of investments in hydro power plants. Rent expenditure and depreciation related to waterfalls are not deductible, and waterfalls are not included in the basis for uplift. Tax consolidation is mandatory within the company and, provided the conditions for group taxation are fulfilled, available on a group level. Losses (negative resource rent) on a company (eventually on a group) level will be compensated by the Norwegian state.

**Shipping tonnage tax regime**

The tonnage tax rules in Norway are in line with those found in other European Union (EU)/European Economic Area (EEA) countries and imply that shipping income will be tax-exempt on a permanent basis.

Norwegian tonnage-taxed companies are allowed to keep only certain kinds of assets inside the tonnage regime (legal assets) and are not allowed to have income from non-tonnage-taxed activities except financial income. If the requirements are not fulfilled, the company will fall outside the scope of the model and be taxed at the ordinary rate (25%).

**Qualifying assets**

A tonnage-taxed company must own at least one qualifying asset (i.e. a vessel, for example bulk tankers, container vessels, car carriers, tugboats, and entrepreneurial vessels and auxiliary vessels for use in the petroleum industry), new building contracts, a 3% share in another tonnage-taxed limited company, or a 3% ownership interest in a partnership or controlled foreign company (CFC).
Qualifying and legal business activities/income
Qualifying business income is income from the operation of the company’s own and chartered vessels. A tonnage-taxed company may, for example, charter vessels in and out on bareboat and time charter terms without limitations. Furthermore, gains upon disposal of vessels and new building contracts are exempt from taxation.

Income from related activities, such as the sale of goods and services onboard vessels, loading and discharging vessels, or leasing out containers and operations of ticket offices, is also exempt from taxation. The exemption also applies to income from the strategic and commercial management of the company’s owned and chartered vessels, as well as vessels owned or operated by group companies (more than 50% joint ownership), and vessels operated according to a pool agreement. Pure management companies are not included (i.e. all companies must have at least one qualifying asset).

Financial income is permitted, except for income from shares in unlisted companies and ownership interests in partnerships that are not taxed under the tonnage tax system. The condition is that financial activities do not constitute a separate business. Net financial income is subject to ordinary taxation (25%). Currency gains and losses are partly taxable/deductible, and interest costs are partly deductible, depending on the proportion between the company’s finance capital and total book capital.

Entrance into the tonnage tax system
Entry into the tonnage tax system is optional and may take place with effect from 1 January every year, provided that the company has fulfilled the conditions for the application into the tonnage tax system from the beginning of the year. Newly established companies will have direct entry and may enter into the tonnage tax system from the date of incorporation. All qualifying companies within the same group are obligated to make the same election (tonnage taxation or ordinary taxation).

Companies that enter into the tonnage tax system are subject to a formal ten-year lock-in period. If a company exits the tonnage tax system before the lock-in period expires, it will be excluded from the tonnage tax system until after the initial lock-in period has ended.

Upon entry into the tonnage tax system, the difference between market value and tax value of the company’s assets (including vessels, new building contracts, ownership interests in partnerships, and shares in CFCs/tax exempt assets) is taxed as a capital gain (25%) that can be transferred to the gain and loss account. 20% of the balance will be entered as income each year (balance method). There is continuity for financial assets and assets covered by the tax-exemption rules (qualifying shares and derivatives).

Exit from the tonnage tax system
A shipping company may exit the regime on a voluntary basis or may be obligated to do so after breaching specific company requirements within the tonnage tax system. There should be no exit charge when leaving the regime, and the tax value on the company’s assets will be adjusted to market value at the time of exit. However, a company that has untaxed gains calculated upon entry into the tonnage tax system could have a tax liability upon exit.

Local income taxes
There is no county or municipal CIT in Norway.

Corporate residence
Companies that are registered and incorporated in Norway in accordance with Norwegian company law are, as a general rule, regarded as tax resident in Norway and taxable for their worldwide income. If effective management at the board/director level is carried out outside Norway, residency in Norway for tax purposes may cease, and the
company may be subject to exit taxation. Note that several factors should be considered in order to determine whether tax residency has moved (e.g. other management functions and the overall connection to Norway).

Based on the proposal from the Scheel Committee, the government will assess in more detail if amendments of the conditions for Norwegian corporate tax residence should be introduced in the Tax Act, making all companies registered and incorporated in Norway tax resident in Norway.

Foreign corporations will be regarded as tax resident in Norway if the place of effective management is in Norway. The place of effective management will be deemed to be in Norway if, for example, the board of directors makes its decisions in Norway.

**Permanent establishment (PE)**

According to Norwegian domestic law, a foreign company is liable to tax in Norway when engaged in a business that is either conducted in or managed from Norway. The tax liability is limited to income that is derived from Norwegian sources. As a general rule, non-residents without a PE are not liable for tax on capital gains when selling Norwegian financial instruments. However, if the financial instrument is connected to a business that is conducted in or managed from Norway, the sale of the financial instrument can trigger taxation in Norway.

The legislation does not contain a reference to the treaty concepts of 'permanent establishment' or 'permanent representative'. The threshold for tax liability is normally lower under legislation than the taxing right afforded to source states under double tax treaties (DTTs).

With respect to DTTs, the Norwegian tax authorities will, to a large extent, follow the Organisation for Economic Co-operation and Development (OECD) Commentaries when interpreting the relevant DTT, if the wording is similar to the OECD Model Tax Convention.

**Other taxes**

**Value-added tax (VAT)**

The general VAT rate is 25% and applies to all supplies of goods and services not qualifying for another rate or an exemption. A reduced rate of 15% applies to supply of food and beverages, excluding tobacco, alcohol, medication, and water from waterworks. The reduced rate is not applicable to the supply of food and beverages consumed in restaurants and other food establishments.

A reduced rate of 10% applies to the television licence fee charged for broadcasting services provided by the Norwegian Broadcasting Company (NRK), domestic passenger transport services and procurement of such services, domestic ferry services related to transport of vehicles, accommodation services, cinema tickets, museum and gallery tickets, amusement park tickets, and sports events.

Exemptions with credit (zero-rated) include, but are not limited to, the following (please note that there might be specific conditions for the exemptions to apply):

- Export of goods and services.
- Goods and services for Norwegian offshore and non-resident ships.
- Transfer of a going concern.
- Supply of newspapers (including e-newspapers) and books (does not include e-books, which are subject to the 25% VAT rate).
- Sale of vessels and aircraft for use in taxable activity.
Exemptions without credit include, but are not limited to, the following (please note that there might be specific conditions for the exemptions to apply):

- Supply of works of art owned by the artist.
- Health services.
- Social services.
- Financial services, including banking, insurance, and the sale of shares. Please note that the Scheel Committee and the Norwegian government have proposed to subject financial services rendered for compensation, such as fees, to VAT from 2017.
- Educational services.
- Sale and lease of real estate (accommodation and lease of parking lots are taxable).
- Services supplied by cultural and entertainment institutions.

Exemptions, whereby an option to tax is available, include the letting of immovable property to VAT liable lessees following a specific VAT registration with the VAT authorities. Please note that an ordinary VAT registered business is not required to specifically register for letting of property.

The registration threshold is met when supplies subject to VAT in coherence with the Norwegian VAT legislation (including self-supplies) exceed NOK 50,000 during a 12-month period. For charitable and public utility institutions and organisations, the threshold is set at NOK 140,000.

**Customs duties**
There are quite extensive customs duties on agricultural products, which must be paid upon importation. However, it is often possible to avoid customs duties on these products partly or completely by applying for an exemption from the agricultural authorities in advance. Some of these exemptions are subject to tariff quotas.

Clothes and some other textile products are also subject to customs duties upon importation to Norway, but imports comprised by free trade agreements (such as the EEA with the EU) and the General System of Preferences (for developing countries) are exempt. As a result, clothes will, as a general rule, not be subject to customs duties as long as the importer presents the necessary certificates of origin.

There are no customs duties on other products than agricultural products, clothes, and textile products.

**Excise taxes**
Excise taxes are calculated on import and domestic production of the following:

- Petroleum products, including gas.
- Alcoholic beverages.
- Non-alcoholic beverages.
- Ethanol for technical purposes.
- Tobacco.
- Chocolate, candy, sugar, etc.
- Products containing the chemicals TRI/PER.
- Products containing the propellant gases HFK/PFK.

There are also excise taxes related to the following:

- Registration of vehicles.
- Use of vehicles (annual tax).
- Emissions of NOx.
- Sale of electricity.
Property taxes
Real estate may, under certain conditions, be subject to property tax. It is up to the different municipalities to choose whether it wants to impose property tax on real estate. Not all municipalities impose property tax on real estate. The applicable rate varies between 0.2% and 0.7%, which is decided by the municipality. The tax base will normally be the estimated market value (with some adjustments).

Hydro power producers must pay property tax on the hydro power plant’s capitalised value using a capital interest rate of 4.5%. However, the basis for the calculation of the property tax should fall in the range of NOK 0.95 to NOK 2.74 per kWh of the power plant average production for the last seven years. For hydro power plants with nominal capacity less than 10,000 kVA, the property tax base will be the same as the tax value for income tax purposes.

Stamp taxes
A tax is levied on the registration of a change of ownership of real estate. The tax is calculated at 2.5% of the fair market value.

Net wealth taxes
There is no net wealth tax or other capital taxes for limited liability companies, investment funds, state-owned enterprises (according to the State-owned Enterprise Act), inter-municipal companies, and companies in which somebody owns a part in or receives income from, when the responsibility for the companies' liabilities is limited to the companies' capital.

Some institutional holders (e.g. mutual insurance companies, savings banks, cooperatives, taxable pension funds, self-owned finance institutions, mortgage credit associations) pay 0.15% (state) net wealth tax. The maximum net wealth tax rate for a corporate body is 0.85% (state and municipal tax figures for fiscal year [FY] 2016).

Shares in limited liability companies and equity funds are valued at 100% of quoted value for net wealth tax purposes as of 1 January of the year after the relevant income year. If quoted both on the Norwegian and a foreign stock exchange, the Norwegian stock exchange value will be applicable. If not quoted, the basis for taxation is, as a rule, the company's net taxable value for wealth tax purposes as per 1 January of the income year in question. The basis for taxation of non-quoted shares in foreign companies is, as a starting point, the assumed market value of the shares as per 1 January of the assessment year.

National insurance contributions
Employers are subject to pay employers' national insurance contributions on the employees' gross salary. The employers' contribution rate varies between 0% and 14.1% based on the municipality of the head office of the business. The contribution shall be reported and paid on a bimonthly basis.

Exit tax
The exit rules levy taxes upon the migration of assets or liabilities. The tax is calculated by reference to the accrued but unrealised gains at the time of migration at a rate of 25%. Exit tax is also levied if Norwegian CFC taxation lapses because the control requirement is no longer met or if:

• a Norwegian tax resident company transfers its tax residency (effective management) to another country
• a Norwegian tax resident company has assets or liabilities that are transferred to a PE that is tax exempt pursuant to a DTT, or
• a foreign company has assets or liabilities that are transferred from a Norwegian PE to the head office or a foreign PE of the same company.
Transfer of assets or liabilities from a PE of a Norwegian company to another PE in a country where the DTT in question is based on the credit method is, however, not regarded as a taxable event.

According to the rules, the tax treatment is different depending on the type of assets being transferred. Business-related operational equipment and financial assets being transferred out of Norwegian taxing jurisdiction are considered as taxable events, but the tax charge may be deferred if certain conditions are met. The main conditions are that the taxpayer is resident within the EEA/EU and has provided a guarantee for the deferred tax and interest charge. The transfer of intangible assets and inventory trigger immediate and unconditional exit taxation.

*De minimis* exception rules apply when determining whether the exit tax may be levied. Exit tax on the transfer of tangible assets is applicable only if the unrealised capital gains exceed NOK 5 million. Exit tax on the transfer of other assets and liabilities is only applicable if the unrealised capital gains exceed NOK 1 million.

Exit taxation at both the corporate and shareholder level will also be triggered when companies transfer tax residency (effective management) to another state.

**Carbon dioxide (CO₂) tax**
A CO₂ tax is calculated on petroleum that is flared and on natural gas emitted into the air, as well as on CO₂ that is separated from petroleum and emitted into the air, and on installations used for production or transportation of petroleum. The CO₂ tax is regarded as a normal operating cost for CIT purposes and is a fully deductible cost both for corporate and special tax calculations.

**Natural resource tax**
A NOK 0.013 per kWh natural resource tax applies to hydro power activities, based on one-seventh of the produced kWh for the income year in question and the six previous years. The natural resource tax is creditable against the standard CIT.
**Branch income**

Branch income is taxed at the corporate rate of 25% (the same as Norwegian companies). The basis for taxation is gross income less deductible costs. Both direct and indirect costs related to the activities carried out in Norway may be deductible.

There is no branch profit tax or other repatriation taxes. However, if assets and/or liabilities are transferred from a PE in Norway to the head office or another foreign PE of the same company, this may trigger exit taxation. The transfer of assets to another corporate entity is subject to regular taxation.

**Income determination**

**Inventory valuation**

Inventory is valued at cost. Cost is normally determined using the first in first out (FIFO) method. The last in first out (LIFO) method is not acceptable for tax purposes. Conformity between book and tax reporting is not required.

**Capital gains**

Capital gains realised in the course of a business activity are almost always regarded as taxable income. Gains resulting from real estate transactions are taxed, regardless of whether they are incurred in connection with business activity. Losses may be offset against the taxpayer’s other income.

Capital gains realised on both business-related and non-business-related securities are, in principle, taxable. In general, any capital gains realised on bonds at maturity are regarded as taxable income. Correspondingly, realised losses will be eligible for deductions.

**Tax-exemption rules for corporate shareholders**

Under the tax-exemption rules, corporate shareholders are generally exempt from tax on dividends received and capital gains on qualifying shares and on derivatives where the underlying object is qualifying shares. Correspondingly, losses on shares are, in general, non-deductible. All operational expenses related to exempt income from shares are fully tax deductible. In order to limit the benefit of these deductions, the tax-exemption method is, with some exemptions, limited to 97% for received dividends, and the remaining 3% is taxable for Norwegian corporate shareholders (at a 0.75% effective tax rate). The 3% taxable income is calculated on dividends. Dividend distributions within a tax group (where the ultimate parent company directly or indirectly owns more than 90% of the shares and voting rights) are fully tax exempt. In addition, the tax-exemption method also applies for certain distributions from partnerships and, under certain conditions, to foreign-resident companies with taxable activity in Norway (3% of the income taxable at 25%). However, distributions on hybrid instruments will not be tax exempt if the distribution is deductible for the distributing company.

Note that an investment in a company resident in a low-tax country in the EEA has to fulfill certain substance requirements to qualify for the tax-exemption rules. These requirements are intended to be in line with the substance requirements of the European Court of Justice’s (ECJ’s) decision in the Cadbury Schweppes case. A country is considered a low-tax country if the level of effective taxation is less than two-thirds of the tax that would have been due had the foreign company been resident in Norway. This is the same test used for the CFC regime (see the Group taxation section for more information). The Directorate of Taxes has published a non-exhaustive list of low-tax jurisdictions (black list) and non-low-tax jurisdictions (white list).

However, for investments outside the EEA, the tax exemption rules apply only if a shareholder owns 10% or more of the share capital and the voting rights of the foreign...
company for a consecutive period of two or more years. To be able to deduct losses on the realisation of shareholdings outside the EEA, the shareholder and/or a related party may not own 10% or more of the share capital and the voting rights of the foreign company in a two-year period prior to the realisation. For dividends, the holding period of two years does not have to be met when dividends are distributed, but can also be met after the dividend date.

Shareholdings in low-tax countries outside of the EEA do not qualify for the tax-exemption rules.

Acquisition and sales related costs (e.g. broker fees) must be added to the cost price of the shares for tax purposes. Costs incurred to manage acquired tax-exempt shares are, however, tax deductible.

Norway's internal tax rules do not allow taxation of a non-resident's capital gain on the disposal of financial instruments, including shares in Norwegian companies, unless the non-resident has a PE to which the financial instrument may be allocated.

**Stock dividends**

Stock dividends (bonus shares) are not taxable on receipt, provided that the dividends have been distributed in accordance with the Limited Liability Company Acts and distributed in proportion with the ownership level of the shares.

**Tax treatment of investments in security funds**

As of 2016, new rules for taxation of investments in security funds apply. Formerly, the taxation of the unitholders depended on whether the fund was regarded as a mutual fund or a bond fund.

As of 2016, investments in security funds are taxed according to the same rules. The taxation of the investment in security funds will be determined by the share ratio in the fund. Distributions from security funds with a share interest between 20% and 80% will be split between dividend and interest income calculated on a *pro rata* basis based on the share interest in the fund. Furthermore, distributions from funds with more than 80% shares will only be taxed as dividends, and funds with less than 20% shares will only be taxed as interest.

**Interest income**

In general, interest income is taxable on an accrual basis.

**Foreign income**

A Norwegian resident company is subject to CIT on its worldwide income. Double taxation of foreign-source income, including foreign-branch income and CFC income, is mitigated either through tax treaties or domestic tax provisions. A deduction for foreign tax may either be claimed as an expense or as a credit against Norwegian tax payable on that income. In most circumstances, foreign dividends are exempt according to the tax-exemption rules. As a consequence, foreign WHT may not be credited and constitute a real cost for the companies concerned.

Norway does not have any legislation for the deferral of tax on foreign income.

**Deductions**

**Depreciation**

In Norway, the declining-balance method of depreciation is mandatory for capitalised assets. The depreciation rates given below are the maximum rates.
There is a duty to capitalise an asset that has a value of NOK 15,000 or higher and has an economic life of at least three years.

<table>
<thead>
<tr>
<th>Asset</th>
<th>Depreciation rate (%)</th>
</tr>
</thead>

<td>2</td>
</tr>
<tr>
<td>Fixed technical installations in buildings, including heating plant, cooling and freezing plant, electrical installation, sanitary installation, elevator, etc.</td>
<td>10</td>
</tr>
</tbody>
</table>

Notes

1. An increased depreciation rate of 30% applies to machines, etc. for the first year of the investment.
2. Auxiliary and supplementary installations in industrial plants will be depreciated together with the building and constructions group (10% depreciation if expected operating time is less than 20 years). In addition, constructions for transfer and distribution of energy, and electronic equipment, used in other business activities than power generation will be depreciated at 5%.
3. The applicable rate is 10% if, from the date of its erection, the structure has an economic life of 20 years or less.

New Norwegian tax regulations for accelerated depreciation of wind power plants have been adopted with effect for investments made after 1 January 2015, provided that the European Free Trade Association (EFTA) Surveillance Authority (ESA) clarifies that the rules are in compliance with EU/EEA state aid rules. According to the new rules, the main assets in wind power plants acquired between 1 January 2015 and 31 December 2020 can be depreciated on a linear basis over five years.

Special depreciation rules apply to assets moved in and out of Norwegian jurisdiction to and from companies resident outside the EEA.

**Goodwill**

Acquired goodwill may be amortised according to the declining-balance method at a maximum of 20% per annum. The tax authorities have, however, on several occasions recently questioned the allocation to goodwill and claimed that a part of the purchase price should be allocated to intellectual property, concessions, etc. (which may not be depreciated unless it is of a time-limited nature). Other intangibles are amortisable on the condition that they are subject to an evident loss in value (impairment test) or if they are time-limited.

**Start-up expenses**

In general, start-up expenses are deductible, provided that the costs are borne by the company. Start-up costs could include costs related to registration in the Register of Business Enterprises, lawyers and accountants fees, drafting articles of association and shareholders agreement, etc.

**Interest expenses**

In general, interest expenses are deductible. Norway does not have a rule distinguishing between different income categories (as in the United Kingdom). If income is exempt from taxation in Norway pursuant to a tax treaty, corresponding costs or losses are not tax deductible.
Norway

Limitations on tax deductible inter-company interest expenses apply. Please see the detailed description under Thin capitalisation in the Group taxation section for further information.

**Bad debts**
In general, receivables are tax deductible if the debt is clearly irrecoverable or realised (e.g. if the receivable is sold to a third party, converted to share capital, or waived) and is sufficiently connected to the company's business (the business requirement). For accounts receivables, a calculated rate multiplied by the total account receivables at year-end may be deducted. The rate is calculated based on the two preceding years losses on such receivables multiplied by a fixed rate set by the Ministry of Finance.

Losses on receivables between group companies (with more than 90% direct or indirect mutual ownership of shares) and partnerships are, as a main rule, not tax deductible. However, trade receivables and losses on receivables created in connection with mergers or demergers are deductible for tax purposes.

**Charitable contributions**
Donations to certain charitable institutions are tax deductible. The upper limit for the tax deduction per year is NOK 25,000. The same limit applies to individuals and companies. The receiving entity must be pre-approved by the Norwegian tax authorities.

**Fines and penalties**
Fines and penalties are normally not tax deductible. This also applies to some administrative charges that are penal in nature. Charges that have no statutory basis in Norwegian law may be tax deductible, provided that the general conditions are fulfilled.

**Taxes**
Real estate tax, as well as foreign income and capital taxes paid by the taxpayer, are deductible when determining corporate income. Foreign taxes derived from income that is taxable in Norway are deductible only if they have not been credited against Norwegian tax payable.

**Net operating losses**
Losses may be carried forward indefinitely. Losses incurred in the year of ceasing business may be carried back for a period of two years.

**Payments to foreign affiliates**
Royalties and service fees paid to related foreign companies are fully deductible, provided they meet the arm's-length principle. As regards loans, the tax authorities require that the entity in question is able to service its debts. In addition, any loan terms should be comparable to those that would have been agreed upon by unrelated parties. Interest on financing, to the extent that these rules are not satisfied, may be regarded as dividends and thus non-deductible and, in addition, may be subject to Norwegian WHT. In addition, limitations on tax deductible inter-company interest expenses apply. Please see the detailed description under Thin capitalisation in the Group taxation section for further information.

**Group taxation**
Income taxes are assessed on companies individually, not on a consolidated basis. This may be avoided through group contributions between Norwegian companies, provided common direct or indirect (including foreign) ownership and voting rights is more than 90%. Furthermore, the Norwegian group contribution rules are, under certain conditions, also applicable to branches of foreign companies that are resident within the EEA. Note that group contributions are not deductible for companies engaged in oil and gas producing activities subject to the Petroleum Tax Act.
Assets may, pursuant to the Group Regulations, be transferred tax-free between group companies at tax book value for tax purposes and at market value for financial book purposes. However, a guarantee for the latent tax liability created by the transfer must be provided upon request by the tax authorities.

Payment must equal market value of the assets transferred. The same applies to payment in the form of shares. If the transferee loses the affiliation with the tax group while still owning the transferred assets, the transferor will be taxed for the difference between the tax book value and the market value of the assets.

**Transfer pricing**

In Norway, the arm’s-length principle for related party transactions is incorporated into the Tax Act. The transfer pricing provision of the Tax Act states that the OECD Guidelines ‘shall be taken into account’ when addressing transfer pricing issues under Norwegian tax law.

Transfer pricing has increasingly become the focus of the tax authorities’ attention in recent years. It is fairly common for the Norwegian tax authorities to choose test cases that are subject to substantial investment. During the most recent years, focus has been on business restructuring, commissionaire arrangements, and the financing of operations.

Norway has newly introduced an advance pricing agreement (APA) regime. It is also becoming more common to discuss complex cases with the tax authorities on a non-binding basis in advance of implementation or before assessment. However, there are no particular Norwegian safe harbour rules or any other official guidance of how to price specific transactions, etc.

**Thin capitalisation**

There is no fixed debt-to-equity ratio requirement in Norwegian tax law. However, for companies that are part of a group, adjustments may be made under the arm’s-length provisions. Generally, these provisions apply only if the company has obtained a larger loan from a group company than an independent credit institution would have granted, or if the agreed level of interest is higher than an independent credit institution would have required. Naturally, this analysis will vary based on the actual company’s credit worthiness, which consists of several elements, such as the nature of the business, financial status, future income possibilities, and group relationships. As such, there is no applicable ‘safe harbour’. The company must also be able to service its debts.

If a Norwegian entity is regarded as being thinly capitalised, part of the entity's interest and debts may be reclassified to dividend and equity.

Limitations apply to tax deductible inter-company interest expenses. In general, interest expenses to related parties that exceed 25% of a Norwegian company's taxable EBITDA, with some adjustments, will not be tax deductible. The regulations only apply to companies that have more than NOK 5 million in total net interest expenses.

Two parties are related if one party directly or indirectly owns or controls the other party by at least 50%. Related parties may be resident in Norway or abroad.

External loans can also, under certain conditions, be regarded as intra-group loans if an entity has provided a guarantee for the debt of a related party. However, an exemption applies if the guarantee is provided by a company that is more than 50% owned by the borrower or a company that is controlled by the borrower or if the security is the shares in the borrower.

The interest deductibility limitation is calculated for each entity in the group. Disallowed interest deductions may be carried forward for ten years.
The limitation applies both to local and foreign companies that have a taxable presence in Norway, as well as partnerships, CFCs, etc.

**Controlled foreign companies (CFCs)**

Norwegian residents are taxed directly on their allocable part of the profits from a CFC’s income if the company is resident in a low-tax country, irrespective of whether income is distributed to the Norwegian investor. A low-tax country, in this respect, is a country where the effective foreign income taxation of the company’s profits is less than two-thirds of the effective taxation that would have been due had the company been resident in Norway. A condition for such taxation is that 50% or more of the foreign company’s shares or capital is held or controlled, directly or indirectly, by Norwegian taxpayers (alone or together), based on the status at the beginning and end of the income year in question.

Note that if Norwegian taxpayers own or control more than 60% of the shares or capital at the end of the income year, Norwegian control exists irrespective of the level of control at the beginning of the year. Norwegian control ceases to exist if Norwegian taxpayers own or control less than 50% of the shares or capital at both the beginning and end of the income year or less than 40% of the shares or capital at the end of the income year.

On the condition that Norway has signed a tax treaty with the country involved and the company in question is covered by the treaty, the CFC rules will be applicable only if the income of the entity in question is mainly of a passive nature. Furthermore, CFC taxation may also be prohibited if the company in question is resident within the EEA and cannot be deemed as a wholly artificial arrangement as outlined in the ECJ’s decision in the Cadbury Schweppes case. Hence, CFC taxation will be avoided for EEA companies that fulfil certain substance requirements.

**Tax credits and incentives**

**Foreign tax credit**

Norwegian limited liability companies that have paid taxes on foreign-source income may, under certain conditions, offset the Norwegian tax paid against the foreign tax paid. The tax credit is limited to the lower of the Norwegian tax paid on the same type of foreign income and the foreign tax actually paid. It is possible to carry forward unused foreign taxes for five years. A credit claimed in accordance with the regulations stated above may not be used in addition to deductions pursuant to other rules and regulations. These rules are very technical, and it should be noted that there are three different ‘baskets’ of income.

**Roll-over regulations**

Upon application, the Ministry of Finance has the authority to grant tax relief on the transfer of assets within a group. The transfer may be carried out between group companies (more than 90% ownership and voting rights) or partnerships (with mainly the same owners). If a tax relief is granted, the transfer would not trigger any taxation at the time of the transfer, but all tax positions, including the tax basis of the transferred assets, will be transferred to the acquiring company. A condition for the tax relief is normally that the companies remain within the group.

The Ministry of Finance also has the authority to grant tax relief on the realisation of property, business, shares, etc. during a reorganisation. The reorganisation must improve the efficiency of the business to qualify for tax relief, and, accordingly, administrative effects would not be sufficient. The tax relief must also help companies to carry out the reorganisation. In addition, the tax relief must not reduce the Norwegian tax base; the tax positions would be transferred to the new taxpayer.
SkatteFUNN research and development (R&D) tax incentive scheme

The SkatteFUNN R&D tax incentive scheme is a government program that is designed to stimulate R&D in Norwegian trade and industry. Businesses and enterprises that are subject to taxation in Norway are eligible to apply for tax relief.

All Norwegian companies and branches with R&D projects can apply for a deduction of up to 20% of incurred costs, limited up to a cost base of NOK 20 million for self-developed R&D and NOK 40 million for R&D purchased from approved institutions. If the company does not have taxable gain for the income year in question, the company will receive a cash refund for the year following the income year.

The main criterion for applying for SkatteFUNN is that the company has an R&D project with the aim of developing a new or improved asset, service, or production process. There are no requirements regarding type of business. A distinction is made against ordinary product development without developing new knowledge, functions, etc., the ordinary day-to-day business operations, etc.

The application for SkatteFUNN must be approved by Norges Forskningsråd (The Research Council of Norway) and is awarded for a period of a maximum of three years. If the application is approved, there is a requirement to submit a form attested by the company’s auditor, together with the ordinary tax return, in order to obtain the tax incentive.

Withholding taxes

Norway does not levy WHT on payments of royalties and interest, except on interest derived from primary capital certificates (‘Egenkapitalbevis’).

The internal WHT rate is 25%, which may either be reduced under the tax-exemption rules or by an applicable tax treaty. To qualify for the tax-exemption rules, the recipient of the dividends has to be a corporate investor resident in an EEA country and must also fulfil certain substance requirements.

5. 25% of the voting rights.
6. 50% of the voting rights.
7. 5% for over 70% of the capital; 10% for 25% to 70% of the capital.
8. Internal Norwegian WHT rate (i.e. 25%).
9. 15% of the capital.
10. 10% of the capital for an uninterrupted 24-month period.
11. 80% of voting rights.
12. 20% of the capital provided that such dividends are exempt from tax in the other state.
13. 10% of the capital for an uninterrupted 12-month period.

Tax administration

Taxable period
The income tax year normally runs from 1 January to 31 December, with assessments being issued in autumn of the following calendar year. Companies are liable for both advance payments and final settlements in the calendar year of assessment. Companies with a financial year other than the calendar year may use the financial year for tax purposes in certain instances (e.g. if they belong to a foreign group with a deviating accounting year, they may use the financial year of the group for tax purposes).

Tax returns
Companies are required to file their tax returns electronically by the end of May in the year following their financial year. Upon application, an extension of the time limit to file will normally be granted. The tax returns and the basic attachments are obligatory for all corporate taxpayers. Additional requirements may apply for specific business sectors, such as hydro power production. Under the petroleum tax regime, the filing deadline is the end of April.
Norway

The annual assessment is made by one of five regional tax departments, who notify the taxpayer if it has been determined that the taxable income will deviate from what was submitted in the tax return.

**Payment of tax**
Companies are required to make advance payments of tax on 15 February and 15 April in the year following the income year. The two payments should together cover all of the expected CIT to be assessed. Any balance must be paid three weeks after the assessment has been made public (i.e. in early autumn of the year following the relevant accounting year).

The above applies to all corporate taxpayers, except for taxpayers under the petroleum tax regime, where tax shall be paid in six instalments.

**Tax audit process**
The Norwegian tax system is tax return based. The Norwegian tax office carries out tax audits based on different selection criterions. A tax audit can be caused by the ordinary review of the tax return, random selection of companies or business sectors, information obtained from other parties, etc.

The tax office normally gives notice of an upcoming tax audit, but it can also be unannounced. The examination generally takes place by formal, written communication, and the process can take from a few weeks to several years.

**Statute of limitations**
The tax office has a ten-year limit for reassessing tax assessment for all open years (from the year after the income year in question). However, a two-year limit applies for negative adjustments and a three-year limit for positive adjustments if the taxpayer has provided sufficient and correct information in the tax return.

The taxpayer may file an appeal on the tax assessment within six weeks after the taxpayer receives it. The time limit for appealing other decisions is normally three weeks after the tax office’s decision.

**Topics of focus for tax authorities**
The tax office’s topics of focus can vary each year and from region to region. The primary topics of focus lately have been thin capitalisation, transfer pricing, and tax losses on receivables.

**Other issues**

**Foreign Account Tax Compliance Act (FATCA) agreement with the United States**
In April 2013, Norway entered into an FATCA agreement with the United States. The agreement is based on the US FATCA regulations and is the basis for information exchange between the Norwegian and US tax authorities with regards to financial transactions.

According to the agreement, Norwegian financial institutions can report to the Norwegian authorities instead of reporting to the US authorities. It is expected that this will ease the reporting liabilities for Norwegian financial institutions.
**Oman**

**Significant developments**

There have been no significant corporate tax developments in Oman during the past year.

**Taxes on corporate income**

The Income Tax Law seeks to tax worldwide income of entities formed in Oman and the Oman-source income of branches and other forms of permanent establishment (PE).

The rate of income tax is uniform for all types of business entities, regardless of whether it is a corporate entity and/or whether it is registered or not.

The income tax rate is as follows:

<table>
<thead>
<tr>
<th>Taxable profits (OMR*)</th>
<th>Rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>First 30,000</td>
<td>0</td>
</tr>
<tr>
<td>Over 30,000</td>
<td>12</td>
</tr>
</tbody>
</table>

* Omani rial

**Petroleum income tax**

Special provisions are applicable to the taxation of income derived from the sale of petroleum. The tax rate specified for such companies is 55%. However, the tax rates are applied on income as determined by the individual Exploration and Production Sharing Agreement entered into between the government of Oman and the company engaged in the sale of petroleum. Under these agreements, the government pays the company’s share of income tax from amounts withheld from the government’s share of production. Therefore, the income tax is not actually borne by the company.

**Local income taxes**

There are no local income taxes in Oman.

**Corporate residence**

The term ‘resident’ is not defined in the tax law.

**Permanent establishment (PE)**

PE is defined in very broad terms and includes places of sale, places of management, branches, offices, factories, workshops, mines, quarries, and building sites for construction. However, the mere use of storage or display facilities does not constitute a PE. The definition of PE references carrying on business in Oman, either directly or through a dependent agent.
Additionally, the definition stipulates that a total stay of 90 days during a 12-month period creates a PE in Oman. However, this 90-day period applies to rendering of consultancy services or other services only. Under this definition, while the sale of goods into Oman will not be deemed to be a taxable activity, a contract for the supply and installation of equipment is likely to attract tax. By the same criterion, services rendered by personnel visiting Oman will be treated as taxable activities, applying the 90-day rule.

**Other taxes**

**Value-added tax (VAT)**
Oman has announced its intention, along with several other Gulf Cooperation Council (GCC) member countries, to implement VAT from 1 January 2018. The features of the planned GCC common VAT framework have not been announced, although the main rate of VAT is expected to be in the region of 3% to 5%.

**Customs duty**
Customs duty of 5% of cost, insurance, and freight (CIF) value applies to most non-GCC source goods. Exemptions apply for certain food items, medical supplies, etc.

**Excise taxes**
There are no excise taxes in Oman.

**Property taxes**
There are no property taxes in Oman.

**Stamp duty**
Stamp duty is applicable on transfer of land and property at 5% of the value.

**Payroll taxes**

**Social security contributions**
A 17.5% social security contribution is applicable to employees who are Omani nationals, but not to expatriate employees. The employee pays a contribution of 7% of salary, and the employer pays the balance of 10.5%. The employer is also required to contribute for insurance for work-related injuries in the amount of 1% of the salary of the employee. This brings the total monthly social security and insurance contributions to be made by the employer to 11.5%.

**Municipal taxes**
Municipal taxes apply to the following items:

- Property rents: 3%.
- Hotel occupancy: 5%.
- Leisure and cinema houses: 10%.

**Branch income**
Branches of foreign entities (regardless of country) are subject to tax at the rate of 12% on income over OMR 30,000.

Expenses incurred by the head office that can be identified as directly related to the branch’s activity are deductible. The deduction for other head office expenses is limited to 3% of the branch’s gross income for the year. This rate is 5% for banks and insurance companies, and 10% for high-tech industrial activities.
**Income determination**

**Inventory valuation**
Inventory should be valued using a method that complies with International Accounting Standards.

**Capital gains**
Gains on sales of securities listed on the Muscat Securities Market are exempt from taxation. Gains on transfers of other assets are taxable as ordinary income.

**Dividend income**
Dividends received from Omani entities are exempt from taxation. Foreign-source dividends are taxable. Foreign-source dividends are taxed as the same rates as corporate income.

**Stock dividends**
There are no provisions in the tax law that address stock dividends.

**Interest income**
Interest income is taxable as business income.

**Rent/royalty income**
Rental income and royalties are taxed as business income.

**Unrealised exchange gains/losses**
Unrealised exchange gains are not taxable. Similarly, any unrealised loss is not deductible from the total taxable income.

**Exempt income**
The following income is exempt from income tax in Oman:

- Dividends received from an Omani company.
- Profits or gains on disposal of securities listed on Muscat Security Market.
- Omani marine companies, whether wholly owned by Omanis or with foreign and Omani ownership and registered in Oman, are exempt from tax. Foreign marine companies conducting activities in Oman through an authorised agent are exempted from tax with effect from the date of commencement of activity, provided that reciprocal treatment is afforded by the country of the foreign company.
- Income realised by foreign airlines carrying on business through PEs in Oman is exempt from tax. This exemption is limited to the extent of the income from operating airplanes for international transport, provided reciprocal treatment is accorded in the airline’s home country.
- Income realised by investment funds established in Oman under the Capital Market Authority Law or established overseas for dealing in shares and securities listed on Muscat Security Market is exempt.
- Foreign companies engaged in oil and gas exploration activities, while taxable under the law, normally have their tax obligations discharged by the government under the terms of the Exploration and Production Sharing Agreement.
- Foreign companies working for the government in projects deemed to be of national importance may be able to negotiate a tax protection clause whereby any tax paid by them is reimbursed by the government.

See Exempt activities in the Tax credits and incentives section for a description of exemptions from tax for income from certain principal activities.
Oman

**Foreign income**
Worldwide income of an entity formed in Oman is taxed in Oman. Credit for foreign taxes paid is given under the law; however, this may not exceed the amount of Omani tax payable on such income.

The Oman tax law does not contain rules on deferral of foreign income.

---

**Deductions**

**Depreciation**
Depreciation is taken on a straight-line basis on the following classes of assets at the annual rates shown.

<table>
<thead>
<tr>
<th>Asset</th>
<th>Rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Permanent buildings</td>
<td>4</td>
</tr>
<tr>
<td>Semi-permanent buildings</td>
<td>15</td>
</tr>
<tr>
<td>Docks, sea barriers in ports, pipelines, roads, and railway lines</td>
<td>10</td>
</tr>
<tr>
<td>Aircraft and ships</td>
<td>15</td>
</tr>
<tr>
<td>Hospital buildings, educational establishments, and equipment for scientific research</td>
<td>100</td>
</tr>
</tbody>
</table>

The rate of depreciation allowed is doubled in the case of buildings used for industrial purposes.

The tax law also provides for calculation of depreciation on a net book value basis for the following classes of assets. A ‘pooling’ concept is permitted, whereby assets subject to the same rate of depreciation may be pooled together for purposes of depreciation.

<table>
<thead>
<tr>
<th>Pool</th>
<th>Rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>First pool is comprised of machinery and equipment, including computer software installations, furniture and fixtures, and vehicles</td>
<td>33.33</td>
</tr>
<tr>
<td>Second pool is comprised of drilling equipment</td>
<td>10</td>
</tr>
<tr>
<td>Third pool is comprised of ‘other machinery and equipment’ not included above</td>
<td>15</td>
</tr>
</tbody>
</table>

**Goodwill**
Goodwill is amortisable for tax purposes, generally over the life assigned for International Financial Reporting Standards (IFRS) accounting purposes.

**Start-up expenses**
Expenses incurred before the commencement of business are allowed as a deduction in the first taxable year (or period).

**Interest expenses**
Deduction of expenses incurred for the purpose of earning income is generally allowed. Interest expense is allowed for loans from unrelated parties or on loans from banks. Interest paid to related parties is allowed only to the extent the loan terms are at arm’s length.

**Bad debts and other contingencies**
Amounts charged to the profit and loss account for creating provisions in respect of bad debts, stock obsolescence, warranties, and similar types of contingencies are not tax deductible. Deduction is allowed only at the time of write-off. However, provisions created by licensed banks in respect of bad debts are allowable within the limits approved/required by the Central Bank of Oman.
Charitable contributions
Charitable donations are limited to specified institutions and organisations and are subject to an overall limitation of 5% of total income.

Meals, entertainment, officers’ compensation, etc.
All expenses incurred for the generation of gross total income are allowed. There are no specific restrictions on deduction for expenses like meals and entertainment, compensation for officers, and life insurance payments for employees. There are limits on the deductibility of directors’ fees.

Social security payments
Social security contributions paid by employers in respect of employees may also be deducted.

Pension payments
Contributions to pension funds, domestic and foreign, are deductible, provided the fund is licensed (in Oman or the country where it was established) and complies with certain other specified conditions.

Illegal payments
Payments of bribes or kickbacks, and other illegal payments, are not deductible.

Fines and penalties
Civil fines and penalties are not deductible.

Taxes
Taxes on income, whether incurred in Oman or elsewhere, are not deductible in arriving at taxable income. A credit may be available for taxes paid in a foreign jurisdiction.

Other significant items/restrictions on allowable expenses
The tax law has imposed restrictions on the deductibility of certain other expenses. The principal items affected are the following:

- Sponsorship fees paid to Omani sponsors are restricted to 5% of net taxable income before sponsorship fees. Net taxable income is determined after offsetting any losses carried forward.
- Charges or expenses allocated from the head office or other group companies are limited to 3% of gross income (5% for banks and insurance companies, and 10% for high-tech industrial activities).
- Commissions paid by insurance companies are restricted to 25% of net premiums collected.
- Leasing companies are treated at par with banks as far as deduction for loan loss provision is concerned. Leasing companies are allowed deductions for loan loss provisions, subject to the limits or recommendations of the Central Bank of Oman.
- Losses arising on sale of investments listed on the Muscat Security Market are not allowed as a deduction from taxable income.
- Any expense or costs that have been incurred to generate income exempted from tax are not allowed as a deduction from taxable income.
- Amounts paid as tax consultancy or advisory fees are disallowed.

Net operating losses
Carryforward of losses is limited to five years, except in the case of companies that incurred losses during a mandatory tax-exempt period, where the net losses may be carried forward indefinitely for offset against future profits.

Carryback of losses is not allowed.
Oman

**Payments to foreign affiliates**
Payments to foreign affiliates normally receive in-depth scrutiny from the tax authorities. Accordingly, proper documentation should be obtained in order to establish that these transactions are made at an arm's-length basis.

**Group taxation**
Businesses are taxed as separate entities, and the tax law does not recognise group taxation.

**Transfer pricing**
Transactions between related parties must be valued at arm's length. There is no specific guidance on acceptable methods for determining an arm's-length price.

**Inter-company payments**
All inter-company payments are scrutinised in detail to ensure that the profits are not transferred to avoid payment of tax.

**Thin capitalisation**
If the debt-to-equity ratio exceeds 2:1 in the case of related party debt, interest on the excess debt is not deductible for tax purposes. This rule does not apply to banks and insurance companies, PEs of foreign companies, or proprietary (Omani owned) establishments.

**Controlled foreign companies (CFCs)**
There is no CFC regime in Oman.

**Tax credits and incentives**

**Foreign tax credit**
A foreign tax credit is available to Omani companies or establishments (proprietorships) who suffer foreign taxes on income that is also taxed in Oman. The credit is limited to the amount of tax incurred in Oman. The taxpayer is required to submit an application to the Secretariat General for Taxation to claim such credit.

**Exempt activities**
Income from the principal activities listed below is exempt from tax, provided an exemption is applied for and obtained.

- Industry and mining.
- Export of products manufactured or processed locally.
- Operation of hotels or tourist villages.
- Agriculture and animal husbandry and the processing of agricultural produce.
- Fishing and fish processing and aquaculture.
- University education, college or institutes of higher studies, private schools, nurseries, training colleges, and institutes.

The exemption is valid for a period of five years from the date of commencement of production or the practice of activities and may be made subject to such conditions as the Minister of Commerce and industry may specify. The exemption is renewable for a period not exceeding five years, subject to approval by the Financial Affairs and Energy Resources Council.

*See Exempt income in the Income determination section for a description of other income items exempt from tax.*
Withholding taxes

Foreign companies that do not have a PE in Oman for tax purposes and that derive income from Oman in the nature of the following are subject to withholding tax (WHT) at 10% of gross income from such sources:

- Royalty.
- Consideration for research and development (R&D).
- Consideration for use of or right to use computer software.
- Management fees.

Such WHT is required to be withheld by the Omani-based company and paid to the tax department within 14 days of the end of the month in which tax is deducted or payments are due or made to the foreign company.

There is no WHT on dividends and interest payments.

The term ‘royalty’ has been defined under the law to include consideration for the use of intellectual property (IP), including computer software, cinematography films, tapes, discs, or any other media, patents, trademarks, drawings, etc. The term further includes consideration for using industrial, commercial, or scientific equipment and consideration for information concerning industrial, commercial, or scientific experience or consideration for granting rights to exploit mining or other natural resources.

Double tax treaties (DTTs)
The maximum WHT rates provided by the Oman DTTs are shown in the table below. There are also agreements with various countries that are not yet in force.

Notes

1. 10% minimum shareholding required.
2. 15% minimum shareholding required.
3. 20% minimum shareholding required.
4. Interest received by financial institutions (including insurance companies) or loans/debt claims guaranteed by the government of the source state.
5. 60% minimum shareholding required.
6. 25% to 60% minimum shareholding required.
7. Only the country from which the payment is made (source country) may tax.
8. Dividends paid out of income derived from immovable property by an investment company or investment fund.

---

**Tax administration**

**Taxable period**

The tax year is the calendar year. Assessments can be made on the basis of a year-end other than 31 December, provided permission is granted in advance by the Omani tax authorities and the company then adheres to the year-end on a consistent basis.

**Tax returns**

A provisional declaration of tax must be submitted in the prescribed form within three months from the end of the accounting period to which it relates. The final annual return of income should be submitted in the prescribed format within six months from the end of the accounting period to which it relates. Reasonable time extensions can be sought and are normally provided for filing the provisional and annual returns of income, but these do not defer payment of tax, which will be subject to additional tax at 1% per month from the due date to the actual date of payment.

In the case of companies having a paid-up capital in excess of OMR 20,000, the annual return of income should be accompanied by audited accounts signed by an auditor registered in Oman. The law requires accounts to be drawn up in accordance with IFRS consistently applied. It specifically provides for accrual accounting unless prior permission of the Secretary General of Taxation (the Secretary General) has been obtained. The accounts must be submitted in local currency unless prior approval of the Secretary General has been obtained for submitting them in foreign currency.

Delay or failure in submitting the provisional or annual returns may attract a penalty of not less than OMR 100 and not more than OMR 1,000.

Failure to file the provisional or annual returns of income may result in an estimated profit assessment by the Secretary General.

Failure to submit audited accounts as required under the Law is deemed to result in an incomplete annual return of income and may attract an estimated profit assessment.

The law confers wide powers on the Secretary General for requesting information. Experience has shown that, notwithstanding the presentation of audited accounts, the tax department requests very detailed information and supporting documentation relating to revenue and expenses. Failure to provide such information or the provision of incorrect information can result in an additional assessment by the Secretary General and/or various penalties on the company and/or the officer responsible for providing the information.

**Payment of tax**

Any tax estimated to be payable in respect of an accounting period should be paid with the provisional assessment and ‘topped up’ for any additional amount computed as payable following submission of the annual return of income. Failure to pay taxes by the due date attracts interest at the rate of 1% per month from the date on which such tax was due to the date of payment.

1574 Oman PwC Worldwide Tax Summaries
The difference between the amount paid and the amount assessed, subject to filing of an objection, should be paid within one month from the date of the assessment. The additional amount assessed attracts interest at the rate of 1% per month from the date on which such tax was due to the date of payment.

Under the Law, the Secretary General has the authority, with the approval of the Minister and the Tax Committee, to sequester and sell the assets of a taxable entity to recover the taxes due.

If decisive proof is presented to the Secretary General that any person has paid tax for any year exceeding the tax due and payable for such tax year as finally settled, such person has the right to recover the tax. However, if any tax has become payable by such person in respect of another tax year, the excess amount will be adjusted against the future tax liability. Any request for recovery must be presented within five years from the end of the tax year to which it relates.

Where the taxpayer fails to declare correct income in the tax return for any tax year, the Secretary General may impose a fine not exceeding 25% of the difference between the amount on the basis of the correct taxable income and the amount of tax as per the return submitted.

**Objections and appeals**
A company has a right to object to any assessment issued by the Secretary General. The objection document should be prepared in writing (in English and in Arabic) and filed with the office of the Secretary General for Taxation within 45 days from the date of assessment. The Secretary General is required to give a judgment within five months, extendable up to another five months at the Secretary General’s discretion, from the date of receiving the objection. The tax demanded may be kept in abeyance on request. No additional tax is payable until the Secretary General issues the judgment.

**Statute of limitations**
The tax authorities have a period of up to five years from the end of the year in which a tax return is submitted to complete the assessment for that tax year. However, where the entity has not submitted any tax return, the tax authorities have a period of ten years to complete the assessments.

**Maintenance of records**
The Law requires accounting records and supporting documentation to be maintained for ten years after the end of the accounting period to which these records relate.

**Topics of focus for tax authorities**
Related party transactions are likely to attract particular scrutiny by the tax authorities. Taxpayers should maintain documentation that proves that transactions are carried on at arm’s length.

Significant developments

The following significant developments in corporate taxation have recently occurred in Pakistan:

• The corporate tax rate decreased from 33% to 32% for tax year 2016, 31% for tax year 2017, and 30% for tax year 2018 onwards.
• Super tax is levied at 4% for banking companies and 3% for other companies earning income of more than 500 million Pakistani rupees (PKR). Super tax is payable only for tax year 2015.
• Undistributed reserves of companies are taxed if in excess of 100% of paid-up capital at the rate of 10%.
• Withholding tax (WHT) rates for unregistered taxpayers are enhanced.
• New WHT provisions for banking companies are introduced whereby all transactions in excess of PKR 50,000 by unregistered taxpayers are subjected to WHT of 0.6%.
• Returns filed by taxpayers are automatically selected for audit if their income for the year is less than 25% of their last declared income.
• Powers to issue notifications by the Federal Board of Revenue are restricted.
• Tax exemptions are allowed for solar and wind power energy plant and equipment manufacturing, agricultural cold chain and warehousing, halal meat production units, electricity transmission projects, manufacturing of cellular phones, and new manufacturing units set up in Khyber Pakhtunkhwa and Balochistan.

Taxes on corporate income

A resident company is taxed on its worldwide income. Non-resident companies operating in Pakistan through a branch are taxed on their Pakistan-source income, attributable to the branch, at rates applicable to a company.

The federal corporate tax rates on taxable income are as follows:

<table>
<thead>
<tr>
<th>Company type</th>
<th>Tax rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Banking company</td>
<td>35</td>
</tr>
<tr>
<td>Public company other than a banking company</td>
<td>32</td>
</tr>
<tr>
<td>Any other company</td>
<td>32</td>
</tr>
<tr>
<td>Small company (see the Tax credits and incentives section for more information)</td>
<td>25</td>
</tr>
</tbody>
</table>

Note that the corporate tax rate for tax year 2017 is 31% and for tax years 2018 and onwards is 30% for companies other than banking companies.

The term ‘public company’ implies a company listed on any stock exchange in Pakistan or one in which not less than 50% of the shares are held by the federal government or a public trust.
In the case of a modaraba (see the Income determination section for a definition), income, except relating to trading activities, is exempt from tax, provided that 90% of its profit is distributed to the certificate holders as cash dividends.

The final tax regime (FTR) for resident taxpayers, a presumptive tax scheme where taxes are withheld at the source on the sale of goods and execution of contracts or collected at the time of import (for other than industrial raw materials), is considered the final tax liability in respect of income arising from the sale, contract, or import.

In the case of exports, tax collected at the time of realisation of foreign-exchange proceeds is treated as the final tax for that income.

The FTR is also applicable to non-resident taxpayers, at their option. However, it is only applicable in cases of receipts on account of the execution of a contract for construction, assembly, or installation, including a contract for the supply of management activities in relation to such project as well as certain contracts for services and contracts for advertisement services rendered by television satellite channels.

**Taxation of a permanent establishment (PE) of a non-resident**
The following principles shall apply in computing taxable income of a PE:

- It is a distinct and separate entity dealing independently with the non-resident of which it is a PE.
- In addition to business expenditure, executive and administrative expenditure, whether incurred in Pakistan or elsewhere, will be allowed as deductions.
- Head office expenditure, including rent, salaries, travelling, and any other expenditure that may be prescribed, shall be allowed as a deduction in proportion to the turnover of the PE in the same proportion as the non-resident’s total head office expenditure bears to its worldwide turnover.
- Royalties, compensation for services (including management services), and interest on loans (except in banking business) payable or receivable to or from a PE’s head office shall be considered in computing taxable income of the PE.
- No deduction will be allowed for any interest paid on loans acquired by a non-resident to finance the operations of a PE (or for the insurance premium in respect of such loans).

**Minimum tax on turnover**
Where the tax payable by a company is less than 1% of the turnover, except where the company is in a loss position before charging depreciation and other inadmissible expenses, the company is required to pay a minimum tax equivalent to 0.5% of the turnover. Tax paid in excess of normal tax liability can be carried forward for adjustment against tax liability of a subsequent tax year. However, such tax can only be adjusted against tax liability of the five tax years immediately succeeding the tax year for which the amount was paid.

The minimum tax rate for companies providing services is 8% of the turnover, except for certain specified services sectors, which are allowed concessions with conditions.

**Alternate Corporate Tax (ACT)**
Under the ACT, the minimum tax liability of a company is the higher of 17% of accounting income or the corporate tax liability determined under the ordinance, including minimum tax on turnover. This concept is applicable for all companies except insurance companies, companies engaged in exploration and production of petroleum, banking companies, and companies enjoying a reduced rate of tax. Exempt income, income taxable under the FTR, gain on disposal of specified listed securities, income entitled to 100% tax credit on account of equity investment, and income of non-profit organisations, trusts, and welfare institutions are not taxable under the ACT.
Pakistan

**Super tax**
Super tax is introduced through Finance Act, 2015 whereby 4% of super tax is payable by banking companies and 3% by other companies if the income of the company is PKR 500 million or more. Super tax is payable only for tax year 2015.

**Local taxes on income**
No local taxes are payable in respect of income of companies.

**Corporate residence**
A company is resident in Pakistan if it is incorporated or formed by or under the law of Pakistan or if the control and management of its affairs is situated wholly in Pakistan in that year.

The term ‘company’ includes a trust, a cooperative society, a finance society, or any other society established or constituted by or under any law; a corporate body incorporated outside Pakistan; and any foreign association, incorporated or unincorporated, that the Central Revenue authorities may declare to be a company.

**Permanent establishment (PE)**
A PE is a place of business through which the business of a non-resident is wholly or partly carried out, including:

- A place of management, branch, office, factory or workshop, premises for soliciting orders, warehouse, permanent sales exhibition, or sales outlet, except a liaison office.
- An agriculture, pastoral, or forestry property.
- A mine, oil or gas well, quarry, or any other place of extraction of natural resources.
- A building site; a construction, assembly, or installation project; or supervisory activities connected with such site or project if such activity continued for more than 90 days within any 12-month period.
- The furnishing of services, including consultancy services, by any person through employees or other personnel engaged by the person for that purpose.
- A person acting in Pakistan on behalf of the person, other than an agent of independent status acting in the ordinary course of business.
- Any substantial equipment installed, or other asset or property capable of activity giving rise to income.

The definition of a PE provided in a double taxation treaty (DTT) will prevail in cases where a DTT is executed by Pakistan with the related country of origin of the PE.

**Other taxes**

**Value-added tax (VAT)**
VAT (locally termed as ‘sales tax’) is ordinarily levied at 17% on the value of goods, unless specifically exempt, after allowing related input credits.

Telecommunication services are levied VAT at the rate of 19.5%. VAT on services, including telecommunication services, is a provincial levy.

Significant zero-rated goods are as follows:

- Supplies and repair and maintenance of certain ships and aircraft.
- Supplies to diplomatic missions and diplomats.
- Supplies of raw materials, components, and goods for export processing zones.
- Supplies of locally manufactured plant and machinery to export processing zones and supplies of certain specified machinery to the exploration and production sector.
Supplies to exporters.

Significant exemptions are as follows:

- Live animals and live poultry.
- Live plants.
- Vegetables, pulses, edible fruits (excluding imported fruits), certain spices, sugar cane, edible oils, etc.
- Milk preparations.
- Newsprints, newspapers, journals, periodicals, and books.
- Agricultural produce not subjected to any process.

**Customs and import duties**

Customs and certain other duties are collected at the import stage at varying rates classified under the Harmonized System (HS) Code.

**Excise duty**

Federal excise duty (FED) is levied at the rate of 17% on certain types of manufacturing, import of goods, and rendering of services, except telecommunications services, which are charged at the rate of 19.5%. FED, under the constitution, is to be levied and collected by the provinces. Sindh, Punjab, and Khyber Pakhtunkhwa provinces have promulgated their statute, and others are expected to follow.

**Property taxes**

Property owners are required to pay property tax levied and collected by provincial governments through municipal governments at varying rates.

**Stamp duty**

In the case of sale or transfer of immovable property, stamp duty is payable (with varying rates on the basis of location of the property) on the value of the property.

**Social security contributions**

Nominal social security and Employees Old Age Benefit contribution is collected from the employers and the employees. Employers are responsible to collect and pay on a monthly basis.

**Payroll taxes**

Employers are not responsible to pay any other tax in respect of their employees or their salaries.

**Branch income**

The rates of tax for a branch of a company incorporated outside Pakistan are the same as those applicable on resident companies, other than public and banking companies (i.e. 32% for tax year 2016, 31% for tax year 2017, and 30% for tax year 2018 onwards). Tax at the rate of 12.5% is levied on the transfer of profits to the head office, with an exception for companies engaged in the oil and gas exploration and production business.

Payments to a branch in Pakistan of a non-resident are subject to deduction of tax at source on the same basis as a resident in the case of sale of goods, rendering of professional services, and execution of contracts. In other circumstances, a reduced/0% WHT certificate can be obtained from the Commissioner of Income Tax.

Pakistan has signed agreements for avoidance of double taxation with over 60 countries.
Pakistan

**Inventory valuation**
Inventories are to be stated at the lower of cost or market. The first in first out (FIFO) and average methods are accepted. Conformity of methods used for book and tax reporting is desirable, and the method used should be consistently applied.

**Capital gains**
Capital gain on the sale of immovable property, on which depreciation is not allowed, is taxed at the rate of 10% if disposed of within one year and 5% if disposed of within two years. However, if the retention period is more than two years, the gain is not taxable.

Gain on the disposal of shares of a resident company or a non-resident company, whose assets wholly or principally consist of immovable property situated in Pakistan or rights to explore/exploit natural resources in Pakistan, shall be Pakistan-source income.

Tax rates on capital gains on the sale of shares of public companies or *modaraba* (profit sharing) certificates are exempt from tax if held for a period of more than 48 months for tax year 2016 onwards. Capital gains on shares and *modaraba* are taxable at 7.5% if held for less than 48 months and more than 24 months, taxable at 10% if held for less than 24 months and more than 12 months, and taxable at 12.5% if held for less than 12 months.

Capital gain, other than on statutory depreciable assets, realised within one year of acquisition is fully taxed; after one year, 75% of such gains are taxed and 25% are exempt.

Capital gains on statutory depreciable assets (other than immovable property) are chargeable to tax as normal business income in the year of sale. They are measured as the difference between the sale proceeds and the tax written-down value of the relevant asset sold.

In the case of an asset disposal transaction that is on a non-arm's-length basis, fair market value of the asset shall be taken to be the consideration received by the seller, as well as the cost for the buyer.

Where assets are transferred outside Pakistan, the original cost is treated as the sale price, which means that the entire depreciation is recaptured at the time of export, except if the assets are used in oil or gas exploration, in which case only the initial depreciation is recaptured.

No gain or loss shall be taken to arise on disposal of an asset by a resident company to another resident company, provided certain conditions are met. The required conditions include, *inter alia*, that the transferor is 100% owned by the transferee or *vice versa* or both companies are 100% owned by a third company, and the transferee income is not exempt in the year of transfer. The scheme of arrangement is approved by the Securities and Exchange Commission of Pakistan or State Bank of Pakistan.

Any distribution to the shareholders of a company, to the extent that it relates to undistributed profits, is treated as a dividend.

Capital loss can be offset only against capital gains. Unabsorbed capital loss can be carried forward for adjustment against capital gains for six years.

**Dividend income**
Dividend income is subject to WHT of 12.5% or a lower tax treaty rate. The rate is 17.5% for persons receiving dividend income but not filing income tax returns (non-filers).
The deduction at source shall be the full and final discharge of tax liability on dividend income, except for non-filers, who can claim a refund of 5% upon filing of an income tax return.

**Stock dividends**

Stock dividends declared by resident companies are taxable as bonus shares at the rate of 5%.

**Interest income**

Interest earned by a company is taxed as its income from other sources. Interest earned by a non-resident company without a PE in Pakistan attracts WHT at the rate of 10%, except where a lower rate is provided in the related DTT, which is also the final tax on such income.

**Income from royalties and fees for technical services (FTS)**

Royalties received by non-residents are deemed to accrue or arise in Pakistan and are taxable if paid by a resident in Pakistan or borne by a PE of a non-resident in Pakistan.

Income from ‘fees for technical services' (FTS) is deemed to accrue or arise in Pakistan if paid by a resident in Pakistan or borne by a PE of a non-resident in Pakistan. FTS means any consideration for the rendering of any managerial, technical, or consultancy services (including the provision of the services of technical or other personnel), but does not include consideration for any construction, assembly, or like project undertaken by the recipient or consideration that would be income of the recipient chargeable under the head salary.

**Other significant items**

Liabilities allowed as a tax deduction in a tax year and remaining unpaid for three subsequent years are deemed to be income in the first tax year following the said three years. Such items are then allowed as a deduction in the year the liability is discharged.

Agricultural income is exempt from income tax.

**Foreign income**

A resident company is taxed on its worldwide income and on its foreign income as earned. Double taxation of foreign income is avoided by means of foreign tax credits; this relief is allowed to the resident company on the doubly taxed income at the lower of the Pakistan or foreign tax rate. Undistributed income of a non-resident subsidiary is not subject to tax.

Foreign loss can only be offset against foreign income and can be carried forward for six years.

**Modaraba**

*Modaraba* (profit sharing) is a financing vehicle that enables a management company to control and manage the business of a *modaraba* company with a minimum of 10% equity participation. The management company is entitled to remuneration based on an agreed percentage (but not exceeding 10%) of annual profits of the *modaraba* business. A *modaraba* can be for a specific purpose or many purposes and for a limited or unlimited period. The income of a *modaraba* not relating to trading activity is free from tax if 90% of its profits are distributed as cash dividend.

**Deductions**

**Depreciation**

Normal depreciation is allowed at the following prescribed rates by applying the reducing-balance method.
Pakistan

<table>
<thead>
<tr>
<th>Assets</th>
<th>Depreciation rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Buildings</td>
<td>10</td>
</tr>
<tr>
<td>Furniture</td>
<td>15</td>
</tr>
<tr>

<td>15</td>
</tr>
<tr>
<td>Computer hardware, including monitors and printers</td>
<td>30</td>
</tr>
<tr>
<td>Aircraft and aero engines</td>
<td>30</td>
</tr>
<tr>
<td>Below-ground installations in mineral oil concerns</td>
<td>100</td>
</tr>
<tr>
<td>Offshore platform</td>
<td>20</td>
</tr>
</tbody>
</table>

All depreciable assets put into service for the first time in Pakistan during a tax year, other than road transport vehicles not plying for hire, furniture (including fixtures), plant and machinery used previously in Pakistan, or plant and machinery for which a deduction has been allowed under another section of this ordinance, for the entire cost of the asset, shall be entitled to an initial allowance at 50% of the cost of the asset, except for buildings, for which the rate is 15%.

Book depreciation need not conform to tax depreciation. Unabsorbed tax depreciation not set off against the income of the year is carried forward and added to depreciation of the assets of the same business in the following year. Tax depreciation can be carried forward without limit until fully absorbed.

**Amortisation of intangibles**
The cost incurred on acquisition of a patent, invention, design or model, secret formula or process, copyright, software, quota, licence, intellectual property, or other like property or right, and any expenditure that provides an advantage or benefit for a period of more than one year, is allowed as a deduction on a straight-line basis over the useful life of the asset, but not exceeding a period of ten years.

Any payment made against acquisition of goodwill will also be amortised under these provisions.

**Organisational and start-up expenses**
Expenditure incurred before the commencement of a business wholly and exclusively to derive income chargeable to tax can be deducted over a period of five years.

**Interest expense**
Interest expense is allowed as an expense if required WHT is deducted and deposited in the government treasury.

**Bad debt**
Bad debts are allowed as deductible expenditure if the following conditions are satisfied:

- Debts are included previously in the income chargeable to tax.
- Debts are written off in the financial statements.
- There are reasonable grounds for believing that the debt is irrecoverable.

**Charitable contributions**
See Charitable donations credit in the Tax credits and incentives section.

**Fines and penalties**
Fines or penalties that are not paid or payable for the violation of any law, rule, or regulation are allowable as tax deductible expenses.

**Taxes**
Taxes on income are not deductible. Sales tax and excise tax are tax deductible where these are to be absorbed by the business; otherwise, these are passed on to the consumer.
Other significant items
Expenditure on scientific research incurred in Pakistan wholly and exclusively for the purpose of deriving income chargeable to tax is an allowable expenditure.

Exchange gains and loss on foreign currency loans specifically obtained for acquiring an asset are adjusted against the depreciable cost of the asset.

Any lease rental incurred by a person in the tax year to a scheduled bank, financial institution, approved modaraba, or approved leasing company shall be a deductible expense. However, financial charges paid for the above-mentioned leases are added back into the taxable income of the company.

Net operating losses
Operating losses may be carried forward and set off against the profits of the succeeding six years of the same business in which the losses were incurred. Unabsorbed depreciation can be carried forward indefinitely.

Carried forward losses of an entity in the case of group relief cannot be utilised if the ownership of the holding company is reduced to less than 55% and 75% if one of the companies is a listed company or none of the companies is a listed company, respectively.

Business losses can be carried forward up to a period of six years in the case of the amalgamation of two companies, with the condition that the same business is continued for a minimum period of five years.

The carrying back of losses is not permitted.

Payments to foreign affiliates
The deductibility of a head office expenditure of a non-resident taxpayer is limited to the same proportion of total head office expenditure as the Pakistan turnover has with the total world turnover. However, such domestic rules are overridden if the branch is a tax resident of a country having an agreement for avoidance of double taxation (treaty) and that treaty provides a different basis.

Group taxation
A locally incorporated holding company and subsidiary of a 100% owned group may be taxed as one group by giving an irrevocable option for taxation as one fiscal unit. The relief is not available for losses prior to formation of the group. The group is available if the companies are designated as entitled to avail group relief by the Securities and Exchange Commission of Pakistan.

Any company that is the subsidiary of a holding company may surrender its loss for the year to its holding company or its subsidiary, or between another subsidiary of the holding company, provided that the holding company directly holds 55% or more capital of the subsidiary if one of the companies is a listed company. However, if none of the companies is a listed company, the holding requirement is 75% or more. The loss can be surrendered for a maximum of three years, and the required holding is for at least five years.

Transfer pricing
The tax authorities have the power in respect of a transaction between associates to distribute, apportion, or allocate income, deductions, or tax credits between such associates to reflect the income that would have been realised in an arm's-length transaction.
Pakistan

**Thin capitalisation**
Where a foreign-controlled resident company (other than a financial institution or a banking company) or a branch of a foreign company operating in Pakistan has a foreign-debt-to-foreign-equity ratio in excess of 3:1 at any time during a year, a deduction shall be disallowed for the profit on debt (interest) paid by the company in that year on that part of the debt that exceeds the 3:1 ratio.

**Controlled foreign companies (CFCs)**
The only provision with any implications for CFCs is defined under Thin capitalisation above.

---

**Tax credits and incentives**

Any relief from Pakistani income tax that is provided in any other law and not provided for in the Income Tax Ordinance or a treaty is not valid.

**Tax exemptions**
Profits and gains derived from an electric power generation project set up in Pakistan are exempt from tax.

Profits and gains derived by a company from the export of computer software, information technology (IT) services, or IT enabled services are exempt from tax through 30 June 2016.

Profits and gains from solar and wind energy plant and equipment manufacturing are exempt from tax for five years if set up by 31 December 2016.

Profit and gains from agricultural cold chain and warehousing are exempt from tax for three years if set up between 1 July 2015 and 30 June 2016.

Profits and gains from halal meat production are exempt from tax for a period of four years if set up between 1 July 2015 and 30 June 2017.

Profits and gains from new manufacturing units set up in Khyber Pakhtunkhwa and Balochistan are exempt from tax for five years if set up between 1 July 2015 and 30 June 2018.

Profits and gains from electricity transmission projects are exempt from tax for ten years if set up between 1 July 2015 and 30 June 2018.

Profits and gains from manufacturing of cellular phones are exempt from tax for five years if business commenced between 1 July 2015 and 30 June 2017.

**Small companies**
Activities of small companies are encouraged with a reduced income tax rate of 25%.

A small company has been defined to mean a company that:

- is registered on or after 1 July 2005 under the Companies Ordinance, 1984
- has a paid-up capital plus undistributed reserves not exceeding PKR 25 million
- has an annual turnover not exceeding PKR 250 million, and
- is not formed by splitting up or the reconstitution of business already in existence.

**Charitable donations credit**
Companies are allowed a tax credit equivalent to 20% of their taxable income in respect of donations to:
Pakistan

- any board of education or university in Pakistan, established by or under federal or provincial law
- any educational institution, hospital, or relief fund established or run in Pakistan by federal government, provincial government, or local government, and
- any non-profit organisation.

Foreign tax credit
Where a resident taxpayer derives foreign-source income on which foreign income tax is paid within two years from the year in which it is derived, the taxpayer is allowed a tax credit equal to the lower of (i) the foreign income tax paid or (ii) the Pakistan tax payable in respect of that income. However, foreign tax paid is not refundable.

Withholding taxes
WHT on payments of royalty and FTS, when royalty or FTS is not attributable to a PE in Pakistan, is 15% or a lower treaty rate of royalty or gross fees. The tax withheld is deemed to be the final tax liability of the non-resident. In the case of a non-resident where royalty or FTS is attributable to a PE in Pakistan, the amount of royalty/FTS shall be chargeable to tax as normal income, and withholding on payments can be avoided, subject to approval of the commissioner. If a reduced rate is available in a tax treaty, such rate would be applicable.

Resident corporations making certain types of payments must withhold tax as follows:

<table>

Notes

1. This table is a summary only and does not reproduce all the provisions that may be relevant in determining the application of WHT in each tax treaty.
2. Resident and non-resident imply tax status.
3. Individuals and companies are required to render annual returns of income and pay tax at the applicable rates. Credit is given for WHT deducted.
4. WHT rates for interest and royalties given to non-resident corporations (treaty countries) also apply to non-resident individuals.
5. The following remarks for dividends should be noted:
   - The inter-corporate rate of tax on dividends received by a foreign corporation is 12.5%; corresponding treaty WHT rates in excess of 12.5% have been specified.
   - The rates given in the table for treaty countries relate to recipient corporations. The maximum rate, as stated above, in respect of inter-corporate dividends is 12.5%. The lower rates are...
expressly provided in respect of dividends paid to a parent/associated corporation that has a certain minimum holding in a Pakistan industrial undertaking. The level of holding are noted:

- Japan: 25% and 50%.
- United States: 50%.

6. Certain treaties provide for tax exemption of interest paid to the government or the central bank of the contracting state and on foreign loans specifically approved by the federal government.

7. No concession is provided under the treaty.

8. Royalties are exempt from tax, provided the recipient does not have a PE in Pakistan.

9. Inter-corporate dividend where companies are entitled to group relief is exempt.

10. WHT rate depends on percentage of holding in the company.

11. This rate applies if the paying company is engaged in the industrial undertaking.

12. Consideration for technical know-how or information concerning industrial, commercial, or scientific experience.

13. This rate applies if the beneficial owner is a company.

14. This rate applies if the beneficial owner is a bank.

15. This rate applies if the paying company operates in preferred areas.

16. This rate applies if the company is owned by the government.

17. 5% is applicable for royalties payable for copyright of a literary, artistic, or scientific work, but excluding cinematograph films and tapes for television or broadcasting. All other royalties are taxable at 15%.

18. 18% is applicable for royalties payable for patent, trademark, design or model, plan, secret formula, or process of any industrial or scientific equipment, or for information concerning industrial and scientific experience; 15% for copyright of literary, artistic, or scientific work; and 10% for copyright of cinematograph films or tapes for television or radio broadcasting.

19. 10% is applicable for royalties payable for copyright of literary, artistic, and scientific work. All other royalties are taxable at 20%.

---

**Tax administration**

**Taxable period**

The tax year is 1 July through 30 June. However, tax authorities are empowered to approve a special year end.

**Tax returns**

All companies are required to file an income tax return each year by 31 December for the preceding financial year (1 July through 30 June) by accounting for business income on an accrual basis. If the special year granted by the tax authorities ends on 31 December, then the tax return is required to be filed by 30 September following the year-end.

An across-the-board self-assessment scheme is in place whereby assessment is taken to be finalised upon filing of the return. The Commissioner, however, has powers to amend the assessment if it is believed that the ordinance has been incorrectly applied or there is definite information that the assessment made is incorrect. These powers are to be exercised within a prescribed time frame. In the case of transactions between associates, the Commissioner can substitute the transaction value with the fair market consideration. The Commissioner is also empowered to determine tax liability according to the substance of the transaction, disregarding formal arrangements between the parties.

**Payment of tax**

Companies are required to pay advance tax on the basis of tax liability of the immediately preceding tax year in respect of their income (excluding capital gains and presumptive income). The advance tax is to be paid after adjusting the taxes withheld at source (other than the tax withheld relating to final tax regime).

Advance tax is required to be paid in four quarterly instalments on or before 25 September, 25 December, 25 March, and 15 June in each financial year. Credit for tax paid in a tax year shall be allowed against tax liability of that year.

The total tax liability is to be discharged at the time of filing the return of income.

Advance taxes and taxes withheld are adjustable against the tax payable with the return of income.
Pakistan

**Tax audit process**
The Federal Board of Revenue is authorised to prescribe criteria for selection of audit of taxpayers who have filed their returns for a tax year. Based on such criteria, cases are selected through computer ballot separately for income tax, sales tax, and federal excise duty. The returns are examined by tax authorities, and related documents and information are requisitioned. Show cause notices are then raised and, on receipt of explanations from taxpayers, income or loss is assessed. In case of disagreement with assessments, the taxpayer has the right to agitate the issues before appellate forums.

**Statute of limitations**
An audit of the tax return filed by a taxpayer can be conducted by the tax authorities within five years of the end of the financial year in which the return is filed.

**Advance rulings**
A non-resident not operating in Pakistan through a PE can apply to the Federal Board of Revenue to issue an advance ruling setting out the Board's position regarding application of the provisions of the Income Tax Ordinance to a transaction proposed or entered into by the taxpayer. The tax ruling, once issued, is binding on tax authorities.

**Topics of focus of tax authorities**
Tax authorities focus on the following issues:

- WHT.
- Transfer pricing.
- Relationship of expenditure with the business of the taxpayer.
- Advance tax.
- Payment of tax dues within the time prescribed.
- Audit of returns filed.
- Compliance by taxpayers.
- Collection of arrears.

**Other issues**

**Special rules**
Special rules are applicable for computation of income from exploration and production of petroleum, mineral deposits, insurance business, and banking business.

**United States (US) Foreign Account Tax Compliance Act (FATCA)**
Pakistan is under active negotiation with the United States for executing an agreement for compliance with FATCA; however, banks and other entities affected by FATCA are required to register with the US Internal Revenue Service (IRS).
**Panama**

### Significant developments

There have been no significant corporate tax developments in Panama during the past year.

---

### Taxes on corporate income

Panamanian income tax is levied based on the territoriality principle. Panamanian-source income is subject to taxation whether it is received by a resident or non-resident entity. Residency is only relevant to determine if the entity is subject to withholding tax (WHT) or not.

Corporations are subject to income tax at a fixed rate of 25%.

The tax base (i.e. amount to which the tax rate will apply) for companies whose taxable income is greater than 1.5 million United States dollars (USD) is the greater of:

- net taxable income calculated on the normal basis or
- 4.67% of the gross taxable income (excluding exempted and non-taxable income and foreign-source income); this is called the alternate calculation of income tax (*Calculation Alternativo del Impuesto sobre la Renta* or CAIR).

If the entity’s tax year results in a loss due to the alternative calculation, the taxpayer may request to the tax administration (the National Administration of Public Income, i.e. *Administración Nacional de Ingresos Públicos* or ANIP) not to be subject to the CAIR.

The taxpayer may also request not to apply the CAIR if its effective income tax rate is higher than the applicable income tax rate (i.e. 25%). Here is an example of such an instance:

<table>
<thead>
<tr>
<th>Net taxable income</th>

</tr>
</tbody>
</table>

---
Panama

The ANIP has a six-month period within which to reach a decision on such requests; otherwise, the petition will be considered as granted.

**Local municipal tax**

Local municipal tax is charged based on the gross income generated by the business through the corresponding accounting period; it also depends on the type of activity being conducted by the corporation. In most cases, it cannot exceed USD 2,000 per month for each activity performed.

An Annual Municipal Tax Return for the District of Panama must be filed before the Municipal Authorities in the first 90 calendar days after the ending of the fiscal year. In case the taxpayer does not file the return before the deadline, a USD 500 penalty will be applicable.

**Corporate residence**

A company is considered as a tax resident when it has been incorporated in Panama and if Panama is regarded as the place where the central management is located. Entities incorporated abroad may also be registered with the tax administration in order to avoid WHT.

**Permanent establishment (PE)**

Panama follows the Organisation for Economic Co-operation and Development (OECD) PE rules.

Under Executive Decree, the income attributable to a PE or fixed place is that which the PE or fixed place could have obtained if it were a distinct and independent enterprise, taking into account the activities performed, assets used, and risks assumed.

**Other taxes**

**Movable goods and services transfer tax (ITBMS)**

The movable goods and services transfer tax (*Impuesto de Transferencia de Bienes Muebles y Prestación de Servicios* or ITBMS) is the Panamanian value-added tax (VAT).

The general tax rate is currently 7%.

Alcoholic beverages and hotel accommodation are taxed at 10%, and tobacco and tobacco-derived products are taxed at 15%.

ITBMS is calculated on the value-added through a method of tax credits (i.e. ITBMS paid on transactions to produce taxable transactions) and tax debits (i.e. ITBMS collected on transactions).

Exports are not taxed, and the ITBMS paid to generate the exports may be refunded. The sale of goods such as medicines, foods, and certain products for babies are not taxed and may allow the supplier to recover the ITBMS as an exporter if certain criteria is met.

Medical services and transportation, among other services, are not taxed but do not produce ITBMS credit for the supplier.

The statute of limitations is five years.
**Customs duties**

All goods introduced into the Panamanian territory from another country are subject to customs duties. The duty rates are provided by the Panamanian Customs and Tariffs Office.

Customs duties may only be assessed by authorised customs brokers.

**Excise tax (selective consumption tax)**

The selective consumption tax is applied to goods (e.g. jewellery, expensive automobiles, guns, tobacco, alcoholic beverages) and services (e.g. mobile, cable TV, satellite TV) that are considered as non-essential. The tax base is the cost, insurance, and freight (CIF) price plus import duties for imported items and sales price for all other activities. The tax is levied at only one stage: on the importation of the taxed products; on the sale of taxed goods produced in Panama; and, for services, when the service is invoiced, the service is completely rendered, or upon receipt of advance payments, whichever occurs first.

Different tax rates apply depending on the type of service or good, with a minimum of 5% on sodas and 100% on tobacco products.

**Immovable Property Tax**

In Panama, all owners of real estate should pay Immovable Property Tax annually at a rate between 0% and 2.10%, depending on the value of the property.

**Stamp duty**

Stamp duty is charged at a rate of USD 0.10 per USD 100 (or fraction thereof) only on certain commercial contracts.

**Capital gains tax**

The transfer of real estate property and securities is subject to WHT on the gross transactions amount, but the taxpayer may make a special income tax assessment to pay the capital gain and may request a rebate of the difference between the WHT and the capital gain.

In the case of the transfer of real estate property, a 2% real estate transfer tax plus a 3% income tax advance payment must be remitted (calculated over the gross transaction amount or the cadastral value, whichever is greater). The 3% may be deemed definitive; contrariwise, the tax will be assessed at 10% of the gain and the 3% of the advance payment will be credited. Any amount in excess may be subject to rebate.

The rates as described in the table below will be applicable to the transfer of real estate if:

- the transferor’s core business is the sale of real estate with new constructions
- it is the first transfer of the real estate after the new construction is built, and
- the construction permit was issued after 1 January 2010.

<table>
<thead>
<tr>
<th>New housing construction</th>
<th>Rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Up to USD 35,000</td>
<td>0.5</td>
</tr>
<tr>
<td>From USD 35,000 up to USD 80,000</td>
<td>1.5</td>
</tr>
<tr>
<td>Greater than USD 80,000</td>
<td>2.5</td>
</tr>
</tbody>
</table>

New commercial construction 4.5

When transferring new housing real estate, the real estate transfer tax (2%) does not apply if the transfer occurs within the next two years after an Occupancy Permit is issued.
Panama

The transfer of securities is subject to a 5% WHT, and the tax rate on capital gain is 10%. The law establishes the application of a 5% WHT that will be applied by the buyer. The seller may accept the WHT as definitive or perform the calculation of the gain, apply the rate of 10%, and deduce the applied WHT. In case the WHT is superior, the taxpayer can choose to claim the return of payments made in excess.

Example:

<table>
<thead>
<tr>
<th>Sales price (a)</th>
<th>1,000</th>
</tr>
</thead>
<tbody>
<tr>
<td>Cost (b)</td>
<td>900</td>
</tr>
<tr>
<td>Benefit (c)</td>
<td>100</td>
</tr>
<tr>
<td>WHT at 5% of (a)</td>
<td>50</td>
</tr>
<tr>
<td>Tax at 10% of (c)</td>
<td>10</td>
</tr>
<tr>
<td>Payment in excess</td>
<td>40</td>
</tr>
</tbody>
</table>

The sale of fixed assets is subject to 10% on the capital gain, and there is no WHT.

**Franchise tax**

Franchise tax must be paid by all corporations on an annual basis (USD 300 per year). The deadline for payment depends on the date of incorporation of the company. If the company was incorporated on any date during the first six months of the year, the due date for payment will be on 15 July of each year. If it was incorporated in the last six months, the due date will be 15 January of each year.

Non-profit organisations, cooperatives, and civil partnerships are not subject to franchise tax.

**Operations notice tax**

The notice of operations is an annual tax on equity at a rate of 2%, with a minimum tax amount of USD 100 and a maximum tax amount of USD 60,000. In the case of free zones or special trade areas, the tax will be calculated at a rate of 1% up to a maximum tax amount of USD 50,000.

The tax base is the outcome from total assets less total liabilities (excluding liabilities with related parties abroad). Special considerations apply under certain double tax treaties (DTTs).

**Payroll taxes**

**Social security taxes**

Social security tax is assessed at a rate of 9.75% on wages and other compensation paid, including compensation in kind, for employees and 12.25% for employers. There is no maximum limit on the taxable amount.

**Educational insurance tax**

Educational insurance tax is assessed at the rate of 1.25% for employees and 1.50% for employers, on salaries and wages paid. There is no maximum limit on the taxable amount.

**Professional risk tax**

Professional risk tax is an additional tax applicable to employers at 0.33% to 6.25% according to the type of industry.
Branch income

For tax purposes, branches are considered separate entities from the head office and must therefore keep accounts separately and will have separate tax liability.

Branches located within the Panamanian territory must pay dividend tax through definitive WHT of 10% of net taxable income generated by the Panamanian branch, less all income taxes paid by the same corporation in Panama. This amount will be paid jointly on filing the corresponding income tax return.

Income determination

Under the territorality principle, the following will not be considered as taxable income:

- All income produced outside Panama.
- All income generated from operations or services performed outside the Panamanian territory.

Inventory valuation

Inventory should be valued at the start of any business and, subsequently, at least once every accounting period. All assets must be grouped, depending on their nature, with certain characteristics indicated (e.g. the unit of measurement, the name of the asset, the price of the unit, the total value of units). Reference to the accounting records should also be included.

Inventories are generally stated at cost and can be valued using the compound average cost method, first in first out (FIFO) method, retail method, or specific identification method. Since all entities must keep legal records, any adjustment resulting from using different methods of inventory valuation for tax purposes and financial purposes should be recorded and must be reported to the proper authorities. Once a taxpayer adopts a method, they must maintain it for at least five years.

Capital gains

See Capital gains tax in the Other taxes section for a description of how capital gains are taxed in Panama.

Dividend income

Panamanian legislation establishes that distribution of dividends is subject to definitive WHT, applied at the moment of distribution. Generally, dividends are subject to income tax at a rate of 10% without taking into consideration the form of payment, types of stock, assets, or money.

Dividend tax applies at a 5% rate on dividends paid from foreign-source income, from income derived from exports, as well as exempt income from banking account interests and earnings derived from securities issued by the government.

Free zone users are taxed at a 5% rate as well for local-source income.

Loans to shareholders are deemed as dividend distributions, subject to a 10% withholding even in the cases where the 5% tax rate applies.

Notwithstanding the aforementioned, if the entity's shares are issued to bearer, they will be subject to dividend tax at a rate of 20%.

Dividend tax is levied if the entity meets one of the following criteria: (i) requires an operation permit to operate in Panama, (ii) requires an operation key to operate at the Colon Free Zone, (iii) is established in a Fuel Free Zone, (iv) is established in a free zone
Panama

or special zone, (v) produces Panamanian-source taxable income. Dividend tax also does not apply to dividends paid on income received as a dividend if the entity is not required to withhold dividend tax or if the entity withheld the tax.

A complementary tax applies each tax year that the entity distributes less than 40% of the net profits after income tax. The complementary tax is an advance payment of the dividend tax, calculated on the difference of the distributed dividends and 40% of the net profits after income tax, and applies the corresponding tax rate. If complementary tax is paid, then the entity may offset the paid complementary tax with the dividend tax when the corresponding dividend is decreed.

**Inter-company dividends**
The distribution of dividends derived from income received as dividends from other entities is not subject to income tax or dividend tax as long as the entity that paid the dividend in the first instance was exempt from withholding any dividend tax, or if it was required to, made the corresponding withholding.

**Interest income**
Interest income is subject to income tax.

**Foreign income**
Panamanian resident companies are taxed on their income generated within the Panamanian territory. Any other income generated abroad will be exempt from income tax payment but may be subject to dividend tax (see above).

---

**Deductions**

Taxable income is determined by deducting from the Panamanian-source income all costs, expenses, and non-taxable income applicable and permitted by law. The deductibility of costs and expenses depend on the relation of such costs and expenses with the generation or preservation of income source. Special restrictions apply to the following:

- Depreciation.
- Bad debt.
- Charitable contributions.

Costs and expenses related to non-taxable income are not considered as deductible. Thus, the taxpayer must split the expenses and costs related to taxable transactions from those related to non-taxable transactions. The expenses and costs allocated to taxed transactions may not exceed the amount from multiplying the portion of taxable income from the total income by the total costs and expenses.

<table>
<thead>
<tr>
<th>Example:</th>
<th>Taxable</th>
<th>Non-taxable</th>
<th>Total</th>
</tr>
</thead>
<tbody>
<tr>
<td>Income</td>
<td>100</td>
<td>50</td>
<td>150</td>

<th>Straight-line (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Furniture and fixtures</td>
<td>33 as maximum</td>
</tr>
<tr>
<td>Vehicles</td>
<td>33 as maximum</td>
</tr>
</tbody>
</table>

In the case of mines, depletion will be deductible during the useful life or depending on the state contract methodology.

**Goodwill**

Goodwill expenses are deductible only when the transferring agent declares them as income.

**Start-up expenses**

Start-up expenses are deductible through the amortisation process, over a maximum term of five years.

**Interest expenses**

Interest expenses are deductible only in cases where the interest relates to the generation or conservation of taxable income from a Panamanian source. No thin capitalisation rules are in force.

**Bad debt**

A taxpayer may deduct bad debts by opting for one of the following options:

- Deducting gains and losses annually to the value of such accounts in the fiscal year.
- Charging an annual profit and loss figure for the establishment of a reserve to meet contingencies of this nature.

**Charitable contributions**

Donations made in cash or in kind to the government, charitable or educational institutions, activities to promote HIV disease awareness, or political parties are deductible, with certain restrictions and limited to 1% of taxable income.

**Fines and penalties**

Fines and penalties are not deductible.

**Taxes**

The national and municipal taxes that affect capital, sales, and other operations related to taxable income producing activity are deductible.

**Net operating losses**

Losses incurred by common taxpayers may be carried forward and deducted from taxable profits for the following five years, at a rate of 20% each year, but limited to 50% of taxable income. Loss carrybacks are not allowed, and losses are not allowed for estimated income tax purposes.

**Payments to foreign affiliates**

A payment to a foreign entity (including affiliates) in a foreign country will be subject to WHT anytime it represents a deductible cost or expense for the payer. The tax base will be 50% of the remittance, and the income tax rate applicable is 25%.

**Group taxation**

In Panama, there are no group taxation rules.
Panama

**Transfer pricing**
Transfer pricing rules are applicable for all transactions with non-domiciled related parties.

An informative return must be filed within six months after the end of the taxable year. An additional ‘arm’s-length’ economic study must be kept and made available for tax authority inspection upon request.

**Thin capitalisation**
There are currently no thin capitalisation rules in Panama.

**Controlled foreign companies (CFCs)**
There are no provisions regarding CFCs in Panama.

**Tax credits and incentives**

**Foreign tax credit**
Foreign tax credits are not applicable in Panama.

**Free zones**
Entities established in free zones may enjoy exemption from import duties on goods, income tax, sales tax, export tax, and selective consumption tax derived from royalties on exportation and re-exportation activities. Aside from trading activities, the following businesses may also apply for the regime: higher education centres, scientific research centres, specialised centres for health services, high technology businesses, assembling businesses, semi processed or finished products processing businesses, services businesses, environmental service businesses, general services, logistics services businesses, and manufacturing businesses.

**Tourism, industry, and agriculture allowances**
The Incentive Law for Tourism Development grants several tax benefits (e.g. exemption from import duties on certain tourism services and related goods, exemption from property tax for companies dedicated to tourism), but only for those corporations with a signed tourism agreement with the government. Income tax exemptions may apply in special cases.

In general, income from individuals or corporations that engage in agricultural production activities will be exempted from income tax if annual gross income is lower than USD 250,000.

Forestry plantations are totally exempted from income tax payment until 2018 if the lot planted has been duly registered at the Forestry Registry of the Environmental National Authority and resolution with approval from this authority has been issued.

**Special laws**
The Panamanian government has enacted special laws regarding tax exemptions for certain activities performed in Panama, such as call centres (Law No. 54 of 2001), and tax exemptions for certain appointed areas, such as the Panama Pacific Economic Zone (Law No. 41 of 2004) and Law No. 41 of 2007, which creates a special regime for the establishment and operation of regional headquarters in Panama.

By means of Law No. 8 of 2010, Real Estate Investment Societies may deduct the profits distributed to their shareholders, provided that these Real Estate Investment Societies:

- raise long-term funds in a securities market
- are registered in the National Securities Commission
- distribute no less than 90% of their free cash flow
• register in the General Direction of Revenues, and
• withhold 20% of the profits distributed as an income tax advance payment on behalf of the shareholder, which may be deemed the definitive tax to be paid by the shareholder.

**Withholding taxes**

Royalties and commissions on services paid to foreign entities are taxed through the application of the corresponding tax rate (i.e. 25%) over 50% of remittance under the concept of WHT (effective tax rate is 12.5%). The taxpayer may decide not to withhold taxes and consequently not deduct the expense.

Payment of interest is also subject to income tax on 50% of the interest paid to a beneficiary abroad on loans invested in Panama, but the payer must proceed with the WHT even if one does not deduct the interest.

If the beneficiary is registered as a taxpayer in Panama before the tax administration, no WHT may be required.

If, according to a special law, the payment of interest, royalties, dividends, fees, etc. is exempt from WHT, said exemption will not apply if the beneficial owner of the payment can credit the taxes that would have been paid in Panama in its country of residence. In the event that the credit application is not allowed in the country of residence, the taxpayer must request a formal opinion from an independent expert stating the non-applicability of the tax credit in the country of residence.

```
Recipients Dividends (%) Interest (%) Royalties (%)
Foreign corporations 5/10/20 12.5 12.5
```

In case of treaties, special rules are applicable in order to avoid double taxation.

Notes

1. Depending on the percentage of ownership held by the beneficial owner (at least 25% to apply the 5% rate).
2. Depending on the person or entity receiving the payment. If the beneficial owner is a bank, the 5% rate will apply; if the beneficial owner is the Central Bank of either state, the 0% rate will apply; in all other cases, the 7.5% rate will apply.

3. If the services are not rendered in any of the states, the income will only be taxed in the state where such income arose.

4. If paid to government financial institutions, the 0% rate will apply.

5. 3% for the use or right to use industrial, commercial, or scientific equipment.

6. Depending on the percentage of ownership held by the beneficial owner (at least 10% to apply the 5% rate).

7. Depending on the person or entity receiving the payment. If the beneficial owner is a bank, the 5% rate will apply; if the beneficial owner is the Central Bank of either state, the 0% rate will apply; in all other cases, the 10% rate will apply.

8. The 12.5% rate applies if the person rendering the services is in the other state for more than 60 days.

9. No WHT is levied if the foreign company (beneficial owner) receiving the dividends directly holds at least 15% of the shares of the company paying the dividends, provided that the shares of the foreign company are regularly traded on a recognised stock exchange or at least 50% of the shares of the foreign company is owned by residents of either contracting state or by companies the shares of which are regularly traded on a recognised stock exchange. Also, no WHT is levied if the foreign company is a bank or insurance company, a state or political subdivision, a headquarter owning at least 10% of the shares of the Dutch company, or a pension fund.

10. Depending on the percentage of ownership held by the beneficial owner (at least 10% to apply the 10% rate).

11. If the services are rendered in Panama, then the 10% rate will apply.

12. Depending on the percentage of ownership held by the beneficial owner (at least 10% to apply the 4% rate).

13. 5% WHT rate is levied if the recipient (excluding partnerships) is a shareholder with at least a 40% direct interest in the paying company; otherwise, a 10% rate is levied. No WHT is levied if the recipient is a shareholder with at least an 80% direct interest in the paying company, and (i) its shares are listed on a stock exchange, (ii) the recipient is at least 50% owned by residents from either of the two countries, (iii) the recipient is owned by shareholders resident for tax purposes in third countries by a proportion of less than 25%, and (iv) the recipient is owned (an interest of more than 25%) by residents in third countries, provided that a tax treaty for the avoidance of double taxation has been signed with the country of the company paying the dividends and that this tax treaty establishes the same or more favourable conditions. No WHT is levied for dividends paid to pension funds.

14. No WHT is levied if the foreign company (beneficial owner) receiving the dividends directly holds at least 15% of the shares of the company paying the dividends, provided that the shares of the foreign company are regularly traded on a recognised stock exchange or at least 50% of the shares of the foreign company is owned by residents of either contracting state or by companies the shares of which are regularly traded on a recognised stock exchange.

15. 5% but only if: (i) the interest is beneficially owned by: (i) an individual, (ii) a company with shares regularly traded on a recognised stock exchange, (iii) a financial institution or (ii) the interest is paid by: (i) a state, political subdivision, or local authority, (ii) a bank, or (iii) on a quoted eurobond. The 0% rate will apply if it is paid to the Central Bank of either state.

16. If the person is more than 90 days in Panama, then the 12.5% rate will apply.

17. 0% applies for sales on credit and payments to the Central Bank; 5% for payments to banks in general; and 10% for all other cases.

18. 5% if the beneficial owner is resident of a contracting state or the beneficial owner is a pension scheme.

---

**Tax administration**

**Taxable period**

The accounting period is the period for which the company makes its accounts. Returns shall be made upon completion of the accounting period and may not exceed 12 months. For most companies, it is usually from 1 January to 31 December.

**Tax returns**

The due date for filing is three months after the end of the fiscal year, with the possibility for an extension of up to one additional month.

**Payment of tax**

Income tax payment shall be made depending on the income tax return and shall be made no longer than three months after closing of the corresponding accounting period.

Taxpayers must pay estimated taxes (usually the same amount as generated income) at the end of the sixth, ninth, and 12th month after the end of the corresponding accounting period.
**Tax audit process**
Tax authorities select the taxpayers subject to audit based on internal criterion.

**Statute of limitations**
The tax administration may audit the income tax returns filed within the last three years from the last day of the year on which the tax return was filed.

**Topics of focus for tax authorities**
Among the topics of focus are non-deductible expenses, withholdings, and VAT.

**Other issues**

**US Foreign Account Tax Compliance Act (FATCA)**
Panama signed the Model 1 Intergovernmental Agreement (IGA) for FATCA purposes with the US Treasury in order for Panamanian Banks to subscribe to the terms of FATCA.

**Significant developments**

The 2016 National Budget was handed down on 3 November 2015. The budget contained no material changes to the tax regime, as most of the amendments were technical in nature.

---

**Taxes on corporate income**

Papua New Guinea (PNG) resident companies are liable for income tax on their worldwide income. Companies that are not resident in Papua New Guinea are only required to remit tax on income sourced in Papua New Guinea. A non-resident’s PNG-sourced passive income, including dividends, interest, and royalties, is generally only subject to withholding tax (WHT). It is ordinarily the case that the payer of the dividend, interest, or royalty must withhold the relevant amount of the tax and remit this to PNG’s Internal Revenue Commission (IRC).

Papua New Guinea levies corporate income tax (CIT) on companies on a flat rate basis. The operations of a company, rather than the company’s taxable income level, will dictate the rate applied to the company’s taxable income.

Generally, trading profits and other income (except income that is specifically exempt) of resident companies in Papua New Guinea are assessed tax at a rate of 30%, whereas non-resident companies operating in Papua New Guinea are assessed tax at a rate of 48%. There are, however, different tax rates for income derived from mining, petroleum, and gas operations.

Specifically, trading profits and other income from operations in Papua New Guinea are liable for CIT at the following rates:

<table>
<thead>
<tr>
<th>Source of income</th>
<th>CIT rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Income other than income from mining, petroleum, or gas operations:</td>
<td></td>
</tr>
<tr>
<td>Resident company</td>
<td>30</td>
</tr>
<tr>
<td>Non-resident company</td>
<td>48</td>
</tr>
<tr>
<td>Income from petroleum operations: *</td>
<td></td>
</tr>
<tr>
<td>Existing projects</td>
<td>50</td>
</tr>
<tr>
<td>New projects</td>
<td>45</td>
</tr>
<tr>
<td>Incentive rate projects</td>
<td>30</td>
</tr>
<tr>
<td>Income from mining operations:</td>
<td></td>
</tr>
<tr>
<td>Resident company</td>
<td>30</td>
</tr>
<tr>
<td>Non-resident company</td>
<td>40</td>
</tr>
<tr>
<td>Income from gas operations *</td>
<td>30</td>
</tr>
</tbody>
</table>

* The same rates of CIT apply to income from the petroleum operations listed above or gas operations derived by a resident or non-resident company.
**Overseas shippers**
Income derived by overseas shippers or charterers carrying passengers, livestock, mail, or goods out of Papua New Guinea is taxable in Papua New Guinea. The tax is calculated on a deemed taxable income equal to 5% of the gross income, which is taxable at the non-resident rate of 48% in the case of companies. The IRC may exempt the overseas shipper from tax if the shipper’s home country exempts PNG shippers from a similar tax.

**Local income taxes**
There are no local income taxes in Papua New Guinea.

**Corporate residence**
A company will be deemed a resident for CIT purposes if it meets either the (i) incorporation test or (ii) the management and control test.

**Incorporation test**
A company incorporated in Papua New Guinea is automatically regarded as a PNG tax resident. However, the operation of the law of another country and a relevant double taxation treaty (DTT) may result in a company also being treated as resident in another country.

**Management and control test**
A company is a PNG tax resident if it is managed and controlled in Papua New Guinea, regardless of where it is incorporated. Generally, a company is managed and controlled in Papua New Guinea if key decisions affecting the company are made at directors’ meetings held in Papua New Guinea. This also includes a company incorporated outside Papua New Guinea that trades in Papua New Guinea and has its voting power controlled by resident shareholders.

**Dual residence**
An entity may be a tax resident of both Papua New Guinea and another country by application of domestic legislation. A DTT entered into between Papua New Guinea and another country may contain a tiebreaker test to determine the country of residence for the purposes of the DTT.

**Permanent establishment (PE)**
The concept of ‘permanent establishment’ has limited significance in the domestic taxation law of Papua New Guinea and is defined to mean a place at or through which a person carries on any business. Under domestic taxation law, Papua New Guinea will seek to tax the PNG-sourced income of a non-resident irrespective of whether or not that income is derived at or through a PE in Papua New Guinea.

Where PNG has entered into a DTT, the concept of PE becomes more important as it will then be one of the factors determining Papua New Guinea’s taxing rights over income sourced in Papua New Guinea, particularly with respect to the business profits of a non-resident company. In general terms, Papua New Guinea’s DTTs:

- define a PE to be a fixed place at or through which the business of an enterprise is wholly or partly carried on, and
- deem a PE to exist in various circumstances, including those relating to the presence of substantial equipment in the contracting state and the time spent by personnel of an enterprise furnishing services in a contracting state.
Papua New Guinea

**Other taxes**

**Goods and services tax (GST)**
The GST rate is 10% and applies to most goods and services supplied in Papua New Guinea. Exported goods and services attract a zero rate of GST. Goods and services, other than motor cars, supplied to mining, petroleum, or gas companies are also zero-rated. Some goods and services are exempt, including medical, educational, and financial services. Land is excluded from GST, but buildings and other improvements are subject to the tax.

An import GST deferral scheme was introduced in the 2015 National Budget and is effective from 1 January 2016. While no formal guidance on its administration has been issued, we understand taxpayers will need to have a good history of tax compliance in order to qualify.

Directors of companies that fail to comply with GST obligations are personally liable for a penalty equal to the outstanding tax liability that the company ought to have remitted to the IRC.

**Customs duties**
The majority of manufacturing inputs (including plant and machinery) attract no customs duties, and other customs duty rates are being progressively reduced. The remaining rates for customs duties vary depending on the nature of the good being imported and are assessed on the total value of the goods imported, including cost, insurance, and freight (CIF). Customs bonds may be issued for the temporary importation of goods that are to be re-exported within 12 months.

**Excise taxes**
Although customs duties are now minimal in many cases, some goods, most notably motor vehicles, now attract excise tax. Private motor vehicles generally attract excise tax at the rate of 60%, whereas work vehicles attract excise tax of 10%. Excise taxes can also apply to some domestically produced goods, including refined fuel products, alcohol, and tobacco. The tobacco excise tax is levied at 5% biannually (10% annually).

**Land tax**
Land tax is imposed annually by provincial governments on the unimproved value of the land, and the power to levy land tax is vested exclusively with the provincial governments. In Papua New Guinea, land tax is difficult to implement and faces major geographical and social problems.

**Stamp duties**
Stamp duty applies at varying rates on documents and certain transactions. Of particular note is duty charged on the conveyance of property, which rises to a maximum of 5% where the value of the property being transferred exceeds 100,000 PNG kina (PGK). The duty is payable by the purchaser, and a 5% duty on the unencumbered value of land may also be payable where there is a transfer of shares in certain landholding companies.

Other dutiable transactions include share transfers (including some share buy-backs), which are subject to a rate of 1%. The Collector of Stamp Duties has the power to amend assessments and refund overpayments of stamp duty.

The Stamp Duties Act was amended to implement a rental income compliance system. The amendment effectively makes it compulsory for a landlord to provide their Taxation Identification Number (TIN) on lease documents, as lease documents will not otherwise be stamped.

Stamp duty is payable on documents executed outside Papua New Guinea that relate to property or matters done or to be done in Papua New Guinea.
**Export duties**

**Timber**
Export duty on timber logs (not sawn timber or plantation logs) is calculated with reference to the freight on board (FOB) value per cubic metre of exported logs and rates that increase as the value of the exported logs increase.

**Spices**
Levies are imposed from time to time on the export of specified spices (e.g. vanilla).

**Salary or wages tax (SWT)**
Businesses paying salary or wages to employees are required to withhold SWT (calculated at the prescribed marginal rates) and remit to the IRC on the seventh day of the month following the month of payment.

Salary or wages is defined as remuneration paid to employees in cash or kind, including benefits such as accommodation and transportation.

Normal employment-related receipts and benefits also include any remuneration paid as consultancy fees or fees for professional services, where the remuneration is paid wholly or substantially for personal services performed in Papua New Guinea.

Directors are personally liable for any unpaid SWT obligations of their companies. Directors who fail to ensure their company complies with its SWT reporting obligations may be penalised at a rate of 20% of the unpaid tax liability per annum. After three months of non-payment of outstanding SWT, directors will not be able to obtain a remission of penalties imposed.

**Contributions to employee superannuation funds**
Contributions to employee superannuation funds are compulsory for entities with 15 or more permanent employees. The employer’s compulsory contribution is 8.4% of each employee’s gross basic salary. The employee’s minimum contribution is 6.0%.

Membership is generally compulsory for citizens. Non-citizens are currently exempt; however, this is under continuing review.

Contributions must be paid to an authorised superannuation fund. Contributions paid to an authorised fund are tax-deductible to the extent that they do not exceed 15% of the relevant employee’s gross taxable salary. Contributions to non-resident funds are not tax-deductible.

**Training levy**
All businesses whose annual payroll exceeds PGK 200,000 are subject to a 2% training levy, calculated on the sum of the taxable salaries, including benefits, of all personnel. Qualifying expenses incurred in training PNG citizen employees are creditable up to the actual amount of the levy. The training levy, if payable, is not tax-deductible.

**Departure tax**
A departure tax is collected by airlines issuing tickets for persons departing Papua New Guinea.

**Gaming machine tax**
Papua New Guinea imposes a 74% tax on gross revenue from gaming machines.

**Resource project production levies**
Production royalties of 2% are payable to the national government on the net smelter return from mining operations. These royalties are tax-deductible. A royalty, at the rate of 2% of the wellhead value, is also payable from the production of petroleum and
gas operations. Holders of new petroleum development licences are entitled to treat royalties as income tax paid. However, new petroleum projects will also pay a tax-deductible development levy calculated at the same rate of 2% of the wellhead value.

Mining projects are also required to pay a production levy to the Mineral Resources Authority calculated at a rate between 0.25% and 0.5% of the assessable income from production.

**Branch income**

Income derived by a non-resident contractor for services in Papua New Guinea is usually subject to a WHT at the rate of 12% of gross income. This amount is calculated on deemed taxable income of 25% of the gross contract income, which is taxed at the non-resident tax rate of 48% (subject to tax treaties). The provisions extend to payments for the following:

- The installation, maintenance, and use in Papua New Guinea of substantial equipment or machinery.
- Construction projects.
- For the lease or charter of any industrial, commercial, or scientific equipment or any machinery or vehicle.
- Consultancy or management services.

Where the non-resident contractor rules do not apply, the non-resident company will be subject to income tax at the non-resident tax rate of 48% on its PNG-sourced taxable income (see the *Income determination* section for a definition of taxable income).

PNG branch remittances are not liable for dividends WHT or any branch profits or similar tax.

**Income determination**

Taxable income is defined as the sum of assessable income minus allowable deductions. In practice, profits are calculated for tax purposes by reference to the profits reported in the financial accounts. Accounts must be prepared in accordance with PNG accounting principles, which follow the International Financial Reporting Standards (IFRS).

**Inventory valuation**

There is no form of stock relief or trading stock valuation adjustment to recognise the effects of inflation in Papua New Guinea. There is a once-only option to adopt the lowest of the cost amount, the market selling value, or the replacement value (which, in practice, may mean that book and tax valuations for trading stock are not aligned). Where the option is not exercised, the value of the stock is deemed to be the cost price; however, neither the income tax law nor the associated regulations provide detailed guidance on what constitutes ‘cost price’ (the Commissioner General of Internal Revenue has not produced any related guidance to date). It will generally be the case that where a taxpayer has determined a cost price in accordance with IFRS that cost price will also be accepted for income tax purposes.

In special circumstances, the Commissioner General of Internal Revenue may accept a lower valuation.

**Capital gains**

There is no general capital gains tax in Papua New Guinea. However, profits arising on the sale of property acquired for the purpose of resale at a profit, or from the carrying out of a profit-making scheme, are taxable as ordinary income.
**Dividend income**

Unless otherwise exempt from CIT, dividends are included in the assessable income of a shareholder.

**Inter-company dividends**

Dividends received by a resident company from other companies, whether resident or non-resident, while being assessable to tax, are generally subject to a full tax rebate and are effectively received tax-free. However, where a company has losses on other activities or losses carried over from earlier years, those losses are applied against dividend income before the calculation of the dividend rebate.

**Stock dividends**

In most cases, the payment of a dividend by way of the issue of shares is subject to the same taxation treatment as the payment of a dividend by way of cash or the distribution of other property. However, dividends paid by the issue of shares wholly and exclusively out of profits arising from the sale or revaluation of assets not acquired for the purpose of resale at a profit are exempt from income tax and dividends WHT.

**Interest income**

Unless exempt under specific provisions, interest paid or credited by a financial institution, the Central Bank, or a company to a person resident in Papua New Guinea is includable in income, and the person making the payment of or crediting interest in the account is liable to withhold and pay tax upon the amount.

**Partnership income**

A partner’s share of the assessable income of the partnership less all allowable deductions to the partnership is includable in the partner’s assessable income for the year of income. Likewise, the partner’s individual interest in a partnership loss incurred in the year of income is an allowable deduction. Further, if income is exempt income to the partnership, this income will be exempt income to the individual partner relative to their individual interest.

**Unrealised exchange gains/losses**

Generally, foreign exchange gains realised and derived from debts made on or after 11 November 1986 or denominated in a currency other than the Papua New Guinea kina are included in assessable income.

**Foreign income**

PNG resident companies are liable for CIT on their income from all sources (i.e. including foreign-sourced income). A foreign tax credit may be available to offset foreign tax paid against PNG tax payable (see the Tax credits and incentives section for more information).

There are no provisions in Papua New Guinea that permit the deferral of the taxation of income derived outside Papua New Guinea. Subject to the operation of a DTT, foreign-sourced income derived by a resident of Papua New Guinea is subject to tax in Papua New Guinea in the year in which it is derived, irrespective of whether or not that income is repatriated to Papua New Guinea.

**Deductions**

General deduction provisions provide that all losses and expenditures, to the extent incurred in gaining or producing the assessable income or necessarily incurred in carrying on a business for the purpose of gaining or producing that income, are allowable deductions. However, the general deduction provisions do not allow a deduction to the extent a loss or expenditure is an outgoing of capital, or of a capital,
private, or domestic nature, or incurred in relation to the gaining or production of exempt income.

**Depreciation**
Depreciation is allowed for equipment and other assets at prescribed rates. A taxpayer must use the diminishing-value method unless an election is made to use the prime-cost method. The applicable diminishing-value rates are 150% of the prime-cost rates.

**Plant, machinery, and equipment**
Plant, machinery, and equipment (including buildings) are depreciable at rates according to their estimated lives. A taxpayer other than a taxpayer who derives income from mining, petroleum, or gas operations may elect to claim special accelerated depreciation rates for certain capital items. For example, flexible depreciation rates (up to 100%) may be claimed on new industrial plant with a life exceeding five years that is used for manufacturing purposes. Other new plant and articles used in manufacturing, construction, transport, storage, communication, and agricultural production are eligible for an accelerated deduction equal to 20% of cost in the year of purchase. New plant and articles used for tourism are eligible for an accelerated deduction equal to 55% of cost in the year of purchase.

**Motor vehicles**
Motor vehicles are generally depreciable at 20% of prime cost. There is no upper limit in value for depreciation purposes.

**Buildings**
Buildings forming an integral part of plant, machinery, and equipment are depreciable at a prime-cost rate of up to 7.5%, depending on the construction materials. Buildings housing plants eligible for the one-year write-off deduction (see comments on new industrial plant under Plant, machinery, and equipment above) can be written off in the year of construction. Other income producing buildings may qualify for the accelerated deduction of 20% in the year of purchase.

**Agricultural and fishing plants**
Most items of new agricultural and commercial fishing plants qualify for 100% depreciation, as do boats and ships, including ancillary equipment, used solely as dive boats or for scuba diving by accredited tour operators. Other new items having a life exceeding five years used by a person carrying on agricultural operations are eligible for accelerated depreciation in the initial year of use.

**Goodwill**
A deduction is not available for goodwill or the amortisation of goodwill in Papua New Guinea (this being an amount not deductible under ordinary concepts and an item for which there is no specific deduction provision).

**Start-up expenses**
It will generally be the case that start-up expenses will not be deductible in Papua New Guinea. Such expenses are generally either capital, or of a capital nature, or incurred prior to the derivation of assessable income. There is no specific deduction provision for the deductibility of start-up expenses.

**Interest expenses**
A deduction is generally available for interest incurred on an arm's-length basis, subject to meeting the general principles for deductibility and the requirements under the thin capitalisation rules (see Thin capitalisation in the Group taxation section). Where interest is incurred in connection with the construction or acquisition of a plant or capital asset, that interest is not immediately deductible. Rather, such interest is deemed to form part of the cost of that asset (and in the case of a plant will then form part of the base from which future depreciation deductions may be claimed).
Bad debt
Bad debts are deductible if they have previously been included in assessable income and written off by year end or if the bad debt was in respect of money lent in the ordinary course of the taxpayer’s business of money lending.

Double deductions
An additional amount equal to the actual amount of expenditure incurred is deductible in respect of certain expenditures (e.g. export market development costs, some staff training costs, certain donations). In other words, a ‘double deduction’ is available with respect to these items.

Donations
It is considered that donations made by a corporate taxpayer meet the general principles for deductibility and hence will generally be deductible (notwithstanding the specific provision dealing with gifts to charitable bodies has no current effect as there are no charitable bodies approved by the Commissioner General of Internal Revenue for this purpose). There are specific provisions in Papua New Guinea’s taxation law dealing with the deductibility of certain donations, some of which provide a deduction for up to 200% of the value of the amount donated.

Pension expenses
Contributions paid to an authorised superannuation fund are tax-deductible to the extent that they do not exceed 15% of the relevant employee’s gross taxable salary. Contributions to non-resident funds are not tax-deductible. See the Other taxes section for more information.

Fines and penalties
There are no specific provisions denying a deduction for fines or penalties in Papua New Guinea taxation law; however, arguably, fines and penalties may not meet the general principles for deductibility, and their deductibility needs to be considered on a case-by-case basis.

Taxes
A deduction is not allowable in respect of payments of income tax or training levy. Other taxes may be deductible, subject to meeting the general principles for deductibility.

Net operating losses

Domestic
Trading losses may be offset against all income received in the same accounting period or carried forward and offset against future trading profits. The limitation period on the carryforward of losses is generally 20 years. Losses may not be carried back against prior years’ profits. Primary production losses and resource project losses may be carried forward without a time limitation, although, again, they may not be carried back (see the Tax credits and incentives section for more information).

Note that the carryforward of losses is subject to a 50% or more continuity of shareholding and control test, or a continuity of business test where there is a breach of the ownership test.

Foreign
Losses incurred by a resident taxpayer from a source outside Papua New Guinea (other than in relation to export market development) are not deductible against assessable income derived within Papua New Guinea. In practice, overseas losses can be carried forward and offset against overseas income for up to 20 years.
**Payments to foreign affiliates**
The deduction available to a taxpayer for management fees paid to an associated person is limited to the greater of:

- 2% of assessable income derived from PNG sources by the taxpayer or
- 2% of the total allowable deductions, excluding management fees incurred by the taxpayer in Papua New Guinea.

The limitation applies to both resident and non-resident taxpayers. Special rules apply to mining, petroleum, and gas companies. These limits may not apply where the recipient of the management fee is resident in a country with which Papua New Guinea has a DTT or where it can be demonstrated that the management fee arrangements do not have the purposes or effect of avoiding or altering the income tax payable in Papua New Guinea.

**Group taxation**
Companies are assessed for CIT separately, regardless of whether they are part of a group of associated or related companies. Losses of one company within a group cannot be offset for tax purposes against the profits of another company within that group.

The Companies Act allows two or more companies to amalgamate and continue as one, and provisions are in place to allow this to occur without any adverse CIT consequences.

**Transfer pricing**
Papua New Guinea has transfer pricing provisions that require transactions with foreign affiliates to be conducted on an arm's-length basis. Disclosure of such transactions is done through an international dealings schedule (IDS). Corporate taxpayers (including companies, superannuation funds, and unit trusts) that have transactions or dealings with international affiliates that exceed PGK 100,000 in an income year or have aggregate loan balances with international affiliates in excess of PGK 2 million at any time during an income year are required to prepare and lodge an IDS with their income tax return for that year of income.

**Thin capitalisation**
Thin capitalisation rules apply to prevent taxpayers from incurring excessive levels of debt. By excessively gearing their investments, companies are able to claim greater tax deductions through the interest expense charged on such debt. Thin capitalisation rules typically feature a debt-to-equity ratio that governs the ratio by which companies can borrow from related parties relative to their equity. Any interest charged on debt that exceeds this ratio will not be deductible for CIT purposes.

Papua New Guinea's thin capitalisation rules apply a debt-to-equity ratio of 3:1 to PNG resource companies and 2:1 to all other PNG companies.

These rules do not apply to licensed financial institutions and do not apply to interest paid under domestic debt for non-resource companies. If the ratio is breached, a proportion of the interest on foreign debt will be denied as a tax deduction. For resource companies, a proportion of interest on all debt will be denied.

**Controlled foreign companies (CFCs)**
Papua New Guinea does not have CFC rules.

**Tax credits and incentives**
In this section, we comment on the more significant tax credits and incentives available in Papua New Guinea, followed by a summary of those with more limited application.
Foreign tax credit
A foreign tax credit may be available to offset foreign tax paid against PNG tax payable. The foreign tax credit is limited to either the foreign tax paid or the average PNG tax payable on that foreign income, whichever is less. There is no mechanism to carry forward excess foreign tax credits for utilisation in a subsequent year.

Primary production incentives
Key incentives that are available with specific application to primary production activities include:

- **Outright deductions** for certain capital expenditures, including clearing, preparing, or conserving land for agriculture; eradicating pests; providing labourers’ accommodation; and for the conservation and conveyance of water.
- **A 100% deduction** is available for a new plant used directly for the purposes of agricultural production, and an initial 20% accelerated depreciation deduction is allowed for a new plant with a life exceeding five years.
- **Losses** incurred in carrying on a primary production business can be carried forward indefinitely; they are not restricted to the 20-year limit that generally applies to company tax losses.
- **Agricultural companies** may transfer to their shareholders the benefit of the outright tax deduction available for many types of capital expenditures. The total deduction available to shareholders may not exceed the amounts paid on their shares.
- **As part of promoting investment in primary production**, a 20% tax rate is prescribed in respect of ‘incentive rate primary production income’ derived by a company (as opposed to the normal 30% tax rate for a resident company or 48% for a non-resident company) for up to ten years.

Agricultural production extension services deduction
A 150% deduction is available for expenditure on services provided free of charge to smallholder growers, including the provision of advice, training, and technical assistance in relation to primary production to assist growers with production, processing, packaging, and marketing issues.

Incentive rate for large-scale tourist accommodation facilities
A 20% tax rate applies to income derived by a taxpayer from the operation of a large-scale tourist accommodation facility or a substantially improved large-scale tourist accommodation facility. The concession applies where construction of such facilities commenced between 1 January 2007 and 31 December 2011, expenditure is 7 million United States dollars (USD) or more, and the taxpayer is registered with the IRC. The rate applies for 14 years after the end of the year of income in which the taxpayer first derives income from the facility.

Double deduction for staff training costs
Certain staff training costs, including the cost of full-time training officers and tourism training, are eligible for a double deduction. The total tax saving is limited to 75% of the expenditure incurred.

Double deduction for export market development costs
Expenditure incurred in the promotion for sale outside Papua New Guinea of goods manufactured in Papua New Guinea or tourism promotion is eligible for double deduction. The total tax saving cannot exceed 75% of the expenditure incurred.

Export incentives
Prior to 1 January 2015, the net export income from the export sale of certain types of goods was exempt for the first four years of income, with a partial exemption in the following three years. This exemption is not applicable from 1 January 2015 (except in respect of goods that qualified for the exemption prior to that date).
Tax credit for infrastructure development by agricultural, mining, petroleum, and gas companies
A tax credit is available to agricultural, mining, petroleum, gas, and certain tourism companies that incur expenditure on a prescribed infrastructure development. In the case of taxpayers engaged in mining, petroleum, and gas operations, the credit is limited to 0.75% of the assessable income or the amount of tax payable for the year (in respect of that mining, petroleum, or gas project), whichever is less. Excess expenditure over the 0.75% or tax payable may be included in the following year’s rebate claim.

Unutilised credits or excess expenditure can generally only be carried forward for two years. In the case of taxpayers engaged in agricultural production, the credit is limited to 1.5% of the assessable income or the amount of tax payable for the year, whichever is less.

A prescribed infrastructure development includes a school, aid post, hospital road, and other capital assets that have been approved as such by the Department of National Planning and the IRC. It cannot be an expenditure required under the Mining Act or the Oil and Gas Act.

Other tax incentives in Papua New Guinea
Other tax incentives available in Papua New Guinea include:

• Manufacturers’ wage subsidy.
• Immediate deduction for the costs of acquiring and installing solar heating plant.
• A ten-year tax exemption for qualifying new business located in prescribed remote areas of Papua New Guinea.
• A specific deduction for environmental protection and clean-up costs.

Incentives for petroleum, mining, and gas operations
Special incentives and rules apply to mining, petroleum, and gas exploration, extraction, and production activities. The main aspects are as follows:

Project basis of assessment
A project basis of assessment (ring-fencing) is adopted for all resource projects. This means losses from other operations, regardless of whether or not they are resource related, cannot generally be offset against resource project income from a particular ring-fenced project. However, there are some concessions to the ring-fencing principle in respect of exploration expenditure and expenditure in respect of discontinued projects and losses arising from site restoration costs.

In general, all costs incurred in the exploration and development phases of the project are accumulated and amortised over the life of the project. Once production starts, an immediate deduction is allowed for ‘normal’ operating and administration expenses. Capital expenditure incurred after the start of production are capitalised and amortised over the life of the project.

Rate of tax
The rates of tax in respect of income from a resource project are:

<table>
<thead>
<tr>
<th>Source of income</th>
<th>CIT rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Mining</td>
<td>Non-resident companies</td>
</tr>
<tr>
<td></td>
<td>30</td>
</tr>
<tr>
<td>Petroleum:</td>
<td>Non-resident companies</td>
</tr>
<tr>
<td>Existing projects</td>
<td>50</td>
</tr>
<tr>
<td>New projects</td>
<td>45</td>
</tr>
<tr>
<td>Incentive rate</td>
<td>30</td>
</tr>
<tr>
<td>Gas</td>
<td>30</td>
</tr>
</tbody>
</table>
Interest deductions
Interest is not deductible prior to the commencement of a resource project. Following the issue of a resource development licence, a person carrying on a resource project or exploration in relation to a resource project may claim a deduction against resource income for interest on money borrowed for carrying on the relevant operations or exploration. This is subject to a number of conditions, including the resource company maintaining a debt-to-equity ratio of 3:1 (see Thin capitalisation in the Group taxation section).

Capital allowances
Allowable exploration expenditures (AEE) are amortised over the life of the resource project. The deduction is calculated by dividing the unamortised balance by either the remaining life of the project or four, whichever is less. The amount of the deduction is limited to the amount of income remaining after deducting all other deductions, other than deductions for allowable capital expenditure. In other words, the deduction cannot create a tax loss.

Allowable capital expenditures (ACE) are amortised over the life of the resource project. The ACE is split into two categories: capital expenditures with an estimated effective life of more than ten years (long-life ACE) and capital expenditures with an estimated effective life of less than ten years (short-life ACE).

The annual deduction for long-life ACE is claimed on a straight-line basis over ten years. Where the remaining life of the project is less than ten years, the rate at which the deduction is allowed is calculated by referring to the remaining life of the project. For short-life ACE, the annual deduction is calculated by dividing the unamortised balance by either the remaining life of the project or four, whichever is less. For new mining projects, the deductions for both long-life ACE and short-life ACE are calculated by dividing the unamortised balance by either the remaining life of the project or four, whichever is less.

The amount of the deduction for ACE is limited to the amount of income remaining after deducting all other deductions. In other words, the deduction cannot create a tax loss.

Off-licence exploration expenditure
A major easing of the ring-fencing principle applies to taxpayers that are involved in a producing project where the taxpayer or a related party incurs exploration expenditure outside the area of the productive project. In this situation, the taxpayer can elect (whether or not it is currently involved in a producing project) to add such exploration expenditure to an exploration pool that can be amortised against income from the producing project.

The amount allowable as a deduction from this exploration pool in respect of resource operations carried on by the taxpayer or a related corporation is the lesser of:

- 25% of the total undeducted balance of expenditure in the exploration pool or
- such amount as reduces CIT (other than additional profits tax [see below]) that would, but for this deduction, be payable by the taxpayer and its related corporations in respect of those resource operations for that year of income, by 10% (or 25% for mining projects).

Management fees
Once a resource project derives assessable income, the deduction for management fees is restricted to 2% of operating expenses other than management fees. During the exploration phase of a project, the amount of management fees that can be treated as allowable exploration expenditure is limited to 2% of the exploration expenditure other than management fees. Furthermore, during the development phase, the amount of
management fees that can be treated as allowable capital expenditure is limited to 2% of the allowable capital expenditure other than management fees.

**Transfer of expenditure**
When interests are transferred from one taxpayer to another, the vendor and purchaser can agree to transfer deduction entitlements for the unamortised balances of allowable exploration expenditure and allowable capital expenditure to the purchaser.

**Liquefied natural gas (LNG) project**
A number of provisions with specific application to the PNG LNG project have been included in the Income Tax Act, Stamp Duties Act, Goods and Services Tax Act, Customs Act, and Excise Act.

Other provisions were added or amended at the same time as the PNG LNG project-specific provisions, the most notable being the re-introduction of additional profits tax for all designated gas projects.

**Additional profits tax**
Designated gas projects are potentially subject to additional profits tax (this tax does not currently have application to mining or petroleum projects). This is essentially a tax on positive cash flows arising from a gas project in excess of a hurdle rate of return. There are two calculations required, and, in summary, they operate as follows:

- Under Calculation X, once the cash flows become positive, after exceeding a 17.5% accumulation rate, the positive cash flow is subject to tax at a 7.5% rate.
- Under Calculation Y, once the cash flows become positive, after exceeding a 20.0% accumulation rate and any additional profits tax paid under Calculation X, the positive cash flow is subject to tax at a 10.0% rate.

**Withholding taxes**

**Dividends, interest, royalties, and technical/management fees**
The following WHT rates apply to dividends, interest, royalties, and technical fees under PNG domestic law and tax treaties. PNG domestic legislation provides an exemption from WHT for dividends and interest in certain circumstances. The higher rates quoted are the maximum rates allowable under the treaties.

</table>
Notes

1. The rate of WHT on dividends paid by mining companies is 10%. Dividends paid to a resident or a non-resident out of income from petroleum or gas operations are exempt from income tax and are not subject to WHT. There are also some other specific exemptions from WHT on dividends.

2. There is no WHT on interest when:
   - interest is paid or credited to a licensed financial institution in Papua New Guinea, the Bank of Papua New Guinea, or the state
   - interest is paid or credited by a resource company to a non-resident lender, or
   - the interest income is otherwise exempt income in the hands of the recipient.

3. A royalty paid to a non-resident associate of the payee will suffer a 30% WHT. Where the non-resident is not an associate of the payee, the WHT rate will be 10% (or 48% of the taxable income derived from the royalty if the non-resident chooses to lodge an income tax return in Papua New Guinea).

4. The treaty with Germany has not yet been ratified by Germany.

Business income WHT
Income derived by local contractors in certain industries is covered by the business income WHT regime. The industries affected include:

- Building and construction.
- Road transport.
- Motor vehicle repairs.
- Joinery and cabinet making.
- Security.
- Equipment hire.

Businesses affected are required to have a certificate of compliance and to produce it when entering into contracts with their customers. Payers are required to file an annual income reporting statement where they make either an eligible payment of PGK 500 or more in relation to one contract or eligible payments for several contracts exceeding PGK 5,000 in the year of income in relation to a single payee. Payers are required to deduct a 10% WHT if payees do not produce a certificate of compliance.

Non-resident insurer WHT
Premiums paid to non-resident insurers in respect of insurance contracts on property situated in Papua New Guinea or insured events that can only occur in Papua New Guinea are subject to tax in Papua New Guinea. The tax is calculated on a deemed taxable income equal to 10% of the gross premium, which is taxed at the non-resident tax rates of 48% (companies) or 30% (unincorporated associations). Tax treaties may limit the rate of tax applied.

Tax administration

Taxable period
The tax year is generally the period 1 January to 31 December; however, application may be made for a substituted tax year-end. These will normally be granted where the substituted tax year-end coincides with the accounting year-end of an overseas holding company. A company’s tax year does not need to be the same as its accounting period.

Tax returns
Papua New Guinea operates on a full assessment basis, and companies are required to lodge an annual CIT return showing the calculation of taxable income for the year. In addition, the return must provide detailed disclosures in relation to income derived and expenses incurred during the year of income.

A company must file a tax return by 28 February in the year following the year of income to which the return relates. However, the following automatic extensions apply where the company lodges its return through a registered tax agent:

- Six months from the taxpayer’s year-end for taxable returns and partnership returns.
Papua New Guinea

- Eight months from the taxpayer’s year-end for resource company returns in a tax payable position.
- Ten months from the taxpayer’s year-end for non-taxable returns.

**Payment of tax**

CIT is collected under a provisional tax system. Under this system, tax is paid in respect of a company's current year profits (i.e. payments made in the year of income are in respect of income derived in the same year as the payment is due).

Provisional tax is assessed by the IRC based on the last return lodged. In the event that no tax was payable on the previous year’s return, the Commissioner General has the right to estimate the amount of tax based on any other information available.

Provisional tax is payable in three equal instalments by 30 April, 31 July, and 31 October.

Applications may be made to reduce provisional tax assessed if the tax due for the year in question is expected to be lower than the provisional tax assessed. Where estimated provisional tax is less than 75% of the income tax ultimately assessed, additional tax may be levied. Additional tax at a rate of 20% will be assessed, based on the difference between the estimate lodged and the provisional tax originally determined, or the actual tax payable, whichever is less. The Commissioner General has the discretion to require payment of additional tax.

Mining, petroleum, and gas companies are subject to advance payments tax, a system that broadly mirrors the provisional tax system in place for non-resource companies. The main difference for resource companies is they have the option to lodge an estimate of their taxable income for the year prior to 30 April, 31 July, and 31 October each year, which the IRC uses to assess each advance payments tax instalment.

Following the lodgement of the CIT return, the IRC will serve a notice of assessment on the company. The balance of tax payable for a year of income, after the application of provisional tax (or advance payments tax in the case of a resource company) and other tax credits or rebates, is due to be paid within 30 days of the date of service of the notice of assessment.

**Tax audit process**

There is no prescribed tax audit process in Papua New Guinea, and resource constraints have limited the IRC’s audit activities.

**Period for amendment of assessments**

Where the IRC considers that a taxpayer made a full and true disclosure of all the material facts necessary for assessing their returns as originally assessed, the IRC may only amend an assessment that increases the tax liability of the taxpayer within three years from the date that tax became due and payable under the original assessment.

Where the IRC considers that a taxpayer did not make a full and true disclosure of all the material facts necessary for the assessment of their returns, and there has been an avoidance of tax, then:

- the IRC may amend any assessments previously issued to the participants if the IRC is of the opinion that the avoidance of tax was due to fraud or evasion (i.e. no time limit applies), or
- in cases of tax avoidance due to reasons other than fraud or evasion, the IRC may amend an assessment within six years from the date that tax became due and payable under the original assessment.
Topics of focus for the Internal Revenue Commission (IRC)
In late 2011, the IRC issued Taxation Circular No 2011/2, which provided guidance on transfer pricing matters in Papua New Guinea. The IRC continues to consider transfer pricing as an area of focus.

The IRC has indicated an increased focus on the effective collection of taxes and tax compliance through the implementation of a new Standard Integrated Tax Accounting System (SIGTAS).

The IRC has not otherwise publicly announced areas of focus for audit programs.
Significant developments

There have been no significant corporate tax developments in Paraguay during the past year.

Taxes on corporate income

Income is taxed in Paraguay according to the resource principle (i.e. the territorial system of taxation).

There are three tax systems in Paraguay, depending on the type of taxpayer, as follows:

- Commercial income tax (CIT): For income from commercial, industrial, and service activities, the general income tax rate of 10% applies. See Capital gains and Dividend income in the Income determination section for a description of how such income is taxed. Note that dividend distributions require an additional 5% tax that must be paid on the amount of dividend approved for distribution at the shareholder meeting.
- Agriculture income tax (AIT): For income from agricultural and cattle activities, the tax rate is 10% (determined by annual income).
- Little taxpayer income tax (LTIT): For those taxpayers with annual income of less than 100 million Paraguayan guaraníes (PYG), a single tax at a rate of 10% applies.

Local income taxes

There are no other income taxes (i.e. municipal tax on income, etc.) or patrimony taxes in Paraguay.

Corporate residence

Corporate legal residence is determined as the place where direction or central management takes place, unless the corporation’s charter states otherwise.

Permanent establishment (PE)

The Paraguayan Tax Law establishes the definition of a PE.

The following activities may be considered as a PE in the country:

- Branches or agencies.
- A factory, industrial plant, or cattle ranch entity.
- Mine activities, or any other natural resources extraction activities.
- Civil construction or assemble activities that exceed 12 months.

If a person provides instructions related to the agreement of certain operations on behalf of a foreign entity, this operation may be considered as a PE in the country, except in cases where the mentioned instructions are related to the purchase of goods.
Other taxes

Value-added tax (VAT)
VAT applies to all corporations and to individuals or associations of individuals rendering personal services.

The general VAT rate is 10%, but a special VAT rate of 5% applies for selling real estate, basic groceries, farming products, and pharmaceutical products.

Customs taxes
As products are introduced into Paraguay directly by the local importer, the importer is responsible for payment of the related taxes (VAT on imports) before clearing the goods from Paraguayan customs, apart from customs tariffs. The other expenses involved in the import of products are the following:

- Port rates (between 0.65% and 1.50% of customs valuation).
- Customs valuation service (0.5% of customs valuation).
- Consular fee (approximately 50 United States dollars [USD] for each commercial document receiving a visa or legalisation from the Paraguayan consulate at the originating country).
- Indian contribution fee (7% on consular fee).
- IT system utilisation fee (between USD 15 and USD according to importation value).

Other expenses should be added to the above, such as photocopying, handling fees, customs agent fees, etc.

Excise taxes
The excise tax, called the selective tax on consumption, is assessed on local goods and imported products listed, either specifically or generically, in the legislation. The importation of goods listed and the first sale of goods produced in Paraguay are taxed. The selective tax on consumption is collected independently of customs duty.

Some goods subject to this tax include whiskey and other alcoholic beverages, beer, tobacco products, petroleum, etc.

Real estate tax
Real estate tax is levied annually at 1% of the fiscal value of the property, which is generally less than actual value (or market value). A tax rate of 0.5% applies if the area of rural property is smaller than five hectares and is used for agricultural or cattle ranching. In certain areas, an additional tax is levied on the fiscal value of vacant and semi-vacant land when the area of the built-up portion falls within certain determined percentage limits. Large tracts of land in rural areas are subject to an additional tax determined on a percentage basis and to a proportional tax of 0.5% to 1% on the fiscal value of tracts with areas ranging from 10,000 to 60,000 or more hectares.

The 1992 Paraguayan Constitution established that municipalities and departments are entitled to the tax revenues directly related to real estate. Collection of these taxes is the responsibility of municipal governments.

Stamp taxes
There are no taxes on acts and documents in Paraguay.

Social security contributions
In Paraguay, there is a compulsory social security system through which it is required that the employers register their employees.

The calculation basis constitutes every wage item, in cash or goods, except the annual mandatory bonus and family allowance.
Paraguay

The monthly rates are as follows:

<table>
<thead>
<tr>
<th>Contribution</th>
<th>Commercial entity (%)</th>
<th>Financial entity (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Employee</td>
<td>9.0</td>
<td>11</td>
</tr>
<tr>
<td>Employer</td>
<td>16.5</td>
<td>17</td>
</tr>
<tr>
<td>Total</td>
<td>25.5</td>
<td>28</td>
</tr>
</tbody>
</table>

The employee’s contribution is withheld from salary by the employer, which is a designated withholding agent. The employer’s contributions are computed on total payroll and are paid together with the employee’s withholding to the Social Security Institute.

Branch income

Branches are taxed at the same rate as domestic corporations. Profits transferred or credited to the head office are subject to a 15% withholding tax (WHT) when remitted to the head office abroad.

Additionally, the payment of dividends (by the head office’s instructions) is subject to a tax rate of 5%, which has to be paid at the time of the remittance and charged to the local entity.

Income determination

Inventory valuation
Taxpayers may adopt any method of inventory valuation, provided it is technically acceptable according to tax administration criteria (e.g. first in first out [FIFO], average cost). The valuation must be applied consistently and may be changed only with the prior approval of the Treasury Ministry.

Damaged, deteriorated, and obsolete inventories may be written down to fixed values by the taxpayer. The tax administration can reject valuations that are not realistic.

Capital gains
Gains on all assets, tangible and intangible, are taxable as part of profits and subject to income tax at a rate of 10%. Foreign currency exchange gains are also taxable at the same tax rate.

Dividend income
Dividends are taxable income when the recipient (or shareholder) is a non-resident, in which case a 15% WHT applies. An additional 5% tax is charged to local entities when the income or dividend is distributed to a local (resident) or foreign (non-resident) shareholder.

Stock dividends
Stock dividends are not taxable income, except when dividends represent more than 30% of the taxable income of an investor.

The mentioned exemption is not applicable in relation to the 15% WHT (in case of foreign shareholders) and 5% additional tax for dividend distribution (charged to the local entity that made the distribution).
**Interest income**
Interest income of a Paraguayan resident from capital abroad is subject to income tax. This case is the only exception to the resource principle rules enacted under Paraguay Tax Law.

**Foreign income**
Foreign-source income is not taxable. However, interest, commissions, and capital gains are considered Paraguayan-source income and subject to CIT when the investor is resident in Paraguay.

---

**Deductions**

**Depreciation and depletion**
The maximum allowable depreciation rates range from 2.5% for urban buildings to 25% for computer equipment. Depreciation is calculated using the straight-line method based on the useful life of assets as determined by the Treasurer. The Treasurer may also authorise the use of other depreciation or depletion methods that are deemed to be technically justified and generally accepted.

Fixed assets must be revalued annually based on the increase of the price index. Capital gains derived from the revaluation of fixed assets are not taxable income.

**Goodwill**
Amortisation of goodwill is not deductible.

**Start-up expenses**
Amortisation of start-up expenses may occur over three to five years, depending on the taxpayer’s decision.

**Interest expenses**
The interest expenses on loans taken for Paraguayan residents or Paraguayan taxpayers may be considered as deductible expenses.

Additionally, it is important to mention that certain investment projects may be subject to a special exemption of the taxes on the interest, commission, and other expenses for loans taken for banking entities abroad (see Investment incentives in the Tax credits and incentives section).

**Extraordinary losses/bad debts**
The deduction of extraordinary losses and bad debts require the meeting of certain conditions (e.g. communication to the tax authority, evaluation of the actual loss in monetary terms, audit review).

**Charitable contributions**
The deduction of a donation is subject to formal registration of the beneficiary entity as a public benefactor before the Treasury Ministry.

**Executive remuneration**
The deduction of executive remuneration is limited to a percentage defined according to the enterprise’s profits. However, in the event that the executive employees are subject to personal income tax (PIT), the deduction of their salaries is not limited for CIT purpose.

**Fines and penalties**
Fines and penalties are considered as non-deductible expenses for income tax purposes.
Taxes
In general, all taxes mentioned in the Other taxes section are deductible. Income tax and any fiscal surcharges or fines are not deductible.

Other significant items
General provisions for expenses or other potential losses are not deductible.

Other specific non-deductible items include:

- Interest on capital, loans, or any other investment by an owner, partner, or shareholder in a business.
- Personal expenses of an owner, partner, or shareholder, except when they are subject to PIT.
- Money drawn on account of future earnings.
- Direct expenses incurred in earning non-taxable income.
- Earnings from any fiscal period that are retained in the business as capital increases or reserve accounts.

Net operating losses
Net operating losses are not permitted to be carried forward and applied against future years.

Losses may not be carried back in Paraguay. However, a taxpayer may modify one’s tax returns at a later date.

Payments to foreign affiliates
There are no limits on the deductibility of payments to foreign affiliates, including management fees, royalties, research and development (R&D), and general and administrative expenses, provided that the taxpayer maintains corresponding legal documentation that includes the country of origin and applies appropriate WHT. See the Withholding taxes section for the applicable WHT rates.

Group taxation
Group taxation is not permitted in Paraguay.

Transfer pricing
There are no transfer pricing rules in current Paraguayan legislation requiring compliance with certain conditions or minimum prices for the purpose of fiscal deductions, except for the following regulation applicable to importations and exportations:

“In the case of importers, it will be assumed that, in the absence of proof to the contrary, the cost of goods introduced to the country may not exceed the wholesalers price ruling in their place of origin plus freight and insurance costs and expenses to Paraguayan territory, and therefore, the excess of such value will constitute taxable income for the importers.

In the case of exporters, where a price has been fixed or the price declared is lower than the wholesalers price in Paraguay plus the freight and insurance costs and expenses to point of destination, this latter aggregate value shall be taken as the basis for determining the exporter’s taxable income.

To this effect, the nature of the goods and the transaction mode adopted will be taken into account.” (Section 16 of Law No. 2421/04).
**Thin capitalisation**
There are no thin capitalisation rules in Paraguay.

---

**Tax credits and incentives**

**Foreign tax credit**
Foreign tax credits are not applied to local tax payments in Paraguay.

**Investment incentives**
The framework of economic investment was established in the Law No. 60/90, which offers some special tax exemption benefits to foreign and local investors.

The benefits of the Law No. 60/90 may be available for the following investments:

- Cash, financing, provision of credit, or other financial instruments, under the conditions established by the administration of the President of Paraguay and the corresponding ministries.
- Capital goods, raw materials, and inputs for local industry for the fabrication of capital goods.
- Transfers of licensing rights with respect to trademarks, industrial processes and models, and other technologies.
- Technically specialised services.
- Capital leases.
- Other forms that the administration of the President of Paraguay and the corresponding ministries determined by law.

The investment incentives included in Law No. 60/90 that remain enacted after tax law modification (Law No. 2421/04) are the exemptions from certain fiscal, municipal, and customs duties taxes.

When the amount of financing for an investment is equal or greater than USD 5 million, it will be exempt from WHTs on interest, commissions, and capital that have to be paid to financial or banking entities abroad. This benefit is for five years.

If the investment is at least USD 5 million and the project is approved by the tax authorities, the dividends and profits derived from the project are tax exempt. The mentioned exemption is granted for five years and may be extended to ten years.

**Maquila tax exemptions (Law No. 1064/97)**
Under the ‘Maquila’ Regime, investors may import goods or products to be assembled, repaired, improved, worked on, or processed with the purpose of exporting such goods or products, prior to the addition of value or the ‘Paraguayan component’. This regime is subject to a special tax treatment: a 1% tax rate applies to the value added within Paraguayan territory.

Innovative regulations allow for virtual commerce between maquila factories, which improve the utilisation of goods imported under the temporary regime (called ‘virtual maquila’).

This regime also establishes the service maquila, which enjoys the same tax benefits, and its main purpose is to provide support to entities abroad (currently, there are call centres that benefit from this regime).

Paraguayan legislation does not impose restrictions in terms of the types of products and services that the maquila industry may comprise. The maquila activity’s national policy is regulated and supervised by the National Council of the Maquila Industry for Export
Paraguay

(CNIME). Both individuals and legal entities domiciled in Paraguay, whether national or foreign, may take advantage of these regulatory benefits.

This industry has been receiving broad government support, given that it is considered an element of social interest in the strive to combat unemployment. There are currently over 57 maquila companies in the country.

**Duty and tax-free zones (called ‘zona franca’ Law No. 523/95)**

Duty and tax-free zones, where all types of commercial, industrial, and service activities may be carried out, constitute a relevant incentive for business.

The legal framework governing such zones offer several advantages in terms of tax exemptions, as well as a special tax regime with an income tax rate of 0.5%.

The main purpose of free trade zones is the development of activities in connection with foreign markets; however, operations within the country are also allowed.

Act 523/95, ‘which authorises and establishes the Free Trade Zone Regime’, and its regulatory decree 15.554/96, ‘which regulates the Free Trade Zone Act’, among others, establish the guidelines related to activities within free trade zones.

The aforementioned regulation establishes two main entities, the ‘concessionaire’, responsible for providing the necessary infrastructure for freight operational management, and the user, responsible for carrying out the commercial, industrial, or service activity. The regulation therefore establishes the administrative measures that enable operations in free trade zones and its supervision, control, and development.

There are currently two free trade zones located in the Alto Paraná region (northeastern region, in close proximity to the border with Brazil and Argentina), in which national and international companies actively operate.

**Other incentives**

- Exports are exempt from certain customs duties and from VAT.
- A Capital Market Law (No. 1284/98) established incentives for issuance of bonds abroad.
- Under the Export Incentives Regime, exports are VAT exempt. The legislation recognises a tax credit for pre-production stages. A Temporary or Provisional Admission Regime is also in place, which exempts imports from import tariffs and VAT.

**Withholding taxes**

In accordance with the regulations in force, foreign entities may be subject to income tax withholdings in respect of services rendered to them deemed to be of Paraguayan source, including payments made by the branch or affiliate of a foreign home office.

Business income tax regulations consider that branches, agencies, or PEs of foreign entities are taxpayers, independently from the foreign home office status.

The withholdings are to be made from the payments made by local entities for such services.

Notes

1. Local entities are required to pay an additional 5% WHT when the income or dividend is distributed.
2. The WHT on interest is based on 100% of the amount paid when remitted to the head office abroad. In other cases, when the payment is not directly made to the head office or shareholders that have control of the local subsidiary, the WHT is based on 50% of the amount paid. The tax rate is 30%.
3. For financing loans, the WHT effective tax rate is 6%.
4. The WHT on interest is based on 100% of the amount paid when remitted to the head office abroad. The tax rate is 30%. In other cases, when the payment is not directly made to the head office or shareholders that have control of the local subsidiary, the WHT is based on 50% of the amount paid. The tax rate is 30%
5. The WHT on fees is based on 100% of the amount paid when remitted to the head office abroad. The tax rate is 15%. In other cases, it is based on 50% of the amount paid. The tax rate is 15%.
6. Fees for personal services rendered by non-resident individuals are subject to PIT. The withholding of PIT has to be made on 50% of the amount paid. The tax rate is 20% (effective tax rate of 10%).
7. In case of a loan to Chile, the WHT on the interest is 15% if the loan is provided by a bank or insurance company. On the other hand, if the loan is provided by an associated company or head office, the tax rate is 10%. Regarding VAT WHT, see Note 3.

Tax administration

Taxable period
For the CIT and LTIT, the taxable period is the calendar year. Regarding the AIT, the taxable period is as follows:

- In the event a taxpayer is subject to AIT exclusively, the tax period is from 1 July to 30 June of the following year.
- If a taxpayer is subject to AIT and CIT according to the activities performed, the taxable period is the calendar year.

Tax returns
Income tax returns are submitted on a fiscal-year basis as a self-assessment and must be filed by the fourth month following the end of the fiscal year.

Payment of tax
Income tax is due on varying days in the fourth month following the end of the fiscal year, depending on the taxpayer ID number, according to a calendar established by the Treasury Ministry. Four equal advance payments are made throughout the year, calculated based on 100% of the tax due in the previous year. Payments must be made in May, July, September, and November of each year after the due date for filing the income tax return, according to the calendar established by the tax authorities.
Penalties
Tax legislation provides the following penalties:

- Late payment of income tax is penalised by a fine varying from 4% to a maximum of 14%, plus interest at 0.116% per day.
- Tax fraud is punished by a charge of from one to three times the value of the tax in default.
- Tax law infringements are penalised through fines varying from the equivalent of USD 10 to USD 250.
- Omission of payment incurs a fine of 50% of the tax pending.

Tax audit process
The auditing process is performed by the tax authorities when there is a certainty or suspicion of tax evasion. Additionally, the taxpayer may be audited according to a draw process that is made by the tax authority.

The tax law also establishes an obligatory tax audit, which has to be made by external auditors, when the taxpayer obtains PYG 6 billion of gross income during the year. An annual audit report on tax compliance rules is presented to and reviewed by the tax authorities. When a tax issue is identified, the tax authority may apply a penalty to the taxpayer.

Statute of limitations
The tax authority may audit the last five fiscal years.

**Significant developments**

**Special deduction regime for projects related to scientific research, technological development, and technological innovation**

A special deduction regime has been established for projects related to scientific research, technological development, and technological innovation as of 2016. According to this incentive, taxpayers investing in these projects will be able to deduct 150% or 175% of the expenses incurred in them. See the Tax credits and incentives section for more information.

**Tax credit incentive for reinvestment made by universities**

A tax credit incentive has been envisaged for private universities that reinvest their profits in infrastructure, educational equipment, technological and scientific research and innovation, training of teachers, social work, high qualification sports, and sport programs support, as well as granting scholarships.

Universities reinvesting their profits in these activities will be granted a tax credit of 30% of the reinvested amount, but not exceeding the income tax of the year in which the reinvestment is made.

**Exemption from capital gains from the sale of shares**

An exemption has been granted as of January 2016 until December 2018 for the sale of shares performed through the Peruvian stock market exchange as long as these requirements are met:

- No more than 10% interest is transferred.
- The stock has market presence.

**Taxes on corporate income**

Companies incorporated in Peru are considered resident in Peru for tax purposes and thus subject to a corporate income tax (CIT) rate of 28% for 2015 to 2016 (27% for 2017 to 2018, and 26% from 2019) on worldwide net income.

For purpose of determining taxable income, such entities are allowed to deduct expenses to the extent that they are necessary to generate or maintain the source of taxable income. Requirements, limitations, and/or caps may apply to the deduction of certain expenses (thin capitalisation rules), bad debt provisions, salaries, travel expenses, gifts, donations, penalties, etc.

The Peruvian Income Tax Law (PITL) allows crediting for various payments against income tax, including income taxes paid in advance, amounts paid for certain other taxes, and income taxes paid in foreign tax jurisdictions, provided that the foreign
country's tax rate is not higher than the Peruvian CIT rate and the taxable income qualifies as foreign-source income for Peruvian income tax purposes.

Dividends and any other type of profit distributions are taxed at a rate of 6.8% for 2015 to 2016 (8% for 2017 to 2018, 9.3% from 2019) upon distribution, when the distribution is made to a non-resident entity (either individuals or legal entities) and to resident individuals, or when the distribution is agreed to by the shareholders, whichever happens first (resident legal entities are not subject to withholding tax [WHT] over dividends received from other Peruvian corporations). The entity distributing dividends or profits is liable for WHT at the aforementioned rates.

Nevertheless, enterprises are subject to an additional tax rate of 6.8% for 2015 to 2016 (8% for 2017 to 2018, 9.3% from 2019) on every amount or payment in kind that, as result of a tax audit, is construed as taxable income to the extent that it is an indirect distribution of such income that escapes further control from the tax administration, including income that has not been declared.

On the other hand, companies incorporated abroad are considered as non-domiciled in Peru for tax purposes and thus subject, in most cases, to an income tax rate of 30% over the gross Peruvian-source income. As a general rule, foreign companies are not allowed to deduct expenses and are taxed on gross income.

**Local income taxes**

There are no local or provincial taxes on income in Peru.

---

**Corporate residence**

For income tax purposes, the following entities, among others, are considered as resident entities in Peru:

- Corporations duly incorporated in Peru.
- Branches, agencies, and permanent establishments (PEs) in Peru of non-resident individuals or entities.
- Partnerships and limited liability companies.

**Permanent establishment (PE)**

According to the PITL, a foreign company is considered to have a PE (i) if it has a fixed place of business through which it carries out business activities in whole or in part; (ii) if an individual has a power of attorney of a foreign entity and uses it on a regular basis to sign agreements on behalf of the foreign entity; and (iii) if the person with powers of attorney of the foreign entity keeps in Peru inventory and/or goods to be negotiated in Peru on behalf of the foreign entity.

The consequence of a PE presence in Peru is that the PE will be obligated to comply with all the formal and substantial tax obligations of any domiciled taxpayer, meaning that it will have to be registered before the tax administration (get a tax identification [RUC] number), keep full accounting books, file monthly and yearly tax returns, withhold taxes, allocate a reasonable income for its Peruvian source activities, etc. If a PE presence is determined, then the tax contingency will have to be quantified by calculating the taxes, fines, and interest accrued as from the moment in which the PE presence can be deemed, except for the period barred by statute of limitations.

---

**Other taxes**

**Value-added tax (VAT)**

The general rate of VAT is 18% and is applicable to the following operations:
• Sale of goods within the country.
• Rendering or first use of services within the country.
• Construction contracts.
• The first sale of real estate made by construction firms.
• Import of goods.

For all transactions, the vendor is subject to VAT, except in the case of importation of goods or services rendered abroad, but economically used within Peru, for which VAT is self-assessed by the importers and users, respectively.

The VAT law follows a debit/credit system, and input VAT may be offset by output VAT. Should excess input VAT be obtained in a particular month, it shall offset output VAT obtained during the following months, until it is exhausted.

The export of movable goods (including the sale of goods in the international zone of ports and airports) is not subject to VAT, nor is the exportation of certain services. Thus, VAT paid upon the acquisition of goods, rendering of services, construction agreements, and the importation of goods related to exported goods or services creates a positive VAT export balance.

The positive balance may offset output VAT, income tax, or any other outstanding tax debt in favour of the central government. If the positive balance is not completely offset, as the amount of the aforementioned tax obligations is insufficient, the taxpayer may apply for a refund.

**Tax Obligatory Payment System (SPOT)**
The SPOT is applicable to the sale of certain goods and the rendering of services subject to Peruvian VAT. The main purpose of the SPOT is to generate funds to enable the payment of tax obligations by the VAT payer.

According to the SPOT, all the sales of goods and services listed in the appendices of the Resolution that are levied with VAT will be subject to withholding, applying the rates established for each kind of good and service (1.5%, 4%, 9%, 10%, or 15%).

Any service subject to VAT, except expressly excluded, will be subject to the SPOT with a withholding rate of 10%.

The purchaser or service recipient must withhold a percentage of the transaction price and deposit such amount within the seller’s or service provider’s State Bank (Banco de la Nación) account. It is important to note that the right of the purchaser or user of the service to offset input VAT related to such goods and services may be exercised only after the deposit with the State Bank has been executed.

The amount deposited is applied towards the payment of the seller’s or service provider’s Peruvian tax obligations (not just VAT). If after four consecutive months such amount is not used, the seller or service provider may request a refund or use the amount to pay withholdings applicable to purchasers or services recipients.

**Customs duties**
Customs duties applied to imports are linked to their classification under the Customs Tariff, given by NANDINA subheading that is determined by the information provided by the importer (through the invoice and other complementary information), as well as the physical recognition by the Customs Officer at the time of customs clearance.

As such, the taxes required are:

• *Ad valorem* customs duty (rates of 0%, 6%, and 11%, as the case may be).
• VAT (16%).
Peru

- Municipal promotion tax (2%).

Other taxes that may apply, depending on the equipment, include the following:

- Selective consumption tax.
- Specific duties.
- Antidumping and compensatory.
- VAT perception.

There are no restrictions on imports and exports, although there is a limited list of products that cannot be imported or exported. Exports are not subject to any taxes. The importation of most capital goods is subject to the 0% rate.

The government is empowered to grant duty exemptions under certain circumstances and also to temporarily suspend the assessment of duties on certain products. Customs duties are imposed on an *ad valorem* basis (the carriage, insurance, and freight [CIF] value of the imported goods). Goods are classified for customs duty purposes under the Harmonized System.

Pursuant to the drawback regime, an exporter may apply for a refund of customs duties paid upon: (i) the importation of goods contained in exported goods or (ii) the importation of goods that are consumed during the production of exported goods.

The refund rate is currently 4% of the freight on board (FOB) value of the exported good, provided such amount does not exceed 50% of the good’s production cost. The refund will proceed for each type of good exported and for the first 20 million United States dollars (USD) worth of goods exported per year (the excess will not be subject to refund).

For such purposes, the beneficiaries of the drawback regime are the manufacturer/exporter companies whose cost of production has been increased by the customs duties paid upon the importation of: (i) raw material, (ii) intermediate products, or (iii) pieces incorporated or consumed in the production of exported goods. Note that fuel or any other energy source used to generate heat or energy for purposes of obtaining the exported good is not considered as raw material.

**Excise tax**

The sale of specific goods, including fuel, cigarettes, beer, liquor, and vehicles, is subject to excise tax.

Excise tax rates, and the manner on which the tax is applied, depend on the type of goods or services.

**Real estate property tax**

The real estate property tax is levied on the value of urban and rural real estate property. Individuals and legal entities owning the referred real estate properties are considered taxpayers for such purposes. The taxable base is calculated taking into account the value of all the properties owned in a specific local district, as reflected in the internal records of the corresponding local authorities.

The tax is calculated and paid on an annual basis applying the following progressive cumulative scale:

<table>
<thead>
<tr>
<th>Real estate’s value</th>
<th>Real estate property tax rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Up to 15 tax units</td>
<td>0.2</td>
</tr>
<tr>
<td>For the excess of 15 tax units and up to 60 tax units</td>
<td>0.6</td>
</tr>
<tr>
<td>Over 60 tax units</td>
<td>1.0</td>
</tr>
</tbody>
</table>
Real estate transfer tax
The real estate transfer tax is levied on all transfers of urban and rural real estate property. The taxpayer is the purchaser of the property. The taxable base is equivalent to the consideration agreed upon by the parties to the transaction, provided it is higher than the property's value (in the relevant year for purposes of the real estate property tax) as reflected in the internal records of the corresponding local authorities.

The tax rate is 3% and must be borne exclusively by the buyer, regardless of whatever the parties agree. The first ten tax units (approximately USD 11,285) of the taxable base are exempt from this tax.

Stamp taxes
There are no stamp taxes in Peru.

Financial transactions tax (FTT)
FTT is applied at a rate of 0.005% on all debits and/or credits on bank accounts held by the taxpayers.

The following operations, among others, are exempted from the FTT:

- Operations made between accounts of the same holder.
- Credits to bank accounts for payment of salaries.
- Credits and debits to bank accounts of diplomatic representations and international organisations recognised in Peru.

Payments of FTT are deductible as expenses for income tax purposes.

Temporary net assets tax (TNAT)
Companies subject to income tax are obligated to pay TNAT, except for companies that are in preoperative stages or that commenced business on 1 January of the fiscal year in which TNAT must be paid.

The taxable basis is the value of the assets set forth in the taxpayer's balance sheet as of 31 December of the year prior to that of the tax payment, adjusted for deductions and amortisations accepted by the Peruvian law.

The amount of TNAT is determined by applying the following rates on the taxable basis:

- Up to 1 million Peruvian nuevos soles (PEN): 0%.
- Excess of PEN 1 million: 0.4%.

The amount paid for TNAT may be credited against the taxpayer's income tax. If not totally used, the remaining TNAT may be refunded by the tax administration.

Special taxation on mining industry
The new mining royalty (NMR) regime, special mining tax (SMT), and special mining contribution (SMC) are economic considerations paid to the Peruvian government for the exploitation of mineral resources. The NMR applies to metallic and non-metallic mineral resources, while the SMT and SMC only apply to metallic mineral resources.

The SMC is only applicable to mining companies with projects with tax stability agreements in force. Such companies have voluntarily entered into agreements with the Peruvian government with the purpose of paying this contribution. This special contribution is determined for each stability agreement entered into.

In all three cases, the tax basis is the operating profit of the company, and the special rates and considerations are explained below:
The amounts paid will be deductible for income tax purposes as long as they are actually paid during the fiscal year.

**Energy and Mining Investment Regulatory Agency (OSINERGMIN) contribution**
The basis for calculating the OSINERGMIN contribution is the monthly invoicing of activities directly related to OSINERGMIN’s regulatory scope (mining activities), after deducting the VAT. The applicable rate is 0.16% in 2016.

**Agency for Environmental Assessment and Enforcement (OEFA) contribution**
The basis for calculating the OEFA contribution is the monthly invoicing of activities directly related to OEFA’s regulatory scope (mining activities), after deducting the VAT. The applicable rate is 0.13% in 2016.

**Payroll taxes**
Payroll taxes in Peru are only those characterised as social security contributions.

**Social security contributions**

*Health contributions*
Employers shall make monthly health contribution payments equal to 9% of the compensation paid to employees.

Employees shall be affiliated either to the National Health System (EsSalud) or the Private Health System (EPS), according to what option they choose. In the latter, a portion (25%) of the amount paid to the EPS may be used by the employer as a credit to be offset against EsSalud contributions.

*Insurance for high-risk work*
Employees who perform high-risk activities established in Law 26790, such as mineral extraction and iron and steel smelting, among others, must have a complementary insurance for high-risk work, which provides coverage such as health care, temporary or permanent disability pensions, and burial expenses relating to work accidents or professional diseases. This insurance is compulsory and must be paid for by the employer.

*Pension funds contributions*
Employers shall apply monthly withholdings for pension funds contributions equal to 13% of the remuneration received by the employee in cases where the employee is affiliated with the National Pension System (ONP) or approximately 12.4% in cases where the employee is affiliated with the Private Pension System (AFP). In this last case, 10% corresponds to the personal pension account and almost 2.4% to insurance and commissions for managing the fund.
Regarding the termination of employment of foreign individuals who leave the country, their pension funds in an AFP may be wired to an account of the employee in a foreign bank (the aforementioned 10%).

**Branch income**

Branches, agencies, and PEs of non-resident companies or entities incorporated in Peru are subject to income tax at a rate of 28% for 2015 to 2016 (27% for 2017 to 2018, 26% from 2019) on their Peruvian-source income.

For tax purposes, branches or subsidiaries are subject to the same obligations applicable to all companies in Peru, including income tax, VAT, FTT, filing of the corresponding income tax and VAT returns, issuance of invoices, etc.

Nevertheless, the following important differences between subsidiaries and branches resident in Peru must be taken into account:

- Branches are subject to income tax only for their Peruvian-source income, while subsidiaries are subject to income tax on their global-source income (both Peruvian and foreign income).
- For branches, the WHT on profit for distribution is applied on the date the annual income tax return is submitted. Subsidiaries are subject to the WHT on the date in which the corresponding shareholders agreement took place or the date when the beneficiary receives the dividends, whichever occurs first. For non-domiciled shareholders, the withholding will be applied whenever the dividend is actually paid, without taking into account the moment in which the shareholder agreement is executed.

**Income determination**

**Inventory valuation**
The first in first out (FIFO), average, specific-identification, retail, and normal or base-stock methods are allowed for inventory valuation. The last in first out (LIFO) method is not permitted.

**Capital gains**
Capital gains are taxed as ordinary income. However, capital gains derived from the sale of stock issued by a Peruvian company through the Lima Stock Exchange are taxed at a 5% rate.

An exemption has been granted as of January 2016 until December 2018 for the sale of shares performed through the Peruvian stock market exchange as long as these requirements are met:

- No more than 10% interest is transferred.
- The stock has market presence.

**Dividend income**
Cash dividends distributed to resident corporations are not subject to any taxes.

**Interest income**
The PITL establishes that the WHT rate on interest arising from loans is 4.99%, provided the following requirements are met:

- In case of cash loans, the entrance into Peru of the foreign currency must be duly accredited.
Peru

- The credit must not accrue an effective interest that surpasses that of the London Interbank Offered Rate (LIBOR) plus 7 points (for loans proceeding from Europe or the United States).
- The loan must be destined to finance business or taxable activities.
- The parties involved must not qualify as related parties for tax purposes.

If any of the above mentioned conditions are not met, or to the extent they are not fulfilled, a withholding rate of 30% over the gross interest will be applied. A 30% withholding rate will also apply whenever the debtor and creditor are related parties or when the participation of the creditor only aims to conceal a transaction between related parties.

**Foreign income**
A Peruvian corporation is taxed on foreign-source income. Foreign-source income is recognised upon accrual. No tax deferral is allowed on this type of income (see *Controlled foreign companies in the Group taxation section*). Double taxation may be avoided by means of foreign tax credits.

**Deductions**

**Acceptable payment methods**
Obligations that are fulfilled through cash payments exceeding PEN 3,500 must be made via bank account deposits, wire transfers, payment orders, credit cards, non-negotiable cheques, or other means of payment provided by entities of the Peruvian financial system. Failure to use one of these payment methods when such an obligation exists will result in the disallowance of deductions for any expenses or costs for income tax purposes and the disallowance of a credit for the corresponding VAT.

**Expenses derived from transactions entered into with entities resident in tax havens**
Certain expenses are not tax-deductible, including expenses incurred with respect to transactions with (i) entities resident in tax havens on the list attached to the PITL regulations, (ii) PEs located in tax havens, or (iii) entities that generate revenues or income through tax havens.

Nonetheless, expenses incurred from the following transactions are excluded from the above mentioned limitations, provided the consideration paid falls within market value:

- Interest on loans.
- Insurance premiums.
- Leases of aircraft or ships.
- Maritime freight.
- Fees for passing through the Panama Canal.

**Depreciation**
Assets may be depreciated for tax purposes via the straight-line method, capped at the following rates, but without exceeding the amount of the financial depreciation:

<table>
<thead>
<tr>
<th>Assets</th>
<th>Depreciation rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Cattle (both labour and reproduction) and fishing nets</td>
<td>25</td>
</tr>
<tr>
<td>Vehicles (except trains) and any kind of ovens</td>
<td>20</td>
</tr>
<tr>
<td>Machines and equipment used for mining, oil and construction activities, excluding furniture, household, and office goods</td>
<td>20</td>
</tr>
<tr>
<td>Equipment for data processing</td>
<td>25</td>
</tr>
<tr>
<td>Machines and equipment acquired as of 1 January 1991</td>
<td>10</td>
</tr>
<tr>
<td>Other fixed assets</td>
<td>10</td>
</tr>
</tbody>
</table>
Buildings must be subject to a flat 5% depreciation rate, regardless of the financial depreciation.

**Amortisation of intangible assets**
The amortisation of property rights, trademarks, patents, and manufacturing procedures, as well as other similar intangible assets, are not deductible for income tax purposes. However, the price paid for intangible assets of a limited duration, at the taxpayer’s choice, may be considered as an expense and applied to the results in a single year or amortised proportionally over a ten-year term.

The Peruvian tax administration, prior to an opinion from the corresponding technical organism, is permitted to determine the real value of those intangible assets for tax purposes, when the price does not reflect the real one.

**Organisational and start-up expenses**
Organisation expenses, pre-operating expenses (including initial operations and further expansion of operations), and interest accrued during the pre-operating period may be expensed in the first period of operation or amortised using the straight-line method over a maximum of ten years. However, once a company has elected to recover start-up costs via the straight-line method, it may revoke such election only upon receiving approval of the tax authorities.

**Interest expenses**
In general terms, interest on loans and related expenses are deductible, provided they are related to the acquisition of goods or services incurred, or to be incurred, in order to obtain or produce taxable income or to maintain the source of such income.

In the case of loans entered into between related parties, the amount of interest to be deducted is limited to interest from indebtedness not exceeding three times the net equity of the debtor as of the end of the previous fiscal year (see Thin capitalisation in the Group taxation section).

**Bad debts**
Write-offs of bad debts and equitable provisions are deductible, provided that the accounts to which they belong are determined. For the provisions of bad debts, it is necessary that:

- there is a debt due and the taxpayer can provide evidence of the financial difficulties of the debtor that could foresee a risk in the collection of the debt and
- the provision is registered separately in the inventory and balance book at the fiscal year closing. In this sense, generic bad debt provision will not be deductible in the assessment of the net taxable income, nor will bad debts whose terms have not yet elapsed.

Bear in mind that the following debts are not considered bad debts:

- Debts incurred between related parties.
- Debts guaranteed by banks or financial companies by means of rights over real property, money deposits, or purchase-sale agreements with reservation of right of legal ownership.
- Debts that have been subject to renewal or express extension.

**Charitable contributions**
Donations made to entities of the public sector, except companies, and to non-profit associations with certain purposes are deductible, provided that the receiver of the donation is duly qualified by the tax administration.
Peru

The deduction will be limited to 10% of the net income of the donor and only during the fiscal year in which it is granted (carryforward of the donation is disallowed). This means that if the donor does not obtain taxable income in the fiscal year in which the donation is made, no deduction will be available.

**Profit sharing**
Entities with more than 20 employees, provided they obtain taxable income during the fiscal year, must distribute a percentage (5%, 8%, or 10% depending on the industry) of their profits (the basis is the tax profit of the fiscal year) among their employees. The amount of distribution for each employee depends on the effective working days during the year and annual remuneration.

**Employee’s retributions and health insurance premiums**
Employee’s retributions paid during a fiscal year may be deducted in such year, provided the payments are made by the employer before the term to file its annual income tax return expires. Likewise, health insurance premiums for employees, their spouses, and children are deductible.

**Vehicle expenses deductions**
Vehicle expenses may be deducted, provided the vehicles are essential to a company’s business activities and are continually used for such purpose. There is a limitation on the tax deductibility of car expenses used for administrative or representation purposes, depending on the amount of income generated by the company. The number of company cars assigned to directors, managers, and representatives of a company may not exceed five under any circumstances.

**Fines and penalties**
Fines and penalties are not deductible for income tax purposes.

**Taxes**
Other taxes assessable on properties and activities generating taxable income are deductible for income tax purposes.

**Net operating losses (NOLs)**
Tax losses may be offset according to either of the following systems:

- Against net income generated within the following four fiscal years after the year in which the loss is incurred. Any losses that are not offset within such period may not be carried forward to any future year.
- Against 50% of the net income generated in the following fiscal years after the year in which the loss was generated. Under this system, there is no time limitation for carrying forward the losses.

After choosing one of the aforementioned systems, the taxpayer will not be able to change the system until the accumulated tax losses from prior fiscal years are exhausted. Losses will not be carried back to years prior to the year in which the loss is generated.

**Payments to foreign affiliates**
Payment of royalties to non-resident affiliates is permitted and deductible from gross income.

**Group taxation**
Group taxation is not permitted in Peru.
**Transfer pricing**

The rules related to market value and transfer pricing establish that, in any kind of transaction, the value assigned to the goods and services must be the market value for tax purposes. If such value differs from the market value, either by overvaluation or sub-valuation, the tax administration will proceed to adjust it for both the purchaser and the seller, even when one of them is a non-domiciled entity, provided that the value agreed to results in a lower tax than the one that would have applied if transfer pricing rules had been applied. The adjustment will be imputed in the taxable period in which the operations with related parties were performed.

In case of transactions between related parties or those entered with tax havens, the market value will be equivalent to the value agreed with independent parties in similar transactions, being mandatory to support such value with a transfer pricing study.

The law states that transfer pricing rules will not apply for VAT purposes.

**Tax price adjustments**

Adjustments to prices are only required whenever the price paid generates a higher tax deduction or a lower income tax in Peru; consequently, the existence of a tax prejudice will be required for an adjustment to be requested.

Adjustments are performed individually (on each operation) and not in an overall or global manner.

The adjustment of the value assigned by the tax administration or the taxpayer will be effective for both the transferor and the purchaser or transferee, without any constraints. Previously, such bilateral adjustment was conditioned to both parties being domiciled or incorporated in Peru, a condition that has now been rejected. In the case of non-domiciled parties, the bilateral adjustment will only proceed on transactions that could trigger taxable income in Peru and/or deductions for determining the income tax in Peru.

The adjustments are attributed to the corresponding tax period, according to the attribution rules depicted in the PITL (accrual regime for corporate taxpayers). However, when, under such rules, the adjustment cannot be attributed to a particular period, the adjustment will be allocated among all tax periods where income or expense has been allocated, in proportion.

Operations where no consideration has been paid are subject to transfer pricing rules. In this kind of transaction, the adjustment shall be allocated to the period or periods in which revenue would have accrued if consideration had been paid and the income was to be acknowledged by a domiciled taxpayer. On the other hand, if the income was to be recognised by a non-domiciled taxpayer, it would be attributed to the period or periods where the expenses accrued, even if it was a non-deductible expense.

**Commodities**

There is a specific methodology for determining prices in the sales of internationally traded commodities to tax havens or intermediaries.

In this methodology, it is required to determine the price of the specified operation based on the international price without taking into account the particularities of each case. Such method will not be applied as long as the taxpayer has entered into futures contracts for hedging purposes in respect of imported or exported goods, or irrefutably accredit that the international intermediary has real presence in the territory of residence and their core business does not consist of obtaining passive incomes, or brokering in the sale of goods to members of the same economic group.
**Thin capitalisation**
In the case of loans entered into between related parties, the amount of interest to be deducted is limited to interest from indebtedness not exceeding three times the entities net equity as of the end of the previous fiscal year. In this connection, even though Peruvian corporate law has no requirements as to a minimum amount of share capital to incorporate a legal entity, it should be noted that having a small share capital may jeopardise the deductibility of interest payable for loans granted by related entities since, in case of newly incorporated entities, the share capital (equity) to be considered for calculating the thin capitalisation limit is the original one (this is, the one with which the entity was incorporated). In any case, this will only trigger a deductibility problem for the fiscal year in which the entity is incorporated, since for the following fiscal year the thin capitalisation rule will be calculated on the basis of the net equity at the end of the prior fiscal year (which, at that moment, may have already been increased through new contributions or capitalisations).

**Controlled foreign companies (CFCs)**
CFC rules are in force in order to avoid the deferral of income tax on passive income obtained from CFCs (defined as at least 50% of ownership, voting rights, or gains) by domiciled taxpayers, provided such companies are situated in tax havens or jurisdictions with nil or reduced tax rates.

**Taxation of indirect disposal of shares in Peruvian entities**
The indirect transfer of Peruvian shares of a foreign entity that, in turn, owns (directly or indirectly through other entities) shares of a Peruvian entity is levied with income tax, provided that both of the following conditions are met:

- During the 12 months prior to the transfer, the market value of the Peruvian entity’s shares owned by the foreign entity equals 50% or more of the market value of the foreign entity's shares.
- During any given 12-month period, shares representing 10% or more of the foreign entity's share capital are transferred.

**Tax credits and incentives**

**Foreign tax credit**
Pursuant to the PITL, taxpayers may deduct the foreign income taxes paid due to their foreign-source income levied by the PITL, provided that it doesn’t exceed the amount that results from applying the average rate of the taxpayer to the incomes obtained abroad, or the tax paid abroad. The amount that, for any circumstance, is not used in the corresponding fiscal year cannot be set off (or compensated) in others fiscal years or be refunded.

Also, the following will be taken into account:

- Tax credit will be granted for the entire tax paid abroad that falls upon income taxed by the PITL.
- Taxes paid abroad, whatever its denomination, shall bear the characteristics of income taxes.
- Tax credit will only be granted when the payment of the foreign income tax is supported by reliable documentation.

**Special deduction regime for projects related to scientific research, technological development, and technological innovation**
A special deduction regime has been established for projects related to scientific research, technological development, and technological innovation as of 2016. According to this incentive, taxpayers investing in these projects will be able to deduct 150% or 175% of the expenses incurred in them.
In that sense, the taxpayer may have the following deductions:

- 175% of the expenses incurred if the project is executed directly by the taxpayer or through centres of scientific research, technological development, and technological innovation domiciled in Peru.
- 150% of the expenses incurred if the project is executed by non-domiciled centres of scientific research, technological development, and technological innovation.

There are some requirements that must be fulfilled in order to access the benefit.

**Early recovery of VAT**
Companies in a preoperative stage with large projects in process may apply for early recovery of VAT prior to commencing operations. An investment agreement with the government (the Ministry of its sector) is required.

**Stability agreement**
Investors may enter into stability agreements with the government, either under the general regime or specific regimes (i.e. mining and petroleum).

Under the general regime, investors may enter into Juridical Stability Agreements that guarantee the following advantages for a ten-year period:

- Stability of the income tax regime in force at the time the agreement is entered into with respect to dividends and profit distribution.
- Stability of the Peruvian government monetary policy, according to which there is a complete absence of exchange controls, foreign currency can be freely acquired or sold at whatever exchange rate the market offers, and funds can be remitted abroad without any previous authorisation.
- Right of non-discrimination between foreign and local investors.

Under the mining regime, local mining companies may enter into stability agreements of guarantees and investment promotion measures that guarantee the following for 10, 12, or 15 years:

- Stability of the overall tax regime.
- Stability of the overall administrative regime.
- Free disposition of funds (foreign currency) arising from export operations.
- No exchange rate discrimination.
- Free trade of products.
- Stability of special regimes for tax refunds, temporary importation, etc.

Oil and gas companies may enter into stability agreements that guarantee the following for the term of the contract:

- Stability of the overall tax regime.
- Free disposition of funds (foreign currency) arising from export operations.
- Free convertibility of its funds.
- Free trade of products.

**Investment promotion in the Amazon**
Certain tax benefits with regard to VAT and income tax have been established for taxpayers located in the area designated by the law as the ‘Amazon’ and that are engaged in the following activities:

- Agriculture and livestock enterprises.
- Aquaculture.
- Fishing.
- Tourism.
Peru

- Manufacturing activities linked to the processing, transformation, and commercialisation of primary products originating in the activities listed above and in forest transformation, provided these products are produced in the area.

**Special zones - Centres of Export, Transformation, Industry, Commercialisation, and Services (CETICOS)**

CETICOS are geographical areas duly delimited with customs primary zone status and special treatment, destined to generate development poles through industrial, maquila, assembling, or storage activities. CETICOS are located in Paita, Ilo, and Matarani cities.

Agribusiness and agro-exporting activities may be performed within a CETICOS. Agribusiness activity is primarily the transformation of agro-farming products produced in the country. Such transformation must be carried out at CETICOS.

Companies engaged in industrial, maquila, or assembling activities, established or set up in the CETICOS, until 31 December 2022, are exempt from income tax, VAT, excise tax, municipal promotion tax, as well as from any other taxes, fees, contributions levied by the Central Administration, and even taxes that require express exempt regulation.

**Withholding taxes**

Domestic corporations are required to withhold income tax with respect to income paid to non-resident entities at the following rates:

<table>
<thead>
<tr>
<th>Type of payment</th>
<th>WHT (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Dividends or profit distributions</td>
<td>6.8</td>
</tr>
<tr>
<td>Interest on non-related party loans, provided certain requirements are fulfilled</td>
<td>4.99</td>
</tr>
<tr>
<td>Interest on related party loans</td>
<td>30</td>
</tr>
<tr>
<td>Interest paid by Peruvian financial entities or banks to foreign beneficiaries for credit lines used in Peru</td>
<td>4.99</td>
</tr>
<tr>
<td>Royalties</td>
<td>30</td>
</tr>
<tr>
<td>Digital services</td>
<td>30</td>
</tr>
<tr>
<td>Technical assistance</td>
<td>15</td>
</tr>
<tr>
<td>Lease of vessels or aircraft</td>
<td>10</td>
</tr>
<tr>
<td>Other income</td>
<td>30</td>
</tr>
<tr>
<td>Sale of securities within Peru (Lima Stock Exchange)</td>
<td>5</td>
</tr>
<tr>
<td>Sale of securities outside Peru</td>
<td>30</td>
</tr>
</tbody>
</table>

Note that resident taxpayers may not deduct the WHT of a third party, except in the case of loans provided by non-resident creditors, to the extent that the debtor has contractually assumed the obligation of bearing the WHT cost.

If the retribution for technical assistance exceeds 140 tax units, a report issued by an audit firm will be required, in which is stated that the technical assistance has been effectively rendered in order to apply the 15% WHT rate; otherwise, a WHT rate of 30% will apply.

Capital gains derived from the sale of stocks issued by a Peruvian company through the Lima Stock Exchange are taxed at a 5% rate. See *Capital gains in the Income determination section for a description of an exemption granted as of January 2016 until December 2018.*

In the case of the services mentioned below that entail the execution of activities both in Peru and abroad, non-resident entities are subject to a 30% WHT on deemed Peru-source income determined by applying the following percentages to gross income:
Tax treaties

Peru has entered into treaties with Brazil, Canada, Chile, Korea, Mexico, Portugal, and Switzerland regarding double taxation on income tax under the Organisation for Economic Co-operation and Development (OECD) Model. Double taxation treaties (DTTs) with Spain and Thailand are not in force, as ratification by the Peruvian Congress is still pending. In addition, Peru, as a member of the Andean Community, which also includes Bolivia, Colombia, and Ecuador, is subject to a double-taxation standard (based in source income and not on the OECD Model).

Please see the chart below for the reduced WHT rates that apply under DTTs in force.

</table>

Notes

1. The lower rate applies in case the beneficial owner is a company that controls at least 20% (Brazil), 10% (Canada, Portugal, and Switzerland), or 25% (Chile and Mexico) of the voting power in the company paying the dividends.
2. The lower rate applies to loans from banks (Portugal and Switzerland) and sale on credit of industrial, commercial, and scientific equipment (Switzerland).
3. The treaty rate applies to technical assistance in connection with copyrights, goods, or rights that generate royalties.

Tax administration

Taxable period

According to law, the fiscal year is the calendar year.

Tax returns

The filing deadline for the income tax return is generally the first week of April. The system is one of self-assessment, but the tax return filed with the tax authorities is subject to review.
**Payment of tax**

Income tax payments are due in 12 monthly instalments. The due date for the final income tax payment for a year is generally the first week of April.

The estimated payment calculation system has been established, and the amount of the estimated payment will be the greater of the result of multiplying the net revenue of the month by (i) 1.5% or (ii) the applicable coefficient. The coefficient is calculated by dividing the income generated in the previous fiscal year by the income tax that was determined.

**Tax authority**

The National Superintendency of Customs and Tax Administration (SUNAT) is responsible for administering all of the aforementioned taxes (income tax, VAT, etc.). Companies resident in Peru must be registered with the tax administration (Taxpayer’s Registry).

The Tax Court is a specialised administrative tribunal, which depends on the Ministry of Economy and Finance, but is otherwise autonomous regarding its specific functions. Its mission is to rule over tax controversies that may arise between the tax administration and the taxpayers, by interpreting and applying the corresponding tax legislation, issuing mandatory observance jurisprudence, and establishing homogenous criteria that continue to support the progress of the tax system.

Finally, taxpayers are entitled to file an appeal before the Judiciary (Court) against resolutions issued by the Tax Court, but payment of the tax debt must be performed or guarantees must be provided.

**Tax audit process**

The tax audit performed by the SUNAT includes all the aspects of the tax and period being subject to review. The tax audit is formal and the process is fully regulated.

The SUNAT is also able to conduct partial audits of limited scope.

**Statute of limitations**

Pursuant to the Peruvian tax legislation, the SUNAT is entitled to audit taxpayers in order to assess their tax liabilities, request the payment of any due tax, and assess any applicable penalty for up to (i) four years from 1 January of the year following the date the corresponding tax return had to be filed, (ii) six years to the extent that the corresponding tax return was not filed, and (iii) ten years when the tax withheld by the taxpayer has not been paid to the SUNAT.

**Topics of focus for tax authorities**

The SUNAT mainly focuses on the following topics:

- Deduction of expenses, including cost share expenses.
- Market value of transactions between related parties.
- Peruvian source income WHT.
- Income tax advance payments.

**General Anti-avoidance Rule (GAAR)**

The GAAR (provision XVI of the Tax Code) allows the SUNAT to consider the acts, situations, and economic activities performed, established, or desired by the taxpayers in order to determine the real nature of the taxable event. To this extent, provision XVI establishes that when tax evasion is detected, the SUNAT is entitled to collect the tax debt and fines; reduce the amount of balances due, NOLs, or tax credits; or eliminate any tax advantage, without prejudice, to recover any amount that was wrongfully reimbursed.
While interpreting the tax legislation, substance should be selected over a legal form. The fact that a taxpayer’s transactions are legal does not imply that they are acceptable with reference to the underlying meaning embedded in the tax rules. Thus, where there is no business purpose except to obtain a tax benefit, the SUNAT should challenge such transactions as artificial and apply the corresponding tax rules.

However, the faculty of the SUNAT to apply provision XVI of the Tax Code has been suspended, with the exception of the first and last paragraphs of said provision.

---

**Other issues**

**Foreign Account Tax Compliance Act (FATCA)**

A Model 1 Intergovernmental agreement (IGA) is treated as ‘in effect’ by the United States (US) Treasury as of 1 May 2014. The US and Peruvian governments have reached an agreement in substance, and Peru has consented to disclose this status. In accordance with this status, the text of such IGA has not been released and financial institutions in Peru are allowed to register on the FATCA registration website consistent with the treatment of having an IGA in effect, provided that the jurisdiction continues to demonstrate firm resolve to sign the IGA as soon as possible.
Significant developments

Approval of the Tax Incentives Management and Transparency Act (TIMTA)
Republic Act (RA) No. 10708, also known as the Tax Incentives Management and Transparency Act, seeks to enhance fiscal accountability and transparency in the grant and management of tax incentives. It was signed into law on 9 December 2015.

Under the law, entities registered with the concerned investment promotion agencies (IPAs) are required to file and submit tax returns and complete annual tax incentives reports. Non-compliance with reporting requirements is subject to penalties ranging from a fine of 100,000 Philippine pesos (PHP) (first violation), PHP 500,000 (second violation), and cancellation of its registration (third violation).

Additional modes of payment of taxes
The Philippine Bureau of Internal Revenue (BIR) has adopted additional modes of payment of taxes through credit, debit, and prepaid cards ('Card Payment Facility') under Revenue Regulations No. 3-2016, dated 12 January 2016. Under the Regulations, taxpayers opting to pay through the Card Payment Facility shall bear the cost of bank and or credit card charges and other fees, including the Merchant Discount Rate.

See further discussion under Payment of tax in the Tax administration section.

Tax treaty updates
From a tax treaty network perspective, the double taxation agreement (DTA) signed by the Philippine government with the Republic of Turkey in March 2009 entered into force on 11 January 2016 and applies on income derived or accrued beginning 1 January 2017.

In addition, two protocols were signed to amend the existing DTAs between the Philippine government and the following countries (note that, as of 25 April 2016, the official signed copies of the full text of the treaties below haven’t been released):

- Germany: The renegotiated DTA between the Philippine government and the Federal Republic of Germany for the Avoidance of Double Taxation with Respect to Taxes on Income and on Capital entered into force on 18 December 2015. The renegotiated treaty shall take effect on any taxable period beginning on or after the first day of January 2016.

See updated tax treaty rates in the Withholding taxes section.
Taxes on corporate income

A domestic corporation is subject to tax on its worldwide income. On the other hand, a foreign corporation is subject to tax only on income from Philippine sources (see the descriptions of Resident foreign corporations and Non-resident foreign corporations below).

Domestic corporations

The following corporate income tax (CIT) rates apply to domestic corporations:

<table>
<thead>
<tr>
<th>Income</th>
<th>CIT rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>In general, on net income from all sources.</td>
<td>30</td>
</tr>
<tr>
<td>Minimum corporate income tax (MCIT) on gross income, beginning in the fourth taxable year following the year of commencement of business operations. MCIT is imposed where the CIT at 30% is less than 2% MCIT on gross income.</td>
<td>2</td>
</tr>
<tr>
<td>Proprietary educational institutions and non-profit hospitals, on net income if gross income from unrelated trade, business, and other activities does not exceed 50% of the total gross income from all sources.</td>
<td>10</td>
</tr>
<tr>
<td>Non-stock, non-profit educational institutions (all assets and revenues used actually, directly, and exclusively for educational purposes) and other non-profit organisations.</td>
<td>Exempt</td>
</tr>
</tbody>
</table>

Certain passive income from domestic sources is subject to final tax rather than ordinary income tax (see the Income determination section).

Improperly accumulated earnings tax

An improperly accumulated earnings tax of 10% is imposed on improperly accumulated income. The tax applies to every corporation formed or used for the purpose of avoiding income tax with respect to its shareholders, or the shareholders of any other corporation, by permitting earnings and profits to accumulate instead of being divided or distributed. Exceptions are made for publicly held corporations, banks and non-bank financial intermediaries, and insurance companies.

Resident foreign corporations

Resident foreign corporations (i.e. foreign corporations engaged in trade or business in the Philippines through a branch office) are taxed in the same manner as domestic corporations (except on capital gains on the sale of buildings not used in business, which are taxable as ordinary income), but only on Philippine-source income.

International carriers are subject to an income tax of 2.5% on their gross Philippine billings unless a lower rate is available under an existing tax treaty. Exception from this tax is also available under international agreements to which the Philippines is a signatory or on the basis of reciprocity in cases where the home country of the international carrier grants income tax exemption to Philippine carriers.

Income of offshore banking units (OBUs) and foreign currency deposit units (FCDUs) of depository banks from foreign currency transactions with non-residents, other OBUs, or FCDUs and local commercial banks (including branches of foreign banks) authorised by the Bangko Sentral ng Pilipinas (central bank) to transact business with OBUs and FCDUs are exempt from all taxes except net income specified by the Secretary of Finance upon recommendation of the Monetary Board. Interest income from foreign currency loans granted to residents other than OBUs or local commercial banks shall be subject to a 10% final income tax.

Regional or area headquarters of multinational corporations that do not earn or derive income from the Philippines, and that act as supervisory, communications, and coordinating centres for their affiliates, subsidiaries, or branches in the Asia-Pacific region and other foreign markets are not subject to CIT.
Philippines

Regional operating headquarters (ROHQ) pay a tax of 10% on their taxable income. An ROHQ is a branch established in the Philippines by a multinational company that is engaged in any of the following services: general administration and planning, business planning and coordination, sourcing and procurement of raw materials and components, corporate finance advisory services, marketing control and sales promotion, training and personnel management, logistic services, research and development services and product development, technical support and maintenance, data processing and communication, or business development.

Non-resident foreign corporations
In general, non-resident foreign corporations are taxed on gross income received from sources within the Philippines at 30%, except for reinsurance premiums, which are exempt. Interest on foreign loans is taxed at 20%. Dividends from domestic corporations, however, are subject to a final withholding tax (WHT) at the rate of 15% if the country in which the corporation is domiciled does not impose income tax on such dividends or allows a tax deemed paid credit of 15%.

Lower rates or exemption on the above income may be available under an applicable tax treaty.

Rentals and charter fees payable to non-resident owners of vessels chartered by Philippine nationals are subject to a final tax of 4.5%. Rentals, charters, and other fees derived by non-resident lessors of aircraft, machinery, and other equipment are subject to a final tax of 7.5%.

Local income taxes
See Local government taxes in the Other taxes section for a description of local taxes on sales or receipts.

Corporate residence
A domestic corporation is a corporation that is created or organised under Philippine laws. A foreign corporation that is duly licensed to engage in trade or business within the Philippines is referred to as a ‘resident foreign corporation’.

Permanent establishment (PE)
The business profits provision in most Philippine treaties permits the Philippines to tax only those profits attributable to a PE. While Philippine treaties adopt the United Nations (UN) Model Convention, Organisation for Economic Co-operation and Development (OECD) commentaries have often been cited by tax authorities to support their interpretation of treaty provisions. The main implication is that most Philippine treaties contain a rule deeming a PE to arise when services are performed in the Philippines for a specified period of time.

Other taxes
Value-added tax (VAT)
VAT applies to practically all sales of services and imports, as well as to sales, barter, exchange, or lease of goods or properties (tangible or intangible). The tax is equivalent to a uniform rate of 12%, based on the gross selling price of goods or properties sold, or gross receipts from the sale of services. On importation of goods, the basis of the tax is the value used by the Bureau of Customs in determining tariff and customs duties plus customs duties, excise taxes, if any, and other charges. Where the valuation used by the Bureau of Customs is by volume or quantity, the VAT basis is the landed cost plus excise taxes, if any.
Certain transactions are zero-rated or exempt from VAT. Export sales by VAT-registered persons are zero-rated.

Certain sales of services exempt from VAT, including services provided by financial intermediaries, are subject to percentage taxes based on gross sales, receipts, or income. A 3% percentage tax also applies to persons who are not VAT-registered because their annual sales or receipts do not exceed PHP 1,919,500.

**Customs duties**
Applicable customs duties are determined based on the tariff classification of the import product. As with the rest of the Association of South East Asian Nations (ASEAN) countries, tariff classification in the Philippines is based on the ASEAN Harmonised Tariff Nomenclature (AHTN), which is patterned after the Harmonised Commodity Classification and Coding System (HS) Convention and its 2002 revisions. The latest edition, HS Code 2012, entered into force on 1 January 2012. With HS Code 2012, the overall AHTN tariff lines were reduced by 247, or an approximately 4% cut in the number of AHTN tariff lines in 2010. Although 267 classification rulings were issued to address commonly raised valuation and tariff classification, it is still advisable that tariff classification rulings from the Philippine Tariff Commission be secured prior to importation into the Philippines in case of uncertainty as to the correct classification of a product. Note that while the tariff classification rulings issued by the Philippine Tariff Commission do not prevent the Bureau of Customs from conducting its own verification, these rulings carry persuasive reference in support of the classification and duty rate used by an importer.

The Philippines adopts the World Trade Organization (WTO) Valuation Agreement, where the declared invoice price is used as the basis for determining customs duties.

As a protective measure, the Philippines retains higher tariff rates (20% to 50%) on sensitive agricultural products, such as grains, livestock and meat products, sugar, certain vegetables, and coffee. A few agricultural commodities are subject to minimum access volumes, but these represent less than 1% of all tariff lines.

In view of the existing free trade agreements in the region, such as the ASEAN Free Trade Area (AFTA), ASEAN-China Free Trade Area (ACFTA), ASEAN-Korea Free Trade Area (AKFTA), the ASEAN-Australia-New Zealand Free Trade Area (AANZFTA), the ASEAN-Japan Comprehensive Economic Partnership Agreement (AJCEPA), and the ASEAN-INDIA Free Trade Area (AIFTA), the Philippines has taken steps to progressively eliminate tariffs. Tariff reductions for the Philippines range from 10% to 35% for most products included in the Normal Track list.

**Excise taxes**
Excise tax is payable at varying rates on alcohol products, tobacco products, petroleum products, mineral products, and automobiles. Excise tax is also payable on all goods commonly or commercially known as jewellery, whether real or imitation; perfumes and toilet waters; and yachts and other vessels intended for pleasure or sport at 20% of the wholesale price or value of the importation used by the Bureau of Customs in determining tariff and customs duties.

**Documentary stamp tax (DST)**
DST is payable at varying rates on various documents and transactions. The following table contains selected examples:

<table>
<thead>
<tr>
<th>Taxable document/ transaction (tax base)</th>
<th>DST rate</th>
</tr>
</thead>
<tbody>
<tr>
<td>Original issue of shares</td>
<td>PHP 1 for every PHP 200 or fractional part of par value</td>
</tr>
</tbody>
</table>
**Philippines**

<table>
<thead>
<tr>
<th>Taxable document/transaction (tax base)</th>
<th>DST rate</th>
</tr>
</thead>
<tbody>
<tr>

</tr>
<tr>
<td>Life insurance policy</td>
<td>PHP 10 to PHP 100 depending upon the amount of insurance</td>
</tr>
<tr>
<td>Lease/hiring agreement</td>
<td>PHP 3 for the first PHP 2,000 or fractional part of amount stipulated in contract, and PHP 1 for every PHP 1,000 or fractional part in excess of PHP 2,000 for each year of contract term</td>
</tr>
<tr>
<td>Mortgage, pledge, deed of trust</td>
<td>PHP 20 for the first PHP 5,000 of amount secured, and PHP 10 for every PHP 5,000 or fractional part in excess of PHP 5,000</td>
</tr>
<tr>
<td>Deed of sale, conveyance of real property</td>
<td>PHP 15 for each PHP 1,000 of consideration/value or fractional part thereof</td>
</tr>
</tbody>
</table>

**Capital gains tax**

Capital gains arise from the sale or exchange of ‘capital assets’. Capital assets are property held by the taxpayer (whether or not connected with its trade), other than the following:

- Inventories or property held primarily for sale to customers in the ordinary course of business.
- Real property or depreciable property used in trade or business.
- Property of a kind that would be included in the inventory of the taxpayer if on hand at the close of the taxable year.

Capital losses are deductible only to the extent of capital gains.

There are no holding period requirements for capital assets of corporations.

A 6% final tax is imposed on the higher of the gross selling price or fair market value upon the sale, exchange, or disposition of land or buildings not actually used in the business of a corporation. The tax is withheld by the buyer at the time of sale.

Net capital gains derived from the sale, exchange, transfer, or similar transactions of shares of stock not traded through a local stock exchange are taxed at 5% on the first PHP 100,000 of gains, and 10% on gains in excess of PHP 100,000. Sales of shares of stock listed and traded on a local stock exchange, other than the sale by a dealer in securities, are subject to a stock transaction tax of 0.5% based on the gross selling price, provided the listed corporation observes a minimum public ownership of at least 10% based on the company’s issued and outstanding shares, exclusive of any treasury shares or such percentage as may be prescribed by the Securities and Exchange Commission (SEC) or Philippine Stock Exchange (PSE), whichever is higher; otherwise, the 5%/10% tax shall apply.

Capital gains from the sale of bonds, debentures, or other certificates of indebtedness with a maturity of more than five years are exempt from tax.
A tax is levied on every sale, barter, exchange, or other disposition through an initial public offering (IPO) of shares of stock in closely held corporations. A ‘closely held corporation’ is any corporation of which at least 50% in value of the total outstanding capital stock, or at least 50% of the total combined voting power of all classes of stock entitled to vote, is owned directly or indirectly by, or for, not more than 20 individuals. The tax rates provided hereunder are based on the proportion of the gross selling price, or gross value in money, of the shares of stock sold, bartered, exchanged, or otherwise disposed of to the total outstanding shares of stock after listing on the local stock exchange.

<table>
<thead>
<tr>

</tr>
<tr>
<td>Over 33 1/3%</td>
<td>1</td>
</tr>
</tbody>
</table>

**Fringe benefits tax**

A final tax of 32%, payable by the employer, is imposed on the grossed-up monetary value of fringe benefits (e.g. housing, expense accounts, vehicles of any kind, household personnel, interest on loans at lower than market rates [the current benchmark rate is 12%], membership dues for social and athletic clubs, foreign travel expenses, holiday and vacation expenses, educational assistance, insurance) furnished or granted to managerial or supervisory personnel by the employer. An exception is for fringe benefits required by the nature of or necessary to the trade, business, or profession of the employer, or when the fringe benefit is for the convenience or advantage of the employer.

The following fringe benefits are not subject to the tax:

- Those authorised and exempted from tax under special laws.
- Contributions of the employer for the benefit of the employee to retirement, insurance, and hospitalisation benefit plans.
- Those granted to rank-and-file employees (however, the employees may be subject to WHT on compensation).
- Those of relatively small value or de minimis benefits.

The fringe benefits tax is payable on a calendar quarter basis and is an additional deductible expense for the employer. Fringe benefits already subjected to fringe benefits tax will no longer form part of the employee’s taxable income.

The grossed-up monetary value of the fringe benefit is generally computed by dividing the actual monetary value of the benefit by 68%.

**Payroll taxes**

**Social security contributions**

Corporations doing business in the Philippines must be registered with social institutions, such as the Social Security System (SSS), Home Development Mutual Fund (HDMF), and Philippine Health Corporation (PHIC), upon employment of any employee and prior to the due date of the remittance of any social contributions.

Employee contributions for social security are deducted from the employee’s salary payments. For 2016, the maximum monthly deductions remain at PHP 581.30 for SSS, PHP 100 for HDMF, and PHP 437.50 for PHIC.

Employers are also required to make contributions. Employers’ maximum contribution for each employee is PHP 1,208.70 per month. Employer contributions for HDMF and PHIC are generally of the same amount as the employee contributions.
Philippines

Local government taxes
Local government units impose local business taxes, which are generally based on the gross sales or gross receipts of the prior year, and real property taxes, which are levied annually on the basis of a fixed proportion of the value of the real property (taxable value). The local business tax rate varies depending on the location of the business, but generally shall not exceed 3%. Real property located in a province may be subject to real property tax of not more than 1% of its taxable value, while real property in a city (or municipality in Metro Manila) may be subject to real property tax of not more 2% of its taxable value.

Branch income
The income tax rate on branch profits is the same as on corporate profits. In general, profits remitted abroad by a branch office are subject to a 15% tax rate, based on the total profits applied or earmarked for remittance, without any deduction for the tax component thereof. A lower rate may apply under certain tax treaties. Profits from qualified activities remitted by a branch registered with the Philippine Economic Zone Authority (PEZA) are tax exempt.

Income determination

Inventory valuation
Inventories are generally stated at cost or at the lower of cost or market. Last in first out (LIFO) is not allowed for tax purposes. Generally, the inventory valuation method for tax purposes must conform to that used for financial reporting purposes.

Capital gains
Capital gains are not generally subject to CIT, but may be subject to capital gains tax. See Capital gains tax in the Other taxes section for more information.

Dividend income
Dividends received by a domestic or resident foreign corporation from another domestic corporation are not subject to tax. These dividends are excluded from the taxable income of the recipient.

Dividends received by a non-resident foreign corporation from a domestic corporation are subject to a general final WHT at the rate of 30%. A lower rate of 15% applies if the country in which the corporation is domiciled either does not impose income tax on such dividends or allows a tax deemed paid credit of 15%. Treaty rates ranging from 10% to 25% may also apply if the recipient is a resident of a country with which the Philippines has a tax treaty.

Stock dividends
A Philippine corporation can distribute stock dividends tax-free, proportionately to all shareholders.

Interest income
Interest on bank savings, time deposits, deposit substitutes, and money market placements received by domestic or resident foreign corporations from a domestic corporation are subject to a final tax of 20%, while interest income derived from FCDU deposits is subject to a final tax of 7.5%. Such income is excluded from gross income reportable in CIT returns.

Interest income of OBUs and FCDUs from foreign currency loans granted to residents other than OBUs or local commercial banks shall be subject to 10% tax.
**Royalty income**  
Royalties received by domestic or resident foreign corporations from a domestic corporation are subject to a final tax of 20%.

**Other significant items**  
Other items exempt from CIT include the following:

- Proceeds of life insurance policies.
- Return of policy premium.
- Gifts, bequests, and devises.
- Interest on certain government securities.
- Income exempt under a treaty.
- Gains from sale, exchange, or retirement of bonds.
- Gains from redemption of shares of stock in mutual fund companies.

**Foreign income**  
A Philippine (domestic) corporation is taxed on its worldwide income. A domestic corporation is taxed on income from foreign sources when earned or received, depending on the accounting method used by the taxpayer.

Income earned through a foreign subsidiary is taxed only when paid to a Philippine resident shareholder as a dividend. Meanwhile, income earned through a foreign branch is taxed as it accrues. The losses incurred by the foreign branch are deductible against other income earned by the Philippine corporation.

Double taxation is generally relieved through a credit for foreign taxes. However, a taxpayer can take a deduction for foreign taxes instead, if that leads to a more favourable outcome.

**Deductions**  
Corporate taxpayers can avail themselves of the optional standard deduction computed at 40% of gross income. The optional standard deduction is in lieu of the itemised operating expenses.

**Depreciation and depletion**  
Depreciation is generally computed on a straight-line basis, although any reasonable method may be elected if the aggregate amount of depreciation, plus salvage value at the end of the useful life of the property, will equal the cost of the property. Gain on the sale of depreciated property is taxable as ordinary income. Generally, tax depreciation should conform to book depreciation, unless the former includes incentives.

Properties used in petroleum operations may be depreciated over a period of ten years using the straight-line or declining-balance method, at the option of the service contractor. Properties used in mining operations with expected life of more than ten years may be depreciated over any number of years between five years and their expected life.

A cost depletion allowance is available as follows:

- For oil and gas wells, depletion is based on actual reduction in flow and production ascertained, not by flush flow, but by the settled production or regular flow.
- For mines, depletion is allowable up to an amount not to exceed the market value, as used for purposes of imposing the mining *ad valorem* taxes, of the products mined and sold during the year.

**Goodwill**  
Goodwill is not deductible for tax purposes.
Start-up expenses
Start-up expenses are deductible when incurred.

Interest expenses
The allowable deduction for interest expense is reduced by an amount equal to 33% of interest income that is subject to final tax.

Bad debts
Bad debts are deductible expenses when written-off, subject to certain requirements.

Charitable contributions
The deduction for charitable contributions ordinarily may not exceed 5% of taxable income. However, contributions to certain institutions are 100% deductible, subject to certain conditions.

Entertainment expenses
Entertainment, amusement, and recreation expenses should not exceed 0.5% of net sales for taxpayers engaged in the sale of goods or properties, or 1% of net revenue for taxpayers engaged in the sale of services, including professionals and lessors of properties.

Special deductions
Special deductions are allowed for certain businesses (e.g. insurance, mining, petroleum, and real estate investment trust).

Fines and penalties
Fines and penalties are deductible as necessary and ordinary business expenses. Surcharge and compromise penalty imposed for non-payment or late payment of taxes is not deductible for tax purposes.

Taxes
Corporate taxpayers can claim a deduction for all taxes paid or accrued within the taxable year in connection with their trade or business, except for the following:

- Philippine CIT.
- Income taxes imposed by authority of any foreign country, unless the taxpayer elects to take a deduction in lieu of a foreign tax credit.
- Estate and donor’s taxes.
- Taxes assessed against local benefits of a kind tending to increase the value of the property assessed.

In the case of a foreign corporation, deductions for taxes are allowed only if they are connected with income from sources within the Philippines.

Net operating losses
A net operating loss for any taxable year immediately preceding the current taxable year, which had not been previously offset as a deduction from gross income, may be carried over as a deduction from gross income for the next three consecutive taxable years immediately following the year of this loss (except losses during the period when the taxpayer was tax-exempt), provided there has been no substantial change in the ownership of the business or enterprise.

For mines, other than oil and gas wells, a net operating loss calculated without the benefit of incentives provided for under Executive Order (EO) No. 226, or the Omnibus Investments Code of 1987, as amended, incurred in any of the first ten years of operation may be carried over as a deduction from taxable income for the next five years immediately following the year of such loss.
Loss carrybacks are not allowed.

**Payments to foreign affiliates**
A Philippine corporation can claim a deduction for royalties, management service fees, and interest charges paid to foreign affiliates, provided such amounts are equal to what it would pay an unrelated entity, and the appropriate WHTs are withheld and remitted.

The registration of licensing and management agreements, now known as technology transfer arrangements (TTAs), has been liberalised. Only TTAs not conforming to certain provisions of the Intellectual Property Code require approval by, and registration with, the Documentation, Information, and Technology Transfer Bureau of the Intellectual Property Office (formerly Bureau of Patents, Trademarks, and Technology Transfer) to render the contracts enforceable.

**Head office expense allocations**
A resident foreign corporation is allowed to claim allocated head office expenses as a deduction, subject to certain requirements.

---

**Group taxation**
There is no group taxation in the Philippines.

**Transfer pricing**
Transfer Pricing Regulations govern the cross-border and domestic transactions between associated enterprises. The Regulations state that the ‘arm’s-length principle’ shall be adopted in determining the transfer price in related-party transactions. The application of the arm’s-length principle may follow a ‘three-step’ approach prescribed by the BIR under the Regulations, to wit: (i) the conduct of a comparability analysis, (ii) the identification of the tested party and the appropriate transfer pricing method, and (iii) the determination of the arm’s-length results.

Taxpayers must keep adequate documentation supporting their transfer prices so that they can defend their transfer pricing analysis, mitigate the risk of transfer pricing adjustments arising from tax examinations, and support their applications for Mutual Agreement Procedure (MAP). There is also a ‘contemporaneous’ requirement that transfer pricing documents must exist or be brought into existence at the time the taxpayers develop or implement any arrangements that may raise transfer pricing issues. This can generally mean that while transfer pricing documentation is not required to be submitted together with the tax returns, such documents should be retained and submitted to the BIR when required or requested. There is no prescribed period within which such documentation may be made available, but it should be available in cases of audit/investigation.

An Advance Pricing Arrangement (APA) is an agreement entered into between the taxpayer and the BIR to determine in advance an appropriate set of criteria (e.g. method, comparables, appropriate adjustments thereto) to ascertain the transfer prices of controlled transactions over a fixed period of time. It is currently available to taxpayers, but the BIR is still in the process of drafting more detailed guidelines. The APA is not mandatory, but may be advisable since the purpose of the APA is to reduce the risk of transfer pricing re-examination and double taxation.

Transactions entered into prior to the Transfer Pricing Regulations becoming effective in February 2013 shall be governed by the laws and other administrative issuances prevailing at the time the controlled transactions were entered into.

**Thin capitalisation**
There are generally no thin capitalisation rules in the Philippines.
Controlled foreign companies (CFCs)
There are no CFC rules in the Philippines.

Tax credits and incentives

Foreign tax credit
Domestic corporations are allowed to claim a credit for any income taxes paid to a foreign country, provided that the taxes are not claimed as deductions. Foreign corporations are not allowed foreign tax credits.

Credits for foreign taxes are determined on a country-by-country basis. The amount of foreign tax credit in respect of the tax paid in a country shall not exceed the same proportion of the tax against which the tax credit is taken, which the taxpayer’s income from the country bears to its entire taxable income. There is, however, a further limitation based on the total amount of foreign-sourced income that the taxpayer earns. The total amount of foreign tax credits shall not exceed the same proportion of the tax against which the tax credit is taken that the taxpayer’s foreign-sourced income bears to its entire taxable income.

Export incentives
Tax incentives available to export enterprises registered with the Board of Investments (BOI) are as follows:

- Income tax holiday (ITH) giving full exemption from CIT for six years for pioneer firms and those locating in less-developed areas and four years for non-pioneer firms. The ITH period starts from the date of commercial operation, or target date of operation, whichever is earlier. If prescribed conditions are met, the ITH period may be extended by up to three years. In no case, however, can the total ITH period exceed eight years. Expanding export-oriented firms are also allowed a three-year ITH on the incremental income. Subject to certain exceptions, new and expansion projects located in the National Capital Region (NCR) or Metro Manila are no longer entitled to ITH.
- Tax and duty exemption on imported spare parts and supplies for export producers with a customs bonded manufacturing warehouse exporting at least 70% of annual production, if foreign-owned, or 50%, if Filipino-owned.
- Full deduction of the cost of major infrastructure undertaken by enterprises in less-developed areas.
- Additional deduction of 50% of the incremental labour expense if the prescribed ratio of capital assets to annual labour is met and 100% of the incremental labour if located in less-developed areas within five years from date of registration (this incentive cannot be availed of simultaneously with the ITH).
- Ten-year exemption from taxes and duties on importation of breeding stock and genetic materials.
- Tax credit on domestic breeding stocks and genetic materials (ten years).
- Exemption from wharfage, any export tax, duty, impost, or fees.
- Tax credits equivalent to taxes and duties paid on purchases of raw materials, supplies, and semi-manufactured products forming part of the products for export.

Other incentives
Export and free-trade enterprises, information technology (IT) enterprises, and special economic zone developers/operators (including IT buildings located in Metro Manila and IT parks) registered with PEZA are entitled to an ITH of six years for pioneer firms and four years for non-pioneer firms. Foreign articles brought into the zones will be exempt from import duties and taxes. Local purchases of goods from VAT-registered suppliers outside the economic zones are zero-rated. After the lapse of the ITH period, enterprises registered and operating within special economic zones/export processing zones will pay only a 5% special tax on gross income earned from registered activities in lieu of all local and national taxes.
A regional or area headquarters established in the country as a supervisory, communications, and coordination centre for a corporation’s subsidiaries, affiliates, and branches in the Asia-Pacific region, and whose headquarters do not derive income from the Philippines, are not subject to any CIT nor VAT and are entitled to certain non-tax incentives.

An ROHQ that is allowed to derive income in the Philippines by performing qualifying business services to its affiliates, subsidiaries, or branches in the Philippines, in the Asia-Pacific Region, and other foreign markets may avail itself of the following incentives:

- Income tax at the preferential rate of 10% of its taxable income.
- Exemption from all kinds of local taxes, fees, or charges imposed by a local government unit, except real property tax on land improvements and equipment.
- Tax and duty-free importation of equipment and materials for training and conferences that are needed and used solely for its functions as an ROHQ and are not locally available, subject to the prior approval of the BOI.
- Importation of new motor vehicles, subject to the payment of corresponding duties and taxes.
- Exemption from travel tax, specific immigration fees, and requirements, subject to certain conditions.

The following are the incentives granted to exporters under the Export Development Act (Republic Act No. 7844):

- Exemption from Presidential Decree No. 1853 (requiring 100% of Letter of Credit), provided that the importation shall be used for the production of goods and services for export.
- Tax credit for incremental export performance. The tax credit for increase in current export revenues shall be computed as a percentage to be applied on the incremental export revenue converted to pesos at the current rate. The percentages or rates are as follows:
  - For the first 5% increase in annual export revenues over the previous year: 2.5%.
  - For the next 5% increase: 5.0%.
  - For the next 5% increase: 7.5%.
  - In excess: 10%.

Note that this incentive is not available for exporters enjoying ITH or VAT exemption or whose local VAT is below 10%.

- In addition to the above incentives, all existing incentives being enjoyed by the enterprise if registered with the BOI, PEZA, Subic Bay Metropolitan Authority (SBMA), Clark Development Corporation (CDC), or other ecozone regulating agencies.

Withholding taxes

Corporations and individuals engaged in business are required to withhold the appropriate tax on income payments to non-residents, generally at the rate of 30% in the case of payments to non-resident foreign corporations or 25% for non-resident aliens not engaged in trade or business. For WHT on resident corporations, see the discussions in the Income determination section.

Tax treaty rates

For countries with which the Philippines has concluded tax treaties, the maximum rates of taxes to be withheld are as follows:

As of 21 April 2016:
### Philippines

**Notes**

1. The lower rate generally applies if the beneficial owner of the dividends is a company with a substantial ownership in the dividend paying company.
2. Interest derived by a foreign government or its agencies is typically exempt from Philippine tax. Many treaties also contain special rules for both Philippine and home country taxation of interest paid on instruments secured by a government agency of one of the countries. Such provisions have been excluded from the analysis.
3. A 15% rate applies under domestic law if the home country exempts the dividend from tax or permits a 15% or greater credit for corporate taxes paid by the company paying the dividend.
4. Entitlement to the lower rate depends on how the dividend will be taxed in Australia.
5. The 10% rate applies to interest paid in respect of the public issues of bonds, debentures, or similar obligations.
6. The lower rate applies to royalties paid by an enterprise registered with the Philippine BOI and engaged in preferred areas of activity.
7. The threshold for substantial ownership is 10%.
8. The 10% rate also applies to interest paid by a company registered with the BOI and engaged in preferred pioneer areas of investment in the Philippines.
9. The treaty also contains a most-favoured-nation rule, limiting the Philippine tax on royalties to the lowest rate of Philippine tax that may be imposed on royalties of the same kind paid in similar circumstances to a resident of a third state.
10. The 15% rate applies to royalties arising from the use of, or the right to use, any copyright of literary, artistic, or scientific work including cinematograph films or tapes for television or broadcasting.
11. The threshold for substantial ownership is 25%.
12. The 25% rate applies to royalties arising from the use or the right to use trademarks and cinematographic films, films or tapes for television or radio broadcasting. The 15% applies to any other royalties.
13. The 10% rate applies to the use of, or the right to use, any patent, trademark, design or model, plan, secret formula or process, or from the use of, or the right to use, industrial, commercial, or scientific equipment, or for information concerning industrial, commercial, or scientific experience. Strictly, application of the rate is generally at the discretion of the Philippine Competent Authorities, but the BIR has never raised this as an issue.
14. The 10% rate applies to royalties arising from the use of, or the right to use, any copyright of literary, artistic, or scientific work (other than copyright of cinematograph films), any patent, trademark, design or model, plan, secret formula or process, or from the use of, or the right to use, industrial, commercial, or scientific equipment, or for information concerning industrial, commercial, or scientific experience.
15. The 15% rate applies to royalties paid by an enterprise registered and engaged in preferred areas of activities, and to royalties in respect of cinematographic films or tapes for television or broadcasting, and for the use of, or the right to use, any copyright. The 25% rate applies to other royalties.
16. The 10% rate also applies to interest paid in connection with the sale on credit of any industrial, commercial, or scientific equipment.
17. The 10% rate also applies to interest paid on any loans granted by a bank.
18. The 15% rate also applies to royalties in respect of cinematographic films or tapes for television or broadcasting.
19. The 10% rate applies to royalties paid by an enterprise registered with the BOI and engaged in preferred pioneer areas of activity. The 20% rate applies to rentals from cinematographic films and tapes for television or broadcasting. The 15% rate applies to all other royalties.
20. The 7.5% rate applies to the lease of containers. The 10% rate applies to royalties paid by an enterprise registered with the BOI. The 25% rate applies to other royalties.
21. The 10% rate applies to royalties paid by an enterprise registered with the BOI and engaged in preferred pioneer areas of activity. The 20% rate applies to rentals from cinematographic films and tapes for television or broadcasting. The 15% rate applies to all other royalties.
22. The threshold for substantial ownership is 15%.
23. The 10% rate applies to royalties paid by an enterprise registered with the BOI and engaged in preferred pioneer areas of activity. The 20% rate applies to rentals from cinematographic films and tapes for television or broadcasting. The 15% rate applies to all other royalties.
24. The threshold for substantial ownership is 70% for the 5% rate to apply.

**Tax administration**

**Taxable period**
The accounting period must follow a 12-month fiscal period but may or may not follow the calendar year. Most Philippine companies have a fiscal year that ends in December or March.

**Tax returns**
Corporations should file their returns and compute their income on the basis of an accounting period of 12 months.

Corporate taxpayers file self-assessed returns. Electronic filing and payment of taxes are available under the Electronic Filing and Payment System (eFPS) of the BIR.

The following corporate taxpayers who are not covered by eFPS are required to use Electronic BIR Forms (eBIRForms) in filing their tax returns:

- Accredited tax agents/practitioners and all their client-taxpayers who authorised them to file on their behalf.
- Accredited printers of principal and supplementary receipts/invoices.
- One-time transaction taxpayers.
- Those who shall file a ‘No Payment’ return, except senior citizen or persons with disabilities filing their own return, employees deriving purely compensation income and the income tax of which has been withheld correctly, employees qualified for substituted filing but opted to file for an income tax return and are filing for purposes...
of promotion (Philippine National Police and Armed Forces of the Philippines), loans, scholarship, foreign travel requirements, etc.

- Government-owned or controlled corporations.
- Local government units, except barangays.
- Cooperatives registered with the National Electrifications Administration and Local Water Utilities Administrations.

Taxpayers who are required to file their returns using eFPS or eBIRForms but fail to do so shall be subject to a penalty of PHP 1,000 per return and civil penalties equivalent to 25% of the tax due.

A domestic or resident foreign corporation is required to file income tax returns on a quarterly basis. Within 60 days from the close of the first three quarters of its taxable year, the corporation must file a return summarising its gross income and deductions for the year to date. A final annual income tax return must be filed on or before the 15th day of the fourth month following the close of the taxable year.

Corporate taxpayers must file their income tax returns using one of three different forms, depending on their tax regime (i.e. subject only to the regular income tax, tax exempt, or with mixed income subject to multiple tax rates or special/preferential rates).

**Payment of tax**

Every corporation files cumulative quarterly income tax returns for the first three quarters and pays the tax due within 60 days after each quarter. A final adjustment return covering the total taxable income of the preceding taxable year must be filed on the 15th day of the fourth month following the close of the taxable year. The balance of the tax due after deducting the quarterly payments must be paid, while the excess may be claimed as a refund or tax credit. Excess estimated quarterly income taxes paid may be carried over and credited against estimated quarterly income tax liabilities for succeeding taxable years. Once the option to carry over has been made, such option is irrevocable, and no cash refund or tax credit certificate (TCC) is allowed, except upon liquidation of the company.

Since additional modes of payment of taxes are now available through credit, debit, and prepaid cards under recently issued Revenue Regulations, taxpayers may choose from the available online payment facilities provided by the Electronic Payment Service Provider (EPSP) to process tax payments. However, only accredited Authorised Agent Banks (AABs) may accept such payments, and accreditation of AABs is subject to compliance with certain conditions under existing Regulations.

Payment of taxes through the Card Payment Facility shall be deemed made on the date and time appearing in the system-generated payment confirmation receipt issued to the taxpayer-cardholder by the AAB-acquirer, provided that the payment was actually received by the BIR. The taxpayer is not relieved of, and has a continuing liability for such taxes, until the payment is actually received by the BIR.

**Annual statutory audit**

An annual statutory audit is required for all corporations with authorised capital stock or paid-up capital exceeding PHP 50,000, including branches of foreign corporations. It is also required for any corporation whose gross sales or earnings exceed PHP 150,000 in any quarter.

**Statute of limitations**

There is no statutory obligation on the Tax Commissioner to make an assessment for internal revenue taxes, and most taxes are collected based on the taxpayer’s self-calculation. If an assessment is to be issued, however, it must be done within three years from the deadline or the date of actual filing of the return, whichever is later. The taxpayer and the Commissioner can, however, agree in writing to extend this period.
In the case of a false or fraudulent return or of failure to file a return, the tax may be assessed or a proceeding in court for collection may be commenced without assessment at any time within ten years from the discovery of the falsity, fraud, or omission.

Any internal revenue tax that has been assessed within the period of limitation may be collected by distraint or levy or by a proceeding in court within five years following the assessment of the tax.

The prescription periods are suspended in certain circumstances, such as when the offender is absent from the Philippines, when the Commissioner grants a taxpayer’s request for a reinvestigation, or when the taxpayer and the BIR agree to extend the prescriptive period for assessment through a written waiver.

In the case of overpayment of tax, a claim for refund or credit may be filed with the BIR within two years from the date of erroneous payment of the tax. If the claim is denied or no decision is received from the BIR, a petition for review may be filed with the Court of Tax Appeals (CTA). This must be filed before the two-year period expires, and in the case of a denied claim, within 30 days from the receipt of the denial.

**Topics of focus for tax authorities**

During audits, the BIR generally covers all applicable internal revenue taxes. With the issuance of certain regulations in recent years, assessment issues involving transfer pricing, intercompany advances, donor’s tax, and improperly accumulated earnings tax have become more prevalent.

**Other issues**

**United States (US) Foreign Account Tax Compliance Act (FATCA)**

FATCA took effect on 1 July 2014. Under FATCA, financial institutions outside the United States shall report each year to the US Internal Revenue Service (IRS) information about accounts held by US citizens. The said financial institutions that fail to comply with FATCA are subject to a 30% WHT on US-sourced ‘fixed, determinable, annual, or periodic income’, which shall be withheld by their counterparties in the United States.

In the absence of an intergovernmental agreement (IGA), participating foreign financial institutions (FFIs) in the Philippines individually signed an FFI Agreement with the IRS.

Under Model 1 of the IGA, FFIs will provide information on US accounts to the BIR, which information will be relayed to the IRS.

Currently, Model 1 IGA is treated as ‘in effect’ by the US Treasury as of 30 November 2014. The United States and the Philippines have reached an agreement in substance, and the Philippine government has consented to disclose this status. In accordance with this status, the text of such IGA has not been released and financial institutions in the Philippines are allowed to register on the FATCA registration website consistent with the treatment of having an IGA in effect, provided that the jurisdiction continues to demonstrate firm resolve to sign the IGA as soon as possible.

However, as of 25 April 2016, the BIR has not yet issued the reporting guidelines for Model 1 of the IGA, pending its ratification by the Philippine Senate. Thus, the reporting deadline for participating FFIs is currently on hold.
Significant developments

Changes in transfer pricing rules
New regulations, binding from 1 January 2016, introduce a number of significant changes to the Polish transfer pricing regulations and imposes new requirements on taxpayers conducting related-party transactions.

In general, more information on related-party transactions will need to be disclosed to the tax authorities.

The new Polish regulations generally follow guidelines of the base erosion and profit shifting (BEPS) Action 13 report; however, certain specific local requirements have also been introduced. According to the new regulations, taxpayers will be obligated to prepare much more extensive transfer pricing documentation (compared to the current requirements) after exceeding certain statutory thresholds, conducting benchmarking studies, and submitting additional returns summarising related-party transactions conducted.

On the other hand, the new regulations introduce some changes favourable for taxpayers. In particular, the materiality thresholds are increased for transfer pricing purposes.

Country-by-country reporting is also introduced by the new regulations. Regulations on country-by-country reporting are binding as of 1 January 2016, whereas other changes become effective as of 1 January 2017.

Dividend income
As of 1 January 2016, European Union (EU) Council Directive no. 2015/21 dated 27 January 2015 was introduced to the Polish tax system. According to the new regulations, the participation exemption on dividends and other profit-sharing payments will not apply to the legal transaction or series of legal transactions that, having been put into place for the main purpose or one of the main purposes of obtaining a tax advantage, are not genuine, having regard to all relevant facts and circumstances.

Tax on certain financial institutions
As of February 2016, certain financial institutions, such as banks, insurance, and re-insurance companies (including branch offices in Poland), as well as so-called lending companies, are subject to tax on certain financial institutions (so-called ‘banking tax’). Tax at the rate 0.44% per year (0.0366% per month) is levied on the assets of the taxpayers exceeding certain thresholds.

Taxes on corporate income
The corporate income tax (CIT) is the only tax levied on corporate income. The standard CIT rate is 19%.
Poland

Polish tax residents are subject to tax on their worldwide income. Non-residents are taxed only on their Polish-sourced income. The tax authorities’ right to tax a non-resident is further limited if the non-resident’s country of residence concluded a double tax treaty (DTT) with Poland. In this case, the Polish tax authorities are, as a rule, entitled to tax only the portion of the non-resident’s income that may be attributed to a permanent establishment (PE) located in Poland if such income has arisen in Poland for the foreign tax resident. Exceptions relate to specific types of income, such as royalties, interest, dividends, and capital gains, which may be in Poland even if no PE exists.

Polish companies with foreign participation may be set up as either limited liability companies or joint-stock companies. There is no limitation on the percentage of foreign participation. Both types are subject to the general CIT rules, including the standard 19% tax rate (and other rates, depending on the type of revenue sourced in Poland). The same rate applies to branches of foreign companies (see the Branch income section for more information).

Certain entities are explicitly excluded from the group of taxpayers under the CIT law (e.g. Treasury, National Bank of Poland). Polish and EU/European Economic Area (EEA) based investment funds are also exempted on the grounds of such provision.

Local income taxes
There are no local income taxes in Poland.

Corporate residence
A company is considered to be a resident in Poland if its registered office or management is located in Poland.

Permanent establishment (PE)

PE under Polish CIT law
According to Polish CIT law, the following are understood to be a PE:

- A permanent place of business through which a non-Polish tax resident conducts its business activities, in whole or in part, within the territory of Poland; in particular, a branch, agency, office, factory, workshop, or place of extraction of natural resources.
- A construction site, construction, assembly, or installation works carried on within the territory of Poland by a non-Polish tax resident.
- A person who, on behalf and for the benefit of a non-Polish tax resident, operates in Poland, provided such person holds and exercises a power of attorney to enter into agreements on one’s behalf.

We note that Polish CIT law:

- does not encompass any provisions concerning the period required for construction works to create a PE
- does not include provisions indicating that an independent agent does not create a PE, and
- does not include provisions indicating that actions of an auxiliary or preparatory character do not lead to creation of a PE in Poland.

PE from a DTT perspective
In general, the provisions of DTTs concluded by Poland are based on the Organisation for Economic Co-operation and Development (OECD) Model Tax Convention on Income and on Capital (OECD Model), except for provisions related to taxation of royalties, which are based on the United Nations (UN) Model Double Taxation Convention.
Poland

As a principle, treaties based on the OECD Model provide for the following concepts, which determine whether activities of a foreign entrepreneur constitute a PE (usually in Article 5):

- Fixed place of business concept.
- Dependent agent concept.
- Construction PE concept.

Note that some DTTs concluded by Poland also encompass other PE concepts (e.g. service PE concept or offshore PE concept).

Other taxes

Value-added tax (VAT)

Polish VAT applies to the following activities:

- Supplies of goods and services within the territory of Poland.
- Exports of goods outside the territory of the European Union.
- Imports of goods from countries that do not belong to the European Union.
- Intra-Community acquisitions of goods (imports from countries belonging to the European Union).
- Intra-Community supplies of goods (exports to the countries belonging to the European Union).

VAT rates

The VAT rates are 23% (standard rate), 8%, 5%, 0%, and exemption.

The standard 23% VAT rate generally applies to the supply of all goods and services, except for those that are covered by special VAT provisions that provide other rates or treatments.

Supplies covered by a reduced rate of 8% include, among others, supplies of pharmaceutical products and passenger transport services and also supply of goods for the Social Housing Programme (no greater than 150 square metres).

Supplies covered by a reduced rate of 5% include books and journals, unprocessed food, and basic food.

Zero-rated activities include, among others, exports of goods to countries outside the European Union.

VAT-exempt supplies include, among others, certain financial, insurance, and educational services.

Basic calculation rules

In general, the VAT due equals the VAT on outputs decreased by the VAT on inputs (in other words, input VAT is deducted from output VAT). Input VAT may be deducted from output VAT when a business (with a VAT payer status) receives an invoice for goods or services purchased. Input VAT may not be deducted unless a purchased supply is linked to the VATable activities. Furthermore, the deductibility of input VAT is restricted by the VAT law with respect to the purchase of certain goods and services. In addition, subject to numerous conditions, output VAT may be reduced when receivables, resulting from VATable sales, become uncollectible.

VAT refunds

The Polish VAT law allows direct refunds when input VAT (available for deduction) exceeds output VAT.
A Polish business may also be entitled to the VAT refund owed by another country under certain circumstances. Likewise, a foreign business having seat or fixed place of business for VAT purposes outside of Poland may be, in most cases, entitled to the refund of Polish VAT. If the respective countries belong to the European Union, the procedure is substantially simplified due to the EU Directive, which provides favourable rules for businesses based in EU countries that are seeking VAT refunds in other EU countries (i.e. electronic VAT refunds are possible).

**International services**
The treatment of international services largely depends on the place of supply since it is determinative of whether particular services are subject to the Polish VAT. The Polish VAT applies only to those services that are supplied within Poland.

**Reporting rules**
Generally, the VAT reporting period is one month. VAT returns should be submitted by the 25th day of the month following the VAT reporting period. All taxpayers may opt for a quarterly, instead of monthly, reporting period.

**Customs duties**
As a member of the European Union, Poland belongs to a customs union, thus only goods imported from non-EU countries or exported from Poland to non-EU countries are subject to customs duties and formalities. Moreover, all the Community customs regulations are directly applicable in Poland. The most important act is the Community Customs Code and its implementing provisions, as well as the Community Customs Tariff.

These regulations are supplemented with certain Polish national rules, especially in respect to procedures and specific areas that are not defined in the Community customs law (e.g. strict regulations concerning the export of works of art and animals, limits on the amount of cash that may be brought from Poland to non-EU countries).

**Excise duties**
Excise duties are levied on the production, sale, import, and intra-Community acquisition of ‘excise goods’, which are listed in the excise duty law and include (among others) alcohol, cigarettes, energy products (e.g. petrol, oils, gas), passenger cars, and electricity.

Depending on the excise goods in question, one of four methods of calculating excise tax may be applicable:

- A percentage of the taxable base.
- An amount per unit.
- A percentage of the maximum retail price.
- An amount per unit and a percentage of the maximum retail price.

The excise rate for car petrol is 1,540 Polish złoty (PLN) per 1,000 litres.

Passenger cars are subject to the following excise rates:

- 3.1% for cars with engine cubic capacity that does not exceed 2,000 cc.
- 18.6% for cars with engine cubic capacity that exceeds 2,000 cc.

Notwithstanding the above, Polish excise duty law provides for a wide system of excise duty exemptions as well as 0% taxation. Under specified circumstances, such preferential treatment may apply to specified goods that are otherwise taxed based on general rules. This concerns, for example, specific energy products used for other purposes than as a fuel or for heating.
Poland

There is also an excise duty placed on coal. Depending on the type of coal product, the excise rates are PLN 30.5 per 1,000 kg of coal, PLN 11 per 1,000 kg of lignite, and PLN 35.2 per 1,000 kg of coke. In practice, there are a wide range of excise duty exemptions (practically, Poland has used all the exemption options provided in the EU Directive); nevertheless, many new administrative obligations have been set for entities producing, distributing, and using coal. The fulfilment of those obligations is necessary in order to apply an excise duty exemption.

**Property taxes**

Property tax rates are fixed by municipalities within limits set in the Law on Local Taxes and Fees. In 2016, land used for business purposes is subject to a rate limit of PLN 0.89 per square metre. Buildings used for business purposes are subject to a rate limit of PLN 22.86 per square metre.

**Transfer taxes**

A transfer tax may apply to certain civil law transactions, determined as a percentage of the transaction (i.e. such as sale, loan, donation). A tax obligation on civil law transactions does not arise when one of the parties of the transaction is a VAT payer.

**Stamp duty**

In Poland, some activities are charged a stamp duty. Payment is required, for example, in connection with the submission of a power of attorney, after completion of an official act, or the issue of a certificate or permit.

**Capital tax**

A share capital increase (in case of corporations) and contribution/contribution increase (in case of partnerships) is subject to a 0.5% capital tax, payable by a company or partnership that receives a capital contribution. This tax applies equally to limited liability companies as well as joint-stock companies. A merger, division, or transformation of a corporation into another corporation is not subject to capital tax, even if the transaction results in a share capital increase. A similar exemption applies to a capital increase resulting from (i) an in-kind contribution of an enterprise or its organised part or (ii) contribution of shares of the other corporation giving the majority of votes in this corporation or contribution of additional shares in case the corporation to which the shares are contributed already has the majority of votes.

**Tax on certain financial institutions**

As of 1 February 2016, a new tax on certain financial institutions (so-called ‘banking tax’) was introduced. This tax is levied on:

- Banks, branches of foreign banks, branches of credit institutions, and credit unions.
- Insurance companies, reinsurance companies, branches of international insurance companies and international reinsurance companies, and main branches of international insurance companies and international reinsurance companies.
- The lending institutions within the meaning of the Consumer Credit Act.

Tax at the rate 0.44% per year (0.0366% per month) is levied on the assets of the taxpayers less (i) PLN 4 billion in case of banks, (ii) PLN 2 billion in case of (re-) insurance companies, and (iii) PLN 200 million in case of lending institutions. In case of (re-)insurance companies and lending companies, tax is levied on the consolidated assets of the capital group companies.

**Payroll taxes**

**Social security contributions**

Both the employer and the employee are obligated to contribute to the Polish social security system. Apart from paying its own share, the employer is obligated to withhold
the employee’s share of the social security contributions and remit them to the Social Security Authorities (ZUS). In both cases, the relevant payments shall be made monthly.

The employer pays total contributions in a range of 19.48% to 22.14% of the employee’s gross salary (the employer’s contribution rate includes an accident insurance element that varies according to the number of employees insured and the business sector). The contribution rate for the employee is 13.71% of gross salary. The social security shares payable by the employer and the employee are tax-deductible items in their respective income tax settlements.

The rates apply to salaries below the cap of PLN 121,650 in 2016. The cap changes every year. After exceeding this cap, the salary is subject to a contribution rate of 3.22% to 6.41% payable by the employer and 2.45% payable by the employee.

**Branch income**

Foreign businesses are allowed, under certain conditions, to establish their branch offices (exclusively within the scope of their ‘foreign’ business activity) and representative offices (exclusively with regard to promotion and advertising) in Poland.

A branch office almost always has PE status in Poland. Once a branch is established, the foreign company pays CIT at the standard rate of 19%, based on the income attributable to the operations of the Polish branch. For this purpose, as well as for accounting purposes, a branch is obligated to keep accounting books that include all the data necessary to establish the taxable base. In this respect, general income determination rules relevant to Polish companies apply to branches as well. In the few cases in which a branch can demonstrate, based on a DTT, that its business presence in Poland does not constitute a PE, its profits are not subject to Polish CIT.

**Income determination**

The tax base for CIT purposes is the overall income, which is the difference between aggregated taxable revenue and aggregated tax-deductible costs. A tax-deductible cost is defined as a cost incurred for the purposes of deriving revenues, as well as for the purpose of securing or preserving a source of revenue.

Subject to numerous exemptions, the tax base includes all sources of income. Consequently, there is no special treatment for income such as capital gains or interest.

In practice, taxable income is calculated by adjusting the profit reported for accounting purposes. The relevant adjustments are necessary due to differences between tax and accounting treatment of numerous revenue and cost items. As a result, the taxable base is usually higher than the accounting profit.

**Inventory valuation**

Generally, the value of inventory shortages may be included as a tax-deductible cost. Other write-offs in the value of inventory are not recognised for tax purposes until the inventory in question is sold.

When inventory is lost or sold, a tax deduction is allowed for the costs incurred when the inventory was purchased. The methods acceptable for inventory valuation for tax (and accounting) purposes are standard cost, average (weighted) cost, first in first out (FIFO), and last in first out (LIFO).
**Capital gains**
There is no separate capital gains tax. Capital gains or losses are aggregated with an entity’s other taxable income or losses. Capital losses are tax-deductible.

**Dividend income**

**Domestic dividend income**
Dividends received from Polish residents (domestic dividends) are excluded from overall income. Instead, such dividends are subject to a 19% withholding tax (WHT), which is withheld and remitted to the tax office by the payer of dividends. Based on a participation exemption, however, domestic dividends are not subject to the 19% WHT if the Polish beneficiary holds at least a 10% share in the paying company for at least two years.

The revenue arising from voluntary redemption of shares is not treated as a dividend for tax purposes and does not enjoy the benefits of the participation exemption (i.e. the method of redemption, whether voluntary or automatic, will matter).

**Dividend income from abroad**
Generally, dividends received by a Polish corporate tax resident from a non-resident are treated as regular income and taxed at the standard CIT rate. CIT on such dividends paid in other countries may be credited proportionately against Polish CIT.

Additionally, dividends received from entities seated in the European Union (including Poland), EEA member states, or Switzerland can benefit from CIT exemption if the Polish company owns, respectively, at least 10% (in respect to companies seated in the EU/EEA member states) or 25% (in respect to companies seated in Switzerland) in the share capital of the payer for two consecutive years (and certain other conditions are met).

Dividends received from non-EU/non-EEA member states may benefit from underlying tax credit. If a Polish company or a PE of a company from an EU/EEA member state located in Poland receives a dividend from a company seated in a non-EU/non-EEA country, it may deduct the tax paid by the payer on profits out of which the dividend was paid. The deduction is only possible if the Polish company/company from EU/EEA, which PE is located in Poland, holds (for two consecutive works) at least 75% of shares of the dividend payer. The tax may be deducted in an appropriate proportion. Furthermore, the deduction is possible if there is a DTT. Based on the provisions of the relevant DTT or other agreement concluded by Poland, the Polish tax authority may exchange tax information with its counterparty.

**Anti-avoidance regulations**
As of 1 January 2016, the participation exemption on dividends and other profit-sharing payments will not apply to the legal transaction or series of legal transactions that, having been put into place for the main purpose or one of the main purposes of obtaining a tax advantage, are not genuine, having regard to all relevant facts and circumstances.

Based on the introduced provisions, a ‘not genuine’ legal transaction is such transaction that is undertaken in order to benefit from the tax exemption but does not reflect economic reality (i.e. it is not conducted for valid commercial reasons and its result is, in particular, transfer of shares’ ownership of the company paying the dividend or achieving, by this company, income [revenue] paid in the form of dividend).

**Interest income**
Interest income is aggregated with an entity’s other taxable income.
**Foreign income**
Resident corporations are taxed on their worldwide income unless there is an applicable DTT in place between Poland and the relevant country that provides that the foreign income shall be exempt from taxation in Poland (see Foreign tax credit in the Tax credits and incentives section).

Controlled foreign company (CFC) rules entered into force as of 1 January 2015 (see Controlled foreign companies (CFCs) in the Group taxation section for more information).

---

**Deductions**

Generally, a tax-deductible cost is defined as a cost incurred for the purposes of deriving revenues, as well as for the purpose of securing or preserving a source of revenue. The last element of the definition of a tax-deductible cost was added to reduce uncertainties surrounding the deductibility of business expenses that do not directly generate revenue.

The CIT law provides a list of items that are not deductible for tax purposes, even if the items meet the general conditions described above. This list contains over 60 items including, among others, the following:

- Written-off, lapsed accounts receivable.
- Entertainment costs.
- Accrued but unpaid interest.
- Accounting and comparable provisions.
- Tax penalties and penalty interest.
- A portion of the insurance premium paid on a passenger car (i.e. the portion calculated on the excess of the car value over 20,000 euros [EUR]).
- A portion of the depreciation write-offs made on a passenger car (i.e. the portion calculated on the excess of the car value over EUR 20,000).

Furthermore, expenses incurred in connection with the acquisition of fixed and intangible assets (e.g. licences, trademarks, know-how) are not directly deductible. Instead, the acquired assets are subject to depreciation. If such assets are sold, a business is entitled to deduct the net value (cost of acquisition reduced by the overall value of the tax depreciation allowances made). Similar treatment relates to the acquisition of shares or land, except that these particular assets are not depreciable. Therefore, the full cost of an acquisition of shares or land may be deducted when such assets are sold.

**Depreciation**

Depreciation write-offs are treated as a tax-deductible cost. Generally, depreciation allowances are calculated based on the straight-line method and the maximum rates provided in the CIT law. If this is the case, a taxpayer deducts equal annual write-offs, calculated by multiplying the maximum rate of depreciation by the asset’s initial value until the total value of write-offs equals the initial value (typically, the initial value equals the purchase price).

For certain categories of machinery and vehicles (but not passenger cars), the reducing-balance depreciation method may be applied. Under this method, the tax depreciation may be accelerated during the initial period of the asset’s use by multiplying the statutory maximum rate by two. The rate is then applied to the net value of fixed assets (i.e. initial value reduced by earlier annual write-offs). The reducing-balance method is applied until the annual depreciation write-off equals the hypothetical write-off that would be made under the straight-line method. From this point, the depreciation allowance is taken based on the straight-line method for its remaining useful life.
The main categories of assets and the related statutory annual tax depreciation rate are as follows:

<table>
<thead>
<tr>
<th>Assets</th>
<th>Depreciation rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Various buildings and constructions</td>
<td>1.5 to 10</td>
</tr>
<tr>
<td>Machinery and equipment (general)</td>
<td>7 to 20</td>
</tr>
<tr>
<td>Machinery for road building and construction</td>
<td>18 to 20</td>
</tr>
<tr>
<td>Machinery for paper industry</td>
<td>14</td>
</tr>
<tr>
<td>Office equipment</td>
<td>20</td>
</tr>
<tr>
<td>Computers</td>
<td>30</td>
</tr>
</tbody>
</table>

Apart from the above, the Polish CIT law includes provisions for accelerated depreciation (within specified limits) for assets used in deteriorated conditions and for second-hand assets.

**Goodwill**
Under the provisions of CIT law, goodwill is subject to tax amortisation if it is created as a result of acquisition of an enterprise, or its organised part, made in one of the following ways: (i) purchase; (ii) payable use, provided that the user of such enterprise/organised part of an enterprise makes the depreciation write-offs; or (iii) contribution to a company based on commercialisation and privatisation regulations. The goodwill is amortised for tax purposes for a minimum period of five years.

**Start-up expenses**
There are no specific provisions in the Polish CIT law relating to start-up expenses; the general rules of tax deductibility described above apply.

**Interest expenses**
Accrued interest on loans and credit that were paid or capitalised are deductible for CIT purposes. Polish CIT law provides some exceptions, such as instances where costs are not associated with earning revenue.

In Poland, there are also some limitations of interest tax deductibility connected with thin capitalisation regulations. See Thin capitalisation in the Group taxation section for more information.

**Bad debt**
As a general rule, debts written off as uncollectable cannot be considered as tax deductible. However, in certain situations, the provisions of Polish CIT law provide some exceptions. According to these provisions, only strictly defined uncollectable debts (which based on the CIT law were booked as taxable revenues) may be considered by the taxpayer as a tax-deductible cost, provided that their uncollectability was properly documented (e.g. by a court decision). In some cases, uncollectability may be considered probable (e.g. debtor’s death).

**Charitable contributions**
Companies are entitled to deduct donations for the purposes of public benefit and to volunteer activity organisations up to a total amount not exceeding 10% of income; however, deductions may not be made for donations to:

- natural persons or
- legal persons or organisational units having no legal personality who carry on economic activity consisting in the production of electronic goods; fuel; tobacco; spirits, wines, beers, and other alcohol beverages containing over 1.5% alcohol; products made of noble metals or containing such metals; or incomes received from trading in such goods.
Donations for religious practice purposes can be deducted up to a total amount not exceeding 10% of income.

Additionally, the donations of food products made for the purposes of so-called public benefit constitute tax deductible costs in the amount of production costs or purchase price.

**Fines and penalties**
Fines and penalties can be recognised as tax deductible items if they meet the general conditions. However, the Polish CIT law provides some exceptions, which include contractual penalties and indemnities for defects in supplied goods, works, and services performed; delayed supply of non-defective goods; and delay in the elimination of defects in goods, works, and services performed.

**Taxes**
Income tax, certain industry-specific taxes (e.g. banking tax), and, in most cases, VAT incurred on purchases are not deductible. However, as a rule, VAT is deductible for CIT purposes if it cannot be offset against the company's output VAT. Other taxes, if paid in the course of business activities, are generally deductible in full.

**Net operating losses**
A tax loss reported in a tax year may be carried forward over the next five consecutive tax years; however, in any particular tax year, the taxpayer may not deduct more than 50% of the loss incurred in the year for which it was reported. For example, a taxpayer that incurred PLN 100 annual loss in 2016 may carry it forward to 2017 through 2021. However, the maximum loss deduction in any of these years may not exceed PLN 50 (assuming that there are no other losses available for deduction).

Currently, there is no possibility to carry back tax losses in Poland.

**Payments to foreign affiliates**
Deductions may be claimed for royalties, management services, and interest charges paid to foreign affiliates. However, note that interest expenses are subject to the thin capitalisation restrictions (see Thin capitalisation in the Group taxation section for more information). Furthermore, note that transactions with related companies should be made according to the market conditions. Where a company shifts income to another entity (especially a foreign entity), the tax authorities may adjust the taxable base upward (see Transfer pricing in the Group taxation section for more information).

**Group taxation**
The CIT law includes provisions on group taxation (i.e. in theory, a group of companies). If a group of companies meets certain conditions, it can be treated as a single taxpayer. However, the required conditions are extremely demanding and very few taxpayers of this type exist.

**Transfer pricing**
Transactions between related parties should be conducted in accordance with the arm's-length principle. The tax authorities may increase the taxable base if the pricing used between related parties differs from what would have been used between unrelated parties in a similar business transaction and the difference results in income being shifted from a Polish taxpayer to another entity (whether a Polish resident or not). Similar rules apply to transactions between Polish residents and the residents of tax haven countries. These transactions may be subject to the transfer pricing principles even if the parties thereto are not related. The CIT law also contains detailed requirements for transfer pricing documentation.
Transfer pricing regulations are currently undergoing major changes. As of 2016, the biggest Polish capital groups (with consolidated revenues exceeding EUR 750 million) are obligated to provide, in Poland, information on their taxable income, tax paid, and their place of business unless the consolidating entity is a subsidiary of a foreign party. In this case, the obligation is shifted abroad.

As of 1 January 2017, taxpayers will be obligated to prepare expanded transfer pricing documentation covering not only the description of a transaction but also ‘other events included in the accounting books’ if they were agreed to by related parties and influence the taxpayer’s taxable income or loss. If the taxpayer’s revenue or expenses exceed EUR 10 million in the preceding financial year, the requirements increase such that the taxpayer will be obligated to provide a benchmarking study verifying the arm’s-length character of related-party transactions. Furthermore, taxpayers whose annual revenues or expenses exceed EUR 20 million in the preceding financial year will also be obligated to provide documentation (masterfile) presenting the character of settlements from the group perspective. According to the new regulations, taxpayers whose revenue exceeds EUR 10 million will be obligated to attach to their tax return a summary of their related-party transactions using a special form.

Taxpayers can reduce the transfer pricing risk by applying for an advance pricing arrangement (APA). An APA decision shall be issued by the Minister of Finance in response to a taxpayer’s application. An APA will obligate a taxpayer to follow a specified methodology when calculating the transfer prices applicable to transactions between related entities. In exchange, the tax authorities may not challenge the agreed upon methodology.

**Thin capitalisation**

As of 1 January 2015, new thin capitalisation rules became effective. The Polish thin capitalisation rules are now considerably stricter than the previous rules, in particular:

- Interest exceeding the debt-to-net equity ratio of 1:1 is non-deductible (the previous allowable ratio was three times share capital).
- The list of qualified lenders includes indirect shareholders with at least 25% of the borrower’s shares (previously only direct shareholders and sister companies were treated as qualified lenders).
- Taxpayers are able to choose an alternative method that would limit interest deductibility to 50% of operational income and certain benchmark rates.
- Grandfathering rules apply to loans granted and cash physically transferred before 2015.
- Applicability of the grandfathering rules to loans with capitalised interest remains unclear.

**Controlled foreign companies (CFCs)**

As of 1 January 2015, CFC rules entered into force. An additional income tax is imposed on direct and indirect shareholders of companies deriving their income mainly (more than 50%) from so-called passive sources (i.e. dividends, income from alienation of shares and liabilities, interest, guarantees, intellectual property [IP] or industrial property rights [including the sale of these rights]). The regulation also applies to the income from business carried on through a PE situated abroad (additional tax will not be levied on taxpayers who already take into account profits of their PEs in determining the taxable basis for CIT in Poland).

The new tax regime affects taxpayers that are owners of foreign PEs, direct and indirect shareholders with the right to a minimum of 25% participation in foreign companies’ income (in certain cases, the threshold will be calculated based on number of votes at shareholders’ meetings or shareholding in the company’s registered capital), as well as shareholders of companies registered in countries recognised as applying harmful tax competition.
Income of CFC companies/PEs derived from the sources listed above are taxable in Poland only if such companies/PEs are taxable at tax rates lower than 14.25% or the income is exempt from taxation in their jurisdictions (the CFC regulation does not affect the income derived from dividends that are tax exempt based on the EU Parent-Subsidiary Directive).

Under the new regime, income earned by CFC subsidiaries or PEs is subject to 19% CIT. As a general rule, taxpayers are allowed to decrease the tax due in Poland by the amount of tax already paid abroad by the CFC companies/PEs. The tax base is to cover the whole amount of income earned by the CFC companies/PEs (including the passive income and the income earned on the actual business) that can be allocated to the Polish shareholders. The tax base is calculated proportionally to the period in which particular taxpayers were foreign entity shareholders. If CFC companies are located in tax havens, the shareholders are to pay the tax on the whole amount of income earned by the CFC companies (independently of their actual share in the income).

Tax on gains from CFCs will not be levied only if the controlled corporation will perform actual economic activity, i.e.:

- Incorporation must correspond with an actual establishment intended to carry on genuine economic activities. In particular, the controlled corporation should physically exist in terms of premises, staff, and equipment.
- CFC does not create an artificial arrangement without a link with economic reality.
- There is proportionality between the actual economic activities carried out by the controlled corporation and the extent to which a corporation exists in terms of premises, staff, and equipment.

---

**Tax credits and incentives**

**Foreign tax credit**

Resident corporations are taxed on their worldwide income unless there is an applicable DTT in place between Poland and the relevant country that provides that the foreign income shall be exempt from taxation in Poland. In all other cases (in particular, when the income is not covered by any treaty), Poland uses the ordinary credit method to avoid double taxation. Therefore, a Polish resident is liable for income tax imposed on its worldwide income, but the tax is proportionately reduced by the income tax paid abroad.

**Special Economic Zones (SEZs)**

Polish legislation provides investment incentives related to business activities carried out in 14 zones defined as SEZs. A business entity can benefit from tax incentives, provided that the entity obtains a permit from the Ministry of Economic Development to conduct business activities there and meets other legal requirements. Note that a CIT credit applies only to income earned on activity conducted within the territory of SEZs and covered by permit.

In general, the amount of the tax incentive depends on project location and size of the enterprise. For large enterprises, it can be 15% to 50% of eligible expenditures (i.e. investment expenditures or two-year labour costs). In other words, the CIT credit allows the investor to avoid paying income tax up to the limit calculated on the basis of eligible expenditures and state aid intensity (percentage as above). In case of investment valued PLN 20 million and intensity aid of 40%, the investor would be entitled not to pay tax due up to PLN 8 million. If the available limit of the tax credit exceeds the annual tax due generated on SEZ activity, the excess may be utilised in the following tax years. Consequently, in the case of significant investments, it is possible for businesses that run activities in the SEZs to enjoy exemption from income tax for a considerable period.
According to current regulations, the deadline for utilising the available tax credit is the end of 2026 (previously 2020).

Note that in the case of small enterprises, the limit of the tax credit may be increased by 20%. In the case of medium-sized enterprises, the limit of the tax credit may be increased by 10%.

**Tax relief for research and development (R&D)**

Since 1 January 2016, entrepreneurs have gained the possibility of a tax deduction from 110% to 130% of costs incurred for R&D. The value of the deduction varies depending on the size of the company and type of eligible costs.

To benefit from the tax relief, each entity needs to perform R&D works and record the eligible costs in separate accounts. It is not important whether the R&D works end with success or the level of innovativeness of future effects of those works. Tax relief is also allowed for qualifying projects in progress (e.g. projects launched in previous years).

According to current plans (March 2016), the level of tax relief in 2017 should be increased to 130% to 150% of costs incurred. Unofficially, the government plans to increase those levels up to the maximum of 200%, which may potentially happen from the beginning of 2018.

**Withholding taxes**

**Domestic provisions: General rules**

The general domestic WHT rate for dividends is 19%. Dividends also encompass income from liquidation of a company and the income from the redemption of shares (with the exception of gain from voluntary redemption, which is treated as a capital gain subject to the 19% CIT rate in Poland if the gain is realised by a taxpayer from a non-treaty country or the treaty includes a so-called real estate clause).

The general WHT rate on interest and royalties paid to non-residents is 20% (10% regarding services of sea or air transportation). These WHT rates may be reduced by DTTs.

There is also a 20% WHT on payments made to non-residents for intangible services (such as consulting services). However, if a payment is made to a country that has a DTT with Poland, this tax may be avoided with the completion of certain minimal administrative formalities. Few treaties treat payments for technical services as royalties (e.g. India).

**Special treatment: EU Directives**

The CIT law provisions and certain EU Directives provide special treatment for dividends, interest, and royalties paid to numerous European countries.

In general, the transitional rules on interest and royalty payments paid by Polish corporate residents to associated EU or EEA companies, as well as the full exemption after 1 July 2013, only apply to interest and royalty payments between associated companies (parent-subsidiary relationships or sister-sister relationships) in which capital involvements are significant, i.e. the paying company owns or is owned at least 25% by the company receiving interest or the company that pays interest and the company that receives interest are owned at least 25% by the same parent company. Shareholding should be kept for a minimum of two consecutive years.

Dividends paid to corporate residents of EU and EEA countries are exempt from WHT, subject to certain conditions specified in the CIT law. The basic requirement is that the
foreign beneficiary holds at least 10% of the shares in the Polish company for a minimum of two consecutive years.

In relation to all given payments (i.e. dividends, interest, royalties), the condition regarding holding shares is also fulfilled if two years passes after the day of the dividend/interest/royalty payment. If the period is interrupted afterwards, the company is obligated to pay the tax at the standard rate with interest.

Note that several additional conditions have to be met for the reduced rate/exemption from the WHT based on the Directive to be applied (e.g. the company receiving the dividend/interest/royalty cannot be exempt from tax on all its income, regardless of its source; the recipient has to have ownership title to the shares in the Polish company).

Additionally, the CIT law states that in order to enjoy the exemption from WHT on dividends and decreased WHT rate on interest and royalties, based on the Directives’ provisions, the relevant DTT or other agreement concluded by Poland should allow exchange of tax information between the tax authorities of Poland and the country of the payment recipient.

Given the fact that Poland did not conclude a DTT with Liechtenstein, payments made to tax residents of Liechtenstein should not benefit from the Directive.

**Treaty rates**

If EU special rules do not apply, the domestic WHT rates can be decreased by a DTT concluded between Poland and the payment recipient’s country of residence if certain administrative conditions are met (i.e. the payer obtains a valid certificate of a fiscal residence of the payment recipient/beneficial owner).

The following table lists the WHT rates as provided in the treaties concluded by Poland. Notably, the following table shows only rates that result from general treaty provisions; the treaties themselves occasionally include special provisions (applicable in special circumstances or to special entities) that provide lower WHT rates than the ones listed.

Furthermore, if a treaty rate is higher than a domestic one, the latter should apply.

**Notes**

1. When the beneficial owner is a company that directly holds at least 25% of the capital of the company paying the dividends.
2. When interest is paid to the government, the central bank of the state, including local authorities or other government bodies.
3. When the beneficial owner is a company (other than a partnership) that directly holds at least 10% of the capital of the company paying the dividends.
4. When interest is paid to the government, a political subdivision, or a local authority in connection with:
   - a loan granted, insured, or guaranteed by a governmental institution for the purposes of promoting exports
   - a loan on credit of any industrial, commercial, or scientific equipment, or
   - any loan granted by a bank.
5. When the beneficial owner is a company that directly holds at least 10% of the capital of the company paying the dividends.
6. When the interest is paid:
   - to the Central Bank of Poland
   - to the Central Bank of Bangladesh
   - to the government of the Republic of Poland or the government of the Republic of Bangladesh, or
   - in respect of a loan made or guaranteed or insured by the government of the other state, or any agency including a financial institution owned or controlled by the government.
7. When the beneficial owner is a company (other than a partnership) that directly holds at least 30% of the capital of the company paying the dividends.
8. When the beneficial owner is a company (other than a partnership):
   - that directly holds at least 25% of the capital of the company paying the dividends or
   - that directly holds at least 10% of the capital of the company paying the dividends, and the value of investments in the company is at least EUR 500,000 or is equal to the amount in the other currency.
9. When interest is paid:
   - on a loan granted, guaranteed, or insured, or a credit granted, guaranteed, or insured, by a general system organised by the state, including political subdivisions or local authorities for purposes of promoting exports
   - on a loan of whatever kind, except in the form of bearer securities, granted by a banking company, or
   - to other states, including political subdivisions and local authorities.
10. When interest is paid to the government, including local authorities, to the central bank or any financial institution controlled by that government, or on loans guaranteed by that government.
11. When interest is paid in respect of a loan made, guaranteed, or insured by the state or agreed public body.
12. Copyright royalties and other similar payments in respect of the production or reproduction of any literary, dramatic, musical, or artistic work (not including royalties in respect of motion picture films and works on film or videotape for use in connection with television).
13. When the beneficial owner is a company that directly controls 20% of the voting stock of the company paying the dividends.
14. For the use of, or the right to use any industrial, commercial, or scientific equipment.
15. When interest is paid:
   - to the government, a local authority, and the central bank or any financial institution wholly owned by that government or
   - to the other resident of the other state with respect to debt-claims indirectly financed by the government of the other state, a local authority, and the central bank or any financial institution wholly owned by the government.
16. For the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematograph films and films or tapes for radio or television broadcasting, or any patent, know-how, trademark, design or model, plan, secret formula, or process.

17. The Protocol of 22 March 2012 has entered into force. The Protocol introduces a maximum 5% rate of WHT on dividends and exempts dividends paid to an immediate parent company (other than partnership) that owns at least 10% of the capital of the company paying the dividend.

18. When the beneficial owner is a company (other than a partnership) that directly holds at least 20% of the capital of the company paying the dividends.

19. When the beneficial owner is a company (other than a partnership) that directly holds at least 25% of the capital of the company paying the dividends, where such holding is being possessed for an uninterrupted period of no less than one year and the dividends are declared within that period.

20. When the beneficial owner is a pension fund or other similar institution providing pension schemes in which individuals may participate in order to secure retirement benefits, when such pension fund or other similar institution is established, recognised for tax purposes and controlled in accordance with the laws of the other state.

21. When interest is paid:
   • on a loan of whatever kind granted, insured, or guaranteed by a financial institution or owned or controlled by the state
   • in connection with the sale on credit of any industrial, commercial, or scientific equipment
   • in respect of a bond, debenture, or other similar obligations of the government of the state, or of a political subdivision or local authority, or
   • to the other state, or to a political subdivision or local authority.

22. When interest is paid to the government of the other state, including local authorities and the central bank.

23. When the beneficial owner is a company (other than a partnership) that directly holds at least 25% of the capital of the company paying the dividends.

24. When interest is paid to the government of the other state, including political subdivisions and local authorities, the central bank, or any financial institution owned by the government or on loans guaranteed by the government.

25. From copyright of literary, artistic, or scientific work.

26. When the beneficial owner is the government of the other state or central bank.

27. When the interest, subject to certain exceptions related to silent shareholders, is paid:
   • to the government of Poland or Germany on a loan of whatever kind granted, insured, or guaranteed by a public institution for purposes of promoting exports
   • in connection with the sale on credit of any industrial, commercial, or scientific equipment
   • in connection with the sale on credit goods between companies, or
   • on any loan of whatever kind granted by a bank.

28. If the following conditions are met:
   • Interests paid to:
     • the government, a political sub-division, or a local authority of the other contracting state or
     • the central bank of other contracting state.
   • When the beneficial owner is a resident of the other contracting state and is derived in connection
     • with a loan or credit extended or endorsed by:
       • Bank Handlowy (in scope of financing export and import) - for Poland
       • the Export-Import Bank of India (in scope of financing export and import) - for India
       • any institution in the other contracting state in charge of public financing of external trade, or
       • any other person, provided that the loan or credit is approved by the government of the first
         mentioned contracting state.
   • When the beneficial owner is the government, ministry, other governmental institution, municipality,
     • central bank, or any other bank wholly owned by the government of the other contracting state.
   • When the beneficial owner is a resident of the other contracting state and directly holds at least 25% of
     • the voting power of the company paying the dividends.
   • Interest paid in connection with:
     • the sale on credit of any industrial, commercial, or scientific equipment
     • the sale on credit of any merchandise by one enterprise to another, or
     • on any loan of whatever kind granted by the bank.

29. When the beneficial owner is a company (other than a partnership) that directly holds at least 15% of the capital of the company paying the dividends.

30. When the beneficial owner is a company (other than a partnership) that owns at least 10% of the capital of the company paying the dividends.

31. If the following conditions are met:
   • When the payer of interests is the government or contracting state or a local authority thereof.
   • Interest is paid to the government of other contracting state or local authority thereof (including
     • financing institutions) wholly owned by other contracting state or local authority thereof.
   • Interest is paid to any other entity, including financial institutions, in relation to loans made in
     • application of an agreement concluded between governments of contracting states.

32. When the beneficial owner is the government of other contracting state, including local authorities
   • thereof, the central bank, any financial institutions controlled by that government or any resident
     • of the other contracting state with respect to debt-claims, guaranteed or indirectly financed by
       institutions mentioned above.

33. For payments connected with copyrights, literary, artistic, and scientific activity, including payments
   • connected with films for cinemas and films and tapes for TV

34. When the beneficial owner is a company that directly or indirectly holds, at least 20% of the capital of
   • the company paying the dividends.

35. When interest is paid to the government or local authorities.

36. When interest:
   • arising in contracting state and received by the government of the other contracting state,
     • including political subdivision or a local authority thereof or the central bank of that other
       contracting state
   • arising in contracting state is paid in respect of loans and credits made or guaranteed:
39. Interest paid to government or central bank.
40. When the beneficial owner is:
   - the government of the other contracting state, entity, or any governmental institution or
   - a company that is a resident of the other contracting state and at least 25% of its capital is
directly or indirectly owned by the entities mentioned above.
41. If the following conditions are met:
   - When the beneficial owner is:
     - the government of the other contracting state, entity, or governmental institution or
     - a company that is a resident of the other contracting state and at least 25% of its capital is
       owned directly or indirectly by the entities mentioned above.
   - When interest is paid in connection with loans guaranteed by the entities mentioned above.
42. When interest is paid:
   - to the government, including the local authorities, to the central bank or any financial institution
     controlled by that government, or on loans guaranteed by that government or
   - to the resident in the other contracting state.
43. If the following conditions are met:
   - When the beneficial owner is other contracting state.
   - When interest is paid in connection with loans and credits granted by bank.
44. Dividends paid by:
   - a resident of Poland to a resident of Malaysia who is subject to Malaysian tax in respect thereof or
   - a resident of Malaysia to a resident of Poland who is subject to Polish tax in respect thereof.
45. Interest paid to resident of Poland on an approved loan or a long-term loan.
46. Royalties paid to resident of Poland by resident of Malaysia and approved by the competent authority
    of Malaysia.
47. If the following conditions are met:
   - When the beneficial owner is:
     - a contracting state, a political subdivision, or a local authority, or The National Bank of Poland
     or Banco de Mexico or
     - a recognised pension or retirement fund provided that its income is generally exempt from tax
       in this state.
   - When interest:
     - is paid by any of entities mentioned above
     - arises in Poland and is paid in respect of a loan for a period not less than three years granted,
       guaranteed, or insured by Banco de Comercio Exterior, S.N.C., Nacional Financiera, S.N.C. or
       Banco National de Obras y Servicios Publicos S.N.C., or
     - arises in Mexico and is paid in respect of a loan for a period not less than three years granted,
       guaranteed, or insured by PKO S.A., Corporation of Credit Insurance, and Bank Handlowy in
       Warsaw.
48. If the following conditions are met:
   - When the beneficial owner is a bank or insurance company.
   - When interest is derived from bonds and securities that are regularly and substantially traded on a
     recognised securities market.
49. When dividends are paid to the company that directly holds at least 10% of the capital paying the
    dividends on the day they are paid and has done (or will do) so for an uninterrupted 24-month period
    from which that date falls.
50. When interest is paid:
   - by a resident of Pakistan to a Polish company or enterprise on loans approved by the Ministry of
     Finance of the government of Pakistan
   - to the State Bank of Pakistan from sources in Poland, or
   - to Bank Handlowy in Poland from the sources in Pakistan.
51. For payments of any kind received in consideration for the use of, or the right to use:
   - any copyright, patent, trademark, design or model, plan, secret formula, or process
   - an industrial, commercial, or scientific equipment, or
   - motion picture films, and works on films and videotapes for use in connection with television.
52. For payments received in consideration of technical know-how concerning industrial, commercial, or
    scientific experience.
53. Interests paid in respect of:
   - a bond, debenture, or other similar obligations of the government, state, political subdivision, or
     local authority thereof or
   - a loan or credit extended, guaranteed, insured, or refinanced by:
     - Central Bank of Philippines - for Philippines
     - Central Bank of Poland - for Poland, or
   - other lending institutions as specified and agreed in letters of exchange between competent
     authorities of the contracting states.
54. When dividends are paid to the company that directly holds at least 25% of the capital stock of the
    company paying the dividends for an uninterrupted 24-month period prior to the payment.
55. If the following conditions are met:
   - When the debtor of such interests is the government, a political subdivision, or local authority.
   - When the interest is paid to the government of other contracting state, a political subdivision, or
     local authority thereof, or an institution or body in connection with any financing granted by them
     under an agreement between the governments of the contracting states.
Poland

- Loans or credit made on central banks of contracting states and any other financial institution controlled by the state and financing external business that may be agreed upon between the competent authorities of the contracting states.

56. Interests paid to government, administrative, territorial, or the central bank.
57. Dividends paid by:
   - the company that is a resident of Singapore to a resident of Poland (as long as Singapore does not impose a tax on dividends in addition to the tax chargeable on the profits or income of a company) or
   - to government of either contracting state with respect to shares in joint stock companies of that other state.
58. Interest paid to government.
59. Interests paid to government, local authorities, or the central bank.
60. Interests:
   - received by any banking institution that is a resident of contracting state
   - derived from contracting state of the other contracting state either directly or through any agency, or
   - accruing to any company, partnership, or other body of persons resident in the contracting state for any loans in money, goods, and services or in any other form, granted by them to the government of the other contracting state or to a state corporation, or to any state institution, or to any other institution, to the capital of which, the other contracting state has made any contribution, or to a credit agency, or an undertaking in that other contracting state with the approval of the government of the same state.
61. For payment in consideration, for the use of, or the right to use, any copyrights or cinematograph films.
62. As long as Switzerland will not tax royalties paid to foreign recipients, the payments are taxed only in the country of residence of the recipient (currently there is no WHT in Switzerland).
63. If the following conditions are met:
   - When recipient is a contracting state, or one of its local authorities, or the statutory body of either, including the central bank; or when interests are paid by a contracting state, or one of its local authorities, or the statutory body of either.
   - Such interest is paid in respect of any debt-claim or loan guaranteed, insured, or supported by a contracting state or another person acting on state's behalf.
64. Payments payable to contracting state or a state owned company in respect of tape or films.
65. Royalties made as consideration, for the alienation, or the use of, or the right to use, any copyright of literary, artistic, or scientific work, excluding cinematographic films or tapes for television or broadcasting.
66. When the beneficial owner is the government or a government institution.
67. When dividends are paid to a company that is the resident of the other contracting state and that directly holds at least 10% of the capital, paying the dividends on the day they are paid and has done (or will do so) for an uninterrupted 24-month period from which that date falls.
68. When interests are paid to the government, a political subdivision, or a local authority in connection with:
   - a loan granted, insured, or guaranteed by a governmental institution for the purposes of promoting exports
   - the sale on credit of any industrial, commercial, or scientific equipment, or
   - any loan granted by a bank.
69. When the beneficial owner is a company that directly holds at least 10% of the outstanding shares of the voting stock of the company paying the dividends.
70. When the beneficial owner is a company that directly holds at least 20% of the capital of the company paying the dividends.
71. When the beneficial owner is:
   - the government or a local authority or
   - the National Bank of Poland or the Central Bank of Uzbekistan Republic.
72. For payment of any kind, received in consideration, for the use of, or the right to use:
   - any patent, design or model, plan, secret formula, or process or
   - any information concerning industrial or scientific experience.
73. Treaty allows application of the domestic tax rate.
74. As long as Iceland does not levy tax at source of income, interest is taxable only in the contracting state of which the beneficial owner of the interest is a resident.
75. When interest is paid to the government, a political subdivision, or a local authority in connection with:
   - a loan granted, insured, or guaranteed by a governmental institution for the purposes of promoting exports
   - a sale on credit of any industrial, commercial, or scientific equipment
   - any loan granted by a bank
   - in respect of a bond, debenture, or other similar obligations of the government of a contracting state, or of a political subdivision or local authority thereof, or
   - to the other contracting state, or to a political subdivision or local authority thereof.
76. When the tax is charged by Poland.
77. When the dividends are paid by a company resident of Poland to a resident of Malta that directly holds at least 10% of the capital company paying the dividends on the date they are paid and has done so or will have done so for an uninterrupted 24-month period in which that date falls.
78. When the recipient is the beneficial owner.
79. According to the Protocol of 22 March 2012, which has entered into force, the maximum WHT rate on interest paid is 5%. However, when interest is paid to the government, including political subdivisions and local authorities, the central bank, or any statutory body of the state with respect to loans or credits made or guaranteed by the government of the other state, including political sub-
divisions and local authorities, the central bank, or any statutory body of the other state, it shall be exempt from tax in the first mentioned contracting state.

80. There is a WHT exemption on interest payable: (i) on any loan or credit granted by a bank; (ii) to the government of the other contracting state, including any political subdivision or local authority thereof, the central bank, or any financial institution owned or controlled by that government; or (iii) to a resident of the other state in connection with any loan or credit guaranteed by the government of the other state, including any political subdivision or local authority thereof, the central bank, or any financial institution owned or controlled by that government. The maximum rate of WHT on interest is 5%.

81. The maximum WHT rate on royalties is 10%.

82. The lower rate applies to fees for technical services.

83. When interest is paid: (i) by the government of a contracting state, administrative subdivision, or local authority thereof; (ii) to the government of the other contracting state, administrative subdivision, or a local authority thereof; or (iii) to the central bank of the other contracting state or a corporate body (including financial institution) controlled or owned by that state, a political or administrative subdivision, or local authority thereof.

84. If the recipient of the interest is the beneficial owner and interest is paid: (i) to the Republic of Poland or the State of Qatar; (ii) on a loan of whatever kind granted, insured, or guaranteed by a public institution for purposes of promoting exports; (iii) in connection with the sale on credit of any industrial, commercial, or scientific equipment; or (iv) on any loan of whatever kind granted by a bank.

85. The treaty rate is 15% for all types of interest. However, by virtue of a most-favoured-nation clause of the protocol (and since the Chile-Spain treaty provides a reduced rate), the rate is reduced to 5% in respect of interest (i) paid to a bank or insurance company or (ii) derived from bonds or securities that are regularly and substantially traded on a recognised securities market.

86. The general treaty rate is 15%. However, by virtue of a most-favoured-nation clause of the protocol (and since the Chile-Spain treaty provides a reduced rate), the rate is reduced to 10%.

87. The Protocol of 22 March 2012 has not changed the WHT rate in relation to royalties; however, the beneficial owner clause was introduced. Additionally, the new DTT amends the definition of ‘royalties’.

88. When the beneficial owner is a company (other than a partnership) that directly holds at least 10% of the capital of the company paying the dividends, where such holding is being possessed for an uninterrupted period of no less than two years and the dividends are declared within that period.

---

**Tax administration**

**Taxable period**
The taxable period is the calendar year (between 1 January and 31 December). Companies are entitled to choose another (than calendar) fiscal year (e.g. between 1 April and 31 March).

**Tax returns**
The annual CIT return should be submitted to the tax office within three months following the end of the tax year.

**Payment of tax**
The same deadline as the CIT return applies to the settlement of the annual CIT liability. In financial terms, the final settlement is not significant since most of the annual liability is paid by CIT advances throughout the tax year.

The CIT advances should be paid for each month by the 20th day of the following month. Entities that started business activities (except for companies organised as a result of certain transformations) and entities whose gross sales revenue (including VAT) in the prior tax year did not exceed EUR 1.2 million are entitled to opt to make advance settlements on a quarterly basis (instead of a monthly basis).

**Tax audit process**
The tax authorities generally shall notify its intention to initiate a tax audit. The inspection shall be initiated not earlier than after seven days and not later than 30 days from the receipt of the notice.

The duration of all audits in one calendar year may not exceed the following:

- For micro entrepreneurs: 12 working days.
- For small entrepreneurs: 18 working days.
- For medium entrepreneurs: 24 working days.
Poland

- For large entrepreneurs: 48 working days.

**Statute of limitations**
Tax liability expires five years after the end of the calendar year in which the tax payment deadline passed. There are also situations when the statute of limitations can be suspended or interrupted (e.g. litigation).

**Topics of focus for tax authorities**
According to recent statements from the Ministry of Finance, the focus of the tax audit authorities is on transactions between related parties. Moreover, traditionally, tax audits usually cover:

- Validity of the VAT refund.
- Possibility to correct excise duty resulting from post-transaction rebate.
- Correctness of VAT returns concerning scrap sales.
- Correctness of settlements concerning the use of a trademark.

**Other issues**

*United States Foreign Account Tax Compliance Act (US FATCA)*
On 2 April 2014, the US Treasury announced that an intergovernmental agreement (IGA) was ‘in effect’ and, on 7 October 2014, the US Treasury and Poland signed and released the IGA. As of 4 May 2015, the President has signed the bill, which confirmed IGA ratification.
**Significant developments**

**March 2016: 2016 State Budget Law published**

Law 7-A/2016, dated 30 March 2016, approved the 2016 State Budget Law, which, in general, applies as of 31 March 2016. Several amendments to the tax law have been introduced, of which we highlight the following:

**Corporate income tax (CIT)**

- Participation exemption regime on dividends and capital gains: Increase to 10% (previously 5%) the minimum participation in the share capital or of the voting rights; decrease to one year the minimum holding period required (previously 24 months) ([see the Income determination section for more information](#)).
- Distribution of profits and reserves to non-resident entities: Increase to 10% (previously 5%) the minimum participation in the share capital or of the voting rights in a Portuguese subsidiary; decrease to one year the minimum holding period required (previously 24 months) ([see the Withholding taxes section for more information](#)).
- Carryforward of tax losses: Tax losses generated in tax years starting on or after 1 January 2017 can be carried forward for five years (currently 12 years).

**Value-added tax (VAT)**

- Supply of food (excluding certain beverages), including take away and home delivery meals: Subject to the intermediate rate from 1 July 2016 onwards (currently subject to the standard rate).

**Transfer pricing**

- Country-by-country (CbC) report: Applicable to entities belonging to an economic group with an annual consolidated revenue in the preceding tax year of at least 750 million euros (EUR); the report should be filed by the end of the 12th month following the end of the tax year to which it relates.

**Legislative authorisations**

- Patent box regime: The government was granted authorisation to revoke the current regime, which shall apply only to patents, industrial designs, and models registered up to 30 June 2016 (the respective tax benefits shall apply until 30 June 2021). The new regime shall foresee a 50% relief from taxation on income arising from patents, industrial designs, and models in respect of research and development (R&D) activities developed externally (R&D activities contracted from third parties will no longer qualify). The tax benefit will be capped at a proportion of the expenses incurred (an additional deduction of 30% of the cap will be available under certain conditions).
• Mandatory automatic exchange of information regarding financial accounts: The government was granted authorisation to transpose into domestic law the latest amendment to Council Directive 2011/16/EU, dated 15 February 2016, on the matter of administrative cooperation on tax matters. This latest amendment foresee, among other situations, mandatory automatic exchange of information regarding account holders, account number and balance, and reporting financial institution.

**February 2016: Transposition of amendment to European Union (EU) Parent/Subsidiary Directive (EU General Anti-avoidance Rule [GAAR])**

Under the amendment introduced, the exemption from withholding tax (WHT) shall be denied in case of an arrangement or series of arrangements which main purpose or purposes is to obtain a tax advantage that defeats the object and purpose of eliminating double taxation on profits, in case such arrangement or series of arrangements is not regarded as genuine, all facts and circumstances considered. For completeness, an arrangement or series of arrangements is not regarded as genuine if it is not based on valid economic reasons and has no economic reality.

The same amendment was included in the Portuguese participation exemption regime applicable to dividends and capital gains realised by Portuguese tax resident entities.

**July 2015: New Madeira International Business Centre (MIBC) special tax regime published**

Law 64/2015, dated 1 July 2015, approved the new special tax regime of the MIBC. The new MIBC special tax regime applies as of 1 January 2015. Entities licensed until 31 December 2020 can benefit, until 21 December 2027, from a reduced CIT rate of 5% on income derived from transactions with non-resident entities. Other tax benefits are also available.

---

**Taxes on corporate income**

Resident companies in Portugal are taxed on their worldwide income.

There is an optional regime to exclude from taxation the profits and losses allocated to a foreign permanent establishment (PE) of a Portuguese company. The regime applies provided that (i) the profit allocated to that PE is subject to and not exempt from a tax foreseen in Article 2 of the EU Parent/Subsidiary Directive (Council Directive 2011/96/EU), or a tax similar to the Portuguese CIT where the legal rate is not lower than 60% of the standard CIT rate, and (ii) the PE is not located in a black-listed jurisdiction. The regime is not applicable to the profit allocated to the foreign PE up to the amount of the losses allocated to that PE that have been taken into account by the Portuguese taxpayer when computing the respective taxable income of the previous 12 tax years in case of losses generated in tax years starting on or after 1 January 2016. In case of tax years starting on or after 1 January 2017, the period to consider shall be five tax years (12 tax years in case of small and medium-sized companies). This is an optional regime that must cover, at least, all the PEs located in the same jurisdiction, and is mandatory for a minimum three-year period.

CIT is also applicable to Portugal-source income attributable to a PE of a non-resident company in Portugal. Special WHT rates apply to income generated in Portugal that is
attributable to non-residents without a PE in Portugal (see the Withholding taxes section for more information).

A flat CIT rate of 21% applies on the global amount of taxable income realised by companies resident for tax purposes in Portugal mainland or in the Autonomous Region of Madeira (also applicable to Portuguese PEs of foreign entities).

A reduced CIT rate of 17% applies to small and medium-sized companies on the first EUR 15,000 of taxable income (the standard CIT rate shall apply on the excess). Reference is made to the concept of micro, small, and medium-sized companies as foreseen in the EU Commission Recommendation 2003/361, concerning the definition of micro, small, and medium-sized enterprises.

Entities that do not carry out a commercial, industrial, or agricultural activity as their main activity are subject to a 21% CIT rate on the global amount of their taxable income.

A lower CIT rate of 16.8% applies to companies that are tax resident in the Autonomous Region of Azores, including PEs of foreign entities registered therein.

**Surtaxes**
The following surtaxes may also apply:

- A local surtax (Derrama) of up to 1.5% of taxable income, prior to the deduction of any available carryforward tax losses, is levied in certain municipalities. The local surtax is assessed and paid when filing the CIT return.
- A state surtax (Derrama Estadual) applies (prior to the deduction of any available carryforward tax losses) at the following rates:
  - 3% applicable to the taxable profit exceeding EUR 1.5 million and up to EUR 7.5 million.
  - 5% applicable to the taxable profit exceeding EUR 7.5 million and up to EUR 35 million.
  - 7% applicable to the taxable profit exceeding EUR 35 million.

The state surtax is levied on resident taxpayers carrying on commercial, industrial, or agricultural activity and by non-residents with a PE in Portugal. The state surtax is paid in three instalments.

A regional surtax (Derrama Regional) applies in the Autonomous Region of Madeira on the same terms as the state surtax.

**Autonomous taxation**
Autonomous taxation applies at different rates on certain expenses incurred by entities subject to CIT. It is self-assessed in addition to CIT (even if no CIT is due) at the following rates:

- Representation and entertainment expenses: 10%.
- Mileage allowance: 5%.
- Per diem allowance: 5%.
- Non-documented expenses: 50% (70% for partially or fully exempted taxpayers).
- Company car expenses (including depreciation, rentals, leasing, insurance, maintenance, repairs, fuel, and taxes), except fully electric cars, vehicles allocated to public transport, or vehicles that are taxed as income in kind for personal income tax (PIT) purposes, depending on the acquisition cost and regardless of the year of acquisition:
  - Acquisition cost lower than EUR 25,000: 10%.
  - Acquisition cost between EUR 25,000 and EUR 35,000: 27.5%.
  - Acquisition cost of EUR 35,000 or more: 35%.
Portugal

- Dividends distributed to wholly or partially exempt taxpayers regarding participations held for less than one year: 23%.
- The total amount of the expenses incurred with any compensation paid as a result of the termination of functions of managers or board members if not related to the productivity targets previously established under the existing labour relation; or the amount that exceeds the remuneration that would be received by the manager or the board member until the term of the labour agreement, in case of redundancy prior to that term; or, in all cases, if the liability for the payment is shifted to another entity: 35%.
- The total amount of the expenses incurred with bonuses paid to managers or board members if the respective amount corresponds to more than 25% of the annual salary and exceeds EUR 27,500: 35%.

All of the above-mentioned rates of autonomous taxation are increased by 10% if the taxpayer has tax losses in the tax year in which the expenses are incurred.

**Corporate residence**

A resident company is one whose head office or effective management is located in Portugal.

**Permanent establishment (PE)**

Under Portuguese tax law, any fixed place of business in Portugal through which the business of an enterprise is wholly or partly carried on is deemed to constitute a PE in Portugal.

A fixed place of business comprises, among others, a place of management, a branch, an office, a factory, a workshop, a mine, an oil or gas well, a quarry, or any other place of extraction of natural resources, and also a building site or a construction or installation project if it lasts more than six months (time period may differ considering the applicable tax treaty).

A PE may also be deemed to exist in case of a person (a dependent agent), which is not an independent agent, acting, in the Portuguese territory on behalf of a company, with powers to intermediate and conclude binding contracts for that company, within the scope of its business activity.

No PE should exist where a fixed place of business in Portugal is used solely for carrying out ancillary or preparatory activities, or, in the case of a company, carries out its activities in Portugal through a broker, general commission agent, or other agent of an independent status, acting in the normal course of its business, bearing all related business risks.

Additionally, the term PE shall be deemed not to include the following actions:

- Use of facilities solely for the purpose of storage, display, or delivery of goods or merchandise belonging to the enterprise.
- Maintenance of a stock of goods or merchandise belonging to the enterprise solely for the purpose of storage, display, or delivery.
- Maintenance of a stock of goods or merchandise belonging to the enterprise solely for the purpose of processing by another enterprise.
- Maintenance of a fixed place of business solely for the purpose of purchasing goods or merchandise, or of collecting information, for the enterprise.
- Maintenance of a fixed place of business solely for the purpose of carrying on, for the enterprise, any other activity of a preparatory or auxiliary character.
• Maintenance of a fixed place of business solely for any combination of activities mentioned above, provided that the overall activity of the fixed place of business resulting from this combination is of a preparatory or auxiliary character.

Other taxes

Value-added tax (VAT)

VAT rates
There are three VAT rates: the standard rate of 23% (22% in the Autonomous Region of Madeira; 18% in the Autonomous Region of the Azores), the intermediate rate of 13% (12% in Madeira; 9% in the Azores), and the reduced rate of 6% (5% in Madeira and Azores).

The intermediate rate applies to supplies of some foodstuffs and to admissions to concerts, shows, theatre, cinemas, circus, and bullfighting. From July 2016 onwards, the intermediate rate will also apply to pre-cooked meals, in ready-to-eat and take away or home delivery regimes, and to food and beverage services rendered, excluding alcoholic beverages, soft drinks, juices, nectars, and carbonated water, or added carbon dioxide or other substances.

The reduced rate applies to the supplies of some basic foodstuffs, periodical publications, books, pharmaceutical products, hotel accommodation, agricultural goods, and passenger transport.

Exports and intra-EU supplies of goods are zero-rated.

Supplies of goods
Supplies of goods are subject to VAT in Portugal if the goods are located in Portugal at the moment their transport or dispatch to the customer begins. If the goods are located in Portugal and there is no transport or dispatch, then supplies of the goods are subject to VAT at the moment they are put at the disposal of the customer.

Supplies of services
Supplies of services are subject to VAT in Portugal whenever: (i) acquired by taxable persons that have their business, a fixed establishment, domicile, or residence in Portugal to which the services are provided (B2B rule) or (ii) supplied to non-taxable persons if the provider has established its business, a fixed establishment, domicile, or residence in Portugal from where these services are provided (B2C rule).

Regardless of the place where the service provider and the acquirer are established, and of the acquirer being a taxable person, the supply of the following services is subject to VAT in Portugal if physically carried out in Portugal:

• Services connected with immovable property in Portugal.
• Passenger transport for the distances covered in Portugal.
• Admission to cultural, artistic, scientific, sporting, educational, entertainment, or similar events in Portugal.
• Restaurant and catering services in Portugal.
• Short-term hiring of a means of transport (up to 30 days, for boats up to 90 days) if the means of transport are put at the disposal of the customer in Portugal.

The supply of the following services is subject to VAT in Portugal if physically carried out in Portugal and if the acquirer is a non-taxable person:

• Transport of goods, other than intra-Community transport of goods, for the distances covered in Portugal.
Portugal

- Intra-Community transport of goods, if the place of departure is Portugal.
- Valuations of and work on movable property.
- Services and ancillary services relating to cultural, artistic, sporting, scientific, educational, entertainment, or similar activities, such as fairs and exhibitions, including the supply of services of the organisers; and hiring of a means of transport, other than short-term hiring, when the acquirer is established, has one’s permanent address, or usually resides in Portugal.

Telecommunications, broadcasting, television, and electronic services supplied to non-taxable persons are taxed in Portugal when the customer, a non-taxable person, is established, has one’s permanent address, or usually resides herein.

**Customs duties**
Customs duties are regulated by the Community Customs Code. Therefore, the rules foreseen for the import and export of goods in Portugal are similar to the rules applicable in other EU member states.

The customs duties’ rates applied in Portugal vary according to the origin of the goods. There are several origin agreements that exempt from customs duties the importation of goods from certain countries or that determine reduced rates.

**Excise duties**
There are different types of excise duties, such as petroleum and energy products tax, alcohol and alcoholic beverages tax, tobacco tax, and vehicle tax.

The tax applicable to petroleum and energetic products depends on the goods supplied, and it varies between EUR 578.95 per 1,000 litres for leaded petrol and EUR 2.84/gJ for natural gas used as fuel.

Due to the Green Tax Reform, there is an adding factor to excise duties on petroleum and energetic products, which, in 2016, is 2.271654 for gasoline and 2.474862 for diesel. The adding factor is extensive to petroleum, coal, natural gas, coke, liquefied petroleum gas (LPG), and fuel oil.

The excise duty applies on the supply of natural gas to final consumers at the rate of EUR 0.30/gJ.

The tax applicable to alcohol and alcoholic beverages also depends on the type of good supplied, varying between EUR 7.98 per hectolitre for a certain type of beer and EUR 1,327.94 per hectolitre for spirits.

The tax applicable to tobacco (ad valorem) also varies in accordance with the type of product supplied, namely it varies between 17% of the sale price for cigarettes, 20% for fine-cut tobacco for the rolling, 25% for cigars and cigarillos, and 50% of the sale price for tobacco used in a water pipe.

The tax applicable to vehicles varies in accordance with the type of vehicle, the fuel used, and the cylinder of the vehicle. The higher taxation is applicable for cars used for the transport of passengers using petrol as fuel and the lower taxation is applicable for motorcycles.

An excise duty on consumption of electricity is due by producers, traders, self-producers, and consumers that buy electricity in organised markets. The tax applicable to electricity varies between EUR 1/kw to EUR 1.1/kw.

**Property tax (Imposto Municipal sobre Imóveis or IMI)**
IMI is a municipal property tax computed on the tax registration value (TRV) of urban and rural properties located in Portuguese territory. For urban properties, the TRV
is determined by means of a valuation, based on the type of property, calculated by reference to a formula based on objective criteria, such as the construction cost per square metre, area, age, construction quality, and comfort indexes. IMI is due by the real estate owner, the usufructuary, or the holder of the surface right of a real estate unit with reference to 31 December of the year that it concerns.

IMI is levied at the following rates, in addition to corporate or individual tax assessed on actual income generated by real estate:

<table>
<thead>
<tr>
<th>Real estate type</th>
<th>IMI (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Urban real estate</td>
<td>0.3 to 0.45</td>
</tr>
<tr>
<td>Rural real estate</td>
<td>0.8</td>
</tr>
<tr>
<td>Real estate owned by residents in a black-listed jurisdiction (except individuals)</td>
<td>7.5</td>
</tr>
</tbody>
</table>

The list of countries, territories, and regions that provide a more favourable tax regime (‘black-listed jurisdictions’) is presented below:

- American Samoa
- Andorra (1)
- Anguilla (1)
- Antigua and Barbuda (1)
- Aruba
- Ascension Island
- Bahamas
- Bahrain
- Barbados
- Belize (1)
- Bermuda (1)
- Bolivia
- British Virgin Islands (1)
- Brunei
- Cayman Islands (1)
- Channel Islands (1, 2)
- Christmas Island
- Cocos (Keeling)
- Cook Islands
- Costa Rica
- Djibouti
- Dominica (1)
- Falkland Islands or Malvinas
- Fiji Islands
- French Polynesia
- Gambia
- Gibraltar (1)
- Grenada
- Guam
- Guyana
- Honduras
- Hong Kong
- Isle of Man (1)
- Jamaica
- Jordan
- Kingdom of Tonga
- Kiribati
- Kuwait
- Labuan
- Lebanon
- Liberia (1)
- Liechtenstein
- Marianas
- Marshall Islands
- Mauritius
- Monaco
- Montserrat
- Nauru
- Netherlands Antilles
- Niue Island
- Norfolk Island
- Pacific Islands
- Palau Islands
- Panama
- Pitcairn Island
- Puerto Rico
- Qatar
- Queshm Island
- Saint Helena
- Saint Kitts and Nevis (1)
- Saint Lucia (1)
- Saint Pierre and Miquelon
- San Marino
- Seychelles
- Solomon Islands
- St. Vicente and the Grenadines
- Sultanate of Oman
- Svalbard
- Swaziland
- The Maldives
- Tokelau
- Trinidad and Tobago
- Tristan da Cunha
- Turks and Caicos (1)
- Tuvalu
- United Arab Emirates
- United States Virgin Islands
- Uruguay
- Vanuatu
- Western Samoa
- Yemen Arab Republic

Notes
1. The Portuguese authorities have signed tax information exchange agreements (TIEAs) with these jurisdictions (in case of the Channel Islands, only with Guernsey and Jersey). The following TIEAs are in force: Andorra, Bermuda, Cayman Islands, Gibraltar, Isle of Man, Jersey, and Saint Lucia.

IMI rates are annually increased three times when urban real estate is vacant or in ruins for a period of over one year.
Portugal

IMI exemptions and reductions

Urban real estate subject to urban rehabilitation
IMI exemption applies to urban real estate subject to urban rehabilitation for a period of three or five years, counted from the date of (i) issuance of the municipality’s license or (ii) completion of the rehabilitation works.

Real estate part of a tourism complex granted with tourism utility
Real estate that is part of a tourism complex granted with tourism utility benefits from IMI exemption for a period of seven years.

Urban real estate intended for the production of energy from renewable sources
Urban real estate exclusively intended for the production of energy from renewable sources benefits from a 50% reduction of the IMI rate.

Other benefits of environmental nature attributed to real estate
By resolution of the municipal assembly, municipalities may determine a reduction of up to 15% of the IMI rate, applicable to urban real estate with energy efficiency.

Tax incentives for forestry activity
IMI exemption is applicable to rural real estate corresponding to forest areas covered by a forest intervention zone and to rural real estate intended for forestry exploitation under a forest management plan.

Tax regime for investment promotion (RFAI)
Companies with investments that qualify for the RFAI can benefit from an exemption or reduction from IMI for a period of up to ten years regarding real estate acquired and regarded as an eligible investment.

Property transfer tax (Imposto Municipal sobre as Transmissões Onerosas de Imóveis or IMT)
IMT is a municipal tax levied on the transfer for consideration of real estate located in the Portuguese territory. The tax is due by the acquirer at the rates shown below, and the taxable basis is the same as for IMI or the price agreed upon by the contracting parties, whichever is higher. Note that the acquisition of more than 75% of the share capital of a company incorporated as a limited liability company (Sociedade por quotas), which owns real estate located in Portugal, is subject to IMT.

</tbody>
</table>

IMT exemptions

- Acquisition of properties for resale by real estate trading companies.
- Acquisition of properties intended for urban rehabilitation.
- Acquisition of property or autonomous fraction of urban property intended to install a tourism complex to which has been attributed tourism utility.
- Acquisition of real estate by Real Estate Investment Funds for Residential Letting (REIFRLs).
- Restructuring operations or cooperation arrangements.
- Acquisition of buildings classified as of national/public/municipal interest.
- Exemption or reduction of the IMT rate, regarding the acquisition of property that constitutes eligible investment under the RFAI.
Stamp duty
Stamp duty is payable on a wide variety of transactions and documents, at rates that may be set in specific amounts or on a percentage basis. Important examples include the following:

<table>

Notes
1. The rates apply as follows:
   - 1% for urban housing buildings or building plots wherein house construction is authorised or intended, according to the current rules of the IMI Code.
   - 7.5% for buildings, regardless of their use, owned by companies resident in black-listed jurisdictions.

Stamp duty exemptions
Some acts are exempt from stamp duty, such as the ones mentioned below (the exemption may depend on certain requirements):

- Guarantees on stock exchange dealings regarding securities and derivatives.
- Transactions between financial institutions, when directly related to lending/security operations.
- Short-term treasury needs (less than one year) granted by venture capital companies to companies in which they hold a participation, granted by any company to companies dominated by them or with a shareholding with voting rights of at least 10% or with a purchase price of at least EUR 5 million, as well as to financing between companies in a dominant or group relationship.
- Short-term shareholders’ loans (less than one year) in case of direct shareholding of 10% or more, held for one year or more.
Portugal

- Shareholders’ loans, including the respective interest, not reimbursed before one year, when provided by shareholders, of at least 10%, of the share capital and as long as the shareholding is maintained for a consecutive period of one year, or since the incorporation of the subsidiary, provided that, in this case, the participation has been maintained during that period.
- Interest on loans for permanent housing.
- Free transfer of property to spouse, or de facto spouse, descendants, and ascendants.
- Mergers or cooperation operations.
- Warranties provided in favour of the state or social security institutions upon the payment of debt by instalments under enforcement procedures or relating to the recovery of tax and social security credits.
- Under the RFAI, companies are exempt from stamp duty on the acquisition of real estate property that constitutes relevant investment, according to the terms of this regime.
- Securities repos or similar rights exchanged in stock markets, as well as repo and fiduciary sales in guarantee, performed by financial institutions and intermediated by central counterparts, are also exempt from stamp duty.

**Financial sector contribution**

Portuguese headquartered credit institutions, Portuguese subsidiaries of foreign credit institutions, as well as branches in Portugal of foreign credit institutions, including EU residents, are subject to a financial sector contribution, applicable on a taxable base composed as follows:

- Base I: Liabilities less deposits included in deposit guarantee schemes, such as the Deposit Guarantee Fund, only to the extent that they are effectively covered; for this purpose, liabilities are defined as the set of elements accounted for in the balance sheet representing liabilities towards third parties, irrespective of their form or nature (excluding, amongst others, items accounted for as equity, liabilities for defined benefit retirement plans; provisions, liabilities concerning the revaluation of financial derivatives).

The financial sector contribution is applicable at a maximum of 0.11% on Base I and at 0.00030% on Base II.

**Payroll taxes**

**Social security contributions**

Employers are required to make monthly social security contributions at the standard rate of 23.75% on the monthly gross remuneration of their employees.

Social security contributions are deductible for CIT purposes.

**Branch income**

The profits of a Portuguese branch are taxed on the same basis as corporate profits. Income remitted by a Portuguese branch to the foreign head office is not subject to taxation in Portugal.

**Income determination**

Taxable profit is based on accounting income adjusted according to specific provisions of the tax legislation, when applicable.
Inventory valuation
Inventories are valued at the lower of the following values: cost or net realisable value. The first in first out (FIFO) and average-cost methods of valuation are accepted. The last in first out (LIFO) method is not allowed.

Inventory adjustments are deductible for tax purposes on the amount accounted for in the tax year, capped at the difference between the acquisition or production value and, if lower, the net realisable value (dually documented) with reference to the balance sheet.

Capital gains
Under the participation exemption regime, capital gains and capital losses realised on the transfer of shares can be exempt from taxation. This rule applies to all types of Portuguese companies (holdings and operational companies) and includes capital gains on the transfer of shares derived from a non-tax neutral merger, division, transfer of assets, or exchange of shares, and also in case of a transfer of supplementary capital entries. The regime applies provided that, at the date of the transaction, the following requirements are met:

- The shares are held for a consecutive period of at least one year.
- The taxpayer directly, or directly and indirectly, holds at least 10% of the share capital or voting rights in the entity from which the shares are transferred.
- The taxpayer is not covered by the tax transparency regime (i.e. imputation of profits to individual or corporate shareholders, regardless of effective distribution).
- The entity from which shares are transferred is not resident in a black-listed jurisdiction.
- The assets of the entity from which shares are transferred are not directly or indirectly comprised of more than 50% of real estate located in Portugal and acquired on or after 1 January 2014 (except real estate allocated to an agricultural, industrial, or commercial activity that does not consist of buying and selling real estate).

This regime also applies to capital gains and capital losses realised by a Portuguese PE of:

- An EU resident entity, which complies with the requirements foreseen in Article 2 of the EU Parent/Subsidiary Directive.
- An EEA resident entity, subject to tax cooperation obligations similar to the ones established within the European Union, provided that the entity complies with requirements that are comparable to those foreseen in Article 2 of the EU Parent/Subsidiary Directive.
- An entity resident in a state with which Portugal has concluded a double tax treaty (DTT) (except if resident in a black-listed jurisdiction) that foresees exchange of information and is subject and not exempt in its state of residence from an income tax similar to the Portuguese CIT, which legal rate is not lower than 60% of the standard Portuguese CIT rate (meaning 12.6%).

Where the participation exemption regime on the transfer of shares does not apply, the positive net difference between capital gains and capital losses arising from the transfer of shares is taxed as part of normal income. The same applies on the disposal of tangible fixed assets, intangibles, biological assets, and investment properties. In certain circumstances, only 50% of the net gains on disposal of tangible fixed assets, intangibles, and biological assets is taxed as part of normal income, provided the sales proceeds are reinvested.

The regime also applies to capital gains and capital losses realised and related with shares held by a company with head office or place of effective management in Portugal that transfers its tax residence to another EU member state or to an EEA member state.
Capital gains and capital losses are determined by the difference between the sales proceeds, net of related costs, and the acquisition value, net of impairment losses and tax deductible depreciation or amortisation, adjusted by the inflation index (in the case of at least two years of ownership).

**Dividend income**
Under the participation exemption regime, profits distributed to a Portuguese parent company are exempt from taxation, provided that the following requirements are met:

- The taxpayer directly, or directly and indirectly, holds at least 10% of the share capital or voting rights in the subsidiary.
- The shares are held for a consecutive period of at least one year (or maintained for that period).
- The taxpayer is not covered by the tax transparency regime.
- The subsidiary is subject to and not exempt from CIT, an income tax mentioned in Article 2 of the EU Parent/Subsidiary Directive (Council Directive 2011/96/EU), or a tax similar to CIT with a legal rate that is not lower than 60% of the standard CIT rate.
- The subsidiary is not resident in a black-listed jurisdiction.

This regime also applies to profits distributed to a Portuguese PE of:

- An EU resident entity, which complies with the requirements foreseen in Article 2 of the EU Parent/Subsidiary Directive.
- An EEA resident entity, subject to tax cooperation obligations similar to the ones established within the European Union, provided that the entity complies with requirements that are comparable to those foreseen in Article 2 of the EU Parent/Subsidiary Directive.
- An entity resident in a state with which Portugal has concluded a DTT (except if resident in a black-listed jurisdiction) that foresees exchange of information and is subject and not exempt in its state of residence from an income tax similar to the Portuguese CIT.

Law 5/2016, dated 29 February 2016, amended the CIT Code in order to deny the participation exemption regime on profits in case of an arrangement or series of arrangements which main purpose or purposes is to obtain a tax advantage that defeats the object and purpose of eliminating double taxation on profits, in case such arrangement or series of arrangements is not regarded as genuine, all facts and circumstances considered. For completeness, an arrangement or series of arrangements is not regarded as genuine if it is not based on valid economic reasons and has no economic reality.

**Interest income**
Interest income obtained by Portuguese taxpayers is taxed as part of normal income and taxed at the standard CIT rate. Any WHT incurred in interest income received is treated as a payment on account of the final CIT liability, refundable even if no CIT is due.

**Foreign income**
A Portuguese company is taxed on all its foreign income; however, there is an optional regime to exclude from taxation the profits and losses allocated to a foreign PE (see the Taxes on corporate income section for more information).

Taxes paid abroad can be offset against corresponding Portuguese tax (see Foreign tax credit in the Tax credits and incentives section for more information).

There are no provisions concerning tax deferral of income earned abroad.
Deductions

Depreciation and amortisation

The qualifying cost of an asset for tax purposes is the acquisition or production cost.

Depreciation must be computed by using the straight-line method or the declining-balance method. The latter cannot be applied to buildings, passenger vehicles, furniture, social welfare equipment, or second-hand assets.

Straight-line rates of depreciation are normally consistent with rates privately used by business and industry and are increased, for the purposes of applying the declining-balance method, by coefficients of:

- 1.5 if assets have a useful life of less than five years.
- 2 if useful life is five or six years.
- 2.5 for useful lives in excess of six years.

Different depreciation methods may be applied without previous approval from the Portuguese Tax Authority (PTA) (annual depreciation cannot, however, exceed the depreciation resulting from using either the straight-line or declining-balance methods).

Some examples relating to the maximum straight-line depreciation rate are as follows:

<table>
<thead>
<tr>

<td>25</td>
</tr>
</tbody>
</table>

Rates can be reduced by 50% in any one year at the taxpayer’s option. If the reduction is more than 50%, the difference is allowed for tax purposes at a future date. A total of 60% of additional depreciation on revaluation of fixed assets, as permitted by law from time to time, is allowed for tax purposes.

Depreciation rates of tangible assets may be increased by 25% in the case of companies with a schedule of two shifts (for three shifts, 50%), given the faster deterioration of those assets.

Assets with an acquisition value lower than EUR 1,000 can be depreciated in the acquisition year, unless the assets are part of a set of elements that should be depreciated as a whole.

Depreciation of yachts and airplanes that are not essential for business activities is not allowed as a cost for tax purposes.

Depreciation of passenger cars and certain other vehicles on the part of their cost of acquisition that exceeds certain amounts (as defined by law), with reference to their acquisition value, is also disallowed as a cost for tax purposes. The following caps apply (i.e. disallowed cost above the values below):
Portugal

- EUR 29,927.87 of acquisition cost, in the case of vehicles acquired until 31 December 2009.
- EUR 40,000 of acquisition cost, in the case of vehicles acquired between 1 January 2010 and 31 December 2010.
- EUR 30,000 of acquisition cost, in the case of vehicles acquired between 1 January 2011 and 31 December 2011 (EUR 45,000 in the case of electric vehicles).
- EUR 25,000 of acquisition cost, in the case of vehicles acquired between 1 January 2012 and 31 December 2014 (EUR 50,000 in the case of electric vehicles).
- EUR 25,000 of acquisition cost, in the case of vehicles acquired from 1 January 2015 onwards (EUR 62,500 in the case of fully electric vehicles; EUR 50,000 in the case of hybrid plug-in vehicles; EUR 37,500 in the case of vehicles that use LPG or compressed natural gas).

Development expenses, patents, trademarks, licences, and similar rights may be amortised for tax purposes if acquired for a limited period of time.

The cost of acquisition of certain intangibles with unlimited life (i.e. trademarks, permits, production processes, models, and other industrial property rights) can be amortised for tax purposes over a period of 20 years.

Depreciation of non-consumable biological assets is tax deductible.

Expenses relating to assets generated internally are deductible for tax purposes in the tax year in which the cost is incurred.

**Goodwill**

Goodwill acquired as a result of a corporate restructure or business combination can be amortised for tax purposes over a 20-year period, except if related with shareholdings.

**Start-up expenses**

Start-up and research expenses are deductible for tax purposes in the respective tax year.

**Limitation on the deductibility of financing expenses**

Companies may only deduct net financing expenses up to the higher of the following limits:

- EUR 1 million or
- 30% of the earnings before depreciations, amortisation, taxes, and net financing expenses.

Under the transitional period, a 40% cap applies in 2016, until reaching 30% in 2017 and following years. In the cases where the taxable year is less than a calendar year, the EUR 1 million limit is reduced proportionally to the duration of the taxable year.

Besides Portuguese tax resident entities, PEs of non-resident entities are also covered by the scope of this rule. Entities subject to the supervision of the Portuguese Central Bank (Banco de Portugal) and the Portuguese Insurance and Pension Fund Supervisory Authority (Autoridade de Supervisão de Seguros e Fundos de Pensões), as well as Portuguese branches of financial entities or insurance companies resident for tax purposes in the European Union, are excluded from this rule.

No distinction is made between bank and intra-group financing, domestic or foreign financing (EU or non-EU).

Financing expenses considered as excessive (not deductible) in a certain fiscal year may be deductible in the following five fiscal years, provided that, together with the net financing expenses of that year, the above-mentioned limits are not exceeded.
Additionally, where financing expenses do not exceed 30% (or the applicable percentage) of the earnings before depreciations, net financing expenses, and taxes, the unused difference is added to the maximum deductible amount in the following five tax years, until its total deduction.

For the purposes of the regime, net financing expenses consist of, among others, any amounts due in connection to the remuneration of financing, including interest on overdraft facilities, short-term loans, bonds, financial expenses related to financial leases, or exchange losses, deducted from the profits or gains of the same nature.

Where the special regime of group taxation applies, there is the option to make the calculation considering the net financial expenses of the group and the sum of all the respective earnings before interest, taxes, depreciation, and amortisation (EBITDA).

**Interest on shareholder loans**
If the rate applicable to interest and other compensation regarding loans provided by the shareholders to the company is higher than the Euro Interbank Offered Rate (EURIBOR) 12-month rate rounded up with a spread of 1.5% (at the date the loan was granted), the amount paid in excess is not tax deductible. This rule does not apply when the shareholder is a resident of a tax treaty country or when the interest rate is at arm’s length under the transfer pricing provisions.

In the case of small and medium-sized companies, shareholders’ loans with an interest rate of the EURIBOR 12-month rate plus a spread up to 6% are tax deductible.

**Bad debt**
Impairment losses on doubtful debts are deductible for tax purposes when an insolvency or recovery has been requested or the credits have been claimed in court.

The annual amount of accumulated impairment losses on doubtful debts due for more than six months, with evidence that measures towards its perception were taken, is capped at the following percentages of the debts:

- More than 6 and less than 12 months: 25%.
- More than 12 and less than 18 months: 50%.
- More than 18 and less than 24 months: 75%.
- More than 24 months: 100%.

Amounts guaranteed by insurance or mortgage, or due or secured by the state, autonomous regions, or municipalities, or due by related parties (e.g. 10% shareholding) are not considered as doubtful debts, and the respective impairment loss is disallowed for tax purposes.

The ageing of bills of exchange is calculated from the date when the respective payment is due.

Uncollectable debts are allowed as tax deductible costs if supported under insolvency, recovery enforcement, or in an out-of-court conciliation procedure for the viability of insolvent companies or companies in a difficult economic situation (mediated by the Institute for the Support of Small and Medium-Sized Enterprises or IAPMEI). This rule applies to the amount of the uncollectable debts that were not deducted for tax purposes as impairment losses (or for which the amount was insufficient).

**Charitable contributions**
Donations to authorised charitable institutions are allowable at up to 0.8% of turnover, with the possibility of the cost being raised up to 150%. Donations to authorised cultural institutions are allowable at up to 0.6% of turnover, with the possibility of the cost being raised up to 130%.
Portugal

Donations to the state, municipalities, and foundations where the state or municipalities participate in the initial capital are fully deductible, with the possibility of the cost being raised up to 140%. Special application may be made by certain entities in order to be included under the referred regime.

Donations of computers, software equipment, training, and consultancy in the area of computers granted to the state, municipalities, foundations, museums as well as to authorised charitable and cultural institutions are allowable at up to 0.8% of turnover, with the possibility of the cost being raised up to 140%.

**Vacation accrual**
Vacation allowance is tax deductible in the year in which the benefit accrues, regardless of the year in which payment is made.

**Pension expenses**
Pension, invalidity, and health schemes are tax deductible up to a rate of 15% of annual staff expenses, provided that, among other conditions, they are available to all employees and the management and disposition of the benefits are outside the control of the taxpayer, such as under an insured scheme with vested benefits.

**Fines and penalties**
Fines and penalties for infractions that do not have a contractual nature, including late assessment interest, are disallowed for CIT purposes.

**Taxes**
All taxes other than CIT, autonomous taxation, state surtax (Derrama Estadual), and local surtax (Derrama) constitute a normal business expense.

**Other significant items**
The costs borne from the acquisition of social passes are regarded as tax-deductible costs to the extent the employer attributes them on a general basis.

Uninsured losses, including indemnities to third parties, are disallowed unless the risk could not be insured.

Non-documented expenses are not tax deductible and are subject to a 50% autonomous taxation for fully taxable entities.

**Net operating losses**
Tax losses generated in tax years starting on or after 1 January 2016 can be carried forward for 12 years. Tax losses generated in tax years starting on or after 1 January 2017 can be carried forward for five years. The deduction of carried forward tax losses is capped at 70% of the taxable income.

Carryback of losses is not allowed.

The tax losses carried forward are lost in case of a change in direct ownership of the company of at least 50% shareholding or voting rights (not applicable in case of changes within the same group of companies, under certain conditions).

In special cases of economical merits, the Ministry of Finance may authorise the use of tax losses upon a request filed by the taxpayer before those changes occur.

**Payments to foreign affiliates**
A Portuguese corporation is allowed to deduct royalties, interest, and other costs paid to foreign affiliates, provided the amounts are at arm's length. Service fees paid are allowed if there is adequate proof that the service was effectively rendered (an invoice is required in cases where the supplier of the goods or services is obligated to issue such
document; otherwise, other supporting documents are required) and has economic substance, as well as if the amount is at arm’s length.

**Payments to non-residents in a black-listed jurisdiction**
Payments made or due, indirectly, to non-resident entities in a black-listed jurisdiction, when the taxable person has or should have had knowledge of the final purpose given to such payments, will be non-deductible for tax purposes, except if the taxpayer demonstrates that such charges relate to genuine transactions and are not of an abnormal or exaggerated amount. Such knowledge is presumed whenever there are special relations between the taxpayer and the entities in a black-listed jurisdiction or between the taxpayer and the legal representative, fiduciary, or intermediary.

---

**Group taxation**

**Special regime for group taxation**
Taxation under the special tax regime for groups of companies is available, upon the filing of a special form with the PTA, to companies with head office and effective management in Portugal.

The group taxation regime may apply, provided one of the companies directly or indirectly holds 75% or more of the statutory capital of the others and more than 50% of the voting rights.

Tax grouping generally enables the group companies to offset losses incurred by one company against profits of another company.

Tax losses obtained prior to the beginning of the tax grouping can be carried forward only against the particular company’s taxable income (for the carryforward of tax losses regime, see Net operating losses in the Deductions section).

To be taxed under this regime, the group companies must meet the following conditions:

- Must be tax resident in Portugal (even if held through an EU or EEA group company).
- Must be subject to the normal regime of taxation at the highest corporate tax rate.
- Must maintain a minimum holding participation of 75%.
- All companies must be held by the parent company for more than one year (excluding newly incorporated companies).
- Cannot be dormant for more than one year.
- Cannot be dissolved or insolvent.
- Cannot have tax losses in the three years prior to the regime application, unless the companies have been held by the parent company for more than two years.
- Cannot have a tax period different from that of the parent company.

Additionally, the parent company:

- should not be controlled by any other Portuguese-resident company that fulfils the requirements to be the parent company and
- should not have renounced to the application of this regime in the three previous years.

When the regime comes to an end or when one company ceases to qualify for this regime, the tax losses obtained during the regime cannot be carried forward and deducted against future individual taxable income of the companies. The parent company is responsible for demonstrating that the requirements for the application of the group taxation regime are met.
Portugal

It is possible to apply the group taxation regime if the dominant company has its registered head office or place of effective management in an EU or EEA country (in the later case, provided there is administrative cooperation on tax matters similar to the one in place with the European Union). In addition, among others, the following requirements must be met:

- The dominant company owns the dominated companies for more than one year with reference to the date at which the regime starts to apply.
- The dominant company is not directly or indirectly 75% held by a Portuguese dominant company.
- The dominant company is subject and not exempt from a tax as per Article 2 of Council Directive 2011/96.
- The dominant company is incorporated as a limited liability company.

**Transfer pricing**

The PTA is entitled to adjust taxable income if the taxpayer and another individual or entity, due to their special relationship, have established particular conditions that diverge from the conditions normally agreed upon between independent entities and distort the results that would arise if those relations were at arm’s length. Portugal’s transfer pricing legislation broadly follows the Organisation for Economic Cooperation and Development (OECD) guidelines.

Companies with sales and other profits higher than EUR 3 million are required to prepare transfer pricing documentation, which should be filed with the PTA if requested. Penalties arise from non-compliance with this obligation.

An advance pricing agreement (APA) mechanism allows taxpayers and the PTA to establish agreements on a taxpayer’s future transfer pricing policy. This aims to guarantee compliance with the arm’s-length principle. This regime applies to transactions carried out with related parties and between a PE and the respective head office.

The conclusion of an APA implies the payment of a charge calculated with reference to the taxpayer’s turnover, capped at EUR 35,000. This charge is reduced by 50% in the case of a renewal or revision of an existing APA.

The assessment of an APA procedure takes 180 days for unilateral APAs, and 360 days for bilateral or multilateral APAs. This period is reduced to 100 business days for APAs concluded in connection with a relevant investment project in Portugal, as foreseen in the Tax Investment Code (Código Fiscal do Investimento).

For the PTA to confirm compliance of the transfer pricing method(s) with the terms and conditions set out in the APA, the taxpayer must prepare an annual report. The report must be made available to the PTA before the last business day of May in the year following that in which the transactions took place (i.e. when the tax year corresponds to the calendar year). Failure to comply invalidates the APA.

The 2016 State Budget Law introduced the country-by-country (CbC) report. It applies to entities belonging to an economic group with an annual consolidated revenue in the preceding tax year of at least EUR 750 million. The report should be filed by the end of the 12th month following the end of the tax year to which it relates (starting in 2016).

**Thin capitalisation**

Thin capitalisation rules have been revoked following the adoption of rules for the limitation on the deductibility of financing expenses. See Limitation on the deductibility of financing expenses in the Deductions section for more information.
Controlled foreign companies (CFCs)
Profits or income derived by an entity resident in a black-listed jurisdiction, or in a jurisdiction where it is subject to an effective tax rate equal to or lower than 60% of the Portuguese standard CIT rate, are imputed to the Portuguese taxpayer, provided it holds, directly or indirectly, at least 25% of the share capital (10% if more than 50% of the capital is held by Portuguese taxpayers), voting rights, or rights on income or assets of that entity. Upon distribution of the profits, a deduction is available for previously imputed income.

CFC rules also apply if the controlled entity (as defined above) is held by a Portuguese entity through a legal representative, fiduciary, or intermediary.

CFC rules do not apply if the CFC is resident in another EU country or in an EEA member state (bound to administrative cooperation on tax matters), provided that there are valid economic reasons underlying the incorporation and running of such company and it carries out agricultural, commercial, industrial, or services activities.

Upon a dividend distribution by the CFC, the tax credit of the tax paid abroad, which is not used, cannot be carried forward to subsequent tax years.

Tax credits and incentives

Foreign tax credit

International juridical double taxation
Taxes paid abroad can be offset against corresponding Portuguese tax, capped at the lower of (i) the tax liability corresponding to the foreign income, net of costs directly or indirectly incurred, or (ii) the foreign tax paid. In both cases, it is limited to the foreign tax as foreseen in the applicable DTT. This foreign tax credit can be carried forward for five years. The computation of the amount of the tax credit is now determined per jurisdiction, considering the total amount of the respective income, except in relation to income obtained by foreign PEs (the deduction in this case is assessed individually).

International economic double taxation
Taxpayers may opt to apply a tax credit (underlying tax credit) for international economic double taxation regarding profits or reserves received, to which the participation exemption regime on profits does not apply, and provided that the taxpayer holds, (or becomes the holder of) at least 10% of the share capital of the subsidiary for a period of one year.

When choosing the abovementioned option, the taxpayer shall add to the taxable income the amount of the income tax related to the distributed profits or reserves that has been effectively paid abroad by the subsidiary.

General tax benefits and incentives

Contractual tax incentives
Relevant investment projects up to 2020 (minimum investment of EUR 3 million) that qualify for strategic economic interest and promote the creation of jobs are eligible for tax incentives, as foreseen in the Tax Benefits Code and the Investment Tax Code. These are granted on a case-by-case basis under a government contract for a period not exceeding ten years and include a tax credit of 10% to 20% of the investment and exemptions or reductions from property transfer tax, property tax, and stamp duty.

Patent box regime
Income derived from the sale or granting of the temporary use of industrial property rights (i.e. patents and industrial drawings and models) is 50% exempt. The regime
Portugal

applies to income derived from industrial property rights derived from R&D developed internally or contracted from third parties. Transactions with associated enterprises, including entities resident in black-listed jurisdictions, are excluded. The regime applies to the above-mentioned industrial property rights registered on or after 1 January 2014.

Under the 2016 State Budget Law, the government was granted authorisation to revoke the current patent box regime, which shall apply only to patents, industrial designs, and models registered up to 30 June 2016 (the respective benefits shall, however, apply to 30 June 2021). A new patent box regime will be introduced, limited to the income arising from R&D activities developed internally. It shall be capped at a proportion of the expenses incurred although an additional deduction of 30% of the cap will be foreseen regarding R&D expenses incurred by the taxpayer.

Collective Investment Vehicles (CIVs)

\textit{CIT}

The taxable profit of a CIV corresponds to the net income of the period, computed in accordance with the applicable accounting standards, while disregarding the following:

- Investment income, rental income, and capital gains (unless if derived from ‘offshore’ entities).
- Expenses related to the income referred to above.
- Non-deductible expenses under article 23-A of the CIT Code.
- Income and expenses related to management fees and other commissions reverting to the CIV.

Tax losses generated by the CIV follow the regime foreseen in the CIT Code, with the necessary amendments.

The taxable profit assessed by a CIV is subject to the standard CIT rate. CIVs are exempt from municipal and state surtax; however, they are subject to autonomous taxation rates as foreseen in the CIT Code.

CIT due by a CIV is assessed in the periodical CIT return. Respective payment should be made until the last day of the time limit foreseen for the submission of the form.

\textit{Stamp duty}

Stamp duty is also levied on the net asset value of the CIV, as follows:

- For CIVs investing exclusively in money market instruments and deposits, at a rate of 0.0025%.
- For other CIVs, at a rate of 0.0125%.

The tax is assessed quarterly, in March, June, September and December of each year, and is due by the CIV before the end of the month following the taxable event.

\textit{Taxation of a CIV’s investors}

Regarding the taxation of income obtained by holders of participation units/shareholdings in the CIV, the taxation ‘at exit’ rule is applicable.

Income obtained by resident investors is subject to taxation at the PIT level (generally, at the rate of 28%) and CIT level (being considered in the taxable profit of the investors).

Income obtained by non-resident investors without PE benefit from a favourable tax regime:

- Taxation at the rate of 10% in case of income arising from Real Estate Investment Funds (REIFs) and Real Estate Investment Companies.
Exemption in case of income arising from Securities Investment Funds and Securities Investment Companies.

This regime does not apply, being instead applicable the PIT and CIT regime foreseen for resident investors, whenever the investors are tax residents in ‘offshore’ jurisdictions or, as a general rule, are held more than 25% by tax residents in Portugal.

**Pension funds**

Pension funds are exempt from CIT and IMT.

The CIT exemption is applicable to pension funds incorporated under the Portuguese law as well as to pension funds established in another EU country or in an EEA member state (bound to administrative cooperation on tax matters) that cumulatively fulfil the following requirements:

- Exclusively assure the payment of retirement pensions granted from elderly, handicapped, surviving, pre-retired, health, and post-employment benefits, as well as death benefits when complementary and ancillary to the previously mentioned.
- Are the effective beneficiaries of the income.
- In the case of dividend distributions, the related shareholding should have been held for a consecutive one-year period.

**Contractors for North Atlantic Treaty Organization (NATO) infrastructures**

Contractors for NATO infrastructures are exempt from CIT.

**Net young employment creation**

150% of the costs related to net increase job creation, under labour contracts without term, for employees up to 35 years (including) of age and for long-term unemployed individuals may be deducted from taxable income. For this purpose, the fixed remunerations paid and the contributions made by the employer to social security should be considered. The maximum amount of annual increase on deductible costs for each eligible employee is 14 times the national minimum retribution (EUR 530 in 2016).

The increase in 50% of the expenses incurred with the same employer is applicable to more than one employee, provided that there are no special relations.

This tax benefit is not cumulative with any tax benefits or other incentives (e.g. social security) concerning the same employee.

This deduction applies for a period of five years for each employee.

**Research and development (R&D) (Sistema de Incentivos Fiscais em Investigação e Desenvolvimento Empresarial or SIFIDE II)**

Portuguese tax resident companies carrying out commercial, industrial, or agricultural activities, and non-resident companies with a PE in the Portuguese territory, are allowed to deduct from the CIT due, up to the respective amount, the value of eligible expenses incurred with R&D, in a double percentage as follows:

- Base rate: 32.5% of the R&D expenses incurred; this rate is increased by 15% in case of small and medium-sized companies that do not benefit from the incremental rate of 50% (applicable to entities that had completed two years of activity).
- Incremental rate: 50% of the difference between the R&D expenses made in the tax year and the average amount of the R&D expenses made in the previous two years, up to the limit of EUR 1.5 million.
Portugal

Expenses that, due to insufficient tax due, cannot be deducted in the tax year they were incurred can be carried forward for eight years.

Eligible expenses related to allowances paid to personnel directly involved with R&D tasks are capped at 55% of the operational expenses incurred.

Expenses incurred in connection with projects that include, exclusively, third parties, including contracts and R&D services, are not considered.

Expenses relating to staff with a minimum academic qualification of level 8 of the National Qualifications Framework are considered at 120% of their amount.

Expenses related to demonstrations are eligible for the SIFIDE II regime, provided they are notified up front.

Expenses incurred with the acquisition, registration, and maintenance of patents, essential for the performance of R&D activities and audits, are accepted only for micro, small, or medium-sized companies.

The deduction of R&D expenses requires that the entity develops agricultural, industrial, or commercial activities or services as its main business activity.

The applications should be submitted by the end of July of the year following the year in which the investment was made, and applications referring to years previous to that fiscal year will not be accepted.

The regime applies until 2020.

**Incentives for the acquisition of companies in a difficult economic situation**

The regime of incentives applicable to the acquisition of companies in a difficult economic situation may also apply to cases approved by IAPMEI within the scope of the Incentive System for the Revitalization and Modernization of Companies (SIRME). Under this regime, the acquiring company may deduct tax losses assessed but not yet used by the acquired company for a period of five years in proportion of its participation in the share capital of the acquired company, capped at 60% of the taxable income.

**Tax regime for investment promotion (Regime Fiscal de Apoio Ao Investimento or RFAI)**

RFAI establishes several tax incentives to investment realised within specific business sectors.

Among other incentives, companies that invest in certain regions can benefit from a deduction against CIT otherwise payable (capped at 50% of the CIT due) of 25% (for qualified investments lower than EUR 5 million) or 10% (for qualified investments higher than EUR 5 million) of the qualified investment. Companies are also able to carry forward any unused credit for ten years and may benefit from exemptions or reductions from property transfer tax (IMT), property tax (IMI), and stamp duty on the acquisition of real estate for investment purposes. IMT exemptions are subject to the approval of the municipality where the real estate is located and where the investment is made.

**Loan interest and lease rentals on imported equipment**

When paid by the state, regional authorities, and public services, loan interest and lease rentals on imported equipment can qualify for partial or full exemption from tax upon an appropriate application.
Real Estate Investment Fund for Residential Lease (REIFRL)
A regime is applicable to REIFRL and to Real Estate Investment Companies for Residential Lease (REICRL) incorporated in accordance with the Portuguese law until 31 December 2014.

The following benefits are established for this tax regime:

• CIT exemption on income obtained by REIFRLs.
• CIT exemption for the income obtained by participation unit holders, except for the capital gains arising from the sale of such participation units.

The above-referred tax regime and respective exemptions are not applicable to entities resident in a black-listed jurisdiction.

Incentives to urban rehabilitation
Incentives are applicable to real estate property covered by rehabilitation projects undertaken until 2020.

REIFs that have been incorporated between 2008 and 31 December 2013 may benefit from:

• CIT: The income obtained by REIFs is tax exempt when the funds are incorporated in accordance with the Portuguese law, and respective assets are comprised of at least 75% real estate subject to rehabilitation projects in qualifying areas.
• Property transfer tax: Urban property (buildings or autonomous units) destined for permanent residence and located in a rehabilitation area may benefit from an IMT exemption on the first transfer of such urban property upon undertaking of rehabilitation works. The granting of this exemption depends on a decision in this respect of the municipality of the area of the real estate property.
• Property tax: The IMI exemption granted in respect of urban properties subject to rehabilitation works is extended from eight to ten years (it is granted for a five years term and renewable for an additional five-year period). Again, the granting of this exemption depends on a decision in this respect of the municipality of the area of the real estate property.

Tax benefits and incentives for non-resident corporate entities

Capital gains
Capital gains on the sale of shares and quotas held in a Portuguese company by a non-resident company may be tax exempt. However, there are some important exceptions, such as:

• Where the non-resident shareholder (without a PE in Portugal) is owned more than 25%, directly or indirectly, by a Portuguese resident company, except when the following cumulative conditions are met in respect of the non-resident shareholder:
  • Is resident in an EU member state, an EEA member state (bounded by an agreement for administrative cooperation in tax matters similar to the EU’s), or a state that has a tax treaty in force foreseeing exchange of information.
  • Is subject and not exempt from corporation tax as foreseen in EU Council Directive (Directive 2011/96/EU, dated 30 November) or a tax similar to the Portuguese CIT (in the latter case, provided that the legal rate is not lower than 60% of the standard Portuguese CIT rate that now stands at 21%).
  • Holds directly, or directly and indirectly, at least 10% of the share capital or of the voting rights of the Portuguese resident entity being sold for a minimum holding period of one consecutive year.
  • Is not part of an artificial scheme which purpose or main purpose does not aim at obtaining a tax advantage.
• Where the non-resident shareholder is located in a black-listed jurisdiction.
Portugal

• Where the assets of the company sold consist mainly of immovable property located in Portugal.

Government and corporate bonds
Interest and capital gains on government and corporate bonds are tax exempt (where held by entities not located in black-listed jurisdictions) under certain conditions.

Interest paid by resident credit institutions
Interest paid by resident credit institutions to non-resident financial companies deriving from loans as well as gains arising from swap transactions are tax exempt.

Tax regime applicable to external loans
Interest derived from Schuldscheindarlehen loan agreements signed by the Public Treasury Institute (IGCP), on behalf of the Portuguese Republic, is tax exempt, provided the creditor is not resident in Portugal and has no PE herein to which the loan can be allocated to.

Special tax regime applicable to debt securities issued by non-resident entities
Income from debt securities representing public and non-public debt issued by non-resident entities is tax exempt, provided that the income is considered to be obtained in Portugal, under Portuguese tax rules, and paid by the Portuguese state as a guarantor of the obligations undertaken by the entities in which it owns a participation, together with other EU member states.

Repo operations
Gains obtained by non-resident financial institutions on securities' repo operations undertaken with resident credit institution are exempt from CIT, provided that such gains are not attributable to Portuguese PEs of non-resident financial institutions.

Securities repos or similar rights exchanged in stock markets, as well as the repo and fiduciary sales in guarantee, performed by financial institutions intermediated by central counterparties, are also exempt from stamp duty.

Madeira International Business Centre (MIBC)
Entities licensed to operate in the MIBC until 31 December 2020 benefit from a special tax regime, which is applicable until 31 December 2027.

The MIBC special tax regime provides a reduced CIT rate of 5% on qualifying foreign-source income, based on thresholds of taxable income and job creation requirements. MIBC-licensed entities also benefit from an 80% exemption from stamp duty, property taxes, and municipal and regional surtaxes.

Non-resident shareholders (except if domiciled in blacklisted jurisdictions) of MIBC-licensed entities benefit from an exemption from WHT on dividend distributions, regardless of the percentage of ownership or holding period, and shareholders’ loans.

Other non-resident entities, regardless of their tax residence, that carry out business with MIBC-licensed entities benefit from an exemption from WHT on interest, royalties, technical assistance, and service income received, regardless of their tax domicile, provided that the income received is related with the activity of the MIBC-licensed entity.

MIBC-licensed companies generally benefit from Portugal's network of DTTSs. EU laws and regulations apply to Madeira.

The MIBC special tax regime is not available to entities pursuing intra-group services (head office activities and business and management consulting), financing, and insurance activities. Certain productive activities are also excluded.
**Withholding taxes**

**General WHT rates**

Notes

1. For residents, tax withheld constitutes a payment on account of final corporate or individual income tax due. For non-residents, tax withheld is the final tax, except for property income, in which case it is a payment on account.
2. Not subject to WHT in the case of holdings of at least 10% owned for at least one year.
3. Not subject to WHT if the non-resident entity, including a foreign PE located in an EU or EEA member state, has a head office that meets the following requirements:
   - Holds directly, or directly and indirectly, at least 10% of the share capital or of voting rights in the Portuguese subsidiary, for a minimum period of one year.
   - Is resident in an EU member state, an EEA member state (bound to administrative cooperation in tax matters similar to the EU’s), or a state with which Portugal has concluded a tax treaty that foresees exchange of information.
   - Is subject to and not exempt from an income tax mentioned in Article 2 of Council Directive 2011/96/EU, dated 30 November, or a tax similar to CIT, and in case of a resident in a tax treaty state, the applicable legal rate is not lower than 60% of the standard CIT rate.
   - Is resident in Switzerland and, among other requirements, holds a minimum shareholding of 25% in the Portuguese subsidiary for a minimum period of two years.
4. WHT rate is increased to 35% when the income is paid or due to entities resident in black-listed jurisdictions.
5. Not subject to WHT if the EU Interest & Royalty Directive 2003/49 applies.
6. WHT rate is increased to 35% when the income is paid in bank accounts open in the name of one or more account holders but on behalf of non-identified third parties.
7. Not subject to WHT if a tax treaty is applicable.

**Tax treaty rates**

Tax treaties reduce the above-mentioned rates as follows:

### Notes

1. The lower of the listed rates applies to royalties when the beneficiary holds 50% or less of the paying company’s share capital.
2. There is no WHT on dividends if the EU Parent/Subsidiary Directive applies.
3. The lower of the listed rates applies to dividends when the beneficiary directly holds 25% or more of share capital. Depending on each DTT, a two year holding period may be required.
4. The higher rate applies to interest on debentures raised in France after 1 January 1965 or on significant loans or debentures raised in Portugal or abroad under major development projects listed in the treaty annex.
5. The lower of the listed rates applies to bank loans, but if interest is payable from Portugal, the bank loans must qualify as being of economic or social interest or fall under an approved development plan.
6. The lower of the listed rates applies to interest received by financial institutions.
7. The lower of the listed rates applies to technical assistance.
8. The lower of the listed rates applies to interest related to loans with a minimum maturity of two years.
9. The rate of 10% applies to bonds interest or other securities transacted in the stock market. The rate of 10% applies to loans from banks or insurance companies or credit selling of equipment.
10. The rate of 5% applies to interest related to credits of any nature granted by a financial institution.
11. The rate of 10% applies if the company that is paying the dividends is a resident of Israel and the dividends derive from profits that are subject to tax in Israel at a rate that is lower than the normal rate of Israel company tax. The rate of 5% applies if the beneficial owner is a company that directly holds at least 25% of the capital of the company paying the dividends.
12. The treaty is signed but not yet in force.
13. The lower of the listed rates applies to dividends if the beneficial owner is a company (other than a partnership) that directly holds at least 10% of the capital of the company paying the dividends. Depending on each DTT, a one year holding period may be required.
14. The rate of 5% on dividends applies if the beneficial owner is a company (other than a partnership) that for an uninterrupted period of at least 12 months prior to the payment of the dividends or if the company paying the dividends has existed for less than 12 months, during the lifetime of the company, directly holds at least 10% of the capital of the company paying the dividends, or if the beneficial owner of the dividends is: (i) in the case of Portugal, the state, a political or administrative subdivision, or a local authority thereof, or the Bank of Portugal; and, (ii) in the case of Norway, the government of Norway, a political or administrative subdivision, or a local authority thereof, or the Central Bank of Norway.
15. A WHT rate of 5% on dividends applies in case of shareholdings of at least 25% on the company distributing the dividends, as well as for an exemption on dividends, in case of shareholdings of at least 25% held for at least two years. An exemption from WHT is also foreseen regarding interest and royalties, when paid between associated companies (shareholdings of at least 25% held for at least two years), in line with the Agreement between the European Community and the Swiss Confederation.
16. The lower of the listed rates applies to dividends if the beneficial owner is a company (other than a partnership) that (i) directly holds at least 10% of the capital of the Portuguese company paying the dividends or (ii) directly controls at least 10% of the voting rights of the Peruvian company paying the dividends.
17. The lower of the listed rates applies to interest related to credits of any nature granted by a financial institution.
18. The lower of the listed rates applies to royalties paid for technical assistance provided in connection with the use of, or the right to use of author’s rights, or information concerning industrial, commercial, or scientific experience.

### Tax administration

#### Taxable period

The tax year is, as a general rule, the calendar year. A different tax year is allowed in the case of companies obligated to accounting consolidation and of PEs of non-resident entities, which can adopt the tax period of the non-resident company. If this option is taken, the new tax period must be maintained for a minimum of five years. The five year minimum period is not applicable if the taxpayer is transferred to a group of companies that are subject to consolidation of financial statements and the holding company has a fiscal year different from the one that was being adopted by the taxpayer.
**Portugal**

**Tax returns**
The annual CIT return must be submitted by electronic data transmission by the last day of May of the year following the year of income. Whenever the tax year ends on a date other than 31 December, the annual CIT return shall be submitted by electronic data transmission by the last day of the fifth month following the year end. The system is one of self-assessment.

**Payment of tax**
Tax is paid in instalments. Three payments on account due in July, September, and up to 15 December of the year in which taxable income arises corresponding to 95% of the previous year's corporate tax assessment (for taxpayers with a turnover above EUR 500,000; 80% if below this amount). Payments on account are not required if the previous year's corporate tax assessment is less than EUR 200. The third payment may be suspended upon declaring that no further tax is due in respect of the current year. However, interest is assessed at a rate of 4% if this results in postponing more than 20% of the tax that would otherwise have been paid.

A last instalment is paid (or received) through self-assessment upon filing the annual tax return in May of the following year. If the tax year ends on a date other than 31 December, interim payments take place in the seventh, ninth, and up to the 15th of the 12th month of the tax year.

Filing of the annual tax return together with the final payment is in the fifth month following the close of the tax year.

Given the introduction of a state surtax (Derrama Estadual) three additional payments on account are due on the same dates as the interim payments mentioned above. The additional payments on account correspond to 2.5% of the taxable profit above EUR 1.5 million and up to EUR 7.5 million, 4.5% of the taxable profit above EUR 7.5 million and up to EUR 35 million, and 6.5% of the taxable profit above EUR 35 million, assessed in the previous year.

In particular situations, a special payment on account is due of a minimum of EUR 1,000 up to EUR 70,000, paid in March, or in March and October (the third or the third and tenth month of the tax year if it ends on a date other than 31 December).

**Interest and penalties**
Late assessment interest is due in case of delay on the assessment of taxes due. Late assessment interest is computed on a daily basis. The current rate of late assessment interest is 4% (year).

Late penalty interest is due in case of delay in the payment of the tax assessed. The current rate is 5.168%. Late penalty interest is computed on a daily basis. Tax penalties for companies are capped at EUR 165,000 in the case of intention and EUR 45,000 in the case of negligence. In general, in case of failure or late payment of CIT, companies are liable to a penalty varying between 30% and 100% of the tax due, capped at EUR 45,000 (in case of negligence).

Specific tax penalties apply regarding transfer pricing documentation and the CFC regime (between EUR 1,000 and EUR 10,000 for companies) and regarding omissions or inaccuracies regarding ruling requests (between EUR 750 and EUR 22,500 for companies in the case of urgent rulings or 25% of the previous amounts in the case of non-urgent rulings).

There is the possibility of applying for penalty reduction, provided certain requirements are met (e.g. regularisation of the tax situation/payment of the tax due; situation where there was no damage to the Revenue).
**Tax audit process**

Taxpayers are audited by the PTA based on several criteria, as detailed in a specific document prepared by the PTA.

The PTA must notify the taxpayers of the preliminary conclusions reached in cases where these may lead to tax assessment acts unfavourable to the taxpayers, further to which taxpayers may present their argumentation.

The PTA must then prepare a final report of the tax audit performed, identifying the facts detected.

Tax audits may be initiated within the statute of limitation (see below).

Tax audits must be concluded within six months. A prorogation of the deadline to one year may apply under certain conditions (e.g. complexity of the facts involved, necessity to make use of mechanisms of mutual assistance on tax matters).

The PTA releases, on a periodical basis, a list of taxpayers that, due to the nature of their activities, their turnover, or other criteria, are subject to regular monitorisation. There is also a specific department for major taxpayers.

**Statute of limitations**

The statute of limitation period is four years, but can be extended in case of tax losses. Regarding facts involving black-listed jurisdictions, the statute of limitation for the right to assess taxes is extended to 12 years while the time period allowed to collect taxes is extended to 15 years. The statute of limitation period is also increased from four to 12 years in case of facts related to deposit and securities accounts in financial institutions outside the European Union.

**Topics of focus for tax authorities**

Currently and mainly further to the Memorandum of Understanding between the Portuguese Republic, the European Commission (EC), the European Central Bank, and the International Monetary Fund (IMF), the PTA has been exhibiting a more aggressive approach, especially with regards to the fight against tax fraud and evasion, mainly by aggravating taxation in fields where tax avoidance is significant and by introducing additional compliance and reporting obligations.

Increased focus has also been verified on transfer pricing matters, mainly on the transfer pricing policies in transactions with non-resident entities and especially in case of payments made to entities that are resident in black-listed jurisdictions. In this regard, cooperation on transfer pricing matters with other tax administrations has been strengthened.

Situations of recognition of PEs in Portugal, usually triggered by inspections to VAT registers, are now recurrent.

**Anti-avoidance**

A general anti-avoidance provision is in force, pursuant to which contracts and other acts are ineffective whenever it is demonstrated that they were tax driven to reduce taxation that would be due under contracts bearing a similar economic effect, in which case taxation would be based on the latter.

The anti-avoidance procedure is initiated within the general term foreseen (statute of limitation) and is now more flexible in terms of proof by the PTA.

Anti-avoidance rules are not applicable in cases where a request for obtaining binding information is not answered by the PTA within 150 days.
Portugal

**Binding rulings**

Binding rulings can be:

- **Urgent:** A decision should be taken in 90 days; these are subject to the payment of a fee ranging between EUR 2,500 and EUR 25,500, depending on the complexity of the matter; if no decision is taken within the deadline established, there is a tacit approval of the taxpayer’s understanding of the tax matter.
- **Non-urgent:** A decision should be taken in 150 days; no fees are charged; a decision is required (no tacit approval, as in case of an urgent ruling).

**Fight against tax fraud and evasion**

It is mandatory that payments above EUR 1,000 are made by a means that allows the identification of the recipient of the income (e.g. bank transfer, nominative cheque, or direct debit).

Council Directive 2011/16/EU, on the matter of administrative cooperation in the field of taxation, has been transposed to the Portuguese legislation, reviewing the exchange information mechanisms between tax authorities and aiming at a more effective action against tax evasion and fraud at an international level.

**Significant developments**

Pursuant to Act No. 77, a value-added tax (VAT) regime should have replaced the sales and use tax (SUT) regime, effective 1 June 2016. Furthermore, on 30 September 2015, Act No. 159 was signed into law to introduce technical amendments to the Puerto Rico Internal Revenue Code, including changes to the SUT and VAT regimes. Act No. 159 clarified certain general terms and definitions and expanded the exclusions from taxable services and business-to-business (B2B) services applied to the SUT regime.

Notwithstanding the above, on 26 May 2016, the Puerto Rico Legislature eliminated the implementation of the VAT regime; consequently, the SUT regime will continue to apply.

On 7 April 2016, the Governor of Puerto Rico approved Act No. 22-2016, known as the ‘Electricity, Water and Sewer Services Subsidies and Overdue Payments Reform Act’ (Act No. 22). Act No. 22 amends Act No. 73-2008 as amended, known as the ‘Economic Incentives Act for the Development of Puerto Rico’ (Act No. 73) in order to limit the utilisation of the research and development (R&D) credit.

**Taxes on corporate income**

A domestic corporation is taxable in Puerto Rico on its worldwide income. A foreign corporation engaged in trade or business in Puerto Rico is taxed at the regular corporate tax rates on income from Puerto Rico sources that is effectively connected income and at a 29% withholding tax (WHT) rate on its Puerto Rico-source gross income not effectively connected with that business.

The current corporate income tax (CIT) rate is comprised of a 20% normal tax and a graduated surtax (computed on the ‘surtax net income’).

The ‘surtax net income’ is basically the net taxable income subject to regular tax less a surtax deduction in the amount of 25,000 United States dollars (USD). The graduated surtax rates are as follows:

- 5% for surtax net income up to USD 75,000.
- USD 3,750 plus 15% of surtax net income from USD 75,001 to USD 125,000.
- USD 11,250 plus 16% of surtax net income from USD 125,001 to USD 175,000.
- USD 19,250 plus 17% of surtax net income from USD 175,001 to USD 225,000.
- USD 27,750 plus 18% of surtax net income from USD 225,001 to USD 275,000.
- USD 36,750 plus 19% of surtax net income in excess of USD 275,000 for a maximum nominal tax rate of nearly 39%.

The determination of the applicable surtax rate is made on a consolidated basis for controlled groups and related companies, so the net taxable income of all the
entities subject to tax in Puerto Rico within said groups has to be combined for the determination of the applicable surtax rate.

**Alternative minimum tax (AMT)**

The AMT includes various components in order to calculate the tentative minimum tax. Such tentative minimum tax is the higher of the following:

- 30% of the alternative minimum net income.
- The sum of the following components:
  - 20% of the expenses paid or incurred by a related party, including those expenses allocated from a home office to its Puerto Rico branch, as long as these expense or cost allocations are not subject to income taxes in Puerto Rico, plus
  - a percentage of the value of personal property purchases from related parties, including those transfers of personal property from the home office to the Puerto Rico branch. The percentage fluctuates from 2.5% to 6.5% depending on the amount of gross income earned during the taxable year.

For AMT purposes, expenses paid or incurred for services performed by a related party outside Puerto Rico are considered a permanent adjustment in the determination of the alternative minimum net income (i.e. non-deductible for AMT purposes).

In determining the alternative minimum net income, the net operating loss (NOL) would be limited to 70% of the alternative minimum net income. Also, the amount of the tax credit available with respect to the AMT paid in prior years that may be claimed against the current year regular tax is limited to 25% of the current net regular tax over the AMT for such taxable year. The AMT credit can be carried forward indefinitely.

**Tax on deemed dividends**

A tax is imposed on certain corporations for taxable years commencing after 31 December 2013. The tax is a 10% tax on the deemed dividend amount attributable to a foreign owner. A foreign owner is defined as any non-resident person (or entity not engaged in a trade or business in Puerto Rico), who directly owns 50% or more of the corporation's stocks. The deemed dividend amount is computed using the lesser of the average value of the total foreign assets or the accumulated earnings and profits of the corporation.

Pursuant to Act No. 159, a corporation is allowed to prepay the dividend WHT between 1 October 2015 and 31 December 2015 on future dividend distributions using the 8% preferential WHT rate.

Also, the prepaid amount is allowed to reduce the accumulated earning and profits subject to the tax on deemed dividends.

**Tax on improper accumulation of income**

A surtax of 50% is imposed on corporations that improperly accumulate earnings to prevent the imposition of tax on shareholders or partners rather than paying the earnings out as dividends. The tax is not imposed on accumulated earnings and profits but is imposed on the net income for the year computed without taking capital loss carryover or NOL carryover deductions, and reduced by the following items: Puerto Rico income taxes paid or accrued, disallowed net capital losses, and charitable contributions in excess of the deductible amount. The net income does not include industrial income exempted from income taxes under Industrial Incentives Acts. However, an exempt business can be subject to the penalty tax on non-exempt income.
Corporate residence

A corporation organised or created under the laws of Puerto Rico is a domestic corporation. A domestic corporation is a resident corporation even if it does not conduct business operations in Puerto Rico. A corporation created elsewhere is considered a foreign corporation.

Permanent establishment (PE)

The Puerto Rico Tax Code does not provide specific guidance on PE. Facts and circumstances need to be analysed in order to determine if a corporation has created a PE in Puerto Rico or not. However, having an office or fixed place of business in Puerto Rico may deem the corporation to be engaged in a trade or business in Puerto Rico (i.e. having a PE).

Sourcing rules pursuant to Act No. 154

Act No. 154’s source rules are segregated into two parts. The first part treats a non-Puerto Rico resident manufacturing entity as having an office or fixed place of business in Puerto Rico merely as a result of engaging in transactions above a certain threshold with a related Puerto Rico entity. The second part treats a portion of the income earned by a non-Puerto Rico resident entity as Puerto Rico-source income.

Act No. 154’s source rule applies where a non-Puerto Rico resident purchases goods and services from a related company that manufactures personal property or performs services in Puerto Rico that account for 10% or more of the total gross receipts of the seller from sales of such property or services in Puerto Rico, or at least 10% of the purchase cost of personal property and services acquired by the purchaser, for the taxable year or any of the three prior taxable years.

Where Act No. 154’s source rule applies, a portion of the income of the non-Puerto Rico resident purchaser from the sale outside of Puerto Rico of personal property manufactured or produced in whole or part in Puerto Rico by the related Puerto Rico seller will be treated as Puerto Rico-source income that is effectively connected with the conduct of a Puerto Rico trade or business. The portion of the non-Puerto Rico resident’s income that is treated as Puerto Rico source is determined under an equally weighted, four-factor (i.e. purchases, sales, property, and payroll) formulary apportionment method. Where the purchaser fails to provide adequate documentation regarding the formulary apportionment factors, 50% of the income of the non-Puerto Rico resident purchaser from the sale outside of Puerto Rico of personal property manufactured or produced in whole or part in Puerto Rico by the related Puerto Rico seller will be treated as sourced where the property is manufactured or produced (i.e. Puerto Rico). The source rule also will apply to agency and commissionaire arrangements, in addition to buy-sell transactions involving related parties. In addition, the source rule contains an anti-abuse provision that disregards a transaction, for purposes of the source rule, where one of the principal purposes of the transaction is avoidance of the source rule.

Other taxes

Sales and use tax (SUT)

As a general rule, the SUT shall be applied, collected, and paid on all transactions of taxable items in Puerto Rico. Taxable items consist of tangible personal property, taxable services, admissions, and what is known as bundled transactions. Excluded from this definition are professional associations and certain membership fees; stamps issued by professional associations, the Commonwealth of Puerto Rico, or the federal government; human blood, tissue, and organs; maintenance fees paid to resident associations; air and maritime tickets; real property; and bingos, raffles, and lottery. Other transactions that are exempt from SUT include export transactions; duty-free stores located at airport or maritime ports; prescription medicines; insulin; taxable items acquired for certain
Puerto Rico

manufacturing operations (e.g. raw materials); and food and ingredients for food (except for prepared food, diet supplements, sweets, and carbonated beverages).

As of 1 July 2015, the SUT rate is imposed at 10.5% (previously 6%) at the state level and an additional 1% at the municipal level, for an aggregate 11.5% (previously 7%). As of 1 October 2015, designated professional services and B2B services are taxed at a 4% SUT rate.

Taxable services that are excluded from SUT include, among others, the following:

- Services rendered by merchants with annual volume of business of less than USD 50,000.
- Services rendered by a non-resident to a related party that is engaged in a Puerto Rico trade or business and holds a tax grant pursuant to Act No. 73-2008, Act No. 83-2010, Act No. 20-2012, or any similar act.
- Intangible rights.
- Advertising and promotion services.
- Construction subcontracted services and subcontracted telecommunication services.
- Toll manufacturing services or contract manufacturing services.
- Repair, maintenance, and conditioning of aircraft provided by a merchant that holds a tax grant pursuant to Act No. 73-2008 or any other similar act.

SUT should be remitted to the Puerto Rico government as 10.5% or 4% to the Puerto Rico Treasury Department (PRTD) and the remaining 1% to the corresponding municipality.

Tangible personal property introduced into Puerto Rico is subject to use tax upon importation, holding the release on the ports until the use tax is satisfied, unless the taxpayer is a bonded merchant or an eligible reseller. The use tax paid upon importation of the merchandise can be claimed as a credit on the SUT return.

Every natural or juridical person who does or wishes to do business of any kind in Puerto Rico shall request registration in the Merchant’s Registry of the PRTD at least 30 days before starting operations. Once the registration application is filled out and approved, the Secretary of the Treasury will grant a Merchant’s Registration Certificate. This certificate constitutes the merchant’s authorisation to do business in Puerto Rico and confirms the merchant’s obligation as a withholding agent. The Merchant’s Registration Certificate shall be displayed, at all times, in a visible place for the general public in the commercial establishment for which it was issued. Please note that if a merchant is doing business in one or more of the 78 municipalities in Puerto Rico, the merchant only needs to register with the PRTD.

Unless specifically exempted, all persons selling taxable items are required to file a monthly SUT return. This return shall be filed electronically with the PRTD no later than the 20th day of the calendar month following the month during which the sales occurred. Also, all persons that import tangible property to Puerto Rico must file a use tax on imports return no later than the tenth day of the calendar month following the import.

There is a credit for purchases of products manufactured in Puerto Rico for purposes of SUT. In general, the credit will be 10% of the excess of the purchases of eligible products over the average of the purchases of eligible products for three out of ten prior taxable years. This credit can be carried forward until exhausted. It is important to note that the credit used will be considered taxable income for income tax purposes of the year the credit is taken.
**Customs duties and import tariffs**
Puerto Rico does not have customs duty and import tariff provisions. Since Puerto Rico is a Commonwealth of the United States, it follows the United States’ customs duties and import tariffs.

**Excise taxes**
There are certain articles subject to a special excise tax, such as cigarettes, fuels, crude oils, vehicles, alcoholic beverages, cement, sugar, and plastic products, among others.

**Act No. 154’s excise tax**
Companies with manufacturing operations in Puerto Rico may be subject to an excise tax on goods or services provided to offshore-related entities under Act No. 154 of 2010, as amended. This Act created an excise tax that works in tandem with Act No. 154’s source rules. Where the excise tax applies, it is in lieu of the tax that otherwise would arise from the application of Act No. 154’s source rules. Under this excise tax rule, offshore purchasers that acquire goods from Puerto Rico sellers with gross receipts in excess of USD 75 million for any of the three preceding taxable years and that otherwise meet the source-of-income rule thresholds (set forth above) are subject to this excise tax equal to the ‘applicable percentage of the value’ of such personal property or services, which is essentially a scaled-back percentage. The excise tax rate phases out as follows:

- 3.75% between 1 January 2012 and 31 December 2012.
- 2.75% between 1 January 2013 and 30 June 2013.
- 4.00% between 1 July 2013 and 31 December 2017.

Various tax credits are provided to offset the excise tax mentioned above.

The excise tax is collected by the Puerto Rico seller on receipts from the sale of personal property or services rendered to a related offshore purchaser. The tax has to be deposited with the Secretary of the Treasury on or before the 13th day of the month following the sale. Each person required to collect the excise tax must file a quarterly excise tax return on 30 April, 31 July, 31 October, and 1 January and pay any remaining tax liability not deposited on a monthly basis, as outlined above.

Act No. 154 sets forth the process for which a credit may be claimed for (i) taxes paid to any of the states of the United States on the acquisition of personal property and services and (ii) taxes paid to Puerto Rico by another member of the taxpayer's controlled group on a series of purchases.

**Personal property taxes**
Every corporation engaged in a trade or business in Puerto Rico that on 1 January of each year owns personal property used in its trade or business within Puerto Rico, whether it is leased to another entity or not, is subject to tax on such property. The tax is self-assessed by the corporation, and it is paid together with the filing of an annual return. The tax ranges between 5.80% and 9.83%, depending on the municipality.

The tax return must be filed electronically through the Municipal Revenue Collection Center (MRCC) website (www.crimpr.net). In order to file the return, every taxpayer with over USD 3 million in volume of business and specialist who had prepared more than five returns for the prior taxable year need to register using this website. The signature and certification of the return will be satisfied by virtue of the electronic filing. Also, all returns filed electronically should be accompanied by the corresponding payment due on or before 15 May.

Every corporation must substantially satisfy its personal property tax liability, if any, through estimated tax payments. The amount of estimated taxes should be paid in equal instalments on the 15th day of August, November, February, and May of the taxable year of the corporation. The estimated payments should equal or exceed 90% of the actual
personal property tax for the year or 100% of the personal property tax as reflected in the personal property tax return for the preceding taxable year, whichever is less. Any tax not covered by the estimated tax payments should be paid along with the personal property tax return. Failure to pay the tax by the due dates indicated above may result in a penalty of 5% of the instalment due.

A 5% statutory discount is available if 100% of the personal property tax, as reflected in the personal property tax return for the preceding taxable year, is made by the first instalment date (15 August).

In general, all personal property not specifically exempted, including cash, finished goods inventory, supplies, and depreciable property, is subject to the tax. The personal property tax is generally based on the book value of the asset as of 1 January. Finished goods inventory, however, is assessed on the average of the monthly balances for the 12-month period preceding 1 January of each year.

The valuation of the personal property subject to tax is determined by multiplying the book value of such property by the applicable tax rate determined by the municipality in which the property is located. If the book value of depreciable property is below its estimated residual value, the property should be assessed at its estimated residual value.

**Real property taxes**
The property tax system is administered by the MRCC. The tax on real property is directly assessed by the MRCC and may be paid in two instalments. The tax, (which varies from a minimum of 8.03% to a maximum of 11.83%, depending on the municipality) is applied to an amount based on the hypothetical fair market value (FMV) of the relevant property in the year 1957. In general terms, this hypothetical FMV normally ranges between 40% and 50% of the cost of the property.

**Transfer taxes**
Puerto Rico does not have transfer tax provisions.

**Stamp taxes**
Puerto Rico does not have stamp tax provisions. However, recordation fees are imposed at the time of officially recording a real estate transaction with the Puerto Rico Property Registry.

**Payroll taxes**

**Withholding taxes on salaries and wages**
All employers are required to withhold Puerto Rico income tax from all wages paid to its employees.

**Federal Social Security and Medicare (FICA)**
The Federal Social Security and Medicare Law applies in full in Puerto Rico. The tax rate is imposed on both the employer and the employee. For 2016, the tax rate is 7.65%, which consists of 6.2% of Social Security and 1.45% of Medicare Tax. The Social Security Tax is calculated on the first USD 118,500 (year 2016) of wages received, and the Medicare Tax is calculated on the total wages, without ceiling.

In addition, an employer must withhold a 0.9% Additional Medicare Tax from wages paid to an employee in excess of USD 200,000 in a calendar year. The employer is required to begin withholding Additional Medicare Tax in the pay period in which wages are paid in excess of USD 200,000 to an employee and continue to withhold it each pay period until the end of the calendar year. Additional Medicare Tax is only imposed on the employee. There is no employer share of Additional Medicare Tax. All wages that are subject to Medicare tax are subject to Additional Medicare Tax withholding if paid in excess of the USD 200,000 withholding threshold.
State (PR) Unemployment Tax (SUTA)
The unemployment tax is paid only by the employer and is paid on the first USD 7,000 of total wages paid to each employee during the calendar year, based on an experience rating system. In addition, the employer must also pay a special tax equal to 1% of the wages subject to unemployment tax. However, the special tax together with the experience-based tax cannot exceed 5.4%.

Federal Unemployment Tax (FUTA)
Similar to the FICA, FUTA also applies in Puerto Rico. All persons who employ at least one individual during any 20-week period or pay USD 1,500 or more in salaries during any trimester of the calendar year are subject to the FUTA tax.

The employer is solely responsible for payment of the tax. The rate is 6.0% on the first USD 7,000 of total wages paid during the calendar year to each employee. However, a credit of 5.4% is granted for the PR unemployment tax paid. Therefore, the effective tax rate is 0.6% (6.0% less 5.4%).

Disability insurance
The Puerto Rico Department of Labor and Human Resources Bureau of Employment Security also administers the disability insurance program. This program is funded principally through the imposition of a tax, in equal amounts, on the employer and employee.

A contributory tax of 0.6% is imposed on the first USD 9,000 of the total wages paid in the year. From the total tax, half (0.3%) is paid by the employer and the other half by the employee.

Employers may establish private insurance plans if approved by the Puerto Rico Department of Labor and Human Resources.

Workmen’s Accident Compensation Insurance
The Workmen’s Accident Compensation Insurance Act (WACA) establishes a compulsory insurance program that covers employees who suffer injury, become disabled, or lose their lives due to a job related accident. The insurance premium is based on total wages paid during the government’s fiscal year, which runs from 1 July to 30 June. The actual rates vary among industry types. The employer is solely responsible for payment of the assessed premium.

Chauffeurs’ Social Security
Every employer having one or more drivers is subject to Chauffeurs’ Social Security tax. It also applies to an employer whose employees are usually or regularly required or allowed to operate a motor vehicle as an inherent part of their work.

The tax is imposed on both the employer and the employee as follows:

- Every employer must pay USD 0.30 per week or fraction thereof for each covered employee.
- Every employee must pay USD 0.50 per week or fraction thereof.

Municipal license tax
Every corporation is required to file an annual volume-of-business declaration with each of the municipalities in which it establishes or conducts business operations during the year. The declaration must indicate the actual volume of business (i.e. net sales, gross income from any service rendered, and other gross receipts) attributable to each municipality. When a business operates in more than one municipality but does not receive income in all of them, the license tax shall be computed based on a distribution of sales apportioned to each municipality by square feet of the building used in each municipality.
For a non-financial business, the license tax payment varies from a minimum of 0.20% to a maximum of 0.50%, depending on each municipality. The payment must be made in two equal instalments on or before 15 July and 15 January on the basis of the volume of business generated by the entity during its accounting year ended within the immediately preceding calendar year before the due date of the declaration. A 5% discount is available when the tax is fully paid on the declaration due date (on or before five working days after 15 April of each year).

For the first six months after a new business is established, the new company is generally exempt from the municipal license tax, provided that the business informs the municipality that it has established a new business in the municipality within the first 30 days of operations and requests the provisional license tax as established in each municipality. A copy of the municipal licence is generally requested as a prerequisite for obtaining other licences and permits in Puerto Rico.

**Branch income**

Corporations operating in Puerto Rico as a branch may be subject to a 10% tax on the dividend equivalent amount (commonly known as the branch profit tax or BPT). The BPT should be determined and paid along with the CIT return. There will not be an income tax withholding at source at the time cash transfers are made by the Puerto Rico branch to its home office outside of Puerto Rico.

**Income determination**

The gross income of a corporation generally includes business income, profits from the sale of property, interest, dividends, and income derived from any source, unless specifically exempted by law.

A corporation's net income is generally calculated in accordance with the method used for financial statement purposes, except for various items of income and expenses, which are treated differently. For example, the cash method of accounting may not be used by a corporation with inventory or with an average annual gross income in excess of USD 1 million. Long-term contract methods and the instalment method can be used for regular tax calculations.

**Inventory valuation**

In general, inventory is valued at the lower of cost or market. Retail merchants can use the retail method of accounting.

**Capital gains**

Tax-advantaged treatment is provided for net long-term gains (holding period of more than one year) from the sale of capital assets. For corporations, net long-term capital gains, reduced by any short-term capital losses, are subject to an alternative (preferential) tax of 20% in lieu of the regular CIT rates.

**Dividend income**

Dividends from a corporation that derives 20% or more of its profits from sources within Puerto Rico are taxable in Puerto Rico. However, a dividends-received deduction may apply.

**Dividends-received deduction**

All corporations engaged in trade or business in Puerto Rico are entitled to an 85% deduction on dividends received from a domestic corporation but not in excess of 85% of the net income of the corporation. A 100% dividends-received deduction applies for
dividends received from taxable controlled domestic corporations (if ownership in a corporation is 80% or more).

**Interest income**
Interest income is generally taxable, except interest from obligations of the federal government or any state, territory, or political subdivisions; the District of Columbia; and the Commonwealth of Puerto Rico or any of its instrumentalities or political subdivisions.

**Royalty income**
Royalties from property located in Puerto Rico or from any interest in such property are included in gross income.

**Partnership income**
The income (loss) of a partnership passes through to its partners so that the partnership itself is not subject to tax. Thus, each partner generally accounts for their distributive share of the partnership's taxable income (loss).

**Other income**
Service fees are generally taxable as ordinary income.

**Foreign income**
Generally, a Puerto Rico domestic corporation is taxed on its worldwide income, including foreign income earned and foreign dividends when received. Double taxation is avoided by means of foreign tax credit or deduction. In the case of resident foreign corporations, these are only taxed on their Puerto Rico-source income and on their effectively connected Puerto Rico income (i.e. foreign income won’t be taxable for Puerto Rico purposes).

---

**Deductions**
All ordinary and necessary expenses paid or incurred during the taxable year in carrying on any trade or business are deductible by corporations operating in Puerto Rico.

**Depreciation**
A reasonable depreciation allowance is deductible for the exhaustion, wear and tear, and obsolescence of property used in business. The most common depreciation method used by corporations is the straight-line method. Nevertheless, any other consistent method may be used in lieu of the straight-line method as long as it is in accordance with the recognised trade practice. In addition, a corporation (other than one that is exempt under an Industrial Incentives Act) can elect an accelerated depreciation method for new or used tangible property acquired by purchase in taxable years commencing after 30 June 1995.

For property acquired after 31 December 2009, when using the straight-line depreciation method, the useful life has to be determined based on the same rules of accelerated depreciation.

For intangibles (other than goodwill) acquired or created after 1 September 2010, the deduction is calculated using the straight-line method over the lower of a useful life of 15 years or the intangible’s useful life.

**Goodwill**
The cost of goodwill is generally capitalised and amortised ratably over 15 years.

**Start-up expenses**
Generally, start-up expenditures may be deducted in the tax year in which the trade or business begins or they may be ratably amortised over five years.

**Interest expenses**
In general, interest expense is deductible without limitation. However, interest expenses related to exempt income are not deductible. If interest is paid to a non-Puerto Rico resident related party, a 29% withholding at source applies. If the 29% withholding is not withheld, no deduction is available.

**Bad debt**
Bad debt resulting from a trade or business may be deducted in the year the debt becomes worthless (i.e. uncollectible). The reserve method is not admissible for Puerto Rico purposes.

**Charitable contributions**
Deductions for allowed charitable contributions are limited to 10% of net income, computed regardless of the contributions.

**Rent expense**
Corporations are entitled to a rent expense deduction if the rented property is used in the business.

**Employee remuneration**
Corporations may deduct payments of reasonable salaries or other compensation for services actually rendered.

**Insurance premiums**
Insurance premiums paid or accrued on risks related to a trade or business are deductible, as well as premiums on group life policies covering employees where the beneficiary is not the corporation. No deduction is allowed for premiums paid to an insurance company not authorised to provide insurance in Puerto Rico or through an agent or broker not authorised to operate in Puerto Rico.

**Meals and entertainment**
Meals and entertainment expenses are deductible, subject to a 50% limitation. Travelling expenses are fully deductible if the trip is for business purposes.

**Automobiles expenses**
A corporation is allowed to depreciate non-cargo automobiles used in a trade or business over a five year useful life (three years in the case of sales persons) up to a maximum base of USD 30,000 for a maximum annual depreciation of USD 6,000.
On the other hand, for non-cargo automobile maintenance expenses (e.g. gas, repairs, insurance), a deduction based on USD 0.60 per mileage is allowed.

**Fines and penalties**
Penalty payments, such as with respect to Commonwealth taxes, whether on account of negligence, delinquency, or fraud, are not deductible from gross income.

**Taxes**
A corporation is allowed a deduction for taxes paid (except for Puerto Rico CIT), including income tax paid to the United States, its other possessions, and any foreign country. The deduction is in lieu of claiming a foreign tax credit.

**Other significant items**
The cost of incidental repairs (not adding value to the property) is deductible as a business expense.

Subject to certain limitations, savings and retirement plans for the benefit of employees are deductible if qualified by the Secretary of the Treasury.

**Net operating losses (NOLs)**
All corporations are generally entitled to the NOL deduction in computing their tax. NOLs created from taxable years beginning prior to 31 December 2012 (and after 31 December 2004) may be carried forward for 12 taxable years (there are no carryback provisions). For taxable years beginning after 31 December 2012, the NOL carryforward period is ten years. The use of the NOL deduction is limited to 80% of the taxable income for the year. The NOL to be carried forward should exclude the deductible portion of the expenses or payments to foreign affiliates.

Also, losses from sales or exchanges of capital assets are allowed only to the extent of gains from such sales or exchanges. The carryforward period in this instance, however, is seven years. The use of capital losses is limited to 80% of the capital gains for the taxable year.

**Payments to foreign affiliates**
51% of expenses attributable to payments made to a related party that is not engaged in a trade or business in Puerto Rico or to the home office located outside of Puerto Rico (i.e. foreign affiliate) will not be deductible for purposes of computing the net taxable income, as long as these payments are not subject to income taxes in Puerto Rico.

The Secretary of the Treasury has the authority to grant a 100% deduction for the expenses paid or incurred with related parties not engaged in a trade or business in Puerto Rico via the waiver mechanism. However, the deduction is limited to 60% of the expenses that qualify for the waiver.

Expenses paid or incurred with related parties not engaged in a trade or business in Puerto Rico for which a waiver from the Secretary of the Treasury is not obtained do not generate NOL carryforward (i.e. the expenses are added back to the NOL). In other words, the non-disallowed portion of the payments to foreign affiliates/branches will not be allowed if this particular portion causes a NOL.

**Group taxation**
Puerto Rico does not have group taxation rules. In other words, corporations cannot file a consolidated return for Puerto Rico CIT purposes.

**Transfer pricing**
There are no specific transfer pricing rules in Puerto Rico.
**Thin capitalisation**
There are no specific thin capitalisation rules in Puerto Rico.

**Controlled foreign companies (CFCs)**
There are no specific CFC rules in Puerto Rico.

---

**Tax credits and incentives**

A corporation engaged in specific eligible activities may apply for a reduced CIT rate, among other incentives, through the request of a Tax Exemption Grant to the Puerto Rico Office of Industrial Tax Exemption (OITE) under Act No. 73 of 28 May 2008 (Act No. 73).

A corporation engaged in eligible activities related to the exportation of services may apply for a reduced CIT rate, among other incentives, through the request of a Tax Exemption Grant to OITE under Act No. 20 of 17 January 2012 (Act No. 20), instead of through Act No. 73.

**Tax rate incentives**

**Under Act No. 73**

Exempt entities may elect one of the following two scenarios:

- General scenario: 4% CIT rate with a WHT rate on royalty payments of 12%. Under this scenario, the amount of WHT on the royalty payments is creditable against the 4% CIT.
- Alternate scenario: 8% CIT rate with a WHT rate on royalty payments of 2%. Under this scenario, the WHT on royalty payments is creditable against the 8% CIT.

Companies may elect one of these scenarios at the time of applying for the benefits under the Act. However, there are other possibilities:

- 4% fixed income tax rate on Incentive Development Income (IDI), excluding income from certain investments provided by Section 2(j).
- Pioneer industries are eligible for a 1% CIT rate.
- Activities for the development in Puerto Rico of intangible property are eligible for a 0% CIT rate.
- Any exempt business having operations at a municipality located in a ‘low or intermediate development zone’ may reduce its CIT rate by an additional 5%.
- Any exempt business having operations in Vieques and Culebra may be totally exempt from income taxes during the first ten years of operations as established in the Act. The remaining years covered by its tax decree may qualify for a 2% CIT rate.

**Under Act No. 20**

- 4% CIT on export services income or
- 3% CIT when more than 90% of the eligible business's gross income is derived from export services and such services are considered strategic services, according to the criteria established in Act No. 20.

**Special deductions**

Special deductions under Act No. 73 are available for capital investment in buildings, structure, machinery and equipment, and the NOL carryforwards.

There are no special deductions allowed under Act No. 20.
**Credits**

The following credits are only available under Act No. 73. Please note that no credits are allowed under Act No. 20.

**Credit for purchases of Puerto Rico manufactured product**

Subject to certain limitations, the credit for purchases of products manufactured in Puerto Rico is 25% (35% in the case of recycled products).

**Job creation credit**

There is a credit for every incremental job applicable to exempt business starting operations after 1 July 2008. The amount of the credit (maximum of USD 5,000 per each employment) depends upon the location of the industrial development zone.

**Research and development (R&D) investment credit**

A 50% credit is granted for the eligible investment in R&D activities, including operational expenditures, clinical trials, infrastructure, renewable energy, or intellectual property (IP).

Act No. 22 amends Act No. 73 in order to provide that existing business that hold a tax grant under Act No. 73 will not be allowed to claim R&D credits against an electric energy, water, and/or sewer services bill, unless the PRTD certifies the availability of the credit.

**Energy investment credit**

A 50% credit is granted for the eligible investment in the acquisition of machinery and equipment for the creation of energy.

**Energy cost credit**

There is also a 3% credit (which could be increased up to 10% if certain employment requirements are met) for payments made to the Puerto Rico Power Authority during the corresponding taxable year. This credit is available for a ten-year period starting as of 1 July 2008. Additional credits (for the purpose of reducing the cost of energy) may be available to industrial units, subject to certain limitations. Act No. 22 of 2016 eliminates the energy credits to new applicants for tax grants under Act No. 73.

**Technology transfer credit**

A 12% credit (2% in the case of exempt businesses that opted for the alternate tax) is available for payments made to resident entities for the use or privilege of using intangible property in Puerto Rico.

**Strategic projects investment credit**

There is a 50% credit for eligible investment in strategic projects, including activities for the design, development, and construction of dams.

**Industrial investment credit**

There is a 50% credit, up to a maximum of USD 8 million, for cash invested in the purchase of 50% or more of the stock or operating assets of an exempt business that is in the process of shutting down operations, amounts used to start-up a small or medium-exempt business, or amounts used for a substantial expansion of an exempt business.

**Property tax incentives**

Similar to the previous incentives laws, Act No. 73 allows for a 90% property tax exemption on personal and real property. However, Act No. 73 introduced a methodology for the classification and assessment of real property owned by the exempt businesses. Under the provisions of Act No. 73, a taxpayer can self-assess one’s real property tax responsibility (similar to the current personal property tax system) and remit the related tax liability due along with a real property tax return (to be issued by the MRCC) by 15 May of each year. The self-appraisal method is only applicable to real
Puerto Rico

property that has not been appraised by the MRCC and is mainly limited to machinery and equipment classified as real property. Note that this method is not available for assets such as land, buildings, and building equipment.

For purposes of Act No. 20, there is a 100% exemption from property taxes during the first five years of operations in the case of eligible services as call centres, management services, and shared services. After said five year period, a 90% exemption will apply during the term remaining under the Tax Exemption Grant.

**Municipal license tax and other municipal tax incentives**
Under Act No. 73, the municipal license tax exemption continues at 60% for exempted businesses. Exempt businesses operating in Vieques or Culebra are 90% exempt; small or medium-exempt businesses are 75% exempt; and central or regional corporate headquarters providing managerial services to affiliated companies are 100% exempt during the first five years after becoming eligible for the exemption.

There are no municipal tax exemptions under Act No. 20.

**Foreign tax credit**
Generally, in any year, a taxpayer can choose whether to take as a credit (subject to limitation) or as a deduction the foreign income and excess profit taxes paid or accrued during the taxable year to any foreign country. A foreign tax credit reduces the Puerto Rico income tax liability dollar for dollar, while a deduction reduces the Puerto Rico income tax liability at the marginal rate of the taxpayer. There are no carryforward provisions for foreign tax credit purposes.

**Withholding taxes**
Corporations not engaged in a trade or business in Puerto Rico are subject to a 29% WHT at source on certain gross income items (considered fixed or determinable, annual or periodical [FDAP]) from Puerto Rico sources.

FDAP income may include interest received from a related person, rents, royalties, salaries, annuities, compensation, remuneration, and net capital gains. However, if the payment received is from dividends, a 10% WHT should apply.

The payer, as a withholding agent, is responsible for the withholding and remittance of the 29% (10% in the case of dividends) to the PRTD. Such tax is due on or before the 15th day of the month following the receipt of the income by the non-resident corporation. An annual informative return is also required to be filed no later than 15 April of the following year.

**Tax treaties**
There are no tax treaties between foreign countries and Puerto Rico. However, the Puerto Rico Supreme Court has recognised that, although Puerto Rico is generally not a signatory party to a treaty entered into by the United States, if an international treaty with the United States does not explicitly exclude Puerto Rico, the treaty will be applicable to Puerto Rico.

**Tax administration**

**Taxable period**
The annual accounting period may be on the basis of the calendar year, a fiscal year ending on the last day of a month, or a 52/53 week year.
Puerto Rico

**Tax returns**
The Puerto Rico tax system is based on the principle of self-assessment. A corporate taxpayer is required to file an annual income tax return by the 15th day of the fourth month following the close of its tax year. In general terms, a taxpayer can obtain an automatic extension of three months to file its income tax return. Failure to timely file can result in penalties.

A corporate taxpayer may also be subject to file a personal property tax return by 15 May and/or a volume of business declaration by the 5th business day after 15 April.

**Payment of tax**
A corporation must substantially satisfy its annual income tax liability, if any, through estimated income tax payments. The amount of estimated income taxes should be paid on equal instalments on the 15th day of the fourth, sixth, ninth, and 12th month of the taxable year of the corporation. The estimated payments should equal or exceed 90% of the actual tax for the year (including AMT) or, in cases where a CIT return was filed by the corporation in the preceding year, 100% of such tax liability. Any tax not covered by the estimated tax payments should be paid along with the CIT return. Failure to pay the tax by the due dates indicated above may result in a penalty of 10% of the instalment due.

**Annual report**
Every corporation is required to file an annual corporation report with the Puerto Rico Department of State. This annual report must be filed by the 15th day of April along with a USD 150 annual fee and a balance sheet as of the close of operations of the prior year. The report should be filed through the Puerto Rico Department of State’s website. In the case of for-profit corporations, if the volume of business exceeds USD 3 million, the annual report must be accompanied by a balance sheet certified by a certified public accountant (CPA) licensed in Puerto Rico. In the event that the volume of business does not exceed USD 3 million, a balance sheet prepared under Generally Accepted Accounting Principles (GAAP) by a person with a general knowledge in accounting has to be submitted along with the corporate annual report. An extension of 60 days (an additional 30-day period may be requested) for filing the annual report can be obtained if timely requested. The Secretary of State is authorised to impose a penalty for failure to timely or accurately file the annual corporate report that would be between USD 75 and USD 2,000 if a non-profit corporation, and between USD 750 and USD 2,000 if a for-profit corporation.

**Audited financial statements**
Accounting records must be prepared in accordance with the GAAP followed in the United States. Domestic (i.e. incorporated in Puerto Rico) or foreign corporations with volume of business of more than USD 3 million must include, with their CIT return, audited financial statements of the Puerto Rico operations for the accounting year ended on or before the preceding 31 December. The financial statements should be submitted with an audit report issued by a CPA licensed in Puerto Rico.

Also, qualified and disclaimer opinions are now allowed to the extent that the qualification or disclaimer does not result from a restriction in scope. However, no adverse opinions are allowed. All groups of related entities engaged in a trade or business in Puerto Rico are required to file consolidated or combined financial statements (CFS), which should contain a consolidating schedule and general information of the related parties. The determination of the gross income threshold for purposes of the audited financial statement requirement should be made taking into consideration the volume of business of all the entities within a controlled group. In the case of foreign entities, these will be able to submit audited financial statements with their Puerto Rico operations on a stand-alone basis; in other words, the CFS will not be required. The requirement for audited financial statements will not apply to non-profit organisations.
Puerto Rico

With respect to the municipal license and personal property tax filings, the threshold amount for the audited financial statements requirement is gross revenues of more than USD 3 million, regardless of the corporate residency (i.e. foreign or domestic).

Supplemental information is also required to be included as part of the audited financial statements to be filed with the income tax return, volume of business declaration, and personal property tax return. The due date for the supplemental information is the last day of the month following the CIT due date, including extensions (i.e. 31 August 2016). The supplemental information must be submitted electronically and separately from the audited financial statements.

**Tax audit process**
Many taxpayers are under audit by the PRTD. The audits may include income, payroll, withholding, and sales and use taxes.

**Statute of limitations**
The PRTD generally has four years after an original return is filed to assess income, payroll, and sales and use taxes. A return will be deemed to have been filed on the later of (i) its due date or (ii) the date the return was actually filed.

**Topics of focus for tax authorities**
Currently, the PRTD is focused on SUT, intercompany loans, withholding at source, and payments to foreign affiliates, among others.
Significant developments

Implementation of a value-added tax (VAT) by 2018/19
Currently, there is no VAT or sales tax in Qatar or other Gulf Cooperation Council (GCC) countries. The GCC plans to introduce a VAT common framework, which will form the legal basis for the introduction of a VAT system in each of the GCC member states (Bahrain, Kuwait, Oman, Qatar, Saudi Arabia, and the United Arab Emirates [UAE]). Certain GCC member states (including Kuwait, Oman, and the UAE) have announced that VAT will be implemented by 1 January 2018. Other member states, including Qatar, are expected to make similar announcements shortly. The anticipated VAT rate across the GCC may be between 3% and 5%.

Wage protection system
Qatar recently introduced a wage protection system (WPS) requiring all salaries of employees of a Qatar branch or company in the State of Qatar to be paid into an employee bank account in Qatar and various details on each employee to be provided. This information may be used to cross reference to Minister of Labour records of registered employees and possibly to wages and salaries cost in financial statements.

Taxation of non-resident capital gains
Following a change in approach by the Qatar tax authorities, certain practical barriers to non-residents filing tax returns have been overcome. In particular, the historic requirement that in order to file a Qatar tax return a company must have a Qatar tax card (which is not possible where the non-resident does not have either a formal legal presence [i.e. a Commercial Registration] or is registered as a permanent establishment [PE] with the Qatar tax authorities) has been removed. As the practical barriers to non-residents in respect of filing a tax return have been removed, it may be necessary for non-residents to consider whether they have realised Qatar-sourced income and thus are required to file Qatar tax returns and pay the tax due. This may be of particular relevance to non-residents selling shares in a Qatar company as one must receive a no objection letter from the tax authorities or have the exchange officially stamped in order to register the change in share ownership.

Introduction of electronic tax administration
Any correspondence (e.g. tax returns, withholding tax [WHT] statements, extension requests, tax card applications, objections, appeals) should be submitted to the tax department through the new electronic filing system. However, hard copies had to be filed in addition to the online submission until April 2016. From 1 April 2016, taxpayers are required to file certain documents (application for tax registration and tax cards/ renewal of tax cards, submission of tax returns and audited financial statements, submission of monthly WHT statements, application for WHT refunds, application for approval in respect of sale/transfer of shares) only via the online tax administration system.

The Qatar Financial Centre (QFC) has also now introduced online filing. This was initially not mandatory; however, from 1 January 2016, all tax returns must be
submitted online using the QFC Tax Portal. From this date, the QFC tax department does not accept hard-copy tax returns or tax returns submitted via email.

**New Commercial Companies Law**
According to the new Commercial Companies Law, which became effective on 7 August 2015, a number of significant changes to company corporate guidance have been introduced. In particular, the law established a minimum share capital of 200,000 riyals (QAR) for limited liability companies (LLCs), renewed a standard version of the Memorandum of Association and licence application forms, and introduced new fines and penalties amounting to a maximum of QAR 1 million. Entities that are subject to the new rules had to ensure that they were compliant with them before 7 February 2016.

---

**Taxes on corporate income**
An entity that is wholly or partially foreign owned and that derives income from sources in Qatar is taxable in Qatar. In the case of a joint venture, the tax liability of the joint venture is dependent upon the foreign partners’ share of the joint venture’s profit. Currently, no corporate income tax (CIT) is levied on a corporate entity that is wholly owned by Qatari nationals and GCC nationals.

Unless specifically exempt from tax, an entity will be taxable in Qatar if it has generated Qatar-source income, regardless of the place of its incorporation.

Taxable income generally is subject to a flat (CIT) rate of 10%, with certain exceptions available.

The following tax rates apply in the specific circumstances noted:

- If a special agreement was reached with the government of Qatar prior to 1 January 2010, the rate specified in the agreement continues to apply. If no rate is specified in the agreement, a rate of 35% will be used.
- The rate applied with respect to oil operations, as defined in Law No. 3 of 2007, may not be less than 35%.
- Payments made to non-residents with respect to certain service activities not connected with a PE in Qatar are subject to WHTs (see the Withholding taxes section).

The amount of tax payable is reduced for companies that are partly foreign owned, depending on the extent of local ownership.

**Local income taxes**
There are no local, state, or provincial government taxes on income in Qatar.

---

**Corporate residence**
It is important to recognise that residence is not the basis used to determine whether an entity is taxable for CIT purposes in Qatar. Accordingly, a CIT exposure in Qatar may arise even if a company is not resident in Qatar. However, residence is relevant when considering whether WHT will apply on payments received rather than CIT.

A company is resident in Qatar if it is incorporated in accordance with Qatari laws, its head office is situated in Qatar, or its place of effective management and control is in Qatar.

**Permanent establishment (PE)**
A PE is defined as a fixed place of business through which the business of a taxpayer is wholly or partly carried on. A PE is deemed to include a branch, office, factory,
workshop, mine, oil or gas well, quarry, a building site, an assembly project, or a place of exploration, extraction, or exploitation of natural resources. A PE also includes activity carried on by the taxpayer through a person acting on behalf of the taxpayer or in the taxpayer's interest, other than an agent of an independent status.

To date, the Qatar tax department has permitted a PE to register for tax purposes and file an annual tax return. However, if a PE is not registered in the commercial register, it is in contravention of the Foreign Investment Law. Following introduction of the tax administration system (TAS), the risk may increase of the Qatar tax department querying why the PE has not registered in the commercial register as the commercial registration number is ordinarily required as part of the online filing process.

Other taxes

Value-added tax (VAT)
Currently, Qatar imposes no VAT or sales tax on operations in Qatar. However, the introduction of VAT in the GCC under a common framework is expected by 2018/19. The anticipated tax rate may be between 3% and 5%.

Customs duties
Customs duties are applied to goods with an origin outside the GCC countries, normally at a rate of 5%. Higher rates sometimes apply for specific types of goods, such as tobacco products. Temporary import exemptions are sometimes available.

Excise taxes
There are no excise taxes in Qatar.

Property taxes
There are no property taxes in Qatar. However, fees may be payable to the government by the owner on the registration of property and by the landlord on the registration of leases.

Transfer taxes
There are no transfer taxes in Qatar; however, share transfers of state entities require formal confirmation of 'No Objection' from the tax authorities prior to the transfer being updated in the commercial register.

Stamp taxes
There are no stamp taxes in Qatar.

Social security contributions
Employers have to pay social insurance in respect of Qatari employees but have no obligations for employees of other nationalities.

Branch income
The profits of a branch owned by a foreign parent entity are subject to the same tax rules as apply to other forms of taxable entities.

Income determination
CIT is levied on a company’s Qatar-source income. Some examples of Qatar-source income include:
Qatar

- Income derived from an activity carried on in Qatar.
- Income derived from contracts wholly or partially performed in Qatar.
- Income from real estate situated in Qatar, including income from the sale of shares of companies with assets consisting of mainly real estate situated in Qatar.
- Income from shares in companies resident in Qatar.

**Inventory valuation**
Inventory must be valued in accordance with International Financial Reporting Standards (IFRS).

**Capital gains**
Any chargeable gains on the sale of capital assets are taxed as ordinary income. Specific rules exist in respect of gains realised on the disposal of real estate. Capital gains generated by a non-resident on the sale of shares in a Qatar company are an area of focus for the tax authorities (see the Significant developments section).

**Dividend income**
Dividends are not taxable in Qatar if received from profits that have been subject to Qatar tax or from companies that are exempt from Qatar tax.

**Interest income**
Interest arising in Qatar and bank interest realised outside Qatar, if it results from the taxpayer’s activity in Qatar, are taxed as ordinary income.

**Foreign income**
Non-Qatar-sourced income is not subject to tax in Qatar.

**Deductions**
Taxable income is determined after deducting all expenditures, costs, and losses incurred to generate gross income. A deduction is usually available for expenses that are not considered to be ‘capital’ in nature and are incurred in generating Qatar-source revenue.

**Depreciation**
Depreciation should be calculated in accordance with rates specified by the Qatar tax law and the related regulations. In practice, however, the deduction for depreciation is restricted to the amount of the accounting depreciation.

For certain assets, depreciation is calculated on the cost on a straight-line basis. The rates of depreciation are as follows:

<table>
<thead>
<tr>
<th>Assets</th>
<th>Depreciation rate (% per annum)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Buildings and constructions, including roads, bridges, pipelines, storage tanks, and port ducts inside the establishment and excluding ready-made light constructions</td>
<td>5</td>

</tr>
<tr>
<td>Intangible assets: Pre-establishment expenses</td>
<td>50</td>
</tr>
<tr>
<td>Trademarks, patents, and the like</td>
<td>Amortised over the expected lifetime of the asset, provided that the amortisation allowance shall not exceed 15% per annum.</td>
</tr>
</tbody>
</table>

1728 Qatar  PwC Worldwide Tax Summaries
Other assets will be divided into groups and depreciated on a reducing-balance basis. The rates of depreciation are as follows:

<table>
<thead>
<tr>
<th>Group</th>
<th>Asset</th>
<th>Depreciation rate (% per annum)</th>
</tr>
</thead>
<tbody>
<tr>
<td>I</td>
<td>Computer hardware and software accessories</td>
<td>33.33</td>
</tr>

<td>20</td>
</tr>
<tr>
<td>III</td>
<td>Furniture, fixtures and fittings, and other fixed assets</td>
<td>15</td>
</tr>
</tbody>
</table>

**Goodwill**
There are no specific provisions dealing with the taxation of goodwill. Accordingly, the accounting tax treatment should be followed from a tax perspective.

**Interest expenses**
Interest on loans used for the purpose of the taxpayer’s activity is tax deductible, except where the loan is between a Qatar branch and its head office or a party related to the head office.

**Bad debt**
Bad debts approved by the tax authorities in accordance with the criteria set out in the tax law are deductible.

**Charitable contributions**
Donations, gift aid, and subscriptions to charitable, humanitarian, scientific, cultural, or sporting activities paid in Qatar to government authorities or public bodies are deductible, provided the value does not exceed 5% of net profit in the year in which the deduction is claimed.

**Fines and penalties**
Fines and penalties are not deductible for Qatar tax purposes.

**Taxes**
Taxes and duties, other than the income tax, provided for in the law are deductible.

**Other significant items**
Other deductible expenditures include the following:

- Employee costs (including salaries, wages, gratuities, and other end of service benefits).
- Losses resulting from the sale of assets.
- Rents.
- Insurance premiums.

**Net operating losses**
Losses may be deducted from net income during the year. Losses can be carried forward for three years after the year in which they were incurred. Losses cannot be carried back.

**Allocations of overhead costs to branches**
The branch’s share of head office expenses (i.e. indirect or allocated overhead) generally is deductible only up to a certain limit. The deduction is capped at 3% (1% for banks) of the total revenue less certain other costs.
Group taxation

There is no definition of a ‘group’ for Qatar tax purposes; consequently, there is no concept of group taxation.

Transfer pricing

The executive regulations, which supplement Qatar’s tax law, have made it clear that the anti-avoidance provision will be applied to related-party transactions. In determining the arm’s-length value, the unrelated comparable price method should be used (i.e. the price of services or goods that would have been applied should the transaction be between unrelated parties). It is possible to make an application to the Qatar tax authorities to use another method approved by the Organisation for Economic Co-operation and Development (OECD).

Thin capitalisation

There are no specific thin capitalisation rules in Qatar, although consideration should be given to the anti-avoidance provision noted above.

Controlled foreign companies (CFCs)

There are no CFC provisions in Qatar.

Tax credits and incentives

Foreign tax credit

The executive regulations of Qatar’s tax law provide that income tax paid outside Qatar is deductible as an expense for the purposes of determining taxable income, provided such income is taxable in Qatar.

Qatar Science and Technology Park (QSTP)

Qatar has established the QSTP, which is aimed at entities with research and development (R&D) activities. QSTP entities can be fully exempt from Qatar tax; however, tax exempt entities are required to file tax returns.

Other tax exemptions

An application for a tax exemption may be made for certain projects that are considered to be strategically significant to the Qatar economy. The exemptions are generally granted for a period of three or six years. Applications for an exemption are assessed based on certain criteria set out in the Qatar tax law.

Notwithstanding the fact that an exemption is granted, an entity that is exempt is still required to file a tax return under the Qatar tax law.

Withholding taxes

WHT is levied on certain payments made to non-residents in relation to royalties and technical services (the applicable rate is 5%) and on interest, commissions, brokerage fees, directors’ fees, attendance fees, and any other payments for services carried out wholly or partly in Qatar (the applicable rate is 7%). The executive regulations have excluded certain payments from the scope of WHT. Dividends are not subject to WHT.

The company that makes the payment to its foreign supplier is required to withhold the tax and remit to the tax department the funds that were withheld by the 16th day of the following month. In the event that the company does not make a payment to the tax department, the company will be liable for a penalty equal to the amount of unpaid tax due, in addition to the WHT.
Retention system

Pursuant to circulars issued by the tax department, a retention system is in place whereby certain final contract amounts are required to be retained from payments made to Qatari resident entities and non-resident entities with a PE in Qatar in connection with services performed in Qatar. All ministries; government departments; public, semi-public, and private establishments; and Qatar taxpayers are required to retain. Companies resident in Qatar and permanent branches can secure a release of the final payment by presenting a tax card. A retention equivalent to the higher of 3% of the contract value (less the value of supply and work carried out abroad) or the final contractual payment will apply to temporary branches registered for activities of at least one year until they produce a no objection letter from the Qatar tax authorities. All other non-residents are expected to be subject to WHT in respect of payments that fall within the scope of WHT.

Tax treaties

Qatar has a growing double taxation treaty (DTT) network with over 60 DTTs currently in force. The WHT rates under these treaties in respect of dividends, interest, and royalties are as follows:

<table>
<thead>
<tr>
<th>Recipient</th>
<th>WHT (%)</th>

* Dividends are not subject to WHT according to domestic tax law of Qatar.

Notes

1. 5% if capital exceeds 100,000 United States dollars (USD), and 10% in all other cases.
2. 0% if the beneficial owner is a company that owns at least 10%, 5% if 10% direct participation is held by an individual who has resided in the relevant state for a period of at least 48 months, and 10% in all other cases.
3. 5% if the beneficial owner is a company that has owned, directly or indirectly, at least 25%, and 10% if participation is less than 25%.
4. 5% if the beneficial owner is a company that owns at least 10%, and 10% in all other cases (i.e. less than 10% shareholding).
5. 5% if the beneficial owner is a company that owns at least 7.5%, and 10% in all other cases (i.e. less than 7.5% shareholding).
6. 5% if the beneficial owner is a company that owns at least 10%, and 15% in all other cases (i.e. less than 10% shareholding).
7. 5% if the beneficial owner is a company that directly holds at least 10%, 10% if the beneficial owner is an individual that directly holds at least 10%, and 15% in all other cases.
8. 10% if the beneficial owner is a company that has owned at least 25%, and 15% in all other cases (i.e. less than 25% shareholding).
9. 0% where the beneficial owner of the interest carries on business in the other contracting state where the interest arises (i.e. through a PE therein), and 5% if the contracting company does not have a PE.
10. 0% if interest arising in contracting state is derived from government debt, and 10% if the contracting company does not have a PE.
11. It should be noted that there is limited information available in respect of the treaty with this country, and the date provided above may be the date on which the treaty was signed or entered into force rather than its effective date.
12. Reduced to zero if the beneficial owner has a PE in the contracting state.
13. 0% if the beneficial owner is a company, and 5% in all other cases.
14. 5% if the beneficial owner is a bank, and 10% in all other cases.
15. 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that directly holds at least 20% of the capital of the company paying the dividends. 7.5% in all other cases.
16. 0% if the interest derived from a contracting state and paid for the government or the central bank in the other state. 10% in all other cases.
17. 5% of the gross amount of the dividends if the beneficial owner is a company that holds, directly or indirectly, at least 50% of the capital of the company paying the dividends or has invested more than USD 10 million in the capital of the company paying the dividends. 12.5% in all other cases.
18. 5% of the gross amount of the royalties in respect of payments of any kind received as a consideration for the use of, or the right to use, any patent, design or model, plan, secret formula or process, or for the use of, or the right to use, industrial, commercial, or scientific equipment, or for information concerning industrial, commercial, or scientific experience. 10% in all other cases.
19. 5% if the beneficial owner is a company (other than a partnership) that directly holds at least 10% of the capital of the company paying the dividends.
20. 0% if the interest is derived from government debt or arises in respect of any debt instrument listed on a recognised stock exchange. 10% in all other cases.
21. 5% if the beneficial owner is a company that has owned, directly or indirectly, for the period of six months ending on the date on which entitlement to the dividends is determined, at least 10% of the voting power or of the total issued shares of the company paying the dividends, and if the company paying the dividends is not entitled to a tax deduction of dividends. 10% in all other cases.
22. 0% if interest is derived from government debt or if the beneficial owner is either: (i) a bank, (ii) an insurance company, (iii) a securities dealer, or (iv) any other enterprise, provided that, in the three taxable years preceding the taxable year in which the interest is paid, the enterprise derives more than 50% of its liabilities from the issuance of bonds in the financial markets or from taking deposits at interest and more than 50% of the assets of the enterprise consist of debt-claims against persons that are not associated with the enterprise. 10% in all other cases.
23. 10% if the beneficial owner is a company (excluding partnerships) that directly holds at least 10% of the capital of the paying company. 15% in all other cases.
24. 0% if dividends are paid to the other contracting state. 5% if the beneficial owner is a company (other than a partnership) that holds at least 10% of the capital of the company paying the dividends. 10% in all other cases.

---

**Tax administration**

**Taxable period**
The tax year is generally the same as the calendar year, although advance approval may be sought from the Qatar tax authorities to use a company's accounting year-end.

**Tax returns**
The tax return is due within four months from the end of a company's accounting period.

**Payment of tax**
The tax payable is based on the tax declaration and should be paid on the same day that the tax return is due.

**Late filing penalties**
The Qatar tax law contains a penalty regime, which imposes a penalty for the late filing of a tax return. In addition, a penalty applies where there is a late payment of tax.

**Objection and appeals process**
It is possible for a taxpayer to initially object directly to the tax department regarding a decision related to a tax position. If the objection is unsuccessful with respect to altering the tax department's decision, an appeal may be made by the taxpayer to the Tax Appeals Committee. Based on the Tax Appeals Committee's decision with respect to the appeal, a final appeal may be made by either the tax department or the taxpayer to the administrative chamber of the court. The law prescribes time limits for each stage of the appeal process.

**Accounting and audit requirements**
A company's CIT return is required to be accompanied by audited financial statements if the company's capital or profit exceeds QAR 100,000 or the head office is situated outside Qatar. The audit report must be signed by a Qatar registered auditor.

Qatar tax law requires accounts to be prepared in accordance with IFRS.
Accounting record retention
All accounting books, registers, and documents relating to activity in Qatar are required to be retained in Qatar for a ten-year period.

Anti-avoidance provision
The Qatar tax law contains an anti-avoidance provision that gives the Qatar tax authorities wide powers to counteract transactions that have been carried out with a tax avoidance purpose. These powers include substituting an arm’s-length value or re-characterising transactions.

Topics of focus for tax authorities
The following areas appear to be the focus of the Qatar tax authorities from a tax compliance perspective:

• Representative offices of non-residents are being required to file tax returns, notwithstanding the fact that they may only be promoting their business.
• The Qatar tax authorities are closely examining the taxpayer’s activities to establish whether or not a PE exists. This is a particular area of focus where a taxpayer submits a claim for a refund of WHT on the basis of application of the provisions of a DTT. If a taxpayer has a PE, the Foreign Investment Law requires that PE to be formally registered as a company or a temporary branch.
• Related-party transactions and large and unusual items of expenditure are being scrutinised by the Qatar tax authorities. See the Group taxation section for comments on the anti-avoidance provision and transfer pricing.
• The allocation of head office general and administrative expenses to a Qatar branch of a foreign company.
• Capital gains generated on the sale of shares by a non-resident in a Qatari company.

Other issues

The Qatar Financial Centre (QFC)
The QFC was established in 2005 to attract companies in the financial services sector. The QFC has its own tax regulations and rules, and the State of Qatar tax laws do not apply to the licensed activities of entities established in the QFC.

The QFC is an onshore regime that operates within its own legal, tax, and regulatory framework, which is independent of, but runs parallel to, the existing framework in the State of Qatar. The QFC has its own Civil and Commercial Courts, as well as an independent Regulatory Tribunal. The legal framework is modelled closely after the English common law and existing major financial centres.

QFC-established entities can access the local market, be 100% foreign owned, are subject to no currency restrictions, and can repatriate 100% of their profit. Entities can be based at premises anywhere in Qatar (provided those premises are approved by the QFC).

Regulated activities
Regulated activities are those undertaken by financial firms (such as investment and retail banks, insurance companies, fund and wealth management firms, brokerage offices, and securities operations).

Non-regulated activities
Permitted non-regulated activities were originally limited to activities in support of financial firms (e.g. services by accounting, audit, and legal firms). The QFC subsequently introduced a number of changes to expand the scope of permitted non-regulatory activities to include services (as long as these are business-to-business [B2B]) such as intellectual property (IP) management and treasury for all sectors and consultancy services in relation to information technology (IT), real estate, recruitment,
and sports and event management. The opportunity now exists for a business that is not regulated and that might previously have set up contract-specific temporary branches under Qatar state law to incorporate within the QFC as a 100% foreign-owned entity. The QFC is also available to Qatari investors, and they can enjoy benefits similar to those awarded under the State Tax Law (i.e. exemption from CIT), provided the business is 90% Qatari owned.

**Tax environment**
The key features of the QFC tax environment are as follows:

- Unregulated QFC LLCs with a minimum 90% Qatari ownership benefit from a 0% concessionary CIT rate.
- Low general CIT rate of 10% on locally sourced profits.
- Extensive tax exemptions for qualifying activities, dividends, and capital gains.
- No WHT on payments from Qatar.
- Access to Qatar’s DTT network with over 60 jurisdictions.
- VAT may be introduced in the future, but is currently not applicable.
- No personal income tax (PIT) for expatriate employees.
- Online tax administration system.
- Advance ruling services providing QFC entities with a high degree of certainty.
- Statutory protection for investors, whereby QFC tax authority must review tax returns within 12 months of filing.
- Group loss relief available.
- No tax exemption for profits of Qatari partners in joint ventures where the Qatari ownership is less than 90%.

**Intergovernmental agreement (IGA) with the United States**
The State of Qatar entered into a Model 1B IGA effective 7 January 2015, replacing the ‘in principle’ agreement previously in place. Practical considerations regarding the implementation of the Foreign Account Tax Compliance Act (FATCA) into local law, including form of reporting and local deadlines, remain under discussion.
Significant developments

Corporate taxation

• Starting 1 January 2016, the withholding tax (WHT) rate for dividend income derived by non-residents from Romania decreased from 16% to 5%. This is similar to the WHT rate that applies to the distribution of dividends to Romanian legal entities and Romanian resident individuals.
• The New Tax Code, effective as of 1 January 2016, unconditionally exempts from profit tax any dividends received by Romanian profit taxpayers from Romanian legal entities. For dividends received from foreign legal entities, the existing conditions for applying the participation exemption will remain effective (i.e. exemption applies if there is a minimum shareholding percentage of 10% for an uninterrupted period of at least one year).
• The New Tax Code, effective as of 1 January 2016, incorporates the recent amendments to the European Directive no. 2011/96/EU, relating to the application of a common system of taxation in the case of parent companies and subsidiaries of different member states. The legislation introduces the anti-abuse rule for preventing unlawful tax practices used to obtain tax benefits contrary to the Directive’s principles. Also, dividends received by a Romanian legal entity from a foreign legal entity under certain conditions will not be taxed as long as those dividends are not treated as deductible expenses by the paying subsidiary.
• Starting from 1 January 2016, the amendments applicable to domestic mergers, total or partial spin-offs, transfer of assets, and exchange of shares have been harmonised with those applicable to similar cross-border transactions. The neutrality of in-kind contributions to a company’s equity has been eliminated, except for cases involving a transfer of a going concern. Transfers carried out during a partial spin-off will not be subject to profit tax only if a transfer of a going concern takes place and the transferor maintains at least one line of activity.
• The Romanian anti-abuse rules in the New Tax Code, effective as of 1 January 2016, define ‘artificial cross-border transaction’ as a cross-border transaction or series of cross-border transactions that have no economic substance and that cannot be used regularly within ordinary business practices, their main purpose being to avoid taxation or to obtain tax advantages that could not be gained otherwise. Cross-border transactions are those transactions taking place between two or more entities, out of which at least one is situated outside Romania. Cross-border artificial transactions are not considered part of the scope of the conventions for the avoidance of double taxation.
• As of 1 January 2016, the construction tax for agricultural constructions is eliminated. For other constructions, it will be eliminated as of 1 January 2017.

Value-added tax (VAT)

• Starting 1 January 2016, the standard VAT rate of 24% has been reduced to 20%. As of 1 January 2017, it will be reduced to 19%.
• As of 1 January 2016, according to the provisions of Law no. 227/2015 regarding the new Fiscal Code, the supply of school manuals, books, newspapers, and some magazines, as well as the supply of services consisting of the allowance of access to castles, museums, cinemas, and others, is no longer subject to the 9% VAT rate, but, rather, to the reduced VAT rate of 5%. Additionally, sports events are also included in the category of operations subject to the reduced VAT rate of 5%.

• As of 1 January 2016, the VAT reverse-charge mechanism is applicable to the supply of buildings, parts of buildings, and plots of land, and to the supply of mobile phones, PC tablets, laptops, gaming consoles, and devices with integrated circuits. The reverse-charge mechanism will be applied to the supply of mobile phones, PC tablets, etc. only until 31 December 2018.

---

**Taxes on corporate income**

The standard profit tax rate is 16% for Romanian companies and foreign companies operating through a permanent establishment (PE) in Romania. Resident companies are taxed on their worldwide income, unless a double tax treaty (DTT) stipulates otherwise. Non-resident companies are taxed on all income derived from Romanian taxpayers, regardless of whether the services are rendered in Romania or abroad.

The profit tax due for nightclubs and gambling operations is either 5% of the revenue obtained from such activities or 16% of the taxable profit, whichever is higher.

**Micro-company tax regime**

Micro-companies are subject to a mandatory revenue tax rate (see details below) in lieu of the standard profit tax, provided they meet all the following criteria at the end of the previous year:

- Derive income from activities other than banking, capital markets, insurance and reinsurance, and gambling.
- Derive income from consulting and management activities that accounts for no more than 20% of their total revenues.
- Their annual turnover is lower than the Romanian leu (RON) equivalent of 100,000 euros (EUR) starting from 1 January 2016 (previously EUR 65,000).
- Their shares are held by entities other than the state or local authorities.
- Must not be involved in a registered procedure of dissolution with liquidation.

Payment of the tax and filing of the returns is made quarterly, by the 25th day of the month following the end of the quarter for which the tax is calculated.

Newly established companies are required to follow the micro-company tax regime starting with the first fiscal year. Newly incorporated Romanian legal entities that, upon registration with the Trade Registry, are due to perform banking, insurance and reinsurance, consultancy and management, or gambling activities are excepted from this rule. If, during a fiscal year, a micro-company registers a turnover above EUR 100,000, that company will pay profit tax starting with the quarter in which the limit was exceeded. Companies that, at the moment of incorporation, have a share capital of at least EUR 25,000 may opt to apply the profit tax rules during the first fiscal year.

Micro-companies have the obligation to communicate to the tax authorities the change in their tax system by 31 January of the year in which the tax is due.

Note that if revenues derived from management and consultancy activities exceed 20% of its total revenues, a micro-company becomes a profit taxpayer.

Starting from 1 January 2016, new legislative provisions have been introduced, as follows:
Romania

- A tiered system of micro-company tax rates, depending on the number of employees, has been introduced:
  - 1% for micro-companies with two or more employees.
  - 2% for micro-companies with one employee.
  - 3% for micro-companies with no employees.
- Taxpayers operating in the oil sector are excluded from the scope of the micro-company tax regime.
- A reduced rate of 1% has been introduced for newly set up Romanian legal entities that have at least one employee and have been incorporated for a minimum period of 48 months, with their shareholders not having held equity in other legal entities. This rate is only applied to the first 24 months from registration of the legal entity; the law also provides other requirements for the application of the reduced rate.
- The method for calculating the profit tax for taxpayers that shift from the micro-company tax regime to the profit tax regime during a fiscal year has been amended. For the purpose of calculating the profit tax, only the revenues and expenses recorded starting with the quarter in which the shift was made are taken into consideration. Under the prior legislation, all revenues and expenses recorded since the beginning of the fiscal year were considered.
- New deductions to the taxable base have been introduced, including the revenues obtained from a state with which Romania has concluded a DTT if these revenues have been taxed in the foreign state.

**Local income taxes**

There are no local taxes on corporate income.

---

**Corporate residence**

A company is considered tax resident in Romania if it was set-up under Romanian law or has its place of effective management in Romania.

Starting from 1 January 2016, a definition of the 'place of effective management' (POEM) is introduced, according to which POEM represents the place where strategic economic decisions necessary to ensure the management of the foreign company are taken and/or the place where the most senior person or group of persons who manage and control the activity of the foreign entity operate.

**Permanent establishment (PE)**

A PE is generally defined as being the place through which the activity of a non-resident company is conducted, fully or partially, directly or through a dependent agent.

Once a PE is created, Romania has the right to tax the profits of the non-resident parent company derived from the activities performed through the PE.

Starting from 1 January 2016, the provision according to which, in defining the PE concept, reference can be made to Article 5 - ‘Permanent establishment’ of the Organisation for Economic Co-operation and Development (OECD) Model Tax Convention has been transferred from the Methodological Norms to the Fiscal Code.

The Romanian legislation explicitly states the conditions that trigger a PE:

- Fixed base PE is created through a place of business with a certain degree of permanency through which business is conducted in Romania (with some exceptions).
- Agency PE is created through agents with a dependent status that operate in Romania on behalf of the foreign company.
The registration, reporting, and tax payment requirements for a PE are similar to those for a Romanian company.

Consolidation of PE revenues and expenses belonging to the same foreign legal entity is possible. For further information, please see the Group taxation section.

Other taxes

Value-added tax (VAT)
As of 1 January 2016, the standard VAT rate is 20% (previously 24%). The rate will be reduced to 19% as of 1 January 2017. The standard VAT rate is applied to all supplies of goods and services (including imports) that neither qualify for an exemption (with or without credit) nor for a reduced VAT rate.

The reduced VAT rate of 9% is levied on medicines for human and veterinarian use; accommodation in hotels or in areas with a similar function, regardless of the type of accommodation (accommodation with/without breakfast, half-board/full-board/all-inclusive accommodation); supply of prostheses and orthopaedic products; supply of medicines for human and veterinary use; accommodation and catering services, except for alcoholic beverages, other than beer; supply of food, including non-alcoholic drinks, for human and animal consumption; supply of drinking water; and irrigation water used in agriculture.

As of 1 January 2016, the supply of school manuals, books, newspapers, and some magazines, as well as the supply of services consisting of the allowance of access to castles, museums, cinemas, and others, is no longer be subject to the 9% VAT rate, but, rather, to the reduced VAT rate of 5%. Additionally, sports events are also included in the category of operations subject to the reduced VAT rate of 5%.

VAT exemption without credit applies to a range of activities, including the supply of services in relation to banking, finance, and insurance. However, some financial services are subject to 20% VAT (e.g. factoring, debt collection, managing, and depositing certain equity papers).

There are also operations exempt with credit (i.e. deduction right for the related input VAT), such as the following:

- Supply of goods shipped or transported outside the European Union (EU), and related services.
- Intra-Community supply of goods.
- International transport of passengers.
- Goods placed into free trade zones and free warehouses.
- Supply of goods to a bonded warehouse, a VAT warehouse, and related services.
- Supply of goods that are placed under suspensive customs regimes.
- Supply of services in connection with goods placed under suspensive customs regimes or goods placed into free trade zones.
- Supply of goods and services to diplomatic missions, international organisations, and North Atlantic Treaty Organization (NATO) forces.

VAT on imported goods will continue to be paid at customs until 31 December 2016, except for taxable persons registered for VAT purposes that obtain an import VAT deferment certificate from the customs authorities. For these taxpayers, the VAT is not paid in customs but shown in the VAT return as both input and output VAT. The import VAT deferment is available only to companies for which the value of imports performed in the previous year/previous 12 consecutive months has exceeded the threshold of RON 100 million to companies with Approved Economic Operators (AEO) status and to those authorised to perform in-house customs clearance formalities.
Romania

The rules for establishing the place of VAT taxation for supply of goods and services are determined based on the same rules as those presented in the EU 2006/112/EC and EU 2008/8/EC Directives. Services provided by non-resident entities to Romanian companies with deemed place of supply in Romania are subject to Romanian VAT under the reverse-charge mechanism, provided that no VAT exemption is applicable.

VAT consolidation
Companies that are legally independent but are closely related in terms of financial, economic, and organisational purposes may choose to form a tax group as long as they are administered by the same competent fiscal body. However, transactions between the members of the group fall within the scope of VAT.

Reverse-charge mechanism
Under the VAT reverse-charge mechanism, VAT is not actually paid, but only shown in the VAT return as both input and output tax, provided that both the beneficiary and the supplier are registered for VAT purposes.

The reverse-charge mechanism applies either for intra-Community acquisitions of goods performed in Romania or for services performed by non-resident entities that are not established, nor have a fixed establishment, in Romania. The place of supply of services is where the beneficiary is established or has a fixed establishment (e.g. consultancy, marketing services).

Domestic supplies of cereals and industrial plants performed between companies registered for VAT purposes will be subject to the reverse-charge mechanism. The measure applies until 31 December 2018.

As of 1 January 2016, the application of the reverse-charge mechanism has been extended to the supply of buildings, parts of buildings, and plots of land, as well as, until 31 December 2018, to the supply of mobile phones, PC tablets, laptops, gaming consoles, and devices with integrated circuits.

Limited VAT deduction right
The VAT deduction right related to the acquisition of road vehicles used for the transport of passengers and vehicles that meet certain characteristics, as well as the acquisition of fuel and all related services used for the respective vehicles, is limited to 50%, except for some specific exceptions (e.g. vehicles used by sales agents, taxi, transport services).

VAT compliance
The annual turnover threshold for VAT registration in Romania is the Romanian leu equivalent of EUR 65,000. Companies surpassing this VAT registration threshold will be obligated to collect VAT for the advance payments received before registering for VAT purposes, related to goods delivered/services performed after the registration date, as of 1 January 2016.

As a general rule, the fiscal period is the calendar month. For taxable persons registered for VAT purposes whose previous year-end turnover did not exceed EUR 100,000, the fiscal period is the calendar quarter.

Taxable persons must keep complete and detailed records for calculation of VAT liabilities.

VAT returns should be submitted to the tax authorities by the 25th day of the month following the end of the fiscal period; the VAT payment is due by the same date. The VAT return can be submitted by electronic means.

Taxable persons not registered for VAT purposes in Romania and not required to register are liable to pay VAT and to submit a special VAT return on services rendered by non-
residents with a deemed place of supply in Romania. These obligations must be fulfilled by the 25th day of the month following that when the services are supplied.

Taxable persons are required to file VAT statements related to acquisitions/supplies of goods/services performed on Romanian territory on a monthly/quarterly basis, based on invoices issued/received to/from taxable persons registered for VAT purposes in Romania.

A taxable person registered for VAT purposes who does not exceed the exemption threshold of EUR 65,000 during the course of a calendar year may request deregistration from the VAT registered persons record between the first and tenth day of each month following the fiscal period used (month or quarter).

**The cash accounting VAT scheme (CAVS)**
The CAVS is optional for taxpayers with a turnover lower than RON 2,250,000 registered in the previous year and for newly founded companies. The right to deduct the input VAT for the acquisitions of goods/services from companies applying the CAVS is deferred until the date the payment is performed.

**Customs and international trade**

**Customs duties**
The customs duties are those specified in the EU Common Customs Tariff and are expressed as a percentage applied to the customs value (i.e. *ad valorem* taxes), as a fixed amount applied to a specific quantity (i.e. specific taxes), or as a combination of the above.

Agricultural products (i.e. products from chapters 1 to 24 of the EU Common Customs Tariff) are subject to specific taxation.

In certain cases (e.g. meat), the customs duty rate is established with regard to the cost, insurance, and freight (CIF) or the entry price of the products. In other cases, the customs duty rate is established by adding additional duties, such as agricultural components, to the *ad valorem* tax.

**Customs value**
The customs value is determined and declared by importers in accordance with the provisions of the Union Customs Code and its Delegated and Implementing Regulations, which took over the rules set up by the World Trade Organization (WTO) Customs Valuation Agreement (i.e. the Agreement pertaining to the implementation of Article VII of the General Agreement on Trade and Tariffs [GATT]).

**Authorised Economic Operator (AEO) status**
Operators that obtain AEO status benefit from simplifications regarding customs inspection, obtaining customs authorisations, and performing customs formalities.

Moreover, through the AEO authorisation, the holder is recognised by the customs authorities as a reliable person, giving comfort as regards observance of the safety and security standards.

In addition, companies certified as AEOs may apply for the benefit to defer the payment of the VAT in customs upon importation.

Operators authorised as AEOs will be verified at least once every three years regarding their compliance with the certification criteria.
Romania

Binding Tariff Information (BTI)/Binding Origin Information (BOI)
Companies can obtain rulings (BTI) from the Romanian customs authorities on the tariff classification of imported goods that are binding for the customs authorities for a three-year period, whenever goods identical to those described in the BTI are imported.

A similar type of ruling can also be obtained regarding the origin of goods (BOI).

Trade measures
For some agricultural products, the European Union generally imposes specific measures (e.g. values or quantitative allowances) on imports from other countries. It is mandatory to obtain an import licence before importing such products.

Moreover, import/export licences from relevant authorities are also required for commodities regarded as potentially hazardous to human health or to the environment (e.g. some chemical products, certain types of waste and scrap), for commodities the end-use of which is controlled (e.g. explosives), or for dual use (i.e. both civil and military) products.

Excise duties

Harmonised excise goods
The following products are subject to harmonised excise duties: alcohol and alcoholic beverages, manufactured tobacco products, energy products (e.g. unleaded petrol, diesel oil, gas, coal), and electricity.

Excise duties are due when excise goods are released for consumption (e.g. imported into Romania, taken out of an excise duty suspension arrangement).

Ethyl alcohol and other alcoholic products are exempt from the payment of excise duties if they are denatured and used in the nutritional, pharmaceuticals, or cosmetics industry.

Some energy products subject to movement control are excepted from excise duty, provided that an end-user authorisation is obtained and the payment of excise duties is secured.

Manufactured tobacco is also exempt from excise duties when exclusively intended for scientific and quality testing.

In some cases, traders can claim a refund of the excise duties paid (e.g. excise duty paid for goods released for consumption in Romania, but intended for consumption in other EU member states; excise duties paid for goods released for consumption and then returned to the production tax warehouse for recycling, reprocessing, or destruction; excise duties paid for goods acquired from the European Union or imported and then returned to the suppliers; excise duties paid for goods released for consumption in Romania and then exported).

For cigarettes, the excise duty due is equal to the sum of the specific excise duty and the ad valorem excise duty. The specific excise duty expressed in RON/1,000 cigarettes is annually determined based on the weighted average retail price, the legal percentage related to the ad valorem excise duty, and the total excise duty. The specific excise duty on cigarettes for the period 1 April 2016 to 31 December 2016 is set at RON 329.30/1,000 cigarettes.

The excise duty rate for ethyl alcohol is RON 4,738.01/hectolitre of pure alcohol.
The excise duty level for fermented still beverages, other than beer and wines, is set at RON 47.38/hectolitre of product, while the excise duty level for apple and pear cider and mead is nil.

The excise duty level for intermediary products is set at RON 781.77/hectolitre of product, and the level for beer is set at RON 3.90/hectolitre/1 Plato degree.

The current levels of excise duties on gasoline and diesel are RON 2,035.40/1,000 litres and RON 1,897.08/1,000 litres, respectively.

Companies selling fuel in gas stations have to register with the tax authorities. The same obligation applies for companies that market wholesale fuel, alcoholic drinks, or tobacco products.

Other excise goods
Other excise goods are:

- Heated tobacco products, which by heating generate an aerosol that can be inhaled without the combustion of tobacco mixture (with the following tariff classification: CN 2403 99 90).
- Liquids containing nicotine for inhaling using an electronic device (i.e. electronic cigarette) (with the following tariff classification: CN 3824 90 96).

Excise duties are to be paid by the 25th day inclusive of the month following the one (i) in which they were sold on the national market for domestic products or (ii) when the actual receipt takes place for products received from EU countries, except for the excisable goods imported, for which the excise duty is to be paid when the goods are released for free circulation.

Economic operators performing directly intra-Community acquisitions/imports of such goods are entitled to request a refund of the excise duties paid if the products are exported, supplied to another EU member state, or returned to the supplier. For the production/intra-Community acquisitions/imports of such products, prior authorisation is requested.

Property taxes

Building tax
Starting from 1 January 2016, the building tax calculation method has been amended by differentiating between buildings depending on their destination usage:

- Residential buildings: Tax rate between 0.08% and 0.2% (applicable to the taxable value as per the specific table provided by the law for individuals and the value resulted from the evaluation report for legal entities).
- Non-residential buildings: Tax rate between 0.2% and 1.3%. In the case of a building used for agricultural purposes, the applicable tax rate is 0.4%.

Local authorities have been granted the authority to increase local tax allowances by 50%; previously, these could have only been increased by no more than 20%.

The increased tax rate for building tax due by legal entities is 5% (if no revaluation was performed during the last three years).

If a building was acquired during a fiscal year, the building tax for the entire year is due by the seller. The buyer is liable to pay the tax starting with the next year.
Building tax is paid annually, in two equal instalments, by 31 March and 30 September. For the payment of the entire annual tax by 31 March, a reduction of up to 10% is granted by the Local Council.

**Land tax**
Owners of land are subject to land tax established at a fixed amount per square metre, depending on the rank of the area where the land is located and the area or category of land use, in accordance with the classification made by the Local Council.

Similar to building tax, land tax is paid annually, in two equal instalments, by 31 March and 30 September. A 10% reduction is granted for full advance payment of this tax by 31 March.

**Construction tax**
There is a tax on constructions included in the first group of the catalogue for classification and normal useful life of fixed assets, which are not subject to building tax. The tax on constructions is calculated by applying a 1% rate to the value of the constructions recorded in the taxpayers' books as at 31 December of the previous year.

Fit-out works on buildings that are rented, taken under management, or put into use are not subject to construction tax.

As of 1 January 2016, the construction tax for agricultural constructions is eliminated. For other constructions, it will be eliminated as of 1 January 2017.

**Transfer taxes**
There are no transfer taxes for companies for the transfer of property. The income derived from such a transfer will be included into the taxable profits of the company and subject to the flat tax rate.

**Stamp duty**
For judicial claims, issue of licences and certificates, and documentary transactions that require authentication, stamp duty (in the form of notary fee) has to be paid.

**Environmental taxes**
For certain activities (e.g. selling ferrous and non-ferrous waste, activities involving the use of dangerous substances, activities that generate polluting air emissions, placement of packaging materials/tyres on the market), companies have to pay contributions and taxes to the Romanian Environmental Fund.

Companies that place packed goods on the national market are liable to contribute to the Environmental Fund. The contribution amounts to RON 2 per kilogram of packaging introduced on the market and is due for the difference between the quantities of packaging waste that have to be recovered/recycled according to the law and the quantity actually recovered/recycled.

A tax of RON 0.3/kg is levied on industrial oils and lubricants placed on the market.

Companies conducting activities that result in the discharge of air-pollutant emissions from fixed sources (e.g. nitrogen oxides, sulphur oxides, persistent organic pollutants, heavy metal emissions, such as lead, cadmium, mercury) have to pay contributions to the Environmental Fund that range between RON 0.02/kg and RON 20/kg. For air pollutants, the computation is based on the CORINAIR/AP-42 methodology, and the tax is applied based on the nature of the air pollutants.

The environmental tax contribution for tyres placed on the market amounts to RON 2/kg.
The contribution for plastic bags placed on the national market amounts to RON 0.1/piece, which is due for bags and shopping bags that have an integrated or applied handle and that are manufactured from non-renewable resources.

In order to improve the regulatory system with respect to the Environmental Fund contributions, the modification and completion of the current regulations is likely to occur in the near future.

All producers/importers/exporters of electric and electronic equipment (EEE) and of batteries and accumulators are required to register with the National Agency for Environmental Protection as ‘EEE producers’ and as ‘producers of batteries and accumulators’, respectively.

**Payroll taxes**

Employers must contribute mandatory employer’s social security contributions and withhold, on a monthly basis, the mandatory employee’s social security contributions and the income tax (16%) from the employee’s gross salary and wire the amounts to the Romanian tax authorities.

**Social security contributions**

Employers must pay pension contributions, calculated on the gross salary costs, at 15.8%, 20.8%, and 25.8%, depending on working conditions.

The monthly contribution is capped at five average gross salaries multiplied by the number of insured individuals employed under employment contract. For 2016, the national average gross salary is set at RON 2,681.

Other mandatory contributions on labour paid by employers for employees, calculated on gross salary costs, are:

- Contribution for medical leaves: 0.85%; the monthly contribution is capped at 12 gross minimum wages multiplied by the number of insured individuals. As of 1 May 2016, the gross minimum wage is RON 1,250 (previously RON 1,050).
- Health insurance fund: 5.2%.
- Unemployment fund: 0.5%.
- Guarantee fund: 0.25%.
- Labour accidents insurance fund: 0.15% to 0.85%.

The mandatory employee’s social security contributions, which must be withheld by the employer, are:

- Pension contribution: 10.5%, capped at five times the average monthly gross salary.
- Health insurance fund: 5.5%.
- Unemployment fund: 0.5%.

**Branch income**

**Branch**

A foreign company can set up a branch in Romania, as long as the branch only operates in the same field of activity as the parent company. A branch is considered to have the same legal personality as the parent company and is not a separate legal entity (no own share capital, no separate name, etc.).

Profits derived by the branch are taxed at the standard profit tax rate of 16%.
Romania

**Representative offices**
Representative offices are often established as a first step to operating in Romania. A representative office can undertake only auxiliary or preparatory activities, cannot trade in its own name, and cannot engage in any commercial activities. A representative office can perform only a limited range of activities without being considered a PE for profit tax purposes.

Representative offices are subject to a flat annual tax of EUR 4,000 (payable in local currency, i.e. Romanian leu). The tax is paid in two equal instalments, by 25 June and 25 December. If a representative office is set up or closed down during a year, the tax due for that year is pro-rated for the months that the representative office was operational in that fiscal year.

**Income determination**
The taxable profit of a company is calculated as the difference between the revenue derived from any source and the expenses incurred in obtaining the taxable revenue throughout the tax year, adjusted for fiscal purposes by deducting non-taxable revenue and adding non-deductible expenses. Other elements similar to revenue and expenses are also to be taken into account when calculating the taxable profit.

For taxpayers that apply International Financial Reporting Standards (IFRS) (i.e. financial institutions and listed companies), there are specific rules in relation to the fiscal value assessment, profit tax computation, adjustments for step-down in value, amortisation, and fiscal treatment of deferred profit tax.

**Inventory valuation**
The methods permitted for inventory valuation under Romanian law are standard cost, detailed sale price, average (weighted) cost, first in first out (FIFO), and last in first out (LIFO). The accounting method is also recognised for tax purposes.

Assets are generally valued at their acquisition cost, production cost, or market value. Fixed assets may be re-valued at certain points in time for various purposes.

**Capital gains**
Capital gains earned by a Romanian resident company are included in their ordinary profits and are taxed at 16%. Capital gains obtained by non-residents from real estate property located in Romania or from the sale of shares held in a Romanian company are also taxable in Romania. However, the income may be subject to treaty protection.

Participation exemption applies for capital gains derived by a Romanian legal entity from participations of at least 10%, held for a minimum period of one year, in a subsidiary established in a state with which Romania has a DTT.

Prior to 1 January 2016, capital gains derived from the transfer of shares in companies whose assets consisted of more than 50% real estate located in Romania were subject to tax at 16% (no domestic participation exemption). Starting from 1 January 2016, domestic participation exemption as detailed above is applicable in all cases, including in cases of sale of real estate shares.

**Dividend income**
Dividends distributed by a company resident in another EU member state to a Romanian company are tax exempt if the Romanian company has held, prior to the time of distribution, a minimum of 10% of the shares in the respective non-resident company for an uninterrupted period of at least one year.
The New Tax Code, effective as of 1 January 2016, incorporates the amendments to the European Directive no. 2011/96/EU, relating to the application of a common system of taxation in the case of parent companies and subsidiaries of different member states. The legislation introduces the anti-abuse rule for preventing unlawful tax practices used to obtain tax benefits contrary to the Directive’s principles. Also, dividends received by a Romanian legal entity from a foreign legal entity under certain conditions mentioned above will not be taxed as long as those dividends are not treated as deductible expenses by the paying subsidiary.

Participation exemption applies for dividends derived by a Romanian legal entity from participation of at least 10%, held for a minimum period of one year, in a subsidiary established in a state with which Romania has a DTT.

Dividends received by a Romanian company from another Romanian company are not subject to profit tax, but are subject to a final WHT of 5%. Those payments are non-taxable if the shareholder held, at the time of distribution, a minimum of 10% of the shares in the other company for an uninterrupted period of at least two years.

Dividends received by a Romanian company from a non-qualifying foreign subsidiary are taxed in Romania at the normal profit tax rate of 16%. Credit is available for tax paid abroad.

Starting from 1 January 2016, new legislative provisions have been introduced, as follows:

• The non-taxable treatment of the revenues from dividends received from Romanian legal entities independent of any other conditions has been introduced; as regards the dividends received from foreign legal entities, the current conditions have to be further met for such profit tax exemption to apply (i.e. a minimum shareholding of 10% for an uninterrupted period of at least one year).
• The WHT rate for dividend income derived by non-residents from Romania has decreased from 16% to 5%. This is similar to the WHT rate that applies to the distribution of dividends to Romanian legal entities and Romanian resident individuals.

**Interest and royalty income**
Interest and royalty payments made by Romanian companies to other Romanian companies are taxable income in the hands of the beneficiary.

Romanian-sourced interest and royalty payments of an affiliated company, resident in an EU member state, are exempt from WHT, provided that certain conditions are met, e.g.:

• 25% minimum direct holding of the share capital (i.e. one company has a direct minimum holding of 25% in the share capital of the other company or a third company has a direct minimum holding of 25% in the share capital of both companies involved in the payment of the interest and royalties).
• The holding period must be maintained for an uninterrupted period of at least two years prior to the payment of the interest and royalties.
• The company receiving the interest or royalty payments must be the beneficial owner of these payments.

**Fiduciary contracts**
If the settlor of a fiduciary contract is also the beneficiary, then:

• the transfer of the patrimony from the settlor to the fiduciary is not considered a taxable transfer, and
Romania

• the fiduciary will keep separate bookkeeping entry for the fiduciary patrimony and will communicate to the settlor, on a quarterly basis, the income and expenses resulting from the administration of the patrimony.

If the beneficiary is the fiduciary or a third party, the expenses recorded from the transfer of the patrimony from the settlor to the fiduciary is considered non-deductible.

Other significant items
The other most relevant types of non-taxable revenue stipulated by the Romanian Fiscal Code are:

• Favourable fluctuations in the price of shares and long-term bonds registered by the company in which the shares and long-term bonds are held, as a result of capitalisation of reserves, benefits, or share premiums.
• Revenue from reversal or cancellation of provisions/expenses that were previously non-deductible, recovery of expenses that were previously non-deductible, and revenue from reversal or cancellation of interest and late payment penalties that were previously non-deductible.
• Revenue from the annulment of a reserve registered as a result of a participation in nature to the capital of other legal entities.
• Revenue from deferred income tax.
• Revenue resulting from the change in the fair value of real estate investments/biological assets owned by the taxpayers applying IFRS.
• Non-taxable revenue expressly provided for under agreements and memoranda enforced by regulatory documents.

Foreign income
Resident companies are taxed on their worldwide income unless a DTT provides otherwise. However, in case of foreign subsidiaries of Romanian companies, income is not taxed in Romania until remitted back. Otherwise, there is no specific tax deferral regime in place.

Deductions
Expenses fall into three categories: deductible expenses, limited deductibility expenses, and non-deductible expenses.

Deductible expenses
As a general rule, expenses are deductible only if incurred for the purpose of generating taxable income.

Starting from 1 January 2016, the general rule for deductibility of expenses has been amended and the expenses incurred for business purposes are to be considered as tax deductible.

Some of the deductible expenses specifically mentioned by the Fiscal Code include:

• Marketing and advertising expenses.
• Research and development (R&D) expenses that are not recognised as intangible assets for accounting purposes.
• Expenses incurred for environmental protection and resource conservation.
• Expenses incurred for management improvement; updating information technology (IT) systems; introducing, maintaining, and developing quality management systems; and obtaining quality compliance confirmation.
• Losses incurred when writing off client receivables in any of the following cases:
  • The bankruptcy procedure of the debtor was closed due to a court ruling.
  • The debtor is deceased and the receivable cannot be recovered from the heirs.
• The debtor is dissolved or liquidated.
• The debtor has major financial difficulties affecting its entire patrimony.
• Expenses related to losses from the valuation of shares and long-term bonds.
• Travel and accommodation expenses related to business; this also includes transportation of personnel to and from the workplace.
• Daily allowances for expenses incurred by employees in connection to travels in Romania and abroad.
• Expenses incurred from professional training and development of employees.
• Expenses related to benefits granted to employees as equity instruments settled with cash, at the moment of the effective granting, if the benefits are subject to personal income tax (PIT).
• Expenses incurred in connection to work safety, prevention of work accidents and occupational diseases, the related insurance contributions, and professional risk insurance premiums.
• Expenses incurred in connection to the acquisition of packaging materials, during the useful life set by the taxpayer.
• Fines, interest, penalties, and other increased payments due under commercial contracts.

Note that credit institutions apply IFRS rules, and certain deductibility rules are provided for this category of taxpayers.

**Limited deductibility expenses**

The deductibility of the following expenses is limited:

• Interest expenses and foreign exchange losses under thin capitalisation rules (*see the Group taxation section for more information*).
• Provision and reserve expenses (*see details below*).
• Depreciation and reduction in value of fixed assets under fiscal depreciation rules (*see details below*).
• Perishable goods and losses resulted from transport/storage, according to law.
• Protocol expenses are deductible at up to 2% of the accounting profit, adjusted with protocol and profit tax expenses. Output VAT related to gifts of at least RON 100 offered by taxpayers fall under the protocol expenses category.
• Social expenses are deductible at up to 5% of salary expenses and include, among other items, maternity allowances, expenses for nursery tickets, funeral benefits, and allowances for serious or incurable diseases and prostheses, as well as expenses for the proper operation of certain activities or units under taxpayers’ administration (i.e. kindergartens, nurseries, health services supplied for occupational diseases and work accidents prior to admission to health establishments, canteens, sports clubs, clubs, etc.), gifts represented by money of in kind, including gift tickets given to employees and their children, and medical services granted in case of professional diseases and labour accidents until transfer to a hospital. Expenses incurred for benefits granted under a collective labour agreement are also deductible within the same limits.
• Expenses incurred with lunch vouchers and holiday vouchers given by employers, according to law.
• Technological losses within the internal consumption norm required for the production of a good or provision of a service.
• Expenses incurred for functioning, maintenance, and repairs corresponding to an establishment represented by an individual’s personal property, used as well for individual purposes, deductible in the limit of the surfaces at the disposal of the company based on the contractual agreements.
• Expenses incurred with electricity at the level of the technological internal consumption norm or, in case it is missing, at the level of the norm approved by the National Authority for Energy, including the commercial consumption for the taxpayers in the electricity distribution business.
• Taxes and fees paid to non-government organisations or professional associations related to the taxpayer’s activity are deductible up to the limit of EUR 4,000 per year.
Romania

- All direct expenses attributable to vehicles with up to nine seats that are not used exclusively for business purposes are 50% deductible for profit tax purposes, under certain conditions provided by law. These expenses are fully deductible for vehicles used for the following activities:
  - Emergency, safety and security, courier services, cars used by sales and acquisitions agents.
  - Paid transportation services and taxi activities.
  - Rental.
  - Driving schools.
  - Vehicles used as commodities.
- For vehicles with up to nine seats, tax depreciation is limited to a maximum of RON 1,500 per month for each vehicle starting from 1 February 2013.

**Non-deductible expenses**

Expenses deemed non-deductible include, among other items, the following:

- Domestic profit tax, including differences from previous years or from the current year, and profit tax paid in foreign countries, deferred tax registered according to accounting standards.
- Expenses with tax not withheld at source in the name of non-resident individuals and legal entities.
- Expenses related to non-taxable revenues.
- Interest, fines, and penalties due to Romanian or foreign authorities, according to legal provisions, with the exception of the ones pertaining to agreements concluded with these authorities.
- Expenses incurred for management, consultancy, assistance, or other supply of services performed by a non-resident located in a state that has no exchange of information agreement concluded with Romania. These provisions are applicable if the expenses are incurred in respect of transactions deemed as artificial.
- Sponsorship and patronage expenses and expenses for private scholarships. Taxpayers are, however, granted a fiscal credit of up to 0.5% (previously 0.3%) of turnover and 20% of the profit tax due, whichever is lower. Taxpayers that do not benefit from fiscal credit in the year when they grant sponsorship according to the law may carry forward the fiscal credit for the next seven consecutive years.
- Losses incurred when writing off client receivables, for the amount not covered by a provision, in any cases other than the following: a reorganisation plan was applied through a court decision in accordance to Law no. 85/2014; the bankruptcy procedure of the debtor was closed due to a court ruling; the debtor is deceased and the receivable cannot be recovered from the heirs; the debtor is dissolved or liquidated; or the debtor has major financial difficulties affecting its entire patrimony.
- Expenses resulting from the adjustment of acquired receivables, provided insurance contracts have been put in place.
- Expenses resulted from benefits granted to employees as equity instruments settled with shares/cash, unless subjected to PIT.
- Expenses in favour of shareholders, other than those related to goods or services provided by the shareholders at market value.
- Expenses incurred with insurance premiums unrelated to the risks and assets of the taxpayer’s business, with the exception of those that relate to goods representing a banking guarantee for the loans used for business purposes.
- Expenses registered in the accounting records based on documents issued by an inactive taxpayer, according to the provisions of the Fiscal Procedure Code, with the exception of those representing acquisitions of goods performed during foreclosure procedures or from legal entities in bankruptcy procedure according to Law no. 85/2014.
- Expenses relating to missing or damaged non-imputable inventories or tangible assets, as well as related VAT, if the case. These expenses are deductible in case any of the following conditions are applicable to the inventory/assets:
• They were destroyed following natural disasters or major force situations in the conditions provided by the methodical norms.
• Insurance contracts have been set up in respect of these.
• They were degraded from a qualitative perspective, and the proof of destruction is available.
• They have a validity/expiry term that has passed, according to law.
• Expenses reflected in accounting records, irrespective of their nature, that later prove to be related to acts of corruption as defined under the law.

Note that credit institutions apply IFRS rules, and certain non-deductibility rules are provided for this category of taxpayers.

**Depreciation**
Romanian law makes an explicit distinction between fiscal and accounting depreciation. Fiscal depreciation is treated as an expense deductible from the tax base, while accounting depreciation is treated as a non-deductible expense. Companies should maintain a separate record to reflect the separate computation of the fiscal and accounting depreciation. Any accounting revaluations of fixed assets are not taken into account in computing the tax depreciation.

Assets are generally depreciated using the straight-line method. However, accelerated or degressive depreciation methods may be used to determine fiscal depreciation, while the accounting depreciation method may be different.

The useful lives to be used for tax purposes are the ones stated in the Official Fixed Assets Catalogue, published under government decision. Ranges are provided for classes of fixed assets, from which the taxpayers can choose the useful life (e.g. office and housing buildings: 40 to 60 years, commercial buildings: 32 to 48 years, commercial furnishings: 9 to 15 years, automobiles: 4 to 6 years).

For vehicles with up to nine seats, the fiscal depreciation is limited to a maximum of RON 1,500 per month for each vehicle. Certain categories of vehicles are exempt from this monthly deduction limitation (e.g. used exclusively for emergency, security, or delivery service; used for paid passenger transport; or used for paid supply of services).

Land cannot be depreciated.

**Accelerated depreciation**
Under the Fiscal Code, machinery and technical equipment, computers and their peripherals, as well as patents, may be depreciated by using the accelerated method, under which a maximum of 50% of the asset's fiscal value may be deducted during the first year of usage, while the rest of the asset's value can be depreciated using the straight-line method over the remaining useful life.

**Goodwill**
As a rule, goodwill is deemed non-depreciable from a Romanian fiscal perspective.

**Start-up expenses**
According to accounting rules, start-up expenses may be capitalised and depreciated over a maximum period of five years. However, according to the fiscal rules, start-up expenses should not be depreciated for tax purposes.

**Provisions and reserves**
As a general rule, provisions and reserves are non-deductible for profit tax purposes. However, there are certain provisions and reserves that are deductible, such as:

• Setting up or increasing the legal reserve fund up to 5% of the accounting profit, adjusted with profit tax expense, and until it reaches 20% of the share capital.
Romania

- Provisions related to guarantees for proper execution granted to the clients.
- Provisions for depreciation of receivables are deductible at up to 30% if the related receivables meet the following conditions simultaneously:
  - Not collected for a period exceeding 270 days from the due date.
  - Not guaranteed by another person.
  - Due by a person not affiliated with the taxpayer.
- Bad debt provisions are fully deductible if all the following conditions are met:
  - The debtor is a company declared bankrupt by a court ruling or an individual for whom insolvency procedure has been declared based on:
    - Reimbursement plan.
    - Asset liquidation.
    - Simplified procedure.
  - Receivables are not guaranteed by another person.
  - The debtor is not a related party.
- Specific provisions established by non-banking financial institutions and other legal persons according to their incorporation law.
- Adjustments for impairment set up by credit institutions that apply IFRS and prudential filters set up according to regulations issued by the National Bank of Romania.
- Technical reserves set up by insurance and reinsurance companies, in accordance with their regulatory legal framework, except for the equalisation reserve.
- Risk provisions for transactions carried out on financial markets, in accordance with the rules issued by the Romanian National Securities Commission.
- Provisions and adjustments for impairment of receivables that were acquired by legal persons from credit institutions in order to be collected, for the difference between the receivables value and the amount due to the assignee, provided several conditions are met.
- Reserves from revaluation of fixed assets and land, made after 1 January 2004, which are deductible through depreciation or through expenses triggered by assets sold or written off, are taxable at the same time and for the same amount as the tax depreciation deduction, i.e. when the assets are sold or written off.
- In case the level of the subscribed share capital was reduced, the part of the legal reserve corresponding to the reduction, that was previously deducted, represents an element similar to revenues.

The reduction or cancellation of any provision or reserve deducted from the taxable profit, due to changing the destination of the provision or reserve, distribution towards shareholders in any form, liquidation, spin-off, merger, or any other reason, is included in the taxable revenue and taxed accordingly.

Note that special rules are applicable to credit institutions that are required to apply IFRS rules.

**Fiscal losses**
Companies are allowed to carry forward fiscal losses declared in the annual profit tax returns for a period of up to five years (for losses incurred prior to 2009) or seven years (for losses incurred after 2009), based on the FIFO method. No related adjustment for inflation is allowed.

Any loss incurred by a PE of a Romanian company located in a non-EU/European Free Trade Association (EFTA) member state or in a country that has a DTT in place with Romania is only deductible for tax purposes from the revenue derived by that PE, and losses can be carried forward only for a period of five years.

For foreign legal persons, carryforward of losses applies only to revenue and expenses attributable to their PE in Romania.
Losses incurred by a company can be transferred within a merger/spin-off operation and can be recovered by the successors, in proportion to the assets and liabilities transferred. The successors of these restructuring operations are able to use such losses during the remaining period.

Carryback of losses is not available in Romania.

**Payments to foreign affiliates**
Transactions with Romanian-affiliated companies and with non-resident related parties fall within the scope of the investigations regarding compliance with transfer pricing legislation (see Transfer pricing in the Group taxation section).

---

**Group taxation**

There is no tax consolidation or group taxation in Romania, except for PE consolidation. Members of a group must file separate returns and are taxed separately. Losses incurred by group members cannot be offset against profits made by other members of the group.

**Consolidation of PEs**
Foreign legal entities that perform economic activities in Romania through several PEs must register one of them as their PE designated to fulfil the fiscal obligations for all the PEs owned.

The revenues and expenses of all the PEs belonging to the same foreign legal entity will be cumulated at the level of the designated PE.

**Transfer pricing**
Transfer pricing requirements are applicable to transactions between Romanian related parties as well as foreign related parties.

Transactions between related parties should observe the arm's-length principle. If transfer prices are not set at arm's length, the Romanian tax authorities have the right to adjust the taxpayer’s revenue or expenses so as to reflect the market value.

Traditional transfer pricing methods (i.e. comparable uncontrolled prices, cost plus, and resale price methods), as well as any other methods that are in line with the OECD Transfer Pricing Guidelines (i.e. transactional net margin and profit split methods), may be used for setting transfer prices.

**Transfer pricing documentation**
Taxpayers engaged in related party transactions have to prepare and make their transfer pricing documentation file available, irrespective of whether the transfer pricing documentation file has been requested by the Romanian tax authorities.

Transfer pricing audit activity has significantly increased during the past few years, and requests for presenting the transfer pricing documentation file have started to become common practice. We are aware of recent cases where the Romanian tax authorities adjusted the taxable result of local taxpayers in accordance with the applicable regulations.

The content of the transfer pricing documentation file has been approved by order of the president of the National Agency for Tax Administration. The Order is supplemented by the Transfer Pricing Guidelines issued by the OECD and the Code of Conduct on transfer pricing documentation for associated enterprises in the European Union Transfer Pricing Document (EUTPD).
The deadline for presenting the transfer pricing documentation file will not exceed three calendar months, with the possibility of a single extension equal to the period initially established.

Failure to present the transfer pricing documentation file or presenting an incomplete file following two consecutive requests may trigger estimation of transfer prices by the tax authorities on the basis of generally available information.

**Advance pricing agreement (APA)**

Taxpayers engaged in transactions with related parties have the possibility to apply for an APA. These taxpayers can also schedule a pre-filing meeting to discuss the feasibility of the APA.

The request for an APA is filed together with the relevant documentation and payment evidence of the fee (ranging between EUR 10,000 and EUR 20,000). The required documentation is based on the EUTPD and suggests, up front, the content of the APA.

The term provided by the Fiscal Procedural Code for issuance of an APA is 12 months for unilateral APAs and 18 months for bilateral and multilateral APAs. The APA is issued for a period of up to five years. In exceptional cases, such as long-term agreements, it may be issued for a longer period.

APAs are opposable and binding on the tax authorities as long as there are no material changes in the critical assumptions. In this view, the beneficiaries are obligated to submit an annual report on compliance with the terms and conditions of the agreement.

If taxpayers do not agree with the content of the APA, they can notify the National Agency for Tax Administration within 15 days. In this case, the agreement does not produce any legal effects.

**Thin capitalisation**

If the company’s equity is negative or the debt-to-equity ratio is higher than 3:1, expenses incurred from interest charges and net losses related to foreign exchange differences on long-term loans are fully non-deductible. However, these expenses may be carried forward to the following fiscal years and become fully tax deductible in the year the debt-to-equity ratio becomes lower than or equal to 3:1.

Debt included in the calculation of the debt-to-equity ratio is represented by all such (non-financial institution) loans with a maturity period of over one year.

The equity includes share capital, share/merger premiums, reserves, retained earnings, current year earnings, and other equity elements. Both debt and equity are calculated as the average of values existing at the beginning and at the end of the period for which profit tax is calculated.

Starting from 1 January 2016, an amendment regarding the computation of the debt-to-equity ratio has been introduced. Loans with a reimbursement term of longer than one year for which no interest is due according to the contract are also taken into consideration.

The deductibility of interest expenses and net foreign exchange losses related to long-term loans (with a maturity period of over one year) is further subject to the safe harbour rule. The safe harbour rule limits the deductibility of interest on such loans to a maximum of 4% for loans denominated in foreign currency and to the National Bank of Romania’s reference interest rate for Romanian leu loans. Interest expenses recorded over this limit are tax non-deductible and cannot be carried forward in future periods.
**Controlled foreign companies (CFCs)**
Under Romanian legislation, there are no CFCs rules.

---

**Tax credits and incentives**

**Foreign tax credits**

- Tax credits for taxes paid to a foreign state may be obtained in Romania only if the DTT concluded between Romania and the foreign state applies and only if proper documentation confirming the tax was paid is available.
- A Romanian PE of a legal entity resident in the European Union or the European Economic Area (EEA) that obtains revenues from another EU or EEA member state, taxed both in Romania and in that member state, may claim a tax credit in Romania under the applicable tax law provisions.

**Tax exemption for reinvested profits**

- The profit invested in new technological equipment manufactured and/or acquired and commissioned during the period 1 July 2014 to 31 December 2016 is exempt from profit tax.
- In order to benefit from this incentive, the technological equipment should be used by the taxpayer for business purposes for more than half of its useful life, but for no longer than five years.
- The technological equipment for which this tax incentive applies cannot be depreciated by using the accelerated depreciation method.
- As of 1 January 2016, the applicability of the tax exemption of reinvested profits has been extended so as to include other fixed assets, such as computers, tax registers, and software.

**Research and development (R&D) incentives**

Companies can benefit from an additional deduction of 50% of the eligible expenses for their R&D activities. Moreover, accelerated depreciation may be applied for devices and equipment used in the R&D activity.

In order to benefit from this supplementary deduction, the eligible R&D activities must be applicative research and/or technological development relevant to the taxpayer’s activity and must be performed in Romania or in the EU/EEA member states.

As of 1 January 2016, a new provision has been introduced, according to which the additional deduction for R&D activities is not available if the R&D project’s objectives are not met.

**Local tax exemptions for business located in industrial parks**

No property tax is due for buildings and constructions located in an industrial park. Also, land within industrial parks is exempt from land tax.

The incentives granted for the set up and development of industrial parks include:

- Local tax exemptions/reductions for immovable assets and land related to the industrial park.
- Other incentives that may be granted by the local tax authorities.
- Development programmes for infrastructure, investments, and equipment endowments granted by local and central public administration, companies, and foreign financial assistance.
- Concessions and structural funds for development.

The companies operating within the industrial park benefit from:
Romania

• Various services offered by the park administrator free of charge or with reduced fees.
• Advantageous conditions with regard to location, use of the infrastructure, and communications of the park, with payment in instalments.

Local councils may grant land tax exemptions for owners of land situated in degraded or polluted areas, but not included in the area of improvement, at taxpayer’s request and with the approval of the Ministry of Agriculture and Rural Development and the Ministry of Environment.

Land tax exemptions apply from the first day of the month following approval being obtained.

**Employment incentives for special categories**
For employment of recent graduates, employers can apply for a monthly grant of 1 to 1.5 (depending on the level of educational background) multiplied by the reference social indicator (currently set at RON 500) for each new graduate of a recognised institution for a period of 12 months. Employers benefiting from this incentive are obligated to keep this employment relationship for a time period of at least three years.

Moreover, employers may also be exempt for these 12 months from paying the unemployment contribution due for these graduates. In addition, grants amounting to the social security contributions for two years for recent graduates are available if they are still employed by the company for two additional years after the first three years pass.

The same incentives apply for the employment of recent graduates with disabilities, except that the period for which the exemption from contributions to the unemployment fund and the monthly grants apply is extended to 18 months.

Employers can also apply for exemption from unemployment fund contributions and for a monthly grant equal to the reference social indicator for each unemployed person with an age exceeding 45 years, or for each such person who is the sole family supporter. This monthly grant is available for a period of 12 months. Employers benefiting from this incentive have the obligation to keep this employment relationship for at least two years.

Employers running professional training programmes for their employees may apply for a refund of 50% of their expenses for up to 20% of their workforce, subject to certain conditions and limitations.

**Other incentives granted to taxpayers**
For justified claims of the taxpayers, the tax authorities may grant incentives for the payment of taxes, such as the rescheduling of tax payments due.

Rescheduling of tax payment obligations may be granted by the tax authorities to individuals and legal entities upon request. The time-frame for the rescheduling is a maximum of five years for taxpayers with tax liabilities below or equal to RON 300 million and up to seven years for taxpayers with liabilities higher than RON 300 million. The time-frame is set after taking into consideration the taxpayer’s financial situation and the total tax burden.

In order to benefit from the rescheduling of tax payment obligations, taxpayers must meet certain conditions and also provide a guarantee that covers the rescheduled liabilities, interest, and also a supplementary percentage of the rescheduled liabilities, depending on the duration of the rescheduling time-frame.
**Withholding taxes**

**Domestic dividend tax**
Starting from 1 January 2016, the dividend tax rate for the dividend distribution between Romanian legal entities decreased from 16% to 5%. The tax is eliminated if there is a shareholding percentage of a minimum of 10% for an uninterrupted period of at least one year.

**WHT for non-residents**
The provisions of the Parent-Subsidiary Directive (2011/96) and of the Interest and Royalties Directive (2003/49) as transposed into the domestic fiscal legislation apply only to EU member states, with the member states of the European Free Trade Association (Iceland, Norway, and Lichtenstein) being excluded.

All income obtained by non-residents from Romanian taxpayers for the provision of services rendered in Romania or abroad is subject to 16% WHT rate in Romania.

Non-resident companies not operating through a PE are subject to a 16% WHT on revenue sourced in Romania, such as interest, royalties, revenue from services, commissions, and revenue derived from liquidation of a Romanian legal entity.

Starting from 1 January 2016, the tax rate for dividend revenues derived by non-residents from Romania has been reduced from 16% to 5%.

Certain specific provisions and exceptions apply to non-resident WHT, as follows:

- A 50% WHT applies to payments made by Romanian residents (e.g. dividends, interest, royalties, commissions, services) to non-residents in countries that do not have an exchange of information agreement concluded with Romania, regardless of whether the beneficiary of the income is resident of a state with which Romania has concluded a DTT or not. However, this WHT is applicable only to the extent such payments result from artificial transactions.
- As Romania is an EU member state, the provisions of the Parent-Subsidiary Directive apply. Consequently, dividends paid by Romanian companies to companies resident in one of the EU/EEA member states are exempt from WHT if the dividend beneficiary has held, at the time of distribution, a minimum of 10% of the shares of the Romanian company for an uninterrupted period of at least one year.
- Dividend and interest income obtained from Romania by EEA registered pension funds is exempt from WHT.
- Romania has implemented the Interest and Royalties Directive. Payments of interest and royalties made by a Romanian company to another company resident in an EU member state are tax exempt from WHT if the non-resident company held, for an uninterrupted period of at least two years, at least 25% of the share capital of the Romanian company prior to the time of payment.

In order to apply EU legislation, non-resident recipients of the income are required to present a certificate of tax residence and a declaration attesting to compliance with the necessary requirements provided by the European Directives.

The New Tax Code, effective as of 1 January 2016, incorporates the recent amendments to the European Parent-Subsidiary Directive no. 2011/96/EU. The legislation introduces the anti-abuse rule for preventing unlawful tax practices used to obtain tax benefits contrary to the Directive’s principles. Also, dividends received by a Romanian legal entity from a foreign legal entity under certain conditions will not be taxed as long as those dividends are not treated as deductible expenses by the paying subsidiary.

The following categories of income derived by non-residents from Romania are exempt from WHT:
Romania

- Interest income and income derived from the sale of debt instruments issued by the Romanian authorities (e.g. government bonds).
- Revenue from international transportation and accessory services.
- Prizes obtained by individual non-residents from artistic, cultural, or sport festivals/competitions paid from public funds.
- Income obtained from a partnership constituted in Romania by a non-resident company (the related profits are subject to corporate profit tax).

Starting 1 June 2015, new measures have been introduced for the purpose of eliminating the discriminatory treatment applied to non-residents deriving interest revenues and/or revenues from freelancing activities in Romania that are subject to WHT applied to the gross value of the income.

Legal entities/individuals resident in member states of the European Union or the Economic European Area deriving interest revenues and/or revenues from freelancing activities in Romania may opt for the regularisation of the WHT by way of declaring and paying in Romania the corporate income tax/income tax related to the revenues obtained.

The tax withheld and paid is deemed as an advance payment in connection with the corporate income tax/income tax.

The possibility for regularisation of the WHT is only applied in the case of revenues derived from Romania by residents of member states of the European Union or the European Economic Area, provided that a Convention for the Avoidance of Double Taxation or a legal instrument for the exchange of information is concluded between Romania and those states.

**Notes**

1. The lower rate applies to a participation of at least 25%.
2. The lower rate applies to a participation of at least 10% where the dividends are paid out of profits that have been subject to a normal rate of company tax.
3. The lower interest rate applies if one of the following requirements is fulfilled:
   - The payer or the recipient of the interest is the government of a contracting state itself, a local authority or an administrative-territorial unit thereof, or the Central Bank of a contracting state.
   - The interest is paid in respect of a loan granted, approved, guaranteed, of insured by the government of a contracting state, the Central Bank of a contracting state, or any financial institution owned or controlled by the government of a contracting state.
   - The interest is paid in respect of a loan granted by a bank or any other financial institution (including an insurance company).
   - The interest is paid on a loan made for a period of more than two years.
   - The interest is paid in connection with the sale on credit of any industrial, commercial, or scientific equipment.
4. The lower rate applies to a participation of at least 10%.
5. The treaty concluded with the former Socialist Republic of Yugoslavia (Socialist republic) signed in 1986.
6. The zero rate applies to interest paid by public bodies.
7. The lower rate applies to copyright royalties (excluding films), computer software, patents, and know-how.
8. The 15% withheld at source in Romania on the commission paid to an Egyptian resident shall be given as a credit to be deducted from the income tax charged in Egypt.
9. The lower rate applies to royalties for computer software and industrial, commercial, or scientific equipment.
10. The lower rate applies if and as long as Germany, under its domestic law, does not levy WHT on interest paid to a resident of Romania.
11. The higher rate applies to industrial royalties.
12. The lower rate applies to a participation of at least 40%.
13. The lower rate applies if the beneficial owner is a company (other than a partnership) that directly holds at least 25% of the capital of the company paying the dividends.
14. The lower rate applies if the recipient is a company that directly owns at least 25% of the capital of the company paying the dividends.
15. The lower rate applies for royalties that consist of payments of any kind received as a consideration for the use of, or the right to use, any patent, trademark, design or model, plan, secret formula or process, or for information concerning industrial, commercial, or scientific experience, or for the use of, or the right to use, industrial, commercial, or scientific equipment, cinematograph films, or tapes, for television or broadcasting. The higher rate applies if the royalties consist of payments of any kind received as a consideration for the use of, or the right to use, any copyright of literary, artistic, or scientific work.
16. The lower rate applies if such recipient is the beneficial owner and if such interest is paid:
   - in connection with the sale on credit of any industrial, commercial, or scientific equipment
   - on any loan of whatever kind granted by a bank or other financial institution (including an insurance company)
   - on any loan of whatever kind made for a period of more than two years, or
• on any debt-claim of whatever kind guaranteed, insured, or directly or indirectly financed by or on behalf of the government of either contracting state.

17. The lower interest rate applies if the royalties are beneficially owned by a resident of a contracting state and refer to the right to use any copyright of literary, artistic, or scientific work, including motion pictures or films, recordings on tape or other media used for radio or television broadcasting, or other means of reproduction or transmission.

18. The lower rate applies to interest paid in connection with the sale on credit of any industrial or scientific equipment, of any merchandise by one enterprise to another enterprise, or on a loan granted by banks.

19. The lower rate applies to interest paid by public bodies.

20. The lower rate applies for cultural royalties; the higher rate applies for industrial royalties.

21. The lower rate applies for interest arising in a contracting state and derived by the government of the other contracting state, including local authorities thereof and administrative-territorial units thereof, the Central Bank or any financial institution performing functions of a governmental nature, or by any resident of the other Contracting State with respect to debt claims guaranteed or indirectly financed by the government of that other contracting state, including local authorities thereof and administrative-territorial units thereof, the Central Bank of that other contracting state or any financial institution performing functions of a governmental nature.

22. The lower rate applies for royalties related to the right to use any patent, trademark, design or model plan, secret formula or process, or for the use of, or the right to use, industrial, commercial, or scientific equipment, or for information concerning industrial, commercial, or scientific experience.

23. The lower rate applies if the beneficial owner of the dividends is the government of Kuwait or a company in whose capital the government directly or indirectly owns at least 51% and the remaining capital of such company is owned by residents of Kuwait.

24. The lower rate applies if the beneficial owner of the dividends is a company, including a bank or a financial institution, that is a resident of Kuwait and in whose capital the government directly or indirectly owns at least 25% and the remaining capital of such company is owned by residents of Kuwait.

25. Interest shall not be taxed in the state where it arises if the indebtedness on which such interest is paid, guaranteed, insured, or financed by the other state or by a financial institution that is a resident of that other state.

26. The lower rate applies for interest to which a resident of Romania is beneficially entitled if the loan or other indebtedness in respect of which the interest is paid is an approved loan or a long-term loan.

27. The lower rate applies for royalties for the use of, or the right to use, any copyright, trademark, design or model plan, secret formula or process, or for the use of, or the right to use, information concerning industrial, commercial, or scientific experience.

28. 0% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that directly holds at least 25% of the capital of the company paying the dividends; 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that directly holds at least 10% of the capital of the company paying the dividends; 15% of the gross amount of the dividends in all other cases.

29. The lower rate applies if, and as long as, the Netherlands does not levy a WHT on interest/royalties paid to a resident of Romania. Interest paid to a bank or financial institution (including an insurance company) and interest paid on a loan made for a period of more than two years are exempt.

30. The lower rate applies if, and as long as, the Netherlands does not levy a WHT on interest/royalties paid to a resident of Romania.

31. The lower rate applies if the recipient is a company (excluding partnership) and during the part of the paying corporation’s taxable year that precedes the date of payment of the dividends and during the whole of its prior taxable year (if any) at least 25% of the outstanding shares of the voting stock of the paying corporation was owned by the recipient corporation.

32. The lower rate applies if such interest is paid:
   • in connection with the sale on credit of any industrial, commercial, or scientific machine or equipment, or similar installation
   • on any loan of whatever kind granted by a bank, or
   • in respect of public issues of bonds, debentures, or similar obligations.

33. 10% of the gross amount of the royalties, where the royalties are paid by an enterprise registered with the Romanian Agency for Development, in the case of Romania and with the Board of Investments, in the case of the Philippines and engaged in preferred pioneer areas of activities; 15% of the gross amount of the royalties, in respect of cinematographic films and tapes for television or broadcasting; 25% of the gross amount of the royalties, in all other cases.

34. As long as Poland does not introduce in its domestic legislation the WHT of commissions paid to non-residents, the provisions of paragraph 2 of Article 13 are not applying and the commissions are taxable only in the residence country of the beneficial owner of the commission.

35. The lower rate applies if the beneficial owner of the dividends is a company that, for an uninterrupted period of two years prior to the payment of the dividends, directly owns at least 25% of the capital stock (capital social) of the company paying the dividends.

36. The lower rate applies to participations of at least 50%; the 5% rate applies to participations of at least 10%.

37. According to the treaty concluded between Romania and the former Yugoslavia (Federal Republic of).

38. The lower rate applies to royalties for the use of, or the right to use, any patent, trademark, design or model plan, secret formula or process, or industrial, commercial, or scientific equipment, or for information concerning industrial, commercial, or scientific experience.

39. The lower rate applies if the beneficial owner is a company that directly holds at least 25% of the capital of the company paying the dividends.

40. The lower rate applies if the dividends are beneficially owned by a resident of the other contracting state that is:
   • a company (other than a partnership) that directly holds at least 25% of the capital of the company paying the dividends
Romania

- a pension fund or other similar institution providing pension schemes, or
- the government of that other state, a political subdivision, local authority, or administrative-territorial unit thereof, or the Central Bank of that other state.

41. The lower rate applies to the extent that such interest is paid:
- in respect of a loan, debt-claim, or credit that is owed to, or made, provided, guaranteed, or insured by that state or a political subdivision, local authority, administrative-territorial unit, or export financing institution thereof, or
- by a company to a company of the other contracting state where such company is affiliated with the company paying the interest by a direct minimum holding of 25% in the capital or where both companies are held by a third company that has directly a minimum holding of 25%, both in the capital of the first company and in the capital of the second company.

42. The lower rate applies as long as the Swiss Confederation, in accordance with its domestic legislation, does not levy a WHT on royalties paid to non-residents.

43. The lower rate applies if the company paying the dividends engages in an industrial undertaking and the recipient company, excluding partnership, directly holds at least 25% of the capital of the former company.

44. 10% of the gross amount of the interest if it is received by any financial institution (including an insurance company); 20% of the gross amount of the interest in the case of interest on credit sale; 25% of the gross amount of the interest in other cases.

45. Interest arising in Romania and paid to government of Turkey or to the Central Bank of Turkey shall be exempt from Romanian tax.

46. Interest arising in a contracting state shall be exempt from tax in that state if it is derived and beneficially owned by the government of the other contracting state, a local authority or an administrative-territorial unit thereof, or any agency or bank unit or institution of that government, a local authority or an administrative-territorial unit, or if the debt-claims of a resident of the other contracting state are warranted, insured, or directly or indirectly financed by a financial institution wholly owned by the government of the other contracting state.

47. The lower rate applies for use or lease of any patent, trademark, design or model, plan, secret formula or process, or for information concerning industrial, commercial, or scientific equipment.

48. 0% if the beneficial owner of the dividends is (i) the government of any contracting state or any governmental institutions or entity thereof or (ii) a company that is a resident of either contracting state and the capital of which is directly or indirectly owned (at least 25%) by the government or governmental institutions of either contracting states.

49. Interest arising in Romania and paid to the government of the United Arab Emirates or its financial institutions shall be exempted from Romanian taxes.

50. The lower rate applies if the beneficial owner is a company that directly or indirectly controls at least 25% of the voting power in the company paying the dividends.

51. The lower rate applies in the case of royalties received as consideration for the use of, or the right to use, any copyright of literary, dramatic, musical, artistic, or scientific work (including cinematograph films and films or tapes for radio or television broadcasting).

52. If certain conditions are met.

53. 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that directly holds at least 25% of the capital of the company paying the dividends; 10% of the gross amount of the dividends in all other cases.

In order to apply the provisions of the relevant DTT, the non-resident recipient of the income should provide to the Romanian paying company a tax residency certificate attesting its tax residency for the purpose of the DTT.

If the tax rates prescribed by domestic legislation differ from those prescribed by the DTT, then the most favourable rate will apply. The tax rate applicable to income obtained by a resident of an EU member state in Romania is the most favourable rate provided under either domestic legislation, the EU Directives transposed into domestic legislation, or the DTT.

**Tax administration**

**Taxable period**

The fiscal year is the calendar year or the period during which the entity existed if it was set up or ceased to exist during that calendar year.

Taxpayers with a financial year different from the calendar year have the option to align the tax year to the financial year. The first amended tax year will start on 1 January and will end on the last day of the amended tax year.
Starting from 1 January 2016, the period in which a taxpayer has to communicate to the territorial tax bodies the intention of changing the fiscal year period has been reduced (i.e. within 15 days as of the beginning of the new fiscal year).

**Tax returns**

Taxpayers (except for non-profit organisations and taxpayers deriving most of their income from agriculture) must submit the profit tax returns by the 25th day of the first month following the first, second, and third quarters. The annual profit tax return is due by 25 March of the following year.

Non-profit organisations and taxpayers that obtain income mainly from agricultural activities have to declare and pay annual profit tax by 25 February of the year following the reporting period.

Taxpayers (except those specifically mentioned by law) may opt to declare and pay the annual profit tax by making quarterly advance payments (see Payment of tax below). The decision to take this option has to be communicated by 31 January of the fiscal year in which the taxpayer wants to apply the option and it has to be maintained for at least two consecutive years.

Large and medium-sized taxpayers have the obligation to submit fiscal forms online, using the [www.e-guvernare.ro](http://www.e-guvernare.ro) portal. The electronic signature of the tax returns can only be made using a qualified certificate issued by a legally accredited certification services provider. Other categories of taxpayers may file their tax return electronically as an alternative way of compliance.

Taxpayers required to withhold tax, with the exception of salary payers, are required to submit a statement to the tax authorities regarding the tax withheld for each beneficiary of income. This statement must be submitted for the previous year by the last day of February of the current fiscal year and refers to the tax withheld and paid by Romanian residents on income obtained in Romania by non-resident beneficiaries.

If taxpayers have failed to submit their tax returns, the tax authorities will assess, by way of default, all the tax obligations found in the taxpayer’s fiscal liability records for each fiscal period in which tax returns were not submitted.

**Payment of tax**

Taxpayers (except for banks, non-profit organisations, taxpayers deriving most of their income from agriculture) must pay the quarterly profit tax by the 25th day of the first month following the first, second, and third quarters. The annual profit tax has to be paid by 25 March of the following year.

Banks and branches of foreign banks in Romania are required to apply the system of advance quarterly profit tax payments. Other taxpayers, with some exceptions mentioned by law, may use this system as an alternative reporting and payment procedure.

The anticipated quarterly payments are calculated as a quarter of the previous year’s profit tax increased by the consumer price index (CPI) inflation rate, with the payments due by the 25th day of the month following the end of the quarter. The CPI inflation rate is published by Order of the Ministry of Finance by 15 April of the year for which the advance payments are made. For 2016, the CPI inflation rate is 100.5%. If taxpayers incur fiscal losses in the first year of the application of the option, the advance profit tax payments are calculated by applying the profit tax rate to the accounting profit for the period in which tax payments are made in advance.

Non-profit organisations and taxpayers that obtain income mainly from crop production have to pay annual profit tax by 25 February of the following year.
Newly established banks and branches of foreign banks in Romania (i.e. without a previous year history) or those that incurred fiscal losses in the previous year make quarterly advance payments at the level of the amount resulted from applying the profit tax rate on the accounting profit for the period for which the advance payment is made.

Starting from 1 January 2016, the deadline for declaring and paying the profit tax due for the last quarter of the fiscal year by taxpayers applying the advance payments system, whereby quarterly payments are determined as one-fourth of the profit tax due for the preceding year, has been amended. For the last quarter of the fiscal year, the deadline for the obligation to declare and make advance payment will be the 25th day of the last month of that fiscal year.

**Late-payment penalty**
The late-payment interest rate is 0.02% for each day of delay. Subsequent late-payment penalties also apply.

The penalty is set at 0.01% per day of delay. This penalty does not apply to main tax obligations not declared by the taxpayer and is established by a tax inspection authority decision.

Starting from 1 January 2016, a non-declaration penalty has been introduced, at 0.08% per day, starting from the day following the due date until the date of payment. This penalty applies to the main tax obligations declared incorrectly or not declared by the taxpayer and is established by a tax inspection authority decision.

**Non-resident companies**
Non-resident companies deriving income from the sale of real estate located in Romania or from the sale of shares held in a Romanian company (except if participation exemption applies) are subject to a 16% profit tax in Romania and are liable to declare and pay such tax. Non-residents may appoint a tax agent/representative to fulfil this requirement. However, if the buyer is a Romanian company or a Romanian PE of a non-resident company, the obligation to declare and pay the annual profit tax rests with the buyer.

Starting 1 January 2016, in case of income from sale/transfer of shares held by a non-resident in a Romanian entity, the obligation of the buyer to withhold the tax (in case the buyer is a Romanian entity) has been eliminated.

For capital gains tax declaration and payment, the Romanian legislation requires the following tax returns to be submitted:

- Quarterly statements, starting the 25th day of the month following the quarter in which the non-resident first earned capital gains taxable in Romania.
- An annual profit tax return.

The quarterly statements and annual return must be submitted during the entire period in which the non-resident is registered with the Romanian tax authorities, even if, throughout that period, it no longer carries out transactions generating taxable revenue in Romania.

**Tax audit process**
Tax inspections can be carried out in respect of all legal persons, irrespective of their organisational structure, that are bound to determine, withhold, and pay taxes, duties, contributions, and other amounts owed to the general consolidated budget.

The tax authorities may not inspect the same taxes for a period previously inspected unless additional data is obtained of which the tax inspectors were unaware when carrying out the first inspection or calculation errors were made.
Prior to the tax inspection commencing, the tax authorities must notify the taxpayer in writing, by sending a tax inspection notice, except in the cases explicitly laid down in the Fiscal Procedural Code.

Tax inspections are generally carried out at the taxpayer’s business premises and may not exceed a six-month period in the case of large taxpayers or three months for other taxpayers. For taxpayers that have secondary offices, the tax inspections may not exceed six months. The tax authorities may suspend the tax inspection if they deem it necessary for the clarification of the taxpayer’s tax status.

Before finalisation of the tax inspection, the tax authorities are required to inform the taxpayer of their findings and the tax consequences and allow the taxpayer to express its point of view, within three days from the ending of the tax inspection. Upon completion of the tax inspection, the authorities conclude a tax inspection report, based on which the tax assessment is made, which in turn is to be communicated to the taxpayer within 30 days from the ending of the tax inspection.

**Statute of limitations**
As a general rule, the statute of limitation is five years and, as of 1 January 2016, begins to run on 1 July (previously 1 January) of the year following that for which the tax obligation is for, if the law does not dispose otherwise. However, the statute can be suspended for the duration of a tax inspection but will recommence after the inspection has been completed.

**Topics of focus for tax authorities**
Areas of focus during tax audits include:

- VAT reimbursable positions.
- Deductibility of service expenses.
- Transfer pricing.
- Transactions with tax havens.

**Other issues**

**Mergers and acquisitions**
Mergers, spin-offs, transfers of assets, and exchanges of shares between two Romanian companies should not trigger capital gains tax.

In the case of a relocation of the registered office of a European Company (SE) and a European Cooperative Society (SCE) from Romania to another EU member state, no tax will apply on the difference between the market value of the transferred assets and liabilities and their fiscal value, if certain conditions are met. There will also be no tax on such movements at the shareholder level. Therefore, a tax basis step-up may be achieved in the case of Romanian shareholders.

If a Romanian company has a PE in another EU member state, and the Romanian company is dissolved as a result of a cross-border reorganisation, the Romanian tax authorities will not have the right to tax the PE.

There are provisions for the recovery of fiscal losses in the case of restructuring operations carried out by Romanian legal entities and those involving Romanian legal entities and residents of other EU member states. Herewith, the right to recover fiscal losses by legal entities that are successors of merger or spin-off operations is regulated. The recovery is correlated with the assets and liabilities transferred according to the merger/spin-off project. Also, some amendments are provided to the Romanian Company Law simplifying and, in some cases, reducing the time-frame for performing the legal steps that have to be followed in case of mergers and spin-offs.
Romania

For taxpayers going through a restructuring process, the right to carry forward non-deductible interest expenses and net foreign exchange losses is split between the beneficiary and the assignor in proportion to the assets and liabilities transferred.

Starting from 1 January 2016, the amendments applicable to domestic mergers, total or partial spin-offs, transfer of assets, and exchange of shares have been harmonised with those applicable to similar cross-border transactions. The neutrality of in-kind contributions to a company’s equity has been eliminated, except for cases involving a transfer of a going concern. Transfers carried out during a partial spin-off will not be subject to profit tax only if a transfer of a going concern takes place and the transferor maintains at least one line of activity.

**Intergovernmental agreements (IGAs)**

A Model 1 IGA is treated as ‘in effect’ by the United States (US) Treasury as of 2 April 2014.

The Model 1 IGA between the US and Romanian governments was signed on 28 May 2015 in order to improve international tax compliance and to implement the Foreign Account Tax Compliance Act (FATCA). The agreement will enhance transparency between the two countries in the field of taxation, promote growing cooperation in combating tax evasion practices, simplify implementation of financial information transmission, and increase legal certainty for financial institutions in Romania.

The agreement between Romania and the United States to improve international tax compliance and implementation of FATCA was ratified by the Romanian Parliament and published in the Official Gazette on 30 October 2015.

**Common Reporting Standard (CRS)**

The status regarding the implementation of the CRS, as developed by the OECD, is the following:

- On 29 October 2014, the Romanian Minister of Finance signed the Declaration to comply with the provisions of the Multilateral Competent Authority Agreement (MCAA) on Automatic Exchange of Financial Account Information.
- On 1 November 2014, the Convention on Mutual Administrative Assistance in Tax Matters was enforced in Romania.
- In February 2016, the Romanian government approved the draft law ratifying the MCAA.

These two official documents are part of the process of implementing the CRS issued in February 2014 by the OECD. Further on, Romania will sign bilateral agreements with other states with which the exchange of financial account information will be performed. At this stage, no such agreements have been signed.

Based on the Multilateral Competent Authority Agreement on Automatic Exchange of Financial Account Information, Romania is expected to implement the first automatic information exchange by September 2017.

In addition, Romania transposed the provisions of Directive 2011/16/EU as amended and supplemented by Directive 2014/107/EU regarding the mandatory automatic exchange of information in the field of taxation. As such, Romania introduced in the national legislation a requirement for financial institutions to implement reporting and due diligence rules, which are fully consistent with the CRS developed by the OECD.

**Significant developments**

**Recent significant changes in tax legislation**

**Tax incentives for green-field projects**

According to the Federal Law No. 144-FZ adopted in May 2016, the preferential tax regime currently available for investors in the Far East is now available for the whole territory of Russia.

In particular, starting from 2017, any Russian constituent region may introduce a reduced profits tax rate for investors, provided they meet certain criteria. The main requirement is the volume of their capital expenditures must be a minimum of 50 million Russian roubles (RUB) during three years or a minimum of RUB 500 million during five years.

The special tax rate may be as low as 0% during the first five years from the date the first income from the sales under an investment project is generated, and then 10% over the following five-year period.

---

**Taxes on corporate income**

**Profits tax**

Russian legal entities pay tax on their worldwide income (credit relief is available for foreign tax paid, up to the amount of the Russian tax liability that would have been due on the same amount under Russian rules).

The maximum profits tax rate for all taxpayers in the Russian Federation is set at 20% (2% is paid to the federal budget and 18% is paid to the budgets of constituent regions). The amount payable to the budgets of constituent regions may be reduced by the regions. So, the total minimum tax rate may come to 15.5% (e.g. a rate of 15.5% has been established for certain categories of taxpayers in Moscow, St. Petersburg, the Samara Region, the Kaluga Region, and several other regions).

Foreign legal entities pay tax on Russia-source income derived through a permanent establishment (PE) (at 20%) and are also subject to withholding tax (WHT) on income from Russian sources not related to a PE (at rates varying from 10% to 20%, depending on the type of income and the method used to calculate it).

**Local income taxes**

There are no local taxes on income in the Russian Federation.
Russian Federation

**Corporate residence**

Foreign legal entities managed from Russia can be recognised as Russian tax residents. Russian tax residency means that the worldwide income of such entities will be taxed in Russia.

The tax residence rules set basic and additional criteria for determining the place of management. With that, the rules specify situations that do not affect the residency status (e.g. preparation of consolidated financial statements in Russia). Nevertheless, when assessing the risk of a company being deemed as a Russian tax resident, it is advisable to evaluate all facts and circumstances, even if formally the activities exercised in Russia attributes to such exemptions.

The rules also specify four situations when a company may be deemed a Russian tax resident only on a voluntary basis:

- a company is a party of a production-sharing agreement
- a company is a foreign ‘active’ holding or sub-holding company (subject to compliance with certain conditions)
- a company is an operator of a new subsea field (or direct shareholder of such operator), or
- a company's core activity is offering for lease or sublease sea-going or mixed river-sea-going ships and/or international transportation of goods, passengers, and their baggage, and providing related services.

**Permanent establishment (PE)**

A permanent establishment is broadly defined as ‘a branch, division, office, bureau, agency, or any other place through which a foreign legal entity regularly carries out its business activities in Russia’.

**Other taxes**

**Value-added tax (VAT)**

VAT is a federal tax in Russia, payable to the federal budget.

There is no separate VAT registration in Russia. The established general tax registration requirements are applicable to all taxes, including VAT.

Taxpayers follow a 'classical' input-output VAT system, whereby a VAT payer generally accounts for VAT on the full sales price of the transaction and is entitled to recover input VAT incurred on inventory costs and other related business expenses. The Russian VAT system, although not originally based on the European Union (EU) model, has nonetheless moved more towards it. However, it still currently differs from the EU VAT system in various ways.

**Output VAT**

VAT usually applies to the value of goods, works, services, or property rights supplied in Russia. The standard VAT rate is 18% in Russia (with a lower rate of 10% applicable for certain basic foodstuffs, children's clothing, medicines and medical products, certain printed publications, etc.). The same VAT rates apply for imports of goods into Russia.

Exports of goods, international transportation and other services related to the export of goods from Russia, international passenger transportation, and certain other supplies are zero-rated with a right for input VAT recovery. The application of a 0% VAT rate and recovery of the respective input VAT should be confirmed by submitting a number of documents to the tax authorities within certain time limits. Special rules are in place regarding the documentary confirmation of the right to tax export supplies to Eurasian
Economic Union member countries at a 0% VAT rate, including input VAT recovery rights.

The list of VAT-exempt goods and services includes basic banking and insurance services, services provided by financial companies (depositaries, brokers, and some others), educational services by certified establishments, the sale of certain essential medical equipment, passenger transportation, warranty services, and certain other socially important services. Most accredited offices of foreign legal entities (as well as the accredited employees of these offices) may be exempt from VAT on property rental payments. Performance of VAT-exempt supply does not provide the right for recovery of attributable input VAT. Instead, costs associated with non-recoverable input VAT are, in most cases, deductible for profits tax purposes.

**Withholding VAT**

Russian VAT law provides rules for determining where services are supplied in terms of VAT. These rules divide all services into different categories in order to determine where they are deemed to be supplied for VAT purposes. For example, certain services are deemed to be supplied where they are performed, some where the 'buyer' of the services carries out the activity, and others where immovable property is located, etc.

Under the reverse-charge mechanism, a Russian company must account for VAT on any payment it makes to a non-tax registered foreign company if the payment is connected to a supply of goods or services considered to be supplied in Russia, based on the VAT place of supply rules and not falling under any VAT exemption based on domestic VAT law. In such circumstances, under the law, the Russian buyer shall act as a tax agent for Russian VAT purposes by withholding Russian VAT at the rate of 18/118 from payments to the foreign supplier and remit such withheld VAT to the Russian budget. The withheld VAT may be recovered by the Russian payers in accordance with the standard input VAT recovery rules as provided by law.

**Input VAT recovery**

Taxpayers are usually eligible to recover input VAT associated with the purchase of goods, works, services, or property rights, provided a set of rules established by the VAT legislation is met. Input VAT can potentially be recovered by the taxpayer in the following cases:

- VAT related to goods, works, or services acquired for the purpose of conducting VATable activities.
- VAT related to purchased goods, works, or services used in non-VATable transactions if a portion of expenses related to non-VATable operations does not exceed 5% of total amount of expenses for the respective quarter.
- Input VAT related to advance payments remitted to the Russian suppliers for goods (works, services).

**VAT compliance requirements**

Each taxpayer performing supply of goods, works, services, or property rights is liable to issue VAT invoices and provide them to customers. VAT invoices shall be issued within five days after the supply has taken place. The VAT invoice is a standard form as established by the government. Compliance with invoicing requirements is critical to the buyer's ability to recover input VAT.

Incoming and outgoing VAT invoices should usually be registered by taxpayers in special purchases and sales VAT ledgers.

VAT returns must be submitted electronically to the tax authorities on a quarterly basis. Purchases and sales books and respective journals of issued and received VAT invoices are attached to the electronic VAT return so that the tax authorities receive information on all VAT invoices and are generally able to reconcile all input and output VAT amounts.
Russian Federation

in Russia. VAT must be paid to the Russian budget after the end of each quarter in three instalments not later than the 25th day of each of the three consecutive months following the quarter, except for remittal of VAT withheld by Russian buyers under the reverse-charge mechanism, which is to be transferred to the Russian budget on the date of the external payment.

**Import VAT**
Import VAT is payable to customs upon importation of goods. The tax base for import VAT is generally the customs value of the imported goods, including customs duties and excise payments. Either the 18% or 10% VAT rate may apply upon import of goods in Russia, depending on the specifics of the goods.

A limited scope of goods is eligible for exemption from import VAT. The list of such goods includes, for example, certain medical products and goods designated for diplomatic corps. Relief from import VAT is also available on certain equipment (including their components and spare parts) that is not produced in Russia. The list of such equipment has been established by the Russian government.

**Import duties**
In addition to VAT, customs duties are levied on assets imported into the Russian Federation. The rate varies according to the tariff code for goods imported and their country of origin (generally, the rate varies from 0% to 20% of the customs value of imported goods). The rates have been reduced for a number of goods due to Russia’s accession to the World Trade Organization (WTO). There is special relief from customs duties for qualifying goods contributed to the charter capital of Russian companies with foreign investments.

The foundation of the Eurasian Economic Union, and deeper integration amongst Russia, Belarus, Kazakhstan, and Armenia (hereinafter, ‘the EAEU’), has resulted in unification of the customs legislation of the EAEU members, as well as the creation of a single customs territory, within which goods in mutual trade between the member states are moved without any clearance formalities. Members of the EAEU should apply a unified customs tariffs and customs valuation methodology, as well as general rules of non-tariff regulation and uniform technical regulations, etc.

**Customs processing fee**
Goods transported across the Russian Federation’s customs border are subject to a customs processing fee with a flat rate. The fee depends on a customs value of transported goods. The fee is usually small.

**Excise duty**
Excise taxes are generally paid by producers of excisable products on their domestic supplies. Excise taxes are also applied to import of excisable goods. Export of excisable products is generally exempt from excise taxes. Excise products include cars, tobacco, alcohol, and certain oil products. Special excise rates for each type of excisable goods are established in the Tax Code. The rates are widely variable and are based on various factors.

**Property tax**
The maximum property tax rate is 2.2%, and regional legislative bodies have the right to reduce this rate. The property tax is charged on fixed assets only (including leased out property). Intangible assets, inventories, work-in-progress, and financial assets are not subject to property tax in Russia.

Property tax is not charged on:

- fixed assets included in the first or second depreciation groups (equipment used for up to three years), or
• movable property entered into a company's books as of 1 January 2013 as fixed assets, except for property obtained as a result of:
  • reorganisation or liquidation of legal entities, or
  • transfer or acquisition from related parties.

From 2015 through 2034, a zero rate applies to trunk gas pipelines and structures constituting integral parts of said pipelines, as well as gas production project sites and helium production and storage facilities, subject to certain conditions (e.g. initial commissioning after 1 January 2015).

At the same time, the property of natural monopolies, which earlier was exempted, is now taxed. The tax rates applicable under the laws of Russia’s constituent regions to public railroads, trunk pipelines, power lines, and facilities constituting an integral technical component of the above objects cannot exceed 1.3% in 2016, 1.6% in 2017, and 1.9% in 2018.

In most cases, the average book value of fixed assets is taxed.

Certain real estate objects are taxed based on their cadastral value (that is close to their market value), namely:

• Administrative and business centres.
• Shopping centres and premises therein.
• Offices, retail outlets, public eateries, and consumer facilities.
• Immovable property of foreign entities with no PE in Russia or not related to their operations through a PE in Russia.

The tax rate may not exceed 2% in 2016 and following periods.

Actual tax rates and special rules for determining the taxable base for certain objects are currently being set by constituent regions. According to the law of the City of Moscow ‘On the property tax’, the tax rates will equal 1.3% in 2016, 1.4% in 2017, and 1.5% in 2018.

**Transfer taxes**

There are no transfer taxes in Russia.

**Transport tax**

Transport tax is imposed on certain types of land, water, and air transport registered in Russia. Fixed rates apply (per unit of horsepower, gross tonnage, or unit of transport), which may differ based on engine capacity, gross tonnage, and type of transport. The actual rates in Russia’s regions may be subject to a maximum ten-fold increase/reduction by the legislative bodies of the Russian Federation’s constituent subjects. Reporting and payment rules have been established by regional legislative authorities.

A multiplier (up to three) depends on the age and cost of a car. For example, in Moscow, the tax may reach RUB 200,000 per year for the most high-end class of vehicle.

**Payroll taxes**

There are no payroll taxes in addition to social contributions that an employer is responsible for.

**Social contributions**

Annual salaries of all employees are taxed under the following rules (effective 2016):

• Contributions to the Social Insurance Fund: Only the first RUB 723,000 are taxed (at a rate of 2.9%).
Russian Federation

- Contributions to the Pension Fund: The first RUB 800,000 are taxed at 22%, and the excess is taxed at 10%.
- Contributions to the Medical Insurance Fund: A 5.1% rate applies to the total salary.

Remuneration of foreign nationals temporarily staying in Russia are covered by (i) pension insurance contributions at a rate of 22% within the threshold of RUB 800,000 and a 10% top-up charge on remuneration paid in excess of the threshold and (ii) social insurance contributions at a rate of 1.8% within the threshold of RUB 723,000. The only exception made is for highly qualified specialists (with a respective work permit).

**Mineral Resources Extraction Tax (MRET)**
The MRET calculation depends on the type of mineral resource.

The MRET for coal, oil, gas, and gas condensate is calculated using the extracted volume of the respective resource. The tax rate is established as a fixed rate multiplied by various coefficients linked to world prices and field characteristics. A zero MRET rate applies to oil extracted from green fields in certain regions of Russia (e.g. East Siberia, internal and territorial waters located in the northern polar zone, the Azov and Caspian Seas, and the Nenets and Yamal Regions) during their initial production stage.

The MRET on other natural resources depends on the value of the resources extracted. The tax rate varies from 3.8% to 8%. For instance, 3.8% for potassium salt, 4.8% for ferrous metals, 6% for products containing gold, and 8% for non-ferrous metals and diamonds.

Reduced MRET rates apply to investors in Russia's Far East (see Regional incentives in the Tax credits and incentives section for more details).

**Environmental levy**
The environmental levy must be paid by manufacturers and importers of goods to be disposed of after they are no longer fit for use/consumption because of wear and tear, broken down by certain groups of goods. These groups of goods include paper and paper products, rubber and plastic products, textile and leather, metals, and electronics.

It should be noted that the levy is not technically a tax, and is established by a special law outside the Tax Code. It is levied on entities operating in specific industries whose products are determined to have an environmental impact that warrants compensation.

The levy is calculated by multiplying three values: (mass/quantity of goods subject to utilisation [or mass of packaging]) \* (levy rate) \* (utilisation standard in relative units).

As of 9 April 2016, all the elements required for calculation of the environmental levy amount for 2016 were established. The levy for 2016 should be paid not later than 15 April 2017. Moreover, during March and April 2017, manufacturers and importers are also required to prepare and submit the appropriate reports to the Russian Federal Service for Supervision of Natural Resource Usage (Rosprirodnadzor).

The following groups of goods will be subject to the highest environmental levy amounts in 2016: rechargeable batteries, various rubberware and tyres, casings, and rubber bags.

**Trade levy law**
A new chapter on ‘trade levy’ was introduced into the Tax Code. It authorises local authorities to introduce the levy in their respective municipalities (or federal cities).

The levy is to be applied towards individual assets used in retail and wholesale trade.

To date, the levy has only been enacted by Moscow (with effect from 1 July 2015).
**Branch income**

Foreign legal entities pay tax on profits attributable to a PE. A PE’s profits are computed on primarily the same basis as Russian legal entities, including composition of tax-deductible expenses. The Tax Code does not specifically mention the deductibility of expenses incurred abroad by a head office with respect to its PE in Russia (including a reasonable allocation of administration costs), although most double taxation treaties (DTTs) provide for such an option.

A special provision on taxable income of PEs has been recently introduced in Russian tax law. Taxable income of a PE in Russia should be determined while taking into account the PE’s functions, assets, and economic/commercial risks. This provision does not contain any guidance on specific transfer pricing methods that taxpayers should follow. In addition, court practice regarding this approach has not yet been developed.

If a foreign legal entity conducts free-of-charge preparatory and/or auxiliary services for the benefit of third parties, then a PE would be considered to have been formed, and the tax base is calculated as 20% of its expenses relating to such activities.

Foreign legal entities operating in Russia through a PE must follow the filing and payment schedules established for Russian legal entities. Although they do not make monthly advance payments, they should pay profits tax on a quarterly and annual basis only.

**Income determination**

The accounting period in Russia is a calendar year. Different periods are not permitted. The taxable base is calculated on an accrual basis (only small-scale taxpayers are still allowed to use a cash basis).

Taxable income is to be computed following the rules and principles established in the Tax Code. Taxpayers must maintain tax accounting registers. Statutory accounts may be used for computing tax items for which accounting methods are the same. In practice, most taxpayers use statutory accounts as a basis and apply adjustments so as to arrive at taxable income.

**Inventory valuation**

Inventory can be valued using one of the following methods: first in first out (FIFO), average cost, and individual unit cost.

**Capital gains**

Capital gains are subject to the same 20% profits tax rate and are added to ordinary income in order to arrive at the taxable income.

The number of tax baskets for taxpayers performing operations with securities and derivatives is two: (i) general and (ii) results from operations with non-listed securities and non-listed derivatives. The loss on the second basket cannot be offset with the profits on the first basket (however, the opposite offset is possible). It is worth noting that, starting from 2016, the price in transactions with securities and derivatives should be compared with a market price only if a transaction is controlled under transfer pricing rules.

Gains from the sale of fixed assets and other property are equal to the difference between the sale price and their net book value for tax purposes. Losses resulting from the sale of fixed assets should be deducted in equal monthly installments during the period, defined as the difference between their normative useful life and the actual time of use.
A significant exemption is available for capital gains from the sale or other disposal (including redemption) of shares in Russian entities (interests in Russian entities' charter capital), provided that, as of the date of sale, they have been continuously held by the taxpayer on the basis of right of ownership or another proprietary right for more than five years. One of the following conditions must be met in order to apply a 0% tax rate:

- The shares have been non-listed securities over the entire period of the taxpayer’s ownership.
- The shares are listed securities, and the company issuing shares has taken part in the technology/innovation sector of the economy over the entire period of the taxpayer’s ownership.
- As of the date of acquisition by the taxpayer, the shares qualified as non-listed securities and, as of the date of their sale by this taxpayer or of another disposal (including redemption) by this taxpayer, they are listed securities of the high technology/innovative sector of the economy.
- Less than 50% of total assets of the company issuing shares are represented by real estate in Russia (directly or indirectly).

Beneficial tax treatment will only apply to shares and interests in charter capital acquired by taxpayers after 1 January 2011 (this means that the exemption may be first used in 2016).

**Dividend income**

Dividends received by Russian legal entities from Russian or foreign legal entities are taxed in Russia at a 13% flat rate.

Dividends received from 'strategic investments' are exempt from Russian income tax. An investment is considered strategic when:

- the owner (recipient of dividends) owns at least 50% of the capital of the payer of dividends or owns depository receipts entitling it to receive at least 50% of the total amount of paid dividends and
- the share or depository receipts have been owned for at least 365 calendar days on the day dividends are declared.

Dividends from companies residing in 'offshore' zones with preferential tax regimes are not eligible for this tax exemption. The list of offshore zones is established by the Ministry of Finance.

Tax on dividends from abroad withheld in the source country may be credited against Russian tax.

The standard 15% tax rate is applicable to dividends paid by Russian legal entities to foreign legal entities. The tax should be withheld by the Russian legal entity paying dividends. The tax may be reduced based on a relevant DTT, usually to 10% or 5% (please see the Withholding taxes section for more details).

**Interest income**

Interest income is taxed on an accrual basis. A standard tax rate of 20% is applied to interest income, except for interest on state and municipal securities, which is taxed at 0%, 9%, or 15%, depending on the type of security. The rate may be reduced (typically to zero) according to the relevant tax treaty.

The level of interest income recognised for tax purposes may be subject to control (see Interest expense in the Deductions section for more details).
**Exchange gains and losses**
Starting from 2015, foreign exchange gains and losses are recognised for tax purposes on an accrual basis only.

Under the previous rules, gains and losses from settlements in a local currency of amounts denominated in (tied to) a foreign currency were taxable (deductible) on payment. For contracts concluded before 1 January 2015, the previous rules still apply.

**Foreign income**
Russian legal entities pay tax on their worldwide income. Credit relief is available for foreign taxes paid up to the amount of the Russian tax liability that would have been due on the same amount under Russian rules.

Current tax legislation does not contain provisions that allow tax deferral with respect to foreign income.

---

**Deductions**
Expenses are deducted on an accrual basis. The main criteria for deductibility of expenses is that the expense is (i) incurred in the course of an income-generating activity, (ii) properly documented, and (iii) not mentioned in the Tax Code as non-deductible for tax purposes.

**Depreciation and amortisation**
Two methods of depreciation are allowed: the straight-line method and the declining-balance method. The ranges of useful life of assets for tax purposes are established in the Classification of Fixed Assets adopted by the Russian government, for example:

<table>
<thead>
<tr>
<th>Fixed asset</th>
<th>Useful life (years)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Personal computer</td>
<td>2 to 3</td>
</tr>
<tr>
<td>Automobile</td>
<td>3 to 5</td>
</tr>
<tr>
<td>Truck (more than five tonnes capacity)</td>
<td>7 to 10</td>
</tr>
<tr>
<td>Aircraft</td>
<td>10 to 15</td>
</tr>
<tr>
<td>Blast furnace</td>
<td>20 to 25</td>
</tr>
</tbody>
</table>

Accelerated depreciation is permitted in respect to some types of property (a special ratio of up to three may be applied). It is prohibited to apply several special coefficients to a normal rate of depreciation.

An upfront premium is allowed, which means that a taxpayer has the right to deduct 10% (or 30% for certain categories of fixed assets) of the cost of fixed assets purchased (or constructed) in the month when the depreciation started. The balance is depreciated over the useful life of the asset. A premium must be recaptured if a relevant asset is sold within five years of its acquisition (the requirement to recapture does not apply to sales to unrelated parties starting from 2013).

Intangible assets are amortised over their useful life or over ten years (two years for certain types of intangible assets) if their useful life cannot be determined.

**Goodwill**
Under tax law, a mark-up (the difference between the acquisition value and net assets of the business [property complex] purchased) should be recognised as goodwill for tax purposes and may be amortised by a buyer over five years. However, this tax regime often does not apply since a business (subject of a deal) needs to be registered as a property complex with the state authorities. However, sellers almost never do this.
**Start-up expenses**
Russian tax law does not contain specific provisions on the deductibility of start-up expenses. In some cases, they may be deducted neither by a parent company nor by a subsidiary for tax purposes.

**Interest expenses**
Starting from 2015, the tax authorities can audit interest income and expenses only for transactions that are controlled under the Russian transfer pricing rules (this means transactions with related parties in most cases) and only in accordance with these rules.

The following table shows how the market corridors (safe harbours) are applied to interest accrued since 2016:

<table>
<thead>
<tr>
<th>Debt currency</th>
<th>Type of loan</th>
<th>Safe harbour rates</th>
</tr>
</thead>
<tbody>
<tr>
<td>Roubles</td>
<td>Rouble loans between Russian entities</td>
<td>75% to 125% of the CBRF key rate</td>
</tr>
<tr>
<td></td>
<td>Other rouble loans</td>
<td>75% to 125% of the CBRF key rate</td>
</tr>
<tr>
<td>Euros (EUR)</td>
<td>Foreign currency loans</td>
<td>EURIBOR +4% to EURIBOR +7%</td>
</tr>
<tr>
<td>Renminbi (CNY)</td>
<td>SHIBOR +4% to SHIBOR +7%</td>
<td></td>
</tr>
<tr>
<td>British pounds (GBP)</td>
<td>LIBOR in GBP +4% to LIBOR in GBP +7%</td>
<td></td>
</tr>
<tr>
<td>Swiss francs (CHF) or Japanese yen (JPY)</td>
<td>LIBOR in relevant currency +2% to LIBOR in relevant currency +5%</td>
<td></td>
</tr>
<tr>
<td>Other</td>
<td>LIBOR in USD +4% to LIBOR in USD +7%</td>
<td></td>
</tr>
</tbody>
</table>

**Bad debt**
Losses in the form of bad debts written off are usually deductible. Companies may create a bad debt reserve. The method of accrual for a bad debt reserve for tax purposes may differ from that in financial accounting, as it is based only on the overdue payment period (i.e. if the delay exceeds 90 days, the full amount of the account receivable is included in the reserve).

**Charitable contributions**
Russian tax law does not foresee any benefits with respect to charitable contributions. Such expenses are not deductible for tax purposes.

**Research and development (R&D) expenses**
R&D expenses (including R&D with a negative result) are deductible within one year after completion. Certain R&D expenses may be deducted using a coefficient of 1.5. The list of R&D categories is determined by the Russian government. A provision for future R&D expenses may be accrued for tax purposes.

**Insurance premiums**
Expenses related to all types of obligatory insurance are deductible and subject to state tariff limitations, wherever established. Voluntary insurance expenses are deductible to the extent that they relate to the insurance of damage and losses related to certain classes of assets, and the insurance of construction activity risks. Contract liability insurance expenses are deductible to the extent that such insurance is required by an international treaty to which Russia is a party or a generally accepted international trade custom.

Long-term life and pension insurance is deductible within a limit of 12% of the payroll fund. Voluntary medical insurance is deductible within a limit of 6% of the payroll fund.

**Fines and penalties**
Fines and penalties paid to contractors for violating contractual terms may be deducted for tax purposes.
Fines and penalties paid to a budget are not deductible.

**Taxes**
Taxes paid by a taxpayer, as well as social contributions of employers, are deductible for tax purposes. Trade levy is credited against profits tax.

**Net operating and capital losses**
Tax losses may be carried forward for up to ten years without limitation (i.e. they can be used to offset the entire taxable profit before a loss carryforward deduction). Carryback of losses, however, is not allowed.

Losses from the sale of fixed assets are recognised evenly during the remaining useful life.

Losses and income from different tax baskets are determined separately (please see Capital gains in the Income determination section for more details).

**Payments to foreign affiliates**
There are no special tax provisions with respect to the deductibility of payments to foreign affiliates for services provided. They may be deducted in full if general deductibility criteria are met. Charges with respect to administrative support provided by foreign affiliates may be deductible. However, due care should be taken with regard to the documents used to support the nature and actual receipt of service.

**Group taxation**

**Consolidated taxpayer regime**
The consolidated taxpayer regime is available for large Russian groups. A group can comprise two or more Russian entities where the direct or indirect equity interest of one member in the charter/share capital of the other members comes to at least 90%. In order to establish and apply this regime, all group members should meet the following requirements:

- At least RUB 10 billion in total profits tax, VAT, excise tax, and MRET paid during the year preceding the year of registration of a group taxpayer.
- At least RUB 100 billion in sales proceeds and other income.
- Total cost of assets of at least RUB 300 billion.

The advantages of applying this regime are the following. Firstly, transactions among members are not controllable under the transfer pricing legislation (with one exception: transactions with mineral resources subject to MRET with a percentage rate are still subject to control). Secondly, for the purposes of calculating profits tax, it is possible to consolidate members’ profits and losses.

A one-year moratorium has been imposed on the creation of consolidated groups in 2015. It is expected that the moratorium will be prolonged till 2019. The respective bill is currently under public discussion (it has not been submitted to the State Duma yet).

**Transfer pricing**
Russian transfer pricing legislation is essentially based on Organisation for Economic Co-operation and Development (OECD) principles, with certain important deviations. This legislation establishes criteria for related parties and controlled transactions, transfer pricing methods for determining arm’s-length prices/profitability, a list of permitted information sources, and compliance requirements.
Advanced pricing agreements (APAs) are available to Russian companies registered as the ‘largest’ taxpayers. Bilateral APAs are not presently available because relevant regulations have not yet been adopted.

**Thin capitalisation**

Under the Russian Tax Code, interest on loans received from foreign shareholders (as well as their Russian affiliates, or loans guaranteed by foreign shareholders or their Russian affiliates) owning more than 20% of capital is deductible, provided that the loans do not exceed the amount of equity by three times (12.5 times for banks and leasing companies). If loans exceed this limit, excess interest on the loans will be reclassified for taxation purposes as dividends paid to foreign shareholders. Such dividends are not deductible for profits tax purposes and are subject to WHT at the rate of 15% (treaty benefits may apply to reduce the rate).

Temporary changes (from 1 July 2014 to 31 December 2016) due to the significant drop in the Russian rouble’s exchange rate in 2014 were also introduced. In particular, currency exchange rates were frozen as of 1 July 2014 with respect to ‘old’ loans (obtained before 1 October 2014) for the purpose of calculation of borrower’s net assets because many taxpayers could not meet the 3:1 criteria.

Starting from 2016, interest on loans from independent banks are exempted from the thin capitalisation rules (provided the debt [both principal and interest] was not repaid by a foreign shareholder or its affiliates as a result of execution of a guarantee to the bank).

Significant developments in thin capitalisation rules will come into effect from 1 January 2017. The new version of the rules is aligned with transfer pricing rules (including, among other things, a transition from the 20% participation criteria to 25% or 50%, as appropriate, of each link in the ownership chain).

The major change involves expanding the scope of thin capitalisation rules to include loans from foreign related companies that do not hold a direct or indirect interest in a Russian borrower (‘sister’ companies). This position corresponds to the current Russian court practice; however, no criteria for the substance of a foreign sister company is provided to shield the loan from the scope of the rules.

Among other adopted changes:

- Loans exclusively within Russia will not be controlled (provided certain requirements are met).
- All listed liabilities of a taxpayer should be considered in aggregate to calculate the tax (this provision could considerably expand the scope of the rules).
- A debt arising upon the issue of Eurobonds is not subject to the rules.

**Controlled foreign companies (CFCs)**

CFC rules have been in effect starting since 1 January 2015. The new law introducing these rules was first signed in November 2014 and amended in 2015. New (latest) draft amendments to the law were released on 14 December 2015.

These rules apply to Russian tax residents (controlling parties) who control foreign tax resident companies and non-corporate structures (including trusts).

In particular, a controlling party of a CFC means an individual or legal entity with a direct or indirect interest in a CFC (for individuals, jointly with spouses and minor children) of:

- over 25%, or
over 10% if total participatory interest of all Russian tax residents in the CFC is over 50%.

Please note that 2015 was a transition period, during which a higher participatory interest threshold of more than 50% was applied.

Taxpayers have to file several types of notifications to the tax authorities, including:

- Notification on participation in foreign companies (if direct or indirect participatory interest is above 10%), as well as on incorporation of foreign non-corporate structures or execution of the control over such structures (certain specific aspects should be taken into account with this respect), should be provided within a month’s period starting from the date of beginning of participation. The fine for failure to provide the notification in time or provision of incorrect information is RUB 50,000 for each company.
- Notification on CFCs should be provided annually by 20 March (starting in 2017). The fine for failure to provide the notification in time or provision of incorrect information is RUB 100,000 for each CFC.

Profits of certain CFCs will be exempt from taxation in Russia (but not from the obligation to file respective notifications), provided that one of the following special exemptions apply:

- ‘Active’ companies and ‘active’ holding and sub-holding companies, which meet certain criteria.
- Companies that have (i) an effective tax rate of at least 3/4 of the average weighted Russian tax rate and (ii) their permanent location is a ‘good’ jurisdiction (i.e. treaty country, except for those countries that do not exchange tax information with Russia).
- A number of other exemptions.

In order to apply an exemption, a controlling party must submit documents to the tax authorities certifying compliance with the conditions under which CFC income is not taxable in Russia.

CFC income shall be subject to a 20% tax rate if a CFC is controlled by a legal entity and a rate of 13% if it is controlled by an individual. The amount of taxable profit can be reduced by the amount of dividends paid out of the CFC’s profits (certain specific issues should be taken into account).

Only the profits of CFCs determined in periods starting from 2015 are subject to tax in Russia. CFC profits of 2015 shall be included to the annual income tax return for the first time by 28 March 2017 (for Russian legal entities) and by 30 April 2017 (for Russian individuals).

CFC profit is subject to tax in Russia if the amount of profit for the respective period exceeds the threshold of RUB 10 million (other thresholds will apply during the transition period: RUB 50 million for 2015, RUB 30 million for 2016).

Profits of a CFC shall be determined based on financial statements prepared in accordance with its personal law (provided that the CFC’s financial statements are subject to mandatory audit under the CFC’s personal law and the CFC’s permanent location is a treaty country) or according to Russian tax rules (in all other cases). These provisions potentially may be mitigated.

Underpayment of CFC tax is fined at 20% on the underpaid tax amount, but not less than RUB 100,000. There is also a transition period exception, according to which fine is not levied for underpayment of CFC profits of 2015 to 2017 tax periods.
Russian Federation

Russian legislation allows one to credit tax paid by a CFC against CFC tax due by the controlling party in Russia.

There are a number of exemptions that allow one to structure the transfer of assets and to liquidate a foreign company without tax exposures in Russia. These exemptions are aimed at encouraging taxpayers to move assets from offshore jurisdictions to Russia. However, they are available for liquidations finalised by 2017 (the deadline may be extended under certain circumstances).

---

**Tax credits and incentives**

At present, there are several types of incentives in Russia:

- Regional incentives granted by regional or local authorities with respect to taxes paid to their budgets.
- Special tax regimes in special economic zones (SEZs).
- Incentives related to certain activities (e.g. activities related to R&D, information technology).
- Incentives related to particular projects (e.g. Skolkovo, the FIFA 2018).

The incentives are briefly described below.

It is also worth mentioning that Russian tax law provides for special tax regimes to support small and medium-size businesses. These include a unified and simplified regimes, as well as a unified agricultural tax.

**Regional incentives**

Regional incentives in the form of reduced rates for taxes payable to regional budgets (primarily profits tax and property tax) are granted to certain classes of taxpayers (typically large investors or entities operating in specific industries).

**Russian Far East incentives**

Tax breaks for investment projects in several Far Eastern and Siberian regions are available. The law establishes a zero rate for profits tax payable to the federal budget and allows investors in the 13 eligible regions to use lower regional tax rates. So, in contrast to the regular 20% rate, the beneficial tax rate adopted by most of these regions usually comes to 0% during the first five years from the date the first income from the sales of goods under an investment project is generated, and then 10% over the following five-year period.

In addition, reduced rates are applicable with respect to the MRET payable by participants in regional investment projects. They apply to a whole range of mineral resources, including gold, coal, ferrous and non-ferrous mineral ores, etc.

The law sets thresholds for capital investments and timeframes for their implementation according to the specifics of a given investment project of:

- at least RUB 50 million within three years, or
- at least RUB 500 million within five years.

An investment project must be focused on producing goods exclusively within one of the eligible Russian constituent regions.

Please note that starting from 2017 any Russian constituent region is entitled to introduce such a regime for investors in their territory.
In addition, Fast-track Development Zones (FDZs) will be created in the Russian Fast East. FDZs will offer special terms for doing business for start-up companies, including tax holidays and simplified rules for hiring foreign employees.

**Special economic zones (SEZs)**
The following types of SEZ are established in Russia:

- Technical research and implementation zones for scientific projects.
- Industrial production zones to develop industrial products.
- Tourism-recreation zones for the development and effective use of Russian tourist resources.
- Port zones.

SEZ residents may take advantage of different combinations of benefits, such as reduced profits tax, exemption from property tax and land tax, and, in some cases, exemption from customs duty and VAT.

**Activities incentives**
The following 'activities' incentives are available to taxpayers in Russia:

- Certain R&D services are exempt from VAT.
- Certain R&D service-related expenses, as listed by the government, are deductible using a coefficient of 1.5.
- Fixed assets used in science and technology may be depreciated with an accelerated coefficient of up to 3.
- Reduced rates for contribution payments to social funds are established for information technology (IT) companies.

**Special project incentives**
Participants in the Skolkovo Innovation Centre enjoy a number of benefits, the primary of which are the following: exemption from profits and property taxes, exemption from VAT obligations, and reduced rates for mandatory contributions to social funds.

**Foreign tax credit**
Credit relief is available for foreign taxes paid up to the amount of the Russian tax liability that would have been due on the same amount under Russian rules.

**Withholding taxes**
Under the general provisions of the Tax Code, income received by a foreign legal entity and not attributed to a PE in Russia is subject to WHT in Russia (to be withheld at source). WHT rates are as follows:

- 15% on dividends and income from participation in Russian enterprises with foreign investments.
- 10% on freight income.
- 20% on certain other income from Russian sources, including royalties and interest.
- 20% of revenue or 20% of the margin on capital gains (from the sale of immovable property located in Russia or non-listed shares in Russian subsidiaries where the immovable property located in Russia represents more than 50% of assets).

Taxation of margins (rather than gross income received from the above sales) may be applied only if proper documentary support of expenses is available.

Income of foreign organisations (not performing activities in Russia through a PE) from the sale of certain listed securities of Russian entities (and their derivatives) is not regarded as income derived from sources in Russia subject to WHT.
Russian Federation

The list of exempt income (not subject to WHT) also includes: (i) interest payments on Russian state securities; (ii) interest payments on tradable bonds, issued in accordance with the laws of foreign states; and (iii) payments made by Russian companies to finance coupons on Eurobonds issued by special purpose vehicles (SPVs) incorporated outside of Russia.

Tax should be withheld by the tax agent and paid to the Russian budget. WHT rates may be reduced under a relevant DTT, provisions of which may be applied based on confirmation of tax residence, which is to be provided by a foreign company to the Russian tax agent prior to the payment date (no advance permission from the Russian tax authorities is required) and also as long as general conditions are fulfilled (proof of beneficial ownership, etc.).

The Russian tax authorities recognise the terms of former Union of Soviet Socialist Republics' (USSR) treaties until they are renegotiated by the Russian government. Furthermore, the list of effective tax treaties is continuously updated.

‘Beneficial ownership’ concept
A concept of the actual owner of income (i.e. ‘beneficial owner’) was introduced into tax legislations by so-called deoffshorisation law. It determines the ability to apply lower tax rates under a DTT.

Tax authorities have not come up yet with a concise test of beneficial ownership, which means that Russian tax agents will not be entirely comfortable applying reduced tax rates on income paid abroad. Making any payments, they will have to consider the risk of additional tax and penalties to be paid at their own expense.

According to the law, a tax agent has the right to request a confirmation that a foreign organisation is a beneficial owner of income. If the tax agent becomes aware of who is the beneficial owner of income, the law allows for using a corresponding treaty with the country where this beneficial owner resides (for dividends, indirect interest is treated as direct interest).

If the beneficial owner is a Russian tax resident, the income paid is taxed under the Russian Tax Code rules (please note that a zero tax rate on dividends is applied under additional conditions). In such cases, the tax authorities must be notified about the payments made.

Treaty rates
The list below indicates the WHT rates mentioned in treaties.

Notes

1. In most cases, a 0% tax rate applies to interest payments to the governments of contracting states and to payments guaranteed by the government.
2. If the beneficial owner of the dividends directly holds at least 25% of the capital of the company paying the dividends.
3. If the resident of the other contracting state contributed at least 40,000 United States dollars (USD) (or an equivalent amount in the domestic currency of either of the contracting states) to the authorised capital of the enterprise paying the dividends.

4. If the following conditions are met:
   a. Dividends are paid to a company (other than a partnership) that directly holds at least 10% of the capital of the company paying the dividends.
   b. The resident of the other contracting state has invested a minimum of 700,000 Australian dollars (AUD), or an equivalent amount in Russian roubles, in the capital of that company.
   c. If the dividends are paid by a company that is resident in Russia, the dividends are exempt from Russian tax.

5. If the beneficial owner of the dividends is a company (other than a partnership) that directly holds at least 10% of the capital of the company paying the dividends and the participation exceeds USD 100,000, or an equivalent amount in any other currency.

6. If the beneficial owner of the dividends is a company that owns at least 10% of the voting stock (or in the case of Russia, if there is no voting stock, at least 10% of the statutory capital) of the company paying the dividends.

7. 0% WHT is applied to the following types of Royalties:
   a. Royalties for the production or reproduction of any literary, dramatic, musical, or other artistic work (but not including royalties for motion picture films or work on film or videotape or other means of reproduction for use in connection with television broadcasting).
   b. Royalties for the use of, or the right to use, computer software.
   c. Royalties paid to an unrelated party for the use of, or the right to use, any patent or any information concerning industrial, commercial, or scientific experience.

8. For the use of any industrial, commercial, or scientific equipment.

9. If the beneficial owner of the dividends is a company that directly holds at least 25% of the capital of the company paying the dividends (this share should be at least USD 100,000 or its equivalent in another currency).

10. If the beneficial owner of the dividends is a company (excluding partnerships) that directly holds at least 25% of the capital of the company paying the dividends.

11. If the beneficial owner of the dividends has directly invested in the capital of the company not less than USD 75,000.

12. If the beneficial owner of the dividends is a company (other than a partnership) that directly holds at least 10% of the capital of the company paying the dividends and the foreign capital invested exceeds USD 100,000 or its equivalent in the national currencies of the contracting states at the moment when the dividends become due and payable.

13. If the following conditions are met:
   a. Where the beneficial owner of the dividends has invested in the company paying the dividends, irrespective of the form or the nature of such investments, a total value of at least 500,000 French francs (FF) or the equivalent in another currency; as the value of each investment is appreciated as of the date it is made.
   b. Where that beneficial owner is a company that is liable to tax on profits under the general tax laws of the contracting state of which it is a resident and which is exempt from such tax in respect of such dividends.

14. If only one of the conditions of 13 (a) or 13 (b) are met.

15. If the beneficial owner of the dividends is a company that directly holds at least 10% of the basic or common stock of the company paying the dividends and such capital share amounts to at least EUR 100,000 or its equivalent in another currency.

16. If the beneficial owner of the dividends is a company (other than partnership) that directly holds at least 25% of the capital of the company paying the dividends and the foreign capital invested exceeds USD 100,000, or its equivalent in the national currency of the contracting state.

17. If the beneficial owner of the dividends is a company that directly holds at least 10% of the capital of the company paying the dividends (this share should be at least USD 100,000, or its equivalent in another currency).

18. Literary, artistic, or scientific work including cinematograph films and films or tapes for radio or television broadcasting.

19. If the beneficial owner of the dividends is a company (other than a partnership) that directly holds at least 30% of the capital of the company paying the dividends and invests not less than USD 200,000 or the equivalent in local currencies to the company paying the dividends.

20. The 0% rate applies to dividends paid to governmental agencies or financial institutions.

21. If the beneficial owner is a company (other than a partnership) that directly holds at least 25% of the capital of a company paying dividends and the capital invested exceeds USD 75,000.

22. Applicable to interbank loans only.

23. If the beneficial owner of the dividends directly holds at least 10% of the capital in the company paying the dividends and the investment exceeds EUR 80,000 or its equivalent in roubles.

24. The 15% rate applies to profits received from a joint venture by a resident of Malaysia.

25. Any patent, trademark, design or model, plan, secret formula or process, or any copyright of scientific work, or for the use of, or the right to use, industrial, commercial, or scientific equipment, or for information concerning industrial, commercial, or scientific experience.

26. Cinematograph films or tapes for radio or television broadcasting, any copyright of literary or artistic work.

27. If the invested amount equals or exceeds FF 1 million.

28. 5% where the participation interest is at least 20% (if the owner is not a partnership) and the investment exceeds EUR 100,000; 10% in all other cases.

29. If the beneficial owner of the dividends has invested in the capital of the company paying dividends and the investment exceeds EUR 500,000.

30. If the beneficial owner of the dividends is a company (other than a partnership) that directly holds at least 25% of the share capital of the company paying the dividends and has directly invested in the equity share capital of that company not less than the equivalent of USD 100,000.
31. If the beneficial owner of the dividends is a company (other than a partnership) that directly holds at least 25% of the capital of the company paying the dividends and has invested in it at least 75,000 European Currency Units (ECU) or its equivalent in the national currencies of the contracting states.

32. If the beneficial owner of the dividends is a company that, for an uninterrupted period of two years prior to the payment of the dividends, directly owned at least 25% of the capital of the company paying the dividends.

33. If the beneficial owner of the dividends is the government of the other contracting state or if the beneficial owner of the dividends is a company that directly holds at least 15% of the capital of the company paying the dividends and has invested in it at least USD 100,000 or its equivalent in other currencies.

34. If residents of the other contracting state hold at least 30% of the capital of the company paying the dividends and have directly invested in the equity share capital (authorised fund) of that company an amount of not less than USD 100,000 or its equivalent in the currency of the first state.

35. If the following conditions are met:
   a. The beneficial owner of the dividends is a company (other than a partnership) that has invested at least ECU 100,000 or its equivalent in any other currency in the capital of the company paying the dividends.
   b. Those dividends are exempt from tax in the other contracting state.

36. If only one of the conditions of 35 (a) or 35 (b) are met.

37. If the beneficial owner of the dividends is a company (other than a partnership) that directly holds 100% of the capital of the company paying the dividends; or, in the case of a joint venture, not less than 30% of the capital of the joint venture; and, in either case, the foreign capital invested exceeds USD 100,000 or its equivalent in the national currencies of the contracting states at the moment of the actual distribution of the dividends.

38. If the beneficial owner of the dividends is a company (other than a partnership) that directly holds at least 20% of the capital of the company paying the dividends and the foreign capital invested exceeds 200,000 Swiss francs (CHF) or its equivalent in any other currency at the moment when the dividends become due.

39. Any copyright of literary, artistic, or scientific work.

40. Any patent, trademark, design or model, plan, secret formula or process, any computer software programme, or for information concerning industrial, commercial, or scientific experience.

41. If a resident of the other contracting state has invested in its joint-stock capital (registered fund) at least USD 50,000 or its equivalent in the national currencies of the contracting states.

42. In the case of banks.

43. In the case of fees for technical assistance.

44. If the residents of the other contracting state have directly invested in the equity share capital of that company not less than USD 10 million.

**Tax administration**

All taxpayers are required to obtain tax registration and be assigned a taxpayer identification number, irrespective of whether their activities are subject to Russian taxation.

**Taxable period**

The taxable period runs from 1 January to 31 December.

**Tax returns**

An annual profits tax return must be filed by 28 March of the year following the end of the reporting year.

**Payment of tax**

Companies pay advance profits tax payments on a monthly or quarterly basis. The final payment for the year is due by 28 March of the following year.

**Tax audit process**

Tax dispute resolution at the pre-trial (administrative) stage

Tax disputes happen quite frequently in Russia. Most corporate taxpayers have to go through the tax litigation process at least once while doing business in the country.

At present, if taxpayers seek to challenge decisions and other documents/actions (or failure to act) of the tax authorities in court, before going to court, they must first contest such decisions/actions with the relevant higher tax office.
In recent times, tax disputes have been increasingly resolved at the pre-trial (administrative, superior tax office) stage. However, taxpayers cannot formally negotiate tax audit results or enter into formal settlement agreements with the tax authorities at the pre-trial stage. So, in many cases, they still must litigate in order to uphold their rights.

**Tax dispute resolution in court**

Taxpayers can file claims against the tax authorities through arbitrazh courts (i.e. courts that review and resolve economic disputes mainly among legal entities/entrepreneurs or between legal entities/entrepreneurs and state authorities, including the tax authorities). Claims may be filed with a court within three months after a contested decision takes effect or within three months after a taxpayer discovers that its rights have been violated (provided that the taxpayer has already sought redress through the mandatory pre-trial stage mentioned above).

Courts of the first instance (first level) initially review disputes and issue decisions. Decisions of a first instance court can be appealed to appellate courts (second instance or level) and cassational courts (third instance or level). If litigation goes through all three instances (levels), the process usually takes up to a year.

Resolutions/decisions of courts at these three levels may be appealed to the Russian Federation Supreme Court (as a supervisory authority). However, in practice, very few such disputes are actually heard by the Supreme Court.

**Statute of limitations**

The statute of limitations is established for three years. For example, tax authorities may examine 2015, 2014, and 2013 profits tax returns by conducting a site tax audit in 2016.

**Topics of focus for tax authorities**

The recent court practice demonstrates that tax authorities concentrate on (i) tax evasion schemes and relationships with one-day contractors, (ii) financing structures and thin capitalisation rules, and (iii) royalties paid abroad.

---

**Significant developments**

Rwanda enacted a new investment code (Law no. 06/2015 of 28 March 2015) to replace the old code. The new code became effective from 27 May 2015 and is more focused on priority sectors. The priority sectors identified include exports, industrial manufacturing, energy, transport, information and communications technology (ICT), financial services, and construction of low-cost housing.

The new investment code has phased out incentives that did not achieve the code’s strategic objectives, such as tax discounts, construction incentives, and those not conforming to East African Community (EAC) Customs Union rules.

*See the Tax credits and incentives section for a description of the incentives available to a registered investor under the new investment code.*

---

**Taxes on corporate income**

Rwanda operates both a source and residence-based taxation system. This means that any income that is deemed to be from sources within Rwanda will be liable to tax in Rwanda. In addition, resident entities are taxed on their worldwide income. However, where such income is taxed in another country, a tax credit is allowed, which does not exceed the tax that would have been payable on the same income in Rwanda.

Non-resident entities are taxed on income sourced in Rwanda through a permanent establishment (PE).

The standard corporate income tax (CIT) rate is 30%; however, small businesses and individuals (whose business has a turnover of less than 20 million Rwanda francs [RWF] in a tax period) pay profit tax at the rate of 4% of turnover.

**Special CIT regimes**

There are special CIT rates for certain industries or sectors of the economy.

Newly listed companies on capital markets are taxed as follows for a period of five years:

- If a company sells at least 20% of their shares to the public, the CIT rate is 28%.
- If a company sells at least 30% of their shares to the public, the CIT rate is 25%.
- If a company sells at least 40% of their shares to the public, the CIT rate is 20%.

Venture capital companies registered with the Capital Markets Authority in Rwanda enjoy a CIT rate of 0% for a period of five years. This is also the same rate applicable to companies that carry out micro-finance activities.
Rwanda

Registered investors in priority sectors can enjoy reduced CIT rates and tax holidays where certain conditions and thresholds are fulfilled. See the Tax credits and incentives section for more information.

**Local income taxes**

Rwandan legislation does not provide for any local taxes on income.

---

**Corporate residence**

Rwanda incorporated companies or associations are treated as Rwanda resident entities. In addition, companies incorporated overseas are also treated as Rwandan resident companies if they have a place of effective management in Rwanda at any time during the tax period. The term ‘effective management’ is not defined in the tax law.

Rwandan government companies are also considered to be residents in Rwanda.

**Permanent establishment (PE)**

The definition of a PE for Rwanda is largely based on the Organisation for Economic Co-operation and Development (OECD) Model Tax Convention definition. According to Rwandan tax law, a PE means a fixed place of business through which the business of a person is wholly or partially carried on.

For non-resident companies, CIT liability will arise if they have a PE in Rwanda through which a trade is carried on. The profits attributable to the PE will be taxed in Rwanda. However, there are no rules or guidance on how the PE's profit should be evaluated for Rwanda tax purposes. The general understanding is that entities are required to use transfer pricing methods to determine the level of profits that should be attributable to the PE based on the functions it performs.

In particular, the existence of the following triggers a PE: an administrative branch; a factory; a workshop; a mine, quarry, or any other place for the exploitation of natural resources; a building site; or a place where construction or assembly works are carried out.

There are a number of specific exceptions from the definition of a PE. A person is deemed not to have a PE if that person:

a. uses facilities solely for the purpose of storage or display of goods or merchandise
b. maintains a stock of goods or merchandise solely for the purpose of storage or display
c. maintains a stock of goods or merchandise solely for the purpose of processing by another person
d. has a place of operation aimed purposely at purchasing goods or merchandise or at collecting information related to one’s business, or
e. has a place of operation solely for the purpose of carrying on preparations of one’s activities and performing any other activities that make them more effective.

Where an agent, except an independent person concerned with (e) above, acts on behalf of a company (or person) and the agent has capacity to conclude contracts in the name of that company, the company is considered as having a PE in respect of activities one’s agent undertakes except if such activities of the agent are limited to those mentioned in (b) above.

However, a person is not considered as having a PE if it carries out activities through a broker, general commission agent, or any other private agent in accordance with procedures of the ordinary course of the activities of such an agent.

A company that controls or is controlled by another company does not, of itself, constitute either company to be a PE of the other.
**Other taxes**

**Value-added tax (VAT)**
VAT is levied on the supply of taxable goods and services in Rwanda as well as on the importation of taxable goods and services into Rwanda.

The threshold for VAT registration is taxable turnover of RWF 20 million in any relevant year or RWF 5 million in a calendar quarter.

The standard VAT rate is 18% and applies to goods and services that are neither exempt from VAT nor zero-rated.

Export of goods and services are subject to VAT at 0%. Supplies to privileged persons, such as goods imported for official purposes of diplomatic missions, supplies made under special arrangements between the government of Rwanda and donors, and supplies or importation made under special technical aid agreements, are subject to VAT at 0%. Persons entitled to zero rating of goods or supplies received by them are required to pay VAT at the time of receiving the supply and then apply for a refund of the VAT paid.

Some supplies are exempt from VAT, the main categories being supply of water service, goods and services for health purposes, educational materials and services, transport services, books and newspapers, financial and insurance services, lending or leasing interests in land or building for residential purposes, funeral services, energy supplies, all unprocessed agricultural and livestock products, mobile handsets, and equipment for information, communication, and technology.

Suppliers who provide zero-rated services or goods are entitled to recover input VAT incurred in making the supply. This is unlike exempt supplies, where input VAT recovery is not allowed. Therefore, zero rating is preferable to exemption.

The VAT returns and relevant payment are due to the Rwanda Revenue Authority (RRA) on a monthly basis by the 15th day of the following month. However, taxpayers with annual turnover of RWF 200 million or below may elect to file VAT returns or make payments on a quarterly or monthly basis.

**Customs duties**
Rwanda is a member of the East African Community, which uses the East African Community Customs Act (EACMA) for levying import duty. The EACMA prescribes Common External Tariffs (CET) for goods originating outside the Customs Union. Goods are generally subject to import duty of 0% for raw materials and capital goods, 10% for intermediate goods, and 25% for finished goods.

Goods will only enjoy the preferential community tariffs if they meet the EAC Customs Union Rules of Origin.

Certain industries and items are also entitled to exemptions under the customs law (e.g. assemblers of bicycles and motor cycle kits, importers of gas cylinders, certain hotel equipment, solar equipment, and energy saving bulbs).

Enterprises established in Free Trade Zones are exempt from customs duty on machinery and inputs for exported products. There also exists an import duty remission scheme, where import duty may be remitted for raw materials used to manufacture goods for export. This is subject to a requirement for proof of export and execution of the bond.

In 2015, a new law establishing the infrastructure development levy on imported goods was introduced. According to this law, all imported goods, except those listed as exempt, are subject to a levy of 1.5%. The levy is required to be computed on the customs value of imported goods.
Rwanda

**Excise taxes**
Excise tax is imposed on the manufacturer or importation of certain commodities, mainly soft drinks, bottled water, cigarettes, alcohol, fuels, and lubricants.

The following rates apply in respect of products and services for which excise duty is applied:

- Juice from fruits: 5%.
- Soda and lemonade: 39%.
- Mineral water: 10%.
- Beer: 60%.
- Wine, brandies, liquors, and whisky: 70%.
- Cigarettes: 36% of retail price of a pack (of 20 rods) and RWF 30 per pack.
- Telephone communication: 10%.
- Premium (excluding benzene) fuel and gas oil: RWF 183/litre on premium fuel and RWF 150/litre on gas oil.
- Lubricants: 37%.
- Powdered milk: 10%.
- Vehicles with an engine capacity of above 2500cc: 15%.
- Vehicles with an engine capacity of between 1500cc and 2500cc: 10%.
- Vehicles with an engine capacity of less than 1500cc: 5%.

**Property taxes/fixed asset tax**
Local government levies fixed asset tax on:

- the market value of parcels of land
- the market value of buildings and all improvements thereto registered with the land registration centre and for which the owner has obtained a title deed from the time the building is inhabited or used for other activities
- the value of land exploited for quarry purposes, and
- the market value of usufruct with a title deed.

The tax rate is fixed at a thousandth (1/1000) of the taxable value per year. The tax payment must be paid not later than 31 March of the year.

**Transfer taxes**
There is a fixed fee of RWF 20,000 on transfer of property. However, no transfer of ownership of a fixed asset can be effected without a tax clearance certificate issued by the concerned decentralised entity.

**Stamp taxes**
There are no stamp duties in Rwanda.

**Trading licence fee**
Districts charge a trading licence fee, which is paid by any person who commences a profit-oriented activity in Rwanda. The tax year starts on 1 January, and the trading licence fee must be paid for a whole year. If such activity starts after January, the taxpayer must pay a trading licence fee equivalent to the remaining months, including the one in which the activities started.

The tax declaration is done not later than 31 March of the tax year. The trading licence fee is calculated on the basis of turnover, and the amount of the fee varies between RWF 60,000 (for turnover of RWF 40 million) and RWF 250,000 (for turnover of over RWF 150 million).

The turnover applied is as per the amount approved in the previous year by the RRA. Every year, not later than 31 January, the RRA submits the necessary data to the concerned decentralised entity.
There are also different rates for the trading licence fee for other small traders, such as small-scale technicians, transport activities by boat, traders, and technicians.

**Payroll taxes**
Employers are required to withhold tax on payments to employees in respect of employment services that they have rendered. The tax is withheld through the pay-as-you-earn (PAYE) system. The tax deducted should be remitted to the RRA by the 15th day of the following month.

**Social security contributions**
All people working in Rwanda, both nationals and foreigners, are required to contribute to a national social security contribution fund managed by the Rwanda Social Security Fund. The employer is required to contribute 5% of the employee’s gross salary to the scheme, while the employee’s contribution is 3%.

Gross salary means total remuneration received by the employee, including allowances, bonuses, commissions, and all other cash benefits, as well as any fringe benefits, but excludes reimbursement of business expenses and transport allowances.

The social security contributions computed are required to be remitted to the RRA by the 15th day of the following month.

---

**Branch income**

The tax law does not prescribe special provisions for taxation of branches; consequently, tax rates on the profits of PEs are the same as for domestic corporations. PEs are subject to tax at a rate of 30% and treated as domestic companies.

A branch is considered a PE for the parent company; consequently, it is taxed on the income that is sourced from Rwanda only.

---

**Income determination**

**Inventory valuation**
Trading stock is valued at a lower of cost price or market price on the last day of the tax period. Work in progress is valued at cost.

**Capital gains**
There is a general capital gains tax law in Rwanda that provides that capital gains arising from the sale of commercial immovable property are subject to tax at the rate of 30%. However, capital gains arising from secondary market transactions on listed securities are exempt from taxation.

In addition, capital gains and losses arising on reorganisation are exempt from tax in respect of the transferring company. Reorganisation is defined to include the following:

- a merger of two or more resident companies
- the acquisition or a takeover of 50% or more of shares or voting rights by number or value in a resident company in exchange for shares of the purchasing company
- the acquisition of 50% or more of the assets and liabilities of a resident company by another resident company solely in exchange of shares in the purchasing company, or
- splitting of a resident company into two or more resident companies.
Rwanda

**Dividend income**
Dividend income includes income from shares and similar income distributed by companies, cooperative societies, public business enterprise, and partnerships. Dividend income is subject to withholding tax (WHT) at the flat rate of 15%.

If dividend distribution has been subjected to WHT, this becomes the final tax.

In determination of taxable business profit of a resident company or partnership, dividends and other profit-shares received from a resident entity are therefore excluded.

**Interest income**
Interest income includes income from loans, deposits, guarantees, and current accounts. It also includes income from government securities and bonds, as well as from negotiable securities issued by public and private companies.

Interest income is subject to WHT at the flat rate of 15%.

**Foreign income**
Resident companies and enterprises are taxed on their worldwide income. However, a foreign tax credit is granted in respect of taxes paid on the foreign income, subject to the limit of the tax that would have been paid in Rwanda on the same income.

There are no provisions in Rwanda for tax deferral of income earned abroad.

---

**Deductions**
A trading company is generally permitted to deduct expenses that are incurred wholly and exclusively for purposes of the company's trade, provided these costs are not capital in nature and are charged to the profit and loss account.

The Rwandan tax law stipulates that deductible expenses should fulfil the following conditions:

- Used for direct purpose of and in normal course of business.
- Actual expenses substantiated by proper documents.
- Result in a decrease in net assets.
- Used for activities related to the tax period in which they are incurred.

**Depreciation and amortisation**
Accounting depreciation of fixed assets is not allowable as a deduction for tax purposes. The same applies in the case of amortisation of assets. However, businesses are allowed specified deductions, referred to as tax depreciation in respect of specified classes of assets. This is deducted in arriving at taxable income.

Tax depreciation allowance is granted to persons who own depreciable assets at the end of the tax period and use such assets in the production of income.

Land, fine arts, antiquities, jewellery, and any other assets that are not subject to wear and tear or obsolescence are not granted tax depreciation. Cost of refining or reconstruction of building, equipment, and heavy machinery fixed to the walls attract tax depreciation at the rate of 5%.

Intangible assets, including goodwill that is purchased from a third party, enjoy tax depreciation at the rate of 10%, while computers and accessories, information and communication systems, software products, and data equipment are granted tax depreciation at 50%.
Tax depreciation allowance is also available on all other classes at the rate of 25%.

There is also an enhanced allowance in the form of an investment allowance that is granted to investors where they incur an investment of at least RWF 30 million. The rate is 40% where the investment is within Kigali city or 50% where the investment is within priority sectors defined by the Rwandan Investment Code or a registered business located outside Kigali. Businesses are required to hold the investment for at least three years in order to benefit from the investment allowance.

Note that the above incentives have been repealed by the new investment code. However, taxpayers who were enjoying the benefits can continue to do so until 27 May 2016. The new investment code introduces new incentives for registered investors (see the Tax credits and incentives section).

**Goodwill**

As mentioned above, purchased goodwill will attract tax depreciation at the rate of 10%, which is an allowable deduction. However, amortisation of goodwill is not tax deductible.

**Start-up expenses**

There is no clear guidance on the tax treatment of start-up expenses. However, in practice, start-up expenses of a capital nature are not deductible for tax purposes. Where they relate to purchase of assets, respective tax depreciation is claimed. Start-up expenses of a revenue nature are tax deductible.

**Interest expenses**

Interest on borrowed money used for earning business profit or interest in respect of an amount payable for property acquired to earn income is deductible, provided the interest paid is pursuant to a legal obligation and is reasonable under the circumstances.

Thin capitalisation rules can limit interest deductions when debt owed to related entities exceeds four times the amount of the corporation’s equity (see Thin capitalisation in the Group taxation section).

**Bad debt**

A bad debt provision will be deductible for tax purposes if it fulfils the following conditions:

- The amount was previously included in the income of the taxpayer.
- Debt is written off in the books of accounts.
- All possible steps have been pursued by the taxpayer, and there is concrete proof that the debtor is insolvent.

It is the last condition that makes the criteria difficult to satisfy, and local taxpayers rarely obtain bad debt relief in practice.

However, licensed commercial banks and leasing entities duly licensed as such are allowed to deduct, in determining business profit, any increase of the mandatory reserve for non-performing loans as required by the directives related to management of bank loans and similar institutions of the National Bank of Rwanda. Similarly, the business profit is increased by the entire amount recovered from bad debts deducted from such reserves.

**Charitable contributions**

Donations and gifts to charitable organisations and other non-profit making organisations are tax deductible where the amounts are less than 1% of turnover. However, donations to profit making organisations are not allowed for tax, irrespective of the amount.
**Fines and penalties**
Fines and penalties imposed for breaking the law or for statutory offences, such as payment of taxes late, are not tax deductible.

The law does not specify which type of non-statutory fines or penalties are not allowed for tax. For example, there is no guidance on whether fines or penalties paid for breach of contract are deductible or not.

**Taxes**
Income tax paid on business profit and recoverable VAT are not deductible for tax purposes. This includes any back taxes paid by the business.

**Net operating losses**
Tax losses can be carried forward for the next five tax periods, earlier losses being deducted before later losses.

If the direct or indirect ownership of the share capital or the voting rights of an unlisted company changes more than 25% by value or by number during a tax period, such a company is restricted from carrying forward losses incurred during the tax period and previous tax periods.

There are no provisions for carryback of tax losses.

**Payments to foreign affiliates**
Royalties, management fees, and similar payments to affiliated non-residents are deductible expenses to the extent that they are incurred to earn income of the Rwandan company and the payments adhere to the arm’s-length principle and comply with transfer pricing requirements.

**Group taxation**
There is no provision for group taxation in Rwanda. Each individual corporate group member is required to submit their own tax return on a stand-alone basis.

**Transfer pricing**
Rwandan transfer pricing legislation and the prescribed transfer pricing methods are generally consistent with OECD guidelines. The law requires that transactions between related parties be carried out under the arm’s-length principle.

The tax law empowers the Commissioner General to adjust profits earned between related parties if the Commissioner General considers that the trading arrangements between related parties do not adhere to the arm’s-length principle. The arm’s-length principle requires that transfer prices charged between related parties are equivalent to those that would be charged between independent parties in the same circumstances.

Rwanda operates a self-assessment system; consequently, taxpayers are obligated to self-assess their compliance to the tax legislation, which includes transfer pricing policy. However, there are no specific transfer pricing documentation requirements currently in place.

Rwanda’s transfer pricing legislation provides an opportunity for advance pricing agreements (APAs) with the RRA, a progressive development giving businesses operating in Rwanda a greater degree of certainty. Taxpayers can discuss and negotiate their transfer pricing arrangements with the RRA and obtain an advance ruling confirming that their transfer pricing arrangement is appropriate. This is intended to minimise the potential for future disputes.
**Thin capitalisation**

The interest paid on loans and advances from related entities is not tax deductible to the extent that the total amount of loans/advances exceeds four times the amount of equity during the tax period. For purposes of determining the above, equity excludes provisions and reserves. This provision does not apply to commercial banks and insurance companies.

**Controlled foreign companies (CFCs)**

There are no provisions in Rwanda for CFCs.

---

**Tax credits and incentives**

There are tax incentives in the form of lower CIT rates (see *Special CIT regimes in the Taxes on corporate income section*) for registered investors.

The new investment code also provides the following incentives to a registered investor with effect from 27 May 2015:

- A seven-year tax holiday for investments in the following specific sectors: manufacturing, tourism, health, exports, energy projects producing at least 25 MW (excluding investors having an engineering procurement contract [EPC] executed on behalf of the government of Rwanda, and ICT with an investment involving manufacturing, assembly, and service. The investment should be of at least 50 million United States dollars (USD) and the investor should contribute at least 30% of this investment in the form of equity in these sectors.
- A preferential CIT rate of 0% for international companies with their regional offices in Rwanda and that fulfil certain requirements.
- A preferential CIT rate of 15% for registered investors undertaking; (i) exportation (ii) energy generation, transmission, and distribution, (iii) transport of goods and related activities, (iv) mass transportation of passengers and goods, (v) ICT, (vi) financial services, including global business activities, private equity funds, fund management, wealth management, mutual funds, collective investment schemes, captive insurance schemes, venture capital, and asset backed securities, (vii) building of low-cost housing, and (viii) any another priority economic sector as may be determined by an Order of the Minister of Finance.
- Exemption from capital gains tax.
- Five-year tax holiday for micro-finance institutions.
- Customs exemption on products used in Export Processing Zones (EPZs).
- Prompt settlement of VAT refunds.

There are, however, certain conditions that have to be fulfilled to obtain the incentives above.

Note that a variety of tax incentives were given in the form of enhanced tax depreciation allowances (known as capital allowances) under the old investment code. The incentives were granted based on the type of assets purchased and used for business and the amount of investment made (see *Depreciation and amortisation in the Deductions section*).

Also note that there is a transition period of one year in which the registered investors who are eligible for some incentives under the old code can continue to benefit from these until 27 May 2016.

**Foreign tax credit**

Rwanda allows a foreign tax credit on income generated from business activities performed abroad by a tax resident. The income tax payable is offset by the foreign tax paid on that income. However, the foreign credit is limited to the amount of tax that would have been applicable on that income in Rwanda.
Rwanda

The credit is allowed where it is supported by appropriate evidence, such as a tax declaration, a WHT certificate, or any other similar acceptable document.

**Withholding taxes**

A resident individual or resident entity is required to deduct a WHT of 15% when making the following payments:

- Dividends.
- Interest.
- Royalties.
- Service fees, including management and technical service fees, with the exclusion of international transport.
- Performance payments made to an artist, musician, or sports person.
- Lottery and other gambling proceeds.
- Goods supplied by companies or physical persons not registered with the tax administration.

There is also a WHT of 5% that is applicable on goods imported for commercial use. Public institutions are required to retain 3% on payments to winners of public tenders. However, businesses that possess a tax clearance certificate are exempted from deduction of the above WHT.

The WHT deducted should be remitted to the RRA within 15 days following the month of deduction.

**Tax treaties**

Rwanda has double tax treaties (DTTs) with Belgium, Mauritius, Singapore, and South Africa.

The DTT between Rwanda and Belgium provides for a lower rate of 10% on interest and royalties, but 0% on dividends.

The DTT between Rwanda and Mauritius has been ratified and provides for a lower rate of 10% on royalties, dividends, and interest and 12% on management fees.

The DTT between Rwanda and South Africa provides for a lower WHT rate of 10%.

The DTT between Rwanda and Singapore provides for lower rate of 10% on interest, royalties, and management or professional fees, but 7.5% on dividends.

The DTT agreements contain conditions to be complied with for the preferential rates to apply; consequently, it is recommended that professional advice is sought before application.

**Tax administration**

**Taxable period**

The normal taxable period is between January and December. However, a different tax period can be allowed on approval by the Minister of Finance.

**Tax returns**

Companies are assessed with reference to accounting periods. This refers to the period for which a company prepares its accounts. However, an accounting period for CIT purposes cannot exceed 12 months, so companies preparing statutory accounts for longer than 12 months need to prepare more than one CIT return.
Rwanda operates a self-assessment regime. Quarterly tax returns are due on 30 June, 30 September, and 31 December (or by the sixth, ninth, and 12th month of the tax period). The annual tax return/declaration must be filed within three months after the tax period. The tax declaration must include audited financial statements as well as any other documents that may be requested by the tax administration.

**Payment of tax**
Advance CIT is payable in three instalments. Tax payments are due on 30 June, 30 September, and 31 December (or by the sixth, ninth, and 12th month of the tax period). Each instalment is 25% of the tax liability as calculated in the tax return/declaration of the previous tax period. This amount can be reduced by WHT paid during the tax period. The final payment of CIT for taxpayers with a December year-end is 31 March of the following year. In the case of other accounting year-ends, the final CIT payment is due on the last day of the third month following the accounting year-end.

**Tax audit process**
Large taxpayers are selected for audit by the RRA on a regular basis. The RRA tends to audit two tax periods, but this can be extended on request by the taxpayer. Most audits are carried out onsite. The RRA may conduct a desk audit of the taxpayer’s tax affairs where they note discrepancies on tax returns filed by the taxpayer, anomalies with turnover, or any other situations that justify an audit.

Under normal in-depth audits, the RRA is required to issue a taxpayer with a draft notice of assessment following the completion of the field audit. The draft assessment is referred to as a rectification note. The taxpayer is granted 30 days within which to respond. In case the tax issues are not resolved, a final notice of assessment is issued. The taxpayer is allowed 30 days within which to appeal. Once an appeal is submitted to the Commissioner General, the RRA has 30 days within which to respond to the objection. This can be extended by another 30 days but not beyond this period. At this stage, the appeal is handled by the appeal committee, and the taxpayer and the taxpayer’s agent are invited for a meeting to provide explanations.

Once the final assessment is issued, the tax due is payable, although the Commissioner General has powers to suspend the payment pending the determination of the appeal.

There is a provision for resolving the dispute through an amicable settlement process. Taxpayers can opt for this approach while at the same time exploring the next stage of the appeal process.

A taxpayer that disagrees with the response on the final assessment can appeal to the high court within 30 days.

**Statute of limitations**
The RRA has powers to audit a taxpayer for a period going back five years, although this can be extended to ten years in case of fraud. Taxpayers are required to keep their records for a period of ten years.

**Topics of focus for tax authorities**
Topics of interest for the RRA include:

- Deduction of WHT on payments to non-resident persons and reverse VAT.
- Treatment of capital gains on disposal of assets.
- Recovery of reverse VAT on services that are regarded as being available in the local market.
- Reconciliation of turnover per financial statements to receipts as per taxpayer bank statements.
Saint Kitts and Nevis

**Significant developments**

The government has announced that the withholding tax (WHT) rate of 10% will be increased to 15% on payments made to non-resident persons as described in the Withholding taxes section. In addition, the restriction on compensation expense, which is currently 75,000 East Caribbean dollars (XCD), is scheduled to be increased to XCD 90,000 from 1 June 2016. However, the amendments have not yet been finalised.

**Taxes on corporate income**

Companies incorporated in Saint Kitts and Nevis (St. Kitts-Nevis) pay corporate income tax (CIT) on their worldwide income with relief available under existing double taxation agreements (DTAs). Non-resident companies deriving income from St. Kitts-Nevis are liable for CIT and should be registered if they have a physical presence in St. Kitts-Nevis.

St. Kitts-Nevis imposes CIT at a flat rate of 33%.

Taxable income or assessable income is ascertained by deducting from income all expenses that are wholly and exclusively incurred during the year in the production of the income. Assessable income is normally arrived at by adjusting the net profit per the financial statements for non-taxable income, non-deductible expenses, and prior-period losses of up to 50% of chargeable income.

Where a person resident in St. Kitts-Nevis makes a payment to another person not resident in St. Kitts-Nevis, as noted in the Withholding taxes section, then WHT at a rate of 10% must be deducted and remitted to the Inland Revenue within 15 days.

A company that carries on business exclusively with persons who are not resident in St. Kitts-Nevis is exempt from all income, capital gains, and withholding taxes.

Companies registered under the Condominium Act are governed by that Act and are not required to pay CIT.

**Corporate residence**

A corporation is deemed to be resident if it is incorporated in St. Kitts-Nevis or if it is registered as an external company doing business in St. Kitts-Nevis under the Companies Act.

**Permanent establishment (PE)**

A PE is not defined in the Income Tax Act; however, any company that would meet the general definition of a PE must be registered.
**Other taxes**

**Value-added tax (VAT)**
The standard VAT rate is 17%, while hotel accommodation, tour operators, and restaurants carry a reduced rate of 10%.

Most foods (excluding prepared food or meals from a restaurant, snackette, cafeteria etc.; live animals; and plants), medicines, and funeral expenses by a licenced funeral home are exempt from VAT.

Persons who have made or are likely to make taxable supplies in excess of XCD 96,000 for certain professional services and XCD 150,000 for other business activities in a continuous period of 12 calendar months are required to register for VAT.

**Customs duties**
All imports are subject to import duties, VAT, and customs service tax (CST). In all instances, certain exemptions will apply.

Customs duty is levied on a wide range of imported goods at rates from 0% to 70% as specified in the Custom Duties Act. VAT is applied at a rate of 17%, and CST at a rate of 6%. Customs duty is levied on goods based on the cost, insurance, and freight (CIF) values and rates determined by the Caribbean Community (CARICOM) Common External Tariff.

**Excise tax**
The excise tax applies to a small range of goods, such as alcoholic beverages, tobacco products, petroleum products, motor cycles, aerated beverages, and firearms. The excise tax rate ranges between 5% and 25%.

**Property tax**

**Saint Kitts**
Property tax in Saint Kitts is levied at varied rates on the basis of the market value of the real property (including land and building as assessed by the Chief Valuation Officer) and its class.

Property classes and rates of tax are as follows:

- Residential use property: 0.2%.
- Commercial use property: 0.3%.

Annual allowances and tax rebates are available as follows:

- Residential use property and condominium allowance of XCD 80,000 from the taxable value.
- No property tax is assessed on any buildings, condominiums, etc. that are under construction.
- New residential use properties and condominiums are exempt from tax for one year from the date certified by the valuation officer.

Note that residential use properties located in the South East Peninsula are assigned values based on fixed rates for land (XCD 20 per square foot) and building (XCD 300 per square foot). Property tax is then applied at a rate of 0.2%.

Where property situated in the South East Peninsula area is not developed within five years, a surcharge can be assessed at the rate of 1% of the assessed market value per annum, and increased annually at the rate of 1% thereafter until it reaches a maximum rate of 5% of the assessed market value while the property remains undeveloped. If
Saint Kitts and Nevis

Property is less than one acre, undeveloped, and owned by a resident for the purpose of erecting a house, such property is exempt from the surcharge upon application in writing to the Comptroller of Inland Revenue.

Property tax is payable on or before 30 June of each year and is deemed to be in default if not paid within 30 days of becoming due. Interest is charged at a rate of 12% per annum on the unpaid taxes.

**Nevis**

Property tax in Nevis is levied at varied rates on the basis of the market value of the real property (including land and building as assessed by the Chief Valuation Officer) and its class.

Property class and rates are as follows:

<table>
<thead>
<tr>
<th>Property class</th>
<th>Building tax rate (%)</th>
<th>Land tax rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Residential</td>
<td>0.156</td>
<td>0.075</td>
</tr>
<tr>
<td>Commercial</td>
<td>0.3</td>
<td>0.2</td>
</tr>
<tr>
<td>Accommodation</td>
<td>0.3</td>
<td>0.2</td>
</tr>
<tr>
<td>Certified farming</td>
<td>0</td>
<td>0.01</td>
</tr>
<tr>
<td>Institutional</td>
<td>0.2</td>
<td>0.15</td>
</tr>
</tbody>
</table>

Commercial use property is defined as property that does not include accommodation use property or property used for certified farming operations.

Accommodation use property is defined as property for short-term accommodation and includes a guest house.

Annual allowances and tax rebates are available as follows:

- Residential use property and condominium allowance of XCD 80,000 from the taxable value.
- No property tax is assessed on any buildings, condominiums, etc. that are under construction.

Property tax is payable on or before 30 June of each year and is deemed to be in default if not paid within 30 days of becoming due. Interest is charged at a rate of 12% per annum on the unpaid taxes.

**Alien land holding licences**

To hold land as an owner, a non-citizen must first obtain an alien land holding licence and pay 10% of the market value of property or XCD 750, whichever is greater.

A non-citizen is required to obtain a licence to hold shares in a company that owns land, to vote at shareholders meetings of the company, and to be a director of the company. Each licence costs XCD 250.

If a non-citizen purchases land in the Frigate Bay area, then there is no requirement to obtain a licence and only a minimal fee of XCD 50 is payable.

If a non-citizen wishes to purchase land in the South East Peninsula, the non-citizen is required to obtain a licence prior to purchasing the property; however, the payment of the 10% licence fee will be waived.
**Stamp duty**

Stamp duty applies to a very wide range of transactions (e.g. bill of sale, lease, mortgage, contract, bill of lading). Stamp duty on transfer of real property, transfer of shares, mortgages, and bank loans to aliens is specifically covered below.

**Transfer of real property**

Stamp duty is levied on the consideration for the sale or the value of property as assessed by the Property Valuation Officer, whichever is higher.

The vendor is responsible for the payment of all stamp duty on property transfers on the following basis:

<table>
<thead>
<tr>
<th>Type of property transfer</th>
<th>Rate</th>
</tr>
</thead>
<tbody>
<tr>
<td>a. Transfer of property for consideration in money or value in kind of not less than the value of the property</td>
<td>12%</td>
</tr>
<tr>
<td>b. Transfer of property for consideration in money or value in kind of less than the value of the property</td>
<td>12%</td>
</tr>
<tr>
<td>c. Transfer of property without consideration in money or value in kind</td>
<td>6%</td>
</tr>
<tr>
<td>d. Transfer of property in any Special Development Area other than the South East Peninsula</td>
<td>14%</td>
</tr>
<tr>
<td>e. Transfer of property situated in the South East Peninsula</td>
<td>18.50%</td>
</tr>
<tr>
<td>f. Transfer of property other than stock or debenture stock or funded debt or land</td>
<td>2%</td>
</tr>
<tr>
<td>g. Transfer of property between husband and wife and between parents and children and vice versa</td>
<td>XCD 100</td>
</tr>
<tr>
<td>h. Transfer of land by will or by similar instrument</td>
<td>XCD 100</td>
</tr>
<tr>
<td>i. Transfer of registered condominium units</td>
<td>5%</td>
</tr>
</tbody>
</table>

Where a developer has obtained concessions in connection with a house or building constructed on the land being transferred, the developer is required to pay stamp duty on the same basis as noted in a, b, and c above.

Where a developer has obtained concessions in connection with a house or building to be constructed on the land being transferred, then the developer will be required to pay stamp duty initially on the land on the same basis as noted in a, b, and c above. However, when the house or building is subsequently constructed on the land with the aid of the concession, the owner of the building shall pay stamp duty on the house or building as provided in a, b, and c above as if the concessions or any part thereof had not been utilised.

Where a developer has not obtained concessions in connection with a house or building constructed on the land being transferred, the developer will be required to pay stamp duty on the same basis as noted in a, b, and c in respect of the land only.

**Transfer of shares**

Stamp duty is levied on the value of the consideration for the sale of shares or debentures issued by or on behalf of a company or at the value assessed by the Property Valuation Officer, whichever is higher. The stamp duty is levied at a rate of 2%. If the company owns property and its value exceeds 50% of the value of the company’s assets, then the stamp duty is calculated using the applicable rate on the transfer of real property (see above).

**Mortgages**

Stamp duty is levied on the total amount secured and is applicable to both the registration and discharge of the mortgage. The standard rate is 1%. For amounts secured in relation to a Special Development Area, the rate is 2%.
Saint Kitts and Nevis

Bank loans to aliens
Stamp duty is levied on the total amount of a bank loan to aliens. The standard rate is 2.5%. For loans to finance development in a Special Development Area, the rate is 5%.

Life insurance premium tax
A premium tax of 5% is levied on the premium income of all life insurance companies, whether resident or non-resident. In addition, a registration fee of XCD 2 per XCD 1,000 of income or XCD 30, whichever is less, must be paid to the Comptroller of Inland Revenue.

General insurance premium tax
A premium tax of 5% is levied on the premium income (net of agent’s commission) of all general insurance companies, whether resident or non-resident.

Statutory payroll deductions

Social Security
The employer’s portion of Social Security is 5% of chargeable income (on income of up to XCD 6,500 per month).

Housing and Social Development Levy (Social Services Levy)
The employer’s portion of the Social Services Levy is 3% of chargeable income.

Employment Injury Benefit
The employer’s portion of Employment Injury Benefit is 1% of chargeable income (on income of up to XCD 6,500 per month).

Severance Payment Fund
The employer’s portion of the contribution to the Severance Payment Fund is 1% of chargeable income.

Branch income
Branch income is taxed on the same basis and at the same rate as the income of a corporation. A resident branch of a foreign company shall be regarded as a separate company and shall be taxed on the same basis as that of a locally registered corporation.

Recharges of expenses from head office to the branch will be subject to WHT at a rate of 10%; however, the recharges have to be justified and cannot be based on a percentage allocation.

Income determination

Inventory valuation
Inventories are generally stated at the lower of cost or net realisable value. The first in first out (FIFO) and average cost methods of valuation are generally used for book and tax purposes. However, the Comptroller of Inland Revenue will normally accept a method of valuation that conforms to standard accounting practice in the trade concerned. The last in first out (LIFO) method is not permitted for tax or book purposes.

Capital gains
Capital gains tax will be imposed if an asset is sold within one year of the date of acquisition. The maximum rate of tax will be 16.5% (one half the 33% CIT rate). Assets sold after one year will not attract capital gains tax.
**Dividend income**
Dividends received by a company resident in St. Kitts-Nevis from another company resident in St. Kitts-Nevis are taxed at source at the CIT rate of 33%. Credit is given to the recipient for the tax on the dividend in computing the tax liability.

**Interest income**
Interest income received by a company registered in St. Kitts-Nevis is taxed at the CIT rate of 33%. Interest earned on local and other CARICOM government securities are normally exempt from the payment of CIT.

**Foreign income**
A St. Kitts-Nevis corporation is taxed on foreign branch income when earned and on foreign dividends when received. Double taxation is avoided by means of foreign tax credits where tax treaties exist and through deduction of foreign income taxes in other cases (the United Kingdom [UK] and CARICOM). There is also relief from British Commonwealth taxes. See Foreign tax credit in the Tax credits and incentives section for more information.

**Deductions**

**Depreciation**
Depreciation allowed for tax purposes is computed by the diminishing-balance method at prescribed rates. An initial allowance of 20% is granted on industrial buildings or structures and in respect of capital expenditure incurred on plant and machinery by a person carrying on a trade or undertaking, as defined. In addition, an annual allowance of between 2% and 5% is allowed on all buildings constructed after 1 March 1994. Concrete buildings are depreciated at a rate of 2%, while the rate varies for other buildings depending on the type of material used in construction. Conformity between book and tax depreciation is not required.

Any gain on the sale of depreciated assets is taxable as ordinary income up to the amount of tax depreciation recaptured.

Initial allowances and annual allowances cannot reduce the tax that would have been otherwise payable by more than 50%. Any initial allowance or annual allowance not utilised may be carried forward indefinitely.

**Goodwill**
Goodwill and trademarks are not depreciable assets, and amortisation is not allowed.

**Start-up expenses**
There are no specific provisions in relation to deductions for start-up expenses. However, the policy is that certain start-up expenses, such as costs of incorporation and other initial start-up costs, may qualify for a three to five year straight-line write-off, depending on the total dollar value.

**Interest expenses**
No specific restrictions will apply to interest paid on loans owing to shareholders, directors, their spouses, children or relatives, or to any related parties. Interest is only deductible to the extent that it was incurred in producing chargeable income.

**Restriction on bad debts**
Specific bad or doubtful debts in excess of 5% of total trade receivables will not be allowed as a deduction.

**Charitable donations**
Charitable donations are not deductible for tax purposes.
Contributions to a pension fund
Contributions made by an employer to a pension fund (approved by the Comptroller) on behalf of its employees are deductible, up to a maximum of 5% of annual earnings of the employee or XCD 2,000 per annum. Application should be made to the Ministry of Finance or to the Pension Fund Committee.

Restriction on compensation expenses
Salaries, wages, leave pay, fees, commissions, bonuses, gratuities, or any other perquisites or such other payments that an employee of a company receives in the course of their employment or the value of any benefit to such employee or to any member of an employee’s family in excess of XCD 75,000 per annum will not be allowed as a deduction from chargeable profit.

Where an employee or shareholder receives remuneration in a tax year from two or more associated companies, the amount deductible in relation to the employee or shareholder in the tax year by all of the associated companies shall not exceed XCD 75,000. If the remuneration received by the employee or shareholder exceeds XCD 75,000, the amount deductible by each associated company will be equal to the allowable deduction of XCD 75,000 times the remuneration received from the associated company divided by the total remuneration paid to the employee or shareholder by all of the associated companies.

Fines and penalties
Fines and penalties imposed under tax laws of St. Kitts-Nevis are not deductible expenses.

Taxes
There are no provisions in the Income Tax Act in relation to the deductibility of taxes paid by a company. However, in general, VAT, VAT input tax, and adjustments under the VAT Act are disregarded for income tax purposes. Other taxes, including property tax, transfer taxes, payroll taxes, and insurance premium taxes, except income tax and share transfer tax, are deductible to the extent they are incurred in producing chargeable income.

Net operating losses
Income tax losses may be carried forward for five years following the year in which the loss was incurred. However, the chargeable income of a company after deducting initial and annual capital allowances in any one income year may not be reduced by more than 50% by losses brought forward. No carryback of losses is permitted.

Payments to foreign affiliates
A company incorporated in St. Kitts-Nevis may claim a deduction for royalties, management fees, and interest charges paid to foreign affiliates, provided the payments are equal to or less than what the corporation would pay to an unrelated entity. The deductibility of any payments to a foreign affiliate will be subject to an arm’s-length test, and WHT will be payable at a rate of 10%.

Restriction on related-party expenses
Amounts paid or payable to related or associated persons for administration fees, management fees or expenses, head office charges and allocations, technical services, shared costs, and other similar charges are restricted to 5% of the taxpayer’s gross sales or revenues.

Group taxation
Group taxation is not permitted in St. Kitts-Nevis.
Transfer pricing
There are no provisions for transfer pricing in the tax laws of St. Kitts-Nevis.

Thin capitalisation
There are no provisions for thin capitalisation in the tax laws of St. Kitts-Nevis.

Controlled foreign companies (CFCs)
There are no specific rules relating to a controlled foreign entity.

Tax credits and incentives
Tax incentives are currently available under the following legislation.

Income Tax Act, No. 17 of 1966
The Income Tax Act provides that if a company is licensed under the Hotel Aids Ordinance and constructs a hotel with more than 30 rooms, the hotel will receive an exemption from CIT for a period of ten years beginning on the day it is first open for business. If the hotel has less than 30 rooms, then it will be entitled to a five-year tax holiday. During the tax holiday period, no initial deductions or annual capital allowance deductions shall be allowed. Thereafter, only the annual allowance will be allowed and will be computed on the total capital expenditure incurred during the holiday period less any assets sold. The net losses arising during the tax holiday period (i.e. the excess of accumulated tax losses over total profits) may be carried forward and set-off against profits following the expiration of the tax holiday in accordance with the normal rules for set-off of losses.

The Income Tax Act also provides that if a licence is granted to a pioneer manufacturer under the Pioneer Industries Act, the manufacturer is entitled to a five-year tax holiday (or up to ten years, at the discretion of the government) as provided in the licence.

Hotel Aids Act
The Hotel Aids Act provides that a licence may be granted to any person who desires to construct or extend an existing hotel to import building material and equipment free from import duties, as specified in the licence, for use in the construction of the hotel and to furnish and equip the hotel. The holder of a licence may not dispose of any hotel equipment within three years of being imported free of duties and taxes. Permission must be received from the Comptroller of Customs to dispose of any building material and hotel equipment within the three-year period.

Fiscal Incentives Act
The Fiscal Incentives Act provides that if a company is declared to be an approved enterprise to manufacture certain ‘approved products’, then the manufacturer is entitled to a tax holiday period of between ten and 15 years depending on the classification of the approved enterprise. The net losses arising during the tax holiday period (i.e. excess of all losses over all profits) may be carried forward and set-off against profits of the approved enterprise for the five-year period following the tax holiday period.

Small Business Development Act, 2009
The Small Business Development Act provides the framework for the promotion of investment opportunities in St. Kitts-Nevis by introducing a system of registration of small businesses and a range of incentives that are available to locals. The incentives and concessions available to any small business that would be entitled for consideration are as follows:

- Concession on consumption tax applicable to professionals (e.g. engineers, doctors).
- Reduction in CIT for a minimum of three years to a maximum of five years.
Saint Kitts and Nevis

- Relief from CIT by way of an allowable deduction on any monies borrowed from any financial institution, including any bank, non-bank, or credit union.
- Export incentives.
- Rebate of CIT.
- Exemption from or reduction in customs duty on inputs imported for use in the small business.
- Exemption from or reduction in customs duty on any plant, machinery, equipment, or motor vehicle imported for use in the small business.
- Reduction of property tax by up to 75%.

A small business to which this Act applies must meet all of the following criteria:

- No more than 25 employees.
- Net assets or paid up capital not exceeding XCD 1 million.
- Annual sales not exceeding XCD 2 million.
- Owned by citizens of St. Kitts-Nevis.
- Not more than 25% owned or controlled by a company whose annual turnover or net assets exceed the limits noted above or by a subsidiary of a larger company.
- The composition of the board of directors is not controlled by a company whose annual turnover exceeds the criteria above.
- Has no agreement for managerial or other services to persons who are not citizens of St. Kitts-Nevis or other CARICOM territories.

The registration fee for an approved small business is XCD 100. Each approved small business must, within six months after the end of its financial year, submit to the Registrar (person designated by the Minister to perform the functions of Registrar of Small Businesses) financial statements audited by an auditor in accordance with generally accepted international auditing standards.

**Other incentives**
Approved manufacturing, agricultural, and tourist ventures are permitted to import building material and equipment free of customs duties.

A Memorandum of Understanding (MOU) between the government and small hotel operators provides for certain conditions under which small hotel operators will be eligible for duty-free concessions on the refurbishment of their facilities every seven years, and on food and wine for their restaurant facilities where applicable. For purposes of this incentive package, a small hotel is defined as a hotel consisting of at least ten rooms and not exceeding 99 rooms.

**Foreign tax credit**
Double taxation is avoided by means of foreign tax credits where tax treaties exist and through deduction of foreign income taxes in other cases (the United Kingdom and CARICOM). A foreign tax credit is also available to persons in St. Kitts-Nevis who have paid or are liable to pay income tax in a country that is a member of the British Commonwealth (other than the United Kingdom).

**Commonwealth relief: Residents**
The relief available for a person resident in St. Kitts-Nevis from tax payable in St. Kitts-Nevis is the income tax rate in the British Commonwealth country if that rate does not exceed one half of the tax rate in St. Kitts-Nevis. If the income tax rate in the British Commonwealth country exceeds the St. Kitts-Nevis tax rate, then the relief will be limited to one half the tax rate in St. Kitts-Nevis.

**Commonwealth relief: Non-residents**
The relief available in St. Kitts-Nevis for a person not resident in St. Kitts-Nevis from tax payable in St. Kitts-Nevis is one half of the income tax rate in the British Commonwealth country if that rate does not exceed the tax rate in St. Kitts-Nevis. In any other case, the
relief will be limited to the amount by which the St. Kitts-Nevis tax rate exceeded one half of the rate of income tax in the British Commonwealth country.

**Withholding taxes**

WHT at the rate of 10% should be withheld from payments made to non-residents in respect of the following:

- Dividends.
- Interest, annuities, premiums, and discounts.
- Rent, leases, contracts, and royalty payments.
- Natural resources.
- Commissions, remuneration, fees, and licences.
- Charges for the provision of personal services, commercial advice, and managerial skills.
- Administration, management, or head office expenses.
- Profits.
- Technical, professional, vocational, and any other service fees.
- Accounting, actuarial, legal, and audit expenses.
- Non-life insurance premiums.
- Any other annual or periodic payments or distributions.

**Notes**

1. The rate is 5% if the beneficial owner is a company; 0% if the beneficial owner is an individual and resident of either contracting state or a partnership held by individuals and beneficial owners who are resident of either contracting state.
2. Taxable only in the state in which the beneficial owner is resident.
3. The rate of tax is 5% if the beneficial owner is a company that has directly held at least 25% of the capital of the company paying the dividends for an uninterrupted period of at least 12 months prior to the decision to distribute the dividends.
4. The rate is 7.5% if the beneficial owner is a company that has directly held at least 10% but less than 25% of the capital of the company paying the dividends for an uninterrupted period of at least 12 months prior to the decision to distribute the dividends.
5. Taxable only in the source state.

**Tax administration**

**Taxable period**

Taxes are assessed on a fiscal-year basis.

**Tax returns**

The taxpayer must file an information return on Form CIT-01 by the 15th day of the fourth month after the fiscal year-end along with the financial statements. The authorities either accept the self-assessment or issue a revised assessment.
Saint Kitts and Nevis

return is not filed on a timely basis, the authorities have the power to issue estimated assessments. There is a 5% penalty for late filing.

The taxpayer can object to assessments raised within one month and ask the Comptroller of Inland Revenue to review and revise. In the event that the objection is unsuccessful, the taxpayer may appeal to the Commissioners of Income Tax. Assessments may be reviewed and revised by the Comptroller within the year of assessment or within six years of the expiration of the assessment year.

**Payment of tax**
Advance tax is payable in quarterly instalments on 15 March, 15 June, 15 September, and 15 December of each year and is ordinarily based on the tax chargeable and assessed in the previous fiscal year. The standard amount of each instalment is determined as one quarter of the tax chargeable in the previous fiscal year. If the assessment for the prior year has not been finalised, the Comptroller of Inland Revenue can raise an assessment based on best judgement.

The balance of tax due after the final assessment is issued, as notified in the assessment, is payable on or before the 15th day of the fourth month after the fiscal year-end. If the Comptroller of Inland Revenue revises the assessment, then payment of the balance of taxes due is due one month after the date of issue of the revised assessment.

Tax is deemed to be in default if not paid by the 15th day of the fourth month after the fiscal year-end or within one month of the date of the notice of assessment, whichever is later. Interest of 1% per month or 12% per annum is charged on unpaid taxes in default.

**Anti-avoidance provisions**
The Comptroller on Inland Revenue can, by notice in writing:

- distribute, apportion, or allocate amounts to be deducted in calculating income tax paid between related persons as is necessary to reflect the chargeable income or tax payable as if the arrangement had been done at arm's length
- re-characterise the source and type of income, loss, or payments made under an arrangement, the form of which does not reflect its substance or is classified as an avoidance arrangement, and
- disregard an arrangement, transaction, or part of an arrangement or transaction that does not have substantial economic effect or is classified as an avoidance arrangement.

**Tax audit process**
The St. Kitts-Nevis tax system for companies is based on self-assessment; however, the Inland Revenue Department (IRD) undertakes ongoing compliance activities to ensure that corporations are meeting their tax obligations. There is no specific approach used by the IRD in relation to compliance and audit activities. Compliance activities generally take the form of reviews of specific issues and audits.

**Statute of limitations**
Assessments may be reviewed and revised by the Comptroller of Inland Revenue within the year of assessment or within six years of the expiration of the assessment year.

**Topics of focus for tax authorities**
The IRD does not have any specific compliance program; however, when an audit is done, the focus is mainly on the detection of basic non-compliance, such as omission of income, inclusion of non-deductible expenses, and classification of items between expenses and capital items. In recent years, the IRD has been paying special attention to the application of WHT on payments made to non-resident persons and VAT on services imported into St. Kitts-Nevis, mainly between related parties.
Other issues

**Tax Information Exchange Agreements (TIEAs)**
TIEAs provide for the exchange of information on tax matters. TIEAs with Aruba, Australia, Belgium, Denmark, Finland, France, Guernsey, Liechtenstein, Netherlands, Netherlands Antilles, and Norway are in force. TIEAs have also been signed with the Faroes, Germany, Greenland, Iceland, New Zealand, Portugal, South Africa, and Sweden.

**United States (US) Foreign Account Tax Compliance Act (FATCA)**
On 4 June 2014, the United States and Saint Kitts and Nevis reached an agreement in substance and Saint Kitts and Nevis has consented to disclose this status. In accordance with this status, the text of such intergovernmental agreement (IGA) has not been released and financial institutions in Saint Kitts and Nevis are allowed to register on the FATCA registration website consistent with the treatment of having an IGA in effect, provided that the jurisdiction continues to demonstrate firm resolve to sign the IGA as soon as possible.

**Significant developments**

The Value Added Tax (VAT) Act was amended to increase the threshold for registration from 180,000 East Caribbean dollars (XCD) to XCD 400,000 in January of 2016. Taxpayers with annual sales below this threshold were encouraged to immediately deregister. The Act was also amended to allow registered taxpayers with zero-rated sales constituting a minimum of 50% of their total sales to apply for a refund after one month rather than the usual three month period stipulated for all VAT registered taxpayers.

**Taxes on corporate income**

Resident companies are taxed on gains or profits accrued directly or indirectly from all sources, whether in or out of Saint Lucia, and are subject to tax at a flat rate of 30%. The 30% tax rate is only applicable to companies that prior to income year 2003 have no tax arrears and have complied with the requirements of any enactment administered by the Inland Revenue Department (IRD). The tax rate of 33.33% will still apply to those companies that have tax arrears and have not complied with the requirement.

Non-resident companies are taxed on Saint Lucia-source income. The gross amount of such income is liable to 25% withholding tax (WHT), while WHT of 15% applies to interest.

Associations of underwriters are taxed at 30% on 10% of the gross premium arising in Saint Lucia, and life insurance companies are taxed at 30% on 10% of the gross investment income arising in Saint Lucia.

**Corporate residence**

Companies are regarded as resident if they are incorporated in Saint Lucia or managed and controlled through a permanent establishment (PE) in Saint Lucia.

**Permanent establishment (PE)**

A PE is defined in Saint Lucia as a fixed place or premises through which the business is wholly or partly carried on.

**Other taxes**

**Value-added tax (VAT)**

The standard VAT rate is 15%. There is also a 0% rate charged on certain goods and services. In respect of the hotel sector and related services, a reduced rate of 10% is applicable.
The threshold for registered taxpayers is currently set at XCD 400,000 per annum. This means that it is not mandatory for businesses earning less than the threshold to register for VAT. The threshold is based on the annual sales turnover of the taxpayer.

The VAT rate of 0% has been legislated on certain supplies, which include, but are not limited to, the following:

- Goods to be exported.
- Goods for sale at duty-free shops.
- Fuel.
- Water.
- Electricity.

The following goods and services are exempted from payment of VAT, but this list is not exhaustive:

- Domestic residential rental.
- Educational services.
- Financial services.
- Insurance services.
- Medical services.
- Local transportation services.
- Certain food items (e.g. chicken, rice, milk, flour, bread).

The government secured the Caribbean Community and Common Market’s (CARICOM’s) approval to remove the import duty on medical supplies for a period of four years from 1 May 2012 to 30 April 2016. Although this was meant to be a temporary measure, the instrument instituting the exemption had no end date and there have been no official pronouncements terminating the exemption. Prescription drugs are currently exempt from VAT.

The government has also agreed to the establishment of a special VAT Refund Account in accordance with the provisions of the Financial Administration Act. This is to facilitate the timely processing and payment of refunds to taxpayers.

**Customs duties**

Customs duties are charged on a wide range of imported goods. Exemptions are granted for raw materials and plant and machinery used in manufacturing and for certain items imported by hotels under construction, extension, or refurbishing projects.

**Excise taxes**

Excise taxes are imposed on home-produced goods, mainly liquor, beer, and cigarettes. XCD 1.44 per litre of liquid applies to beer in glass bottles and XCD 3.50 per liquid gallon applies to beers in metal cans.

There is also an excise tax on fuel when fuel is imported by a wholesaler. Tax is included on the price of fuel paid at the gas pump. The tax rate formula is based on the current price provided by the supplier and regulated price at the gas pump.

**Commercial property tax**

Commercial property tax is assessed annually at 0.4% of the open market value of the property. The owner is required to obtain a commercial valuation assessing the open market value of the property. All new commercial properties completed after 1 April 2001 can benefit from a three-year tax exemption from commercial property tax.

**Residential property tax**

The property tax rate for residential property is 0.25% of the open market value.
Saint Lucia

**Stamp tax**
Stamp tax is charged on any document that evidences a legal or contractual relationship between two or more parties. Additionally, many types of commercial and legal documents must be stamped as evidence of the payment of taxes. Stamp tax may be charged either at a fixed rate or at an *ad valorem* rate, depending, for example, on the value of the property being transferred.

**Payroll taxes**
Other than employers' portion of the statutory National Insurance Corporate (NIC) contributions (see below), there are no other payroll taxes, where the burden falls on the employer. Employers are, however, responsible for deducting the employees' income tax liability at source, through the pay-as-you-earn (PAYE) system.

**Social security contributions**
The employee's share of NIC contributions (for retirement, sickness, and disability benefits) is 5% of gross salary, up to a maximum contribution of XCD 250 per month (i.e. on a monthly salary of XCD 3,000). The employer matches the contribution and files monthly returns.

**Branch income**
The tax rate on branch income is the same as that on income earned by resident companies. No additional tax is withheld on transfers of profits to the head office.

**Income determination**

**Inventory valuation**
Inventory is generally valued at the lower of cost or market value. The Saint Lucia IRD will generally accept a valuation method that is in line with the common accounting practice of the particular trade or industry. First in first out (FIFO) or average costing are normally used both for book and tax purposes.

Obsolescence is permitted where it occurs, but there are no provisions to account for monetary inflation on inventory valuation.
**Capital gains**
There is no tax on capital gains except in instances where such gains comprise a portion of the income-earning activities of the business. In such instances, the corporate tax rate applies.

**Dividend income**
Dividends are tax exempt in Saint Lucia.

**Inter-company dividends**
Inter-company dividends are not subject to tax in Saint Lucia.

**Interest income**
The corporate tax rate applies to interest income. However, income earned on securities issued by member governments of the Eastern Caribbean Central Bank and income accruing from trading in securities under the Securities Act to any citizen or resident of any member state of the Organisation of Eastern Caribbean States or to any company incorporated in and registered in any member state of the Organisation of Eastern Caribbean States is tax exempt.

Any expenditure incurred for the purpose of producing exempt income is not deductible.

**Royalty and rental income**
The corporate tax rate applies to royalty and rental income. However, rental income from a residential accommodation shall be exempt from tax if certain requirements, as defined by regulations, are met.

**Foreign exchange gains/losses**
Foreign exchange gains or losses arising from foreign exchange transactions on trading items are assessable or deductible as realised gains or losses if settled within normal credit terms. Gains or losses on other instruments, including inter-company loans, are recognised only when actually realised.

Unrealised exchange gains/losses are not taxable/deductible.

**Bribes, kickbacks, illegal payments**
Bribes, kickbacks, and illegal payments received by a company are includible in taxable income.

**Foreign income**
Resident companies are taxed in Saint Lucia on income earned outside Saint Lucia. Reciprocal understandings exist with some countries for the avoidance of double taxation, and foreign tax is allowed as a credit against tax charged in Saint Lucia. Saint Lucia has no tax treaties with other countries, except for the member states that make up CARICOM. There is an agreement among the governments of CARICOM for the avoidance of double taxation. Where no agreement exists, the foreign tax offset is the lesser of the foreign tax paid or the tax payable on that income in Saint Lucia.

Tax deferral is not permitted in Saint Lucia.

**Deductions**
Accrued expenses are deductible as long as they are business related. Contingent liabilities are deductible expenses once they are recognised in the book of accounts.

**Depreciation**
The following capital allowances are available in Saint Lucia:
Saint Lucia

- An initial allowance of 20% is granted on the acquisition of industrial, agricultural, and commercial buildings (except for hotels and rental properties); on plant and machinery, including motor vehicles and furniture; and on fixtures and equipment.
- Thereafter, annual allowances for wear and tear, ranging from 10% to 33.33%, are granted on the reducing-balance method, except for industrial and agricultural buildings, which are allowed an annual rate of 5%, and commercial buildings (except for hotels and rental properties), which are allowed an annual rate of 2.5%.

The Comptroller of the IRD may also grant, on application, a higher rate for annual allowance for assets that have higher or abnormal wear and tear.

Gains on disposal are taxable as ordinary income to the extent of depreciation recovered, and any proceeds in excess of the cost of the asset are treated as a capital gain, which is not subject to tax. Where the proceeds on disposal are lower than the tax written-down value of the asset, a balancing allowance is granted for the shortfall.

**Goodwill**
Neither the amortisation of impaired goodwill nor the related write-off of it is an allowable deduction.

**Organisational and start-up expenses**
All expenditures incurred in connection with incorporation costs for the establishment of a new small business enterprise are allowable deductions. A small business enterprise is an enterprise incorporated during the year of income that:

- is wholly owned by citizens of Saint Lucia who have not been owners of previously incorporated businesses in Saint Lucia
- employs not more than 50 persons
- has gross income that does not exceed XCD 1 million
- engages in an activity on the listing of preferred business activities as approved by the Minister of Finance, and
- satisfies the provision of any law in force with respect to micro or small scale business.

**Interest expenses**
Interest on any loan, including interest payable on debentures, is an allowable deduction to the extent that the amount of such loan was used for the purpose of producing assessable income.

**Bad debt**
Bad debt expense is deductible, provided it has been brought to account in generating the company's assessable income for any income year and that the company has taken all reasonable steps to establish that the collection of such debt is unlikely.

**Charitable contributions**
Charitable contributions are an allowable deduction when the contributions are made under a deed of covenant for a period of not less than three years to any religious, charitable, medical, or educational institution; sporting body; or fund of a public character, approved by Cabinet, if such contributions are made to the Saint Lucia National Trust. However, the deduction with respect to such contributions shall not exceed 25% of the assessable income of the company for that income year.

**Pension expenses**
Current annual contributions to an approved pension fund are deductible expenses. However, where a special payment is made to an approved pension fund, in relation to a period of service by an employee prior to the setting up of the approved pension fund, or to meet any actuarially ascertained insufficiency in the resources of the approved pension fund to meet its obligations to its employees, such amount shall be deductible as follows:
i. Where the special payment does not exceed the current annual contribution, such amount is wholly deductible.

ii. Where the special payment exceeds the current annual contribution, the special payment is an allowable deduction in such years of income, not exceeding five in number, as in the opinion of the Comptroller is reasonable under the circumstances.

iii. Where under (ii) above, annual deductions are allowable over a number of years of income, the first such deduction is allowable for the income year for which the special payment is made.

**Taxes**

VAT paid on goods imported or purchased, and sold in the ordinary course of business, are deductible for tax purposes. Property taxes are deductible where the property is used in producing assessable income. Income taxes, penalties, and interest on tax in arrears are not deductible.

**Other significant items**

Meals and entertainment, officer’s compensation/life insurance, and payment to directors are deductible expenses, provided they are wholly and exclusively incurred by a company during that year of income for the purpose of producing its assessable income.

**Net operating losses**

Net operating losses may be carried forward for up to six years if the losses have not been fully absorbed earlier. In carrying losses forward, the amount that can be claimed in any subsequent year is restricted to one-half of the assessable income of that year. Losses may not be carried back.

**Payments to foreign affiliates**

There are no restrictions on the deductibility of interest paid to foreign affiliates if the transaction is carried out at arm’s length and at commercial rates. However, deductions for management charges, allocations of head office expenses, royalties, and other charges that are subject to 25% WHT are restricted to the lesser of the aggregate of those charges or 10% of all allowable business deductions, excluding cost of sales and capital allowances.

**Group taxation**

Group tax filing is not allowed in Saint Lucia; however, group tax relief is available under certain circumstances to allow the trading losses, excluding the current loss, of a resident company within a group to offset the profits of another resident company within the same group. A claim for group relief requires the consent of the Comptroller of the IRD and is only available to resident companies.

**Transfer pricing**

Related party transactions are accepted if they are made on an arm’s-length basis. The IRD has the power under the Income Tax Act to make any adjustment deemed necessary to place such transactions at arm’s length.

**Thin capitalisation**

No provision exists for thin capitalisation in Saint Lucia.

**Controlled foreign companies (CFCs)**

There are no provisions relevant to CFCs in Saint Lucia.
Saint Lucia

**Tax credits and incentives**

**Foreign tax credit**
Where income has accrued to a resident and has been taxed in a foreign country with which there is no double tax agreement (DTA), or is income to which a DTA, if there is one, does not relate, credit for tax on such income is allowed for the lesser of the tax payable in the foreign country or the tax charged under Saint Lucia tax law.

**Tax holidays**
Tax holidays are available for manufacturing companies. The incentives are aimed at increasing the manufacturing base of Saint Lucia, the level of exports, and the use of local materials and labour in production. An approved manufacturing enterprise will be granted a tax holiday up to a maximum of 15 years. In determining the length of the tax holiday, the extent of the local value added to approved products is taken into account.

**Investment incentives**
Income tax incentives and other fiscal concessions are provided under the Fiscal Incentives Act, the Tourism Incentives Act, the Special Development Areas Act, and other concessions granted by the Cabinet of Ministers. The extent of the incentives and concessions granted are specific to the legislation or Cabinet conclusions and depend on the impact that the investment would have on local employment, exports, and the generation of foreign exchange earnings. The incentives granted include the following:

- Duty-free importation of raw materials, machinery, components, and spare parts and other inputs used in manufacturing, and the duty-free importation of construction materials, equipment, and other inputs used in the construction and operation of hotels and other hospitality products.
- Income tax waivers of up to 100% of the taxable income of companies engaged in manufacturing, tourism, and agriculture and other employment generating activities, for periods of up to 15 years.
- Whole or partial waivers of property tax, stamp duties, Alien Landholding Licence fees, WHT, and VAT with respect to investments in specific areas, or in specific industries and activities.
- Guaranteed repatriation of capital and dividends. Remittance of profits and dividends are tax-free as they are not subject to WHT.
- Export allowances for goods manufactured in Saint Lucia and exported. Companies that engage in such activity are given tax exemption on the export of such goods, up to a maximum of ten to 15 years.

**Employment incentives**
Employment incentives are available in the Income Tax Act for the following:

- Hiring university graduates. An additional deduction of 25% of salaries is provided for a maximum period of three years.
- Hiring persons in the offshore financial services industry with skills not available in Saint Lucia. A special tax concession is given to such persons that allows a prescribed percentage of an employee’s or contractor’s salary or fees to be exempt from income tax.

**International Business Companies (IBCs) Act**
IBCs are prohibited from conducting business in Saint Lucia and may elect to be exempted from income tax. Alternatively, IBCs may elect to be liable to income tax on its profits and gains at a rate of 1%. Freedom from exchange controls is granted to IBCs, as well as stamp duty on the transfers of any property, assets, shares, debt obligation, or other securities. No WHT is levied on remittances of dividends and distributions, royalties, interest, management fees, or fees or other income paid by IBCs to persons outside Saint Lucia. Supplies to an IBC are also deemed to be an export, and VAT is applied at the rate of 0%.
**Other incentives**

Complete or partial waivers of income tax are available on the taxable profits of companies engaged in providing services to the offshore financial services industry.

Special tax concessions are also available for capital construction in the hotel industry. Capital expenditures on the construction of a hotel may offset profits for up to 15 years.

---

**Withholding taxes**

Resident corporations and persons that make certain payments of an income nature to residents or non-residents are required to withhold tax on these payments as follows:

<table>
<thead>
<tr>
<th>Recipient</th>
<th>WHT (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Resident corporations:</td>
<td></td>
</tr>
<tr>
<td>Payments to contractors</td>

</tr>
</tbody>
</table>

Saint Lucia has only one DTA. This treaty, between the Caribbean territories, is referred to as the CARICOM Double Taxation Agreement. CARICOM is comprised of the following states:

- Antigua and Barbuda
- The Bahamas
- Barbados
- Belize
- Dominica
- Grenada
- Guyana
- Haiti
- Jamaica
- Montserrat
- St. Kitts and Nevis
- St. Vincent and the Grenadines
- Suriname
- Trinidad and Tobago

---

**Tax administration**

**Taxable period**

Returns must cover a 12-month period, which may be changed only with the Comptroller’s permission.

**Tax returns**

Tax returns must be filed within three months of the company’s fiscal year-end. An extension of the filing date may be obtained.
Saint Lucia

Financial statements must be submitted with the returns, together with a schedule reconciling taxable income with book income and various other schedules of additional information.

The system is one of self-assessment. Upon receipt of the returns, the IRD examines the information provided and issues a notice of assessment at any time, subject to the statute of limitations. The Revenue Department may also issue assessments in the absence of returns.

**Payment of tax**
Tax is payable in instalments on 25 March, 25 June, and 25 September in each year of income, based on the preceding year’s income. Any remainder is payable within three months of the end of the fiscal year.

**Penalties and interest**
The following civil penalties and interest, which are non-deductible, are imposed:

- For late filing or for failure to file: 5% of the tax charge at filing date.
- For late payment: 10% of the unpaid tax at the due date.
- On tax and penalties unpaid: monthly interest at a rate of 1.04%.
- Tax knowingly evaded or sought to be evaded: 100% of the tax.

**Appeals**
Within 30 days after the date of service of a notice of assessment or reassessment, the taxpayer may submit a written objection to the Revenue Department on any matters in such assessment or reassessment. If the Revenue Department confirms its assessment, the taxpayer may file an appeal with the Appeal Commission, which comprises seven persons appointed by the Minister of Finance. A decision by that body may be further appealed to the Saint Lucia High Court within 30 days. An appeal against an order from this Court may be made to the Court of Appeal.

**Tax audit process**
The IRD carries out audits of a selection of tax returns, usually at the taxpayer’s place of business. Audits may be carried out at any time prior to the expiration of the statute of limitations, whether or not notices of assessment have been issued. The Revenue Department has wide powers in determining the information it requires for these audits.

**Statute of limitations**
Assessments are not final until six years after the end of the income year, within which period assessments may be made at any time. In cases of misrepresentation or failure to disclose any material fact, a reassessment can be made at any time.

**Topics of focus for tax authorities**
The tax authorities in Saint Lucia continue to focus on improving and increasing tax collection and improving compliance with filing requirements. The Prime Minister stated that there are four main objectives of the reform program. These are to enhance taxpayer service and compliance and re-organise the IRD along functional lines; to strengthen planning, design, and monitoring functions; to segment the taxpayer population and establish separate large, medium, small, and micro-taxpayer sections to focus on the peculiar needs of each segment; and to integrate the administration of VAT into the mainstream operations of the IRD. Out of these stated reform objectives, the government has restructured the IRD, and the Department is now separated into a small and micro taxpayers division and medium and large taxpayers division.
Other issues

**Tax Information Exchange Agreements (TIEAs)**
TIEAs provide for the exchange of information on tax matters. TIEAs with Aruba, Australia, Belgium, Denmark, Finland, France, Germany, Iceland, Ireland, the Netherlands, Netherlands Antilles, Norway, Portugal, Sweden, the United Kingdom, and the United States are in force.

**United States (US) Foreign Account Tax Compliance Act (FATCA)**
On 19 November 2015, the government of the United States and the government of Saint Lucia signed an intergovernmental agreement (IGA) entitled, ‘Agreement between the Government of the United States of America and the Government of St. Lucia to Improve International Tax Compliance and to Implement FATCA’. The IGA requires, in particular, the exchange of certain information with respect to US and Saint Lucia reportable accounts on an automatic basis, pursuant to the provisions of Article 4 of the Agreement between both Governments for the Exchange of Information with Respect to Taxes, done at Washington on January 1987 (the ‘TIEA’).
**Significant developments**

**Name change for tax authority**
The name of the Department of Zakat and Income Tax (DZIT) has been changed to General Authority for Zakat and Tax (GAZT) as per the royal decree No. (A/133) dated 30/7/1437 correspondence to 7 May 2016.

**Introduction of new electronic filing system (ERAD) and unified tax/Zakat return**
On 1 February 2016, the GAZT issued an internal circular pertaining to the introduction of a new electronic filing system (ERAD). All tax, withholding tax (WHT), and Zakat returns, as well as the returns subject to both tax and Zakat (i.e. mixed entities), will require to be filed on ERAD. This was applicable to all returns for the financial year ended 31 December 2015 and onwards as well as returns not yet filed.

As per the ERAD system, a new unified tax/Zakat online return has to be completed. The new return contains six pages and requires completion of 35 schedules. New schedules were introduced covering the detailed movement of balances affecting the Zakat/tax calculation; moreover, many of the previous schedules were amended to reflect much more details, such as the calculation of the percentage of completion, and the new unified return required additional breakdowns and details relating to various accounts that have been added. All data should be entered in the new EARD system, and the GAZT has stopped accepting filing of hard-copy returns.

**Value-added tax (VAT)**
VAT will be introduced by 2018, according to the Saudi Finance Minister. See Value-added tax in the Other taxes section for more information.

**Annual fees on ‘unexploited’ land in the Kingdom of Saudi Arabia**
On 23 November 2015, the Cabinet passed, upon recommendation of the Shura Council, an annual fee of 2.5% on the value of the undeveloped urban land’s owned by one or more persons (natural or legal). The Cabinet is expected to update the decision with implementation regulations (‘new system’) by June 2016, which will be issued by the Ministry of Housing in collaboration with relevant bodies. According to the provisions of article (15) of the law, the new system will come into force after 180 days from publishing it in the official gazette.

The Ministry of Housing will use fee income to spend on housing and infrastructure projects, which supports the supply in the housing sector and provides solutions and products.

**Taxes on corporate income**
Only non-Saudi investors are liable for income tax in Saudi Arabia. In most cases, Saudi citizen investors (and citizens of the Gulf Cooperation Council [GCC] countries, who are
considered to be Saudi citizens for Saudi tax purposes) are liable for Zakat, an Islamic assessment. Where a company is owned by both Saudi and non-Saudi interests, the portion of taxable income attributable to the non-Saudi interest is subject to income tax, and the Saudi share goes into the basis on which Zakat is assessed.

According to the income tax law, the following persons are subject to income tax:

- A resident capital company to the extent of its non-Saudi shareholding.
- A resident non-Saudi natural person who carries on activities in Saudi Arabia.
- A non-resident person who carries out activities in Saudi Arabia through a permanent establishment (PE).
- A non-resident person who has other income subject to tax from sources within Saudi Arabia.
- A person engaged in natural gas investment fields.
- A person engaged in oil and other hydrocarbon production.

The rate of income tax is 20% of the net adjusted profits. WHT rates are between 5% and 20%. Zakat is charged on the company’s Zakat base at 2.5%. Zakat base represents the net worth of the entity as calculated for Zakat purposes.

It should be noted that although the income tax rate is 20%, income from the following two activities is subject to different rates:

- Natural Gas Investment Tax (NGIT) shall be determined on the basis of the internal rate of return (IRR) on the cumulative annual cash flows of the taxpayer derived from natural gas investment activities. The rate applicable will be 30% if the IRR is 8% or less. The rate increases progressively up to 85% if the IRR equals or exceeds 20%.
- Income from oil and hydrocarbon production is subject to tax at the rate of 85%.

**Local income taxes**

There are no local, state, or provincial government taxes on income other than the regular income tax or Zakat as mentioned above.

**Corporate residence**

A company is considered a resident company if it is formed under the Saudi Arabian Regulations for Companies or if its central management is located in Saudi Arabia.

**Permanent establishment (PE)**

According to the Saudi tax regulations, the following are the requirements for considering a non-resident party to have a PE:

- A PE of a non-resident in Saudi Arabia, unless otherwise provided below, consists of the permanent place of activity of the non-resident through which one carries out business, in full or in part, including business carried out through an agent.
- The following are considered a PE:
  - Construction sites, assembly facilities, and the exercise of its related supervisory activities.
  - Installations or sites used for surveying for natural resources, drilling equipment, or ships used for surveying for natural resources, and the exercise of its related supervisory activities.
  - A fixed location where a non-resident natural person carries out business.
  - A branch of a non-resident company that is licensed to carry out business in Saudi Arabia.
- A place is not considered a PE of a non-resident in Saudi Arabia if it is used in Saudi Arabia only to do the following:
  - Store, display, or deliver goods or products belonging to the non-resident.
Saudi Arabia

- Keep an inventory of goods or products belonging to the non-resident only for the purposes of processing by another person.
- Purchase of goods or products only for the collection of information for the non-resident.
- Perform any other activities that are preparatory or auxiliary in nature for the interests of the non-resident.
- Prepare contracts relating to loans, supply of products, or perform technical services for signature.
- Executing any group of the activities mentioned above.
- A non-resident partner in a resident personal company is considered an owner to a PE in Saudi Arabia in the form of a share in a personal company.

Furthermore, the agent mentioned in the above article is identified as a dependent agent who has any of the following authorities:

- Negotiate on behalf of a non-resident.
- Conclude contracts on behalf of a non-resident.
- Has a stock of goods, owned by a non-resident, on hand in Saudi Arabia to supply the clients' demands regularly on behalf of the non-resident.

A place from which a non-resident carries out insurance and/or reinsurance activity in Saudi Arabia through an agent is considered a PE of the non-resident even though the agent is not authorised to negotiate and conclude contracts on behalf of the non-resident.

Other taxes

Value-added tax (VAT)
There is currently no VAT system in Saudi Arabia. However VAT will be introduced by 2018, according to the Saudi Finance Minister. The decision to introduce VAT was agreed upon at the 102nd meeting of GCC Finance Ministers in Riyadh. The discussions took place at a gathering of the Committee on Financial and Economic Cooperation, which includes ministers from other GCC states.

The decision was based on an agreement taken by the Supreme GCC Council earlier in 2016 to introduce VAT in the six GCC countries. It was agreed that VAT would be introduced by 2018.

Reports indicate that the GCC bloc will introduce VAT of up to 5%. The tax would exclude 95 food items, but would be applicable for all citizens and residents. Health, education, and social services will likely be excluded.

Customs duties
Customs duties are imposed on imports according to tariff rates that are effective on the payment date in accordance with the Saudi Customs regulations. Customs duties are imposed on the price of the imported goods. This price is assessed based on the actual cost paid or on the agreed upon cost denominated in the currency of the exporting country. The price consists of the price of the imported goods as packed for shipping from the port of export plus freight and insurance cost to the Saudi port, which is converted to Saudi riyals at the exchange rates published by Saudi Arabian Monetary Agency (SAMA) on the date of the declaration. In case this procedure is not achievable, the imported goods will be priced based on the most proximate comparable value that could be ascertained. Imported goods that are subject to customs duties based on weight are assessed based on the gross weight or the net weight as shown in the tariff schedules. The gross weight of the goods includes the goods weight including all internal and external packing materials. Net weight of the goods excludes all internal and external packing materials, including the items used for separating and arranging the goods.
To encourage joint ventures in manufacturing, the government grants tariff protection from competing imports to locally produced, quality goods. Rates can be as high as 20%.

Penalties on smuggling goods vary from confiscation to collections of customs duties and penalties to imprisonment.

**Payroll taxes**
Since there is no individual income tax regime in Saudi Arabia, earnings from employment are not subject to income tax. Only the social insurance tax (see below) is applied on the payroll.

**Social insurance tax**
Social insurance tax is paid monthly based on (i) basic wage, (ii) cash or in-kind housing allowance, and (iii) commissions, with an upper limit of 45,000 Saudi riyals (SAR), is computed at 2% for non-Saudi employees, and is paid by the employer. For Saudi employees, the rate is 22% and is paid by both the employee (10%) and the employer (12%).

Based on Saudisation requirements, companies having a workforce of less than 50% of Saudi nationals have to pay SAR 200 monthly to the Labour Office for each expatriate employee.

**Other taxes**
There is no form of stamp duty, transfer, excise, sales, turnover, production, real estate, or property taxation except in so far as they may fall within the scope of *Zakat*, which is applicable only to Saudi nationals.

**Branch income**
Taxable income from a branch of a non-Saudi based corporation is taxed at 20%. Certain charges incurred by the headquarters are not deductible on the branch tax return.

**Income determination**

**Inventory valuation**
The weighted average-cost method is used for valuing inventory under Saudi tax law.

**Capital gains**
Capital gains are subject to income tax or *Zakat*, as appropriate, at the normal income tax or *Zakat* rate. However, capital gains realised from the disposal of shares in Saudi stock companies listed in the Saudi market are tax exempt, subject to certain conditions.

**Dividend income**
Dividend income that is received by a resident party is subject to income tax at the normal income tax rate. However, dividends paid to a non-resident party are subject to WHT at 5%.

**Interest income**
Interest income is subject to income tax at the normal income tax rate.

**Imports and supply contracts**
Saudi tax law provides that no profit will be considered to arise from a contract for the supply of goods to Saudi Arabia, provided delivery of the goods is either free on board (FOB) or cost, insurance, and freight (CIF) to a Saudi port. However, should the contract provide for the delivery and/or installation of materials at a point inside Saudi Arabia,
the supplier may be considered to be carrying on business within Saudi Arabia, and, as a consequence, the contract may be subject to Saudi income taxation as follows:

- If the material cost was identified in the supply contract separately from the cost of work performed in Saudi Arabia, then, in the absence of a PE, a WHT on the work that will be performed in Saudi Arabia may be assessed, based on the type of services. However, if the contract qualifies the supplier to have a PE in Saudi Arabia, then income tax will be applied according to the Saudi tax regulations as for a normal taxpayer.
- If the supply contract indicates a total cost without segregation in the value of supply and the value of the other activities in Saudi Arabia, then the work performed in Saudi Arabia will be assigned a value equal to 10% of the contract value for each type of activity.

**Foreign income**
The gross income derived by a capital company resident in Saudi Arabia from its operations and of its branches inside and outside Saudi Arabia is subject to tax in Saudi Arabia. However, in order to avoid double taxation on the same income, the following exceptions and clarifications are to be considered:

- With respect to the income realised from investments in other resident capital companies and in order to avoid double taxation, such income is to be excluded from being subject to tax under the following conditions:
  - That such income was subjected to tax in Saudi Arabia.
  - The percentage of ownership in the company invested in is not less than 10%.
  - The period of ownership of shares is not less than one year.
- With respect to the income realised from investments and operations outside Saudi Arabia, it will be subject to tax in Saudi Arabia unless an effective double tax treaty (DTT) between Saudi Arabia and the country invested in stipulates different provisions.

There are no restrictions on repatriation of profits, fees, capital, salaries, or other monies.

**Deductions**
All expenses that are necessary and normal to the business, paid or accrued, are allowable deductions, provided the expense meets the following conditions:

- It is an actual expense, supported by a verifiable document or other qualifying evidence.
- It is related to the generation of taxable income.
- It is related to the subject tax year.
- It is of a non-capital nature.

**Depreciation**
A depreciation deduction is allowed under the following limitations as stipulated by the law:

- The asset is not intended for resale and is to be used, in full or in part, for the entity’s purposes.
- The asset is of a depreciable nature that loses value because of use or because of wear and tear and obsolescence and has a value extending beyond the end of the taxable year.
- The asset is owned by the business, as per the ownership document for buildings and contracts and invoices for other assets.
• The asset depreciation is allowed even if the asset becomes inactive during the tax year.

Depreciation for tax purposes is calculated as follows, based on the following five categories of depreciable tangible or intangible assets, other than land:

<table>
<thead>
<tr>
<th>Asset category</th>
<th>Depreciation rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Fixed buildings</td>
<td>5</td>
</tr>
<tr>
<td>Industrial and agricultural movable buildings</td>
<td>10</td>
</tr>
<tr>
<td>Factories, machines and equipment, computer application programs, passenger cars, and cargo vehicles</td>
<td>25</td>
</tr>
<tr>
<td>Expenditures for geological surveying, drilling, exploration, and other preliminary work to exploit and develop natural resources and their fields</td>
<td>20</td>
</tr>
<tr>
<td>All other tangible or intangible assets not included in previous categories, such as furniture, planes, ships and trains, and goodwill</td>
<td>10</td>
</tr>
</tbody>
</table>

The declining-balance method of depreciation, according to the above rates, should be followed for tax purposes. However, straight-line depreciation is allowed for Zakat payers as of 7 April 2013.

There are also rules for depreciation relating to assets either acquired or disposed of. Essentially, 50% of the allowable acquisition price or disposal proceeds is added to or subtracted from the asset pool in the first year, and the remaining 50% in the following year.

Assets under build, own, and transfer (BOT) and build, own, operate, and transfer (BOOT) are allowed to be depreciated over the contract period. This presumes, although it is not clear, that assets under the BOT and BOOT schemes actually will have a separate grouping in addition to the above prescribed groups.

**Start-up expenses**

Tax treatment of start-up expenses depend on how they were treated under Saudi generally accepted accounting principles (GAAP). Generally, they can be fully expensed at the first financial year or can be amortised.

**Loan charges (interest expenses)**

An interest deduction is limited to the lower of the loan charge incurred during the tax year, if related to income that is subject to tax, or the result of the following formula, whichever is less.

The taxpayer’s total income from loan charges, plus 50% of (A minus B) as below:

A = income subject to tax other than income from loan charges.

B = expenses allowed under the law other than loan charge expenses.

Note that banks are not subject to this formula.

**Bad debt**

Bad debts are deductible, provided they meet all of the following conditions:

• The bad debt was previously declared in the appropriate year’s income.
• The debt resulted from sale of goods or services.
• The company holds a certificate from the taxpayer’s certified public accountant (CPA) certifying that the debt has been written off in the taxpayer’s books and records, based on a decision by the taxpayer at the appropriate management level.
Saudi Arabia

- Serious efforts have been exerted by the taxpayer to collect the debt with no success and the inability of the debtor to pay has been proved based on a judicial ruling or bankruptcy.
- The debt is not from a related party.
- There is a commitment by the taxpayer to reinstate, as income, any written-off debt whenever collected.

Charitable contributions
In determining the tax base of each taxpayer, a deduction is allowed for donations paid during the taxable year to public agencies or philanthropic societies licensed in Saudi Arabia, which are non-profit organisations and are allowed to receive donations.

Allocations and reserves
Allocations and reserves formed during the year are deductible as follows:

- Bank allocations to a reserve fund for doubtful debts are allowable deductions. However, a bank must submit a certificate from the SAMA stating the amount of doubtful debts and the amount of doubtful debts collected during the year that should be reinstated in the tax base of the year of collection.
- Insurance/reinsurance companies may deduct, based on industry standards, a reserve for unearned premiums and for unexpired risks, provided that it is reported in the tax base of the following year.

A reserve for unearned premiums means a part of premium amounts collected or stated in books that covers risks related to the future tax year(s). A reserve for unexpired risks mean the amount of compensation claimed or reported, but for which the payment process falls short of completion during the tax year.

- A taxpayer may reduce its book profit by the amount of reserves used during the year that had been readjusted when made to increase income or decrease expenses in the year of formation. Examples of such reserves are end-of-service awards, doubtful debt, and drops in prices. Such amounts are deductible, provided the following conditions are met:
  - The used amount was paid or accrued during the year, and it is supported by documentation.
  - The reserve had been adjusted in the year of formation to increase the tax base.

School fees
School fees paid by taxpayers for their employees’ children are deductible expenses, provided they meet the following conditions:

- They are paid to a local licensed school.
- This benefit is stated in the employment contract.

Pension fund
Employers’ contributions to employees’ pension funds or savings funds established under Saudi Arabia’s rules and regulations are deductible, provided that such contribution, one payment or in aggregate, is not in excess of 25% of the employee’s income before the employer’s contributions and that the fund meets the following criteria:

- The fund is established according to special provisions that clearly stipulate conditions of subscription and rights of subscribers.
- Such obligation is stated in the employment contract or in the Articles of Association of the establishment.
- The fund has a character independent of the establishment and has separate accounts audited by an independent CPA.
Saudi Arabia

**Research and development (R&D)**
A deduction is allowed for R&D expenditure incurred during the tax year in connection with the generation of income that is subject to tax. Such expenditure relates to technical, scientific, and engineering experiments; computer systems; or similar research. This provision does not apply to the acquisition of land and facilities, or to equipment used for research. Such facilities and equipment are subject to depreciation under the law.

**Fines and penalties**
Fines and penalties related to income tax, paid or payable in Saudi Arabia or to other countries, are not deductible.

Financial fines or penalties paid or payable in Saudi Arabia, such as traffic fines or fines for causing damage to public utilities, are also not deductible.

Fines or penalties paid for breach of contractual obligations, such as fines on delayed or defaulted completion of contracts, are deductible, provided they are documented by the contracting party and the income from such penalties is reported in the year of recovery.

**Taxes**
Income taxes are not deductible.

**Non-deductible expenses**
The following expenses are non-deductible:

- Wages, salaries, and whatever is so deemed, in cash or in kind, paid to an owner, partner, or shareholder, or to a member of their families, being a parent, spouse, sons/daughters, and siblings (this provision does not apply to stockholders in a stock company).
- Compensation in cash or in kind paid to a partner, shareholder, or to a family member, including a parent, spouse, sons/daughters, and siblings, for a property or service to the extent that the compensation is higher than the fair market value of such property or service at time of transaction.
- Entertainment expenses incurred for events such as parties, sports competitions, entertainment trips and activities, etc.
- Expenses of a natural person for personal consumption, such as personal withdrawals, dependant’s cost of living, or education.
- Any bribe or similar payment, which is considered an illegal practice in Saudi Arabia, even if paid abroad.
- Insurance commission in excess of 3% of total premiums collected in Saudi Arabia through an agent or others and regardless of whether or not the agent is a partner.

**Net operating losses**
A taxpayer may carry forward operational losses, as adjusted, to the years following the loss year until the cumulative loss is fully offset. The maximum profit percentage of any year that could be used to offset cumulative losses should not exceed 25% of the year’s profit as reported in the taxpayer’s return. Carryback of losses is not allowed.

**Payments to foreign affiliates**
Payments made to headquarter offices located abroad by wholly owned local subsidiaries or branches are not deductible. Such payments include:

- royalties or commissions
- loan charges (interest expense) or any other financial fees (except loan charges paid by branches of foreign banks in Saudi Arabia to their non-resident head offices, which are considered as tax deductible expenses), and
- indirect administrative and general expenses allocated on an estimated basis.
The value of goods or services delivered to the taxpayer by related parties is not deductible to the extent that it is in excess of an arm's-length value.

**Group taxation**

Double taxation on the income of foreign investors realised from their investments in other resident companies is eliminated under the following conditions:

- Such income was subjected to tax in Saudi Arabia.
- The percentage of ownership in the company invested in is not less than 10%.
- The period of ownership of shares is not less than one year.

With respect to the income realised by a resident capital company from its investments and operations outside Saudi Arabia, it will be subject to tax in Saudi Arabia (unless an effective DTT between Saudi Arabia and the country invested in stipulates different provisions).

However, for Zakat purposes, the concept of consolidation is acceptable and relief may be obtained for wholly owned subsidiaries by Saudi/GCC companies that are subject to Zakat.

Note that an entity operating in Saudi Arabia that has undertaken more than one project under the same commercial registration is required to consolidate the results of such projects into the financial statements of that entity and subject them to taxation as a single operation.

**Transfer pricing**

There are no specific transfer pricing rules in Saudi Arabia that impose or deem a charge to arise where the GAZT has reason to believe that a transaction has taken place at a value other than on an arm's-length basis. However, there is a generic provision that allows the GAZT to re-characterise or re-allocate income or expenses arising from a transaction if it is undertaken for the purposes of avoiding or reducing a tax liability in Saudi Arabia.

In addition to the above and based on the Ministerial Resolution (No. 1776) dated 19 March 2014, the GAZT is to issue guidelines/regulations on transfer pricing of transactions between related parties in accordance with the internationally accepted standards.

**Thin capitalisation**

There is no special legislation governing thin capitalisation for tax purposes. A Saudi company may deduct interest payments to affiliates, but not the head office, provided that the amount of debt and rate of interest are at arm's length and that the interest deductibility formula is met. A Saudi company may be financed with minimum capital, and there is no limit to the amount of debt that may be used.

**Controlled foreign companies (CFCs)**

There are no special rules for CFCs in Saudi Arabia. However, as mentioned above, the gross income derived by a capital company resident in Saudi Arabia from its operations and of its branches outside Saudi Arabia is subject to tax in Saudi Arabia.

**Tax credits and incentives**

**Foreign tax credit**

Income tax and related fines and penalties paid or payable to Saudi Arabia or to other countries are non-deductible expenses.
Incentives for investment in less-developed regions

The government of Saudi Arabia has granted tax concessions to the following six less-developed regions in Saudi Arabia, with the intention of attracting more investment:

- Ha’il.
- Jazan.
- Najran.
- Al-Baha.
- Al-Jouf.
- Northern territory.

These tax privileges are granted for a period of ten years from the start of any project.

The qualifying investing company’s annual tax bill may be reduced by:

- Half the annual training expenditure on Saudis.
- Half the annual salaries paid to Saudis.
- 15% of the non-Saudi capital share, subject to certain conditions.

More deductions are granted if investment capital for any project exceeds SAR 1 million and if more than five employees of Saudi nationality have jobs of a technical or administrative nature with contracts of at least one year.

Customs incentives

An exemption from customs duties is available on machinery and raw materials that are required for approved projects, provided that they are not available in the local market. Such exemptions should be applied for prior to their importation and are subject to certain terms.

Withholding taxes

Payments made from a resident party or a PE to a non-resident party for services performed are subject to WHT. The rates vary between 5%, 15%, and 20% based on the type of service and whether the beneficiary is a related party.

The WHT should be paid within the first ten days of the month following the month during which the payment was made.

The domestic rate for WHT is 5% on dividends, 5% on interest, and 15% on royalties.

Tax treaties

Saudi Arabia has entered into tax treaties with several countries. Treaties currently or about to be in force are listed below. A number of other treaties are at various stages of negotiation.

DTTs have not yet been effectively tested in Saudi Arabia. However, they generally follow the Organisation for Economic Co-operation and Development (OECD) Model Treaty and may provide certain relief, including WHT on dividends, interest, and royalties.

The following are the treaty WHT rates for payments made from Saudi Arabia to treaty country recipients. Each tax treaty should be studied carefully because there could be exceptions to the general rules:

Notes

1. Shall not exceed:
   - 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that has owned, directly or indirectly, at least 25% of the capital of the company paying the dividends for a period of at least 12 months preceding the date the dividends were declared.
   - 10% of the gross amount of the dividends in all other cases.
2. Shall not exceed:
   - 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that directly holds at least 10% of the capital of the company paying the dividends.
   - 10% of the gross amount of the dividends in all other cases.
3. Shall not exceed:
   - 5% of the gross amount of dividends if the beneficial owner is (i) a company or (ii) an entity wholly owned by the government.
   - 10% of the gross amount of the dividends in all other cases.
4. Shall not exceed:
   - 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that directly holds at least 25% of the capital of the company paying the dividends.
   - 10% of the gross amount of the dividends in all other cases.
5. Shall not exceed:
   - 5% of the gross amount of the dividends.
   - The contracting state of which the company paying the dividends is a resident shall exempt from tax the dividends paid by that company to a company (other than a partnership) that is a
resident of the other contracting state, as long as it directly holds at least 25% of the capital of the company paying the dividends.

6. Shall not exceed:
   • 5% of the gross amount of the dividends:
     • if the beneficial owner is a company (other than a partnership) that directly holds at least 20% of the capital of the company paying the dividends or
     • if the beneficial owner is central bank or an entity that is wholly owned by the government.
   • 10% of the gross amount of the dividends in all other cases.

7. Shall not exceed:
   • 15% of the gross amount of the dividends where qualifying dividends are paid by a property investment vehicle.
   • 5% of the gross amount of the dividends in all other cases.

8. Shall not exceed:
   • 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that directly holds at least 20% of the capital of the company paying the dividends, or has invested 20 million United States dollars (USD) or more, or any equivalent currency, in the capital of the company paying the dividends.
   • 12.5% of the gross amount of the dividends in all other cases.

9. Shall not exceed:
   • 5% of the gross amount of the dividends if the beneficial owner is a company that directly holds, directly or indirectly, during the period of 183 days ending on the date on which entitlement to the dividends is determined, at least 10% of the voting shares or of the total issued shares of the company paying the dividends.
   • 10% of the gross amount of the dividends in all other cases.

10. Shall not exceed:
    • 5% of the gross amount of the royalties that are paid for the use of, or the right to use, industrial, commercial, or scientific equipment.
    • 10% of the gross amount of the royalties in all other cases.

11. Shall not exceed:
    • 5% of the gross amount of the royalties that are paid for the use of, or the right to use, industrial, commercial, or scientific equipment.
    • 8% of the gross amount of the royalties in all other cases.

12. Shall not exceed:
    • 7.5% of the gross amount of such royalties that are paid for rendering of any services or assistance of a technical or managerial nature.
    • 10% of the gross amount of such royalties in all other cases.

13. Shall not exceed:
    • 5% of the gross amount of the dividends.
    The contracting state of which the company paying the dividends is a resident shall exempt from tax the dividends paid by that company to a company (other than a partnership) that is a resident of the other contracting state, as long as it directly holds at least 25% of the capital of the company paying the dividends or when paid to the government, the central bank, or any institution, agency, or fund wholly owned by the government of Ireland.

14. Shall not exceed:
    • 5% of the gross amount of the royalties that are paid for the use of, or the right to use, industrial, commercial, or scientific equipment.
    • 7% of the gross amount of the royalties in all other cases.

15. Shall not exceed:
    • 5% of the gross amount of the dividends if the beneficial owner directly holds at least 20% of the capital of the company paying the dividends.
    • 15% of the gross amount of the dividends in all other cases.

16. Shall not exceed:
    • 2.5% of the gross amount of income from debt-claims for banking institutions.
    • 5% of the gross amount of income from debt-claims in all other cases.

17. The GAZT informed a taxpayer in a case where a royalty was paid by a Saudi company to an unrelated, third party that it was also taxable in Saudi Arabia, and requested settlement of 15% WHT, indicating that Saudi Arabia has the taxing right.

18. Shall not exceed:
    • 5% of the gross amount of dividends if the beneficial owner is the government of the other contracting state, the central bank of that other contracting state, or any entity wholly owned by the government of that other contracting state.
    • 5% of the gross amount of dividends if the beneficial owner of dividends has invested to the capital of the company paying the dividends at least USD 300,000 or its equivalent in any other currency.
    • 7% of the gross amount of dividends in all other cases.

19. Shall not exceed:
    • 0% if income from debt-claims arising in a contracting state and paid to the government or the central bank of the other contracting state or any entity wholly owned by the government of that other contracting state or under a loan agreement approved by the government shall be exempt from tax in the first-mentioned contracting state.
    • 7% of the gross amount of income from debt-claims in all other cases.

The GAZT offers a choice of automatic application of relevant tax treaty without going through the refund procedure. The choice is given to Saudi Arabia residents or PEs of non-residents that make payments subject to WHT in Saudi Arabia.
Saudi Arabia

They can apply reduced rates or full relief upon making the payment. The following conditions are imposed on taxpayers that choose to apply DTT automatically:

- Report, via monthly WHT returns, the full details of each payment made to non-resident parties (beneficiaries).
- Still file a request form for application of DTT together with tax residence certificate of the beneficiary.
- Undertake full responsibility for any understatement of tax, including penalties.

As mentioned above, the GAZT provides a choice; taxpayers can still withhold tax and comply with the refund procedure.

The GAZT’s view on virtual PE

Usually, a treaty’s articles do not address technical services (except Vietnam/Malaysia, where it is part of royalties), so the source country should not have a taxing right unless a PE is created by the non-resident in Saudi Arabia. Also, the treaty with Spain does not have a ‘service PE’ article. Effectively, the provision of technical services provided totally outside Saudi Arabia or other services not defined should be taxable only in the country of residence.

However, an internal circular issued by the GAZT should be taken into consideration when applying WHT refund claims by non-residents. The circular relates to the interOPERATION of services PE (article 5(3)(b), not OECD but the United Nations [UN] model).

---

**Tax administration**

**Taxable period**

Tax filings are based on the company’s fiscal year.

**Tax returns**

Returns are due to be filed with the GAZT within 120 days after the taxpayer’s year-end. The system is one of self-assessment.

According to the tax authority, companies that are owned by Saudis only, or by Saudis and non-Saudis, must file audited financial statements along with the tax return.

**Payment of tax**

Final tax due must be paid within 120 days after the taxpayer's year-end.

Three equal advance tax payments are required to be made on the last day of the sixth, ninth, and 12th months for a current tax year, provided that the taxpayer has earned income during the year. Each advance payment is equal to 25% of the amount resulting from the taxpayer’s tax liability based on the previous year return minus the withheld tax on reported income, if any. The taxpayer is not required to make advance tax payments if the result of the said formula is less than SAR 500,000. Late payment of an advance payment is subject to a delay penalty of 1% of the amount due for every 30 days of delay.

**Tax audit process**

There is no specific audit process followed by the GAZT; however, the most common ways for the GAZT to select companies for tax audits are the size of the company, the companies’ shareholders nationality (totally owned by foreigners and branches of foreign companies), and certain risk assessment measures.
Statute of limitations
The GAZT may, with a reasoned notification, make or amend a tax assessment within five years from the end of the deadline specified for filing the tax declaration for the taxable year, or, at any time, upon a written consent of the taxpayer.

The GAZT may make or amend an assessment within ten years of the deadline specified for filing the tax declaration for the taxable year if a taxpayer does not file its tax declaration or it is found that the declaration is incomplete or incorrect with the intent of tax evasion.

A taxpayer may request a refund of overpaid amounts at any time within five years from the end of the overpaid taxable year.

Topics of focus for tax authorities
The GAZT emphasises the submission of a certificate from the General Organisation for Social Insurance (GOSI) along with a reconciliation statement between salaries and wages subject to GOSI and salaries and wages charged to the taxpayer’s accounts duly certified by a Saudi licensed CPA.

The GAZT focuses on the payments made to non-resident parties to verify compliance with the WHT regulations by requesting a reconciliation statement for such payments with the annual WHT form.

The GAZT has also been requesting import value lists from the Customs Authority in order to confirm the value of goods imported and declared by taxpayers in their annual declarations during the financial period.

Other issues
United States (US) Foreign Account Tax Compliance Act (FATCA)
Saudi Arabia signed a Model 1 Intergovernmental Agreement (IGA) in light of the FATCA dated 24 June 2014. The draft regulations were issued in February 2012 and the final regulations were released on 17 January 2013 with an amendment to some of the deadlines issued through a notice on 12 July 2013. Saudi Arabia has consented to disclose this status. In accordance with this status, the text of such IGA has not been released, and financial institutions in Saudi Arabia are allowed to register on the FATCA registration website consistent with the treatment of having an IGA in effect, provided that the jurisdiction continues to demonstrate firm resolve to sign the IGA as soon as possible.

**Significant developments**

The ceiling for minimum corporate income tax (CIT) of 20 million *Communauté financière d’Afrique* (Financial Community of Africa or CFA) francs (XOF) has been reduced to its prior amount of XOF 5 million.

**Taxes on corporate income**

Branches and companies are liable for CIT at the rate of 30%.

Residents are taxed upon their worldwide income. Non-residents are generally taxed via the existence of a permanent establishment (PE) on Senegal-source income.

Withholding taxes (WHTs) may also apply to non-residents, as per the services delivered to Senegalese taxpayers, subject to the application of a double tax treaty (DTT).

**Minimum CIT**

A minimum CIT is due, in case of lack of profits, at the rate of 0.5% applied on the annual turnover. The minimum amount cannot be less than XOF 500,000 and the maximum amount cannot be more than XOF 5 million.

**Local income taxes**

See the Other taxes section for a description of local taxes based on turnover and property.

**Corporate residence**

Companies are considered as Senegalese residents if they have a registered fixed establishment. Nonetheless, foreign companies that are not registered locally may be deemed to have a PE in Senegal in relation to their local activity and will then be subject to tax liabilities.

**Permanent establishment (PE)**

The criteria for a PE were derived from the former General Tax Code (GTC) and are close to the Organisation for Economic Co-operation and Development (OECD) standards. The new GTC does not include a PE provision, but the former one should be applicable. DTTs can be applicable and can provide specific definitions. These DTTs are based on the OECD model in most cases. See the Withholding taxes section for a list of countries with which Senegal has concluded DTTs.

**Other taxes**

**Value-added tax (VAT)**

Subject to certain exclusions, most commercial operations are subject to an 18% VAT.
VAT on tourism activities is 10%.

A 17% special tax on financial activities (mainly banking, money transfers, and change operations) is applicable instead of VAT.

VAT returns must be filed monthly.

**Customs duties/Import tariffs**  
In the case of import of goods, the following tariffs apply:

- Customs duties: 0%, 5%, 10%, or 20%, depending on the nature of the goods.
- Statistical import charge: 1%.
- Community solidarity levy: 1%.
- Economic Community of West African States (ECOWAS) levy: 0.5% (only applicable among ECOWAS countries).
- Senegalese Shippers Council (COSEC) royalty: 0.4% (only applicable on importation by sea).

**Excise taxes**  
The products on which the Senegalese authorities levy excise tax, and the relevant excise tax rates, are as follows:

- Beverages: 40% for beverages containing alcohol, plus an additional tax ranging from XOF 1,500 to XOF 5,000 per litre; 3% for sparkling beverages.
- Tobacco: 45%.
- Coffee: 5%.
- Tea: 5%.
- Fat: Rate varies from 5% to 12%.
- Private cars with a horsepower (tax engine rating) superior to 13CV: 10%.
- Cosmetic products: 10% (increased to 15% for depigmentation products).
- Oil products (rates per nature and per hectolitre): XOF 21,865 for super-petrol, XOF 19,847 for conventional petrol, XOF 3,856 for petrol for the use of pirogues, XOF 10,395 for diesel.

**Tax on built real estate**  
The tax on built real estate applies annually to owners of buildings, factories, industrial premises, or equipment fixed on the land. The tax rate is 5% for common buildings and 7.5% for factories and industrial premises. It is applied on the basis of the rental value of the lands, buildings, etc.

**Tax on non-built real estate**  
The tax on non-built real estate applies annually to owners of land without buildings, factories, industrial premises, or equipment fixed on the land. The tax rate is fixed at 5%. It is applied on the basis of the rental value of the land.

**Stamp/registration duties**  
There are many stamp and/or registration duties, depending on the operations, such as the following:

<table>
<thead>
<tr>
<th>Operation</th>
<th>Stamp and/or registration duty</th>
</tr>
</thead>
<tbody>
<tr>
<td>Commercial, house, or equipment lease</td>
<td>2% applicable on the basis of the annual rent</td>
</tr>
<tr>
<td>Transfer of real estate</td>
<td>5% on the sales price</td>
</tr>
<tr>
<td>Pledge</td>
<td>1% on the guarantee value</td>
</tr>
<tr>
<td>Increase of the capital in cash</td>
<td>1% of the increase where the share capital is greater than XOF 100 million</td>
</tr>
<tr>
<td>Transfer of business</td>
<td>5% on the sales price</td>
</tr>
</tbody>
</table>
Senegal

Operation | Stamp and/or registration duty
---|---
Transfer of shares | 1% on the sales price (or the market value if higher)

**Business licence tax**

Business licence tax is an annual duty consisting of a fixed annual payment (fixed duty) and a proportional duty, calculated in most cases on the basis of the rental value of the premises used. The amounts and rates of these taxes are fixed according to the type and size of the activity carried out.

There is a table that includes several categories of business. For each category, a fixed tax is provided as well as the percentage that is applied on the assets at their fair value.

As an example, when the fixed tax depends on the level of the annual turnover, the following scale is applicable:

<table>
<thead>
<tr>
<th>Level of turnover (XOF)</th>
<th>Fixed amount of tax (XOF)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Over 0-50 million</td>
<td>75,000</td>
</tr>
<tr>
<td>Over 50 million-150 million</td>
<td>125,000</td>
</tr>
<tr>
<td>Over 150 million-250 million</td>
<td>175,000</td>
</tr>
<tr>
<td>Over 250 million-500 million</td>
<td>300,000</td>
</tr>
<tr>
<td>Over 500 million</td>
<td>800,000</td>
</tr>
</tbody>
</table>

In this case, the proportional tax is determined by applying the rate of 19% on the annual rental value of the offices, warehouses, sites, and other premises and installations considered as constructions, real estate, and assets in general that are used for the activities.

In the absence of a determined rent, the rental value is calculated by applying the following rates to the purchase price:

- Land: 3%.
- Buildings and installations: 4.8%.
- Fixed and movable tools: 5%.

**Tax on telecommunication**

The tax rate is 5% on telecommunication use and access. To offset the tax, the purchase of mobile telephones (and other types of telephones) remains exempt from VAT and customs duty.

There are also two specific taxes payable by companies in the telecommunications sector. These taxes represent 3% (for the tax called ‘CODETE’) and 1% (for the tax called ‘PST’) of the annual turnover less the payments made to other operators for networking services.

**Tax on vehicles**

An owner of a motor vehicle (car, truck, or motorbike) must pay an annual tax fixed at XOF 1,000 per hectolitre, except for the pirogue gasoline.

**Company tax on vehicles**

In addition to the tax on vehicles, companies owning or renting vehicles (more than 15 days a year) must pay a specific annual tax on them. Rates range from XOF 50,000 to XOF 200,000, depending on the type and horsepower of the vehicle.
**Payroll taxes**

**Pay-as-you-earn (PAYE)**
All compensation (including salary, cash allowances, and benefits in kind) paid to employees is generally taxable. For the calculation of the personal income tax (PIT) to be withheld by the employer, the tax administration provides a tax table determined on a monthly basis so that no calculation is necessary.

**Employer tax**
Employers are subject to a 3% tax based on the total gross salaries paid to employees.

**Social Security contributions**
Social Security contributions are borne exclusively by the employer.

The rate for the industrial accident/occupational disease branch has to be confirmed by the authority when registering the entity with the Social Security Office (applicable rate to be stated within the related certificate).

<table>
<thead>
<tr>
<th>Sector</th>
<th>Rate of contributions (only payable by employers) (%)</th>
<th>Maximum monthly basis of calculation (XOF)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Family</td>
<td>7</td>
<td>63,000</td>
</tr>
<tr>
<td>Industrial accident / Occupational disease</td>
<td>1/3/5</td>
<td>63,000</td>
</tr>
</tbody>
</table>

**Retirement contributions**
Retirement contributions are payable both by the employer and the employees:

<table>
<thead>
<tr>
<th>Regime</th>
<th>Rates of contributions (%)</th>
<th>Maximum monthly basis of calculation (XOF)</th>
</tr>
</thead>
<tbody>
<tr>
<td>General</td>
<td>Payable by employers: 8.4</td>
<td>Payable by employees (withheld on the salary): 5.6</td>
</tr>
<tr>
<td>Executive</td>
<td>3.6</td>
<td>2.4</td>
</tr>
</tbody>
</table>

**Employment medical coverage**
The employer shall subscribe for all employees a medical coverage. The level of coverage depends on the type of agreement concluded with the dedicated organism. Usually, the employee is reimbursed for 80% of medical expenses, even though the law provides a range between 50% and 80%.

The monthly rate is 6%, to be levied on a contribution rate between XOF 60,000 and XOF 250,000, for both the employee and the employer.

**Branch income**
In general, the tax on branch income is similar to that of corporate income. Nonetheless, a 10% duty is automatically applied to profits generated after CIT. It corresponds to an automatic application of the 10% tax on payment on dividends applicable to a company.

Headquarter expenses, which are a proration of the worldwide office expenses, may be allocated to the Senegal branch. This proration is based upon a ratio of the local turnover of the branch and the worldwide turnover of the parent company. It applies to the total amount of headquarters’ expenses incurred by the company. In addition, the deductibility of headquarters expenses is limited to 20% of the accounting profits before the deduction. This limitation does not apply to other types of services provided by headquarters, such as technical assistance.
**Income determination**

**Inventory valuation**
Inventory is generally stated at the lower of cost or market value. Last in first out (LIFO) and first in first out (FIFO) are permitted. Book and tax conformity is required.

**Capital gains**
Capital gains derived from the transfer of assets are subject to the 30% CIT. There is no basket system. Sales of stocks by a non-resident are liable to the 30% CIT, subject to the application of a DTT.

**Dividend income**
If a parent company domiciled in Senegal owns 10% of the subsidiary (main condition for the application of the parent-subsidiary corporation special taxation status), a 95% reduction on the dividends received is applicable for CIT purposes.

If these conditions are not met, dividends received by a company are subject to CIT as follows:

- 40% of the dividends are added back to the taxable profit.
- The company benefits from a tax credit upon the CIT equal to 40% of the tax on distributions withheld (at the general WHT rate of 10%).

**Stock dividends**
Stock dividends are unusual in Senegal. However, this kind of distribution would be taxable at the general WHT rate of 10% on the basis of its real value.

**Interest income**
Article 105 of the General Tax Code provides a list of interests that are not subject to CIT. For instance, the following are not subject to CIT:

- Interest on sovereign debt.
- Interest on deposit accounts opened at the Housing Bank of Senegal (*Banque de l’Habitat du Senegal*).
- Interest on loans granted by the Central Bank.

**Foreign income**
In general, profits generated in Senegal are taxed under Senegal’s income tax law. Profits generated outside Senegal and constituting a PE in the relevant country are not taxed in Senegal. A DTT can provide different rules.

**Deductions**

**Depreciation and depletion**
The rates of depreciation are not provided by the law. The rate is determined on the normal and predictable duration of use of the asset by taking into account normal wear and tear. In practice, there are standard rates for common assets. Accelerated depreciation can be applicable, subject to conditions.

**Goodwill**
There are no provisions in Senegal for goodwill.

**Start-up expenses**
Start-up expenses are deductible if justified and approved by the shareholders.
**Interest expenses**
Interests on current account advances or loans from a shareholder (directly or indirectly) are subject to restrictions as to their deduction from taxable income:

- The share capital of the company receiving the loan or advance shall be, beforehand, fully paid.
- The amount of the loan or advance shall not exceed the share capital of the company receiving it. It is not an individual but an overall ceiling on the total amount of loans and advances of all shareholders and seniors.
- The rate of interest shall not exceed the rate of advance of the Institute of Emissions plus 3 points. The rate published by the Ministry of Economy and Finance for 2016 is 3.5%.

**Bad debt**
There are no provisions in Senegal for bad debt.

**Charitable contributions**
Only payments made to specific chartered organisations are deductible, at a rate of up to 0.5/100 of turnover. On the contrary, payments made to non-chartered organisations are not deductible.

**Fines and penalties**
Fines and penalties are not deductible for CIT purposes.

**Taxes**
CIT and the company tax on vehicles are not deductible.

**Other significant items**
Provisions are deductible if they correspond to a risk or a probable cost that is more than possible and leads to a decrease in the assets. Provisions for paid holidays and retirement compensation are not deductible.

**Net operating losses**
Tax losses may be carried forward to the next three years. Losses corresponding to the depreciation of assets can be carried forward indefinitely. The carryback of losses is not allowed.

**Payments to foreign affiliates**
Reasonable royalties, interest, and management service fees paid to foreign parent companies are deductible. Supporting documents (e.g. invoices, contracts) will be necessary to prove that these expenses are justified.

**Group taxation**
Group taxation is not permitted in Senegal.

**Transfer pricing**
The transfer pricing regulations globally correspond to the OECD requirements standards (i.e. identifying related-party transactions, choosing the suitable transfer pricing method, and preparing documentation to support the selection of such method).

**Thin capitalisation**
There are no specific rules regarding thin capitalisation in Senegal. Nonetheless, the following tax and legal rules should be known:

- From a legal point of view (corporate law), the net assets must be equal to at least half of the share capital of the company. In case the net assets are lower than this
Senegal

threshold, the situation should be regularised by any lawful means within a period of two years following the financial year it appears. Otherwise, any third party can request the closing of the entity before the courts.

- The deductibility of interest paid to a shareholder upon a loan or an advance in general is limited to a maximum rate calculated on the Central Bank legal interest rate (currently fixed at 3.5%) plus 3 points, calculated on the amount of the share capital (see Interest expenses in the Deductions section for more information). Portions exceeding this limit are not deductible for CIT purpose.

**Controlled foreign companies (CFCs)**
The there are no provisions in Senegal for CFCs.

---

**Tax credits and incentives**

**Foreign tax credit**
Usually, DTTs may provide some tax credit on the basis of the relationship between Senegalese entities and their partners located abroad. For each DTT, the specific process to enforce those tax credits either in Senegal or abroad (depending on the payments directions) are stipulated within that DTT. Nonetheless, as far Senegal is concerned, the practice consisting of enforcing foreign tax credits locally is very rare.

**The Investment Code**
The Investment Code applies to investments over XOF 100 million (mainly production, processing, industrial, tourism, agricultural, and complex trade). The benefits of the Investment Code include exemption from customs duties, suspension of VAT payment for three years, CIT limitation, etc. The tax benefits are directly integrated in the GTC and do not require administrative authorisation (i.e. as long the requirements are met, the taxpayers may benefit from those tax benefits).

**Free export company status**
Agriculture, industry, and telecommunications companies that have an exporting potential amounting to at least 80% of their turnover may qualify for the free export company status. There are several advantages for companies that qualify, including a CIT rate of 15%, exemption from dividend WHT, exemption from business licence tax, exemption from taxes on real estate, and exemption from registration duty for incorporation or bylaws change purposes.

**Miscellaneous incentives**
There are a wide range of investment laws (i.e. negotiations with the government to set up a specific tax regime different from common rules) for investments greater than XOF 250 billion, including the mining code and the petroleum code, among others. All of these tax benefits are directly included in the GTC.

---

**Withholding taxes**
Senegal has various WHTs. The primary ones are as follows:

- 20% WHT on remuneration paid for services (including royalties) rendered by a foreign individual or foreign company.
- 5% WHT on remuneration paid for services rendered by a resident individual (liable for tax under lump sum taxation, among others) or resident company that are not subject to CIT.
- 10% WHT on dividends distributed.
- 13% WHT on bond interest.
- 8% WHT on deposits or guaranteed interest on accounts with a bank.
- 16% WHT on other revenues, notably interest on loans.
These WHTs may be limited by DTTs.

**Double tax treaties (DTTs)**
The DTTs concluded by Senegal are based on the OECD model in most cases. Senegal has concluded such treaties with the countries listed in the table below.

Treaty WHT rates are as follows:

<table>

* West African Economic and Monetary Union (member states are Benin, Burkina-Faso, Côte d’Ivoire, Guinea-Bissau, Mali, Niger, and Togo).

### Tax administration

#### Taxable period
The tax year in Senegal is the calendar year.

#### Tax returns
Companies must file CIT returns by 30 April of the year following the tax year.

Also, in addition to the miscellaneous annual returns (business licence tax, company car tax, etc.) and other monthly tax returns (VAT, payroll taxes, WHT, etc.), taxpayers must file by 31 January for the prior financial year:

- An annual recapitulative payroll tax return.
- An annual recapitulative return on payment for services.

#### Payment of tax
CIT must be paid in two instalments (each equal to one-third of the previous year’s tax) by 15 February and 30 April. The outstanding balance payment amount of the tax due must be paid by 15 June.

For the first financial year of a newly incorporated company, no instalment is due; the new company pays the whole CIT before 15 June of the following year.

#### Penalties
In case of late payment, a 5% interest of delay on the amount due plus an additional 0.5% duty per month of delay or portion of month of delay are applicable. This late payment is due when the taxpayer’s regularisation is spontaneous.

On the other hand, if such payment is triggered by a tax audit from the authority itself after the deadline is crossed, the following penalties apply:

- 50% for any WHT and VAT.
Senegal

- 25% for other taxes (CIT, business licence tax, taxes on real estate, registration duties, company car tax).

Also, the late filling of tax returns triggers an XOF 200,000 penalty per return.

**Tax audit process**
The tax authorities may request information, clarifications, or justification to the taxpayers. The taxpayers have 20 days to answer to those requests.

The tax authorities may also implement an inspection of the accounting documents at the premises of the taxpayer or at any place the taxpayer would consider more appropriate for material reasons upon a specific request. In such cases, a notice is sent to the taxpayer at least five days before the beginning of the inspection.

The tax authorities are not allowed to process a new tax inspection on a period already inspected by their services unless a new element or document is revealed after the first inspection was processed.

Where the tax authorities estimate that the taxpayer has not fulfilled all of one's tax obligation, a tax reassessment shall be transmitted to the taxpayer, who has 30 days in order to answer or comment on the findings.

After the tax authorities have received those comments, they can confirm partially or totally the reassessment within a statutory delay of 60 days.

**Statute of limitations**
The statute of limitations is, generally speaking, four years.

**Topics of focus for tax authorities**
With regards to corporate tax compliance, the tax authorities are generally focusing on certain expenses with forbidden or limited deductibility, such as depreciation of assets, provisions, interest, royalties/services fees, insurance premiums, head office costs, etc., but they usually define their approach according to the business sector of the company.

Significant developments
The latest amendments to the tax laws were enacted in October and December 2015 and relate to the value-added tax (VAT), corporate income tax (CIT), personal income tax (PIT), and Law on Tax Procedure and Tax Administration.

Starting from 1 March 2016, fees paid by Serbian resident entities to non-resident legal entities for services rendered or used in the territory of Serbia are subject to 20% withholding tax (WHT), unless otherwise stipulated by an applicable double tax treaty (DTT). Other new CIT rules apply for the assessment of 2016 CIT liability.

According to the amended VAT Law, non-residents can register for VAT purposes by appointment of a fiscal representative. Additionally, there were certain changes in relation to the VAT rules regulating supply of goods and services in the field of construction.

Taxes on corporate income
Residents are taxed on their income generated in Serbia, as well as on their worldwide income. Non-residents are taxed only on their income sourced through a permanent establishment (PE) in Serbian territory.

The CIT rate is 15%.

Local income taxes
There are no local taxes on income in Serbia.

Corporate residence
A legal entity is considered to be a resident of Serbia if it is established or has its place of effective management and control in Serbia.

Permanent establishment (PE)
A PE is any permanent place of business through which a non-resident conducts its business.

Other taxes
Value-added tax (VAT)
The VAT was introduced on 1 January 2005 and generally follows the European Union’s (EU’s) Sixth Directive.

The standard VAT rate is 20% for most taxable supplies. A reduced VAT rate of 10% applies for basic food stuffs, daily newspapers, medicines, publications, public transportation services, utilities, etc.
In addition to these tax rates, there is a 0% tax rate with the right of deduction of the input VAT that applies to the export of goods, transport and other services directly related to exports, international air transport, etc.

A 0% tax rate without the right of deduction of the input VAT applies to trading in shares and other securities, insurance and reinsurance, and the lease of apartments, business premises, etc.

A taxpayer for VAT purposes is a person who independently, and in the course of its business activities, undertakes the supply of goods and services or import of goods. Business activity is defined as the permanent activity of a manufacturer, salesperson, or service provider for the purpose of gaining income. A branch or other operating unit can be a taxpayer.

A non-resident can register for VAT purposes by appointment of a fiscal representative who has a registered seat in Serbia.

The usual taxable period is a calendar month, but if a taxpayer’s total annual turnover is less than 50 million Serbian dinars (RSD), or is estimated (for the next 12 months) to be so, the taxable period is a calendar quarter. For newly established businesses, the VAT period is the calendar month for the current and next calendar year. Taxpayers are required to submit returns within 15 days of the end of each taxable period. Tax debtors who are not taxpayers are required to submit returns within 10 days of the end of the taxable period.

**Customs duties**

Goods imported into Serbia are subject to customs duty rates provided in the Law on Customs Tariff. These rates are *ad valorem* (the only exception is related to the importation of other cigarettes containing tobacco, where a combined *ad valorem* and specific customs duty rate is prescribed) and apply to goods originating in countries that have a most favoured nation (MFN) status in trading with Serbia. Goods originating in other countries are subject to MFN duty rates increased by 70%.

At the moment, the only trading partner with Serbia that does not have MFN status is Taiwan.

Customs duty rates in Serbia range from 0% to 57.6%, with most being under 30%. At the moment, the 57.6% rate only applies to cigarettes containing tobacco.

**Excise duties**

Excise duties are levied on producers and importers of the following goods:

- Oil derivatives.
- Tobacco products.
- Alcoholic beverages.
- Coffee (green, roasted, ground, and coffee extracts).

Excise duty in Serbia is specific (for oil derivatives, alcoholic beverages, cigars, cigarillos, and coffee), *ad valorem* (for pipe tobacco), and combined (specific + *ad valorem* on retail price for cigarettes).

Excise duties stated in Serbian currency are adjusted on a half-year basis according to variations of the consumer price index (CPI) declared by relevant government bodies in charge of statistics. For oil derivatives, the government can modify the specific excise duty amounts during the year according to changes in prices of crude oil on the market.
Property tax
Property tax is payable annually in Serbia by all legal entities and individuals who own or have rights over real estate located in Serbia, such as:

- Ownership rights.
- Right of occupancy.
- Tenancy rights over an apartment or a building for a period longer than one year or for an indefinite period.
- Urban land usage right (municipal, public, and other state-owned land) larger than ten acres in area.

Where the taxpayer keeps books, the property tax on real estate is levied at a flat rate that cannot exceed 0.40%.

Transfer tax
Transfer tax is levied on the transfer for a consideration of rights over real estate when VAT is not payable on such a transfer; intellectual property rights; ownership over used vehicles, vessels, and aircraft (unless owned by the state); right to use urban and/or public building land; as well as rights relating to expropriated real estate.

The contract price is used as a tax base; however, the tax authorities have the right to adjust the tax base in case they estimate that the price agreed to in the contract is lower than under market conditions. The tax is payable at a 2.5% rate.

Stamp taxes
There are no stamp taxes in Serbia.

Capital gains tax of non-residents
Capital gains realised by non-residents from both residents or other non-residents are subject to 20% capital gain tax. Non-residents should appoint a fiscal representative in Serbia who should submit a tax return within 30 days from the realisation of capital gain. Based on the tax return, tax authorities will issue a decision assessing tax liability (if any).

In order to benefit from application of a relevant DTT, the same rules are applicable as for WHT. Non-residents (i.e. the income recipient) must provide a tax residency certificate (on the form prescribed by the Serbian Ministry of Finance stamped by the relevant body from the non-resident’s country of residence or official translation of certificate issued by foreign tax authorities), and the income recipient must be the beneficial owner of the income.

Payroll taxes
The employer is liable to withhold PIT and social security contributions on payment of salaries to employees, at the following rates:

- 10% PIT.
- 19.9% social security contributions payable by the employee.
- 17.9% social security contributions payable by the employer.

The tax and contributions base is gross salary. The social security contributions base is limited to five average monthly salaries in Serbia.

Branch income
Non-residents carrying on business in Serbia through a branch are taxed on their Serbian-sourced income at the CIT rate of 15%. A branch is considered to be a PE.
Serbia

**Income determination**

Taxable profit is determined by adjusting the accounting profit as stated in the profit and loss statement (determined in accordance with International Financial Reporting Standards [IFRS] and local accounting and audit legislation) and in accordance with the provisions of the CIT Law.

For taxpayers who, according to local legislation, are not obligated to apply IFRS, taxable profit is determined according to the special guidelines prescribed by the Ministry of Finance.

**Inventory valuation**

Cost of materials and the purchase value of merchandise are tax-deductible up to an amount calculated by applying the average weighted cost method or the first in first out (FIFO) method. If another method is used, an adjustment for tax purposes should be made.

**Capital gains**

Capital gains are generated by the sale or other transfer of real estate, rights related to industrial property, as well as shares, stocks, securities, certain bonds, and investment units. A capital gain is determined as the difference between the sale and purchase price of the asset concerned, determined in accordance with the provisions of the Law. If the amount is negative, a capital loss is realised.

Capital gains and operational profit are disclosed in the same tax return, but they are taxed separately. Consequently, capital gains/losses cannot be used to offset business losses/gains.

However, capital gains can be offset with capital losses occurring in the same period. A capital loss can be carried forward for five years.

The capital gains tax rate is 15%.

However, the rate applicable for capital gains incurred by non-residents is 20%, unless envisaged otherwise by a relevant DTT (see the Other taxes section for more information).

**Dividend income**

Dividends received by a Serbian company from another Serbian company are not subject to CIT.

Dividends received from a non-resident will be treated as taxable income of a Serbian company and subject to 15% CIT. However, a Serbian entity will have the right to decrease its tax liability by taking a tax credit for the WHT and underlying CIT paid in a subsidiary's country, provided that the taxpayer holds at least 10% of the shares in the subsidiary. If the taxpayer holds less than 10% of the shares in the subsidiary, the tax credit should not exceed the amount of tax that would be paid in Serbia on that income, where the tax basis represents 40% of the received gross income (see the Tax credits and incentives section for more information).

**Interest income**

Interest income will be included in accounting profit determined in accordance with IFRS and will be taxable at the CIT rate of 15%. A Serbian resident has the right to decrease its CIT liability for WHT on interest paid abroad. The amount of the tax credit should not exceed the amount of CIT that would be paid in Serbia on that income, where the tax basis represents 40% of the received gross income.

**Royalty income**

Royalty income will be treated as business income and subject to the general CIT rate.
A resident taxpayer also has the right to decrease its CIT liability for WHT on royalties paid abroad. The amount of the tax credit should not exceed the amount of CIT that would be paid in Serbia on that income, where the tax basis represents 40% of the received gross income.

Unrealised currency exchange gains
Unrealised currency exchange gains will be included in accounting profits under IFRS rules. Serbian legislation does not provide any exception of taxation of this income.

Foreign income
Companies resident in Serbia are taxed on their worldwide income.

When profit generated in another country is taxed in the foreign country, a company has the right to decrease its tax liability by claiming a tax credit from the tax authorities in Serbia (see the Tax credits and incentives section for more information).

There are no provisions that provide for the possibility that taxation of income earned abroad may be deferred.

Deductions

Depreciation and amortisation
Fixed and intangible assets are divided into five groups, with depreciation and amortisation rates prescribed for each (Group I: 2.5%; II: 10%; III: 15%; IV: 20%; and V: 30%). A straight-line depreciation method is prescribed for the first group, which includes real estate, while a declining-balance method is applicable for assets in the other groups.

Assets subject to tax depreciation and amortisation are all tangible and intangible (except goodwill and renewable resources) assets with a useful life longer than one year that are recognised as non-current assets under IFRS.

Goodwill
Goodwill is not subject to tax amortisation.

Start-up expenses
Generally, start-up expenses are tax deductible for CIT purposes.

Interest expenses
Interest on related-party loans exceeding thin capitalisation and transfer pricing thresholds are not deductible (see the Group taxation section).

Bad debts
Bad debt provisions are generally tax deductible if they are at least 60 days overdue. Provisions have to be made individually for each receivable.

Write-off of individual debts, except for those from debtors who are at the same time creditors, is recognised as an expense under the following conditions:

• They were written off as uncollectable.
• The taxpayer has initiated a court procedure to collect debt or duly reported the receivables in case of liquidation or bankruptcy procedure over the debtor.

Taxable income should be increased for receivables that are written-off and do not meet the above requirements and for which tax deductible provisions were previously made.
Charitable contributions
Expenses for health care, scientific, educational, humanitarian, religious, ecological, cultural, and sport related purposes, as well as humanitarian aid given to the Republic of Serbia, its autonomous provinces, and the local government for sanitation of consequences that emerged during emergency situations, are deductible, at up to 5% of total revenues.

Fines and penalties
Fines and penalties (both commercial and those charged by the authorities) are not deductible.

Taxes
All taxes, duties, and contributions that do not depend on the profitability of the company are deductible in the tax period that the liability in this respect was settled.

Other significant items
The following other expenses are not recognised for CIT purposes:

- Non-documented expenses.
- Provisions for receivables from entities that are creditors at the same time, up to the amount of the liability due to that entity.
- Presents provided to political organisations.
- Presents provided to related parties.
- Penalty interest for late payment of taxes, contributions, and other charges.
- Expenses related to forced collection of taxes and other liabilities.
- Non-business related expense.
- Share in the profit paid to employees or other individuals.
- Calculated but unpaid redundancy payments (deductible when paid).
- Expenses related to employment costs, apart from salaries (deductible when paid).
- Impairment of assets (deductible in tax period in which asset is disposed of or used).
- Direct write-off of receivables (under certain conditions).
- Long-term provisions (deductible when paid).

The following other expenses are recognised for CIT purposes only up to a certain limit:

- Advertising and promotional expenses, up to 10% of total revenues.
- Business entertainment expenses, up to 0.5% of total revenues.
- Membership fees paid to chambers of commerce and other associations (except political parties), up to 0.1% of gross revenue.

Net operating losses
The taxpayer has the right to carry forward and utilise tax losses incurred over the following five years.

Carryback rules do not exist in Serbia.

Payments to foreign affiliates
Generally, there are no restrictions on the deductibility of royalties and service fees paid to foreign affiliates, provided they are at arm's length, appropriately documented (by agreements, contracts, calculation sheets, etc.), and incurred for business purposes only.

Payment of interest to foreign affiliates is restricted and regulated by thin capitalisation rules and transfer pricing rules (see the Group taxation section).
**Group taxation**

Tax groupings/consolidation is allowed to a group of companies where all members are Serbian residents and one company directly or indirectly controls at least 75% of the shares in another company. Each company files its own tax balance sheet, and the parent company files a consolidated tax balance sheet for the whole group.

In the consolidated tax balance sheet, losses of one or more companies are offset by the profits of other related companies. Each company is liable for the portion of tax attributable to its share of the group’s taxable profit.

Once approved by the Ministry of Finance, tax grouping/consolidation applies for at least five years.

**Transfer pricing**

A transfer price is the price of transactions between related parties. Related parties exist if there is a possibility of control or influence over business decisions between them. Ownership of 25% or more, or a majority of shares, is considered as potential control. Influence over business decisions exists when an associated party holds 25% or more, or individually holds the greatest portion, of votes in the taxpayer’s management bodies. If the same persons participate in management or control of both companies, a connection between them will be deemed to exist.

Close family members are also regarded as related parties. Non-resident entities from tax havens are considered as related parties of resident entities. The Serbian Ministry of Finance prescribed the list of countries that are to be considered as tax havens for the application of relevant CIT Law provisions.

A company should disclose transactions with related parties separately at transfer prices and at arm’s-length prices in its CIT calculation. Positive difference between these prices (adjustments of expenses) and negative difference (adjustments of revenues) is included in taxable profit.

Serbian CIT Law recognises the following methods for determining arm’s-length prices:

- Comparable uncontrolled price (CUP).
- Cost plus.
- Resale minus.
- Transactional net margin (TNMM).
- Profit split.
- Any other method that allows determination of arm’s-length prices if none of the above methods can be applied.

It is mandatory to prepare and submit transfer pricing documentation together with the CIT return.

**Transfer pricing rules for intra-group loans**

Any interest incurred on related-party loans exceeding the arm’s-length interest rate is not tax deductible. Arm’s-length interest is deemed to be the:

- weighted average key policy rate for the tax period, for loans denominated in dinars, and
- weighted average interest rate at which domestic banks borrowed from foreign lenders in related tax period, for foreign currency loans.

These indicators are determined by the National Bank of Serbia and published by the Ministry of Finance. However, taxpayers are entitled to determine market interest rates by using all general methods for determining arm’s-length interest rates. In case the
Serbia

taxpayer decides to determine interest rates by applying general methods, it will be obliged to apply such interest rates for assessment of all related-party loans.

Transfer pricing rules in this respect are applied up to the amount of tax deductible interest determined in accordance with the thin capitalisation threshold.

**Thin capitalisation**
The interest and related costs will be fully deductible if the loans from related parties do not exceed four times the taxpayer's net equity (ten times for banks and leasing companies). The amount of a taxpayer's net equity for this purpose is calculated as the average of the total assets less total liabilities at the beginning and the end of the year, while the amount of loans from related parties is calculated as a daily average for the year.

In cases where the loans from related parties exceed the prescribed threshold, the amount of non-deductible interest will be calculated as proportional to the amount of loans exceeding the 4:1 (10:1) threshold.

**Controlled foreign companies (CFCs)**
There are no CFC rules in Serbia.

---

**Tax credits and incentives**

**Foreign tax credit**
A Serbian entity is entitled to a tax credit for the WHT paid on foreign-sourced dividends and underlying CIT paid abroad (by its non-resident subsidiary), provided that the taxpayer holds at least 10% of the shares in the subsidiary for at least one year before filing a return. If the taxpayer holds less than 10% of the shares in the subsidiary, the tax credit should not exceed the amount of tax that would be paid in Serbia on that income, where the tax basis represents 40% of the received gross income. Non-utilised tax credit can be carried forward by the parent company for five years.

A resident taxpayer also has the right to decrease its tax liability for WHT paid abroad on interest and authorship fees. The tax credit should not exceed the amount of tax that would be paid in Serbia on that income, where the tax basis represents 40% of the received gross income. Carryforward of unused tax credits is not allowed.

**Tax holiday**
A ten-year tax holiday is available for companies with a minimum investment in property, plant, and equipment (PPE) of RSD 1 billion. To qualify for the credit, a taxpayer must employ at least 100 new workers for an indefinite period. The tax holiday is available for the ten-year period in proportion to the investment made. The number of employees employed in the tax period in which the taxpayer qualified for the tax holiday must be retained throughout the whole tax holiday period.

---

**Withholding taxes**

WHT is calculated and paid at the rate of 20% on payments such as dividends/share in profit, royalties (including neighbouring authorship rights, intellectual property rights, and related rights), interest income, fees for services provided or used in Serbia, income from distributed surplus of a company in bankruptcy, revenues derived from the liquidation surplus of a company in liquidation, and lease payments for real estate and other assets made to a non-resident, unless a DTT applies to provide a reduced rate or exemption.
WHT is also payable on a non-resident’s income realised on the basis of performing entertaining, artistic, sports, and similar programs in Serbia, which is not taxed as income of an individual (performer, musician, sportsman etc.).

In order to benefit from application of a relevant DTT, non-residents (i.e. the income recipient) must provide a tax residency certificate on the form prescribed by the Serbian Ministry of Finance stamped by the relevant body from the non-resident’s country of residence.

Special WHT rules apply in case of non-resident entities from tax havens. WHT is payable at the rate of 25% on royalties, interest, income from lease of immovable property and other assets, and service fees paid to non-resident entities from tax havens. Dividend payments to non-residents from tax havens are subject to WHT at 20%. The Serbian Ministry of Finance publishes a list of jurisdictions that are regarded as tax havens (http://www.poreskauprava.gov.rs/pravna-lica/pregled-propisa/prav ilnici/312/pravilnik-o-listi-jurisdikcija-sa-preferencialnim-poreskim-sistemom.html).

WHT rates envisaged by applicable DTTs are provided in the following table.

### Tax Administration

#### Taxable period

The tax period in Serbia is the calendar year. However, entities have a possibility to opt for a different tax period other than the calendar year (subject to the approval of the tax administration).
Ministry of Finance), but still 12-months long. Once approved, such tax period must be applied for at least five years.

**Tax returns**
CIT returns, together with all supporting documents (e.g. tax depreciation and tax credit forms), must be filed with the tax authorities not later than 180 days after expiration of the tax year (e.g. 30 June).

A newly established company needs to register with the tax authorities within 15 days of registration with the Serbian Business Registry.

**Payment of tax**
CIT is payable monthly in advance instalments by the 15th day of the following month for the prior calendar month. The amount of payable advances is determined on the basis of a company's CIT calculation for the previous year.

The due date for final settlement of CIT liability is the date of filing the annual tax return.

**Tax audit process**
The tax authorities may undertake an unlimited number of tax audits in respect of the same taxes within a reviewed period. In principle, re-performing of an audit of the same tax within a reviewed period is based on existence of new facts that were previously unavailable to the tax authorities.

**Statute of limitations**
The statute of limitations period for assessment of tax liabilities is five years from the year in which tax should have been assessed. The statute of limitations for collection of tax liabilities is five years from the year in which tax was due for payment. This is with the exception of pension insurance contributions, which do not become statute barred.

The statute of limitations commences from 1 January of the year following the year in which the tax return/liability was due.

**Topics of focus for tax authorities**
Historically, audits by the tax authority have been focused primarily on VAT, PIT, and social security contributions assessment.

**Other issues**

**Intergovernmental agreements (IGAs)**

**United States (US) Foreign Account Tax Compliance Act (FATCA)**
FATCA is a set of regulations of the United States adopted in order to combat tax evasion. It requires that foreign financial institutions or other financial intermediaries participate in preventing tax evasion by reporting (i.e. providing) information concerning US ‘account holders’, which include bank account holders, investors, and shareholders, to the US Internal Revenue Service (IRS).

The Model 1 IGA has not yet been signed by the United States and Serbia. However, the IGA is treated as ‘in effect’ by the US Treasury as of 30 June 2014. Serbia has consented to disclose this status since the United States and Serbia have reached an agreement in substance. In accordance with this status, the text of such IGA has not been released and financial institutions in Serbia are allowed to register on the FATCA registration website consistent with the treatment of having an IGA in effect, provided that the jurisdiction continues to demonstrate firm resolve to sign the IGA as soon as possible.

Significant developments

The 2016 Budget was announced on 24 March 2016. Corporate tax changes include the following:

- Increase in the corporate tax rebate for years of assessment 2016 and 2017 (income years 2015 and 2016) to 50% of the tax payable, subject to an annual cap of 20,000 Singapore dollars (SGD).
- Introduction of a 100% investment allowance for capital expenditure (capped at SGD 10 million per project) on approved automation equipment.
- Introduction of an anti-avoidance rule for acquisition of intellectual property (IP) rights.
- Extension of the safe harbour rule for exemption of gains on disposal of equity investments.
- Extension and/or enhancements of incentives to support internationalisation, mergers and acquisitions, productivity and innovation, intensification of land use, finance and treasury centres, the maritime industry, global trading, and corporate social responsibility.
- Extension of tax incentives for trustee companies and the insurance sector, with adjustments to various concessional tax rules.

Other tax changes include the following:

- Introduction of a cap of SGD 80,000 on individual tax reliefs with effect from year of assessment 2018 (income year 2017).
- Deferral of a planned Foreign Worker Levy (FWL) increase for certain industry sectors.

For details of the 2016 Budget proposals, refer to our 2016 Budget Commentary at www.pwc.com/sg/en/budget-2016/sg-budget-commentary-2016.html

Taxes on corporate income

Companies (resident and non-resident) that carry on a business in Singapore are taxed on their Singapore-sourced income when it arises and on foreign-sourced income when it is remitted or deemed remitted to Singapore. Non-residents are subject to withholding tax (WHT) on certain types of income (e.g. interest, royalties, technical service fees, rental of movable property) where these are deemed to arise in Singapore (for details, see the Withholding taxes section).

Tax on corporate income is imposed at a flat rate of 17%. There is an exemption of up to SGD 152,500 out of the first SGD 300,000 of taxable income.

A three-year tax exemption on the first SGD 100,000 and a partial exemption of up to SGD 100,000 on the next SGD 200,000 of taxable income are available for qualifying
start-up companies. This exemption is not available to property development and investment holding companies incorporated on or after 26 February 2013.

In addition, for the years of assessment 2016 to 2017 (i.e. income years 2015 to 2016), there is a 50% corporate tax rebate. This rebate is capped at SGD 20,000 per year.

Singapore adopts a one-tier taxation system, under which all Singapore dividends are tax-exempt in the shareholder’s hands.

Corporate residence

In Singapore, the tax residence of a corporation is determined by the place where the central management and control of its business is exercised. This is taken generally to mean the place where the directors meet to exercise de facto control, although the Inland Revenue Authority of Singapore (IRAS) has set out further guidance.

Permanent establishment (PE)

The presence of a PE is largely irrelevant, except for treaty purposes, as Singapore taxes with reference to the source of income rather than the presence of a PE.

However, a PE is a clear indication of source.

The definition of a PE in Singapore’s double taxation agreements (DTAs) is largely based on the Organisation for Economic Co-operation and Development (OECD) Model Tax Convention definition.

It is generally taken to be a fixed place through which the business of an enterprise is wholly or partly carried on, and normally includes a place of management, a branch, an office, a factory, a workshop, and a place of extraction of natural resources, etc.

In addition, and subject to the terms of the relevant agreements, a non-resident may have a PE in Singapore if one:

- has a building site or a construction, assembly, or installation project that lasts longer than a specified number of months, or supervisory activities connected with the building site or construction project
- furnishes services (including consultancy services) through employees in Singapore for more than a specified number of days or months, or
- has an agent in Singapore who has, and habitually exercises, a general authority to negotiate and conclude contracts on behalf of the enterprise.

The Singapore tax legislation defines a PE more broadly than most of the DTAs; however, as mentioned above, this is largely irrelevant where a treaty can take precedence.

Other taxes

Goods and services tax (GST)

GST is charged at 7% on the supply of goods and services made in Singapore by a taxable person in the course or furtherance of one’s business.

The only exemptions from GST are prescribed financial services (including life insurance) and the sale or rental of residential properties. Zero-rating only applies to the export of goods and international services.
Singapore

GST is also levied on imports of goods, at the time of importation. However, there are reliefs available to ease the cash-flow burden of import-export traders by suspending GST at the time of importation. GST is not currently charged on imports of services.

A taxable person is one who is, or is required to be, registered for GST. GST registration is required if one’s taxable turnover exceeds SGD 1 million per year. Voluntary registration is permitted if the taxable turnover is below the registration limit, subject to conditions.

A supply of goods is made in Singapore if the goods are in Singapore at the time of supply, and a supply of services is made in Singapore if the supplier belongs in Singapore. Generally, a person belongs in Singapore if one’s business (including carrying on a business through a branch or agency) or fixed establishment is in Singapore.

A taxable person is allowed to offset the input GST paid on taxable purchases against the output GST chargeable on supplies made. However, certain purchases are specifically denied an input GST deduction. These include supplies of goods and services such as non-business expenses, club subscription fees, family benefits, car rental expenses, motor vehicle expenses, medical expenses, and transactions involving betting, sweepstakes, lotteries, fruit machines, or games of chance.

A non-resident is not entitled to GST refunds except by appointing a resident tax agent to act on one’s behalf. The resident tax agent can then recover import GST paid on behalf of the non-resident business but will be required to account for output GST on any subsequent supply of the non-resident’s goods in Singapore.

**Customs and excise duties**

Singapore is essentially a free port with minimal import restrictions. Customs and excise duties are imposed on intoxicating liquors, tobacco products, motor vehicles, and petroleum products.

**Property tax**

Property tax is levied annually at the following rates on the annual value of houses, land, buildings, or tenements.

<table>
<thead>
<tr>
<th>Property</th>
<th>Tax rate</th>
</tr>
</thead>
<tbody>
<tr>
<td>Residential property (excluding residential land)</td>
<td>Graduated rates from 10% to 20%</td>
</tr>
<tr>
<td>Owner-occupied residential property (excluding residential land)</td>
<td>Graduated rates from 0% to 16%</td>
</tr>
<tr>
<td>Land and non-residential properties</td>
<td>10%</td>
</tr>
</tbody>
</table>

**Stamp duties**

Stamp duties are levied on written documents relating to stocks and shares and immovable property.

Stamp duties are typically payable by the buyer (i.e. buyer’s stamp duty or BSD); however, seller’s stamp duty (SSD) and additional buyer’s stamp duty (ABSD) have been introduced as measures to cool the residential property market. Stamp duty rates on immovable property therefore vary, depending on the date of purchase, the holding period, the number of properties already owned, and whether the buyer is a foreigner, Singaporean, or permanent resident. Foreigners of certain nationalities who fall within the scope of the respective free trade agreements will be accorded the same treatment as Singaporeans.

Documents relating to the transfer of stocks and shares are subject to stamp duty of 0.2% on the purchase price or market value of the shares transferred, whichever is the higher.
For conveyance of immovable property, there is BSD of up to 3% on the purchase price or market value, whichever is the higher. There is an ABSD of up to 15% and an SSD of up to 16% on the price or market value of the property, whichever is the higher, depending on the type of property (residential or industrial), the residency status of the buyer, the holding period of the property, and the number of properties owned.

Leases attract duty at 0.4% of the total rent (for leases of up to four years) or 0.4% of four times the average annual rent for the period of the lease (for leases longer than four years), but leases with average annual rents not exceeding SGD 1,000 are exempt from stamp duty.

**Foreign Worker Levy (FWL)**
The FWL is a monthly levy of up to SGD 950 that employers are liable to pay for each foreign employee (Work Permit or S Pass holders) hired. The levy rate depends on the employee's qualifications, the employer's industry, and the ratio of foreigners to Singaporeans and permanent residents employed in the company. The government has announced that levy increases for Work Permit holders in the marine and process sectors that were originally proposed for 1 July 2016 will be deferred for a year. Other proposed increases will take place on 1 July 2016, as previously announced.

**Payroll taxes**
Singapore does not have payroll withholding. When a non-Singapore citizen employee ceases employment in Singapore, leaves Singapore for an overseas posting, or leaves Singapore for a period exceeding three months, the employer needs to notify the Singapore tax authorities once the fact of cessation is known to the employer, unless the employer is bearing full Singapore taxes for the employee, and withhold all monies due until tax clearance is issued. The notification must be made no later than one month prior to the date of cessation/departure, or two months from the date of cessation/departure where the employer is bearing full Singapore taxes for the employee. Non-Singapore citizen employees are also subject to tax on unexercised/unvested stock options/awards on a deemed gain basis when they cease employment or leave Singapore.

**Social security contributions**

**Central Provident Fund (CPF)**
The CPF is Singapore’s national pension scheme. Contributions are payable by Singapore citizens and permanent residents only. Generally, employers and employees contribute 17% and 20%, respectively, of ordinary monthly wages up to an income ceiling of SGD 6,000. Their respective maximum contributions are therefore SGD 1,020 and SGD 1,200. The rates are applicable to employees aged 55 years and below.

These rates also apply to additional wages (e.g. year-end bonus), up to a maximum contribution of:

- the actual additional wages if the annual ordinary wages are not more than the ordinary wage ceiling of SGD 72,000 and the total wages are not more than the maximum contribution of SGD 102,000
- the difference between the maximum contribution of SGD 102,000 and annual ordinary wages if the total wages exceed the maximum contribution of SGD 102,000 but the annual ordinary wages are not more than the ordinary wage ceiling of SGD 72,000, or
- the lower of the difference between the maximum contribution and the ordinary wage ceiling (SGD 102,000 less SGD 72,000) or the actual additional wages if annual ordinary wages exceed the ordinary wage ceiling of SGD 72,000.

Reduced rates apply for employees above the age of 35 who are earning less than SGD 750 per month, and those above 55, although these rates are being gradually increased.
Singapore

Foreign nationals and their employers are precluded from making CPF contributions. Foreign employees who become Singapore permanent residents, and their employers, may contribute at reduced rates for the first two years.

Supplementary Retirement Scheme (SRS)
The SRS is a voluntary scheme to encourage employees and the self-employed to save for retirement over and above their CPF savings. The maximum amount to be contributed is subject to an income cap of SGD 102,000. Employers are allowed to contribute to their employees’ SRS accounts. This is subject to a 15% contribution limit for Singapore citizens and permanent residents, and a 35% cap for foreigners. Employees will be taxable on these contributions, but will be allowed corresponding tax relief.

Branch income
Tax rates on branch profits are the same as on corporate profits. There is no branch profits remittance tax on the repatriation of profits to the head office.

Income determination

Inventory valuation
There are no special rules as to which valuation basis should be adopted for inventories (stock-in-trade) in the case of a continuing business, as long as the basis is consistent from one year to another. However, a last in first out (LIFO) basis of valuation is not permitted for tax purposes. Generally, tax reporting conforms to book reporting.

Capital gains
There is no tax on capital gains. Where there is a series of transactions or where the holding period of an asset is relatively short, the tax authorities may take the view that a business is being carried on and attempt to assess the gains as trading profits of the corporation. The United Kingdom (UK) Badges of Trade, which are used in judicial decisions to distinguish capital and revenue transactions, are generally applied in determining this issue. They include the existence of a profit-seeking motive, the number of transactions, the nature of the asset, the existence of similar trading transactions or interests, changes to the asset, the way the sale was carried out, the source of finance, the interval of time between purchase and sale, and the method of acquisition.

Gains derived by a company from the disposal of ordinary shares that take place between 1 June 2012 and 31 May 2022 will not be taxed if the company has held at least 20% of the ordinary shares in the investee company for a continuous period of at least 24 months prior to the disposal. This protection does not apply to gains derived by an insurance company or disposal of shares in certain companies that trade or hold immovable properties.

Dividend income
Singapore dividends are exempt in the hands of the recipient.

Interest income
Singapore-sourced interest income is taxable when it arises, and foreign-sourced interest is taxable when it is remitted or deemed to be remitted to Singapore. For further details on foreign-sourced interest income and the availability of foreign tax credit, refer to Foreign income below.

Foreign income
A corporation, whether resident in Singapore or not, is taxed on foreign income when it is received in Singapore. Legislative provisions govern the basis of treating foreign
income as received in Singapore. There are no special rules for taxing the undistributed income of foreign subsidiaries.

Where income is earned from treaty countries, double taxation is avoided by means of foreign tax credit granted under those treaties. For non-treaty countries, unilateral tax credit is given in respect of foreign tax on all foreign-sourced income. These foreign tax credits may be pooled, subject to certain conditions.

Foreign dividends, foreign branch profits, and foreign service fee income remitted to Singapore may be exempt from tax if they fulfil certain conditions.

---

**Deductions**

**Depreciation**

Tax depreciation is allowable at specified rates on buildings used in qualifying industry sectors, subject to conditions. In 2010, industrial building allowances were replaced by a Land Intensification Allowance. The latter provides for faster depreciation but is subject to approval as it is allowed as a tax incentive. Transitional provisions for industrial building allowances are available for taxpayers who committed to qualifying capital expenditure on or before 22 February 2010.

Tax depreciation is available on machinery and equipment on a straight-line basis over their specified working life for all types of business. In lieu of the straight-line basis, accelerated tax depreciation allowances can be claimed by all businesses on all machinery and equipment in equal instalments over three years.

A 100% depreciation allowance is available on capital expenditure incurred on computers, robots, standby generators, pollution control and energy-efficient equipment, certain diesel-driven vehicles, and prescribed automation equipment.

Writing down allowances on a straight-line basis over five years are allowable on the cost of acquisition of IP, subject to certain conditions. Taxpayers acquiring IP in the 2016 to 2019 income years may make an irrevocable election to claim the writing down allowances over 10 or 15 years instead of five.

In addition, enhanced allowances may be available for the acquisition of automation equipment and IP (see Productivity and Innovation Credit [PIC] in the Tax credits and incentives section).

Gains on tax depreciable property (i.e. the excess of proceeds over tax base) are taxed as ordinary income to the extent that tax depreciation has been allowed; that is, there is a clawback of tax depreciation on the disposal of the asset.

**Goodwill**

Payments for the acquisition of goodwill are generally capital in nature and not deductible.

**Start-up expenses**

Generally, expenses incurred prior to the commencement of business are not tax deductible. However, most businesses are allowed to deduct expenses incurred in the 12 months immediately preceding the accounting year in which the business earned its first dollar of trading income. Deductible expenses are those that would have been allowed a deduction had they been incurred after the business commenced operations.

In addition, deductions and writing down allowances are available for certain types of pre-commencement expenditure (acquisition of plant and machinery, research and
development [R&D], etc.) that are deemed to be incurred on the first day on which the taxpayer carries on one’s business.

**Interest expenses**
Interest incurred on capital employed in the production of income, and prescribed borrowing costs that are incurred as a substitute for interest or to reduce interest costs, will be allowed as a tax deduction.

**Research and development (R&D) expenses**
Expenses incurred in respect of R&D carried out in Singapore qualify for a tax deduction of 150% of the expenses incurred. If the R&D is carried out overseas, the expenses incurred can be deductible if they meet certain conditions.

Expenditure incurred in relation to R&D cost-sharing arrangements are accorded the same tax treatment as R&D expenses.

Enhanced deductions may also be available under the PIC scheme (see *Productivity and Innovation Credit [PIC] in the Tax credits and incentives section*).

**Bad debts**
Bad trade debts and provisions for trade debts are deductible to the extent that they are incurred in the business and previously included as trading receipts. Doubtful debts are deductible if they are properly estimated and specific. General provisions for bad debts are not deductible.

Businesses that have elected to align their tax treatment of financial instruments with the accounting treatment prescribed by SFRS 39 (Financial Instruments: Recognition and Measurement) will be allowed a tax deduction for impairment losses on trade debts when they are incurred (regardless of whether they are general or specific provisions). Correspondingly, any reversal will be taxed.

**Charitable contributions**
Donations are deductible only if they are made in cash or another prescribed form and to an approved recipient. The deduction allowed for qualifying donations is generally 250% of the value of the donation; however, qualifying donations made in 2015 were eligible for a deduction at 300% of the value of the donations. Businesses that send employees to volunteer and provide services to approved charitable institutions from 1 July 2016 to 31 December 2018 will be allowed to deduct 250% of the wages and incidental expenses incurred, subject to certain conditions.

**Fines and penalties**
Fines and penalties imposed for violations of the law are not deductible.

**Taxes**
Income taxes are generally not deductible in determining corporate income. However, irrecoverable GST is deductible under certain circumstances. The FWL and property taxes are deductible to the extent they are incurred wholly and exclusively in the production of income.

**Other significant items**
Private automobile expenses are not deductible.

The tax deduction for medical expenses is limited to 2% of total payroll if the employer implements certain portable medical insurance or benefit schemes. Otherwise, the amount deductible will be limited to 1% of total payroll. Where the company is exempt or taxed at a reduced rate, the expenses disallowed are effectively taxed at the prevailing corporate rate.
A tax deduction for employee share-based remuneration (stock awards or stock option schemes) is allowed only if treasury shares in the company or its holding company are purchased to fulfil such obligations. A company may also claim a tax deduction when the share-based remuneration scheme is administered by a special purpose vehicle (SPV). The deduction is restricted generally to the lowest of the actual outlay incurred by the company, its holding company, or the SPV.

**Net operating losses**
Loss carryover, including unutilised tax depreciation allowance, is unlimited, provided shareholdings in the loss-making corporation have not changed beyond 50% of the total number of issued shares. Additionally, for tax depreciation allowances to be carried forward, the same trade needs to be continued. The tax authorities may exercise discretion to allow carryover of tax losses and unutilised tax depreciation even when there has been a change in shareholding beyond 50%, absent any tax avoidance motives. Losses and tax depreciation of up to SGD 100,000 incurred by the company in the current year can be carried back for one year. The carryback of losses and tax depreciation is subject to the continuity of shareholding test and the same trade test for carryback of tax depreciation.

**Payments to foreign affiliates**
Payments to non-residents, including foreign affiliates, are deductible, provided they are fair and reasonable, are revenue in nature, and can be seen to be relevant to earning the payer's income.

---

**Group taxation**
A company is allowed to transfer excess current year trade losses, current year tax depreciation, and current year approved donations to another company within the same group if certain conditions are satisfied.

Broadly, to qualify for group relief, companies must be incorporated in Singapore, belong to the same group of companies where, among other things, there must be at least a 75% ownership relationship between claimant and transferor, and have the same accounting year-end. In addition, a group must comply with certain prescribed offset and apportionment rules.

**Transfer pricing**
The Income Tax Act contains provisions that may be used in a transfer pricing context to effectively allow the IRAS to challenge and revise inter-company transactions. Additionally, specific transfer pricing provisions define the arm’s-length principle and provide the IRAS with a right to make transfer pricing adjustments in cases where taxpayers do not comply with the arm’s-length principle.

The IRAS has also issued transfer pricing guidelines to supplement the provisions in the Income Tax Act and the various treaties signed by Singapore. The guidelines cover the application of the arm’s-length principle and the documentation requirements relating to all related-party transactions, including local related-party transactions. They provide guidance to taxpayers on how to substantiate their transfer prices with their related entities by maintaining adequate documentation to mitigate the risk of tax adjustment by the IRAS and to safeguard them from potential double taxation. The IRAS has also provided guidance on matters relating to mutual agreement procedures (MAPs) and advance pricing arrangements (APAs).

Although Singapore’s income tax rates are traditionally lower than the majority of its trading partners, the IRAS is increasing its focus on transfer pricing issues, and now requires taxpayers to maintain contemporaneous transfer pricing documentation.
Thin capitalisation
There are no formal thin capitalisation rules in Singapore. However, general anti-avoidance and transfer pricing provisions may operate in cases of abuse.

Controlled foreign companies
There are no CFC rules in Singapore.

Tax credits and incentives
There are various tax incentives available to taxpayers involved in specified activities or industries identified as being beneficial to Singapore’s economic development.

Tax incentive applications are typically subject to an approval process during which the administering agency evaluates the applicant’s business plans in detail. Successful applicants are required to satisfy rigorous requirements and are expected to make significant economic commitments in Singapore.

Generally, applicants are expected to carry out substantive, high value activities in Singapore, and will be required to commit to certain levels of local business spending and skilled employment. Some factors that will be considered include the use of Singapore as a base from which to implement regional growth strategies; introduction and anchoring of leading-edge skills, technology, and activities in Singapore; contributions to the growth of R&D and innovation capabilities; and potential spin-off to the rest of the economy.

Pioneer tax incentive
Corporations manufacturing approved products with high technological content or providing qualifying services may apply for tax exemption for five to 15 years for each qualifying project or activity under the pioneer tax incentive. Corporations may apply for their post-pioneer profits to be taxed at a reduced rate under the Development and Expansion Incentive, as discussed below.

Development and Expansion Incentive
Under the Development and Expansion Incentive, corporations engaging in new high-value-added projects, expanding or upgrading their operations, or undertaking incremental activities after their pioneer period may apply for their profits to be taxed at a reduced rate of not less than 5% for an initial period of up to ten years. The total tax relief period for each qualifying project or activity is subject to a maximum of 40 years (inclusive of the post-pioneer relief period previously granted, if applicable).

Investment allowance
Under the investment allowance, a tax exemption is granted on an amount of profits based on a specified percentage (of up to 100%) of the capital expenditure incurred for qualifying projects or activities within a period of up to five years (up to eight years for assets acquired on hire-purchase). Capital expenditure incurred for productive equipment placed overseas on approved projects may likewise be granted integrated investment allowances. Investment allowances of 100% of capital expenditure (net of grants) may be granted to businesses seeking to make substantial investment in automation, subject to a cap of SGD 10 million per project.

Incentives for internationalisation
A new International Growth scheme provides for a 10% concessionary tax rate on incremental income from qualifying activities for up to five years. This incentive is intended for larger Singapore companies that anchor key functions in Singapore as they venture overseas.
In addition, the double tax deduction scheme for internationalisation allows companies expanding overseas to claim a double deduction for eligible expenses for specified market expansion and investment development activities. With effect from 1 July 2015, this includes manpower expenses incurred when Singaporeans are deployed to overseas entities.

**Productivity and Innovation Credit (PIC)**
The PIC scheme provides for an enhanced 400% deduction for qualifying expenditure incurred in respect of six qualifying activities during the accounting periods that end between 2010 and 2017 (i.e. years of assessment 2011 to 2018). The six qualifying activities are:

- The acquisition or leasing of prescribed IT and automation equipment.
- Staff training.
- The acquisition of IP.
- The registration of IP rights.
- R&D.
- Design.

The enhanced deduction is available only on the first SGD 400,000 of qualifying expenditure incurred each year on each of the qualifying activities, although, for the years of assessment 2015 to 2018, qualifying small and medium enterprises may claim PIC benefits for up to SGD 600,000 of such expenditure for each qualifying activity a year. The cap may be combined for certain years of assessment. Certain activities are subject to approval or minimum ownership requirements.

For the years of assessment 2013 to 2018, the acquisition of IP rights includes licensing of those rights, other than trademarks and any rights to the use of software.

**Mergers and acquisitions allowance**
The mergers and acquisitions allowance allows a write-off, over five years, of 25% of the value of qualifying mergers or acquisitions deals executed between 1 April 2015 and 31 March 2020, subject to a cap of SGD 5 million (SGD 10 million for deals executed from 1 April 2016 to 31 March 2020) per year of assessment. This incentive is available only to companies that are incorporated, tax resident, and carrying on a business in Singapore. A 200% tax allowance is also granted on transaction costs (capped at SGD 100,000 per year of assessment) incurred on qualifying deals.

**Financial services incentives**

**Financial sector incentive (FSI) scheme**
The FSI scheme covers a broad range of financial institutions, including bond intermediaries, Asian currency units, derivative traders, fund managers, equity capital market intermediaries, operational headquarters, providers of high-value-added processing services supporting financial activities, futures members of the Singapore Exchange Limited, members of the Singapore Commodity Exchange Limited, providers of trustee and custodian services, and trust management or administration services. Financial institutions that plan to expand their Singapore operations and are prepared to meet various strict qualifying conditions may apply for this incentive.

Under the FSI scheme, income from certain high growth, high-value-added activities, such as services and transactions relating to the bond market, derivatives market, equity market, and credit facilities syndication, may be taxed at 5%, while a broader range of financial activities will qualify for a 12% tax rate. The tax incentive period may last for five, seven, or ten years, subject to certain conditions being met.
Finance and treasury centre (FTC)
Income derived by an FTC from approved FTC activities is taxed at a reduced rate of 10% (8% from 25 March 2016). Approved activities include international treasury and fund management activities, corporate finance and advisory services, economic and investment research and analysis, and credit control and administration.

Interest payments to overseas banks and approved network companies are also exempt from WHT where the funds borrowed are used for approved activities.

Debt securities incentives
A package of tax concessions is available to various players in the Singapore bond market, including those involved in certain Islamic financing arrangements.

Offshore insurance incentives
Approved insurance companies engaged in the business of insuring and reinsuring offshore risks are taxed at a rate of 10% on qualifying income arising from offshore risks business. The tax exemption for approved insurance companies for qualifying income from the writing of marine hull and liability risk insurance expired on 31 March 2016 and was replaced with a 10% concessionary tax rate for awards granted or renewed from 1 April 2016. The tax exemption for offshore specialised risk insurance is due to expire on 31 August 2016. It will be replaced by a 5% concessionary tax rate for awards granted between 1 September 2016 and 31 August 2019; and an 8% tax rate will apply for awards granted thereafter. The incentive will also be expanded to cover onshore specialised risk insurance from 1 September 2016.

Tax exemption is available for qualifying income of approved offshore captive insurance companies until 31 March 2018. Awards granted or renewed after that date will enjoy a 10% concessionary tax rate.

Approved insurance and reinsurance brokers are taxed at a rate of 10% on commission income from broking activities if the risks being insured or reinsured are offshore risks and on fee income from advisory services provided to non-Singapore based clients. The concessionary tax rate is further reduced to 5% on qualifying income for approved insurance and reinsurance brokers in respect of the offshore specialty insurance broking business.

Real Estate Investment Trusts (REITs)
Distributions made to foreign non-individual investors by a listed REIT out of rental income from Singapore real estate are subject to a reduced tax rate of 10%, subject to certain conditions being met. Listed REITs investing in foreign properties can apply for tax exemption for certain foreign income received in Singapore. Distributions out of this income similarly are exempt. A GST remission is granted to listed REITs to allow them to claim GST on their business expenses regardless of whether the underlying assets are held directly or indirectly through SPVs or sub-trusts.

Islamic financing arrangements
The income tax, stamp duty, and GST treatment of prescribed Islamic financing arrangements and Islamic debt securities (Sukuk) are aligned with that of the conventional financing contracts to which they are economically equivalent, subject to certain conditions.

Infrastructure project finance incentives
Tax exemption is available for interest income earned from qualifying investments in qualifying infrastructure projects/assets. FSI companies that provide project finance advisory services related to qualifying projects/assets pay tax at 5% or 12% on their qualifying income, and companies that provide management services to qualifying business trusts and funds pay tax at 10% on their qualifying income. Stamp duty remission is also available on the transfer of such projects/assets to listed entities.
Sovereign wealth funds
Tax exemption is available for income derived by a sovereign fund entity and an approved foreign government-owned entity from funds managed in Singapore.

Headquarters (HQ) schemes
Approved regional headquarters in Singapore are taxed at a concessionary rate of tax of 15% on qualifying overseas income. Depending on their level of economic commitments to Singapore, international headquarters can apply for various tax incentives, including tax exemption or concessionary tax rates on qualifying income.

Maritime Sector Incentive (MSI) scheme
The MSI scheme is the umbrella incentive for the maritime sector. Incentives offered include tax exemption for shipping companies and a 10% concessionary tax rate for international freight and logistics operators. Approved ship investment managers are also taxed at 10% on qualifying management-related income. The scheme also includes approved ship investment vehicles, which are tax exempt on their qualifying vessel lease income; approved container investment enterprises, which are taxed at 5% or 10% on qualifying income from container-leasing; and approved container investment management companies, which are taxed at 10% on qualifying management fees.

Qualifying ship operators and lessors under the MSI scheme also enjoy automatic tax exemption on gains from the disposal of vessels, vessels under construction, and new building contracts.

Other incentives
Incentives for not-for-profit organisations, international arbitration, oil traders, international traders, trust companies, and the provision of international legal services include tax exemptions or concessionary tax rates of 10% for qualifying income. The concessionary tax rate for liquefied natural gas (LNG) trading, aircraft leasing, qualifying oil traders, and international traders may be further reduced to 5%.

Foreign tax credit
See Foreign income in the Income determination section for a description of the foreign tax credit regime.

Withholding taxes
Domestic corporations paying certain types of income to non-residents are required to withhold tax.

Unless a lower treaty rate applies, interest on loans and rentals from movable property are subject to WHT at the rate of 15%. Royalty payments are subject to WHT at the rate of 10%. The tax withheld represents a final tax and applies only to non-residents who are not carrying on any business in Singapore and who have no PE in Singapore. Technical assistance and management fees for services rendered in Singapore are taxed at the prevailing corporate rate. However, this is not a final tax. Royalties, interest, rental of movable property, technical assistance, and management fees can be exempt from WHT in certain situations or subject to a reduction in tax rates, usually under fiscal incentives or DTAs.

Payments made to public entertainers and non-resident professionals who perform services in Singapore are also subject to a final tax of 15% on their gross income. For public entertainers, this appears to be a final tax unless they qualify to be taxed as Singapore tax residents. However, non-resident professionals may elect to be taxed at the prevailing tax rate for non-resident individuals of 22% on net income if this results in a lower tax cost. The WHT rate on payments to non-resident entertainers was reduced to 10% from 22 February 2010 to 31 March 2020.
Ship charter fee payments are not subject to WHT.

The WHT rates are shown in the following table.

**Notes**

1. Singapore has no WHT on dividends over and above the tax on the profits out of which the dividends are declared. However, some treaties provide for a maximum WHT on dividends should Singapore impose such a WHT in the future.
2. The non-treaty rates (a final tax) apply only to non-residents who do not carry on business in Singapore and who do not have a PE in Singapore. This rate may be further reduced by tax incentives.
3. Interest:
Singapore

a. Lower rate or exemption if received by a financial institution.
b. Exempt if paid to the government.
c. Lower rate or exemption if paid by an approved industrial undertaking.
d. Exempt if paid by a bank and received by a bank.
e. Exempt if paid to a bank but linked to a government loan agreement or paid to specific financial institutions/banks.
f. Exempt if paid in respect of an approved loan or indebtedness.
g. Exempt if paid to an approved pension fund.
h. From 1 January 2017, lower rate if paid to a financial institution or insurance company or paid with respect to indebtedness arising from a sale on credit of any equipment, merchandise, or services.
i. Exempt if paid by a financial institution.

4. Royalties:
   a. Royalties on literary or artistic copyrights, including film royalties, are taxed at the non-treaty rate.
   b. Lower rate for payments in connection with industrial, commercial, or scientific equipment.
   c. Royalties on literary, artistic, or scientific work, except computer software, but including film royalties, are exempt.
   d. Lower rate for payments in connection with patents, designs, secret formulas/processes, or industrial, commercial, or scientific equipment/experience.
   e. From 1 January 2017, lower rate of 5% for royalties on copyright of literary, artistic, or scientific work, including cinematograph films, or films or tapes used for radio or television broadcasting, and 8% for royalties in connection with patents, trademarks, designs or model, plan, secret formula, or process, or industrial, commercial, or scientific equipment.

5. Treaties:
   a. Treaty with Bermuda covers only the exchange of information.
   b. Treaty with Chile covers only international ship operations.
   c. Treaties with Brazil, Hong Kong, and the United States cover only shipping and air transport activities.
   d. Treaty or lower rate applies from 1 January 2017.

---

**Tax administration**

**Taxable period**
The tax basis period is the calendar year; however, for business profits, the accounting period will generally be adopted.

**Tax returns**
Tax is computed for each tax year based on the income earned in the preceding year (the tax basis period). The corporation files an estimate of its income within three months of the end of the accounting period followed by a return of income by 30 November of the tax year, and the tax is assessed by the Comptroller of Income Tax. Corporations that file their tax returns electronically enjoy an extended filing deadline of 15 December. Mandatory electronic filing of tax returns will be introduced gradually; certain companies will be required to file electronically from year of assessment 2018 (income year 2017), and by year of assessment 2020 (income year 2019), all companies are expected to have adopted electronic filing. There is no fixed date for the issue of assessments.

**Payment of tax**
Assessed tax is payable within one month after the service of the notice of assessment, whether or not a notice of objection to the assessment has been lodged with the tax authorities. Application may be made to the Comptroller to pay estimated tax liabilities on a monthly basis. However, the Comptroller is under no obligation to grant such an application.

Late payment of tax will attract penalties, up to a maximum of 17% of the outstanding tax.

**Tax audit process**
The IRAS adopts a risk-based approach to identifying compliance risk, with a focus on improving the behaviour of taxpayers who pose a higher risk of non-compliance. It also prioritises and tailors specific compliance programmes that aim to identify taxpayers who have made mistakes in their tax returns, create an audit presence in the community to deter non-compliance by other taxpayers, educate taxpayers on their tax obligations.
and how to comply with these, and identify areas of tax law, policies, and processes where the tax system can be simplified.

**Statute of limitations**
The statute of limitations is four years from the year of assessment, but does not apply where there has been fraud or wilful default by the taxpayer.

**Topics of focus for tax authorities**
In the past, the IRAS has focussed its compliance efforts on:

- the timely filing of corporate tax returns
- PIC claims
- the classification of income and expenses for income taxable at concessionary and prevailing corporate tax rates
- group relief claims
- tax exemption for foreign-sourced dividends, and
- the recognition of income from construction contracts and provisions claimed by construction companies.

The IRAS has announced that, in addition to the above, it will be focussing on:

- wholesale of chemical and chemical products, and
- travel agencies and ticketing agents.

**Other issues**

**Exchange of information (EOI)**
The Singapore government introduced several key measures to strengthen Singapore’s EOI framework after endorsing the internationally agreed standard for exchange of information for tax purposes (the Standard) in 2009.

Singapore has amended its laws such that it is now able to extend EOI assistance to all existing tax treaty partner jurisdictions without having to update the terms of those treaties.

Singapore is also a signatory to the Convention on Mutual Administrative Assistance in Tax Matters (CMAA). Following its ratification on 21 January 2016 and the issue of domestic implementation legislation, it has become operative from 1 May 2016 and will expand Singapore’s network of partners for EOI on request by 34 jurisdictions. It should, however, be noted that Singapore has made various reservations in implementation in accordance with local laws, including not providing assistance in the recovery of foreign taxes.

Legislative changes intended to allow Singapore to implement its international commitment to commence automatic exchange of financial account information (AEOI) in 2018 are in the process of being introduced. It has been announced that AEOI will be carried out on a bilateral basis with jurisdictions with which Singapore has signed Competent Authority Agreements. This will be subject to the following:

- That there is a level playing field among all major financial centres, including Dubai, Hong Kong, Luxembourg, and Switzerland, to minimise regulatory arbitrage.
- That AEOI partners have strong rule of law and the ability to ensure the confidentiality of information exchanged and prevent its unauthorised use.
- That there is full reciprocity with AEOI partners in terms of information exchanged.

In this regard, it has been indicated that Singapore will prioritise the implementation with jurisdictions with strong rule of law, such as the United Kingdom and France.
Singapore

Singapore has also signed a Model 1 Foreign Account Tax Compliance Act (FATCA) intergovernmental agreement (IGA) with the United States to help ease the compliance burden of Singapore-based financial institutions. This entered into force on 18 March 2015.

**Adoption of International Financial Reporting Standards (IFRS)**

Companies incorporated in Singapore and Singapore branches of foreign companies are required by the Companies Act to prepare and present financial statements that comply with the Singapore Financial Reporting Standards (SFRS). In Singapore, the Accounting Standards Council (ASC) has the statutory authority to issue SFRS for adoption.

The SFRS is principally based on and substantially similar to IFRS that are issued by the International Accounting Standards Board (IASB). Full convergence of the SFRS with IFRS for Singapore-listed companies was the strategic direction of the ASC set in 2009, and, on 29 May 2014, the ASC and Singapore Exchange jointly announced that Singapore-listed companies will have to apply a new financial reporting framework identical to the IFRS for annual periods beginning on or after 1 January 2018. Non-listed companies may voluntarily apply the new framework.

Companies are required to submit financial statements as part of their tax return filing. The IRAS generally accepts financial statements prepared for statutory filing, although companies that have been allowed to prepare their financial statements using standards other than SFRS, such as IFRS or the Generally Accepted Accounting Principles (GAAP) adopted by the United States, may be required to explain and/or account for any differences and make the necessary tax adjustments, if any.

In relation to financial instruments, the Income Tax Act was amended to align the tax treatment with the accounting treatment prescribed by SFRS 39 (Financial Instruments: Recognition and Measurement). As a concession, the IRAS allows taxpayers to elect to align their tax reporting of lease income to the accounting treatment prescribed by SFRS 17 (Leases), which requires operating lease income to be recognised using the ‘effective rent method’.

**Sample corporate tax calculation**

For a sample corporate tax calculation, see the Other issues section of Singapore’s Corporate tax summary at www.pwc.com/taxsummaries.
**Significant developments**

**Social security contributions**
The age for old age insurance (AOV) has been raised from 60 to 62. This may later be raised further, to 65, depending on the financial results of the AOV fund. Based on a transitional rule, the change will not apply to those who, at that time, already had reached the age of 58 or 59.

**Tax court**
The Parliament of Sint Maarten (St. Maarten) approved the introduction of appeal in two instances in tax matters in order to improve the legal protection of taxpayers. The amendment is expected to go into effect on 1 May 2016. Once the amendment goes into effect, a person can appeal a decision of the tax inspectorate at the Court of First Instance of St. Maarten. This court will also take over all appeals that are pending before the Board of Appeal in Tax Cases, on the day the amendment goes into effect.

If a party does not agree with the decision of the Court of First Instance in a tax dispute, that party may file an (higher) appeal with the Joint Court of Justice of Aruba, Curaçao, St. Maarten, and of Bonaire, St. Eustatius, and Saba.

It is expected that appeals will be handled in a much shorter period by the Court of First Instance of St. Maarten than in the current situation with the Board of Appeal in Tax Cases.

**Foundations and trusts**
Also, applicable as of fiscal year 2015, the legislation relevant to associations and foundations has changed. The Profit Tax Ordinance now states that all trusts, associations, and foundations are subject to profit tax, except those that are dedicated to the promotion of the general social interest. The ordinance further states that the term ‘foundation’ also includes private foundations. The Inspectorate of Taxes has issued a publication in which they state that this means that all associations, trusts, and foundations, including private foundations, are subject to profit tax and have to submit profit tax returns. Only the foundations, associations, and trusts dedicated to the promotion of the general social interest exclusively are still exempted from filing tax returns.

**Transitional legislation**
While the offshore tax regime was abolished in 2001, qualifying offshore companies incorporated before 1 January 2002 may continue to apply the old regime until 2019, provided that certain conditions are met under transitional legislation.

**Taxes on corporate income**
Resident corporations are taxed on worldwide income. Non-resident companies are taxed on the following St. Maarten-source income:

- Income attributable to a permanent establishment (PE).
Sint Maarten

- Income from real property situated in St. Maarten.
- Interest on loans secured by a mortgage on property situated in St. Maarten.

Capital gains are not differentiated from operating income and are subject to the same applicable rates. Corporations are taxed on their income as reflected in their profit and loss account, less certain deductible items.

Companies are generally taxed at a flat rate of 34.5%.

**Minimum rates**

Special minimum rates apply to the taxable income of certain companies:

<table>
<thead>
<tr>
<th>Type of company</th>
<th>Minimum rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>New industries and hotels</td>
<td>2</td>
</tr>
<tr>
<td>Land development companies</td>
<td>2</td>
</tr>
</tbody>
</table>

**Shipping business**

Shipping companies are subject to the general profit tax rate of 34.5% but may apply for the tonnage regime. If applicable, their profit is calculated based on the rates in the table below. If a shipping company applies the tonnage regime, the actual profits or losses are not taken into account, regardless of whether they are regular profits or capital gains.

The calculated profit based on the table below is subject to the general tax rate of 34.5%.

<table>
<thead>

**Exempt companies**

Please see the Tax credits and incentives section for more information on tax exempt companies.

**Companies under transitional offshore rules**

Transitional rules distinguish three types of offshore companies:

- Offshore companies that, on the last day of the financial year that ended before 1 January 2002, had all (or almost all) investments in or revenues from portfolio investments, royalties, holding companies, finance companies, or technical support subject to tax rates of 2.4% to 3% (while capital gains and losses were not taken into account) will be grandfathered through the last day of the financial year of the company that starts before 1 July 2019.
- Offshore companies that, on the last day of the financial year that ended before 1 January 2002, had all (or almost all) their profit subject to tax rates of 4.8% to 6% or, under certain circumstances, 2.4% to 3% and that had a valid ruling with the tax inspector (e.g. trading companies, banks, captives commissions, and fee-earning companies) on the aforementioned date or for which a request for (extension of) such a ruling had been filed on that date will be grandfathered through the last day of the financial year of the company that starts before 1 July 2019.
- Offshore companies that, on the last day of the financial year that ended before 1 January 2002, had invested all (or almost all) investments in or revenues from real estate property or rights connected thereto, located outside the Netherlands Antilles. These revenues were, under the old offshore regime, exempt from tax. For profit tax...
purposes, these companies will be grandfathered through the last day of the financial year of the company that starts before 1 July 2019.

Specific rules are applicable to companies that were incorporated after 30 June 1999 but before 31 December 2001. These companies may also qualify for the aforementioned transitional rules, provided that these companies have been active in a meaningful way. In principle, a company will not be considered to have been active in a meaningful way if the assets of the companies consist predominantly of deposits or receivables on shareholders or affiliated parties.

The grandfathering period continues until 2019.

---

**Corporate residence**

Corporate residence is, in principle, determined by the place of incorporation. However, other factors may also determine residence. For example, a foreign company with effective management in St. Maarten is considered to be a resident. A company that has been established in St. Maarten will always be considered a resident of St. Maarten.

Offshore entities in St. Maarten must have a local managing director. This function is easily provided by one of the many trust companies established in St. Maarten.

**Permanent establishment (PE)**

The definition of a PE in St. Maarten is generally in line with the Organisation for Economic Co-operation and Development (OECD) model.

**Transfer of legal seat**

Legislation has been enacted under which a St. Maarten company is allowed to transfer its legal seat to another jurisdiction (if permitted under the laws of the outside jurisdiction) and a foreign company is allowed to migrate to St. Maarten.

---

**Other taxes**

**Turnover tax**

A 5% turnover/sales tax is levied on the revenue derived from services and deliveries rendered by an entrepreneur or company in St. Maarten. Note that non-resident service providers are also subject to this tax.

A limited number of services and deliveries are exempt, such as:

- Exports.
- Certain basic food and other products.
- Electricity and water.
- Medical services.
- Services at the airport or in the harbour regarding imported or exported goods or goods in transit.
- Advisory and management services provided to or by offshore companies and offshore banks.

An entrepreneur liable to turnover/sales tax must file a declaration with the Tax Inspectorate, before the 16th day of the month following the month concerned, at the Tax Collector’s office.

**Import tariffs**

In general, there are no customs duties or import tariffs in St. Maarten, except for a special import tariff on gasoline. The rate is ANG 29 per hectolitre.
Sint Maarten

**Excise duties**
There are no excise duties in St. Maarten.

**Property taxes**
There is no property tax in St. Maarten.

**Transfer tax**
The transfer of immovable property located in St. Maarten is subject to a 4% transfer duty.

**Stamp taxes**
A stamp tax is levied in two ways, in the form of stamps and as stamped paper.

Stamp tax applies to documents such as government licences, leases, agreements, and court documents. The rate depends on the type of document. As an example, the stamp tax for bank checks is ANG 0.25. The general rate for each page of a legal document is ANG 5.

**Payroll taxes**
Employers must not only withhold wage tax but also the employee part of social security premiums from their employees and pay the amount withheld, together with the amount payable by the employer, to the tax collector.

**Social security contributions**

**Health and accident insurance**
Employees with an income of ANG 67,816.32 or less are insured against health care costs and loss of income in case of illness. The premium is 8.3% to be paid by the employer and 4.2% by the employee.

Employees are also insured against loss of income as a result of an accident that occurs at work. The premium varies from 0.5% to 5%, depending on the class of risk, to be paid fully by the employer. Maximum premium income is ANG 67,816.32.

**Old age insurance (AOV) and widows and orphans insurance (AWW)**
The collective premium for AOV and AWW amounts to 14% up to an income of ANG 100,000, of which 7.5% is to be paid by the employer.

**Branch income**
Tax rates on the profits of PEs are the same as for resident corporations.

There are specific rules for the PE of an insurance company. In that case, the company may elect to declare profit based on a percentage of premiums received by the PE, as well as premiums the company has received from insured residents and from insured risks in St. Maarten. The insurance company may also elect to declare a profit that is in the same proportion to total profit of the company as the aforementioned premiums to total premiums.

No tax is withheld on transfers of profits to the head office.

**Income determination**

**Inventory valuation**
Both the last in first out (LIFO) and first in first out (FIFO) methods of inventory valuation are permitted, provided the chosen method conforms to sound commercial
Conformity of book and tax reporting is not required. However, occasions or situations for differences are very rare.

**Capital gains**
Capital gains or losses are, in principle, considered ordinary income and subject to standard corporate rates. An exemption from profit tax is granted for advantages (dividends and capital gains) from a qualifying participation (see Dividend income below).

The gain on disposal of depreciable assets may be carried over to a special tax deferral reinvestment reserve but must then be deducted from the acquisition cost of the later acquired asset. The reserve may be maintained for a maximum of four years. If the reserve has not been fully applied, the remainder will be liable to taxation in the fourth year.

Under the transitional regime for offshore companies (investment, holding, finance, and patent holding companies), capital gains and losses are tax exempt.

**Dividend income**
In general, a full participation exemption applies to all local, as well as foreign, participations for dividends as well as for capital gains. However, it is required that dividends be derived from an active participation (non-portfolio investment) or a participation that is subject to tax.

Expenses incurred in connection with a qualifying participation (including capital losses) are not deductible, unless it can be demonstrated that these are indirectly incurred to realise profits that are subject to tax in St. Maarten.

**Non-portfolio investment clause**
A participation is deemed to be active if the gross income of that participation consists of not more than 50% of dividends, interest, or royalties received other than from an enterprise of that participation.

**Subject-to-tax clause**
A participation is deemed to be subject to tax if it is subject to a tax rate of at least 10%.

If at least one of these clauses has been met, the 100% participation exemption will apply. If none of these clauses are met, the participation exemption is limited to 70% of dividends. Consequently, the dividends would be subject to an effective tax rate of 10.35% (30% x 34.5% regular tax rate).

The 100% exemption also applies to income other than dividends, such as capital gains derived from qualifying participations.

**Immovable property**
The aforementioned clauses do not apply to dividends from a participation that (almost) exclusively (directly or indirectly) holds immovable property. The 100% participation exemption applies to these dividends.

**Definition of dividend**
A dividend is defined as a distribution of profits on shares or profit-sharing notes, paid from statutory profits or profit reserves. Dividends shall not be considered payments for the purchase of own shares or profit-sharing notes, distributions on shares upon liquidation, repayment of paid-up capital, or the distribution of bonus shares.

**Minimum cost-price threshold for participations**
The minimum cost-price threshold for shareholdings, profit-sharing notes, or voting rights of less than 5% is ANG 890,000.
Sint Maarten

**Interest income**
There is no specific regime for interest received. Interest income is therefore taxed at the same rate as other income.

**Foreign income**
A St. Maarten corporation is taxed on foreign interest and other income as earned, and on foreign dividends when received. Undistributed income of foreign subsidiaries is not taxable.

St. Maarten has adopted a definition of a branch (permanent establishment/permanent representatives) that is in line with the definition in the OECD Model Double Taxation Convention on Income and Capital.

The profits of a PE on Aruba, Curaçao, or the Netherlands, including the Caribbean Netherlands, are tax exempt in St. Maarten based on the tax arrangement with the Kingdom of the Netherlands. In the case of a PE outside the Kingdom of the Netherlands (i.e. the Netherlands, Aruba, Curaçao, and St. Maarten), the income realised through the PE, after deduction of foreign taxes, is tax exempt. In the case of a foreign loss, this is not deductible.

Foreign real estate is always deemed to be part of a PE and, as such, is fully tax exempt.

---

**Deductions**

**Depreciation and amortisation**
Depreciation of tangible fixed assets, excluding land, is taken over the estimated useful life of the asset. The depreciable base includes purchase price, customs duties, shipping costs, and installation costs, less residual value, if any. The straight-line method is customary, but the declining-balance method is also acceptable. In addition, an accelerated deduction of one-third of the assets' depreciable basis may be taken. The assets' remaining cost basis (two-thirds) is depreciated using one of the acceptable methods.

The cost basis of certain intangible assets, such as patents, trademarks, and copyrights, can be amortised over their expected useful lives. Goodwill and other intangibles resulting from the excess of purchase price over the cost basis of assets purchased are amortised over three to five years.

The tax department has issued the following estimated depreciation table:

<table>
<thead>
<tr>
<th>Asset</th>

<td>20</td>
<td>0</td>
</tr>
</tbody>
</table>
Start-up expenses
Start-up expenses should be capitalised and may be depreciated, comparable to goodwill, over five years.

Anti-abuse rules regarding interest and loans
Due to existing anti-abuse rules, the deduction for interest paid on intra-group debts relating to certain transactions is disallowed. However, if the taxpayer provides credible evidence of overriding commercial reasons for the transaction, or in case the interest in the hands of the recipient is taxed at an effective tax rate that is considered adequate by St. Maarten standards, the interest may be deductible.

In case of intra-group financing, the amount of interest paid or received for profit tax purposes should be based on arm's-length principles.

In case of profit participating loans, the interest will be qualified as a dividend and will not be deductible. Interest received on such loans may meet the definitions of the participation exemption if the creditor also holds a qualifying participation in the debtor.

A write-down of an intra-group loan may be denied in case of a profit-participating loan or if, at the time of issuance, it was foreseeable that the loan would never be fully repaid.

Provision for bad debt
It is possible to make a provision for future expenses with a cause existing on the balance sheet of the tax year in question. Therefore, a provision may be made for bad debts.

Charitable donations
Charitable donations to qualifying entities within the Kingdom of the Netherlands may be deducted to the extent that they exceed 1% of net income and ANG 100 after utilisation of tax loss carryforwards. The maximum deduction is 3% of net income.

Bribes, kickbacks, and illegal payments
Expenses that are connected to a criminal offence for which a taxpayer has been convicted are not deductible. Bribes paid to public servants and politicians are not deductible.

Fines and penalties
Fines and penalties are not deductible in cases where they have been imposed by a criminal court in St. Maarten, or have been paid to avoid prosecution, and in cases of administrative fines imposed by a government agency in St. Maarten.

Taxes
The turnover tax paid by the entrepreneur is deductible for profit tax purposes, up to 90%. Other taxes, other than the profit tax itself, incurred in the course of doing business are deductible.

Other significant items
Deduction of certain expenses (e.g. costs for food, drink, and entertainment) are only allowed in part. These costs are often referred to as mixed costs. The non-deductible portion is 10% of the total of these expenses.

Net operating losses
Losses may be carried forward for a period of ten years. Start-up losses during the first four years for companies having tax holidays may be carried forward indefinitely. Carrybacks are not permitted.
Payments to foreign affiliates
The Corporate Tax Act provides for specific limitations for deduction of interest in certain cases of restructuring and refinancing involving the creation of artificial flows of interest payments to persons who are tax exempt or subject to lower taxes in their jurisdiction.

Group taxation

Fiscal unity
The Corporate Tax Act provides for fiscal unity treatment for corporate profit tax purposes. Resident companies with wholly owned resident subsidiaries can qualify for this regime. The parent company is entitled to submit one consolidated income tax return on behalf of the entire fiscal unity group. As a result, only the parent company is assessed.

Within certain limitations, losses of one company can be offset against the profits made by another company in the fiscal unity group. No profits need to be recognised on inter-company transactions, as these are disregarded for tax purposes. The fiscal unity applies for profit tax purposes only; the participating entities remain separate and identifiable under civil law.

Fiscal unity relief is confined to companies organised under the laws of St. Maarten, the Netherlands, Aruba, or Curaçao. The companies that invoke this relief must have their place of management in St. Maarten.

On the basis of the non-discrimination provision of a relevant tax treaty, entities established under the laws of a tax treaty party may also be admitted to the fiscal unity regime, provided that they are resident in St. Maarten.

Transfer pricing
There are no specific regulations with regard to transfer pricing. However, based on case law, businesses can be required to show that in case of intra-company transactions, these transactions have been made at arm’s length.

Thin capitalisation
In cases where a company receives a loan from an associated exempt private limited liability company (Besloten Vennootschap or BV), and the amount of the loan is more than three times the net equity of the company, the interest on the loan is not deductible for the part that is more than three times the net equity.

Controlled foreign companies (CFCs)
There are no CFC provisions.

Tax credits and incentives

Foreign tax credit
A tax credit applies to income from abroad that has been subject to tax at source or to another tax on income. The tax credit is allowed for the income tax levied abroad, but shall not exceed the St. Maarten profit tax that is attributable to that foreign income.

Inward investment and capital investment
There are tax incentives or holidays for the establishment of new economic enterprises and hotels with a predetermined minimum employment and capital investment. Special provisions relate to the taxation of shipping and insurance companies.
**Investment allowance**
For a minimum investment of ANG 5,000, an 8% investment allowance on acquisitions and improvements (12% for new buildings) is permitted as a deduction from taxable profit in the year of investment and in the subsequent year for businesses operating in St. Maarten.

**Accelerated depreciation and tax rollover reserve**
An accelerated deduction of one-third of the assets' depreciable basis may be taken. If a profit results at the time of sale of capital assets with the intention to replace that asset, the profit may be placed in a tax rollover account.

**Tax exempt company**
It is possible to elect tax-exempt status for a BV. To qualify for the exemption, a number of conditions must be met, including (but not limited to) the disclosure of beneficiaries, management, financials, and the activities (only investment and financing activities) of the company. Recently, the licensing of intellectual and industrial property rights, and other comparable property and usage rights, have been added to the list of allowed activities.

Another condition has been added that requires that no more than 5% of the revenues of the exempt company consist of dividends from subsidiaries that are not subject to a tax regime comparable to that of St. Maarten. A profit tax regime is comparable to that of St. Maarten if the foreign tax regime provides for a profit tax rate of at least 15% (50% of the old Netherlands Antillean rate, excluding island surcharges).

The subject-to-tax requirement is also met if the foreign tax regime appears on a list of comparable tax regimes. The list that has been issued includes all European Union (EU) and OECD member states and all jurisdictions with which St. Maarten has a tax treaty. According to the list, the subject-to-tax requirement is also met in the case of a jurisdiction that is included in the white list issued by the OECD, provided that no special tax regime is applicable.

**Independent expert**
An independent expert is required to certify that the exempt company meets the requirements for exempt status. If more than 5% of the revenues of the exempt company consist of dividends from subsidiaries that are not subject to a tax comparable to that of St. Maarten, the independent expert must inform the Inspectorate of Taxes. The inspector notifies the company that it no longer meets the requirements for exempt status. The exempt status is then terminated starting the first day of the year following the year in which the notification becomes final.

**Ocean shipping companies**
Ocean shipping companies are taxed on a fixed profit per net ton of ANG 0.60 up to ANG 2.00 (or per 10 net ton in case of management and control). International aviation companies may apply a reduced tax rate against 80% of their profit, as their profits are deemed to be gained outside of St. Maarten. As a result, the overall effective tax rate is 9.66%.

**New industries and hotels**
New industries and hotels are granted partial exemption from profit tax and a minimum 2% tax rate for a period of five to 11 years. A minimum investment is required. Losses incurred during the first four years of operations may be used to offset taxable income for an indefinite period of time.

**Land development companies**
Land development companies are granted a tax holiday. They are exempt from tax on profits realised on the sale of the developed land. A minimum investment of ANG 1
million is required. Activities should be expected to enhance the economic development of St. Maarten.

**Private foundations**

Private foundations are exempt from St. Maarten profit tax, and their distributions are exempt from St. Maarten gift tax, as are contributions of assets to the foundation by a non-resident. Gift tax in the contributor’s country may be applicable.

The ‘private’ foundation is a variant of the long-existing ‘common’ foundation. The most important difference is that the purposes of a common foundation may not include making distributions (other than distributions of an idealistic or social nature). This restriction does not apply to private foundations, whose purpose may include making distributions to the founders and others. A private foundation may not run a business or enterprise for profit. Acting as a holding company or investment company is not considered running a business. The private foundation is intended to be an alternative to the Anglo-Saxon trust, especially in civil law jurisdictions.

**Withholding taxes**

Although a dividend withholding tax (WHT) was approved in 1999, it has been decided that for the foreseeable future this tax will not enter into force. If it is decided that the tax will enter into force, there is a mandatory transitional period during which the tax will not be applicable to legal entities resident at that time in St. Maarten.

**Tax treaties**

St. Maarten currently has tax treaties in effect with the Netherlands, Aruba, Curaçao, and Norway. A double tax agreement (DTA) has been negotiated with Jamaica, but this has not entered into force yet. See the Other issues section for a description of tax information exchange agreements (TIEAs).

**Tax arrangement for the Kingdom of the Netherlands (TAK)**

As part of the Kingdom of the Netherlands, St. Maarten is party to a federal tax agreement with the Netherlands, Aruba, and Curaçao (TAK). Subject to this treaty, dividends, interest, and royalties paid out to a St. Maarten company may qualify for reduced rates of WHT in the subject countries.

Dutch dividend WHT is 15% if the St. Maarten company owns less than 25% of the Dutch company. If the St. Maarten company’s interest is 25% or more, Dutch WHT can be reduced to 8.3%.

The WHT regime in the TAK also applies to the old St. Maarten offshore companies.

A new agreement between the government of St. Maarten and the Netherlands has been signed. The new agreement conforms more to the latest international developments with regard to double tax treaties (DTTs). The agreement entered into force and is applicable for income received from 1 January 2017. The new agreement will replace the existing TAK and arranges the levy rights between the Netherlands and St. Maarten. The TAK will remain in force with regard to the Netherlands in relation to Aruba, and between Aruba, Curaçao, and St. Maarten.

**Tax administration**

**Taxable period**

Profit tax is levied by way of a self-assessment system. Returns are to be filed on a calendar-year basis. Non-resident corporations may file their returns based on a calendar-year basis or on a different book year. On request, this may also apply, for
example, when a resident company is the subsidiary of a foreign parent company (i.e. only a local company must request for a different tax year-end).

**Tax returns**
A provisional return must be filed within three months after the end of the book year. A final return must be filed within six months after the end of the book year.

For the provisional return, no extensions are granted. For the final return, an extension may be requested. In general, no extensions will be granted for more than 12 months after the book year.

**Payment of tax**
Payment is to be made at the time of filing and in a lump sum on the basis of the self-assessment. This means that if the book year equals the calendar year, the provisional return is due before 1 April of the following year, and the final return before 1 July of the following year.

In general, at the time of filing the provisional return, an amount equal to the profit tax of the previous year must be paid; the remaining balance due for the year for which the return is filed must be paid at the time of filing the final return.

For example, if the tax due for the year 2015 was 100, then at the time of filing the provisional return for 2016, which is due before 1 April 2017, that same amount must be declared and paid. If there is reason to believe that the amount for the year 2016 will be lower than for 2015, the estimated lower amount may be paid at the time of filing the provisional return, upon request.

At the time of filing the final return for the year 2016, which is due before 1 July 2017, the balance due must be paid; or if the total amount is less than the amount already paid up, a repayment will follow.

**Tax audit process**
As the profit tax is levied based on self-assessment, the tax department does not issue a final tax assessment. There is no specific cycle for audits. Depending on a desk review of the tax returns of the last couple of years, an audit may follow.

**Statute of limitations**
A reassessment can be imposed until five years after the tax year. In cases where the taxpayer is considered to be in bad faith, a reassessment can be imposed until ten years after the tax year.

**Topics of focus for tax authorities**
There are no specific topics of focus for the tax authorities. In case an audit is started, each aspect may be investigated. Often the audit will not only focus on the profit tax, but also the other tax obligations, such as sales tax, wage tax, and social security premiums.

**Other issues**

**Exchange controls**
In general, exchange control regulations are very liberal for offshore companies. Offshore companies established in St. Maarten can obtain non-resident status for exchange control purposes, which basically provides for total exemption from exchange controls. Onshore companies are subject to slightly stricter rules. These companies are subject to a licence fee of 1%.
Business combinations
The Corporate Tax Act provides for a tax facility for business mergers. In a business merger, a company acquires all or a substantial part of the trade or business of another company with a view towards combining the business operations of the two companies into a permanent financial and economic organisation. If the business is transferred as part of a business merger, the gains realised by the transferor are not subject to profit tax if certain conditions are met.

Although there is no specific provision in the Corporate Tax Act with regard to legal mergers, legal split-ups, and re-incorporations, the Tax Inspectorate has announced that when certain conditions are met, a tax facility also applies in these cases.

Tax information exchange agreements (TIEAs)
TIEAs have been signed with several countries, including Australia, Canada, Denmark, Mexico, Spain, Sweden, New Zealand, and the United States. As a result, St. Maarten, as part of the former Netherlands Antilles, has been moved to the white list of the OECD Global Forum.

St. Maarten has not signed an intergovernmental agreement (IGA) with the United States.

Significant developments

A recent amendment to the tax legislation in the Slovak Republic (Slovakia) includes, inter alia, the following measures applicable from 1 January 2016:

• Update of anti-avoidance provisions.
• New definition of acquisition cost of financial assets (such as participation shares) for capital gains tax purposes.
• Change in the mechanism for penalties assessment.
• Clarification with respect to transfer pricing documentation.

Note that the legislation is expected to continue to be subject to frequent amendments and new official interpretations; consequently, it is advisable to contact PwC Bratislava for up-to-date information.

Taxes on corporate income

As a member state of the Organisation for Economic Co-operation and Development (OECD), the Slovak Republic's system of corporate taxation generally follows OECD guidelines and principles.

The corporate income tax (CIT) applies to the profits generated by all companies, including branches of foreign companies.

Slovak tax residents are taxed on their worldwide income. Slovak tax residents may utilise a method of elimination of double taxation if their income is taxed abroad. The exemption or credit method can be used to eliminate the double taxation, depending on the relevant double tax treaty (DTT) and the type of income.

Slovak tax non-residents are taxable in Slovakia on their Slovak-source income only. Slovak-source income is defined by local tax law and includes, inter alia, the business income of permanent establishments (PEs) and passive types of income, such as royalties, interest, and income from disposal of assets.

Slovakia has a flat CIT rate of 22%. Some income may be subject to a 19% withholding tax (WHT) rate (e.g. interest, royalties). A specific 35% WHT rate applies for payments to taxpayers from non-treaty jurisdictions (i.e. where no DTT or tax information exchange agreement [TIEA] exists).

Tax licence (minimum tax)

A tax licence is applicable to companies and represents a minimum lump sum tax after deduction of tax relief and credit of taxes paid abroad. The respective amounts range from 480 euros (EUR) to EUR 2,880, depending on the entity’s turnover and whether the entity is a value-added tax (VAT) payer. The tax licence should be paid regardless of the value of the reported tax base or the tax loss incurred; however, it should be
Slovak Republic

possible to deduct it from future tax liability in the subsequent three years. An entity may not be liable to pay the tax licence only in exceptional cases (e.g. in the first year of its existence, during its liquidation, during bankruptcy, if it operates a subsidised workshop).

**Local income taxes**
Slovakia does not have local, state, or provincial CIT.

-------------------------------------------------------------------------------------------------

**Corporate residence**

A company is a tax resident in the Slovak Republic if it has its registered seat or effective place of management in the Slovak Republic.

**Permanent establishment (PE)**
A foreign company may create a PE if (i) its employees (or persons working for it) are present and providing services in the Slovak Republic on behalf of the foreign company where this activity is carried out through a permanent place of business, (ii) the employees conclude and negotiate agreements on the foreign entity's behalf, or (iii) the foreign entity establishes a building site within the territory of the Slovak Republic.

An activity performed in the Slovak Republic in the form of providing services for more than six months may also be considered a PE, irrespective of the existence of the fixed place.

-------------------------------------------------------------------------------------------------

**Other taxes**

**Value-added tax (VAT)**
A basic VAT rate of 20% applies to all taxable supplies, with certain exceptions. Certain medical products and printed materials have a VAT rate of 10%. With effect from 1 January 2016, the VAT Act broadens the list of goods subject to the reduced 10% VAT rate, which now includes 'basic foods' (e.g. milk, butter, meat).

Exempt supplies without credit entitlement include postal services, financial and insurance services, education, public radio and TV broadcasting services, health and social services, the transfer and leasing of real estate (with exceptions), and lottery services. There are also other VAT-exempt transactions without credit entitlement, as well as exempt taxable supplies with credit entitlement.

A special regime for the payment of VAT by a supplier based on the receipt of a payment for supplied goods or services ('cash accounting') is also available. This regime will postpone the obligation to pay VAT until the customer pays the supplier for the supply. This cash accounting scheme can only be used by Slovak-established entities (i.e. with a seat, place of business, or fixed establishment in Slovakia) and if they meet certain conditions.

Reverse-charge mechanism applies for local supplies of any type of goods by foreign persons to a Slovak-established entrepreneur. Foreign companies that only carry out local supplies in Slovakia subject to the local reverse-charge mechanism will not be obligated to register for Slovak VAT. If they are already registered for Slovak VAT, they will not be entitled to deduct input VAT via a Slovak VAT return if this input VAT relates only to the supplies where the reverse-charge mechanism applies. Foreign companies will be able to claim Slovak input VAT using the VAT refund procedure, provided they meet the stipulated conditions.

There is an obligation for the VAT refund's requestors from another European Union (EU) member state and from third-party countries who need to notify the Slovak Tax
Office in the case when they receive a credit note for a decrease in the price from their supplier after the VAT has already been paid to the applicant and they have to repay the relevant amount of VAT to the Tax Office. The foreign companies from non-EU countries are able to apply for a VAT refund on a three-month basis under the same conditions as foreign companies from EU countries.

Local reverse-charge applies for the supplies of construction work, supply of building or parts of buildings under construction, and supply of goods with assembly and installation where assembly and installation can be considered as construction work. For such supplies, the supplier will not charge VAT on the issued invoice and the recipient (VAT payer) must apply a reverse-charge.

VAT grouping is possible if certain conditions are met.

**Customs duties**

Goods imported from non-EU countries are subject to import customs clearance. Goods exported from the EU customs territory have to be declared for export customs clearance.

To communicate with the customs offices, each person must have an Economic Operator Registration and Identification Number (EORI), which is registered by the customs authorities on request. EORI registration is mandatory for customs clearance.

The European customs rate, customs nomenclature, and customs tariffs are set by EU legislation.

Note that new customs legislation entered into force from 1 May 2016. Whilst the main principles of customs legislation were not altered, areas of key changes include the following:

- Alignment of customs processes and introduction of their uniformity at a higher level across all EU member states.
- Fully electronic customs procedure introduced as an obligation and not as an option (e-Customs).
- Revision and realignment of customs procedures, customs approved treatments, and end-use licence (i.e. customs approved treatments are no longer valid, end-use is considered as customs regime, inward processing relief [IPR] drawback system is being cancelled).
- Creating a platform for the introduction of new concepts (‘single windows’).
- Abolishment of first sale method in customs valuation and change of the definition of transaction value.
- Introduction of self-assessment (delegation of the executing of certain customs formalities to the operator that are otherwise the responsibility of the customs authorities) and other simplified procedures.
- New concept of Authorized Economic Operator (AEO) with only two types AEO-C and AEO-S.
- Validity of binding tariff information (BTIs), time limits for decision making process, customs guarantee, definition of the debtor, exporter, etc.

**Excise taxes**

Excise tax is charged on the release to tax-free circulation or import of tobacco products, wine, spirits, beer, mineral oil, electric energy, coal, and natural gas.

**Immovable property tax**

Immovable property tax, which is divided into land tax, building tax, and tax on apartments, is governed by the Act on Local Taxes. Immovable property tax is calculated based on the area of the real estate, its location, and its type, as well as the tax rate of each self-governing region.
Slovak Republic

The immovable property tax rate may vary significantly. Please find below the spread of the tax charges per square metre.

<table>
<thead>
<tr>
<th>Property</th>
<th>Immovable property tax per square metre (EUR)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Four floor office building in centre of city of Bratislava</td>
<td>8.30 *</td>
</tr>
<tr>
<td>One floor hall rural area</td>
<td>0.57 to 6.40</td>
</tr>
</tbody>
</table>

* For each additional floor, add an additional tax of EUR 0.33.

**Transfer taxes**
There are no transfer taxes in the Slovak Republic.

**Stamp taxes**
There are no stamp duties or similar taxes on share or other property transfers in the Slovak Republic, although small administrative fees are payable to register such transactions.

**Turnover taxes**
There are no turnover taxes in the Slovak Republic.

**Special tax on regulated industries**
There is a special tax from activities of entities in regulated industries (e.g. energy, insurance and re-insurance, public healthcare insurance, electronic communications, pharmaceuticals, postal services, railway transport, public water distribution and sewerage, air transport), which applies for the period from September 2012 to December 2016. The tax is calculated as a multiple of the tax base (accounting result before tax) that exceeds EUR 3 million a year and the tax rate. The monthly tax rate is 0.00363. The annual rate can be up to 4.35%.

**Special tax on banks**
A special tax on banks is charged at a rate of up to 0.4% to the extent that the cumulative amount of special tax collected from all banks by the Tax Office does not reach the EUR 750 million threshold. The tax rate of 0.2% applies in 2016.

The special tax on banks is calculated from the bank's liabilities recognised on the balance sheet net of deductions (e.g. the amount of the bank's equity, provided that its value is positive), the amount of the subordinated debt under a special regulation, and the amount of funds provided to the branch of a foreign bank.

**Motor vehicle tax**
Vehicle tax applies to vehicles that are registered in the Slovak Republic and used for business purposes. The taxpayer is the entity that uses the vehicle for business purposes. The tax rate depends on engine capacity, vehicle size, etc. The motor vehicle tax is administrated by the Tax Office.

**Payroll taxes**
Taxable remuneration from employment includes all remuneration, whether monetary or non-monetary, including in-kind benefits provided to an employee. Statutory health insurance and social security contributions paid by the employee reduce taxable income. Obligatory employer’s health insurance and social security contributions paid by the employer are not part of the employee’s taxable income.

Employers must keep Slovak payroll records for employees and members of their statutory bodies.
The tax base up to EUR 35,022.31 is taxed at 19%. The exceeding part of the tax base is taxed at 25%.

Income of constitutional authorities from dependent activity is, in addition to the tax calculated as listed above, subject to a special tax rate of 5%.

**Social security contributions**
Employer’s health insurance and social security contributions total 34.4% of remuneration; however, due to caps on the amounts on which these contributions are levied, the total contribution does not exceed EUR 1,475.76 per month for the period from 1 January 2016 to 31 December 2016. Employers also pay injury insurance contributions of 0.8% of employees’ total salary costs per month, which are not capped.

The rate of health insurance contributions for individuals who receive dividends (except for dividends from listed shares) is 14% of the assessment base. In general, the payer of the dividend needs to withhold the health insurance contribution on the payment of the dividend.

The common maximum health insurance assessment base for 2016 is EUR 51,480.

**Branch income**
A foreign company may trade through a Slovak branch, which must be registered in the Slovak Commercial Register. The taxable income of the branch must not be lower than that which an independent entity (e.g. a Slovak company) would achieve from carrying out similar activities under similar conditions. If the branch’s taxable income cannot be assessed based on its income less costs, as adjusted for tax purposes, certain other methods may be used. A taxpayer may ask the tax authorities in writing to approve such a method.

**Income determination**
The tax base is generally the accounting result as determined under Slovak statutory accounting rules, adjusted for tax purposes.

**Inventory valuation**
Stock (i.e. inventory) is valuated at cost. Slovak legislation specifically provides for the use of the arithmetical average cost and first in first out (FIFO) methods to value stock. Last in first out (LIFO) may not be used. The tax treatment follows the accounting treatment.

**Capital gains**
Capital gains from the disposal of assets are included in the CIT base. The tax treatment of capital losses depends on the type of asset on which they arose.

Capital gains on the alienation of shares and participation interest in Slovak companies may be taxed in Slovakia, predominately if sold to a buyer who is a Slovak tax resident or has a PE to which the purchase is attributable.

The income from the sale of shares or participation interest of a company where the value of immovable property is more than 50% of the equity has its source in Slovakia.

**Dividend income**
Dividends paid out of profits earned on or after 1 January 2004, and liquidation surpluses and settlement amounts to which shareholders became entitled on or after 1 January 2004, are not subject to tax.
However, based on newly introduced anti-avoidance provisions, any dividends may be taxable in Slovakia if they are received through artificial structures with no genuine business reason and contrary to economic reality.

**Interest and royalty income**

Slovak-source interest income earned by taxpayers with limited, as well as unlimited, tax liability is subject to withholding at a flat tax rate of 19% (for states without a DTT, please refer to the Withholding taxes section), except where the recipient of the deposit interest or the yield is a Slovak investment fund, Slovak supplementary pension fund, Slovak bank or the branch of a foreign bank, or the Slovak Export-Import Bank.

Royalty income is subject to the 19% corporate flat tax rate (for states without a DTT, please refer to the Withholding taxes section).

Interest and royalty income is exempt if it is paid by a Slovak payer to a recipient who is a tax resident in the European Union and is a beneficial owner of this income, provided that for 24 months before the payment:

- the payer owns at least a 25% direct shareholding of the recipient of the income
- the recipient owns at least a 25% direct shareholding of the payer of the income, or
- a third entity resident in the European Union owns at least a 25% direct shareholding in both the payer and the recipient of the income.

**Unrealised foreign exchange gains/losses**

The taxpayer may decide whether to include unrealised foreign exchange differences relating to unsettled payables and receivables in the tax base in the tax period when they are accounted for or in the tax period when they are realised. However, the decision to include/stop including these differences when they are realised must be made on the CIT return.

**Foreign income**

Companies resident in the Slovak Republic are taxed on their worldwide income, including income of its foreign branches. A Slovak tax resident entity is able to deduct from its tax base a tax loss made by its taxable PE (e.g. branch) outside the Slovak Republic, adjusted for Slovak tax purposes.

Credit relief is available for foreign tax paid under most of Slovakia's DTTs. Alternatively, exemption of foreign income taxed abroad from taxation in Slovakia may apply.

Slovakia does not have provisions related to deferral.

**Deductions**

**Depreciation and amortisation**

Tangible fixed assets (acquisition value over EUR 1,700) are classified into six tax depreciation groups to which different depreciation periods apply. The possibility to use accelerated tax depreciation methods is limited to assets belonging to the tax depreciation groups 2 and 3.

<table>
<thead>
<tr>
<th>Depreciation group</th>
<th>Assets</th>
<th>Depreciation (years)</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Motor vehicles, office machines and computers, tools and implements</td>
<td>4</td>
</tr>
<tr>
<td>2</td>
<td>Combustion engines, outboard engines, most production line equipment, furniture</td>
<td>6</td>
</tr>
<tr>
<td>3</td>
<td>Electric motors, turbines, air-conditioning systems</td>
<td>8</td>
</tr>
<tr>
<td>4</td>
<td>Buildings made of metal, ships, railway locomotives</td>
<td>12</td>
</tr>
</tbody>
</table>
Depreciation group | Assets | Depreciation (years)
--- | --- | ---
5 | Buildings not involved in depreciation group no. 6 and engineer’s sites not included in other depreciation groups | 20
6 | Administrative and residential buildings, hotels and buildings for culture, education, health, and public entertainment | 40

Taxpayers do not have to depreciate an asset every year. Tax depreciation may be interrupted in any year and continued in a later year without a loss of the total tax depreciation available.

A lessee can depreciate a tangible fixed asset held under a financial lease. The tax depreciation base equals the acquisition value of the leased asset without VAT and financing costs plus expenses related to acquisition of the leased asset that the lessee incurred before the asset was put into use. The assets acquired under finance lease shall be amortised proportionally or using an accelerated method.

The value to be used as the basis for tax depreciation depends on how the asset is acquired and is usually based on one of the following:

- Acquisition costs (i.e. the price for which the asset was acquired).
- The taxpayer’s own costs incurred, if the asset is acquired or produced internally.
- Intangibles (acquisition value of EUR 2,400 or more) and low value assets (acquisition value of EUR 1,700 or less) are amortised for tax purposes in line with their accounting amortisation (i.e. over the useful life of the asset).

**Goodwill**

Amortisation of purchased goodwill, including the goodwill on purchase of a business as a going concern, if it represents an identifiable intangible asset, is tax deductible over up to seven consecutive tax years.

For goodwill created at the contribution of business as a going concern or goodwill created at a merger, the tax deductibility of the goodwill depends on the method of tax treatment of this reorganisation. If the reorganisation is performed for tax purposes at fair market values, the goodwill created will be tax deductible. On the other hand, if the reorganisation is made at original values (carry-over basis), the goodwill created is not tax deductible.

**Start-up expenses**

Start-up expenses are tax deductible in the period when incurred.

**Interest expenses**

In general, interest expenses incurred in order to generate taxable income can be treated as tax deductible, subject to thin capitalisation rules (see Thin capitalisation in the Group taxation section).

**Bad debt provisions**

Provisions for unsecured receivables from loans created by banks, and bad debts of regular commercial companies, are fully tax deductible (subject to certain conditions) once the debt has been overdue for more than 1,080 days (20% of the bad debt is tax deductible when it has been overdue for more than 360 days, and 50% after 720 days), provided certain conditions are met. Provisions for bad debts in other circumstances can also be tax deductible if specific conditions are met (e.g. bad debts registered in bankruptcy proceedings).

**Charitable contributions**

Charitable contributions are treated as gifts, which are not tax deductible.
Slovak Republic

**Pension expenses**
Contributions to supplementary pension savings made by the Slovak employer on behalf of the employee, up to 6% of the gross salary of the employee participating in these plans, are tax deductible.

**Fines and penalties**
Penalties and fines are not tax deductible.

**Allowance for students**
Subject to specific conditions, taxpayers may deduct from their tax base a special allowance with respect to practical education provided to students of up to EUR 3,200 per student per year.

**Taxes**
Road tax, real estate tax, and most other such taxes are tax deductible. Social security contributions paid by an employer with respect to employees are also tax deductible. VAT charged to profit and loss is tax deductible only if certain conditions are met.

**Other non-deductible expenses**
Expenses are generally tax deductible if incurred to generate, secure, and maintain the entity's taxable income. However, certain other costs are specifically not tax deductible. These include entertainment costs, various provisions (e.g. provisions to tangible and intangible assets, certain bad debt provisions), and various expenses in excess of statutory limits (e.g. employee travel expenses and meal allowances).

**Net operating losses**
A company or branch may currently carry forward and utilise a tax loss equally over a period of four years following the year in which the loss arose.

For issues related to the interim provision regarding tax losses carried forward from years 2010 to 2013, please contact the local PwC Tax office.

Carryback of losses is not available in the Slovak Republic.

**Payments to foreign affiliates**
Generally, deductions may be claimed for royalties, management service fees, and interest charges paid to foreign affiliates, provided such amounts are at arm's length and subject to other limitations by the law (e.g. thin capitalisation rules).

**Group taxation**
There is no concept of group CIT in the Slovak Republic. Each company in a group is taxed individually.

**Transfer pricing**
Under the transfer pricing rules, prices in transactions between a Slovak company and its related parties should be at arm's length, which means the prices should be at rates similar to those that would be charged between unrelated parties for the same or similar transactions under comparable conditions. Although the OECD Transfer Pricing Guidelines were not formally implemented, these are usually followed for determination of arm's-length prices.

The transfer pricing documentation requirements also apply to domestic-related parties in addition to the rules for foreign-related parties. This means that the prices used between two Slovak related parties need to be set at an arm's-length basis for tax purposes. All provisions of the law on methods of determining such prices for the
purpose of adjusting the tax base and the obligation to keep associated transfer pricing documentation also apply to domestic-related parties.

If transactions between the related parties are not made at arm’s length, and this results in a reduction in the Slovak entity’s corporate tax base, then the tax authorities can adjust the corporate tax base to that which it would have been if arm’s-length prices had been used.

**Transfer pricing documentation**

All Slovak taxpayers must keep sufficient transfer pricing documentation to justify prices charged by or to their foreign-related parties. The Slovak Ministry of Finance has issued a guideline setting out detailed requirements for transfer pricing documentation (the Guideline).

The EU code of conduct was not formally implemented. However, the Guideline requires maintaining transfer pricing documentation in a form generally in line with the EU standards.

Slovak tax inspectors may require transfer pricing documentation. The deadline to provide transfer pricing documentation for taxpayers is 15 days, and the tax authority may request transfer pricing documentation without the formal opening of a tax audit. Without such documentation, transfer pricing adjustments (increased tax base) are much more likely to be imposed.

**Thin capitalisation**

The limit for the maximum amount of tax deductible interest and related fees on credits and loans between related parties is established as 25% of the adjusted earnings before interest, tax, depreciation, and amortisation (EBITDA), i.e. the sum of:

- accounting profit before tax
- depreciation and amortisation, and
- interest expenses included in the accounting profit before tax.

In general, thin capitalisation provisions do not apply to financial institutions, collective investment schemes, and leasing companies. Other exceptions or restrictions may apply.

**Controlled foreign companies (CFCs)**

There is no CFC regime in place in the Slovak Republic.

**Treatment of inter-company items**

Dividends are not treated as taxable (subject to anti-avoidance provisions) if they are paid out of the profit after tax earned in 2004 or later.

In general, royalties, commissions, and other payments paid to foreign-related parties are tax deductible, provided they are incurred for genuine business reasons and the charges are in line with transfer pricing rules.

**Tax credits and incentives**

There are several types of investment incentives potentially available, including corporate tax credits, discounts on the price of publicly owned real estate, and financial support for creating jobs or for the acquisition of long-term assets. All of these are treated as state aid.

Various conditions must be met in order for a company to qualify for state aid. These include a minimum amount of investment in fixed assets, where the amount depends
mainly on the type of project and where it is located, or a minimum number of newly created jobs.

**Investment incentives**
Investment incentives (including tax credits) are potentially available for projects in the following areas:

- Industry.
- Technology centres.
- Shared services centres.
- Tourism.

The granting of a tax relief is subject to approval of the Slovak authorities. If certain conditions are met, a taxpayer may apply tax relief in the ten subsequent years following the tax period in which the relief was granted.

**Research and development (R&D) super deduction**
Taxpayers involved in R&D are entitled to an R&D super deduction of at least 25% of actual qualifying costs incurred.

**Foreign tax credit**
Foreign tax credits are available if allotted under an applicable DTT.

---

**Withholding taxes**

Mainly, the following payments are subject to WHT when made by Slovak companies to foreign parties. However, a DTT may reduce or eliminate the rate:

<table>
<thead>
<tr>
<th>Payments</th>
<th>WHT (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Fees for services</td>
<td>19/35</td>
</tr>
<tr>
<td>Royalties *</td>
<td>19/35</td>
</tr>
<tr>
<td>Interest on loans and deposits*</td>
<td>19/35</td>
</tr>
</tbody>
</table>

* Royalties and interest paid to related EU-resident companies are not subject to WHT if certain conditions are met.

A 35% WHT rate applies on payments to taxpayers from non-contracting states (i.e. states that did not conclude either a DTT or TIEA with the Slovak Republic).

Service fees may be subject to tax in Slovakia only if the service is provided in the territory of Slovakia.

Dividends paid out of profits arising in 2004 and later years are not subject to Slovak WHT (subject to anti-avoidance provisions).

WHT should be paid to the Tax Office no later than 15 days from the end of the calendar month following that in which the payment was made. The withholding obligation lies with the Slovak resident taxpayer. The taxpayer must also notify the tax administrator of the tax withheld and transferred. If the tax is not properly withheld, the unpaid tax becomes the Slovak tax resident’s tax liability, and a penalty may be assessed.

**Double tax treaties (DTTs)**
This table highlights countries with which Slovakia has entered into a DTT.

**Notes**

1. The lower rate applies to cultural royalties.
   a. In the case of Romania, the rate of 10% applies to royalties in respect of the use of trademarks, patents, or know-how. The higher rate applies in any other cases.
   b. In the case of Brazil, the rate of 25% applies to royalties for the use of trademarks. The lower applies in other cases.
2. The lower rate applies to interest on loans and credits granted by a bank for at least ten years in connection with the sale of industrial equipment; with the study, installation, or furnishing of industrial or scientific units; or with public works.
   a. The zero rate applies to interest on certain commercial debt-claims, loans guaranteed by public entities for export promotion, accounts/loans between banks/public institutions of the two states, and interest paid to another state or political subdivision of a local authority.
3. The zero rate applies if the interest is received by the government/the central bank/other state institutions (see the respective treaty for exact wording).
4. The zero rate applies if the interest is received by the government or the central bank or other state institutions, or if the receivables on which the interest is paid are guaranteed/financed/indirectly financed by the government/governmental institutions (see treaty for exact wording).
5. The rate of 10% applies to royalties for cinematography, TV broadcasting, and radio broadcasting, and to giving up rights related to royalties. The higher rate applies in other cases.
6. This rate also applies to payment for services.
7. WHT is 0% on bank loans.
8. The zero rate applies to copyrights; 1% applies to finance lease of equipment; 5% applies to equipment rental and royalties for software, cinematography, and TV and radio broadcasting; and 10% applies to payments for the use of trademarks and know-how.
9. The rate of 2% applies to state bonds, obligations, and loans interest or guaranteed by the National Bank of Slovakia/Israel, Slovak Society for Insurance of Foreign Credits and Loans, or Israel Society for Insurance of Foreign Trade; 5% applies if interest is received by a financial institution; and 10% applies in all other cases.
10. Slovakia can apply the rate of 5% to royalties for the use of trademarks, patents, or know-how paid from Switzerland to Slovakia, if Switzerland does not apply the 10% rate.
11. The zero-rate applies to interest on loans and credits in connection with the sale of industrial, business, or scientific equipment, or the sale of goods.
12. The zero-rate applies if the interest received is related to loans (monetary or non-monetary) provided to the government of the other contracting state corporation or any other institution with state shareholding or to loans provided to a bank institution under a governmental approval.
13. The zero-rate applies to copyrights.
14. The zero-rate applies to interest received by a resident of one state in respect of indebtedness of the other state government or political subdivision/local authority, or in respect of a loan made/guaranteed by the other state government in respect of imports/exports.
15. The zero-rate applies if the interest is received by the government, the central bank, or other state institutions, or if the receivables on which the interest is paid are guaranteed/financed/indirectly financed by the government/governmental institutions (see treaty for exact wording).
16. The rate of 5% applies to royalties for the use or the right to use of patent, draft or model, plan, confidential formula or procedure, for information related to industrial or scientific experience and for the use or the right to use of an industrial, business, or scientific device. The rate of 10% applies to royalties for the use or the right to use of trademark or for information related to business experience. The rate of 15% applies to royalties, other than those stated above.
17. Interest is exempt if paid by a government/public law agency and other agencies specified in the DTT between Slovakia and Kuwait.
18. Slovakia and Switzerland signed the Protocol to a DTT on 8 February 2011. Based on this Protocol, the interest rate will be a maximum of 5%. Industrial royalties are subject to 10%, but the potential reduction of the rate is in case the royalties are paid within European Union, and entities are
considered to be related companies with direct share exceeding 25% for more than 24 months, which is in accordance with the EU Directive on interest and royalty payments made between associated companies.

**Tax administration**

**Taxable period**
The standard fiscal year is a calendar year, but a Slovak entity may opt to change this to a different 12-month period.

**Tax returns**
A corporate tax return must be filed together with the entity's financial statements within three months following the fiscal year-end. The taxpayer may extend the filing deadline by up to three months. To extend the filing deadline, the taxpayer must notify the Tax Office before the normal filing deadline. After notification, the deadline is automatically extended. Further extension of up to six months is available upon Tax Office approval.

**Payment of tax**
The balance of tax due for a fiscal year is payable by the filing deadline.

Advance payments of corporate tax must be paid monthly or quarterly during the current tax period. Instalments are usually based on the last known tax liability of the entity. It is not necessary to pay tax advances if the last tax liability did not exceed EUR 2,500.

**Penalties**
As of 1 January 2016, the mechanism for penalties assessment has changed. The penalties levied by the Tax Office will depend on the time elapsed from the deadline for filing the regular tax return to the date of filing the amended tax return or the start of the tax audit. From 1 January 2016, the penalties are:

- 3% a year for self-assessment via an amended tax return.
- 7% a year for self-assessment within 15 days after notification that a tax audit has been opened (‘self-disclosure’).
- 10% a year for an assessment made by the Tax Office during a tax audit.

The penalties will be levied at a minimum of 1% of the assessed amount and a maximum of 100% of the assessed amount.

An ‘aggregated penalty’ applies for cases of more than one administrative offence.

**Tax audit process**
Generally, the tax authority selects the taxpayers subject to tax audit based on certain criteria that are not communicated to the public.

The taxpayers that utilise state aid in the form of tax relief are subject to specific tax audit in the year of utilisation of the tax relief.

The tax audit has to be finalised within one year.

**Statute of limitations**
A tax may not normally be assessed or additionally assessed more than five years (ten years when DTT treaty was applied, including transactions with foreign-related parties) after the end of the year during which the obligation to file a tax return arose, or during which the taxpayer was obligated to pay the tax. If a tax inspection is undertaken within this five-year period, another five-year period commences from the end of the year in which the taxpayer was notified of this action.
Slovak Republic

If a taxpayer utilises a tax loss, a tax or additional tax cannot be assessed more than seven years after the end of the year in which the obligation to file a tax return in which a taxpayer reported the tax loss arose.

However, tax may be assessed, or additionally assessed, no later than ten years after the end of the year during which the obligation to file a tax return arose, or during which the taxpayer was obligated to pay the tax.

Topics of focus for tax authorities
The tax authorities, within a tax inspection, generally focus on transfer pricing, VAT, limited tax deductibility of special types of costs (e.g. entertainment, promotion costs), and tax incentives.

Other issues

Business combinations
Two alternative tax treatments may be used for business combinations, including in-kind contributions to a company’s share capital, mergers, and demergers.

Under the first alternative, the taxpayer should value assets for tax purposes using their current market values, and the revaluation difference must be reflected in the appropriate company’s tax returns within seven years of the transaction.

Under the second alternative, the taxpayer should continue to use the original tax book values of the assets (carry-over basis), and revaluation difference is not taxable/tax deductible.

When selling a business, the purchaser must include goodwill or negative goodwill, acquired as part of the purchase, in its tax base within seven tax periods.

Adoption of International Financial Reporting Standards (IFRS)
Slovakia has adopted most of the principles of IFRS in its accounting law. However, there are still some differences between IFRS and Slovak accounting standards.

Obligation to prepare statutory financial statements according to IFRS
Financial institutions (banks, insurance companies, etc.) must prepare their statutory financial statements according to IFRS. In addition, a company that fulfils two or more of the following conditions, in two consecutive accounting periods, must prepare its statutory financial statements according to IFRS:

- The total value of assets is more than EUR 170 million.
- Net turnover exceeds EUR 170 million.
- The average number of employees in the individual accounting period exceeds 2,000.

An entity may decide to prepare its financial statements under IFRS if certain conditions are met.

If the Slovak taxpayer is obligated to prepare its financial statements under IFRS, the tax base is derived from either:

- the profit before tax under IFRS, adjusted for tax purposes using the ‘IFRS Tax Bridge’ issued by the Slovak Ministry of Finance, or
- the profit before tax under Slovak statutory accounting standards.

Tax information exchange agreements (TIEAs)
This table highlights countries with which Slovakia has entered into a TIEA.
International agreements

The Slovak/United States (US) Intergovernmental Agreement (IGA) entered into force during 2015. However, financial institutions in the Slovak Republic were allowed to register on the Foreign Account Tax Compliance Act (FATCA) registration website consistent with the treatment of having an IGA in effect even earlier.

FATCA was implemented into Slovak legislation with effect from 1 January 2016.
**Significant developments**

**Corporate income tax (CIT)**

The Tax Procedure Act has been amended to introduce the possibility for taxable entities to conclude an Advanced Pricing Agreement (APA) with the competent authority on the transfer prices set between related entities. Additionally, the possibility is foreseen that APA is concluded cross border with the competent tax authority in a foreign state. The amendments will come into force from 1 January 2017.

In that regard, in the beginning of 2016, Slovenia has also signed the Multilateral Competent Authority Agreement together with 31 countries, which implements country-by-country (CbC) reporting on transfer prices for certain multinational companies.

Furthermore, the Slovene CIT Act has been amended to prevent abuse on the taxation of the hybrid financial mechanism (‘hybrid loans’).

The Slovene government set the CIT rate at 17% for financial year 2016, and future years (most likely).

**Value-added tax (VAT)**

As of the beginning of 2016, Slovenia has implemented an obligation for taxable persons to report cash turnover only through specific electronic cash registers (‘tax cash registers’), providing for traceability of any modifications made and thus enabling a proper audit trail.

Also from the beginning of 2016, the higher VAT rates (changed from 20% to 22% and from 8% to 9.5% in 2013) became permanent in nature, and the change was implemented into the Slovene VAT Act to enhance transparency. Previously, the increase was meant to be temporary in nature as a measure to overcome the financial crisis.

Moreover, the procedure of charging and paying import VAT is simplified. Import VAT will no longer have to be charged based on customs declaration at the time of the import (if certain conditions are met). Instead, taxpayers identified for VAT purposes in Slovenia will be able to reverse charge and pay it through VAT return at the end of the month (as it goes for inter-Community acquisitions). If the conditions for VAT deduction are fulfilled, the taxpayer will be able to claim VAT deduction at the same time. Taxpayers without a permanent establishment (PE) in Slovenia but identified for VAT purposes will have to appoint a tax representative for VAT purposes in order to be able to charge the import VAT according to the amended procedure.

The amendments to the procedure of charging and paying import VAT shall apply (i.e. the provisions will be able to be used) from 1 July 2016 onwards.
**Taxes on corporate income**

Slovenian tax residents are liable to pay CIT on their worldwide income. Slovenian tax non-residents are taxed only on income from sources in Slovenia, including income earned through PEs in Slovenia.

The CIT rate is a flat rate of 17%.

Non-profit taxpayers and charitable organisations, associations, foundations, etc. are exempt from CIT on their non-profit-making activities.

Investment funds, as well as pension funds, pension insurance companies, and venture capital companies, may be taxed at a rate of 0% if certain conditions are met.

**Tonnage tax**

A company may request to be subject to tonnage tax instead of CIT if it meets certain conditions (i.e. it operates in maritime transport in international shipping) and notifies the tax authorities in advance.

The tax base for tonnage tax is the sum of the tax bases for each of an entity’s ships that are included in the tonnage tax regime. The tax base for a particular ship is calculated by multiplying the number of ship operating days by the daily tax base shown in the following table:

<table>
<thead>
<tr>
<th>Net tonnage (NT)</th>
<th>EUR*/day for 100 net tonnes</th>
</tr>
</thead>
<tbody>
<tr>
<td>For the first 1,000 tonnes</td>
<td>0.90</td>
</tr>
<tr>
<td>For the next 1,001 to 10,000 tonnes</td>
<td>0.67</td>
</tr>
<tr>
<td>For the next 10,001 to 25,000 tonnes</td>
<td>0.40</td>
</tr>
<tr>
<td>Above 25,001 tonnes</td>
<td>0.20</td>
</tr>
</tbody>
</table>

* euros

**Local income taxes**

There are no local taxes on income in Slovenia.

---

**Corporate residence**

A legal entity is considered to be a Slovenian tax resident if the entity has its statutory (registered) seat or place of effective management located in Slovenia. These conditions, however, do not exclude a society or any association of persons, including an association under civil or foreign law that does not have legal identity, from also being considered to be a Slovene tax resident.

**Permanent establishment (PE)**

The Slovene definition of a PE is generally in line with the definition set out in the Organisation for Economic Co-operation and Development (OECD) model tax treaty. Thus, it is a place of business in Slovenia in or through which the non-resident’s activities are conducted in whole or in part. The following, in particular, are considered to constitute a PE:

- An office, branch, factory, workshop, mine, quarry, or other place where natural resources are obtained or exploited.
- A building site; construction, assembly, or installation site; or the supervision thereof, if the duration of the activities concerned exceeds 12 months.

A place of business is not considered a non-resident’s PE if the non-resident:
Slovenia

- only uses the premises in question for storage, display, or delivery of goods belonging to oneself
- only maintains inventories of goods belonging to oneself for the purpose of storage, display, or delivery
- only maintains inventories of goods belonging to oneself for the purpose of processing by third parties
- only maintains the place of business in question for the purpose of purchasing goods or collecting information for oneself
- only maintains the place of business for the purpose of engaging in any other preparatory or auxiliary activity for oneself, or
- only maintains the place of business in question for the purpose of any combination of activities referred to above, provided that the overall activity of the fixed place of business resulting from this combination is of a preparatory or auxiliary character.

Other taxes

Value-added tax (VAT)
A basic VAT rate of 22% applies to all taxable supplies.

A lower VAT rate of 9.5% generally applies to foodstuffs, live animals, seeds, plants, water supplies, medicines, medical equipment, transport of passengers, books, admission fees, royalties for writers and performers, certain works of art, certain residential properties, hotel accommodation, use of sport facilities, burial and cremation services, public hygiene services, minor repairs of bicycles, shoes and clothing, domestic care services, and hairdressing services.

Exempt supplies without credit entitlement include financial and insurance/reinsurance services, rent and lease of immovable goods (with exceptions), tax and court stamps, lottery services, trade of land, health and social services, etc. There are also other VAT-exempt transactions without a credit entitlement as well as exempt taxable supplies with a credit entitlement.

VAT grouping is not possible within Slovenia.

The threshold for VAT registration is EUR 50,000.

Customs duties
Goods imported from non-European Union (EU) countries are subject to import customs clearance, and goods being exported from the EU customs territory must be declared for export customs clearance. The person responsible for paying the customs debt is the declarant. The declarant is the person making the customs declaration in its own name or the person in whose name the customs declaration is made. The customs declaration should be made in the prescribed form and manner (in writing or by another action specified by law). Import or export duties are customs duties and other charges payable on the import or export of goods (excise duties, environmental tax, and motor vehicle tax).

For purposes of communication with the customs offices, each person has to be identified by an Economic Operator Registration and Identification (EORI) Number, which is registered by the customs authorities on request. EORI registration is mandatory for customs clearance.

As of the beginning of 2016, import VAT will no longer have to be charged based on customs declaration at the time of the import, instead taxpayers will be able to pay it through the VAT return at the end of the month (if certain conditions are met). Accordingly, the importers will not be forced to finance their import VAT anymore, as they will be able to account for it and deduct it in the same VAT return.
Excise tax
Excise tax is charged on the release into free tax circulation or import of tobacco products, alcohol and alcoholic drinks, fuel and mineral oils, and electricity. The table below presents the valid rates of excise tax.

<table>
<thead>
<tr>
<th>Product</th>
<th>Excise tax rate</th>
</tr>
</thead>
<tbody>
<tr>
<td>Cigarettes</td>
<td>From EUR 68.8238 per 1,000 pieces; in case the retail price of a pack of 20 cigarettes amounts to less than EUR 3.51, the excise tax is EUR 106 per 1,000 pieces</td>
</tr>
<tr>
<td>Beer</td>
<td>EUR 12.10 per 1 vol. % alcohol in 1 hl</td>
</tr>
<tr>
<td>Alcohol drinks (except wine)</td>
<td>EUR 132 per 1 hl</td>
</tr>
<tr>
<td>Ethyl alcohol</td>
<td>EUR 1,320 per 100 vol. % alcohol in 1 hl</td>
</tr>
<tr>
<td>Unleaded petrol</td>
<td>EUR 503.80 per 1,000 l</td>
</tr>
<tr>

<td>EUR 0.0184 per m³ for heating purposes and EUR 0.092 per m³ for propelling purposes</td>
</tr>
<tr>
<td>Heating oil</td>
<td>EUR 20.8646 per 1,000 kg</td>
</tr>
<tr>
<td>Electricity</td>
<td>EUR 3.05 per 1 MWh</td>
</tr>
</tbody>
</table>

Property tax
Currently, there is no specific tax levied on immovable property in Slovenia. However, charge for the use of building land is levied on vacant and constructed building land in possession of legal persons and individuals. Charge is set by local communities for vacant building land based on the area of the building land planned for building, and for constructed building land based on the useful area of the residential house or business premises thereon.

Real estate transfer tax
Real estate transfer tax of 2% is charged on real estate transfers and financial leases of real estate, unless VAT has been charged on the transaction.

Stamp tax
There is no stamp duty in Slovenia.

Financial services tax
Slovenia levies tax on financial services provided by banks and other financial institutions. The tax rate is 8.5% and is applied to the fee of the financial service.

Environmental tax
Environmental tax is charged on carbon dioxide (CO2) emissions, waste disposal, lubricating oils and fluids, used tyres, and used motor vehicles.

Motor vehicle tax
Motor vehicle tax applies to all vehicles that are registered for the first time in Slovenia. The taxpayer is the entity that imports the vehicle from EU or non-EU countries. The tax rate depends on fuel range, engine power, and emission of CO2 and ranges from 0.5% to 31%.

In addition to the motor vehicle tax described above, the government imposes an additional tax on motor vehicles with engine displacement above 2,500 ccm that ranges from 0% to 16%, depending on the engine size.

Water vessel tax
The existing water vessel tax is imposed on:

- vessels exceeding five metres in length that are entered in vessel registers, with the exception of vessels under construction
Slovenia

- vessels exceeding five metres in length whose owners are residents of the Republic of Slovenia and that comply with the technical conditions required for entry into the vessel registers referred to in the first bullet but have not yet been entered into these registers, and
- vessels exceeding five metres in length whose owners are residents of the Republic of Slovenia and that comply with the technical conditions required for entry into the vessel registers referred to in the first bullet but have not been entered into these registers because they are registered abroad.

In addition to the water vessel tax described above, the government levies an additional tax on water vessels, depending on the length of the vessel:

<table>
<thead>
<tr>
<th>Class of vessel length (in metres)</th>
<th>General part of tax liability (in EUR)</th>
<th>The liability per metre of length (in EUR)</th>
<th>The liability per kilowatt propulsion power (in EUR)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Above 5 to 8</td>
<td>2.00</td>
<td>0.50</td>
<td>0.10</td>
</tr>
<tr>
<td>8 to 12</td>
<td>10.00</td>
<td>2.00</td>
<td>1.00</td>
</tr>
<tr>
<td>12</td>
<td>20.00</td>
<td>3.50</td>
<td>2.00</td>
</tr>
</tbody>
</table>

The tax liability decreases by 5% per each year of age of the vessel. The tax cannot, however, be lower than 50% of the tax liability calculated for a new vessel.

**Insurance premium tax**

Insurance premium tax is levied on insurance premiums at the rate of 8.5% and paid by insurance companies, unless the insurance lasts for at least ten years.

**Payroll taxes**

There are no payroll taxes other than social security contributions and withholding of personal income tax in Slovenia. The tax tables applicable to individuals are provided in the Taxes on personal income section of Slovenia’s Individual tax summary at www.pwc.com/taxsummaries.

**Social security contributions**

Both employer and employee must make social security contributions. Contributions are withheld by the Slovene employer at the payment of income. The basis for calculation of the social security contributions is the gross amount of income. The types of contributions are as follows:

<table>
<thead>
<tr>
<th>Type of contribution</th>
<th>Employee (%)</th>
<th>Employer (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Pension insurance</td>
<td>15.50</td>
<td>8.85</td>

<td>0.10</td>
<td>0.10</td>
</tr>
<tr>
<td>Totals</td>
<td>22.10</td>
<td>16.10</td>
</tr>
</tbody>
</table>

**Branch income**

If a branch meets the conditions, as set out in the tax legislation and relevant double tax treaty (DTT), to be treated as a PE, then it will be liable to pay tax in Slovenia on profits that are attributable to the PE.

The profit that is attributed to a PE is determined broadly in line with OECD principles. Generally, the attributable profit is the profit that would be expected to be earned by the
PE if it were an independent taxpayer performing the same or similar activities and/or business.

A branch whose activities do not create a PE is not subject to CIT in Slovenia.

**Income determination**

Taxable profits are assessed in accordance with Slovenian Accounting Standards 2006 or International Financial Reporting Standards (IFRS) and modified for certain revenues and certain expenses, which are partly or wholly tax non-deductible.

**Inventory valuation**

Slovenian law allows the application of all the most commonly used inventory valuation methods, including the first in first out (FIFO), weighted average cost, and floating average prices methods.

**Capital gains**

Under certain circumstances, the gains made by a Slovenian taxpayer on the disposal of an equity shareholding are effectively 47.5% exempt from taxation. Similarly, 50% of a loss arising on the disposal of such a shareholding would not be deductible for CIT. This treatment applies to the disposal of shareholdings of at least 8% that have been held for at least six months and where the taxpayer disposing of the holding employed at least one person during the six-month holding period.

The above treatment is not available for the disposal of a shareholding of a company that is resident in a country that:

- is outside the European Union
- has a corporate tax rate less than 12.5%, and
- is included in a list published by the Ministry of Finance.

**Dividend income**

Dividends and similar income received by a Slovenian taxpayer are generally 95% exempt from taxation as long as the distributor was subject to Slovenian CIT or to a comparable profits tax. The exceptions to this are where dividends represent untaxed reserves of the distributor or where the distributor is tax resident in a country that:

- is outside the European Union
- has a corporate tax rate less than 12.5%, and
- is included in a list published by the Ministry of Finance.

**Interest income**

Interest and similar income received by a Slovenian taxpayer is included in the taxable base and can be reduced in the amount of a tax liability paid abroad. Interest between related parties needs to be calculated in accordance with the arm’s-length principle.

**Foreign income**

Foreign income, except dividends, received by a Slovenian entity from foreign sources is included in taxable income for CIT purposes in the same tax year as it arises unless the applicable DTT provides for an exemption.

**Deductions**

In general, business expenses that are necessary to generate taxable revenues are fully tax deductible.
**Depreciation and amortisation**

Depreciation of tangible fixed assets, amortisation of intangible assets, and depreciation of investment property are recognised as expenditures in line with the accounting treatment, up to a maximum of the amount calculated using the straight-line depreciation method and the maximum tax depreciation rates listed below. Any accounting depreciation in excess of these rates is not tax deductible in the period concerned, but may be deductible in subsequent tax periods until the asset is fully depreciated or disposed of.

The maximum annual depreciation rates are as follows:

<table>
<thead>
<tr>
<th>Depreciation category</th>
<th>Types of assets</th>
<th>Annual depreciation rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Buildings, including investment property</td>
<td>3</td>
</tr>
<tr>
<td>2</td>
<td>Parts of buildings, including investment property</td>
<td>6</td>
</tr>
<tr>
<td>3</td>
<td>Equipment, vehicles, and machinery</td>
<td>20</td>
</tr>
<tr>
<td>4</td>
<td>Parts of equipment, and equipment for research activities</td>
<td>33.3</td>
</tr>
<tr>
<td>5</td>
<td>Computer equipment, hardware, and software</td>
<td>50</td>
</tr>
<tr>
<td>6</td>
<td>Crops lasting several years</td>
<td>10</td>
</tr>
<tr>
<td>7</td>
<td>Breeding animals</td>
<td>20</td>
</tr>
<tr>
<td>8</td>
<td>Other fixed assets</td>
<td>10</td>
</tr>
</tbody>
</table>

**Goodwill**

In general, if goodwill is impaired for accounting purposes, then the impairment cost may be treated as tax deductible. The amount that may be treated as tax deductible in any one tax period is limited to 20% of the initial value of the goodwill.

**Start-up expenses**

In accordance with Slovene legislation, costs that occur prior to the entry of a legal entity into court register may not be treated as tax deductible. Such a principle arises from a common legal principle whereby an entity may be subject to rights and obligations only after its establishment date. The date of entry into the court register is deemed to be the date of the establishment.

**Related-party interest**

Companies may deduct interest expense on loans from their owners or other associated parties up to a maximum of the amount calculated by using the prescribed interest rate published by the Ministry of Finance. Taxpayers must increase taxable profits by the amount of any excess interest expense, unless they can prove that they could have received the loan on comparable terms from an unrelated party.

**Provisions**

Certain provisions are only 50% tax deductible when accrued, with the remaining 50% being treated as tax deductible when the provision is utilised. The provisions that are subject to this treatment are provisions for warranties granted when selling products or providing services, reorganisations/redundancies, anticipated losses from onerous contracts, pensions, long-service bonuses, and severance payments on retirement.

**Bad debt**

Bad debt provisions are only tax deductible if the amount does not exceed the lower of:

- the arithmetic mean of the bad debts written-off in the past three tax periods, under certain conditions specified in the tax law, and
- the amount corresponding to 1% of taxable revenues of the tax period.

In order to take advantage of this deduction, a company must be able to calculate amounts for both tests and then take the lower of the two amounts so calculated. If the company is
not able to determine the amount for either, the cost of the bad debt provision is not tax deductible until the provision is utilised.

Costs of bad debts are tax deductible when the debt is finally written-off, provided there is a finalised court procedure, the creditor can demonstrate that it would cost more to pursue the debtor than the debt is worth, or the creditor can demonstrate that it has done everything required by good business practice to try to recover the debt.

**Charitable contributions**
A taxpayer may claim a reduction of its taxable profits for donations made for humanitarian, disabled, charitable, scientific, educational, medical, sports, cultural, ecological, and religious purposes to residents of Slovenia or of EU or European Economic Area (EEA) member states, up to 0.3% of the taxable person’s taxable revenues. An additional allowance of 0.2% of the taxpayers’ taxable revenues is available for payments made for cultural purposes and to voluntary organisations that work for the public interest to protect the public from natural and other disasters.

A taxpayer may decrease its taxable base for payments made to political parties and representative trade unions, up to an amount equal to three times the average monthly salary per employee of the taxpayer.

**Compensation**
Salaries and other payments relating to employment (e.g. wage compensation, holiday allowances, employer’s social security contributions, long-service awards, severance benefits paid upon retirement, solidarity assistance, and reimbursement of business related expenses) are generally fully tax deductible.

The costs of benefits in kind are also tax deductible if such benefits are taxed for the individual under the Personal Income Tax Act.

**Pension allowances**
Under certain conditions, a tax-deductible allowance for voluntary supplementary pension insurance may apply, of up to 24% of compulsory contributions for pension and disability insurance for insured employees, but may not exceed EUR 2,390 annually per employee.

**Fines and penalties**
Costs relating to compulsory collection of taxes and other levies are, in accordance with Slovene legislation, not tax deductible.

**Taxes**
Taxes paid by a shareholder as a natural person and VAT that was not deducted as an input VAT, even though there was a right to deduct, are not tax deductible. In addition, interests on late payment of taxes are not tax deductible.

**Other significant items**
The following expenses are considered unnecessary for the generation of taxable revenues and are not deductible for tax purposes:

- Expenses that are not directly necessary for performing business activities or are not incurred as a consequence of a business activity.
- Expenses of a private character.
- Expenses that do not correspond to standard business practice.

Some of the most common non-deductible expenses include:

- Penalties and the cost of bribes.
- Input VAT that could have been reclaimed in accordance with the VAT Act.
Slovenia

- Entertainment costs, which are only 50% tax deductible.
- Costs relating to the supervisory board, which are only 50% tax deductible.
- Legal and other costs of incorporation, which may be deductible for the parent company but not for the entity being incorporated.

**Net operating losses**
The use of retained tax losses is limited to a maximum of 50% of the actual tax base. Despite this limitation, tax losses may still be carried forward to subsequent years without a limitation, but loss carrybacks are not permitted. Loss relief may not exceed the amount of current taxable income. Generally, losses that are generated in multiple tax years are absorbed chronologically. The right to carry losses forward may be forfeited if the ownership of the capital or voting power of the taxpayer claiming the loss carryforward changes by more than 50% within the tax period and the taxpayer either has not performed business activities for two years prior to the change of ownership or substantially changes its business activity two years prior to or after the change in ownership.

Treatment of tax losses mentioned in the preceding paragraph does not apply for those losses that are generated in the year of the change of ownership or prior tax periods.

**Payment to foreign affiliates**
Payments to foreign affiliates are normally subject to withholding tax (WHT) if there is no right to apply exemptions in accordance with Slovenian legislation or DTT. Payments similar to dividends, including disguised distribution of profit, are not tax deductible. Any other payments to foreign affiliates are tax deductible if they are made in accordance with the arm’s-length principle.

**Group taxation**
Group tax returns were abolished with the introduction of the CIT Act on 1 January 2007.

**Transfer pricing**
Prices between a Slovenian entity and its related parties must be set, for tax purposes, at fair market value using the arm’s-length principle. Broadly speaking, taxpayers are related by direct, indirect, or common shareholdings of over 25%; through a participation in management; or by control through other means, including through contractual terms.

For transactions between two related Slovenian tax residents, provided neither is in an ‘advantaged’ position (advantaged usually means having unutilised tax losses), there is no actual requirement for the companies to adjust their tax returns to reflect an arm’s-length price.

Taxable persons must prepare transfer pricing documentation. The Slovenian rules regarding such documentation follow the EU Code of Conduct on transfer pricing documentation for associated enterprises in the EU (EU TPD).

**Thin capitalisation**
Interest payments on loans granted, or guaranteed, by a related party (a party that directly or indirectly owns at least 25% of the shares or voting rights in the taxpayer) are not tax deductible to the extent that the loan amount exceeds the thin capitalisation threshold specified in law. This does not apply to loan recipients who are banks or insurance companies.

Sister entities (i.e. entities with the same owner) also fall under the definition of the above-described rules.
Generally speaking, the thin capitalisation threshold is exceeded if the debt-to-equity ratio exceeds 4:1.

**Controlled foreign companies (CFCs)**
There are no specific provisions in Slovenia regarding CFCs; however, there are general anti-abuse provisions in place.

---

**Tax credits and incentives**

**Foreign tax credit**
Tax paid abroad can be credited against tax liability in Slovenia. The amount of tax that can be credited is the amount of final and actually paid tax. If there is a DTT made between countries in question, the amount of tax that can be credited is the amount calculated at the rate determined in the DTT. A taxpayer needs to provide proof of the amount of foreign tax, the basis for calculation of the tax, and the amount of the tax paid.

**Investment allowances**
A tax allowance for investment in equipment and intangible assets is available for investments made after 1 January 2008. The tax allowance is limited to 40% of the value of the assets (also intangibles) invested into.

**Research and development (R&D) allowances**
A 100% investment allowance is granted for investments in R&D within the tax period, regardless of the location of establishment of the company within Slovenia. Such an investment tax allowance may be obtained for expenditures on:

- internal R&D activities within the company and
- the purchase of R&D equipment from related or unrelated parties or from a private research institution.

**Allowances for employing certain individuals**
A taxpayer that employs trainees or students to undertake practical work may reduce its taxable profits by an additional 20% of the average monthly payment paid to such persons, for every month the person carries out the work.

A taxpayer that employs disabled persons may decrease its taxable profits by an additional 50% of the salary paid to such persons (in addition to the deduction for their actual salary cost). A taxpayer that employs a severely disabled person or a person with a combination of total hearing loss and speech impairment may reduce its taxable base by an additional 70% of the salary paid to such a person (in addition to the deduction for their actual salary cost).

**Tax relief for investments in the Pomurje region**
Entities based in the Pomurje region of Slovenia may claim additional employment incentives and additional tax relief for investments. These extra benefits are available from 2010 to 2017. As a result, provided certain conditions are met, entities with their seat in Pomurje are entitled to a 70% tax allowance for investments in equipment and intangible assets as well as to certain employment allowances.

**Tax relief for employment of hard-to-place workers**
A taxpayer who employs a hard-to-place worker may be able to benefit from a tax allowance for both CIT and tax on activity. A hard-to-place worker is a person younger than 26 or older than 55 who has been registered as unemployed for at least six months and who has not been employed by the taxpayer or a related party in the past 24 months. The tax allowance equates to 45% of the salary paid to the person during the first 24 months of their employment, up to the amount of the tax base.
Slovenia

As of the beginning of 2016 and until the end of 2017, an additional tax relief is available for taxpayers employing a person older than 55 who has been registered as unemployed for at least six months prior to employment. A taxpayer will be exempt from paying all compulsory social security contributions (16.10%) for the first two years after employing such a person in case the employment contract is concluded during the above mentioned period.

**Withholding taxes**

In Slovenia, tax must be calculated and withheld on the payments made by residents and non-residents on Slovenian-sourced income to recipients outside Slovenia.

Payments to which the WHT rules apply include payments for dividends, interest, copyrights, patents, licences, leases on real estate situated in Slovenia, services of performing artists, and services charged from low-tax jurisdictions.

The WHT rate is 15%.

If a DTT exists, the WHT rate may be reduced in line with the provisions of the treaty. Similarly for payments of interest, royalties, and dividends within Europe, the Interest and Royalties Directive and the Parent Subsidiary Directive, respectively, may also reduce this WHT rate to zero.

Furthermore, WHT is not deducted on dividends paid to a parent company in another EU member state if those dividends are subject to an exemption from tax in the hands of the recipient, provided certain conditions are met.

Subject to certain conditions, tax is not required to be withheld on interest on non-exchangeable debt securities issued outside Slovenia by a Slovenian tax resident corporation through a public placement on an international clearing system (i.e. Euroclear).

WHT is applicable only for explicitly determined types of services (i.e. consulting, marketing, staffing, administration, information, and legal services), provided they were made to countries with an average CIT rate not exceeding 12.5%, where such a country was also stated on a separate list published by the Ministry of Finance.

Notes

1. Under certain treaties, the WHT rate depends on whether, and to what extent, the recipient participates in the capital of the distributor. Generally, if the recipient holds a participation of more than 25% in...
Slovenia

the distributing company, the dividends are subject to a lower 5% WHT rate. The higher WHT rate is, however, normally due when the participation is less than 25%.

2. Some DTTs include specific provisions whereby interest payments are subject to a 0% WHT rate if certain conditions are met.

3. The rates shown apply from 1 January 2011, when the most recent treaty with Italy came into effect.

4. Ratified international treaties that are not yet in force and are not used in Slovenia.

5. 5% rate if the beneficial owner is a company (other than a partnership) that directly holds at least 10% of the capital of the company paying the dividend; 10% rate if the beneficial owner is a company that directly holds at least 10% of the capital of the company paying the dividends and the dividends are paid out of profits which by virtue of the law of the state in which the payer is a resident are exempt from company tax or subject to company tax at a rate that is lower than the normal rate in that state; 15% rate applicable in all other cases.

6. 5% rate applicable to the gross amount of: (i) royalties paid for the use of, or the right to use, any copyright of literary, artistic, or scientific work (but not including cinematograph films) and (ii) royalties paid for the use of, or the right to use, industrial, commercial, or scientific equipment, 10% rate applicable in all other cases.

7. 5% rate applicable to royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematograph films or films or tapes used for radio or television broadcasting; 10% rate applicable to royalties for the use of, or the right to use, any patent, trademark, design or model, plan, secret formula or process, or for the use of, or the right to use, industrial, commercial, or scientific equipment, or for information concerning industrial, commercial, or scientific experience.

8. 10% rate applicable to royalties for the use of, or the right to use, any copyright of literary or artistic work including motion pictures, live broadcasting, film, tape, or other means of the use or reproduction in connection with radio and television broadcasting, and for the use of, or the right to use industrial, commercial, or scientific equipment; 15% rate applicable to royalties in all other cases.

9. 5% rate applicable to copyright, as defined by the Copyright and Related Rights Act; 10% rate applicable to other property rights.

10. 10% rate applicable to the gross amount of interest if received by a financial institution (including an insurance company); 15% rate applicable to the gross amount of interest in all other situations.

---

**Tax administration**

**Taxable period**
The tax period should be the calendar year. However, a tax period may differ from the calendar year but may not exceed a period of 12 months. In this case, the tax authorities must be informed about the chosen tax period, and the taxable entity will not be allowed to change its tax period for the following three years.

**Tax returns**
A tax return must be submitted to the tax authorities by the end of the third month following the end of the tax year.

**Payment of tax**
CIT is paid in advance in monthly instalments (if the amount of prepayment exceeds EUR 400 per month) or in quarterly instalments (if the amount of prepayment is less than EUR 400 per month) determined on the basis of the previous year’s assessment.

The final CIT payment must be made within 30 days of the tax return submission.

**Tax audit process**
Slovene legislation does not define an audit cycle. However, we understand that the Slovene tax administration has its own criteria for how to determine audit targets, which is in accordance with their annual tax plan.

**Statute of limitations**
Under Slovene legislation, a tax inspection may be initiated within five years from the date when a tax return was due for submission to the tax authorities. However, the five year period runs following each interrupting act (generally, certain actions by the Tax Office or the taxpayer within the tax period may be considered as interrupting acts), but may not surpass a maximum of ten years counting from the date when the tax return is due. A concluded tax inspection will foreclose any further tax authorities’ inspection only for the period and the items that were subject of the concluded tax inspection. Any issue not examined remains open for a future tax inspection. The right of the tax authorities to
assess and collect tax permanently expires after ten years counted from the date when the tax return is due.

**Topics of focus for tax authorities**
Recently, we have noticed that tax authorities focus on appropriateness of transfer pricing for multinational companies.

**Fiscal verification of invoices**
The Act on Fiscal Verification of Invoices introduces new certified cash registers for cash transactions as of 2 January 2016. According to this new regulation, all legal and natural persons that perform cash transactions and are obligated to keep books and records must now use certified tax registers. No exceptions are envisaged, so electronic confirmation of invoices applies to anyone that is obligated to use receipts in accordance with the VAT Act. Certified cash registers will be connected to the central information system of the financial authority via the internet, so processed invoices will be verified and saved in real time.

**Other issues**

**State aid**
Slovene law does not regulate state aid specifically, but as the EU Treaty, relevant EU Regulations and Directives, and EU Court case law are of direct application in Slovenia, Slovene courts follow the same policy as reflected in the noted documents and case law. Thus, state aid in Slovenia is defined as an advantage in any form whatsoever conferred on a selective basis to undertakings by national public authorities and causing distortion of the competition.

**Base erosion and profit shifting (BEPS)**
The transfer pricing landscape of Slovenia remains relatively unchanged, but is nonetheless dependent on the updated or added guidance published by the OECD as a result of the BEPS action plan. It can be anticipated that the changes due to the BEPS project will also have an appropriate impact on the transfer pricing environment, legislation, and practices in Slovenia.

**United States (US) Foreign Account Tax Compliance Act (FATCA)**
On 2 June 2014, the Republic of Slovenia concluded an Agreement to Improve International Tax Compliance and to implement FATCA (the Agreement) with the United States that entered into force on 1 July 2014, which further defines the obligations of Slovenian financial institutions and the Financial Administration of the Republic of Slovenia related to FATCA implementation. The Agreement supplements the existing rules on cooperation between the Republic of Slovenia and the United States in the field of avoidance of double taxation and exchange of information and will contribute to the reduction of administrative burden to Slovenian financial institutions.

The conclusion of the Agreement, which is based on the Model 1 Intergovernmental Agreement (IGA), ensures the implementation of FATCA provisions on the basis of reporting and exchange of information in accordance with the convention for the avoidance of double taxation and the prevention of fiscal evasion with respect to taxes on income and capital. According to the Agreement, Slovenian financial institutions are required to report information as determined in the Agreement to the Financial Administration of the Republic of Slovenia, which reports the information to the US Internal Revenue Service (IRS). Reciprocally, Slovenia is receiving information from the US IRS about the funds of Slovenian taxpayers in the United States.
 Significant developments

After the switch from the source-based taxation to the worldwide taxation of South African (SA) residents in 2000, and the introduction of capital gains tax in 2001, the SA tax system has not undergone fundamental changes. Smaller reforms, however, are ongoing. The most significant recent changes are:

- Amendments extending prescription periods in certain circumstances.
- Withdrawal of a foreign tax rebate (s6quin) in respect of SA-source services income and a slight extension of the deduction rule (s6quat) as partial compensation.
- The proposed introduction of a 15% withholding tax (WHT) on cross-border service fees has been withdrawn.
- The inclusion rate for capital gain tax for companies has increased from 66.6% to 80%, raising the effective capital gain tax rate from 18.6% to 22.4%, for years of assessment beginning on or after 1 March 2016.

 Taxes on corporate income

An SA-resident company is subject to corporate income tax (CIT) on its worldwide income, irrespective of source. Non-residents are taxable on SA-source income.

In South Africa, the CIT rate applicable for corporate income of both resident and non-resident companies for tax years ending between 1 April 2016 and 31 March 2017 is a flat 28%.

Close corporations, which are essentially a simplified form of company, are taxed at the same rate as companies and are subject to the same taxation rules.

Small business corporations (i.e. companies with only natural persons as members/owners and with gross income of not more than 20 million South African rand [ZAR]) are taxed at 0% on the first ZAR 75,000 of taxable income earned, 7% on the amount above ZAR 75,000 but not exceeding ZAR 365,000, 21% on the amount above ZAR 365,000 but not exceeding ZAR 550,000, and 28% on the amount exceeding ZAR 550,000.

Special CIT rates apply in certain industries, such as mining and long-term insurance (see below).

 Alternative turnover-based tax for very small companies

To reduce the compliance costs for very small companies, a turnover-based presumptive tax is available. Companies with a turnover of less than ZAR 1 million per year can elect to pay this tax instead of normal CIT, at a rate ranging from 0% to 3%, depending on the turnover.
Dividends tax
Dividends tax is imposed at 15% on dividends declared and paid by resident companies and by non-resident companies in respect of shares listed on the Johannesburg Stock Exchange (JSE) paid to SA residents.

Dividends are tax exempt if the beneficial owner of the dividend is an SA resident company, SA retirement fund, or other prescribed exempt person.

The tax is to be withheld by companies paying the taxable dividends or by regulated intermediaries in the case of dividends paid through a regulated intermediary. In the case of in specie dividends, the company declaring the in specie dividend is liable for the dividends tax and not the beneficial owner of the dividends.

Exemptions from dividends tax and treaty-imposed reduced rates only apply if the beneficial owner of the dividend has made the required declaration to the paying company or regulated intermediary.

CIT for mining companies
Special rates of normal tax, based on a standard formula, are laid down for companies mining for gold. Companies mining for other minerals are subjected to the same 28% rate of normal tax applying to ordinary companies.

CIT for long-term insurance companies
Life insurance companies are obligated to follow the ‘four-funds approach’, with policies divided into four funds, depending on the nature of the beneficiary. Each fund is then allocated assets according to the risk carried by the fund. Funds are treated as separate taxpayers and taxed at four separate rates. These rates are 30% for individual policyholder funds, 0% for untaxed policyholder funds, 28% for company policyholder funds, and 28% for corporate funds (the company itself).

With effect from January 2016, a fifth fund was introduced, the Risk Policy Fund, to cater for changes to the taxation of the risk business of long-term insurance companies. The Risk Policy Fund is also taxed at a rate of 28%.

Local income taxes
No local government taxes on income apply to either SA-resident or non-resident companies.

Corporate residence
A company is resident in South Africa if it is incorporated, established, or formed in South Africa or has its place of effective management in South Africa. However, a company that is deemed to be exclusively resident in another country in terms of a double taxation agreement (DTA) is excluded from SA residency.

In terms of a recent Interpretation Note issued by the South African Revenue Service (SARS), the place of effective management is regarded as the place where key management and commercial decisions that are necessary for the conduct of its business as a whole are, in substance, made. This approach is consistent with internationally accepted principles.

Permanent establishment (PE)
South Africa does not, as a general rule, tax non-residents on the basis of having a PE in South Africa. Rather, non-residents are subject to income tax in South Africa on income derived from a South African source. The primary exception to this rule is in relation to capital gains, where non-residents are subject to tax on assets attributable to a PE in...
South Africa

South Africa. A PE is defined by reference to the definition thereof in the Organisation for Economic Co-operation and Development (OECD) Model Tax Convention.

Other taxes

Value-added tax (VAT)
VAT is an indirect tax that is largely directed at the domestic consumption of goods and services and at goods imported into South Africa. The tax is designed to be paid mainly by the ultimate consumer or purchaser in South Africa. It is levied at two rates, namely a standard 14% rate and a zero rate (0%).

Very few business transactions carried out in South Africa are not subject to VAT. The tax is collected by businesses that are registered as vendors with the SARS on all taxable supplies throughout the production and distribution chain. Sales or supplies by non-vendors are not subject to VAT.

VAT registration and administration
All suppliers of goods and services having an annual turnover exceeding ZAR 1 million are obligated to register as VAT vendors and to charge output VAT. Other vendors may elect to register as VAT vendors, provided their annual turnover exceeds ZAR 50,000. Two exceptions apply. Firstly, non-resident suppliers of electronic services are obligated to register after aggregate supplies of ZAR 50,000 have been made. Secondly, persons likely to make taxable supplies only after a period of time may register if the activities are of a nature set out in regulations. If they do not register, they are prohibited from charging VAT on goods or services they supply and claiming an input tax (rebate of VAT paid) on goods and services that they acquire.

Under the VAT system, vendors normally pay VAT on expenses (input tax) and charge VAT on supplies made (output tax). This mechanism, therefore, ensures that only the so-called ‘added-value’ is taxed. Due to VAT being a self-assessment system, the output tax collected may be reduced by input tax paid. Thereafter, the net amount is payable to, or refundable by, the SARS. The self-assessment returns are due regularly within prescribed periods (tax periods).

Taxable supplies
Standard rated and zero-rated supplies are known as taxable supplies. Other supplies are known as exempt and non-supplies.

Goods and services
For a liability for VAT to exist, there must be a supply or importation of goods or services. Goods are corporeal movable things, fixed property, and real rights in such things and property. The meaning of ‘services’ is very broad and includes the granting, assignment, cession, or surrender of any right or the making available of any facility or advantage.

Electronic services
Non-resident suppliers of electronic services are compelled to register for VAT on the payments basis and account for VAT on supplies of electronic services to SA residents.

Imports
Services imported by a vendor and utilised or consumed by the vendor for the making of taxable supplies are not subject to VAT. In addition, the VAT Act has a schedule that lists goods that are exempt from VAT on importation, whether by a vendor or an unregistered person.

Zero-rated supplies
The VAT Act contains a list of the supplies of goods or services that are taxed at the zero rate. Most of the items refer to exports and international transport, but other specified
goods utilised for farming purposes, the sale of an enterprise as a going concern, certain basic foodstuffs, fuel subject to the fuel levy, and deemed supplies by welfare organisations are also zero-rated.

A zero-rated supply made by a vendor is subject to VAT but at a rate of 0%. Under a zero-rated supply, a vendor does not charge VAT on the consideration for the supply and obtains a refund or credit for the VAT paid on taxable supplies utilised in the making of the zero-rated supplies.

**Exempt supplies**
In addition to zero-rated supplies, the VAT Act contains a list of the supplies of goods or services that are exempt from VAT. While all fee-based financial services are subject to VAT, the charging of interest is exempt. Other exempt supplies include residential rentals, non-international passenger transport by road or rail, and educational services.

Under exempt supplies by vendors, the vendors do not charge VAT on the supply, and they are not entitled to a deduction or credit for the VAT paid by them on goods and services supplied to them for the making of the exempt supply. Accordingly, vendors treat the VAT paid by them, and for which they do not obtain a deduction or credit, as another cost and recover it in the consideration they charge for the making of the exempt supply.

**Customs duties**
Customs duties are charged on importation of goods into South Africa at rates ranging between 3% and 45%. The import duties may also include anti-dumping and countervailing duties of up to 150%. No customs duties are charged on trade between South Africa and Botswana, Lesotho, Namibia, and Swaziland, as these five countries constitute the Southern African Customs Union.

**Excise duties**
Excise duty is levied on certain locally manufactured goods as well as their imported equivalents. A specific duty at a pre-determined amount is levied on tobacco and liquor, and an *ad valorem* duty (calculated as a percentage of price) on certain luxury goods and automobiles. Relief from excise duty is available for exported products and for certain products produced in the course of specified farming, forestry, and (limited) manufacturing activities.

**Property taxes**
Local municipalities levy rates on land. These rates are based on a percentage of the municipal valuation of land and improvements and vary from municipality to municipality. Generally, a higher rate is levied on properties zoned for business use.

**Transfer duty**
Transfer duty levied on the sale of immovable property is payable by the person acquiring the property within six months from the date of acquisition at the following rates:

<table>
<thead>
<tr>
<th>Purchase price (ZAR)</th>
<th>Transfer duty rate</th>
</tr>
</thead>
<tbody>
<tr>
<td>Not exceeding 750,000</td>
<td>0%</td>
</tr>
<tr>
<td>750,001 to 1,250,000</td>
<td>3% on value above 750,000</td>
</tr>
<tr>
<td>1,250,001 to 1,750,000</td>
<td>15,000 plus 6% on value above 1,250,000</td>
</tr>
<tr>
<td>1,750,001 to 2,250,000</td>
<td>45,000 plus 8% on value above 1,750,000</td>
</tr>
<tr>
<td>2,250,001 to 10,000,000</td>
<td>85,000 plus 11% on value above 2,250,000</td>
</tr>
<tr>
<td>Exceeding 10,000,000</td>
<td>937,500 plus 13% on value above 10,000,000</td>
</tr>
</tbody>
</table>

Transfers of immovable property subject to VAT are exempt from transfer duty.
**Securities transfer tax (STT)**
STT is levied at a rate of 0.25% of the taxable amount in respect of the transfer of a security. The taxable amount is usually the consideration for which the security is purchased or the market value of the security if the consideration declared is less than the market value or if no consideration was paid. STT is payable by the company that issued the securities in question. However, the company can recover the tax from the person acquiring the shares. Slightly different rules apply in the case of listed securities.

**Payroll taxes**
Employers are liable to withhold pay-as-you-earn (PAYE) on behalf of their employees. PAYE is payable to SARS on a monthly basis, calculated on the remuneration paid to an employee. The rates vary depending on the employee’s remuneration.

**Skills Development Levy (SDL)**
SDL is a compulsory levy to fund education and training. It is payable by an employer and cannot be deducted from the remuneration payable to an employee. Small employers with an annual payroll of less than ZAR 500,000 are exempt from the levy. SDL is levied at the rate of 1% of payroll. It is payable monthly, together with income tax that the employer has withheld on its employees’ salaries.

**Unemployment Insurance Fund (UIF) contributions**
Employers are required to contribute on behalf of their employees on a personalised basis to the UIF. The rate of contributions is 1% of gross remuneration payable to an employee; however, the monthly cap of ZAR 148.72 applies. Another 1%, subject to the same cap, is payable by the employee and withheld by the employer.

**Compensation for Occupational Injuries and Diseases Act (COIDA) fund**
Employers are liable for making annual contributions to the COIDA fund. COIDA contributions are a payroll cost that cannot be deducted from the employee’s salary, with a maximum salary cap of ZAR 355,752 per annum. The rates vary depending on the employer’s industry.

**Donations tax**
Disposals of assets below an adequate consideration are a deemed donation and subject to donations tax. Donations tax is payable by resident companies at a flat rate of 20% on donations made. An annual exemption of ZAR 10,000 is available.

Public companies, comprised of mostly listed companies, are exempt from donations tax. An exemption is also available for donations made to certain charities and other non-profit organisations.

**Vehicle emissions tax**
An environmental levy is levied on new passenger motor vehicles based on grams per kilometre of CO2 emissions of the vehicle over a stated level. From 1 April 2016, the levy is ZAR 100 to ZAR 140 per gram per kilometre over the CO2 threshold level.

**Fuel levy**
A fuel levy is included in the price of petroleum fuel sold. The general fuel levy for 2016/17 is 285 cents per litre of petrol and 270 cents per litre of diesel. A refund of the diesel fuel levy may be claimed in certain industries, such as agriculture, fishing, and mining.

**Electricity levy**
To support energy efficiency, the government has implemented a levy on electricity generated from non-renewable sources at 3.5 cents/kWh. The levy is paid at source by the electricity producer and recovered in the price to the consumer.
Tyre levy
A tyre levy will be implemented at a rate of ZAR 2.30/kg, effective 1 October 2016. The levy will replace the current fee arrangements for tyres, as regulated by the Department of Environmental Affairs.

Sugar tax
A tax on sugar-sweetened beverages is proposed to be introduced from 1 April 2017. The proposed tax rate is yet to be announced.

Air passenger tax
Passengers departing on international flights must pay air passenger tax at the rate of ZAR 100 on flights to Botswana, Lesotho, Namibia, and Swaziland, and ZAR 190 on other flights. The tax is added to the price of the ticket.

Branch income
SA branches of foreign companies are not considered to be separate legal entities for tax purposes, and no tax is withheld on transfers of profits to the head office. Branches of foreign companies are taxed at a rate of 28% and are not liable for dividends tax or any branch profits repatriation tax.

Note that a branch must register as a taxpayer and submit tax returns. Separate financial statements must be drawn up for the SA branch. For all practical purposes, the SARS will treat the branch as a separate entity. For example, inter-branch cost recoveries levied by the head office incurred in the production of SA income normally will be allowed as a deduction by the branch, although this treatment is not extended to interest on inter-branch loans.

In terms of DTAs, the taxation of branches is limited to cases where the branch constitutes a PE.

Income determination

Inventory valuation
Inventories generally are stated at the lower of cost or net realisable value. Write-downs of inventory for slow-moving and obsolete items must be justified, and a general policy on a percentage basis is not permitted. Last in first out (LIFO) is not accepted for tax purposes.

Capital gains
Although the capital gains tax forms part of income tax, the two taxes are not fully integrated. Gains realised by companies are taxed at the normal CIT rate. Previously, only 66.6% of gains were included in taxable income. Effective for years of assessment beginning on or after 1 March 2016, however, the inclusion rate increases from 66.6% to 80%, raising the effective capital gain tax rate from 18.6% to 22.4%.

Dividend income
Dividends are generally taxed in the hands of the beneficial owner at a rate of 15% (see Dividends tax in the Taxes on corporate income section). The amount is withheld by the company declaring the dividend on behalf of the shareholder receiving it. In specie dividends are subject to tax in the hands of the company and not the beneficial owner.

Foreign dividends received by or accrued to an SA-resident taxpayer are included in income based on a formula and taxed at the normal CIT rate, which results in an effective tax rate of 15%. Qualifying foreign dividends are also generally not subject to tax where they are received by resident shareholders holding in excess of 10% of
South Africa

the equity shares and voting rights of the company declaring the dividend. Dividends received by residents holding less than 10% of such shares will generally be taxable in South Africa, subject to a tax credit for foreign taxes payable by the recipient shareholder.

Stock dividends
Stock dividends (capitalisation issues of shares) are not subject to CIT or dividends tax.

Interest income
Interest income for resident companies is taxed at the normal CIT rate. Interest received by non-resident companies is only subject to CIT if it is from a source in South Africa and the company carried on business through a PE in South Africa during the tax year.

A 15% WHT on interest applies to interest paid on certain debt instruments to non-resident companies.

Foreign income
Foreign income of an SA-resident company is subject to tax in South Africa on an earliest of receipt or accrual basis. However, income that may not be remitted to South Africa in terms of the laws of the country where the amount arose is deferred until the income can be remitted. Double taxation may be avoided under certain DTAs or by way of unilateral credit or deduction for foreign tax payable on foreign income (see Foreign tax credit in the Tax credits and incentives section).

Deductions

Depreciation and depletion
A depreciation (wear and tear) allowance may be deducted on movable assets used for the purpose of trade. There are no statutory provisions relating to rates of wear and tear, but the SARS has published a table of periods over which the assets may be written off. The rates of wear and tear, based on the cash cost, are calculated either according to the straight-line or diminishing-balance method.

New and unused machinery used in a process of manufacture or in a similar process is depreciable at the rate of 40% in the first year of use and 20% in the three following years. If the machinery is not new and unused, an allowance of 20% per year over five years is available.

An accelerated depreciation allowance (50% in the first year of use, 30% in the second, and 20% in the third year) applies to the machinery and articles used in farming, production of biodiesel or bioethanol, and production of energy from certain renewable sources.

Specific allowances are also provided for pipelines, transmission lines, railway lines, rolling stock, airport property, ports, ships, mining operations, and other qualifying industrial assets.

Buildings and other permanent structures may not be depreciated, apart from an annual allowance for each of the following:

- Buildings used in a process of manufacture or a process similar to a process of manufacture: For buildings erected before 1 January 1989, a 2% rate applies per year. For buildings erected after 1 January 1989, a 5% rate applies.
- Hotel buildings: For buildings built prior to 4 June 1988, a 2% rate applies per year. For hotel buildings erected after 4 June 1988, a 5% rate applies. Improvements within the existing building framework that commenced on or after 17 March 1993 are depreciated at the rate of 20%.
• Agricultural cooperative storage buildings: For buildings built prior to 1 January 1989, a 2% rate applies per year. For buildings erected on or after 1 January 1989, a 5% rate applies.

• Housing projects of not less than five units: Housing projects of not less than five units of residential accommodation, which consist of more than one room and the erection of which commenced on or after 1 April 1982 and before 21 October 2008, are subject to a 2% rate of depreciation. After 21 October 2008, an allowance of 5% is available on this type of property. The 5% depreciation rate is available to the taxpayer provided that the unit is used by the taxpayer solely for trade purposes, the unit is situated in South Africa, and the taxpayer owns at least five units in South Africa used for the purposes of trade. An additional allowance is available for a low-cost residential unit. Additionally, from 21 October 2008, taxpayers are granted relief for the transfer of ownership on a contract for deed basis of employer provided low-cost residential units to employees.

• Buildings in urban development zones: Improvements to an existing building in an urban development zone, where the existing structural or exterior framework is preserved and brought into before 31 March 2014, qualify for an accelerated allowance of 20% per year. Buildings that are erected, extended, or added to in an urban development zone on or after 21 October 2008 and which are not covered by the first mentioned allowance qualify for a 20% allowance in the first year and an 8% allowance in the following ten years. As of 21 October 2008, new and unused low-income residential units located in urban development zone demarcations are subject to an additional annual depreciation allowance. The rate is 25% in the first year, 13% in the succeeding five years, and 10% in the year following the last year. Improvements are subject to a depreciation allowance of 25% over a period of four years.

• Commercial buildings: The cost to the taxpayer of any new and unused building owned by the taxpayer, or any new and unused improvement to any building owned by the taxpayer, if that building or improvement wholly or mainly is used by the taxpayer for trade purposes, other than the provision of residential accommodation, is subject to a 5% rate of depreciation. This allowance is applicable to any building or improvement contracted for on or after 1 April 2007 and the construction of which commenced on or after 1 April 2007.

An allowance for assets disposed of or scrapped during a year of assessment is determined by reference to the cost less allowances already granted and the proceeds on disposal (if any). Recoupments of allowances granted are taxable where disposal proceeds exceed the tax basis at the time of sale. Such recoupments cannot exceed the cost of the asset. Proceeds above cost will be taxed as a capital gain.

Book depreciation does not need to be consistent with tax depreciation.

No cost or percentage depletion is available for natural resources.

**Goodwill**

The sale and purchase of goodwill is generally a transaction on capital account, and the person paying for the goodwill will usually be unable to claim a deduction. No capital allowances are available for goodwill.

**Start-up expenses**

Special relief is provided for start-up (or pre-trade) expenditure to allow for a deduction in the year that trade commences. The expenses are only deductible if they would have been deductible had they been incurred after the commencement of trade. These expenses and any loss they create are ring-fenced and may only be deducted against income from the trade to which the start-up costs relate.
Interest expenses
Generally, interest expenditure incurred in the production of non-exempt income and for the purposes of trade is deductible. However, interest that is incurred to produce income that is exempt from tax will not be allowed as a tax deduction. A special dispensation applies to the deduction of interest on debt used to acquire shares in a company, provided certain requirements are met.

Special rules apply to determine the amount of interest and timing of any deductions taking into account all payments and receipts in respect of debt instruments with interest being determined on the basis of an internal rate of return.

Certain debt instruments that are convertible to shares or may be settled in shares or where repayment is subject to solvency or related to connected-party debt with a maturity of 30 years or more are treated as hybrid debt instruments and no interest deduction is allowed in respect thereof. Certain hybrid interest is also treated as a dividend.

In addition, the interest deduction for interest paid between related parties is limited where such interest is not subject to income tax or WHT on interest. In terms of these rules, interest deductions are limited to an amount determined with reference to a percentage of taxable income before interest and depreciation. The percentage is determined with reference to the repo rate with a ceiling of 60% of adjusted taxable income. Any excess interest may be carried forward to the following year for deduction. The transfer pricing and thin capitalisation rules continue to apply to such interest.

Further interest deduction limitations also apply to interest paid on debt used to fund acquisitions of shares or businesses under certain of the corporate rollover relief provisions (see the Group taxation section). In terms of these rules, with some amendments thereto only applying for years of assessment commencing on or after 1 January 2015, interest deductions on such transactions are limited to an amount determined with reference to a percentage of taxable income before interest and depreciation. The percentage is determined with reference to the repo rate with a ceiling of 60% of adjusted taxable income.

The deduction of cross-border interest paid to connected persons is subject to limitation under transfer pricing rules (see Transfer pricing and thin capitalisation in the Group taxation section).

Bad debt
Bad debts are tax deductible if the debt relates to an amount that has been included in the taxpayer’s taxable income in any tax year if it is due at the end of the year of assessment. A tax allowance is also provided for in respect of specifically identified doubtful debts.

Any bad debts arising on loaned money is deductible if it was lent in the course of a money-lending business.

Charitable contributions
Donations to certain charitable organisations approved as public benefit organisations are tax deductible, up to a maximum of 10% of taxable income.

Cost of inventory
The cost of inventory is, in principle, deductible as soon as the inventory is acquired. However, at the end of each year, the cost of the inventory still on hand has to be added to the company’s income. Then in the next year, it can be deducted again. This has the effect of timing the deduction of the cost of inventory to match the time of its realisation.
**Assets acquired for shares issued**
When assets are acquired by a company in return for shares issued to the seller, the purchaser of the assets is deemed to have incurred expenditure equal to the market value of the shares immediately after acquisition. Special rules apply in the case of a mismatch in the value of the shares and assets.

**Fines and penalties**
Any fine or penalty imposed in respect of an unlawful activity carried out in South Africa, or in any other country where it would be unlawful in South Africa, is not deductible for tax purposes.

**Taxes**
Most taxes (other than income taxes, donations tax, WHT on interest, and dividends tax) are deductible from taxable income for the corporation, provided they qualify for deduction under general rules.

**Net operating losses**
Losses may be carried forward indefinitely, provided an active trade or business of a similar nature is carried on without interruption. There is no loss carryback in South Africa.

**Payments to foreign affiliates**
Deductions may be claimed for royalties, managerial service fees, and interest charges paid to foreign affiliates, provided such amounts approximate those that would be paid to an unrelated party in an arm's-length transaction.

Interest deductions may be limited in certain circumstances (see Interest expenses above and Transfer pricing and thin capitalisation in the Group taxation section).

**Group taxation**
Group taxation is generally not permitted in South Africa. However, relief is given for transactions between group companies to allow for reorganisations, provided certain requirements are met.

In general, the relief will only apply to transactions between companies within the same group. A group of companies is defined as a controlling company and one or more controlled companies in relation to that controlling company. A controlling company means a company holding, directly or indirectly, at least 70% of the equity shares of any other company. Foreign-incorporated companies do not form part of a group of companies for the purposes of this relief unless effectively managed in South Africa, although relief is extended to controlled foreign companies (CFCs) in certain circumstances.

Corporate rollover relief is available for asset-for-share transactions, amalgamation transactions, intra-group transactions, unbundling transactions, and transactions relating to liquidation, winding-up, and deregistration.

The relief may cover the capital gains tax arising from the disposal of capital assets, income tax arising from the disposal of a depreciable asset, income tax arising from the disposal of trading stock, donations tax arising from the disposal of an asset, dividends tax, VAT, securities transfer tax, and transfer duty.

**Transfer pricing and thin capitalisation**
South Africa has transfer pricing legislation applying to cross-border transactions involving connected persons. The transfer pricing legislation applies the arm's-length standard.
South Africa

The transfer pricing legislation does not separately address transfer pricing and thin capitalisation. Rather, thin capitalisation is treated as simply a breach of the general arm's-length standard.

Where a transfer pricing adjustment is required to be made, that adjustment is subject to a secondary adjustment where it is deemed to be either a dividend or a donation.

**Controlled foreign companies (CFCs)**
If one or more residents together, directly or indirectly, hold more than 50% of the voting or participation rights in a foreign company, then it is a CFC in relation to those residents. The income of a CFC is imputed to the residents in proportion to their holdings, subject to certain exclusions and tax credits, where applicable. The most notable exclusions are for high-tax CFCs and income attributable to foreign business establishments.

**Tax credits and incentives**

**Foreign tax credit**
The South African Income Tax Act makes provision for a rebate against CIT in respect of foreign taxes paid on foreign-sourced income or a deduction against income of foreign taxes paid on SA-sourced income. In both instances, the taxpayer must be an SA resident, the income must be included in taxable income, and that income must have been subject to a foreign tax that is not recoverable. The rebate is limited to the total normal tax payable calculated by applying the ratio of the total taxable income attributable to the foreign tax to the total taxable income. The deduction, however, may not exceed the income on which the foreign tax was levied.

**Research and development (R&D)**
The current costs related to certain R&D activities carried on in South Africa are 150% deductible, subject to pre-approval by a government-appointed approval committee. The cost of machinery and other capital assets acquired for the purposes of R&D may be depreciated 40% in the first year of use, 20% in the second, 20% in the third year, and 20% in the fourth year. Buildings used in the process of R&D may be written-off over a 20-year period.

**Headquarter company regime**
A ‘headquarter company’ regime encourages the use of South Africa as a location for intermediate holding companies.

The main benefits offered to a headquarter company are:

- Exemption from South Africa's CFC rules.
- Exemptions on the headquarter company’s dividend distributions.
- Exemption from the WHT on interest in certain circumstances.
- Exemption from South Africa’s transfer pricing rules on back-to-back loans, outbound loans, back-to-back intellectual property (IP) licensing arrangements, and outbound IP licensing arrangements.
- Capital gains tax exemption upon the disposal of shares by the headquarter company.

The requirements for a headquarter company are as follows:

- The headquarter company must be SA resident.
- Each shareholder in the headquarter company must hold at least 10% of the headquarter company’s equity shares and voting rights. This means that a headquarter company can never have more than ten shareholders.
- At least 80% of the headquarter company’s assets (measured on a ‘cost’ basis and excluding cash and certain bank deposits) must be comprised of certain assets related
to the foreign companies in which the headquarter company holds at least 10% of the equity shares and voting rights. Specifically, these assets must be:

- the equity shares in those companies
- loans to those companies, and
- IP licensed to those companies.
- At least 50% of the headquarter company’s gross income must be comprised of dividends, interest, royalties, rentals, service fees, or proceeds from the sale of equity shares or IP from its 10%-plus holdings, where the gross income exceeds ZAR 5 million.

**Industrial policy projects**

In 2008, a ZAR 20 billion incentive package for investors in energy efficient projects was announced. The incentive is available for industrial projects participating in the manufacturing sector (other than alcohol or alcohol-related products, tobacco or tobacco-related products, arms and ammunition, and biofuels, which have a negative impact on food security). Companies are divided into those with a qualifying status and those with a preferred status. The status is determined in terms of a point system.

The proposed project must either be a ‘brownfield project’ (expansion or upgrade of an existing industrial project) or a ‘greenfield project’ (a wholly new industrial project, which uses new and unused manufacturing assets). Approved projects may be granted a tax allowance known as an additional investment allowance equal to 55% (100% if located in an industrial development zone) of the cost of any manufacturing asset used in an industrial policy project with preferred status or 35% (75% if located in an industrial development zone) of the cost of any manufacturing asset used in any other approved industrial policy project.

The additional investment allowance may not exceed ZAR 900 million in the case of any greenfield project with a preferred status, ZAR 550 million in the case of any other greenfield project, ZAR 550 million in the case of any brownfield project with a preferred status, or ZAR 350 million in the case of any other brownfield project.

In addition to the above, a company may also claim a deduction known as an additional training allowance.

**Special Economic Zones (SEZs)**

An SEZ incentive has been introduced for companies carrying on business in an SEZ comprising of a reduced corporate tax rate of 15% as well as a 10% allowance in respect of the cost of new and unused buildings owned by a qualifying company or any new or unused improvements to any building owned by a qualifying company.

In addition, employment incentives have also been introduced for employers carrying on a trade in an SEZ that will allow for an employees’ tax reduction for the employer in respect of qualifying employees, up to a prescribed monthly amount.

**Energy efficiency savings**

The energy efficiency savings incentive provides an income tax deduction to qualifying taxpayers. The deduction equates to ZAR 0.95 for each kilowatt hour (or equivalent) saved by the taxpayer during the relevant year of assessment against a baseline from the beginning of the year.

**International shipping incentive**

Income from international shipping of a resident company that holds a share in a South African flagged ship is exempt from income tax. Qualifying shipping companies can also use a currency other than the rand as their functional currency.
**Venture capital companies**
In order to assist small and medium-sized businesses to raise capital to finance businesses, a tax incentive for investors in small and medium-sized enterprises through venture capital companies was introduced.

A deduction is allowed from the income of a taxpayer in respect of expenditures actually incurred by that person in respect of shares issued to that person by a venture capital company.

**Withholding taxes**

**Payments to residents**
The only payments to residents that are subject to WHT are in respect of dividends, although resident companies are exempt from the dividend WHT.

**Royalties payable to non-residents**
Royalties and know-how payments made to non-residents for the use of or right to use IP rights in South Africa are deemed to be from an SA source. The payer of the royalty or know-how payment is obligated to deduct a WHT of 15% of this payment, which is a final tax payable by the recipient of such income.

**Dividends payable to non-residents**
A dividend WHT of 15% applies to any dividend paid by a resident company or dividend paid to SA residents by a non-resident company in respect of shares listed on an SA exchange. The tax is imposed on the beneficial owner of the dividend and not on the company, with the exception of in specie dividends. The payer of the dividend or regulated intermediary is obligated to deduct the 15% WHT from the payment. The treaty rate is the maximum allowable rate to be charged by the treaty countries; where this rate is higher than the domestic tax rate, the latter will apply.

**Interest payable to non-residents**
A 15% WHT on interest applies to interest payable from an SA source to non-residents on certain debt instruments. The resident payer of the interest is obligated to deduct the 15% WHT from the payment.

**Treaty rates for dividends, interest, and royalties**
The WHT may be reduced by the terms of the relevant tax treaty, as follows:

Notes

‘D’ refers to direct capital holding.

1. Recipient is the beneficial owner of the royalty.
2. Royalty is subject to tax in recipient country.
3. 15% is levied on royalties for cinematographic or television films.
4. The maximum rate for copyright royalties, royalties for use of computer software, and patents concerning industrial, commercial, and scientific experience is 6% of the royalties paid; otherwise, 10%.
5. Maximum rate of 10% on royalty of the adjusted amount (being 70% of the gross royalties) for use of industrial, commercial, or scientific equipment.
6. The 5% rate applies to royalties for the use of a copyright. A 7% rate applies to royalties for the use of patents, trademarks, designs, models, etc.
7. In respect of right to use industrial, commercial, or scientific equipment and transport vehicles, a 10% rate applies.
8. The lower rate of 5% applies to any cultural, dramatic, musical, or other artistic work (but not including royalties in respect of motion picture films) as well as industrial, commercial, or scientific works. The rate of 10% applies in all other cases.
9. The 5% lower rate applies to use of literary, artistic, and scientific works. The 7% lower rate applies to right of use of patents, trademarks, designs, and models.
10. No right to tax dividends in payor state if the beneficial owner of the dividend is resident in the payee state.
11. Lower rate applies to a beneficial owner that is a company and has a minimum holding of 25% of capital, and the higher rate applies in other cases.
12. Lower rate applies to a beneficial owner that is a company and has a minimum holding of 10% of capital, and the higher rate applies in other cases.
13. Lower rate applies to a beneficial owner that is a company and has a minimum holding of 25% of voting shares, and the higher rate applies in other cases.
14. Lower rate applies to a beneficial owner that is a company and has a minimum holding of 25% of capital and a minimum 12-month holding period prior to the end of the accounting period prior to the dividend payment, and the higher rate applies in other cases.
15. Lower rate applies to a beneficial owner that is a company and has a minimum holding of 25% of voting shares and a minimum six-month holding period prior to the end of the accounting period prior to the dividend payment, and the higher rate applies in other cases.
16. SA resident payor to Maltese resident beneficial owner (Maltese resident payor to SA resident beneficial owner is limited to tax on profits).
17. Lower rate applies to a beneficial owner that is a company and has a minimum holding of 25% of capital and a minimum two-year uninterrupted holding period prior to the dividend payment, and the higher rate applies in other cases.
18. Lower rate applies to a beneficial owner who has a minimum holding of 30% of capital and a minimum direct investment of 100,000 United States dollars (USD) in the company declaring the dividend, and the higher rate applies in other cases.
19. Lower rate applies to a beneficial owner that is a company and has a minimum holding of 10% of capital, and the higher rate applies in other cases. However, a ‘most favoured nations’ clause applies, which will limit the above rates to the lowest treaty rate in terms of any other treaty.
20. Lower rate applies to a beneficial owner that is a company and has a minimum holding of 20% of capital, and the higher rate applies in other cases.
21. Lower rate applies to a beneficial owner that is a company and has a minimum holding of 15% of capital, and the higher rate applies in other cases.
22. Lower rate of 5% applies to a beneficial owner that is a company and has a minimum holding of 10% of capital. Lower rate of 10% applies in all other cases. 15% rate applies to all dividends from property investment companies.
23. Lower rate applies to a beneficial owner that is a company and has a minimum holding of 10% of voting power (directly), and the higher rate applies in other cases.
24. The treaty contains no provisions regarding dividends WHT, thus the domestic rate will apply.
25. The Netherlands Protocol has a ‘most favoured nations’ provision whereby the rate most favourable in any other treaty will apply over the default treaty rate. This, however, only applies to treaties concluded after this treaty.
26. No right to tax interest in payor state if the beneficial owner of the interest is resident in the payee state.
27. The 5% rate applies to interest derived by a bank or any other financial institution, and the 10% rate applies in other cases.
28. No right to tax interest in payor state if the beneficial owner of the interest is resident in the payee state and provided interest is taxable in that other state.
29. No specific provision is made for interest in the DTA.
30. The 10% rate applies to interest received by a financial institution (including an insurance company), and the 15% rate applies in other cases.
31. The 5% rate applies to interest on loans made by banks, and the 12% rate applies in other cases.
32. The 5% rate applies if the interest is paid to a bank; the 10% rate applies in other cases.
33. In Canada, a beneficial owner that is a company controls a minimum of 10% of the voting power (directly/indirectly), but excludes non-resident owned investment corporation resident in Canada.
34. In New Zealand, dividends are taxed at a flat rate of 15%.
35. No right to tax interest in payor state if the beneficial owner is the government of the other state or a government entity.
36. No specific provision is made for royalties in the DTA.
37. No right to tax interest on stocks and securities issued by any government other than South Africa, even if business is carried on in South Africa, if taxed in residence state.
38. Lower rates for royalties do not apply if attributable to a PE in the payor state or the right or property on which royalty is paid is attributable to PE in payor state.
39. The 10% rate applies if the beneficial owner is resident in the payee state.
40. Lower rate of 5% applies to the dividend if beneficial owner is resident in payee state.
41. The interest exemption in the source country is only retained for interest paid or received by a government or central bank, or for interest on debt instruments listed on a recognised stock exchange.
42. The interest exemption applies if the beneficial owner of the interest is the Hong Kong Special Administrative Region (HKSAR) Government, the Hong Kong Monetary Authority, the SA Government, the SA Reserve Bank, or institutions wholly or mainly owned by them.

Non-resident entertainers and sportspersons
A WHT at the rate of 15% applies to all payments made to non-resident entertainers and sports persons in respect of their activities exercised in South Africa.

Disposal of immovable property by non-residents
Any person who pays an amount to a non-resident in respect of the sale of immovable property in South Africa must withhold from the amount payable an amount equal to:

- 5% if the non-resident seller is an individual
- 7.5% if the non-resident seller is a company, or
- 10% if the non-resident seller is a trust.

The amount so withheld is not a final tax for the non-resident seller. Instead, this amount is regarded as an advance payment of the non-resident seller’s normal tax liability for the year of assessment during which the property is disposed of. The non-resident seller is still obligated to submit an income tax return for that year.

Tax administration

Taxable period
The corporate tax year is the same as the company’s financial year. It may be changed upon application showing reasonable cause.

Tax returns
Annual income tax returns must be submitted within one year from the end of the company’s tax year. The annual tax return includes a supplementary reconciling return where requested. Furthermore, schedules apply for CFCs, short-term insurers, mining companies, headquarter companies, and learnership allowances.

‘Signed off’ financial statements are required to be submitted with the annual tax return.
South Africa

**Payment of tax**
Payments are made with provisional returns filed at six-month intervals from the tax year-end based on an estimate of taxable income for the year. Interest is charged on any underpayment outstanding for more than six months after the tax year-end, except in the case of February year-ends, in which case it is seven months. Any balance (together with interest) is then paid following assessment.

**Tax audit process**
There is no prescribed audit process, and an audit can be initiated by any factor as determined by the SARS. The audit or inspection will commence with a request from the SARS for the taxpayer to make available any such records or information as may be required.

**Statute of limitations**
Tax debts to the state prescribe after a period of 15 years. Tax returns submitted that have been assessed may not be reopened after a period of three years from date of assessment by the SARS or five years if it is a self-assessment by the taxpayer, unless there has been fraud, misrepresentation, or non-disclosure by the taxpayer.

The prescription period may be extended by three years in the case of an assessment by the SARS or by two years in the case of self-assessment in respect of certain complex matters, such as transfer pricing and general anti-avoidance cases.

**Topics of focus for tax authorities**
The SARS, in their 2015/16 to 2019/20 Strategic Plan, stated that they will focus on the following areas:

- Large business and transfer pricing.
- The construction industry.
- Illicit cigarettes.
- Undervaluation of imports in the clothing and textile industry.
- Small business and cost of compliance.
- Collaboration with other jurisdictions on tax base erosion.

**Other issues**

**Intergovernmental agreements (IGAs)**
South Africa entered into an agreement with the United States to improve international tax compliance and to implement the Foreign Account Tax Compliance Act (FATCA). The date of entry into force is 28 October 2014.

South Africa is also a party to the Multilateral Convention on Mutual Administrative Assistance on Tax Matters as well as a number of bilateral tax information exchange agreements.
Significant developments

Over the past year, the following significant amendments have been made to Spanish law on the taxation of companies:

Law 48/2015, of 29 October 2015, which passed the State Budget Bill, was published in the Spanish Official State Gazette on 30 October 2015. The main measures contained in this law that affect taxation of companies are:

• The requirements for the conversion of certain deferred tax assets related to bad debt or contributions to welfare systems into a credit payable by the tax authorities are modified. Previous deferred tax assets that do not meet the new requirements may also be converted into a credit payable by the tax authorities, although, in this case, prior payment of an amount may be required.
• Effective as of 1 July 2016, the rules to calculate the patent box tax incentive are modified to bring this tax incentive in line with the European Union (EU) and the Organisation for Economic Co-operation and Development (OECD) Agreement. With this reform, income generated from assigning the use of certain intangible assets may be eligible for a reduction in the taxable base by the percentage resulting from multiplying by 60% the result of the following coefficient:
  • In the numerator, the expenses incurred to create the asset (including subcontracted expenses with non-related parties), increased by 30%, up to the limit of the denominator amount.
  • In the denominator, the expenses incurred to create the asset, including the subcontract and expenses incurred for the acquisition.

Financial expenses, real estate depreciation expenses, or any other expenses incurred to create the asset are not included in this coefficient.

The requirement that the assigner company has created the asset by bearing at least 25% of its cost is eliminated.

• The legal interest rate for 2016 is 3%, and the late payment interest rate is 3.75%.
• Certain events of exceptional public interest and priority patronage activities for 2016 are established in the law.
• Regarding value-added tax (VAT), certain exemptions are modified to bring Spanish law in line with EU law.

Law 22/2015, of 20 July 2015, on auditing, was published in the Spanish Official State Gazette on 21 July 2015. Under this law, intangible assets are amortised according to their useful life. When the useful life cannot be reliably determined, amortisation is tax deductible up to a maximum annual limit of 5% of its amount.

For goodwill, amortisation is tax deductible up to the maximum annual limit of 5% of its amount.
Spain

Royal Decree-Law 9/2015, of 10 July 2015, was published in the Spanish Official State Gazette on 11 July 2015. The new Royal Decree-Law established a reduction in the withholding tax (WHT) rates starting on 12 July 2015. Thereby, starting on 1 January 2016, the standard WHT rate is set at 19% (19.5% from 12 July 2015 to 1 January 2016, 20% from 1 January 2015 to 11 July 2015).

### Taxes on corporate income

The general corporate income tax (CIT) rate in Spain is 25% for tax periods starting on or after 1 January 2016 (28% in 2015). Other tax rates may apply, depending on the type of company that is taxed and the type of business carried out.

Resident companies are taxed on their worldwide income. For permanent establishments (PEs) in Spain of foreign companies, non-resident income tax (NRIT) is chargeable on income that may be allocated to the PE at a 25% tax rate for periods starting on or after 1 January 2016 (28% in 2015).

NRIT is also chargeable on non-established foreign companies/individuals that obtain income in Spain (see the Withholding taxes section).

### Small companies

Companies with a turnover under 10 million euros (EUR) in the preceding tax year (considering, in the case of a group of companies, the group companies’ total turnover) are considered small companies for CIT purposes and are taxed at a 25% tax rate for tax periods starting in 2016.

### Newly created companies

Newly created companies are taxed at a 15% tax rate for tax periods starting on or after 1 January 2015, provided that they have been set up after that date, for both the first tax period in which they obtain a profit and the following tax period. This tax rate is not applicable to companies that, by law, are considered equity companies. Newly created companies that are set up in tax periods starting prior to that date will continue to be taxed at a 15% tax rate on their tax base up to EUR 300,000 and a 20% tax on any excess in these two periods.

### Business and professional activities tax

The business and professional activities tax is a local direct tax levied annually on the performance in Spain of business, professional, or artistic activities, regardless of whether or not they are carried out in a particular premises. The tax payable depends on different factors, such as the type of activity carried out and the location and size of the premises where the activity is carried out. As regards limits, it may not exceed 15% of the presumed average profits of the professional/economic activity.

CIT payers and non-resident companies carrying on an activity in Spain through a PE are exempt from this tax if their net turnover for the tax year of the last CIT/NRIT return filed prior to the date of accrual of the local tax (1 January) was less than EUR 1 million.

### Corporate residence

A company is resident in Spain and subject to CIT on its worldwide income when:

- it has been incorporated in accordance with Spanish law
- its registered office is in Spain, and/or
- its ‘effective’ head office is in Spain.
Under Spanish law, a company’s ‘effective’ head office is in Spain when its business activities are managed and controlled from Spain.

Companies established in a country or territory where no tax is levied or that is a tax haven are deemed to be tax resident in Spain in the following cases:

- When the company’s main assets consist, directly or indirectly, of property located or rights fulfilled or exercised in Spain.
- When the company’s core business activity is carried on in Spain.

This presumption may be refuted by the company if it can prove that it is effectively administered and managed in the country or territory in which it is established and that it was incorporated and operates for valid economic and business reasons and not merely for the purpose of managing securities or other assets.

**Permanent establishment (PE)**

Taxpayers operating in Spain through a PE are subject to NRIT.

Most Spanish tax treaties for the avoidance of double taxation contain a definition of PE in line with OECD criteria.

In the absence of a tax treaty, internal law states that an individual or company is considered to operate through a PE when, by any legal means, one has continuous or habitual work facilities in Spain or a place to do any kind of work where one performs all or part of one’s activity, or when one acts in Spain through an agent with powers to enter into an agreement in the name and on behalf of the non-resident individual or company, provided said powers are exercised on a regular basis.

In particular, management offices, branches, offices, factories, workshops, warehouses, shops or other establishments; mines, oil or gas wells, quarries, farms, forestry facilities, livestock farms, or any other site where natural resources are collected; and construction, installation, or assembly sites whose duration lasts more than six months will be considered PEs.

**Other taxes**

**Value-added tax (VAT)**

Spanish VAT is payable on supplies of goods and services carried out in Spanish VAT territory and on imports/intra-EU acquisitions of goods and services. There are three rates for the different types of goods and services, which are as follows:

- Ordinary rate of 21%, applied on regular supplies of goods and services.
- Reduced rate of 10%, applied on basic necessities (e.g. food and agricultural products not included in the ‘super reduced’ 4% rate, dwellings, other qualifying services).
- Super reduced rate of 4%, applied on basic necessities other than those classified under the reduced rate (e.g. bread, milk, books, medicine).

In the Canary Islands, a specific tax is applied instead of VAT, called the Canary Island General Indirect Tax (IGIC). The ordinary IGIC rate is 7%, and the other IGIC rates are 0%, 3%, 9.5%, and 13.5% (20% for tobacco). IGIC is similar to VAT, but it has some significant differences, such as the exemption established for telecommunications services. Imports of tangible goods into the Canary Islands are subject to this tax.

In Ceuta and Melilla, sales tax is applied instead of VAT.
Spain

**Customs duties**
Many goods imported into Spain from outside the European Union are subject to customs duties. The rates of duty are provided by the EU's Common Customs Tariff and vary widely.

**Excise duties**
Excise duties are chargeable on most hydrocarbon oil products, alcoholic drinks, and tobacco products imported into or produced in Spain. Purely as examples, most road fuels carry a duty of about EUR 0.33 per litre, cigarettes carry a duty of about EUR 24.1 per thousand (plus 51% of the maximum retail sale price), tobacco of about EUR 22 per kg (plus 41.5% of the maximum retail sale price), most wines of EUR 0 per litre, and spirits of about EUR 9.13 per litre of pure alcohol included.

**Tax on tax-haven-resident companies owning real estate in Spain**
Companies resident in a tax haven for tax purposes that own real estate or hold real property rights in Spain are subject to a special levy accrued on 31 December and declared and paid in January of the following year in the place and manner established by law. The tax is equal to 3% of the assessed value of the real estate.

**Transfer tax**
A transfer tax, which is usually 5% to 10%, depending upon the region, is generally levied on *inter vivos* transfers, including real estate transfers and real estate leases that are exempt from VAT.

Second and ulterior transfers of buildings are exempt from VAT; consequently, they are, in principle, subject to transfer tax.

Residential leases are exempt from VAT and therefore subject to transfer tax.

Transfers of quoted or unquoted (listed or unlisted) securities are, in principle, exempt from both transfer tax and VAT. This exemption will not apply for transfers of unlisted securities of a company in the secondary market that tries to evade the tax that is payable on a direct transfer of real estate that it owns. For this purpose, Spanish law establishes certain cases where it is understood that there is an intention to evade tax.

This exception will not apply to transfers of securities received as a result of the incorporation by banks of asset management companies and to transfers of securities of banks affected by the integration plans regulated by Royal Decree-Law 9/2009, which will therefore be exempt from transfer tax. In addition, acquisitions of assets in the Canary Islands may be exempt from transfer tax (and from IGIC) when certain requirements are complied with.

Restructuring transactions are also exempt from transfer tax. For these purposes, mergers, spin-offs, exchanges of shares, and certain in-kind contributions are considered to be restructuring transactions.

**Stamp duty**
A stamp duty is mostly levied on notarial instruments and records documenting transactions that have an economic value and need to be registered in public registries (e.g. company, land, and industrial property registries). Stamp duty is incompatible with transfer tax and capital duty, but compatible with VAT. The general rate is between 0.75% and 1.5%, depending on the region of Spain and the taxable event.

Stamp duty is also levied on certain commercial (e.g. bills of exchange, promissory notes), court, and administrative documents.
**Capital duty**
1% capital duty is levied on capital reductions and company dissolution, to be paid by the shareholders.

Capital duty is incompatible with transfer tax and stamp duty in certain cases, but it is compatible with VAT.

**Payroll taxes**
Employers are required to withhold a percentage of their employees’ salaries and benefits as a payment on account of their personal income tax (PIT). The rate of withholding is a progressive rate of between 19% and 45% in or after 2016, depending on the employee’s personal circumstances and income.

**Social security contributions**
Employers are required to pay social security contributions. The rate of the contributions under the general social security contribution regime is the fixed rate of 29.9% plus a variable rate for occupational accidents (e.g. 1% for office work).

Employees are also required to pay social security contributions. Under the general social security contribution regime, the rate of social security contributions is 6.35%. Employers should deduct this amount from the amounts that they pay to employees.

The rates of social security contributions stated above should be applied on the employee’s total monthly gross employment income, whether in cash or in kind, with a minimum monthly contribution base of between EUR 764.40 and EUR 1,067.40, depending on the employee’s professional category, and a maximum monthly contribution base of EUR 3,642.

Both parts of the social security contributions (employer and employee) should be paid by the employer to the Social Security Treasury.

**Other local taxes**
In addition to the taxes stated above, the following other local taxes may be charged on companies:

- Real estate tax, levied annually by local authorities on the ownership of real estate.
- Local tax levied on the increase in the value of urban land, chargeable when urban real estate is sold.
- Motor vehicle tax, charged on the ownership of vehicles.
- Tax on constructions, installations, and building works, charged on the cost of certain works that require town planning licences.
- Waste collection fees.

**Branch income**
Income obtained by a branch in Spain of a non-resident company is taxed at the standard CIT rate of 25% in or after 2016.

When calculating the tax base for taxpayers resident in other EU member states that do not have a PE, a distinction is made between individuals and companies, and tax deductible expenses are established in accordance with PIT and CIT legislation, respectively.

Payments made by a branch to its head office or a PE of its head office for royalties, interest, commissions, or technical assistance fees are not tax deductible. Management and general administrative expenses incurred by the foreign head office that can be allocated to the branch are tax deductible if the payments for these expenses are made
following a criteria of continuity and rationality and provided that certain documentary requirements and other formalities are fulfilled.

Under Spanish law, income obtained by a branch that is repatriated to its head office is taxed at source at the general WHT rate of 19% in or after 2016. This tax is not chargeable in the case of a PE of a company resident in the European Union (unless the company is resident in a tax haven). Most tax treaties signed by Spain do not establish any provisions on this matter, and, in such cases, no tax is chargeable on income repatriated by branches. Some tax treaties, such as the treaties with Canada, Indonesia, and the United States (US), expressly establish a tax on income repatriated by branches. For example, US head offices are taxed at a 10% rate on the repatriated profits of a Spanish branch under the US/Spanish tax treaty.

**Income determination**

The general rule for determining income for CIT purposes is that accounting rules must be followed unless tax law establishes otherwise. In order to maintain this consistency, CIT/PE NRIT returns include pages in which the company’s accounting/commercial balance sheet and profit and loss account figures must be entered.

In Spain, the tax authorities are authorised to modify accounting results exclusively for the purpose of determining tax results if they observe that a company’s accounting results have not been calculated in accordance with Spanish Generally Accepted Accounting Principles (GAAP).

**Inventory valuation**

Inventory is valued at acquisition price or production cost under the average and first in first out (FIFO) valuation methods (the replacement and base stock valuation methods may only be used in exceptional cases). Again, since there are no specific tax rules for determining taxable income, accounting rules are also applicable for calculating valuation and obsolescence provisions for inventory.

**Capital gains and losses**

Capital gains are taxable in the tax year in which they arise. They are treated as normal income and taxed at the standard CIT rate of 25% for tax periods starting in or after 2016.

*Please see the Tax credits and incentives section for a description of a tax credit for reinvestment.*

For operations where payment is deferred or paid in instalments, the income is obtained proportionally as the corresponding payments are made, unless the taxpayer opts to be taxed in accordance with the accrual criteria.

Special rules apply to capital losses arising from transfers of shares, which may reduce the amount of the loss by the amount of the dividends that have been received from the company whose shares are transferred during the holding period, provided that such dividends or shares have not been deducted from its acquisition value and generated any entitlement to apply an internal double tax deduction of 100% (dividends received between tax periods starting in 2009 and tax periods starting in 2014), a tax exemption for double taxation, or a deduction for international double taxation (dividends received in tax periods starting in or after 2009).

Tax losses generated on transfers of assets to another company in the same corporate group are not tax deductible when the transfer takes place. Their tax deductibility is deferred to the moment when the assets are written off the acquirer’s balance sheet transferred out of the group or when the transferor or acquirer cease to form part of the
group. In the case of depreciable/amortisable assets, however, the undeducted amount should be included in line with its depreciation/amortisation by the acquirer.

**Dividend income**
The deduction previously established for the avoidance of internal double taxation has been eliminated for tax periods starting in or after 2015.

Dividends received from companies resident in Spain in which at least a 5% interest has been held for at least one year, including ownership by other group companies, (or with an acquisition value of over EUR 20 million) are exempt from tax. Dividends received from companies resident in Spain in which an interest of less than 5% is held (or with an acquisition value of less than EUR 20 million) are taxable in their entirety for the recipient.

As a general rule (there are certain exceptions), capital gains arising on the transfer of companies resident in Spain in which at least a 5% interest has been held for at least one year (or with an acquisition value of over EUR 20 million) are exempt from tax. The period during which the interest is held by another group company is also taken into consideration for this rule.

Special rules apply to, amongst others, the following:

- Dividends received from companies that obtain dividends or capital gains generated from transfers of interests in other companies, provided that such dividends and capital gains exceed 70% of the company's gross income.
- Capital gains arising from transfers of interests in companies that receive dividends or capital gains generated from transfers of interests when such dividends and capital gains exceed 70% of the company's gross income.

*Please see Foreign income below for a description of the taxation of dividends received from foreign companies.*

**Stock dividends**
CIT is not levied on bonus shares (i.e. shares partially or totally given to shareholders in a capital increase charged against distributable reserves), although they must be taken into account when calculating the average cost of shares held for the levying of tax when the shares are sold.

**Interest income**
Interest income is treated as normal income and taxed at the standard CIT rate of 25% for tax periods starting in or after 2016.

**Other significant items**
The following items, amongst others, are excluded or deferred from taxable income:

- Distributed dividends corresponding to profits obtained by companies in tax periods in which the flow-through tax regime (internal and international) has been applied.
- Assets written up in accordance with revaluation laws and tax-protected restructuring transactions involving accounting capital gains.

**Foreign income**
**Tax relief on foreign income**
Resident companies are taxed on their worldwide income. For foreign-source income, total or partial tax relief in the form of tax credits or exemptions is given if tax is levied on the income in both Spain and the foreign country where the income has been generated.
This tax relief may be available for the following:

- Economic double taxation, which is when the same income is taxed in the hands of two different taxpayers. For example, another government taxes a foreign company on the income earned in that country and a Spanish resident shareholder is taxed on the dividends that it receives from the foreign company or the capital gains from transfers of its shares.
- Juridical double taxation, which is when the same income is taxed in two countries in the hands of the same taxpayer. For example, the income is taxed (via a WHT) in the country where the income is generated and again in the other country where the recipient is resident.

The main characteristics of double tax relief are discussed below.

Dividends or profit-sharing income received by a Spanish company from a foreign company are tax exempt, subject to compliance with the following requirements:

- The Spanish company has at least a 5% interest in the foreign company, which has been held for at least one year. This one-year holding period is deemed to be complied with if it is completed after the dividend is distributed. The period in which the interest is held by another group company is also taken into consideration for this rule.
- The investee has been taxed by a tax that is identical or similar to Spanish CIT at, at least, a 10% nominal tax rate in the tax year in which the distributed profits were obtained. This requirement is complied with when the investee is resident in a country with which Spain has signed a tax treaty containing an exchange-of-information provision.

Capital gains arising from the sale of shares in foreign companies also qualify for a tax exemption if the requirements stated above are complied with during the holding period.

Both the dividends and capital gains exemptions are not applicable when the investee company is resident in a tax haven, unless it is an EU member state and the company can prove that it has been incorporated and operates for valid business reasons and that it carries on business activities.

Tax exemption is limited in certain cases.

Special rules apply to, amongst others, the following:

- Dividends received from companies that obtain dividends or capital gains generated from transfers of interests in other companies, provided that such dividends and capital gains exceed 70% of the company's gross income.
- Capital gains arising from transfers of interests in companies that receive dividends or capital gains generated from transfers of interests when such dividends and capital gains exceed 70% of the company’s gross income.

As an alternative to this ‘tax exemption’ regime and applicable to dividend distributions only, a tax credit based on imputation is established. This tax credit allows the crediting of the foreign tax paid abroad on the income from which the dividends are paid and the foreign WHT paid on the profit distribution, up to the limit of the tax that would have been paid on the gross amount in Spain. The only requirement for the application of this ‘tax imputation’ regime is that the Spanish company has at least a 5% interest in the foreign company during the 12 months prior to the date on which the dividend is due and payable. This one-year holding period is deemed to be complied with if it is completed after the dividend is distributed. The tax credit can be carried forward for an unlimited number of years.
Spanish legislation provides for CIT relief on 'juridical' double taxation by applying the 'tax imputation' regime. Under this regime, gross foreign income (including foreign WHT paid) is included for Spanish tax calculation purposes, and a tax credit for the foreign WHT paid is applicable up to the amount of the CIT that the company would have paid if such gross income had been obtained in Spain. The part of the tax paid abroad with respect to which the taxpayer is not entitled to this tax credit may be considered tax deductible, provided that it corresponds to the foreign company's business activities carried out abroad. The tax credit can be carried forward for an unlimited number of years.

Under Spanish tax treaties and implemented EU tax directives, several methods have been established to avoid double taxation. The main one is the traditional deduction of a tax credit from tax effectively paid. However, some treaties establish a tax exemption or the exclusive right to tax. Also, a tax-sparing clause is included in some treaties, which allows for the deduction of not only the tax actually paid but a higher amount of tax.

### Deductions

**Depreciation, amortisation, and depletion**

All assets, except land, are depreciable/amortisable for tax purposes. Guideline tables of tax depreciation/amortisation rates are established that state maximum per annum rates and maximum years of useful life for each asset type, classified by business sector. The tables have been modified for tax periods starting on or after 1 January 2015, and a transitory regime has been established for assets that were being depreciated/amortised at a different rate from the rate established in the new tables.

Please see the table below as an example of the maximum per annum rates and maximum years of useful life established in the tables for some assets that are typically depreciated/amortised:

<table>
<thead>
<tr>
<th>Asset</th>
<th>Maximum per annum depreciation/amortisation rate (%)</th>
<th>Maximum useful life (years)</th>
</tr>

</table>

The straight-line depreciation/amortisation method is normally used, calculated over the asset's useful life and applied on the asset's cost or written-up value (if such a write-up is acceptable for tax purposes). Off-book adjustments must be included in tax assessments if accounting depreciation/amortisation exceeds tax depreciation/amortisation.

Qualifying assets with a useful life of more than one year can also be depreciated/amortised using declining-balance methods. Buildings, furniture, and fittings cannot be depreciated using the declining-balance methods.

For tax periods starting in 2013 and 2014, the tax deduction of recorded depreciation of tangible fixed assets and investment property was limited to 70% of the maximum depreciation permitted by the regulations implemented under Spanish CIT law. This
limitation did not apply to small or medium-sized companies. Recorded depreciation that was not deducted as a result of this limitation could be carried forward and is deductible either on a straight-line basis over ten years or, alternatively, over the asset’s useful life, from the first tax period starting in 2015. For tax periods starting in or after 2015, a deduction may be applied on gross tax payable. The deduction is 5% (2% for tax periods starting in 2015) of the amounts included in the tax base resulting from depreciation charges not deducted in tax periods starting in 2013 and 2014. This deduction compensates the reduction of CIT rates and ensures that the 70% tax depreciation limit only has a financial effect.

Mining assets and assets used for research and development (R&D), amongst others, but not including buildings, can be freely depreciated/amortised for tax purposes.

**Free depreciation**
Unrestricted depreciation of investments in new tangible fixed assets and investment property was regulated for investments made by taxpayers in tax periods starting in 2011, 2012, 2013, 2014, and 2015. This tax relief was also available for tax periods starting in 2009 and 2010, but it could only be availed of if the requirement that the taxpayer's staff levels were maintained or increased was met.

Due to the tax reform carried out by Royal Decree Law (RDL) 12/2012, this tax incentive was repealed effective 31 March 2012.

A transitional regime is provided for investments made prior to that date. Under this transitional regime, unrestricted depreciation tax relief may be applied to these investments, although with certain limits.

**Amortisation of intangibles**
A 60% reduction may be applied on the net income obtained from licensing certain intangible assets if certain requirements are met (the effective tax on this net income would generally be 10%). Effective as of 1 July 2016, the rules to calculate the patent box tax incentive are modified to bring this tax incentive in line with the EU and OECD Agreement. With this reform, income generated from assigning the use of certain intangible assets may be eligible for a reduction in the taxable base of the percentage resulting from multiplying by 60% a coefficient that may not be greater than one (i.e. the maximum reduction will be 60%). For tax years starting in or after 2016, goodwill is amortised under Spanish GAAP during its useful life, which is estimated to be ten years unless otherwise proven. However, it can be amortised for tax purposes at a maximum annual rate of 5%, irrespective of whether or not the assets in question were acquired from a company of the same corporate group. Goodwill acquired from another group company in tax periods starting prior to 1 January 2015 does not qualify for a deduction.

Intangible assets may be amortised during their useful life. When the useful life may not be reliably estimated, the assets will be amortised over ten years, unless otherwise established by law or the regulations implemented under law. This amortisation is tax deductible irrespective of whether or not the assets in question have been acquired from a group company. When the useful life of intangible assets cannot be reliably estimated, the amortisation is tax deductible up to the limit of 5%.

The amortisation of intangible assets acquired from another group company in tax periods starting prior to 1 January 2015 is not tax deductible.

For tax periods starting in or after 2015, taxpayers to whom the 70% limit for tax deductible amortisation applied in 2013 and 2014 are entitled to a deduction against their gross tax payable of the amounts included in their tax base resulting from amortisation not deducted in tax periods starting in 2013 and 2014. The deduction is 5% for tax periods starting in or after 2016. This deduction compensates the reduction of
CIT rates and, consequently, ensures that the 70% tax deductible amortisation limit only has a financial effect.

**Depletion**
Depletion is allowed for mining companies and companies involved in exploring/investigating natural oil resources as established in applicable legislation.

**Financial goodwill**
To promote the internationalisation of Spanish companies, in 2002 a rule was introduced that financial goodwill arising from the acquisition of an interest in a non-resident company (financial goodwill being, in this case, the excess price paid for the acquisition of the business over its net book value at the date of the acquisition that cannot be allocated to the non-resident company's assets in Spain) could be amortised up to a maximum of 5% per year.

To apply this tax relief, the following requirements had to be met:

- A minimum 5% interest had to be held in the non-resident company.
- The non-resident company had to be subject to a similar tax to Spanish CIT.
- The income obtained by the non-resident company had to be generated from business activities carried out abroad in accordance with Spanish CIT law.

Decisions of the European Commission dated 28 October 2009 (regarding interest in non-resident EU companies) and 12 January 2011 (regarding interest in non-resident non-EU companies) considered that this tax relief was unlawful state aid.

According to the Commission’s decisions, only acquisitions of interests in non-resident companies carried out before 21 December 2007 (or before 21 May 2011 for majority interests in non-resident companies established in countries with explicit obstacles to cross-border business combination transactions outside the European Union) can continue applying this tax relief until the financial goodwill is wholly amortised.

The provisions related to financial goodwill tax relief laid down in the CIT Act were amended by Law 31/2011, passed on 4 October 2011, and take effect for tax periods ending on or after 21 December 2007. Under the amended regulation, the financial goodwill tax relief is not applicable for acquisitions of interests in non-resident companies carried out on or after 21 December 2007 (or on or after 21 May 2011, when there is evidence which proves that there is an explicit obstacle for cross-border business combination transactions outside the European Union).

In its decision of 17 July 2013, the Commission has asked the Spanish tax authorities to suspend their rule that allowed for the tax deduction of financial goodwill arising from second or bottom-tier non-resident companies.

On 7 November 2014, two resolutions from the EU General Court annulled the aforementioned decisions of the European Commission on the grounds that the Spanish financial goodwill tax relief did not constitute state aid that was incompatible with the internal market, amongst other reasons, because it could not identify a category of undertakings that benefited from the measure or selectivity.

**Start-up expenses**
According to Spanish GAAP, start-up expenses are considered to be expenses in the financial year in which they are incurred. As no special rule is provided for tax purposes, they are deductible for CIT purposes in the year in which they are incurred.
Spain

Financial expenses

General limits on the deduction of financial expenses
The amount of net deductible financial expenses in the tax period is generally reduced to 30% of operating profit (similar to earnings before interest, taxes, depreciations, and amortisation [EBITDA], applying certain adjustments) for the year, financial expenses of less than EUR 1 million (or the proportional part for tax periods of less than one year) being deductible regardless of the 30% limit. For such purposes, net financial expenses will be considered to be the excess of financial expenses (excluding the non-deductible expenses mentioned below) with respect to income deriving from the assignment of capital to third parties accrued in the tax period.

For companies taxed under the tax consolidation regime, the deduction limit will refer to the tax group. Nonetheless, the company's net financial expenses available for deduction at the time of its inclusion in the group will be deducted, up to the limit of 30% of its operating profit. When a company stops forming part of the group or the group is extinguished and there are net financial expenses available for deduction, the rule will be similar to that for assigning tax losses to the companies that formed part of the group.

Limits on the deduction of financial expenses will not be applicable for dissolved companies for the tax period in which they are dissolved, unless the company is dissolved as a result of a restructuring operation.

Finally, limits on the deduction of financial expenses will not apply to (i) insurance companies or to (ii) credit institutions. Financial expenses that have not been deducted due to the application of this limit can be deducted in subsequent tax periods for an unlimited period of time.

Specific limit on the deduction of financial expenses on the acquisition of interests in the capital or equity of any type of company
A specific limit is introduced for financial expenses generated from debts incurred to acquire interests in the capital or equity of any type of company. These expenses are deductible, subject to an additional limit of 30% of the acquirer’s operating profits, excluding the operating profits of any company that may merge into the acquirer or that may join its tax group during the four years following the acquisition (besides this specific limit, the general limit on tax deductibility will also apply to these financial expenses).

This specific limit is not applicable when the debt associated with the acquisition of the interest reaches a maximum of 70% and is reduced, as of the time of the acquisition, by at least the proportional part corresponding to each of the following years until a level equal to 30% of the acquisition price is reached.

This specific limit does not apply to restructuring operations carried out before 20 June 2014 or to restructuring operations carried out on or after 20 June 2014 between companies that formed part of a tax consolidation group during tax periods starting before that date.

Financial expenses that have not been deducted due to the application of this limit can be deducted in subsequent tax periods for an unlimited period of time.

Specific limit on the deduction of intra-group financial expenses on acquisitions of interests in other group companies or contributions to capital or equity of other group companies
Over the past few years, a large number of tax inspections have adjusted the tax effects of acquisitions of shares from group companies with intra-group debt. Many of these operations were acquisitions of shares in non-resident companies, so that the dividends and capital gains arising from the acquisition of the shares were covered by the
exemption for the avoidance of double taxation established in Article 21 of the Spanish CIT Act. In addition, the lenders of these operations were usually located in low-tax territories.

In the absence of specific limitation rules on the tax deductibility of financial expenses in previous years, the reaction of the tax authorities to these kinds of operations has been to apply general anti-abuse rules.

With this scenario, RDL 12/2012 introduced a limitation rule for the deduction of intra-group financial expenses that is applicable for tax periods starting on or after 1 January 2012. In accordance with this rule, financial expenses arising from debts with group companies generated from acquisitions of interests in other group companies or contributions to capital or equity of other group companies will not be deductible unless there is evidence that there are valid economic reasons for such expenses.

**Participating loans**
Interest on participating loans contracted by group companies on or after 20 June 2014 is, by law, a return on equity and is not deductible for tax purposes. In the recipient’s tax returns (if the recipient is a Spanish CIT payer), they should be treated as dividends and the recipient may be eligible, when appropriate, for a tax exemption for the avoidance of double taxation of dividends.

**Bad debt provisions**
Provisions for covering the risk derived from possible bad debts are tax deductible when, at the time the tax accrues, any of the following circumstances exists:

- Six months have elapsed since the obligation became due.
- The debtor is declared bankrupt.
- The debtor is prosecuted for an offence of embezzlement.
- The obligations have been claimed judicially or are the subject of a legal dispute or arbitration proceedings, and collection depends on the solution thereof.

Provisions for the credits listed below are not tax deductible:

- Credits owed by public law entities, unless they are being examined in an arbitration or court proceeding brought to establish their existence or amount.
- Receivables from related persons or companies, unless they are going through bankruptcy proceedings and the court has declared the initiation of the liquidation phase.
- Credits based on overall estimates of the bad debt risk corresponding to trade and other debtors.

Special rules apply to bank entities.

**Time apportionment of certain allocations or welfare system provisions**
Positive adjustments arising from certain allocations to bad debt or welfare system provisions that are non-deductible under the Spanish CIT Act should be reversed in the corresponding year in accordance with this Act, up to a maximum of 60% of the tax base prior to their inclusion and prior to the capitalisation reserve starting in 2016 (70% in 2015) and the application of prior-year tax losses, with any excess being allocated in subsequent years, subject to the same limits, provided that a deferred tax asset has been recorded.

**Equity investments in companies**
The tax deductibility of impairment allowances of share capital or equity investments in companies has been eliminated for tax periods starting on or after 1 January 2013.
Spain

The elimination of this tax deductibility will be temporary as potential impairment losses will be tax deductible under normal conditions if the shares are transferred or the subsidiary is dissolved.

A complicated transitory system has been established in the Spanish CIT Act to regulate the effects of reversals of impairment allowances deducted in prior years.

With this regulation, the rules on the avoidance of double taxation for distributions of dividends inside or outside Spain have also changed.

**Severance pay**
Severance pay is tax deductible for CIT purposes when it does not exceed, for each recipient, EUR 1 million or, if it exceeds this amount, up to the amount that is exempt under Spanish PIT law.

**Charitable donations**
Donations are considered to be non-deductible expenses for CIT purposes.

This notwithstanding, a tax credit may be availed for donations to non-profit organisations that comply with certain requirements. The tax credit in this case is 35% of the donation. However, if during the two immediately preceding tax periods, deductible donations or contributions have been made to the same company for an amount equal to or exceeding, in each case, those made in the previous tax period, the deduction percentage applicable to the deduction base for the company is 40% in or after 2016.

In addition, the tax credit is not limited to 25% of the donating company's gross tax payable less the deductions for international double taxation and tax relief for income obtained in Ceuta and Melilla, for export activities, and for local public services, which is applicable for other tax credits (see CIT relief in the Tax credits and incentives section).

The tax credit base cannot exceed 10% of the taxable income of the financial year. Any excess may be carried forward for a period of ten years.

For donations to listed priority sponsorship activities, the tax credit may be increased by 5% and the 10% tax credit base limit can be increased to 15%.

**Fines and penalties**
Penalties imposed due to the failure to pay taxes and surcharges for late filing/payment or for other tax infringements are not tax deductible.

The Spanish tax authorities usually consider that late payment interest recorded as an expense is tax deductible; however, some case law in Spain questions whether this interest is a taxable expense.

**Taxes**
Taxes, other than CIT, that are recorded as an expense due to their nature (e.g. business and professional activities tax, but not withholdings) are tax-deductible expenses. In some cases, indirect taxes, such as non-deductible VAT or transfer tax, can be added to the value of assets for depreciation purposes.

**Net operating losses**
For tax periods starting on or after 1 January 2015, tax losses may be carried forward for an unlimited amount of time. Tax losses pending offset at the beginning of the first tax period starting on or after 1 January 2015 may be offset in subsequent tax periods for an unlimited number of tax periods. As a general rule, tax losses cannot be carried back. There are no tax loss ‘baskets’ (operating/capital). Notwithstanding, for tax periods starting in or after 2015, companies whose turnover in the previous tax period was under EUR 10 million may reduce their positive tax base by up to 10% of their amount.
by establishing a non-distributable reserve for the amount of the reduction (reserve for the levelling-off of tax losses). The reduction may not exceed EUR 1 million and should be reversed in line with the tax losses obtained by the company, subject to a five-year time limit.

For tax periods starting in or after 2016, the tax losses of any type of company can be offset against positive income generated in the ensuing tax periods, subject to a limit of 60% (70% in 2015) of their tax base prior to the application of the capitalisation reserve and the offsetting of the tax losses, and with the possibility that EUR 1 million can be offset in all cases. This limit does not apply: (i) in the tax period in which the company is extinguished, unless this is due to a restructuring operation carried out under the tax neutrality regime, and (ii) to any income corresponding to debt relief or deferral resulting from an agreement with creditors.

Complex rules may limit the use of tax losses of a company dissolved as a result of a restructuring operation and, in certain circumstances, when it has a change of shareholders.

**Payments to foreign affiliates**

Supplies of goods or services by a company not established in Spain to a Spanish group company must be valued at arm’s length. If recorded expenses for such goods/services exceed the arm’s-length price, the tax deductibility of the excess amounts could be challenged in a tax inspection. The tax deductibility of expense charges received from tax havens is fully disallowed unless proper evidence of an actual service valued at arm’s length can be provided.

Management services received from outside Spain and recorded as distributions of costs of a group centre do not have to be documented in a written agreement entered into before the commencement of the services to ensure the tax deductibility of the expenses (as previously was the case), although it would be recommendable to have such an agreement. For any other types of services, an agreement recorded before a notary public is not obligatory under Spanish law, but it is advisable.

As regards the taxation in Spain of the foreign company that supplies services, the WHT rate to be applied in or after 2016 on the gross income obtained by the company is 24% (19% for residents in other EU member states or European Economic Area [EEA] countries with which there is an effective exchange of tax information). Dividends, interest, and capital gains generated as a result of a transfer of assets are taxed at a 19% WHT rate from 2016. If management services, technical assistance, or the performance of studies are solely used outside Spain and are linked to business carried on abroad, then no WHT is applicable. In addition, under most tax treaties signed by Spain, ‘business profits’ obtained in Spain by non-residents are exempt from WHT. However, ‘business profits’ is a miscellaneous residual category. For instance, if the amount obtained qualifies as a royalty payment, WHT is applicable at the reduced tax treaty rates if the foreign company can obtain a document from the tax authorities of its country of residence certifying its tax residence. If no tax treaty applies, then the above 24% (19% for residents in other EU member states or EEA countries with which there is an effective exchange of tax information) WHT rate is applicable (see the Withholding taxes section for more information).

**PEs and interests in joint ventures**

Losses obtained outside Spain by means of a PE are not tax deductible. Losses generated from interests in joint ventures that carry on a business activity outside Spain are not tax deductible either.

Negative income generated from the transfer of a PE is tax deductible when the transfer takes place, provided that the acquirer does not form part of the same corporate group.
**Group taxation**

**Tax groupings for CIT purposes**
Under Spanish tax law, companies can form a group and apply a special tax consolidation regime for CIT purposes. Companies forming a tax group must formally pass a resolution agreeing to do so before the beginning of the first tax year in which the tax consolidation regime will be applied.

To apply the tax consolidation regime, the controlling company of the tax group must hold a 75% or higher interest, either directly or indirectly, and the majority of the voting rights in the companies forming the tax group at the beginning of the first tax year in which the tax consolidation regime is applied, and this interest and voting rights must be maintained during the year unless the dependent company is dissolved. The interest requirement is 70% for companies listed on a stock exchange.

For tax periods starting in or after 2015, a non-resident company can also be the controlling company of a tax consolidation group, provided that it has legal personality, is taxed by Spanish CIT, and is not resident in a tax haven. When the controlling company is a non-resident company, the group is made up of all the resident controlled companies and one of the companies is required to be appointed as the representative of the group and will be responsible for complying with all of the group's obligations and formalities.

For tax periods starting in or after 2015, resident companies that meet the minimum holding and voting rights requirements through non-resident companies should be included in the tax consolidation group.

These rules mean that some changes need to be made to the composition of certain groups. They also allow for the possibility of horizontal consolidation.

The main characteristics of the tax consolidation regime are as follows:

- The taxable income of the tax group is the sum of the taxable incomes of each of the companies forming the group.
- The tax losses of any of the companies forming the group can be offset against the tax profits of any of the other group companies.
- For the calculation of consolidated taxable income, the tax profits (losses) generated from transactions carried out between group companies are eliminated and only included in consolidated taxable income when:
  - they are carried out with third parties
  - a group company participating in the internal operation ceases to form part of the tax group, and
  - the tax consolidation regime is no longer applied by the group for whatever reason.
- Specific limitations apply regarding the offsetting of tax losses or the application of tax credits generated by the group companies before they formed part of the tax group. Such tax losses/credits may be offset (applied) by the tax group up to the limit of the tax profits/tax liability of the company that generated the losses/credits after the relevant eliminations and, in the case of tax losses, up to 60% of the positive individual tax base for tax periods starting in 2016 (70% in 2015).
- No WHT is chargeable on payments made between companies of the tax group (e.g. interest, dividends).

**Tax groupings for VAT purposes**
Groups of companies may also choose to be taxed under a special tax consolidation regime for VAT purposes. This special regime is optional, but once it has been opted for, it must be applied for a minimum of three years, which is extendible unless it is expressly waived by the companies.
The VAT consolidation regime may only be applied by companies resident in Spanish VAT territory that do not form part of any other VAT grouping.

The controlling company of the group must be a legal entity or PE that is not dependent on any other entity established in Spanish VAT territory, and its interest in the capital or voting rights of the subsidiary companies of the group should be over 50% for the entire calendar year. A new requirement is established that group companies should be associated in three different ways: economic, financial, and organisational.

With the application of the VAT consolidation regime, there are two different options for taxation:

- The aggregation system, where the balances of the VAT returns of the individual companies of the group are totalled. The right to a tax deduction is exercised by the individual companies.
- The consolidation system, where an individual company can opt to reduce VAT taxable income for inter-company operations, which is limited to the ‘external’ cost.

**Transfer pricing**

All related-party transactions must be valued at market price, following the arm’s-length principle (e.g. the value that in normal market conditions would have been established between unrelated parties).

For this purpose, related persons or entities shall be:

- A company and its shareholders or members.
- A company and its board members or directors, except insofar as concerns the remunerations of the latter.
- A company and the spouses of or persons related to its shareholders or members, board members, or directors, either in a direct line or collaterally, by consanguinity or affinity up to the third degree.
- Two companies of a group.
- A company and the board members or directors of another company, when both companies form part of a group.
- A company and the spouses of or persons related to the shareholders or members of another company, either in a direct line or collaterally, by consanguinity or affinity up to the third degree, when both companies form part of a group.
- A company and another company in which the former company has at least a 25% holding, held indirectly, in its share capital or shareholders’ equity.
- Two companies in which the same shareholders or members or their spouses, or persons related to them either in a direct line or collaterally, by consanguinity or affinity up to the third degree, have at least a 25% holding, whether directly or indirectly, in their share capital or shareholders’ equity.
- A company resident in Spanish territory and its PEs abroad.
- A company not resident in Spanish territory and its PEs in Spanish territory.
- Two companies forming part of a group taxed under the tax regime for groups of cooperative companies.

For cases where association exists as a result of a shareholder/member-company relationship, the shareholding must be 25% or more. The reference to directors shall include *de facto* and *de jure* directors.

The determination of the market value by taxpayers must be done through the application of one of the following transfer pricing methodologies: comparable uncontrolled price (CUP) method, cost plus (CP) method, resale price method (RPM), profit split method (PSM), or transactional net margin method (TNMM). There is no longer an order of priority in the use of these valuation methods. When it is not possible
to apply one of the methods established by the law, other generally accepted valuation methods and techniques based on the arm's-length principle can be used.

Documentation is also a requirement, with taxpayers required to produce group-level and taxpayer-specific documentation for each tax year. Related persons or entities must keep such documentation available for the tax authorities as of the end of the voluntary return or assessment period in question. Some exceptions are established for these documentation requirements.

Documentation is always required for transactions with entities, whether related parties or otherwise, that are resident in tax havens.

For tax periods beginning in or after 2016, a new level of documentation is introduced for Spanish resident parent companies of a commercial group that are not controlled by another company and for Spanish resident subsidiaries controlled by a non-resident company that, at the same time, is not controlled by another company or by PEs of non-resident companies. These companies must submit information annually 'country by country' whenever the group's turnover during the 12 months before the beginning of the tax period is at least EUR 750 million.

Please note that specific penalties may be imposed in the event of the absence of documentation or where data are omitted, inaccurate, or false.

**Thin capitalisation**

Thin capitalisation rules have been repealed.

**Controlled foreign companies (CFCs)**

Spanish CFC rules seek to avoid the effects produced when Spanish tax resident companies or individuals place their capital in low-taxed foreign companies to avoid including passive income generated by such capital in their taxable bases or the effects produced when a subsidiary located in a low-taxed jurisdiction provides services to its Spanish resident parent company that reduces the latter's taxes.

Under this regime, Spanish tax resident companies pay Spanish CIT on the income obtained by a non-resident subsidiary upon meeting certain requirements, including, specifically, the requirement that the Spanish parent company must own, individually or together with other related companies or individuals, over 50% of the non-resident subsidiary's share capital, equity, profits, or voting rights, and the CIT payable by the non-resident subsidiary must be under 75% of the tax that would be payable in Spain.

CFC rules are not applicable to EU resident companies if they are set up for economic reasons and carry on a business activity or to the Collective Investment Institutions regulated in EU Directive 2009/65/CE other than those established in Section 54 of the Spanish CIT Act and domiciled in an EU member state.

There are two types of CFC:

- A 'global CFC' regulation applies if the non-resident company does not have at its disposal an adequate structure of material and human resources unless it can justify that its operations are performed using material and human resources existing in a non-resident company of its same corporate group or that there are valid economic reasons for its incorporation and operations. With this regulation, all income obtained by the company not resident in Spanish territory should be included in the Spanish company's tax base. However, dividends, stakes in profits, or income arising from the transfer of an interest should not be included when the interest exceeds 5%, the minimum ownership period is one year, and the interest is held for the purpose of directing and managing the investee if the investee has an adequate structure of material and human resources and, by law, it is not an equity company.
When the conditions for applying the international tax transparency regime are met and the requirements for the application of the ‘global CFC’ are not met, the following income obtained by non-resident investees should be included in the Spanish company’s tax base:

- Income generated from real estate assets not assigned to a business activity.
- Income generated from an interest held in the equity of any type of company and from the assignment of own capital to third parties.
- Capitalisation and insurance operations in which the beneficiary is the company itself.
- Income generated from industrial and intellectual property, technical assistance, real estate, image rights, and the leasing or sub-leasing of businesses and mines.
- Income generated from transfers of the aforementioned assets and rights.
- Income generated from lending, financial, and insurance activities and the provision of services if they generate a taxable expense in the Spanish resident company. The positive income obtained in this case will not be included if over 50% of the gross income obtained by the non-resident company due to these services comes from services provided to non-related companies.
- Income generated from derivative financial instruments.

The types of income indicated above should not be imputed when the sum of these amounts is less than 15% of the total income obtained by the non-resident company, unless the income is generated from derivative financial instruments, which should be imputed in its entirety.

In addition, the ordinary level of CFC will not apply if the income indicated above corresponds to non-taxable expenses incurred by Spanish tax resident companies.

---

**Tax credits and incentives**

**Foreign tax credit**

*See Foreign income in the Income determination section for a description of double tax relief.*

**CIT relief**

No specific tax relief is established in Spanish law for foreign investors. Relief may be availed of by Spanish and foreign-owned companies alike. The tax relief available under CIT law in Spain is as follows.

Most of the tax credits that have been established to promote certain investments have been eliminated. However, the largest tax credits are maintained (tax exemption/deduction credit to prevent internal and international double taxation, tax credit for R&D, and tax credit for technological innovation).

**Tax relief for business activity/place of business activity**

- 50% tax credit on CIT levied on income obtained in Ceuta and Melilla through companies established and carrying on activities during a full business cycle in these enclaves because of their specific geographic location.
- 99% tax credit on the CIT levied on income obtained from the supply of local public services, except when the state company in question is owned, partially or wholly, by a quoted/non-quoted company or individual.

**R&D and technological innovation credits**

A 25% tax credit can be availed of for expenses incurred from R&D activities. If the expenses are higher than the average R&D expenses incurred by the company during the previous two years, the tax credit is 42% for the excess amount.
Spain

An additional tax credit of 17% can be availed of for staff expenses incurred for staff exclusively carrying out and qualified to carry out R&D activities.

An 8% tax credit can be availed of for investments made in tangible fixed assets (excluding buildings) and intangible assets that are exclusively assigned to R&D activities.

A 12% tax credit can be availed of for technological innovation activities.

Tax relief for R&D and technological innovation can be excluded from the limits on tax relief applied on tax liabilities (see below for Limits on the amount of tax credit applied), which will have a cost of 20% of the tax relief applied, meaning that, if certain requirements are met, 80% of the tax relief for R&D and technological innovation may reduce tax liability after double tax deductions and tax allowances to zero, and any excess tax relief (up to its 80%) may be refunded by the tax authorities.

The requirements for the exclusion of the R&D and technological innovation tax reliefs from the tax relief limits are as follows:

- One tax period has passed since the tax relief was generated and the tax relief has not been applied.
- An amount equal to the tax relief applied or paid has been allocated to R&D and technological innovation expenses or to investments in tangible fixed assets or intangible assets used exclusively for R&D and technological innovation activities, excluding real property, within 24 months of the end of the tax period when the tax relief was applied or paid.
- The taxpayer’s average number of staff (staff in general or staff assigned to R&D and technological innovation activities) has not decreased between the end of the tax period when the tax relief was generated and the end of the reinvestment period.
- The taxpayer has a report that certifies that the activities are R&D and technological innovation activities or it has made an advance agreement with the Spanish tax authorities regarding the valuation of the expenses and investments of the project.

The following should also be taken into consideration:

- The tax relief applied or paid for technological innovation in accordance with the foregoing comments may not exceed a total of EUR 1 million per year.
- The sum of the tax relief applied or paid for technological innovation and the tax relief applied or paid for R&D innovation in accordance with the foregoing comments may not exceed a total of EUR 3 million per year.

If R&D expenses for the year exceed 10% of turnover, an additional amount of EUR 2 million per year of tax credit for R&D can be applied or paid without limitation and with a 20% discount.

**Tax relief for invested profits**

Tax relief for invested profits has been eliminated for tax periods starting on or after 1 January 2015.

This tax relief gave small companies a 10% reduction of their taxable profits, provided that such profits were reinvested in new tangible fixed assets or real property investments used for business activities and certain requirements were met.

Taxpayers may avail of this tax relief for profits generated in tax periods starting between 1 January 2013 and 31 December 2014 even when the investment is made and the other requirements are met in tax periods starting in or after 2015.
**Reinvestment of extraordinary income**
The tax credit for reinvestment of extraordinary income has been eliminated for tax periods starting on or after 1 January 2015.

Taxpayers may continue to avail of the tax credit for income obtained in tax periods starting prior to 1 January 2015 when the reinvestment is made and the other requirements are met in tax periods starting after that date.

The tax credit can also be applied for sales with instalment payments, although, in this case, the tax credit is 10% if the income is included in the tax base for tax periods starting in or after 2016.

**Capitalisation reserve**
The tax base can be reduced by 10% of the increase in equity made in the preceding year, provided that the equity is maintained for a period of five years (except when losses are made), subject to a limit of 10% of the positive tax base of the period prior to this reduction. If this tax base is insufficient, pending amounts may be offset in subsequent tax periods. To apply this tax relief, a reserve should be allocated for the amount of the reduction, which should be undistributable for a period of five years.

**Tax credits for film productions and live performing arts and musical shows**
Investments in Spanish feature-length film productions and the production of audio-visual fiction, animation, or documentary series, where physical copies can be produced prior to serialised industrial production, entitle the producer to a 20% tax credit on the first EUR 1 million of the tax credit base and an 18% tax credit for any excess tax credit base. The tax credit may not exceed EUR 3 million.

A territory requirement is introduced, and this tax relief may only be applied for productions mainly carried out in Spain.

For foreign productions, a tax credit of 15% of expenses incurred in Spain can be applied if certain requirements are met. The tax credit may not exceed EUR 2.5 million. The limit of 25% of gross tax payable does not apply in the case of this tax credit, meaning that gross tax payable may be reduced in its entirety, and if tax payable is not sufficient, the taxpayer may request the difference from the tax authorities in its CIT return.

Taxpayers are eligible for a 20% tax credit for expenses incurred for producing and performing live performing arts and musical shows. This tax credit may not exceed EUR 500,000.

**Tax credit for increases in the number of disabled workers**
A tax credit can be applied for increases in the number of disabled workers contracted per year on a permanent and full-time basis. The tax credit is EUR 9,000 per worker contracted whose level of disability is 33% or more, but less than 65%, and EUR 12,000 per worker contracted whose level of disability is 65% or more. This increase is calculated by taking the average number of company workers of each of these categories in the tax year in question that meet the established requirements and comparing it with the company’s average number of staff in the same category in the previous tax year.

**Reserve for levelling-off of tax losses**
The possibility of reducing the positive tax base of small companies by up to 10% by establishing a non-distributable reserve for the amount of the reduction is introduced (reserve for the levelling-off of tax losses). The reduction may not exceed EUR 1 million and should be reversed in line with the tax losses obtained by the company, subject to a five-year time limit.
Spain

Limits on the amount of tax credit applied
The combined sum of all investment tax credits may not exceed 25% of the company’s gross tax payable less deductions for international double taxation and tax relief for income obtained in Ceuta and Melilla, for export activities, and for local public services. When R&D and technological innovation tax credits for expenses and investments in the year exceed 10% of the company’s gross tax payable, less tax credits and relief mentioned above, the limit will be 50%.

Time limits for the application of tax credits
Tax credits that are not applied in the tax period owing to insufficient tax payable may be applied in tax periods ending in the 15 years immediately thereafter. However, R&D and technological innovation tax credits may be applied in tax periods ending in the 18 years immediately thereafter.

Special tax regimes
Special tax regimes are applicable, among others, in the following cases:

Spanish and European Economic Interest Groupings and Temporary Consortia of Entities

- Spanish Economic Interest Groupings (SEIGs) that meet certain requirements will not be subject to Spanish CIT on the part of the taxable income that corresponds to members resident in Spain for tax purposes. Such part of the positive or negative taxable income shall be deemed to be the profits/losses of the SEIG members. The proportional part of tax credits and payments in advance will also be assigned to the Spanish tax resident members of the SEIG where they are subject to CIT or PIT. Dividends distributed to SEIG members that have been subject to imputation will not be taxed under CIT or PIT on distributions. Dividends distributed to Spanish non-resident SEIG members will be taxed in accordance with the Spanish NRIT law and Conventions for the Avoidance of Double Taxation.

- European Economic Interest Groupings (EEIGs) will be taxed under the above-mentioned regime with the following exception: EEIGs will not be subject to Spanish CIT.

If the EEIG is not resident in Spain for tax purposes, Spanish tax resident members will include the corresponding part of the profits or losses determined for the grouping, corrected by applying the rules for determining taxable income for CIT or PIT purposes, as applicable. When the activity carried out by the members through the grouping determines the existence of a PE abroad, the rules provided for in this law or in the respective treaty for the avoidance of double international taxation will be applicable.

Non-Spanish tax resident members will only be subject to Spanish NRIT when the activity they perform through the grouping determines the existence of a PE in Spanish territory.

Dividends distributed to non-Spanish tax resident members that have been subject to imputation will not be taxed in Spain on the distribution.

- Temporary Consortia of Entities (TCEs) are taxed under the SEIG regime. Members of a TCE operating abroad may apply the exemption for double taxation on income obtained by the TCE abroad through a PE or the deduction for the avoidance of international double taxation on income obtained by the TCE abroad. Losses obtained abroad by members of TCEs are not tax deductible.

Restructuring transactions
The special tax regime for restructuring transactions is a tax neutrality regime implemented under EU Directive 2009/133. As a general rule, under this regime, asset transfers carried out through such transactions do not have any tax implications.
(either from a direct, indirect, or other Spanish tax perspective) for the parties involved (transferor, beneficiary, and shareholder), until a subsequent transfer takes place that is not protected by this regime.

The transactions that can be taxed under this regime are mergers, global transfers, spin-offs of business units/majority interests, splits, share-to-share transactions, contributions of business units, and contributions of assets (this last transaction is not fully tax-protected). Each of them must comply with a series of requirements for the application of the regime.

Transfers of registered offices of an EU company or cooperative society between EU member states will not generate any tax for the company/cooperative society's shareholders on their income, profits, or capital gains.

The tax credit position of a company dissolved as a result of a tax-protected restructuring transaction is ‘acquired’ in full by the beneficiary company in the case of universal succession.

The ‘acquired’ tax credits only include tax credits that are obtained in relation to assets transferred in transactions where the transferor is not dissolved or the succession is not a full succession for Spanish commercial purposes.

Tax losses may be transferred not only when the transferring company is dissolved but also when a line of business is transferred (in the latter case, only tax losses related to this line of business will be transferred), subject in both cases to certain restrictions.

Financial goodwill arising in a merger transaction in which the acquirer owns an interest of at least 5% in the capital of the transferor is amortised for tax purposes at a maximum annual rate of 5% at the level of the Spanish beneficiary company of the merger, provided that such interest was acquired in a tax period that, for the transferor, commenced before 1 January 2015. Amortisation of financial goodwill does not have to be recorded in the income statement for it to be tax deductible.

When the interest has been acquired in a tax period that, for the transferor, commenced on or after 1 January 2015, this tax incentive, which aims to correct double taxation, will not be applicable, as, initially, the whole transferring company's capital gain will benefit from the tax exemption for the avoidance of double taxation, provided that the transferring company is a Spanish CIT payer.

This tax regime cannot be applied if the transaction is carried out for the purpose of tax fraud or evasion (anti-abuse clause). An additional anti-abuse clause in line with the clause established by the EU directive is established in Spanish law to ensure that the tax regime cannot be applied if the transaction is not carried out for valid economic reasons, such as the streamlining of activities or group restructuring to gain efficiency, but to obtain a tax benefit. If the tax authorities decide, as a result of its verification procedures, that the special tax regime is not applicable, either fully or partly, as there are no valid economic reasons for the transaction, the only implication will be that the effects of the tax benefit obtained will be eliminated.

The special tax neutrality regime is applicable by default to restructuring operations. When these operations are carried out, the tax authorities should be notified of the type of operation and, when the case, whether the taxpayer opts not to apply the special tax regime. Failure to notify the tax authorities of this matter is a serious tax offence and carries a fine of EUR 10,000.

For debts incurred to acquire companies, the interest should be deducted for tax purposes taking into consideration the acquirer’s operating profits, excluding the operating profits of any company with which the acquirer may merge during the four
Spain

years following the acquisition. These financial expenses should also be taken into account for the purpose of the general financial expenses limit applicable.

Expenses that are not tax deductible owing to the application of this special rule can be deducted, subject to the above limits, in subsequent tax periods for an unlimited period of time. The limit is not applicable when the debt associated with the acquisition of the interest in the company reaches a maximum of 70% and is reduced, as from the time of the acquisition, by at least the proportional part corresponding to each of the following years until a level equal to 30% of the acquisition price is reached.

This limit does not apply to restructuring operations carried out before 20 June 2014 or to restructuring operations carried out on or after 20 June 2014 between companies that formed part of the same tax consolidation group in tax periods starting on or after that date.

Tax transparency
Tax transparency (under international CFC rules) is not applicable for companies resident in the European Union, provided that the taxpayer can prove that the non-resident company has been set up and operates for valid economic reasons and carries out a business activity or that it is a collective investment institution regulated in EC Directive 2009/65/CE and not established in Section 54 of Spanish CIT Act that has been set up and is domiciled in an EU member state.

*See CFCs in the Group taxation section for more information.*

Venture capital companies and funds
Venture capital companies (VCCs) and funds (VCFs) may benefit from the following tax regime if certain requirements are met:

- Dividends from target companies may benefit from the tax exemption for the avoidance of double taxation, irrespective of the percentage of the interest or the holding period.
- Capital gains arising from the transfer of shares in target companies that do not meet the requirements for the application of the tax exemption for the avoidance of double taxation may be 99% exempted from CIT, provided that such shares have been held for a period between two and 15 years.
- Profit distributions to VCC and VCF shareholders may benefit from the tax exemption for the avoidance of double taxation, irrespective of the percentage of the interest or the holding period, if the shareholders are Spanish tax residents or have a PE in Spain. Income from profit distributions to non-Spanish tax resident shareholders without a PE in Spain is not subject to taxation in Spain unless it is obtained through a tax haven. The same regime applies to the transfer of shares in VCCs and VCFs.

Collective Investment Institutions (CIIs)
CIIs are subject to CIT at a reduced rate of 1%. They are not entitled to apply the tax exemption for the avoidance of double taxation on dividends and capital gains arising from the transfer of shares or a deduction for the avoidance of international double taxation. Dividends distributed by these institutions are subject to the general WHT regime. Shareholders are taxed on dividends received from the CII and on capital gains obtained for the transfer of the CII without being entitled to the application of the tax exemption for the avoidance of double taxation on dividends and capital gains arising from the transfer of shares or a deduction for the avoidance of international double taxation.

Lease transactions
Financial leasing contracts with a purchase option that may be exercised at the end of the lease period may benefit from a special tax regime if they meet certain requirements.
According to this regime, the lessee may deduct the following expenses from its taxable income:

- The part of the lease payments that corresponds to the financial charge (interest) paid to the lessor.
- The part of the lease payments that corresponds to the recovery of the cost of the leased object. Tax deductibility for this amount may not exceed the result of applying twice the straight-line depreciation/amortisation rate applicable on the leased object in accordance with the official depreciation/amortisation tables.

**Spanish holding companies of foreign companies (Entidad de Tenencia de Valores Extranjeros or ETVE) regime**

Spanish resident companies whose corporate purpose includes the holding and management of foreign companies’ shares and that, by law, are not equity companies (i.e. companies that do not carry on a business activity) are granted some tax benefits, subject to compliance with certain requirements.

The tax authorities must be notified of the application of this tax regime.

In addition, the distribution of profits by the holding company to non-resident companies or individual shareholders is not taxable in Spain if such profits come from income generated from non-resident companies and may benefit from the tax exemption for the avoidance of double taxation on dividends and capital gains arising from the transfer of shares or from income obtained abroad through a PE that may benefit from the exemption for the avoidance of international double taxation of income obtained through a PE unless the profits are distributed to a tax haven. Resident company shareholders are entitled to an internal tax credit on dividends under Spanish law.

**Small and medium-sized companies**

Small and medium-sized companies are eligible for tax relief, such as accelerated depreciation/amortisation or more favourable bad debt provision treatment. To be eligible for this relief, turnover in the previous tax year must not exceed EUR 10 million and, by law, the company must not be considered an equity company (a company that does not carry on a business activity). In the case of a group, the turnover of all the companies must be considered for this purpose. Companies that generate a turnover of EUR 10 million that have met the requirements to be considered small and medium-sized companies in the tax period in which they obtained such turnover and in the two previous tax periods may be eligible for this tax relief during the three periods immediately after the period in which they obtain this turnover.

For tax periods starting in or after 2016, the applicable CIT rate is the general rate (25%).

**Special tax regime for companies that lease housing**

Companies whose main business activity is the lease of housing located in Spain that they have constructed, promoted, or acquired may apply a special tax regime that significantly reduces CIT liability, provided that certain requirements are met.

**Real Estate Investment Trust Regime (SOCIMI)**

A special tax regime is established in Spain for listed companies that make investments in the real estate market (called SOCIMIs in Spain) and meet certain requirements. SOCIMIs apply a 0% CIT rate and have strict profit distribution obligations.

**Special economic and tax regime of the Canary Islands**

Due to the remoteness and isolation of the Canary Islands, they have traditionally enjoyed a special economic and tax regime with specific economic and tax measures different to those established for the rest of Spain. See the Tax credits and incentives.
Withholding taxes

Ordinarily, WHT is the mechanism by which the Spanish tax authorities collect the final tax levied on non-residents. In the case of resident beneficiaries, however, it is simply an advance payment of a tax that is then normally self-assessed by the resident taxpayer in the final annual tax return.

The advance payment system of WHT for resident beneficiaries referred to above also applies if non-resident companies/individuals not established in Spain sell their title to Spanish real estate. In this case, the acquirer of the real estate must levy a 3% WHT on the selling price on account of the tax chargeable to the seller on its capital gain (19% from 2016). Other capital gains (for instance, from a sale by a non-resident of a substantial interest in a Spanish company where neither a tax treaty nor internal rules establish a tax exemption) are taxed in the hands of the non-resident transferor, but the mechanics of levying the tax are not those of a WHT. In this case, the non-resident’s tax is paid directly, through its representative or by the depositor or manager of the assets in question, if any.

The following table states the general WHT rates on income obtained by resident/non-resident companies. The most significant peculiarities regarding the rates for each type of income are stated in footnotes to the table.

### Notes

The general rates in the table above are for guidance only and should not be treated as tax advice.

The rates above are for income obtained by non-residents that is not related to any PEs that they may have in Spain.

* Aside from these tax treaties, the following tax treaties are not yet in force, as they are currently being negotiated or are not yet approved or published: Azerbaijan, Bahrain, Belarus, Cabo Verde, Montenegro, Namibia, Peru, Qatar, and Syria.

** These tax treaties are currently being renegotiated.

1. a. If a corporate taxpayer, as a shareholder, is entitled to a tax exemption for the avoidance of double taxation on the dividends received, no WHT is levied. As a general rule, corporate shareholders with at least a 5% interest held for at least one year may apply this tax exemption on the dividends received.
   b. For residents of other EU member states or EEA countries with which there is an effective exchange of tax information, the rate is 19% in or after 2016.
2. a. The 19% WHT rate does not apply if, amongst other cases, the recipient is a resident bank or savings or other financial institution subject to CIT, provided that this income is not portfolio income. In addition, no WHT is levied on interest arising between companies taxed under the tax consolidation regime.
   b. A 19% WHT rate is levied on income generated under royalty and technical assistance agreements, from leases or from the granting of rights when ownership is not transferred. A 24% rate is levied on fees received by a company for the transfer of rights to an image or consent or authorization to its use.
3. Implementation of the EU Parent-Subsidiary Directive in Spanish law gives EU shareholders a WHT exemption on dividends from Spanish companies, subject to compliance with certain requirements. Luxembourg recipients of income that are companies under paragraph 1 of the Protocol to the Tax Treaty with Spain (holding companies) are not allowed this exemption.
4. The EU Interest and Royalties Directive WHT exemption for interest obtained by EU lenders is applicable when appropriate.
5. Taxable income from supplies of services, technical assistance, or assembly/installation work under engineering contracts provided or carried out by non-resident companies with no PE in Spain does not follow the general rule for gross income. In such cases, total income can be reduced by related staff costs, certain supplies (water, electricity, telephone), and materials used for the services/work, provided that, in the case of staff costs, evidence can be furnished that they were actually taxed in Spain. According to the EU Interest and Royalties Directive, royalties paid to other EU member state associate companies are exempt from WHT.
6. A 5% WHT is levied if the recipient is a company that holds at least 10% of the capital of the company paying the dividends; no WHT is levied if the recipient company holds at least 75% of the capital of the company paying the dividends.
7. Levied if the recipient is a company holding at least a 10% interest in the paying company; otherwise, a 15% rate is levied.
8. Interest paid by certain public institutions is tax exempt.
9. Interest paid to certain public institutions is tax exempt.
10. Interest arising from the acquisition of commercial, industrial, or scientific equipment is tax exempt.
11. Interest paid on loans granted by a bank or other financial institution is tax exempt.
12. For royalties for any copyright of artistic, scientific, or literary work (including cinematograph films and films or tapes for radio or television broadcasting), the rate levied is 14%.
13. Levied if the recipient is a company holding at least a 25% interest in the paying company; otherwise, a 15% rate is levied.
14. No WHT is levied on interest when both contracting states agree this and the loan is for no less than five years.
15. No WHT is levied on dividends if the beneficial owner is a company (other than a partnership) that holds at least 25% of the capital of the company paying the dividends.
16. Levied if the recipient is a company holding a direct interest of at least 50% in the paying company for at least one year; otherwise, a 15% rate is levied.
17. No WHT is levied if the recipient is a company holding at least a 25% interest in the paying company.
18. Reduced WHT rates or exemptions are not levied/applied if the income is paid to a company resident in a contracting state more than 50% of whose shares are directly or indirectly held by non-residents. This clause will not apply if the company can prove that it carries out important industrial or commercial activities and does not merely manage or hold shares.
19. A tax exemption can be applied to interest on commercial loans, loans guaranteed by public bodies for the promotion of exports, and on current accounts in banks or nomenclative advances between banks of both contracting states.
20. Royalties for any copyright of literary, theatrical, musical, or artistic work (with some exceptions, such as films and TV programs) are exempt from WHT.
21. A 5% WHT is levied if the beneficial owner (individual or company) is the shareholder of the paying company with at least 20% interest; otherwise, 10% WHT is levied.
22. No WHT is levied on interest if: (i) the recipient is the other contracting state, its central bank, or its political divisions; (ii) the payer is a contracting state or its political divisions; (iii) the interest arises from a loan or credit granted or guaranteed by a contracting state or its political divisions; (iv) the recipient is a financial institution; (v) the recipient is a pension fund qualifying for tax purposes in a contracting state and the income from such fund is tax exempt in the contracting state paying the dividend.
23. Levied if the recipient is a company that directly holds at least 25% of the capital of the paying company; otherwise, a 10% rate is levied. However, if, under the provisions of Spanish CIT legislation and any future amendments, a company resident in Spain is not taxed by Spanish CIT on the dividends that it receives from a company resident in Uzbekistan, the 5% WHT rate shall be reduced to 0%.
24. The maximum WHT is 10% for interest paid to financial institutions for loans and credits granted for a minimum term of ten years for the purchase of capital equipment.
25. Interest arising from securities issued by a contracting state is exempt from WHT.
26. A 10% WHT rate is levied on royalties for copyrights of any literary, scientific, or artistic work (including films and TV programs).
27. Levied if the beneficial owner is a company (excluding partnerships) with at least a 25% interest in the paying company held directly or indirectly; otherwise, a 15% rate is levied.
28. A reduced WHT rate is only levied if the income is taxed in Canada; otherwise, the general rate is levied.
29. Levied if the recipient is a company with at least a 20% interest in the paying company held directly or indirectly; otherwise, a 10% rate is levied.
30. Interest arising from bank or insurance company loans, bonds, some securities that are regularly negotiated on stock markets, and credit sales of industrial equipment are taxed at a 5% tax rate.
31. A 5% WHT rate is levied on royalties for the use of industrial, commercial, or scientific equipment.
32. WHT is levied on 60% of gross royalties for the use of industrial, commercial, or scientific equipment.
33. A 0% WHT rate is levied if the recipient is a company with at least a 20% interest in the paying company held directly or indirectly.
34. No WHT is levied if: (i) the beneficiary is a contracting state, one of its political subdivisions or one of its local entities; (ii) interest is paid in connection with the sale on credit of merchandise or equipment to a company of a contracting state; or (iii) interest is paid on a loan granted by a bank or financial institution resident in a contracting state.
35. A 5% WHT is levied if the beneficial owner is a company that directly holds at least 20% of the capital of the company paying the dividends.
36. a. 5% WHT is levied if the interest is paid on a long-term loan (more than five years).
   b. No WHT is levied: (i) if interest is paid to a Croatian bank, (ii) on interest arising from the acquisition of commercial, industrial, or scientific equipment, (iii) on interest arising from a credit sale.
37. No WHT is levied if: (i) the beneficiary is a contracting state, one of its political subdivisions or one of its local entities; (ii) interest is paid in connection with the sale on credit of merchandise or equipment to a company of a contracting state; or (iii) interest is paid on a long-term loan (five or more years) granted by a bank or financial institution resident in a contracting state.
38. Royalties for copyrights of any literary, theatrical, musical, or artistic work, excluding films and TV programs, are tax exempt if the recipient is resident in the other contracting state and taxed on such income in such state.
39. A 5% WHT rate is levied on interest arising from the sale of industrial, commercial, or scientific equipment, the sale of merchandise from one business to another business, or the financing of construction, installation or assembly works. No WHT is levied if the interest is paid on a long-term loan (more than five years) or if the interest is paid to the other contracting state or one of its political subdivisions or a financial institution totally owned by the other contracting state or one of its political subdivisions.
40. A 5% WHT rate is levied on royalties for copyrights of any literary, theatrical, musical, or artistic work (excluding films and TV programmes).

41. A 9% WHT rate is levied on the gross amount of the dividends if the beneficiary owner is a company (other than a partnership) that has at least a 25% direct interest in the company paying the dividends.

42. WHT is not levied on interest if the recipient is a contracting state, one of its political subdivisions, or one of its public bodies or local authorities, or if the interest is paid to the Central Bank of the other contracting state.

43. No WHT is levied if the recipient has at least a 50% direct interest in the company paying the dividends, provided that the dividends are distributed from profits taxed in Spain.

44. No WHT is levied on interest if: (i) the recipient is the other contracting state, its central bank, or its political divisions; (ii) the payer is a contracting state or its political divisions, (iii) the interest arises from a loan or credit granted by a contracting state or its political divisions, (iv) the recipient is a qualifying financial institution; or (v) the recipient is a pension fund qualifying for tax purposes in a contracting state and the income from such fund is tax exempt in the contracting state paying the dividend.

45. No WHT is levied if the French company has at least a 10% direct interest in the company distributing the dividend.

46. No WHT is levied if the French company receives interest (i) from the other contracting state or any of its political divisions; (ii) from a resident in the other contracting state from an underlying commercial or industrial activity; (iii) in connection with a credit sale of industrial, commercial, or scientific equipment; or (iv) for a loan granted by a financial institution.

47. No WHT is levied on royalties on copyright of any literary or artistic work (excluding films and TV programs) if the recipient is the beneficiary owner or royalties paid for the use or licensing of containers and bare hull vessels or aircraft used in international trade.

48. Dividends and interest may be taxed at source under domestic law when (i) they are generated from any right (including credits) that allows for shares in profits (such as shares, bonds, or participating loans) and (ii) they are tax deductible for the debtor. Notwithstanding, WHT may not exceed 15% when the beneficial owner is tax resident in the other contracting state.

49. Levied if the recipient is a company with at least a 25% direct interest in the paying company; otherwise, a 10% rate is levied.

50. No WHT is levied on interest if: (i) the interest is paid by a contracting state, one of its political subdivisions, or one of its local entities; (ii) the interest is paid to the other contracting state, one of its political subdivisions, or one of its local entities or to a body (including financial institutions) of such contracting state; or (iii) the interest is paid to another body (including financial institutions) in relation to loans granted by virtue of an agreement between both contracting states.

51. No WHT is levied on interest paid to Central Bank of the other contracting state.

52. No WHT is levied on interest paid to companies in the other contracting state if the operation that generates the debt has been authorised by the government of the state where the company paying the interest is resident.

53. A 10% WHT rate is levied on royalties for the use or cession of use of industrial, commercial, or scientific equipment. The general 20% WHT rate is levied on technical services and other royalties.

54. No WHT is levied on interest if the recipient is a contracting state, one of its political subdivisions, or one of its local entities or if the interest is paid to the Central Bank or a financial institution controlled by the other contracting state, its political subdivisions, or its local entities.

55. No WHT is levied on interest arising from the credit sale of industrial, commercial, or scientific equipment.

56. Levied if the recipient is a company with at least a 20% interest in the paying company; otherwise, a 10% rate is levied.

57. Royalties for copyright on literary, theatrical, musical, or artistic work are taxed at a 5% WHT rate. Royalties on films or other means of audio or video transmission, for the use or right to use industrial, commercial, or scientific equipment, or on scientific works or under agreements between both states are taxed at an 8% rate.

58. A 5% WHT rate is levied on interest arising from the sale of industrial, commercial, or scientific equipment, the sale of merchandise from one business to another business, or loans granted by a financial institution.

59. No WHT is levied on interest if the beneficiary owner of the interest is a resident of the other contracting state and: (i) the beneficial owner of the interest is that contracting state, its central bank, a political subdivision, or a local authority; (ii) the interest is paid by the contracting state in which the interest arises or by a political subdivision, a local authority, or non-profit-making statutory body thereof; (iii) the interest is paid in respect of a loan, debt-claim, or credit that is owed to, or made, provided, guaranteed, or insured by that contracting state or a political subdivision, a local authority, or an export facilitating agency thereof; (iv) the beneficial owner of the interest is a financial institution; or (v) the beneficial owner of the interest is a qualifying pension fund and the income of that fund is generally exempt from tax in that other contracting state.

60. A 4% WHT rate is levied on royalties for copyright on literary, theatrical, musical, or artistic work (excluding films and TV programs).

61. Reduced WHT rates are not levied when more than 75% of the shares of the recipient company resident in a contracting state are owned, directly or indirectly, by non-residents and the income generated by the paying company is not taxed in its country of residence.

62. Levied if the recipient is a company with at least a 25% interest in the paying company; otherwise, a 15% rate is levied.

63. No WHT is levied on interest arising from a loan guaranteed by a contracting state.

64. Consideration received for waiving, either totally or partially, the use or right to use goods or rights is considered to be a royalty.

65. No WHT is levied on interest paid in connection with the sale on credit of merchandise or equipment to a company of a contracting state or on interest paid on a long-term loan (five or more years) granted by a bank or credit institution resident in a contracting state.
66. No WHT is levied if the recipient is a company with at least a 5% direct interest in the paying company.
67. A 5% WHT rate is levied on royalties for technical services.
68. No WHT is levied on dividends paid to a shareholder resident in the other contracting state of the company distributing the dividend with at least a 25% interest.
69. A 10% WHT rate is levied on interest received by a bank (beneficial owner).
70. Levied if the recipient is a company with at least a 50% direct interest in the paying company. A 5% WHT rate is levied if the recipient is a shareholder with at least a 25% direct interest; otherwise, a 10% rate is levied. WHT is reduced to 5% if the recipient company is not taxed in the Netherlands for this dividend.
71. WHT is reduced to 10% if the recipient is a Dutch company with at least a 50% direct interest in the paying company or if the recipient holds 25% of its capital and another Dutch company holds at least the other 25%.
72. No WHT is levied on capital gains from sales of assets/rights when they are considered to be a royalty.
73. a. No WHT is levied on fees paid for the use or licensing of containers and bare hull vessels or aircraft used in international trade.
   b. A 5% WHT is levied if the beneficial owner is a company that has owned directly, during a period of six months, at least 50% of voting shares of the company paying the dividends; a 7.5% WHT is levied if the beneficial owner is a company that has owned directly, during a period of six months, at least 25% of voting shares of the company paying the dividends.
74. Levied if the recipient is a shareholder of the paying company holding voting rights with at least a 10% direct interest; otherwise, a 15% rate is levied.
75. A 10% WHT rate is levied on interest paid for bonds or similar securities generally offered to investors and related to transfers of industrial, commercial, or scientific equipment. No WHT is levied on interest from bonds or similar securities issued by the state or a local entity or from loans given or guaranteed by either of the two contracting states, Central Banks, or financial institutions as agreed between the contracting states.
76. A 20% WHT rate is levied on royalties for films or audio or TV tapes.
77. No WHT is levied on interest from loans granted or guaranteed by a contracting state.
78. If the recipient has invested more than EUR 100,000 in the company that pays the dividend or the dividend is tax exempt in its country of residence, the WHT rate levied is 10%. If both of these requirements are fulfilled, the rate applicable is 5%.
79. Interest on loans with a maturity period of over seven years is tax exempt.
80. A 10% WHT rate is levied on any patents, trademarks, designs or models, plans, secret formulae, or processes and computer software, or for the use of, or the right to use, industrial, commercial, or scientific equipment, or for information concerning industrial, commercial, or scientific experiences. A 5% WHT rate is levied on any copyright of literary, artistic, or scientific work, excluding computer software and including cinematographic films or tapes used for radio or television broadcasting.
81. No WHT is levied on interest paid to a contracting state, one of its political subdivisions, or one of its local entities or interest paid in connection with the sale on credit of merchandise or equipment to a company of a contracting state or interest paid on any long-term loan (seven years minimum) granted by a bank resident in a contracting state.
82. No WHT is levied on interest arising from the credit sale of industrial, commercial, or scientific equipment or merchandise.
83. No WHT is levied on dividends when they are paid to a shareholder with at least a 10% interest held for at least one year, provided that the company distributing the dividends is effectively taxed.
84. No WHT is levied on dividends when they are paid to a shareholder with at least 10% direct interest.
85. No WHT is levied if the royalties are paid between associated companies, affiliated by at least a 25% direct interest held for at least two years or both held by a third company with at least a 25% interest in both companies held for at least two years, and CIT is levied on all of the companies.
86. a. A 10% WHT rate is levied on interest received by financial and insurance entities. No WHT is levied on interest from loans granted by the government, Central Bank, or certain institutions.
   b. A 5% WHT rate is levied on royalties for any copyright of literary, artistic, theatrical, musical, or scientific work (excluding cinematograph films and films or tapes for radio or television broadcasting); an 8% WHT is levied on financial leasing related with the use or the right to use industrial, commercial, or scientific equipment.
87. a. Reduced WHT rates or exemptions are not levied/applied if the income is paid to a company resident in a contracting state more than 75% of whose shares are directly or indirectly held by non-residents and such income is not subject to taxation in such contracting state.
   b. Levied if the recipient is a shareholder of the paying company with at least a 50% interest; otherwise, a 15% rate is levied.
88. A 5% WHT rate is levied for long-term loans (more than seven years).
89. The WHT rate is 10% if the interest arises from a loan granted by a bank or is related to a credit acquisition of merchandise or equipment.
90. Levied if the recipient is a shareholder of the paying company with at least a 10% interest; otherwise, a 15% rate is levied.
91. a. No WHT is levied on royalties paid for the use or licensing of containers used in international trade.
   b. No WHT is levied on dividends when they are paid to a company holding at least a 75% direct interest in the paying company.
92. No WHT is levied if the interest is paid on a long-term loan (more than three years) to finance investment projects if the interest is paid to a pension fund that meets certain requirements or if the interest is paid in relation to a credit acquisition of merchandise, equipment, or services.
93. A 5% WHT is levied on royalties for any copyright of literary, artistic, or scientific work.
94. A 4.95% WHT rate is levied on interest received by financial institutions.
95. No WHT is levied on interest if: (i) the recipient is the other contracting state, its central bank, or its political divisions; (ii) the interest is paid by one contracting state or its political divisions; (iii) the interest arises from a loan or credit granted or guaranteed by a contracting state to promote exports and development, (iv) the recipient is a pension fund qualifying for tax purposes in a contracting state and the income generated from the fund is tax exempt in the contracting state paying the dividend, or (v) the interest is paid in relation to the credit acquisition of industrial, commercial, or scientific equipment.
96. Levied if the recipient is a shareholder of the paying company with at least a 50% interest. A 10% WHT rate is levied if the recipient is a company with at least a 25% direct interest; otherwise, a 15% rate is levied.
97. No WHT is levied on interest arising from loans granted or guaranteed by qualifying public institution or interest paid to public financial institutions.
98. No WHT is levied if the recipient is a company (other than a partnership) with at least a 25% direct interest in the paying company; otherwise, a 5% rate is levied.
99. No WHT is levied if the recipient is a company with at least a 10% direct interest in the paying company; otherwise, a 10% rate is levied.
100. A 5% WHT rate is levied if the recipient (excluding partnerships) is a shareholder with at least a 40% direct interest in the paying company; otherwise, a 10% rate is levied. No WHT is levied if the recipient is a shareholder with at least an 80% direct interest in the paying company, and (i) its shares are listed on a stock exchange, (ii) the recipient is at least 50% owned by residents from either of the two countries, (iii) the recipient is owned by shareholders resident for tax purposes in third countries by a proportion of less than 25%, and (iv) the recipient is owned (an interest of more than 25%) by residents, provided the avoidance of a tax treaty for the avoidance of double taxation has been signed with the country of the company paying the dividends and that this tax treaty establishes the same or more favourable conditions. No WHT is levied for dividends paid to pension funds.
101. Reduced rates/exemptions are not applicable when a Panama tax-resident company pays dividends, interest, or royalties to a Spanish tax resident and such income has been obtained either in Spain or in a country that has not signed a tax treaty for the avoidance of double taxation with Spain.
102. Levied if the recipient is a company (excluding partnerships) with at least a 10% direct interest in the paying company; otherwise, a 5% rate is levied. In the case of distributions made out of a real estate investment trust, 5% is levied if the beneficial owner holds, directly or indirectly, less than 10% of the value of the capital in such trust.
103. No WHT is levied on interest if: (i) the recipient is a contracting state of the treaty, its central bank, or its local collectivities; (ii) the payer is a contracting state or its local collectivities; (iii) the payer is a financial institution of a contracting state and interest is paid to a financial institution of the other contracting state; (iv) the recipient is a pension fund qualifying for tax purposes in a contracting state and the income from such fund is tax exempt in the contracting state paying the dividend; (v) the interest is paid in respect of a loan, debt-claim, or credit that is owed to, made, provided, guaranteed, or insured by an export financing agency of a contracting state or political division, or guaranteed or insured by that state or political division; (vi) the recipient is an institution wholly or mainly owned by a contracting state as may be agreed from time to time between the competent authorities; or (vii) the recipient is the government of Singapore Investment Corporation Pte Ltd.
104. No WHT is levied on dividends if the beneficial owner is a company resident in the other contracting state whose capital is wholly or partly divided into shares and it has held at least 25% of the capital of the dividend-paying company for at least two years before the date of such payment and such dividends are not subject to profit tax in the other contracting state.
105. 5% WHT rate is levied on royalties paid for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematographic films or films and tapes used for radio or television broadcasting.
106. Levied if the recipient is a company with at least a 25% direct interest in the paying company; otherwise, a 15% rate is levied.
107. No WHT is levied on interest if: (i) the interest is paid by a contracting state, one of its political subdivisions, or one of its local collectivities; (ii) the interest is paid to the government of the other contracting state or one of its local collectivities or to a body (including financial institutions) fully owned by such contracting state or its local collectivities; (iii) the interest is paid to another body (including financial institutions) in relation to loans granted under an agreement signed between both contracting states for a term of at least five years; or (iv) the interest is paid in relation to the acquisition of industrial, commercial, or scientific equipment.
108. (i) 3% WHT is levied on royalties paid for the use of, or the right to use, news; (ii) 5% WHT is levied on royalties paid for the use of, or the right to use, copyright on literary, artistic, or scientific works; and (iii) 10% WHT is levied on royalties paid for the use of, or the right to use, patents, designs, models, plans, secret formulae, processes or computer software, or for the use of, or the right to use, industrial, commercial, or scientific equipment or for information concerning industrial, commercial, or scientific experiences or technical assistance services.
109. 15% WHT is levied on dividends paid to pension funds, either directly or indirectly, from immovable property through an investment vehicle that distributes most of its income annually and whose income is tax exempt. In addition, no WHT is levied if the recipient is a company that directly or indirectly holds at least a 10% interest in the paying company or if the recipient is a pension plan of the other contracting state.
110. Levied if the recipient is a company with at least a 10% direct interest in the paying company; otherwise, a 5% rate is levied.
111. No WHT is levied on dividends if the beneficial owner is a company (excluding unlimited liability companies) that directly holds at least 75% of the capital of the company paying the dividends.
112. A 4.95% WHT is levied on interest if: (i) the recipient is the other contracting state, its central bank, or its political divisions; (ii) the payer is a contracting state or its political divisions; (iii) the interest arises from a loan or credit granted or guaranteed by a contracting state, its political divisions, or an export
credit agency; (iv) the interest is paid in relation to the acquisition of any equipment, goods, or services; (v) the recipient is a pension fund qualifying for tax purposes in a contracting state and the income from such fund is tax exempt in the contracting state paying the dividend.

113. No WHT is levied on interest if: (i) the interest is paid by a contracting state or one of its political divisions or (ii) the interest is paid to the government of the other contracting state or one of its political divisions or to a body (including financial institutions) fully owned by such contracting state or its political divisions.

114. 7.5% WHT rate is levied if the recipient is a company (other than a partnership) that directly holds at least 10% of the capital of the company paying the dividend.

115. No WHT is levied on interest if the recipient is the beneficial owner and it is the government of the other contracting state, one of its political subdivisions, one of its local entities, the Central Bank, or a financial institution controlled by the other contracting state.

116. 7.5% WHT is levied on royalties if the recipient is a company.

117. If under any agreement or arrangement between Nigeria and a member state of the OECD Nigeria declared exempt from taxation the dividends, interest, or royalties from a Nigerian source, or limited the tax charged in Nigeria on such dividends, interest, and royalties at rates below those established in the double tax treaty (DTT) with Spain, such exemption or lower rate shall automatically apply to dividends, interest, or royalties from the Nigerian source beneficially owned by a Spanish resident.

118. No WHT is levied on interest if the recipient is the other contracting state, its central bank, or its political divisions; (ii) the payer is a contracting state or its political divisions; or (iii) the interest arises from a loan or credit granted by a contracting state or its political divisions.

119. The provision in this article shall not apply if: (i) a company of a contracting state paying dividends, interest, or royalties to a company resident in the other state has generated its income from a jurisdiction that does not have a double taxation agreement with that other contracting state; and (ii) that income is exempt from or not subject to tax in the first contracting state.

120. No WHT is levied if the beneficial owner is a company that directly holds at least 20% of the capital in the paying company; otherwise, a 10% rate is levied.

121. 5% rate is applicable if the beneficial owner is a company that directly holds at least 10% of the capital in the paying company; otherwise, a 15% rate is levied.

122. Notwithstanding:

a. Interest arising in a contracting state and paid to a resident of the other contracting state shall not be taxable in the first-mentioned contracting state if the beneficial owner of the interest is a resident of the other contracting state and is dealing at arm’s length with the payer. This shall not apply where all or any portion of the interest is paid or payable on an obligation that is contingent or dependent on the use of or production from property or is computed by reference to revenue, profit, cash flow, commodity price, or any other similar criterion or by reference to dividends paid or payable to shareholders of any class of shares of the capital stock of a company.

b. Interest arising in Spain and paid to a resident of Canada shall be taxable only in Canada if it is paid in respect of a loan made, guaranteed, or insured, or a credit extended, guaranteed, or insured by Export Development Canada.

c. Interest arising in Canada and paid to a resident of Spain shall be taxable only in Spain if it is paid in respect of a loan, debt-claim, or credit that is owed to or made, provided, guaranteed, or insured by Spain or a political subdivision, local authority, or export financing agency thereof, provided the loan, debt claim, or credit is in respect of exports.

Tax administration

Taxable period

The tax year for CIT purposes is the company’s accounting year. The tax year cannot exceed 12 months. Incorporation, change of accounting year, or dissolution of a company can give rise to a period of less than one year.

Tax returns

The tax system in Spain is a self-assessment system, and tax returns may be inspected by the tax authorities.

Annual CIT returns must be filed within 25 calendar days following the six months subsequent to the end of the tax year (i.e. if the tax year coincides with the calendar year, the return must be filed between 1 July and 25 July of the following calendar year).

Payment of tax

For CIT, three advance payments of the annual tax payment must be made during the first 20 calendar days of April, October, and December. The final CIT payment must be made with the annual CIT return.

For companies whose turnover, in accordance with Spanish VAT law, for the 12 months prior to the beginning of a tax period exceeds EUR 6,010,121.04, the advance payments are calculated by applying 17% for tax years starting in or after 2016 to the taxable
income (reduced by any applicable tax-loss carryforwards) for each advance-payment period, i.e. at 31 March, 30 September, and 30 November (percentage applicable to companies that are taxed at the general CIT rate).

Small and medium-sized companies can opt to calculate their advance payments in the same way as large companies (applying a percentage of 17% for tax periods starting in or after 2016) or to apply a rate (currently 18%) on the tax liability of their last advance CIT return filed on 1 April, 1 October, or 1 December.

Variable capital investment companies, financial investment funds, real estate investment companies, real estate investment funds, mortgage market regulation funds, and pension funds that meet certain requirements and are taxed at a 1%, or even a 0%, tax rate should not make advance payments and are not required to file the corresponding tax return.

**EUR 2,500 limit on cash payments**
Payments in cash over EUR 2,500 are not allowed for transactions in which at least one of the parties is a person carrying on a business or professional activity, and fines of up to 25% of the amount of the transaction can be imposed on both the payer and the recipient of these cash payments.

**Tax inspections**
The Spanish tax authorities have a tax inspection department that is responsible, amongst other things, for verifying that taxpayers’ obligations are correctly complied with and, if necessary, for making adjustments to their tax affairs by issuing one or more tax assessments.

As part of its responsibilities, the tax inspection department may investigate a taxpayer's tax affairs to ensure that they are correct and verify the accuracy of filed tax returns.

Taxpayers' tax returns to be examined by the tax inspection department are chosen on the basis of different criteria, such as: (i) by random sample, (ii) if debt push down restructuring transactions have been carried out that involve Spanish companies with material debt levels, (iii) if companies have recurring tax-loss carryforwards, or (iv) if companies are related to a family group and lack a production or commercial structure and where their personal and business assets are not clear.

If taxpayers disagree with a tax assessment issued by the tax inspection department as a result of a tax inspection, they may file an appeal firstly with the Spanish economic-administrative tribunal for tax appeals and then, if the appeal is not upheld by the tribunal, with the ordinary courts.

If taxpayers have paid incorrect amounts of tax to the tax authorities, they may claim a refund of any excess tax paid from the authorities within the statute of limitation period (four years) by means of a special procedure that commences with the filing of a request with the tax authorities.

**Statute of limitations**
The statute of limitations for taxes in Spain is generally (with some exceptions) four years starting from the day following the date of termination of the voluntary tax filing period.

This four-year period may re-start for a tax if the tax authorities carry out any actions or procedures, with the formal acknowledgement of the taxpayer, to acknowledge, adjust, review, inspect, guarantee, or collect all, or any part of, a tax obligation, or due to actions by the taxpayer, such as the filing of a new or late tax return, that alters or rectifies a previous tax return or the filing of an appeal or claim by the taxpayers regarding the tax.
The tax authorities' entitlement to verify or investigate tax-loss carryforwards, tax relief availed of for carrying on certain activities, and deductions for the avoidance of double taxation is time-barred after ten years.

At the end of the ten-year period, evidence of the origin and amount of tax losses must be given by presenting the relevant tax assessment or self-assessment and accounting records and, in addition, giving evidence that such assessments and records were filed and deposited with the Companies Registry during this period.

This amendment will apply to verification and investigation proceedings ending after 1 January 2015, provided that no tax assessment has been formally proposed for such proceedings before that date.

**Topics of focus for the tax authorities**

Every year, the Spanish tax authorities issue general guidelines on the authorities' annual tax and customs control plan. These guidelines identify areas where the tax authorities intend to adopt a greater role of verification, inspection, and monitoring during a certain tax year.

**Obligation to disclose assets located overseas**

Assets, such as accounts, shares, or real estate, that are located overseas must be disclosed. Severe fines are imposed (a minimum of EUR 10,000) for breaching this obligation.

In addition, assets regarding which the information disclosure obligation is not complied with by the established time limits are treated as unreported income for CIT payers and allocated to the earliest tax period of those that are not statute barred. Breaches of the obligation to declare this income are a very serious infringement, and fines of 150% of the gross tax liability are imposed.

**Other issues**

**Automatic and standardised exchange of tax information agreements**

The US Foreign Account Tax Compliance Act (FATCA) was enacted in 2010 to detect and prevent offshore tax evasion. Although, due to its name, it may seem that FATCA is for financial institutions, many global companies outside the financial services industry may be affected by FATCA if companies of their worldwide network fall under the purview of FATCA or have operational areas that make or receive payments subject to FATCA.

Multinational companies that are withholding agents are already required to report, withhold on payments, and record payees, but FATCA requires that changes be made to these activities. FATCA has established that multinational businesses should assess company payees differently, engage in withholding on certain gross proceeds transactions (a change from historic processes), and report other information to the US Internal Revenue Service (IRS).

The withholding provisions of FATCA came into effect on 1 July 2014. Compliance with FATCA may require changes to existing systems and processes across business units and regions, the renewal of policies and day-to-day practices, as well as other new tasks, such as registering with the IRS.

Spain and the United States have signed an intergovernmental agreement (IGA) aimed at improving compliance of international tax laws and enforcing FATCA. Under this agreement, published in the Spanish Official State Gazette on 1 July 2014, financial institutions in Spain and the United States are required to provide their tax authorities with information on taxpayers from the other signatory country. This information will
then be automatically exchanged between those tax authorities through a standardised procedure.

**Special tax regime applicable in the Basque Country**
The three provinces that make up the region of the Basque Country (Álava, Guipúzcoa, and Vizcaya) have an ‘economic agreement’ with Spain’s central government (laid down in and regulated by Law 12 of 23 May 2002) in accordance with which these provinces are entitled to establish their own tax regimes.

There are certain provisions in Law 12 of 23 May 2002 regarding CIT that make this region of Spain more attractive for companies, and three CIT Acts have come into effect for each of the three provinces for tax periods beginning on or after 1 January 2014.

*See the Other issues section of Spain’s Corporate tax summary at [www.pwc.com/taxsummaries](http://www.pwc.com/taxsummaries) for more information.*

---

**Significant developments**

Capital allowance is granted on 100% of the cost of plant, machinery, or equipment acquired and used in any new undertaking commenced on or after 1 April 2015 for manufacture of products for export, with an investment of less than 2 million United States dollars (USD).

Fees for technical services paid to persons overseas directly or indirectly by a person in Sri Lanka are deemed to be profits and income arising in, or derived from, Sri Lanka (Sri Lanka source income), and withholding tax (WHT) at 20% is deductible at source.

Effective from the tax year 2016/17, corporate income tax (CIT) rates are revised to three tax rates of 40%, 28%, and 17.5%.

---

**Taxes on corporate income**

Resident companies and public corporations are liable for CIT on their worldwide taxable income. Non-resident companies are liable for CIT of their Sri Lanka-source taxable income.

CIT rates are based on the nature of the income and the institution earning the income, as follows:

</table>

* Unit trusts and mutual funds are treated like resident companies for CIT purposes. Units of investment are treated like company shares, and returns to investors are treated like company dividends.
Sri Lanka

**Dividend tax**
A dividend tax is payable at 10% on the gross dividends distributed by a resident company, other than such dividends distributed out of any dividend received from another resident company (and few other exceptions).

**Deemed dividend tax**
A deemed dividend tax of 15% is payable by any resident company in any tax year if the said company has, in the preceding tax year, distributed dividends of less than 10% of the distributable profits (duly defined) for that preceding tax year.

The tax base for the 15% deemed dividend tax is the book profits of the company reduced by the aggregate of the CIT payable by that company for that tax year, the cost incurred by the company in that tax year in the acquisition of any land or any capital asset, and any notional profit computed on the basis of a revaluation of any capital asset included in such book profit and increased by the aggregate of the allowance for depreciation deducted in respect of any capital asset acquired in that tax year and any notional loss computed on the basis of a revaluation of any capital asset included in such book profit.

**Special tax on public corporations**
In the case of a public corporation, where not less than 75% of the capital is provided by the government (other than via a loan), a tax of 25% of the balance profits, after deducting CIT payable, will be charged. However, where the total gross dividends distributed are not less than 25% of such balance, no special tax will be charged in the relevant years. Where the total gross dividends distributed are less than 25% of such balance, the tax chargeable will be the difference between such balance and the dividends distributed.

**Remittance tax**
Where profits of a non-resident company are remitted in a tax year, a remittance tax of 10% of the remittances is payable.

**Local income taxes**
There is no local or provincial income tax in Sri Lanka.

**Corporate residence**
A company is treated as resident for tax purposes in Sri Lanka if its registered or principal office is in Sri Lanka or if the control and management of its business is exercised in Sri Lanka.

**Permanent establishment (PE)**
PE is only a treaty concept in Sri Lanka. If a non-resident company creates a PE in Sri Lanka in terms of a double tax treaty (DTT), then such company is liable to Sri Lanka CIT. In the absence of a DTT, the domestic tax laws will apply.

**Other taxes**

**Value-added tax (VAT)**
VAT is payable on imported goods and on the supply of goods (including wholesale and retail trade where the turnover, liable supplies, per quarter is not less than LKR 3 million) and services in Sri Lanka. Provisions are made for filing returns monthly or quarterly, based on specified criteria. Even where returns can be filed quarterly, the tax payments are required to be made on a monthly basis by manufacturers and on a half-monthly basis by others. Certain specified imports and domestically supplied goods and/or services are exempt.
VAT is payable on the prescribed valuations of imports and domestic supplies at a standard rate of 15% as of 2 May 2016 (previously 11%). Exports and certain specified international services are zero-rated.

Registration for VAT arises only if the quarterly value of taxable supplies exceeds LKR 3 million as of 2 May 2016 (previously LKR 3.75 million) or the annual value of taxable supplies exceeds LKR 12 million as of 2 May 2016 (previously LKR 15 million).

The input tax paid on the imports and supplies of goods (including capital goods) and services in a month, and used in the business of making taxable supplies in that month, can be deducted from the tax payable (output tax) on such supplies, subject to a limitation of the lesser of 100% of output tax or the actual input tax paid.

Refunds of excess VAT paid are available to zero-rated supplies, to suppliers who are qualified to issue suspended tax invoices, and to new businesses registered under Section 22 (7) of the VAT Act. A simplified VAT scheme has been introduced to relieve zero-rated suppliers and other qualified suppliers from the burden of paying input VAT, thereby obviating the need for the issue of refunds.

**Customs duties**
Customs duty is levied on the value for customs duty (i.e., transaction value). World Trade Organization (WTO) rules on customs valuations are implemented. Sri Lanka has a simplified three-tier tariff structure. The rates are published in the government gazettes. The current rates are 15%, 30%, and 0% (applies to few goods).

**Special Commodity Levy**
Special Commodity Levy is imposed on certain commodity items at the rate specified by the Minister by order published in the gazette at the point of importation of such commodities. Special Commodity Levy is covered by the Director General of Customs.

Special Commodity Levy is a composite levy, and no other tax, duty, levy, cess, or other charge is imposed in terms of any other laws specified as applicable in respect of the commodities specified in any such order.

**Excise duties**
Excise duties and special excise levies are charged on tobacco, cigarettes, liquor, motor vehicles, selected petroleum products, paints, air conditioners, dishwashers, household washing machines, and other products at various rates and at unit rates.

**Stamp duty**
Stamp duty is payable on specified instruments and documents at rates prescribed in the Gazette.

**Economic Service Charge (ESC)**
As of 1 April 2016, ESC is payable quarterly by all businesses at 0.5% (previously 0.25%) of the aggregate turnover of the trade, business, profession, or vocation if the total turnover exceeds LKR 50 million for that quarter. ESC so paid is deductible from the CIT payable for that tax year. ESC is not refundable but can be carried forward for two immediately succeeding tax years to be set off against CIT payable.

**Nation Building Tax (NBT)**
NBT is chargeable at 2% from every person (a person includes a company) who imports any article on the 'liable turnover' from such importation, who carries on the business of manufacture of any article, who provides a service of any description, or on the wholesale or retail sale of any article (other than such sale by the manufacturer of that article) on the liable turnover of the relevant quarter. Certain specified articles or services are exempt from NBT.
The threshold for NBT is LKR 3 million as of 2 May 2016 (previously LKR 3.75 million) per quarter, or LKR 12 million per annum as of 2 May 2016 (previously LKR 15 million).

Liable turnover means:

- In the case of importers, the value of any article ascertained under Section 6 of the VAT Act for the purpose of importation.
- In the case of manufacturers, the proceeds receivable, whether received or not, from the manufacture and sale of goods in Sri Lanka.
- In the case of service providers, the proceeds receivable, whether received or not.
- In the case of wholesale or retail traders, the proceeds receivable, whether received or not, other than pharmaceuticals, gems and jewellery sold for payment in foreign currency, and any article subject to the Special Commodity Levy sold by an importer.

In case of wholesale and retail traders, 50% of the liable turnover will be taxed at a zero rate and the remaining 50% will be taxed at 2%. In the case of a distributor as defined in the ESC Act, 75% of the liable turnover will be taxed at a zero rate and the remaining 25% will be taxed at 2%.

Bad debts, VAT, excise duty (other than such excise duty paid on importation) rebate under export development, or services in relation to an international event should not be included in the liable turnover.

**Construction Industry Guarantee Fund Levy**

As of 1 January 2016, Construction Industry Guarantee Fund Levy has been removed. This levy was payable by each construction contractor or subcontractor on the contract value arising from any contract entered into, calculated at rates varying from 0.25% to 1%, depending on the value of the construction contract.

**Tourism development levy**

Tourism development levy is payable by tourist hotels and institutions licensed under the Tourist Development Act on the turnover of such institution at the rate of 1%.

**Employees Provident Fund (EPF)**

Employers and employees are required to contribute specified percentages (employer 12%, employee 8%) of each employee’s monthly emoluments/salary to the EPF established by the government. Alternatively, employers and employees can contribute to certain private provident funds approved by the labour authority.

**Employees Trust Fund**

Employers are also required to contribute a specified percentage (currently 3%) of each employee’s monthly emoluments/salary to the Employees Trust Fund established by the government.

**Share transaction levy**

Share transaction levy at the rate of 0.3% is chargeable from both the buyer and the seller on the sale value of listed shares transacted through the Colombo Stock Exchange.

This levy was temporarily suspended from 1 January 2016 to 15 April 2016.

**Local taxes**

Taxes (more usually called rates) are currently assessed and collected annually from the owners of land and premises by the local authorities of the areas in which the properties are located. These authorities also charge and collect annual licence fees from certain businesses.
Sri Lanka

**Branch income**

Foreign companies are permitted to register a place of business as an ‘overseas company’ in Sri Lanka under local company law, where the business carried on conforms to the stipulations made under the Exchange Control Law.

An overseas company registered under the Companies Act may also carry on in Sri Lanka any non-commercial, non-trading, or non-industrial activities, such as the activities undertaken or carried on by a liaison office, representative office, regional office, or other similar office, provided such activities do not directly or indirectly provide any income to the company.

In addition to paying the standard CIT, a trading branch is also subject to the 10% remittance tax on remittance of its after tax profits to its foreign head office.

The Sri Lanka-source income of foreign companies from a local ‘place of business’ is taxed at the CIT rate. However, under most DTTs that Sri Lanka has entered into, the income of a project carried out will not be liable for CIT if its duration is less than the period specified in the treaty concerned.

Where branch or project income is liable for CIT but the income is not readily ascertainable, the tax authority may prescribe that the income be computed on a fair percentage (not less than 6%) of the branch or project turnover in Sri Lanka.

**Income determination**

Business accounting for CIT purposes should, unless otherwise specified by the tax statute, conform to Sri Lanka Accounting Standards.

**Inventory valuation**

Inventories should be measured at the lower of cost and net realisable value.

**Capital gains**

There is no capital gains tax. Capital gains from transfer of property are exempt from CIT.

**Dividend income**

Resident company dividends paid on shares held by resident or non-resident persons are not assessable to the recipients if income tax is withheld on such dividends (see the Withholding taxes section), the dividends are exempt from income tax, or the dividends are paid out of dividends received from resident companies.

**Stock dividends**

Stock dividends (bonus shares) are not taxable in the hands of a shareholder at the time of issue; however, where such shares are capitalised out of company profits and there is a return of this capital to the shareholder within six years from the date of issue, the amount of capital returned to the extent of the paid-up value of the bonus shares is treated, by definition, as a dividend and is taxable in the hands of the shareholder. However, if the shareholder is a company, this dividend may not be assessable, as explained above.

**Interest income**

Interest income forms part of the total statutory income, provided it is not exempt under the tax statute.

The interest income exempt from taxes includes interest accruing on money lying in a foreign currency account in any commercial bank; interest accruing to any person or
partnership outside Sri Lanka in respect of any loan granted in a foreign currency by that person or partnership to the government of Sri Lanka, any public corporation, any government institution, any commercial bank, or any other undertaking if the loan is granted on or after 1 April 2012; or interest accruing to any person on moneys invested in government bonds denominated in a foreign currency.

**Foreign income**
Foreign income of a resident person forms part of the total statutory income, provided it is not exempt under the tax statute.

**Deductions**
In ascertaining the total income liable to CIT from the financial accounts filed by a company, deductions from revenue are permitted for outgoings and matching expenses incurred in producing the income, including special deductions.

**Depreciation**
An annual allowance for depreciation for wear and tear is calculated at:

- 100% for software developed in Sri Lanka, or any plant, machinery, or equipment for:
  - energy purposes, which provide more than 30% of the total requirement of the power generation out of alternative energy resources, or
  - the establishment of a Broker Back Office System to be compliant with the Colombo Stock Exchange (CSE) requirement in relation to the risk management systems acquired on or after 1 April 2013.
- 50% for plant, machinery, or equipment for:
  - any export industry
  - technology upgrading purposes, or
  - introducing any new technology acquired on or after 1 April 2013.
- 33 1/3% for other plant, machinery, or equipment for a period of three years.
- 25% of the cost of any information technology for a period of four years.
- 20% of the cost of acquisition of any motor vehicle or furniture for a period of five years.
- 10% of the cost of any qualified building for a period of ten years.
- 100% for plant, machinery, or equipment acquired and used in any new undertaking commenced on or after 1 April 2015 for manufacture of products for export, with investment of not less than USD 2 million.

The cost of renewal of any capital asset, if no allowance is available, is deductible for the purpose of ascertaining profits and income.

**Goodwill**
Amortisation is not allowed on the acquisition of goodwill.

**Formation or liquidation expenses of a company**
In the case of a company, expenses incurred in the formation or liquidation of that company are allowed in computing the taxable income.

**Interest expenses**
Interest paid or payable on borrowings for purposes of business are deductible, subject to the thin capitalisation rules (see the Group taxation section).

**Bad debts and doubtful debts**
A sum equal to the bad debts incurred in any trade, business, profession, or vocation that have become bad debts during the period for which the profits are being ascertained is allowed for tax purposes.
Sri Lanka

In the case of a bank or financial institution, deductibility of a specific bad debt provision is restricted to the lesser of the actual amount of the provision or 1% of the aggregate debts as of the end of the period for which profits are ascertained.

**Charitable contributions**
Relief is available as a deduction from assessable income for contributions in money to an approved charity, provided the charity is established for the provision of institutionalised care for sick or the needy, and contributions in money or in kind to the government of Sri Lanka. The deduction for the former is subject to a ceiling of one-fifth of the assessable income of the company. In the case of the latter, there is no limit to the deduction, and any un-recouped excess of such contributions over the assessable income can be carried forward and deducted from the following year’s assessable income and so on.

**Termination gratuities**
Termination gratuities paid to employees on cessation of business and annual payments made to an approved fund, held for payment under compulsory legislation of gratuities to employees upon termination of their services, are deductible.

**Royalties and ground rents**
Any royalty or ground rent paid is deductible.

**Fines and penalties**
Fines and penalties, paid or payable, are not deductible for tax purposes.

**Taxes**
Sri Lanka income tax payable or any income tax or other similar tax payable in any country with which Sri Lanka has a DTT is not deductible, other than the excess of the foreign-country tax on doubly taxed income over the maximum amount of the credit allowed in the foreign country for the Sri Lanka income tax on that income.

Taxes paid in a foreign country that does not have a tax treaty with Sri Lanka may be deducted.

NBT paid/payable is fully deductible.

Input VAT is not deductible from CIT if it is creditable against output VAT.

Any other prescribed tax or levy is not deductible.

**Non-deductible expenses**
Deductions not permitted for certain expenses or allowances, in the determination of total income, are itemised below:

- Business entertainment expenses incurred or entertainment allowances paid to executive officers.
- Any expenditure of a capital nature or any loss of capital, including book depreciation of capital assets.
- Depreciation allowances, rentals, annual payments, or renewals in respect of vehicles used for purposes of business travel, or capital assets provided for the use of employees at their places of residence, other than motorcycles or bicycles used by non-executive staff and motor coaches used to transport employees to and from their places of work.
- The excess of management fee paid over LKR 2 million or 1% of turnover, whichever is lower, or such amount as may be determined by the tax authorities. This restriction does not apply to a venture capital company, unit trust, or mutual fund.
**Other significant items**
Expenses incurred solely in connection with the promotion of the export trade or the provision of any services for payment in foreign currency or in carrying out an approved programme for the promotion of tourism are fully allowed.

Any foreign travel or foreign training expense incurred in the production of income of any trade, business profession, or vocation is also deductible, subject to a maximum limit of 2% of the previous year’s statutory income from the respective trade, business, profession, or vocation.

Deductions from the total income from all sources of a company are allowed for any interest payable on loans used for the construction or purchase of any building or the purchase of any site for construction of a building; for any annuity payable; or for a business loss.

**Net operating losses**
No deduction from total income is allowed in a tax year for a business loss if, at any time in that year, more than one-third of the issued share capital of the loss-making company is held by persons who did not hold such share capital at any time in the year in which the loss was incurred. In such circumstances, the loss is deferred for deduction only from profits of the particular business in which the loss was incurred.

Any loss incurred in any business of life insurance can be deducted to the extent of any profits from such business included in such total statutory income. Similarly, any loss incurred in any business of finance leasing can be deducted to the extent of any profits from such leasing business included in such total statutory income.

Losses incurred in the conduct of a trade or business, including any such loss brought forward, may be deducted only up to 35% of statutory income of a given tax year. The loss balance may be carried forward indefinitely.

Carryback of losses is not permitted.

**Payments to foreign affiliates**
Any payment made to an affiliate is allowed for tax purposes, provided such payment is in the nature of revenue and is incurred in the production of income.

**Group taxation**
There are no special provisions for taxation of companies in a group in Sri Lanka. Each company is taxed independently of others in the group.

**Transfer pricing**
Any profits and income arising, derived, or accruing from, or any loss incurred in, any transaction entered into between two associated undertakings shall be ascertained with regard to the arm’s-length price.

**Thin capitalisation**
Deductible interest payments made between members of a group of companies, including holding companies, are restricted to the debt-to-equity ratio of 3:1 for manufacturing companies and 4:1 for other companies.

**Controlled foreign companies (CFCs)**
There are no provisions in the tax statute regarding CFCs.
Sri Lanka

**Tax credits and incentives**

Pursuant to the Strategic Development Project Act, projects that are identified and receive strategic development project status qualify for exemption in part or full from the applicability of the following taxes: CIT, VAT, ESC, customs duty, NBT, and PAL. These projects are large-scale projects, mainly infrastructure projects. The tax concessions include exemption from income tax (to be negotiated) for a period not exceeding 25 years.

The other tax incentives are discussed below.

**Tax holidays**

**Exemptions for new enterprises**

Large-scale investors should invest in the acquisition of fixed assets prior to 1 April 2016 and commence commercial operation prior to 1 April 2017 to qualify for the tax exemptions.

- A five-year tax holiday is available to a new venture capital company satisfying specified criteria.
- A five-year tax holiday is granted for the profits from the new undertaking of a company that is engaged solely in R&D in the field of science or technology with the objective of using the results thereof for the production or improvement of products with a minimum investment of LKR 2 million prior to 1 April 2014.
- Tax holidays outside the purview of the tax statute are also available in specified areas of investment to companies that enter into agreements with the BOI and to any strategic development projects identified in accordance with the provisions of the Strategic Development Projects Act No 14 of 2008. The specified areas include
non-traditional export-oriented manufacturing and thrust industries, export-oriented services, large-scale projects of which the project cost exceeds LKR 500 million. Generous waivers of import duties on specified imports and other concessions are also available for these companies.

- Profits and income derived from the sectors of fishing, cultivation, and primary processing of agricultural seeds or planting materials were exempt from CIT for a period of five years reckoned from the tax year commencing from 1 April 2006. From 1 April 2011, but prior to 1 April 2016, a concessionary rate of 10% was applicable. From 1 April 2016, the applicable rate is 17.5%.
- A ten-year tax exemption is granted on profits and income of an undertaking from cultivation of renewable energy crops in agricultural land.
- Profits and income from all transactions connected with manufacturing, distribution, and marketing of organic fertilisers and pesticides are exempt from CIT.

**Inbound investment incentives**

- Exemption from CIT is granted on the profits and income earned in foreign currency by any resident company in Sri Lanka from any services, excluding commissions, discounts, or similar type of receipt, rendered in or outside Sri Lanka, provided such profits and income (less such amounts expended outside Sri Lanka as are considered by the Commissioner General to be reasonable expenses) are remitted to Sri Lanka through a bank.
- Exemption from CIT is granted in respect of dividends, interest, or royalties received on investments made outside Sri Lanka, provided that dividends, interest, and royalties are remitted to Sri Lanka through a bank.

**Other incentives**

- New or existing companies that export non-traditional goods were entitled to be taxed on the profits from these exports at a concessionary rate of 12%. However, from the tax year commencing from 1 April 2016, the applicable rate is 17.5%.
- Exemption from CIT is granted on the profits arising from trading in shares, rights to any share, bonus, or share warrants in respect of which the share transaction levy has been charged.
- Exemption from CIT is granted on an amount equal to the interest or the discount paid or allowed to any non-resident person or to any licensed commercial bank in Sri Lanka by the issuer of any sovereign bond denominated in foreign currency, issued on or after 21 October 2008, by or on behalf of the government of Sri Lanka and on the profits and income from the sale of such sovereign bond.
- Exemption from CIT is granted on an amount equal to the interest or the discount paid or allowed to any person on or after 1 April 2009, on any Sri Lanka Development Bond denominated in United States dollars, issued by the Central Bank of Sri Lanka and on the profits and income from the sale of such Sri Lanka Development Bond.
- Exemption from CIT is granted on the profits and income derived by or accruing to any person or partnership from investment in Economic Resurgence Certificates, utilising money lying to credit of any account opened in any commercial bank or in any specialised bank with the approval of the Central Bank of Sri Lanka from and out of monies deposited in such account on or after 1 February 2009.

**Foreign tax credit**

Where any DTT is entered into between the government of Sri Lanka and the government of any other territory outside Sri Lanka, a credit is to be granted in respect of any tax paid or payable outside Sri Lanka in respect of profits or income arising outside Sri Lanka. Such credit should not exceed the amount of the Sri Lanka tax payable in respect of such profits or income.

Where any non-resident person or any partnership registered outside Sri Lanka providing certain services is liable to pay income tax in Sri Lanka and income tax in any
other country, then such person or partnership shall be entitled to relief from income tax payable in Sri Lanka of an amount equal to the excess, if any, of the income tax in respect of such income payable in Sri Lanka over the income tax in respect of such income payable in such other country.

**Withholding taxes**

Resident companies are entitled to withhold income tax at 10% of gross dividends payable to any shareholder that is chargeable with CIT, excluding any dividend received from another resident company and any dividend that is exempt from CIT.

Fees for technical services paid to persons overseas directly or indirectly by a person in Sri Lanka are deemed to be profit and income arising in or derived from Sri Lanka, and WHT at 20% is deductible at source.

Any person in Sri Lanka who pays or credits to a person or partnership outside Sri Lanka any sum due as interest, rent, ground rent, royalty, or annuity is required to withhold income tax at a rate of 20% of the sum, but the requirement to withhold income tax does not apply to (i) interest not sourced in Sri Lanka, (ii) interest on any loan or advance made by a banker, (iii) interest paid in foreign currency held in an account with a foreign currency banking unit, (iv) interest on any corporate debt security, or (v) any interest that is exempt from income tax under any provisions of the Inland Revenue Act.

In particular instances, the tax authority may prescribe that CIT be withheld at a rate other than 20%, or the rate may be reduced for sums falling due as interest or royalties in respect of persons resident in countries with which Sri Lanka has DTTs in force. Sri Lanka-source income from loan interest or royalties accruing to a non-resident company is taxed at a flat 15% in the absence of a lower rate in the tax treaty with the home country of the non-resident.

However, interest accruing to any overseas lender from a loan granted by that overseas lender to the Sri Lanka government or institution, public corporation, any commercial bank, or to any other undertaking, if such loan is granted on or after 1 April 2012, is exempt from income tax.

Every bank and financial institution is required to withhold income tax at 10% on the amount of any interest paid to a company on any sum of money deposited with it. The depositor is entitled to receive a certificate setting out the gross amount of interest, the amount of tax withheld, and the net amount of interest paid. With respect to Treasury bills and Treasury bonds issued by the Central Bank, the WHT rate of 10% is deducted at the time of the sale of the Treasury bills and Treasury bonds by the Central Bank in the primary market.

1. 0% for copyright royalties.
2. 0% in certain circumstances.
3. 50% of normal tax, which is 7.5%.
4. These treaties are limited to the avoidance of double taxation of income from international transport by air.
5. 10% applies if the beneficial owner is a company that directly holds at least 25% of the capital of the company paying the dividends. In all other cases, the rate is 15%.
6. 10% applies if the beneficial owner is a company that directly holds at least 10% of the capital of the company paying the dividends. In all other cases, the rate is 15%.
7. 7.5% applies if the owner is a company.

**Tax administration**

**Taxable period**
A tax year is any period of 12 consecutive months reckoned from 1 April in any calendar year to 31 March of the following year.

**Tax returns**
CIT returns are due on 30 November, immediately following the end of the tax year.
Sri Lanka

**Statement of accounts**
Where any trade, business, profession, or vocation is being carried on or exercised by any quoted public company, any company that is a member of a group of companies of which at least one company is a quoted public company, or any other company having a turnover of not less than LKR 250 million or net profit of not less than LKR 100 million, such quoted company, member of the group, or such other company should furnish a statement of accounts in support of a return of income. Such statement of accounts is to be prepared by an approved accountant on the basis of an audit carried out by such approved accountant.

**Payment of tax**
Sri Lanka has a pay-and-file system under which the CIT payable for each tax year is required to be paid in four instalments, on or before 15 August, 15 November, and 15 February of the tax year and 15 May immediately following the end of the tax year. If each instalment is not less than one-quarter of the CIT payable for the tax year immediately preceding, the balance of any CIT payable may be paid on or before 30 September immediately following the end of the tax year without incurring penalties.

**Tax audit process**
The tax authority may select tax files for an audit on a random basis or if there is any specific information relating to a taxpayer that warrants investigation.

**Statute of limitations**
No assessment of the income tax payable by any person:

a. who has made a return of one's income on or before the 30th day of November of the tax year immediately succeeding that tax year shall be made after the expiry of a period of:
   - two years in respect of any tax year commencing prior to 1 April 2013, and
   - 18 months in respect of any tax year commencing on or after 1 April 2013 from the 30th day of November of the immediately succeeding tax year, or
b. who has failed to make a return on or before such date as referred to in paragraph (a) shall be made after the expiry of a period of four years from the 30th day of November of the immediately succeeding tax year.

However, such limitation shall not apply where any fraud, evasion, or wilful default has been committed.

**Topics of focus for tax authorities**
Tax authorities, in their audit, primarily focus on whether disallowable expenses have been added back to taxable profits and on profit margins reported. With the requirement to obtain tax clearance for remittance of fees and other payments abroad, increasing attention is paid to remittance of royalties, fees, and other payments to non-resident persons.

Significant developments

There have been no significant corporate tax developments in Swaziland during the past year.

Taxes on corporate income

Income tax is levied on all income derived from sources generated within or deemed to be generated within the country, irrespective of whether the recipient of the income is actually resident in Swaziland.

All companies generating income within Swaziland are taxed on that income at a flat rate of 27.5%.

Corporate residence

Permanent establishment (PE)
PE in Swaziland is determined according to physical presence.

Other taxes

Value-added tax (VAT)
VAT is charged at the standard rate of 14%.

Customs duties
Swaziland has a provision for customs duties for various goods imported into the country. Details are available in the Harmonized Tariff Schedule (HTS).

Excise duties
Swaziland has an excise duty provision for various goods manufactured in the country.

<table>
<thead>
<tr>

Swaziland

**Property taxes**
There are no property taxes in Swaziland.

**Transfer taxes**
Transfer taxes are applied on a variable rate basis to property transfers based on the fair market value of the property being transferred.

**Stamp taxes**
Swaziland has a provision for stamp taxes on various documents. The tax is determined either by way of a set fee or on a sliding scale percentage basis.

**Payroll taxes**
Pay-as-you-earn (PAYE) is to be deducted from employees on a monthly basis and according to the tax tables applicable to individuals, which are provided in the Taxes on personal income section of Swaziland’s Individual tax summary at www.pwc.com/taxsummaries.

**Social security contributions**
There are no social security contributions in Swaziland.

---

**Branch income**
Income tax on registered branch profits is calculated as for a resident company, and a branch profits tax of 15% is assessed for deemed repatriated income. In practice, however, branches are rare since most foreign companies incorporate local subsidiary companies.

<table>

* Swaziland lilangeni

---

**Income determination**

**Inventory valuation**
Inventory valuation is not specific but is effectively at the lower of cost (i.e. first in first out [FIFO] or average cost) and net realisable value.

**Capital gains**
Capital gains are not subject to income tax, provided it can be demonstrated that the gains are of a capital and not an income nature (i.e. not recurring transactions).

**Dividend income**
Dividend income is taxable via withholding tax (WHT) for non-residents (see the Withholding taxes section). No tax is due if received from another local company.

**Inter-company dividends**
Inter-company dividends are not subject to income tax.

**Stock dividends**
Stock dividends are paid out of taxed profits. Such dividends are not subject to income tax when received by a local company, but they are subject to taxation in the hands of local individual taxpayers at the rate of 10%.
Interest income
Interest income sourced in Swaziland is taxable.

Foreign income
Foreign income is not subject to income tax unless it is deemed to be from a Swaziland source.

Deductions

For the first year after the addition of an asset, the wear-and-tear allowance is calculated on a monthly basis. With respect to leased assets, the lessor’s claim for wear-and-tear allowance is usually spread over the lease period.

An initial allowance of 50% is granted for plant and machinery used in a manufacturing process, including hotel equipment. An initial allowance of 50% is granted for industrial buildings used for manufacturing purposes and hotels, together with a 4% annual allowance.

Goodwill
The write-off of any goodwill is not allowed for tax purposes.

Start-up expenses
It is departmental practice to not allow the deduction of any start-up expenses.

Interest expenses
Interest is deductible as long as it is incurred in the production of income.
Swaziland

Bad debt
Swaziland does allow a deduction for bad debts, subject to the Commissioner’s approval and provided that the debts were included in the taxpayer’s income in the year of assessment or in years past.

Charitable contributions
Subject to the Commissioner’s approval in regard to the amount allowable as a deduction in the year of grant and subsequent years, Swaziland allows a deduction for, among other things, grants made to the government for the building of schools and hospitals.

Fines and penalties
Fines and penalties resulting from late payment of any tax or levied as payable under any Act administered by the Commissioner will be a non-deductible expense.

Taxes
Taxes are not deductible.

Net operating losses
Losses may not be carried back but may be carried forward for as long as trading continues (i.e. indefinitely). If any break in trading occurs, however, the losses are forfeited.

Payments to foreign affiliates
Deductions may be claimed for payments of management service fees, interest, and royalties to foreign affiliates, provided the payments are made under a written agreement, are reasonable, and receive exchange control approval for transfers outside the rand monetary area. Note that this approval is routinely given without any significant delay for bona fide transactions.

Group taxation
Swaziland does not have group taxation legislation. All companies are assessed on their individual profits and losses.

Transfer pricing
Swaziland does not have transfer pricing legislation; however, under the anti-avoidance provision, the Revenue Authority will look for arm’s-length transactions.

Thin capitalisation
Swaziland does not have thin capitalisation rules.

Controlled foreign companies (CFCs)
Swaziland does not have any legislation regarding CFCs.

Tax credits and incentives
Foreign tax credit
Swaziland does not have a foreign tax credit regime.

Development Approval Order
The Minister of Finance, along set guidelines and with prior consent of the Cabinet, may nominate a business as a developmental enterprise (i.e. a business the Minister deems to be beneficial to the development of the economy) for a grant of a Development Approval Order. If approved, the business generally will be granted tax concessions, such as a lower corporate tax rate.
**Withholding taxes**

Non-resident WHTs are levied as follows.

**Dividends**

WHT for dividends is payable at the rate of 15% (12.5% for companies registered in Botswana, Lesotho, and the Republic of South Africa). The rate drops to 10% under the double taxation agreement (DTA) with South Africa where the holding company owns more than 25% of the shares. Non-resident shareholders’ WHT is payable within 30 days of the date on which the dividend is payable.

**Interest**

WHT for interest is payable at the rate of 10%. Non-resident WHT on interest is payable within 14 days of the date of the accrual of the interest.

**Royalties and management fees**

WHT for royalties and management fees is payable at the rate of 15%. Upon application, 5% may be refunded if there is a DTA in place.

**Entertainers and sportsmen**

WHT is payable at the rate of 15% on income earned in Swaziland by entertainers and sportsmen. This tax relates only to public entertainers and sportsmen not ordinarily resident in Swaziland. The payer is required to deduct the tax and pay it within 15 days.

**Contractors or professionals**

WHT is payable at the rate of 15% on services provided by contractors or professionals in Swaziland (materials are not taxed to the extent that materials are incidental to the overall charge). The Commissioner of Taxes must be notified of any agreement relating to construction operations or professional services under which payments are made to non-resident persons within 30 days after entering into the agreement. It is required that the tax be paid within 15 days from the date of payment.

**Tax administration**

**Taxable period**

The tax year runs from 1 July to 30 June. Companies are required to have a 30 June year-end unless another year-end date is approved by the Commissioner of Taxes; such approval is routinely given.

**Tax returns**

Income tax returns should be submitted within 120 days of 30 June, unless an extension of time for submission is granted, which also is routinely given if all tax requirements for the prior year are up to date and the provisional tax has been paid in accordance with the law. The extension of time is usually granted for a further 60 days, which effectively gives the taxpayer six months to submit their income tax return.

**Payment of tax**

Notice of the date of payment is usually given on the tax assessment.

**Provisional tax payments**

With respect to companies, provisional tax is payable in two instalments: one payment is due within six months of the company’s financial year-end, and the other payment is due no later than the last day of the company’s financial year.

The estimate of taxable income for provisional tax purposes should not be less than the taxable income assessed for the latest preceding year of assessment for which an assessment has been issued that is not less than 21 days before the date the estimate is
Swaziland

made. This rule does not apply if the taxpayer can convince the Commissioner of Taxes that the taxable income for the current year will be less than the taxable income for the preceding year.

A provisional taxpayer becomes liable to pay a penalty if the estimate for taxable income for the second payment of provisional tax is found to be both less than 90% of the taxable income as finally determined and less than the taxable income as assessed for the immediately preceding tax year.

**Tax audit process**
All assessments are subject to a tax audit. Current departmental practice is to perform tax audits going back four years.

**Statute of limitations**
There is no statute of limitations in Swaziland.

**Topics of focus for tax authorities**
Currently, the tax authorities are conducting full tax audits.

Significant developments

Interest deductibility matters
In June 2014, a governmental committee presented a first proposal on further strengthened interest deductibility restrictions. The new proposal has suffered heavy criticism. New rules limiting interest deductibility can be expected to be introduced by 2017 at the earliest, perhaps with applicability only in 2018. If this timing expectation is true, the international business community would have to continue to rely on the vague applicability status of the current, 2013, interest deductibility regime, which is litigated heavily in the tax courts and, furthermore, is subject to European Union (EU) infringement procedures.

Dividend income
Pursuant to the recent amendment of the Parent-Subsidiary Directive (EU general anti-avoidance rule [GAAR]), member states shall bring into force the laws, regulations, and administrative provisions necessary for complying, and the Swedish government has, as of 1 January 2016, introduced provisions making tax deductible dividends paid by a foreign company (i.e. not only EU/European Economic Area [EEA] companies) under a hybrid arrangement subject to Swedish corporate tax for the recipient Swedish company.

Apart from that, when implementing the Directive, the Swedish government was of the view that the current Swedish Anti-avoidance Tax Act already covers those situations that are intended to be covered by the amended Directive, apart from a minor change in the Withholding Tax (WHT) Act (for outbound dividends), targeting structures put in place to obtain WHT exemption through the use of decoy arrangements. This anti-avoidance provision has long existed under current Swedish law, but an explicit clarification is made as of 1 January 2016 that the provision can also be applicable in cases covered by the Parent-Subsidiary Directive.

Taxes on corporate income

State (national) income tax
Resident legal entities are liable for tax on their worldwide income unless tax treaties or special exemptions apply. Non-resident entities are taxed on income that is deemed to have its source within Sweden.

Taxable income is subject to corporate tax at the rate of 22%. All income of corporate entities is treated as business income.

Local income taxes
No local income taxes apply to Swedish corporations.

Corporate residence
A company is considered to be a tax resident of Sweden if it is incorporated in Sweden.
Sweden

Permanent establishment (PE)
The term ‘permanent establishment’ is defined in Sweden as a fixed place of business through which the business is carried on from a specific establishment, such as a place of management, branch, office, factory, or workshop. Places where construction work is carried on are also regarded as PEs, as well as if an agent who is dependent upon the foreign company habitually exercises authority in Sweden.

Other taxes

Value-added tax (VAT)
The Swedish VAT system is harmonised with the EU rules. The general VAT rate of 25% is chargeable on most goods and services. Reduced rates apply to a few goods and services, such as hotel accommodation, foodstuffs (excluding alcoholic beverages), restaurant meals, and low or non-alcoholic drinks (12%), as well as newspapers, magazines, books, passenger transport, maps, musical notes, some cultural services, transport in ski lifts, etc. (6%). Certain financial and insurance services are exempt from VAT.

VAT returns are filed and tax is paid monthly or quarterly. VAT returns are filed monthly if the VATable turnover is estimated at more than 40 million Swedish kronor (SEK) (estimated yearly sales excluding any reverse charge or import acquisitions). Companies with a lower VATable turnover than SEK 40 million report VAT quarterly. However, any company may choose to have a monthly reporting period. For companies with a turnover of less than SEK 1 million, VAT may be reported in an annual VAT return.

Customs duties
As a member of the European Union, Sweden is also part of the Customs union enforcing the Community Customs code. Most EU Customs duties are calculated as a percentage of the value of the goods being imported. All imported goods must be classified according to the EU Customs tariff (TARIC), and the duty rates applied depend on the economic sensitivity of the goods. The actual duty rate to be applied also depends on other factors, such as the country of origin of the product and any free trade agreements that may be applicable.

Excise duties
The three main Swedish excise duties are harmonised with EU rules. These are the alcohol tax, the tobacco tax, and the tax on fuels and electricity. There are, however, still differences in local legislation between the member states, and the taxation of fuels is partly EU harmonised, partly national. Fuels are subject to energy tax, carbon dioxide tax, and sulphur tax. Depending on the use of fuels, taxes may be partly or fully reduced. For bio-fuels, certain exemptions may also apply.

Real estate tax
The annual real estate tax rate on business premises is 1% of the tax assessed value. For industrial property, the tax rate is 0.5%. Other rates exist for special property.

Stamp tax
Stamp tax at 4.25% is payable on a transfer of real estate. The tax base consists of the highest of the purchase consideration or the tax assessed value of the real estate. Stamp tax on an intra-group transfer of real estate may be deferred as long as the real estate remains within the group.

Payroll taxes

Social fees
Mandatory social security charges payable by employers on remuneration to employees (or by the self-employed) are levied at approximately 31%. The reduced rate that has
been applied for very young people is waived from 1 June 2016. A reduced rate remains applicable for very old people. Social security charges are deductible for corporate tax purposes.

Pension benefits beyond the mandatory system are customary amongst most Swedish employers. A special salary tax is levied at approximately 24% on these additional pension premiums/commitments and is deductible for corporate tax purposes.

**Branch income**

Branch income (i.e. PE income) is taxed at the corporate tax rate of 22%, and general corporate tax rules apply for branch offices in Sweden. No WHT is levied on the outbound repatriation of taxed profits.

The receipt of Swedish-source royalties or fees for use of tangible or intangible assets by a foreign resident is also (subject to treaty restrictions) regarded as a special form of PE income.

**Income determination**

**Inventory valuation**

Inventories (stock-in-trade) are valued at acquisition cost or market value, whichever is lower. As an alternative, inventories may be valued at 97% of the total acquisition cost, which is determined on a first in first out (FIFO) basis. The last in first out (LIFO) method is not permitted. Generally, inventories should be stated at the same amount for tax and accounting purposes.

**Capital gains**

There is a capital gains tax exemption for Swedish corporate entities on gains related to the disposal of shares held for business reasons.

 Shares in Swedish corporations can qualify as shares held for business reasons. Unquoted/unlisted shares will always be considered as held for business reasons. Quoted/listed shares are considered held for business reasons if the company has a holding corresponding to at least 10% of the voting rights or the shares are held in the course of the business. An additional condition regarding quoted/listed shares is that the shares must be held for a period of at least one year. Under certain conditions, tax exemption also applies to shares in foreign companies.

Note that non-tax-exempt capital gains are included in business income and taxed at the corporate tax rate.

Shares in partnerships (tax transparent entities) and indirect holdings via partnerships are also included in the participation exemption regime.

An exception from the capital gains tax exemption applies for the sale of shares in a ‘shell company’, which is a company or partnership where the market value of cash, shares and other marketable instruments (other than shares held for business reasons), and similar assets exceeds 50% of the consideration paid for the shares. The sale of a shell company results in harsh taxation of the gross consideration. Provided certain formalities are fulfilled, however, it is possible to avoid such taxation.

A consequence of the participation exemption is that capital losses on shares or participations held for business reasons are not deductible.
Sweden

Capital losses on portfolio holdings of shares, share options, convertible debentures, and similar financial instruments are allowed only as an offset to capital gains on the same group of financial instruments.

Certain special rules apply to computation of capital gains and losses on real estate.

**Dividend income**
A participation exemption applies for dividends received on shares held for business reasons (see above) and on qualifying holdings via partnerships. A tax deductible dividend paid by a foreign company (i.e. not only EU/EEA companies) under a hybrid arrangement is though subject to Swedish corporate tax for the recipient Swedish company.

**Interest income**
Interest received by a corporation is included in the corporate tax basis.

**Foreign income**
Companies resident in Sweden are taxed on their worldwide income. Non-resident entities are taxed on income that is deemed to have its source within Sweden.

A Swedish corporation is taxed on foreign branch income. Double taxation normally is avoided by means of either a deduction for foreign tax, or a foreign tax credit.

Dividends and capital gains from foreign subsidiaries are generally exempt from taxation according to the participation exemption provisions applicable to shares held for business reasons (see above).

**Deductions**

**Depreciation, amortisation, and depletion**

**Depreciation on fixed assets**
Land improvements may be depreciated at the rate of 5% per year of the acquisition cost. The maximum allowance is 100% of the tax basis of the improvement.

Buildings may be depreciated at rates between 2% and 5% per year of the taxable basis, depending on type and usage of the building. The maximum allowance is 100% of the tax basis of the building.

For machinery and equipment, the depreciation for tax purposes should correspond to the depreciation charged in the books and accounts, as long as the total net value of the assets is not less than the 70% of net value in previous accounts plus additions less proceeds of sales (i.e. 30% declining-balance depreciation) or cost less 20% per year (i.e. 20% straight-line depreciation on remaining assets). An alternative 25% declining-balance method without correspondence to the books also exists.

**Immediate deduction of certain assets**
The cost of assets having an expected life of no more than three years and the cost of assets not exceeding certain limits, depending on size of operations, may be deducted immediately. Certain costs for repairs, maintenance, and modifications of buildings may also be deducted immediately.

**Amortisation of intangibles and goodwill**
The amortisation of patents, leaseholds, and acquired goodwill follows the same rules as depreciation for machinery and equipment (see above).
Depletion of mines and quarries
The entire cost of mines and quarries may be depleted over their expected exploitation period. These depletion amounts may be deducted annually but are limited to 100% of the acquisition cost of the mine or quarry.

Start-up expenses
General start-up expenses for generating and maintaining business income are, as a rule, deductible for Swedish tax purposes.

Interest expenses
Interest expenses on external loans are fully deductible, whereas interest paid to affiliated companies are deductible only if an exception applies under the Swedish interest stripping restrictions and to the extent that the arm’s-length principle is complied with. Under the interest stripping restrictions, and in brief, a deduction is not allowed for interest accruing on an intra-group loan unless the true creditor within the affiliated group (i.e. the person entitled to the interest) is taxed on the interest income at a rate of at least 10% or it is shown that the debt is based on commercial reasons. Regardless, a deduction may be refused if the debt structure has been put in place mainly for the group to achieve a substantial tax benefit.

Bad debt
Business bad debts are deductible if they are proven wholly or partially worthless.

Charitable contributions
Purely charitable contributions are generally non-deductible.

Fines and penalties
Fines and penalties are non-deductible for Swedish tax purposes.

Taxes
Generally, Swedish taxes are not deductible for tax purposes. However, specific taxes, fees, and foreign taxes may be deductible. Recoverable VAT is not treated as an expense or cost.

Net operating losses
Tax losses may be carried forward indefinitely but may become subject to restrictions and/or forfeiture upon ownership changes, mergers and demergers, dispositions with creditors, and certain other reorganisations. No carryback of losses is possible.

Payments to foreign affiliates
Transactions with affiliates not liable to tax in Sweden must be at arm’s length. Formal transfer pricing documentation requirements apply.

Group taxation
Swedish companies are not taxed on a consolidated basis. However, it is possible for qualifying groups (i.e. a holding greater than 90% of the capital, which must have been upheld during the whole fiscal year) to effectively offset operating losses of one Swedish company against operating profits of another Swedish company by way of group contributions, which are tax deductible for the contributor and taxable for the recipient. EEA companies are regarded as Swedish companies for these purposes if the recipient is taxable in Sweden.

A similar Swedish deduction is, under certain circumstances, also available for cross-border group relief at the Swedish parent’s level within the EEA for final foreign subsidiary losses.
**Transfer pricing**
The Swedish transfer pricing regime is generally an Organisation of Economic Co-operation and Development (OECD) type of regime. Sweden has formal transfer pricing documentation requirements in place.

**Thin capitalisation**
There are no thin capitalisation rules for tax purposes in Sweden; however, interest stripping restrictions exist (see Interest expenses in the Deductions section).

**Controlled foreign companies (CFCs)**
Sweden’s CFC provisions aim at taxing a Swedish resident shareholder for shareholdings in low-taxed foreign entities. A Swedish resident shareholder with a holding in a CFC entity will annually be taxed for its ownership portion of the CFC’s income, according to provisions applicable to a Swedish corporation. For a corporation, the portion will be taxed at the Swedish corporate tax rate. Only holdings, direct or indirect through other foreign entities, corresponding to at least 25% (capital or voting rights) in the foreign entity could lead to CFC taxation. A foreign company is considered low taxed if the income in the company, calculated in accordance with Swedish provisions, is taxed at a rate below 12.1%. However, if the foreign entity is resident in an ‘approved country’, CFC taxation should not arise. Approved countries appear in an official ‘black/white’ list. Active EEA entities are, under certain circumstances, not considered low taxed.

---

**Tax credits and incentives**
There are no specific tax incentives in Sweden for corporations. However, some generally applicable regimes exist.

For example, Sweden has an accruals reserve regime. The accruals reserve regime allows for a tax-deductible appropriation for corporations of 25% of the taxable profit before appropriation to a reserve. Each year’s appropriation forms a separate reserve that must be reversed to income no later than the sixth year following the appropriation. However, a standardised interest income is imposed on former years’ appropriations at 72% of the interest rate on governmental debt notes.

**Foreign tax credit**
A foreign tax credit is generally available, provided certain conditions are fulfilled, and the tax credit allowed is limited to an amount corresponding to the Swedish tax on the foreign income. Unutilised foreign taxes may be carried forward for five years. Tax treaty implications may exist.

---

**Withholding taxes**
There are no Swedish taxes on interest and service fees paid to non-resident corporations or individuals. Such payments to resident corporations and individuals are taxed as ordinary income.

WHT on dividends, royalties, and certain rentals vary according to domestic law and tax treaties, as shown below.

Apart from the highlighted treaties, Sweden has concluded agreements on exchange of information in tax matters and partial tax treaties. The conclusion of a tax information exchange agreement (TIEA) with the United Arab Emirates on 5 November 2015 means that Sweden has information exchange agreements with all the world’s tax jurisdictions. It could also be noted that amendments to the EU Directive on administrative cooperation in the field of taxation are proposed to be implemented in Swedish legislation with effect as of 1 January 2017.

### Notes

1. According to domestic law, there is no WHT on dividends to a foreign company on shares held for business reasons (for the definition of shares held for business reasons, see Capital gains in the Income determination section), provided that the foreign company is similar to a Swedish limited liability company (and some other legal entities) and is subject to income tax at a level similar to that imposed on a Swedish company. Further, there is no tax liability for a legal entity of a member state of the European Union if the entity owns 10% or more of the share capital in the distributing company and fulfils the conditions of the Directive (90/435) regarding a parent company and subsidiaries.

2. The reduced rate shown before a stroke (/) refers to payments to corporations having requisite control. Where appropriate, the particular treaty should be consulted to see whether the reduced rate is applicable.

3. Swedish-source royalties and certain rental fees are treated as a special form of PE, taxable at the corporate tax rate, subject to treaty reduction or waiver. Royalties paid from Sweden to a company within the European Union should not be taxed in Sweden if one of the companies holds at least 25% (capital) of the other or, where there are two companies concerned, at least 25% are held by another company within the European Union. Indirect participation does not benefit from the legislation. Both the payer and the recipient must be legal entities under the EU directive.
4. Payments to resident corporations and individuals are taxed as ordinary income. Only resident banks and similar entities are required to withhold tax on payments of cash dividends to resident individuals.
5. Royalties and certain rentals paid by Swedish licensees are treated as business income taxable in Sweden and do not incur WHT (see Note 3).
6. Note also the domestic provision stating a 0% WHT on dividends distributed to qualifying entities based on EU Directive (90/435) and/or where the shares are held for business purposes (see Note 1).
7. Dividends: 10% of the gross amount if the company receiving the dividends owns at least 25% of the foreign company's capital.

Royalties: of the gross amount paid for the use of, or the right to use:

- News: 3%.
- Copyright of literary, dramatic, musical, or other artistic work: 5%.
- Any patent, trademark, design or model, plan, or secret formula or process; industrial or scientific equipment or information concerning industrial, commercial, or scientific experience: 10%.
- For the rendering of technical assistance: 10%.
- All other cases: 15%.
8. Royalties are normally taxable only in the recipient's home country. However, where the royalty is paid by a Swedish legal entity that is more than 50% owned by one Austrian recipient, entity or individual, the tax in Sweden is a maximum of 10%.
9. Literary, artistic, or scientific royalties: 0%; other royalties: 5%.
10. Royalties for use of industrial, commercial, or scientific equipment: 5%; with respect to patents, secret formulas or processes, or for information concerning industrial, commercial, or scientific experience: 3%; other royalties: 10%.
11. Royalties for use of copyright and literary, dramatic, musical, and artistic royalties: 0%. Other royalties: 10% (treaty should be consulted).
12. The treaty has effect on income derived on or after 1 January 2006.
13. The double taxation treaty does not include Hong Kong.
14. The same treaty is applicable to the Czech Republic and the Slovak Republic.
15. According to the Nordic multilateral tax treaty.
16. Dividends are exempt from tax if the recipient of the dividends is a company directly owning at least 10% of the capital of the company paying out the dividends. Certain rentals are subject to tax if there is a PE in a country other than the home country and the claim is connected with the business carried on from the PE. Concerning Iceland, dividends are normally exempt from tax for companies, but the tax rate is 15% if the dividends have been deducted from the income of the distributing company.
17. Royalties for the use of industrial, commercial, or scientific equipment: 5%; other royalties: 10%.
18. Royalties with respect to patents, secret formulas or processes, or for information concerning industrial, commercial, or scientific experience: 5%; other royalties: 12.5%.
19. Royalties for the use of industrial, commercial, or scientific equipment or for information concerning industrial, commercial, or scientific experience: 10%; other royalties: 15% (treaty should be consulted).
20. Literary, artistic, or scientific royalties including films: 15%; other royalties: 10% (treaty should be consulted).
21. Royalties with respect to patents, secret formulas or processes, or for information concerning industrial or scientific experience: 5%; other royalties: 15%.
22. Commercial royalties, including films: 20%; copyright, literary, dramatic, musical, or artistic royalties: 0%.
23. Commercial royalties, including films: 15%; literary, dramatic, musical, or artistic royalties: 5%.
24. Literary, artistic, scientific, or film royalties: 10%; other royalties: 7%.
25. Royalties with respect to patents, designs or models, secret formulas or processes, or for information concerning industrial or scientific experience or for the use of industrial, commercial, or scientific equipment involving a transfer of know-how: 5%; other royalties: 15%.
26. Former Yugoslavia refers to the countries of Bosnia and Herzegovina, Croatia, Macedonia, Montenegro, Serbia, Slovenia, and the autonomous province of Kosovo. The treaty is applicable to all republics and autonomous provinces of the former Yugoslavia with the exception of Macedonia, with which Sweden has concluded a bilateral treaty.
27. Royalties arising from the use or the right to use trademarks: 25%; other royalties: 15%.
28. The first tax treaty between Sweden and Armenia was signed on 9 February 2016 but is pending to be adopted by the Swedish Parliament.
29. The first tax treaty between Sweden and Azerbaijan was signed on 10 February 2016 but is pending to be adopted by the Swedish Parliament.
30. A new tax treaty between Sweden and United Kingdom was signed on 26 March 2015. The Swedish legislation implementing the treaty entered into force on 31 December 2015.
31. Dividends are exempt from tax if the beneficial owner is a company that controls at least 10% of the voting power of the paying company. For other cases, dividends are taxable at a maximum rate of 5%. A maximum rate of 15% applies to dividends paid out of income (including gains) from immovable property by an investment vehicle that distributes most of the income annually and whose income from the immovable property is tax exempt.
32. Royalties for the use of, or the right to use, industrial, commercial, or scientific equipment: 5%; other royalties: 10%.
33. Royalties for the use of, or the right to use, industrial, commercial, or scientific equipment: 5%; other royalties: 7%.
34. Royalties for patents relating to industrial know-how of manufacturing methods and royalties attributable to agriculture, pharmaceuticals, computers, computer software and construction, secret formula or processes, or for information concerning industrial, commercial, or scientific nature: 0%. Other royalties: 10%.
Sweden

35. Royalties paid for the use of, or the right to use, patent, trademark, design or model, plan, or secret formula or process, or information concerning experience of industrial, commercial, or scientific nature: 5%. Other royalties: 10%.

---

**Tax administration**

**Taxable period**

If the income is derived from business, the basis for tax assessment is the financial year. The year-end for a company may be fixed at any calendar month ending, provided it comprises 12 calendar months and ends on the last day of a month. Swedish subsidiaries of foreign parents may generally be permitted to adopt the same year-end as the parent company.

**Tax returns**

Every corporate entity or registered branch must file an annual corporate tax return. The applicable due date for tax return submissions depends on the month in which the financial year ends: tax returns for financial years ending in January through April are due on 1 November in the same year; tax returns for financial years ending in May or June are due on 15 December in the same year; tax returns for financial years ending in July or August are due on 1 March in the following year; and tax returns for financial years ending in September through December are due on 1 July in the following year. The financial year of most Swedish companies follow the calendar year; consequently, most tax returns are subject to the 1 July due date.

The annual assessments are made by the local tax offices during the calendar year following the income year and should be completed about a year after the expiry of the financial year.

**Payment of tax**

Income taxes are collected during the year in which the income is earned, under a preliminary tax system. A corporate entity's preliminary tax liability is determined by a preliminary tax assessment based either on the latest available final tax assessment or on a preliminary tax return filed by the company. The preliminary taxes are payable in monthly instalments. Interest surcharges on underpayment of preliminary taxes, however, generally apply after two months from the end of the fiscal year (the end of a fiscal year is one of 30 April, 30 June, 31 August, or 31 December).

Once a tax assessment decision has been made by the Swedish Tax Agency, any balance owed by the taxpayer is payable in 90 days. Any balance owed to the taxpayer is automatically refunded within a year from the end of the fiscal year.

**Tax penalty**

A taxpayer that submits incorrect or insufficient information in a tax return is charged a penalty of up to 40% of the tax that, if the incorrect information had been accepted, would have been imposed or credited. The penalty and the rate may vary depending on the type of the shortcoming. Late filing fees also apply.

**Appeals**

Taxes are assessed by the Swedish Tax Agency. Depending on the circumstances, reassessments and/or appeals generally can be initiated within two and/or six years after the expiry of the calendar year during which the financial year ended. The extended six-year period can generally be applied by the Swedish Tax Agency to the disadvantage of the taxpayer in cases of erroneous or misleading information having been provided by the taxpayer or the taxpayer's omission of information. Appeals can be made to the Administrative Court, onwards to the Administrative Court of Appeal and, in case granted trial dispensation, onwards to the Supreme Administrative Court.

**Topics of focus for tax authorities**
The Swedish Tax Agency has, for quite some time, focused on challenging interest deductions on inter-company loans made under the view that the interest rate deviates from the arm’s-length rule. This particular focus has resulted in a number of court cases. The Swedish Tax Agency is currently also focusing on interest deduction restrictions under current limitation rules.

Another focus of the Swedish Tax Agency has been to challenge individual owners of private equity companies on the taxation of carried interest.

**Other issues**

**United States (US) Foreign Account Tax Compliance Act (FATCA)**
On 8 August 2014, Sweden signed a Model 1A FATCA agreement with the United States. The intergovernmental agreement (IGA) has been implemented through legislative means that entered into force as of 1 April 2015.

Significant developments

Base erosion and profit shifting (BEPS)
Based on the results of the BEPS project, Switzerland has launched several actions in order to implement BEPS measures into the Swiss tax law, in particular:

• Country-by-country (CbC) reporting: In April 2016, the Federal Council launched the consultation process with respect to the multilateral agreement and the respective Swiss act in order to implement the exchange of CbC reports. It is expected that multinationals, which are required to prepare a CbC report, have to draw up a CbC report in the year 2018 for the first time. The automatic exchange of these reports between the partner states shall start in 2020.
• Spontaneous exchange of information: In April 2016, the Federal Council launched the consultation with respect to the implementation of the legal framework and the procedures required for the spontaneous exchange of information. The new rules shall be based on the Organisation for Economic Co-operation and Development (OECD)/Council of Europe Convention on Mutual Administrative Assistance in Tax Matters and the revised Swiss Tax Administrative Assistance Act. The new law shall enter into force as of 1 January 2017. The spontaneous exchange of information shall start as of 1 January 2018.

Corporate tax reform III
After having implemented two favourable corporate tax reforms, corporate tax reform III is currently on the political agenda. The aim of the reform is to stabilise and strengthen Switzerland’s fiscal competitiveness as a business location and to focus on innovation and value creation.

The draft law is currently subject to parliamentary debates and includes the following innovations:

• The implementation of a patent box regime at the cantonal and communal level considering the latest international developments in this regard.
