Capital gains are not differentiated from operating income and are subject to the same applicable rates. Corporations are taxed on their income as reflected in their profit and loss account, less certain deductible items.

Companies are generally taxed at a flat rate of 34.5%. Special minimum rates apply to the taxable income of certain companies:

<table>

</tbody>
</table>

**Shipping business**

Shipping companies are subject to the general profit tax rate of 34.5% but may apply for the tonnage regime. If applicable, their profit is calculated based on the rates in the table below. If a shipping company applies the tonnage regime, the actual profits or losses are not taken into account, regardless of whether they are regular profits or capital gains.

The calculated profit based on the table below is subject to the general tax rate of 34.5%.

**Exempt companies**

*Please see the Tax incentives section for more information on tax exempt companies.*

**Companies under transitional offshore rules**

Transitional rules distinguish three types of offshore companies.

- Offshore companies which, on the last day of the financial year that ended before 1 January 2002, had all (or almost all) investments in or revenues from portfolio investments, royalties, holding companies, finance companies, or technical support subject to tax rates of 2.4% to 3% (while capital gains and losses were not taken into account) will be grandfathered through the last day of the financial year of the company that starts before 1 July 2019.

- Offshore companies which, on the last day of the financial year that ended before 1 January 2002, had all (or almost all) their profit subject to tax rates of 4.8% to 6% or, under certain circumstances, 2.4% to 3% and which had a valid ruling with the tax inspector (e.g. trading companies, banks, captives commissions, and fee-earning companies) on the aforementioned date or for which a request for (extension of) such a ruling had been filed on that date will be grandfathered through the last day of the financial year of the company that starts before 1 July 2019.
Sint Maarten

- Offshore companies that, on the last day of the financial year that ended before 1 January 2002, had invested all (or almost all) investments in or revenues from real estate property or rights connected thereto, located outside the Netherlands Antilles. These revenues were, under the old offshore regime, exempt from tax. For profit tax purposes, these companies will be grandfathered through the last day of the financial year of the company that starts before 1 July 2019.

Specific rules are applicable to companies that were incorporated after 30 June 1999 but before 31 December 2001. These companies may also qualify for the aforementioned transitional rules provided that these companies have been active in a meaningful way. In principle, a company will not be considered to have been active in a meaningful way if the assets of the companies consist predominantly of deposits or receivables on shareholders or affiliated parties.

The grandfathering period continues until 2019.

Corporate residence

Corporate residence is, in principle, determined by the place of incorporation. However, other factors may also determine residence. For example, a foreign company with effective management in St. Maarten is considered to be a resident. A company that has been established in St. Maarten will always be considered a resident of St. Maarten.

Offshore entities in St. Maarten must have a local managing director. This function is easily provided by one of the many trust companies established in St. Maarten.

Permanent establishment (PE)

The definition of a PE in St. Maarten is generally in line with the OECD model.

Transfer of legal seat

Legislation has been enacted under which a St. Maarten company is allowed to transfer its legal seat to another jurisdiction (if permitted under the laws of the outside jurisdiction) and a foreign company is allowed to migrate to St. Maarten.

Other taxes

Turnover tax

A 5% turnover/sales tax is levied on the revenue derived from services and deliveries rendered by an entrepreneur or company in St. Maarten. Note that non-resident service providers are also subject to this tax as of 11 February 2011.

A limited number of services and deliveries are exempt, such as:

- Exports.
- Certain basic food and other products.
- Electricity and water.
- Medical services.
- Services at the airport or in the harbour regarding imported or exported goods or goods in transit.
- Advisory and management services provided to or by offshore companies and offshore banks.
An entrepreneur liable to turnover/sales tax must file a declaration, with the Tax Inspectorate before the 16th day of the month following the month concerned, at the Tax Collector’s office.

**Property taxes**
There is no property tax in St. Maarten.

**Transfer tax**
The transfer of immovable property located in St. Maarten is subject to a 4% transfer duty.

---

**Branch income**

**Branches operating in St. Maarten**
Tax rates on the profits of PEs are the same as for resident corporations.

There are specific rules for the PE of an insurance company. In that case, the company may elect to declare profit based on a percentage of premiums received by the PE, as well as premiums the company has received from insured residents and from insured risks in St. Maarten. The insurance company may also elect to declare a profit that is in the same proportion to total profit of the company as the aforementioned premiums to total premiums.

No tax is withheld on transfers of profits to the head office.

**Branches of St. Maarten-based companies**
St. Maarten has adopted a definition of a branch (permanent establishment/permanent representatives) that is in line with the definition in the OECD Model Double Taxation Convention on Income and Capital.

The profits of a PE on Aruba, Curaçao or the Netherlands, including the Caribbean Netherlands, are tax exempt in St. Maarten based on the tax arrangement with the Kingdom of the Netherlands. In the case of a PE outside the Kingdom of the Netherlands (i.e. the Netherlands, Aruba, Curaçao, and St. Maarten), the income realised through the PE, after deduction of foreign taxes, is tax exempt. In the case of a foreign loss, this is not deductible.

Foreign real estate is always deemed to be part of a permanent establishment and, as such, is fully tax exempt.

---

**Income determination**

**Inventory valuation**
Both the last in first out (LIFO) and first in first-out (FIFO) methods of inventory valuation are permitted, provided the chosen method conforms to sound commercial practice. Conformity of book and tax reporting is not required. However, occasions or situations for differences are very rare.

**Capital gains**
Capital gains or losses are, in principle, considered ordinary income and subject to standard corporate rates. An exemption from profit tax is granted for advantages
Sint Maarten

(dividends and capital gains) from a qualifying participation (see Dividend income below).

Under the transitional regime for offshore companies (investment, holding, finance, and patent holding companies), capital gains and losses are tax exempt.

**Dividend income**
In general, a full participation exemption applies to all local as well as foreign participations for dividends as well as for capital gains. However, it is now required that dividends be derived from an active participation (non-portfolio investment) or a participation that is subject to tax.

Expenses incurred in connection with a qualifying participation (including capital losses) are not deductible, unless it can be demonstrated that these are indirectly incurred to realise profits that are subject to tax in St. Maarten.

**Non-portfolio investment clause**
A participation is deemed to be active if the gross income of that participation consists of not more than 50% of dividends, interest, or royalties received other than from an enterprise of that participation.

**Subject-to-tax clause**
A participation is deemed to be subject to tax if it is subject to a tax rate of at least 10%.

If at least one of these clauses has been met, the 100% participation exemption will apply. If none of these clauses are met, the participation exemption is limited to 70% of dividends. Consequently, the dividends would be subject to an effective tax rate of 10.35% (30% x 34.5% regular tax rate).

The 100% exemption also applies to income other than dividends, such as capital gains derived from qualifying participations.

**Immovable property**
The aforementioned clauses do not apply to dividends from a participation that (almost) exclusively (directly or indirectly) holds immovable property. The 100% participation exemption applies to these dividends.

**Definition of dividend**
A dividend is defined as a distribution of profits on shares or profit-sharing notes, paid from statutory profits or profit reserves. Dividends shall not be considered payments for the purchase of own shares or profit-sharing notes, distributions on shares upon liquidation, repayment of paid-up capital, or the distribution of bonus shares.

**Minimum cost-price threshold for participations**
The minimum cost-price threshold for shareholdings, profit-sharing notes, or voting rights of less than 5% is ANG 890,000.

**Foreign income**
A St. Maarten corporation is taxed on foreign interest and other income as earned, and on foreign dividends when received. Undistributed income of foreign subsidiaries is not taxable.

The profit of a PE is tax exempt, and foreign losses are not deductible.
Deductions

Depreciation and amortisation
Depreciation of tangible fixed assets, excluding land, is taken over the estimated useful life of the asset. The depreciable base includes purchase price, customs duties, shipping costs, and installation costs, less residual value, if any. The straight-line method is customary, but the declining-balance method is also acceptable. In addition, an accelerated deduction of one-third of the assets’ depreciable basis may be taken. The assets’ remaining cost basis (two-thirds) is depreciated using one of the acceptable methods.

The cost basis of certain intangible assets, such as patents, trademarks, and copyrights, can be amortised over their expected useful lives. Goodwill and other intangibles resulting from the excess of purchase price over the cost basis of assets purchased are amortised over three to five years.

Charitable donations
Charitable donations to qualifying entities within the Kingdom of the Netherlands may be deducted to the extent that they exceed 1% of net income and ANG 100 after utilisation of tax loss carryforwards. The maximum deduction is 3% of net income.

Taxes
Taxes, other than the corporate tax itself, incurred in the course of doing business are deductible.

Fines and penalties
Fines and penalties are not deductible in cases where they have been imposed by a criminal court in St. Maarten, or have been paid to avoid prosecution, and in cases of administrative fines imposed by a Government agency in St. Maarten.

Bribes, kickbacks, and illegal payments
Expenses that are connected to a criminal offence for which a taxpayer has been convicted are not deductible. Bribes paid to public servants and politicians are not deductible.

Net operating losses
Losses may be carried forward for a period of ten years. Start-up losses during the first four years for companies having tax holidays may be carried forward indefinitely. Carrybacks are not permitted.

Payments to foreign affiliates
The Corporate Tax Act provides for specific limitations for deduction of interest in certain cases of restructuring and refinancing involving the creation of artificial flows of interest payments to persons who are tax exempt or subject to lower taxes in their jurisdiction.

Group taxation

Fiscal unity
The Corporate Tax Act provides for fiscal unity treatment for corporate profit tax purposes. Resident companies with wholly owned resident subsidiaries could qualify for this regime. The parent company is entitled to submit one consolidated income tax
Sint Maarten

return on behalf of the entire fiscal unity group. As a result, only the parent company is assessed.

Within certain limitations, losses of one company can be offset against the profits made by another company in the fiscal unity group. No profits need to be recognised on inter-company transactions, as these are disregarded for tax purposes. The fiscal unity applies for profit tax purposes only; the participating entities remain separate and identifiable under civil law.

Fiscal unity relief is confined to companies organised under the laws of St. Maarten, the Netherlands, Aruba, or Curaçao. The companies which invoke this relief must have their place of management in St. Maarten.

On the basis of the non-discrimination provision of a relevant tax treaty, entities established under the laws of a tax treaty party may also be admitted to the fiscal unity regime provided that they are resident in St. Maarten.

**Transfer pricing**
There are no specific regulations with regard to transfer pricing. However, based on case law, businesses can be required to show that in case of intra-company transactions, these transactions have been made at arm's length.

**Thin capitalisation**
In cases where a company receives a loan from an associated exempt private limited liability company (Besloten Vennootschap or BV), and the amount of the loan is more than three times the net equity of the company, the interest on the loan is not deductible for the part that is more than three times the net equity.

---

**Tax credits and incentives**

**Foreign tax credit**
A tax credit applies to income from abroad that has been subject to tax at source or to another tax on income. The tax credit is allowed for the income tax levied abroad, but shall not exceed the St. Maarten profit tax that is attributable to that foreign income.

**Inward investment and capital investment**
There are tax incentives or holidays for the establishment of new economic enterprises and hotels with a predetermined minimum employment and capital investment. Special provisions relate to the taxation of shipping and insurance companies.

**Investment allowance**
For a minimum investment of ANG 5,000, an 8% investment allowance on acquisitions and improvements (for new buildings, 12%) is permitted as a deduction from taxable profit in the year of investment and in the subsequent year, for businesses operating in St. Maarten.

**Accelerated depreciation and tax rollover reserve**
An accelerated deduction of one-third of the assets’ depreciable basis may be taken. If a profit results at the time of sale of capital assets with the intention to replace that asset, the profit may be placed in a tax rollover account.
**Tax exempt company**

It is possible to elect tax-exempt status for a BV. To qualify for the exemption, a number of conditions must be met, including (but not limited to) the disclosure of beneficiaries, management, financials, and the activities (only investment and financing activities) of the company. Recently, the licensing of intellectual and industrial property rights and other comparable property and usage rights have been added to the list of allowed activities.

Another condition has been added that requires that no more than 5% of the revenues of the exempt company consist of dividends from subsidiaries that are not subject to a tax regime comparable to that of St. Maarten. A profit tax regime is comparable to that of St. Maarten if the foreign tax regime provides for a profit tax rate of at least 15% (50% of the old Netherlands Antillean rate, excluding island surcharges).

The subject-to-tax requirement is also met if the foreign tax regime appears on a list of comparable tax regimes. The list that has been issued includes all EU and OECD member states and all jurisdictions with which St. Maarten has a tax treaty. According to the list, the subject-to-tax requirement is also met in the case of a jurisdiction that is included in the white list issued by the OECD, provided that no special tax regime is applicable.

**Independent expert**

Currently, an independent expert is required to certify that the exempt company meets the requirements for exempt status. If more than 5% of the revenues of the exempt company consist of dividends from subsidiaries that are not subject to a tax comparable to that of St. Maarten, the independent expert must inform the Inspectorate of Taxes. The inspector notifies the company that it no longer meets the requirements for exempt status. The exempt status is then terminated starting the first day of the year following the year in which the notification becomes final.

**Ocean shipping companies**

Ocean shipping companies are taxed on a fixed profit per net ton of ANG 0.60 up to ANG 2.00 (or per 10 net ton in case of management and control). International aviation companies may apply a reduced tax rate against 80% of their profit, as their profits are deemed to be gained outside of St. Maarten. As a result, the overall effective tax rate is 9.66%.

**New industries and hotels**

New industries and hotels are granted partial exemption from profit tax and a minimum 2% tax rate for a period of five to 11 years. A minimum investment is required. Losses incurred during the first four years of operations may be used to offset taxable income for an indefinite period of time.

**Land development companies**

Land development companies are granted a tax holiday. They are exempt from tax on profits realised on the sale of the developed land. A minimum investment of ANG 1 million is required. Activities should be expected to enhance the economic development of St. Maarten.

**Private foundations**

Private foundations are exempt from St. Maarten profit tax, and their distributions are exempt from St. Maarten gift tax, as are contributions of assets to the foundation by a non-resident. Gift tax in the contributor’s country may be applicable.
Sint Maarten

The ‘private’ foundation is a variant of the long-existing ‘common’ foundation. The most important difference is that the purposes of a common foundation may not include making distributions (other than distributions of an idealistic or social nature). This restriction does not apply to private foundations, whose purpose may include making distributions to the founders and others. A private foundation may not run a business or enterprise for profit. Acting as a holding company or investment company is not considered running a business. The private foundation is intended to be an alternative to the Anglo-Saxon trust, especially in civil law jurisdictions.

**Mergers, split-ups, and re-incorporations**

In cases of a business merger, relief is granted under certain circumstances. Although there is no specific provision in the Corporate Tax Act with regard to legal mergers, legal split-ups, and re-incorporations, the Tax Inspectorate has announced that when certain conditions are met, a tax facility also applies in these cases.

---

**Withholding taxes**

Although a dividend withholding tax (WHT) was approved in 1999, it has been decided that for the foreseeable future this tax will not enter into force. If it is decided that the tax will enter into force, there is a mandatory transitional period during which the tax will not be applicable to legal entities resident at that time in St. Maarten.

**Tax treaties**

St. Maarten currently has tax treaties in effect with the Netherlands, Aruba, Curaçao, and Norway. A DTA has been negotiated with Jamaica, but this has not entered into force yet. Furthermore, TIEAs have been signed with several countries including Australia, Canada, Denmark, Mexico, Spain, Sweden, New Zealand, and the United States. As a result, St. Maarten, as part of the former Netherlands Antilles, has been moved to the white list of the OECD Global Forum.

**Tax arrangement for the Kingdom of the Netherlands (TAK)**

As part of the Kingdom of the Netherlands (TAK), St. Maarten is party to a federal tax agreement with the Netherlands, Aruba, and St. Maarten. Subject to this treaty, dividends, interest, and royalties paid out to a St. Maarten company may qualify for reduced rates of WHT in the subject countries.

Dutch dividend WHT is 15% if the St. Maarten company owns less than 25% of the Dutch company. In St. Maarten, only 5% of these dividends are taxed, at a rate of 34.5%, which results in an effective profit tax rate of 1.725%.

If the St. Maarten company’s interest is 25% or more, Dutch WHT can be reduced to 8.3%. This tax is then paid, under a special procedure, to the St. Maarten tax authorities. These dividends are fully exempt from profit tax in St. Maarten.

Capital gains derived from shareholdings in Netherlands’ corporations are fully exempt from profit tax in St. Maarten, provided that the shareholding amounts to at least 25% interest in the corporation. If the shareholding amounts to less than 25%, the capital gain is tax exempt for 95%.

The WHT regime in the TAK also applies to the old St. Maarten offshore companies.

The TAK is to be revised.
**Tax administration**

**Returns**
Profit tax is levied by way of a self-assessment system. Returns are to be filed on a calendar-year basis. Non-resident corporations may file their returns based on a calendar year basis or on a different book-year. On request, this may also apply, for example, when a resident company is the subsidiary of a foreign parent company (i.e. only a local company must request for a different tax year end).

A provisional return must be filed within three months after the end of the book-year. A final return must be filed within six months after the end of the book-year.

**Payment of tax**
Payment is to be made at the time of filing and in a lump sum on the basis of the self-assessment.

In general, at the time of filing the provisional return, an amount equal to the profit tax of the previous year must be paid; the remaining balance due for the year for which the return is filed must be paid at the time of filing the final return.

For example, if the tax due for the year 2009 was 100, then at the time of filing the provisional return for 2010, that same amount must be declared and paid. If there is reason to believe that the amount for the year 2010 will be lower than for 2009, the estimated lower amount may be paid at the time of filing the provisional return, upon request.

At the time of filing the final return for the year 2010, the balance due must be paid; or if the total amount is less than the amount already paid up, a repayment will follow.

**Statute of limitations**
A reassessment can be imposed until five years after the tax year. In cases where the taxpayer is considered to be in bad faith, a reassessment can be imposed until ten years after the tax year.

**Other issues**

**Mergers**
The Corporate Tax Act provides for a tax facility for business mergers. In a business merger, a company acquires all or a substantial part of the trade or business of another company with a view towards combining the business operations of the two companies into a permanent financial and economic organisation. If the business is transferred as part of a business merger, the gains realised by the transferor are not subject to profit tax if certain conditions are met.

Although there is no specific provision in the Corporate Tax Act with regard to legal mergers, legal split-ups, and re-incorporations, the Tax Inspectorate has announced that when certain conditions are met, a tax facility also applies in these cases.
**Exchange controls**
In general, exchange control regulations are very liberal for offshore companies. Offshore companies established in St. Maarten can obtain non-resident status for exchange control purposes, which basically provides for total exemption from exchange controls. Onshore companies are subject to slightly stricter rules. These companies are subject to a licence fee of 1%.
**Slovak Republic**

**PwC contact**

**Significant developments**
The tax legislation in the Slovak Republic (Slovakia) has not been significantly amended recently. Nevertheless, the legislation is subject to frequent amendments and new official interpretations. Therefore, it is advisable to contact PwC Bratislava for up-to-date information. The latest amendment recently approved by the Slovak Parliament is effective from 1 January 2011. Thus, the information included in this summary applies from 1 January 2011 unless otherwise stated.

**Taxes on corporate income**
As a member state of the Organisation for Economic Cooperation and Development (OECD), the Slovak Republic's system of corporate taxation generally follows OECD guidelines and principles.

Slovakia has a flat corporate income tax (CIT) rate of 19%, and does not have local, state, or provincial CIT.

**Corporate residence**
A company is a resident in the Slovak Republic if it has its registered seat or effective place of management in the Slovak Republic.

**Permanent establishment (PE)**
A foreign company may create a PE if (i) its employees (or persons working for it) are present and providing services in the Slovak Republic on behalf of the foreign company where this activity is carried out through a permanent place of business, (ii) the employees conclude and negotiate agreements on the foreign entity's behalf, or (iii) the foreign entity establishes a building site within the territory of the Slovak Republic.

**Other taxes**

**Value-added tax (VAT)**
A basic VAT rate of 20% applies to all taxable supplies, with certain exceptions. Medical products and printed materials have a VAT rate of 10%. Exempt supplies without credit entitlement include postal services, financial and insurance services, education, public radio and TV broadcasting services, health and social services, the transfer and leasing of real estate (with exceptions), and lottery services. There are also other VAT-exempt transactions without credit entitlement, as well as exempt taxable supplies with credit entitlement.
Slovak Republic

VAT grouping is possible if certain conditions are met.

**Stamp taxes**
There are no special stamp taxes in Slovakia.

**Excise tax**
Excise tax is charged on the release to free tax circulation or import of tobacco products, wine, spirits, beer, and mineral oil. In addition, effective 1 July 2008, excise tax is also charged on electric energy, coal, and natural gas.

**Immovable property tax**
Immovable property tax, which is divided into land tax, building tax, and tax on apartments, is governed by the Act on Local Taxes. Immovable property tax is calculated based on the area of the real estate, its location, and its type, as well as the tax rate of each self-governing region.

Real estate transfer tax was abolished effective 1 January 2005, and there are no stamp duties or similar taxes on share or other property transfers, although small administrative fees are payable to register such transactions.

**Transfer taxes**
Transfer taxes are not applicable for Slovakia.

**Turnover taxes**
Turnover taxes are not applicable for Slovakia.

**Registration taxes**
Registration taxes are not applicable for Slovakia.

**Customs duties**
- Goods imported from non-EU countries are subject to import customs clearance.
- Goods exported from the EU customs territory have to be declared for export customs clearance.
- The person responsible for paying the customs debt is the declarant.
- The declarant is the person making the customs declaration in his own name, or the person in whose name the customs declaration is made.
- The custom declaration should be made in the prescribed form and manner (in writing or by another action).
- Import or export duties are customs duties and other charges payable on the import or export of goods (import VAT, excise duties, and charges under the common agricultural policy).
- The customs authorities require declarants to provide a deposit to cover the customs debt in the event that a customs debt arises. Such a deposit may be in cash, or may be provided by a guarantor.

To communicate with the customs offices, each person must have an Economic Operator Registration and Identification Number (EORI), which is registered by the customs authorities on request. EORI registration is mandatory for customs clearance.

The European customs rate, customs nomenclature and customs tariffs are set by EU legislation.
Motor vehicle tax
Vehicle tax applies to vehicles that are used for business purposes in the Slovak Republic, regardless of where they may be registered. The taxpayer is the entity that uses the vehicle for business purposes. The tax rate depends on engine capacity, vehicle size, and the decision of each self-governing region.

Inheritance tax and gift tax
Inheritance tax and gift tax were abolished as of 1 January 2004.

Branch income
A foreign company may trade through a Slovak branch, which must be registered in the Slovak Commercial Register. The taxable income of the branch may not be lower than that which an independent entity (e.g. a Slovak company) would achieve from carrying out similar activities under similar conditions. If the branch's taxable income cannot be assessed based on its income less costs, as adjusted for tax purposes, certain other methods may be used. A taxpayer may ask the tax authorities in writing to approve such a method. A Slovak tax resident entity is able to deduct from its tax base a tax loss made by its taxable PE (e.g. branch) outside Slovakia.

Income determination
The tax base is generally the accounting result as determined under Slovak statutory accounting rules, adjusted for tax purposes. Under the transfer pricing rules, the tax base should be increased by the difference in prices charged between a Slovak entity and its foreign related parties compared with those that would be charged between independent parties. Slovak tax law generally reflects OECD rules with respect to transfer-pricing methods.

Capital gains
Capital gains from the disposal of assets are included in the CIT base. The tax treatment of capital losses depends on the type of asset on which they arose.

Dividend income
Dividends paid out of profits earned on or after 1 January 2004, and liquidation surpluses and settlement amounts to which shareholders became entitled on or after 1 January 2004, are not subject to tax. Income received by inheritance or donation, and income from acquiring new shares due to an increase in share capital from retained profits or mergers and demergers within Slovakia or the European Union (EU), is also not subject to tax.

Interest and royalty income
Slovak-source interest income earned by taxpayers with limited as well as unlimited tax liability is subject to withholding at a flat tax rate of 19%, except where the recipient of the interest or the yield is an investment fund, supplementary pension fund, bank or the branch of a foreign bank, or the Slovak Export-Import Bank.

Royalty income is subject to the 19% corporate flat tax rate.

Interest and royalty income is also exempt if it is paid by a Slovak payer to a recipient who is a tax resident in the European Union and is a beneficial owner of this income, provided that for 24 months before the payment:
• the payer owns at least 25% direct shareholding of the recipient of the income
• the recipient owns at least 25% direct shareholding of the payer of the income, or
• a third entity resident in European Union owns at least 25% direct shareholding on both the payer and the recipient of the income.

**Unrealised foreign exchange gains/losses**
The taxpayer may decide whether to include unrealised foreign exchange differences relating to unsettled payables and receivables in the tax base in the tax period when they are accounted for or in the tax period when they are realised. However, the decision to include these differences when they are realised must be made in writing to the Tax Office before the start of the tax period. Any subsequent decision to revert back to including these differences must be made before the end of the tax period concerned.

**Foreign income**
Companies resident in the Slovak Republic are taxed on their worldwide income, including income of its foreign branches. Credit relief is available for foreign tax paid under most of Slovakia’s double tax treaties (DTTs). Alternatively, exemption of foreign income taxed abroad from taxation in Slovakia may apply.

**Deductions**

**Depreciation and amortisation**
Tax depreciation is calculated on an asset-by-asset basis using a straight-line or reducing-balance method at statutory rates, and is generally available for expenditure incurred on tangible fixed assets. Some types of assets are excluded from depreciation (i.e. land, artwork, and national monuments).

Tangible fixed assets are classified into tax depreciation groups to which different depreciation periods apply, as follows:

<table>
<thead>
<tr>
<th>Depreciation group</th>
<th>Assets</th>
<th>Depreciation (years)</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Motor vehicles, office machines and computers, and tools and implements</td>
<td>4</td>
</tr>
<tr>
<td>2</td>
<td>Engines, most production line equipment, furniture</td>
<td>6</td>
</tr>
<tr>
<td>3</td>
<td>Buildings made of metal, turbines, air-conditioning systems, and ships</td>
<td>12</td>
</tr>
<tr>
<td>4</td>
<td>Buildings of a permanent nature</td>
<td>20</td>
</tr>
</tbody>
</table>

Taxpayers do not have to depreciate an asset every year. Tax depreciation may be interrupted in any year and continued in a later year without a loss of the total tax depreciation available.

A lessee can depreciate a tangible fixed asset held under a financial lease. For tax purposes, the depreciation period equals the leasing period, and the tax depreciation base equals the acquisition value of the leased asset without VAT and financing costs, plus expenses related to acquisition of the leased asset that the lessee incurred before the asset was put into use.

The value to be used as the basis for tax depreciation depends on how the asset is acquired and is usually based on one of the following:
• Acquisition costs (i.e. the price for which the asset was acquired).
• The taxpayer’s own costs incurred, if the asset is acquired or produced internally.

Intangibles are amortised for tax purposes in line with their accounting amortisation (i.e. over the useful life of the intangible asset).

**Goodwill**
Amortisation of purchase goodwill, including the goodwill on purchase of a business as a going concern, is tax deductible. Other goodwill is not tax deductible.

For goodwill created at the contribution of business as a going concern or goodwill created at a merger, the tax deductibility of the goodwill depends on the method of tax treatment of this reorganization. If the reorganization is performed for tax purposes in fair market values, the goodwill created will be tax effective. On the other hand, if the reorganizations are made in original values, the goodwill created is not tax effective.

**Bad debt provisions**
Provisions for unsecured receivables from loans created by banks, and bad debts of regular commercial companies, are fully tax deductible (subject to certain conditions) once the debt has been overdue for more than 1,080 days (20% of the bad debt is tax deductible when it has been overdue for more than 360 days, and 50% after 720 days), provided certain conditions are met.

**Charitable contributions**
Charitable contributions are treated as gifts which are not tax deductible.

**Pension expenses**
Contributions to supplementary pension savings made by the Slovak employer on behalf of the employee, up to 6% of the gross salary of the employee participating in these plans, are tax deductible.

**Start-up expenses**
Start-up expenses are tax deductible in the period when incurred.

**Fines and penalties**
Contractual penalties and late payment interests are generally tax deductible on a cash basis.

**Non-deductible expenses**
Expenses are generally tax deductible if incurred to generate, secure, and maintain the entity’s taxable income. However, certain costs are specifically not tax deductible. These include entertainment costs, statutory penalties and fines, various provisions, and certain expenses in excess of statutory limits (e.g. employee travel expenses and meal allowances).

**Net operating losses**
A company or branch may carry forward and utilise a tax loss for a period of up to five years following the year in which the loss arose, and for up to seven years for tax losses reported after 31 December 2009. Each year’s tax loss should be considered separately, and can be utilised over its own five or seven-year period.

Carryback of losses is not available in Slovakia.
**Group taxation**

There is no concept of group CIT in the Slovak Republic. Each company in a group is taxed individually.

**Treatment of inter-company items**

Dividends are not treated as taxable costs if they are paid out of the profit after tax earned since 2004.

Royalties, commissions, and other payments paid to foreign related parties are tax-deductible, provided they would be taxable if paid to a third party and if the charges are in line with transfer pricing rules.

**Transfer pricing**

Under the transfer pricing rules, prices in transactions between a Slovak company and its foreign-related parties should be at arm's length, which means the prices should be at rates similar to those that would be charged between unrelated parties for the same or similar transactions under comparable conditions. Although the OECD Transfer Pricing Guidelines were formally not implemented, these are usually followed for determination of arm's-length prices.

If transactions between the related parties are not made at arm's length, and this results in a reduction in the Slovak entity's corporate tax base, then the tax authorities can adjust the corporate tax base to that which it would have been achieved if arm's-length prices had been used.

**Transfer pricing documentation**

All Slovak taxpayers must keep sufficient transfer pricing documentation to justify prices charged by or to their foreign related parties. The Slovak Ministry of Finance has issued a guideline setting out detailed requirements for transfer pricing documentation (the Guideline) for entities which are obliged to prepare their financial statements under IFRS.

The EU code of conduct was formally not implemented. However, the Guideline requires maintaining transfer pricing documentation in a form generally in line with the EU standards.

Slovak tax inspectors may require transfer pricing documentation during a tax inspection. Without such documentation, transfer pricing adjustments (increased tax base) are much more likely to be imposed. In addition, entities reporting under IFRS may be specifically penalised for not keeping transfer pricing documentation or for non-compliance of their documentation within the Guideline requirements.

**Thin capitalisation rules**

There are no thin capitalisation rules in the Slovak Republic.

**Controlled foreign company (CFC) regime**

There is no CFC regime in place in the Slovak Republic.
**Tax credits and incentives**

There are several types of investment incentives potentially available, including corporate tax credits, discounts on the price of publicly owned real estate, and financial support for creating jobs or for training employees. All of these are treated as state aid.

Various conditions must be met in order for a company to qualify for state aid. These include a minimum amount of investment in fixed assets, the amount depends mainly on the type of project and where it is located.

**Investment incentives**

Investment incentives (including tax credits) are potentially available for projects in the following areas:

- Industry.
- Technology centres.
- Shared services centres.
- Tourism.

The granting of a tax relief is subject to approval of the Slovak authorities. If certain conditions are met, a taxpayer may apply tax relief in the five subsequent years following the tax period in which the relief was granted.

**Research and development (R&D) incentives**

R&D incentives currently available under Slovak law are:

- Subsidies for research and development projects from the state budget.
- Income tax relief at the amount incurred for R&D.

Types of projects which can be granted investment incentives include:

- Fundamental research projects.
- Experimental development projects.
- Applied research projects.
- Feasibility studies.
- Protection of intellectual and industrial property.
- Staffing of research and development functions.

**Withholding taxes**

Mainly, the following payments are subject to withholding tax (WHT) when made by Slovak companies to foreign parties. However, a DTT may reduce or eliminate the rate:

<table>
<thead>
<tr>
<th>Payments</th>
<th>WHT (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Management fees for services provided in the Slovak Republic</td>
<td>19</td>
</tr>
<tr>
<td>Royalties*</td>
<td>19</td>
</tr>
<tr>
<td>Interest on loans and deposits**</td>
<td>19</td>
</tr>
</tbody>
</table>

* Royalties paid to related EU-resident companies are not subject to WHT if certain conditions are met.

** Interest paid to related EU-resident companies is not subject to WHT if certain conditions are met.
Dividends paid out of profits arising in 2004 and later years are not subject to Slovak WHT.

WHT should be paid to the Tax Office no later than 15 days from the end of the calendar month following that in which the payment was made. The withholding obligation lies with the Slovak resident taxpayer. The taxpayer must also notify the tax administrator of the tax withheld and transferred. If the tax is not properly withheld, the unpaid tax becomes the Slovak tax resident’s tax liability, and a penalty may be assessed.

**Double tax treaties**
This table highlights countries with which Slovakia has entered into DTT.

</tbody>
</table>

Notes

1. The lower rate applies to cultural royalties.
   a. In the case of Romania, the rate of 10% applies to royalties in respect of the use of trademarks, patents, or know-how. The higher rate applies in any other cases.
   b. In the case of Brazil, the rate of 25% applies to royalties for the use of trademarks. The lower applies in other cases.
2. The lower rate applies to interest on loans and credits granted by a bank for at least ten years in connection with the sale of industrial equipment; with the study, installation, or furnishing of industrial or scientific units; or with public works.
   a. The zero-rate applies to interest on certain commercial debt-claims, loans guaranteed by public entities for export promotion, accounts/loans between banks/public institutions of the two states, and interest paid to another state or political subdivision of a local authority.
3. The zero-rate applies if the interest is received by the government/the central bank/other state institutions (see the respective treaty for exact wording).
4. The zero-rate applies if the interest is received by the government or the central bank or other state institutions, or if the receivables on which the interest is paid are guaranteed/financed/indirectly financed by the government/governmental institutions (see treaty for exact wording).
5. The rate of 10% applies to royalties for cinematography, TV broadcasting, and radio broadcasting, and to giving up rights related to royalties. The higher rate applies in other cases.
6. This rate also applies to payment for services.
7. Withholding tax is 0% on bank loans.
8. The zero-rate applies to copyrights, 1% applies to finance lease of equipment, 5% applies to equipment rental and royalties for software, cinematography, and TV and radio broadcasting, 10% applies to payments for the use of trademarks and know-how.
9. The rate of 2% applies to state bonds, obligations, and loans insured or guaranteed by the National Bank of Slovakia/Israel, Slovak Society for Insurance of Foreign Credits and Loans, or Israel Society for Insurance of Foreign Trade; 5% applies if interest is received by a financial institution; and 10% applies in all other cases.

10. Slovakia can apply the rate of 5% to royalties for the use of trademarks, patents, or know-how paid from Switzerland to Slovakia, if Switzerland does not apply the 10% rate.

11. The zero-rate applies to interest on loans and credits in connection with the sale of industrial, business or scientific equipment, or the sale of goods.

12. The zero-rate applies if the interest received is related to loans (monetary or non-monetary) provided to the government of the other contracting state corporation or any other institution with state shareholding or to loans provided to a bank institution under a governmental approval.

13. The zero-rate applies to copyrights.

14. The zero-rate applies to interest received by a resident of one state in respect of indebtedness of the other state government or political subdivision/local authority, or in respect of a loan made/guaranteed by the other state government in respect of imports/exports.

15. The zero-rate applies if the interest is received by the government, the central bank, or other state institutions, or if the receivables on which the interest is paid are guaranteed/financed/indirectly financed by the government/governmental institutions (see treaty for exact wording).

16. The rate of 5% applies to royalties for the use or the right to use of patent, draft or model, plan, confidential formula or procedure, for information related to industrial or scientific experience and for the use or the right to use of an industrial, business or scientific device. The rate of 10% applies to royalties for the use or the right to use of trademark or for information related to business experience. The rate of 15% applies to royalties, other than those stated above.

17. Slovakia is waiting for Egypt to announce its approval of DTT.

18. DTT between Slovakia and Libya is effective as of 21 June 2010.

19. Slovakia and Switzerland signed the Protocol to a DTT on 8 February 2011, which is not ratified yet. Based on this Protocol, the interest rate will be maximum 5%. Industrial royalties are subject to 10%, but the potential reduction of the rate is in case the royalties are paid within European Union, and entities are considered to be related companies with direct share exceeding 25% for more than 24 months, which is in accordance with the EU Directive on interest and royalty payments made between associated companies.

**Tax administration**

**Returns**
The standard fiscal year is a calendar year, but a Slovak entity may opt to change this to a different 12-month period. A corporate tax return must be filed together with the entity's financial statements within three months following the fiscal year-end. A three-month extension to the filing deadline may be used. Also, if part of the income to be reported in the tax return is from sources abroad, the taxpayer may extend the filing deadline by up to six months. To extend the filing deadline, the taxpayer has to notify the Tax Office before the normal filing deadline. After notification, the deadline is automatically extended.

**Payment of taxes**
The balance of tax due for a fiscal year is payable by the filing deadline.

Advance payments of corporate tax must be paid monthly or quarterly during the current tax period. Installments are usually based on the last known tax liability of the entity. It is not necessary to pay tax advances if the last tax liability did not exceed 1,659.70 euros (EUR). When the tax return for the preceding tax period is filed, and the final tax liability is known, any outstanding tax is paid, and a new schedule for paying advances for the current year is made.

**Statute of limitations**
A tax may not normally be assessed or additionally assessed more than five years (ten years when DTT treaty was applied, including transactions with foreign related parties) after the end of the year during which the obligation to file a tax return arose, or during which the taxpayer was obliged to pay the tax. If a tax inspection is undertaken within
this five-year period, another five-year period commences from the end of the year in which the taxpayer was notified of this action.

If a taxpayer utilises a tax loss reported as of 2010, a tax or additional tax cannot be assessed more than seven years after the end of the year in which the obligation to file a tax return in which a taxpayer reported the tax loss arose.

However, tax may be assessed, or additionally assessed, no later than ten years after the end of the year during which the obligation to file a tax return arose, or during which the taxpayer was obliged to pay the tax.

**Other issues**

**Reserve fund**
When a joint-stock company is incorporated, it must create a reserve fund of at least 10% of its share capital. The statutory reserve fund must be increased annually by an amount set out in the company’s Articles of Association, but not less than 10% of its net profit, up to a total of 20% of the share capital.

A limited liability company must create a reserve fund following the first year in which it reports a profit, at the latest. The minimum contribution is then 5% of the net profit each year (or more if specified in the company’s Articles of Association) up to a total of at least 10% of the company’s share capital.

A branch of a foreign company is not required to set up a reserve fund.

A reserve fund may be used to cover prior year losses of the company, and, in certain other limited situations, but it is not distributable.

**Business combinations**
Two alternative tax treatments may be used for business combinations, including in-kind contributions to a company’s share capital, mergers, and demergers.

Under the first alternative, the taxpayer should value assets for tax purposes using their current market values, and the revaluation difference must be reflected in the appropriate company’s tax returns within seven years of the transaction.

Under the second alternative, the taxpayer should continue to use the original tax book values of the assets, and revaluation difference is not taxable/tax deductible.

When selling a business, the purchaser must include goodwill or negative goodwill, acquired as part of the purchase, in its tax base within seven tax periods.

**International Financial Reporting Standards (IFRS) adoption**
Slovakia has adopted most of the principles of IFRS in its accounting law. However, there are still some differences between IFRS and Slovak accounting standards.

**Obligation to prepare statutory financial statements according to IFRS**
Financial institutions (banks, insurance companies, etc.) must prepare their statutory financial statements according to IFRS. In addition, a company which fulfils two or more of the following conditions, in two consecutive accounting periods, must prepare its statutory financial statements according to IFRS:
Slovak Republic

- The total value of assets is more than EUR 165,969,594.
- Net turnover exceeds EUR 165,969,594.
- The average number of employees in the individual accounting period exceeds 2,000.

If the Slovak taxpayer is obliged to prepare its financial statements under IFRS, the tax base is derived from either:

- the profit before tax under IFRS, adjusted for tax purposes using the ‘IFRS Tax Bridge’ issued by the Slovak Ministry of Finance or
- the profit before tax under Slovak statutory accounting standards.
Significant developments

Amendments to corporate taxation
The Slovene Corporate Income Tax (CIT) Act, which became effective on 1 January 2007, was amended once during 2010.

The amendments, which are summarised below, aim to reduce the tax burden on businesses during the global economic downturn, to encourage employment of certain categories of people, and to facilitate investments in research and development (R&D).

Tax relief for investments in the Pomurje region
In 2010, a new decree came into effect that enables entities based in the Pomurje region of Slovenia to benefit from additional employment incentives and additional tax relief for investments. These extra benefits are available from 2010 to 2015. As a result, provided certain conditions are met, entities with their seat in Pomurje are entitled to a 70% tax allowance for investments in equipment and intangible assets as well as to certain employment allowances.

Tax relief for employment of hard-to-place workers
A taxpayer who employs a hard-to-place worker may be able to benefit from a tax allowance for both corporate tax and tax on activity. A hard-to-place worker is a person younger than 26 or older than 55 who has been registered as unemployed for at least six months and who has not been employed by the taxpayer or a related party in the past 24 months. The tax allowance equates to 45% of the salary paid to the person during the first 24 months of their employment, up to the amount of the tax base.

Increase in R&D allowances
There have been changes with respect to the relief for investment in R&D. The relief has been doubled from 20% to 40% of the cost of investments into R&D. Correspondingly, additional regional tax reliefs were increased to 50% or 60%.

Changes to double tax treaties (DTT)
Slovenia has recently ratified four new DTTs which will come into force after both contracting countries finalise all their internal procedures. These treaties are between Slovenia and

- Kuwait
- Egypt
- Qatar, and
- Singapore.

As of 1 January 2011, a new DTT between Slovenia and Italy entered into force.
Slovenia

**Taxes on corporate income**

Slovenian tax residents are liable to pay corporate income tax (CIT) on their worldwide income. Slovenian tax non-residents are taxed only on income from sources in Slovenia, including income earned through permanent establishments (PE) in Slovenia.

The CIT rate for 2010 and subsequent years is a flat rate of 20%.

A special tax regime is granted for certain economic zones where additional tax allowances for investment and employment may be available *(see the Tax credits and incentives section)*.

Taxpayers, such as non-profit or charitable organisations, associations, foundations, etc., are exempt from CIT on their non-profit-making activities.

Investment funds as well as pension funds, pension insurance companies, and venture capital companies may be taxed at a rate of 0% if certain conditions are met.

There are no state or local taxes on income.

**Tonnage tax**

A company may request to be subject to tonnage tax instead of CIT if it meets certain conditions (i.e. it operates in maritime transport in international shipping) and notifies the tax authorities in advance.

The tax base for tonnage tax is the sum of the tax bases for each of an entity’s ships that are included in the tonnage tax regime. The tax base for a particular ship is calculated by multiplying the number of ship operating days by the daily tax base shown in the following table:

<table>
<thead>
<tr>
<th>Net tonnage (NT)</th>
<th>EUR*/day for 100 net tonnes</th>
</tr>
</thead>
<tbody>
<tr>
<td>For the first 1,000 tonnes</td>
<td>0.90</td>
</tr>
<tr>
<td>For the next 1,001 to 10,000 tonnes</td>
<td>0.67</td>
</tr>
<tr>
<td>For the next 10,001 to 25,000 tonnes</td>
<td>0.40</td>
</tr>
<tr>
<td>Above 25,001 tonnes</td>
<td>0.20</td>
</tr>
</tbody>
</table>

*Euros

**Corporate residence**

A legal entity is considered to be a Slovenian tax resident if the entity has its statutory (registered) seat or place of effective management located in Slovenia. These conditions, however, do not exclude a society or any association of persons, including an association under civil or foreign law that does not have legal identity, from also being considered to be a Slovene tax resident.

**Permanent establishment (PE)**

The Slovene definition of a PE is generally in line with the definition set out in the Organisation for Economic Co-operation and Development (OECD) model tax treaty. Thus, it is a place of business in Slovenia in or through which the non-resident’s activities are conducted in whole or in part. The following, in particular, are considered to constitute a PE:
Slovenia

- An office, branch, factory, workshop, mine, quarry, or other place where natural resources are obtained or exploited.
- A building site, construction, assembly, or installation site, or the supervision thereof, if the duration of the activities concerned exceeds 12 months.

A place of business is not considered a non-resident’s PE if the non-resident:

- only uses the premises in question for storage, display, or delivery of goods belonging to oneself
- only maintains inventories of goods belonging to oneself for the purpose of storage, display, or delivery
- only maintains inventories of goods belonging to oneself for the purpose of processing by third parties
- only maintains the place of business in question for the purpose of purchasing goods or collecting information for oneself
- only maintains the place of business for the purpose of engaging in any other preparatory or auxiliary activity for oneself, or
- only maintains the place of business in question for the purpose of any combination of activities referred to above, provided that the overall activity of the fixed place of business resulting from this combination is of a preparatory or auxiliary character.

Other taxes

**Value-added tax (VAT)**

A basic VAT rate of 20% applies to all taxable supplies.

A lower VAT rate of 8.5% generally applies to foodstuffs, live animals, seeds, plants, water supplies, medicines, medical equipment, transport of passengers, books, admission fees, royalties for writers and performers, certain works of art, certain residential properties, hotel accommodation, use of sport facilities, burial and cremation services, public hygiene services, minor repairs of bicycles, shoes and clothing, domestic care services, and hairdressing services.

Exempt supplies without credit entitlement include financial and insurance/reinsurance services, rent and lease of immovable goods (with exceptions), tax and court stamps, lottery services, trade of land, health and social services, etc. There are also other VAT-exempt transactions without a credit entitlement as well as exempt taxable supplies with a credit entitlement.

VAT grouping is not possible within Slovenia.

**Excise tax**

Excise tax is charged on the release into free tax circulation or import of tobacco products, alcohol and alcoholic drinks, fuel and mineral oils, and electricity.

**Real estate tax**

Real estate tax of 2% is charged on real estate transfers and leases, unless VAT has been charged on the transaction.

**Customs duties**

Goods imported from non-European Union (EU) countries are subject to import customs clearance, and goods being exported from the EU customs territory must be declared for export customs clearance. The person responsible for paying the customs
Slovenia

debt is the declarant. The declarant is the person making the customs declaration in its own name, or the person in whose name the customs declaration is made. The customs declaration should be made in the prescribed form and manner (in writing or by another action specified by law). Import or export duties are customs duties and other charges payable on the import or export of goods (import VAT, excise duties, environmental tax, and motor vehicle tax).

For purposes of communication with the customs offices, each person has to be identified by an EORI number (Economic Operator Registration and Identification Number), which is registered by the customs authorities on request. EORI registration is mandatory for customs clearance.

**Environmental tax**
Environmental tax is charged on carbon dioxide emissions, waste disposal, lubricating oils and fluids, and used motor vehicles.

**Motor vehicle tax**
Motor vehicle tax applies to all vehicles that are registered for the first time in Slovenia. The taxpayer is the entity that imports the vehicle from EU or non-EU countries. The tax rate depends on fuel range and emission of CO2 and ranges from 0.5% to 31%.

**Insurance premium tax**
Insurance premium tax is levied on insurance premiums at the rate of 6.5% and paid by insurance companies.

**Property tax**
Slovenia has not yet introduced property tax.

**Stamp tax**
There is no stamp duty in Slovenia.

**Branch income**
If a branch meets the conditions, as set out in the tax legislation and relevant DTT, to be treated as a PE, then it will be liable to pay tax in Slovenia on profits that are attributable to the PE.

The profit that is attributed to a PE is determined broadly in line with OECD principles. Generally, the attributable profit is the profit that would be expected to be earned by the PE if it were an independent taxpayer performing the same or similar activities and/or business.

A branch whose activities do not create a PE is not subject to CIT in Slovenia.

**Income determination**
Taxable profits are assessed in accordance with Slovenian Accounting Standards 2006 or International Financial Reporting Standards (IFRS) and modified for certain revenues and certain expenses, which are partly or wholly tax non-deductible.
**Inventory valuation**
Slovenian law allows the application of all the most commonly used inventory valuation methods, including the first in first out (FIFO), weighted average cost, and floating average prices methods.

**Capital gains**
Under certain circumstances, the gains made by a Slovenian taxpayer on the disposal of an equity shareholding are effectively 47.5% exempt from taxation. Similarly, 50% of a loss arising on the disposal of such a shareholding would not be deductible for CIT. This treatment applies to the disposal of shareholdings of at least 8% that have been held for at least six months and where the taxpayer disposing of the holding employed at least one person during the six-month holding period.

The above treatment is not available for the disposal of a shareholding of a company which is resident in a country that:

- is outside the EU
- has a corporate tax rate less than 12.5%, and
- is included in a list published by the Ministry of Finance.

**Dividend income**
Dividends and similar income received by a Slovenian taxpayer are generally 95% exempt from taxation as long as the distributor was subject to Slovenian CIT or to a comparable profits tax. The exceptions to this are where dividends represent untaxed reserves of the distributor or where the distributor is tax resident in a country that:

- is outside the EU
- has a corporate tax rate less than 12.5%, and
- is included in a list published by the Ministry of Finance.

**Foreign income**
Foreign income, except dividends, received by a Slovenian entity from foreign sources is included in taxable income for CIT purposes unless a tax treaty provides for exemption.

**Deductions**
In general, business expenses which are necessary to generate taxable revenues are fully tax-deductible. The following expenses are considered unnecessary for the generation of taxable revenues and are not deductible for tax purposes:

- Expenses which are not directly necessary for performing business activities or are not incurred as a consequence of a business activity.
- Expenses of a private character.
- Expenses which do not correspond to standard business practice.

Some of the most common non-deductible expenses include:

- Penalties and the cost of bribes.
- Input VAT that could have been reclaimed in accordance with the VAT act.
- Entertainment costs, which are only 50% tax-deductible.
- Costs relating to the supervisory board, which are only 50% tax-deductible.
- Legal and other costs of incorporation, which may be deductible for the parent company but not for the entity being incorporated.
Depreciation and amortisation
Depreciation of tangible fixed assets, amortisation of intangible assets, and depreciation of investment property are recognised as expenditures in line with the accounting treatment, up to a maximum of the amount calculated using the straight-line depreciation method and the maximum tax depreciation rates listed below. Any accounting depreciation in excess of these rates is not tax-deductible in the period concerned, but may be deductible in subsequent tax periods, until the asset is fully depreciated or disposed of.

The maximum annual depreciation rates are as follows:

Goodwill
In general, if goodwill is impaired for accounting purposes, then the impairment cost may be treated as tax-deductible. The amount that may be treated as tax-deductible in any one tax period is limited to 20% of the initial value of the goodwill.

Provisions
Certain provisions are only 50% tax-deductible when accrued, with the remaining 50% being treated as tax-deductible when the provision is utilised. The provisions which are subject to this treatment are provisions for warranties granted when selling products or providing services, reorganisations/redundancies, anticipated losses from onerous contracts, pensions, long-service bonuses, and severance payments on retirement.

Bad debt
Bad debt provisions are only tax-deductible if the amount does not exceed the lower of:

• the arithmetic mean of the bad debts written-off in the past three tax periods, under certain conditions specified in the tax law, and
• the amount corresponding to 1% of taxable revenues of the tax period.

In order to take advantage of this deduction, a company must be able to calculate amounts for both tests and then take the lower of the two amounts so calculated. If the company is not able to determine the amount for either, the cost of the bad debt provision is not tax-deductible until the provision is utilised.

Costs of bad debts are tax-deductible when the debt is finally written-off, provided there is a finalised court procedure, the creditor can demonstrate that it would cost more to pursue the debtor than the debt is worth, or the creditor can demonstrate that it has done everything required by good business practice to try to recover the debt.
Related-party interest
Companies may deduct interest expense on loans from their owners or other associated parties up to a maximum of the amount calculated by using the prescribed interest rate published by the Ministry of Finance. Taxpayers must increase taxable profits by the amount of any excess interest expense, unless they can prove that they could have received the loan on comparable terms from an unrelated party.

Compensation
Salaries and other payments relating to employment (e.g. wage compensation, holiday allowances, employer’s social security contributions, long-service awards, severance benefits paid upon retirement, solidarity assistance, and reimbursement of business related expenses) are generally fully tax-deductible.

The costs of benefits in kind are also tax-deductible if such benefits are taxed for the individual under the Personal Income Tax Act.

Pension allowances
Under certain conditions, a tax-deductible allowance for voluntary supplementary pension insurance may apply, of up to 24% of compulsory contributions for pension and disability insurance for insured employees, but may not exceed EUR 2,390 annually per employee.

Charitable contributions
A taxpayer may claim a reduction of its taxable profits for donations made for humanitarian, disabled, charitable, scientific, educational, medical, sports, cultural, ecological, and religious purposes to residents of Slovenia or of EU or European Economic Area (EEA) member states, up to 0.3% of the taxable person’s taxable revenues. An additional allowance of 0.2% of the taxpayers’ taxable revenues is available for payments made for cultural purposes and to voluntary organisations that work for the public interest to protect the public from natural and other disasters.

A taxpayer may decrease its taxable base for payments made to political parties and representative trade unions, up to an amount equal to three times the average monthly salary per employee of the taxpayer.

Net operating losses
Tax losses may be carried forward to reduce taxable profits indefinitely, but loss carrybacks are not permitted. Loss relief may not exceed the amount of current taxable income. Generally, losses that are generated in multiple tax years are absorbed chronologically. The right to carry losses forward may be forfeited if the ownership of the capital or voting power of the taxpayer claiming the loss carry forward changes by more than 50% within the tax period and the taxpayer either has not performed business activities for two years prior to the change of ownership or substantially changes its business activity two years prior to or after the change in ownership.

Treatment of tax losses mentioned in the preceding paragraph does not apply for those losses that are generated in the year of the change of ownership or prior tax periods.

Group taxation
Group tax returns were abolished with the introduction of the CIT Act on 1 January 2007. However, special transitional provisions allow a group of taxable persons to
Slovenia

continue to file a group tax return, until the period for which approval was granted to file a group tax return expires.

**Transfer pricing**
Prices between a Slovenian entity and its related parties must be set, for tax purposes, at fair market value using the arm's-length principle. Broadly speaking, taxpayers are related by direct, indirect, or common shareholdings of over 25%; through a participation in management; or by control through other means, including through contractual terms.

For transactions between two related Slovenian tax residents, provided neither is in an ‘advantaged’ position (advantaged usually means having unutilised tax losses), there is no actual requirement for the companies to adjust their tax returns to reflect an arm’s-length price.

Taxable persons must prepare transfer pricing documentation. The Slovenian rules regarding such documentation follow the EU Code of Conduct on transfer pricing documentation for associated enterprises in the EU (EU TPD).

**Thin capitalisation**
Interest payments on loans granted, or guaranteed, by a related party (a party which directly or indirectly owns at least 25% of the shares or voting rights in the taxpayer) are not tax-deductible to the extent that the loan amount exceeds the thin capitalisation threshold specified in law. This does not apply to loan recipients who are banks or insurance companies.

Generally speaking, the thin capitalisation threshold is exceeded if the debt-to-equity ratio exceeds 5:1. Note that the debt-to-equity threshold ratio will decrease to 4:1 in 2012.

**Tax credits and incentives**

**Investment allowances**
A tax allowance for investment in equipment and intangible assets is available for investments made after 1 January 2008. The tax allowance is limited to the lesser of 30% of the value of the assets acquired or EUR 30,000.

**Research and development (R&D) allowances**
A 40% investment allowance is granted for investments in R&D within the tax period. Such an investment tax allowance may be obtained for expenditures on:

- internal R&D activities within the company and
- the purchase of R&D equipment from related or unrelated parties or from a private research institution.

In addition, the following higher investment allowances may be available for companies that are established in certain regions in Slovenia, which have lower gross domestic product (GDP) rates than the state average:

- 50% investment allowance for investments in locations where the average regional GDP rate ranges between the state average and 15% lower than the state average.
- 60% investment allowance for investments in locations where the average regional GDP rate is more than 15% below the state average.
Allowances for employing certain individuals
A taxpayer that employs trainees or students to undertake practical work may reduce its taxable profits by an additional 20% of the average monthly payment paid to such persons, for every month the person carries out the work.

A taxpayer that employs disabled persons may decrease its taxable profits by an additional 50% of the salary paid to such persons (in addition to the deduction for their actual salary cost). A taxpayer that employs a severely disabled person or a person with a combination of total hearing loss and speech impairment may reduce its taxable base by an additional 70% of the salary paid to such a person (in addition to the deduction for their actual salary cost).

Tax relief for investments in the Pomurje region
Entities based in the Pomurje region of Slovenia may claim additional employment incentives and additional tax relief for investments. These extra benefits are available from 2010 to 2015. As a result, provided certain conditions are met, entities with their seat in Pomurje are entitled to a 70% tax allowance for investments in equipment and intangible assets as well as to certain employment allowances.

Tax relief for employment of hard-to-place workers
A taxpayer who employs a hard-to-place worker may be able to benefit from a tax allowance for both CIT and tax on activity. A hard-to-place worker is a person younger than 26 or older than 55 who has been registered as unemployed for at least six months and who has not been employed by the taxpayer or a related party in the past 24 months. The tax allowance equates to 45% of the salary paid to the person during the first 24 months of their employment, up to the amount of the tax base.

Withholding taxes
In Slovenia, tax must be calculated and withheld on the payments made by residents and non-residents on Slovenian-sourced income to recipients outside Slovenia.

Payments to which the withholding tax (WHT) rules apply include payments for dividends, interest, copyrights, patents, licenses, leases on real estate situated in Slovenia, services of performing artists, and services charged from low-tax jurisdictions. As of 1 January 2007, a rate of 15% of WHT applies.

If a DTT exists, the WHT rate may be reduced in line with the provisions of the treaty. Similarly for payments of interest, royalties, and dividends within Europe, the Interest and Royalties directive and the Parent Subsidiary directive, respectively, may also reduce this WHT rate to zero.

Furthermore, WHT is not deducted on dividends paid to a parent company in another EU member state if those dividends are subject to an exemption from tax in the hands of the recipient, provided certain conditions are met.

Since the 2010 amendment of the CIT Act, and subject to certain conditions, tax is no longer required to be withheld on interest on non-exchangeable debt securities issued outside Slovenia by a Slovenian tax resident corporation through a public placement on an international clearing system (i.e. Euroclear).

**Notes**

1. Under certain treaties, the WHT rate depends on whether, and to what extent, the recipient participates in the capital of the distributor. Generally, if the recipient holds a participation of more than 25% in the distributing company, the dividends are subject to a lower 5% WHT rate. The higher WHT rate is, however, normally due when the participation is less than 25%.

2. Some DTTs include specific provisions whereby interest payments are subject to a 0% WHT rate, if certain conditions are met.

3. The rates shown apply from 1 January 2011, when the new treaty with Italy came into effect.

4. These treaties have yet to be ratified by both parties.

5. 5% rate if the beneficial owner is a company (other than a partnership) which holds directly at least 10% of the capital of the company paying the dividend; 10% rate if the beneficial owner is a company which holds directly at least 10% of the capital of the company paying the dividends and the dividends are paid out of profits which by virtue of the law of the state in which the payer is a resident, are exempt from company tax or subject to company tax at a rate that is lower than the normal rate in that state; 15% rate applicable in all other cases.

6. 5% rate applicable to the gross amount of: (i) royalties paid for the use of, or the right to use, any copyright of literary, artistic, or scientific work (but not including cinematograph films) and (ii) royalties paid for the use of, or the right to use, industrial, commercial, or scientific equipment, 10% rate applicable in all other cases.

7. 5% rate applicable to royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematograph films or films or tapes used for radio or television broadcasting; 10% rate applicable to royalties for the use of, or the right to use, any patent, trade mark, design or model, plan, secret formula or process, or for the use of, or the right to use, industrial, commercial, or scientific equipment, or for information concerning industrial, commercial, or scientific experience.

8. 10% rate applicable to royalties for the use of, or the right to use, any copyright of literary or artistic work including motion pictures, live broadcasting, film, tape, or other means of the use or reproduction in connection with radio and television broadcasting, and for the use of, or the right to use industrial, commercial, or scientific equipment; 15% rate applicable to royalties in all other cases.

9. 5% rate applicable to royalties for the use of, or the right to use, any copyright of literary or scientific work (including cinematograph films, and films or tapes for radio or television broadcasting); 10% rate applicable to royalties for the use of, or the right to use, any copyright of scientific work, any patent, trade mark, design or model, plan, secret formula or process, or any industrial, commercial, or scientific equipment, or for information concerning industrial, commercial, or scientific experience.

### Tax administration

#### Returns

The tax period should be the calendar year. However, a tax period may differ from the calendar year, but may not exceed a period of 12 months. In this case, the tax authorities must be informed about the chosen tax period, and the taxable entity will not be allowed to change its tax period for the following three years.

A tax return must be submitted to the tax authorities by the end of the third month following the end of the tax year.

#### Payment of tax

Tax is paid in advance in monthly instalments (if the amount of prepayment exceeds EUR 400 per month) or in quarterly instalments (if the amount of prepayment is less than EUR 400 per month) determined on the basis of the previous year’s assessment.
After the switch from the source-based taxation to the worldwide taxation of South African (SA) residents in 2000, and the introduction of capital gains tax in 2001, the SA tax system has not undergone fundamental changes. Smaller reforms, however, are ongoing. In 2010, the most significant changes emanating from the budget speech were:

- the introduction of a withholding tax (WHT) on interest (effective as of 1 January 2013)
- the introduction of a headquarter company regime
- a new dividend definition
- further refinements to the proposed dividend tax
- the introduction of rules governing Islamic financing products, and
- refinements to the transfer pricing and thin capitalisation rules.

Please note this information is current as of 1 June 2011. Typically, pending legislation is announced in June or July. Please visit the Worldwide Tax Summaries website at www.pwc.com/taxsummaries to see any significant corporate tax developments that occurred after 1 June 2011.

Secondary tax on companies reform
The Secondary Tax on Companies (STC) is a tax borne by the company on any dividends declared and paid to shareholders. A reform of STC was launched in 2007 and will culminate with effect on 1 April 2012 with the introduction of a WHT on dividends. This tax will replace the current STC in an attempt to align the SA system of taxing corporate profits with worldwide practice.

Administrative developments
A voluntary disclosure programme was introduced in November 2010 and will remain open until 31 October 2011. This provides individuals and/or corporate entities with a window of opportunity to disclose and regularise their tax affairs.

Taxes on corporate income
An SA-resident company is subject to normal corporate income tax (CIT) on its worldwide income, irrespective of source. Non-residents are taxable on SA actual or deemed source income.

In South Africa, the normal CIT rate applicable for corporate income of companies for tax years ending between 1 April 2008 and 31 March 2012 is a flat 28%.
Close corporations, which are essentially a simplified form of company, are taxed at the same rate as companies and are subject to the same taxation rules.

Small business corporations (i.e. companies with only natural persons as members/owners and with gross income of not more than 14 million South African rand (ZAR)) are taxed at 0% on the first ZAR 59,750 of taxable income earned, 10% on the amount above ZAR 59,750 but not exceeding ZAR 300,000, and 28% on the amount exceeding ZAR 300,000.

A personal service provider company (i.e. a company that provides certain services that are performed by persons who have an interest in the company) is taxed at 33% of its taxable income. Similarly, a branch of a company with its effective place of management outside South Africa (i.e. a non-resident company) is taxed at 33%.

Special CIT rates apply in certain industries, such as mining and insurance (see below).

**Alternative turnover-based tax for very small companies**
To reduce the compliance costs for very small companies, a turnover-based presumptive tax is available. Companies with a turnover of less than ZAR 1 million per year can elect to pay this tax instead of normal CIT, at a rate ranging from 0% to 7%, depending on the turnover.

**Secondary tax on companies (STC)**
STC is levied at a rate of 10% on the net dividends declared by SA-resident companies. The net dividend amount is calculated by deducting dividends accrued from dividends declared during the dividend cycle. The company declaring the dividend, not the recipient, is liable for payment of the tax. Branches of foreign companies are exempt from STC but subject to a higher statutory income tax rate.

STC is in the process of being replaced with a WHT on dividends, which will be charged at the rate of 10%. In the case of foreign shareholders, the rate may be reduced by an applicable double taxation agreement (DTA). The switch from STC to a WHT will become effective on 1 April 2012.

**CIT for mining companies**
There are two formulae for determining CIT for mining companies: one for gold-mining companies that are subject to STC and the other for such companies that have elected to be exempt from STC. The formula for gold-mining companies subject to STC will, as of the 12-month period ending 31 March 2010, be \( Y = 34 - 170/x \), and for those exempt from STC, \( Y = 43 - 215/x \). For these formulae, the following applies.

\[ x = \frac{\text{Taxable income from gold mining}}{\text{Total revenue (turnover) from gold mining}} \]

\( Y \) = calculated percentage which represents the rate of tax to be levied

The maximum tax rate, which applies only to companies' income from specified oil and gas activities, is capped at 28%, and the companies are entitled to enter into so-called fiscal stabilisation agreements with the SA government to 'lock in' this rate. The agreement will not prevent the company from benefiting from any possible rate reduction in the future.
South Africa

The rate of STC for the companies engaged in SA oil and gas activities is 5%. Where, however, a company is engaged in oil and gas activities under the so-called OP 26 right (a right to mine oil and gas), it is completely exempt from STC. The normal STC rate of 10% will apply if the company is engaged in refining.

The branches of foreign companies engaged in SA oil and gas activities are taxed at a maximum rate of 31%.

**CIT for long-term insurance companies**
Life insurance companies are obliged to follow the ‘four-fund approach’, with policies divided into four funds, depending on the nature of the beneficiary. Each fund is then allocated assets according to the risk carried by the fund. Funds are treated as separate taxpayers and taxed at four separate rates. These rates are 30% for individual policyholder funds, 0% for untaxed policyholder funds, 28% for company policyholder funds, and 28% for corporate funds.

**Corporate residence**
A company is resident in South Africa if it is incorporated, established, or formed in South Africa or has its place of effective management in South Africa. However, a company that is deemed to be exclusively resident in another country by the terms of a DTA is excluded from SA residency.

The place of effective management is, in terms of an Interpretation Note issued by the South African Revenue Service (SARS), interpreted as the place where the strategic decisions of the directors are implemented. However, this approach has not yet been tested by the South African courts. Where international precedent applies a different meaning to the term, it is expected that the South African courts would interpret the term in accordance with international precedent for both domestic law and treaty purposes.

**Permanent establishment (PE)**
South Africa does not, as a general rule, tax non-residents on the basis of having a PE in South Africa. Rather, non-residents are subject to income tax in South Africa on income derived or deemed to have been derived from a South African source. The primary exception to this rule is in relation to capital gains where non-residents are subject to tax on assets attributable to a PE in South Africa. A PE is defined by reference to the definition thereof in the Organisation for Economic Co-operation and Development (OECD) Model Tax Convention.

**Other taxes**

**Value-added tax (VAT)**
VAT is an indirect tax, which is largely directed at the domestic consumption of goods and services and at goods imported into South Africa. The tax is designed to be paid mainly by the ultimate consumer or purchaser in South Africa. It is levied at two rates, namely a standard 14% rate and a zero rate (0%).

Very few business transactions carried out in South Africa are not subject to VAT. The tax is collected by businesses which are registered as vendors with SARS on all taxable supplies throughout the production and distribution chain. Sales or supplies by non-vendors are not subject to VAT.
VAT registration and administration
All suppliers of goods and services having an annual turnover currently exceeding ZAR 1 million are obliged to register as VAT vendors and to charge output VAT. Other vendors may elect to register as VAT vendors, provided their annual turnover exceeds ZAR 50,000. If they do not register, they are prohibited from charging VAT on goods or services they supply and claiming an input tax (rebate of VAT paid) on goods and services which they acquire.

Under the VAT system, vendors normally pay VAT on expenses (input tax) and charge VAT on supplies made (output tax). This mechanism, therefore, ensures that only the so-called ‘added-value’ is taxed. Due to VAT being a self-assessment system, the output tax collected may be reduced by input tax paid. Thereafter, the net amount is payable to, or refundable by, the SARS. The self-assessment returns are due regularly within prescribed periods (tax periods).

Taxable supplies
Standard rated and zero-rated supplies are known as taxable supplies. Other supplies are known as exempt and non-supplies.

Goods and services
For a liability for VAT to exist, there must be a supply or importation of goods or services. Goods are corporeal movable things, fixed property, and real rights in such things and property. The meaning of ‘services’ is very broad and includes the granting, assignment, cession, or surrender of any right or the making available of any facility or advantage.

Imports
Services imported by a vendor and utilised or consumed by the vendor for the making of taxable supplies are not subject to VAT. In addition, the VAT Act has a schedule that lists goods that are exempt from VAT on importation, whether by a vendor or an unregistered person.

Zero-rated supplies
The VAT Act contains a list of the supplies of goods or services that are taxed at the zero rate. Most of the items refer to exports and international transport, but other specified goods utilised for farming purposes, the sale of an enterprise as a going concern, fuel subject to the fuel levy, and deemed supplies by welfare organisations are also zero-rated.

A zero-rated supply made by a vendor is subject to VAT but at a rate of 0%. Under a zero-rated supply, a vendor does not charge VAT on the consideration for the supply and obtains a refund or credit for the VAT paid on taxable supplies utilised in the making of the zero-rated supplies.

Exempt supplies
In addition to zero-rated supplies, the VAT Act contains a list of the supplies of goods or services that are exempt from VAT. While all fee-based financial services are subject to VAT, the charging of interest is exempt. Other exempt supplies include residential rentals, basic foodstuffs, non-international passenger transport by road or rail, and educational services.

Under exempt supplies by vendors, the vendors do not charge VAT on the supply, and they are not entitled to a deduction or credit for the VAT paid by them on goods and services supplied to them for the making of the exempt supply. Accordingly, vendors
treat the VAT paid by them, and for which they do not obtain a deduction or credit, as another cost and recover it in the consideration they charge for the making of the exempt supply.

**Skills Development Levy (SDL)**
SDL is a compulsory levy to fund the education and training as envisaged by the Skills Development Act. It is payable by an employer and cannot be deducted from the remuneration payable to an employee. Small employers with an annual payroll of less than ZAR 500,000 are exempt from the levy. SDL is levied at the rate of 1% of payroll. It is payable monthly, together with income tax that the employer has withheld on its employees’ salaries.

**Unemployment Insurance Fund (UIF) contributions**
Employers are required to contribute on behalf of their employees on a personalised basis to the UIF. The rate of contributions is 1% of gross remuneration payable to an employee; however, the monthly cap of ZAR 124.78 applies. Another 1%, subject to the same cap, is payable by the employee and withheld by the employer.

**Compensation for Occupational Injuries and Diseases Act (COIDA) fund**
Employers are liable for making annual contributions to the COIDA fund. COIDA contributions are a payroll cost that cannot be deducted from the employee’s salary. The rates vary depending on the employer’s industry (e.g. a rate of 1.62% is applied to the salaries of employees involved in the manufacture of pottery up to a maximum salary band of ZAR 214,305 per annum).

**Donations tax**
Disposals of assets below their market value are a donation and, at least theoretically, subject to donations tax. Donations tax is payable by resident companies at a flat rate of 20% on donations made. An annual exemption of ZAR 10,000 is available.

Public companies, comprised of mostly listed companies, are exempt from donations tax. An exemption is also available for donations made to certain charities and other non-profit organisations.

**Securities transfer tax (STT)**
Stamp duty and uncertified securities tax were abolished on 1 July 2008 and replaced by STT, which applies to the transfer of listed and unlisted securities. The tax rate is 0.25%, which is applied to the taxable amount in respect of the transfer of a security. The taxable amount is usually the consideration for which the security is purchased or the market value of the security, if the consideration declared is less than the market value or if no consideration was paid. STT is payable by the company that issued the securities in question. However, the company can recover the tax from the person acquiring the shares. Slightly different rules apply in the case of listed securities.

**Property taxes**
Local municipalities levy rates on land. These rates are based on a percentage of the municipal valuation of land and improvements and vary from municipality to municipality. Generally, a higher rate is levied on properties zoned for business use.

**Transfer duty**
Transfer duty levied on the sale of immovable property has been revised in the 2011 budget. The revised rate structure applies to properties acquired under purchase agreements concluded on or after 23 February 2011. The duty is payable by the
person acquiring the property within six months from the date of acquisition at the following rates:

<table>
<thead>
<tr>
<th>Purchase price (ZAR)</th>
<th>Transfer duty rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Not exceeding 600,000</td>
<td>0</td>
</tr>
<tr>
<td>600,000 to 1 million</td>
<td>3</td>
</tr>
<tr>
<td>1 million to 1.5 million</td>
<td>5</td>
</tr>
<tr>
<td>Exceeding 1.5 million</td>
<td>8</td>
</tr>
</tbody>
</table>

Prior to 23 February 2011, the rate applicable to companies was 8% calculated on the higher of the purchase price or market value. Transfers of immovable property subject to VAT are exempt from transfer duty.

**Customs duties**

Customs duties are charged on importation of goods into South Africa which range between 3% and 20%, excluding clothing and apparel which may be as high as 45%. The import duties may also include anti-dumping and countervailing duties of up to 150%. No customs duties are charged on trade between South Africa and Botswana, Lesotho, Namibia, and Swaziland, as these five countries constitute a Southern African Customs Union.

**Excise duties**

Excise duty is levied on certain locally manufactured goods as well as their imported equivalents. A specific duty at a pre-determined amount is levied on tobacco (52% including excise & VAT) and liquor (23% to 43%), and an *ad valorem* duty (calculated as a percentage of price) on monitors (7%) cosmetics, televisions, audio equipment, and luxury automobiles (marginal rate of 25%). Relief from excise duty is available for exported products and for certain products produced in the course of specified farming, forestry, and (limited) manufacturing activities.

**Vehicle emissions tax**

An environmental levy is levied on new motor vehicles based on gram per kilometre of CO2 emissions of the vehicle over a stated level. The levy is currently ZAR 75 to ZAR 100 per gram per kilometre over the CO2 threshold level.

**Fuel levy**

A fuel levy is charged on petroleum fuel sold. As of 6 April 2011, the levy is 177.5 cents per litre of petrol and 162.5 cents per litre of diesel.

**Electricity levy**

To support energy efficiency, the government has implemented a levy on electricity generated from non-renewable sources at 2.5 cents/kWh (2 cents/kWh prior to 1 April 2011). The levy is collected at source by the electricity producer.

**Air passenger tax**

As of 1 October 2011, passengers departing on international flights must pay air passenger tax at the rate of ZAR 100 on flights to Botswana, Lesotho, Namibia, and Swaziland, and ZAR 190 on other flights. The tax is added to the price of the ticket. Departure prior to 1 October 2011 is subject to air passenger tax at the rate of ZAR 80 and ZAR 150 respectively.
South Africa

**Branch income**

SA branches of foreign companies are not considered to be separate legal entities for tax purposes, and no tax is withheld on transfers of profits to the head office. Branches of foreign companies are taxed at a rate of 33% and exempted from STC.

Note that a branch must register as a taxpayer and submit tax returns. Separate financial statements must be drawn up for the SA-trading operations. For all practical purposes, the SARS will treat the branch as a separate entity. For example, inter-branch cost recoveries levied by the head office incurred in the production of SA income normally will be allowed as a deduction by the branch.

In terms of DTAs, the taxation of branches is limited to cases where the branch constitutes a PE.

**Income determination**

**Inventory valuation**

Inventories generally are stated at the lower of cost or net realisable value. Write-downs of inventory for slow-moving and obsolete items must be justified, and a general policy on a percentage basis is not permitted. Last in first out (LIFO) is not accepted for tax purposes.

**Capital gains**

Although the capital gains tax forms part of income tax, the two taxes are not fully integrated. Gains realised by companies are taxed at the normal CIT rate; however, only 50% of gains are included in taxable income.

**Dividend income**

Dividends, other than foreign dividends, are generally not subject to tax in the hands of companies, but the company declaring the dividend is liable for STC (as of 1 April 2012, the shareholders will be liable for WHT on dividends). Qualifying foreign dividends are also generally not subject to tax where they are received by resident shareholders holding in excess of 20% of the equity shares and voting rights of the company declaring the dividend. Dividends received by residents holding less than 20% of such shares will generally be taxable in South Africa, subject to a tax credit for foreign WHT payable by the recipient shareholder.

**Stock dividends**

Stock dividends (capitalisation issues of shares) are not subject to tax or STC.

**Foreign income**

Foreign income of an SA-resident company is subject to tax in South Africa on an earliest of receipt or accrual basis. However, income that may not be remitted to South Africa in terms of the laws of the country where the amount arose is deferred until the income can be remitted. Double taxation may be avoided under certain DTAs or by way of unilateral credit or deduction for foreign tax payable on foreign income (see Foreign tax credit in the Tax credits and incentives section).
Deductions

Depreciation and depletion

A depreciation (wear and tear) allowance may be deducted on movable assets used for the purpose of trade. There are no statutory provisions relating to rates of wear and tear, but SARS has published a table of periods over which the assets may be written off, in the absence of evidence to support a different write off period. The rates of wear and tear, based on the cash cost, are calculated either according to the straight-line or diminishing balance method.

New and unused machinery used in the process of manufacture or in a similar process is depreciable at the rate of 40% in the first year of use and 20% in the three following years. If the machinery is not new and unused, an allowance of 20% per year over five years is available.

An accelerated depreciation schedule (50% in the first year of use, 30% in the second, and 20% in the third year) applies to the machinery and articles used in farming, production of biodiesel or bio-ethanol, and production of energy from renewable sources.

Buildings and other permanent structures may not be depreciated, apart from an annual allowance for each of the following:

- Buildings used in a process of manufacture or a process similar to a process of manufacture: For buildings erected before 1 January 1989, a 2% rate applies per year. For buildings erected after 1 January 1989, a 5% rate applies. However, buildings erected between 1 July 1996 and 30 September 1999 are subject to an accelerated depreciation rate of 10% per year.
- Hotel buildings: For buildings built prior to 4 June 1988, a 2% rate applies per year. For hotel buildings erected after 4 June 1988, a 5% rate applies. Improvements within the existing building framework that commenced on or after 17 March 1993 are depreciated at the rate of 20%.
- Agricultural cooperative storage buildings: For buildings built prior to 1 January 1989, a 2% rate applies per year. For buildings erected on or after 1 January 1989, a 5% rate applies.
- Housing projects of not less than five units: Housing projects of not less than five units of residential accommodation, which consist of more than one room and the erection of which commenced on or after 1 April 1982 and before 21 October 2008, are subject to a 2% rate of depreciation. After 21 October 2008, an allowance of 5% is available on this type of property. The 5% depreciation rate is available to the taxpayer provided that the unit is used by the taxpayer solely for trade purposes, the unit is situated in South Africa, and the taxpayer owns at least five units in South Africa used for the purposes of trade. An additional allowance is available for a low-cost residential unit. Additionally, from 21 October 2008, taxpayers are granted relief for the transfer of ownership on a contract for deed basis of employer provided low cost residential units to employees.
- Buildings in urban development zones: Improvements to an existing building in an urban development zone, here the existing structural or exterior framework is preserved and brought into before 31 March 2014, qualify for an accelerated allowance of 20% per year. Buildings that are erected, extended, or added to in an urban development zone on or after 21 October 2008 and which are not covered by the first mentioned allowance qualify for a 20% allowance in the first year and a 8% allowance in the following ten years. As of 21 October 2008, new and unused low-income residential units located in urban development zone demarcations...
South Africa

are subject to an additional annual depreciation allowance. The rate is 25% in the first year, 13% in the succeeding five years, and 10% in the year following the last year. Improvements are subject to a depreciation allowance of 25% over a period of four years.

- Specific allowances are also provided for pipelines, transmission lines, railway lines, airport property, ships, mining operations, and other qualifying industrial assets.
- Buildings used and specifically equipped for certain research and development (R&D) activities can be depreciated 50% in the first year of use, 30% in the second, and 20% in the third year.
- Commercial buildings: The cost to the taxpayer of any new and unused building owned by the taxpayer, or any new and unused improvement to any building owned by the taxpayer, if that building or improvement wholly or mainly is used by the taxpayer for trade purposes, other than the provision of residential accommodation, is subject to a 5% rate of depreciation. This allowance is applicable to any building or improvement contracted for on or after 1 April 2007 and the construction of which commenced on or after 1 April 2007.

An allowance for assets disposed of or scrapped during a year of assessment is determined by reference to the cost less allowances already granted and the proceeds on disposal (if any). Recoupments of allowances granted are taxable where disposal proceeds exceed the tax basis at the time of sale. Such recoupments cannot exceed the cost of the asset. Proceeds above cost will be taxed as a capital gain.

Book depreciation does not need to be consistent with tax depreciation.

No cost or percentage depletion is available for natural resources.

Cost of inventory
The cost of inventory is, in principle, deductible as soon as the inventory is acquired. However, at the end of each year, the cost of the inventory still on hand has to be added to the company’s income. Then in the next year, it can be deducted again. This has the effect of timing the deduction of the cost of inventory to match the time of its realisation.

Assets acquired for shares issued
When current assets are acquired by a company in return for the shares or debt instruments issued to the seller, the purchaser of the assets may deduct the lesser of the market value of the assets immediately after acquisition or the market value of the shares immediately after acquisition.

Taxes
Payroll taxes are deductible from taxable income for the corporation.

Net operating losses
Losses may be carried forward indefinitely, provided an active trade or business of a similar nature is carried on without interruption. There is no loss carryback in South Africa.

Payments to foreign affiliates
Deductions may be claimed for royalties, managerial service fees, and interest charges paid to foreign affiliates, provided such amounts approximate those that would be paid to an unrelated entity in an arm’s-length transaction.
Interest deductions may be limited where the paying company is thinly capitalised (see Thin capitalisation rules in the Group taxation section).

Specific provisions apply for ‘bullet interest’ (i.e. a one-off, upfront lump sum payment of interest). Any interest expenditure must be spread over the life of the interest-bearing arrangement on the compounding accrual basis.

**Group taxation**

Group taxation generally is not permitted in South Africa. However, relief is given for transactions between group companies to allow for reorganisations, provided certain requirements are met.

In general, the relief will only apply to transactions between companies within the same group. A group of companies is defined as a controlling company and one or more controlled companies in relation to that controlling company. A controlling company means a company holding directly or indirectly at least 70% of the equity of any other company. Foreign-incorporated companies do not form part of a group of companies for the purposes of this relief.

Corporate rollover relief is available for asset-for-share transactions, amalgamation transactions, intra-group transactions, unbundling transactions, and transactions relating to liquidation, winding-up, and deregistration.

The relief may cover the capital gains tax arising from the disposal of capital assets, income tax arising from the disposal of a depreciable asset, income tax arising from the disposal of trading stock, donations tax arising from the disposal of an asset, STC, and transaction taxes.

**Transfer pricing**

Transfer pricing legislation has been in SA law since 1995; however, it has only been in recent years that SARS has focused on this area of taxation. The rules require those liable to tax in South Africa to follow arm’s-length principles in their dealings with inter alia connected persons that are not tax residents of South Africa.

Section 31 of the Income Tax Act combines transfer pricing and thin capitalisation (explained below) measures. Section 31(2) provides the commissioner with the power to adjust the consideration of a transaction to an arm's-length price for the purposes of computing the South African taxable income of a taxpayer. This rule applies to both goods and services as well as to direct and indirect financial assistance.

Section 31 is a discretionary section which means that whilst the taxpayer can place some comfort on the fact that the commissioner must have applied due care and reasonableness in raising a transfer pricing adjustment, the onus of proof for rebutting such adjustments rests squarely with the taxpayer.

**Thin capitalisation rules**

The thin capitalisation rules may be applied by SARS where financial assistance, such as a loan, advance, or debt, or the provision of any security, is granted by a non-resident investor to a resident investee who is either a connected person or a corporate entity in which the investor has a direct or indirect interest entitling it to participate in not less than 25% of the dividends, profits, capital, or votes.
The thin capitalisation rules, when applied, disallow the deductibility of interest paid by the SA resident to the foreign lender, to the extent that such interest is considered to be excessive by the SARS.

In broad terms, the rules will not be applied if the debt-to-equity ratio falls within a safe haven ratio of 3:1. In other words, where the financial assistance granted by the non-resident investor does not exceed three times the fixed capital (being essentially share capital, share premium, and accumulated profits) of the resident investee and the interest rate does not exceed the weighted average of prime plus 2% for SA rand-denominated loans, or the relevant weighted average interbank rate plus 2% for loans denominated in other currencies.

These rules do not apply to financial assistance granted by a ‘parent’ company to its branch operating as an external company in South Africa.

**Amendments to transfer pricing and thin capitalisation rules as of 1 October 2011**

In 2010, significant amendments were made to section 31, but these refinements are only effective as of 1 October 2011 (it should be noted that draft legislation published for comment postpones the refinement to 1 April 2012). The amendments serve to modernise the transfer pricing and thin capitalisation rules in line with the OECD and international tax principles; to remove structural problems caused by a literal translation which focuses on isolated transactions rather than the overall arrangements; and to narrow focus which leads to the application of artificial arguments supporting certain arrangements, rather than focusing on the true economic substance.

Section 31 will no longer separately address transfer pricing and thin capitalisation. Rather, thin capitalisation will be treated as simply a breach of the general arm’s-length standard.

The most critical difference from the current rules is the broadening and generalisation of the application concepts. Specifically, the combination of:

- the rules apply if any of the parties derive a ‘tax benefit’
- the transactional concepts of ‘goods and services’ in section 31(2) are removed and replaced with a much broader ‘transaction, operation, scheme, agreement, or understanding’
- the use of ‘directly or indirectly’ in referring to the transactions (etc.) entered into between the taxpayer and any connected person, and
- the general ‘arm’s-length’ standard.

Regarding ‘financial assistance’, the generalisation of the concepts discussed above make them broad enough to catch both excessive debt amounts as well as excessive interest rates. The current concept of ‘financial assistance’ will be retained, i.e. including the provision of any loan, advance or debt, or any security or guarantee.

Importantly, the discretion given to SARS to adjust the price is removed, as the taxpayer is obliged in terms of the ITA to apply the arm’s-length standard, i.e. “… the taxable income must be calculated as if the transaction (etc) … had been entered into … had those persons been independent persons dealing at arm’s length”. This therefore
removes uncertainty that taxpayers had in respect of performing self adjustments on the tax return.

The much broader concept of ‘connected persons’ that currently exists in section 31 (1A) in respect of intellectual property will be retained (new section 31(3)) but extended to apply in respect of financial assistance, in addition to intellectual property).

**Controlled foreign company (CFC) regime**

If one or more residents together hold more than 50% of the voting or participation rights in a foreign company, then it is a CFC in relation to those residents. The income of a CFC is imputed to the controlling holders in proportion to their holdings, subject to certain exclusions and tax credits, where applicable.

**Tax credits and incentives**

**Foreign tax credit**

The South African Income Tax Act makes provision for a rebate against normal CIT tax in respect of foreign taxes paid on foreign sourced income or a deduction against income of foreign taxes paid on SA-sourced income. In both instances, the taxpayer must be an SA resident, the income must be included in taxable income and is not exempt, and that income was subject to a foreign tax which is not recoverable. The rebate is limited to the total normal tax payable calculated by applying the ratio of the total taxable income attributable to the foreign tax to the total taxable income. The deduction, however, may not exceed the income on which the foreign tax was levied.

**Tax exempt grants**

Cash grants received within the terms of a Government Incentive Scheme by taxpayers with manufacturing operations or similar processes are exempt from CIT on such grants.

**Research and development (R&D)**

To encourage innovation, the current costs related to certain R&D activities carried on in South Africa are 150% deductible. The cost of machinery and other capital assets acquired for the purposes of R&D may be depreciated 50% in the first year of use, 30% in the second, and 20% in the third year.

**Headquarter company regime**

For years of assessment commencing on or after 1 January 2011, a ‘headquarter company’ regime is introduced to encourage the use of South Africa as a location for intermediate holding companies.

The benefits on offer to a headquarter company are:

- Exemption from South Africa’s CFC rules.
- Exemptions on the headquarter company’s dividend distributions.
- Exemption from South African’s thin capitalisation and transfer pricing rules on back-to-back loans.
- Capital gains tax exemption upon the disposal of shares in the headquarter company.

The requirements for a headquarter company are as follows:

- The headquarter company must be SA resident.
South Africa

- Each shareholder in the headquarter company must hold at least 20% of the headquarter company's equity shares and voting rights. This means that a headquarter company can never have more than five shareholders.
- At least 80% of the headquarter company's assets (measured on a 'cost' basis) must be comprised of certain assets related to the foreign companies in which the headquarter company holds at least 20% of the equity shares voting rights. Specifically, these assets must be:
  - the equity shares in those companies'
  - loans to those companies, and
  - intellectual property licensed to those companies.
- At least 80% of the headquarter company's receipts and accruals must be comprised of dividends, interest, royalties, or fees from its 20%-plus holdings, or proceeds from the disposal of the equity shares or intellectual property.

The requirements regarding the headquarter company's shareholders must be fulfilled from the incorporation of the headquarter company. The requirements regarding the headquarter company's assets and its receipts accruals are tested only at year-end but must, in the case of assets, be fulfilled every year over the lifetime of the headquarter company. If a company does not meet the receipts/accruals requirements in any year, it will not be a headquarter company for that year, but will not be permanently excluded on this ground.

**Industrial policy projects**

In 2008, a ZAR 20 billion incentive package for investors in energy efficient projects was announced. The incentive is available for industrial projects participating in the manufacturing sector (other than alcohol or alcohol related products, tobacco or tobacco related products, arms and ammunition, and bio-fuels, which have a negative impact on food security). Companies are divided into those with a qualifying status and those with a preferred status. The status is determined in terms of a point system.

The proposed project must either be a ‘brownfield project' (expansion or upgrade of an existing industrial project) or a ‘greenfield project' (a wholly new industrial project, which uses new and unused manufacturing assets). Approved projects may be granted a tax allowance known as an additional investment allowance equal to 55% of the cost of any manufacturing asset used in an industrial policy project with preferred status or 35% of the cost of any manufacturing asset used in any other approved industrial policy project.

Note that the additional investment allowance may not exceed ZAR 900 million in the case of any greenfield project with a preferred status, ZAR 550 million in the case of any other greenfield project, ZAR 550 million in the case of any brownfield project with a preferred status, or ZAR 350 million in the case of any other brownfield project.

In addition to the above, a company may also claim a deduction known as an additional training allowance.

**Venture capital companies**

In order to assist small and medium-sized businesses to raise capital to finance businesses, a tax incentive for investors in small and medium-sized enterprises through venture capital companies has been introduced. This incentive became effective on 1 July 2009 and will last for 12 years.

A deduction is allowed from the income of an individual or a listed company (or a controlled group company in relation to a listed company) in respect of expenditures
actually incurred by that person in respect of shares issued to that person by a venture capital company. A company may deduct its entire expenditures in respect of shares, provided that the shares held by that company and other companies within the same group do not constitute more than 10% of the equity shares of the venture capital company. The deduction available to an individual is capped at ZAR 750,000. A venture capital company is essentially a holding company deriving its income from equity investments in small and medium companies that, in turn, derive their income from active trade within South Africa. A venture capital company has to be specifically approved by SARS.

Withholding taxes

Payments to residents
No WHT, other than payroll taxes, are currently levied on payments to resident corporations.

Royalties payable to non-residents
Royalties and know-how payments made to non-residents for the use of or right to use intellectual property rights in South Africa are deemed to be from an SA source. The payer of the royalty or know-how payment is obliged to deduct a WHT of 12% of this payment, which is a final tax payable by the recipient of such income. The treaty rate is only the maximum allowable rate to be charged by the treaty countries; where this rate is higher than the domestic tax rate, the latter will apply. The 12% WHT may be reduced by the terms of the relevant tax treaty, as follows:

Notes

1. Recipient is the beneficial owner of the royalty.
2. Royalty is subject to tax in recipient country.
3. 15% is levied on royalties for cinematographic or television films.
4. The maximum rate for copyright royalties, royalties for use of computer software, and patents concerning industrial, commercial, and scientific experience is 6% of the royalties paid, otherwise 10%.
5. Maximum rate of 10% of the adjusted amount (being 70% of the gross royalties) for use of industrial, commercial, or scientific equipment.
6. The 5% rate applies to royalties for the use of a copyright. A 7% rate applies to royalties for the use of patents, trademarks, designs, models, etc.
7. In respect of right to use industrial, commercial, or scientific equipment and transport vehicles, a 10% rate applies.
8. Maximum rate of 15% on royalties arising from the use of, or the right to use, trademarks.

**Non-resident entertainers and sportspersons**
A WHT at the rate of 15% applies to all payments made to non-resident entertainers and sportspersons in respect of their activities exercised in South Africa.

**Disposal of immovable property by non-residents**
Any person who pays an amount to a non-resident in respect of the sale of immovable property in South Africa must withhold from the amount payable an amount equal to:

- 5% if the non-resident seller is an individual
- 7.5% if the non-resident seller is a company, or
- 10% if the non-resident seller is a trust.

The amount so withheld is not a final tax for the non-resident seller. Instead, this amount is regarded as an advance payment of the non-resident seller’s normal tax liability for the year of assessment during which the property is disposed of. The non-resident seller is still obliged to submit an income tax return for that year.

**Dividends tax**
From 1 April 2012, a WHT at the rate of 10% will apply to any dividends paid by a resident company or non-resident company in respect of shares listed on a SA exchange. This WHT will replace STC.

**Interest payable to non-residents**
As of 1 January 2013, a WHT at the rate of 10% will apply to any amount of interest (subject to certain exemptions) received by or accrued to a non-resident that is not a CFC.

**WHT for gambling winnings**
A withholding tax on gambling winnings is proposed with effect from 1 April 2012, and all gambling winnings above ZAR 25,000, including National Lottery winnings, will be subject to a final 15% WHT.
South Africa

**Tax administration**

**Returns**
The corporate fiscal year is the same as the company’s financial year. It may be changed upon application showing reasonable cause. Annual income tax returns must be submitted within one year from the end of the company's fiscal year.

**Payments**
Payments are made with provisional returns filed at six-month intervals from the fiscal year-end based on an estimate of taxable income for the year. Interest is charged on any underpayment outstanding for more than six months after the fiscal year-end except in the case of February year-ends, in which case it is seven months. Any balance (together with interest) is then paid following assessment.

**Voluntary disclosure programme**
In a drive to encourage defaulting taxpayers to come forward and regularise their affairs, SARS has introduced a voluntary disclosure programme which became effective between 5 November 2010 and 31 October 2011. The voluntary disclosure programme does not result in the waiver of any tax payable, but rather SARS will:

- not pursue criminal prosecution
- waive 100% of penalties and additional tax, and
- waive either 100% or 50% of interest payable.
Significant developments

Over the past 12 months, the following significant amendments have been made to Spanish law on direct taxation of companies.

Law on Sustainable Economy, passed on 4 March 2011 (Law 2/2011), increases the following tax credits for tax periods commencing on or after 6 March 2011:

- Tax credit for technological innovation is increased from 8% to 12%.
- Tax credit for environmental investments in installations is increased to 8%. No tax credit will be available for investments made in tax periods commencing between 1 January 2011 and 5 March 2011. For investments made in tax periods commencing between 1 January 2010 and 31 December 2010, the tax credit is 2%.
- The maximum limit for tax credit application in one tax year is also increased if certain requirements are met.

State Budget Bill, passed on 22 December 2010 (Law 39/2010) introduces, among others, the following tax reforms:

- Section 12.5 of the Spanish Corporate Income Tax Law is amended to eliminate the possibility of amortising financial goodwill arising from the acquisition of an interest in a company resident in another European Union (EU) member state carried out after 21 December 2007, for tax purposes. This amendment is made as a result of the European Commission's decision passed on 27 October 2009, which concludes that the Spanish regulations that allow amortisation of financial goodwill arising from acquisitions of interests in EU companies distorts competition and constitutes unlawful state aid. In addition, the European Commission's decision passed on 12 January 2011 in relation to the amortisation of financial goodwill arising from the acquisition of an interest in a company resident outside the European Union has recently been published in the Official Journal of the European Union. The decision considers this tax relief to be unlawful state aid, and its scope is similar to that of the European Commission's decision of 27 October 2009.
- The time period for the application of the tax credit for training (1%/2%) is extended exclusively for expenses incurred and investments made in 2011 to train staff in the use of new communication and information technologies which can only be used outside the workplace and working hours.

A Royal Decree-Law passed on 3 December 2010 (RDL 13/2010) approved certain measures to boost investments and employment. The measures laid down in this legislation include, most notably:

- Extension until 2015 of free depreciation for new tangible fixed assets and investments in real estate used for business activities. Free depreciation was first introduced by Law 4/2008 for tax years commencing in 2009 and 2010, and it
Spain

was extended to tax years 2011 and 2012 by Royal Decree-Law 6/2010. In both cases, such tax relief is conditional on the maintenance of or increase in staff levels. RDL 13/2010 eliminated the requirement to maintain or increase staff levels for investments made in taxable years beginning on or after 1 January 2011 and extended the application period of this tax incentive to tax year 2015.

• Increase in the threshold for a company to be considered a small company. Until tax year 2010, a company was considered as small (and thus could be taxed under the special tax regime for small companies) when its turnover in the preceding tax year was under 8 million euros (EUR). For tax years commencing on or after 1 January 2011, this threshold is fixed at EUR 10 million.

• Tax relief which may be availed of by small and medium-sized companies may continue to be applied by these companies if they exceed the EUR 10 million threshold. In this case, the tax relief may be availed of during the three tax periods following the tax period when they exceed the EUR 10 million threshold, provided that they have met the requirements to be considered small or medium-sized companies in the tax period when they exceed the EUR 10 million threshold and in the two previous tax periods.

• Increase in the first tranche of the tax scale under which small companies are taxed.
  • For tax periods starting on or after 1 January 2011, the rates are the following:
    • Taxable income up to EUR 300,000 is taxed at a 25% tax rate.
    • The part of the taxable income which exceeds this threshold is taxed at the general rate of 30%.
  • Until tax year 2010, small companies were taxed at the following rates:
    • Taxable income up to EUR 120,202 was taxed at a 25% tax rate.
    • The part of the taxable income which exceeded this threshold was taxed at the general rate of 30%.

• Increase in the first tranche of the tax scale under which micro companies are taxed.
  • For tax periods commencing in 2011 (the last year in which this reduced rate is applicable), entities with a net turnover under EUR 5 million and a total maximum staff of 25 employees which maintain or increase their staff levels are taxed at the following rates:
    • Taxable income up to EUR 300,000 is taxed at a 20% tax rate.
    • The part of the taxable income which exceeds this threshold is taxed at the tax rate of 25%.
  • For tax periods commencing in 2009 and 2010, the applicable tax rates were the following:
    • Taxable income up to EUR 120,202 was taxed at a 20% tax rate.
    • The part of the taxable income which exceeded this threshold was taxed at the tax rate of 25%.

**Taxes on corporate income**

The general corporate income tax (CIT) rate in Spain is currently 30%. Other tax rates (ranging from 25% to 35%) may apply depending on the type of company which is taxed and the type of business carried out.

Resident companies are taxed on their worldwide income.

For permanent establishments (PEs) in Spain of foreign companies, non-residents’ income tax is chargeable on their Spain-source taxable income at a 30% tax rate.

Non-residents’ income tax is also chargeable on non-established foreign companies/individuals which obtain income in Spain (see the Withholding taxes section).
Small companies
For tax years commencing on or after 1 January 2011, companies with a turnover under EUR 10 million in the preceding tax year are considered small companies for CIT purposes and are taxed at the following rates:

- Taxable income up to EUR 300,000 is taxed at a 25% tax rate.
- The part of the taxable income which exceeds this threshold is taxed at the general tax rate of 30%.

For tax years commencing prior to 1 January 2011, companies with a turnover under EUR 8 million in the preceding tax year were considered small companies for CIT purposes and were taxed at the following rates:

- Taxable income up to EUR 120,202 was taxed at a 25% tax rate.
- The part of the taxable income which exceeded this threshold was taxed at the general tax rate of 30%.

The tax rate levied on companies forming part of a group depends on the total amount of the group companies’ turnovers. The general 30% tax rate is levied when the sum of the group companies’ turnovers exceeds EUR 10 million (EUR 8 million for tax years commencing prior to 1 January 2011).

Micro companies
A new regulation came into force in Spain in December 2009 which established lower tax rates for companies which maintain or increase their staff levels in tax years 2009, 2010, and 2011.

The rates for tax year 2011 are as follows:

- Taxable income up to EUR 300,000 is taxed at a 20% tax rate.
- The part of the taxable income which exceeds this threshold is taxed at the general tax rate of 25%.

The rates for tax years 2009 and 2010 are as follows:

- Taxable income up to Euros 120,202 was taxed at a 20% tax rate.
- The part of the taxable income which exceeded this threshold was taxed at the general tax rate of 25%.

These lower rates of 20% and 25% are applicable subject to compliance with, amongst others, the following requirements:

- The income generated by all of the company’s business activities does not exceed EUR 5 million.
- The company’s total staff does not exceed 25 employees.
- The company’s average number of employees during the 12-month period following the commencement of the tax year in question is not less than one employee and not less than the company’s average number of employees during the 12-month period prior to the commencement of the tax year in question.

Business and professional activities tax
The business and professional activities tax is a local direct tax levied annually on the performance in Spain of business, professional, or artistic activities, regardless of whether or not they are carried out in a particular premises. The tax payable depends
Spain

on different factors such as the type of activity carried out and the location and size of the premises where the activity is carried out. As regards limits, it may not exceed 15% of the presumed average profits of the professional/economical activity.

CIT-payers and non-resident companies carrying on an activity in Spain through a PE are exempt from this tax if their net turnover for the tax year of the last corporate/non-residents' income tax return filed prior to the date of accrual of the local tax (1 January) was less than EUR 1 million.

**Corporate residence**

A company is resident in Spain and subject to CIT on its worldwide income when:

- it has been incorporated in accordance with Spanish law
- its registered office is in Spain, and/or
- its ‘effective’ head office is in Spain.

Under Spanish law, a company’s ‘effective’, head office is in Spain when its business activities are managed and controlled from Spain.

Companies established in a country or territory where no tax is levied or which is a tax haven are deemed to be tax resident in Spain in the following cases:

- When the company’s main assets consist, directly or indirectly, of property located or rights fulfilled or exercised in Spain.
- When the company’s core business activity is carried on in Spain.

This presumption may be refuted by the company if it can prove that it is effectively administered and managed in the country or territory in which it is established and that it was incorporated and operates for valid economic and business reasons and not merely for the purpose of managing securities or other assets.

**Permanent establishment (PE)**

Taxpayers operating in Spain through a PE are subject to non-residents' income tax.

Most Spanish tax conventions for the avoidance of double taxation contain a definition of PE in line with Organisation for Economic Co-operation and Development (OECD) criteria.

In the absence of a tax convention, internal law states that an individual or company is considered to operate through a PE when, by any legal means, one has continuous or habitual work facilities in Spain or a place to do any kind of work where one performs all or part of one’s activity, or when one acts in Spain through an agent with powers to enter into an agreement in the name and on behalf of the non-resident individual or company, provided said powers are exercised on a regular basis.

In particular, management offices, branches, offices, factories, workshops, warehouses, shops or other establishments; mines, oil or gas wells, quarries, farms, forestry facilities, livestock farms, or any other site where natural resources are collected; and construction, installation, or assembly sites whose duration lasts more than six months will be considered PE.
Other taxes

Value-added tax (VAT)
Spanish VAT is payable on supplies of goods and services carried out in Spanish VAT territory and on imports/intra-European Union acquisitions of goods and services. There are three rates for the different types of goods and services, which are as follows:

- Ordinary rate of 18%, applied on regular supplies of goods and services.
- Reduced rate of 8%, applied on basic necessities (e.g. food and agricultural products not included in the ‘super reduced’ 4% rate, dwellings, and other qualifying services).
- Super reduced rate of 4%, applied on basic necessities other than those classified under the reduced rate (e.g. bread, milk, books, medicine).

In the Canary Islands, a specific tax is applied in lieu of VAT, called the Canary Island General Indirect Tax (IGIC). The ordinary IGIC rate is 5%, and the other IGIC rates are 0%, 2%, 9%, and 13% (20% for tobacco). IGIC is similar to VAT but it has some significant differences, such as the exemption established for telecommunications services. Imports of tangible goods into the Canary Islands are subject to this tax. In Ceuta and Melilla, sales tax is applied instead of VAT.

Customs duties
Many goods imported into Spain from outside the European Union are subject to customs duties. The rates of duty are provided by the EU’s Common Customs Tariff and vary widely.

Excise duties
Excise duties are chargeable on most hydrocarbon oil products, alcoholic drinks, and tobacco products imported into or produced in Spain. Purely as examples, most road fuels carry a duty of about EUR 0.31 per litre, cigarettes carry a duty of about EUR 12.7 per thousand (plus 57% of the maximum retail sale price), tobacco of about EUR 8 per thousand (plus 41.5% of the maximum retail sale price), most wines of EUR 0 per litre, and spirits of about EUR 8.3 per litre of pure alcohol included.

Transfer tax
A transfer tax of 6% or, more frequently, 7%, depending upon the region, is generally levied on inter vivo transfers, including real estate transfers and real estate leases that are exempt from VAT.

Second and ulterior transfers of buildings are exempt from VAT and thus, they are in principle, subject to transfer tax.

Residential leases are exempt from VAT and therefore subject to transfer tax.

Transfers of quoted or unquoted (listed or unlisted) securities are, in principle, exempt from both transfer tax and VAT, except in the following cases:

- Transfers of securities of a company whose real estate assets in Spain represent more than 50% of its total assets or whose assets include securities in another company whose real estate assets in Spain represent at least 50% of its total assets are subject to and not exempt from transfer tax if the acquirer gains control of the real estate company as a result of the transfer.
Spain

- Transfers of securities received in exchange for real estate contributions carried out on the incorporation of a company or on the execution of a subsequent capital increase are also subject to and not exempt from transfer tax provided that not more than three years have elapsed between the date on which the contribution was made and the date on which the securities are transferred.

In addition, acquisitions of assets by new businesses in the Canary Islands are exempt from transfer tax, subject to compliance with certain requirements.

Restructuring transactions are exempt from transfer tax. For these purposes, mergers, spin-offs, exchanges of shares, and in kind contributions defined in section 83 comma 1, 2, 3, and 5 and section 94 of the Spanish Corporate Income Tax Law are considered to be restructuring transactions.

**Capital duty**

As of 3 December 2010, incorporations of companies, capital increases, contributions by shareholders, and the transfer to Spain of the place of effective management or the registered office of a company where neither one nor the other were previously located in a member state of the European Union are exempt from capital duty.

Restructuring transactions are not subject to capital duty. For these purposes, mergers, spin-offs, exchanges of shares, and in kind contributions defined in section 83 comma 1, 2, 3 and 5 and section 94 of the Spanish Corporate Income Tax Law are considered to be restructuring transactions.

The transfer of the place of effective management or the registered office between EU member states is not subject to capital duty. 1% capital duty is levied on capital reductions and company dissolution, to be paid by the shareholders.

Capital duty is incompatible with transfer tax and stamp duty in certain cases, but it is compatible with VAT.

**Stamp duty**

A stamp duty is mostly levied on notarial instruments and records documenting transactions which have an economic value and need to be registered in public registries (e.g. company, land, and industrial property registries). Stamp duty is incompatible with transfer tax and capital duty, but compatible with VAT. The general rate is between 0.75% and 2% depending on the region of Spain and the taxable event.

Stamp duty is also levied on certain commercial documents (e.g. bills of exchange, promissory notes), court, and administrative documents.

**Tax on non-resident companies owning real estate in Spain**

Non-resident companies which own real estate or hold real property rights in Spain are subject to a special levy accrued on 31 December and declared and paid in January of the following year in the place and manner established by law. The tax is equal to 3% of the assessed value of the real estate. This special levy is not applicable to companies resident in a country which has signed a convention for the avoidance of double taxation with Spain, including an exchange-of-information provision, if the ultimate shareholders of such companies are individuals resident in Spain or individuals that may benefit from the application of a convention for the avoidance of double taxation.

In addition, some other exceptions are established for this levy.
Other local taxes
In addition to the taxes stated above, the following other local taxes may be charged on companies:

- Real estate tax, levied annually by local authorities on the ownership of real estate.
- Local tax levied on the increase in the value of urban land, chargeable when urban real estate is sold.
- Motor vehicle tax, charged on the ownership of vehicles.
- Tax on constructions, installations, and building works, charged on the cost of certain works which require town planning licences.
- Waste collection fees.

Branch income

Branches of Spain-based companies
Income obtained by a company resident in Spain through a branch located outside Spain is treated as income generated by the head office and is taxed accordingly. A tax exemption regime is applicable in this case, subject to compliance with certain requirements.

Branches operating in Spain
Income obtained by a branch in Spain of a non-resident company is taxed at the standard CIT rate of 30% and, in most cases, the regulations established by tax law for resident companies are applicable.

Payments made by a branch to its head office or a PE of its head office for royalties, interest, commissions, or technical assistance fees are not tax deductible. Management and general administrative expenses incurred by the foreign head office which can be allocated to the branch are tax deductible if the payments for these expenses are made following a criteria of continuity and rationality and provided that certain documentary requirements and other formalities are fulfilled.

Under Spanish law, income obtained by a branch which is repatriated to its head office is taxed at source at the general withholding tax (WHT) rate of 19%. This tax is not chargeable in the case of a PE of a company resident in the European Union (unless the company is resident in a tax haven). Most tax treaties signed by Spain do not establish any provisions on this matter, and, in such cases, no tax is chargeable on income repatriated by branches. Some tax treaties, such as the treaties with the US, Canada, and Indonesia, expressly establish a tax on income repatriated by branches. For example, US head offices are taxed at a 10% rate on the repatriated profits of a Spanish branch under the US/Spanish tax treaty.

Income determination

The general rule for determining income for CIT purposes is that accounting rules must be followed unless tax law establishes otherwise. In order to maintain this consistency, CIT/PE Non-residents’ income tax returns include pages in which the company’s accounting/commercial balance sheet and profit and loss account figures must be entered.

In Spain, the tax authorities are authorised to modify accounting results exclusively for the purpose of determining tax results if they observe that a company’s accounting
Spain

results have not been calculated in accordance with Spanish Generally Accepted Accounting Principles (GAAP).

**Inventory valuation**

Inventory is valued at acquisition price or production cost under the average and first in first out (FIFO) valuation methods (the replacement and base stock valuation methods may only be used in exceptional cases). Again, since there are no specific tax rules for determining taxable income, accounting rules are also applicable for calculating valuation and obsolescence provisions for inventory.

**Capital gains**

Capital gains are taxable in the tax year in which they arise. They are treated as normal income and taxed at the standard CIT rate of 30% (in the case of gains from real estate after taking into consideration an increase in the cost base for tax indexation purposes). *Please see the Tax credits and incentives section for a description of a tax credit for reinvestment of capital gains.*

**Dividend income**

The amount of dividends included in the calculation of taxable income must be the gross amount.

Upon meeting certain requirements, companies may be eligible for a tax credit for dividends equal to the tax rate applied by the company on the dividends received. This tax credit is generally allowed for the total dividends received from taxable domestic companies when the interest of the company receiving the dividend in the other company is 5% or more and such interest has been held for at least one year. This one-year holding period is deemed to be complied with if it is completed after the dividend is distributed.

This tax regime is to some extent the same as a tax exemption regime. When an interest in a company is less than 5% or is held for less than one year, the tax credit is 30% of half of the amount of the dividends received.

In addition, taxation on capital gains arising from the sale of shares by a company with at least a 5% interest in the subsidiary held for at least one year prior to the sale can be reduced by means of a tax credit at the tax rate applicable on the undistributed part of the subsidiary’s profits generated during the company’s holding period. The reason for this tax relief is that this capital gain is understood to be an underlying dividend.

**Stock dividends**

CIT is not levied on bonus shares (i.e. shares partially or totally given to shareholders in a capital increase charged against distributable reserves), although they must be taken into account when calculating the average cost of shares held for the levying of tax when the shares are sold.

**Foreign income**

Resident companies are taxed on their worldwide income. For foreign-source income, total or partial tax relief in the form of tax credits or exemptions is given if tax is levied on the income in both Spain and the foreign country where the income has been generated.

This tax relief may be available for the following:
Spain

- Economic double taxation, which is when the same income is taxed in the hands of two different taxpayers. For example, another government taxes a foreign company on the income earned in that country and a Spanish resident shareholder is taxed on the dividends that it receives from the foreign company or the capital gains from transfers of its shares.

- Juridical double taxation, which is when the same income is taxed in two countries in the hands of the same taxpayer. For example, the income is taxed (via a WHT) in the country where the income is generated and again in the other country where the recipient is resident.

The main characteristics of double tax relief are discussed below.

Dividends or profit-sharing income received by a Spanish company from a foreign company are tax exempt, subject to compliance with the following requirements:

- The Spanish company has at least a 5% interest in the foreign company during the entire tax year prior to the tax year in which the dividend is paid. This one-year holding period is deemed to be complied with if it is completed after the dividend is distributed.
- The foreign company is subject to a similar tax to Spanish CIT and is not resident in a tax haven. The foreign tax is deemed to be similar to Spanish CIT if the foreign company is resident in a country with which Spain has signed a tax treaty containing an exchange-of-information provision.
- The income out of which the dividend is paid is generated from the business activities of the foreign company carried out abroad stipulated in CIT law.

Capital gains arising from the sale of shares in foreign companies also qualify for a tax exemption provided that the requirements stated above are complied with during the holding period and the acquiring company is not resident in a tax haven. Tax exemption is limited in certain cases.

As an alternative to this 'tax exemption' regime and applicable to dividend distributions only, a tax credit based on imputation is established. This tax credit allows the crediting of the foreign tax paid abroad on the income from which the dividends are paid and the foreign WHT paid on the profit distribution, up to the limit of the tax that would have been paid on the gross amount in Spain. The only requirement for the application of this 'tax imputation' regime is that the Spanish company has at least a 5% interest in the foreign company during the 12 months prior to the date on which the dividend is due and payable. This one-year holding period is deemed to be complied with if it is completed after the dividend is distributed. This tax relief may be carried forward for up to ten years.

Spanish international legislation provides for CIT relief on ‘juridical’ double taxation by applying the ‘tax imputation’ regime. Under this regime, gross foreign income (including foreign WHT paid) is included for Spanish tax calculation purposes, and a tax credit for the foreign WHT paid is applicable up to the amount of the CIT that the company would have paid if such gross income had been obtained in Spain. The tax credit can be carried forward for up to ten years, but the rate will be the rate applicable at the moment when the tax credit is applied.

Under Spanish tax treaties and implemented EU tax directives, several methods have been established to avoid double taxation. The main one is the traditional deduction of a tax credit from tax effectively paid. However, some treaties establish a tax exemption or the exclusive right to tax. Also, a tax-sparing clause is included in some treaties.
which allows for the deduction of not only the tax actually paid but a higher amount of tax.

**Other significant items**

The following items, amongst others, are excluded or deferred from taxable income:

- Distributed dividends corresponding to profits obtained by companies in tax years in which the flow-through tax regime (internal and international) has been applied.
- Assets written up in accordance with revaluation laws and tax-protected restructuring transactions involving accounting capital gains.

**Deductions**

**Depreciation, amortisation, and depletion**

All assets, except land, are depreciable for tax purposes. Guideline tables of tax depreciation rates are established which state maximum per annum rates and maximum years of useful life for each asset type, classified by business sector. Please see the table below as an example of the maximum per annum rates and maximum years of useful life of some assets that are typically depreciated:

<table>
<thead>
<tr>
<th>Asset</th>
<th>Maximum per annum depreciation rate (%)</th>
<th>Maximum useful life (years)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Industrial buildings and warehouses</td>
<td>3</td>
<td>68</td>
</tr>
<tr>
<td>Administrative and commercial buildings</td>
<td>2</td>
<td>100</td>
</tr>
<tr>
<td>Passenger cars</td>
<td>16</td>
<td>14</td>
</tr>
<tr>
<td>Furniture and office equipment (excluded computers)</td>
<td>10</td>
<td>20</td>
</tr>
<tr>
<td>Computers</td>
<td>25</td>
<td>8</td>
</tr>
<tr>
<td>Software</td>
<td>33</td>
<td>6</td>
</tr>
<tr>
<td>Tools</td>
<td>30</td>
<td>8</td>
</tr>
</tbody>
</table>

The straight-line depreciation method is normally used, calculated over the asset’s useful life and applied on the asset’s cost or written-up value (if such a write-up is acceptable for tax purposes). Off-book adjustments must be included in tax assessments if accounting depreciation exceeds tax depreciation.

Qualifying assets with a useful life of more than one year can also be depreciated using one of the following declining-balance methods:

- By applying a constant percentage on the carrying amount of the asset multiplied by 1.5, 2, or 2.5 depending on the useful life of the asset (below five years, between five and eight years, and over eight years, respectively).
- By using the sum-of-digits method, whereby the asset’s acquisition price is multiplied by the ratio between the number of the years in which it is depreciated in a descending order (e.g. in a three-year useful life, three for the first year, two for the second, and one for the third) and the total numbers for the years of the asset’s useful life (1 + 2 + 3 = 6 for 3 years of useful life).

Buildings, furniture, and fittings cannot be depreciated using the declining-balance methods.
Special depreciation plans for new assets can be approved by the tax authorities upon request, when they are subject to wear-and-tear at a higher rate than the normal rate applicable.

Recorded depreciation is fully tax deductible, even when it is higher than the depreciation which would arise by applying any of the tax depreciation methods stated above, if the taxpayer is able to justify that the depreciation is real.

Mining assets and assets used for research and development (R&D), amongst others, but not including buildings, can be freely depreciated/amortised for tax purposes.

**Free depreciation**

Unrestricted depreciation tax relief was also available for tax periods commencing in 2009 and 2010, but it could only be availed of if the requirement that the taxpayer’s staff levels are maintained or increased was met. This requirement is eliminated for the application of the tax relief for tax periods commencing in 2011, 2012, 2013, 2014, and 2015. However, taxpayers that applied accelerated depreciation for their investments in 2009 and 2010 will have to meet the staff maintenance or increase requirement established for such tax periods.

In both cases, depreciation is fully tax deductible in this case, even if it is not recorded in the company’s profit and loss account.

Provided that certain requirements are met and that the call option is exercised, free depreciation relief is also applicable to investments carried out in tax years 2009 to 2015 in new tangible fixed assets and property investments used for business activities which are carried out through leasing agreements. As explained above, for tax years 2009 and 2010 such tax relief is conditional on the maintenance of or increase in staff levels.

**Amortisation of intangibles**

A 50% reduction may be applied for income obtained from licensing certain intangible assets, subject to compliance with certain requirements (the effective tax on this income would be 15%).

Goodwill cannot be amortised under Spanish GAAP. However, it can be amortised for tax purposes at an annual rate of 5%, subject to compliance with certain requirements (e.g. it is acquired for consideration from an unrelated party in accordance with the provisions of Section 42 of the Spanish Commercial Code and an obligatory non-distributable reserve is established).

Intangible assets with a specific useful life may be amortised and such amortisation is tax deductible even if it is not recorded in the company’s profit and loss account, when the company complies with the following requirements:

- The assets are acquired for consideration.
- The company does not form part of a group as defined in Section 42 of the Spanish Commercial Code. The tax deduction of the amortisation is up to 10% per annum, unless a lower useful life can be evidenced.
Spain

If the two requirements stated above are complied with, amortisation on intangible assets which do not have a specific useful life is also tax deductible up to the 10% annual limit, regardless of whether they are amortised under Spanish GAAP or not.

**Depletion**
Depletion is allowed for mining companies and companies involved in exploring/investigating natural oil resources as established in applicable legislation.

**Taxes**
Taxes, other than CIT, that are recorded as an expense due to their nature (e.g. business and professional activities tax, but not withholdings) are tax deductible expenses. In some cases, indirect taxes such as non-deductible VAT or transfer tax could be added to the value of assets for depreciation purposes.

**Fines and penalties**
Penalties imposed due to the failure to pay taxes and surcharges for late filing/payment or for other tax infringements are not tax deductible.

Late-payment interest recorded as an expense is, in principle, tax deductible.

**Net operation losses**
Tax losses may be carried forward for 15 years, but they cannot be carried back. There are no tax loss ‘baskets’ (operating/capital) under Spanish law.

Complex rules may limit the use of tax losses of a company dissolved as a result of a restructuring operation and, in certain circumstances, when it has a change of shareholders.

**Payments to foreign affiliates**
Supplies of goods or services by a company not established in Spain to a Spanish group company must be valued at arm’s length. If recorded expenses for such goods/services exceed arm’s-length price, the tax deductibility of the excess amounts could be challenged in a tax inspection. The tax deductibility of expense charges received from tax havens is fully disallowed unless proper evidence of an actual service valued at arm’s length can be provided.

Management services received from outside Spain and recorded as distributions of costs of a group centre do not have to be documented in a written agreement entered into before the commencement of the services to ensure the tax deductibility of the expenses (as previously was the case), although it would be recommendable to have such an agreement. For any other types of services, an agreement recorded before a notary public is not obligatory under Spanish law, but it is advisable.

As regards the taxation in Spain of the foreign company which supplies the services, the WHT rate to be applied on the gross income obtained by the company is 24%. Dividends, interest, and capital gains generated as a result of a transfer of assets are taxed at a 19% WHT rate. If management services, technical assistance, or the performance of studies are solely used outside Spain and are linked to business carried on abroad, then no WHT is applicable. In addition, under most tax treaties signed by Spain, ‘business profits’ obtained in Spain by non-residents are exempt from WHT. However, ‘business profits’ is a miscellaneous residual category. For instance, if the amount obtained qualifies as a royalty payment, WHT is applicable at the reduced tax treaty rates if the foreign company can obtain a document from the tax authorities of its
country of residence certifying its tax residence. If no tax treaty applies, then the above 24% WHT rate is applicable (see the Withholding taxes section for more information).

**Group taxation**

**Tax groupings for CIT purposes**

Under Spanish tax law, companies can form a group and apply a special tax consolidation regime for CIT purposes. Companies forming a tax group must formally pass a resolution agreeing to do so before the beginning of the first tax year in which the tax consolidation regime will be applied.

To apply the tax consolidation regime, the controlling company of the tax group must hold a 75% or higher interest, either directly or indirectly, in the companies forming the tax group at the beginning of the first tax year in which the tax consolidation regime is applied, and this interest must be maintained during the year unless the dependent company is dissolved. For tax years commencing after 1 January 2010, the interest requirement is 70% for companies listed on the Stock Exchange.

The main characteristics of the tax consolidation regime are as follows:

- The taxable income of the tax group is the sum of the taxable incomes of each of the companies forming the group.
- The tax losses of any of the companies forming the group can be offset against the tax profits of any of the other group companies.
- For the calculation of consolidated taxable income, the tax profits (losses) generated from transactions carried out between group companies are eliminated and only included in consolidated taxable income when:
  - they are carried out with third parties
  - a group company participating in the internal operation ceases to form part of the tax group, and
  - the tax consolidation regime is no longer applied by the group for whatever reason.
- Specific limitations apply regarding the offsetting of tax losses or the application of tax credits generated by the group companies before they formed part of the tax group. Such tax losses/credits may be offset (applied) by the tax group up to the limit of the tax profits/tax liability of the company which generated the losses/credits.
- No WHT is chargeable on payments made between companies of the tax group (e.g. interest, dividends).

**Tax groupings for VAT purposes**

Groups of companies may also choose to be taxed under a special tax consolidation regime for VAT purposes. This special regime is optional, but once it has been opted for, it must be applied for a minimum of three years which is extendible unless it is expressly waived by the companies.

The VAT consolidation regime may only be applied by groups resident in Spanish VAT territory which do not form part of any other VAT grouping.

The controlling company of the group must be a legal entity or PE which is not dependent on any other entity established in Spanish VAT territory, and it must hold at least a 50% interest in the subsidiary companies of the group for the entire calendar year.
Spain

With the application of the VAT consolidation regime, there are two different options for taxation:

- The aggregation system, where the balances of the VAT returns of the individual companies of the group are totalled. The right to a tax deduction is exercised by the individual companies.
- The consolidation system, where an individual company can opt to reduce VAT taxable income for inter-company operations which is limited to the 'external' cost.

**Transfer pricing**

All related-party transactions must be valued at market price, following the arm's-length standard (e.g. the value which in normal market conditions would have been established between unrelated parties).

For this purposes, related persons or entities shall be:

- A company and its shareholders or members.
- A company and its board members or directors.
- A company and the spouses of or persons related to its shareholders or members, board members, or directors, either in a direct line or collaterally, by consanguinity or affinity up to the third degree.
- Two companies of a group.
- A company and the shareholders or members of another company, when both companies form part of a group.
- A company and the board members or directors of another company, when both companies form part of a group.
- A company and the spouses of or persons related to the shareholders or members of another company, either in a direct line or collaterally, by consanguinity or affinity up to the third degree.
- Two companies in which the same shareholders or members or their spouses, or persons related to them either in a direct line or collaterally, by consanguinity or affinity up to the third degree, have at least a 25% holding, whether directly or indirectly, in their share capital or shareholders' equity.
- A company resident in Spanish territory and its PEs abroad.
- A company not resident in Spanish territory and its PEs in Spanish territory.
- Two companies forming part of a group taxed under the tax regime for groups of cooperative companies.

For cases where association exists as a result of a shareholder/member-company relationship, the shareholding must be 5% or more, or 1% if the shares are quoted on a regulated stock exchange. The reference to directors shall include *de facto* and *de jure* directors.

The determination of the market value by taxpayers must be done through the application of one of the following transfer pricing methodologies, in order of preference as follows: Comparable Uncontrolled Price (CUP) method, Cost Plus (CP) method, or Resale Price Method (RPM), usually referred to as traditional transaction methods.

If the application of any of the above methods is not possible, the Profit Split Method (PSM) or Transactional Net Margin Method (TNMM) could be applied, usually referred to as transactional profit methods.
Documentation is also a requirement, with taxpayers required to produce group-level and taxpayer-specific documentation for each tax year. Related persons or entities must keep such documentation available for the tax authorities as from the end of the voluntary return or assessment period in question. Exceptionally, no documentation requirements will be applied in the following cases, among others:

- With some exceptions, transactions carried out within a tax period with one related person or entity will not be subject to documentation requirements when the sum of the considerations of all these transactions does not exceed EUR 250,000.
- Transactions carried out within a group of companies taxed under the Spanish special tax consolidation regime.
- Transactions carried out by economic interest groups and temporary business associations.
- Transactions involving the purchase or sale of publicly traded shares.

Documentation is always required for transactions with entities, whether related parties or otherwise, which are resident in tax havens.

Please note that specific penalties may be imposed in the event of the absence of documentation or where data are omitted, inaccurate, or false.

**Thin capitalisation rules**
When the net remunerated direct or indirect borrowing of an entity from other individuals or entities which are not resident in Spanish territory, excluding banking institutions, to which it is related exceeds the result of applying the coefficient of 3 to the entity's fiscal capital (equity), the interest accrued on the excess will be treated as a dividend for tax purposes.

Taxpayers may submit to the Tax Administration a proposal for the application of a different coefficient based on the arm’s-length borrowings that the taxpayer would have been able to obtain from unrelated individuals or entities, provided that the transaction is not carried out with individuals or entities resident for tax purposes in territories listed as tax havens by tax regulations.

Thin capitalisation rules will not apply when the related entity which is not resident in Spain for tax purposes is resident in another EU member state, unless it is resident in a territory listed as a tax haven by tax regulations.

Please note that thin capitalisation rules are additional to, and not a substitute for, the transfer pricing requirement that related-party finance be at arm’s length.

**Controlled foreign company (CFC) regime**
Spanish CFC rules seek to avoid the effects produced when Spanish tax resident entities or individuals place their capital in low-taxed foreign entities to avoid including passive income generated by such capital in their taxable bases.

Under this regime, Spanish tax resident entities are subject to Spanish CIT on certain kinds of positive passive income obtained by entities which are not resident in the European Union for tax purposes in which they own, individually or together with tax related entities or persons, more than 50% of the share capital, equity, profits, or voting rights, provided that the CIT due by the non-resident entity is below 75% of the tax that would have been due in Spain.
The types of passive income to which CFC rules apply are as follows: (i) income from immovable property not used for business activities; (ii) income derived from equity in other entities or from capital assigned to third parties (interest and dividends); (iii) transfer of the above mentioned immovable property and financial assets; and (iv) income arising from credit, financial, insurance, and service activities carried out directly or indirectly with related Spanish tax resident entities in which a tax deductible expense is generated.

Passive income mentioned in numbers (i) to (iii) above obtained by the non-resident entity will not be considered taxable income of the Spanish tax resident entity when it arises from entities in which the latter holds a direct or indirect interest of over 5%, provided that the non-resident entity controls and manages the interest using the relevant human and material resources and provided at least 85% of the income obtained from such participated entities comes from business activities.

Moreover, the passive income mentioned in numbers (i) to (iii) above will not be included in the Spanish entity’s taxable base when it amounts in total to less than 15% of the total profits obtained by the CFC or less than 4% of its total turnover.

---

**Tax credits and incentives**

**CIT relief**

No specific tax relief is established in Spanish law for foreign investors. Relief may be availed of by Spanish and foreign-owned companies alike. The tax relief available under CIT law in Spain is as follows:

Current tax credits for promoting certain investments must be reduced and finally eliminated. However, the largest tax credits are maintained (tax credit to prevent internal and international double taxation, tax credit for the reinvestment of extraordinary profits, and tax credit for R&D).

**Tax relief for business activity/place of business activity**

- 50% tax credit on CIT levied on income obtained in Ceuta and Melilla through companies established and carrying on activities during a full business cycle in these enclaves.
- 99% tax credit on the CIT levied on income obtained from the supply of local public services, except when the state company in question is owned, partially or wholly, by a quoted/non-quoted company or individual.
- 38% tax credit (50% prior to 2011) on the CIT levied on income obtained from exports of films, books, and similar cultural items if profits are reinvested in the acquisition of assets used for such activities. This tax credit will be gradually reduced over the coming years and eliminated in 2014.

**R&D credits**

A 25% tax credit can be availed of for expenses incurred from R&D activities. If the expenses are higher than the average R&D expenses incurred by the company during the previous two years, the tax credit is 42% for the excess amount.

An additional tax credit of 17% can be availed of for staff expenses incurred for staff exclusively carrying out and qualified to carry out R&D activities.
An 8% tax credit can be availed of for investments made in tangible fixed assets (excluding buildings) and intangible assets which are exclusively assigned to R&D activities.

**Technological innovation credits**
An 8% tax credit can be availed of for technological innovation activities. For tax periods commencing on or after 6 March 2011, such tax credit is increased to 12%.

**Tax credit for environmental investments**
Tax credit for environmental investments in installations is increased for tax periods commencing on or after 6 March 2011. Depending on when the investment is made, the tax credit for these investments is as follows:

- For investments made in tax periods commencing between 1 January 2010 and 31 December 2010, the tax credit is 2%.
- No tax credit may be availed of for investments made in tax periods commencing between 1 January 2011 and 5 March 2011.
- For investments made in tax periods commencing on or after 6 March 2011, the tax credit is 8%.

Finally, the tax credit for environmental investments in vehicles and the tax credit for environmental investments in assets to promote the exploitation of renewable energies are eliminated for tax periods commencing on or after 1 January 2011.

**Reinvestment of extraordinary income**
A 12% tax credit can be availed of for sales of assets which are used for the company's business activities when the amount obtained from the sale is reinvested in similar types of assets during a four-year period (as from one year prior to the sale up to three years after the sale). This tax credit therefore reduces the effective tax levied on sales of certain assets to 18%.

In the case of a sale of company shares, to be eligible for this tax credit, the interest in the company must be a minimum of 5% and must have been held for more than one year prior to the sale.

The asset in which the reinvestment is made must be maintained for five years (three in the case of moveable assets) unless its useful life is shorter.

**The following tax credits have been eliminated for tax periods commencing on or after 1 January 2011**
- Tax credit for the promotion of information and communications technologies: 3%.
- Tax credit for investments in vehicle navigation and tracking systems, adaptation of vehicles for the disabled, and nursery school fees for staff's children: 2%.
- Tax credit for contributions made by employers to certain staff pension schemes: 2%.
- Tax credit for export activities: 3%

The 18% tax credit for film productions will be eliminated in 2012.

The tax credit for investments in heritage assets (8% in 2010 and 6% in 2011) and book publishing (3% in 2010 and 2% in 2011) will be eliminated in 2014.

A tax credit of 1% to 2% may be obtained on expenses incurred in, or related to, financing ongoing staff education programmes. This tax credit can also be availed of for expenses incurred by companies to familiarise staff in the use of new technologies.
Spain

These expenses are not a benefit in kind for the staff. The tax credit related to education programmes will be eliminated in 2011, but the tax credit related to expenses incurred to familiarise staff in the use of new technologies will not be eliminated until 2012.

Other tax relief
A tax credit can be applied for increases in the number of disabled workers contracted per year on a permanent and full-time basis (EUR 6,000 per worker contracted). This increase is calculated by taking the average number of company workers meeting these requirements in the tax year in question and comparing it with the company’s average number of staff in the previous tax year.

Special tax regimes
Special tax regimes are applicable, among others, in the following cases:

Spanish and European Economic Interest Groupings and Temporary Consortia of Entities
• Spanish Economic Interest Groupings (SEIGs) that meet certain requirements will not be subject to Spanish CIT on the part of the taxable income which corresponds to members resident in Spain for tax purposes. Such part of the positive or negative taxable income shall be deemed to be the profits/losses of the SEIG members. The proportional part of tax credits and payments in advance will also be assigned to the Spanish tax resident members of the SEIG where they are subject to corporate or personal income tax. Dividends distributed to SEIG members that have been subject to imputation will not be taxed under corporate or personal income tax on distributions. Dividends distributed to Spanish non-resident SEIG members will be taxed in accordance with the Spanish Non-Resident Income Tax Act and Conventions for the Avoidance of Double Taxation.
• European Economic Interest Groupings (EEIGs) will be taxed under the above-mentioned regime with the following exception: EEIG will not be subject to Spanish CIT. If the EEIG is not resident in Spain for tax purposes, Spanish tax resident members will include the corresponding part of the profits or losses determined for the grouping, corrected by applying the rules for determining taxable income for corporate or personal income tax purposes, as applicable. When the activity carried out by the members through the grouping determines the existence of a PE abroad, the rules provided for in this Law or in the respective treaty for the avoidance of double international taxation will be applicable.

Non-Spanish tax resident members will only be subject to Spanish Non-Resident Income Tax when the activity they perform through the grouping determines the existence of a PE in Spanish territory.

Dividends distributed to non-Spanish tax resident members that have been subject to imputation will not be taxed in Spain on the distribution.

• Temporary Consortia of Entities (TCEs) are taxed under the SEIG regime. As an exception, members of a TCE that operates abroad may benefit from exemptions for income obtained abroad.

Restructuring transactions
For restructuring transactions, the special tax regime is a tax neutrality regime implemented under EU Directive 90/434. As a general rule, under this regime, asset transfers carried out through such transactions do not have any tax implications.
(either from a direct, indirect, or other Spanish tax perspective) for the parties involved (transferor, beneficiary, and shareholder), until a subsequent transfer takes place which is not protected by this regime.

The transactions which can be taxed under this regime are mergers, global transfers, spin-offs of business units/majority interests, splits, share-to-share transactions, contributions of business units, and contributions of assets (this last transaction is not fully tax-protected). Each of them must comply with a series of requirements for the application of the regime.

The tax credit position of a company dissolved as a result of a tax-protected restructuring transaction is ‘acquired’ in full by the beneficiary company in the case of universal succession.

The ‘acquired’ tax credits only include tax credits which are obtained in relation to assets transferred in transactions where the transferor is not dissolved or the succession is not a full succession for Spanish commercial purposes.

Regarding tax losses, the Spanish tax authorities hold the view that tax losses may not be transferred when the transferring company is not dissolved. When the transferring company is dissolved, the tax losses may be applied by the beneficiary company up to certain limits and subject to certain restrictions.

Financial goodwill arising in a merger transaction is amortised for tax purposes at a maximum annual rate of 5% at the level of the Spanish beneficiary company of the merger, if the seller of the shares giving rise to the ‘merger’ goodwill has been actually taxed for the equivalent capital gain in Spain or in any other EU country (excluding tax havens), and provided that certain requirements are met. Amortisation of financial goodwill does not have to be recorded in the profit and loss account for it to be tax deductible, although an annual amount must be charged to a non-distributable reserve (either from annual profits or from freely-distributable reserves), which must be at least the tax deductible amount.

This tax regime cannot be applied if the transaction is carried out for the purpose of tax fraud or evasion (anti-abuse clause). An additional anti-abuse clause in line with the clause established by the EU directive is established in Spanish law to ensure that the tax regime cannot be applied if the transaction is not carried out for valid economic reasons, such as the streamlining of activities or group restructuring to gain efficiency, but to obtain a tax benefit.

The tax authorities must be notified of the application of this tax regime.

**Tax transparency**

Tax transparency (international controlled foreign company (CFC) rules) is not applicable for companies resident in the European Union. See CFC regime in the Group taxation section for more information.

**Venture capital companies and funds**

Venture capital companies (VCCs) and funds (VCFs) may benefit from the following tax regime if certain requirements are met:

- Dividends from target companies may benefit from a 100% tax credit for the avoidance of double taxation or tax exemption.
Spain

- Capital gains arising from the transfer of shares in target companies may be 99% exempted from CIT, provided that such shares have been held for a period between 2 and 15 years.
- Profit distributions to VCC and VCF shareholders may benefit from a 100% tax credit for the avoidance of double taxation if the shareholders are Spanish tax residents or have a PE in Spain. Income from profit distributions to non-Spanish tax resident shareholders without a PE in Spain is not subject to taxation in Spain unless it is obtained through a tax haven. The same regime applies to the transfer of shares in VCCs and VCFs.

Collective Investment Institutions (CIIs)
CIIs are subject to CIT at a reduced rate of 1%. They are not entitled to apply any tax credits. Dividends distributed by these institutions are subject to the general WHT regime. Shareholders are taxed on dividends received from the CII and on capital gains obtained for the transfer of the CII without being entitled to the application of a tax credit for the avoidance of double taxation.

Lease transactions
Financial leasing contracts with a purchase option that may be exercised at the end of the lease period may benefit from a special tax regime if they meet certain requirements. According to this regime, the lessee may deduct the following expenses from its taxable income:

- The part of the lease instalments corresponding to the financial charge (interest) paid to the lessor.
- The part of the lease instalments paid which corresponds to the recovery of the cost of the good. Tax deductibility for this amount may not exceed the result of applying twice the straight-line depreciation rate which corresponds to the good in question in accordance with the officially-approved depreciation tables.

Spanish holding companies of foreign companies (Entidad de Tenencia de Valores Extranjeros or ETVE) regime
Spanish resident companies whose corporate purpose includes the holding and management of foreign companies’ shares are granted some tax benefits subject to compliance with certain requirements.

The tax authorities must be notified of the application of this tax regime.

Companies taxed under this tax regime are granted a tax exemption on dividends and capital gains when they have a 5% direct interest or, if their interest is less than 5%, when the acquisition value of their interest is at least EUR 6 million.

In addition, the distribution of profits by the holding company to non-resident companies or individual shareholders is not taxable in Spain (unless the profits are distributed to a tax haven). Resident company shareholders are now entitled to an internal tax credit on dividends under Spanish law.

Small and medium-sized companies
Small and medium-sized companies are eligible for tax relief such as accelerated depreciation/amortisation, or more favourable bad debt provision treatment. Accelerated depreciation/amortisation can be applied for assets acquired using amounts obtained from sales of trading assets. To be eligible for this relief, turnover in the previous tax year must not exceed EUR 10 million (EUR 8 million for tax
years starting prior to 1 January 2011). In the case of a group, the turnover of all the companies must be considered for this purpose.

A reduced CIT rate of 25% is levied on the first EUR 300,000 of annual tax profits (EUR 120,202 for tax years starting prior to 1 January 2011).

Small and medium-sized businesses are eligible for a tax credit of 3% of investments made and expenses incurred to improve their capabilities in internet access and business information management to improve the efficiency of their internal processes. This tax credit may be carried forward for a period of 15 years and will be eliminated in 2011.

**Special economic and tax regime of the Canary Islands**

Due to the distance to and isolation of the Canary Islands, they have traditionally enjoyed a special economic and tax regime with specific economic and tax measures different to those established for the rest of Spain.

Regarding direct taxes, the Canary Island economic and tax regime establishes the following tax benefits for companies and businesses domiciled in the Canary Islands or with a PE in the Canary Islands:

- Up to 90% of annual undistributed accounting profits can be allocated to a special investment reserve and not taxed providing that they are invested within a four-year period (including the period during which the profits are obtained) in qualifying assets in the Canary Islands, or in certain public debt securities or shares in other companies operating in the Canary Islands which invest in qualifying assets.
- Most Spanish CIT relief is 80% higher for companies and businesses located in the Canary Islands.
- A 25% tax credit can be availed of for investments in new tangible fixed assets and, subject to compliance with certain requirements, second-hand assets.
- A tax credit of 50% of the CIT liability is granted for taxable income generated from the production of tangible goods while carrying on agricultural, farming, industrial, and fishing activities.
- A tax credit of 90% of the CIT liability is granted for profits of shipping companies generated from ships registered in the Canary Islands Special Ships and Shipping Companies Register. For sailors of such ships, a 50% tax exemption can be applied to personal income tax levied on their employment income and a 90% reduction to the part of their Social Security contributions paid by their employers.

Regarding indirect taxes, in addition to lower taxation through the Canary Island general indirect tax (IGIC at the general rate of 5%) compared to VAT and specific IGIC exemptions, the following should be noted:

- Companies domiciled in the Canary Islands which are CIT-payers and which are newly incorporated, start new activities or improve their existing activities may benefit from the following tax relief:
  - Exemption from IGIC on supplies and imports of capital goods if the company has a deduction percentage that is not 100%.
  - Shipping companies qualify for an exemption from transfer tax for any contracts related to ships registered in the Canary Islands Special Ships and Shipping Companies Register.
Spain

- Custom Free areas are available. Upon EU demand, there are restrictions on the application of certain tax relief (special investment reserve, tax credits for production, and new business indirect tax relief) for the following industrial sectors: shipbuilding, synthetic fibres, automobile, iron and steel, and coal.

**Canary Islands Special Zone tax regime**

In January 2000, a special Canary Island Special Zone tax regime was approved by the European Union. The main regulations of this regime, established by the Spanish government, are as follows:

- New companies may qualify for the application of this tax regime and, on the approval of the tax authorities, may be registered up to 31 December 2013 (applying the tax regime up to 31 December 2019). This may be extended by the European Union.
- To qualify for this tax regime, the company must:
  - covenant to make an investment in fixed assets of at least EUR 100,000 in Gran Canaria or Tenerife, or EUR 50,000 in Fuerteventura, Lanzarote, La Palma, El Hierro, or La Gomera, within the first two years of their business activity
  - covenant to create at least five new jobs in Gran Canaria or Tenerife, or three in the other islands
  - provide a description of the business activities to be carried out which support the company’s solvency, viability, international competitiveness, and contribution to the economic and social development of the Canary Islands
  - establish its registered office and place of effective management in the Special Area
  - have at least one company director who resides in the Canary Islands, and
  - carry out one of the qualifying business activities.
- The territory where this tax regime can be applied includes all the Canary Islands, except for companies which intend to carry out industrial or commercial activities involving tangible goods, which must be located in specific controlled areas.
- Companies applying the tax regime may operate outside the Canary Islands through branches if separate accounting books are kept, but the tax regime will not be applicable to such branches' activities.
- Activities for which the tax regime can be applied include a wide range of industrial and commercial activities, most services and holdings. Credit and insurance entities are excluded, and no stock exchanges are allowed.
- Companies applying the tax regime are subject to CIT in Spain at a 4% rate for companies authorised from 1 January 2007 onwards and at a variable rate of between 1% and 5% for companies authorised before this date. The special 4% rate shall be levied on a maximum amount of the taxable income which will depend on the number of jobs created and the type of activity carried out by the company. The general CIT regime establishes a 30% tax rate for Spanish companies applicable as from 2008. For small companies, the tax rate is 25% for the first EUR 300,000 of profits (EUR 120,202 for tax years starting prior to 1 January 2010) and 30% for remaining profits.
- Under this tax regime, companies can avail themselves of large tax exemptions for IGIC, transfer tax, and stamp duty, and large reductions and simplified regulations for local taxes.
- Interest and some other returns from moveable goods paid by companies under this tax regime are exempt from Spanish Non-Residents' Income Tax, except when paid to residents in tax havens.
- Benefits established in the EU Parent-Subsidiary Directive are extended to non-EU residents. These benefits are not applicable when the income is paid to residents in tax havens.
A fee of EUR 732.51 is payable to be registered as a company which applies this tax regime, and an annual fee of EUR 1,098.76 is payable to continue to be registered as qualifying for the tax regime.

Finally, the Spanish Parliament has recently proposed some amendments to the law regulating the Canary Island Special Zone tax regime, including, among other tax benefits, a reduction in the special CIT rate for companies which apply the regime to 1% for the first tax base segment.

**Foreign tax credit**

See Foreign income in the Income determination section for a description of double tax relief.

---

### Withholding taxes

Ordinarily, WHT is the mechanism by which the Spanish tax authorities collect the final tax levied on non-residents. In the case of resident beneficiaries, however, it is simply an advance payment of a tax that is then normally self-assessed by the resident taxpayer in the final annual tax return.

The advance payment system of WHT for resident beneficiaries referred to above also applies if non-resident companies/individuals not established in Spain sell their title to Spanish real estate. In this case, the acquirer of the real estate must levy a 3% WHT on the selling price on account of the 19% tax chargeable to the seller on its capital gain. Other capital gains (for instance, from a sale by a non-resident of a substantial interest in a Spanish company where neither a tax treaty nor internal rules establish a tax exemption) are taxed in the hands of the non-resident transferor, but the mechanics of levying the tax are not those of a WHT. In this case, the non-resident’s tax is paid directly, through its representative or by the depositor or manager of the assets in question, if any.

The following table states the general WHT rates on income obtained by resident/non-resident companies. The most significant peculiarities regarding the rates for each type of income are stated in footnotes to the table.

### Notes

The general rates in the table above are for guidance only and should not be treated as tax advice.

The rates above are for income obtained by non-residents which is not related to any PEs they may have in Spain.

(*) Aside from these tax treaties, the following tax treaties are not yet in force as they are currently being negotiated or are not yet approved or published: Armenia, Barbados, Georgia, Hong-Kong, Kuwait, Namibia, Nigeria, Panama, Peru, Senegal, Singapore, and Syria.

1. If a corporate taxpayer, as a shareholder, is entitled to full tax relief on the dividend received, no WHT is levied. As a general rule, corporate shareholders with at least a 5% interest held for at least one year are granted full tax relief.

2. a. The 19% WHT rate does not apply if, amongst other cases, the recipient is a resident bank or savings or other financial institution subject to CIT, provided that this income is not portfolio income. In addition, no WHT is levied on interest arising between companies taxed under the tax consolidation regime.

   b. A 19% WHT rate is levied on income generated under royalty and technical assistance agreements, from leases, or from the granting of rights when ownership is not transferred. A 24% rate is levied on fees received by a company for the transfer of rights to an image or consent or authorisation to its use.

3. Implementation of the EU Parent-Subsidiary Directive in Spanish law gives EU shareholders a WHT exemption on dividends from Spanish companies, subject to compliance with certain requirements. Luxembourg recipients of income which are companies under paragraph 1 of the protocol to the Tax Treaty with Spain (holding companies) are not allowed this exemption.

4. The EU Interest and Royalties Directive WHT exemption for interest obtained by EU lenders is applicable when appropriate.

5. Taxable income from supplies of services, technical assistance, or assembly/installation work under engineering contracts provided or carried out by non-resident companies with no PE in Spain does not follow the general rule for gross income. In such cases, total income can be reduced by related
Spain

staff costs, certain supplies (water, electricity, telephone) and materials used for the services/work, provided that, in the case of staff costs, evidence can be furnished that they were actually taxed in Spain. According to the EU Interest and Royalties Directive, royalties paid to other EU member state associate companies are exempt from WHT as of 1 July 2011 (WHT was limited to a maximum 10% prior to 1 July 2011).

6. A 5% WHT is levied if the beneficial owner is an Albanian company which holds at least 10% of the capital of the company paying the dividends; no WHT is levied if the Albanian company holds at least 75% of the capital of the Spanish company paying the dividends.

7. Levied if the recipient is a company holding at least a 10% interest in the paying company; otherwise, a 15% rate is levied.

8. Interest paid by certain public institutions is tax exempt.

9. Interest paid to certain public institutions is tax exempt.

10. Interest arising from the acquisition of commercial, industrial or scientific equipment is tax exempt.

11. Interest paid on loans granted by a bank or other financial institution is tax exempt.

12. For royalties for any copyright of artistic, scientific, or literary work (including cinematograph films and films or tapes for radio or television broadcasting), the rate levied is 14%.

13. Levied if the recipient is a company holding at least a 25% interest in the paying company; otherwise, a 15% rate is levied.

14. No WHT is levied on interest when both contracting states agree this and the loan is for no less than five years.

15. A 3% WHT rate is levied on royalties for the use of or right to use news. A 5% WHT rate is levied on royalties for any copyright of artistic, theatrical, musical, or literary work. A 10% WHT rate is levied on royalties for the use of or right to use copyright of industrial property, know-how, or scientific, commercial, or industrial equipment.

16. Levied if the recipient is a company holding a direct interest of at least 50% in the paying company for at least one year; otherwise, a 15% rate is levied.

17. No WHT is levied if the recipient is a company holding at least a 25% interest in the paying company.

18. Reduced WHT rates or exemptions are not levied/applied if the income is paid to a company resident in a contracting state more than 50% of whose shares are directly or indirectly held by non-residents. This clause will not apply if the company can prove that it carries out important industrial or commercial activities and does not merely manage or hold shares.

19. A tax exemption can be applied to interest on commercial loans, loans guaranteed by public bodies for the promotion of exports, and on current accounts in banks or nominative advances between banks of both contracting states.

20. Royalties for any copyright of literary, theatrical, musical, or artistic work (with some exceptions, such as films and TV programs) are exempt from WHT.

21. 5% WHT is levied if the recipient (beneficial owner) is the shareholder of the paying company with at least a 20% interest; otherwise, 10% WHT is levied.

22. No WHT is levied on interest if: (i) the recipient is the other contracting state, its central bank, or its political divisions; (ii) the payer is a contracting state or its political divisions; (iii) the interest arises from a loan or credit granted or guaranteed by a contracting state or its political divisions; (iv) the recipient is a financial institution; or (v) the recipient is a pension fund qualifying for tax purposes in a contracting state and the income from such fund is tax exempt in the contracting state paying the dividend.

23. Levied if the recipient is a company with at least a 25% interest in the paying company with voting rights; otherwise, a 15% rate is levied.

24. The maximum WHT is 10% for interest paid to financial institutions for loans and credits granted for a minimum term of ten years for the purchase of capital equipment.

25. Interest arising from securities issued by a contracting state is exempt from WHT.

26. A 10% WHT rate is levied on royalties for copyrights of any literary, scientific, or artistic work (including films and TV programs).

27. Levied if the beneficial owner is a company (excluding partnerships) with at least a 25% interest in the paying company held directly or indirectly; otherwise, a 15% rate is levied.

28. A reduced WHT rate is only levied if the income is taxed in Canada; otherwise the general rate is levied.

29. Levied if the recipient is a company with at least a 20% interest in the paying company held directly or indirectly; otherwise, a 10% rate is levied.

30. Interest arising from bank or insurance company loans, bonds, some securities that are regularly negotiated on stock markets, and credit sales of industrial equipment are taxed at a 5% tax rate.

31. A 5% WHT rate is levied on royalties for the use of industrial, commercial or scientific equipment.

32. WHT is levied on 60% of gross royalties for the use of industrial, commercial or scientific equipment.

33. A 0% WHT rate is levied if the recipient is a company with at least a 20% interest in the paying company held directly or indirectly.

34. No WHT is levied if: (i) the beneficiary is a contracting state, one of its political subdivisions or one of its local authorities; (ii) interest is paid in connection with the sale on credit of merchandise or equipment to a company of a contracting state; or (iii) interest is paid on a loan granted by a bank or financial institution resident in a contracting state.

35. A 5% WHT is levied if the beneficial owner is a company which directly holds at least 20% of the capital of the company paying the dividends.

36. a. 5% WHT is levied if the interest is paid on a long-term loan (more than five years).
b. No WHT is levied: (i) if interest is paid to a Croatian bank; (ii) on interest arising from the acquisition of commercial, industrial, or scientific equipment, (iii) on interest arising from a credit sale.

37. No WHT is levied if: (i) the beneficiary is a contracting state, one of its political subdivisions or one of its local entities; (ii) interest is paid in connection with the sale on credit of merchandise or equipment to a company of a contracting state; or (iii) interest is paid on a long-term loan (five or more years) granted by a bank or financial institution resident in a contracting state.

38. Royalties for copyrights of any literary, theatrical, musical, or artistic work, excluding films and TV programs, are tax exempt if the recipient is resident in the other contracting state and taxed on such income in such state.

39. A 5% WHT rate is levied on interest arising from the sale of industrial, commercial or scientific equipment, the sale of merchandise from one business to another business, or the financing of construction, installation or assembly works. No WHT is levied if the interest is paid on a long term loan (more than five years) or if the interest is paid to the other contracting state or one of its political subdivisions or a financial institution totally owned by the other contracting state or one of its political subdivisions.

40. A 5% WHT rate is levied on royalties for copyrights of any literary, theatrical, musical, or artistic work (excluding films and TV programs).

41. A 9% WHT rate is levied on the gross amount of the dividends if the beneficiary owner is a company (other than a partnership) which has at least a 25% direct interest in the company paying the dividends.

42. WHT is not levied on interest if the recipient is a contracting state, one of its political subdivisions, or one of its public bodies or local authorities, or if the interest is paid to the Central Bank of the other contracting state.

43. No WHT is levied if the recipient is a company with at least a 50% direct interest in the company paying the dividends, provided that the dividends are distributed from profits taxed in Spain.

44. No WHT is levied on interest if: (i) the recipient is the other contracting state, its central bank or its political divisions; (ii) the payer is a contracting state or its political divisions, or (iii) in connection with a credit sale of industrial, commercial or scientific equipment.

45. No WHT is levied on royalties on copyright of any literary or artistic work (excluding films and TV programs) if the recipient is the beneficiary owner or royalties paid for the use or licensing of containers and bare hull vessels or aircraft used in international trade.

46. No WHT is levied on interest paid to ‘Deutsche Bundesbank’ or ‘Kreditanstalt für Wiederaufbau’.

47. WHT is not levied if the recipient is a company with at least a 25% direct interest in the company distributing the dividend.

48. No WHT is levied on interest paid to companies in the other contracting state if the operation that generates the debt has been authorised by the government of the state where the company paying the dividends.

49. WHT is levied on dividends paid to another company by a company of a contracting state; or (iii) interest is paid on a long‑term loan (five or more years) or if the interest is paid to the other contracting state or one of its political subdivisions.

50. A 10% WHT rate is levied on royalties for the use or cession of use of industrial, commercial, or scientific equipment. The general 20% WHT rate is levied on technical services and other royalties.

51. No WHT is levied on interest if: (i) the interest is paid by a contracting state, one of its political subdivisions; (ii) the interest arises from a loan or credit granted or guaranteed by a contracting state or its political divisions, (iv) the recipient is a qualifying financial institution; or (v) the recipient is a pension fund qualifying for tax purposes in a contracting state and the income from such fund is tax exempt in the contracting state paying the dividend.

52. No WHT is levied if: (i) the recipient is a contracting state, one of its political subdivisions or one of its local entities; (ii) from a resident in the other contracting state from an underlying commercial or industrial activity, (iii) in connection with a credit sale of industrial, commercial or scientific equipment, or (iv) for a loan granted by a financial institution.

53. No WHT is levied on royalties on copyright of any literary or artistic work (excluding films and TV programs) if the recipient is the beneficiary owner or royalties paid for the use or licensing of containers and bare hull vessels or aircraft used in international trade.

54. No WHT is levied on interest paid to companies in the other contracting state if the operation that generates the debt has been authorised by the government of the state where the company paying the dividends.

55. A 9% WHT rate is levied on the gross amount of the dividends if the beneficiary owner is a company (other than a partnership) which has at least a 25% direct interest in the company paying the dividends.

56. WHT is not levied if the recipient is a company with at least a 25% direct interest in the company paying the dividends.

57. Royalties for copyright on literary, theatrical, musical, or artistic work are taxed at a 5% WHT rate. Royalties on films or other means of audio or video transmission, for the use or right to use industrial, commercial, or scientific equipment, or on scientific works or under agreements between both states are taxed at an 8% rate.

58. A 5% WHT rate is levied on interest arising from the sale of industrial, commercial, or scientific equipment, the sale of merchandise from one business to another business or loans granted by a financial institution.

59. A 5% WHT rate is levied on royalties for copyright on literary, theatrical, musical, or artistic work (excluding films and TV programs).

60. A 4% WHT rate is levied on royalties for copyright on literary, theatrical, musical, or artistic work (excluding films and TV programs).
61. Reduced WHT rates are not levied when more than 75% of the shares of the recipient company resident in a contracting state are owned directly or indirectly by non-residents and the income generated by the paying company is not taxed in its country of residence.

62. Levied if the recipient is a company with at least a 25% interest in the paying company; otherwise, a 15% rate is levied.

63. No WHT is levied on interest arising from a loan guaranteed by a contracting state.

64. Consideration received for waiving, either totally or partially, the use or right to use goods or rights is considered to be a royalty.

65. No WHT is levied on interest paid in connection with the sale on credit of merchandise or equipment to a company of a contracting state or on interest paid on a long-term loan (five or more years) granted by a bank or credit institution resident in a contracting state.

66. No WHT is levied if the recipient is a company with at least a 5% direct interest in the paying company.

67. A 5% WHT rate is levied on royalties for technical services.

68. No WHT is levied on dividends paid to a shareholder resident in the other contracting state of the company distributing the dividend with at least a 25% interest.

69. A 10% WHT rate is levied on interest received by a bank (beneficial owner).

70. Levied if the recipient is a company with at least a 50% direct interest in the paying company. A 5% WHT rate is levied if the recipient is a shareholder with at least a 25% direct interest; otherwise, a 10% rate is levied. WHT is reduced to 5% if the recipient company is not taxed in the Netherlands for this dividend.

71. WHT is reduced to 10% if the recipient is a Dutch company with at least a 50% direct interest in the paying company or if the recipient holds 25% of its capital and another Dutch company holds at least the other 25%.

72. No WHT is levied on capital gains from sales of assets/rights when they are considered to be a royalty.

73. a. No WHT is levied on fees paid for the use or licensing of containers and bare hull vessels or aircraft used in international trade.

74. If the recipient is a shareholder of the paying company holding voting rights with at least a 10% direct interest; otherwise, a 15% rate is levied.

75. A 10% WHT rate is levied on interest paid for bonds or similar securities generally offered to investors and related to transfers of industrial, commercial, or scientific equipment. No WHT is levied on interest from bonds or similar securities issued by the state or a local entity or from loans given or guaranteed by either of the two contracting states, Central Banks, or financial institutions as agreed between the contracting states.

76. A 20% WHT rate is levied on royalties for films or audio or TV tapes.

77. If the recipient has invested more than EUR 100,000 in the company that pays the dividends: a 7.5% WHT is levied if the beneficial owner is a company that has owned directly, during a period of six months, at least 50% of voting shares of the company paying the dividends; at least 25% of voting shares of the company paying the dividends.

78. Levied if the recipient company is not taxed in the Netherlands for this dividend.

79. Interest on loans with a maturity period of over seven years is tax exempt.

80. A 10% WHT rate is levied on any patents, trademarks, designs or models, plans, secret formulae, or processes and computer software, or for the use of, or the right to use, industrial, commercial, or scientific equipment, or for information concerning industrial, commercial, or scientific experiences. A 5% WHT rate is levied on any copyright of literary, artistic, or scientific work (excluding cinematograph films and films or tapes for radio or television broadcasting); an 8% WHT is levied on financial leasing related with the use or the right to use industrial, commercial, or scientific equipment.
Spain

87. a. Reduced WHT rates or exemptions are not levied/applied if the income is paid to a company resident in a contracting state more than 75% of whose shares are directly or indirectly held by non-residents and such income is not subject to taxation in such contracting state.
b. Levied if the recipient is a shareholder of the paying company with at least a 50% interest; otherwise, a 15% rate is levied.
88. A 5% WHT rate is levied for long-term loans (more than seven years).
89. The WHT rate is 10% if the interest arises from a loan granted by a bank or is related to a credit acquisition of merchandise or equipment.
90. Levied if the recipient is a shareholder of the paying company with at least a 10% interest; otherwise, a 15% rate is levied.
91. a. No WHT is levied on royalties paid for the use or licensing of containers used in international trade.
b. No WHT is levied on dividends when they are paid to a company holding at least a 75% direct interest in the paying company.
92. No WHT is levied if the interest is paid on a long-term loan (more than three years) to finance investment projects, if the interest is paid to a pension fund that meets certain requirements, or if the interest is paid in relation to a credit acquisition of merchandise, equipment, or services.
93. A 5% WHT is levied on royalties for any copyright of literary, artistic, or scientific work.
94. A 4.95% WHT rate is levied on interest received by financial institutions.
95. No WHT is levied on interest if: (i) the recipient is the other contracting state, its central bank, or its political divisions; (ii) the interest is paid by one contracting state or its political divisions, (iii) the interest arises from a loan or credit granted or guaranteed by a contracting state to promote exports and development, (iv) the recipient is a pension fund qualifying for tax purposes in a contracting state and the income generated from the fund is tax exempt in the contracting state paying the dividend, or (v) the interest is paid in relation to the credit acquisition of industrial, commercial or scientific equipment.
96. Levied if the recipient is a shareholder of the paying company with at least a 50% interest. A 10% WHT rate is levied if the recipient is a company with at least a 25% direct interest; otherwise, a 15% rate is levied.
97. No WHT is levied on interest arising from loans granted or guaranteed by qualifying public institution or interest paid to public financial institutions.

---

**Tax administration**

**Returns**
The tax system in Spain is a self-assessment system, and tax returns may be inspected by the tax authorities. The tax year for CIT purposes is the company’s accounting year. The tax year cannot exceed 12 months, and the commencement, termination, or change of a tax year can give rise to a period of less than one year.

Annual CIT returns must be filed and the tax paid within 25 calendar days following the six months subsequent to the end of the tax year (i.e. if the tax year coincides with the calendar year, the return must be filed between 1 July and 25 July of the following calendar year).

**Payment of CIT**
For CIT, three on-account payments of the annual tax payment must be made during the first 20 calendar days of April, October, and December. Large companies must calculate these advance payments as a percentage (21%) of their annual tax profits for each period, i.e. at 31 March, 30 September, and 30 November. Some allowances and the tax year advance payments can be credited against this percentage of tax profits. Small companies can opt to calculate their advance payments in the same way as large companies or to apply a rate (currently 18%) on the tax liability arising from the CIT returns that should have been filed in April, October, and December.
Spain

Other issues

Special tax regime applicable in the Basque Country
The three provinces that make up the region of the Basque Country (Alava, Guipúzcoa and Vizcaya) have an ‘economic agreement’ with Spain’s central government (laid down and regulated by Law 12 of 23 May 2002) in accordance with which these regions are granted the right to regulate their own tax regimes.

There are certain provisions in this law regarding CIT which make this area of Spain more attractive for companies.

General tax rate
The general tax rate is 28%.

Lower tax rates
A reduced rate of 24% is levied on small companies. From 1 January 2010, a small company is considered to be a company which meets the following requirements in the year prior to the application of the special tax regime:

- Carries on an economic business activity.
- Net turnover or assets under EUR 10 million.
- Average number of staff under 50.
- An interest of 25% or more in the company is not held, directly or indirectly, by a company that does not meet the above requirements.

A 20% rate (24% in Guipúzcoa) is levied on real estate companies which comply with the following requirements:

- Their share capital is wholly owned by individuals during the whole tax year.
- More than half of their assets are securities or more than half of their assets are not used for economic business activities during at least 90 days of the tax year.
- At least 90% of their profits are generated from investment income and capital gains.

A 21% rate is levied on companies that are floated on the Bilbao Stock Exchange and on brokerages and cooperatives. Companies that are floated on the Bilbao Stock Exchange are taxed at this rate for three years, as long as they are in compliance with certain requirements.

Tax-loss carryforwards
Tax losses may be carried forward for the following 15 years in Guipúzcoa. In Vizcaya and Alava, there is no time limit for the offsetting of tax losses.

Tax deductibility of amortisation of goodwill and intangible assets
Amortisation recorded for intangible assets (irrespective of whether they have a specific useful life or not), including goodwill, is tax deductible up to a maximum annual limit of 20%, subject to compliance with the following requirements:

- The assets have been acquired for consideration.
- The acquiring and transferring companies are not associated parties.

Financial goodwill
Financial goodwill is tax deductible over a period of five years when at least a 5% interest is acquired in the company and these shares are not quoted on a Stock
Exchange or, if they are quoted on a Stock Exchange, they are shares of group or associated companies.

If the company from which the shares have been acquired has an interest in another company, the equity, assets and rights recorded in the group's consolidated annual accounts must be taken into consideration for the purpose of calculating the amount of the financial goodwill.

If the company from which the shares have been acquired is a non-resident company, in addition to the requirements stated above, the following requirements must be fulfilled:

- The company is subject in its country of residence to a tax which is identical or similar to Spanish CIT.
- The company carries on business activities abroad.

If the shares are not acquired on a stock market, the company which acquires the shares must not be in any of the situations provided for in Article 42 of the Spanish Commercial Code in relation to the transferring company.

**Depreciation periods**
The depreciation periods for assets are shorter than those under state CIT law.

**Reinvestment of extraordinary income**
Income obtained from the sale of tangible fixed assets or intangible assets can be deducted from taxable income, subject to compliance with the following requirements:

- The amount obtained from the sale is reinvested in similar types of assets within a four-year period (as from one year prior to the sale up to three years after the sale).
- The asset in which the reinvestment is made is maintained for five years (three in the case of movable assets), unless its useful life is shorter.
- For sales of shares in other companies when the interest held is at least 5% and has been held or a period of one year prior to the date of sale, 60% of the income obtained from the sale can be deducted from taxable income.

**Income generated from intellectual or industrial property**
30% of the income obtained from the transfer of intellectual or industrial property rights can be deducted from taxable income, subject to compliance with certain requirements, and 60% if the company has created the intellectual or industrial property itself. There are no quantity limits to be complied with for the application of this deduction.

**Investments in new tangible fixed assets**
A 10% tax credit can be applied to investments in new tangible fixed assets, subject to compliance with certain requirements. The minimum depreciation period for the assets, excluding computer equipment, is five years.

The total amount of the investment must be over EUR 60,100 and the investment must comply with at least one of the following requirements:

- Exceeds 10% of the carrying amounts (minus depreciation/amortisation) of the company's tangible fixed assets, buildings and software during the previous year.
- Exceeds 15% of the carrying amount of the same type of tangible fixed assets of the company during the previous year.
Spain

**Special reserve for investments in production**
A tax credit can be applied for the distribution of profits to a special reserve for investments in production, subject to compliance with the following requirements:

- The company invests the amount distributed to the reserve in new tangible fixed assets during the following two years.
- These assets are maintained by the company during a five-year period or during their useful life if it is less than five years.
- The company's shareholder's equity is increased by the amount distributed to the reserve, and this increase is maintained for a five-year period as from the date on which the investment was made.

The tax credit is 10% of the profits distributed to the reserve.

**Research and development**
A 30% tax credit can be availed of for expenses incurred from R&D activities. If the expenses are higher than the average expenses incurred by the company during the previous two years, the tax credit is 50% on the excess amount.

An additional tax credit of 20% can be availed of for the following expenses:

- Staff expenses incurred for staff exclusively carrying out and qualified to carry out R&D activities.
- Expenses incurred for projects contracted from certain universities and public organisations.

A 10% tax credit can be availed of for investments made in tangible fixed assets (excluding buildings) and intangible assets which are exclusively assigned to R&D activities.

**Technological innovation**
A 20% or 15% tax credit can be availed of for certain expenses incurred for technological innovation.

**Expenses incurred for environmental conservation and improvement and for conservation of energy**
Companies are eligible for a 30% tax credit for investments made in the equipment listed in the Basque List of Environmental Technologies, subject to compliance with certain requirements.

Companies may also qualify for a 15% tax credit for investments made and expenses incurred in respect of tangible fixed assets, subject to compliance with certain requirements.

**Export investments (e.g. foreign advertising, formation of companies, and branches abroad)**
As in state CIT law, for periods starting from 1 January 2011, there is no tax credit for export investments.

**Staff training**
A 10% tax credit can be applied to expenses incurred in staff training. If the expenses are higher than the average training expenses incurred by the company during the previous two years, the tax credit is 15% of the excess amount.
A tax credit can also be applied for expenses incurred to obtain the Occupational Health and Safety Assessment Sequence (OHSAS) 18001 certificate and to train staff in new technologies.

**Job creation**
For tax years commencing during the period 1 January 2010 to 31 December 2011, the following tax credits can be availed of for job creation, subject to compliance with the requirements stated:

- EUR 4,600 for each job created provided that a permanent employment contract is signed with the employee.
- EUR 8,600 for each job created provided that a permanent employment contract is signed with the employee and a person who has special difficulties in finding employment is contracted.

The company’s average number of staff with permanent employment contracts must be increased by at least the same number of contracts that generated the tax credit and this increase must be maintained by the company for two years.

**Corporate contribution to an EPSV**
A tax credit of 10% applies to corporate contributions to certain pension schemes in favour of the staff of the company, up to the limit of EUR 8,000 per employee each year.

For tax years commencing before 31 December 2011, an additional tax credit of 50%, up to the limit of EUR 200 per employee, could be applied on the excess amount contributed in comparison with the previous year’s contribution.

**Time limits for the application of tax credits**
In Guipúzcoa, tax credits can be carried forward for a period of 15 years as from the date on which the company qualifies for them. In Vizcaya and Alava, there is no time limit for the application of tax credits.

**Limits on the amount of tax credit applied**
The combined sum of all investment tax credits, excluding tax credits for R&D and technological innovation, may not exceed 45% of the company’s CIT liability.

**Interim payments**
There is no obligation to make interim payments on account of CIT.

**Special Regime for small and medium-sized companies**
A small company is considered to be a company which meets the following requirements during the year prior to the application of the special tax regime:

- Carries on an economic business activity.
- Net turnover or assets under EUR 10 million.
- Average number of staff under 50.
- An interest of 25% or more in the company is not held, directly or indirectly, by a company that does not meet the above requirements.

A medium company is considered to be a company which meets the following requirements during the year prior to the application of the special tax regime:

- Carries on an economic business activity.
Spain

- Net turnover under EUR 50 million or assets under EUR 43 million.
- Average number of staff under 250.
- An interest of 25% or more in the company is not held, directly or indirectly, by a company that does not meet the above requirements.

The benefits derived from this special tax regime are as follows:

- Free depreciation for new tangible assets (except buildings) for small-sized companies (general free depreciation relief set forth for tax years 2009 to 2015 is not applicable in the Basque Country).
- Accelerated depreciation for new tangible assets (except buildings) for medium-sized companies.
- Global bad debt provisions up to 1% of credit sales and services of small- and medium-sized companies are tax deductible for CIT purposes. Provisions for possible insolvency of credit sales and services are tax deductible up to a limit of 1% of the amount of credit sales and services at the end of the period.
## Significant developments

The highlight of the 2011 Budget is the reduction of the corporate income tax (CIT) rates, as follows:

## Taxes on corporate income

Resident companies and public corporations are liable for CIT on their worldwide taxable income. Non-resident companies are liable for CIT of their Sri Lanka-source taxable income.

As of 1 April 2011, the CIT rate for companies, including public corporations and quoted public companies, with taxable income greater than LKR 5 million is 28%. The CIT rate for companies with taxable income less than or equal to LKR 5 million is 12%. Prior to
Sri Lanka

1 April 2011, the rates were 35% (33 1/3% for any quoted public company, for five years from the year in which it becomes a quoted public company) and 15%, respectively.

As of 1 April 2011, the CIT rate for companies whose annual turnover does not exceed LKR 300 million is 10%. Prior to 1 April 2011, the CIT rate for such companies was 35%.

**Marginal relief**
Where the taxable income of any company for any year of assessment exceeds LKR 5 million but does not exceed LKR 6,111,111, then such part of the tax computed for such year of assessment as is attributable to such excess shall not be more than such excess.

**Industry-specific rates**
As of 1 April 2011, a 12% CIT rate applies to profits from exports, fisheries, tourism, and construction. The lower CIT rate applicable to the construction industry, however, is restricted to resident companies only. Prior to 1 April 2011, the CIT rate on such profits was 15%.

As of 1 April 2011, a 40% CIT rate applies to profits from companies engaged in the manufacture or import of liquor or tobacco products. Prior to 1 April 2011, the CIT rate on such profits was 35%.

As of 1 April 2011, a 10% CIT rate applies to profits from companies engaged in agriculture. Prior to 1 April 2011, such profits were exempt from CIT.

As of 1 April 2011, a 12% CIT rate applies to profits from companies engaged in the manufacture of animal feed. Prior to 1 April 2011, the CIT rate on such profits was 35%.

As of 1 April 2011, a 12% CIT rate applies to profits from companies engaged in deemed exports. Prior to 1 April 2011, the CIT rate on such profits was 15%.

As of 1 April 2011, a 10% CIT rate applies to profits from companies engaged in the operation and maintenance of facilities for storage, development of software, or supply of labour. Prior to 1 April 2011, the CIT rate on such profits was 35%.

As of 1 April 2011, a 10% CIT rate applies to profits from companies engaged in educational services. Prior to 1 April 2011, the CIT rate on such profits was 35%.

As of 1 April 2011, the CIT rate applicable to venture capital companies is 12%. Prior to 1 April 2011, the applicable CIT rate was 20%.

Unit trusts and mutual funds are treated like resident companies for CIT purposes. Units of investment are treated like company shares, and returns to investors are treated like company dividends. The tax rate is 10% on the profits derived by any unit trust or mutual fund.

**Dividend tax**
A dividend tax is payable at 10% on the gross dividends distributed by a resident company, other than such dividends distributed out of any dividend received from another resident company (and few other exceptions).

**Deemed dividend tax**
A deemed dividend tax of 15% is payable by any resident company in any tax year if the said company has, in the preceding tax year, distributed dividends of less than 10%
(25% prior to 1 April 2011) of the distributable profits (duly defined) for that preceding tax year.

The tax base for the 15% deemed dividend tax is the book profits of the company reduced by the aggregate of the income tax payable by that company for that year of assessment, the cost incurred by the company in that year of assessment in the acquisition of any land or any capital asset, and any notional profit computed on the bases of a revaluation of any capital asset included in such book profit and increased by the aggregate of the allowance for depreciation deducted in respect of any capital asset and any notional loss computed on the basis of a revaluation of any capital asset included in such book profit.

**Remittance tax**
Where profits of a non-resident company are remitted in a tax year, a remittance tax is payable in an amount equal to 10% of the remittances.

**Surtax**
Public corporations are also subject to tax of an additional amount, the excess (if any) of 25% of the balance of profits left after deduction of the CIT payable over the amount of gross dividends distributed out of profits on which taxable income is computed.

**Social responsibility levy**
Prior to 1 April 2011, a 1.5% social responsibility levy was payable by every company on the amount of CIT, dividend tax, deemed dividend tax, and remittance tax. This levy has been removed as of 1 April 2011.

**Corporate residence**
A company is treated as resident for tax purposes in Sri Lanka if its registered or principal office is in Sri Lanka or if the control and management of its business is exercised in Sri Lanka.

**Other taxes**

**Value-added tax (VAT)**
VAT is payable on imported goods and on the supply of goods (excluding, in particular, the supply to merchants who purchase goods locally) and services in Sri Lanka. Provisions are made for filing returns monthly or quarterly, based on specified criteria. Even where returns can be filed quarterly, the tax payments are required to be made on a monthly basis. Certain specified imports and domestically supplied goods and/or services are exempt.

VAT is payable on the prescribed valuations of imports and domestic supplies at a standard rate of 12%. There was a higher rate of 20% for luxury items, which was abolished effective from 1 January 2011. Exports and certain specified international services are zero-rated.

No registration for VAT is necessary if the total value of taxable supplies in a quarter is LKR 650,000 or less, or LKR 2.5 million or less in a year.

The input tax paid on the imports and supplies of goods (including capital goods) and services in a month, and used in the business of making taxable supplies in that
Sri Lanka

month, can be deducted from the tax payable (output tax) on such supplies, subject to a limitation of the lesser of 100% (85% prior to 1 January 2011) of output tax or the actual input tax paid.

Refunds of excess VAT paid are available to zero-rated supplies, to suppliers who are qualified to issue suspended tax invoices, and to new businesses registered under Section 22 (7) of the VAT Act.

**Economic service charge (ESC)**

ESC is payable quarterly by every person (a person includes a company) in respect of the aggregate turnover of the trade, business, profession, or vocation at rates varying from 0.1% to 1%, depending on the business activity, if the total turnover exceeds LKR 25 million (7.5 million prior to 1 April 2011) for that quarter. ESC so paid is deductible from the CIT payable for that year of assessment. ESC is not refundable but can be carried forward for four immediately succeeding tax years and offset against CIT payable for those four tax years. Maximum ESC payable for any quarter is LKR 30 million.

**Nation building tax (NBT)**

NBT is chargeable at 2% (3% prior to 1 January 2011) from every person (a person includes a company) who imports any article on the 'liable turnover’ from such importation and who carries on the business of manufacture of any article or carries on the business of providing a service of any description on the liable turnover of the relevant quarter. Certain specified articles or services are exempt from NBT.

Liable turnover means:

- In the case of importer, the value of any article ascertained under section 6 of the VAT Act for the purpose of importation.
- In the case of manufacturer, the proceeds receivable, whether received or not, from the manufacture and sale in Sri Lanka.
- In the case of service provider, the proceeds receivable, whether received or not.

As of 1 January 2011, wholesale and retail traders are also liable to pay NBT; however, 50% of the liable turnover will be taxed at a zero rate and the remaining 50% will be taxed at 2%. In the case of a distributor as defined in the ESC Act, 75% of the liable turnover will be taxed at a zero rate and the remaining 25% will be taxed at 2%.

Bad debts, VAT, and excise duty should not be included in the liable turnover.

**Turnover tax**

Prior to 1 January 2011, a turnover tax at rates varying from 1% to 5% of turnover was charged on any person who bought or sold articles in any area of Sri Lanka. This tax has been abolished as of 1 January 2011.

**Excise duties**

Excise duties and special excise levies are charged on tobacco, cigarettes, liquor, motor vehicles, selected petroleum products, paints, air conditioners, dishwashers, household washing machines, and other products.

**Stamp duty**

Stamp duty is payable on specified instruments and documents at rates prescribed in the Gazette.
Construction industry guarantee fund levy
Construction industry guarantee fund levy is payable by each construction contractor or subcontractor on the contract value arising from any contract entered into, calculated at rates varying from 0.25% to 1%, depending on the value of the construction contract. As of 1 April 2009, any person or partnership that makes any payment, which is subject to such levy, to a contractor should deduct such levy as a withholding tax (WHT) and remit the amount withheld to the Commissioner General of Inland Revenue.

Tourism development levy
Tourism development levy is payable by tourist hotels and institutions licensed under the Tourist Development Act on the turnover of such institution at the rate of 1%.

Employees Provident Fund (EPF)
Employers and employees are required to contribute specified percentages (employer 12%; employee 8%) of each employee’s monthly emoluments/salary to the EPF established by the Government. Alternatively, employers and employees must contribute to certain private provident funds approved by the labour authority.

Employees Trust Fund
Employers are also required to contribute a specified percentage (currently 3%) of each employee’s monthly emoluments/salary to the Employees Trust Fund established by the Government.

Share transaction levy
Share transaction levy at the rate of 0.3% (0.2% prior to 1 January 2011) is chargeable from the buyer and from the seller on the sale of listed shares.

Local taxes
Taxes (more usually called rates) are currently assessed and collected annually from the owners of land and premises by the local authorities of the areas in which the properties are located. These authorities also charge and collect annual licence fees from certain businesses as well.

Branch income
Foreign companies are permitted to register a place of business in Sri Lanka or to be registered as an overseas company under local company law, where the business carried on conforms to the stipulations made under the exchange control law.

An overseas company registered under the companies act may carry on in Sri Lanka any non-commercial, non-holding, or non-industrial activities, such as the activities undertaken or carried on by a liaison office, representative office, regional office, or other similar office, provided such activities do not provide any income directly or indirectly to the company.

In addition to paying the standard CIT, a branch is also subject to the 10% remittance tax on remittance to its foreign head office.

The Sri Lanka-source income of foreign companies from a local ‘place of business’ is taxed at the CIT rate. However, under most double-taxation-avoidance treaties that Sri Lanka has entered into, the income of a turnkey or service project will not be liable for CIT if its duration is less than a period specified in the treaty concerned.
Sri Lanka

Where branch or project income is liable for CIT but the income is not readily ascertainable, the tax authority may prescribe that the income be computed on a fair percentage (not less than 6%) of the branch or project turnover in Sri Lanka.

**Income determination**

Business accounting for income tax purposes should, unless otherwise specified by the tax statute, conform to Sri Lanka Accounting Standards.

**Inventory valuation**

Inventories should be measured at the lower of cost and net realisable value.

**Capital gains**

There is no capital gains tax. Capital gains from transfer of property are exempt from CIT.

**Dividends**

Resident company dividends paid on shares held by resident or non-resident persons are not assessable to the recipients if income tax is withheld on such dividends (see the Withholding taxes section), the dividends are exempt from income tax, or the dividends are paid out of dividends received from resident companies.

Stock dividends (bonus shares) are not taxable in the hands of a shareholder at the time of issue; but where such shares are capitalised out of company profits and there is a return of this capital to the shareholder within six years from the date of issue, the amount of capital returned to the extent of the paid-up value of the bonus shares is treated by definition as a dividend and is taxable in the hands of the shareholder. However, if the shareholder is a company, this dividend may not be assessable, as explained above.

**Deductions**

In ascertaining the total income liable to CIT from the financial accounts filed by a company, deductions from revenue are permitted for outgoing and matching expenses incurred in producing the income, including special deductions.

**Depreciation**

An annual allowance for depreciation for wear and tear is calculated at:

- 33 1/3% for plant, machinery, or equipment for a period of three years.
- 25% of the cost of any information technology for a period of four years.
- 20% of the cost of acquisition of any motor vehicle or furniture for a period of five years.
- 10% of the cost of any qualified building for a period of ten years.

Prior to 1 April 2011, the depreciation rate was 12.5% for a period of eight years for plant, machinery, and equipment and 6 2/3% for a period of 15 years for any qualified building.

The cost of renewal of any capital asset, if no allowance exists, is deductible for the purpose of ascertaining profits and income.
**Bad debts and doubtful debts**
In the case of a bank or financial institution, deductibility of a specific bad debt provision is restricted to the lesser of the actual amount of the provision or 1% of the aggregate debts as at the end of the period for which profits are ascertained.

**Interest**
Interest paid or payable on borrowings for purposes of business are deductible, subject to the thin capitalisation rules *(see the Group taxation section)*.

Deductions from the total income from all sources of a company are allowed for any interest payable on loans used for the construction or purchase of any building or the purchase of any site for construction of a building; for any annuity, ground rent, or royalty payable; or for a business loss other than a loss incurred in any business of life insurance and any business of finance leasing, including any loss current or brought forward from a previous year, up to a maximum limit of 35% of the total statutory income in determining the residual balance income, which would be assessable for income tax. Where such deductions exceed the total income, any unrelieved excess is carried forward for deduction in the succeeding tax year from its total statutory income for that year of assessment and so on.

**Charitable contributions**
Relief is available as a deduction from assessable income for contributions in money to an approved charity, if the charity is established for the provision of institutionalized care for sick or the needy, and contributions in money or in kind to the Government of Sri Lanka. The deduction for the former is subject to a ceiling of one-fifth of the assessable income of the company. In the case of the latter, there is no limit to the deduction, and any un-recouped excess of such contributions over the assessable income is available for carry forward deduction from the following year’s assessable income and so on.

**Royalties**
No deduction is allowed for a royalty paid by a person outside Sri Lanka to another person outside Sri Lanka.

**Formation or liquidation expenses of a company**
In the case of a company, expenses incurred in the formation or liquidation of that company are allowed in computing the taxable income.

**Terminal gratuities**
Termination gratuities paid to employees on cessation of business and annual payments made to an approved fund, held for payment under compulsory legislation of gratuities to employees upon termination of their services, are deductible.

**Taxes**
Sri Lanka income tax payable or any income tax or other similar tax payable in any country with which Sri Lanka has a double-taxation-avoidance treaty is not deductible, other than the excess of the foreign-country tax on doubly taxed income over the maximum amount of the credit allowed in the foreign country for the Sri Lanka income tax on that income.

Taxes paid in a foreign country that does not have a tax treaty with Sri Lanka may be deducted.
NBT paid/payable is fully deductible as of 1 January 2011. Prior to 1 January 2011, 2/3 of NBT was disallowed.

Input VAT is not deductible from CIT since it is creditable against output VAT.

Any other prescribed tax or levy is not deductible.

**Non-deductible expenses**
Deductions not permitted for certain expenses or allowances, in the determination of total income, are itemised below:

- Business entertainment expenses incurred or entertainment allowances paid to executive officers.
- Any expenditure of a capital nature or any loss of capital, including book depreciation of capital assets.
- Depreciation allowances or rentals or annual payments or renewals in respect of vehicles used for purposes of business travel, or capital assets provided for the use of employees at their places of residence, other than motorcycles or bicycles used by non-executive staff and motor coaches used to transport employees to and from their places of work.
- The excess of management fee paid over LKR 2 million (LKR 1 million prior to 1 April 2011) or 1% of turnover, whichever is lower, or such amount as may be determined by the tax authorities. This restriction does not apply to a venture capital company, unit trust, or mutual fund.
- As of 1 April 2011, any foreign travel or foreign training expense incurred in the production of income of any trade, business profession, or vocation is deductible, subject to a maximum limit of 2% of the previous year’s statutory income from the respective trade or business. Prior to 1 April 2011, foreign travel expenses incurred in connection with a business were not deductible, other than those expenses incurred solely in connection with the promotion of the export trade, or the provision of any services for payment in foreign currency or in carrying out an approved programme for the promotion of tourism.

**Net operating losses**
No deduction from total income is allowed in a tax year for a business loss if, at any time in that year, more than one-third of the issued share capital of the loss-making company is held by persons who did not hold such share capital at any time in the year in which the loss was incurred. In such circumstances, the loss is deferred for deduction only from profits of the particular business in which the loss was incurred.

Any loss incurred in any business of life insurance can be deducted to the extent of any profits from such business included in such total statutory income. Similarly, any loss incurred in any business of finance leasing can be deducted to the extent of any profits from such leasing business included in such total statutory income.

Losses incurred in the creation of a trade or business may be carried forward indefinitely but only up to 35% of statutory income. Carryback of losses is not permitted.

**Group taxation**
There are no special provisions for taxation of companies in a group in Sri Lanka. Each company is taxed independently of others in the group.
Thin capitalisation
Deductible interest payments made between members of a group of companies, including holding companies, are restricted to the debt equity ratio of 3:1 for manufacturing companies and 4:1 for other companies.

Tax credits and incentives

Tax holidays
A tax holiday is available to companies engaged in:

- Agriculture, agro processing, industrial and machine tool manufacturing, machinery manufacture, electronics, export of non-traditional products, or information technology and allied services.
- Any designated project.
- An undertaking for large-scale infrastructure development.
- Small-scale infrastructure undertakings for generation of power, tourism, recreation, warehousing and cold storage garbage collection or disposal, construction of houses, or hospitals.

The period of the tax holiday will be determined by reference to the nature of the undertaking and the amount invested in the project, as follows:

- A five-year tax holiday is available to a new venture capital company satisfying specified criteria.
- A five-year tax holiday is granted for the profits from the new undertaking of a company that is engaged solely in research and development (R&D) in the field of science or technology with the object of using the results thereof for the production or improvement of products with a minimum investment of LKR 2 million.
- Tax holidays outside the purview of the tax statute are also available in specified areas of investment to companies that enter into agreements with the Board of Investment (BOI) of Sri Lanka and to any strategic development projects indentified in accordance with the provisions of the strategic Development projects Act No 14 of 2008. The specified areas include non-traditional export-oriented manufacturing and thrust industries, export-oriented services, large-scale projects of which the project cost exceed LKR 500 million. Generous waiver of import duties on specified imports and other concessions are also available for these companies.
- Profits and income derived from the sectors of fishing, cultivation, and primary processing of agriculture seeds or planting materials will be exempt from CIT for a period of five years reckoned from the year of assessment commencing from 1 April 2011.

Inbound investment incentives
- Exemption from CIT is granted on the profits and income earned in foreign currency, remitted to Sri Lanka net of expenses (considered reasonable by the tax authority), by a resident company in respect of services (including a construction project) rendered outside Sri Lanka.
- Exemption from CIT is granted on the profits and income earned in foreign currency by any resident company in Sri Lanka from the services rendered in or outside Sri Lanka in respect of any profession or vocation as is specified by the Commissioner General by notice published in the Gazette, if such profits and income (less such amount, expended outside Sri Lanka as is considered by the Commissioner General to be reasonable expenses) are remitted to Sri Lanka through a bank. As of 1 April
Sri Lanka

2011, this exemption is extended to cover any service, excluding commissions, discount, or similar type of receipts.

• Exemption from CIT is granted in respect of dividends or interest received on investments made outside Sri Lanka, provided that dividends and interest are remitted to Sri Lanka through a bank.

Other incentives

• New or existing companies that export non-traditional goods are entitled to be taxed on the profits from these exports or services at a concessionary rate of 15% for a period of 20 years, ending on 31 March 2014 and 2015, respectively. As of 1 April 2011, the applicable rate is 12%. Dividends paid by such companies out of profits earned from the exports of non-traditional goods, which are taxed at 15%, are in turn liable to tax of 10% in the hands of corporate shareholders where the income tax is already withheld from the dividends (see the Withholding taxes section).

• Exemption from CIT is granted on the profits arising from trading in shares, rights to any share, bonus, or share warrants in respect of which the share transaction levy has been charged.

• Exemption from CIT is granted on an amount equal to the interest or the discount paid or allowed to any non-resident person or to any licensed commercial bank in Sri Lanka by the issuer of any sovereign bond denominated in foreign currency, issued on or after 21 October 2008, by or on behalf of the government of Sri Lanka and on the profits and income from the sale of such sovereign bond.

• Exemption from CIT is granted on an amount equal to the interest or the discount paid or allowed to any person on or after 1 April 2009, on any Sri Lanka Development Bond denominated in United States dollars, issued by the Central Bank of Sri Lanka and on the profits and income from the sale of such Sri Lanka Development Bond.

• Exemption from CIT is granted on the profits and income derived by or accruing to any person or partnership from investment in Economic Resurgence Certificates, utilising money lying to credit of any account opened in any commercial bank or in any specialised bank with the approval of the Central Bank of Sri Lanka from and out of monies deposited in such account on or after 1 February 2009.

Withholding taxes

Resident companies are entitled to withhold income tax at 10% of gross dividends payable to any shareholder that is chargeable with CIT, excluding any dividend received from another resident company and any dividend that is exempt from CIT.

Any person in Sri Lanka who pays or credits to a person or partnership outside of Sri Lanka any sum due as interest, rent, ground rent, royalty, or annuity is required to withhold income tax at a rate of 20% of the sum, but the requirement to withhold income tax does not apply to interest not sourced in Sri Lanka or to interest on any loan or advance made by a banker or to interest paid on foreign currency held in an account with a foreign currency banking unit.

In particular instances, the tax authority may prescribe that CIT be withheld at a rate other than 20%, or the rate may be reduced for sums falling due as interest or royalties in respect of persons resident in countries with which Sri Lanka has double taxation treaties in force. Sri Lanka-source income from loan interest or royalties accruing to a non-resident company is taxed at a flat 20%, in the absence of a lower rate in the tax treaty with the home country of the non-resident.
Every bank and financial institution is required to withhold income tax at 10% on the amount of any interest paid to a company on any sum of money deposited with it. The depositor is entitled to receive a certificate setting out the gross amount of interest, the amount of tax withheld, and the net amount of interest paid. With respect to Treasury bills and Treasury bonds issued by the Central Bank, the WHT rate of 10% applies to an investor from any country.

Prior to 1 April 2011, every person or partnership that paid a fee to another person or partnership in consideration for services rendered by the latter in the course of any business, profession, vocation, or activity of an independent character was required to withhold income tax at 5% of such fee and furnish a certificate to the payee similar to that described above. The WHT requirement was extended to any commission, brokerage fee, or other income of a like nature, and also to any payment for supply of an article on contract through a tender or quotation. As of 1 April 2011, the 5% WHT has been abolished.

10% WHT on rent, lease rent, or other payment for the use or occupation of any land or building has also been abolished as of 1 April 2011.

### Notes

1. 0% for copyright royalties.
2. 0% in certain circumstances.
3. 50% of normal tax, which is 7.5%.
4. These treaties are limited to the avoidance of double taxation of income from international transport by air.

### Tax administration

#### Returns

A tax year is any period of 12 consecutive months reckoned from 1 April in any calendar year to 31 March of the following year.

#### Payment of tax

Sri Lanka has a pay-and-file system under which the CIT payable for each tax year is required to be paid in four instalments, on or before 15 August, 15 November, and 15 February of the tax year and 15 May immediately following the end of the tax year. If each instalment is not less than one-quarter of the CIT payable for the tax year immediately preceding, the balance of any CIT payable may be paid on or before 30 September immediately following the end of the tax year without incurring penalties.

**Significant developments**

As of 1 January 2011, the Swaziland Revenue Authority was established. This Authority amalgamated the Department of Customs and the Department of Taxes. Although no amendments were made to their corresponding governing legislation, the letter of the law is being applied with a policy of zero tolerance for non-compliance.

**Taxes on corporate income**

All companies within Swaziland are taxed on income at a flat rate of 30%.

**Corporate residence**

Income tax is levied on all income derived from sources generated within or deemed to be generated within the country, irrespective of whether the recipient of the income is actually resident in Swaziland.

**Other taxes**

**Sales taxes**

Sales tax is levied at a rate of 14% (25% for liquor and cigarettes) on goods imported into Swaziland and on the first sale of goods manufactured for sale in Swaziland. Customs and excise duties are also imposed on such goods. The 14% sales tax is also applicable to most professional services.

**Customs duties**

Swaziland has a provision for customs duties for various goods imported into the country. Details are available in the Harmonized Tariff Schedule (HTS).

**Excise duties**

Swaziland has an excise duty provision for various goods manufactured in the country.

</tbody>
</table>

**Transfer taxes**
Transfer taxes are applied on a variable rate basis to property transfers based on the fair market value of the property being transferred.

**Stamp taxes**
Swaziland has a provision for stamp taxes on various documents. The tax is determined either by way of a set fee or on a sliding scale percentage basis.

**Branch income**
Income tax on registered branch profits is calculated as for a resident company, and a branch profits tax of 15% is assessed for deemed repatriated income. In practice, however, branches are rare since most foreign companies incorporate local subsidiary companies.

</tr>
</tbody>
</table>

**Income determination**

**Inventory valuation**
Inventory valuation is not specific but is effectively at the lower of cost (i.e. first in first out (FIFO) or average cost) and net realisable value.

**Capital gains**
Capital gains are not subject to income tax, provided it can be demonstrated that the gains are of a capital and not an income nature (i.e. not recurring transactions).

**Inter-company dividends**
Inter-company dividends are not subject to income tax.

**Stock dividends**
Stock dividends are paid out of taxed profits. Such dividends are not subject to income tax when received by a local company, but they are subject to taxation in the hands of local individual taxpayers at the rate of 10%.

**Foreign income**
Foreign income is not subject to income tax unless it is deemed to be from a Swaziland source.
Deductions

Accrued expenses
Expenses incurred in earning income during the year, regardless of whether such expenses were actually paid or not within that year, qualify for deduction in that year, provided they are not of a capital nature.

Depreciation
Depreciation (wear-and-tear) allowances, calculated by the net-reducing-balance method, are available as follows:

<table>

For the first year after the addition of an asset, the wear-and-tear allowance is calculated on a monthly basis. With respect to leased assets, the lessor's claim for wear-and-tear allowance is usually spread over the lease period.

An initial allowance of 50% is granted for plant and machinery used in a manufacturing process, including hotel equipment. An initial allowance of 50% is also granted for industrial buildings used for manufacturing purposes and hotels, together with a 4% annual allowance.

Bad debt
Swaziland does allow a deduction for bad debts, subject to the Commissioner's approval and provided that the debts were included in the taxpayer's income in the year of assessment or in years past.
Swaziland

**Charitable contributions**
Subject to the Commissioner’s approval in regard to the amount allowable as a deduction in the year of grant and subsequent years, Swaziland allows a deduction for, among other things, grants made to the government for the building of schools and hospitals.

**Fines and penalties**
Fines and penalties resulting from late payment of any tax or levied as payable under any Act administered by the Commissioner will be a non-deductible expense.

**Net operating losses**
Losses may not be carried back but may be carried forward for as long as trading continues (i.e. indefinitely). If any break in trading occurs, however, the losses are forfeited.

**Payments to foreign affiliates**
Deductions may be claimed for payments of management service fees, interest, and royalties to foreign affiliates, provided the payments are made under a written agreement, are reasonable, and receive exchange control approval for transfers outside the rand monetary area. Note that this approval is routinely given without any significant delay for bona fide transactions.

---

**Group taxation**
Swaziland does not have group taxation legislation. All companies are assessed on their individual profits and losses.

**Transfer pricing regime**
Swaziland does not have transfer pricing legislation; however, under the anti-avoidance provision, the Revenue Authority will look for arm’s-length transactions.

**Thin capitalisation rules**
Swaziland does not have thin capitalisation rules.

---

**Tax credits and incentives**

**Development Approval Order**
The Minister of Finance, along set guidelines and with prior consent of the Cabinet, may nominate a business as a developmental enterprise (i.e. a business the Minister deems to be beneficial to the development of the economy) for a grant of a Development Approval Order. If approved, the business generally will be granted tax concessions, such as a lower corporate tax rate.

**Training expenditures**
Approved training schemes, resulting in a 150% tax deduction of salaries, are no longer available.

---

**Withholding taxes**
Non-resident withholding taxes (WHT) are levied as follows.

**Dividends**
WHT for dividends is payable at the rate of 15% (12.5% for companies registered in Botswana, Lesotho, and the Republic of South Africa). The rate drops to 10% under the double taxation agreement (DTA) with South Africa where the holding company owns more than 25% of the shares. Non-resident shareholders’ WHT is payable within 30 days of the date on which the dividend is payable.

**Interest**
WHT for interest is payable at the rate of 10%. Non-resident WHT on interest is payable within 14 days of the date of the accrual of the interest.

**Entertainers and sportsmen**
WHT is payable at the rate of 15% on income earned in Swaziland by entertainers and sportsmen. This tax relates only to public entertainers and sportsmen not ordinarily resident in Swaziland. The payer is required to deduct the tax and pay it within 15 days.

**Contractors or professionals**
WHT is payable at the rate of 15% on services provided by contractors or professionals in Swaziland (materials are not taxed to the extent that materials are incidental to the overall charge). The Commissioner of Taxes must be notified of any agreement relating to construction operations or professional services under which payments are made to non-resident persons within 30 days after entering into the agreement. It is required that the tax be paid within 15 days from the date of payment.

---

**Tax administration**

**Returns**
The tax year runs from 1 July to 30 June. Companies are required to have a 30 June year end unless another year end date is approved by the Commissioner of Taxes; such approval is routinely given. Income tax returns should be submitted within 30 days of 30 June unless an extension of time for submission is granted, which also is routinely given.

**Payment of tax**
Notice of the date of payment is usually given on the tax assessment.

**Provisional tax payments**
With respect to companies, provisional tax is payable in two instalments: one payment is due within six months of the company’s financial year-end, and the other payment is due no later than the last day of the company’s financial year.

The estimate of taxable income for provisional tax purposes should not be less than the taxable income assessed for the latest preceding year of assessment, for which an assessment has been issued not less than 21 days before the date the estimate is made. This rule does not apply if the taxpayer can convince the Commissioner of Taxes that the taxable income for the current year will be less than the taxable income for the preceding year.

A provisional taxpayer becomes liable to pay a penalty if the estimate for taxable income for the second payment of provisional tax is found to be both less than 90% of the taxable income as finally determined and less than the taxable income as assessed for the immediately preceding tax year.

**Significant developments**

There have been no significant corporate tax developments in Sweden during the past year.

**Taxes on corporate income**

**State (national) income tax**

Resident legal entities are liable for tax on their worldwide income unless tax treaties or special exemptions apply. Non-resident entities are taxed on income that is deemed to have its source within Sweden.

Taxable income is subject to tax at the rate of 26.3% for financial years commencing on or after 1 January 2009. The previous rate was 28%. All income of corporate entities is treated as business income.

**Corporate residence**

A company is considered to be a tax resident of Sweden if it is incorporated in Sweden.

**Permanent establishment (PE)**

The term permanent establishment (PE) is defined in Sweden as a fixed place of business through which the business is carried on from a specific establishment, such as a place of management, branch, office, factory, or workshop. Places where entrepreneurial work is carried on are also regarded as PEs if an agent or a representative who is dependent upon the foreign company habitually exercises authority in Sweden.

**Other taxes**

**Value-added tax (VAT)**

The Swedish VAT system is harmonised with the European Community rules. The general VAT rate is 25% and chargeable on most goods and services. Reduced rates apply to a few goods and services, such as food, which is taxed at the rate of 12%, and transport of passengers, which is taxed at the rate of 6%. Certain financial and insurance services are exempt from VAT.

VAT returns are filed and tax is paid monthly or quarterly. However, for companies with a turnover of less than 1 million Swedish kronor (SEK), VAT may be reported in the income tax return.
**Stamp tax**
Stamp tax at 4.25% is payable on a transfer of real estate. The tax base consists of the highest of the purchase consideration or the tax assessed value of the real estate. Stamp tax on an intra-group transfer of real estate may be deferred as long as the real estate remains within the group.

**Social fees**
Mandatory social security charges payable by employers on remuneration to employees (or by the self-employed) are levied at approximately 31%. Reduced rates apply for very young or old people. Social security charges are deductible for corporate tax purposes.

Pension benefits beyond the mandatory system are customary amongst most Swedish employers. A special salary tax is levied at approximately 24% on these additional pension premiums/commitments and is deductible for corporate tax purposes.

**Real estate tax**
The real estate tax rate on business premises is 1% of the tax assessed value. For industrial property, the tax rate is 0.5%. Other rates exist for special property.

**Branch income**
Branch income (i.e. PE income) is taxed at the corporate tax rate of 26.3%, and general corporate tax rules apply for branch offices in Sweden. No withholding tax (WHT) is levied on the outbound repatriation of taxed profits.

The receipt of Swedish source royalties or fees for use of tangible or intangible assets by a foreign resident is also (subject to treaty restrictions) regarded as a special form of PE income.

**Income determination**

**Inventory valuation**
Inventories (stock-in-trade) are valued at acquisition cost or market value, whichever is lower. As an alternative, inventories may be valued at 97% of the total acquisition cost, which is determined on a first in first out (FIFO) basis. Last in first out (LIFO) is not permitted. Generally, inventories should be stated at the same amount for tax and accounting purposes.

**Capital gains**
There is a capital gains tax exemption for Swedish corporate entities on gains related to the disposal of shares held for business reasons. This abolishment of capital gains taxation for corporations, under the participation exemption provisions, has made Sweden a favourable holding company location.

Note that non-tax-exempt capital gains are included in business income and taxed at the corporate tax rate.

Shares in Swedish corporations as well as in foreign companies can qualify as shares held for business reasons. Unquoted/unlisted shares will always be considered as held for business reasons. Quoted/listed shares are considered held for business reasons provided that the company has a holding corresponding to at least 10% of the voting rights or the shares are held in the course of the business. An additional condition
Sweden

regarding quoted/listed shares is that the shares must be held for a period of at least one year.

An exception from the capital gains tax exemption applies for the sale of shares in a ‘shell company’, which is a company or partnership where the market value of cash, shares and other marketable instruments (other than shares held for business reasons), and similar assets exceeds 50% of the consideration paid for the shares. The sale of a shell company results in harsh taxation of the gross consideration. Provided certain formalities are fulfilled, however, it is possible to avoid such taxation.

A consequence of the participation exemption is that capital losses on shares or participations held for business reasons are not deductible.

Capital losses on portfolio holdings of shares, share options, convertible debentures, and similar financial instruments are allowed only as an offset to capital gains on the same group of financial instruments.

Certain special rules apply to computation of capital gains and losses on real estate.

As of 2010, participation in partnerships (tax transparent entities) are included in the capital gains tax exemption regime (making losses non-deductible), including qualifying indirect holdings via a partnership.

**Dividend income**
A participation exemption will apply for dividends received on shares held for business reasons (see above) and on qualifying holdings via partnerships. The requirement of a minimum holding period for a holding of quoted/listed shares can be fulfilled retroactively.

**Foreign income**
Companies resident in Sweden are taxed on their worldwide income. Non-resident entities are taxed on income that is deemed to have its source within Sweden.

A Swedish corporation is taxed on foreign branch income. Double taxation normally is avoided by means of either a deduction for foreign tax, or a foreign tax credit.

Dividends and capital gains from foreign subsidiaries are generally exempt from taxation according to the participation exemption provisions applicable to shares held for business reasons (see above).

**Deductions**

**Depreciation, amortisation, and depletion**

Depreciation on fixed assets
Land improvements may be depreciated at the rate of 5% per year of the acquisition cost. The maximum allowance is 100% of the tax basis of the improvement.

Buildings may be depreciated at rates between 2% and 5% per year of the taxable basis, depending on type and usage of the building. The maximum allowance is 100% of the tax basis of the building.

For machinery, equipment, and motor vehicles, the depreciation for tax purposes should correspond to the depreciation charged in the books and accounts, as long as the
total net value of the assets is not less than the 70% of net value in previous accounts plus additions less proceeds of sales (i.e. 30% declining balance depreciation) or cost less 20% per year (i.e. 20% straight-line depreciation on remaining assets).

Immediate deduction of certain assets
The cost of assets having an expected life of not more than three years and the cost of assets not exceeding certain levels, depending on size of operations, may be deducted immediately. Certain costs for repairs, maintenance, and modifications of buildings may also be deducted immediately.

Amortisation of intangibles and goodwill
The amortisation of patents, leaseholds, and goodwill follows the same rules as depreciation for machinery, equipment, and motor vehicles (see above).

Depletion of mines and quarries
The entire cost of mines and quarries may be depleted over their expected exploitation period. These depletion amounts may be deducted annually but are limited to 100% of the acquisition cost of the mine or quarry.

Taxes
Generally, Swedish taxes are not deductible for tax purposes. However, specific taxes, fees, and foreign taxes may be deductible. Recoverable VAT is not treated as an expense or cost.

Net operating losses
Tax losses may be carried forward indefinitely, subject to restrictions or forfeiture upon ownership changes, mergers and demergers, dispositions with creditors, and certain other reorganisations. No carryback of losses is possible.

Payments to foreign affiliates
Transactions with an affiliate not liable for tax in Sweden must be at arm’s length. Formal transfer pricing documentation requirements apply since 1 January 2007.

In 2009, Sweden enacted anti-debt push down provisions under which a deduction is not allowed for interest payments on any intra-group loans for the acquisition of shares from an affiliate, unless the creditor is taxed on the interest income at a rate of at least 10% or it is shown that the share transfer and the debt is based on commercial reasons. Note that loan agreements signed prior to 2009 are covered by these new provisions.

Group taxation
Swedish companies are not taxed on a consolidated basis. However, it is possible for qualifying groups (i.e. a holding of greater than 90% of the capital which must have been owned during the whole fiscal year) to effectively offset operating losses of one Swedish company against operating profits of another Swedish company by way of group contributions, which are tax deductible for the contributor and taxable for the recipient. European Economic Area (EEA) companies are regarded as Swedish companies for these purposes, if the recipient is taxable in Sweden.

A similar Swedish deductibility is, under certain circumstances, also available for cross-border consolidation within the EEA for final subsidiary losses.
Sweden

**Transfer pricing**
The Swedish transfer pricing regime is generally an Organisation of Economic Co-operation and Development (OECD) type of regime.

**Thin capitalisation**
There are no thin capitalisation rules for tax purposes in Sweden.

**Controlled foreign company (CFC) legislation**
Sweden's CFC provisions aim at taxing a Swedish resident shareholder for shareholdings in low-taxed foreign entities. A Swedish resident shareholder with a holding in a CFC-entity will annually be taxed for its ownership portion of the CFC's income, according to provisions applicable to a Swedish corporation. For a corporation, the portion will be taxed at the Swedish corporate tax rate. Only holdings, direct or indirect through other foreign entities, corresponding to at least 25% (capital or voting rights) in the foreign entity could lead to CFC taxation. A foreign company is considered lowly taxed if the income in the company, calculated in accordance with Swedish provisions, is taxed at a rate below 14.47%. However, if the foreign entity is resident in an 'approved country', CFC taxation should not arise. Approved countries appear in an official 'black/white' list. Active European Economic Area (EEA) entities are, under certain circumstances, excluded from CFC taxation.

**Tax credits and incentives**
There are no specific tax incentives in Sweden for corporations. However, some generally applicable regimes exist.

For example, Sweden has an accruals reserve regime. The accruals reserve regime allows for a tax-deductible appropriation for corporations of 25% of the taxable profit before appropriation to a reserve. Each year's appropriation forms a separate reserve that must be reversed to income no later than the sixth year following the appropriation. However, a standardised interest income is imposed on former years' appropriations at 72% of the interest rate on governmental debt notes.

**Foreign tax credit**
A foreign tax credit is generally available, provided certain conditions are fulfilled, but the tax credit allowed is always limited to an amount corresponding to the Swedish tax on the foreign income in question. Tax treaty implications may exist.

**Withholding taxes**
There are no Swedish taxes on interest and service fees paid to non-resident corporations or individuals. Such payments to resident corporations and individuals are taxed as ordinary income.

WHT on dividends, royalties, and certain rentals vary according to domestic law and tax treaties, as shown below.

Apart from the highlighted treaties, Sweden has concluded agreements on exchange of information in tax matters and partial tax treaties with many tax haven jurisdictions.

**Notes**

1. According to domestic law there is no WHT on dividends to a foreign company on shares held for business reasons (for the definition of shares held for business reasons, see Capital gains in the Income determination section), provided that the foreign company is similar to a Swedish limited liability company (and some other legal entities) and is subject to income tax at similar level to that imposed on a Swedish company. Further, there is no tax liability for a legal entity of a member state of the European Union if the entity owns 10% or more of the share capital in the distributing company and fulfils the conditions of the Directive (90/435) regarding parent company and subsidiaries.

2. The reduced rate shown before a stroke (/) refers to payments to corporations having requisite control. Where appropriate, the particular treaty should be consulted to see whether the reduced rate is applicable.
3. Swedish source royalties and certain rental fees are treated as a special form of PE, taxable at the corporate tax rate, subject to treaty reduction or waiver. Royalties paid from Sweden to a company within the European Union should not be taxed in Sweden if one of the companies holds at least 25% (capital) of the other, or where there are two companies concerned, at least 25% are held by another company within the European Union. Indirect participation does not benefit from the legislation. Both the payer and the recipient must be legal entities under the EU directive.

4. Payments to resident corporations and individuals are taxed as ordinary income. Only resident banks and similar entities are required to withhold tax on payments of cash dividends to resident individuals.

5. Royalties and certain rentals paid by Swedish licensees are treated as business income taxable in Sweden and do not incur WHT (see Note 3).

6. Note also the domestic provision stating a 0% WHT on dividends distributed on shares held for business reasons to qualifying entities (see Note 1).

7. Dividends: 10% of the gross amount if the company receiving the dividends owns at least 25% of the foreign company’s capital. Royalties: of the gross amount paid for the use of, or the right to use:
   - News: 3%.
   - Copyright of literary, dramatic, musical, or other artistic work: 5%.
   - Any patent, trademark, design or model, plan, or secret formula or process; industrial or scientific equipment or information concerning industrial, commercial or scientific experience; payments for the rendering of technical assistance: 10%.
   - All other cases: 15%.

8. Royalties are normally taxable only in the recipient’s home country. However, where the royalty is paid by a Swedish legal entity that is more than 50% owned by one Austrian recipient, entity or individual, the tax in Sweden is a maximum of 10%.

9. Literary, artistic or scientific royalties: 0%; other royalties: 5%.

10. Royalties for use of industrial, commercial, or scientific equipment: 5%; with respect to patents, secret formulas or processes, or for information concerning industrial, commercial, or scientific experience: 3%; other royalties: 10%.

11. Royalties for use of copyright and literary, dramatic, musical, and artistic royalties: 0%. Other royalties: 10%. (Treaty should be consulted).

12. The treaty has effect on income derived on or after 1 January 2006.

13. The double taxation treaty does not include Hong Kong.

14. The same treaty is applicable to the Czech Republic and the Slovak Republic.

15. According to the Nordic multilateral tax treaty.

16. Dividends are exempt from tax if the recipient of the dividends is a company directly owning at least 10% of the capital of the company paying out the dividends. Certain rentals are subject to tax if there is a PE in a country other than the home country and the claim is connected with the business carried on from the PE. Concerning Iceland, dividends are normally exempt from tax for companies, but the tax rate is 15% if the dividends have been deducted from the income of the distributing company.

17. Royalties for the use of industrial, commercial, or scientific equipment: 5%; other royalties: 10%.

18. Royalties with respect to patents, secret formulas or processes, or for information concerning industrial, commercial, or scientific experience: 5%; other royalties: 12.5%.

19. Royalties for the use of industrial, commercial, or scientific equipment or for information concerning industrial, commercial, or scientific experience: 10%; other royalties: 15%. (Treaty should be consulted.)

20. Literary, artistic, or scientific royalties including films: 15%; other royalties: 10%. (Treaty should be consulted.)

21. Royalties with respect to patents, secret formulas or processes, or for information concerning industrial or scientific experience: 5%; other royalties: 15%.

22. Commercial royalties, including films: 20%; copyright, literary, dramatic, musical, or artistic royalties: 0%.

23. Commercial royalties, including films: 15%; literary, dramatic, musical, or artistic royalties: 5%.

24. Literary, artistic, scientific, or film royalties: 10%; other royalties: 7%.

25. Royalties with respect to patents, designs or models, secret formulas or processes, or for information concerning industrial or scientific experience or for the use of industrial, commercial, or scientific equipment involving a transfer of know-how: 5%; other royalties: 15%.

26. The treaty is applicable to all republics and autonomous provinces of the former Yugoslavia with the exception of Macedonia, with which Sweden has concluded a bilateral treaty.

---

**Tax administration**

**Returns**

If the income is derived from business, the basis for tax assessment is the financial year. The year-end for a company may be fixed at any of the following dates: 30 April, 30 June, 31 August, or 31 December. Another year-end can be used if special permission by the tax agency is requested and granted. Swedish subsidiaries of foreign parents are generally permitted to adopt the same year-end as the parent company, provided it ends on the last day of the month.
Sweden

Every corporate entity or registered branch must file an annual corporate income tax return, which generally should be filed by 2 May each year, covering the financial year ending during the preceding calendar year. An extension may be available. The annual assessments are made by the local tax offices during the calendar year following the income year and should be completed by the end of November. VAT returns and employer returns (employee Pay As You Earn (PAYE) and employer withholding) are normally due on a monthly basis.

**Income tax payments**
Income taxes are collected during the year in which the income is earned, under a preliminary tax system. A corporate entity's preliminary tax liability is determined by a preliminary tax assessment based either on the latest available final tax assessment or on a preliminary tax return filed by the company. The preliminary taxes are payable in monthly instalments. Interest surcharges on underpayment of preliminary taxes, however, generally apply from 12 February the year after the financial year (the assessment year). Any balance owed by the taxpayer is payable in 90 days after the assessment has been made. Normally, any balance owed to the taxpayer is refunded in December of the assessment year.

**Tax penalty**
A taxpayer that submits incorrect or insufficient information in a tax return is charged a penalty amounting to up to 40% of the tax which, if the incorrect information had been accepted, would have been imposed or credited. The penalty and the rate may vary depending on the type of the incorrect information given.

**Appeals**
Taxes are assessed by the tax agency. Depending on the circumstances, reassessments and/or appeals generally can be initiated within one and five years after the assessment year. Appeals can be made to the administrative court, and onwards to the administrative court of appeal, and in case of granted trial dispensation, onwards to the supreme administrative court.

Significant developments

Corporate tax reform II
Although the corporate tax reform II (CTR II) was, in general, put into force as of 1 January 2009, the following significant amendments entered into force as of 1 January 2011:

Extension of participation relief on dividend income
The thresholds to obtain participation relief on dividend income after the effective date of 1 January 2011 were reduced to a participation of at least 10% from the prior 20% of capital, or a market value of at least 1 million Swiss francs (CHF) instead of the prior CHF 2 million (see Participation relief in the Income determination section).

Extension of participation relief on capital gains on the sale of investments
After the effective date of 1 January 2011, at a federal corporate income tax (CIT) level, limited companies and cooperatives desiring participation relief on capital gains must sell an interest of at least 10%, instead of the prior 20% requirement. The minimum holding period of one year remains unchanged. Even though voluntary, most cantons grant the participation relief on capital gains derived from the sale of investments (see Participation relief in the Income determination section).

Introduction of the capital contribution principle
The change from the nominal principle to the capital contribution principle entered into force as of 1 January 2011. It allows repayment of shareholders’ capital contributions without liability for Swiss withholding tax (WHT) at the level of the distributing company and without income tax at the level of the Swiss individual shareholder (holding the shares in one’s private assets). According to the transition period, capital contributions are qualifying if accumulated after 31 December 1996 and meeting some further requirements (e.g. timely recordings in the statutory books and vis-à-vis the tax authority; see Introduction of the capital contribution principle in the Withholding taxes section).

Relief on intra-group financing
Improvements regarding intra-group financing were implemented effective on 1 August 2010. According to the new standards, liabilities to group (affiliated) companies, regardless of their terms, their number, or their amount, are, on constitution, no longer subject to issuance duty, and the interest on them is no longer subject to WHT (to this extent abolition of the so-called 10/20 lender rule). With this revision, Switzerland will be much more attractive in tax respects for inter-company financing activities for international groups, in particular for cash pooling activities (see Issuance stamp tax in the Other taxes section).
Switzerland

New value-added tax (VAT) rates as of 1 January 2011
As of 1 January 2011, the Swiss VAT rates were temporarily increased in order to support the solvency of disability insurance. The increase is limited to seven years. The regular rate has increased by 0.4% to 8%, the privileged rate by 0.1% to 2.5%, and the special rate by 0.2% to 3.8% (see Value-added tax in the Other taxes section).

Taxes on corporate income
Resident companies are subject to CIT on their worldwide income levied at three levels, the federal, cantonal, and communal level.

Federal level
Switzerland levies a direct federal CIT at a flat rate of 8.5% on profits after tax (i.e. taxes are deductible from the tax basis in Switzerland, consequently, the tax rate on income before taxes amounts to approximately 7.83%). At a federal level, no corporate capital tax is levied.

Cantonal/communal level
In addition to the direct federal CIT, each canton has its own tax law and levies cantonal and communal (municipal) income and capital taxes at different rates. Therefore, the tax burden of income (and capital) varies from canton to canton. Some cantonal and communal taxes are imposed at progressive rates.

Overall tax rates
As a general rule, the overall approximate range of the maximum effective CIT rate on profit for federal, cantonal, and communal taxes is between 12.7% and 24.2%, depending on the company’s location.

Income attributable to permanent establishments (PE) or immovable property located abroad is excluded from the Swiss tax base and only taken into account for rate progression purposes in the cantons that still apply progressive tax rates.

Corporate residence
A company is considered resident in Switzerland if its place of incorporation is in Switzerland. Residency is also linked upon the place of effective management, which may be the centre from which day-to-day activities are directed or the place from which managerial decisions are made.

Other taxes
Value-added tax (VAT)
In 2009, a new Swiss VAT law was approved by the Swiss Parliament and put in force effective as of 1 January 2010. The new VAT law features a noticeable simplification of the system, enhances transparency, is more customer-friendly, and aims at providing more legal certainty.

As a matter of principle, proceeds of sales and services conducted in Switzerland are subject to VAT at the standard rate of 8%. However, goods for basic needs are subject to VAT at the rate of 2.5%, and services in connection with the provision of lodging are subject to VAT at the rate of 3.8%. A registered taxpayer generally is entitled to offset
the amount of VAT charged by suppliers or paid on imports against the VAT payable. These rates represent a temporary increase that went into effect as of 1 January 2011 in order to support the solvency of disability insurance. The increase is limited to seven years.

Prior to 1 January 2011, the regular rate was 7.6%, the privileged rate was 2.4%, and the special rate was 3.6%.

**Capital tax**

Corporate capital tax is only levied at a cantonal but not at a federal level. It is based on the corporation's equity (i.e. the taxable equity corresponds to the sum of nominal capital, paid in surplus, retained earnings, other equity reserves, and — according to Swiss thin capitalisation rules — potential deemed equity). Tax rates vary from 0.001% to 0.5288%. Reduced rates are applicable for companies subject to a special cantonal tax regime (e.g. holding companies, mixed trading companies).

As a result of the CTR II, the cantons may now choose to credit CIT to the capital tax in order to reduce the overall tax burden *(for more information in connection with the CTR II in general, see Corporate tax reform II in the Significant developments section).*

**Issuance stamp tax**

Issuance stamp tax (often known as capital duty) on the issue and increase of the equity of Swiss corporations is levied at the rate of 1% on the fair market value of the assets contributed, with an exemption on the first CHF 1 million of capital paid in, whether it is made in an initial or subsequent contribution.

A tax ruling may be obtained to exempt a multitude of transactions from issuance stamp tax. In particular, special rules allow for most reorganisations to take place on a tax neutral basis. In addition, an existing non-resident company may generally transfer assets to Switzerland without incurring Swiss issuance stamp tax. However, if the company was formed abroad and re-domiciled to Switzerland exclusively or mainly in order to avoid Swiss stamp taxes, the issuance stamp tax may apply.

Issuance stamp tax is further payable with respect to the following instruments:

- Bonds, which are defined for the purposes of this tax as bonds, promissory notes issued in sequence and similar paper, discount paper, and any other evidence of indebtedness in the form of a debt security or traded as if there were a debt security which is intended for public placement as well as participations in loans granted to Swiss debtors.
- Money market papers, which are identical instruments to bonds with a fixed term of not more than 12 months, issued by a Swiss body.

Effective on 1 August 2010, improvements regarding intra-group financing were implemented. According to the new standards, liabilities to group (affiliated) companies, regardless of their terms, their number, or their amount, are, on constitution, no longer subject to issuance duty, and the interest on them is no longer subject to WHT (to this extent abolition of the so-called 10/20 lender rule). Consequently, Switzerland will be much more attractive in tax respects for inter-company financing activities for international groups, in particular for cash pooling activities. Due to tax evasion reasons, these rules are, however, not available for a domestic group company, which guarantees a bond issued by a foreign group company. These amendments were prioritised by singling out from the pending (new) Corporate tax reform III, which, however, stagnated some time ago.
Switzerland

The following tax rates apply:

- 0.12% of the nominal value for each year or part thereof up to the maturity of a bond.
- 0.06% each year on the same basis for sub-participations and medium term bonds.
- 0.06% each year on commercial paper with the face value calculated at 1/360th for each day on which such paper is outstanding.

**Securities transfer stamp tax**

Swiss securities transfer stamp tax (often called ‘securities turnover tax’) is levied on the transfer of Swiss and foreign securities in which Swiss securities dealers participate as contracting parties or as intermediaries. The ordinary tax rate of Swiss securities transfer stamp tax is 0.15% for securities issued by a tax resident of Switzerland and 0.3% for securities issued by a tax resident of a foreign country.

Swiss securities dealers are defined as any person professionally engaged in the buying or selling of securities for one’s own account or for another person, including Swiss banks and other Swiss bank-like institutions. The definition also includes companies holding taxable securities whose book value exceeds CHF 10 million and remote members of a Swiss stock exchange with regard to Swiss titles, which are quoted on the Swiss stock exchange.

Taxable securities include, but are not limited to, shares (including participations, i.e. main interests in other companies) and bonds. Options and many other derivative instruments are not subject to Swiss securities transfer stamp tax. However, the exercise of such financial instruments or derivatives may result in a taxable transfer of a security.

Various transactions are exempt from Swiss securities transfer stamp tax. Generally, no Swiss securities transfer stamp tax is levied in the case of a merger or a reorganisation in which a Swiss securities dealer is involved and taxable securities (including participations) are transferred. Furthermore, the merger law also states an exemption from Swiss securities transfer stamp tax in case of a replacement of a participation. This is particularly important for holding companies, which qualify as Swiss securities dealers.

---

**Branch income**

The same tax principles that apply for non-resident corporations also apply for Swiss branches, provided that transactions with the head office or other branches are at arm’s length. There is no Swiss WHT on profit transfers to the head office.

---

**Income determination**

The statutory accounts of a Swiss company (or in the case of a non-resident company, the branch accounts) serve as the basis for determining taxable income. There are generally very few differences between statutory profit and taxable profit apart from the participation relief for dividend and capital gains income (see below), adjustments required by tax law, and the usage of existing tax loss carryforwards (see Net operating losses in the Deductions section).
Participation relief

Participation relief is the name generally attributed to the tax relief received for qualifying dividend and capital gains income of a company. Participation relief is not an outright tax exemption, but rather a tax abatement mechanism. It is therefore also commonly referred to as 'participation deduction'.

Participation relief is a percentage deduction from CIT that is equal to net participation income divided by taxable income. Net participation income consists of the gross participation income from qualifying dividends and (usually) qualifying capital gains income less related administration and financing costs and any depreciation of the participation that is linked to the dividend distribution. In most cases, participation relief results in a full exemption of participation income from federal CIT, or one close thereto. Note that participation relief may be diluted in certain cases (e.g. if loss carry forwards are offset).

The participation relief on dividend income is mandatory at the federal CIT as well as on the cantonal/municipal level. The participation relief on capital gains is voluntary for cantonal/municipal purposes but nevertheless implemented by most cantonal tax acts. Specific privileged cantonal/municipal tax regimes may foresee more favourable rules for dividend income and capital gains than the participation relief (see Privileged cantonal tax regimes in the Tax credits and incentives section).

Dividend income

As of 1 January 2011, dividends qualifying for participation relief are those from participations representing at least 10% of the share capital or 10% of profits and reserves of another company or those having a market value of at least CHF 1 million. Prior to 1 January 2011, the thresholds were 20% of the share capital of another company or a market value of at least CHF 2 million. Note that there is neither a minimum holding period nor a requirement that the dividend paying subsidiary is liable to income tax in its jurisdiction of residence.

Capital gains income

As of 1 January 2011, capital gains derived from the disposal of a qualifying participation are entitled to participation relief if the following conditions are cumulatively met:

- The participation sold was owned by the company for a period of at least one year.
- The amount sold constitutes at least 10% of the share capital or 10% of profits and reserves of the underlying subsidiary. Partial sales of residual holdings of less than 10% are possible, provided their market value at the beginning of the year still amounted to at least CHF 1 million.

Prior to 1 January 2011, the threshold was 20% of the share capital of the underlying subsidiary.

It is noteworthy that capital gains are only entitled to participation relief to the extent the sales price exceeds the original investment costs of the participation, whereas the so-called 'recaptured depreciation' (i.e. the amount of former depreciations) is taxable.

Foreign income

Swiss tax resident corporations are basically taxed on their worldwide income. However, income attributable to a foreign PE outside Switzerland is not taxed in Switzerland but may be taken into account only to determine the rate of tax applicable to taxable income. The same rule applies for income from real estate situated abroad.
Switzerland

Dividends, interest, and royalties from Swiss or foreign sources are included in assessable income. However, in certain cantons, special methods of assessment may apply for dividend and other income originating outside Switzerland. For dividend income, a relief generally is available at a federal income tax level as well as at a cantonal level (see Participation relief above). The irrecoverable portion of foreign WHT of most treaty countries can be credited against the related Swiss income taxes on the same income. Foreign WHT of all non-treaty countries generally are not creditable, but they are deductible for income tax purposes.

There are no controlled foreign company (CFC) rules in Switzerland. Consequently, undistributed income of foreign subsidiaries is usually not taxed in Switzerland (see Controlled foreign company (CFC) regime in the Group taxation section).

**Foreign exchange gains**
Realised foreign exchange gains are included in the tax basis of a corporation as taxable. Based on a recent federal court decision, for which applicability for a specific case has to be reviewed, unrealised gains (or losses) resulting from the translation of financial statements in a foreign (functional) currency to CHF may not be taxable (respectively tax deductible).

**Deductions**
The statutory accounts of a Swiss company are the basis for determining taxable income. To be tax deductible, an expense has to be booked in the statutory accounts accordingly.

In principle, it can be said that all business expenses that are booked in the statutory accounts are tax deductible assuming they are economically justified from a tax perspective. If an expense is not a justifiable business expense in the sense of the tax law, it will be added back to taxable income. Examples typically include excessive depreciation, non-justified payments to related parties (e.g. hidden profit distributions), etc.

**Depreciation**
Maximum depreciation/amortisation rates allowed for tax purposes are issued by the Federal Tax Administration. Higher depreciation/amortisation is allowed for tax purposes if the taxpayer can prove that such higher depreciation/amortisation is required from a statutory accounting perspective. Some cantons follow the federal guidelines, whereas some cantons apply and/or have published their own (more liberal) applicable depreciation/amortisation rates.

The following summary of the rates specified by the Federal Tax Administration provides the general range of allowable depreciation:

<table>
<thead>
<tr>
<th>Assets</th>
<th>Declining balance (%)</th>
<th>Straight-line (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Commercial buildings</strong></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Buildings alone</td>
<td>4</td>
<td>2</td>
</tr>
<tr>
<td>Buildings and land combined</td>
<td>3</td>
<td>1.5</td>
</tr>
<tr>
<td><strong>Equipment</strong></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Office furniture and equipment</td>
<td>25</td>
<td>12.5</td>
</tr>
<tr>
<td>Computer hardware and software</td>
<td>40</td>
<td>20</td>
</tr>
</tbody>
</table>
Some cantons (such as Zurich and Basel-City) take a more liberal approach and even permit a write-down of certain assets (including fixed assets) to 20% or nil of the purchase price in the first year, provided that such write-downs do not, in the aggregate, result in a drastic decline in taxable income or even a tax loss and are commercially justified. For this accelerated depreciation to be tax deductible, it must be booked in the statutory accounts and generally disclosed in the tax return. As the cantonal tax authorities are responsible for assessing not only cantonal/communal CIT but also federal CIT, the accelerated depreciation usually will be accepted for federal CIT purposes as well.

**Goodwill**

Only acquired goodwill (derivative goodwill) may be capitalised in the statutory accounts and amortised. Amortisation is generally allowed over five years.

**Interest expense**

Interest paid by a corporation to a third party is a deductible business expense. Interest paid to related parties (affiliates or shareholders) has to reflect the fair market rate and is subject to limitations (see *Thin capitalisation rules in the Group taxation section*).

With respect to related parties, the Federal Tax Administration annually issues safe harbour interest rates to be used on loans in CHF on the one hand and in foreign currencies on the other hand. The corporation may deviate from these safe harbour rates as long as it can prove that the rates used are at arm’s length and more appropriate in the present case. The cantons usually follow the federal guidelines.

The safe harbour rules for loans denominated in CHF applicable as of 1 January 2011 are as follows:

<table>
<thead>
<tr>
<th>For loans made to related parties</th>
<th>Minimum interest rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Financed from equity</td>
<td>2¼</td>
</tr>
<tr>
<td>Financed from debt (actual costs plus at least):</td>
<td></td>
</tr>
<tr>
<td>On amount up to CHF 10 million</td>
<td>½</td>
</tr>
<tr>
<td>But in all cases at least</td>
<td>2¼</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>For loans made to related parties</th>
<th>Maximum interest rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Type of loan</td>
<td>Home construction / agriculture</td>
</tr>
<tr>
<td>Real estate loans</td>
<td>2</td>
</tr>
<tr>
<td>A loan up to the amount possible for mortgage (i.e. 2/3 of the market value of the real estate)</td>
<td></td>
</tr>
<tr>
<td>Rest, whereby the following maximum interest rates for debt are applicable:</td>
<td>2 ¾</td>
</tr>
<tr>
<td>Land, villas, residences, vacation houses, business premises up to 70% of the market value</td>
<td></td>
</tr>
</tbody>
</table>
Switzerland

<table>
<thead>
<tr>
<th>For loans made to related parties</th>
<th>Maximum interest rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Type of loan</td>
<td>Home construction / agriculture</td>
</tr>
<tr>
<td>Other real estate up to 80% of market value</td>
<td></td>
</tr>
<tr>
<td>Operational loans</td>
<td></td>
</tr>
<tr>
<td>Made to trading and production companies</td>
<td>–</td>
</tr>
<tr>
<td>Made to holding and asset administration companies</td>
<td>–</td>
</tr>
</tbody>
</table>

*In calculating the amount of the maximum interest permissible from a tax perspective, any potentially existing hidden equity (under Swiss thin capitalisation rules) has to be considered.

**Royalties**

Royalty payments are generally deductible for tax purposes as long as the royalty rate is at arm’s length.

**Bad debt provision**

Based on a longstanding but not published practice, it is admissible in Switzerland to set up an accounting provision for specific impaired debts, which will be accepted for tax purposes. Unlike most other countries, it is also possible in Switzerland to set up an additional (‘lump sum’) bad debt provision of 5% on all domestic and 10% on all foreign receivables (i.e. after deduction of specific impaired debts), except for inter-company receivables and receivables to the public, enabling the taxpayer to defer the related tax liability until this provision has been released. Some cantons, such as Zurich, accept an even higher reserve (i.e. 10% on domestic and 20% on foreign receivables). This additional bad debt provision may have the character of a ‘hidden’ (i.e. undisclosed) reserve and is possible to build because the Swiss accounting standards favour prudence over true and fair view accounting principles.

**Obsolete inventory provision**

Similarly to the bad debt provision, it is also possible to build a ‘hidden’ (i.e. undisclosed) reserve on a company’s inventory. This provision, which must also be booked in the statutory accounts, is accepted for tax purposes (similar to the bad debt provision). Specifically, a company may build a provision for obsolete inventory as well as a hidden reserve on 33.3 % of the inventory value after deduction of the obsolete inventory.

**Costs of employee share plans and stock option plans**

The cost of employee share plans and stock option plans are generally deductible, assuming the employees eligible for the plan are employed by the Swiss company. The same holds true for the recharge of costs for plans covering local employees.

**Charitable contributions**

At a federal level, charitable contributions up to 20% of the net profit of a company are tax deductible, if certain criteria are met. In particular, the charitable contribution has to be remitted to (i) Swiss legal entities which are exempt from taxation based on their public welfare or exclusively charitable objective or to (ii) the Swiss Federation, a Swiss Canton or Municipality, or their agencies (‘Anstalten’). The cantons usually apply the same rules and similar thresholds.

Sponsoring contributions are only tax deductible if commercially justified (without specific thresholds).
**Fines and penalties**
Under Swiss tax law, tax fines are usually not tax deductible. The potential tax deductibility of other fines or penalties has to be analysed with respect to the specific case.

**Tax expenses**
Corporate income and capital taxes paid to Switzerland as well as to the cantons and the municipalities are tax deductible.

**Net operating losses**
Losses may be carried forward for at maximum seven tax years and offset from the preceding seven years’ taxable profits. There is no carryback of losses.

**Payments to foreign affiliates**
Management and services fees paid by a Swiss company to a related party are generally tax deductible as long as the fees are at arm’s length.

---

**Group taxation**
Tax is levied on each corporation as a separate entity. A parent company and its Swiss subsidiaries are taxed separately, and only the dividends from the subsidiaries (but not their profits) are taxable in the parent company’s hands. However, usually for dividend income, the participation relief is applicable *(see Participation relief in the Income determination section)*. As a result, in general, there are no rules on group consolidation for tax purposes.

**Transfer pricing**
Switzerland is of the opinion that transfer pricing matters cannot be addressed by legislation and therefore has no plans to issue any domestic provisions on transfer pricing in the near future. There is, however, an increasing awareness of the issue and concern on the part of the Swiss tax authorities that taxpayers may transfer profits without economic justification to countries with strict transfer pricing rules and documentation requirements in order to avoid challenges by the respective local tax authorities. In this context Swiss tax authorities take an increasing interest in a company’s transfer pricing position in order to defend their own position. Some cantonal tax authorities have started to particularly focus on low risk/low profit entities located in Switzerland.

Switzerland follows the OECD Guidelines as closely as possible and recognises the arm’s-length principle based on interpretation of actual legislation. To clarify transfer pricing issues, Switzerland offers an informal procedure for agreeing to pricing policies in advance.

**Thin capitalisation rules**
Swiss thin capitalisation rules are, in general, only applicable for related parties. Therefore, the debts of a company are added to its equity if, economically, they are to be treated as equity. The respective circular letter issued by the Federal Tax Administration provides for debt/equity ratios as safe harbour rules. As an example, the debt/equity ratio is generally fixed at 6:1 for financial companies (safe harbour). Interests paid on loans that exceed the relevant ratios are not deductible; further, these interests may be deemed as a hidden distribution and hence subject to Swiss WHT. There are no limitations on the financing of Swiss corporations by independent third parties (e.g. banks).
Interest rates paid to affiliated companies are also subject to periodic fixed ceilings (see Interest expense in the Deductions section). The deduction of interests in excess of the permitted rate may be disallowed and treated as a hidden distribution subject to Swiss WHT.

**Controlled foreign company (CFC) regime**

There are no CFC rules in Switzerland. Certain Swiss tax evasion instruments (i.e. tax avoidance or ‘Steuerumgehung’) may lead to a result similar to CFC rules; however, they are very rarely assumed by Swiss Courts for affiliated companies.

---

**Tax credits and incentives**

The Swiss cantons offer, in general, competitive tax rates for cantonal and communal tax purposes. Depending on the specific cantonal and municipal tax location in Switzerland, the ordinary overall (federal, cantonal and municipal) CIT charge may vary between 12.7% and 24.2% (see the Taxes on corporate income section). The cantons continually try to improve their environments as business locations. As a result of the CTR II, the cantons may now choose to credit CIT to the capital tax to reduce the overall tax burden (see Capital tax in the Other taxes section). As a further example, the canton of Nidwalden introduced a tax relief for certain licensing income (so-called license-box), whereupon net licence income from the use of intangible assets is taxed separately at a reduced corporate tax rate of 1/5 of the regular rate.

In addition, many cantons offer tax incentives for newly established companies or for expansion investments, such as tax holidays or significant tax relief for cantonal and communal tax purposes for up to ten years. In some cantons or for specific regions, a tax holiday may even be granted for federal CIT purposes if certain conditions are met.

**Privileged cantonal tax regimes**

Many cantons offer privileged corporate tax regimes. Usually, an up-front confirmation for such privileged tax regimes can be obtained by way of an advance tax ruling with the cantonal tax authorities. Such ruling process usually takes at least four to six weeks.

The privileged tax regimes, as described below, are usually granted for an unlimited period of time and can be relied upon unless the Swiss company’s circumstances change materially.

**Holding company tax regime**

A qualifying holding company is exempt from all cantonal/communal CIT (with the exception of income from Swiss real estate, which is subject to tax after deduction of typical mortgage expenditures on such real estate).

Consequently, a holding company is in principle only subject to an effective tax rate of 7.83% (i.e. federal CIT rate) prior to participation relief for qualifying dividends and capital gains. A reduced capital tax at the cantonal/communal tax level also usually applies.

The holding company tax status is available to companies which meet all of the following conditions:

- The primary purpose of the company must be to hold and manage long term equity investments in affiliated companies and this purpose must be stated in the by-laws.
- The company must not be engaged in a commercial activity in Switzerland.
Switzerland

• The company must pass an alternative asset or income test, whereby either two-thirds of the company’s assets must consist of substantial shareholdings or participations or two-thirds of total income of the company must consist of participation income (dividend income or capital gains) from such shareholdings and participations.

A tax ruling may be obtained from the cantonal tax authorities in the proposed canton of residence in order to confirm eligibility for the holding company status prior to forming the holding company.

**Domicile company tax regime**
The domicile company tax status is available for companies which only carry out administrative functions in Switzerland but no commercial activities.

Insofar as a company fulfils the above mentioned criteria, it may apply to the cantonal tax authorities in the proposed canton of residence for a tax ruling entitling it to the following taxation:

• A modest portion of foreign source income (i.e. from 0% - 15%) is subject to tax in accordance with the importance of the administrative function in Switzerland.
• Income from qualifying participations (including dividends, capital gains, and re-evaluation gains) is usually tax exempt (whereas losses deriving from qualifying participations usually are non-tax-deductible).
• All income from Swiss sources is taxed at ordinary rates.
• Expenditures which are justified for business purposes are deductible from the income to which they have a business correlation.
• Reduced capital tax rates usually are applicable.

The conditions to qualify as a domicile company vary from canton to canton. This is particularly the case with regard to determining the percentage of income from foreign sources subject to tax in Switzerland and to the definition of exactly what type of income is considered foreign source income.

A domicile company can be expected to be subject to an effective tax rate of 7.83% - 11% on foreign source income.

**Administrative/auxiliary/mixed company tax regime**
This tax status, which is very similar to the domicile company tax status, has been given different names by the cantons. Internationally, it is most often referred to as the ‘mixed company’ tax status.

In contrast to the pure domicile company status, it is permissible for a mixed company to undertake limited commercial activity in Switzerland. As a general rule, at least 80% of the income from commercial activities of a mixed company must derive from non-Swiss sources (i.e. a maximum of 20% of income may be linked to Swiss sources).

Many cantons additionally require that at least 80% of costs must be related to activities undertaken abroad.

Insofar as a company fulfils the above mentioned criteria, it may apply to the appropriate cantonal tax authorities for a tax ruling entitling it to tax treatment analogous to the rules set forth above for domicile companies. Depending on the concrete Swiss activity and infrastructure, the portion subject to cantonal and communal income tax generally varies from 5% to 25% of the foreign source income.
and is generally higher than is the case for domicile companies. The exact portion needs to be clarified with the responsible cantonal tax authorities in the tax ruling.

**Withholding taxes**

The statutory rate of Swiss WHT is 35%. Relief, if any, is generally granted by refund. With respect to related companies, a mere notification/reporting procedure may be requested for the fraction of the Swiss WHT exceeding the residual WHT. The table further below shows the residual/remaining tax for the recipient. Credit for the unrelieved portion of Swiss WHT may (in case the notification/reporting procedure does not apply) be available in the country of the recipient.

**Introduction of the capital contribution principle in 2011**

By the CTR II, the change from the nominal principle to the capital contribution principle was introduced. It entered into force as of 1 January 2011. The capital contribution principle allows repayment of shareholders' capital contributions without liability for Swiss WHT at the level of the distributing company and without income tax at the level of the Swiss individual shareholder (holding the shares in his private assets). According to the transition period, capital contributions are qualifying if accumulated after 31 December 1996 and meeting some further requirements, e.g. special and timely recordings in the statutory books and vis-à-vis the tax authority. In general, the new rules apply for premiums, additionally paid-in capital and contributions into the reserves of a company without increasing the nominal share capital (see Corporate tax reform II in the Significant developments section).

**Treaties in force (as of 1 January 2011)**

*Bilateral Agreements (in particular Art. 15 of the Savings Agreement) between Switzerland and the European Union (EU) apply as of 1 July 2005 and provide the following benefits:

Upon request, Swiss WHT on dividends paid by a Swiss subsidiary company to its EU parent company may be reduced to 0% (reduction at source) and is only subject to a notification/reporting procedure, if the following conditions are cumulatively met:

- Direct minimum holding of 25% of the subsidiary's capital for at least two years.
- Both companies are subject to CIT.

Upon request, WHT on interest and royalty payments made between associated companies or their PE resident respectively situated in Switzerland and the European Union may be reduced to 0% (reduction at source) in the source state, if the following conditions are cumulatively met:

- Direct minimum holding of 25% for at least two years (parent/subsidiary) or direct holding by a third company of minimum 25% in the capital of both companies for at least two years (sister companies).
- Both companies are subject to CIT.

**Transition periods/rules:**

- Greece, Latvia, Poland, and Portugal: WHT rate on interests is at maximum 10% as of 1 July 2009 to 30 June 2011. As from 1 July 2013, the maximum WHT rate is 5%, afterwards 0%.
- Lithuania: WHT rate on interests is at maximum 10% as of 1 July 2009 to 30 June 2011. As from 1 July 2013, the maximum WHT rate is 5%, afterwards 0%.
- Specific transition rules apply in relation to Spain until 31 May 2007. The above mentioned transition rules only cover the Swiss outbound perspective. Further transition rules may apply for Swiss inbound payments (e.g. for royalties paid to a Swiss company), e.g. with respect to the Czech Republic and Spain.

In general, the Bilateral Agreements between Switzerland and the European Union are applicable with all EU countries. Consequently, the 35% Swiss WHT can also be reduced in connection with the EU countries, if the requirements above are met. In lack of a DTT, this is in particular to be mentioned with respect to Malta and Cyprus. The application of the Bilateral Agreements is subject to domestic and STA misuse conditions.

DTTs between Switzerland and EU countries with more favourable tax treatment of dividend, interest, and royalty payments remain unaffected.
1. In Switzerland, there is no WHT on interest deriving from regular loan agreements. The Swiss WHT of 35% is only levied on interest paid by banking institutions (or paid by entities tax-wise qualified as ‘banking institutions’) to non-banks, interest on bonds, and interest on bond-like loans. Further, the Swiss WHT of 35% may be levied on interest paid on mortgage loans with respect to Swiss located real estate; however, this is not covered in the table above.

2. There is no Swiss WHT on royalties, licenses, and similar fees payable by Swiss individuals or corporations (provided that the dealing at arm’s-length principle is met).

3. The statutory Swiss WHT rate of 35% is levied but refunded, provided that the respective earnings are declared as income for tax purposes.

4. Between Swiss group companies, the Swiss WHT of 35% can usually fully be refunded; in many cases, the tax liability can be met by the notification/reporting procedure. For this purpose, a substantial holding is a participation of at least 10% in the share capital or profits and reserves or otherwise a market value of at least CHF 1 million.

5. Certain types of interest payments income deriving from several countries are exempt from WHT.

6. 15% residual tax for French companies with more than 10% shareholding if fulfilling the following requirements: i) No predominant shareholder of the company is EU or Swiss resident and ii) The shares are not traded at a stock exchange (neither the shares of the receiving nor of the distributing company).

7. Full relief of the WHT on interest paid for a loan granted by the Israel Government (including political subdivisions and local corporate bodies) or granted by the Israel Central Bank.

8. Interest on bank loans is 5%.

9. Full relief if certain requirements are met.

10. Interest on bank loans is 10%.

11. Full relief for certain dividend payments to certain US pension funds.

12. Full relief on certain categories of interest.

13. Interest on bank loans is 0%.

14. According to the territorial principle of Venezuela, only certain persons can benefit from the tax relief.

15. Interest on bank loans to corporations is 0%.

16. 0% WHT rate on dividends of participations of at least 25% if participation was held for at least two years.

17. 20% minimal shareholding plus foreign investment of minimal USD 200,000.

18. 20% minimal shareholding plus foreign investment of minimal CHF 200,000.

19. 30% only on income bonds (‘Gewinnobligationen’) and on profit participating loans (‘partiarische Darlehen’).

20. 5% for specific power houses (‘Grenzkraftwerke’).

21. 10% WHT for shareholdings between 20% and 50%; 7% WHT for shareholdings of more than 50%.

22. 5% WHT for shareholdings of more than 20%; 10% WHT for others.

23. 5% WHT on loans from banks and insurance institutions, bonds or other securities traded on a stock market and on certain credit buying; 15% on any other interest.

24. 5% WHT if the shareholding of 10% was held less than two years, 0% WHT if the shareholding of 10% was held longer than two years.

25. 5% WHT if interest is paid to a bank or a securities dealer or an insurance/reinsurance institution; 10% Swiss WHT in all other cases.

---

**Tax administration**

**Returns**

The tax year is the business year. Thus, the basis for corporate taxation is the applicable accounting period, which may end at any date within a calendar year.

The tax system is based on taxpayers’ declarations, with subsequent assessments being issued by the tax authorities on the basis of the tax returns filed. The due date varies from canton to canton. Companies are initially assessed on a provisional basis, with the final assessments being issued after the tax base has been either the subject of a tax audit or declared final by the authorities.

**Payment of tax**

Unless payments on account are specifically requested, federal, cantonal, and communal taxes on income and capital are, in most cantons and for federal tax purposes, payable only upon receipt of a demand based on a provisional or final assessment.
Switzerland

Note that cantonal exemptions apply. As an example, based on the date of maturity of the respective tax year (30 September), the canton of Zurich levies late payment interest to the extent that the full (final) tax amount had not been paid in time (independent from any earlier provisional tax invoices). About one month before the due date, a (provisional) tax bill based on the latest tax return filed or the assessment of the preceding period is sent to the taxpayer. Payment is usually in two or three instalments. If the entire amount is paid up front, a discount may be granted.

The provisional federal CIT is usually due by 31 March of the year following the tax period at question. The due date of the final federal CIT and the provisional and definitive cantonal CIT varies.

Other issues

Reorganisations
Some corporate reorganisations (transfer of business assets within a group of companies, vertical and horizontal spin-off of business or part of business, share-for-share transactions, cross-border reorganisation where the Swiss tax residence is maintained, and replacement of participations) are possible without triggering adverse tax consequences (tax neutrality). In addition, special rules apply for the tax neutral substitution of assets and qualifying shareholdings.

Significant developments

The Ministry of Economy and Trade has reduced the minimum capital required to establish a partnership to 300,000 Syrian pounds (SYP). The decision was approved by the Syrian Cabinet on 27 April 2010. Prior to this decision, the minimum capital required for a partnership stood at SYP 1 million. In March 2010, the Ministry also reduced the minimum capital required to establish a limited liability company to SYP 1 million from SYP 3 million.

A new bill has been issued (Law No. 13/2011) to encourage Syrian companies to transfer to limited liability and shareholding forms. This law extends the facilities provided by Law No. 61/2007 and grants additional ones to companies. The law provides for companies to pay between 1% and 2% of the difference in the value of their assets as taxes after their revaluation, instead of a rate of between 14% and 28%, and exempts them from any additional taxes or fees that would fall on them because of the revaluation.

Syria has approved a new law regulating the establishment and operations of companies, less than three years after a similar bill was passed. The new text, Law No. 29/2011, brings a number of additions and improvements to the rules regulating the establishment of companies in Syria, such as:

• the establishment of one-person limited liabilities
• the transformation of state-owned entities into companies (currently state-owned institutions operate under specific regulations)
• the establishment of holding firms as limited liabilities, and
• the establishment of non-public shareholding companies.

The minimum face value of shares to be sold by joint stock companies (JSCs) has been lowered to SYP 100 from SYP 500.

In order to ease the establishment of limited liability companies (LLCs), investors will be able to apply to set their company up through the regional offices of the Syrian Investment Agency, the Industrial Cities located across the country, or the Domestic Trade Directorate of the Governorates.

Taxes on corporate income

General income tax rates (including branches of foreign companies)

Except for the special cases listed below, common corporate income tax (CIT) rates (including branches of a non-resident entity) vary between 10% and 28% of profits, as follows:
CIT is levied on all corporeal and incorporeal persons, residents and non-residents, on all profits generated in Syria. Profits are considered to be realised in Syria if they occurred from efforts exerted in Syria, irrespective of the taxpayer’s identity or place of residency.

Syria does not tax residents on a worldwide basis. Syria’s tax is based on territoriality.

**Surtaxes**
Depending on the location of the taxpayer, an additional local administration surtax of 4% to 10% (of the CIT amount) will apply.

**Joint-stock companies with more than 50% shares offered to the public**
Joint-stock companies offering more than 50% of their shares to the public are subject to a flat CIT rate of 14% on profits. In this case, the 4% to 10% administration surtax does not apply.

**Other joint-stock and limited liability companies and projects included under investment encouragement laws**
Joint-stock companies offering less than 50% of their shares to the public, limited liability companies, and projects signed with Syrian companies included under the investment encouragement laws are subject to a flat CIT rate of 22% on profits. In this case, the 4% to 10% local administration surtax applies.

**Hotels, restaurants, and recreational establishments**
International standard, first and second-class hotels, restaurants, lodging houses, related services, and all recreational establishments are subject to tax based on their turnover. The tax rate is 3%, and it covers both CIT and salary tax.

**Contracts with public sector, oil companies, and non-residents**
A Syrian company contracting with the public sector and/or with an oil company or with a non-resident entity will be subject to a withholding tax (WHT) based on the contract value (on that specific contract only) rather than CIT on real profits.

The same tax rate applies to non-residents operating directly from abroad; they are subject to a 1%, 2%, 4%, 7%, or 10% WHT on the value of the contract. The applicable rates vary according to the nature of the contract and the customer. The non-resident tax covers both income tax and salary tax of the foreign and local employees working on the contract.

**Corporate residence**
The following entities are considered Syrian residents for tax purposes:

- An entity whose principal activities are administered in Syria.
• An entity that adopts the Syrian Arab Republic as its headquarters.
• Branches or offices of foreign companies in Syria.

**Other taxes**

**Value-added tax (VAT)**
There is no VAT in Syria.

**Property taxes**
Tax on real estate ranges from 14% to 60% based on the type of property. Property tax is also paid on rental income at progressive rates ranging from between 14% and 60%.

**Customs duties/import tariffs**
In setting the rules for valuation of merchandise, Syrian customs take into consideration the related explanatory notes issued by the World Trade Organization (WTO).

Customs duties classified in the Harmonized Tariff Schedule apply to goods introduced into Syria. Import operations are subject to prior licenses granted to all importers after they present their documents to the commercial registration and chambers of commerce or industry in Syria.

The value of the goods imported to Syria that should be declared is based on the transaction value. It includes the price which is actually paid or payable for the goods when purchased for the purpose of being exported to Syria and any and all other subsequent expenses incurred by the buyer that were not covered by the price (including but not limited to, shipment, insurance, unloading, etc.) until the arrival of goods to Syria.

In practice, customs duty is levied on the higher of the value of the transaction to which are added subsequent expenses or the price specified by the General Foreign Trade Organization (GFTO).

**Ordinary tariffs and preferential tariffs**
Ordinary tariffs apply to goods which are not qualified for preferential tariffs. Preferential tariffs apply to all goods or part thereof originating from a country or a group of countries with which Syria is bound by special customs agreements that qualify these goods for preferential status within limits specified in the said agreements.

Merchandise that has been put into use in a country other than its country of origin, and that is imported from that country, is subject to the higher customs tariff between country of origin and country of import. Merchandise that has been manufactured in a country other than its country of origin is subject to customs tariff related to country of origin or country of manufacture depending on the degree of manufacture in each country and according to the rules set by the Minister.

**Consumption tax/excise tax**
Consumption tax is imposed on certain services and luxury goods with rates ranging from 1.5% to 40%. Taxpayers are required to register for consumption tax purposes, and tax is withheld by the party provided the service or goods or by customs (at import) and paid on a monthly basis to the Ministry of Finance.
Syria

**Registration taxes**
The estimated cost of establishing a company ranges from USD 4,000 to USD 8,300 plus 0.5% of the capital stamp duty plus local administration tax of 5% of the stamp duty. For branch offices, establishment costs are lower and may be estimated at USD 3,000.

**Stamp duty**
Stamp duty generally is imposed on transactions such as the formation of corporations or the execution of documents, licenses, contracts, etc. at a rate ranging from 0.4% to 0.7%.

The surtax is applicable on the stamp duty tax.

**Branch income**
The taxes on branch income are the same as taxes on corporate income (i.e. tax rate varies between 10% and 28%). See the Taxes on corporate income section for more information.

**Income determination**

**Inventory valuation**
Inventory is typically valued at the weighted average cost.

**Capital gains**
Capital gains are considered taxable income and are taxed at the normal CIT rates (10% to 28%).

Capital gains include dividends, interest, revenue, premiums, and other cash income sources.

**Dividend income**
Dividends paid by Syrian corporations on previously taxed income are not subsequently subject to tax upon distribution.

Dividends received from a non-resident entity are subject to tax upon distribution in Syria of 7.5%.

**Rental income**
Rental income should be deducted from the accounting result to reach the taxable result.

Property tax is paid on rental income at progressive rates ranging between 14% and 60%.

**Royalty income**
Royalties received are taxed as ordinary income.

**Partnership income**
Profits of partnerships are deemed to be distributed and are taxed at progressive rates of 10% to 28%.
Foreign income
Income from any source, domestic or foreign, received by a company in Syria is subject to the applicable CIT rate. The scope of tax covers the activities carried out inside and outside Syria, which are administered or managed from Syria.

Deductions

Deductible expenses
The following expenses are deductible:

• Cost of goods sold.
• Cost of services rendered.
• Rent paid for the business premises (or rent value if the taxable entity owns the property).
• Salaries and incentives paid to employees/workers.
• Payments representing employer’s portion of social security contributions.
• Indemnities and allowances (end of service) paid according to the labour law.
• Depreciation accepted according to each kind of profession and industry, except depreciation of real estate.
• Taxes and duties levied during the year except CIT.
• Grants paid by taxable persons against official receipts for known public or private entities on condition the grants do not exceed 3% of net profits.

Non-deductible expenses
The following expenses are not deductible:

• Expenses leading to the increase of the value of fixed assets (capital expenditures).
• Personal expenses considered by the business owner (or/and his partner) as personal compensation.
• Compensations for partners in some business entities.

Depreciation
Depreciation of property, plant, and equipment (at rates fixed by the law) is deductible.

Net operating losses
Losses may be carried forward for five years. The carryback of losses is not available.

Payments to foreign affiliates
Payments to foreign affiliates are considered normal payments because Syria has no transfer pricing rules. However, the payments may be subject to WHT.

Group taxation
There is no group taxation in Syria.

Transfer pricing
No transfer pricing rules exist in Syria.

Thin capitalisation
No thin capitalisation rules exist in Syria.
Syria

**Tax credits and incentives**

**Investment incentives**
Investment encouragement regulations allow foreign investors to benefit from customs exemptions for the imports used in the investment.

**Permanent CIT exemptions**
Physical and moral persons and associations exempted from CIT, either through the real profit or lump-sum profit method, are the following:

- Types of consumers and investors' cooperative associations.
- Farmers harvesting and selling crops; this exemption includes animals and livestock bred on their farming lands.
- Facilities in which stocks are bred or where poultry farming is exercised; subject to CIT according to the real-profit tax.
- Day-care centres.
- Institutes and associations taking care of people with special needs.
- 75% of the yearly net profits for air and maritime transportation.
- 50% of net profits of stock breeding and poultry farming facilities.

**Withholding taxes**

**Interest**
The income, revenue, and interest earned from accounts opened at Syrian banks and from treasury bonds are subject to an 8.25% total WHT (i.e. 7.5% WHT and 10% surtax).

**Royalties**
Royalties paid to non-residents are subject to a 7% total WHT (i.e. 5% CIT as well as a 2% salary tax).

**Resident contractors**
When a Syrian company performs contracts with the public sector, with an oil company, or with a non-resident entity, it will be subject to a WHT based on the contract value (on that specific contract) rather than CIT on real profits.

**Non-resident contractors**
Revenue earned by non-resident contractors in Syria is subject to a WHT based on the contract value (of that specific contract) rather than CIT on real profits.

**Double taxation treaties (DTTs)**
The table below shows the treaty and non-treaty WHT rates:

</table>

Notes

1. Taxed only in the dividend beneficiary’s jurisdiction (when the beneficiary is owner of the shares).
2. Tax should not exceed:
   - 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that owns at least 10% of the shares of the company paying the dividends or
   - 10% of the gross amount of the dividends in all other cases.
3. Tax should not exceed:
   - 5% of the gross amount of the dividends if the beneficial owner is a company that has owned at least 25% of the capital of the company paying the dividends or
   - 10% of the gross amount of the dividends in all other cases.
4. Total Malta or Syrian tax on the profits of a company and the dividends distributed by such company, as the case may be, shall not exceed the maximum tax chargeable on the company’s profits out of which the dividends are paid.
5. Tax should not exceed:
   - 18% of the gross amount for any patent, trademark, design or model, plan, secret formula or process, industrial or scientific equipment, or for information concerning industrial or scientific experience
   - 15% of the gross amount paid for any copyright of literary, artistic, or scientific work, or
   - 10% of the gross amount paid for any copyright of cinematographic films, or tapes for television, or radio broadcasting.
6. Tax should not exceed:
   - 10% of gross amount paid for cinematographic films, magnetic films, and tapes for television and radio or
   - 5% of the sum paid for any copyright of a literary, artistic, or scientific work, including cinematographic films and films and recordings for other forms of radio transmission or television transmission; any patent, trademark, design or model, plan, secret formula, or secret process, as well as for the use or right to use industrial, commercial, or scientific equipment, and for information related to experience in the industrial, commercial, or scientific area.
7. Tax should not exceed:
   - 18% of the gross amount of royalties paid for any patent, trademark, design or model, plan, secret formula or process, any computer software program, or for information concerning industrial, commercial, or scientific experience
Syria

- 13.5% of the gross amount of royalties paid for any copyright of literary, artistic, or scientific work, or
- 4.5% of the gross amount of royalties paid for cinematographic films, programmes, and recordings for radio or television broadcasting.

8. Tax should not exceed:
- 15% of the gross amount of royalties paid for any patent, trademark, design or model, plan, secret formula or process, or for information concerning industrial, commercial, or scientific experience or
- 10% of the gross amount of the royalties for the use of or the right to use any copyright of literary, artistic, or scientific work including cinematographic films and recordings for radio and television.

9. Tax should not exceed:
- 20% of the gross amount of royalties paid for any patent, trademark, design or model, plan, or any industrial or scientific equipment, or for information concerning industrial or scientific experience or
- 15% of the gross amount of the royalties for any copyright of literary, artistic, or scientific work including cinematographic films, or tapes for television or radio broadcasting.

10. Tax should not exceed:
- 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) which holds directly at least 10% of the capital of the company paying the dividends or
- 10% of the gross amount of the dividends in all other cases.

Tax administration

Returns
The tax year in Syria is the calendar year.

Taxpayers in Syria shall comply with the following requirements:

- Tax returns must be filed by 31 May for limited liability and joint-stock companies and 31 March for other types of companies.
- Salary WHT should be submitted by the employer on a semi-annual basis.

Payment of tax
Payment is due at the time of filing.

Penalties
A penalty is assessed for late payments 30 days after the filing date at a rate of 10%, up to the amount of the tax liability.

Statute of limitations
In Syria, the statute of limitations with respect to tax is five years.

---

**Significant developments**

In January 2011, Taiwan introduced a thin capitalisation rule in the amended Income Tax Act. From 2011 onwards, deductible interest expense on inter-company loans is capped at a prescribed debt-to-equity ratio to be determined by the Ministry of Finance (MOF).

The amendment to the Income Tax Act in January 2011 also introduces the tonnage tax system. From 2011 onwards, a qualifying enterprise having its head office in Taiwan engaged in maritime transportation may elect to be taxed under the tonnage tax system.

The Taiwan-France tax treaty took effect from 1 January 2011. The withholding tax (WHT) rates imposed on dividends, royalties, and interests have been reduced from 20% to 10%. After signing this treaty, Taiwan currently has double taxation agreements (DTAs) with 20 countries.

On 4 May 2011, the Presidential Office promulgated the Selective Goods and Services Tax (also known as luxury tax), which imposes a 10% to 15% tax on real estate properties purchased not for self use and sold within two years, as well as various luxury products.

---

**Taxes on corporate income**

To help improve Taiwan’s investment environment and boost foreign investors’ interest in injecting money into Taiwan, the current CIT rate has been reduced from 20% to 17% effective from taxable year 2010 and onward.

Resident companies in Taiwan are taxed on their worldwide income as follows:

<table>
<thead>
<tr>
<th>Taxable income</th>
<th>Tax thereon</th>
</tr>
</thead>
<tbody>
<tr>
<td>Up to TWD* 120,000</td>
<td>Exempt</td>
</tr>
<tr>
<td>TWD 120,001 and over</td>
<td>17% of total taxable income</td>
</tr>
</tbody>
</table>

* New Taiwan dollars

A non-resident company is taxed on income derived from Taiwan sources. A non-resident company with a fixed place of business or business agent in Taiwan will be taxed similarly to a resident company (i.e. subject to filing of annual CIT return based on the same CIT rate provided above). Whereas, a non-resident company having no fixed place of business or business agent in Taiwan is subject to WHT at source on its Taiwan-sourced income. WHT rates on dividends, interest, and royalties may be
Taiwan

reduced if the recipient is a tax resident of a tax treaty country and the relevant treaty provides for a reduced rate. *See the Withholding taxes section for more information.*

**Tonnage tax system**
The amendment to the Income Tax Act in January 2011 introduced the tonnage tax system. From 2011 onwards, a qualifying enterprise having its head office in Taiwan engaged in maritime transportation may elect to be taxed under the tonnage tax system, where a lump sum tax is calculated on the net tonnage of their fleet. Once the application is approved, the enterprise must remain under the tonnage tax system and cannot switch to the regular tax system at its discretion for ten consecutive years. Furthermore, loss carryforwards and tax incentives are not eligible under the tonnage tax system.

**Profit retention tax**
For earnings accumulated on or after 1 January 1998, an additional 10% profit retention tax is imposed on any current earnings that remain undistributed by the end of the following year.

**Imputation tax system**
Taiwan operates an imputation tax system to eliminate double taxation on earnings of a corporation. The 17% CIT and 10% profit retention tax already paid by the corporation can be distributed to the resident individual shareholders as tax credits to offset against their individual income tax. However, the tax credits distributable to shareholders are subject to certain limitations.

Non-resident shareholders may credit the 10% profit retention tax previously paid by the investee company against the dividend WHT where the dividends are distributed from retained earnings that have already been subject to the 10% profit retention tax. Please note that credit for profit retention tax from dividend WHT is calculated based on a prescribed formula.

**Income basic tax (IBT)**
All Taiwan resident companies, as well as non-resident companies with a fixed place of business or business agent in Taiwan, should calculate IBT if they earn certain income that is tax-exempt. The basic income of a company is the amount calculated in accordance with a formulae stipulated by the government, with a deduction of TWD 2 million. Currently, the IBT rate is 10%. If the IBT amount is greater than the regular CIT amount, taxpayers must pay income tax based on the regular CIT amount plus the difference between the IBT amount and the regular CIT amount. On the other hand, if the regular CIT amount is greater than the IBT amount, no special action is required.

**Corporate residence**
A company is a resident of Taiwan for income tax purposes if it is incorporated in Taiwan. A non-resident company which has a fixed place of business or business agent in Taiwan is obligated to file corporate income tax returns in Taiwan on its Taiwan sourced income.
Other taxes

Business tax
All sales of goods and services in Taiwan, as well as the importation of goods into Taiwan, are subject to business tax. There are two types of business tax systems: value-added tax (VAT) and gross business receipts tax (GBRT).

The sellers and service providers are generally obligated to pay business tax for the sales of goods or services within Taiwan unless the law provides otherwise. For importation of goods, the business tax will be paid by the goods receivers or buyers via customs. For importation of services sold by foreign companies to Taiwanese buyers, business tax shall be paid by the service buyers. However, if the foreign service purchased is under TWD 3,000 per transaction, the business tax shall not apply. Furthermore, the service buyer (corporate entity) will not be required to pay business tax if it adopts the VAT system and is exclusively engaged in taxable transactions.

Value-added tax (VAT)
VAT is applicable to general industries, and the VAT rate is 5%. Under the VAT system, each seller collects output VAT from the buyer at the time of sale, deducts input VAT paid on purchases from output VAT, and remits the balance to the tax authority.

Gross business receipts tax (GBRT)
GBRT is applicable to specified industries (e.g. financial institutions, small businesses). For banks, insurance companies, investment trust companies, securities and futures firms, short-term commercial paper enterprises, and pawnshops, the rate is 2%. For re-insurance enterprises, the rate is 1%.

Stamp tax
Stamp taxes are imposed on each copy of the following documents executed within the territory of Taiwan (with the following respective tax rates):

- Monetary receipts must have a revenue stamp of 0.4% of the amount received per piece. However, a receipt for the money deposited by the bidder requires a revenue stamp of 0.1% of the amount received per piece.
- Contract or deed for the sale or purchase of movable property must have revenue stamp of TWD 12 per piece.
- Contractual agreement under which one party agrees to complete a specific piece of work for the other party for consideration must have a revenue stamp of 0.1% of the contract price.
- Contract for the sale, transfer, and partition of real estate must have a revenue stamp of 0.1% of the contract price.

Commodity tax
Commodity tax (excise duty) is levied on certain commodities, as specified in the Commodity Tax Act (including rubber tyres, beverages, cement, plate glass, oil and gas, electrical appliances, and vehicles), at the time when such goods are dispatched from a factory or when imported. Tax rates vary from 8% to 30% and are applicable to different types of commodities based on the value of the goods or the volume in specific circumstances.

### Property tax
A tax is levied on land and buildings annually. The land tax rate ranges from 1% to 5.5% of the assessed land value. The building tax rate for business properties is 3% of the assessed value and the rate for non-business properties is 1.2% or 2% of the assessed value.

### Securities transaction tax
Tax is levied on securities transactions at the rate of 0.3% on gross proceeds from the sale of domestic shares. Trading in corporate bonds and financial bonds issued by Taiwan companies is temporarily exempt from securities transaction tax assessment.

### Customs duties
Taiwan uses the Customs Cooperation Council Nomenclature (CCCN) to classify goods and set duty rates. The customs duty is payable by the consignee or the holder of the bill of lading for imported goods and is based on the dutiable value or the volume of goods imported.

### Luxury tax
On 4 May 2011, the Presidential Office promulgated the Selective Goods and Services Tax (also known as luxury tax). With an aim to curb real estate speculation, luxury tax of 10% will apply on real estate properties purchased not for self use and sold within two years, as well as various luxury products such as upscale automobiles, yachts, private jets, helicopters, fur, ivory, high-end furniture, and membership rights. However, the rate is increased to 15% where real estate properties purchased not for self use are sold within one year. The new law was implemented on 1 June 2011.

### Branch income
A non-resident company whose head office is located outside of Taiwan must keep separate books for its branch in Taiwan. A head office or regional headquarters’ general and administrative expenses may be allocated to the branch under certain conditions. CIT is assessed only on the branch’s profits. A Taiwan branch should complete an annual CIT return.

A Taiwan branch of a foreign company may remit after-tax profits to its foreign head office without further tax due.

### Motion picture leasing
A foreign motion picture’s branch in Taiwan can deem 45% of its revenue from leasing of motion pictures as cost. However, if a foreign enterprise with no branch office in Taiwan leases motion pictures through agents, 50% of the revenues can be deemed as taxable income.
Deemed profit method
A non-resident company which is engaged in international transportation, construction contracting, provision of technical services, or machinery and equipment leasing within Taiwan, and where the cost and expenses are proven to be difficult to calculate, may apply for an advance approval from the National Tax Administration (NTA) to adopt the deemed profit method to determine the taxable income as 10% or 15% of the gross revenues. This will effectively reduce the WHT rate to 2% to 3% on gross revenues once the approval is obtained from the NTA.

Income determination
A Taiwan resident company is taxed on its net income which is defined as gross annual income after deduction of costs, expenses, losses, and taxes. Except for certain exempt items, income from all sources, including offshore and onshore, is subject to CIT.

A non-resident company is only taxed on its Taiwan-sourced income. Article 8 of the Income Tax Act and the related Guideline defines the types of income that should be regarded as sourced from Taiwan.

The Guideline issued by the MOF on 3 September 2009 clarifies the scope of Taiwan-sourced income for the existing income categories. For example, fees received by a non-resident company for service performed entirely outside of Taiwan are exempt from income tax assessment, subject to supporting evidentiary documents.

Inventory valuation
Inventory must be valued at cost. If cost exceeds market price, the latter may be used as the valuation basis except where the last in first out (LIFO) method is used. Cost may be determined by the LIFO, first in first out (FIFO), moving-average, weighted-average, specific identification, or any other method approved by the tax authorities. Conformity between financial and tax reporting is not required.

Capital gains
Gains on the disposal of fixed assets are taxable as current-year income of the company, with the exception of gains on the sales of land. The capital gains tax on marketable securities is currently exempt. Instead, securities transaction tax is levied on the sales proceeds (see the Other taxes section). However, if a non-resident company has a fixed place of business or business agent in Taiwan, capital gains on the sale of marketable securities may trigger IBT.

Dividend income
Dividends received from resident investee companies by a resident corporate shareholder are not included in taxable income. In addition, the imputation tax credit derived from the dividend income of the investee corporation can be distributed to the domestic corporate shareholders, but this tax credit cannot be used to offset the domestic corporation's income tax liability; rather, the tax credits must be recorded in a separate book until they are further distributed to the resident individual shareholders of the resident corporate shareholders.

Dividends received from foreign subsidiaries are taxable, but credits are given for the WHT paid offshore, limited to the incremental tax liability that would result if the dividends were added to the Taiwan corporate shareholder's taxable income and taxed at the Taiwan CIT rate.
Taiwan

**Interest income**
Interest received on commercial paper and certain other interest-bearing financial instruments are subject to WHT of 10% and 15% for resident and non-resident taxpayers, respectively (see the Withholding taxes section). However, such income is not subject to any other form of income tax and is effectively taxed separately from other income.

**Foreign income**
Taiwan adopts a worldwide tax system to tax its resident company (including the Taiwan subsidiaries of foreign companies). In theory, taxation on foreign investment income of a Taiwanese company is deferred until cash is repatriated to Taiwan and then subject to CIT. However, given Taiwan also taxes undistributed profits based on net income shown on the income statement (see Profit retention tax in the Taxes on corporate income section), foreign investment income may still be taxed in Taiwan before cash is repatriated back to Taiwan.

**Deductions**

**Depreciation**
Depreciation on all fixed assets other than land, including premises, plants (buildings), and equipment used to generate income is allowed as a deduction. The straight-line, fixed percentage on diminishing book value, sum-of-years-digit, unit-of-production, and working-hour methods are acceptable depreciation methods to the tax office. The useful lives of typical assets are shown below:

<table>
<thead>
<tr>
<th>Asset category</th>
<th>Useful life</th>
</tr>
</thead>
<tbody>
<tr>
<td>Computer equipment</td>
<td>3</td>
</tr>
<tr>
<td>Furniture and fixtures</td>
<td>5</td>
</tr>
<tr>
<td>Automobile</td>
<td>5</td>
</tr>
<tr>
<td>Building</td>
<td>50</td>
</tr>
</tbody>
</table>

With the approval of the tax authority, a company may revalue its fixed assets each time the government’s wholesale price index increases by 25% over the base period. A company’s base period is established at the time of purchase of fixed assets or at such time when a company revalues its fixed assets. Any increase in fixed assets may then be depreciated for tax purposes.

**Taxes**
All taxes other than income tax are generally deductible, unless where such taxes are related to tax-exempt income. However, tax penalties are not deductible. The tax associated with the acquisition of real estate should be included in the cost of the land or building.

**Other significant items**
If a company invests in a foreign entity and holds at least 20% equity ownership (this limitation does not apply if special approval is obtained from the Executive Yuan), the company can attribute 20% of the investment amount to a ‘reserve for foreign investment loss’.

**Net operating losses (NOLs)**
A company’s NOLs can be carried forward for ten years. Losses cannot be carried back.
Payments to foreign affiliates
Royalties, interest, and service fees paid to a foreign affiliate are subject to WHT. Royalties or service fees paid to a foreign entity may be tax-exempt if certain requirements are met and prior approval is obtained.

Group taxation
Group enterprises meeting certain criteria under the Financial Holding Company Act and Business Mergers & Acquisitions Act may file consolidated tax returns for the Taiwan parent and its first tier Taiwan subsidiaries. For other enterprises, group taxation is not permitted. The Taiwan parent is eligible to file consolidated tax returns if it continuously holds over 90% of the shares of the subsidiaries for 12 months in a tax year.

Transfer pricing
The Taiwan MOF announced the Assessment Rules for non-arm's-length transactions by Profit-seeking Enterprises (TP Assessment Rules) on 28 December 2004. The transfer pricing regulations were established to constrain multinational corporations from leaving their profits in countries with lower tax rates. For applicable companies, the disclosure of related party transactions in the CIT return and the preparation of a transfer pricing report is required. Upon request, the transfer pricing report will have to be submitted to the Taiwan tax authority within one-month of notice. The transfer pricing report must demonstrate the company’s good faith effort to comply with the assessment rules. Without proper reason, failure to comply with such rules will result in additional tax payable and financial penalties. The types of transactions governed by these regulations include the following: transfer of tangible assets, use of tangible assets, transfer of intangible assets, use of intangible assets, rendering of services, use of funds, and other types of transactions prescribed by the MOF.

Thin capitalisation rules
In January 2011, Taiwan introduced a thin capitalisation rule in the amended Income Tax Act. From 2011 onwards, deductible interest expense on inter-company loans is capped at a prescribed debt-to-equity ratio (tentatively 3:1) to be determined by the MOF. The thin capitalisation rule generally applies to profit-seeking enterprises, except banks, credit cooperatives, financial holding companies, bills finance companies, insurance companies, and securities companies.

Tax credits and incentives
Certain tax incentives are provided to investors if they are located in prescribed areas such as science parks, economic processing zones, free-trade-zones, etc. Other tax credits are granted to qualifying companies that invest in specific businesses or industries promoted by the government, such as biotech.

R&D tax incentive
Under the Statute for Innovating Industries (SII), R&D credits are available for up to 15% of qualified R&D expenses incurred, with the maximum amount of tax credit capped at 30% of the tax payable for the year in which the expenses were incurred, including the 10% profit retention tax. Unutilised R&D credits will be forfeited and cannot be carried back or carried forward.
Taiwan

According to Regulation Governing R&D Investment Tax Credit (ITC) Available to Profit-seeking Enterprises, applications should be made in the current year for designated R&D costs when they are first allocated or incurred in order to qualify for R&D ITC. A separate annual application for R&D ITC should be made with the central competent authorities within four months prior to the CIT return filing due date till one month immediately following the filing due date. Information relating to R&D ITC should be provided with the CIT return.

**Tax concessions on merger**
Under the Business Mergers and Acquisitions Act, a merger or consolidation of companies can be exempt from stamp tax, deed tax, securities transaction tax, and business tax if certain conditions are met. After the merger or consolidation, any tax concession previously enjoyed by the merged entities will continue to be applicable to the surviving company (or new company) after the merger or consolidation. However, the surviving company is required to manufacture the same products or provide the same services which were approved for tax concessions by the merged entities in order to continue the concessions obtained previously.

The unexpired and unutilised NOLs of the participating entities prior to the merger or consolidation may be carried over to the surviving or newly-created entity according to the percentage of shareholding in the surviving or newly-created entity held by all shareholders of the participating entities.

**Free-trade-zones**
According to the Statute for the Establishment and Management of Free-trade-zones, foreign companies or their branch offices in Taiwan that apply for establishment in the free-trade-zone or delegate companies already established in the free-trade-zone to store and/or perform simple processing in the free-trade-zone and selling the goods within and outside of Taiwan shall be exempted from CIT. However, in the event that the annual domestic sales exceed 10% of the total annual domestic and foreign sales, the portion in excess shall not be exempted from CIT.

**Foreign tax credit**
Taiwan uses the credit method to avoid double taxation of income. Foreign taxes paid on foreign-sourced income may be credited against a company's total Taiwan income tax liability. However, the credit is limited to the incremental taxes derived from foreign-sourced income.

**Withholding taxes**
Resident corporations paying certain types of income are required to withhold tax as follows:

<table>
<thead>
<tr>
<th>Recipient</th>
<th>Dividends (%)</th>
<th>Interest (%)</th>
<th>Royalties (%)</th>
</tr>
</thead>
<tbody>
<tr>

Notes
1. For non-resident enterprises, a 15% WHT applies to interest income derived from short-term bills, securitised certificates, corporate bonds, government bonds, or financial debentures, as well as interest derived from repurchase transactions involving these bonds or certificates. The rate in all other cases is 20%, unless reduced under a tax treaty.
2. Royalties received by foreign enterprises that are specially approved in advance by the government are exempt from income tax.
3. A rate of 10% for shareholders that are companies (other than partnerships) with at least a 25% shareholding.
4. 7% of the gross amount of the interest arising in a territory and paid on any loan of whatever kind granted by a bank of the other territory.
5. The WHT rate on technical service fee is reduced to 7.5%.
6. The total tax burden of CIT and dividends tax is not to exceed 40% of the total profits of the company.
7. A rate of 5% for shareholders with at least a 10% shareholding.

Tax treaties
Double taxation treaties entered into with the following countries: Australia, Gambia, Belgium, Denmark, France, Senegal, United Kingdom, Sweden, Indonesia, Hungary, Israel, New Zealand, Netherlands, Paraguay, Singapore, South Africa, Swaziland, Macedonia, Malaysia, and Vietnam relate to corporate and individual income tax. Treaties with Canada, the European Union, Germany, Israel, Japan, Korea, Luxembourg, Netherlands, Norway, Sweden, Thailand, Macau, and the United States relate to certain earnings from the operation of ships and/or aircraft.

Tax administration
Returns
The tax year in Taiwan runs from 1 January to 31 December. Tax returns are filed on a self-assessment basis. Businesses may request approval from the local collection authority to file CIT returns using a fiscal year-end other than 31 December. CIT returns are due no later than five months after the end of the tax year.
Taiwan

**Payment of tax**
Tax is paid on a self-assessment basis in two instalments. The first payment is based on 50% of the tax liability of the prior year’s tax return and is made in the ninth month of the enterprise’s fiscal year. However, if the taxpayer meets certain requirements, it may self-assess the provisional tax based on the taxable income of the first half of the current fiscal year. The second payment is made at the time of filing the annual tax return. The returns are subsequently reviewed by the tax authorities, and a final assessment is issued.

Any overpaid tax as a result of the tax collection authority’s mistake shall be refunded to the taxpayer within two years of acknowledgement of such mistake and shall not be subject to the original five-year period for applying for refund where the taxpayer is responsible for the mistake.
Significant developments

Starting from 1 January 2011, the following changes, updates, and clarifications were implemented and introduced:

- Excise tax on cellular communication services was introduced at the rate of 3%.
- Persons importing lint cotton and smelt in the territory of Tajikistan are now also obliged to pay tax on sales.
- VAT on pharmaceuticals was introduced at the rate of 5%.
- Reduction of allowed deduction of provision for doubtful debts for banks and other financial institutions.
- Change in the real estate tax rates.
- Changes in tax returns submission deadlines.

Taxes on corporate income

Generally, all Tajik legal entities are subject to taxation in Tajikistan. Corporate income tax (CIT) is computed by applying the statutory 15% rate to taxable income (25% for enterprises operating in transport, communication, banking, and service sectors), which is calculated based on gross income decreased by allowed deductions and losses carried forward from previous periods.

Tajik residents are taxed on their worldwide income. Non-residents are subject to CIT in Tajikistan only on Tajikistan source income. Non-residents operating through a permanent establishment (PE) are generally subject to the same CIT provisions.

Minimum income tax

In Tajikistan, there is a minimum income tax on company income at the rate of 1% of aggregate annual income. The minimum income tax should always be paid in full. If CIT is less than the minimum income tax, then CIT should not be paid. If CIT is greater than the minimum income tax, then only the positive difference between CIT and the minimum income tax should be paid.

Corporate residence

Legal entities formed under Tajik law, as well as legal entities whose effective control (management) is in Tajikistan, are recognised as residents for CIT purposes.

Permanent establishment (PE)

Under general provisions of the Tax Code, any place of activity associated with production, assembling, packaging, supply, construction, and exploration activity on
Tajikistan

the territory of Tajikistan, regardless of duration of such activities, will be deemed as PE of a non-resident.

Non-residents providing services in the territory of Tajikistan continuously during 90 days in any consecutive 12 month period also create PE in Tajikistan.

---

**Other taxes**

**Value-added tax (VAT)**

VAT is generally assessed on taxable turnover, which includes goods and services. The current VAT rate is 18%. Individuals and businesses are required to register as VAT payers if the taxpayer's taxable turnover exceeds a threshold of 200,000 Tajik somoni (TJS) (approximately USD 43,000) for the preceding 12-month period.

Generally, the Tax Code exempts the following from VAT: goods and services that are not provided in Tajikistan under the place of supply rules; sale, transfer, or rent of real property; financial services; medical services; publishing; and certain other goods and services.

For goods, the place of supply is determined as the initial point of transportation. Services are generally considered to be provided at the place of business of the service provider or the actual place where services are rendered. However, for certain types of services, such as consulting and accounting, the services are considered to be provided at the location of the buyer.

A VAT refund is generally available for qualified exporters if input VAT exceeds assessed VAT.

VAT returns, together with issued and received invoices, are filed monthly, not later than the 15th day of the month following the reporting month. Payments are due by the same date.

**Land tax**

Land tax is paid based on the area of the land plot and varies depending on the location. The land tax rate ranges from TJS 180 to TJS 500 (approximately USD 39 to 108) per hectare, depending on the location of the land plot.

**Real estate tax**

Real estate tax applies to immovable real property such as buildings, houses, and flats. The real estate tax rate is calculated by multiplying the land tax rates by relevant coefficients (from 15 to 60), which depend on the purpose of real property and may be adjusted by the state authorities in each specific case.

**Customs duties**

The tariff rates established by the government, ranging from 0% to 15%, are applied on an ad valorem basis, at a specific rate, or via a combination of the two. The tax rate of 0% is granted to certain types of goods (e.g. some types of printed publication, unwrought wool, gaseous hydrocarbons, electricity).

Note that Tajikistan is signatory to several free trade agreements, primarily among the following Commonwealth of Independent States (CIS) countries: Russia, Belarus, Kazakhstan, and Kyrgyzstan.
**Customs fees**
Customs clearance could not be performed without certification of goods, for which importer should pay based on time spent by certification specialist. Fees for customs clearance range from approximately USD 10 to USD 450, depending on customs value.

**Excise taxes**
Excise tax is assessed on beverages, tobacco products, fuel, tires, and passenger automobiles. Excise tax rates are established by the government.

**Social tax**
An employer is obliged to make social tax payments at the rate of 25% of salary.

**Road tax**
The formula for calculating road tax is total deductions of the reporting year multiplied by the 2% tax rate (0.5% for trade companies). If actual deductions do not exceed 70% of gross income, the tax base for road tax would be 70% of gross income.

**Vehicle tax**
Vehicle tax is computed as a percentage of the calculation index applied for horse power of the vehicle engine. The percentage ranges from 2.5% to 13.75%.

**Branch income**
In addition to CIT, PEs are subject to branch profit tax at the rate of 8% of net profit after CIT, unless a lower rate is prescribed by an applicable double taxation treaty (DTT).

**Income determination**
Income tax is assessed on taxable income, which is the difference between gross income and allowed exemptions and deductions.

**Inventory valuation**
Inventory accounting for tax purposes generally follows inventory accounting for financial reporting purposes. Starting from 2011, legal entities should apply International Financial Reporting Standards (IFRS).

**Capital gains**
In general, capital gains on securities are taxed as business profits.

**Inter-company dividends**
Inter-company dividends received by a resident parent company from a resident subsidiary are exempt from CIT.

**Foreign income**
Tajik residents are taxed on their worldwide income. Non-residents are subject to CIT in Tajikistan only on Tajikistan source income. There are no provisions in the Tax Code for tax deferral.

The Tax Code contains CFC provisions, according to which, income received by the resident's subsidiary (more than 10% ownership) registered in countries with privileged taxation should be included in the income of the resident.
Tajikistan

**Deductions**
In general, all business expenses (e.g. materials, payroll) are allowed as a deduction if the expenses are connected with the earning of income, not of a capital nature, and supported by proper documentation.

**Depreciation**
The deduction for costs related to fixed assets generally is made through depreciation at rates ranging from 7% to 20%, using the declining balance method.

**Goodwill**
There are no special provisions for goodwill deduction in the Tax Code; however, goodwill is not deductible in accordance with the general rules on intangible assets amortisation.

**Interest**
Interest deductibility is generally limited to three times the refinancing rate of the National Bank of Tajikistan (currently 9%). For certain entities, additional limitations may apply.

**Bad debts**
A taxpayer is allowed a bad debts deduction in cases where the income associated with such bad debts is already recognized for CIT purposes. Bad debts are deductible when they are written-off in the accounting books. Special provisions apply for banks and other financial institutions.

**Charity contributions**
Charity contributions are limited to 10% of taxable income.

**Taxes, penalties, and fines**
Taxes paid to the budget of Tajikistan and other states are deductible, except for CIT and minimum income tax. Penalties and fines paid to budget are not deductible.

**Other significant items**
Among other deductions specifically mentioned in the Tax Code are research and development, repair expenses, and geological and geophysical expenses.

**Non-deductible expenses**
Non-deductible expenses specifically mentioned by the Tax Code include meals and entertainment, personal expenses, passenger vehicles, and non-business expenses.

**Net operating losses**
Net operating losses may be carried forward for three years but may not be carried back.

**Payment to foreign affiliates**
No special provisions for deduction of payments to foreign affiliates exist in the Tax Code; therefore, general rules for deductibility of expenses should apply.

**Group taxation**
There are no rules permitting grouping for tax purposes in Tajikistan.
Transfer pricing
The tax authorities have the right to review prices applied in the following transactions for their compliance with market-level pricing:

- Transactions between related parties.
- Barter transactions.
- Cross-border transactions.
- All transactions with deviation of more than 30% from market level.

Thin capitalisation
There are no thin capitalisation rules in Tajikistan; however, interest deductibility is limited as described in the Deductions section.

Tax credits and incentives
Tax incentives include the special economic zones of Sogd, Pyandj, Ishkoshim, and Dangara. Sodj and Pyandj are actively functioning economic zones.

Also, an exemption from CIT is available for taxpayers that have made a certain amount of investments into chartered capital of a production company, as follows:

- Two years exemption if volume of investments is up to USD 500,000.
- Three years exemption if volume of investment is from USD 500,000 up to USD 2 million.
- Four years exemption if volume of investment is from USD 2 million up to USD 5 million.
- Five years exemption if volume of investment exceeds USD 5 million.

Foreign tax credit
Taxes paid outside Tajikistan may be credited against the same types of taxes in Tajikistan, if appropriate supporting documents are provided. The amount of credit may not exceed the amount of tax assessed in respect of such income at the rates applicable in Tajikistan.

Withholding taxes
Tajikistan source income of non-residents is subject to WHT at its source at the rates shown in the following table:

<table>
<thead>
<tr>
<th>Types of income at source of payment</th>
<th>Tax rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Dividends and interest</td>
<td>12</td>
</tr>
<tr>

Notes

1. A rate of 5% of the gross amount of the dividends if the recipient is an enterprise (except a partnership) that directly holds at least 25% of the capital of the company paying the dividends; 10% of the gross amount of the dividends in all other cases.

2. A rate of 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that holds directly at least 10% of the capital of the company paying the dividends; 10% of the gross amount of the dividends in all other cases.

3. A rate of 10% of the gross amount of the dividends if the beneficial owner is a legal entity and directly holds no less than a 30% stake in the company paying the dividends; 15% of the gross amount of the dividends in all other cases.

4. A rate of 5% of the gross amount of the dividends if the beneficial owner is a company that holds at least 50% of the share capital of the company paying the dividends; 15% of the gross amount of the dividends in all other cases.

5. A rate of 0% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that holds directly at least 75% of the capital of the company paying the dividends; 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that holds directly at least 25% of the share capital of the company paying the dividends; 15% of the gross amount of the dividends in all other cases.

6. A rate of 5% of the gross amount of the royalties paid for the use of or the right to use software, or industrial, commercial, or scientific equipment; 10% of the gross amount of the royalties in all other cases.

7. A rate of 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that holds directly at least 25% of the share capital of the company paying the dividends; 10% of the gross amount of the dividends in all other cases.

8. A rate of 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that holds directly at least 25% of the share capital of the company paying the dividends; 15% of the gross amount of the dividends in all other cases.

9. A rate of 5% of the gross amount of the dividends if the beneficial owner is a person who holds directly at least 25% of the share capital of the company paying the dividends; 10% of the gross amount of the dividends in all other cases.

10. Interest arising in Tajikistan and paid to the government of Turkey or to the Central Bank of Turkey shall be exempt from Tajikistan tax; interest arising in Turkey and paid to the government of Tajikistan or to the National Bank of Tajikistan shall be exempt from Turkish tax.

Tax administration

Returns
The Tax Code prescribes a calendar year as the tax year. Annual CIT declarations are due by 1 April in the year following the tax year-end.
Taxpayers are required to submit their estimated calculation of monthly advance payments of CIT.

**Payment of tax**
With respect to CIT, advance payments are due every 15th day of the month. Payment of any outstanding CIT liabilities is required not later than 10 April following the reporting tax period.

The settlement of minimum income tax should be done by 10 April following the reporting tax period in case it exceeds CIT liability.

**Fines and interest penalties**
The fine for failure to file a tax return ranges from a minimum amount of 1 calculation index (CI), which is currently TJS 35 (approximately USD 7.6), to a maximum fine of 100 CI, or TJS 3,500 (approximately USD 761). The amount of the fine depends on the taxpayer’s category and should be assessed based on each ten days of delay. In the absence of tax returns, the tax authorities are entitled to assess taxes based on any information available.

Fines may be assessed in the amount of 10% to 20% of the understated tax liabilities. In severe cases, a violation may be considered a criminal offence.

A fine for failure to withhold and remit tax may be assessed in the amount of 3 to 200 CI (approximately TJS 1,225 to 7,000 (USD 266 to 1,522)) of the tax not withheld.

Interest penalties may apply to late tax payments in the amount of 0.08% of the underpaid tax amount, for each day of tax underpayment.

**Statute of limitations**
Taxpayers are allowed to make changes to prior period tax returns within the statute of limitations (three years). No fines should apply to corrections in this case.

**Other issues**

**Accounting system**
In accordance with the governmental Resolution of the Republic of Tajikistan concerning International Standards of Financial Statements, the Ministry of Finance of the Republic of Tajikistan shall adopt IFRS through a step-by-step approach. Starting from 2011, juridical legal entities should apply IFRS.

Accounting policies and practices are being revised in light of the legal requirement that companies adopt IFRS and International Accounting Standards. Such revised accounting policies should be adopted by companies’ boards of directors and disseminated to all the accounting units with clear instructions on how to introduce and follow the new policies and procedures.
Significant developments

The most significant recent change in relation to income tax on corporations is the introduction of thin capitalisation restrictions on the amount of deductible interest. The thin capitalisation rules have replaced the interest cover provisions (see Thin capitalisation in the Group taxation section).

Taxes on corporate income

Income tax is charged at a rate of 30% on income of a resident corporation and of a permanent establishment (PE) of a non-resident corporation.

A reduced corporate tax rate of 25% applies for three consecutive years for companies newly listed on the Dar es Salaam Stock Exchange. To qualify, at least 30% of the company’s shares must be issued to the public.

Alternative minimum tax applies at a rate of 0.3% of the gross turnover of a company that is in ‘perpetual loss status’ for a period of at least three consecutive years as a result of tax incentives. The practical application of this tax is unclear, but it has been provided that this tax will apply to income years ending on or after 31 July 2008.

Non-residents are also subject to tax on any income with a source in Tanzania. Certain payments to non-residents are subject to tax at the relevant non-resident withholding tax (WHT) rate (see the Withholding taxes section for the relevant rates).

Income from the disposal of investments in Tanzania is subject to income tax where such investments fall within the source rules, and, in such a case, the income will be taxed at a rate of 30%.

Corporate residence

A company is tax resident if it is incorporated or formed under the laws of Tanzania or if the management and control of its affairs is exercised in Tanzania.

A Tanzanian resident is taxed on worldwide income, irrespective of source. Non-residents are taxable on income with a source in Tanzania.
Other taxes

Value-added tax (VAT)
VAT is chargeable on all taxable goods and services supplied in, or imported into, mainland Tanzania. For imported goods, VAT is payable at the time of importation together with any customs and excise duties. For imported services, VAT is accounted for by registered businesses through a ‘reverse charge’ mechanism. The standard rate of VAT is currently at 18%, but the export of goods and certain services is eligible for zero-rating. Businesses with an annual taxable turnover of more than 40 million Tanzanian shillings (TZS) must register for VAT.

The Commissioner for VAT has the discretion to register as intending traders, investors whose projects have not commenced production, but who wish to be VAT-registered in order to reclaim the tax they incur on start-up costs. VAT payable with respect to capital goods (as defined), which are imported or purchased in Tanzania, may be permanently deferred, subject to certain procedures being followed.

Supplies of certain goods and services are exempt from VAT. A business that produces only exempt supplies is unable to register for VAT and consequently unable to recover the VAT incurred on inputs. However, businesses in this category that import taxable services with a value over the registration threshold must register for VAT to account for the VAT on such services.

Certain goods and services supplied to specified entities are eligible for ‘special relief’ from VAT. The ‘special relief’ provisions enable supplies, which would otherwise be chargeable with VAT, to be made VAT free provided certain administrative requirements are followed.

Registered businesses must submit VAT returns, with any tax due, on a monthly basis.

Businesses entitled to VAT refunds can claim any remaining credit six months after a refund first became due, subject to all intervening returns being rendered. Any claim for a VAT refund must be supported by an auditor’s certificate. Businesses in a consistent refund position (e.g. exporters) can apply for approval to lodge their refund claims on a monthly basis.

Zanzibar has its own VAT Act, but it is similar to the Mainland Tanzania Act.

Customs duties
Tanzania is a member of the East African Community, which became a Customs Union on 1 January 2005 on the implementation of the East African Customs Union Protocol. This protocol provides for a common external tariff (CET), elimination of internal tariffs, rules of origin, anti-dumping measures, a common customs law, and common export promotion schemes.

The customs duty rates applicable under the CET are as follows:

<table>
<thead>
<tr>
<th>Category</th>
<th>Rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Raw materials, capital goods, agricultural inputs, pure-bred animals, medicines</td>
<td>0</td>
</tr>
<tr>
<td>Semi-finished goods</td>
<td>10</td>
</tr>
<tr>
<td>Finished final consumer goods</td>
<td>25</td>
</tr>
</tbody>
</table>
Tanzania

Tanzania is also a member of the Southern African Development Community (SADC). Where goods are subject to a lower rate of duty from another trade bloc such as SADC, the lower duty rate applies until such a time as the trading arrangements between the trading blocs are harmonised.

**Excise duties**

Excise duty rates apply as follows.

<table>

</table>

**Fuel levy**

Fuel levy is charged on petroleum products at a rate of TZS 200 per litre.

**Payroll taxes**

Payroll taxes include a skills and development levy at 6% of payroll cash costs and a 20% social security contribution, of which 10% is borne by employers with the other 10% deducted from employee pay, generally.
**Stamp duty**
Examples of instruments giving rise to stamp duty obligations include conveyances, leases, share transfers, and issue and transfer of debentures. The current rate is 1% of the transaction value.

**Local taxes**
The local government levies a property tax based on the value of a premise. The rates vary depending on the value and location of the property. The local government is also entitled to charge a 0.3% service levy based on turnover generated in the relevant district. For agricultural produce and livestock, there is a cess tax, currently capped at 5% of the producer price.

**Branch income**
The income tax liability of a person with a PE in Tanzania is calculated as if the person and the PE are independent but as if the PE is resident in Tanzania. The income of the PE is taxed at the normal income tax rate for entities, namely 30%.

The PE is also subject to a tax on ‘repatriated income’, which applies at a rate of 10% (the same rate as a company would withhold on dividends).

In certain circumstances, business activities of the head office may be attributed to the branch. Arrangements between a PE and head office generally are not recognised other than the transfer of an asset or liability between the two. Amounts derived or payments received and expenditures incurred or payments made that relate to assets held by, or liabilities owed by, the business of the PE are attributed to the PE.

**Income determination**
Subject to any provision to the contrary in the Income Tax Act, income is to be calculated in accordance with generally accepted accounting principles. Corporations must apply an accrual basis of accounting.

**Deductions**
In calculating taxable profit, deductions are allowed for revenue expenditures incurred wholly and exclusively in the production of income, with some statutory exceptions. For capital expenditures, there are specific tax depreciation allowances.

There are special rules with regard to the valuation of trading stock and long-term contracts and in relation to the treatment of instalment sales and finance leases.

There is ring-fencing of mining operations per licenced area. In addition, expenditures incurred for exploration activities outside a licenced area are only deductible when commercial operations commence.

**Depreciation**
The categories of depreciable assets and their tax depreciation rates are set out in the table below.
Tanzania

Expenditures on plant and machinery are generally written off on a reducing balance basis at rates of 37.5%, 25%, or 12.5%, depending on the category of the asset. Certain plant and machinery for manufacturing, fish farming, and tourist hotels benefit from a 50% allowance in the first year, with the normal rates applying to the remaining balance in subsequent years. There is an immediate write-off of expenditures on plant and machinery used in agriculture.

Expenditures on buildings qualify for a depreciation allowance of 5% per year on a straight-line basis. For intangible assets, the write-off is over the useful life of the asset.

Apart from the immediate write-off of plant and machinery, agricultural businesses also benefit from the immediate write-off of agricultural improvement expenditures (including the costs of clearing land, excavating irrigation channels, and planting perennial crops or tree bearing crops). Buildings, structures, dams, water reservoirs, fences, and similar works of a permanent nature used in agriculture, livestock, or fish farming are written off on a straight-line basis over five years.

Mining companies are entitled to a 100% capital deduction with respect to capital expenditures on exploration and development.

</tr>
</tbody>
</table>
**Bad debts**
In order to claim relief for bad debts, it is necessary to demonstrate that all reasonable steps have been taken to pursue payment and that there is a reasonable belief that the debt claim will not be satisfied. However, financial institutions should generally be able to claim relief for provisions made in accordance with the standards established by the Bank of Tanzania.

**Net operating losses**
There is no limit on the carry forward period for tax losses. However, there is ring-fencing of tax losses as follows:

- Losses from agricultural business can only be offset against profits derived from agricultural business.
- Foreign source losses can only be offset against foreign source profits.
- Losses on investments can only be offset against investment income.
- Foreign source losses on investments can only be offset against foreign source investment income.

In certain circumstances, tax losses may be forfeited on a change in the underlying control of an entity.

**Group taxation**
There are no provisions for tax consolidation or group relief.

**Transfer pricing**
With respect to transactions between related parties, there is an obligation to 'quantify, apportion, and allocate amounts' for income tax purposes on an arm’s-length basis. If the Commissioner considers that a person has failed to comply with this requirement, he may make such adjustments as he thinks appropriate.

The Commissioner has the power to make counteractive adjustments to a person's tax liability, where he considers that an arrangement is a tax-avoidance arrangement.

**Thin capitalisation**
There is a thin capitalisation restriction on the amount of deductible interest for what are termed ‘exempt-controlled resident entities’, where the debt: equity ratio exceeds 70:30.

**Controlled foreign trusts and corporations**
There are provisions that relate to the treatment of unallocated income of controlled foreign trusts and corporations; however, in practice, this is more of academic interest as there is limited outward investment from Tanzania.

**Anti-avoidance**
Other anti-avoidance provisions include the following:

- A change in the underlying control of an entity, accompanied by some change in the conduct of the business.
- Income or dividend stripping arrangements.
- Income splitting.
Tanzania

**Tax credits and incentives**

**Agriculture, manufacturing, mining, and tourism**

Tax incentives by way of generous capital deduction provisions are given for specific sectors, namely agriculture, manufacturing, mining, and tourism. See the Deductions section for further details.

**Export processing zones, special economic zones**

There are special benefits for export processing zones (EPZ) and special economic zones (SEZ). Included in the benefits available to a person licensed to carry on business in an EPZ, as well as to SEZ investors selling in export markets, are a ten-year income tax holiday and WHT holiday, subject to a requirement to export at least 80% of production.

**Foreign tax credits**

A credit is automatically given for foreign tax paid by a resident on foreign income, but such credit may not exceed the Tanzanian tax rate applicable to that income. Any unrelieved amount of foreign tax credit may be carried forward (subject to the 'change of control' provisions). An election also may be made to claim relief as an expense instead of as a credit.

**Double tax treaties**

Double tax treaties are in force with Canada, Denmark, Finland, India, Italy, Norway, South Africa, Sweden, and Zambia. In certain circumstances, these may reduce the WHT rates.
**Tax administration**

While the year of income for tax purposes is the calendar year, an entity may apply to use its own accounting period rather than the calendar year.

Taxable income and deductible expenditure is quantified in TZS. The Commissioner does have the power by notice in writing to permit quantification in a foreign currency convertible to TZS.

**Returns**

A statement of estimated tax payable, which contains an estimate of the chargeable income and the tax payable thereon, is due for submission within three months from the beginning of the accounting period. A final tax return must be furnished within six months from the end of the accounting period. WHT returns must be submitted every half year. A late filing penalty applies monthly at an amount equal to the higher of (i) TZS 100,000 or (ii) 2.5% applied to unpaid tax. If estimated tax is significantly underestimated, a penalty may also apply.

**Payment of tax**

Instalment tax is payable in four equal instalments not later than three months, six months, nine months, and 12 months from the beginning of the accounting period. Final tax is payable on the date on which the final return is due for submission, namely six months after the end of the accounting period. WHT is due seven days after the month of deduction. Interest on late payment is charged at the Bank of Tanzania discount rate plus 5%.

Significant developments

Privileges for sustainable investment
In April 2010, the Board of Investment (BOI) launched a new policy in regard to sustainable investment by stipulating that all areas of the country, except Bangkok, will be designated as Investment Promotion Zones until December 2012.

Additional tax incentives for regional operating headquarters (ROH)
A new package of tax incentives available to ROH was introduced in November 2010 which gave taxpayers the right to choose whether to follow the old or the new package. However, an application to switch to the new package by an existing ROH may not be made after 14 November 2015. For further details, see Regional operating headquarters (ROH) in the Tax credits and incentives section.

Tax incentives for international procurement center (IPC)
As of 5 May 2011, a 15% corporate income tax rate is granted to qualified income under the IPC, a company established in Thailand for five consecutive years. For further details, see International procurement center (IPC) in the Tax credits and incentives section.

Withholding tax (WHT)
As of 13 October 2010, the following income earned by a foreign company not carrying on business in Thailand, which was previously exempt from tax, is subject to 15% WHT in respect of new investments:

- Interest on bonds/debentures issued by state enterprises.
- Difference between the redemption price and the initial sale price of bonds issued by the government, state enterprises, and specified institutions.
- Gains on the transfer of bonds issued by the government, state enterprises, and specified institutions.

Taxes on corporate income

Corporate income tax (CIT) is generally paid at a flat rate of 30% on net taxable profits.

Thailand incorporated companies are taxed on worldwide income. A foreign incorporated company is taxed on profits arising from or in consequence of the business carried on in Thailand. A foreign company not carrying on business in Thailand is subject to a WHT on certain types of assessable income (e.g. interest, dividends, royalties, rentals, and service fees) paid from or in Thailand. The rate of WHT is generally 15%, except for dividends which is 10%, while other rates may apply under the provisions of double tax treaties.
Reduced rates for listed companies
A CIT reduction to 25% and 20% respectively is given to companies listed by 31 December 2009 on the Stock Exchange of Thailand (SET) and the Market for Alternative Investment (MAI), the trading board established by the SET. The rates are generally for three years depending on the date of listing.

Listed companies other than those described above are eligible for a reduced CIT rate in the following manners:

<table>
<thead>
<tr>
<th>Companies listed on the SET</th>
<th>Rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Net profit (THB)</td>
<td></td>
</tr>
<tr>
<td>0 to 300,000,000</td>
<td>25</td>
</tr>
<tr>
<td>Over 300,000,000</td>
<td>30</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Companies listed on the MAI</th>
<th>Rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Net profit (THB)</td>
<td></td>
</tr>
<tr>
<td>0 to 20,000,000</td>
<td>20</td>
</tr>
<tr>
<td>Over 20,000,000</td>
<td>30</td>
</tr>
</tbody>
</table>

*Thai baht

These rates apply for three accounting periods commencing from the accounting period beginning on or after 1 January 2008.

Reduced rates for companies with low paid-in capital
Companies and juristic partnerships with paid-in capital not exceeding THB 5 million at the end of any accounting period are subject to CIT at the following reduced rates:

<table>
<thead>
<tr>
<th>Net profit (THB)</th>
<th>Rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>0 to 150,000</td>
<td>0</td>
</tr>
<tr>
<td>150,001 to 1,000,000</td>
<td>15</td>
</tr>
<tr>
<td>1,000,001 to 3,000,000</td>
<td>25</td>
</tr>
<tr>
<td>Over 3,000,000</td>
<td>30</td>
</tr>
</tbody>
</table>

Reduced rates for banks
Banks are subject to CIT at the rate of 10% with respect to profits derived from lending to non-Thai residents from foreign currency funds obtained from non-Thai sources (so-called ‘out-out’ business).

Petroleum income tax
Taxation on income from petroleum operations is imposed on petroleum concessionaire companies by the Petroleum Income Tax Acts (PITA). Companies taxed under the PITA are exempt from taxes and duties on income imposed under the Revenue Code and under any other laws. The exemption applies so long as the company pays taxes and duties on income subject to the PITA or on dividends paid out of income subject to the PITA.

Petroleum companies are taxed at the rate of 50% of their annual net profit from petroleum operations, including profit from the transfer of their concession interests and other activities incidental to petroleum operations. Deductions are allowed for ‘ordinary and necessary’ business expenses, as well as depreciation on capital.
expenditure, petroleum royalties, and other charges. Certain types of expenses are specifically disallowed for deduction, including interest.

Corporate residence

Corporate residence is determined by the place of incorporation. A company incorporated under the laws of Thailand is a resident company.

A company incorporated abroad is subject to CIT in Thailand if it is considered to be carrying on business in Thailand. The term 'carrying on business in Thailand' is broad and, subject to the provisions of double taxation treaties (DTT), includes the presence of an employee, representative, or go-between that results in a foreign corporation deriving income or gains in Thailand.

Other taxes

Value-added tax (VAT)

VAT is levied at the current rate of 7% (which will be adjusted to a normal 10% rate after September 2012), except on exports, which are zero-rated, and a number of exempt goods and services (e.g. basic groceries, education, health care, interest, leasing of immovable property, and sale of real estate).

Specific business tax (SBT)

SBT is collected on the gross revenue of certain businesses, not subject to VAT, at fixed rates. Commercial banking, similar financial businesses, and the sale of immovable property are taxed at 3% and life insurance at 2.5%.

The rate of SBT has been reduced to 0.01% for certain revenue derived by commercial banks and finance, securities, and credit foncier businesses as well as businesses with regular transactions similar to commercial banking.

An additional 10% of SBT is levied as municipality tax.

Stamp duty

Stamp duty is levied on 28 different types of documents and instruments, including contracts for hire of work, loans, share transfers, leases of land or buildings, and insurance policies. The rate of stamp duty varies depending on the type on agreement, but ranges from THB 1 per THB 1,000 of value on most contracts and agreements to a fixed amount per instrument on most commercial and other documents. Unstamped documents are not admissible as evidence in a civil lawsuit, and the surcharge can be as high as 600% of the duties for failure to pay the stamp duty on a timely basis.

Customs duties

Basis of taxation

Customs duties are imposed under the Customs Act and the Customs Tariff Decree. Customs duties are collected on both imports and a very limited number of exports. Classification of imports is based on the Harmonized Commodity Description and Coding System (the so-called ‘Harmonized System’). Thailand has adopted the ASEAN Harmonized Tariff Nomenclature (‘AHTN’) 2007, which is based on the Harmonized System 2007, as its latest import tariff nomenclature.
Duties are levied on a specific or an *ad valorem* basis, whichever is the higher, and the applied *ad valorem* duties range between 0% and 80%. Exemptions from import duties are available on particular items of goods as prescribed in the Customs Tariff Decree. Preferential duty rates are available on imported goods from countries that have a preferential free trade agreement (FTA) with Thailand.

Currently, Thailand has FTAs with the following countries:

- ASEAN member states (i.e. Singapore, Vietnam, Malaysia, Indonesia, Philippines, Cambodia, Laos, Myanmar, and Brunei).
- Peru (not yet entered into force as of April 2011).
- New Zealand.
- Australia.
- India.
- Japan.

Also, as part of ASEAN, Thailand has preferential trade agreements with the following countries:

- China.
- Korea.
- Japan.
- Australia and New Zealand.
- India.

Generally, the value of imports is based on their CIF (cost, insurance, and freight), whereas exported goods are based on their FOB (free on board).

Thailand has implemented the World Trade Organization (WTO) Valuation Agreement. The primary basis for the customs value is transaction value (i.e. the price actually paid or payable for the goods when sold for export). This is subject to adjustments for certain elements which are considered to form a part of the value for customs purposes, but are not yet included in the selling price. If the declared price is evidently low or is unlikely to be the true value of such goods, Thai Customs will dispute the declared price.

**Customs incentives schemes**
Various customs incentives schemes, each with its own specific conditions and duty privileges, are available in Thailand, including the following:

- Duty and tax compensation (‘Tax Coupons’).
- Duty drawback under Section 19 bis for imported raw materials used in export production.
- Duty drawback for re-export in the same state under Section 19.
- Free zones (Customs or Industrial Estate Authority of Thailand Free Zones).
- Manufacturing bonded warehouses.
- General bonded warehouses.
- BOI promotion.

**Excise tax**

**Basis of taxation**
Excise tax is imposed on the sale of a selected range of commodities, whether manufactured locally or imported. Tax rates are based on *ad valorem* or a specific rate, whichever is higher. Tax liabilities arise on locally manufactured goods when leaving the factory and at the time of importation for imported goods.
Thailand

**Taxable goods and services**
- Fuel oil and petroleum products.
- Certain non-alcoholic beverages.
- Certain electrical appliances.
- Crystal glassware.
- Motor vehicles.
- Boats.
- Perfume products and cosmetics.
- Entertaining services, turf courses, and golf courses.
- Alcoholic beverages.
- Cigarettes containing tobacco.
- Woollen carpets.
- Motor bicycles.
- Batteries.
- Playing cards.
- Ozone depleting substances.

**Local taxes**
There are three major local taxes:

**Household and land tax**
Household and land tax is levied at 12.5% of assessable economic rental income.

**Signboard tax**
Signboard tax is levied at varying rates according to size. The minimum tax is THB 200 per annum.

**Local development tax**
Local development tax is levied at rates ranging between 0.25% and 0.95% of the value of land assessed by local authorities. This tax does not apply if the property is subject to household and land tax.

**Capital taxes**
There are no capital taxes in Thailand.

**Branch income**
Branches of foreign corporations pay income tax at the corporate tax rate on locally earned profits only. Branch profits remitted to the foreign head office are subject to additional tax at the rate of 10%. However, this is a tax on disposition of profits abroad and is not limited to remittances. For example, a credit of profits to the head office account in the books is held to be a disposition of profits abroad even though no remittance of funds takes place.

**Income determination**

**Inventory valuation**
Inventory is valued at the lower of cost or market price. Any recognised method of ascertaining the cost price may be used, but a change in the method may be made only with the prior approval of the director-general of the Revenue Department. Conformity between book and tax reporting is required.
Capital gains
There is no specific legislation governing capital gains. All capital gains earned by a Thai company are treated as ordinary revenue for tax purposes. Capital gains on the sale of investments derived from or in Thailand by a foreign company not carrying on business in Thailand are subject to a tax of 15%, withheld at source by the purchaser, unless otherwise exempt under a DTT.

As of 13 October 2010, gains earned by a foreign company not carrying on business in Thailand on sale of bonds issued by the government, state enterprises, and specified institutions are subject to a WHT of 15%.

Dividend income
Dividends received from a Thai company by a company listed on the SET are exempt from tax. Dividends received by a non-listed company from other Thai companies are also exempt from tax, provided that the company receiving the dividends holds at least 25% of the total voting shares without any cross-shareholding. The tax exemption applies on the condition that the shares must be held for at least three months before and three months after the dividends are received.

In other cases, where one Thai company receives dividends from another Thai company, one half thereof is exempt from tax.

Dividends received from outbound investment are exempt from tax provided that the Thai company receiving the dividends holds at least 25% of the shares with voting rights of the company paying the dividends for a period of not less than six months before the date on which the dividends are received and the dividends must be derived from net profit in the foreign country taxed at a rate of not less than 15%. In the event that a ‘special law’ in a particular foreign country provides a reduced tax rate or exemption for the net profit, the limited company which receives the dividends is still eligible for tax exemption.

Share of profits received by a Thai company or a foreign company carrying on business in Thailand from an unincorporated joint venture carrying on business in Thailand are exempt from CIT.

Stock dividends
Stock dividends are taxable to the recipient as ordinary income.

Foreign income
Only Thailand incorporated companies are taxed on worldwide income. The Revenue Code does not describe how foreign income received by a Thailand-incorporated company is taxed, but the Revenue Department regards foreign branch income as taxable when earned and foreign dividend income as taxable when received. Double taxation is relieved by way of a credit against the tax chargeable in Thailand (see Foreign tax credit in the Tax credits and incentives section).

Deductions
Depreciation, amortization, and depletion
Deductions for wear and tear and depreciation are allowed as a percentage of cost. If the rate of deduction adopted by a company under its own accounting method is lower than the statutory percentage of cost, a deduction will be allowed only at the rate adopted by the company. The straight-line basis is the method most commonly used by
Thailand

companies, but any generally accepted basis, such as sum-of-the-years-digits method or double declining method, is permitted. Statutory rates are as shown:

<table>

</tr>
</tbody>
</table>

Special depreciation methods for certain assets may be applied as follows:

- Machinery and equipment for research and development (R&D) may initially be depreciated at 40% of cost with the remaining balance being depreciated at the above statutory rate of 20% per annum.
- Computer hardware and software may be depreciated within three accounting periods.
- Fixed assets, excluding vehicles, land, buildings, and intangible assets of taxpayers operating in the tourism business under the law governing Thailand tourism, which have been purchased or the ownership transferred for the taxpayer’s own business use, may initially be depreciated at 60% of cost on the acquisition date. The remaining cost should then be depreciated according to the normal depreciation method, which is a maximum of 20% per annum. The initial depreciation can be used for assets acquired and ready for use from 14 October 2010 until 31 December 2011.

**Special depreciation method for small companies**

Companies and juristic partnerships with fixed assets, excluding land, at a value of no more than THB 200 million and with no more than 200 employees are entitled to the following special depreciation methods in addition to those noted previously:

- Machinery and equipment may initially be depreciated at 40% of cost, and the remaining balance is then depreciated at the prescribed rate.
- Computer hardware and software may initially be depreciated at 40% of cost, and the remaining balance is then depreciated within three accounting periods.
- Factory buildings may initially be depreciated at 25% of cost, and the remaining balance is then depreciated at the prescribed rate.
Charitable contributions
Deductions for allowable charitable contributions and certain other donations may not exceed 2% of net taxable profits. Deductions for educational support as approved by the Ministry of Education may be allowed at the rate of 200% of the actual expense, but not exceeding 10% of net profit before deductions of the allowable charitable contributions and certain other donations. Furthermore, deductions for the support of public recreational facilities may also be allowed at the rate 200% of the actual expense, but not exceeding 10% of net profit before deductions of the allowable charitable contributions and certain other donations after including the educational support expense.

Taxes
In general, all taxes are deductible except CIT and VAT together with fines, penalties, and surcharges charged under the Revenue Code.

Non-deductible expenses
There are list of non-deductible expenses, including, but not limited to, the following:

- Expenses having nature of provisions or reserves.
- Contributions to any fund (except an approved provident fund).
- Bad debt written off which is not consistent with the rules, procedures, and conditions prescribed by the Ministerial Regulations.

Net operating losses
Losses may be carried forward for the following five accounting periods. Carryback of losses is not permitted. A change in control of a loss company does not impact its loss carryforward.

Payments to foreign affiliates
A Thailand incorporated company may claim a deduction for royalties, management service fees, and interest charges, provided they are expended exclusively for the purpose of generating profits or for purposes of business in Thailand and are determined on an arm’s-length basis.

Group taxation
Group taxation is not permitted in Thailand.

Transfer pricing
Thailand has no detailed transfer pricing legislation. However, transfer pricing guidelines issued by the Revenue Department define the term ‘market price’, detail the permitted transfer methods, describe the transfer pricing documentation requirements, and allow taxpayers to apply for advance pricing agreements (APAs) in respect of any intended related party transaction.

The transfer pricing guidelines do not have the status of legislation but are internal directives that the Revenue officials must adhere to when conducting tax audits, reviews, or investigations. The guidelines are also intended to inform taxpayers about transfer pricing practices.

The guidelines authorize the use of both transactional transfer pricing methods (e.g. the comparable uncontrolled price, the resale price, and the cost plus methods) as well as profit based methods, in order to determine the market price of a transaction. No
one method is preferred over another, and there is no hierarchy of acceptable methods. Although the Revenue Department would generally accept a taxpayer’s chosen method, it retains the right to select an alternative method if it deems it to be more appropriate.

**Thin capitalisation**
Under the tax law, there are no thin capitalisation rules or prescribed debt to equity rules in Thailand.

---

**Tax credits and incentives**
The Board of Investment (BOI), by virtue of the Investment Promotion Act, provides tax incentives to certain activities within the following categories:

- Agriculture and agricultural products.
- Mining, ceramics, and basis metals.
- Light industry.
- Metal products, machinery, and transport equipment.
- Electronic industry and electrical appliance.
- Chemicals, paper, and plastics.
- Service and public utilities.

The tax incentives available include the following:

- Exemption from or reductions of import duties on imported machinery.
- Exemption from import duties on raw materials and components imported for manufacturing for export.
- A reduction of up to 90% of import duties on raw or essential materials imported for manufacturing for domestic sale.
- Exemption from CIT equal to the investment, excluding the cost of land and working capital, for up to eight years depending on the promoted activity and location.
- Exclusion of dividends derived from promoted enterprises from taxable income during the period of exemption from CIT.

Additional incentives for enterprises located in an industrial estate or promotion zone include the following:

- Reduction of 50% of CIT for five years after the end of the tax holiday.
- Double deduction from taxable income of the cost of transportation, electricity, and water supply.

**Privileges for sustainable investment**
In April 2010, the BOI launched a new policy in regard to sustainable investment by stipulating that all areas of the country, except Bangkok, will be designated as Investment Promotion Zones until December 2012. The BOI also provides special privileges to target industries, which have been classified in three categories as follows:

- Activities related to energy conservation and alternative energy.
- Activities related to eco-friendly materials and products.
- High-technology businesses.

Any activity which is classified under the above categories will obtain special privileges as a priority activity, e.g. CIT exemption for a period of eight years with no limit on the
amount, import duty exemption for the import of machinery, 50% reduction in the rate of CIT on net profit for five years after the end of the tax holiday, etc.

Applications for the above measures must be submitted before 31 December 2012.

Special development zone
A special development zone has been established in five provinces in the far south of Thailand in which a company or juristic partnership located therein will be subject to CIT at the rate of 3% for the revenue earned from the manufacture or sale of goods or provision of services from the accounting period that begins on or after 1 January 2010, until the accounting period that ends on or after 31 December 2012.

Regional operating headquarters (ROH)
ROH means a company organised under the Thai law providing administrative, technical assistance, or supporting services to its domestic or overseas affiliated enterprises or branches in at least three countries other than Thailand with a paid-in capital of at least THB 10 million on the last day of any accounting period.

Tax incentives available to ROH are under two packages, known as the old and the new package, either of which taxpayers may elect to follow. However, the applications to obtain the privilege under the new package have to be made before 14 November 2015.

The following corporate tax incentives are available under the old package:

- 10% CIT on income from affiliated enterprises and branches for services rendered, including administrative services, technical assistance, management, R&D, or training.
- 10% CIT on interest income received as a result of re-lending to affiliated enterprises or branches funds borrowed by the ROH.
- 10% CIT on royalty income derived from affiliated enterprises and branches and which is generated from R&D work performed in Thailand.
- CIT exemption on dividends received from domestic and overseas affiliated enterprises and branches.

The corporate tax incentives available under the new package are as follows:

- In the case where service fees and royalties received by the ROH from associated enterprises in foreign countries amount to at least 50% of the total income of the ROH (ROH income plus non-ROH income):
  - CIT exemption for ten years on service income derived from foreign branches or associated enterprises of the ROH (see Note below).
  - 10% CIT for ten years on service income derived from domestic branches or associated enterprises of the ROH and on qualified royalties and qualified interest income (see Note below).
  - CIT exemption for ten years on dividends received by ROH from associated enterprises (see Note below).
  - WHT exemption on dividends received by foreign corporate shareholders not carrying on business in Thailand from the qualified ROH profit.
- In the case where service fees and royalties received by the ROH from associated enterprises in foreign countries amount to less than 50% of the total income of the ROH (ROH income plus non-ROH income):
  - CIT exemption for ten years on service income derived from foreign branches or associated enterprises of the ROH (see Note below).
Thailand

- 10% CIT for ten years on service income derived from domestic branches or associated enterprises of the ROH (see Note below).

Note: The corporate tax benefits will be extended to 15 years provided that as at the end of the tenth fiscal year, the accumulated business spending paid to recipients in Thailand for ten fiscal periods has exceeded THB 150 million.

**International procurement center (IPC)**
The IPC will be subject to CIT on its net profit from qualified income at the rate of 15% for five consecutive accounting periods. IPC refers to a company established under Thai law carrying on the business of procuring and selling goods, raw materials, and parts to affiliated companies.

Qualified income includes:

- Income from procuring and selling goods outside Thailand to affiliated companies situated abroad whereby the goods must not be brought into Thailand.
- Income from procuring parts and raw materials either in Thailand or abroad for sale to affiliated companies situated abroad for manufacturing goods outside Thailand by the affiliates.

Applications to obtain the privilege must be submitted within two years from 6 May 2011.

**Foreign tax credit**
A Thai company can use foreign tax paid on business income or dividends as a credit against its CIT liability. However, the credit cannot exceed the amount of Thai tax on the income.

</table>
Notes

1. The zero-rate applies to a recipient company listed on the SET.
2. The 1% rate applies to interest paid to all resident corporations other than banks or finance companies, except where interest arises from bonds or debentures.
3. The progressive rate is in accordance with the personal income tax schedule.
4. The 10% rate applies to interest paid to a recipient that is a bank or financial institution (including an insurance company).
5. The 5% rate applies to royalties paid for the use of any copyright of literary, artistic, or scientific work excluding cinematograph films and films, tapes or discs for radio, or television broadcasting.
6. The 5% rate applies to royalties paid for the production or reproduction of any literary, dramatic, musical, or artistic work excluding royalties with respect to motion picture films and works on film or videotape for use in connection with television.
7. The 5% rate applies to royalties paid for the use of any copyright of literary, dramatic, musical, or artistic work including software, cinematograph films or films or tapes used for radio or television broadcasting; and the 10% rate applies to royalties paid for the use of industrial, commercial, or scientific equipment or for information concerning industrial, commercial, or scientific experience.
8. The 5% rate applies to royalties paid for the alienation or the use of any copyright of literary, artistic, or scientific work excluding cinematograph films or films or tapes used for radio or television broadcasting, and the 10% rate for the alienation of any patent, trademark, design, or model, plan, secret formula, or process.
9. The 5% rate applies to royalties paid for the use of any copyright of literary, artistic, or scientific work.
10. The 3% rate applies to interest paid on loans or credits granted for four years or more with the participation of a financing public institution to a statutory body or to an enterprise in relation to the sale of any equipment or to the survey, the installation, or the supply of industrial, commercial, or scientific premises and of public works. The 10% rate applies to interest paid to any financial institution.
11. The zero-rate applies to royalties paid to a contracting state or state-owned company with respect to films or tapes, and the 5% rate to royalties for the alienation or the use of any copyright of literary, artistic, or scientific work.
12. The 10% rate applies to (a) interest paid to a bank or financial institution (including an insurance company) and (b) interest paid with respect to indebtedness arising as a consequence of a sale on credit of any equipment, merchandise, or services, except where the sale was between persons not dealing with each other at arm’s length.
13. The 5% rate applies to royalties paid for the use or the right to use any copyright of literary, artistic, or scientific work and the 10% rate for the use or the right to use any patent, trademark, design, or model, plan, secret formula, or process.
14. The 5% rate applies to royalties paid for the use of any copyright of literary, artistic, or scientific work excluding cinematograph films or films, tapes used for radio, or television broadcasting.
15. The 10% rate applies to royalties paid for the use of any copyright; or the use of, or the right to use, any industrial, scientific, or commercial equipment; or the use of, or the right to use, any motion picture film, or film or videotape or any other recording for use in connection with television, or tape or any other recording for use in connection with radio broadcasting; or the reception of, or the right to receive, visual images or sounds, or both, transmitted to the public by satellite or cable, optic fibre, or similar technology; or the use in connection with television or radio broadcasting, or the right to use in connection with television or radio broadcasting, visual images, or sounds, or both, transmitted by satellite or cable, optic fibre, or similar technology.
16. The 5% rate applies to royalties paid for the use of any copyright of literary, artistic, or scientific work, and the 10% rate applies to royalties paid for the use or the right to use industrial, commercial, or scientific equipment.
17. The 10% rate applies to (a) interest paid to a bank or financial institution (including an insurance company) and (b) interest from a loan or debt claim that is guaranteed by the government.
18. The zero-rate applies to royalties paid to a contracting state or a state-owned company with respect to films or tapes, and the 10% rate applies to royalties paid for the alienation or the use of any copyright of literary, artistic, or scientific work.
19. The 5% rate applies to royalties paid for the alienation or the use or the right to use any copyright of literary, artistic, or scientific work excluding cinematograph films or films or tapes used for television or broadcasting.
20. The 10% rate applies to royalties paid for the use of, or the right to use, any copyright of literary or artistic work including motion pictures, live broadcasting, film, tape, or other means of the use or reproduction in connection with radio and television broadcasting, and for the use of, or the right to use industrial, commercial, or scientific equipment.
21. The 5% rate applies to royalties paid for the use of any copyright of literary, dramatic, musical, artistic, or scientific work excluding cinematograph films or films or tapes used for radio or television broadcasting. The 8% rate applies to royalties in consideration of financial leasing for the use of, or the right to use, industrial, commercial, or scientific equipment.
22. The 5% rate applies to royalties paid for the use of any copyright of literary, artistic, or scientific work including software, motion pictures, and works on film, tape, or other means of reproduction for use in connection with radio or television broadcasting. The 8% rate applies to royalties paid for the use of industrial, commercial, or scientific equipment.
23. The 10% rate applies to interest paid (a) to a recipient that is a bank or financial institution (including an insurance company); (b) in connection with the sale on credit of any industrial, commercial, or scientific equipment; or (c) in connection with the sale on credit of any merchandise by one enterprise to another enterprise.

24. The 10% rate applies to interest paid (a) to a recipient that is a bank or financial institution (including an insurance company); or (b) with respect to indebtedness arising as a consequence of a sale on credit of any equipment, merchandise or services, except where the sale was between persons not dealing with each other at arm's length.

25. The 5% rate applies to royalties paid for the use of or the right to use any copyright of literary, artistic, or scientific work including software, and motion pictures and works on film, tape, or other means of reproduction for use in connection with radio or television broadcasting and the 10% rate for the use of or the right to use any patent, trademark, design, or model, plan, secret formula, or process.

26. The 10% rate applies to interest paid to the following recipients (a) in the case of a resident of Russia, any institution having a license to carry on banking operations; and (b) in the case of a resident of Thailand, any financial institution (including an insurance company).

27. The 10% rate applies to royalties paid for the use of, or the right to use, any copyright of literary, artistic, or scientific work, or for the use of, or the right to use, industrial, commercial, or scientific equipment.

28. In case of interest arising in Thailand, the 10% rate applies to interest paid to a Philippines financial institution (including an insurance company). In the case of interest arising in the Philippines, the 10% rate applies in respect of public issues of bonds, debentures, or similar obligations.

Tax administration

Returns
The Thai system is one of self-assessment. A company prepares and files its tax returns by the due dates and at the same time pays the taxes calculated to be due.

The tax year for a company is its accounting period, which must be of 12 months’ duration. However, it may be less than 12 months in the case of the first accounting period after incorporation, the accounting period of dissolution, or after approval for a change in the accounting period has been received from the Revenue Department and the Business Development Department.

Payment of tax
CIT is paid twice in each year. A half-year return must be filed within two months after the end of the first six months of an accounting period. The tax to be paid is computed on one-half of the estimated profit for the full accounting period, except for listed companies, banks, certain other financial institutions, and other companies under prescribed conditions where the tax is based on the actual net profit for the first six months. The balance of the tax due is payable within 150 days from the closing date of the accounting period, along with the annual tax return. Credit is given for the amount of tax paid at the half-year.

**Significant developments**

**Draft Turkish commercial code (TCC) adopted**

The draft TCC, which will be effective as of 1 July 2012, was adopted on 12 January 2011 by the General Assembly of the Turkish Parliament. The TCC brings radical changes into the world of business and the economy in commercial life and brings the following changes that are hereto expressed in general terms:

- Corporate governance is actually a codex that should be applied to all enterprises in order to inspire investors with confidence and ensure sustainable development. The corporate governance approach of TCC has been based on four pillars: (i) Full transparency, (ii) Fairness, (iii) Accountability, and (iv) Responsibility.
- In the TCC, every capital stock company has been obligated to create a website, and if the company already has a website, to allocate a part thereof for information society services.
- A group of companies, which is created for the specific purpose of managing more than one capital stock company according to predetermined and concrete policies within the context of controlling relationships, has been regulated for the first time in Turkish law by the TCC.
- The TCC has regulated the structural changes in companies (i.e. division, merger, and conversion). Most of these provisions relate to protecting the partners, the partnership creditors, and the employees and securing their rights and credits.

The TCC also offers a fundamental system change with a reformist understanding and a contemporary evolution in the auditing of capital stock companies. This change is of such a scope and characteristic that it will establish trust in national and international markets and create a new perspective for Turkey. The new audit will be conducted by an independent auditor in compliance with International Auditing Standards (IAS).

**New code of obligations adopted**

The Turkish code of obligations has been adopted as of 11 January 2011. However, promulgation of this new code has been postponed until 1 July 2012. The new code will supersede the former one, which has been in application for more than 80 years.

The most pertinent innovations commonly encountered in commercial life introduced by the new code are described as follows:

- Formation of agreements: One of the most significant amendments contained in the new code relates to the ‘written form requirement’ presented under Articles 14 and 15. Pursuant to the new articles, agreements can be executed with an electronic signature. According to Article 14 of the new code, in line with the law on electronic signature No. 5070, secure electronic signatures or confirmed fax and any other
communication instruments, which are able to be sent and stored, may be valid and binding.

- Contractual rate of interest and default interest: The new code creates significant changes in favor of the debtor on the contractual rate of interest and the calculation of default rates. High interest rates that are determined by the creditors are prohibited by the new amendments. One of the most important innovations introduced by the new code is that the percentage of the interest and the default interest may not exceed the fixed percentages.

- Risk liability: Under Article 70 of the new code, if damage occurs due to the activities of a significantly dangerous enterprise, the owner of the enterprise shall be held liable together with the operator, if any. Therefore, even if permissions and licenses required for activities of such enterprise are dully obtained, persons who are in charge of the operating activities of the dangerous enterprise will be liable for ordinary risks which may arise from typical damage.

- Guarantee agreements: Pursuant to Article 383 of the new code, a guarantee will not be valid unless it has been executed in writing and unless the maximum amount under the responsibility of the guarantor and the date of the guarantee is clearly stated. Nevertheless, the maximum amount under the responsibility of the guarantor and the date of guarantee may be determined by the handwriting of the guarantor. Amendments adopted after the execution of a guarantee agreement that raise the responsibility of the guarantor will not be valid unless such amendments were made in compliance with the execution requirements of the guarantee.

---

**Taxes on corporate income**

Corporations are liable for corporate income tax (CIT) at a rate of 20% on net profits generated, as adjusted for exemptions and deductions and including prior-year losses carried forward, to a limited extent.

According to Turkish tax legislation, income taxation differs significantly based on the taxpayer’s place of residence. Resident entities are subject to tax on their worldwide income, whereas non-resident entities are taxed solely on the income derived from activities in Turkey.

---

**Corporate residence**

If both the legal and the business headquarters of a company are located outside Turkey, the company is regarded as a non-resident entity for Turkish tax purposes. If one of these headquarters is located within Turkey, the company is regarded as a resident entity for Turkish tax purposes.

Note that there is no distinction between CIT and value-added tax (VAT) registration in Turkey. Therefore, corporations or PEs are liable for all taxes (e.g. CIT, VAT, withholding tax, stamp tax) once they are registered for tax purposes in Turkey.

**Permanent establishment (PE)**

Unlike the provisions of the Organisation for Economic Co-operation and Development (OECD) Model Tax Convention on Income and on Capital, there is no minimum period of presence in Turkey before a presence is regarded under the Turkish tax legislation as a PE. In this regard, we believe that the PE evaluation should be made for each case depending on the merit of the cases both from a local legislation perspective and from a treaty (if applicable) perspective.
Turkey

Other taxes

Value-added tax (VAT)
Deliveries of goods and services are subject to VAT at rates varying from 1% to 18%. The general rate is 18%. VAT payable on local purchases and on imports is regarded as 'input VAT', and VAT calculated and collected on sales is considered 'output VAT'. Input VAT is offset against output VAT in the VAT return filed at the related tax office. If output VAT is in excess of input VAT, the excess amount is paid to the related tax office. Conversely, if input VAT exceeds output VAT, the balance is carried forward to the following months to be offset against future output VAT. With the exception of a few situations such as exportation and sales to an investment incentive holder, there is no cash refund to recover excess input VAT.

Turkish VAT principles contain a 'reverse-charge VAT mechanism', which requires the calculation of VAT by resident entities on payments to persons in foreign countries. Under this mechanism, VAT is calculated and paid to the related tax office by the resident entity. The resident entity treats this VAT as input VAT and offsets it in the same month. This VAT does not create a tax burden for the resident or non-resident entity, except for its cash flow effect on the former if there is insufficient output VAT to offset the input VAT.

Banking and insurance transactions tax (BITT)
The transactions being performed by licensed banks and insurance companies are generally exempt from VAT but are subject to BITT at a rate of 5%, which is due on the gains of such corporations from their transactions.

The purchase of goods and services by banks and insurance companies are subject to VAT, but this is considered an expense or cost item. Therefore, it is not recoverable (i.e. for VAT purposes by offsetting against the output VAT) in the hands of these corporations.

Property taxes
Buildings and land owned in Turkey are subject to real estate tax at different rates.

Stamp tax
Stamp tax applies to a wide range of documents, including but not limited to agreements, financial statements, and payrolls. Stamp tax is levied as a percentage of the value stated on the agreements at rates varying between 0.165% and 0.825%.

Salary payments are subject to stamp tax at a rate of 0.66% over the gross amounts, whereas a lump-sum stamp tax is calculated for certain types of documents such as the printed copies of the financial statements.

Special consumption tax
There are four main product groups that are subject to special consumption tax:

- Petroleum products, natural gas, lubricating oil, solvents, and derivatives of solvents.
- Automobiles and other vehicles, motorcycles, planes, helicopters, yachts.
- Tobacco and tobacco products, alcoholic beverages.
- Luxury products.

Unlike VAT, which is applied on each delivery, special consumption tax is charged only once (except for some activities such as production).
Resource utilisation support fund (RUSF)
Foreign loans (including trade payables) obtained by Turkish resident individuals or legal entities (except for banks or financial institutions) are subject to RUSF at the following rates:

- 3% over the principal or the interest amount (depends on the currency denomination and on the maturity).
- 0% in case of locally obtained loans.

Customs and foreign trade
PwC Turkey’s customs and foreign trade specialist team would be pleased to assist in determination of customs duties and in providing extensive information regarding the local excise regime.

Branch income
Branches are taxed solely on the income derived from activities in Turkey since they are regarded as non-resident entities for Turkish tax purposes. Branch profits are subject to Turkish CIT at the rate of 20%.

The branch profit transferred to headquarters (i.e. upstream income repatriation) is subject to dividend WHT at a rate of 15%, which might be reduced if there is a bilateral tax treaty between Turkey and the country of which the principal is a resident for income tax purposes. See the Withholding taxes section for a list of countries with which Turkey has an applicable tax treaty.

Income determination
Capital gains
No separate rules exist with respect to capital gains taxation in Turkey. Capital gains and losses are included in the determination of taxable corporate income.

See Capital gains exemption in the Tax credits and incentives section for information about an incentive that can reduce the effective CIT rate on capital gains in certain instances.

Dividend income
In dividend distribution’s between Turkish resident companies, the dividend payer is exempt from WHT and the recipient is exempt from CIT.

Foreign income
In principle, foreign-sourced income is taxable in Turkey. However, foreign-sourced dividend income may also be subject to a participation exemption, if certain conditions are fulfilled. A participation exemption for capital gains generated from a foreign subsidiary may also be available in Turkey, under certain conditions.

Other foreign-sourced income, such as royalties and interest, is fully taxable in Turkey. Partial relief from taxation is granted insofar as the foreign tax paid does not exceed the rate of tax payable for the same income in Turkey.

Although undistributed income of foreign subsidiaries should not be taxable in Turkey, controlled foreign company (CFC) rules should also be taken into consideration in this respect. See CFC rules in the Group taxation section for more information.
Turkey

**Deductions**

Turkish CIT legislation allows a deduction for all the “ordinary and necessary expenses paid or incurred for the generation and sustenance of income during the taxable year in carrying on any trade or business”.

The general principle for tax deductibility is that the payment should be a necessary business expense and it should be properly documented in accordance with the relevant provisions of the Turkish transfer pricing regulations and those in the local tax procedural law.

**Depreciation and amortisation**

Fixed assets are subject to depreciation at rates determined by the Turkish Ministry of Finance, based on their useful life.

Depreciation can be calculated by applying either the straight-line or declining-balance method, at the taxpayer's discretion. The taxpayer may also change the option from declining-balance to straight-line (but not vice versa) at any time during the life of the asset. The applicable rate for the declining-balance method is twice the rate of the straight-line method, subject to certain limitations. Furthermore, in special cases, the tax authorities may determine higher depreciation rates.

Intangible assets are amortised by the straight-line method over their estimated useful lives, if objectively determinable.

Profits or losses on disposal of fixed assets (i.e. the difference between the proceeds and the written-down values) are included in taxable income in the year of disposal. If the renewal of disposed-of assets is considered necessary by the owners of the business concern, the profit accrued may be retained for a certain amount of time. After the purchase of new fixed assets, the profits may be offset against the depreciation of the new assets.

**Bad debts**

Bad and doubtful accounts receivable are deductible under certain conditions. Amounts of the receivables collected afterwards are added to the profits of the year in which they are collected.

**Pensions and employee termination benefits**

Payments for pensions and employee termination benefits are deductible for CIT purposes under certain conditions and are not subject to WHT beyond a certain limit.

**Taxes**

Essentially, the CIT itself and VAT are, subject to certain exceptions, not deductible for CIT purposes.

Fees and duties paid in relation to assets of the company are, in principle, deductible in determining taxable corporate income.

**Net operating losses**

Corporate losses may be carried forward for five years. Losses cannot be carried back.
**Payments to foreign affiliates**  
Charges for royalties and interest by foreign affiliates may be deductible for CIT purposes, provided that transfer pricing and thin capitalisation rules are followed (see the Group taxation section for more information).

**Group taxation**  
Consolidation of the accounts of group companies for tax purposes is not allowed in Turkey since each company is regarded as a separate taxpayer.

**Transfer pricing**  
The new corporate income tax law includes considerable amendments to transfer pricing regulations, using the OECD’s guidelines as a basis. If a taxpayer enters into transactions regarding the sale or purchase of goods and services with related parties in which prices are not set in accordance with the arm’s-length principle, the related profits are considered to have been distributed in a disguised manner through transfer pricing. Such disguised profit distribution through transfer pricing is not accepted as deductible for CIT purposes. The methods prescribed in the law are the traditional transaction methods described in the OECD’s transfer pricing guidelines.

**Thin capitalisation**  
According to local thin capitalisation regulation, if the ratio of the borrowings from shareholders or from persons related to the shareholders exceeds triple the shareholders’ equity of the borrower company at any time within the relevant year, the exceeding portion of the borrowing will be considered thin capital and the corresponding interest will not be deductible. Accordingly, the ratio of loans received from related parties to shareholders’ equity must be no more than three to one in order to eliminate Turkish thin capitalisation issues.

**Controlled foreign company (CFC) rules**  
A CFC is a company established abroad with at least 50% of the organisation controlled directly or indirectly by tax-resident companies and real persons by means of separate or joint participation in the capital or dividends voting rights. A CFC also must meet certain conditions (e.g. 25% or more of its gross revenue must be comprised of passive income), and it must be subject to an effective income tax rate lower than 10% for its commercial profit in its home country.

The CFC’s profit is included in the CIT base of the controlling resident corporation at the rate of the shares controlled, irrespective of whether it is distributed.

**Tax credits and incentives**

**Participation exemption for dividends**  
There is an unconditional CIT and dividend WHT exemption for dividend income between Turkish companies. If a Turkish company has a shareholding in a foreign company, this dividend income is exempt from CIT, under certain conditions.

**Exemption for income from foreign construction and repair activities**  
The profit from construction and repair activities carried out by Turkish corporations in foreign countries may be exempt from CIT in Turkey under the Turkish CIT law. It should be noted that if loss occurs from these activities, it is not possible to deduct this loss amount from the income generated through domestic activities since deduction
Turkey

of a loss relating to foreign activities that are exempt from CIT in Turkey is not allowed for deduction.

**Capital gains exemption**
For capital gains generated from the sale of shares in a Turkish company to another Turkish company, a 75% CIT exemption is applicable under certain conditions. This partial exemption may also be applicable for the capital gains derived from the alienation of real estate investments under certain conditions.

In the event a foreign subsidiary is sold by a Turkish company, a CIT exemption at the rate of 100% is applicable under certain conditions.

**Investment incentives**
The Turkish government provides investment incentives (state aids) to eliminate inter-regional economic imbalance, facilitate a larger capital contribution by public and foreign investors to the capital build-up of the country, and support activities that have a positive effect on employment. Generally speaking, state aid can be classified as either a tax or a non-tax incentive.

The principal prerequisite for benefiting from state aid, except investment allowance, is to obtain an Investment Incentive Certificate (IIC). The IIC is a document granted to investors for their investments by the Undersecretariat for the Treasury. It allows utilisation of the said benefits. The import of machinery and equipment (excluding raw materials, intermediate, and operating products) is exempt from customs duty and RUSF payments. In addition, a VAT exemption is also applicable on the importation of eligible machinery and equipment.

According to investment incentive legislation, in order to obtain an IIC, the minimum amount of total investment should be at least 1 million Turkish liras (TRY).

The advantages of an IIC can be summarised as exemption from customs duty, RUSF, and VAT.

From an income tax perspective, the legislation related to investment incentives has changed substantially. There are six main components of the new investment regulation:

- Reduced CIT rate.
- VAT exemption.
- Exemption for social security premium (employer’s portion).
- Customs duty exemption.
- Interest support.
- Allocation of land for investments.

**Free trade zone**
Free trade zones are special sites that lie geographically within the country but are deemed to be outside the customs territory. In these regions, the normal regulations related to foreign trade and other financial and economic areas are either inapplicable, partly applicable, or superseded by new regulations.

In general, activities such as manufacturing, storage, packing, general trading, banking, insurance, and trade may be performed in Turkish free trade zones. Goods moving between Turkey and the zones are treated, for all purposes, as exports or imports. However, operations within the zones are subject to the supervision of the
zone management (and customs authorities), to whom regular activity reports must be submitted. Consequently, there is a requirement for zone users to maintain full accounting records (in Turkish) with respect to their activities. These accounting requirements extend to inventory records. Customs duty is levied on any unexplained inventory losses as though the goods had been imported into the country.

The right to operate in a free zone is conferred by an operating licence obtained from the Undersecretariat for Foreign Trade, which reviews the application for conformity with the objectives and types of activity specified by the Economic Affairs Coordination Council.

**Portfolio investment income**

In line with the amendments in the Turkish income tax law, being effective 1 January 2006, certain investment income (e.g. capital gains on listed equities acquired after 1 January 2006 and interest and capital gains from domestic government bonds or treasury bills issued after 1 January 2006), derived by non-resident corporations without having a PE in Turkey and by non-resident individuals, is currently subject to WHT at source.

The following investors will qualify for WHT at a rate of 0%:

- Turkish resident capital corporations (limited liability companies, joint stock companies, and commandite companies whose capital is divided into shares).
- Non-resident corporations which have the same characteristics as Turkish capital corporations.
- Turkish investment funds (regulated in accordance with the Capital Markets Board or CMB).
- Non-resident investment funds similar to Turkish investment funds.
- Those non-residents similar to Turkish investment funds and trusts which engage in investment in securities and other capital markets instruments as their only business in Turkey, to derive income and capital gains from these instruments, and to exert the rights attached to these instruments.

WHT is applied at a rate of 10% for both resident and non-resident individuals and for all other entities which are not qualified for 0% WHT (i.e. those who are not listed above).

The withholding will be applied by local intermediary banks, brokerage houses, or local custodian banks, instead of the conventional self-declaration mechanism, and this withholding would be the final taxation in Turkey both for non-residents and Turkish individuals.

**Research and development (R&D) activities**

In the last decade, the Turkish Parliament has enacted several regulations to provide incentives for R&D activities in Turkey. The three primary R&D incentives include significant advantages granted to investors planning R&D activities in science, software, and technology in special zones known as ‘techno-parks’, cash subsidies from the Scientific and Technological Research Council of Turkey (TUBITAK), and corporate tax deductions.

One of the objectives of the special R&D law, which was enacted in 2008, is to attract foreign investors with significant R&D activities abroad to invest in Turkey, by enabling non-resident companies with a subsidiary or branch in Turkey to benefit from R&D tax incentives. The main incentives introduced by this R&D law are listed as follows:
Turkey

R&D deduction
All eligible innovation and R&D expenditures made in technology centres or R&D centres, which must employ at least 50 full-time equivalent R&D personnel, or R&D and innovation projects supported by foundations established by law or international funds can be deducted from the CIT base at a rate of 100%. The same expenditures can also be capitalised and expensed through amortisation over five years in the case of successful projects, whereas the R&D expenditure on failed projects can be expensed immediately.

Companies with separate R&D centres employing more than 500 R&D personnel can, in addition to the aforementioned deduction, deduct half of any increase in R&D expenditures over similar money spent in the previous period.

Any unutilised R&D deduction can be carried forward for an unlimited period of time, indexed to the revaluation rate, which is an approximation of the inflation rate.

Income WHT exemption on salaries
80% of the salary income of eligible R&D and support personnel is exempt from income WHT. However, this rate is increased to 90% for personnel with a doctorate degree.

Support for the contributions to the Turkish social security institution
The Ministry of Finance will pay half the employer portion of social security premiums for R&D and support personnel for five years.

Stamp tax exemption
Documents prepared in relation to R&D activities are exempt from stamp tax.

Foreign tax credit
A partial relief from income taxation is granted for the foreign tax paid that does not exceed the rate of tax payable for the same income in Turkey.

Withholding taxes
There is no WHT on payments to resident corporations by other resident corporations, except for a 3% WHT on progress payments to contractors, both domestic and foreign, within the scope of construction work spanning more than one calendar year.

The local WHT rates are as follows:

Notes

1. The local rate of 10% will be applied in the event a higher rate is stipulated in the agreement.
2. Provisions for WHT at source are effective for amounts paid or credited on or after 1 January 2010.
3. A rate of 10% if the loan or other debt claim is for a period exceeding two years; 15% in all other cases (1).
4. A rate of 10% if the loan is taken for a period exceeding two years; 15% in all other cases (1).
5. A rate of 10% if the loan/credit is taken from a financial institution; 15% in all other cases (1).
6. A rate of 10% if the loan is taken from a bank or a financial institution; 15% in all other cases (1).
7. A rate of 10% if the credit/loan is taken from a bank, financial or savings institution, insurance company; 15% in all other cases (1).
8. A rate of 7.5% if the loan is taken from a financial institution; 10% in all other cases.
9. A rate of 10% if the interest is the result of a loan provided/given by a bank or if the interest is paid in return for an article of merchandise, or equipment given to the contracting state on credit; 15% in all other cases (1).
10. A rate of 10% if the loan is taken from a financial institution, including insurance companies; 15% in all other cases (1).
11. A rate of 10% for the use of, the right to use, or the sale (contingent on the productivity, use, or disposition) of any copyright of literary, artistic, or scientific work, including royalties in respect of motion pictures and works on film, tape, or other means of reproduction for use in connection with radio or television broadcasting, any patent, trademark, design or model, plan, secret formula, or process, or for information concerning, industrial, commercial, or scientific experience; 5% for the use of or the right to use industrial, commercial, or scientific equipment.
12. A rate of 5% for the use of industrial, commercial, or scientific equipment; 10% in all other cases.
13. A rate of 15% for patent, trademark, design or model, plan, secret formula or process, or for information concerning industrial, commercial, or scientific experience; 10% for the use of or the right to use any copyright of literary, artistic, or scientific work including cinematographic films and recordings for radio and television.
14. The treaty has been terminated by Germany. The termination is applied for the periods following 1 January 2011.
15. A rate of 5% in respect of a loan or credit made, guaranteed, or insured for the purposes of promoting export by the Oesterreichische Kontrollbank AG or a similar Turkish public entity the objective of which is to promote the export; 10% if the interest is derived by a bank; 15% in all other cases (1).
16. If the beneficial owner of the ‘income from debt claims’ is a resident of Saudi Arabia, the tax so charged shall not exceed 10% of the gross amount of income.
17. A rate of 10% in respect of a loan or other debt claim for a period exceeding two years or if the interest is received by a financial institution; 15% in all other cases (1).
18. Interest arising in one of the contracting states and paid to the Government of Republic of Turkey or the Central Bank of Turkey shall be exempt from income taxes in the contracting state. Similarly, interest arising in the Republic of Turkey and paid to the Government or the Central Bank of the other contracting state shall be exempt from income taxes in Turkey.

**Turkish WHT on dividends**

Dividend distributions to individuals and to non-resident persons who are shareholders are subject to WHT at a local rate of 15%. This rate might be reduced for non-resident shareholders in the presence of a tax treaty. Please note that dividend distributions to resident entities and branches of non-resident entities are not subject to WHT.

Notes

1. The local rate is 15% for dividends. Unless a lower rate is stated in the Agreement, the local rate is applied.
2. As per the provisions of the protocol amending the agreement, the rate may be (partially or wholly) reduced:
   - For the Netherlands: to 10%, as long as, under the provisions of the Netherlands Company Tax Act and to the future amendments thereto, a company which is a resident of the Netherlands is not charged tax with respect to dividends the company receives from a company which is a resident of Turkey.
   - For Belgium: to 10%, as long as, under the provisions of the Belgian laws and of the future amendments thereto, a company which is a resident of Belgium is not charged tax with respect to dividends the company receives from a company which is a resident of Turkey.
   - For Austria: to 5%, if the beneficial owner is a company (other than a partnership) which holds directly at least 25% of the capital of the company paying the dividends, provided that such dividends are exempt from tax in Austria.
   - For Ireland: to 5%, where the beneficial owner is a company (other than a partnership) which holds directly at least 25% of the voting power of the company paying the dividends. 15% in all other cases.
3. Subject to 5% of the gross amount of the dividends if the recipient is the government, or a public institution which is wholly owned by the government or its political subdivisions, or local authorities of the UAE.
4. The tax rate shall be 15% where the amount of the Turkish tax imposed on the income of the company paying dividends is less than 40% of such income derived in the accounting period ending immediately before the date when such dividends become payable.
5. The income should be subject to full corporate taxation in the hands of the Turkish tax-resident subsidiary.
6. The treaty has been terminated by Germany. The termination is applied for the periods following 1 January 2011.
7. The provisions for WHT at source are effective for amounts paid or credited on or after 1 January 2010.
8. If the beneficial owner of the dividends is a resident of Saudi Arabia, the tax so charged shall not exceed 5% of the gross amount of the dividends provided: (i) the beneficial owner is a company (other than a partnership) which holds directly at least 20% of the capital of the Turkish company paying the dividends or (ii) the beneficial owner is a central bank or an entity which is wholly owned by the government.

9. In case of Turkey, the tax rate shall not exceed 5%, to the extent that they are paid out of profits that have been subject to full rate of CIT in Turkey (i.e. without benefiting from tax exemption).

**Anti-tax haven provisions**

According to the new law, all sorts of payments made to corporations (including branches of resident corporations) that are established or operational in countries that are regarded by the Turkish Council of Ministers to undermine fair tax competition (through taxation or other practices) may be subject to taxation in Turkey through withholding at a rate of 30%.

In the meantime, the Turkish Council of Ministers has not yet determined which countries receiving payments are considered ‘tax havens’.

**Tax administration**

A self-assessment system is used in Turkey.

All Turkish taxes are imposed under laws drafted by or with the involvement of the Turkish Ministry of Finance and are promulgated by the Turkish Parliament. The central government, acting through the Ministry of Finance, imposes most of them, although local authorities have certain rights over some minor transaction charges. Tax procedures are governed by the Turkish tax procedural law.

**Returns**

In principle, residents and non-resident entities having a PE in Turkey are obliged to be registered for all taxes in Turkey (e.g. CIT, VAT, WHT, stamp tax) and file annual CIT returns.

The last date of submission of the CIT return is the 25th day of the fourth month following the fiscal year-end. This date would be 25 April if CIT returns are filed on a calendar-year basis. Note that a different fiscal year is also allowed.

**Payment of tax**

Taxable income is declared on a quarterly-basis as advance tax on the 14th day of the second month following each quarter, and corresponding tax is payable on the 17th day of the same period. Advance CIT paid is offset against the final (i.e. fiscal year-end) CIT calculated in the annual CIT return.

The last date of payment of CIT is the 30th day of the fourth month following the fiscal year-end.

**Corporate income tax certification**

In Turkey, a special kind of tax audit arises called ‘corporate income tax certification’. It is regulated under the provisions of the relevant professional law No. 3568 and is a well-recognized territory-specific service, which is very common for all foreign investors having entities established and tax registered in Turkey.
Under this service, a licensed tax auditor (i.e., a sworn-in financial advisor) audits the accounts of a taxpayer from a tax perspective and certifies the accuracy of the CIT return.

This tax certification service is utilised by the majority of business entities in Turkey because such a process helps identify and take corrective measures against erroneous actions that may otherwise be detected only upon a tax investigation by the Ministry of Finance.

Other issues

For up-to-date information
For up-to-date information on the most recent and significant developments in Turkish tax regulations, please refer to the tax bulletins added to our tax portal, Vergi Portali, which can be accessed at Vergiportali.com.
Significant developments

A new law on accounting and financial reporting establishes a basis for the government’s plan to transition into the international accounting and auditing standards by 2014. Banking institutions are already required to prepare financial reporting according to International Financial Reporting Standards (IFRS) as of 1 January 2011. All other organisations and entities are required to implement phased transition into the new standards as of 1 January 2013. Such developments should improve transparency and enable Turkmenistan to attract more foreign direct investments.

Taxes on corporate income

Residents of Turkmenistan are subject to corporate income tax (CIT) on worldwide income; non-residents are subject to CIT only in respect of their Turkmenistan-sourced income. The CIT base is determined as gross income less allowable deductions.

Branches of foreign legal entities are subject to a 20% CIT, whereas Turkmen legal entities are subject to an 8% CIT.

Companies involved in oil and gas operations are subject to a 20% CIT, irrespective of the legal status/ownership structure.

Special purpose duty for improvement of urban and rural territories

A special duty aimed at improving urban and rural territories is imposed on registered entities (e.g. legal entities and branches). The duty applies at 1% of the taxable base for CIT purposes. Generally, contractors and subcontractors operating under the umbrella of the petroleum law may be exempt from this duty.

Contributions to Agriculture Development and Ashgabat City Development Funds

The contributions to the Agriculture Development Fund and Ashgabat City Development Fund are outside of the general tax legislation (tax code) and are provided for by specific decrees. Permanent establishments (PEs)/branches of foreign legal entities are subject to these contributions on the same terms as local legal entities.

Contribution to the Ashgabat City Development Fund only applies to entities located in Ashgabat City.

The base for the contributions is comprised of the accounting income. The contribution rate for the Agriculture Development Fund is 3%, and the contribution rate for the Ashgabat City Development Fund is 0.5%.
Turkmenistan

Generally, contractors and subcontractors operating under the umbrella of the petroleum law may be exempt from these contributions.

**Corporate residence**

Legal entities are treated as residents for CIT purposes if they are established in accordance with Turkmenistan law or their place of effective management is located in Turkmenistan.

**Permanent establishment (PE)**

The general definition of a PE under domestic legislation is similar to the one per the Organisation for Economic Co-operation and Development (OECD) model convention. A PE is a permanent place of the foreign legal entity in Turkmenistan, through which it, fully or partially, conducts entrepreneurial (commercial) activity, including that through an authorised person.

**Other taxes**

**Value-added tax (VAT)**

VAT is generally payable at the rate of 15%. A zero-rate applies to exports of goods (except for oil and gas) and international transport services. Generally, contractors operating under the umbrella of the petroleum law may be exempt from this tax.

The tax base is sales turnover including excise tax. If a sale is made by state-fixed prices, then the tax base is the respective sales turnover including VAT and excise tax. The amount of input VAT incurred may be offset against the amount of output VAT. The amount of input VAT related to capital expenditures should be capitalised.

**Customs duties**

The import of certain goods into Turkmenistan is subject to customs duties. The taxable base is determined as the customs value of imported goods. Although the list of items that are subject to customs duty is relatively limited (i.e. around 50 items) the rates of customs duties may vary from 5% (e.g. products from cement) to 100% (e.g. carbonic acid) depending on the type of imported goods. In most cases, the customs duty is set on an ad valorem basis. There is also a customs clearance fee of 0.2% from the customs value of imported goods.

**Excise taxes**

Excise tax is paid on goods or products that are considered in the list of excised goods or products. Normally, excised goods consist of alcoholic beverages, tobacco products, and automobiles. Excise rates vary based on the type of goods as well as by domestic production or import.

**Property tax**

Property tax in Turkmenistan generally applies at the rate of 1% on the average annual net book value of fixed assets and average annual value of tangible assets used for business purposes and located in Turkmenistan. Generally, contractors and subcontractors operating under the umbrella of the petroleum law may be exempt from this tax.
Subsurface-use tax
Subsurface-use taxpayers are legal entities and individual entrepreneurs extracting natural resources and using land or subsoil waters for the extraction of chemical products. This tax does not normally apply to contractors and subcontractors operating under the umbrella of the petroleum law.

Taxable operations include the sale of natural resources extracted by taxpayers and utilisation of natural resources for consumption. Tax rates vary depending on the goods being extracted. Natural or associated gas extraction is taxed at 22%, and crude oil extraction is taxed at 10%. Tax rates for other mineral resources vary depending on profitability (internal rate of return).

Social security payments
Social security is payable by employers at 20% of the total remuneration provided to local employees. Income paid to expatriate employees should not be subject to the social security contribution.

Advertising levy
An advertising levy is imposed on the amount of expenses on commercial advertising and is to be paid quarterly at the rate of 3% to 5% depending on the location of the payer within Turkmenistan. Generally, contractors operating under the umbrella of the petroleum law may be exempt from this levy.

Transfer taxes
There are no transfer taxes in Turkmenistan.

Stamp taxes
Although state duties of various amounts set forth by the government may apply to certain actions (e.g. branch registration), there is no unified stamp tax/duty mechanism as normally practiced in other countries.

Branch income
Branches pay CIT at the rate of 20%. Technically, branches are also subject to 15% dividend tax on repatriation of income to the head office. However, if the head office collects the income from its clients directly to its bank account abroad, the mechanism of collecting the dividend tax is unclear.

Branches are taxed on profits received from activities in Turkmenistan. The gross income is reduced for expenses incurred (both inside and outside of Turkmenistan) in relation to the activities in Turkmenistan. The procedure for determining the taxable base for branches is generally similar to the one for Turkmen legal entities.

Branches subject to the standard tax regime also pay and file returns with respect to the other taxes described in this summary.

Income determination

Inventory valuation
Inventory is valued at cost, including costs relating to its acquisition. The law permits the use of the weighted average, first in first out (FIFO), and last in first out (LIFO) methods for tax purposes.
Turkmenistan

**Capital gains**
Capital gains are taxable as normal business income in Turkmenistan.

**Dividend income**
The tax code provides for relief from economic double taxation of inter-corporate dividends.

**Foreign income**
A resident company is subject to tax on its worldwide income (including capital gains). There are no provisions for tax deferrals in Turkmenistan tax legislation.

**Deductions**
In general, taxpayers may deduct expenses paid or accrued during the year in connection with their business and aimed at income generation. All expenses must be substantiated by documentary proof.

The deduction of certain expenses is subject to specific ceilings. Such expenses include representation expenses, which are deductible at up to 1% of gross income. Furthermore, deductible norms for business travel expenses are established periodically by the government.

**Depreciation**
Tax depreciation is based on accounting depreciation. Depreciation is accrued based on the straight-line method. Accelerated depreciation is also allowed based on specific consent of the Ministry of Finance. The Turkmenistan accounting legislation provides a comprehensive itemised list of depreciation norms which includes more than 200 items.

Generally, for the purposes of CIT, depreciation accrued is deductible. Fixed assets acquired free of charge as well as assets of non-commercial legal entities, budget organisations, and public associations should be excluded from depreciable assets for CIT purposes, even if they are used for generating income.

Fixed assets provided under operational lease shall be depreciated by the lessor. Fixed assets provided under financial lease shall be depreciated by the lessee.

**Goodwill**
There are no provisions for goodwill in Turkmenistan tax legislation.

**Repair and maintenance expenses**
Deductible expenditures for the repair of fixed assets shall be comprised of the cost of spare parts and consumable materials used for repair, remuneration of employees carrying out the repairs, and other expenditures associated with such repairs, including payments to third parties for the purpose of such repairs.

**Research and development (R&D) expenses**
R&D costs (including those that produced no positive result) shall be subject to deduction from gross revenue, except for costs associated with the purchase of fixed assets, their installation, and other costs of a capital nature.

**Bad debts**
The Tax Code permits a taxpayer to include provisions for uncollectable debts as well as losses incurred as a result of expiration of the collection period for accounts receivable.
Charitable contributions
There are no specific restrictions on deductibility of charitable contributions. However, they may be disallowed under the general restriction of non-business related deductions.

Taxes
For CIT purposes, the following taxes are deductible: property tax; subsurface-use tax; levies established by the tax code (except the special-purpose duty for the improvement of urban and rural territories); accrued amounts of VAT in selling goods, performing work, and rendering of services; and amounts of excise tax included in the price of sold excisable goods by manufacturers of such goods.

Net operating losses
Loss is defined as excess of allowable deductions over gross revenue. Losses shall be carried forward and deducted in subsequent tax (reporting) periods, but not for more than three years. Losses cannot be carried back.

Payments to foreign affiliates
Administrative and management expenses incurred by the head office of a branch in Turkmenistan are not deductible at the branch level.

Group taxation
There is no group taxation in Turkmenistan.

Transfer pricing
The Turkmenistan Tax Code contains provisions concerning state supervision of transfer pricing. According to these rules, the tax authorities monitor and control transfer-pricing of certain types of transactions, including transactions between related parties, foreign trade operations, and transactions where the tax authorities during tax audits perceive considerable deviation from the market price (i.e. more than 20%).

Thin capitalisation
There are no provisions for thin capitalisation in Turkmenistan tax legislation.

Tax credits and incentives
Tax and investment incentives may be negotiated on a case-by-case basis. The President has often issued special decrees granting taxation exemptions and other privileges to specific investors. However, since adopting a new edition of the tax code in 2004, such practice has been significantly reduced.

Foreign tax credit
There are no provisions for foreign tax credits in Turkmenistan tax legislation.

Withholding taxes
Turkmenistan-source income generated by a foreign legal entity that has no PE in Turkmenistan generally is subject to withholding tax (WHT) at the source of payment at 15% (6% for income from the lease of sea vessels and aircrafts).
Relief may be available for WHT if a foreign entity is a resident of a country that has a valid double tax treaty (DTT) with Turkmenistan and if the foreign entity complies with certain administrative procedures.

Currently, Turkmenistan has only a few DTTS in force. Turkmenistan is a successor to a number of DTTS concluded by the USSR, while some treaties were concluded and ratified by the government of Turkmenistan. The countries listed below are considered to have valid tax treaties with Turkmenistan:

**Tax administration**

**Returns**

Reports are generally filed quarterly within the month following the reporting quarter. Annual declaration of branches of foreign legal entities is due by 15 March of the year following the reporting one.

Tax agents must file WHT reports not later than the 20th day of the month following the one when the respective tax liability occurred.
**Payment of tax**

Advance payments under the standard tax regime are made before the 13th and 28th days of each month (unless agreed otherwise with tax authorities). Final payments upon results of the first quarter, first half-year, nine months, and tax year are made within five days from the reporting deadlines. Under the petroleum law tax regime, the CIT is reported and paid once annually based on dates indicated as per the Product Share Agreement (PSA).
Significant developments

Significant changes in 2010
Following the reading of the national budget in June 2010, a few amendments were made to the Income Tax Act, the Value-added Tax (VAT) Act, and the Finance Act. The key notable amendments included the following:

• Exemption of the following items from VAT:
  • Computer software and software licences. Previously, only computer software was exempt from VAT and not software licences. After dialogue between the government and various stakeholders who incur significant costs in respect of software licences, the above amendment was introduced.
  • Biodegradable packaging materials.
• A capital gain derived from sale of shares in a private limited company is subject to tax even though such a gain is not included in a person’s business income. This implies that gains derived by individuals on sale of private shares in a limited company are subject to tax.
• Various changes were made to the provisions for taxation of petroleum operations. However, these may be subject to change in 2011.

Taxes on corporate income

The income tax rate applicable to the chargeable income of companies is 30%, with the exception of:

• Mining companies.
• Non-resident air transport, shipping, and some telecommunication services.
• Resident companies whose turnover is less than 50 million shillings (UGX).

Chargeable income is gross income for the year less the total deductions allowed under the Income Tax Act (ITA). A resident company is taxed on its income from all geographical sources. A non-resident company is only subject to Uganda income tax on income derived from sources in Uganda.

Mining companies
The income tax rate applicable to mining companies is calculated according to the following specified formula:

Annual tax rate = 70 minus (1500/x), where x is the ratio of the company’s chargeable income to the gross revenue for the year.
Note that the derived tax rate is subject to a minimum tax rate of 25% and a maximum tax rate of 45%.

**Non‑resident air transport, shipping, and some telecommunications services**
Non‑resident ship operators, charterers, and air transport operators who derive income from carriage of passengers who embark, or cargo or mail which is embarked, in Uganda, as well as road transport operators who derive income from carriage of cargo or mail which is embarked in Uganda, are taxed at the rate of 2%.

A non‑resident person who carries on the business of transmitting messages by cable, radio, optical fibre, or satellite communication and derives income through transmission of such messages by apparatus established in Uganda, whether or not such messages originated from Uganda, is taxed on one’s gross income at a rate of 5%. Similarly, a non‑resident person who derives income from providing direct‑to‑home pay television services to subscribers in Uganda is taxed on one’s gross income at a rate of 5%.

**Resident companies with turnover of less than UGX 50 million**
A rate of 1% of turnover is used to determine income tax payable by a resident company whose turnover is between UGX 20 million and UGX 50 million (approximately between USD 10,000 and USD 25,000), subject to certain thresholds.

However, on application to the Commissioner, a resident company with a turnover of less than UGX 50 million may be taxed at 30%.

This category excludes professionals, public entertainment services, public utility services, or construction services.

---

**Corporate residence**

A company is resident in Uganda for a year of income if it meets one of the following criteria:

- Is incorporated or formed under the laws of Uganda.
- Has its management and control exercised in Uganda at any time during the year of income.
- Undertakes the majority of its operations in Uganda during a year of income.

**Permanent establishment (PE)**

A PE (branch) means a place where a person carries on business, and includes:

- A place where a person is carrying on business through an agent, other than a general agent of independent status acting in the ordinary course of business as such.
- A place where a person has, is using, or is installing substantial equipment or substantial machinery.
- A place where a person is engaged in a construction, assembly, or installation project for 90 days or more, including a place where a person is conducting supervisory activities in relation to such a project.
Other taxes

Value-added tax (VAT)
VAT is governed by the VAT Act and administered by the Uganda Revenue Authority (URA). VAT is charged at the rate of 18% on the supply of most goods and services in the course of business in Uganda. Specified goods and services, as well as exports outside of Uganda, attract a zero-rate of tax.

Some supplies are exempt from VAT, the main categories being government subsidies, the supply of unprocessed foodstuffs, agricultural products and livestock, financial services, insurance services, unimproved land, leases and sale of certain residential properties, betting and gaming, education, medical and health services, social welfare services, pesticides, petroleum products subject to excise duty, machinery for processing agricultural or dairy products, accommodation in hotels outside specified areas, computers, computer accessories, software, and biodegradable packaging materials. The supply of specialised vehicles, plants, and machinery; engineering designs; feasibility studies; consultancy services; and civil works related to hydro-power, road and bridge construction, public water works, agriculture, education, and health sectors is also exempt.

Zero-rating is preferable to exemption because the VAT on costs incurred in making a zero-rated supply can be recovered while that incurred in making an exempt supply cannot be recovered.

The zero-rated supplies include the supply of goods and services exported from Uganda; the supply of drugs and medicines; the supply of seeds, fertilisers, pesticides and hoes; the supply of machinery, tools, and implements suitable for use only in agriculture; the supply of milk, including milk treated in any way to preserve it; and the supply of leased aircraft, aircraft engines, spare engines, spare parts for aircraft, and aircraft maintenance equipment.

The annual threshold for VAT registration is UGX 50 million (approximately USD 25,000). Persons who make supplies that are VATable and whose turnover exceeds UGX 50 million are required to register for VAT with the URA. VAT registered persons are required to:

• Charge VAT whenever they make supplies that are VATable.
• File monthly returns before the 15th day of the month following the reporting onth.

Credit for input tax
A person making exempt, zero-rated, and standard supplies can recover all the input VAT if the exempt supplies are less than 5% of the total supplies. However, if the exempt supplies are more than 5% but less than 95%, the person is required to recover only a portion of the VAT input tax corresponding to the percentage of the taxable supplies. If the exempt supplies exceed 95%, the person cannot recover any input VAT.

Imported services
The VAT Act defines a supply of service to mean any supply which is not a supply of goods or money, including the performance of services for another person.

An imported service is one provided by a person normally resident outside Uganda who is not required to register for VAT in Uganda. According to regulation 14 of the VAT Regulations 1996, any person who imports a service into the country must account for VAT on such a service. The Regulations require the person importing the service
to account for the VAT at the time when performance of the service is completed, or
when payment for the service is made, or when the invoice is received from the foreign
supplier, whichever is earliest.

The tax on such imported services is supposed to be computed at the rate of 18% of
the cost of the service. VAT registered companies are required to prepare self-billed
tax invoices to account for the input VAT. Further, if the importer of the services is not
registered for VAT, the importer is required to calculate and pay the VAT to URA.

Although there is no effect on the cash flow position, preparation of a self-billed tax
invoice is important as it is a requirement by law. Failure to do so is tantamount to lack
of compliance with the law, and a penalty of 2% per month compounded may apply.

Stamp taxes
Stamp duty is charged on a number of transactions at varying rates. Stamp duty is
charged at 1% of the total value for a number of instruments, including hire purchase
agreements, composition deeds, leases, exchange of property, conveyance, transfers,
share warrants, gifts, and agreement relating to deposit of title deeds.

Stamp duty of 0.5% is incurred on formation of a company, capital-raising activities
such as increase of share capital, debentures, equitable mortgages, and mortgage deeds.

Stamp duty of 1% applies on transfer of shares.

No stamp duty is charged on the increase of share capital where it is in fulfilment of a
condition precedent for acquiring loan funds for a development project or where it is
made on becoming public through the stock exchange.

Stamp duty of UGX 5,000 is also charged in a number of various other instruments.

Customs duties
Many goods imported into Uganda are subject to customs duties. However, exemptions
are available to various classes of plant and machinery imported into Uganda. The
rates of duty are provided by the East African Community common external tariff code.
Certain products imported from the East African Community and the Common Market
for Eastern and Southern Africa (COMESA) region enjoys special custom duty rates.
Imported items are classified according to the nomenclature established under the
international convention on the harmonised commodity description and coding system.
Duty’s range from 0% to 60% depending on the item imported.

Excise taxes
Excise duties are imposed on goods considered luxuriant. Examples include locally
manufactured soft drinks, cigarettes, alcoholic drinks, and spirits. A schedule of some
of the rates is provided below:

<table>
<thead>
<tr>
<th>Goods</th>
<th>Excise tax</th>
</tr>

</tr>
</tbody>
</table>

**Property taxes**

Property taxes are administered by the local authorities. They are based on the value of the property as assessed by the local authorities.

**Turnover taxes**

Every promoter of gaming and pools promoted within Uganda and every principal agent of a promoter of gaming and pools promoted outside Uganda is liable to tax at 15% of the total amount of money received or the total amount of bets.

A tax of 5% is charged on gross income earned by non-resident persons carrying on the business of transmitting messages by cable, radio, optical fibre, satellite, or provision of direct to home pay television services to subscribers in Uganda.

**Environmental taxes**

Environmental levies are charged on every person who imports motor vehicles that are eight years old or older. Levies are also imposed on the importation of used household appliances. The levy on motor vehicles is 20% of the value of the vehicle as determined for customs duty purposes. Levies on electrical appliances range from UGX 20,000 to UGX 50,000 per item depending on the nature of the item.

**Branch income**

Tax is imposed on the income of a non-resident company derived from running a branch in Uganda. The chargeable income of a branch in Uganda is taxed at the corporation tax rate of 30% after deduction of allowable expenses.

In addition to corporation tax, branches are subject to extra tax at a rate of 15% on any repatriated income for a year of income. The repatriated income is calculated using the \( A + (B - C) - D \) approach. Where \( A \) is the net assets at the beginning of the year, \( B \) is the net profit for the year, \( C \) is the tax charge for the year, and \( D \) is the net assets at the end of the year.

**Income determination**

In arriving at chargeable income (taxable income) one has to go through the process of adjusting profits by taking into account deductions allowed and deductions not allowed.

**Inventory valuation**

A taxpayer is allowed a deduction for the cost of trading stock disposed of during the year, which is determined by adding to the opening value of the trading stock the cost of trading stock acquired during the year and subtracting the closing value of stock. The opening value of the stock is the closing value for the previous year or, where
the taxpayer commenced business during the year, the market value at the time of commencement of the business of the trading stock acquired prior to commencement. The closing stock valuation method is the lower of cost or market value. Trading stock is allowed to be valued using either the absorption costing or prime cost method. Stock valuation method once chosen may not be changed but only with written permission of the Commissioner.

**Capital gains**
Capital gains are included in and taxed together with the business income at a rate of 30%. There is no separate capital gains tax. Capital gains arise on disposal of non-depreciable business assets as well as sale of shares.

**Dividend income**
The general rule is that dividend income is taxable as part of business income at a rate of 30%. Dividend income is also subject to withholding tax (WHT) at the rate of 15%. The WHT paid in respect of the dividend income is creditable where the income is subject to the corporation tax rate of 30%. The WHT rate for dividend payments to resident persons is 15%. For dividends paid out by companies listed on the stock exchange to individuals, the rate is 10%.

Dividend income is exempt from tax if the recipient company directly or indirectly controls the paying company through ownership of 25% or more of the voting power of the paying company.

**Interest income**
The general rule is that interest income is taxable as part of business income at a rate of 30%. Interest income is also subject to WHT at the rate of 15%. The WHT paid in respect of the interest income is creditable where the income is subject to the corporation tax rate of 30%. However, interest income earned by financial institutions with respect to agricultural loans is not subject to tax. Also, interest income earned by financial institutions with respect to government securities is subject to tax at 15% as a final tax.

**Rental income**
Rental income for companies is included in gross income and taxed at the 30% corporate tax rate.

**Foreign income**
Foreign income is taxable on resident recipients, and tax suffered in the country where it is sourced (if any) is creditable subject to the provisions of any double taxation agreements. This credit is limited to the amount of Ugandan tax payable on that income.

**Deductions**

**Deductibility of expenses**
The ITA sets out the following conditions for deductibility of an expense:

- There must be an expenditure or loss.
- The expenditure or loss must be incurred by a person during the year of income.
- The expenditure must be incurred in the production of income included in gross income.
Uganda

No deduction is allowed for the following expenditures:

- Any expenditure or loss of a domestic or private nature.
- Any expenditure or loss of a capital nature.
- Any expenditure or loss recoverable under insurance contract or indemnity.
- Income tax payable in Uganda or in a foreign country.
- Any fine or similar penalty paid to a government or its sub-division for breach of any law.
- Any contribution or similar payment made to a retirement fund by the employee or for the benefit of any other person (e.g. National Social Security Fund (NSSF) contributions).
- Any premium or similar payment made in respect of a life insurance policy for the life of the person paying the premium or on the life of some other person.
- Any income appropriated to a reserve fund or capitalised in any way.
- The amount of pension paid to any person.

**Accrued expenses**

A taxpayer who is accounting for tax purposes on an accrual basis derives income when it is receivable by the taxpayer and incurs expenditure when it is payable by the taxpayer.

An amount is treated as payable by the taxpayer when all the events that determine liability have occurred and the amount of the liability can be determined with reasonable accuracy, but not before economic performance with respect to the amount occurs. Economic performance occurs:

- with respect to the acquisition of services or property, at the time the services or property are provided
- with respect to the use of property, at the time the property is used, or
- in any other case, at the time the taxpayer makes payment in full satisfaction of the liability.

**Contingent liabilities**

Contingent liabilities are not tax-deductible in Uganda.

**Depreciation**

A deduction is allowed for the depreciation of the person’s depreciable assets, other than minor assets, in accordance with the appropriate applicable rates. The ITA allows a taxpayer a deduction for the depreciation of their depreciable assets on a reducing balance basis. Depreciable assets are classified in four classes as follows:

<table>
<thead>
<tr>
<th>Class</th>
<th>Assets included</th>
<th>Rate of tax depreciation (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Computers and data handling equipment</td>
<td>40</td>
</tr>
<tr>
<td>2</td>
<td>Automobiles, buses, and mini-buses with a seating capacity of less than 30 passengers; goods vehicles with a load capacity of less than 7 tonnes; construction and earth moving equipment</td>
<td>35</td>
</tr>
<tr>
<td>3</td>
<td>Buses with a seating capacity of 30 or more passengers; goods vehicles designed to carry or pull loads of 7 tonnes or more; specialised trucks, tractors; trailer-mounted containers; plant and machinery used in farming, manufacturing, or mining operations.</td>
<td>30</td>
</tr>
</tbody>
</table>
Class | Assets included | Rate of tax depreciation (%) |
--- | --- | --- |
4 | Rail cars, locomotives, and equipment; vessels, barges, tugs and similar water transportation equipment; aircraft, specialised public utility plant, equipment, and machinery; office furniture, fixtures, and equipment, and any depreciable asset not included in another class. | 20 |

**Initial allowance**
Where a taxpayer places an item of eligible property into service for the first time during the year of income, they qualify for a tax deduction for that year of income which is equal to 75% of the cost of the asset if the property is put into use outside Kampala, Entebbe, Namanve, Jinja, and Njeru. However, if the property is put into use in the above named areas, the tax deduction is equal to 50%.

Eligible property is defined to mean plant and machinery wholly used in the production of income included in gross income but does not include goods or passenger vehicles; appliances of a kind ordinarily used for household purposes; or office or household furniture, fixtures, and fittings.

**Industrial building allowance**
A company is eligible for an industrial building allowance on its industrial and commercial buildings at a tax rate of 5% per annum on a straight-line basis. The industrial building allowance will be granted on the actual cost incurred in constructing the buildings.

In addition to the above, a company is entitled to an initial allowance at the rate of 20% on an industrial building in the first year the building is put to use. The industrial building allowance is computed on the residual value after the initial allowance of 20%.

An industrial building is defined to mean any building which is wholly or partly used, or held ready for use, by a person in manufacturing operations, research and development into improved or new methods of manufacture, mining operations, an approved hotel business, an approved hospital, or approved commercial buildings.

**Goodwill**
No tax deduction is allowed for goodwill in Uganda.

**Start-up expenses**
A company setting up business for the first time or engaged in the initial public offer at the stock market will be entitled to a tax deduction for all its start-up costs that are of capital nature which would otherwise not be tax-deductible under the ordinary tax rules. The start-up costs will be allowed as tax-deductible costs over a period of four years at a straight-line basis at the rate of 25% per annum.

**Bad debts**
A deduction is allowed for bad debts only if:

- the amount was included in the person’s income in the year of income
- it is in respect of money that was lent in the ordinary course of business by a financial institution in the production of income, or
Uganda

- the amount of the debt claim was in respect of a loan granted to any person by a financial institution for the purpose of farming, forestry, fish farming, beekeeping, animal and poultry husbandry, or similar operations.

For the bad debt to be deductible, the taxpayer must demonstrate to the URA that reasonable steps to collect the debt were taken and that the taxpayer failed to recover the debt. In relation to a financial institution, it should be a debt in respect of which a loss reserve held against presently identified losses or potential losses, and which is therefore not available to meet losses which subsequently materialise, has been made.

Interest expenses

Interest is deductible if the interest is incurred in respect of a debt obligation by the company in the production of income included in the company's gross income. Interest arising from non-trade-related debt obligation is not deductible.

Interest charged before capital investment is put to use has to be capitalised. Interest incurred after capital investment is put to use is allowed as a deduction.

If the company is foreign controlled, then the interest arising from the loan in excess of two times the company's equity will not be allowed (see Thin capitalisation rules in the Group taxation section for more information).

Meals, refreshments, and entertainment

Expenses for meals, refreshments, and entertainment are deductible only where the value is included in the employment income of the employees or is excluded from employment income owing to the fact that it is provided on equal terms to all workers.

Charitable contributions

Charitable donations are deductible if made to amateur sporting associations; religious, charitable, or educational institutions of public character; trade unions; and other similar associations which have been issued with a written ruling by the Commissioner currently in force stating that it is an exempt organisation. The donations should not exceed 5% of the person's chargeable income.

Pension expenses

Employers are allowed a deduction for the contributions made to pension schemes on behalf of their employees. Employees, on the other hand, do not get a deduction for the contributions they make to pension funds.

Payment for directors

Directors are treated as employees, so expenses incurred in respect of directors are deductible expenses.

Bribes, kickbacks, illegal payments

Non-business expenses are not tax-deductible, including those of a private nature.

Net operating losses

A deduction is allowed for any assessed tax losses carried forward from previous years of income. Such tax losses are carried forward and deducted against future taxable profit of the business in the subsequent years of income. The losses can be carried forward indefinitely. There is no ring-fencing of losses except in the following circumstances:
• Where, during a year of income, there has been a change of 50% or more in the underlying ownership of a company, as compared with its ownership one year previously, the company is not permitted to deduct an assessed loss in the year of income or in subsequent years, unless the company, for a period of two years after the change or until the assessed loss has been exhausted if that occurs within two years after the change:
  • continues to carry on the same business after the change as it carried on before the change and
  • does not engage in any new business or investment after the change where the primary purpose of the company or the beneficial owners of the company is to utilise the assessed loss so as to reduce the tax payable on the income arising from the new business or investment.
• In cases where losses relate to farming, the assessed farming loss can only be deducted from farming income of the taxpayer in the following year and not from any other income.

There is no provision for carryback of losses in Uganda.

**Payments to foreign affiliates**
Payments to foreign affiliates are deductible as long as they are incurred in the production of income.

**Group taxation**
There are no specific provisions in the law covering groups, so companies in a group do not get any special treatment for tax purposes in Uganda.

**Transfer pricing regime**
Uganda does not have specific transfer pricing legislation. However, the anti-avoidance provisions contained in Sections 90 and 91 of the ITA require transactions between associates to be at arm’s-length basis. These are the provisions that are often applied by the URA in instances where they are of the view that a non-resident person may be transferring profits from Uganda.

**Thin capitalisation rules**
Where a company intends to finance some of its Uganda operations by use of foreign debt, the ITA provides for thin capitalisation rules in Uganda, and the safe harbour debt: equity ratio is 2:1.

The thin capitalisation rules are provided for in Section 89(1) of the ITA. According to this Section, where a foreign controlled resident company which is not a financial institution has a foreign debt to foreign equity ratio in excess of 2 to 1 at any time during that year of income, a deduction is disallowed for the interest paid by the company during that year on that part of the debt which exceeds the 2 to 1 ratio.

**Controlled foreign company (CFC) regime**
Uganda does not have a CFC regime.
Uganda

**Tax credits and incentives**

**Foreign tax credit (FTC)**
A resident taxpayer is entitled to FTC for any foreign income tax paid by the taxpayer in respect of foreign-source income included in the gross income of the taxpayer. The FTC allowed is subject to the income tax rate (i.e. 30%) in Uganda.

**Tax holidays for exporters**
A tax holiday of ten years is available to exporters who export at least 80% of their produce of finished goods, subject to certain conditions.

**Scientific research expenditure, training expenditure, and mineral exploration expenditure**
A 100% allowance is available for scientific research expenditures, training expenditures, and mineral exploration expenditures in the year of expenditure.

**Incentives for the importation of plant and machinery**
Plant and machinery is exempt from customs duty and WHT on importation. Also a VAT deferral facility is available where VAT is deferred on importation of plant and machinery and subsequently waived upon approval by the relevant authorities.

**Employment incentives**
A deduction of 2% of income tax payable is granted to any employer who can prove to the URA that at least 5% of their employees on full time basis are people with disabilities.

**Other incentives**
- Income derived from agro processing is exempt from income tax, subject to certain conditions.
- Business income derived by a person managing or running an educational institution is exempt from income tax.
- New investors may be granted Investment Trader Status where they can claim their input VAT before they start to make taxable supplies. This is subject to certain conditions as specified by the VAT Act.

**Withholding taxes**
According to Section 83(1) of the ITA, a tax is imposed on every non-resident person who derives any dividend, interest, royalty, rent, natural resource payment, or management charge from sources in Uganda. WHT at a rate 15% therefore applies on gross dividend payments, interest, management fees, and royalty payments in respect of non-treaty countries.

However, section 83(5) exempts interest paid by a resident company in respect of debentures, which:

- were issued by the company outside Uganda for the purpose of raising a loan outside Uganda
- were widely issued for the purpose of raising funds for use by the company in a business carried on in Uganda or the interest is paid to a bank or a financial institution of a public character, and
- the interest is paid outside Uganda.
A debenture is defined in the ITA as any form of debt, including debenture stock, mortgage stock, loan, loan stock, or any similar instrument acknowledging indebtedness, whether secured or unsecured. The term widely issued is also specifically defined.

**Double taxation agreements (DTAs)**

A taxpayer may benefit from the provisions of a DTA that Uganda has with another country. Please find below a table showing the countries with which Uganda has DTAs and the applicable WHT rates on various categories of income.

According to section 88 (2) of the ITA, the terms of the international agreement to which Uganda is a party prevails over the provisions of ITA in case the terms of the international agreement are inconsistent with the provisions of the Act.

Note

1. With respect to the Uganda/Netherlands DTA, the rate applicable on dividends is 15% except where the investment is new or is an expansion of the current investment made after the DTA entered into (10 September 2006).

   For new investments and expansions of current investment, the rates are:
   - 0% if the beneficiary holds at least 50% of the shares in the company paying the dividends.
   - 5% if the beneficiary holds less than 50% of the shares in the company making the payment.

**Tax administration**

**Returns**

The ITA provides for two provisional returns within a 12-month period (financial year). The first provisional return is due within the first six months of the accounting year while the second is due by the end of the twelfth month of the accounting year.

The Self Assessment Return (SAR) is due by the sixth month after the end of the accounting year.

Electronic filing has been introduced for all tax returns.

**Payment of tax**

For all companies, a system of provisional payments on account, based on estimated profits, is in place. The first payment of 50% is due in the sixth month of the accounting period and the second payment is due in the 12th month. The balance is expected to be paid together with the SAR.
Uganda

**Statute of limitations**
The ITA requires a taxpayer to maintain records for at least five years after the end of the year to which the records relate.

The VAT Act provides for records to be maintained for six years after the end of the tax period to which they relate.

**Topics of focus for tax authorities**
The focus of the URA keeps shifting but is generally based on the risk analysis of the information availed to them. Currently, the focus is on transfer pricing.

**Significant developments**

Ukraine continues developing its tax system. The new Tax Code took effect on 1 January 2011 (the corporate income tax entered into force on 1 April 2011) and introduced the following significant change.

**Corporate income tax (CIT)**

As of 1 April 2011, the CIT rate has been reduced from 25% from 23%.

**Taxes on corporate income**

CIT applies to taxable profits earned by resident entities in Ukraine and abroad and non-residents with a permanent establishment (PE) in Ukraine. Resident entities are taxed on their worldwide income. Non-resident entities are taxed on their Ukrainian-source income.

As of 1 April 2011, Ukraine’s CIT has a uniform rate of 23% (25% prior to 1 April 2011). The rate will be reduced to 21% as of 1 January 2012, 19% as of 1 January 2013, and 16% from 1 January 2014 onwards.

No CIT is levied at the regional or local level.

A withholding tax (WHT) at a rate of 15% applies for the majority of income payments for non-residents, unless relief is given under a double taxation treaty (DTT). Ukraine has 68 effective DTTs in place. *See the Withholding taxes section for more information.*

**Favourable tax regime for agricultural producers**

Agricultural producers are entitled to use a very favourable tax regime, provided certain requirements are met. The main criterion requires that income from the sale of their own agricultural products constitutes not less than 75% of their total gross revenue.

**Reduced rates for insurance companies**

Reduced CIT rates of 0% and 3% are applicable for income of insurance companies in 2011 and the first quarter of 2012. Net insurance premiums (gross premiums less amounts paid to reinsurance companies) are taxed at 0% for long-term life insurance premiums and pension insurance premiums, and 3% otherwise. Profits earned by insurance companies from non-insurance activities are taxed at the standard rate.

**Corporate residence**

Corporate residence is determined by the place of incorporation.
Ukraine

**Permanent establishment (PE)**

The Ukrainian definition of a PE generally follows the PE definition in the Organisation for Economic Co-operation and Development (OECD) Model Tax Convention, but with a stronger agency tests.

In particular, a non-resident PE is defined as a fixed place of business through which the business activity of a non-resident entity is wholly or partly carried out in Ukraine. A PE includes, among other things, a place of management, affiliate, office, etc.

The Tax Code has introduced the concept of a service PE whereby the provision of services (apart from the provision of personnel), including consultancy services, by a non-resident through its employees or other personnel in Ukraine, shall constitute a Ukrainian PE of this non-resident, provided such activities (within the frame of one project) last more than six months in any 12-month period.

Moreover, a construction site in Ukraine may also give rise to a taxable presence of a non-resident in Ukraine in the form of PE, if the length of the construction activities exceeds six months.

The Tax Code has also assisted with the list of exclusions from the PE definition. In particular, auxiliary and preparatory services of a non-resident should not result in creating a PE for the non-resident.

In practice, the Ukrainian tax authorities usually interpret the term ‘business activity’ in a very broad sense, and, without DTT protection, may consider any type of activity as giving rise to a taxable presence (i.e. a PE) of a foreign entity in Ukraine.

**Other taxes**

**Value-added tax (VAT)**

There are two rates of VAT: 20% and 0%. The rate of 20% applies to almost all transactions subject to VAT except the export of goods and related services, which is taxable at 0%. The zero rate also applies to the supply of international transport services (confirmed by a single international shipping document) and toll manufacturing services.

Provision of services to a non-resident is not considered zero-rated. Such services are subject to 20% VAT or considered to be outside the scope of VAT (effectively exempt with no right to claim input VAT) depending on the place of supply.

Transactions that are subject to VAT include the following:

- The supply of goods and services when the place of supply is in Ukraine, including when the supply is made without consideration.
- The importation of goods and ancillary services (i.e. services costs which are included in goods customs value) into Ukraine.
- Exportation of goods.

Transactions that are not subject to VAT include (non-exhaustive list) the following:

- The issue, sale, and exchange of securities.
• The transfer of property from a lesser to a lessee under an operating lease and return of property upon expiration of the operating lease (other than in course of import operations).
• Interest/commission element of lease payments under financial lease agreements.
• Provision of financial loans and bank guarantees.
• Insurance and reinsurance services supplied by licensed insurers and services of insurance/reinsurance agents and brokers.
• Payment of royalties.
• Reorganisation of a legal entity (merge, spin-off, accession, division).
• Transit of cargo and passengers through Ukrainian territory.

VAT registration
Tax registration as a VAT payer is compulsory if the volume of an entity's taxable transactions exceeds the compulsory registration threshold. The current registration threshold is 300,000 Ukrainian hryvnia (UAH) for the previous 12 months. An entity qualifying as a taxable entity should register with the tax authorities at the place of its location and obtain a VAT registration number. In addition, a voluntarily VAT registration is available if a person makes taxable supplies within 12 previous months and at least 50% of supplies is to VAT payers. There is no mechanism to register for a non-resident without PE in Ukraine. Accordingly, any Ukrainian VAT incurred by non-resident is non-recoverable.

VAT recovery and refunds
Generally, VAT incurred by a registered entity on the purchase and/or importation of goods and services used for the purpose of its own business (except for VAT incurred in relation to exempt supply) may be recovered by way of a credit against output VAT. In case VAT credit exceeds VAT output for two months consecutively, VAT refund is available in form of cash payment or offset against future VAT liabilities (subject to certain rules and limitations).

In practice, obtaining a VAT refund is extremely difficult. As a one-time solution to the existing problem of VAT refunds, in 2010, the Ukrainian Ministry of Finance issued special VAT bonds in order to settle existing VAT refund debt of the government. The government is liable to the interest at 120% discount rate of the National Bank of Ukraine (NBU) charged on VAT that was not refunded within prescribed statutory terms. As of 2011, an automatic VAT refund procedure has been introduced for eligible exporters.

Stamp taxes
Stamp duty is imposed on certain actions, including notarisation of contracts and filing of documents with the courts. In most cases, the amounts involved are nominal, although there are exceptions. Operations carried out at commodity exchanges and sales of real property attract a stamp duty of 1%.

Excise taxes
Excise tax applies to certain goods imported into or produced in Ukraine. Excisable goods include alcoholic beverages, tobacco and tobacco products, cars and car bodies, as well as petrol and diesel fuel. Ukraine is currently experiencing a gradual augmentation of excise tax on tobacco goods, ethyl alcohol, and alcoholic beverages.

Rates of excise tax can be ad valorem (in percentage to the value of goods), specific (in monetary units per unit of goods’ characteristic), or combined.
Property taxes
There is no tax on commercial property in Ukraine (apart from the land tax).

Customs duties
Import duty is payable by the importer when goods are imported into Ukraine and applies in accordance with the customs tariff. There are currently two rates of duty: relieved and full rates. Relieved rates of duty apply to goods originating from World Trade Organization (WTO) countries and countries which have granted Ukraine ‘most favoured nation’ trade status. Full rates of duty apply to goods originating from all other countries.

In addition to the reduced rates mentioned above, Ukraine has concluded free-trade agreements with Georgia, the Commonwealth of Independent States (CIS) countries, and Macedonia. Ukraine has also signed a free-trade agreement with the European Free Trade Association (EFTA) countries, although it is not yet in force. These agreements allow many goods to be imported into Ukraine duty-free, subject to compliance with preferential rules of origin. The 2000 CIS Rules for Determining Country of Origin are used to determine whether goods originate from a particular country to qualify for these duty exemptions.

The government is negotiating a free-trade agreement with the European Union, and the president has indicated that his goal is to have this signed in 2011.

Ukraine has no export duties except on natural gas, scrap metal, livestock, rawhide, and certain oil seeds. Recently, export duties were introduced on grain (wheat, maize, barley).

Land tax
Land tax is assessed annually for the following year and is paid monthly in equal instalments by the owners or users of land. The rate of land tax depends on the category, location, and existence of the state valuation of each particular land plot.

Special Pension Fund charges
The following special charges are payable to the State Pension Fund:

- 3% charge based on the transfer value of a car.
- 1% charge on the acquisition of real estate payable by individuals and legal entities that purchase real estate.
- 7.5% charge on mobile communication services.

There are also a number of other business activities that require contributions to be made to the Special Pension Fund.

Charge on environmental pollution
Environmental pollution charges are imposed on any legal entity that discharges contaminants into the environment (air or water) or disposes of waste. The actual rate depends on the type and toxicity of each contaminant.

Charge for subsoil usage
Companies engaged in extracting mineral resource in Ukraine, regardless of the form of their ownership, are liable to a charge for use of subsoil. For gas and gas condensate, the specific tax rates are applied to the volume of extracted mineral resources. The payments to be made are calculated as follows:
volume of extracted mineral resources * specific tax rate * coefficient

Separate rates of charge for use of subsoil apply to storage of oil and gas products (the amounts are immaterial).

Charges for the use of subsoil are deductible for CIT purposes.

**Rental payments (oil and gas industry)**
Rental payments are to be made by the companies having the appropriate licenses authorising extraction of oil, gas, and gas condensate.

The tax base is calculated as the volume of extracted mineral resources multiplied by the tax rate. The adjusting coefficients apply to tax rates on rental payments for oil, gas condensate, and for natural gas other than that sold to the buyer authorised by the Cabinet of Ministers. Such coefficient is calculated by the Ministry of Economy (for oil and gas condensate) and the Ministry of Finance (for natural gas) for each reporting period.

Rental payments are deductible for CIT purposes. Product Sharing Agreements (PSA) covered by the Tax Code provide an exemption from these rental payments.

**Other local taxes**
The Tax Code reduced the number of local taxes, which may be levied at the discretion of local authorities, from 14 to 4.

**Branch income**
Domestic incorporated branches or other separate units are treated as separate taxpayers for CIT purposes. However, their head offices may pay consolidated CIT.

In Ukraine, it is not currently possible to register a branch of a foreign legal entity. A foreign company may set up a representative office in Ukraine, which is similar to an unincorporated branch. A non-resident company operating via a representative office is deemed to carry out business in Ukraine through a PE and may be subject to CIT at 23% (21% as of 1 January 2012) unless protected by a DTT. When a foreign company conducts business in Ukraine through a PE, taxable income should be determined on the same basis as for domestic entities. If the PE has no separate accounts, the taxable income may be determined as 30% of sale proceeds attributed to the PE.

Distributions made by a PE (out of after-tax income) to its head office should not trigger any further taxation in Ukraine, provided the head office is in a jurisdiction which has a DTT with Ukraine.

**Income determination**
The Tax Code determines taxable profits as taxable income (items of income defined by the Tax Code) less deductible expenses (expenses allowed for deduction by the Tax Code), including depreciation charges. Taxable income includes any operational (business) income received or accrued within a reporting period (e.g. quarter) and other income, which includes generally passive and irregular receivables. Items of income are recorded when a legal title on goods is transferred or when a document confirming rendering of services is signed by parties.
Inventory valuation
A taxpayer is entitled to adopt any of the methods of inventory valuation prescribed by the national accounting standards.

Capital gains on the sale of property
Capital gains realised by the local entity on the sale of buildings are calculated as the difference between the sales price of the fixed asset and its net book value. Capital gains on the sale of land are computed as the difference between the sale price of land and adjusted purchase price of land.

Income from securities
Income from securities is calculated separately from other income and is based on the so called ‘pooling method’. Taxable income is determined by deducting the aggregate cost of acquiring each class of securities from the aggregate proceeds from selling such securities. If aggregate acquisition costs for the year exceed aggregate sales proceeds, the excess is carried forward and applied against sales of securities in subsequent years.

Dividend income
Dividends received by a Ukrainian entity from another Ukrainian entity are exempt from CIT. Dividends received by Ukrainian companies from foreign companies controlled (at last 20% shareholding) by these Ukrainian companies (except for those having ‘offshore status’) are exempt from CIT.

Companies paying dividends are required to pay advance CIT at the standard rate, unless the dividends are paid to individuals or out of received dividends (with some other exceptions). The advance payment is used to meet subsequent CIT liabilities (other than for insurance companies). If the advance tax is not able to be used in the year the dividend is paid, it is carried over to future income years, but it cannot be refunded.

Interest income
Interest received by taxpayers is included in their taxable income on a general basis.

Rent/royalties income
Income from rent / royalties received by taxpayers is included in their taxable income on a general basis.

Foreign exchange gains/losses
Amounts receivable or payable in foreign currency are recognised as taxable income or expenses at the official currency exchange rate at the date when either (i) they should be recognised under general rules of the Tax Code or (ii) they actually paid, whichever event occurs first.

Realised and non-realised foreign exchange gains/losses are generally treated as taxable/deductible. Foreign currency differences arising from unsettled debt balances and foreign currency account balances are computed according to the accounting standards.

Other income
Ukrainian tax legislation does not provide special tax treatment for bribes, kickbacks, or illegal payments. However, any income, unless a specific provision in the law says otherwise, should be included in taxable income.
Funds or property returned to the holder of corporate rights issued by a legal entity after that entity’s liquidation, but not in excess of the shares’ par value, are not taxable.

Interest free loans from non-residents are taxable, unless they are received from shareholders for a period not exceeding 365 calendar days.

**Foreign income**
Foreign income is taxed under general rules, and there are no special rules regarding anti-deferral or unremitted earnings.

---

**Deductions**

Deductible expenses include any operational (related to the cost of goods/services sold) or other expense actually incurred or accrued in respect of the taxpayer’s business, excluding non-allowable expenses specified by the Tax Code.

Generally, operational expenses are recognised at the date of income recognition from the goods/services sold; other expenses are recognised when they are actually incurred.

Examples of non-deductible items include the following:

- Expenses that are not supported by relevant documents (e.g. contract, voucher, receipt, cheque).
- Service fees paid to related entities, unless there is documentation to prove that the fees are paid in relation to services actually performed.
- Expenses relating to receptions, presentations, entertainment, sampling, and free of charge provisions of goods and services. However, advertising expenses are deductible according to the general rule.
- Costs of goods and services purchased from private entrepreneurs on a simplified tax system.
- Fees for consultancy, marketing, and advertising services, as well as royalties, paid to non-residents, are limited for deduction (up to 4% of net revenue separately for royalties and other services for the year preceding the reporting one, excluding VAT and excise). They are not deductible entirely if their recipient is not a beneficial owner or resident in an offshore jurisdiction. In addition, royalties paid to a person who shall not be taxed with regard to such royalty in the country of its residence or for intellectual property rights generated in Ukraine are also fully not tax deductible.
- Engineering fees payable to a non-resident are deductible only up to 5% of custom value of equipment imported under a related contract. The engineering fees are not deductible entirely if their recipient is not a beneficial owner or a resident in an offshore jurisdiction.
- Payments in respect of goodwill and amortisation of goodwill.
- Fines and penalties.
- Business trip expenses for individuals that are not employees or members of the taxpayer’s management/ supervising bodies. Expenses of business trips for employees are deductible within the limits set by the Cabinet of Ministers of Ukraine.
- Expenses relating to the provision of employees with uniforms, safety clothes, and shoes, as well as food, if the amount exceeds the norms established by the Cabinet of Ministers of Ukraine.
- Banks will be entitled to a tax deduction of 20% of loan-loss provisions, excluding off-balance (including interest-accrued, fees, the amount of guarantees issued on the last business day of each tax period, and in respect of all securities). From 1 April 2011 to 1 January 2012, there will be a deduction limit of 30% on such provisions.
Other financial institutions are entitled to a deduction of up to 10% of all loan-loss provisions.

**Depreciation and amortisation**

Assets costing more than UAH 2,500 (UAH 1,000 for 2011) and with a useful life exceeding one year are required to be depreciated. Depreciation is determined on a monthly basis and is computed using the following methods:

- Straight-line.
- Reducing balance.
- Method of accelerated reduction of a residual value.
- Cumulative.
- Production-based.

Fixed assets are divided into 16 groups according to their statutory minimal useful life. The useful life of the fixed assets may be extended by a tax payer.

Land value may not be depreciated unless the land plot is purchased together with a building (object of Group 1).

As of 1 January 2011, intangibles may be amortised according to the standard depreciation methods over the assets’ useful economic lives as defined in documents certifying rights to the intangibles.

**Organisational and start-up expenses**

Deduction of organisational and start-up expenses incurred prior to the entity registration is not explicitly allowed by the law.

**Research and development (R&D) expenses**

R&D expenses other than those subject to amortisation are deductible when incurred, provided they are business-related.

**Interest expenses**

Interest paid is generally deductible for CIT purposes if incurred for business needs. However, a limitation for deducting interest expense applies if at least 50% of the borrower’s capital belongs to non-residents and the interest is payable to non-residents (and related entities) that have a holding on the borrower’s capital. The same rule applies if the borrower is owned by tax-exempt entities and pays interest to them. The deductible interest paid to those persons and their related parties cannot exceed the amount of interest income derived plus 50% of the company’s taxable profit (excluding interest income and before the deduction of interest). Any interest paid to affiliates in excess of this limit is carried forward to future tax periods.

**Bad debt**

As of 1 April 2011, (subject to some transitional rules) the deduction for bad or doubtful debt is allowed if (i) the creditor applies to the court with a claim for debt collection or for initiating bankruptcy proceedings or (ii) the creditor has a note of execution for collection executed by a notary. The creditor which deducted the bad or doubtful debt must also reduce related deductions (deductions related to income recognised as the bad debt in creditor’s accounts).

As of 1 April 2011, (with some transitional provisions) when a creditor pursues action to recover the debt, the debtor is required to adjust its deductions at the moment of
(i) taking effect of the court’s decision or (ii) delivery of the note on debt collection by the notary.

**Pension expenses**
The obligatory Ukrainian social security insurance contributions, including state pension contributions charged on payroll expenses, are deductible for employers. If an employer pays non-state pension contributions at its own expense, such contributions may be deducted in an amount not exceeding 25% of the total amount of payroll expenses accrued for a relevant employee during the tax year of the reporting tax periods in which such payments are incurred.

**Payment for directors**
Payments (including bonuses) of a business nature are normally deductible payments, if properly structured.

**Net operating losses**
Ukrainian tax legislation does not provide refunds for deductions. However, tax losses may be carried forward indefinitely. In the past, Parliament regulated specific losses that could be carried forward. For example, taxpayers were able to use only 20% of their losses on 1 January 2010 when paying tax under a return for the first quarter of 2010. No such restriction has been adopted for 2011.

Ukrainian tax legislation does not provide refunds for losses carried back.

**Payments to foreign affiliates**
Payments of a business nature are normally deductible payments. When such payments are made to related parties, however, the payer is required to hold documentary evidence that the payments are for services actually rendered. The amount of the payment also may not exceed the ‘usual’ (market) price. Reimbursement of costs incurred by holding companies is directly prohibited for deduction.

Payments for goods or services, as well as interests, to foreign entities in listed jurisdictions operating offshore tax regimes (37 tax haven jurisdictions are listed by Ukraine’s Cabinet of Ministers) are deductible at 85% of payments, unless evidence is held that the foreign entity is subject to the ordinary tax rules of the respective foreign jurisdiction (i.e. it does not benefit from the offshore tax regime).

**Group taxation**
In Ukraine, each company is taxed individually. However, companies that have domestic unincorporated branches may pay consolidated CIT or as separate branches.

**Transfer pricing regime**
Ukrainian transfer pricing regulations establish the principle of arm’s-length pricing for transactions between related parties. Parties are ‘related’ if, among other things, one party controls, directly or indirectly, a shareholding interest representing more than 20% of the charter capital of the other party.

**Thin capitalisation**
Ukraine does not have thin capitalisation rules as such. Instead, there are restrictions on related parties’ interest deductibility rules. The interest paid to a related party (as defined in the Tax Code) is deductible within the amount of interest income plus 50% of
Ukraine

the company's taxable profit (excluding interest income). Any interest paid to affiliates in excess of this limit is carried forward to future tax periods.

**Controlled foreign company (CFC) regime**

There are no specific CFC rules in Ukraine.

**Treatment of inter-company items**

Ukrainian tax legislation provides the following treatment for inter-company items:

- Dividends paid by Ukrainian companies are not tax deductible. Dividends received are not generally taxable.
- The payer of royalties is required to hold documentary evidence that the royalty payments are made for services actually rendered. The amount of the payment also may not exceed the 'usual' (market) price. Royalties paid to a non-resident are deductible only to 4% of net revenue. Royalties are completely non-deductible in respect of intangibles originated in Ukraine, paid to residents of the offshore jurisdictions, or paid to persons who are not beneficial owners.
- Expenses in relation to the financing of management bodies, including holding companies, are not tax deductible.
- Cost-sharing and similar intra-group payments, other than remuneration for services actually rendered, may not be deductible.
- Transactions of the receipt (provision) of financial aid between a taxpayer and its branches and other separate units without the legal entity status located in Ukraine shall not affect their taxable income or deductible expenses;
- Interest on loans is limited (see Interest expenses in the Deductions section).

**Tax credits and incentives**

Ukraine currently has very few tax incentives, although some are available. The following businesses are entitled to benefit from them:

- Income of publishing and agricultural entities may be tax exempt.
- Income received by investment funds is tax exempt.
- For enterprises selling domestically produced energy saving goods in Ukraine and enterprises adopting energy saving projects, up to 50% of profits may be exempt.
- As of 1 January 2010, a tax exemption is available for producers of electric and heat energy generated from bio-energy fuel as well as for producers of bio-energy powered domestic equipment. Tax incentives are also available for producers of gas (methane).
- Certain tax incentives are granted to the Union of European Football Associations (UEFA) and its companies during the hosting stage of 2012 UEFA European Football Championship in Ukraine and to specific segments of the tourism industry (including ten years of CIT exemption for 3, 4, and 5-star hotels).
- Light industry is tax exempt until 2021.

**Foreign tax credit**

Tax residents are allowed a credit for foreign taxes paid on income received abroad, provided there is a DTT between Ukraine and the relevant foreign state. The amount of foreign tax credit is limited to the amount of Ukrainian tax that would arise from the equivalent income in Ukraine (i.e. maximum 23%, 21% as of 1 January 2012). To claim a tax credit, the taxpayer requires an official confirmation of payment issued by the relevant foreign tax authority.
**Tax holidays**

Ukrainian tax legislation envisages tax holidays for small business, which are unlikely to impact international businesses.

---

**Withholding taxes**

WHT must be remitted to the authorities no later than the date when the payment is made to the income recipient.

Passive income (dividends, interest, royalties) from Ukrainian sources that is paid to non-resident entities is generally subject to 15% WHT. Other payments, including payments for engineering services, lease payments, and agency and brokerage fees, are also subject to 15% WHT, but payments for most other services are not subject to withholding.

A 15% WHT applies to income on the sale of real estate and on profits from the sale of securities.

Payments for freight services (including sea freight) are subject to 6% WHT.

WHT rates may be reduced under a relevant tax treaty.

As of 1 January 2011, the Tax Code specifies that the non-resident recipient of income sourced in Ukraine must also be considered the beneficial owner of such income in order to benefit from reduced tax rates under relevant tax treaties. According to the 2011 Tax Code, agents, nominee holders, and other intermediaries in respect of received income cannot be beneficial owners of income sourced in Ukraine, and, therefore, are not entitled to favourable treaty provisions.

Payments to non-resident persons for advertising services are not subject to withholding. However, the resident payer is required to pay, from its own funds, a 20% tax based on the value of such services.

A resident payer is similarly required to pay, from its own funds, a 12% tax if a payment is made to a foreign insurer or reinsurer whose rating of financial reliability does not meet requirements set by the authorised state agency. A 0% rate applies otherwise.

As taxes on advertising and insurance are levied on a resident party, they cannot be relieved using a tax treaty.

### Notes

1. The ownership threshold for the non-portfolio rate is 10%, 20%, 25%, or 50%, depending on the specific provisions in the treaty.
2. Several treaties contain a rate of 0% on interest paid to or guaranteed by a government or one of its agencies.
3. If more than one rate is shown, this means that the rate will depend on the type of royalties paid.
4. The lower rate applies to interest on current or deposit bank accounts, certificates of deposit until 1 January 2015.
5. The lower rate applies to interest paid on certain credit sales and on loans granted by a financial institution.
6. The treaties with Cyprus, Japan, Malaysia, and Spain were entered into by the USSR before it dissolved. Ukraine will continue to honour these treaties, unless they are superseded.
7. The lower rate applies to interest paid in connection with the sale on credit of any industrial, commercial, or scientific equipment, unless the indebtedness is between associated enterprises.
8. The 0% rate applies if the investor holds at least 50% of the capital of the company paying the dividends and the capital invested is at least USD 1 million; the payer of dividend should not operate in the field of gambling, show business or intermediation business, or auctions.
9. The 0% rate will apply if a French company or companies hold, directly or indirectly, at least 50% of the capital of the Ukrainian company, and the aggregate investments exceeds 5 million French francs.
10. The lower rate applies to interest paid on any loan granted by a bank.
11. The 0% rate applies if the investor holds directly at least 50% of the capital of the company paying the dividends, and the capital invested is at least USD 300,000.
12. The 10% rate applies if the company receiving the dividend has, for an uninterrupted period of two years before the dividend is paid, owned at least 25% of the capital stock of the company paying the dividends.
13. The 5% rate applies if the capital invested is at least USD 50,000.
14. The 0% rate applies if the Swedish company directly holds at least 25% of the voting power of the company paying the dividends and at least 50% of the Swedish company is held by Swedish residents.
15. The 0% rate applies only if the royalties are taxable in the United Kingdom.
16. The 15% applies to dividends from privileged shares or other fixed payments on shares, as well as to disguised employment income.

## Tax administration

### Returns

Tax returns must be filed by the taxpayer on a monthly (VAT) or a quarterly basis (CIT). Monthly tax returns are due within 20 calendar days following the end of the reporting
month, and quarterly returns are due within 40 calendar days following the last day of
the reporting quarter.

**Payment of tax**
Taxes payable assessed on the basis of tax returns are due within ten calendar days
following the deadline for filing of relevant tax returns.

**Statute of limitations**
Under Ukrainian tax legislation, a three year statute of limitations applies on any
outstanding Ukrainian tax liability, starting as from the date of a tax return is due to be
filed. There is no limit on the period in which an assessment may be made if a taxpayer
has deliberately evaded tax (if proven in court) or when a taxpayer fails to file a return.

**Tax audits**
The tax authorities may carry out scheduled audits once a year. Taxpayers must be
notified of the audit in writing at least ten days before the scheduled audit. In addition,
the tax authorities may perform out-of-schedule audits in certain circumstances (e.g. if
a taxpayer does not file tax returns on a timely basis or is reorganised or liquidated).

**Penalties**
The tax authorities will charge significant penalties for late filing or understatement of
tax liabilities. If a taxpayer fails to withhold tax when required, a penalty of up to 75%
of the deficient tax is imposed.

---

**Other issues**

**Exchange controls**
The key issues regarding Ukraine’s current exchange control regulations are as follows:

- Payments under foreign trade contracts between a resident and a non-resident entity
  should be in foreign currency only.
- Payments in foreign currencies between residents in the territory of Ukraine are
generally prohibited.
- Salaries to Ukrainian staff must be paid in Ukrainian currency (but expatriate
  employees can be paid in hard currency).
- Foreign loans must be registered with the NBU before funds are remitted to Ukraine.
The NBU has reinstated a maximum interest rate and other charges that may be
applied to foreign currency loans obtained from non-residents.
- The maximum allowable interest rates for foreign fixed rate loans in hard currency
  (inclusive of any fees and charges due under the loan agreement) are 9.8% per
  annum for loans up to one year; 10% per annum for loans for one to three years; and
  11% per annum for loans over three years. For loans with floating interest rates, the
  maximum allowable interest rate is three months of USD LIBOR plus 7.5%.
- Proceeds from exports must be credited to the exporter’s Ukrainian bank account
  within 180 days from the date of customs clearance (for goods) or date of services
delivery. Similarly, prepaid goods must be imported and cleared through customs
within 180 days of payment. Failure to do so results in a fine of 0.3% of the amount
due or paid for each day of delay.

Payments by Ukrainian business entities for services rendered by non-residents for
amounts exceeding EUR 100,000 (annually) require confirmation from the Foreign
Markets Monitoring Centre (FMMC) that the fee for the services does not exceed
market prices. Provided the relevant documentation is in place, this should not delay
payments. However, the process cannot be taken lightly. If the FMMC rejects an application, no payment will be permitted.

A number of foreign currency transactions may be undertaken only if an individual licence has been obtained from the NBU.

**Choice of business entity**

Generally, a limited liability company is the most widely used corporate vehicle in Ukraine for both residents and non-residents. A limited liability company has simple registration procedure, is inexpensive, and is easy to maintain. It also provides more flexibility in terms of repatriating dividends from Ukraine.

**Business and tax treatment of intellectual property**

Ukrainian laws concerning intellectual property rights provide for a rather developed background for intellectual property usage. Economic rights of authors and neighboring rights owners may be assigned or licensed. Moral rights are not transferable. However, in the field of enforcement and tax and court practice, there is an enormous lack of practical experience.

Tax treatment for intellectual property transactions is subject to separate analysis on case-by-case basis, as the Ukrainian tax legislation provides different approaches depending on the nature of the agreement concluded. For instance, the transfer of intellectual property may be treated as its sale, provision of services, or royalty agreement.

**Mergers and acquisitions (M&A) from a business and tax perspective**

There are no specific laws regulating public takeovers and mergers in Ukraine.

The global financial crisis significantly affected M&A transactions in Ukraine. However, M&A activity in the Ukrainian market is gradually increasing now, especially in the view of an announced programme of economic reform which includes the privatisation of Ukraine’s regional power grid companies.

The Ukrainian Tax Code provides some guidance on the tax regime of corporate mergers and acquisitions that is generally favourable for M&A transactions. However, no VAT refund in cash will be available in 12 months after transaction. Also, no deduction of tax losses is available if the acquired entity was a related party to an acquirer for less than 18 months.
**Significant developments**

There is a growing trend of tax reforms in the Middle East region and this may result in changes to the tax laws in the United Arab Emirates (UAE).

In particular, the United Arab Emirates (along with the other Gulf Cooperation Council or GCC states) has committed to introduce a value-added tax (VAT) system. The UAE government has made significant progress towards the introduction of VAT; however, there is no formal legislative announcement yet on its introduction.

Advice should therefore be sought to confirm the current status of the UAE tax laws and reforms.

**Taxes on corporate income**

The United Arab Emirates is a federation of seven emirates: Abu Dhabi, Dubai, Sharjah, Ajman, Umm Al-Qaiwain, Ras Al-Khaimah, and Fujairah. Currently, the UAE federation does not impose a federal corporate income tax in the emirates. However, most of the emirates introduced income tax decrees in the late 1960s, and taxation is therefore determined on an emirate by emirate basis.

Under the emirate-based tax decrees, corporate income taxes (CIT) may be imposed on all companies (including branches and permanent establishments) at rates of up to 55%. However, in practice CIT is currently imposed only on branches of foreign banks and companies which produce, trade in, or trade in rights over oil, gas, or other hydrocarbon products (i.e. oil & gas companies) having operations in the emirate.

In addition, some of the emirates have introduced their own specific banking tax decrees which impose tax on branches of foreign banks at the rate of 20%.

**Corporate residence**

Tax residence under the tax decrees of the various emirates is based upon the French concept of territoriality. Basically, the French territoriality concept taxes profits based on territorial nexus, rather than taxing profits earned outside the country.

**Permanent establishment (PE)**

For non-resident companies, the CIT liability will also depend on the existence of any kind of PE. Most of the emirate tax decrees include a definition of a PE that generally includes a branch, management or other fixed place of business, and presence through
an agent that has and habitually exercises authority to conclude contracts on behalf of such corporation. The definitions need to be considered individually under the applicable tax decree.

---

**Other taxes**

**Value-added tax (VAT)**
The United Arab Emirates does not currently operate a VAT regime. However, the United Arab Emirates has made significant progress towards its introduction, and it is known that the introduction of a VAT is expected in the near future.

**Municipal tax**
Most emirates impose a municipality tax on properties, mostly by reference to the annual rental value. It is generally the tenants' obligation to pay the tax; however, the tenants’ employer will typically pay the tax on behalf of the employee. In some cases, separate fees are payable by both tenants and property owners. For example, in Emirate of Dubai, it is currently imposed at 5% of the annual rental value for tenants or for property owners at 5% of the specified rental index.

Further, a land registration fee may also be levied on transfer of ownership of land or property. For example, a land registration fee is levied in the Emirate of Dubai at a rate of 2% of the sale value of the property (shared between the buyer and seller), payable to Dubai Land department.

These levies are imposed and administered differently by each emirate.

**Customs and excise duties**
Generally, a customs duty of 5% is imposed on the cost, insurance, freight (CIF) value of imports. Other rates may apply to certain goods such as alcohol and tobacco, and certain exemptions may also be available.

Currently, there are no separate excise taxes levied in the United Arab Emirates.

**Hotel tax**
Most emirates impose a hotel tax of 5% to 10% on the value of hotel services and entertainment.

---

**Branch income**

As each emirate has a different CIT decree, the decree of each emirate must be consulted to determine the treatment of branches of foreign corporations.

In certain emirates, branches of foreign banks are governed by special banking tax decrees where they are taxed at 20% of their adjusted taxable income.

---

**Income determination**

The tax decrees of the various emirates levy taxation on financial accounting profits. The tax decrees may provide for additional adjustments in specific situations. Currently, these adjustments may not be too relevant given that CIT is not imposed for most
companies (except for oil & gas companies and branches of foreign banks having operations in the emirate) in the United Arab Emirates.

**Deductions**

Deductions are determined based on accounting principles and the tax decrees of the various emirates. Currently, these deductions may not be too relevant given that CIT is not imposed for most companies (except for oil & gas companies and branches of foreign banks having operations in the emirate) in the United Arab Emirates.

**Group taxation**

The United Arab Emirates does not currently permit group taxation.

**Tax credits and incentives**

The United Arab Emirates offers numerous incentives in the form of tax holidays/exemptions, including offering a range of free trade zones.

**Free trade zones (FTZs)**

Currently, there are over 30 FTZs (and business parks) in the United Arab Emirates, each having its own regulations. Businesses (and their employees) established in FTZs are generally eligible for guaranteed tax holidays for ten to 50 year (renewable) periods. The FTZs also offer exemption from customs duties. The laws granting these holidays and exemptions are not consistent among the various FTZs, and each FTZ therefore needs to be considered separately.

**Withholding taxes**

There are currently no withholding taxes in the United Arab Emirates.

**Tax treaty network**

Taxpayers resident in the United Arab Emirates have access to an extensive tax treaty network. These treaties may not be immediately relevant for UAE withholding taxes (which are not imposed under the UAE tax decrees); however, they may continue to allow for other beneficial tax provisions (e.g. right to tax in the other treaty country). For completeness, the treaties currently in force are listed below. A number of other treaties are at various stages of negotiation.

**Significant developments**

Several notable changes to the United Kingdom’s (UK) corporate tax system have been made in the past year. The government has also announced a number of reform measures for corporation tax, together with a programme of future changes and consultations, including a roadmap of how reform will develop in the next five years. The overall aim is to improve the international tax competitiveness of the UK economy by reforming four main areas:

- Rate of corporation tax.
- The corporate tax base.
- Policy making.
- Administration and collection.

Because the UK legislative process can lag behind the announcement of proposals, certain changes are already law, others are very likely, or practically certain, to become law, whilst others are issues announced for wider consultation and future enactment into law.

Significant measures introduced and fully enacted in law which have full impact in 2010 and 2011 include a reduction in the rates of corporation tax, the introduction of a debt cap, commencement of the dividend exemption regime, and the introduction of a bank levy with effect from 1 January 2011. Reductions in rates of capital allowances (tax depreciation) from April 2011 are practically certain to be implemented. These changes and areas of future reform and consultation are discussed below.

**Changes that have taken effect in the past year**

Following consultation on the taxation of foreign profits, a package of complex and far reaching measures was introduced in 2009 and impacts UK inbound, outbound, and purely domestic businesses through 2010 and 2011 and beyond. It comprises:

- a tax exemption for most non-UK dividends and other distributions (as well as for UK dividends) received on or after 1 July 2009
- the introduction of a ‘debt cap’ restricting UK tax deductions for finance costs to the level of a group’s external finance expense, which applies to amounts payable in accounting periods beginning on or after 1 January 2010, and
- the abolition of certain controlled foreign company (CFC) exemptions for accounting periods starting on or after 1 July 2009, subject to transitional provisions (a fundamental overhaul of the CFC regime is under consideration and the subject of further consultation, see below).

Simplification of certain elements of the corporate capital gains regime has been introduced and will almost certainly be effective from July 2011. These elements
include reducing the impact of degrouping charges (by election, a group can take advantage of these changes from 1 April 2011), and facilitating group reorganisations and other corporate transactions.

A new bank levy has been introduced from 1 January 2011 (subject to formal legislative process and approval which is almost certain to complete) and will take the form of an annual tax on certain liabilities of most UK based banks and building societies. The tax will be levied at the following rates:

- January and February 2011: 0.05% of a bank’s short-term relevant liabilities, and 0.025% of long term equity and liabilities.
- March and April 2011: 0.1% of a bank’s short-term relevant liabilities, and 0.05% of long term equity and liabilities.
- 1 May 2011 to 31 December 2011: 0.075% of a bank’s short-term relevant liabilities, and 0.0375% of long term equity and liabilities.
- From 1 January 2012: 0.078% of a bank’s short-term relevant liabilities, and 0.039% of long term equity and liabilities.

The bank levy will not be deductible for corporation tax purposes. The form of the levy is similar to arrangements being implemented in other countries.

Changes tightening the Disclosure of Tax Avoidance Schemes (DOTAS) (or Tax Avoidance Disclosure (TAD)) regime have been enacted with effect from 1 January 2011 and require both earlier and quarterly disclosures.

Employer’s national insurance contributions (NICs) increased by 1% to a maximum of 13.8% from 6 April 2011. (Employee’s NICs also increased from the same date; details are given in the Individual Tax Summaries).

The main corporation tax rate was reduced from 28% to 26% from 1 April 2011, see below.

**Changes enacted but not yet in force**

The Finance Bill (March 2011) changed the main rate of corporation tax from 28% to 26%, and reduces the small profits rate from 21% to 20%, both effective 1 April 2011. Further reductions were announced but these have not yet been enacted (see below). Before March it had been announced that the rate would fall in April 2011 from 28% to 27%, but in his budget the Chancellor announced a further reduction to 26%.

There are firm proposals - very likely to be enacted but not yet law - such that:

- the main rate of corporation tax, currently 26% from 1 April 2011, will fall by a further 1% each year until it reaches 23% on 1 April 2014
- effective for years ending on or after 1 April 2012, the main rates of capital allowances (in effect, statutory depreciation rates) will be reduced; the general rate for plant and machinery will be reduced from 20% to 18% per annum, and the rate for long-life and special plant from 10% to 8% per annum
- the introduction, from 6 December 2010 of a principles-based rule to neutralise any UK tax advantage that arises as a result of financial ‘group mismatches’, i.e. where intra-group financial transactions are treated differently for tax purposes in the individual group members concerned, and
- the 2% ‘entry charge’ for property businesses wishing to convert to the tax advantaged regime for Real Estate Investment Trusts (REITS) will be abolished from April 2012.
Consultations and proposals - ongoing
There are a number of announced proposals for future reform, on which consultations are currently in progress, most significantly:

- measures to tackle tax avoidance, including consultation on the introduction of a general anti-avoidance rule (GAAR)
- the simplification of reliefs and allowances
- a review of corporation tax to establish a broad tax base, a low rate and a more territorial approach
- a new approach to policy making and consultation
- reform of the complex CFC regime, with major reform anticipated to be effective from 2012, so that most genuine overseas businesses will be exempt from the CFC charge
- reviewing the UK taxation of foreign branches, which it has now been announced will be conducted alongside the reform of the CFC rules. In particular, it is proposed that profits of foreign branches of UK groups can be elected out of UK corporation tax
- a refocussing of research and development (R&D) tax credits on hi-tech companies, small firms and start-ups, and
- the introduction of a reduced 10% rate of corporation tax on UK patent income from April 2013 - otherwise to be known as the UK ‘patent box’.

In addition, the Government has also put taxpayers on notice that it is keeping under review whether to introduce an extension to the ‘unallowable purpose’ anti-avoidance rule for loan relationships and derivative contracts, along the lines of the measure it proposed as part of the package of measures arising from the taxation of foreign profits consultation but did not enact.

The European Union is presently working towards a Common Consolidated Corporate Tax Base to harmonise the corporate tax base (but not corporate tax rates) across the EU. It is not clear whether the UK will adopt this, nor when it will impact.

Taxes on corporate income

General corporation tax rates
The normal rate of corporation tax is 26% for the year ending 31 March 2012 (it had already been announced that the rate would fall by 1%, but in March 2011 the Chancellor doubled the decrease to 2%). The rate for the year ending 31 March 2011 was 28%, which had been the rate since 1 April 2008, before which it was 30%. This main rate applies to companies with profits in excess of 1,500,000 pounds sterling (GBP). This rate will fall to 25% from 1 April 2012, followed by a 1% reduction each year to 2014. It is proposed (and likely to be enacted) that the prevailing rate from 1 April 2014 will be 23%. For UK resident companies with tax-adjusted profits below GBP 300,000, a lower rate is generally applicable. This small profits rate is 20% from 1 April 2011 (21% to 31 March 2011). For companies with tax-adjusted profits between GBP 300,000 and GBP 1,500,000, there is a sliding scale of tax rates. For corporate entities with associated companies, both profit limits are divided by the number of active companies worldwide.

Special corporation tax regimes
There are no special rates for, for example, financial concerns or manufacturing groups; in general all companies in all sectors are subject to the same corporate tax rates. There are however two exceptions to this general rule.
United Kingdom

Profits which arise from oil or gas extraction, or oil or gas rights, in the UK and the UK Continental Shelf (‘ring-fence profits’), are subject to tax in the UK in accordance with rates applicable in 2006, i.e. a full rate of 30% and a small companies’ rate of 19%. It should also be noted a supplementary tax charge of 32% (increased from 20% from 24 March 2011) applies to ‘adjusted’ ring fence profits in addition to normal corporation tax.

Life insurance businesses are also taxed under a special regime, which effectively includes different corporate tax rates as well as special rules for quantifying profits.

**Petroleum revenue tax (PRT)**
A tax of 50% is levied on profits accruing from oil and gas extracted in the United Kingdom and in the UK territorial sea and continental shelf in respect of fields given development consent before 16 March 1993. PRT has effectively been abolished, together with associated relief and allowances, for fields that received development consent after 15 March 1993. PRT paid is deductible in computing corporation tax on the company’s total profits.

**Income tax for companies**
A non-resident company is subject to UK corporation tax only on the trading profits of a UK permanent establishment (as discussed further in the Corporate residence section). Any other UK source income received by a non-resident company is subject to UK income tax at the basic rate, currently 20%, without any allowances (subject to any relief offered by a double tax treaty if applicable). This charge most commonly arises in relation to UK rental income earned by a non-resident landlord (NRL). The UK therefore operates a NRL Scheme which requires the NRL’s letting agent or tenants to withhold the appropriate tax at source unless they have been notified that the NRL has applied and been given permission to receive rents gross.

**Local taxes**
There are no local or provincial taxes on income.

Local taxes (known as ‘rates’) are levied on the occupiers of business property by reference to the property’s deemed rental (or ‘rateable’) value, subject to certain reliefs. The amounts paid are deductible for corporation tax purposes, provided they meet all the usual requirements for deductibility.

**Corporate residence**

**Basic rules**
UK incorporated companies are generally treated as UK resident. However, companies resident in the United Kingdom under domestic law, but treated as solely resident in a different country under that country’s double taxation treaty with the United Kingdom, are not treated as UK resident for the purposes of UK domestic tax law.

Additionally, subject to the above exception, companies incorporated overseas are also treated as UK resident if their central management and control is situated in the UK. That is, if the place of the highest form of control and direction over a company’s affairs, as opposed to decisions on the day-to-day running of the business, is in the UK.

**Direct tax liability**
Tax residence is important because resident companies are taxable in the UK on their worldwide profits, while non-resident companies are subject to UK corporation tax.
only on the trading profits attributable to a UK permanent establishment (PE), plus UK income tax (generally by way of withholding, though this is not the case with UK source rental profits) on certain UK source income.

For non-resident companies, the liability to corporation tax depends on the existence of any kind of PE through which a trade is carried on. The meaning of PE for UK tax purposes is set out in statute; it is largely based on the OECD Model Tax Convention definition, but is not identical in all respects. Subject to the terms of the relevant double taxation agreement, a non-resident company will have a PE in the UK if it either:

- has a fixed place of business in the UK through which the business of the company is wholly or partly carried on, or
- an agent acting on behalf of the company has and habitually exercises authority to do business on behalf of the company in the UK.

A fixed place of business includes (but is not limited to) a place of management, a branch, an office, a factory, a workshop, an installation or structure for the exploration of natural resources, a mine, oil or gas well, quarry or other place of extraction of natural resources, or a building or construction or installation project. A company is not however regarded as having a UK PE if the activities for which the fixed place of business is maintained or which the agent carries on are only of a preparatory or auxiliary nature (also defined in the statute).

Rules exist to explain how the PE’s profits should be evaluated for UK tax purposes. Financing arrangements between the branch and head office must be disregarded and there are special rules for banks to stop under-performing loans being allocated to the UK branch in a way that is considered unacceptable and similar potential manipulations. However, a deduction is given for a proportion of head office costs.

Where a non-resident company is liable to UK income tax on non-trading income, otherwise than by way of withholding tax (which, because of rules limiting such liability, almost always means tax on UK net rental income), that tax can only be charged at the basic rate of income tax, currently 20%; companies cannot be charged to tax at the much higher rates which can be applied to individuals.

---

**Other taxes**

**Value-added tax (VAT)**

The standard rate of 20% applies to most goods and services, apart from domestic fuel and power, and certain other reduced-rate supplies, which are subject to VAT at 5% (note that the standard rate was increased from 17.5% with effect from 4 January 2011).

Most exports, most food, most public transport, books and publications, and certain other essential goods and services are zero-rated. Some supplies are exempt, the main categories being the grant of certain interests in land, insurance, financial services, betting and gaming, education, certain sports services, cultural services, and health and welfare. Zero-rating is preferable to exemption, because the VAT on costs incurred in making a zero-rated supply can be recovered, while that incurred in making an exempt supply cannot.

VAT is chargeable on the supply of most goods and services made in the UK by ‘taxable persons’ in the course of business, when their taxable turnover exceeds the registration
United Kingdom

thresholds. Taxable persons include individuals, companies, partnerships, clubs, associations, or charities.

Taxable persons who are not normally resident in the UK, and do not have a business establishment in the UK and, in the case of companies, are not incorporated in the UK, but who make taxable supplies, sales to unregistered persons in the UK, or acquisitions of goods in the UK above the relevant limits, may be required to register and account for VAT here.

If the value of taxable supplies is over a specified limit, registration for VAT is compulsory unless the taxable supplies made are wholly or mainly zero-rated, in which case it is possible to apply for exemption from registration. The Government announced in Budget 2011, that it plans to introduce a zero VAT registration threshold for businesses not established in the UK.

The rules applying to VAT and territoriality are different to those applying to direct tax in that they derive from the principles of the place of supply in EU law, as enshrined in EC VAT Directives. Having determined that a supply of goods or services has taken place, the second condition to be determined, if the transaction is to fall within the scope of UK VAT, is whether the supply takes place within the UK. The place of supply rules are different for goods and for services. A person or business belonging outside the UK, with no place of business here may nevertheless be liable to UK VAT registration where the place of supply of those goods or services is in the UK.

From 1 January 2010, for services, the basic rule is that services are treated as made where the customer ‘belongs’ or is established for VAT purposes, and the customer is responsible for accounting for the VAT due via the reverse charge procedure. However, this is subject to a number of special rules and exceptions. Determining where a business is established for VAT purposes is based on EU law criteria. From 1 January 2010, for business to consumer (B2C) supplies, the basic rule is that services are treated as made where the supplier ‘belongs’ or is established for VAT purposes. For goods, the basic rule is that a supply of goods is taxable in the territory where those goods are physically located at the time of supply. Hence if goods are supplied in the UK by a non-established taxable person there will still be a liability for VAT purposes and the person must register for VAT in the UK if the taxable supplies exceed the current UK VAT registration thresholds.

**Customs and excise duties**

Many goods imported into the UK from outside the European Union are subject to customs duties. The rates of duty are provided by the EU’s Common Customs Tariff and vary widely.

Excise duties are chargeable on most hydrocarbon oil products, alcoholic drinks and tobacco products imported into or produced in the UK. Purely as examples, most road fuels carry a duty of about GBP .58 per litre, cigarettes duty of about GBP 154 per thousand (plus 16.5% of the retail price), tobacco of about GBP 151 per kg, most wines of about GBP 2.41 per litre, and spirits of about GBP 25 per litre of pure alcohol included.

**Insurance premium tax (IPT)**

IPT at the standard rate of 6% applies to premiums for most general insurance, such as for buildings and contents and motor insurance, where the insured risk is in the UK (note that the standard rate was increased from 5% from 4 January 2011). Life assurance and other long term insurance remain exempt, though there are
United Kingdom

anti-avoidance rules surrounding long term medical care policies. As an anti-avoidance measure, a higher rate of 20% applies to insurance sold by suppliers of specified goods or services, e.g. mechanical breakdown insurance, travel insurance (irrespective of supplier), insurance sold with TV and car hire, and ‘non-financial’ guaranteed asset protection (GAP) insurance sold through suppliers of motor vehicles or persons connected with them. Further anti-avoidance rules were introduced with effect from 9 December 2009 affecting administration or similar fees connected with contracts of insurance, charged under separate contracts by brokers and other intermediaries (note that the higher rate was increased from 17.5% from 4 January 2011).

**Airport passenger duty**

Individuals leaving the UK by air are obliged to pay a duty, which in practice is invariably included in the cost of the air ticket. Rates of duty are based on a system of geographical banding and class of travel, ranging from a reduced rate of GBP 12 for short haul destinations in the lowest class of travel, to GBP 170 for long haul destinations in higher classes of travel.

**Environmental taxes**

There are several environmental taxes as below, that is, ‘landfill tax’, ‘climate change levy’ and ‘aggregates levy’.

**Landfill tax**

This is a tax on waste disposal in landfill sites. The standard rate from 1 April 2011 is GBP 56 per tonne, increasing to GBP 64 per tonne from 1 April 2012. The reduced rate for inert waste is GBP 2.50 per tonne.

**Climate change levy**

This is a tax on energy used in the UK such as electricity, gas, coal and so on, and is charged at rates that depend on the nature of the fuel used. There are reduced rates and exclusions from the charge, for example, supplies to domestic or charitable users and to those who carry out specific energy-saving measures.

**Aggregates levy**

This tax is levied on the extraction or importation of sand, gravel and crushed rock for commercial exploitation in the UK. The rate of tax is GBP 2.00 per tonne from 1 April 2010, increasing to GBP 2.10 per tonne from 1 April 2012.

**Stamp taxes**

Stamp duty is charged at 0.5% on instruments effecting sales of shares. Agreements to sell shares usually attract stamp duty reserve tax (SDRT) at 0.5%. The liability to SDRT may be cancelled by paying the stamp duty due on a stock transfer form (or other transfer instrument) executed in pursuance of the agreement. Stamp duty is not usually charged on an issue of shares, but is charged at a higher rate of 1.5% on an issue of shares in bearer form. Issues or transfers of shares to clearance services or depositary receipt systems attract SDRT at 1.5%. (Stamp duty at 1.5% may be payable on instruments effecting transfers of shares to such services or systems.) However, following a European Court of Justice ruling in 2009, the 1.5% SDRT charge is no longer collected in respect of an issue of shares (or transfer of newly issued shares) where the clearance service or depositary receipt system is based within the EU. Furthermore, there are arguments that the 1.5% SDRT charge in the context of issue of shares to systems based outside the EU and transfers of shares to these systems are not lawful. This is the subject of ongoing litigation in the UK and those potentially affected are advised to seek specific advice.
United Kingdom

Transfers of land and buildings are charged to stamp duty land tax at graduated rates up to 4% (5% for residential property from 6 April 2011). Grants of new leases are charged to stamp duty land tax at 1% of the net present value of the rents payable in excess of GBP 150,000 plus up to 4% (or 5% for residential property from 6 April 2011) on any premium paid.

**Employers’ national insurance contributions**

Employers are obliged to pay national insurance contributions based on a percentage of each employee’s earnings. For the year ending 5 April 2011, the rate is 13.8% on all earnings above GBP 136. There is some reduction for employees ‘contracted out’ of the state pension scheme into a private scheme.

**Local municipal taxes**

Local taxes are not based on income, but rather are levied on the occupiers of business property by reference to a deemed annual rental value for the property concerned. These taxes are administered by regional local government authorities rather than central government.

**Pension Protection Fund Levy**

All defined benefit pension schemes pay a levy, based on pension fund liabilities and the financial risk of the employing company. This levy funds a compensation fund for pensioners and employees of failed schemes.

**Bank levy**

A new bank levy has been introduced from 1 January 2011 (subject to formal legislative process and approval which is almost certain to complete) and will take the form of an annual tax on certain liabilities of most UK based banks and building societies. The tax will be levied at the following rates:

- January and February 2011: 0.05% of a bank’s short-term relevant liabilities, and 0.025% of long term equity and liabilities.
- March and April 2011: 0.1% of a bank’s short-term relevant liabilities, and 0.05% of long term equity and liabilities.
- 1 May 2011 to 31 December 2011: 0.075% of a bank’s short-term relevant liabilities, and 0.0375% of long term equity and liabilities.
- From 1 January 2012: 0.078% of a bank’s short-term relevant liabilities, and 0.039% of long term equity and liabilities.

The bank levy will not be deductible for corporation tax purposes. The form of the levy is similar to arrangements being implemented in other countries.

---

**Branch income**

**Basic rules for UK branches**

Tax rates on the profits of permanent establishments (PE) are the same as for domestic corporations, except that the small profits rate is not available to non-UK resident corporations unless under the terms of a double taxation treaty.

There are specific rules setting out how the PE's profits should be evaluated for UK tax purposes, which broadly seek to treat the business as if it were a stand alone company. Financing arrangements between the branch and head office must be disregarded and there are special rules for banks to stop under-performing loans being allocated...
to the UK branch in a way that is considered unacceptable and similar potential manipulations. However, a deduction is given for a proportion of head office costs.

No tax is withheld on transfers of profits to the head office.

**UK companies’ branches**
The UK taxes on a worldwide basis, so non-UK branch profits are computed and taxed in the normal way for UK tax resident companies. However, UK tax will generally be reduced by credit for local direct taxes paid, either under a treaty or via the UK’s unilateral relief rules.

*As noted in the Significant developments section, this is likely to change drastically in 2011 or 2012. Draft legislation published in December 2010, if enacted, will broadly exempt from UK tax overseas branch profits other than from insurance, shipping and aircraft operations, and most investment activity; the exact scope of the new regime, and its start date, should become clearer during 2011.*

---

**Taxable income determination**

A UK resident company is taxed on its worldwide total profits.

The UK tax system requires those total profits to be calculated by finding the aggregate of (i) the company’s net income from each source and (ii) the company’s net chargeable gains arising from the sale of capital assets.

The main sources of income recognised by the legislation are (i) profits of a trade, (ii) profits of a property business, (iii) non-trading profits (or losses) from loan relationships, mainly interest receivable or payable, (iv) non-trading gains (or losses) on intangible fixed assets, and (v) non-exempt dividends or other company distributions. Determining income from the first four of these relies heavily on the company’s accounts; determining income from the last does not, nor does calculating chargeable gains or income from other sources.

The rules for determining the gross income in each category differ in certain respects according to the source concerned and are different again when calculating gains. Likewise there are also subtle differences in the rules concerning the deductions that are permissible in respect of different sources of income and in respect of gains. Because of this continuing reliance on taxing companies on a 'source-by-source' basis, the UK system is not well suited to being analysed in terms of income determination and deductions as two wholly separate topics.

**Basic rules for accounts-based sources**

A company’s trading profits are based on its worldwide profit before tax in its accounts. Adjustments are made for non-trading receipts (such as dividends from other companies and income from property) and non-deductible expenditure (such as capital expenditure or expenditure which is not incurred for the purposes of the trade). Depreciation for tax purposes (known as capital allowances) is calculated and substituted for the depreciation charged in the accounts. There are also a number of other statutory adjustments to be made; three important ones are that pension contributions and deferred pay are broadly deductible only when paid, that a deduction is available for the notional cost of certain share awards to employees, and that where acquired intangibles are not depreciated in the accounts a 4% flat-rate deduction can usually be claimed. There are, however, many others.
United Kingdom

Similar principles apply in relation to the calculation of profits of a property business.

The profits from a company's trading and non-trading loan relationships and related matters are based on the accounts. For this source of income, the distinction between 'capital' and 'revenue' receipts and deductions is not relevant. All credits and debits in the accounts are aggregated in order to find the net profit or deficit. Certain statutory adjustments have to be made — these include an interest capping limitation. Broadly the same regime applies to income and expenses relating to intangibles including goodwill. For a trader these are therefore specific areas where capital amounts can be taxed or allowed.

For traders any profit or loss on loan relationships, and/or on intangibles, are generally included within the trading profits; they become a single source of profits. For loan relationships and intangibles not connected with a trade, the company has a separate source of profits or a separate class of loss.

**Income losses**

Where a loss arises in respect of a particular source of income, there are detailed rules regarding the possible offset of the loss. Carry-back and sideways reliefs are often allowed within limits; carry-forward is generally allowed and carried forward losses do not time expire. Losses can also be utilised by other group companies (see the Group taxation section).

More specifically, dealing with the main sorts of income losses,

- trading losses may be set off against any other source of profit (or gains) in the same year, or may be carried back one year against any other source of profit (or gain) (three years on the cessation of the trade), or may be carried forward without time limit against profits of the same trade only
- property losses may also be set off against any other source of profit (or gains) in the same year, or may be carried forward without time limit against profits of any sort; they cannot, however, be carried back, and
- non-trading deficits (i.e. financing losses) can again be set off against any other source of profit (or gains) in the same year, or may be carried back one year against non-trading credits (i.e. financing profits) or may be carried forward without time limit against non-trading profits.

Non-trading companies may deduct the (non-capital) management expenses incurred in managing its investments from its total profits. Any excess management expenses can be carried forward (without limit) to set against profits in future years.

While income losses can generally be off-set against capital gains of the same accounting period, capital losses are never available for offset against any type of income.

**Inventory**

In general, the book and tax methods of inventory valuation will conform. In practice, inventories are normally valued for tax purposes at the lower of cost or net realisable value. A first in first out (FIFO) basis of determining cost where items cannot be identified is acceptable, but not the base-stock or the last in first out (LIFO) method.

**Realised and unrealised exchange gains/losses**

Unrealised exchange gains and losses tend to arise on debts and derivatives; they are then taxed or allowed, together with realised amounts, on an accounts basis in the same
way as other debits and credits arising out of loan relationships. Where gains or losses arise on other payables or receivables to a trader or property investor, they will again generally be taxed or allowed on an accounts basis. For a trader the taxable or allowable amount will become simply part of the trading profit or loss; for other companies it will become a separate source of taxable profit (a ‘non-trading credit’) or loss (a ‘non-trading deficit’).

Where unrealised differences arise on other capital assets they will not generally be taxable or allowable at that stage; instead, the exchange difference becomes part of the computation and is effectively taxed or allowed when the asset is disposed of and any difference is realised.

**Dividends received**
Most foreign and UK dividends received by UK companies have been exempt from corporation tax since July 2009; one of several criteria has to be met, but these are widely drawn (one test, for example, is that the recipient controls the payer). For non-exempt foreign source dividends, double tax relief (DTR) will be available on a dividend by dividend basis. It would be unusual for companies to be taxed on UK dividends because of the breadth of the exemption, but where they are taxed, there is no concept of DTR for UK dividends.

**Capital assets**
Gains on capital assets are taxed at the normal corporation tax rates. The chargeable gain (or allowable loss) arising on the disposal of a capital asset is calculated by deducting from gross proceeds the costs of acquisition and subsequent improvements, plus the incidental costs of sale and indexation allowance. Indexation allowance compensates for the increase in costs based on the percentage rise (if any) in the UK retail prices index to the date of disposal. Indexation allowance is however limited: it cannot create or increase a capital loss, it can only reduce or eliminate a chargeable gain. These calculations must be done in sterling, so any foreign exchange gains and losses will be taxed (or relieved) on disposal.

Special rules apply to assets held since 31 March 1982.

Most acquisitions and disposals between UK group companies are treated as made on a no gain no loss basis (i.e. at base cost plus indexation). Otherwise acquisitions from, or disposals to, affiliates are treated as made at fair market value, as are other acquisitions or disposals not at arm’s length.

Capital losses are allowed only as an offset to capital gains. An excess of capital losses over capital gains in a company’s accounting period may be carried forward without limitation but may not be carried back.

There is a good deal of anti-avoidance legislation concerning the computation of chargeable gains, notably to stop losses being created or gains avoided where assets are depreciated by intra-group transactions, or where losses are ‘bought in’ from third parties.

Gains realised on certain types of assets can be deferred where all or most of the proceeds are reinvested in other assets of those types within a specified period (generally three years). The ‘rolled-over’ gain then crystallises as and when the latter assets are sold. At present the main asset categories qualifying for roll-over are land and buildings used for a trade.
United Kingdom

Most disposals by trading groups of shareholdings of 10% or more are exempt from tax. The main exceptions will be those of non-trading subsidiaries or subgroups, or of companies acquired within the previous year. As noted previously, gains on goodwill and other intangibles acquired after March 2002 will be taxed as income, not as capital gains.

**Controlled foreign companies**

Under the CFC regime, a UK resident company may be taxed on a proportion of the undistributed profits of certain UK-controlled non-resident companies in which the resident company has an interest.

No liability arises where one of a number of tests (e.g. the ‘exempt activities’ test) can be satisfied. An ‘acceptable distribution’ exemption was withdrawn in 2009 when the rules regarding the taxation of dividends were changed.

As a result of a European Court of Justice decision that the EC Treaty allows intra-EU CFC charges only where the arrangements are ‘wholly artificial’, an additional exemption (not written into the statute) is available to those CFCs that are actually established in an EEA state and carry on genuine economic activity there.

The government is currently consulting on a radical overhaul of the CFC regime. This process is expected to continue well into 2011 and possibly beyond, with initial legislation not anticipated before Finance Act 2012.

**Double tax relief**

The UK has an extensive network of double taxation treaties. Unilateral relief is generally available in any event to credit overseas tax paid on non-UK source profits against the UK tax on the same profits, so that while the relevant treaty might sometimes extend that relief, their main function for UK companies is to limit overseas withholding taxes that would otherwise be payable on passive income.

The UK has a complex regime allowing ‘underlying’ tax relief in respect of foreign dividends, so that tax suffered at lower levels can be relieved (at least in part) where dividends flow to the UK via a chain of companies. This exemption is of limited application since 2009 because most foreign dividends are now exempt from tax.

**Partnerships**

In broad terms, if companies participate in UK partnerships (whether general partnerships, limited partnerships or limited liability partnerships) they will be taxed on a flow through basis. This will in very broad terms mean that UK corporate partners will be taxed on trading, property or financing income as it arises in the partnership accounts, and on non-exempt dividends on a receipts basis.

When considering overseas entities, the UK authorities will not be bound by how the entity is classified in its country of origin. Case law has determined a number of matters that should be considered when establishing whether a non-UK entity should be taxed in the UK as if it were a company or a partnership. HMRC also maintains a public list of non-UK entities and the decisions it has previously made regarding their classification. However, if the parties have flexibility regarding the constitution of such entities then their classification may be viewed differently, either by HMRC or the courts. This area is complex and therefore specialist advice should be sought.
General rules for deductions

As noted in the income section, the UK tax system requires taxable profits to be calculated by aggregating (i) the company's net income from each source and (ii) the company's net chargeable gains arising from the sale of capital assets. This approach gives rise to a particularly complicated regime so far as deductions are concerned. Expenses are usually allocated to the source of income (or occasionally by reference to income generally) or to the particular gain to which they relate. The rules governing their deductibility differ according to whether the expense relates to a capital gain or to income, and indeed according to the particular source of income concerned. For example, there is a considerable difference in the manner in which tax relief is given for expenses incurred by companies trading in property as compared to those that invest in property. The regime also has a large number of specific rules dealing with particular types of deductions which take priority over the more general rules for each type of income.

We have therefore set out the general rule for trading expenses, being the most common category and, following that analysis, considered some specific common exceptions.

General rules for trading expenses

A trading company is generally permitted to deduct expenses that are incurred wholly and exclusively for the purposes of the company's trade, provided those costs are not capital in nature and are charged to the profit and loss account. There is a significant amount of case law surrounding whether expenses have been incurred wholly and exclusively for the purposes of a company's trade and whether they are capital or not. Relief is generally given in the period the expenses are accrued in the accounts, subject to some specific exceptions. In particular, contributions to a registered pension scheme are only allowed on a 'paid' basis with some further provisions under which some contributions may be spread over a number of years; and if bonuses and other staff costs are paid out more than nine months after the end of the accounting period in which they are accrued, they are only allowed on a paid basis.

The general rule is made subject to a raft of specific statutory provisions, some of which allow deductions and others of which limit them; some of the more important of these are discussed below, but there are many others. There is, as one example, a bar to deducting the costs of business entertainment, except within quite strict limits.

Management expenses

Holding companies are permitted a deduction for expenses to the extent that they are expenses of managing the company's investment business and are not capital in nature. Such costs would typically include audit fees, directors' costs, rent, local rates, and office costs. These costs can be set against any sources of profit the company may have (such as financing income). For the top company of a listed group, such expenses can be very substantial.

If the company has inadequate income (given that most dividend income will not be taxable) the excess can be surrendered as group relief. Alternatively it can be carried forward to set against future income, with no time limit.

Many of the specific prohibitions on the deduction of trading expenses (though not all) are extended to create a similar bar on the deduction of such costs as management expenses for non-traders; conversely, many rules giving traders a specific deduction for certain costs are extended to allow non-traders similar relief. But this is not invariably the case. For example, traders can only deduct costs 'wholly and exclusively' incurred...
United Kingdom

for the purposes of the trade; there is no similar rule for management expenses. However, the two specific limitations on trading deductions referred to above (pension contributions and late-paid remuneration) are extended to management expenses.

Employee share schemes
A deduction is often available to an employing company for the deemed cost of providing shares to employees, on a formula basis rather than the accounts charge (if any); this depends on the nature of the share plan and of the shares provided. This regime will generally allow a deduction to a subsidiary company whose employees receive shares (or options over shares) in the parent company.

Fines, penalties and bribes
Any payments that would constitute a criminal offence (e.g. a bribe), or would do so if paid inside the UK, are expressly not deductible as trading expenses or management expenses. Likewise fines and penalties imposed for breaking the law are also not deductible, although a deduction is usually available for legal costs incurred in defending such an action. Civil penalties, interest and default surcharges (e.g. relating to certain VAT defaults) are also generally non-deductible, except for damages which are compensatory rather than punitive (e.g. damages for defamation payable by a newspaper company).

The rule that any amount paid by way of a penalty for breach of the criminal law is not deductible derives largely from case law, and was explicitly said to be a policy rule. It is applied strictly; parking fines, and fines for breaches of regulations, or for price-fixing, are not deductible.

The rule does not however extend to compensatory payments which are not punitive. So settlements in relation to negligence which harms customers or patients, or for breach of contract, or with employees for wrongful dismissal, ought to remain deductible.

Bad debts, provisions, and reserves
A provision will be deductible for tax purposes if (or to the extent that) it:

- is in respect of allowable revenue expenditure
- is made in accordance with acceptable accounting practice
- does not conflict with any statutory rule governing the timing of relief (e.g. in relation to payment of staff costs), and
- is estimated with sufficient accuracy.

This rule extends to bad debts on trading account. Generally, however, bad debts are dealt with under the 'loan relationships' rules for financing costs and financing income. The rules there, however, are broadly the same; if the bad debt can be identified specifically enough to allow a bad debt provision which satisfies UK accounting standards, it should be deductible.

Local taxes
There are no local taxes on income.

Local municipal taxes (business rates) may be deducted from taxable income. These rates are based on property values.
**Funding costs**

Funding costs (primarily fees and interest) are broadly deductible on an accounts basis, even if capital in nature, but subject to thin capitalisation constraints (with no explicit safe harbours) and an interest cap based on the group’s external debt levels. This extends to foreign exchange deductions relating to debts owed and receivable.

Traders will generally take the deductions in computing trading income (which is also accounts based). Deductions relating to loans not used for trading purposes will give rise to ‘non-trading deficits’ which, if not group relieved, can be offset against profits of that year generally, or carried back one year (against that year’s funding profits), or carried forward indefinitely against non-trading profits.

**Intangible fixed assets**

A similar regime applies to intangible assets, such as patent rights, know-how and trademarks, and including goodwill. Royalties are generally deductible on an accounts basis, and except in relation to ‘grandfathered’ assets owned by the group on 31 March 2002, the accounts amortisation is also deductible (with an option to take a flat 4% deduction even if not amortised in the accounts). Traders will take the deductions in computing trading income; non-traders will create a ‘non-trading loss on intangible fixed assets’ which can be relieved as a loss against any profits of the year, carried back one year, or carried forward indefinitely.

Other types of depreciation/amortisation are very seldom allowable, but instead the UK has a wide (though diminishing) range of ‘capital allowances’ which are discussed separately below.

Income costs relating to research & development would normally be deductible in any event, but there is a special incentive connected with R&D which generally allows an additional deduction or the payment of a tax credit (see the Tax credits and incentives section).

**Depreciation/amortisation**

Depreciation of fixed assets (other than of goodwill and other intangibles) is not allowable as a deduction from any source of income. However traders, and most non-traders, are instead allowed specified rates of annual deduction in respect of specified classes of assets, together referred to as ‘capital allowances’, which are deducted in calculating trading income for traders, and (broadly) against income derived from the use of the fixed assets for non-traders.

In the period of expenditure, capital allowances are available, generally at 20% of the cost of machinery and equipment acquired for use in a trade or property rental business; thereafter, tax depreciation is taken generally at 20% per annum on the reducing balance basis. It is proposed (and likely to be enacted) that this 20% rate will reduce to 18% per annum with effect from April 2012. With some exceptions (notably cars, ships, and machinery and equipment in offices and other non-industrial buildings), the rate of tax depreciation for machinery and equipment with an expected useful life when new of at least 25 years, and purchased after 25 November 1996, is 10%. Since 1 April 2008, this 10% rate also applies to certain integral features in buildings and thermal insulation. This 10% rate will reduce to 8% per annum with effect from April 2012.

All businesses, regardless of size, can claim an annual investment allowance of 100% on the first GBP 100,000 per year of most qualifying expenditure incurred on or after
United Kingdom

1 April 2010, but reducing to GBP 25,000 from April 2012. This is restricted to a single allowance for groups of companies or associated businesses.

Enhanced allowances, typically at a rate of 100%, are available for expenditure on certain energy saving plant and other specific categories. The products and technologies supported by this regime are reviewed and updated regularly.

The rate of tax depreciation of most plant or machinery leased to non-residents is restricted, generally to 10% but in some cases to nil. However, HMRC now accept that in some circumstances these rules may be contrary to EU law and for leases finalised on or after 1 April 2006 where the lessee is resident in an EEA country which does not give the lessee relief broadly equivalent to the UK's capital allowances, HMRC will accept that the lessor is entitled to allowances at the normal 20% rate; in addition the 0% rate will not be enforced in the case of other EEA lessees.

No tax depreciation is normally allowed on buildings, apart from certain machinery and equipment embodied in the fabric of the buildings. Prior to April 2011, limited tax depreciation is given for new industrial buildings, agricultural buildings and certain hotels. This allowance is being withdrawn and is 1% (straight-line basis on cost) from 1 April 2010 and 0% after 1 April 2011.

Tax depreciation of machinery and equipment, and of industrial buildings, can be disclaimed in whole or in part, thereby deferring allowances.

Depreciation allowances may also be available in respect of the cost of the acquisition of mineral assets and other qualifying expenditures relating to mineral extraction, generally at the rates of 10% and 25% respectively on the reducing balance basis; and in respect of various other types of capital expenditure, including the cost of ships, construction of public roads, and dredging.

Excess depreciation allowances are generally recaptured on disposal. The recapture is calculated on a 'pool' basis for most machinery and equipment in which case there is no recapture unless the sale proceeds exceeds the total tax written down value of the pooled assets. The rules concerning which pool an asset goes into can be complex; a large company will generally have several pools ranging from single asset pools to a single large pool for most of its plant and machinery. There is no recapture for sales of industrial buildings.

Where assets are leased, capital allowances are generally available to the lessor rather than the lessee. However, this is an area of complexity, and in some situations (generally relating to finance leases), the allowances are only available to the lessee.

**Losses**

Income losses may be carried forward indefinitely, and, in general, set against any type of non-trading profits, but in contrast losses of a particular trade can be carried forward only against profits of the same trade. Unlimited loss carryback is available for trading losses against total profits of (normally) the previous 12 months (provided the same trade was being carried on in that period). There is a more limited facility to carry back certain non-trading losses, also normally for 12 months. Losses can also generally be surrendered to other group companies to set against their taxable profits for the same period.

Capital losses may also be carried forward indefinitely but may not be carried back. There is no ability to surrender capital losses to fellow group members but gains or
losses arising on a particular asset can be allocated to another group member (by means of a joint election on an asset by asset basis) and therefore there is a limited ability for the capital losses of one company to be offset against the gains of a fellow group member in the same or subsequent period.

There are complex anti-avoidance rules which restrict the utilisation of losses where there is a change in ownership of the company.

---

**Group taxation**

**The basic rule**

Each individual corporate group member is required to submit their own tax return on a stand-alone basis, with the exception of the election available with respect to VAT (discussed below). However, there are a variety of ways in which their relationship with fellow group members is recognised in the UK tax system for the purposes of corporation tax, VAT and stamp duty.

**Corporation tax**

The corporation tax system includes a number of measures that advantage UK members of qualifying groups, all of which are subject to anti-avoidance measures.

Operating taxable profits and losses arising in the same period can usually be offset between UK resident 75% affiliates within a worldwide group. This extends to offsetting the UK profits attributed to a UK PE of a non-UK resident group member. There are some restrictions, primarily where one of the two companies is not an economic 75% subsidiary of the group, or is subject to arrangements under which it might leave the group.

Intra-group transfers of capital assets between UK companies, including UK permanent establishments, are normally tax-free, though the definition of group for these purposes is slightly different to the definition for group relief for losses. This treatment is also extended to intra-group transfers of loan relationships, derivatives and intangibles. There is generally a ‘degrouping’ charge if the transferee company leaves the group within six years.

There is no automatic offset of capital gains and losses where these arise in different group companies, but it is normally possible for offset to be arranged by the appropriate tax-free transfer of the asset being disposed of to the third party. Such a tax-free transfer can either be actually done (prior to the third party disposal) or notionally only (by election between the companies concerned).

A UK resident parent company is able to claim group relief for income losses of a non-UK subsidiary which is resident in the European Economic Area (EEA) or which has incurred the relevant losses in a permanent establishment within the EEA, provided that all possibilities of non-UK relief for the losses have been exhausted and future relief is unavailable. The European Commission has referred the UK to the European Court of Justice (ECJ) over this ‘all possibilities’ test and the fact that it must be met immediately after the end of the accounting period in which the loss arises, together with the fact that this extension of loss relief only applies to losses incurred after 1 April 2006.

In addition the corporation tax system also has a number of measures that seek to prohibit groups unfairly manipulating the tax system by shifting profits.
United Kingdom

between group members (either internationally or within the UK) in a way that is considered unacceptable.

Under the CFC regime, a UK resident company may be taxed on a proportion of the undistributed profits of certain UK-controlled non-resident companies in which the resident company has an interest. No liability arises where one of a number of tests (e.g. the exempt activities test) can be satisfied. The Government is currently consulting on a radical overhaul of the CFC regime.

There is a transfer pricing regime that applies to UK-to-UK transactions as well as cross-border transactions. UK taxpayers are required to self-assess their compliance with its arm’s-length principle and must therefore identify and make transfer pricing adjustments when submitting their tax returns. Thin capitalisation is addressed within this regime, with no explicit safe harbours. This regime is discussed in more detail in the Transfer pricing section under Other issues.

Where a UK company borrows from a connected party that is not subject to UK tax in respect of the corresponding interest receipt (and certain other limited circumstances), the UK tax deduction may move to a paid basis rather than the usual accruals basis. However this so called ‘late paid interest’ rule has been modified in order to make it comply with the UK’s obligations under the EC Treaty. It now only applies where the creditor is a company that is resident or effectively managed in a non-qualifying territory, broadly a tax haven. The revised rule applies to accounting periods beginning on or after 1 April 2009, although a company may elect that it not have effect for the first accounting period (not ending after 31 March 2011) to which it would otherwise apply.

A debt cap applicable to accounting periods beginning on or after 1 January 2010 limits the aggregated UK tax deductions group members may claim for finance costs to the level of a group’s external finance expense.

**Indirect tax**

Group companies can, subject to certain requirements, elect to account for VAT as if they were one taxable person, and where this is done, no VAT is charged on intra-group supplies of goods or services. The registration is made in the name of the representative member, who is responsible for completing and rendering the single return on behalf of the group. All the companies are jointly and severally liable for any VAT debts. VAT grouping is subject to detailed anti-avoidance provisions.

**Stamp duty and stamp duty land tax**

Transfers of assets within worldwide 75% groups are generally exempt from stamp duty and stamp duty land tax. The relief can be retrospectively withdrawn in certain circumstances, primarily where the transferee leaves the group within three years of the transfer.

**Tax credits and incentives**

A variety of tax incentives are given in the form of enhanced tax depreciation allowances (known as capital allowances, see Depreciation in the Deductions section). Some of these incentives are given by reference to the expenditure concerned and others by reference to the size of the company incurring that expenditure.
For example, a full write-off can be claimed in the year of expenditure on a range of ‘green’ products and technologies. The list of items supported in this way is reviewed annually. It currently consists of the following: designated energy saving equipment; designated environmentally beneficial plant and machinery; cars with low emissions; plant or machinery relating to gas stations for refuelling vehicles with natural gas or hydrogen fuel incurred prior to 31 March 2013; and conversion or renovation of business premises in designated disadvantaged areas of the UK for expenditure incurred up to 11 April 2012.

All businesses, regardless of size, can claim an annual investment allowance of 100% on the first GBP 100,000 per year of most qualifying expenditure but reducing to GBP 25,000 from April 2012. This is restricted to a single allowance for groups of companies or associated businesses.

A deduction, currently equal to 130% of the qualifying expenditure on R&D can also be claimed by large companies. For small and medium companies, as defined, a deduction equal to 200% (from April 2011, previously 175%) of the qualifying expenditure on R&D is given in the year in which it is incurred, which can be surrendered for a cash payment (at a rate of GBP 24.50 for each GBP 100 of qualifying R&D spend) by companies that are trading at a loss or have not yet started to trade. From April 2012, this 200% rate increases to 225%.

A deduction equal to 150% of the qualifying expenditure on the remediation of contaminated or derelict land is given in the year incurred, which can be surrendered for a cash payment (at a rate of GBP 16 for each GBP 100 of qualifying land remediation spend) by companies that are trading at a loss. This relief is likely to be abolished during 2012.

There are special tax reliefs available for certain expenditure on UK film production. There are no tax holidays nor any foreign investment incentives.

---

**Withholding taxes**

Under UK domestic law, a company may have a duty to withhold tax in relation to the payment of either interest or royalties (or other sums paid for the use of a patent). The circumstances in which such a liability arises are discussed below.

There is no requirement to deduct withholding tax (WHT) from dividends. Therefore dividends may always be paid gross, regardless of the terms of the applicable double tax treaty.

Please note however that this is not an exhaustive list of all the deductions that might be required to be made in respect of UK tax from payments made to or by companies. In particular, non-resident companies that are subject to UK income tax on UK source rental profits (see further comment in Taxes on corporate income section above) will find their letting agent or tenants are obliged to withhold the appropriate tax at source (currently 20% without any allowances) from their rental payments unless the recipient has first applied and been given permission to receive rents gross under the Non-Resident Landlord Scheme. Two other important examples are the UK’s deduction at source regime for entertainers and sportsmen, and the scheme under which payments to unregistered subcontractors working on big building projects may need to have tax deducted at source.
United Kingdom

**Interest**
As a general rule, UK domestic law requires companies making payments of interest to withhold tax at 20%. However, there are a number of exceptions to this general rule. The key exclusions are:

- payments of interest by UK resident companies if the beneficial owner of the interest is also a UK resident company, or a UK PE provided the interest concerned will be taxed in the UK as part of the PE’s trading profits
- payments of interest on a quoted Eurobond
- payments of interest that qualify for exemption under the EU Interest and Royalties Directive
- payments of interest paid to or by a UK bank (or a UK branch of a foreign bank)
- payments of ‘short’ interest. This is, broadly speaking, interest on loans that will not be in place for more than a year. However, the definition can be contentious, and detailed advice should be taken on this if intending to utilise this exemption, and
- payments of interest that do not ‘arise’ in the UK. Whether a payment constitutes UK source interest is a complex issue and specialist advice needs to be taken if seeking to use this exception.

If none of these exceptions apply, a payment of interest must be made after the deduction of WHT unless (or until) HMRC has given authorisation that the payment may be made gross (or with a reduced rate of WHT) because of the applicability of treaty relief for the recipient.

**Royalties**
UK domestic law requires companies making payments of patent, copyright and design royalties that arise in the UK to deduct WHT at 20%. In addition, there is also the possibility that other royalties that arise in the UK may also be subject to the same rate of withholding tax if they constitute ‘qualifying annual payments’, so specialist advice will be needed to clarify this. However certain types of royalties, such as film royalties and equipment royalties will generally not be subject to UK WHT.

Unlike the rule regarding interest, a company may make a royalty payment gross of WHT (or subject to a reduced rate of WHT under a treaty) without prior clearance having been given by HMRC if they reasonably believe at the time the payment is made that the payee is entitled to relief under the treaty. However, if that belief is later found to be incorrect, HMRC may direct that the payment must be made net of WHT, with the WHT paid to HMRC, and the payer may be subject to interest and penalties in respect of the WHT that should have been withheld (even if their belief was reasonable).

**Double taxation treaties**
The table below sets out the rates of WHT applicable to payments of dividends, interest, and royalties under UK domestic law where such a liability arises and the reduced rates that may be available under an applicable double tax treaty.

Notes

1. A tax credit is available to UK resident individual shareholders on dividends received, as described above. Some double taxation treaties allow a half or full tax credit (less, normally, a 5% to 15% notional withholding tax) also to non-resident individuals and usually to corporate portfolio investors. Treaties that allow a payable credit are indicated by an asterisk (*). However, since 6 April 1999 the
credit has been reduced from one quarter to one ninth, which has the result that unless note 14 below applies, the tax credit indicated by the asterisk is now in effect useless, since it is wholly eliminated by the (usually 15%) withholding tax allowed by the treaty.

2. Withholding tax applies only to ‘annual interest’ (i.e. excluding interest on certain short-term loans). Banks and similar financial institutions are also normally able to pay annual interest to non-UK residents free of withholding tax. In addition, most of the UK treaties provide for a zero-rate of withholding on interest paid to governmental and quasi-governmental lenders. Such exemptions are not separately indicated in the table below.

3. Some types of royalties are not subject to UK withholding tax, including film royalties and equipment royalties. Treaty provisions specifically relating to these are therefore not mentioned here.

4. From 6 April 2001, payments to any UK resident company (not just banks, as before) can be made free of withholding tax if the recipient is chargeable to tax on the interest or royalty. Discussions continue as to whether this provision will be extended to recipients who are exempt from UK tax on the interest or royalty.

5. Where a reduced rate of withholding is allowed by any treaty, whether on interest or royalties, it is usual for this reduced rate to be stated not to apply to amounts which are in excess of a normal commercial rate of interest/royalty, or where the interest/royalty is effectively connected to a PE in the United Kingdom of the recipient or where the debt/license was created primarily to obtain the advantage of the treaty; such general limitations are not specifically indicated in the table below.

7. Treaty rate not applicable to certain loans held by tax-exempt holders and resold within three months of acquisition.

8. Lower rates, primarily of 3% on use of news, 5% on copyright royalties other than films and TV, and 10% on certain intellectual property, will in practice apply in almost all cases.

9. No repayable tax credit for companies.

10. A 5% rate on literary/artistic/scientific copyright royalties.

11. A 7.5% rate on interest paid to banks and other financial institutions.

12. The United Kingdom announced that the old UK/USSR treaty ceased to apply to certain former Soviet Republics on 5 April 2002 (such that from that date there was no treaty in force with any of those countries), whilst it continued to apply to others until new treaties were concluded. Treaties have subsequently been signed with a number of these states such that the old UK/USSR treaty currently only continues to apply to Tajikistan, Turkmenistan and Belarus (the last of which concluded a new treaty with the UK in 1995 which is not yet in force). The only remaining states without a treaty in force with the UK post 5 April 2002 are Armenia and Kyrgyzstan. Moldova signed a new treaty with the UK on 8 November 2007 which took effect in the UK from 6 April 2009.

13. A rate of 5% applies to patent royalties and no relief is given for motion picture film royalties, as provided by the 1962 treaty with South Africa that was extended to Namibia by an Exchange of Notes.

14. Half tax credit payable by the UK Exchequer to non-resident companies possessing 10% or more of the voting power of the paying company, subject to a notional withholding tax (which in current circumstances makes the actual repayment very small).

15. Zero-rate on literary/artistic or scientific copyright royalties, excluding payments in respect of cinematograph films and films or tapes for radio or TV broadcasting.

16. The United Kingdom’s treaty with the former Yugoslavia is regarded as still in force between the United Kingdom and Croatia, Montenegro, Serbia and Bosnia-Herzegovina. Macedonia signed a new treaty with the UK on 8 November 2006 which took effect for UK withholding tax purposes on 1 January 2008. A new treaty with Slovenia was signed on 13 November 2007 and came into effect in the UK in April 2009.

17. The independent states of the Czech Republic and the Slovak Republic have confirmed that they will honour the treaty between the United Kingdom and the former Czechoslovakia.

18. The 10% rate applies to royalties for use of industrial, commercial or scientific equipment or experience as well as royalties in respect of patent, trade marks and know-how. Zero-rate on all other royalties.

19. A rate of 10% on certain bank loans.

20. A rate of 10% in certain cases.

21. A rate of 15% on film and TV royalties.

22. A rate of 7% on royalties for use of (or right to use) industrial, commercial, or scientific equipment.

23. A rate of 5% on royalties for use of industrial, commercial, or scientific equipment.

24. No relief is available if the payment concerned is made to a company controlling (directly or indirectly) more than 50% of the voting power of the paying company. In addition, no relief is available in respect of cinematograph film royalties or amounts paid in respect of the extraction of natural resources.

25. Zero-rate on government and local authority loans. The rate is 5% where the beneficial owner is a bank or insurance company or the interest is derived from bonds and securities that are regularly and substantially traded on a recognised securities market. The rate is 10% where the beneficial owner is not a bank or insurance company but the interest is paid by a bank or by the purchaser of machinery and equipment to a person who sold that equipment on credit.

26. A rate of 7% on interest paid to banks.

27. A rate of 10% on interest on bonds issued to the public.

28. A rate of 15% on royalties on films, TV and radio broadcasting.

29. A rate of 5% on literary/artistic/scientific copyrights.

30. A rate of 10% on interest paid to banks and other financial institutions.

31. A rate of 5% on literary/artistic/scientific copyright royalties.
32. Full relief for copyright royalties.
33. Lower rate may be substituted to match any lower rate agreed in a treaty between Uzbekistan and a third Organization for Economic Cooperation and Development (OECD) country.
34. A rate of 10% for royalties on industrial, commercial or scientific equipment.
35. Zero-rate on certain government loans.
36. A rate of 2% for royalties on industrial, commercial or scientific equipment.
37. Zero-rate on literary/artistic copyright royalties, patent royalties and royalties for use of industrial, commercial or scientific know-how and computer software.
38. A rate of 10% for royalties on industrial, commercial or scientific equipment.
39. A rate of 5% for royalties for the use of a patent etc concerning industrial, commercial, or scientific experience.
40. A rate of 10% can be withheld if the recipient of the royalties controls more than 50% of the voting power of the payer.
41. A rate of 15% can be withheld on royalties in respect of cinematograph or television films.
42. A rate of 5% can be withheld on royalties in respect of cinematograph or television films.
43. A new treaty effective for UK income tax (and therefore withholding tax) from 6 April 2007 reduced withholding tax on both interest and royalties to the rates shown in table. Prior to this the rate of withholding tax on interest and royalties was 15% in both cases (subject, in the case of interest, to note 7).
44. A new treaty with Saudi Arabia was signed on 31 October 2007 and entered into force from 1 January 2009. It will be effective in the UK from 1 April 2010 for corporation tax and from 6 April 2010 for income tax and capital gains tax purposes, including withholding tax. The withholding tax rates were not changed by the new treaty and therefore the figures shown above are valid both before and after this date.
45. Full relief is available for literary, artistic or scientific copyright (excluding royalties on cinematograph films and films or tapes for TV or radio broadcasting). No relief is available for amounts paid in respect of the extraction or removal of natural resources.
46. A new treaty with Poland was signed on 20 July 2006 and entered into force on 27 December 2006. It took effect in respect of UK withholding taxes from 1 January 2007, changing the rates to those shown in the table above. The rates were previously zero in respect of interest and 10% in respect of royalties.
47. HMRC intends to progress negotiations on new treaties in the year ending 31 March 2010 with: Australia, Croatia, Ethiopia, Germany, Hungary, Israel, New Zealand, Spain and Thailand.
48. Zero-rate if recipient is: the State; an individual; a company whose shares are substantially and regularly traded on a stock exchange; a company owned at least 75% by residents of Qatar; a pension scheme; or a financial institution independent of the payer.
49. Relief may be restricted to 15% in certain circumstances.
50. A new treaty with France was signed on 19 June 2008 and entered into force on 18 December 2009. It will take effect with respect to UK withholding taxes from 6 April 2010 but the rates remain as shown in the table above.
51. New tax treaties/protocols with the following states have been signed but have not yet entered into force: Mexico (2009), Cayman Islands (2008), Belgium (2009), Qatar (2009), Luxembourg (2009), Singapore (2009), Switzerland (2009), Malaysia (2009), Austria (2009), Oman (2009), Montserrat (2009), and Bahrain (2010). These agreements will enter into force once both countries have completed the required Parliamentary procedures and exchange of diplomatic notes and will take effect on the dates set out therein. The Netherlands and Georgia treaties signed in 2008 and 2010 have now come into force, and both will take effect in the UK from 6 April 2011. The Oman treaty is largely in force (January 2011), but from April 2012 for withholding taxes.
52. Treaty effective in the UK for WHT purposes from 8 April 2009.
53. Reduced treaty rate only applicable if one of various conditions is met by either the beneficial owner or payer of the interest. This is to ensure that the benefit of the interest article can only flow to residents of the other treaty state.
54. The first tax treaty between the UK and Libya entered into force on 8 March 2010 and has effect in the UK for WHT purposes from 6 April 2010.
55. The first tax treaty between the UK and Hong Kong entered into force on 8 March 2010 and has effect in the UK for WHT purposes from 6 April 2011.
56. Provided one of several conditions is specified, one of which is that the recipient is quoted, another being that HMRC accepts that the interest is not paid in connection with tax avoidance (broadly).

---

**Tax administration**

**Direct tax**
Companies are assessed by reference to accounting periods. Normally, the accounting period is the period for which the company makes up its accounts. However, an accounting period for corporation tax purposes cannot exceed 12 months so companies preparing statutory accounts for longer than 12 months need to prepare more than
United Kingdom

one corporation tax return. Companies must file their statutory accounts and tax return within one year from the end of the accounting period; the return must include a self-assessment of the tax payable, eliminating the need for assessment by HMRC (though HMRC retains assessing powers for certain cases where it is not satisfied with the return, or where the company fails to make a return).

For smaller companies, corporation tax is payable nine months after the end of the accounting period to which it relates (so before the return must be filed). For larger companies and groups, a system of quarterly payments on account (based on estimated profits) is in place, with the first payment being due in the seventh month of the accounting period concerned. A company will generally be considered large for this purpose in any accounting period in which it has taxable profits in excess of GBP 1,500,000 (that limit being reduced by reference to the number of companies under common control, where relevant).

For companies which are members of medium or large groups, there is generally a period of one year after the statutory filing dates for the tax authorities to start an enquiry into any aspect of the return. For other companies, enquiries can be started up to 12 months after the date of actual filing. These periods are extended for returns submitted after the filing deadline, that are amended by the taxpayer, or where an issue is subsequently discovered that was not sufficiently disclosed within the standard period.

The UK tax system can impose numerous penalties for failing to adhere to the self-assessment system. These include penalties for late filing of returns, failing to maintain appropriate records, submitting an incorrect return, making errors in certain documents sent to HMRC, unreasonably failing to report errors in assessments by HMRC and failing to respond to a notice of enquiry from the tax authorities within the specified time limit.

Requirements to file online and pay electronically are expected to be phased in for corporation tax from 2011. From 1 April 2011, returns for accounting periods ending after 31 March 2010 must be filed online and such returns must be filed in a specified format which is machine readable by the tax authorities.

Large companies are required to notify HMRC of the identity of their senior accounting officer, who must certify annually that the accounting systems are adequate for the purposes of accurate tax reporting. Penalties are chargeable on the officer and the company for careless or deliberate failure to meet these obligations.

**Indirect tax**

VAT returns must be completed at preset intervals (usually every three months). Larger companies may be required to file monthly returns, or make monthly payments on account. From 1 April 2010, companies with an annual turnover of GBP 100,000 or more, and all newly-registered businesses (whatever their turnover) are required to submit their VAT returns online and pay electronically. From 1 April 2012, businesses with an annual turnover of less than GBP 100,000 will also be required to file VAT returns online and make electronic payments. Smaller enterprises can apply for annual returns. VAT returns are usually required to be filed 30 days after the end of the period.

Annual accounting is available for taxable persons with annual turnover (taxable supplies, excluding VAT) not exceeding GBP 1,350,000.
Cash accounting is available for taxable persons with annual turnover (taxable supplies, excluding VAT) not exceeding GBP 1,350,000.

In addition a flat rate scheme operates for small businesses and is intended to simplify VAT accounting procedures.

Other issues

Adoption of IFRS

IFRS is mandatory for the consolidated financial statements of UK listed companies.

Companies continue to have the choice of adopting IFRS or remaining on UK GAAP at entity level for all entities. Many groups therefore continue to apply UK GAAP in their entity accounts.

The UK Accounting Standards Board (ASB) is proposing a new three-tier system of reporting going forward. It is proposed that all publicly accountable UK registered companies will have to report under IFRS (as endorsed by the EU) in accounting periods beginning on or after 1 July 2013. In addition, UK registered SMEs (broadly entities that do not have public accountability and publish general purpose financial statements for external users) must apply 'IFRS for SMEs' (a simplified IFRS) from the same date. Finally, the Financial Reporting Standard for Smaller Entities (FRSSE) will still be an option for small companies or small groups as defined by the Companies Act 2006. However the options available to a company are subject to the requirements of the UK Company Law framework for consistency of GAAP within a group.

In our experience, many large groups are considering early adoption of EU-endorsed IFRS. However, under current UK law early adoption of IFRS for SMEs or FRSSE is not possible.

Transfer pricing

The UK has widely drafted transfer pricing rules that are intended to apply to almost any kind of transaction made or imposed between related parties that give rise to a provision that:

- differs from one that would have been made between third parties, and
- gives rise to a UK tax advantage (potential or actual) to one or more of the parties.

These rules apply to UK-to-UK transactions as well as cross-border transactions.

This regime therefore applies not only to the provision of products and services but also to finance arrangements, including both the rate of return charged and the amount of loan principle (or equivalent) made available. It is therefore the mechanism by which the UK’s revenue authorities address the issue of thin capitalisation. Unlike many other territories, the UK does not operate any ‘safe harbours’ of any kind in relation to the amount of debt or interest (or equivalents) it considers demonstrate that a UK company or group is not thinly capitalised. (Note that the UK also has a debt cap regime which limits the amount of finance expense for which a UK tax deduction will be available by reference to the worldwide group’s external finance expense, as discussed in the Significant developments section).

Parties are considered related for this purpose where either one controls the other, or both are under common control. Control here is not confined to situations in which one
United Kingdom

party is the majority shareholder in the other. Effectively, control exists where one party has the power to ensure that the affairs of another party are conducted in accordance with the first party’s wishes. The concept is also subject to two important extensions:

- the rules apply to many joint venture companies where two parties each have an interest of at least 40%, and
- there are attribution rules to trace control relationships through a number of levels in determining whether parties are controlled for the purposes of the transfer pricing rules.

In addition, the regime restricts interest deductions to an arm’s-length basis where a financier, and persons who collectively control a company or a partnership, have ‘acted together’ in relation to the financing arrangements of that company or partnership. The financier (usually a bank) can then be taken as controlling the company or partnership, and the loan becomes subject to transfer pricing limitations.

There are a number of exemptions which essentially exclude SMEs and dormant companies from the regime.

The effect of the rules is to require an arm’s-length provision to be substituted for the actual one, thereby increasing the party’s UK tax liability and cancelling out the UK tax advantage that would otherwise have arisen.

Where both parties to the transaction are UK taxpayers, the disadvantaged party will generally be entitled to claim a compensating adjustment (except where the transaction falls within the transfer pricing regime because of the ‘acting together’ provisions), but only after the UK adjustment has been made. The legislation also provides that parties may make balancing payments to each other in such circumstances, of any amount up to the transfer pricing adjustment, which will neither be taxable for the recipient nor tax deductible for the payer.

Where the disadvantaged party is outside the UK tax net they can pursue a claim for relief under the relevant double tax agreement, if that provides a mechanism for such relief; where the adjustment in the UK is to reduce a deduction for an amount paid under deduction of UK tax, the compensating adjustment rules should allow the overseas party to reclaim any withholding tax paid on the disallowed amount.

UK taxpayers are required to self assess their compliance with this arm’s-length principle. Companies and partnerships must therefore identify and make transfer pricing adjustments when submitting their tax returns. This is the case even where the disadvantaged party would be entitled to claim a compensating adjustment equal to the transfer pricing adjustment. An important implication of this approach is the potential for interest and penalties if the adjustment made is subsequently held to be wrong.

**UK tax legislation**

Announcements of proposed new legislation generally occur at least once a year. The main announcement is made on Budget Day (generally in March) when tax rates are set for the coming year. Other announcements can be made at other times and, subject to becoming approved and adopted law, can apply from a specified date. The new legislation is then included in an annual Finance Act, which is normally finalised in July. Much of the legislation introduced in recent years has been due to challenges under the EC treaty, or as a result of the tax planning being notified under the UK’s tax avoidance disclosure regulations. In years of a general election (such as 2010) there may be additional Budget Days and Finance Acts.
UK tax law is periodically consolidated. Until recently the latest consolidation Act dated from 1988, which covered both income tax and corporation tax. Over the last few years income tax and corporation tax legislation has been consolidated separately, and currently the latter is to be found in the Corporation Tax Acts 2009 and 2010, and the Taxation (International and Other Provisions) Act 2010.
**Significant developments**

On 16 December 2010, the House of Representatives voted 277 to 148 to give final approval to an 858 billion dollar (USD) package of individual and business tax relief provisions. The package’s total cost includes a USD 56.5 billion, 13-month extension of unemployment benefits. The House action follows Senate approval of the measure by a vote of 81 to 19 on 15 December 2010, and cleared the ‘Tax Relief, Unemployment Insurance Reauthorization, and Job Creation Act of 2010’ for President Barack Obama’s signature on 17 December 2010. Under the legislation, full expensing for qualified business capital investments apply for property placed in service after 8 September 2010, through the end of 2011. In addition, the bill renews 50% bonus depreciation for 2012, and allows taxpayers to elect to accelerate certain AMT credits in lieu of bonus depreciation for taxable years 2011 and 2012. Certain section 179 small business expensing provisions are extended. The temporary expensing provisions are estimated to cost USD 21.8 billion over ten years. The bill includes a retroactive two-year extension of the research credit and other expired business provisions, through the end of 2011. The bill also includes a number of energy tax incentives.

The business tax relief provisions in the legislation include reinstatement and extension of the research credit, controlled foreign corporation (CFC) look-through rule, active financing income exception, and 15-year depreciation for qualified leasehold improvements; these provisions had expired as of 31 December 2009. In general, these provisions are reinstated for calendar year 2010 and extended through 2011.

Under the CFC look-through rules, dividends, interest, rent, and royalties received or accrued from a related CFC, are not treated as Foreign Personal Holding Company Income (FPHCI). This rule applies only to the extent attributable or properly allocable to income of the payor that is not subpart F income and not effectively connected income.

The active financing income exception allows certain income from the active conduct of banking, financing, or similar businesses, or from the conduct of an insurance business to be excluded temporarily from the definition of Subpart F income.

In addition to the provisions mentioned above, the legislation extends numerous other provisions, including:

- Indian employment tax credit.
- New markets tax credit.
- Railroad track maintenance credit.
- Mine rescue team training credit.
- Employer wage credit for employees who are active duty members of the uniformed services.
• Seven-year recovery period for motorsports entertainment complexes.
• Accelerated depreciation for business property on an Indian reservation.
• Enhanced charitable deduction for contributions of food inventory.
• Enhanced charitable deduction for contributions of book inventories to public schools.
• Enhanced charitable deduction for corporate contributions of computer inventory for educational purposes.
• Election to expense mine safety equipment.
• Special expensing rules for certain domestic film and television productions.
• Expensing of ‘Brownfields’ environmental remediation costs.
• Deduction allowable with respect to income attributable to domestic production activities in Puerto Rico.
• Modification of tax treatment of certain payments to controlling exempt organisations.
• Treatment of certain dividends of a regulated investment company (RIC).
• RIC qualified investment entity treatment under Foreign Investment & Real Property Tax Act (FIRPTA).
• Basis adjustment to stock of S corporations making charitable contributions of property.
• Empowerment zone tax incentives.
• Tax incentives for investment in the District of Columbia.
• Temporary increase in limit on cover over of rum excise taxes to Puerto Rico and the Virgin Islands.

The US corporate income tax rate is based on a progressive rate schedule; however, an alternative minimum tax (see the Other taxes section) provides for a flat rate with fewer deductions. The 39% tax rate applies to taxable income between USD 100,000 and USD 335,000 to eliminate the benefit of the 15% and 25% rates, and the 38% tax rate applies to taxable income between USD 15,000,000 and USD 18,333,333 to eliminate the benefit of the 34% rate. Special rules apply to personal service corporations and personal holding companies.

**Corporate residence**

A corporation organised or created in the United States under the law of the United States or of any state is a domestic corporation. A domestic corporation is a resident...
corporation even though it does no business or owns no property in the United States. Resident corporations are taxed based on worldwide income. Generally, a foreign corporation engaged in a US trade or business is taxed at regular US corporate tax rates on income from US sources that is effectively connected with that business and at 30% on US source income not effectively connected with that business.

**Other taxes**

**Top rate on net capital gains**  
On current transactions, the long-term capital gains tax rate is the same as the tax rates applicable to ordinary income. Thus, the maximum rate is 35%, excluding the additional phase out rates. However, differences may arise where the alternative minimum tax is imposed.

**Federal alternative minimum tax**  
An alternative minimum tax (AMT) is imposed on corporations other than S corporations (see below) and small C corporations (generally those with no three year average annual gross receipts exceeding USD 7.5 million). The tax is 20% of alternative minimum taxable income (AMTI) in excess of a USD 40,000 exemption amount (subject to a phase out). AMTI is computed by adjusting the corporation's regular taxable income by specified adjustments and ‘tax preference’ items. Tax preference or adjustment items could arise, for example, if a corporation has substantial accelerated depreciation, percentage depletion, intangible drilling costs, or non-taxable income.

**Accumulated earnings tax**  
Corporations (other than S corporations, domestic and foreign personal holding companies, corporations exempt from tax under Subchapter F of the Internal Revenue Code (the Code), and passive foreign investment companies) accumulating earnings and profits for the purpose of avoiding shareholder personal income tax are subject to a penalty tax in addition to any other tax that may be applicable. The accumulated earnings tax is equal to 15% of ‘accumulated taxable income’. Generally, accumulated taxable income is the excess of taxable income with certain adjustments, including a deduction for regular income taxes, over the dividends paid deduction and the accumulated earnings credit. Note that a corporation can justify the accumulation of income, and avoid tax, based on its reasonable business needs.

**Personal holding company tax**  
US corporations and certain foreign corporations that receive substantial ‘passive income’ and are ‘closely held’ may be subject to personal holding company tax. The personal holding company tax is 15% of undistributed personal holding company income and is levied in addition to the regular tax.

**S corporations**  
Corporations with 100 or fewer shareholders, none of whom may be corporations, that meet certain other requirements may elect to be taxed under Subchapter S of the Code and are thus known as S corporations. S corporations are taxed in a manner similar, but not identical, to partnerships. Thus, S corporations generally are not subject to US federal income tax.

**Payroll taxes**  
Employers are subject to federal unemployment insurance tax (FUTA) of 6.2% on the first USD 7,000 of wages paid to employees meeting certain criteria. In addition, states impose workers’ compensation insurance tax at varying rates depending on state law.
and the nature of employees’ activities. Employers also are subject to social security contributions tax of 7.65% (including 1.45% Medicare tax) on the first USD 106,800 (for 2009 and 2010) of wages paid to employees and 1.45% of Medicare tax on any wages in excess of USD 106,800.

**State and municipal taxes**

Corporate income tax rates vary from state to state and generally range from 1% to 12% (although some states impose no income tax). The most common taxable base is federal taxable income, which is modified by state provisions and generally is allocated to a state on the basis of a three factor formula: tangible assets and rental expense, sales and other receipts, and payroll. Other taxes that states may impose, in lieu of or in addition to taxes based on income, include franchise taxes and taxes on the capital of a corporation. State and municipal taxes are deductible expenses for federal income tax purposes.

**Excise taxes**

The federal and state governments impose excise taxes on a variety of goods. For example, a federal and state excise tax is imposed on gasoline and diesel fuel used for transportation. The excise taxes are levied item by item and lack any uniformity in rates.

**Value-added tax (VAT)**

No provisions exist for a VAT at the federal level. However, state and local governments may impose sales taxes.

**Stamp tax**

No provisions exist for a stamp tax at the federal level. However, state and local governments frequently impose stamp taxes at the time of officially recording the transaction based upon the value of the real estate.

**Other**

Most states and some cities impose sales or use taxes and a variety of property taxes on both real and personal property. The sales tax on real estate may be a stamp tax on the documents recording the transfer of the real estate.

**Branch income**

Tax rates on branch profits are the same as on corporate profits. The law also imposes a 30% branch profits tax in addition to US corporate level income taxes on a foreign corporation’s US branch earnings and profits for the year that are effectively connected with a US business. The taxable base for the branch profits tax is increased (decreased) by any decrease (increase) in the US net equity of the branch. The branch profits tax on profits may be reduced or eliminated entirely if a relevant treaty so provides (subject to strict ‘treaty shopping’ rules). The purpose of the branch profits tax is to treat US operations of foreign corporations in much the same manner as US corporations owned by foreign persons.

With certain exceptions, a 30% (or lower treaty rate) branch profits tax also will be imposed on interest payments by the US branch to foreign lenders. In addition, the tax will apply if the amount of interest deducted by the branch on its US tax return exceeds the amount of interest actually paid during the year.
United States

**Income determination**

**List of common book/tax adjustments**
Tax and financial accounting typically have differing treatment for the following items:

- research and development
- domestic manufacturing costs
- depreciation of fixed assets
- amortisation of intangibles
- meals and entertainment
- foreign taxes, and
- fines/penalties.

**Inventory valuation**
Inventories generally are stated at the lower of cost or market on a first in first out (FIFO) basis. Last in first out (LIFO) may be elected for tax purposes on a cost basis only and generally requires book and tax conformity.

The tax law requires capitalisation for tax purposes of several costs allocable to the manufacturing process that frequently are expensed as current operating costs for financial reporting (e.g. the excess of tax depreciation over financial statement depreciation).

**Capital gains**
Gains or losses on the sale or exchange of capital assets held for more than 12 months are treated as long-term capital gains or losses. Gains or losses on the sale or exchange of capital assets held for 12 months or less are treated as short-term capital gains or losses. The excess of net long-term capital gain over net short-term capital loss is considered net capital gain. Capital losses are allowed only as an offset to capital gains. An excess of capital losses over capital gains in a taxable year may be carried back three years and carried forward five years to be used against (offset) capital gains.

For dispositions of personal property and certain non-residential real property used in a trade or business, net gains are first taxable as ordinary income to the extent of the depreciation/cost recovery, with any remainder generally treated as capital gain. For other trade or business real property, net gains generally are taxed as ordinary income to the extent that the depreciation or cost recovery claimed exceeds the straight-line amount, with any remainder treated as capital gain.

An exception to capital gain treatment exists to the extent that losses on business assets were recognised in prior years. A net loss from the sale of business assets is treated as an ordinary loss. Future gains, however, will be treated as ordinary income to the extent of such losses recognised in the five immediately preceding years.

**Inter-company dividends**
A US corporation generally may deduct 70% of dividends received from other US corporations. The dividends received deduction is increased from 70% to 80% if the recipient of the dividend distribution owns at least 20% but less than 80% of the distributing corporation. Generally, dividend payments between US corporations that are members of the same affiliated group (see the Group taxation section) are deferred or eliminated until a transaction with a third party occurs. With minor exceptions, a US corporation may not deduct dividends it receives from a foreign corporation.
**Foreign income (Subpart F income) of US taxpayers**

Generally, a US corporation is taxed on its worldwide income, including foreign branch income earned and foreign dividends when received. Double taxation is avoided by means of foreign tax credits. Alternatively, a deduction may be claimed for actual foreign taxes that are paid. In the case of foreign subsidiaries that are more than 50% owned by US shareholders (commonly known as controlled foreign corporations or CFCs), certain types of undistributed income will be taxed currently to the US shareholders (Subpart F income). Generally, Subpart F income includes income that is easily transferred to a low-tax jurisdiction.

Income from certain passive foreign investment companies (where 75% or more of the income is passive or at least 50% of the assets held produce passive income) also is subject to current taxation. Current taxation occurs if the corporation elects to be a qualified electing fund (QEF) or there are actual distributions. If a QEF election is not made and the corporation makes an actual distribution, the distribution will be treated as an excess distribution to the extent it exceeds 125% of the average of the distributions made with respect to the stock over the three immediately preceding years. The excess distribution is spread over the taxpayer’s holding period, and the amount allocated to each year in the holding period is subject to tax at the highest marginal tax rate in effect for that year. This deferred tax amount also is subject to an interest charge. The interest charge is designed to pay the benefit of the tax deferral that arises out of having an overseas investment that pays no US income taxes.

**US income of foreign taxpayers**

Generally, if a foreign entity engages in a US trade or business, all income from sources within the United States that is connected with conducting such trade or business is classified as Effectively Connected Income (ECI). There are also situations in which foreign source income could be ECI. ECI generally is subject to tax at the same rate as corporate profits. A 30% branch profits tax is levied in addition to the US corporate level income tax, which may be reduced or eliminated entirely if a relevant treaty so provides. Deductions are allowed against ECI.

Tax treaties between the United States and other countries may provide special rules for allocating taxing authority between the treaty partners. Tax treaties may provide that income earned by a foreign entity that would otherwise be considered ECI is only taxable in the United States to the extent the profits are attributable to a permanent establishment of the foreign entity in the United States. A permanent establishment generally is defined as a fixed place of business.

**Foreign Investment & Real Property Tax Act (FIRPTA)**

FIRPTA provides that the gain or loss of a foreign person from the disposition of a US real property interest should be taken into account as if the taxpayer were engaged in a US trade or business and such gain or loss were effectively connected with such business. In these situations, the party purchasing the US real property interest from the foreign party is required to withhold 10% of the amount realised.

**Fixed, determinable, annual, or periodical (FDAP) income**

FDAP income includes all income except gains from the sale of real or personal property and income excluded from gross income, without regard to whether the owner of the income is a US or foreign entity. Some examples of FDAP income include dividends, interest, royalties, and commissions. The gross amount of FDAP income or gains from US sources that are not effectively connected with a US trade or business are taxed at a rate of 30%. Deductions against FDAP income are not allowed.
Certain kinds of FDAP income are treated as ECI by reason of statutory requirements, allowable elections, or meeting the requirements under either the Asset-Use Test or Business Activities Test.

**Stock dividends**
A US corporation can distribute a tax-free dividend of common stock proportionately to all common stock shareholders. If the right to elect cash is given, all distributions to all shareholders are taxable as dividend income whether cash or stock is taken. There are exceptions to these rules, and extreme caution must be observed before making such distributions.

**Partnership income**
The income (loss) of a partnership passes through to its partners so that the partnership itself is not subject to tax. Thus, each partner generally accounts for their distributive share of the partnership's taxable income.

**Corporate reorganisations**
In general, a corporate reorganisation involving a merger, acquisition, or consolidation is a taxable event under the general recognition provisions of the Code. However, a corporate reorganisation that meets certain statutory and judicial requirements may qualify as a tax-free transaction, with gain or loss generally not recognised or deferred to a later date.

**Transfer pricing**
Transfer pricing regulations govern how related entities set internal prices for the transfers of goods, intangible assets, services, and loans in both domestic and international contexts. The regulations are designed to prevent tax avoidance among related entities and place a controlled party on par with an uncontrolled taxpayer by requiring an arm's-length standard. The arm's-length standard generally is met if the results of a controlled transaction are consistent with results that would have been realised if uncontrolled taxpayers had engaged in a similar transaction under similar circumstances. If a company is not in compliance with the arm's-length standard, the Internal Revenue Service (IRS) may raise taxable income and tax payable in the United States. After a transfer pricing adjustment, a multinational company may face double tax, paying tax twice on the same income in two countries. Multinational companies may request competent authority relief from double taxation through a tax treaty.

In order to avoid potential transfer pricing penalties, one avenue available to companies may be to obtain an advance pricing agreement with the IRS, unilaterally, or with the IRS and another tax authority, bilaterally, covering inter-company pricing.

**Other**
Interest income, rents, and royalties generally are includible in the determination of gross income.

**Deductions**

**Depreciation**
Depreciation deductions are allowances that may be taken for capital outlays for tangible property. For property placed in service after 1986, capital costs must be recovered by using the modified accelerated cost recovery system (MACRS) method. Depending on the type of tangible property, the general cost recovery periods are three, five, seven, ten, 15, 20, 27.5, and 39 years (31.5 years for property placed in service
before 13 May 1993). The cost recovery methods and periods are the same for both new and used property. Most tangible personal property is in the three, five or seven year class. Property placed in the three, five, seven or ten year class is depreciated by first applying the 200% declining balance method and then switching to the straight-line method at such a time as when use of the straight-line method maximises the depreciation deduction. Property in the 15 or 20 year class is depreciated by using the 150% declining-balance method and later switching to the straight-line method. An election may be made to use the Alternative Depreciation System (basically, the straight-line method over prescribed lives). Residential rental property generally is depreciated by the straight-line method over 27.5 years. Non-residential real property is depreciated by the straight-line method over 39 years (31.5 years for property placed in service before 13 May 1993).

An election to use the straight-line method over the regular recovery period or a longer recovery period also is available. Alternatively, taxpayers may elect to use the 150% declining-balance method over the regular recovery period for all property other than real property. This method is required for alternative minimum tax purposes.

For most tangible personal and real property placed in service in the United States after 1980 but before 1 January 1987, capital costs were recovered using the Accelerated Cost Recovery System (ACRS), which applied accelerated methods of cost recovery over periods specified by statute. The general ACRS recovery periods were three, five, ten, 15, 18, and 19 years.

Special rules apply to automobiles and certain other ‘listed’ property. Accelerated depreciation deductions can be claimed only if the automobile is used 50% or more for qualified business use as defined in related regulations. Further, for automobiles placed in service after 1986, the allowable yearly depreciation deduction cannot exceed specific dollar limitations.

Separate methods and periods of cost recovery are specified by statute for certain tangible personal and real property used outside the United States.

Rapid amortisation may be allowable for certain pollution control facilities.

Tax depreciation is not required to conform to book depreciation. Tax depreciation generally is subject to recapture on the sale or disposition of certain property, to the extent of gain, which is subject to tax as ordinary income.

**Section 179 deduction**

Corporations can elect to expense, up to a statutory amount per year, the cost of certain eligible property used in the active conduct of a trade or business. This is commonly referred to as the section 179 deduction. The maximum annual expensing amount for tax years that begin in 2008 and 2009 is USD 250,000. For tax years beginning in 2010, the maximum annual expensing amount is USD 134,000. For tax years beginning in 2011 and thereafter, the maximum amount is USD 25,000.

The maximum deduction amount is reduced dollar for dollar where the corporation places in service during the tax year qualified tangible personal property in excess of USD 800,000 for tax years that begin in 2008 and 2009. For tax years beginning in 2010, the investment limitation is USD 530,000. For tax years beginning in 2011 and thereafter, the investment limitation is reduced to USD 200,000.
United States

In addition, the deduction under this election is limited to the taxable income of the business. The annual expensing limit is increased by an additional USD 35,000 for qualifying assets placed in service in certain distressed communities. The annual expensing limit also is increased for certain property placed in service in the Gulf Opportunity Zone or Kansas disaster area.

**Bonus depreciation**

A 50% special first year depreciation allowance (i.e. bonus depreciation) applies (unless an election out is made) for new MACRS property with a recovery period of 20 years or less, certain computer software, water utility property, and certain leasehold improvements acquired after 31 December 2007 and before 1 January 2010. The special allowance applies for regular income tax and AMT purposes. No AMT adjustment is made if the special allowance is used. The property must be placed in service before 2010 (before 2011 for certain longer lived property). The special allowance does not apply to property that must be depreciated using the Alternative Depreciation System or to ‘listed property’ not used predominantly for business. The special allowance reduces basis before regular depreciation is figured. Additionally, claiming bonus depreciation on automobiles may affect the first year depreciation limits on such automobiles.

The ‘Tax Relief, Unemployment Insurance Reauthorization, and Job Creation Act of 2010’, signed into law on 17 December 2010 extends bonus depreciation and temporarily increases the available deduction. Bonus depreciation which provides an additional first-year depreciation deduction equal to 50 percent of the cost of qualifying property is extended through 31 December 2012 (31 December 2013 for long-production period property (LPPP) and certain aircraft). This provision currently was set to expire on 31 December 2010 (31 December 2011, for LPPP and certain aircraft) as extended by the Small Business Jobs Act of 2010.

- The legislation provides a temporary 100% bonus depreciation deduction for qualifying property acquired and placed in service after 8 September 2010, through 31 December 2011 (31 December 2012, for LPPP and certain aircraft). Under this provision, property acquired pursuant to a written binding contract entered into before 1 January 2008 is not qualified property for purposes of the 100% bonus depreciation deduction.
- The legislation does not change the definition of eligible property under the current bonus depreciation rules. Current-law rules generally provide that property with a recovery period of 20 years or less, water utility property, certain computer software, and qualified leasehold improvements are eligible.
- The 100% bonus depreciation provision in the legislation operates by substituting ‘100’ for ‘50’ in the applicable 100% period. Thus, property that meets the 100% bonus depreciation requirements will not be eligible property for purposes of the 50% bonus depreciation requirement. For such property, a taxpayer could claim 100% bonus depreciation or elect to forego the bonus depreciation deduction altogether.
- The bonus depreciation provisions, including 100% bonus depreciation, are mandatory. However, as indicated above, a taxpayer may make an election out of bonus depreciation for any particular tax year. This election is made on a class-by-class and entity-by-entity basis.
- The legislation re-enacts the provision allowing a corporation to elect to accelerate AMT credits in lieu of bonus depreciation. This election is available for property placed in service after 31 December 2010, and before 1 January 2013 (1 January 2014 for LPPP and certain aircraft).
Depletion
For natural resource properties other than timber and certain oil and gas properties, depletion may be computed on a cost or a percentage basis.

Cost depletion is a method of depletion applied to exhaustible natural resources, including timber, which is based on the adjusted basis of the property. Each year, the adjusted basis of the property is reduced, but not below zero, by the amount of depletion calculated for that year. The current year cost depletion deduction is based on an estimate of the number of units that make up the deposit and the number of units extracted and sold during the year.

Percentage depletion is a method of depletion applied to most minerals and geothermal deposits, and, to a more limited extent, oil and gas. Percentage depletion is deductible at rates varying from 5% to 25% of gross income, depending on the mineral and certain other conditions. Percentage depletion may be deducted even after the total depletion deductions have exceeded the cost basis. However, percentage depletion is limited to 50% (100% for oil and gas properties) of taxable income from the property (computed without allowance for depletion). Generally, percentage depletion is not available for oil or gas wells. However, exceptions exist for natural gas from geopressurised brine and for independent producers of oil and gas.

Net operating losses
A net operating loss (NOL) is generated when business deductions exceed gross income in a particular tax year. Depending on current tax law, an NOL may be carried back to offset past income and possibly obtain a refund or carried forward to offset future income. Generally, a loss may be carried back two years and, if not fully used, carried forward 20 years. For tax years beginning before 6 August 1997, a loss may be carried back three years and, if not fully used, carried forward 15 years. For state tax purposes, carryback and carryforward provisions are often similar to the federal provisions, except that several states do not permit any carrybacks or carryforwards.

Special rules surrounding NOLs may apply if a taxpayer is located in a qualified disaster area.

Complex rules may limit the use of net operating losses after a reorganisation or other change in corporate ownership. Generally, if the ownership of more than 50% in value of the stock of a loss corporation changes, a limit is placed on the amount of future income that may be offset by losses carried forward.

With certain exceptions, taxpayers may elect to increase the carryback period for an applicable NOL to three, four, or five years from two years under the Worker, Homeownership, and Business Assistance Act of 2009, which was signed by President Obama on 6 November 2009. Under this act, an applicable NOL is the taxpayer’s NOL for any tax year ending after 31 December 2007, and beginning before 1 January 2010. Generally, an election may be made for only one tax year, but an eligible small business that made or makes an election under the Code as in effect before 6 November 2009, may make an election for two tax years.

Under this special provision of the Worker, Homeownership, and Business Assistance Act of 2009, the amount of an NOL that may be carried back to the fifth tax year before the loss year may not exceed 50% of the taxable income for that fifth preceding tax year, determined without consideration of any NOL generated in the loss year or
United States

during any tax year after the loss year. An NOL otherwise carried to tax years following
the fifth preceding tax year is adjusted to take into account that the NOL may offset
only 50% of the taxable income for that fifth preceding tax year. Note that the 50%
limitation does not apply to an applicable 2008 NOL of certain eligible small businesses
that made an earlier election.

The Worker, Homeownership, and Business Assistance Act of 2009 also suspends the
90% limitation on the use of any alternative tax NOL deduction attributable to the
carryback of an applicable NOL for which the extended carryback period is elected. Transition rules prescribe how a taxpayer may revoke certain elections to waive the
carryback period.

**US manufacturing deduction**

Over the last several decades, various tax incentive systems have been enacted in the
United States to encourage exports and later repealed, including the extraterritorial
income (ETI) regime, which was repealed as a result of a World Trade Organization
ruling that the ETI regime favoured US goods and violated the national treatment
provisions of the General Agreement on Tariffs and Trade. In response, the United
States enacted the American Jobs Creation Act of 2004, which introduced a phase-out
repeal of ETI, and introduced the domestic production activities deduction under
section 199, seeking to compensate US manufacturers for the loss of ETI benefits.

Under section 199, taxpayers are allowed a 9% deduction for qualified production
activities (QPA) income (subject to a taxable income limitation), phased in at 3%
in 2005 and 2006; 6% in 2007 through 2009 and 9% in 2010 and thereafter. The
deduction is available to all taxpayers actively engaged in QPA. For corporate taxpayers,
the deduction generally will mean a federal income tax rate of 33.95%, 32.90% and
31.85%, respectively, for the years in question, on QPA income. Importantly, the
deduction also applies in calculating the alternative minimum tax. There is a limit on
the amount of the deduction equal to 50% of W-2 wages allocable to QPA (subject to a
specific effective date), and the deduction is not allowed for taxpayers that incur a loss
from their production activities or have an overall loss (including a carryover loss) from
all activities.

A taxpayer's QPA income is calculated using the following formula: domestic
production gross receipts less the sum of cost of goods sold allocable to such receipts
and other expenses, losses, or deduction which are properly allocable to such receipts.

**Payments to foreign affiliates**

A US corporation generally may claim a deduction for royalties, management service
fees, and interest charges paid to foreign affiliates, to the extent the amounts are
actually paid and are not in excess of what it would pay an unrelated entity, (i.e. are at
arm's length). In addition, US withholding on these payments may be required.

**Debt-to-equity rules**

Thin capitalisation rules may apply to disallow interest payments related to excess
debt and re-characterise such payments as dividends. The interest expense deduction
can be limited and suspended if more than 50% of the adjusted taxable income
of a thinly-capitalised corporation (with similar rules for a corporate partner in a
partnership) is sheltered by interest paid to a related party (or paid to a third-party but
guaranteed by the related party) who is not subject to US tax on the income.
**Employee benefit plans (pension plans and expenses)**

Through the Code, the government provides incentives for employers to provide retirement benefits to workers, including employee benefit, qualifying profit-sharing, or stock bonus plans. Usually, the employer will be allowed a current deduction for any contributions made to the fund, and the employee’s tax liability will be deferred until the benefit is paid. For profit, non-government employers generally have two types of available plans, which generally are subject to the reporting and disclosure requirements set forth under the Employee Retirement Income Security Act of 1974 (ERISA).

The first category of employee benefit plans is the defined benefit plan, or more commonly known as a pension plan, to which an employer contributes money, on an ongoing basis, to cover the amount of retirement income owed to retired employees under the plan (which will vary based on years of service, average salary, and/or other factors). Any investment gains or losses will not affect the amount of benefits paid to participants but will affect the amount an employer needs to contribute in order to cover its obligation.

The second category of employee benefit plans is the defined contribution plan, or more commonly known in the United States as a ‘401(k) plan’, to which an employer’s contributions (if any) are allocated amongst the separate accounts of participating employees, who also may contribute to their respective accounts. Investment gains or losses and the history of contributions will affect the value of a participant’s account at retirement but would not affect an employer’s contributions since the employer is not obligated to ensure any specified level of benefit in the plan.

Non profits, including churches and government entities, have similar employee benefit plans, except different requirements apply. Small employers and self-employed individuals also have similar options available but are subject to different requirements.

**Bribes, kickbacks, illegal payments**

An amount paid, directly or indirectly, to any person that is a bribe, kickback, or other illegal payment is not deductible.

**Taxes**

See, for example, *State and municipal taxes under the section on Other taxes.*

**Other significant items**

- Deductions for allowable charitable contributions may not exceed 10% of taxable income computed without regard to certain deductions, including charitable contributions themselves. Deductions for contributions so limited may be carried over to the five succeeding years, subject to the 10% limitation annually, as noted above.
- Bad debt resulting from a trade or business may be deducted in the year the debt becomes worthless. Determining the date the debt becomes worthless may present difficulty.
- No deduction generally is allowed for a contingent liability until such liability is fixed and determinable.
- No deduction generally is allowed for fines or penalties paid to the government for violation of any law.
- The cost of goodwill and most other intangibles assets generally is capitalised and amortisable rateably over 15 years.
• Generally, start up expenditures must be amortised over a 15 year period; however, a certain taxpayer may elect to deduct some expenses in the tax year in which the trade or business begins.
• Costs incurred for entertainment must meet strict tests in order to be deductible. The deduction for business meal and entertainment expenses is 50% of the expenses incurred. There are also limitations on the deductibility of international and domestic business travel expenses.
• Royalty payments, circulation costs, mine exploration, and development costs, and other miscellaneous costs of carrying on a business are deductible subject to certain conditions and limits.
• Depending on the taxpayer’s tax accounting method, research and experimental expenditures may be deducted as incurred or treated as deferred expenses and amortised over a period of not less than 60 months; however, in general, the method used must be consistently applied.

**Group taxation**

An affiliated group of US ‘includible’ corporations, consisting of a parent and subsidiaries directly or indirectly 80% owned, generally may offset the profits of one affiliate against the losses of another affiliate within the group by electing to file a consolidated federal income tax return. A foreign incorporated subsidiary may not be consolidated into the US group, except for certain Mexican and Canadian incorporated entities. A partnership may not be included in a consolidated return, even if it is 100% owned by members of an affiliated group, since a partnership is not a corporation. However, a member’s earnings that flow through from a partnership are included as part of the consolidated group’s taxable income or loss. Filing on a consolidated (combined) basis also is allowed (or may be required or prohibited) in certain states.

Sales, dividends, and other transactions between corporations that are members of the same group generally are deferred or eliminated until such time as a transaction occurs with a non-member of the group. Losses incurred on the sale of members of the group are disallowed under certain circumstances.

**Tax credits and incentives**

**Inbound investment**

There generally are no specific incentives related to inbound investment at the federal level, other than certain portfolio debt and bank deposit exceptions. The portfolio debt exception enables non-residents and foreign corporations to invest in certain obligations (which must meet certain statutory requirements to qualify as ‘portfolio debt’) in the United States without being subject to US income (or withholding) tax on the interest income. Certain state and local benefits may also be available.

**General business credit**

Various business credits are available to provide special incentives for the achievement of certain economic objectives. In general, these credits are combined into one ‘general business credit’ for purposes of determining each credit’s allowance limitation for the tax year. The general business credit that may be used for a tax year is limited to a tax based amount. In general, the current year’s credit that cannot be used in a given year because of the credit’s allowance limitation may be carried back to the tax year preceding the current year and carried forward to each of the 20 years following the current year.
In general, the current year business credit is a combination of the following credits:

- investment credit
- work opportunity credit
- alcohol fuels credit
- research credit
- low-income housing credit
- enhanced oil recovery credit
- disabled access credit for certain eligible small businesses
- renewable electricity production credit
- empowerment zone employment credit
- Indian employment credit
- employer social security credit
- orphan drug credit
- new markets tax credit
- small employer pension plan startup cost credit for eligible employers
- employer-provided child care credit
- railroad track maintenance credit
- biodiesel fuels credit
- low sulfur diesel fuel production credit
- marginal oil and gas well production credit
- distilled spirits credit
- advanced nuclear power facility production credit
- non-conventional source production credit
- new energy efficient home credit
- energy efficient appliance credit
- a portion of the alternative motor vehicle credit
- a portion of the alternative fuel vehicle refueling property credit
- Hurricane Katrina housing credit
- Hurricane Katrina employee retention credit
- Hurricane Rita employee retention credit
- Hurricane Wilma employee retention credit
- mine rescue team training credit
- agricultural chemicals security credit for eligible businesses
- differential wage payment credit
- carbon dioxide sequestration credit, and
- a portion of the new qualified plug-in electric drive motor vehicle credit for vehicles that will vary based on the date of purchase.

**Employment credits**

A ‘work opportunity tax credit’ is available for employment of certain types of workers who began work for an employer after 30 September 1996 and before 1 September 2011. ‘Creditable’ wages generally are the first USD 6,000 of wages paid to each qualified employee for the year. The credit is 40% of creditable wages, for a maximum credit of USD 2,400.

**Research and development (R&D)**

A credit against the federal tax equal to 20% of the sum of qualified research expenses incurred prior to 31 December 2009 in excess of the base amount (as discussed below) and basic research payments (as discussed below) to a qualified organisation may be obtained for certain periods. The base amount cannot be less than 50% of the current year’s qualified research expenditures. In tax years ending after 8 August 2005, the research expense credit also includes 20% of the taxpayer’s expenditures on qualified energy research undertaken by an energy research consortium. The ‘Tax Relief,
United States

Unemployment Insurance Reauthorization, and Job Creation Act of 2010 includes a retroactive two-year extension of the research credit and other expired business provisions, through the end of 2011.

In addition, for taxable years ending after 2006 taxpayers may be able to use the new alternative simplified credit (ASC) that does not use a gross receipts factor. The ASC generally equals 12% (14% in 2009) of qualified research expenditures (QRE) for taxable years that exceed 50% of the average QRE for the three taxable years preceding the credit determination year. Special transition rules apply to fiscal year 2006-2007 taxpayers.

Those taxpayers that, despite significant R&D investments, are unable to claim the standard R&D credit because their current R&D intensity is lower than during the credit’s 1984–88 ‘fixed base’ period may use an elective ‘alternative incremental research credit’ (AIRC). Under the AIRC, a graduated rate system applies to the extent that the taxpayer’s current year qualified research expenses (QREs) exceed a specified percentage of its average gross receipts for the prior four years (the ‘base amount’). This election to be subject to the alternative incremental credit regime applies to the tax year for which it is made and all later years unless the IRS consents to its revocation.

The deduction for R&D expenditures must be reduced by the entire amount of the credit unless an election is made to reduce the amount of the credit.

Puerto Rico

Puerto Rico is the most populous and politically significant US possession. Puerto Rico corporations are considered foreign for US tax purposes. In general, Puerto Rico corporations are liable to the US for tax on income effectively connected to a US trade or business and on passive income from US sources and on US branch profits. Tax paid to the United States may be eligible for a foreign tax credit against Puerto Rico tax liability.

US corporations operating in Puerto Rico may take a credit against income from Puerto Rico sources. The credit applies to income from operating an active trade or business in Puerto Rico or from the sale of substantially all the assets of such a trade or business. For tax years beginning after 1995, this credit is subject to limitations and generally is available only to existing claimants. All claimants may also take the credit on possession source investment income received or accrued before 1 July 1996. The credit is repealed for tax years beginning after 2005.

Other US possessions

The American Samoa, Guam, the Commonwealth of the Northern Mariana Islands, and the US Virgin Islands have their own independent tax departments. Accordingly, they have their own rules in addition to special provisions in the US tax code.

Qualified private activity bonds

Interest income received on certain qualified private activity bonds generally is exempt from federal income tax. This enables a business enterprise to issue the bonds at a lower interest rate.

Foreign tax credit

Generally, in any year, a taxpayer can choose whether to take as a credit (subject to limitation) or as a deduction foreign income, war profits, and excess profit taxes paid or accrued during the taxable year to any foreign country or US possession. A foreign tax credit (FTC) reduces US income tax liability dollar for dollar, while a deduction reduces
the US income tax liability at the marginal rate of the taxpayer. For taxpayers with net operating losses, the FTC is of no value in such year. However, a benefit might be received either in an earlier year (through a refund of previously paid taxes) or a later year (through a reduction of future taxes). It also should be noted that a taxpayer has an ability to switch from credit to deduction (or from deduction to credit) at any time in a 10-year period commencing when the foreign taxes were paid or accrued. Generally, a foreign tax credit may be carried back one year and, if not fully used, carried forward 10 years.

In addition, the FTC goes beyond direct taxes to include foreign taxes paid ‘in lieu of’ a tax upon income, war profits, or excess profits, which would otherwise generally be imposed. It also includes deemed-paid (indirect) taxes paid for certain US corporate shareholders of non-portfolio foreign corporations when actual or deemed dividends are received. Furthermore, the FTC system has numerous limitations to mitigate the potential abuses of the credit by the taxpayer.

**Other incentives**

State and local governments provide numerous incentives to encourage business and, thus, employment in their jurisdictions.

### Withholding taxes

The US has entered into various income tax treaties with countries in order to avoid double taxation of the same income and to prevent tax evasion. The table below from IRS Publication 901 (April 2010) summarises the benefits resulting from these treaties.

### Notes

* Please note the tax rates and associated footnotes appearing in the ‘Royalties’ column in the table address three types of royalties, as denoted in the most recent IRS publication. These three are industrial royalties, motion picture and television copyright royalties, and ‘Other’ copyright royalties. The back slashes ‘/’ between each figure and associated footnote(s) are meant to demarcate these three types of royalties, respectively.

1. No US tax is imposed on a dividend paid by a US corporation that received at least 80% of its gross income from an active foreign business for the three-year period before the dividend is declared.

2. The reduced rate applies to dividends paid by a subsidiary to a foreign parent corporation that has the required percentage of stock ownership. In some cases, the income of the subsidiary must meet certain requirements (e.g. a certain percentage of its total income must consist of income other than dividends and interest). For Italy, the reduced rate is 10% to 50% of the voting stock (for a 12-month period) of the company paying the dividends. For Japan, dividends received from a more than 50% owned corporate subsidiary are exempt if certain conditions are met.

3. The exemption or reduction in rate does not apply if the recipient has a permanent establishment in the United States and the property giving rise to the income is effectively connected with this permanent establishment. Under certain treaties, the exemption or reduction in rate also does not apply if the property producing the income is effectively connected with a fixed base in the United States from which the recipient performs independent personal services. Even with the treaty, if the income is not effectively connected with a trade or business in the United States by the recipient, the recipient will be considered as not having a permanent establishment in the United States under IRC section 894(b).

4. The exemption or reduction in rate does not apply if the recipient is engaged in a trade or business in the United States through a permanent establishment that is in the United States. However, if the income is not effectively connected with a trade or business in the United States by the recipient, the recipient will be considered as not having a permanent establishment in the United States to apply the reduced treaty rate to that item of income.

5. For Thailand, the rate is 5% for royalties on the use of any copyright of literary, artistic, or scientific work, including software. For Iceland the rate is 5% for trademarks and any information for rentals of industrial, commercial, or scientific equipment.

6. Interest determined with reference to the profits of the issuer or one of its associated enterprises is taxed at 15%.

7. Contingent interest that does not qualify as portfolio interest is treated as a dividend and is subject to the rates under columns 2 and 3, as appropriate.

8. The exemption applies only to interest on credits, loans, and other indebtedness connected with the financing of trade between the United States and the C.I.S. member. It does not include interest from the conduct of a general banking business.

9. The rate for royalties with respect to tangible personal property is 7% (5% in the case of Sri Lanka).

10. Tax imposed on 70% of gross royalties for rentals of industrial or scientific equipment.

11. The rate in column 2 applies to dividends paid by a regulated investment company (RIC) or a real estate investment trust (REIT). However, that rate applies to dividends paid by a REIT only if the beneficial owner of the dividends is an individual holding less than a 10% interest (25% in the case of Portugal, Spain, and Tunisia) in the REIT.

12. Royalties not taxed at the 5% or 8% rate are taxed at a 10% rate, unless footnote (3) applies.

13. The rate is 5% for interest (i) beneficially owned by a bank or other financial institution (including an insurance company), or (ii) paid due to a sale on credit of any industrial, commercial, or scientific equipment, or of any merchandise to an enterprise.

14. The rate is 10% if the interest is paid on a loan granted by a bank or similar financial institution. For Thailand, the 10% rate also applies to interest from an arm’s-length sale on credit of equipment, merchandise, or services.

15. This is the rate for royalties for the use of, or the right to use, industrial, commercial, and scientific equipment. The rate for royalties for information concerning industrial, commercial and scientific know-how is subject to the rate in column 4 (‘Other royalties’).

16. The exemption does not apply to cinematographic items, or works on film, tape, or other means of reproduction for use in radio or television broadcasting.
United States

17. Amounts paid to a pension fund or employee benefit organisation that are not derived from the carrying on of a business, directly or indirectly, by the fund or organisation are exempt.

18. The rate in column 2 applies to dividends paid by a regulated investment company (RIC). Dividends paid by a real estate investment trust (REIT) are subject to a 30% rate.

19. An election can be made to treat this interest income as if it were industrial and commercial profits taxable under article 8 of this treaty.

20. The rate is 4.9% for interest derived from (i) loans granted by banks and insurance companies, and (ii) bonds or securities that are regularly and substantially traded on a recognised securities market. The rate is 10% for interest not described in the preceding sentence and paid (i) by banks, or (ii) by the buyer of machinery and equipment to the seller due to a sale on credit.

21. The rate is 15% (10% for Bulgaria; 30% for Germany and Switzerland) for contingent interest that does not qualify as portfolio interest.

22. The rate is 15% for interest determined with reference to (i) receipts, sales, income, profits, or other cash flow of the debtor or a related person, (ii) any change in the value of any property of the debtor or a related person, or (iii) any dividend, partnership distribution, or similar payment made by the debtor to a related person.

23. Interest received by a financial institution is tax exempt. For Venezuela, the rate is 4.95% if the interest is beneficially owned by a financial institution (including an insurance company).

24. The rate in column 2 applies to dividends paid by a regulated investment company (RIC) or real estate investment trust (REIT). However, that rate applies to dividends paid by a REIT only if the beneficial owner of the dividends is (i) an individual holding not more than a 10% interest in the REIT, (ii) a person holding not more than 5% of any class of the REIT’s stock and the dividends are paid on stock that is publicly traded, or (iii) a person holding not more than a 10% interest in the REIT and the REIT is diversified.

25. Interest paid or accrued on the sale of goods, merchandise, or services between enterprises is exempt. Interest paid or accrued on the sale on credit of industrial, commercial, or scientific equipment is exempt.

26. Dividends received from an 80%-owned corporate subsidiary are exempt if certain conditions are met.

27. Royalties for the use of, or right to use, a copyright of literary, artistic, or scientific work (excluding royalties for software, motion pictures, films, tapes, or other means of reproduction used for radio or television broadcasting) are exempt.

28. Exemption or reduced rate does not apply to amount paid under, or as part of, a conduit arrangement.

29. Interest is exempt if (i) paid to certain financial institutions, or (ii) paid on indebtedness from the sale on credit of equipment or merchandise.

30. Amounts paid to a pension fund that are not derived from the carrying on of a business, directly or indirectly, by the fund are exempt. This includes amounts paid by a REIT only if the conditions in footnote 31 are met. For Sweden, to be entitled to the exemption, the pension fund must not sell or make a contract to sell the holding from which the dividend is derived within two months of the date the pension fund acquired the holding.

31. The rate in column 2 applies to dividends paid by a regulated investment company (RIC) or real estate investment trust (REIT). However, that rate applies to dividends paid by a REIT only if the beneficial owner of the dividends is (i) an individual or a pension fund holding not more than a 10% interest in the REIT, (ii) a person holding not more than 5% of any class of the REIT’s stock and the dividends are paid on stock that is publicly traded, or (iii) a person holding not more than a 10% interest in the REIT and the REIT is diversified. Dividends paid to a pension fund from a RIC, or a REIT that meets the above conditions, are exempt. For Sweden, the pension fund must also satisfy the requirements in footnote 30.

32. If the payments were for the use of, or the right to use, industrial, commercial, or scientific equipment, an election may be made to compute the tax on a net basis as if such income were attributable to a permanent establishment or fixed base in the US.

33. The exemption does not apply if the recipient of the gain is an individual who is present in the United States for more than 119 days during the year.

34. The rate applies to dividends paid by a real estate investment trust (REIT) only if the beneficial owner of the dividends is (i) an individual holding less than a 10% interest in the REIT, (ii) a person holding not more than 5% of any class of the REIT’s stock and the dividends are paid on stock that is publicly traded, or (iii) a person holding not more than a 10% interest in the REIT and the REIT is diversified.

Tax administration

Returns
The US tax system is based on the principle of self-assessment. A corporate taxpayer is required to file an annual tax return (generally Form 1120) by the fifteenth day of the third month following the close of its tax year. A taxpayer can obtain an additional six month extension of time to file its tax return. Failure to timely file may result in penalties.
### Important tax return due dates

### Payment of tax

A taxpayer’s tax liability generally is required to be prepaid throughout the year in four equal estimated payments and fully paid by the date the tax return is initially due. For calendar year corporations, the tax instalment payments are due by the fifteenth day of April, June, and September, and the tax liability must be fully paid by the fifteenth day of December. For fiscal year corporations, the tax instalment payments are due by the fifteenth day of the fourth, sixth, and ninth months, and the tax must be fully paid by the fifteenth day of the twelfth month of the tax year. Generally, no extensions to pay are allowed. Failure to pay the tax by the due dates as indicated above can result in estimated tax and late payment penalties and interest charges.

The instalment payments must include estimates of regular corporate income tax, alternative minimum tax, environmental tax, and, for foreign corporations, the tax on gross transportation income. To avoid a penalty, corporations must calculate the instalment payments based on at least 25% of the lesser of (i) the tax shown on the current tax return, or (ii) the prior year’s tax liability, provided that the tax liability was a positive amount in the prior year and that such year consisted of 12 months. However, corporations with taxable income of at least USD 1 million (before use of NOLs or capital loss carryforwards) in any of the three preceding years are not permitted to calculate the instalment based payment on the prior year’s tax liability, except in determining the first instalment payment. Instead, such corporations must calculate the instalment payments based on the tax shown on the current tax return.

Corporations with more than USD 1 billion in assets will be required to make estimated tax payments that are 100.25% of the amount otherwise due in July, August, or September of 2014. Such overpayments will be balanced out in October, November, or
December of 2014 when payments of 99.75% of the amount otherwise due will be paid by corporations with more than USD 1 billion in assets.

Taxpayers that acquired and placed in service property on or after 8 September 2010, and before 1 January 2011, have based their 2010 estimated tax payments on the assumption that 100% expensing would not be enacted. With enactment of 100% expensing via the ‘Tax Relief, Unemployment Insurance Reauthorization, and Job Creation Act of 2010’, these taxpayers may find they have overpaid 2010 estimated taxes. Taxpayers that have overpaid estimated taxes generally can recoup the overpayment only after the year in which the overpayments were made, by filing the appropriate federal income tax return or a Form 4466, Corporation Application for Quick Refund of Overpayment of Estimated Tax. A corporation may file a Form 4466 if its overpayment is at least USD 500 and 10% of the expected tax liability.

**Audit cycle**
Generally, the US tax system is based on self-assessment; however, many large and midsize businesses are under continuous audit by the IRS and state tax authorities. The audits may include the entire list of taxes for which the business is liable. Smaller business and persons with lower incomes are generally subject to audit on a random basis.

Currently, the IRS is focused on abusive payments related to contribution to capital of a corporation, domestic manufacturing deduction, foreign earnings repatriation, foreign tax credit generators, repairs vs. capitalisation change in accounting method, research credit claims, transfer of intangibles/offshore cost sharing, withholding taxes, and employee classification.

**Statute of limitations**
The IRS generally has three years after an original return is filed to assess income taxes. A return will be deemed to have been filed on its due date, even if the return is actually filed on an earlier date.

**Tax shelter**
Treasury regulations require taxpayers to disclose transactions determined to be abusive or possibly abusive. Current information on these transactions, known as listed and reportable transactions, is available from the IRS website (www.irs.gov).

**Tax accounting and internal controls**
ASC 740, Income Taxes (formerly known as FASB Statement No. 109, Accounting for Income Taxes) addresses how companies should account for and report the effects of taxes based on income. ASC 740’s principles and requirements apply to domestic and foreign entities in preparing financial statements in accordance with US generally accepted accounting principles (GAAP), including not-for-profit entities with activities that are subject to income taxes. This scope includes: (i) domestic federal (national) income taxes (US federal income taxes for US enterprises) and foreign, state, and local (including franchise) taxes based on income, and (ii) an enterprise’s domestic and foreign operations that are consolidated, combined, or accounted for by the equity method.

In recent years, controls around the accounting for income taxes have been a critical source of material weaknesses in companies’ internal controls over financial reporting. Accounting for income taxes also has been a primary reason for restating financial statements. Management should ensure that its judgments and estimates are
reasonable (e.g. assessing the need for a valuation allowance on deferred taxes) and that the underlying internal control processes are reliable.

The adoption of International Financial Reporting Standards (IFRS) in the United States is set by the Securities and Exchange Commission (SEC). The timeline included in the SEC’s roadmap provides for adoption of IFRS in the United States between 2014 and 2016. The SEC has stated that it will reassess the transition to IFRS in 2011.

**Accounting for income taxes**

For US federal tax purposes, the two most important characteristics of a tax method of accounting are (i) timing, and (ii) consistency. If the method does not affect the timing for including items of income or claiming deductions, it is not an accounting method and generally IRS approval is not needed to change it. In order to affect timing, the accounting method must determine the year in which an income or expense item is to be reported.

In general, in order to establish an accounting method, the method must be consistently applied. Once an accounting method has been adopted for federal tax purposes, any change must be requested by the taxpayer and approved by the IRS. Changes in accounting methods cannot be made through amending returns. The two most common methods of accounting are the accrual basis and cash basis methods.

**Penalties**

Civil and criminal penalties may be imposed for failing to follow the IRC when paying US taxes. The civil penalty provisions may be divided into four categories: delinquency penalties, accuracy-related penalties, information reporting penalties, and preparer, promoter, and protester penalties. Many, but not all, have exception provisions to cover reasonable cause. In addition many have provisions directing how the penalties interact with the other penalties.

These four main civil penalty categories may further be divided. First the delinquency penalties may be divided into failure to file, failure to pay, and failure to make timely deposits of tax. Failure to make timely deposits of tax applies to taxpayers required to make instalment payments and withholding tax payments.

Second, the penalties relating to the accuracy of tax returns are divided into the negligence penalty, the substantial understatement penalty, substantial overstatement of pension liabilities, substantial estate or gift tax valuation underestimate, and the valuation penalties. These penalties are also coordinated with the fraud penalty to eliminate any stacking of the penalties. Again, like other provisions, the fraud penalty is not intended to be imposed as a stacked penalty.

The third category of penalties is the information reporting penalties. These penalties may be imposed upon those who only have a duty to report information to the IRS.

The fourth and final major categories of civil penalties are the preparer, promoter, and protester penalties. Currently the most notable of these is the return preparer penalty for which there is a penalty for a position on a return for which the preparer did not have substantial authority. Also included in this provision is a penalty for wilful or reckless attempt to understate the tax liability of another person. Additionally, return preparer penalties may be imposed for failure to furnish a copy of a return or claim for refund to the taxpayer, sign the return or claim for refund, furnish his or her identifying number, or file a correct information return.
Other promoter and protestor penalties include a penalty for promoting abusive tax shelters, aiding and abetting the understatement of tax liability, and filing frivolous income tax returns. Additionally, a court may award sanctions and costs if a person institutes or maintains a proceeding primarily for delay, takes a position that is frivolous, or unreasonably fails to pursue available administrative remedies.

In addition to these major civil penalties, international tax related penalties for failures other than timely and accurate filing (e.g. wilful failure to report international boycott activity, failure of an agent to furnish a notice of a false affidavit relating to the withholding tax on dispositions of US real property interests, failure of a US person to furnish information relating to controlled foreign corporations and controlled foreign partnerships, failure of a US person to report foreign bank accounts, etc.) exist. Pension and employee benefit related tax penalties exist that protect the policy reasons for the tax incentives including, most notably, early withdrawal of pension funds. Another group of specialised penalties apply to exempt organisations.

Criminal penalties exist for situations when the failures to stay within the tax system are more egregious. Although applicable to corporate taxpayers, they are applied more frequently to individuals.

In addition to the penalty provisions, interest at statutory rates generally applies to underpayments of tax.

Significant developments

Uruguay has signed double tax treaties (DTTs) following the model of the Organisation for Economic Co-operation and Development (OECD) with Germany (renegotiation), India, Liechtenstein, Malta, Mexico (in force as of January 2011), Portugal, Spain (in force as of 24 April 2011), and Switzerland, as well as a memorandum to cooperate in the exchange of information with France. The memorandum with France is already approved by the Uruguayan Parliament. DTTs with Belgium, Chile, Malaysia, Equator, Luxembourg, and South Korea are currently under negotiation.

Uruguay has modified the Investment Law, achieving a better framework for local and foreign investments in the country. Three years of experience with the promotional regime in force since 2007 and a new social and economic reality led the authorities to amend certain provisions, maintaining the tax benefits to be granted.

The amendments follow, among others, these objectives:

- Improve the regime in order to connect the investments being promoted with the tax benefits being granted.
- Promote the generation of qualified employment.
- Encourage geographic decentralization.
- Promote production that generates more value added.
- Increase the incentives granted to investments that achieve cleaner energy production; improve technological investigation, innovation, and development; improve energy efficiency; and achieve adaptation to climate changes.
- Promote the development of micro and small-investment projects.

Taxes on corporate income

Net income derived from business activities conducted in Uruguay, obtained by legal entities resident in Uruguay and non-residents operating through a PE in Uruguay, is taxed at a corporate income tax (CIT) rate of 25% under the source principal (i.e. the territorial system of taxation). Accordingly, Uruguay taxes only income that is derived from activities conducted within its borders, income generated from property located in Uruguayan territory, or income derived from the economic use of rights within its territory.

In order to determine the net taxable income, all accrued expenses that are necessary for the generation of Uruguayan-source income and that are duly documented are allowed as deductions. Additionally, a taxpayer will be able to deduct expenses from its gross income if such expenses are subject to taxation (either foreign or local taxation) in
Uruguay

the hands of the other party. A compulsory proportional deduction must be calculated if the tax is at a rate that is lower than 25%.

A 12% withholding tax (WHT) is imposed on Uruguayan-sourced income obtained by non-residents, except in cases where the income is obtained through the operations of a PE in Uruguay (see the Withholding taxes section for more information).

Trading companies
Uruguayan corporations that sell and buy foreign goods or services from Uruguay (which are not physically introduced to the country, in the case of goods, or which are not economically used in Uruguay, in the case of services) may determine the net Uruguayan-source income on a notional basis of 3% of the gross margin (difference between the selling price and the purchase price). This gross margin has to be compliant with transfer pricing rules (in line with OECD guidelines). The applicable effective CIT rate is 0.75% (25% x 3%).

Corporate residence
Legal entities are deemed to be resident in Uruguay when they are incorporated according to the local legislation.

Permanent establishment (PE)
The concept of PE in the Uruguayan tax legislation follows, in general terms, OECD. From a Uruguayan law perspective, the term PE means a fixed place of business through which the business of an enterprise is wholly or partly carried on in Uruguay. The term PE especially includes: (i) places of management; (ii) branches; (iii) offices; (iv) factories; (v) workshops; (vi) mines; oil or gas wells; quarries or any other place of extraction of natural resources; (vii) buildings, constructions, installation projects, or the management activities associated to them, when they last more than three months; and (viii) services rendered (in particular consultancy) by a non-resident through employees or hired personnel in Uruguay during a period or periods exceeding six months on an annual basis. Please note that item (viii) constitutes an exception to the OECD model and is based on the provisions of the United Nations (UN) model.

Other taxes

Value-added tax (VAT)
Uruguayan VAT is levied at a general rate of 22% on the provision of services and on the circulation of goods within the limits of the Uruguayan territory. The import of goods and value-added in regard to the construction of immovable assets are also within the scope of this tax.

The following items are either subject to a reduced 10% VAT rate or exempt from VAT entirely.

Items subject to the 10% VAT rate:

- Food and medicines.
- Hotel services.
- Health services.
- The first sale of immovable assets.
Items exempt from VAT:

- Milk.
- Books.
- Magazines.
- Agriculture machinery.
- Accessories.

Exports are VAT zero-rated. VAT on purchases of the exporters can be recovered in the form of credit certificates that can be used for the payment of other taxes as well.

**Customs duties**

- Consular duty: 2% (from 1 January 2011).
- Customs computer services duty: a scale flat duty, with a limit of 50 US dollars (USD).
- Customs extraordinary duty: a scale flat duty, with a limit of USD 600.
- Global customs duty (TGA): depends on the origin of goods. If they come from Mercosur, the TGA is zero. If not, it varies depending on the type of product, with a maximum rate of 20%, with exceptional levels that range from 23% to 35% (corresponding mainly to certain types of shoes, sugar, and automotives).
- Commission of BROU: 0.05%.

All imports and exports duties are applied on the ‘customs value’ (in general, in imports it is considered as cost, insurance, and freight (CIF), and in exports as freight on board (FOB)).

On imports, VAT is also applicable according to the following detail:

- Goods subject to the general VAT rate (22%):
  - ‘Import VAT’ at the rate of 22%.
  - ‘Advanced payment import VAT’ at a rate of 10%.
- Goods subject to the reduced VAT rate (10%):
  - ‘Import VAT’ at the rate of 10%.
  - ‘Advanced payment import VAT’ at a rate of 3%.

The tax base of VAT on imports is the customs value plus the customs duties.

Additionally, some goods are also subject to an ‘advanced payment import on account of CIT’ at a rate of 10%, which can be deducted from the amount of CIT for the fiscal year.

**Export duties**

Exports are not subject to any taxes, and there are almost no prohibitions regarding the type of goods to be exported. On the contrary, several instruments are offered to promote exports, such as the reimbursement of taxes. For VAT on exports, please see VAT above.

For the reimbursement of indirect taxes, the exporter may recover internal taxes that are added to the cost of the products exported. The amount to be reimbursed is a percentage of the FOB value set by the Executive Power for each product.

Additionally, temporary admission consists of the import of raw materials, pieces, motors, package material, and other industrial input without import duties or taxes. To be subject to this customs duties exemption, the company has to export the finished
Uruguay

goods within 18 months from the introduction of the exempt goods or materials. The subsequent local sale of such finished goods is not entitled to this benefit.

Excise tax
In general, excise tax applies on the first transaction effected in the domestic market by manufacturers or importers of goods. Exports are not taxable.

Excise tax rates vary for each item, and they are generally fixed by the government within maximum parameters established by law.

Goods subject to the highest rates are alcoholic beverages (from 20.20% to 80%, depending on the alcohol degree), tobacco (from 28% to 70%), lubricants (from 5% to 35%) gasoline, fuel, and other petroleum products (from 5% to 133%).

Net wealth tax (NWT)
All types of legal entities and business enterprise owners are subject to a NWT at a rate of 1.5% on the value of net assets. This tax also follows the source principle, whereby only assets located or economically used in Uruguay are taxable. Taxpayers may reduce their capital tax liability in determining the NWT basis, up to their total amount of CIT for the fiscal year. In practice, taxpayers deduct 1%, which was established prior to the tax reform law.

The deduction of liabilities from the amount of taxable assets to determine the NWT basis is limited to: (i) the average of debts with financial institutions, (ii) debts with suppliers of goods and services, (iii) taxes not yet due, (iv) debts with governments, international credit offices of which Uruguay is a member and with foreign state financial institutions that lend funds for long-term productive projects, and (v) debts documented in debentures and obligations, if their emission is done in a public offering and such papers are quoted in a stock exchange.

Property taxes
Regarding taxes of relevance for those doing business in Uruguay, please see Net Wealth Tax above. There are additional property taxes of less significance, levied by Municipal authorities (e.g. Contribución Inmobiliaria) and by National authorities (e.g. Impuesto de Primaria).

Tax of control of corporations
Upon the set up of a corporation, a tax is payable at a 1.5% rate on a notional basis amount, which is determined annually by the authorities. For fiscal year 2011, the estimated amount of this tax (lump sum) is approximately USD 950.

This tax is also due annually at the end of each fiscal year, at a rate of 0.75% on said notional amount, and can be deducted from the NWT. For fiscal year 2011, the estimated amount of this tax (lump sum) is approximately USD 475.

Tax on real estate transfer
A tax on real estate transfer applies to the transfer of immovable assets. Transfer is defined in an ample sense, as a sale, a cession of the right to use, a transfer of inheritance rights, etc.

Both parties to the transfer contract are subject to this tax at a rate of 2% on the property's tax value (according to a National Register, a value generally lower than market value). When the property is transferred without payment, the beneficiary pays...
tax at a rate of 4% on the property tax valuation, except in instances where the property
is transferred to direct heirs or legatees, who pay this tax at a rate of 3%.

**Stamp taxes**
Stamp taxes are not applicable in Uruguay.

**Branch income**
CIT is imposed at a rate of 25% on net income derived from business activities carried
out in Uruguay. A 7% WHT is imposed on profits remitted or credited to a home office.
Dividends and/or profits paid or credited to non-resident shareholders will not be
subject to WHT when they are paid out of non-taxable income for CIT purposes.

**Income determination**

**Inventory valuation**
Replacement cost is permitted for tax purposes, as well as the first in first out (FIFO),
last in first out (LIFO), or average cost methods, irrespective of the inventory valuation
method used for accounting purposes.

**Capital gains**
Capital gains are treated as ordinary income, except for capital gains on property
located in rural areas, which is exempt from tax under certain conditions.

**Inter-company dividends**
Dividends received from local subsidiaries are exempt. Dividends received from foreign
subsidiaries are out of the scope of this tax since they are considered foreign sourced,
thus non-taxable income.

**Foreign income**
Uruguayan legal entities (CIT taxpayers) and non-residents operating through a PE in
Uruguay are only subject to tax on income from Uruguayan sources under the territorial
system of taxation. Hence, foreign-source income is not subject to tax.
Income derived from activities performed, assets located, or rights utilised outside
Uruguay, regardless of the nationality, domicile, or residence of the parties participating
in the transactions and the place where the transaction agreements are subscribed, is
not subject to CIT.

**Income adjustment for inflation**
An income adjustment for inflation has been in force since 1 January 1981 and is
calculated by multiplying the variation in the wholesalers’ price index for the financial
year by the difference between:

1. total assets at the beginning of the year (excluding fixed assets) and
2. total liabilities at the beginning of the year.

If (1) is higher than (2), then an inflation loss adjustment is deducted from gross
income. However, if (2) is higher than (1), then an inflation gain adjustment is added.
Uruguay

**Deductions**
As a general rule, duly documented expenses that are necessary to obtain and preserve gross taxable income are tax deductible. On the contrary, those expenses associated with deriving or preserving income not subject to income tax are not deductible from the taxable basis.

**Depreciation and depletion**
Straight-line depreciation over useful life is mandatory. Specific rates exist for the following cases: (i) 2% per year for urban buildings, (ii) 3% per year for rural buildings, and (iii) no less than 10% per year for new vehicles. Other rates are accepted if economically justified. No conformity between book and tax depreciation is required.

Percentages for depletion computed on the cost of natural resource properties are allowed in accordance with generally accepted criteria.

Depreciation and depletion percentages are computed on the historical cost of fixed assets revaluated at year-end, based on the variation of the wholesalers’ price index. Capital gains derived from the revaluation of fixed assets are not taxable income.

**Taxes**
CIT and NWT are not deductible.

**Net operating losses**
Losses may be carried forward and deducted from the net taxable income of the following five years, once adjusted for inflation. There are no loss carrybacks.

**Payments to foreign affiliates**
All accrued expenses that are necessary for the generation of Uruguayan-source income and that are duly documented are allowed as deductions. Additionally, a taxpayer may deduct expenses from its gross income provided such expenses are subject to taxation (either via foreign or local taxation) in the hands of the other party. A compulsory proportional deduction must be calculated if the tax is at a rate that is lower than the CIT rate of 25%.

**Group taxation**
Group taxation is not permitted in Uruguay.

**Transfer pricing rules**
As a general principle, transfer pricing rules are applicable to international transactions between related parties. However, Uruguayan legislation has extended the scope of these regulations to transactions carried out with low-tax or no-tax jurisdictions or regimes (either international or domestic) and to certain operations through third intermediaries. Domestic transactions with Uruguayan Free Zone users fall under this category.

The definition adopted by the law for related parties is quite broad. Such a relationship is configured when both parties are subject (directly or indirectly) to the management or control of the same individuals or legal entities, or when they have power of decision to direct or define the taxpayer’s activities due either to their participation in capital interest, the level of their credit rights, or their functional or any other type of influence (whether contractual or not).
**Thin capitalisation**
Thin capitalisation rules do not apply in Uruguay.

**Tax credits and incentives**

**CIT reduction for income reinvested in fixed assets**
40% of income reinvested in the purchase of (i) industrial and agricultural machinery, (ii) vehicles and installations, (iii) computers, (iv) telecommunications equipment, and (v) some assets for the tourism industry is exempt from CIT.

20% of income reinvested in the construction and expansion of industrial, agricultural, and tourism buildings is exempt from CIT (limited to 40% of net taxable income in the year of expenditure).

The joint amount of said investments can be deducted from the taxable basis, with a limit of 40% of the annual net profit, once the amount of other exemptions has been deducted. The excess can be deducted (with the same limitations) in the following two tax periods. It is important to mention that income exempt by these provisions cannot be distributed and must be retained as a reserve account, which ultimately can only be capitalised.

**NWT exemption**
Movable fixed assets directly connected to the industrial cycle and equipment for data processing are exempt from NWT.

**Investments law (IL)**
Uruguay has modified the IL, achieving a better framework for local and foreign investments carried out in the country. To obtain tax benefits, the IL requires that enterprises obtain a government statement in this regard. The Bureau of Investor Assistance is in charge of monitoring the correct compliance of these projects.

The IL grants two types of benefits:

**Automatic benefits**
This kind of benefit is only for manufacturing, extractive, or farming/ranching activities, and includes:

- Exemption from NWT for chattel property directly engaged in the production cycle and data-processing equipment.
- Exemption from VAT and CIT paid on the importation of such goods, and reimbursement of VAT in the case of locally purchased items.

**Discretionary benefits**
Benefits that may be obtained at the discretion of the Executive Power for any type of business activity (not cumulative with automatic benefits) include:

- Tax exemptions on importation of fixed assets items.
- NWT exemptions: permanent for chattel property items, for a period of eight years for construction work in Montevideo (capital city), and for a period of ten years in the rest of the country.
- VAT reimbursement on local purchase of goods and services for civil construction work.
Uruguay

- Increased deductions for CIT in respect of fees and remunerations related to technological developments.
- Exemption from CIT, depending on the nature and size of the project to be carried out. The Executive Power takes into account the following criteria to grant this benefit:
  - Addition of technology to improve competitiveness.
  - Contribution to export growth and diversification.
  - Contribution to geographic decentralisation.
  - Improvement of technological investigation, innovation, and development.
  - Generation of employment.

Auto-saving ‘direction’ benefit
The auto-saving ‘direction’ benefit allows a company to deduct from the CIT basis the amount of the capital increase that occurred as a consequence of the reserves capitalisation or of the in-kind distribution of shares, for an amount equivalent to the investment carried out with the investor’s own funds. The amount of the CIT deduction and the period/s to which said exemption will apply is granted by the government through a statement issued by the Executive Power.

Free zones (FZ)
Following the approval of the FZ law in 1987, this system has become an important tool for attracting investments to Uruguay.

It has been utilized for carrying out traditional activities in the FZ (warehousing, logistics, and distribution), for the provision of services (software, finance, call centres, etc.) and for manufacturing activities such as cellulose pulp and leather production. In a clear sign of stability, none of the administrations in office over the last three decades has modified the basics of the FZ system.

The law defines FZ as privately or publicly owned isolated and fenced off areas of Uruguayan territory determined by the Executive Branch with the purpose of carrying out all types of manufacturing, commercial, and service activities within the zone, while enjoying tax exemptions and other benefits envisaged in the law.

Companies in these areas cannot carry out industrial, trading, or service activities in the non-FZ Uruguayan territory, except for services expressly authorized by the government (listed below) but are allowed to render all types of services within the FZ or to third countries.

FZ users are allowed to render the following services to the non-FZ Uruguayan territory (the provision of these services is subject to the general tax system, not to the tax holidays):

- International call centres, except for those whose main destination is the non-FZ Uruguayan territory.
- E-mail, distance learning, electronic signature certificate issuance.
- Software production, technology consulting, and related training services.
- Accounting, administration, and management services rendered to related companies who carry out port and shipping logistics activities, if said services are lower than 20% of the total income obtained during the fiscal year.
- Processing of film material and data.

FZ users are exempt from all current and future national taxes, including those taxes for which a specific legal exemption is required, in connection with the activities performed
within the FZ. The Uruguayan government guarantees all the exemptions and benefits granted by the law for the term of their contracts. FZ can be located outside or inside the cities; it depends on the kind of FZ.

Social security taxes as well as certain WHTs are excluded from the exemption. Income tax WHT on payments of dividends made by these companies to their non-resident shareholders are exempt.

**Holding companies**
Uruguayan legal entities holding shares in non-resident entities or investing in assets not located in Uruguay are not subject to tax (due to the application of the source principle).

**Printing industry incentives**
Companies that print books and educational material are exempt from the NWT and VAT.

**Electric power industry incentives**
Companies which generate electric power from non-traditional energy sources have special benefits regarding CIT.

**Shipping industry incentives**
Imports of material, supplies, and equipment required for the construction, maintenance, and repair of shipyards or vessels are exempt from CIT.

**Water and air transportation incentives**
The income of water and air transportation companies is tax exempt. In the case of foreign companies, the exemption is subject to reciprocal treatment. The government may exempt from CIT companies engaged in transportation by land, subject also to the conditions of reciprocal treatment.

**Forestry plantation incentives**
Income derived from forestry plantations up to July 2007 is tax exempt. Income derived from new forestry plantations is also tax exempt, but under strict conditions, such as wood quality.

**Software industry incentives**
50% of the income derived from the production, development, implementation, updating, and correction of previous versions (amongst others) of software was exempt from CIT for fiscal years ending between 1 January 2010 and 31 December 2010. There were some requirements for exemption, such as the tasks had to be directly developed by the computer support producer. Related services had to be rendered to logical support producers as well.

**Industrial park incentives**
Individuals or legal entities that establish industrial parks within Uruguayan territory, as well as companies located within such industrial parks, are entitled to CIT exemption for their industrial equipment, excise tax and VAT exemption on the acquisitions of such goods, and other benefits.

**Tourism industry incentives**
Investments in the tourism industry have tax benefits related to CIT, VAT, and NWT, as follows:
Uruguay

- Deduction of up to 40% of CIT in investments made in the fiscal year in hotel equipment and equipment for improving entertainment and information services to tourists and deduction of up to 20% of CIT in investments made in construction and expansion of hotel buildings, with the limits mentioned in previous sections (40% of the annual net profit, once the amount of other exemptions has been deducted).
- VAT refund included in local acquisitions of goods and services for construction, improvement, or expansion of tourist complexes.
- VAT exemption on import of goods for construction, improvement, or expansion of tourist complexes.
- The list of operations included in the concept of exports of services for VAT purposes (thus zero-rated) was broadened to include, among others, services related to accommodation that hotels, apartments, and rural tourism establishments provide to tourists.
- NWT exemption for ten years on investments in infrastructure and civil work for construction, improvement, or expansion of tourist complexes.
- NWT exemption for four years on fixed assets investment for tourist complexes.
- 50% exemption of import duties on materials and goods for construction, improvement, or expansion as well as fixed assets of tourist complexes.

**Withholding taxes**

All Uruguayan‑sourced income obtained by non‑residents (other than those obtained through a PE in Uruguay) is taxed at flat rates of up to 12% on gross income, with some exceptions. This tax is basically collected by way of WHT.

The exceptions are as follows:

- Interest on deposits in local currency for terms exceeding one year is taxed at 3%.
- Interest on public bonds is not taxed.
- Dividends paid or credited by CIT taxpayers are taxed at 7%, provided they are derived from taxable income.

Profits originated in the alienation of stock of CIT taxpayer companies obtained by non‑residents are exempt only if the capital of the local company is expressed in bearer shares. The alienation of registered stock is taxed at a rate of 12%.

Although the Uruguayan tax law follows the source principle, technical services (defined as services rendered in the fields of management, technical administration, or advice of any kind) rendered by non‑residents but associated with taxable income obtained by the local user in Uruguay are considered to be Uruguayan sourced for tax purposes and subject to WHT. However, when the taxable income obtained by the local user of the service does not exceed 10% of its total income, then only 5% of the service fee paid or credited abroad will be subject to non‑resident WHT. Therefore, in these cases, the effective WHT rate is only 0.6% (5% x 12%).

**Tax administration**

**Returns**

VAT, CIT, and NWT are self assessed. CIT and NWT returns are filed on a fiscal‑year basis (on the fourth month following the date of the year end). VAT and excise tax rules require monthly payments and/or tax returns. Also, WHTs are declared and payable to the Tax Office on the month following the one in which the tax was due.
Payment of tax
Income and capital taxes are paid monthly by way of advanced payments, which are calculated on the basis of the previous year’s tax. The difference between the advanced tax payments and the total annual tax calculated at fiscal year-end is paid four months after the fiscal year-end.
Uzbekistan, Republic of

**Significant developments**

The Tax Code of the Republic of Uzbekistan was introduced on 1 January 2008 to consolidate the previous Tax Code and separate instructions on specific taxes. The Tax Code is amended annually, and the currently effective version reflects amendments as of 1 January 2011. The most notable amendments as of that date are as follows.

**Value-added tax (VAT)**

Import of medicines that had previously been exempt from VAT is now subject to the restriction that relief is only granted to medicines that are not available from local manufacturers.

The exemption from VAT on sale of precious metals has been abolished.

Sale of cotton fibre within Uzbekistan is subject to zero-rated VAT.

**Property tax**

A new mandatory charge was introduced at 0.25% of the historic value of fully depreciated equipment that continues to be used by enterprises. At the same time, such enterprises may benefit from exemption from corporate income tax (and unified tax payment) in respect of revenue from sale/disposal of such equipment.

**Unified social payment (USP)**

Employment income paid at expense of grants issued by states, international and foreign governmental organisations, international and foreign non-governmental organisations, as well as grants issued under international agreements of Uzbekistan, is exempt from USP (otherwise chargeable at 25%).

**Taxes on corporate income**

Resident corporations pay corporate income tax (CIT) on their worldwide income, whereas non-residents (i.e. foreign legal entities that have a permanent establishment (PE) in Uzbekistan or have income from sources in Uzbekistan not associated with a PE) pay CIT on income resulting from activities/sources in Uzbekistan.

Non-resident corporations are taxed directly at the level of their Uzbek PE, if there is one, or via withholding tax (WHT) at the source of payment of the Uzbek source income.
CIT is charged on taxable profit calculated as a difference between gross income and deductible expenses reduced by applicable incentives granted by the Tax Code, other laws, or presidential decrees.

The CIT rate is set annually by presidential decree. By virtue of the government’s annual initiatives for rate reduction, the CIT rate has been reduced over time as follows:

<table>
<thead>
<tr>
<th>Year</th>
<th>Rate</th>

<td></td>
</tr>
</tbody>
</table>

In 2011, enterprises (i.e. legal entities) are generally subject to CIT at the rate of 9%. Commercial banks are subject to CIT at the rate of 15%.

**Local income taxes**

There is a local tax on accounting profit (less CIT), an infrastructure development tax, which is charged at a maximum rate of 8%.

**Corporate residence**

For Uzbek tax purposes, corporations are classified as resident or non-resident. A resident corporation is a legal entity that passed state registration in Uzbekistan (i.e. Uzbek legal entity). Other legal entities would be regarded as non-resident corporations for tax purposes.

**Permanent establishment (PE)**

PE is defined by the Tax Code as “any place through which non-resident carries out entrepreneurial activity in the Republic of Uzbekistan, including activity carried out through an authorised person. PE would also be existent where non-resident carries on entrepreneurial activity for 183 days (or more) in any consequent 12-month period ending in the current tax period”.

**Other taxes**

**Value-added tax (VAT)**

Legal entities are subject to VAT, which is applied to taxable turnover and taxable imports. The rate for taxable turnover is 20%. This rate also applies to taxable imports, for which the tax base is determined as the customs value plus import duties and excise tax (on excise-liable goods). Export of goods for hard currency is generally zero-rated. Insurance and most types of financial services are exempt.

**Excise tax**

Legal entities producing or importing excise-able goods are subject to excise tax. Rates vary from 5% to 200% depending on the type of goods produced/imported. The taxable base is determined as the value of produced/imported goods excluding VAT.
Uzbekistan, Republic of

**Customs duties**
Import of certain goods to Uzbekistan is subject to customs duties. The taxable base is determined as the customs value of imported goods. Rates of customs duties vary from 5% to 40% depending on the type of imported goods. There is also a customs clearance fee of 0.2% from the customs value of imported goods.

**Stamp duties**
According to Uzbek legislation, stamp duty is an obligatory payment charged for performance of legal actions and/or issuance of legal documents. The following actions, among others, are subject to stamp duties: filing claims, performing notary actions, civil registration, state registration of a legal entity, obtaining licenses/permits to carry out certain activities, etc.

The rates of stamp duties generally vary from 0.5 to 20 times minimum monthly wage (MMW, approximately USD 29), depending on the type of action executed. For instance, duty for filing a claim depends on the amount of claim. If the amount is less than 20 MMW, the duty comprises 5% of this amount; if the amount exceeds 80 MMW, the duty is 20% of this amount. Duty for notarization of copies of documents for legal entities is 2% of the MMW per each page of the document. Duty for registration of legal entities with foreign investment comprises 5 times the MMW plus USD 500.

**Property tax**
The property tax rate in 2011 is 3.5% for legal entities. The tax is computed quarterly, based on the net book value of the fixed assets, adjusted for the effect of revaluation, which should be performed annually on 1 January, the residual value of intangibles, and the value of overdue construction-in-progress. The rate is doubled for equipment not installed in due time.

As of 1 January 2011, a charge of 0.25% of the historic value of outdated equipment will be collected from legal entities (except for micro-firms and small enterprises) for exploitation of fully depreciated equipment.

Newly opened enterprises are exempt from property tax for a period of two years from their date of registration, unless such enterprises have been created on the basis of production facilities or assets of existing enterprises. There is also a rate reduction benefit available to companies engaged in production and export of goods (work, services). Property tax exemption is also available in respect to leased property, for a period of the lease, and new technological equipment, for a period of up to five years.

**Turnover taxes**
There are three mandatory contributions that are charged on the enterprise’s gross annual turnover (less VAT and excise tax):

- Road fund to be imposed at a rate of 1.4%.
- Pension fund at a rate of 1.6%.
- Educational institutions fund (for reconstruction, capital repair, and equipment) at a rate of 0.5%.

The taxable base (and tax rate in exceptional cases) for these mandatory contributions may differ depending on the type of activity of a company.
**Land tax**

Enterprises, including foreign legal entities operating in Uzbekistan via a PE, owning land plots or rights of their use are subject to land tax or land lease payment. Land tax is charged at fixed fees that vary depending on the quality, location, and level of water supply of each land plot. Land lease payment is charged at negotiable rates; however, the minimum amount cannot be less that the land tax rate for the respective land plot. Land tax and land lease payment are computed based on the area of the land being in use.

**Water-use tax**

Enterprises (including PEs) using water in their production are subject to water-use tax. The tax rate is set by the Cabinet of Ministers and depends on the source of water consumption (i.e. surface or underground). Water-use tax is calculated based on the volume of the water consumed.

**Unified social payment (USP)**

Employers are subject to USP assessed on total payroll cost related to local and expatriate staff. This payment is collected by the tax authorities. The rate of USP is 25%.

**Taxes of subsurface users**

In addition to standard taxes, subsurface users (i.e. legal entities and individuals exploring and extracting natural resource) are subject to subsurface users’ specific taxes, as listed below:

**Subsurface use tax (royalty)**

Subsurface use tax is charged on volume of produced (extracted) natural resources that are ready for sale or transfer (including free of charge) and consumption for internal purposes. Taxable base is determined as average weighted sales price.

<table>
<thead>
<tr>
<th>Business activity</th>
<th>Tax rate examples</th>
</tr>
</thead>
<tbody>
<tr>
<td>Extraction of natural resources</td>
<td>natural gas 30%, precious stones 24%, oil 20%, gold 5%, silver 8%</td>
</tr>
<tr>
<td>Utilisation of by-products received during the extraction of natural resources</td>
<td>30% of tax rate applicable to main natural resources extracted</td>
</tr>
</tbody>
</table>

**Excess profits tax**

Excess profits tax is assessed on the difference between the selling price of the extracted natural resources (as per the list) and the statutory price set by the legislation. Excess profits tax is not payable by entities operating under production sharing agreements.

The list of natural resources and goods subject to excess profits tax includes: copper, cement, natural gas, polyethylene granules, clinker. Excess profits tax is paid at 50% of the taxable base.

**Signing and commercial discovery bonuses**

Signing and commercial discover bonuses are one-off payments to the state budget. The signing bonus is payable for the right to engage in exploration and extraction of natural resources and range from 100 to 10,000 times the MMW, depending on the type of minerals. The commercial discovery bonus is paid for each field where a subsurface user discovers the natural resources and comprises 0.1% from the cost of the proved reserve volume.
**Branch income**

There is no concept of a ‘branch’ of a foreign legal entity in the Uzbek legislation. Instead such entities use a PE registration to perform business activities without establishing an Uzbek company.

In addition to CIT, non-residents operating in Uzbekistan via PE pay net profit tax assessed at 10% on accounting profit less CIT.

**Income determination**

**Inventory valuation**

Uzbek legislation permits the application of the weighted average cost method (AVECO) and the first in first out (FIFO) method for the valuation of inventory for tax purposes.

**Capital gains**

Capital gains arising from the disposal of tangible and intangible assets are calculated as the difference between the selling price and the net book value of an asset. The capital gain is included in taxable profits (unless specifically exempt), and the capital losses are deductible (only if the disposed asset had been used for business purposes for three or more years). This is applicable to Uzbek legal entities and PEs of foreign legal entities. Capital gains on non-resident companies may be subject to WHT at 20% as ‘other’ income.

**Dividend income**

Dividends paid by a domestic subsidiary will be subject to 10% WHT at the source. The net dividends received by its domestic parent company will then be excluded from its CIT base. Such net dividends received by a foreign parent company would be taxed in accordance with the respective country’s internal legislation or double taxation treaty (DTT) provisions (if Uzbekistan has a DTT with this country). See the Withholding taxes section for a list of countries with which Uzbekistan has an applicable tax treaty.

**Foreign income**

Gross foreign income of a resident corporation (e.g. income from its foreign branch) should be included in its aggregate income on an accrual basis, regardless of remittance date. Expenses incurred abroad in relation to such foreign income would be deducted subject to provisions of the Uzbek Tax Code. Foreign income tax paid on such income should be credited against the Uzbek CIT only if this branch is registered in a country with which Uzbekistan has a DTT. There are no deferrals for foreign income to be recognised for Uzbek tax purposes.

**Deductions**

The tax base for CIT purposes varies significantly from the computation of taxable profits in most Western jurisdictions. Expenditures such as entertaining, benefits in-kind, and business trip allowances exceeding the statutory norms (that are generally low) are non-deductible.

There are additional costs that cannot be deducted by PEs of foreign legal entities, such as interest on head office loans, commission fees charged by head office, royalty, administrative and management expenses of head office incurred outside Uzbekistan.
However, PEs are eligible to deduct expenses incurred outside of Uzbekistan if they directly relate to their business in Uzbekistan.

**Depreciation and amortisation**

For tax purposes, depreciation/amortisation is calculated with application of rates defined by the Tax Code. If depreciation for accounting purposes is charged at higher rates (compared with the Tax Code rates), the difference would be treated as a temporary difference for CIT purposes (i.e. deducted in future periods).

Depreciation is calculated from a month following the month when the asset was put into use until it is fully depreciated, disposed, or written off. The maximum annual depreciation rates applicable to different types of fixed assets are outlined in the table below.

<table>
<thead>
<tr>
<th>Depreciable item</th>
<th>Rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Buildings and other structures</td>
<td>5</td>
</tr>
<tr>
<td>Cars, tractors, special equipment, computers and related hardware</td>
<td>20</td>
</tr>
<tr>
<td>Lorries, buses, special cars and trucks, industrial machinery and equipment, agricultural machinery and equipment, oil extraction and mining equipment, office furniture</td>
<td>15</td>
</tr>
<tr>
<td>Railway, river and air transport vehicles, thermo-technical equipment, turbines, electric and diesel drives, power supply and communication lines, pipelines</td>
<td>8</td>
</tr>
<tr>
<td>Depreciable assets not mentioned above</td>
<td>10</td>
</tr>
</tbody>
</table>

For statutory accounting purposes, fixed assets can be depreciated using one of the following methods:

- Straight-line.
- Production method.
- Double-declining-balance method.
- Sum-of-the-years' (cumulative) method.

Intangible assets, including leases and other property rights, are amortised over the shorter of an asset’s useful life or the period of activity of the enterprise. Where an asset’s useful life cannot be determined, the asset would be amortised over five years.

Expenses related to geological exploration and developmental works necessary for the extraction of natural resources are deductible for CIT purposes through depreciation at the rate of 15% per annum.

**Interest on short-term loans**

Interest is deductible, except for interest on overdue/delayed loans (i.e. ‘penalty interest’) and interest capitalised in the value of fixed assets (i.e. in cases where a loan was obtained to purchase fixed assets).

**Taxes**

Generally, taxes are deductible for CIT purposes. The exceptions are the infrastructure development tax based on after-tax profits and the net profit tax for PEs.

**Other tax losses**

In cases where goods or services are sold below cost (or given for free), the revenue should be adjusted for tax purposes to the cost or purchase price of the goods or services.
Uzbekistan, Republic of

Production wastes and defects within statutory norms, and losses resulting in force-majeure circumstances are generally deductible.

Losses from the disposal of fixed assets also may be deducted, if the fixed asset has been used for three or more years.

**Net operating losses**

Tax losses may be carried forward for a period of five years, allowing a reduction of taxable income of the respective year by up to 50%. Loss carrybacks are not permitted.

**Group taxation**

There is no provision for consolidation of income or losses by related companies for tax purposes in Uzbekistan. A foreign legal entity that has several PEs in Uzbekistan may not consolidate those for tax purposes.

**Transfer pricing**

As of 1 January 2010, the transfer pricing concept was reintroduced in the Uzbek Tax Code. However, it is limited to a couple of paragraphs stating that tax authorities may adjust prices used by interrelated parties if these prices differ from the prices which would have been used in transactions with independent parties. There is no further guidance for application of this rule, which gives rise to different interpretation by tax authorities and taxpayers.

**Thin capitalisation**

Effective legislation does not provide for thin capitalisation rules, except for debt-to-equity ratios set up by the Central bank of Uzbekistan (CBU) for commercial banks.

**Tax credits and incentives**

The current tax legislation offers tax incentives for enterprises in oil and gas exploration/development projects, enterprises engaged in the production and export of goods for foreign currency (when export share exceeds 15%), and companies rendering certain services.

**Incentives for oil and gas exploration and extraction companies**

Foreign companies carrying out oil and gas exploration works, as well as their foreign contractors/subcontracts engaged in such works, are exempt from payment of all forms of taxes and contributions to non-budget funds during the exploration period. Additionally, import by these companies of equipment, material, and technical resources and services necessary for the exploration and related works is exempt from customs duties.

Resident corporations supplying materials and rendering services to foreign companies carrying out oil and gas exploration are exempt from VAT.

Furthermore, if foreign companies carrying out oil and gas exploration form joint venture companies for extraction of oil and gas at respective fields, such companies are granted a seven-year CIT holiday starting from the date of commencement of extraction.
Incentives for carrying out export activities
Enterprises exporting goods (works, services) of their own production for freely convertible currency may apply reduced rates of CIT as follows:

- If export share of total sales ranges from 15% to 30%, the effective rate shall be reduced by 30%.
- If export share of total sales is 30% or more, the effective tax rate shall be reduced by 50%.

This incentive is applied likewise in regards to property tax as follows:

- If export share ranges from 15% to 30%, the property tax rate is reduced by 30%.
- If export share is 30% or more, the property tax rate is reduced by 50%.

The incentive in both cases is subject to a restriction that it does not apply to wholesale/retail sale or intermediary companies, nor to revenues from the export of specific items such as cotton fibre, oil, gas, precious metals, etc.

Producers can also defer payment of their import VAT in respect of material and technical resources used for production of goods to be exported. The deferral is granted for up to 90 days without application of any interest.

Incentives for service companies
Microfirms and small enterprises engaged in certain types of activity are exempt from CIT and unified tax payment until 1 January 2012. These types include, without limitation, leasing, insurance, auditing/bookkeeping services, and repair of footwear and leather goods.

Exemptions from customs payments
There are certain customs exemptions offered by the legislation for the following:

- Technological equipment imported by foreign investors as their charter fund contribution.
- Technological equipment imported under projects for creation of new or the modernisation of existing production facilities (with appropriate certificates issued by an authorised bank).
- Property imported for production needs by foreign investors and enterprises with foreign investment with foreign participation in the equity of not less than 33%.

Foreign tax credit
In accordance with international tax treaties of the Republic of Uzbekistan, legal entities/residents of Uzbekistan can obtain a tax credit in respect of CIT paid outside of Uzbekistan. In order to claim tax credit, legal entities should provide a copy of tax payment order, confirmation from a competent tax authority, or any other document confirming payment of the tax outside of Uzbekistan.

Withholding taxes
WHT is to be withheld and remitted to the state budget by entities paying income to non-residents if these entities qualify under a tax agent definition (i.e. by (i) Uzbek legal entities and (ii) non-residents operating in Uzbekistan via PE).

The domestic WHT rates are as follows:
Uzbekistan, Republic of

<table>
<thead>
<tr>
<th>Payment</th>
<th>WHT (%)</th>
</tr>
</thead>
<tbody>
<tr>

<td>6</td>
</tr>
<tr>
<td>Royalties, services (including management, consulting services), rents, other income</td>
<td>20</td>
</tr>
</tbody>
</table>

**Double taxation treaty (DTT) relief**

Foreign legal entities that do not carry on activities in Uzbekistan through a PE are subject to WHT on income from sources in Uzbekistan, subject to the terms of a relevant DTT. Uzbekistan has signed DTTs with 50 countries; 46 of them are in force.

DTTs in force establish WHT rates as follows:

<table>

Notes

1. Where the beneficial shareholder owns no less than 10% of the voting shares.
2. Where the beneficial owner holds at least 10% of the capital of the paying entity.
3. Where royalties are paid for patents, trademarks, know-how, etc.
4. Where royalties are paid for copyrights on literature, cinema, musical works, etc.
5. Where royalties are paid for secret formulas, processes, or know-how.
6. Where royalties are paid for computer software, patents, designs, models, or plans.
7. Where one of the following conditions is met: (a) recipient is a local authority or corporate body constituted under public law, including the central bank of the state, or interest is paid by the local authorities or corporate bodies; (b) interest is paid in respect to debt claims or loans, guaranteed, insured, or aided by the state or on behalf of the state; (c) interest is paid in respect to credit sales of industrial, commercial, scientific equipment of goods and merchandise or provision of services by an enterprise to another enterprise; or (d) interest is paid in respect to a loan of any kind granted by a bank.
8. Where the beneficial shareholder owns no less than 25% of the capital of the paying entity.
9. Where the recipients of the interest are governments of contracting states or any governmental body (such interest is exempt from WHT).
10. Where royalties are paid in respect to uses or the rights to use industrial, commercial, or scientific equipment.
11. Where the beneficial shareholder owns no less than 20% of the voting shares.
12. Where interest is paid in respect to: (a) a loan made, guaranteed, or insured by the government of the other state; (b) the sale on credit of industrial, commercial, or scientific equipment; (c) the sale of merchandise by an enterprise to another enterprise; or (d) a loan of any kind granted by a bank.
13. Where the interest is received by any financial institution (including insurance companies).
14. Where interest is beneficially owned by the other contracting state or local authority or an instrumentality of such other state authority and is not subject to tax by that other state.
15. Where the recipients of the interest are governments of contracting states, National Bank of Hungary, Eximbank Hungary Pte. Ltd., Central Bank of Uzbekistan, or the National Bank of Uzbekistan for foreign economic activity (such interest is exempt from WHT).

Note that there may be other WHT rates offered by protocols to the individual treaties.

**Tax administration**

**Returns**

CIT is reported quarterly before 25th day of the month following the reporting quarter, with an annual return due by 25 March following the reporting year for enterprises with foreign investment and 15 February following the reporting year for other categories of CIT payers. PEs report on CIT once a year prior to 25 March following the reporting year.
Uzbekistan, Republic of

Payment of tax
Uzbek enterprises, including enterprises with foreign investment, are required to make advance instalments of CIT in each quarter based on estimated profits in the quarter. The instalments are payable by the 15th day of each month. Final quarterly payments based on actual profit figures are payable no later than the filing deadline for the quarterly tax returns (which is the 25th day of the month following the period of assessment). In case the final quarterly payment is more than 10% higher than advance instalments made in this quarter, tax authorities have the right to recalculate the advance instalments based on the actual quarterly profit figures and charge late payment interest accordingly.

Final CIT payment should be made no later than the date set as the deadline for annual return submission.

Payment of CIT by PE is made annually within a month after the filing deadline.
**Significant developments**

In 2010, the General Assembly of Venezuela’s Legislative Branch created and amended a variety of legal instruments related to taxation, as detailed below.

**Anti-drugs contribution**

The Organic Drug Law published on 15 September 2010 stipulates that any company employing 50 or more employees must make an annual 1% contribution from their operating profit. Such corporations that are dedicated to the manufacture or import of alcohol beverages, tobacco, or their mixtures are required to make a 2% contribution from their operating profit. Note that under the definitions established by this Law, operating profit can be understood as the result from subtracting the operating expenses from the income profit in accordance with the accepted Venezuelan general accounting principles.

This contribution will be collected by the National Anti-Drug Fund (FONA) within 60 continuous days counted from the end of the fiscal year.

Note that this contribution can be retrieved if the company performs:

- prevention programs and projects intended for the company employees and their family environment
- prevention programs for children and adolescents, or
- programs to fight drug trafficking.

**Science, technology, and innovation contribution**

An amendment to the Law on Science, Technology, and Innovation (LOCTI, by its Spanish acronym), dated 16 December 2010, establishes a mandatory contribution to be paid by companies that obtained, in the previously fiscal year, over 100,000 tax units (TU 100,000) in gross income.

The kind of companies that are required to make this contribution include stock companies, limited liability companies, partnerships, communities, irregular associations, associations, foundations, permanent establishments (PEs), or fixed bases located inside or outside the national territory with current activities in Venezuela.

Contributions established in the LOCTI are as follows:

- Companies engaged in activities related to bingos and casinos, alcoholic drinks, or tobacco must annually contribute 2% of gross income.
- Private companies engaged in hydrocarbon activities, including gaseous hydrocarbons, or mining activities must annually contribute 1% of gross income.
Venezuela

- Companies engaged in other economic activities must annually contribute 0.5% of gross income.
- Companies that perform activities with two different percentages will apply the highest one.

The National Fund for Science, Technology, and Innovation (FONACIT) is the entity responsible for the administration, collection, control, verification, and qualitative and quantitative determination of the contributions.

Although the contribution to FONACIT is mandatory, companies can retrieve these resources provided that, in the third quarter of each year, an annual investment in science, technology, and innovation, containing the projects planned for the next year, is made, in line with priority areas and guidelines established by the national authority.

At present, the National Government has given, informally, the following areas as a priority to which projects should focus on in the annual plan:

- Housing and habitat.
- Dynamics, trends, and challenges for urban development.
- Impact of climate change.
- Energy efficiency.

**Increase in the windfall tax on oil production**

In April 2011, the National Government enacted Decree N° 8.163 that increased the windfall tax on oil prices (see the Other taxes section for more information).

---

**Taxes on corporate income**

Corporations resident in Venezuela are subject to corporate income tax (CIT) on their Venezuelan and foreign-source income, whereas corporations resident abroad with a permanent establishment (PE) in Venezuela are levied CIT on only their Venezuelan and foreign-source income attributable to said PE. Corporations are able to claim any similar taxes paid abroad on foreign source income as a tax credit. Non-resident corporations without a PE are subject to CIT only on Venezuela-source income.

Corporate income is taxed at the following progressive rates based on tax units (see below) (i.e. Tariff 2):

<table>
<thead>
<tr>
<th>Taxable income</th>
<th>Rate (%)</th>
<th>Subtract (TU)</th>
</tr>
</thead>
<tbody>
<tr>

<td>22 140</td>
</tr>
<tr>
<td>3,000</td>
<td>–</td>
<td>34 500</td>
</tr>
</tbody>
</table>

**Tax units (TU)**

The 1994 Income Tax Law reform established the concept of a taxable unit as an element that reduces the negative effects created by inflation on the determination of the tax rates. The tax code established the initial TU at 1 bolívar fuerte (VEF), with annual basis adjustments according to the variation on the consumer price index (CPI) from the previous year. During 2010, the TU was VEF 65. For 2011, it was VEF 76.
Additional rates and considerations

Income for oil exploitation and certain related activities is taxed at a flat rate of 50%. Related activities are comprised of those such as refinery, transportation, and purchases for the exports of hydrocarbons and by-products for the exploitation. Joint venture corporations are also subject to a 50% CIT rate.

The above indicated regime does not apply to corporations engaged in the exploration and exploitation of non-associated gas (and the processing, refining, transportation, distribution, commercialisation, and exportation of the gas and its components) or companies exclusively engaged in the refining of hydrocarbons or improvement of extra heavy oil, which are subject to Tariff 2.

Corporate residence

According to the Venezuelan tax code, the following companies are regarded as resident:

- Companies incorporated in Venezuela and registered with the Mercantile Registry as established by commercial law.
- Foreign companies registered with the Superintendence of Foreign Investments (SIEX) to be resident in Venezuela as branches duly registered with the Mercantile Registry.

The following companies are non-residents but subject to Venezuelan taxes:

- Foreign companies registered with SIEX to provide technical assistance, technological services, royalty items, and professional services from abroad.
- Foreign banks granting loans to local companies.
- Foreign companies leasing goods to local companies.
- Foreign companies deriving income from economic activities carried out in Venezuela or from assets in Venezuela.

Permanent establishment (PE)

According to the Venezuela Income Tax Law (VITL), generally, a passive party is deemed to be carrying out operations in Venezuela through a PE when:

- The passive party owns, directly or through an agent, employee, or representative in the Venezuelan territory:
  - an office, fixed place of business, or an activity centre where its activities are totally or partially carried on
  - management head quarters, branches, offices, factories, shops, facilities, warehouses, stores, construction, installations, or assembling works, when the duration thereof exceeds six months, or
  - agencies or representatives authorised (according to the VITL) to contract in the name of or on behalf of the passive party.
- The passive party performs, directly or through an agent, employee, or representative in the Venezuelan territory, professional, artistic activities.
- The passive party possesses, directly or through an agent, employee, representative, or other contracted personnel in the Venezuelan territory, other work places where the operations are wholly or partially performed.

Any agent acting independently shall be excluded from this definition, except if such representative has the power to conclude contracts in the name of the principal.
**Other taxes**

**Value-added tax (VAT)**
Federal VAT, Impuesto al Valor Agregado (IVA), is a one-time tax payable by the ultimate consumer of all types of products and services. However, each business entity involved in the process from the sale of raw materials to the production and distribution of finished products to the ultimate consumer is required to include the tax on its products to customers (output tax) and to pay the tax on its purchases or imports of goods and services (input tax), crediting the amounts paid against the amounts due on its own activities. The net amount payable by each entity is considered to represent a tax on the value added.

In general, VAT does not represent an additional cost to business enterprises because even though all types of business enterprises, including government departments and agencies (with some exceptions), are required to accept charges of the tax by suppliers on their purchases of goods and services, such amounts are normally deductible from the liability of the business enterprises for the tax on their bills to customers.

There are exceptions, principally when the sales of an enterprise are exempt from VAT, in which case the enterprise is treated as the final consumer and must absorb any VAT charges on its purchases except insofar as its activities are subject to the zero rate (see below). However, input tax paid on goods or services used to produce items that are exempt from VAT may be deducted for CIT purposes.

**Taxable transactions**
In general, VAT is payable on all sales, rental, and importation of goods, and rendering of services executed or used in the country, although a number of significant exceptions are provided by law.

**Sales of goods**
The law defines a sale as any transmission of tangible goods, including those made on a conditional basis or through an irrevocable trust. The taxable amount of a sale includes the sale price as well as other amounts charged to the purchaser for other taxes, duties, interest, or surcharges of whatever nature. VAT becomes payable when the goods are invoiced or shipped to the customers or when the price is paid in full or in part.

Exempt sales include the following:

- Certain foods and other products for human consumption.
- Fertilisers as well as any natural gas used in the manufacturing thereof.
- Some products for animal consumption.
- Medicine.
- Products derived from hydrocarbons and some raw materials intended to improve the quality of gasoline.
- Wheelchairs.
- Books, magazines, newspapers, and the paper used in producing these products.
- Vehicles, aircraft, and trains for passenger transport.
- Machinery and equipment for agribusiness.
- Scientific equipment purchased by the government.

**Services**
Taxable services are those rendered within Venezuela by one person to another on an independent basis, transportation of passengers or goods, agency activities, technical assistance, and transfer of technology. VAT is payable to service providers at the
time the invoice is issued, the service is rendered, or the fee becomes demandable, whichever comes first. The taxable amount includes not only the price of services, but also charges to the customers for other taxes, interest, etc.

Exempt services include the following:

- Domestic land and maritime transportation of passengers.
- Educational services.
- Accommodations for students and persons with disabilities.
- Healthcare and dental services, surgery, and hospitalisation.
- Theatres, sports, and cultural events.
- Food services for employees and students.
- Certain utilities (e.g. electricity, water).
- Housecleaning.
- Transport services for hydrocarbon-derived fuels.
- Services involving livestock, poultry, and other minor species including breeding and production.

Exports
Exports are zero-rated. Consequently, VAT is not payable on exports, including exports of in-bond processing companies, technical fees to foreign residents, and sales to in-bond processing companies and companies that export their entire production. Sale of natural hydrocarbon by joint ventures regulated by the Hydrocarbon Law to Petroleos de Venezuela S.A. (PDVSA) and affiliated companies are also taxable at 0%. Though exporters do not collect VAT on export sales, they may recover VAT charges on their purchases of goods and services by means of a refund certificate. This certificate may be used to pay other tax obligations. If such exporters carry out sales in the country, they will be entitled to recover only input VAT related to foreign sales.

Additionally, a zero rate applies to independent personal services provided by residents in Venezuela that are used solely by and for the benefit of persons abroad without a PE or fixed base in Venezuela.

Tax rates
The rate may change every year, within the range of 8% to 16.5%. Currently the general VAT rate is 12%.

An additional tax rate of 10% is applicable to the sale and imports of luxury products (e.g. vehicles valued at more than USD 30,000, motorcycles with a cylinder capacity of 500 cc, nickel or token game machines, aircraft used for recreational or sport purposes, fighting bulls, trained horses, caviar, jewellery with precious stones valued at a price exceeding USD 500).

An 8% VAT applies to the following transactions:

- Goats, sheep, and minor species for slaughter or breeding.
- Meats in their natural state, or refrigerated, frozen, or salted meats, or meats in brine of goats, sheep, and poultry.
- Shortening.
- Rendering of professional services to any government entity, in any level or branch of government, provided such services do not involve any commercial transactions but rather predominantly intellectual work or efforts.
- Domestic air passenger transportation.
Venezuela

Payment and collection
Excess VAT charged or chargeable to customers over VAT paid to vendors or customs authorities — Servicio Nacional Integrado de Administración, Aduanera y Tributaria (SENIAT) — including the correspondent payment, must be remitted to SENIAT within the first 15 days of the following month.

VAT exoneration
Among the fiscal policy measures applicable pursuant to the conjuncture, sector, and regional situation of the country’s economy, the National Executive is entitled to exonerate the import and sales of goods and the rendering of services set forth in the respective decree from the payment of VAT.

Refunds/special regime for industrial projects
The VAT law stipulates a special regime for taxpayers engaged in the execution of industrial projects, whose duration exceeds six taxable periods. Pursuant to this regime, taxpayers will be able to suspend the use of input VAT generated during their operating stage, until such time as they begin generating fiscal output VAT.

Taxpayers engaged in the execution of industrial projects aimed at exporting or generating foreign currency may (with prior consent of the tax authorities), choose to recover the tax supported in construction operations involving the project, provided that they are carried out during the pre-operating stage of such project.

Input VAT subject to recovery must be determined after computing output VAT. In other words, input VAT originated from purchases of goods and reception of services is not subject to recovery if output VAT was not subtracted.

VAT withholding regimes
Taxpayers qualified by the tax administration as special taxpayers and public entities are designated as liable parties in their capacity as withholding agents in regard to payment of the VAT generated in their purchase of tangible goods or services received by providers that are regular taxpayers for VAT purposes.

The amount to be withheld on the part of the agents will be equal to multiplying the invoiced price of the taxed goods or services by 75% of the tax rate, except for those cases in which the VAT does not appear separately from the price, when the respective invoice does not comply with the formalities or requirements set forth in the tax law, or when the supplier is not registered for tax purposes. In these latter cases, 100% of the generated tax is to be withheld.

Suppliers may discount the VAT withheld from the tax liability determined for the period in which the VAT was withheld, provided that they have the receipt issued by the withholding agent. In those cases in which the tax withheld from the taxpayer exceeds the taxpayer’s VAT liability corresponding to the relevant tax period, such taxpayer may discount the tax withheld from VAT liability corresponding to the following tax periods until their total exhaustion.

Municipal business licence tax
Companies and business entities, as well as individuals and unincorporated companies, are subject to municipal tax on gross income from industrial or trade activities carried on in the municipality during the fiscal year. The rates range from 0.1% to 10.0%, depending on the activity and the municipality.
**Urban Property Tax**
The Urban Property Tax is a local or municipal tax payable by any person who owns property rights or any other real rights on urban real estates. The taxable basis is the value of the urban real estate. For these purposes, the fair market value of the real estate is provided as a point of reference. The applicable rate varies according to each municipality.

**Other municipal taxes**
Municipalities also tax vehicles, public entertainment, legal bets, and commercial advertisements. There also are various municipal tariffs and fees.

**Excise taxes**
**Tax on alcohol and alcoholic beverages**
In general terms, the manufacture, commercialisation, and importation of alcohol and alcoholic beverages are subject to excise taxes. The Law of Tax on Alcohol and Alcoholic Beverages provides for three main types of excise taxes:

- Tax on the national production and importation of alcohol and alcoholic beverages, which is established on the basis of TU per litre and varies depending on the type of product.
- Additional excise tax per litre for national and imported beer and for other alcoholic beverages is levied on the sale of those products to the public, which is also provided on the basis of TU per litre, depending on the type of product.
- In addition to the above, another excise tax is imposed on the importation or local sale of national and imported alcoholic beverages to the public, which is levied on the sales price, which is provided on the basis of a percentage on the price of sale to the public and varies depending on the type of product.

**Tax on cigarettes and manufacturing of tobacco**
The importation and national production of cigarettes and tobacco to be consumed in Venezuela is subject to an excise tax. This proportional tax is levied at a rate of 70% on the retail price of cigarettes, tobacco, and its derivates.

**Customs duties**
As a general rule, the importation of goods into Venezuela is subject to customs duties. These duties are generally levied on the cost, insurance, and freight (CIF) value of the product being imported, excluding VAT.

Custom duty rates generally range from 5% to 35%. The duty rates vary depending on the product involved. In general, import tariffs are 5% for capital goods, 10 to 15% for raw materials and intermediate goods, and 15 to 35% for finished products. In addition, all imports are subject to customs handling charge, a duty import, and VAT.

**Gift tax**
Overall, the Inheritance and Donations Tax Law, published on 1999, stipulates the taxes attributable to inheritances left by individuals. Nonetheless, this Law provides regulation about donations, which are significant to corporations. Subject to payment of the gift tax are the beneficiaries of gifts in the form of movable or real property, rights, or shares located in the country.

For tax calculation purposes, the progressive tax rate (up to 55%) set forth in the Law will be applied to the donated good. Both donors and donees are jointly liable for the tax generated from the gift.
The gift tax is applicable from the time in which the donors manifest before the National Treasury their will to donate and must be paid before the registration of any document formalizing or evidencing the authenticity of the gift. Should the donation not be perfected due to express will of the donor or rejection on the part of the donee, the obligation to pay the tax will be eliminated and reimbursement may be requested of the amounts paid in this connection.

Under the transfer pricing rules contained in the Venezuelan Income Tax Law, the tax authorities are empowered to impute income in inter-company transactions at a price reflecting the fair market value of the property being transferred.

Before the introduction of transfer pricing rules, under the Inheritance and Donations Tax Law, the tax authorities could and still can presume in transactions involving a sale, assignment, barter, or transfer, the existence of a donation if, for instance, the price stipulated in such transaction does not reflect the real value of the property being transacted. In such a case, a gift tax may be imposed on the difference between the fair market value of the property being transacted and the consideration received in return.

Also, a cancellation of a debt gives rise to gift tax issues. In this regard, the Inheritance and Donations Tax Law provides that the total or partial forgiveness or cancellation of a loan must be viewed as a gift and, as such, subject to gift tax.

Increase of the windfall tax on oil production
Decree N° 8.163, dated 18 April 2011, provides for the increase of the windfall tax on oil companies. The aforesaid Decree abrogates the regulations on the tax published on April 2008. According to the enacted Decree, the tax is provided in the following terms:

- The contribution on extraordinary oil prices is a 20% tax on the difference in price when the internationally quoted price per barrel exceeds the budgeted price per barrel (for purposes of the Venezuelan Annual Budget Law), provided that the quoted price per barrel is equivalent or lower than USD 70 per barrel (i.e. the maximum basis is the difference between USD 70 per barrel and the current budgeted price of USD 40).
- The contribution on exorbitant oil prices is comprised of the following:
  - 80% tax on income generated by quoted oil prices between USD 70 and USD 90 per barrel (i.e. 80% on the range from USD 70 to USD 90 quoted price per barrel).
  - 90% tax on the difference in the quoted oil prices between USD 90 and USD 100 per barrel.
  - 95% tax on the difference over the threshold of USD 100 per barrel.

The tax is payable by oil companies exporting with sale purposes. Also, the Decree provided that the mixed companies (empresas mixtas) created in accordance with the Master Hydrocarbons Law that sell oil and by-products to the state-owned company (PDVSA), or any of its affiliates, are also obliged to pay the above described tax.

On the other hand, tax exemption is provided for the following cases:

- For mixed companies working on the execution of projects on the development of new oil fields and those projects aimed at boosting oil production as declared by the Ministry of the Popular Power for Oil and Energy, until they have recovered their total investment. Parameters to determine the recovery of investment are to be separately established by the aforesaid Ministry by Resolution.
- Exports executed in connection with cooperation or financing international agreements.
Exonerations may be granted by the National Executive Power for exports executed under economic or international cooperation measures.

The tax is payable on a monthly basis in foreign currency. Other terms of payments are to be regulated by Resolution.

The Decree also establishes USD 70 per barrel as the maximum price to be used as calculation basis for the payment of royalties, extraction tax, and export registration tax provided for in the Master Hydrocarbons Law.

**Hydrocarbons Organic Law**

The state is entitled to 30% of the volume of hydrocarbons extracted from any deposit, by way of royalties. The National Executive can reduce this within certain limits, when it is shown that certain types of deposits are not economically exploitable.

Persons conducting activities related to hydrocarbons must pay the following taxes:

**Surface tax**

For the portion of the surface area granted that is not under development, the equivalent of 100 TU for each square kilometre or portion of a square kilometre for every elapsed year is due as a surface tax. This tax will increase annually by 2% during the first five years and 5% during the following years.

**Tax on own consumption**

10% of the value of each cubic metre of hydrocarbon byproducts produced and consumed as fuel in wholly-owned operations, based on the price of the end consumer, is due as a tax. In the case that said product fails to be sold in a domestic market, the Ministry of Energy and Mines shall provide the price.

**General consumption tax**

For every litre of hydrocarbon byproducts sold in the domestic market, a tax is due at the rate of between 30% and 50% of the price paid by the end consumer, whose aliquot should be implemented annually between the two extremes under the Budget Law. This levy to be paid by the end consumer should be withheld at the supply source, to be handed over to the National Treasury on a monthly basis.

The National Executive may waive, in whole or in part, by the time specified, the general consumption tax, in order to encourage certain activities of public or general interest. The National Executive can also reinstate this levy to its original level when the causes for the waiver cease to exist.

**Gaseous Hydrocarbons Organic Law**

The Gaseous Hydrocarbons Organic Law establishes a system of royalties, determinable by the volumes of gaseous hydrocarbons extracted from any deposit and not re-injected. The state is also entitled to a 20% share for this item.

The exploitation companies of gaseous hydrocarbons shall pay for the gaseous hydrocarbons consumed like fuel, the taxes settle down on the matter by applicable laws.

**Stamp duties**

The Stamp Duties Law establishes a number of stamp duties on the issuance of official documents (e.g. certificates, permits, authorization, registrations). Stamp duties may
be levied at fixed amounts (ranging from TU 0.01 to TU 10,000) or at a rate based on the value of the transaction or work in question.

Public registry tax
Commercial companies are registered with the Mercantile Registry Office and are subject to a tax levied upon incorporation of a company and registration of capital increases. The tax is 1% of the amounts of subscribed or increased capital.

The sale of a going concern is also registered in the Mercantile Registry Office and is subject to a tax levied upon the total amount of the sell. The tax is 2% of the amount.

District Capital stamp tax
On December 2010, a new District Capital Stamp Law was published. Under their own interpretation of the Law, Mercantile Registries of the District Capital are charging 10% of the amount of subscribed or increased capital of companies and 20% for the sale of a going concern.

Payroll taxes and other contributions

Notes
1. As of 1 May 2011, the minimum monthly metropolitan salary amount was increased to VEF 1, 407.47. As of 1 September 2011, it will be increased to VEF 1,548.21.
2. According to the current system, the employer’s contribution to social security will depend on the company's risk qualification (minimum risk, middle risk, or maximum risk).
3. Regarding Instituto Nacional de Capacitación y Educación Socialista (INCES) contribution, the employer must contribute 2% of the total wages and salaries paid to employees.
4. Employers are also required to withhold 0.5% of the annual profit-sharing bonus paid to employees.
5. According to the Ley Orgánica del Sistema de Seguridad Social (LOSSS), the general rule for contribution basis for the new systems may not exceed ten minimum salaries. The transition rules establish a contribution basis of five metropolitan minimum salaries for urban workers for social
security purposes. No cap is expressly established in the transition rules for the housing system and work, security, and health regime.

6. Contributions to be made to this regime are exclusively for the employer and vary depending on the risk associated to the company. A company’s risk is to be determined by the Instituto Nacional de Prevención, Salud y Seguridad Laborales (INPSASEL). To date, INPSASEL has not been created and employers will continue making their contributions to the Venezuela Social Security Institute.

7. Ley Orgánica de Prevención, Condiciones y Medio Ambiente de Trabajo (LOPCYMAT) regulations do not establish a cap for the contribution. However, as mentioned, the LOSSS establishes a maximum of the minimum urban salaries. For this reason, there are several contrary interpretations on whether a cap should be applied in this case.

3. 2% in the case of companies that manufacture or import alcohol beverages or tobacco. 1% for all other companies.

Branch income

Branches of foreign corporations are subject to the same tax rules as Venezuelan corporations. Inter-branch income and deductions must be eliminated. The positive difference between a branch's annual book and taxable income is deemed to be remitted to the branch’s head office (branch profits tax). Such remittances are subject to the 34% flat dividend tax (see Dividend tax in the Income determination section for more information) regardless of whether there is an actual payment unless the branch can provide proof of reinvestment of its profits for a five-year period. If such proof is established, no deemed remittance is assumed.

A Venezuelan taxpayer has to recognize, annually on an accrual basis, income generated in a company or other legal entity it controls which is located in a jurisdiction with low fiscal taxation (JLFT). Further, investments in JLFT must be declared to the SENIAT.

Income determination

Inventory valuation

Inventories may be valued at cost or the lower of cost or market value. Any method generally accepted for accounting purposes can be accepted for tax purposes.

Capital gains

Capital gains are taxable as ordinary income, and capital losses are deductible from ordinary income. Note that capital losses resulting from the sale of stock, capital reduction, or liquidation of a company are only deductible if they meet one of the following conditions:

- The cost of the capital stock was not in excess of the price quoted on a stock exchange or an amount with a reasonable relationship to the book value of the capital stock.
Venezuela

- The holding period of the investment was for at least two years immediately preceding the date of the sale.
- The stockholder proves that the company selling the shares carried on economic activities for at least two years, preceding the date of sale.

At present, the tax law contains two different rulings relevant to the deductibility of losses incurred through operations on the Venezuelan Stock Market, one of which has been described above. The second ruling pertains to income obtained from operations on the local market. This income is subject to a final 1% tax that is withheld at the source. Losses in this kind of operation are not deductible against other income. Corporate shareholders not domiciled in Venezuela may not deduct such losses from other taxable income other than dividends arising from Venezuelan sources.

Gains upon liquidation or reduction of capital are taxable to the liquidating entity.

**Dividend income**

A dividend tax is levied at a flat rate of 34% on the positive difference between book income and tax income generated after 2000. Book income is understood to be that approved at a shareholders’ meeting and based on the financial statements prepared pursuant to generally accepted accounting principles. To determine the applicable difference, a last in first out (LIFO) method applies. The tax is triggered when dividend is paid and shall be remitted via withholding. Withholding is to be made at the moment a dividend is declared or credited to the account a recipient. The 34% (domestic) rate can be mitigated under tax treaties.

Dividends obtained from companies incorporated or resident abroad or incorporated abroad and resident in Venezuela are taxed at a flat 34% rate.

**Stock dividends**

Dividends of stock are subject to payment of the aforementioned dividend tax. Moreover, stock dividends are subject to an advanced payment of dividend tax equivalent to 1% of the dividend distributed. Stock dividends have no cost for tax purposes.

**Foreign income**

Extraterritorial income is subject to Venezuelan CIT based on the concept of worldwide income taxation, according to which:

- Resident companies must pay a tax on total income whether from national or foreign source.
- Non-resident companies with PE in Venezuela will pay tax on their income, whether of national or foreign source, attributable to the Venezuelan PE.
- Non-resident companies will pay taxes on their income originated or caused in Venezuela.
- Resident companies as well as non-resident companies with PE in Venezuela may credit the tax paid abroad for earnings of an extraterritorial source against the income tax payable in Venezuela, subject to limitations.
- In general terms, taxation of foreign-source income is ruled by domestic provisions on taxation of territorial-source income. Foreign source dividends are taxable when dividends are received. However, in case of investments located in JLFT, anti-deferral rules in the international fiscal transparency regime apply (see below).
Foreign technical assistance and services
Taxable income of foreign taxpayers providing technical assistance or technological services from abroad to individuals or entities that use them in Venezuela or assign them to third parties is presumed to be 30% of gross income for technical assistance fees and 50% of gross income for technological service fees. If the contract does not specify the proportion in which the services are rendered, the law provides that 60% of the technical assistance and technological service fees are deemed to be rendered abroad (i.e. foreign-source), with the other 40% deemed to rendered in Venezuela. The law also provides that 75% of the entire income related to technological services and 25% of that related to technological assistance is rendered abroad if not otherwise specified in the contract. See the Withholding taxes section for more information.

International fiscal transparency regime
A regime of international fiscal transparency is created for the purpose of establishing special standards of fiscal control, governing capital investments in countries classified as JLFT, or tax havens. Under certain conditions, a Venezuelan taxpayer may be required to recognize income generated in its JLFT subsidiary on an accrual basis in its tax return.

Inflation adjustment
A system for the adjustment of non-monetary assets, non-monetary liabilities, and shareholder’s equity has been established. ‘Non-monetary assets’ include land, construction, machinery, vehicles, installations, inventories, and investments other than in securities (e.g. bonds and stocks).

There are two phases to the adjustments: (i) initial adjustments and (ii) annual adjustments. Both phases are mandatory adjustments for taxpayers engaged in commercial, industrial, financial, and insurance operations, and in the exploitation of mines and hydrocarbons. The annual adjustment is optional for taxpayers performing non-business activities.

Initial adjustment
The initial adjustment on depreciable fixed assets requires a registration tax of 3% on the amount of the adjustment.

The initial adjustment must be filed at the closing date of any fiscal year ending after 1 January 1993. This adjustment is applicable to all non-monetary assets and non-monetary liabilities.

The initial adjustment is calculated by applying the variations between the CPI of the Caracas Metropolitan Area prevailing in the month in which the non-monetary assets were acquired and the month corresponding to the initial adjustment. Assets acquired before 1950 are deemed to have been acquired in January 1950.

A registry tax of 3% is applied exclusively to the initial revaluation adjustment of depreciable fixed assets. For payment, taxpayers must be registered with the Asset Revaluation Registry, maintained by the tax administration. The resulting tax may be paid in three consecutive annual instalments, beginning on the date of registration.

Companies in the pre-operating stage, deemed to end with the first invoice, must determine and pay a 3% tax once the pre-operating period has ended.

Depreciation or amortisation on the revaluation adjustment is allowed, based on the original estimated life of the asset.
**Annual adjustment**
The annual adjustment is applied each year in determining taxable income. The adjustment factor must be applied to the following balance sheet items at the closing date of the fiscal year. The resulting adjustment will increase or decrease taxable income.

<table>

</tr>
</tbody>
</table>

**Notes**

1. Tax initial equity is defined as the difference between assets and liabilities at the beginning of the tax year, less accounts receivable from administrators, affiliated, and related companies. In order to determine the initial tax equity, assets not located in the country as well as goods, debts, and liabilities entirely applied to the production of deemed, exempt, or exonerated income are excluded.
2. Inventories are to be valued at historical cost for purposes of applying the CPI. The provisions of the income tax law detail the procedures for applying the CPI. The revaluation of inventories in the tax year is included as part of the initial inventories of the following year.
3. The annual revaluation adjustment of fixed assets is considered part of the cost when the assets are sold.

Net losses arising from the annual adjustment that have not been offset may be carried forward only to the next tax period (one year).

Gains or losses originating from the adjustment of accounts receivable or investments, as well as debts and liabilities in foreign currency or with a re-adjustability clause, are deemed to be carried out during the fiscal year in which they become demandable, collected, or paid, whichever comes first.

**Depreciation**
Depreciation is generally computed on a straight-line basis although any other generally accepted method for accounting purposes is also accepted. Depreciation is not allowed on real estate used as rental property. Depreciation on the stepped-up portion of assets revalued by any method other than the inflation adjustments (see the Income determination section) is not permitted. In principle, useful lives of assets shall be consistent with the parameters used in accordance with accounting principles.
Charitable contributions
Deductions for allowable charitable contributions are limited to 10% of taxable income (before deducting contributions) when taxable income does not exceed TU 10,000. When taxable income exceeds TU 10,000, charitable contributions are limited to 8% of taxable income. For oil extraction companies, the deduction is limited to 1% of the pre-contribution tax amount.

Taxes
Municipal, state, and local taxes are deductible in determining taxable income. Corporate taxes are not deductible.

Other significant items
Payments required by the labour law, such as profit sharing (generally between 15 days and four months’ salary) and severance indemnity accruals are also deductible. In cases of unjustified dismissals, double severance indemnities must be paid. However, accruals for such additional indemnities are generally not deductible until paid.

Net operating losses
Losses may be carried forward for three years. Losses may not be carried back. Note that losses from inflation adjustments may be carried forward only one year.

Foreign losses may be offset only against foreign profits.

Payments to foreign affiliates
A Venezuelan corporation may claim a deduction for royalties and technical assistance and for technical service fees paid to foreign affiliates, subject to the following conditions:

- The contract is registered within 60 days of execution with the Superintendence of Foreign Investments (SIEX).
- Income tax payable by the recipient is withheld at the source.
- Transfer pricing requirements are met.
- In the case of technical assistance and technological services fees, the expenses may be deducted if such services cannot be otherwise provided in Venezuela.

Foreign companies domiciled in Venezuela are allowed to deduct royalties paid to parent companies or foreign affiliates. Companies must notify the SIEX of payments made within 60 days (see the Withholding taxes section for more information). Branches of foreign companies, however, may not deduct such payments to head offices or related parties.

Group taxation
Group taxation is no longer possible in Venezuela.

Transfer pricing
Taxpayers that carry out operations with related parties abroad must calculate their income, costs, and deductions by applying a defined methodology of transfer pricing. This regime is applicable to imports, exports, and interest paid to recipients abroad as well as technical assistance, technological services, and royalty fees.
Thin capitalisation
With the amendment of the 2007 income tax law, Venezuela introduced thin capitalisation rules that limit the deduction of interest from debt with related parties in excess of a 1:1 debt-to-equity ratio. Under these rules, if the average of a taxpayer’s debt (with related and unrelated parties) exceeds the average amount of its equity for the respective fiscal year, the excess debt is treated as equity for income tax purposes. Consequently, the ability to deduct interest on related-party loans may be affected.

Tax credits and incentives

Capital investment
A special 10% investment tax credit is granted on the value of new investments in fixed assets (excluding land) made by those legal entities obtaining income from industrial and agro-industrial activities, construction, electricity, telecommunications, science, technology, and generally any industrial activity that represents an investment in advanced technology. This tax credit may be taken if such new investments are dedicated to effectively improving the productive capacity or creating a new enterprise.

The tourist sector is entitled to a 75% investment tax credit on the amount of new investments. The agricultural sector enjoys an 80% investment tax credit.

An additional 10% tax credit is granted on the amount of investments in assets, programmes, and activities aimed at the preservation and protection of the natural environment.

Investment tax reductions may be carried forward up to three years.

Other incentives
Customs duty incentives are also available, such as drawbacks on the import of materials used for exporting products. This may take the form of a tax refund certificate issued by the Ministry of Finance. The certificate is a negotiable bond and will be accepted by the Treasury Funds Office for payment of national taxes. Determination of the amount of the refund will take into account the import duties effectively paid at the time the materials used in the manufacture of the exported product were received in Venezuela.

Foreign tax credit
Foreign income tax paid on taxable foreign income may be offset by the payable Venezuelan tax up to the proportion of Venezuelan payable tax related to foreign-source income. Taxpayers must keep documentation of foreign tax. No carryforward rules are provided for in domestic regulations.

Withholding taxes
Resident corporations making certain types of payments must withhold taxes. T2 refers to Tariff 2. These include the following:

<table>

<td>N/A</td>
</tr>
</tbody>
</table>

**Notes**

1. Withholding taxes (WHT) constitute prepayments against final tax liabilities as determined by the income tax return when filed.
2. Includes commissions earned in instances other than through a dependent relationship (e.g., employer/employee). Commissions are subject to withholdings in the same manner as salaries and wages.
3. The rates for non-residents are similar to those rates applicable for payments to a non-domiciled corporation not resident in a treaty country and rendering services from abroad with no PE in Venezuela.
4. Excludes payments exempted under international shipping agreements.

### Tax treaties

There are currently comprehensive treaties for the avoidance of double taxation with the following countries:

Notes
1. Capital gains on shares of real estate companies are not subject to taxation in Venezuela.
2. Capital gains on shares of real estate companies are not subject to taxation in Venezuela provided that real estate is incorporated to the generation of income.

The treaties with Brazil, Mexico, and Vietnam have been published in the Official Gazette and signed by the contracting parties but have not entered into force since diplomatic notes have not been exchanged.

Treaties with other countries outside the countries listed above are being negotiated.

**Tax administration**

**Returns**
Final tax returns must be filed within three months following the end of the tax year. The system is one of self-assessment.

**Payment of tax**
The total amount of tax due must be paid at the time of filing the annual return. Estimated tax payments must be paid consecutively in six monthly instalments. Companies engaged in mining, hydrocarbon exploitation, and related activities must make 12 equal monthly estimated tax payments.

**Corporate tax calculation**

**Other issues**

**Exchange control**
In January 2003, the Venezuelan government and the Venezuelan Central Bank restricted the free trade of foreign currency and established an Exchange Control Regime, which is characterised by the following aspects:
Venezuela

- The Venezuelan Central Bank (VCB) centralises the purchase and sales of foreign currency.
- All foreign currency derived from the export of goods, services, and technology must be sold to the VCB, through the financial system and at the official exchange rate. Exporters are to be registered with the Users Registry and are to consign certain documentation certifying good fiscal status. Likewise, the sale of every foreign currency, introduced in the country for various concepts, including direct foreign investment, to the VCB is mandatory. In such case, said foreign currency is to be registered with the SIEX for re-exportation and remittance purposes. The acquisition of foreign currency for imports is also subject to application for 'Foreign Currency Authorisation', which is subject to certain conditions.
- As of 14 June 2010, a new mechanism was put in place which regulates the purchase of securities denominated in foreign currency through the System of Transactions with Securities stated in Foreign Currency (SITME by its Spanish acronym) which is regulated and controlled by the Venezuelan Central Bank. The aforesaid mechanism is limited to certain transactions, and companies are allowed to purchase until USD 350,000 per month, this is, USD 4,200,000 per year.

The Law on Foreign Exchange Crimes is in effect, thereby establishing the actions that constitute exchange crimes and their respective penalties. Said penalties may be both criminal and pecuniary.

**Significant developments**

At the beginning of 2011, the Ministry of Finance issued a new circular partly amending the corporate income tax (CIT) regulations. The new circular provides the following new guidance:

- Costs of damaged goods due to expiration or natural spoilage are tax deductible, subject to satisfaction of stipulated conditions.
- The condition that bonuses be of a ‘salary nature’ for tax deductibility has been abolished. The condition remains that bonuses and the entitlement criteria must be set out in employment contracts, collective labour agreements, or internal policies.
- The tax deductible cap applicable to clothing benefits (cash and/or non-cash) increased from 1.5 million Vietnamese dong (VND) to VND 5 million.
- A tax deduction is allowed for year-end salary accruals of not more than 17% of the actual salary costs of the year, provided that the company is not in a loss position.
- Refunds of import duty or export duty (ID/ED) related to the current year should be offset against deductible expenses. A refund of ID/ED paid in previous years shall be treated as other income. However, if the ID/ED relates directly to incentivised activities, the refund should be included in the profits eligible for such incentives.
- Tax losses incurred in a quarter are now allowed to be carried forward to the following quarters of the same tax year for CIT provisional payment purposes.

---

**Taxes on corporate income**

**Standard rates**

All taxes are imposed at the national level. There are no local, state, or provincial taxes. The standard CIT rate is 25%. Enterprises operating in the oil and gas industry will be subject to CIT rates ranging from 32% to 50%, depending on each project.

There is no concept of tax residency for CIT. Business organisations established under the laws of Vietnam are subject to CIT and taxed on worldwide income. 25% CIT shall be applicable to foreign income. There are no provisions for tax incentives for such income.

Foreign organisations/individuals carrying out business in Vietnam without setting up a legal entity in Vietnam and/or having Vietnam-sourced income are considered foreign contractors, irrespective of whether the services are performed inside or outside Vietnam. Payments to foreign contractors are subject to foreign contractor withholding tax (FCWIT), which consists of VAT and CIT elements. See the Withholding taxes section for more information.
Vietnam

**Preferential rates**
Preferential CIT rates of 10% and 20% are available where certain criteria are met. See the Tax credits and incentives section for more information.

**Calculation of taxable profits**
Taxable profit is the difference between total revenue, whether domestic or foreign sourced, and deductible expenses, plus other assessable income.

Taxpayers are required to prepare an annual CIT return which includes a section for making adjustments between accounting profits and taxable profits.

**Corporate residence**
There is no concept of tax residency for CIT. Enterprises established under the law of Vietnam are subject to CIT in Vietnam. In addition, Vietnam has a broadly worded permanent establishment (PE) definition.

**Permanent establishment (PE)**
In Vietnam, a PE is defined as “a fixed place of business through which a foreign enterprise carries out part or the whole of its business or production activities in Vietnam and earns income. The permanent establishment of a foreign enterprise shall include:

- A branch, an operating office, a factory, a workshop, means of transportation, a mine, an oil and gas field, any place relating to the exploitation of natural resources in Vietnam.
- A building site; a construction, installation, or assembly project.
- An establishment providing services including consultancy services through its employees or other persons.
- An agent for a foreign enterprise.
- A representative in Vietnam where [one] has authority to sign contracts under the name of the foreign enterprise, or where [one] does not have authority to sign contracts under the name of the foreign enterprise but regularly delivers goods or provides services in Vietnam.”

Foreign enterprises with their PEs in Vietnam shall pay tax on the taxable income earned in Vietnam (irrespective of whether it relates to the PE) and on the taxable income generated out of Vietnam and related to operations of the PEs.

Where a treaty on avoidance of double taxation to which Vietnam is a signatory contains different provisions relating to PE, such treaty shall apply.

**Other taxes**

**Value-added tax (VAT)**
VAT is applied to goods and services used for production, trading, and consumption in Vietnam (including goods and services purchased from abroad), with certain exemptions. Depending on the category of goods or services, the VAT rates are as follows:

- A 0% rate applies to exported goods, including goods sold to enterprises without PEs in Vietnam (including companies in non-tariff zones), goods processed for export,
goods sold to duty free shops, exported services, construction and installation carried out abroad or for export processing enterprises, aviation, marine, and international transportation services.

- A 5% rate applies generally to areas of the economy concerned with the provision of essential goods and services. This includes clean water, fertiliser production, teaching aids, books, foodstuffs, medicine and medical equipment, husbandry feed, various agricultural products and services, technical/scientific services, rubber latex, sugar and its by-products.
- The 10% ‘standard’ rate applies to activities not specified as exempt or subject to the 0% or 5% rate.

When a supply cannot be readily classified based on the tax tariff, VAT must be calculated based on the highest rate applicable for the particular range of goods which the business supplies.

Taxpayers must file monthly VAT returns and remit the VAT payable no later than the 20th day of the following month.

**Special sales tax (SST)**

SST is a form of excise tax that applies to selected goods and services, such as alcohol, imported automobiles having less than 24 seats, motorcycles, airplanes, boats, petroleum, air-conditioners up to 90,000 British thermal units (BTU), cigarettes, playing cards, discos, massages, karaoke, casinos, gambling, golf clubs, and entertainment with betting and lotteries. For goods, SST is charged at the production or importation stage.

The SST rates are as follows:

<table>
<thead>
<tr>
<th>Products / services</th>
<th>SST rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Cigar/cigarette</td>
<td>65</td>
</tr>
<tr>

**Production royalties**

Production royalties in the form of a natural resource tax (NRT) are payable in industries exploiting natural resources such as oil and gas, other minerals, forests,
Vietnam

fisheries, and natural water. The tax rates vary depending on the natural resource being exploited, ranging from 1% to 40%, and are applied to the production output at a specified taxable value per unit. Various methods are available for the calculation of the taxable value of the resources, including cases where the commercial value of the resources cannot be determined.

**Property taxes**
The rental of land use rights by foreign investors (if not contributed as capital) is, in effect, a form of property tax. It is usually known as land rental, and the range of rates is wide depending upon the location, infrastructure, and the industrial sector in which the business is operating.

**Customs duties**
Import duty rates are classified into three categories: ordinary rates, preferential rates, and special preferential rates.

Preferential rates are applicable to imported goods from countries that have most-favoured-nation status with Vietnam (MFN, also known as normal trade relations). The MFN rates are in accordance with Vietnam’s World Trade Organization (WTO) commitments and are applicable to goods imported from other member countries of the WTO.

Special preferential rates are applicable to imported goods from countries that have a special preferential trade agreement with Vietnam.

Import duty exemptions are provided for encouraged projects and goods imported in certain circumstances.

Export duties are charged only on a few items, basically certain natural resources. Rates range from 0% to 30%.

**Branch income**
Branches of foreign entities are subject to the same CIT regime as entities incorporated in Vietnam.

**Income determination**

**Inventory valuation**
At present there are no provisions for valuing inventories or determining inventory flows. The tax treatment follows the accounting treatment.

**Asset revaluation**
Gains from the revaluation of assets for the purposes of capital contribution or transfer upon division, demerger, consolidation, merger, or conversion of business are subject to 25% CIT.

**Capital gains**
Gains made by a foreign investor on the transfer of an interest (as opposed to shares) in a limited liability company are subject to 25% CIT. The assignee is required to withhold the tax due from the payment to the assignor, and account for this to the tax authorities.
Gains earned by a foreign investor from selling securities (i.e. bonds, shares of public joint-stock companies, irrespective of whether they are listed or non-listed) are subject to CIT at a deemed rate of 0.1% of the sales proceeds. 25% CIT will apply to any gains earned by a foreign company (not incorporated in Vietnam) upon a sale of shares in a non-public joint-stock company.

**Dividend income**
Dividends received from investments in other companies in Vietnam are from after tax profits and are not subject to CIT.

**Other income subject to CIT**
The following other income items are subject to 25% CIT and are not entitled to tax incentives (including preferential tax rate and exemption/reduction):

- Income from transfer of real estate.
- Income from royalty, leasing of assets.
- Income from transfer of assets.
- Interest income.
- Income from trading of foreign currency.
- Reversal of provisions.
- Collected written off debts.
- Unidentified payables.
- Difference between penalties and compensation for breaching economic contracts.
- Gain from the revaluation of assets.

**Foreign income**
Foreign income, under the domestic tax law, is subject to 25% CIT with tax credits available (see Foreign tax credit in the Tax credits and incentives section).

Foreign income shall be taxed when earned. There are no provisions for tax deferral or preferential tax rates for foreign income.

---

**Deductions**

**Depreciation and amortisation**
Tax depreciation may differ from accounting depreciation. Depreciation in excess of the rates specified in the regulations on tax depreciation is not deductible. These regulations specify maximum and minimum permissible effective lives for various classes of assets, including intangibles. Current straight-line tax depreciation rates are as follows:

<table>
<thead>
<tr>
<th>Asset</th>
<th>Rates (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Buildings</td>
<td>2 to 16.67</td>
</tr>
<tr>
<td>Office equipment</td>
<td>10 to 20</td>
</tr>
<tr>
<td>Automobiles</td>
<td>3.33 to 16.66</td>
</tr>
<tr>
<td>Machinery and equipment</td>
<td>5 to 33.33</td>
</tr>
<tr>
<td>Intangible assets</td>
<td>Not more than 5</td>
</tr>
</tbody>
</table>

**Interest expenses**
Interest on loans corresponding to the portion of charter capital not yet contributed is not deductible.
Vietnam

Interest on loans from non-economic and non-credit organisations exceeding 1.5 times the interest rate set by the State Bank of Vietnam is not deductible.

Charitable contributions
Donations are generally non-deductible, except certain donations for education, health care, natural disasters, or building charitable homes for the poor.

Taxes
Creditable input VAT, CIT, and other fees/charges are not deductible for CIT purposes.

Other non-deductible expenditures
The following other expenditures are specifically stated to be non-deductible:

- Depreciation of fixed assets which is not in accordance with the prevailing regulations.
- Employee remuneration expenses which are not actually paid or are not stated in a labour contract or collective labour agreement.
- Life insurance premiums for employees.
- The portion of costs of raw materials, materials, fuel or goods which are used in excess of the reasonable consumption levels.
- Reserves for research and development (R&D) not in accordance with the prevailing regulations.
- Provisions for stock devaluation, bad debts, financial investment losses, product warranties, or construction work which are not in accordance with the prevailing regulations.
- Advertising, promotion (except certain items), conferences/party, commissions, prompt payment discounts exceeding 10% of total other deductible expenses (this cap is increased to 15% for newly-established enterprises for the first three operating years).
- Unrealised foreign exchange gain/losses due to the revaluation of foreign currency items other than account payables at the end of a financial year.
- Management expenses allocated to PEs in Vietnam by the foreign company’s head office which are not in accordance with the regulations.
- Administrative penalties and fines.

For certain businesses (e.g. insurance companies, securities trading, lotteries), the Ministry of Finance provides specific guidance on deductible expenses for CIT purposes.

Net operating losses
Losses may be carried forward fully and consecutively for a maximum of five years. Carryback of losses is not permitted.

Payments to foreign affiliates
There are no special restrictions on the deductibility of royalties, loan interest, and service fees paid to foreign affiliates (except for those paid by branches). However, the payment must be defendable on an arm’s-length basis as required by transfer pricing regulations (see Transfer pricing in the Group taxation section). Certain contracts for the transfer of technology and foreign loans must be registered with the competent authorities.

Group taxation
There is no provision for any form of consolidated filing or group loss relief in Vietnam.
Transfer pricing
Vietnam has transfer pricing regulations which outline various situations where transactions will be considered as being between related parties and the mechanisms for determining the market ‘arm’s length’ transaction value (e.g. comparable uncontrolled price, cost plus, resale price, comparable profits, and profit split).

Under the wide ranging definition of associated parties, the control threshold is lower than in many other countries (20%), and the definition also extends to certain significant supplier, customer, and funding relationships between otherwise unrelated parties.

Compliance requirements include an annual declaration of related party transactions and transfer pricing methodologies used, which is required to be filed together with the annual CIT return.

Companies which have related party transactions must prepare and maintain contemporaneous transfer pricing documentation.

Thin capitalisation
There are no thin capitalisation requirements in the tax legislation. However, the level of permitted debt funding will be limited by virtue of licensing requirements. The maximum amount of debt funding is the difference between the licensed investment capital and charter capital.

Tax credits and incentives
Inbound investment incentives
Tax incentives are granted based on regulated encouraged sectors and difficult socio-economic locations. The sectors which are encouraged by the Vietnamese Government include education, health care, sport/culture, high technology, environmental protection, scientific research, infrastructural development, and computer software manufacture.

The two preferential rates of 10% and 20% are available starting from the commencement of operating activities. When the preferential rate expires, the CIT rate reverts to the standard rate.

Criteria for preferential tax rates are as follows:

- 10% tax rate for 15 years shall be applied to the newly-established enterprises which:
  - operate in regions with specially difficult socio-economic conditions, in economic zones, and high technology zones
  - invest in high technology, science research and technology development, development of water plants, power plants, water supply, and drainage systems; bridges, roads, railways; airports, sea ports, river ports; airfields, stations, and other especially important infrastructure facilities decided by the Prime Minister, or
  - invest in production of computer software.
- 10% tax rate for the duration of operations is available for the income earned from activities in the fields of education/training, vocational training, public health, culture, sport, and environment (socialised fields).
- 20% tax rate shall be applied for ten years to new enterprises established from investment projects in regions with difficult socio-economic conditions.
Vietnam

- 20% tax rate for the duration of operations is available for the income earned from agricultural service cooperatives and people’s credit fund.

**Tax holidays**
Investors may be considered for tax holidays and reductions. The holidays take the form of a complete exemption from CIT for a certain period beginning immediately after the enterprise first makes profits, followed by a further period where tax is charged at 50% of the applicable rate. However, where the enterprise has not derived profits within three years of the commencement of operations, the tax holidays/tax reduction will start from the fourth year of operation. Criteria for eligibility to these holidays and reductions are set out in the CIT regulations as follows:

- Four years of tax exemption and nine subsequent years of 50% reduction shall be applied to the newly-established enterprises which:
  - operate in regions with specially difficult socio-economic conditions, in economic zones, and high technology zones
  - invest in high technology, science research and technology development, development of water plants, power plants, water supply, and drainage systems; bridges, roads, railways; airports, sea ports, river ports; airfields, stations, and other especially important infrastructure facilities decided by the Prime Minister
  - invest in production of computer software, or
  - operate in the socialised fields and in regions with difficult or especially difficult socio-economic conditions.
- Four years of tax exemption and 50% tax reduction for five subsequent years shall be given to new enterprises operating in the socialised fields and in regions not included in the list of regions with difficult or especially difficult socio-economic conditions.
- Two years of tax exemption and four subsequent years of 50% reduction shall be applied to newly-established enterprises operating in regions with difficult socio-economic conditions.

**Employment incentives**
Additional tax reductions may be available for engaging in manufacturing, construction, and transportation activities which employ several female staff, and/or ethnic minorities. CIT reduction must correspond with the actual payment for those employees.

**Research and Development fund**
Business entities in Vietnam are allowed to set up a tax deductible Research and Development fund. Enterprises can appropriate up to 10% of annual profits before tax to the fund. Various conditions apply.

**CIT deferral for small and medium size enterprises**
Eligible small and medium size enterprises (as regulated) can enjoy a one-year deferral of 2011 CIT payments.

**Foreign tax credit**
In respect of Vietnamese enterprises earning income from overseas investment, CIT (or a kind of tax with a nature similar to CIT) paid in a foreign country or paid on behalf by its partner in the country receiving the investment (including tax levied on the dividend) is allowed to be creditable. The credit shall not exceed the CIT amount payable in Vietnam.
Vietnam

The foreign income tax which is entitled to exemption or reduction in accordance with the foreign law shall also be credited.

**Withholding taxes**

**Interest**
An interest withholding tax (WHT) of 10% applies to payments to an overseas lender. Interest on pre 1999 loans may be exempt from WHT. Offshore loans provided by certain government or semi-governmental institutions may obtain an exemption from the interest WHT where a relevant double taxation agreement (DTA) or Inter-Government Agreement applies.

Interest earned from bonds (except for tax exempt bonds) and certificates of deposit are subject to 10% WHT. The sale of bonds and certificates of deposits are subject to deemed tax of 0.1% of the gross sales proceeds.

**Royalties, license fees, etc.**
A 10% royalty WHT applies in the case of payments made to a foreign party for transfers of technology, unless the transfers are contributed as part of legal capital (akin to equity). Transfers of technology are defined very broadly. Certain contracts for the transfer of technology must be registered with the competent authorities.

**Management fees and head office charges**
WHT applies on management fees and head office charges at the rates applicable to services (see below).

**Payments to foreign contractors**
FCWT on payments to foreign contractors applies where a Vietnamese contracting party (including a foreign-invested enterprise incorporated in Vietnam) contracts with a foreign party that does not have a licensed presence in Vietnam, irrespective of whether the services are provided in Vietnam or overseas.

Foreign contractors can apply to be deduction-method VAT payers if they adopt the Vietnamese accounting system. If accounting records are adequate, the foreign contractor will pay CIT on actual profits, but otherwise on a deemed-profit basis.

For direct (non-deduction-method) foreign contractors, VAT and CIT will be withheld by the contracting party at a deemed percentage of taxable turnover. Various rates are specified according to the nature of the contract performed. For CIT, the WHT rate varies from 0.1% to 10%. For VAT, the effective WHT rate can also range from 3% to 5%. The VAT withheld by the contracting party is an allowable input credit in its VAT return.

A summary of VAT and CIT WHT rates follow:

<table>
<thead>
<tr>

<td>Manufacturing, other business activities</td>
<td>3</td>
<td>2</td>
</tr>
</tbody>
</table>

Notes

1. On the basis that import VAT is paid.
2. Relates to VAT only.

Cross-border leases

A Vietnam-based lessee is required to withhold tax from payments to an offshore lessor. 5% VAT and 5% CIT is applicable to the rental charge if it is an operating lease. If it is a finance lease, the interest portion will be exempt from VAT and subject to 10% CIT.

Tax treaties

The above WHT rates may be affected by a relevant DTA.

Notes
1. The treaty is not yet in force
2. In some cases, the limits set by the treaty are not lower than the present withholding rate under domestic law. Therefore, the domestic rates will apply.
3. Interest derived by certain government bodies is exempt from WHT.
4. Royalty WHT rates vary for certain types of royalties.
Vietnam

**Tax administration**

**Returns**
The annual finalisation return and the audited financial statements must be filed within 90 days of the end of the financial year. The standard tax year is the calendar year. However, different accounting year-ends can be used if approval is obtained from the authorities.

**Payment of tax**
CIT shall be declared and paid provisionally on a quarterly basis (based on actual revenues and expenses of each quarter). Quarterly CIT returns and payment must be made no later than the 30th day of the next quarter.

**Statute of limitations**
The general statute of limitations for imposing tax administration penalties is two years. The tax authorities can collect under declared and unpaid tax at any time.

**Audit cycle**
Tax audits are carried out regularly and often cover a number of tax years. Prior to an audit, the tax authorities send the taxpayer a written notice of time and scope of the audit inspection.

**Penalties**
There are detailed regulations setting out penalties for various tax offences. These range from relatively minor administrative penalties through to tax penalties amounting to various multiples of the additional tax assessed.

In practice, imposition of penalties has been arbitrary and inconsistent. However, in recent periods there has been a much tougher stance adopted by the tax authorities. Hence, where tax is paid late (e.g. as a result for of a tax audit investigation), there is a significant likelihood of penalties being imposed. Notably, where tax adjustments are made at a tax audit, any resulting additional taxable profits are not eligible for any CIT incentives to which a company may be entitled.

**Other issues**

**Foreign investment restrictions**
In several fields, foreign investment will not be licensed or will only be licensed under special conditions. The List of Conditional Investment Sectors include television, production and publishing cultural products, telecommunication, transportation by all means, cigarette production, exploring and processing natural resources, real-estate business, education, medical services and distribution.

**Exchange controls**
All buying, selling, lending, and transfer of foreign currency need to be made through credit institutions and other financial institutions authorised by the State Bank of Vietnam (SBV).

Outflow of foreign currency by transfer is authorised for certain transactions such as payments for imports and services abroad, refund of loans contracted abroad and payment of interest accrued thereon, transfer of profits and dividends, and revenues from transfer of technology.
All monetary transactions in Vietnam must be undertaken in Vietnamese dong. Exceptions are applicable to payments for exports made between principals and their agents, and payments for goods and services purchased from institutions authorised to receive foreign currency payments such as for air tickets, shipping and air freight, insurance, and international communications.

**Forms of doing business**
According to the Law on Enterprises, a foreign-invested enterprise may be established as either a single member limited liability or a limited liability with more than one member, a joint-stock company, or a partnership.

**Intellectual property**
Intellectual property rights are protected by the Civil Code (1995 and 2005), the Law on Intellectual Property (2005), and a host of subordinate legislation.

Vietnam is signatory to the Paris Convention, the Madrid Agreement on International Trademark Registration, and the Patent Cooperation Treaty and is a member of the World Intellectual Property Organisation. Vietnam has entered into an agreement on copyrights with the United States. According to the Vietnam-US Bilateral Trade Agreement, Vietnam is further under the obligation to adhere to the Berne Convention.

---

**Significant developments**

Zimbabwe's annual budget presentation was held on 25 November 2010 by the Minister of Finance, the Honorable Tendai Biti, and the proposed changes have been promulgated into law.

The announcements relating to corporate tax can be summarised as follows.

**Value-added tax (VAT)**  
Beginning 1 January 2011, it is mandatory for all registered operators with an annual turnover exceeding USD 240,000 to use electronic fiscal registers (EFRs) that can be linked to the Zimbabwe Revenue Authority (ZIMRA). However, the actual availability of these registers has been delayed.

Beginning 1 January 2011, un-beneficiated chrome exports, which were previously standard-rated, are subject to an increased VAT rate of 20%.

**Income tax**  
There have been no significant corporate income tax developments in Zimbabwe during the past year.

---

**Taxes on corporate income**

The corporate tax rate for companies (other than mining companies with special mining leases, but including branches) continues at 25.75%. This rate includes a base rate of 25% plus a 3% AIDS levy.

Zimbabwe presently operates on a source-based tax system. This means that income from a source within, or deemed to be within, Zimbabwe will be subject to tax in Zimbabwe unless a specific exemption is available. The specific circumstances of a transaction should always be considered to determine whether the transaction gives rise to taxation in Zimbabwe.

Income earned by foreign companies from a source within, or deemed to be within, Zimbabwe will be subject to tax in Zimbabwe. In such a case, one should determine whether the foreign entity is obliged to register a local entity. A company is required to register a branch if it has established a place of business or is otherwise considered to be trading in Zimbabwe. A local subsidiary company may be registered as an alternative to a branch operation.
Non-residents who do not have a place of business in Zimbabwe may, however, be subject to withholding tax (WHT). See the Withholding taxes section for additional details.

Note that Zimbabwe is currently considering a move to a residence-based tax system.

**Corporate residence**

Currently, the Zimbabwean tax system is based on source and not on residency. Zimbabwe is moving towards a residence-based taxation system, but the details are still to be announced. Income derived, or deemed to be derived, from sources within Zimbabwe is subject to tax.

Source is the place where income originates or is earned, not the place of payment. If goods are sold pursuant to a contract entered into within Zimbabwe, the source of income is deemed to arise in Zimbabwe, regardless of the place of delivery or transfer of title.

Certain types of income arising outside Zimbabwe may, in the hands of a domestic company, be deemed to arise in Zimbabwe and be taxed as such. Examples include interest and certain copyright royalties arising outside Zimbabwe. Where the income is deemed to be from Zimbabwe, relief of the foreign tax suffered, up to a maximum of the Zimbabwe tax, may be allowed as a tax credit.

**Permanent establishment (PE)**

In the event that Zimbabwe has entered into a double taxation agreement with the country where the foreign company resides, the entity will only be taxable in Zimbabwe if it operates through a PE, which, in most cases, includes a fixed place of business. The establishment of a local entity or branch will usually create a PE, although the provisions of the related tax treaty should be considered. If a PE exists, only the portion of the income attributable to the PE will be subject to tax in Zimbabwe.

Otherwise, and except for the PE concept embodied in the tax treaties, corporate residence is of little tax significance.

**Other taxes**

**Value-added tax (VAT)**

VAT is a transaction tax, and the implications will vary for different transactions. Some transactions are taxed at a rate of 15% or 0% while other transactions are exempt from VAT. Input tax deductions may be claimed, subject to certain provisions. Advice on VAT implications of specific transactions related to corporate operations should be obtained prior to execution of transactions.

VAT shall be levied on every taxable supply by a registered person. A taxable supply means any supply of goods or services in the course or furtherance of a taxable activity. A taxable activity means any activity that is carried on continuously or regularly in Zimbabwe which involves the supply of goods or services for consideration.

VAT is payable on all imports for home consumption into Zimbabwe, subject to certain exemptions (e.g. in terms of a technical assistance agreement, donations to the state,
Zimbabwe

goods of which the local supply is zero-rated). Import VAT is payable on the import value plus the applicable customs duty.

A company/branch is required to register for VAT if it supplies goods or services on a regular basis for consideration and if its taxable supplies (standard-rated and zero-rated supplies) exceed USD 60,000 in any 12-month period.

A registered VAT vendor is entitled to deduct input tax credits paid in the course of taxable supplies made to such person, provided that a tax invoice is available to support the input tax deduction. It is also important to take note of deemed input tax deductions and prohibited input deductions. Import VAT paid may only be deducted as input tax if the import was in furtherance of a taxable activity and the required documentation (e.g. stamped customs entries) is held by the importer.

**Customs and excise duties**
Zimbabwe is a member of Southern African Development Community (SADC) as well as Common Market for Eastern and Southern Africa (COMESA). Customs duties are payable according to the general customs tariffs that are legislated for in Zimbabwe. Preferential duty rates apply on imports from SADC or COMESA countries while goods may be imported free of customs duties from Namibia in terms of the Zimbabwe-Namibia Free Trade Agreement.

Excise duties are levied on local production of excisable products and are included on most excisable products imported from other countries. Examples of the excise products and applicable rates include the following:

- Cigarettes: 40% + USD 5 per 100
- Spirits: USD 2 per litre
- Wine: USD 0.50 per litre

Excise and fuel levies are also levied on petrol, diesel, and illuminating kerosene.

A security deposit is required by Customs on all temporary importations to cover import VAT and customs duties (if applicable).

It is possible to import goods that are subject to customs duties into registered Customs’ bonded warehouses, where goods are kept for later use. In this case, the payment of duties may be deferred until the goods are taken out of the bonded warehouse for home consumption or acquitted if the goods are subsequently exported.

**Capital gains tax**
It should be noted that capital gains tax is payable in Zimbabwe on the disposal of immovable property or shares that are held in listed (on the Zimbabwean Stock Exchange) or unlisted companies at the following rates:

**Acquired pre-February 2009**
- Listed securities: 1% of proceeds.
- Property: 5% of proceeds.
- Unlisted securities: 5% of proceeds.

**Acquired post-February 2009**
- Listed securities: 1% of proceeds.
- Property: 20% of capital gain.
- Unlisted securities: 20% of capital gain.
**Stamp duty**

Certain transactions may attract stamp duty. The amount of stamp duty payable will differ and will be based on the nature of every individual transaction.

The basic transactions can be summarised as follows.

<table>
<thead>
<tr>
<th>Transaction</th>
<th>Stamp duty</th>
</tr>
</thead>
<tbody>
<tr>
<td>Bonds</td>
<td>0.4% (USD 0.40 for every USD 100 or part thereof)</td>
</tr>
<tr>
<td>Brokers notes – purchase of securities</td>
<td>0.25% (USD 0.25 per every USD 100 or part thereof)</td>
</tr>
<tr>
<td>Brokers notes – purchase / sale of any movable property other than a security</td>
<td>0.10% (USD 0.10 per every USD 100 or part thereof)</td>
</tr>
<tr>
<td>Brokers notes – purchase / sale of any immovable property</td>
<td>1% (USD 1.00 per every USD 100 or part thereof)</td>
</tr>
<tr>
<td>Off market share transfer instruments</td>
<td>2% or USD 2</td>
</tr>
<tr>
<td>Cheques</td>
<td>0.05% (USD 0.05)</td>
</tr>
</tbody>
</table>

Tax advice should be obtained for major transactions in respect of the transactions mentioned above in order to ensure that the correct stamp duty implications are considered.

**Transfer duty**

Transfer duty is payable on the acquisition value of property acquired at the following rates.

<table>
<thead>
<tr>
<th>Value of the property (USD)</th>
<th>Rate of transfer duty</th>
</tr>
</thead>
<tbody>
<tr>
<td>0 to 5,000</td>
<td>1%</td>
</tr>
<tr>
<td>5,001 to 20,000</td>
<td>2% of the value above 5,000</td>
</tr>
<tr>
<td>20,001 to 100,000</td>
<td>3% on the value above 20,000</td>
</tr>
<tr>
<td>100,001 and above</td>
<td>4% of the value above 100,000</td>
</tr>
</tbody>
</table>

Transfer duty is normally payable by the buyer, but the agreement for the sale of the property will determine the person liable to pay these costs. In addition, conveyance costs of up to 3% (plus 15% VAT) must be added on.

**Branch income**

Branch income that is received or has accrued from a source within, or deemed to be within, Zimbabwe is taxable in Zimbabwe in terms of the normal corporate tax rules.

A branch is regarded as an extension of its foreign head office. A branch may therefore not deduct fees paid to its foreign head office (unless a tax treaty makes provision for such deduction) as it is argued that a branch cannot transact with itself. Reimbursement of actual expenses may, however, be deducted, subject to the normal deduction rules.

A 20% WHT is imposed on any payments made in respect of head office charges.

The amount of fees charged by the head office to the Zimbabwe branch is also subject to a limitation, usually based on a maximum of 1% of total expenditure (excluding the
Zimbabwe

charge itself and any capital allowances). Exchange control regulations also limit the remittability of administration and management fees to 2% of turnover.

**Income determination**

The Zimbabwe Income Tax Act (Act) tax base for corporate taxes is taxable income rather than profits. The source and nature of the income determines whether the amount is taxable or not. In addition to amounts received or accrued from actual Zimbabwean sources, there are deeming provisions that bring income from foreign sources into Zimbabwean taxable income.

In general, all receipts from a Zimbabwe source are taxed, excluding amounts that are proven by the taxpayer as being capital receipts. Most expenditure items and some specified exemptions are deductible against income. Capital expenditure is generally not deductible, with amounts on specific items being deductible by way of annual allowances spread over a period.

**Inventory valuation**

The legislation permits three methods of inventory valuation: historic cost, cost of replacement, or net realisable value.

**Capital gains**

*See Capital gains tax in the Other taxes section.*

**Dividend income**

Dividends received from Zimbabwe incorporated companies are tax exempt. When received from non-Zimbabwe companies, they are taxed at a flat rate of 20%; however, relief is granted by allowing any foreign tax suffered as a tax credit.

**Interest income**

Interest accruing from ‘financial institutions’ is subject to a 15% WHT and thereafter is exempt from corporate tax (the WHT becomes a final tax). Interest from other local or foreign sources is included in gross income and is taxed at the normal corporate tax rate. Relief will be granted for any foreign tax paid, up to the maximum Zimbabwe tax rate.

**Partnership income**

The partnership itself is not taxed directly; however, the taxable income of the partnership is calculated in the same way as corporate income and is then allocated amongst the partners in accordance to their agreed profit sharing ratios. This income is taxed in their hands at the basic corporate tax rate.

**Rent/royalties income**

Rents and royalties are generally treated as normal taxable income and are taxed at the basic corporate rate. Rent arising in respect of land and buildings situated outside of Zimbabwe, however, is exempt from local tax.

**Foreign income**

Where income (including business profits) is deemed to be from a Zimbabwe source, it will form a part of the local company's taxable income and will be subject to tax at the basic corporate rate. Relief in respect of foreign taxes suffered will be granted unless it is clear that the true source of the income is, in fact, Zimbabwe.
Zimbabwe

**Deductions**
The Act makes provisions for specific deductions. Some of the deductions, such as the deduction of foreign exchange losses, development and exploration costs, hire purchase allowances, and manufacturing allowances can be more complex.

**Capital allowances**
The cost (including finance charges) of machinery, implements, and other articles used by the taxpayer in the production of income is deductible in four equal annual allowances. No apportionment is required where the asset was held for less than 12 months.

Industrial buildings (including hotels) constructed and used by the taxpayer in the production of income qualify for an initial allowance of 25% of construction cost in the year they enter service. Thereafter, an annual allowance of 25% is deductible for each year following the year of construction. Additions to existing buildings (not alterations or repairs) qualify for the same deductions. It is important to note that the allowance is calculated on the cost of construction and not the cost of acquisition. In the latter case, the allowances are set at 5% of the cost.

A mining exploration expenditure incurred before commencement of production is deductible in full in the first year of production against income derived from the mine. Subsequent development expenditure is presently written off in the year expended. Note that this aspect of Zimbabwe’s mining legislation is currently under review.

Capital allowances may also be deducted with respect to patents, trademarks, and leasehold improvements.

A recovery or recoupment of allowances previously claimed should be included in the gross income of a taxpayer in the event that the allowance is recovered or recouped by way of disposal. The recoupment is presently calculated on the capital allowances previously granted.

**Net operating losses**
Assessed tax losses may be carried forward (but not backwards) for up to six years provided the company continues to trade. This restriction does not apply to mining companies. Tax laws do not allow for losses to be transferred to other group companies, and anti-avoidance provisions may be triggered by transactions designed to transfer or exploit assessed losses.

Assessed losses are reduced in the event of a compromise agreement with creditors.

**Payments to foreign affiliates**
The law prohibits the deduction of amounts incurred in excess of specified limits in respect of management and general administration expenses as well as interest. This applies to branches or subsidiaries of both local and foreign companies.

The limit on management and general administration expenses is based on such expenses exceeding 1% and 0.75% respectively for a company already in production and prior to production of total tax-deductible expenses.
Zimbabwe

**Group taxation**

No taxation of combined operations is allowed in Zimbabwe, including where operations are conducted by more than one company.

**Transfer pricing**

No detailed transfer pricing legislation is currently in place in Zimbabwe. The law does, however, allow the Commissioner General to substitute a new sales price for a transaction in which he considers the declared sales price to be too high or low.

**Thin capitalisation**

The limit on the deductibility of interest is based on a company incurring interest charged by a subsidiary, a fellow subsidiary, or a holding company when the debt to equity ratio exceeds 3:1.

**Tax credits and incentives**

It has been announced by the Minister of Finance that Zimbabwe is moving away from taxation incentives; however, the following are still available.

Note that this is a high-level summary, and certain conditions should be met in order to utilise these incentives.

<table>
<thead>
<tr>
<th>Person for whom incentive is available and duration of incentive</th>
<th>Tax incentive</th>
<th>Tax treatment for normal taxpayers</th>
</tr>
</thead>
<tbody>
<tr>
<td>Taxpayers operating at designated growth point areas.</td>
<td>The capital allowance is calculated as 25% of the cost of construction of a commercial or industrial building in growth point areas in the year when the building enters service and 25% during the three years that follow the year of construction.</td>
<td>Capital allowances are calculated as 25% of the cost of construction of industrial building in the year when the building enters service and 25% during the three years that follow the year of construction.</td>
</tr>
<tr>

<td>Taxed at 25%.</td>
</tr>
</tbody>
</table>

**Withholding taxes**

WHTs are applicable where dividends and royalties or similar payments are declared or distributed to non-Zimbabwean residents (and Zimbabwean residents in some instances).

**Dividends**

Dividends declared by a Zimbabwean company to a non-resident holding company will be subject to non-resident shareholders tax (NRST), a WHT. NRST is payable at a rate of 15% unless treaty relief is available. Dividends from companies listed on the Zimbabwe Stock Exchange have a rate of 10%. NRST is payable within 10 days after declaration of the dividend.

**Royalties or similar payments**

WHT on royalties are payable once a Zimbabwean company pays a royalty to a non-Zimbabwean resident. WHT is levied at a rate of 15% and is payable within 10 days of the date of payment.

A royalty includes payment for the use or right to use any patent or design, trademark, copyright, model, pattern, plan, formula or process, or any other property or right of a similar nature. It also includes the imparting of any scientific, technical, industrial, or commercial knowledge or information for use in Zimbabwe. The nature of the amount payable should therefore be carefully considered in order to determine whether the relevant amount represents a royalty.

**Fees**

Fees are defined to include amounts that are technical, managerial, administrative, or consultative in nature; costs are paid externally. There are some exceptions, but the definition is broad and brings in most costs that may be charged to a Zimbabwean person.

WHT is levied at a rate of 15% and is payable within 10 days of the date of payment.

**Interest**

WHT of 15%, calculated on the gross amount of interest, is payable on interest accruing to any person resident in Zimbabwe. This applies to interest arising from a registered banking institution or unit trust scheme. The tax withheld is a final tax, and the financial institution is responsible to withhold the tax.

Non-resident investors, however, are exempt from any WHT on interest.
Zimbabwe

Summary of WHT payable
The non-residents WHT rates and treaty relief for Zimbabwean double tax agreements can be summarised as follows. It should be noted that the tax treaties contain certain requirements that should be met before the reduced tax rate may be applied.

The definitions of dividends, royalties, and interest in the various treaties should also be considered.

<table>

</tbody>
</table>

* Applies to unlisted companies. The rate for companies listed on the Zimbabwe Stock Exchange is reduced to 10%.

** Resident persons have a 15% WHT on interest arising from financial institutions. Interest from other sources is taxed at the corporate tax rate.

‘N/A’ means that the provisions of the tax treaty limited the rate to a rate that is higher than the local Zimbabwean rate. It should be noted that a treaty can only provide tax relief and cannot impose a higher tax rate.

These are payable within ten days of the date of distribution or accrual.

Zimbabwe has either negotiated, or is currently negotiating, tax treaties with the following countries:

Botswana Jamaica Tanzania
Democratic Republic of Congo Namibia Tunisia
Indonesia Serbia and Montenegro Zambia
Iran Seychelles

Tax administration
The due dates for filing of returns can be summarised as follows.

<table>
<thead>
<tr>
<th>Return</th>
<th>Due date</th>
</tr>
</thead>
<tbody>
<tr>
<td>Income tax return</td>
<td>By the end of April in the following year.</td>
</tr>
<tr>
<td>Provisional tax return – first payment of 10%</td>
<td>25 March of the respective tax year.</td>
</tr>
<tr>
<td>Return</td>
<td>Due date</td>
</tr>
<tr>
<td>-------------------------------------------------</td>
<td>-----------------------------------------------</td>

<td>25 June of the respective tax year.</td>
</tr>
<tr>
<td>Provisional tax return – third payment of 30%</td>
<td>25 September of the respective year.</td>
</tr>
<tr>
<td>Provisional tax return – fourth payment of 35%</td>
<td>20 December of the respective year.</td>
</tr>
<tr>
<td>Employees' tax return (PAYE monthly return)</td>
<td>By the third of the month following the month to which the PAYE relates.</td>
</tr>
<tr>
<td>PAYE reconciliation return</td>
<td>Within 30 days from the tax year-end for individuals, i.e. 31 January each year.</td>
</tr>
<tr>
<td>VAT return</td>
<td>By the tenth day following the month to which the VAT relates.</td>
</tr>
<tr>
<td>Import VAT</td>
<td>At the time that the goods are imported. Can be deferred over a period of 90 days on application to the Commissioner.</td>
</tr>
<tr>
<td>VAT on imported services</td>
<td>Within 30 days of receipt of payment or issuance of an invoice (whichever is earlier).</td>
</tr>
<tr>
<td>Various amounts subject to withholding taxes</td>
<td>Within 10 days from the date of distribution or accrual.</td>
</tr>
</tbody>
</table>

**Anti-avoidance**

Please note that Zimbabwe legislation contains basic anti-avoidance sections that empower the Commissioner General to disregard the implications of a transaction or scheme if it can be proven that:

- such a transaction or scheme had been entered into to avoid or postpone the payment of any duty or levy imposed by the Zimbabwe Income Tax Act
- it was entered into or carried out by means or in a manner that would not normally be employed in the entering into or carrying out of a transaction, operation, or scheme of the nature of the transaction, operation, or scheme in question, or
- it has created rights or obligations that would not normally be created between persons dealing at arm's length under a transaction, operation, or scheme of the nature of the transaction, operation, or scheme in question

The Commissioner General may at his sole discretion impose this legislation on any transaction or scheme, which will place the burden of proof on the taxpayer to prove that any/all of the requirements noted above will not be applicable to the transaction or scheme.

**Other issues**

**Exchange control**

Zimbabwe has been operating a multi-currency system since February 2009. The Zimbabwe dollar (ZWD) was demonetarised effective April 2009. This has had a significant impact on the country’s exchange control regulations.

The Exchange Control Handbook in Zimbabwe is not available to the public; only banking institutions have access to these regulations.

Transactions that involve the transfer of funds to countries outside Zimbabwe are generally subject to Bank approval.
Zimbabwe

The issue of shares in a Zimbabwe company to persons residing outside of Zimbabwe requires specific exchange control approvals. Under recent legislation, a limit of 49% is available for non-residents. A 51% local shareholding by indigenous persons is a requirement. Applications may be made for increased levels; each case will be decided on its own merits.
Global Tax Contacts
Market turmoil, intense competition, and global expansion have sparked unprecedented levels of regulation which companies need to keep up with.

PwC is the leading provider of tax services worldwide - we have representation in every major city across six continents. And the depth and breadth of our resource – encompassing both industry and business competencies – allows us to deploy specialist expertise to solve any tax issue wherever in the world they are needed.

\[1\] The Global Tax Monitor (GTM) recognises PwC as the leading tax adviser globally, by reputation, with a very strong lead over the competition. These results are based on the year-ending Q1 2011 figures, with a sample size of 3,336 primary buyers of tax services globally.

Launched in 2000, the GTM is an independent survey conducted by research agency TNS, that examines the competitive position of the top firms in the tax advisory market - globally, regionally, nationally and on an industry basis. It provides a comprehensive measure of firm reputation, client service and brand health, gained currently from just over 3,000 telephone interviews annually with key decision makers (CFOs and Tax Directors) in 32 key markets.
In addition, our range of services and industry expertise enable us to bring a holistic and integrated approach to your issues. Our size and scale gives us the confidence to say that we will serve you with real specialists across all our services, whether you need that support locally, nationally, or internationally.

We are leading the debate with tax authorities and governments around the world, changing the way we all think about tax.

Clients engage us because we understand the business and economic environment and combine this with specialist tax knowledge. We help you navigate complexity to:

- achieve business objectives by reducing tax risks and meeting your compliance obligations
- improve business and operating efficiency through tax efficiency and understand and manage the total tax contribution your business makes to governments

And we have the courage to ask the tough questions that get to the heart of the matter. Having clarity around your challenges helps us put ourselves in your shoes, and together achieve a successful tax strategy.
Employees are probably your organisation’s greatest asset and your biggest challenge. The PwC Human Resource Services (HRS) network helps you create value by helping you actively manage your people. We have one of the world’s largest human resource (HR) advisory networks with solid grounding in areas such as HR transformation, compensation, benefits, pensions, HR transactions, labour law, HR data metrics and deploying talent around the world. We can put together the team that is right for you to give you all the support you need. And our 6,000 professionals in over 100 countries follow the same multi-disciplinary approach to people management to give you the consistency that is so important when working across borders.

**Indirect Taxes**

We customise the support we give you, and use the latest technology

**Global Leader, Indirect Taxes**
Ine Lejeune
+32 9 268 8300
ine.lejeune@be.pwc.com

To give the best advice on indirect taxation, we believe you need to work closely with the people devising it. At PwC we do this. And we have a thorough understanding of indirect taxes from every perspective - we appreciate that indirect taxes can be very different depending on which industry sector you work in. Across the world, our indirect tax and customs specialists work closely with PwC industry specialists to really understand the specific issues in your sector, and give you advice with genuine insight. And because the implications of indirect taxes can be so important to your business, we customise the support we give you, and use the latest technology, to provide you with what you need, wherever you are and whenever you need us. We can assist you with strategy, risk, process and margin improvement.

The pressures on business to manage tax across borders, along with growing regulation and the need to stay competitive in a global market, means that a local perspective on international tax is not enough. With specialists experienced in complex international tax matters across the world, our network is well positioned to give you top quality advice. It’s this combination of local and global expertise that gives you real insight into managing tax across borders.

Legal Services

Over 2,000 corporate lawyers in more than 75 countries

Global Leader, Legal Services
Leon Flavell
+44 20 7212 1945
leon.flavell@pwcllegal.co.uk

We understand that one size doesn’t fit all when it comes to legal services.

With over 2,000 corporate lawyers in more than 75 countries, we’re able to tackle problems in a way that is genuinely specific to your business. As well as specialist legal advice, we also offer day-to-day general counsel support. We support businesses with teams drawn from the range of skills within the PwC global network. Depending on your legal issues, we might include tax advisers, human capital consultants, corporate finance specialists, actuaries, management consultants, or accountants. We’ll put together whatever it takes to give you a creative solution in the least possible time.

Sustainability and Climate Change

Advice that anticipates what legislative and policy changes are likely to happen

Global Leader, Sustainability and Climate Change
Mark Schofield
+44 20 7212 2527
mark.schofield@uk.pwc.com

Sustainability and climate change continues to evolve as a business issue.

Momentum is building. As such, you need more than advice on the current state – you need advice that anticipates what legislative and policy changes are likely to happen. You need that advice to help you to predict how these developments will impact your business. You also need to understand how your organisation is changing to address sustainability and climate change as a business issue and how existing taxes impact on those changes. Our Sustainability and Climate Change Tax network helps businesses and investors in two ways: it helps them stay on top of global trends and developments in climate change related policy; and it helps businesses address the tax implications of climate change related policy and their own organisation’s response to the business issue.

By giving you insight into your company’s risks and exposures across different territories and disciplines, we can be the effective option to help you deal with tax disputes, audits, and examinations, from prevention through to management and resolution. Our specialists also use their experience to help businesses put in place consistent and defensible practices and policies, so they know what to expect in the future. The Tax Controversy and Dispute Resolution network brings together former revenue authorities and government officials, accountants, economists, international tax litigators, and industry sector specialists, in all areas of direct and indirect tax, as well as customs duties, employment taxes, and tax fraud. We think being effective is about more than just knowledge; it’s about having an insight into what could happen next, so we build strong relationships with governments and policy makers worldwide. That way, we’re close to the people who are setting the dispute agenda, and know how to work with them to get the right results.

Today, when it comes to managing taxes, many businesses find that the approaches they’ve taken in the past are no longer optimal nor sustainable to manage risks and the dynamics of today’s operating environment. This could be due to changes in their industry or organization, changing legislation, structural transformations, pressure from shareholders and regulators, or budget pressures. Our global Tax Management and Accounting Services (TMAS) network has the experience to help you define and implement an operating model that works for your business, so that you retain effective control over your global taxes. PwC’s TMAS group can provide insight and credentials that help teams navigate today’s business changes and build efficient, effective and adaptable tax functions to support global tax management responsibilities. In addition to assisting you in building internal capabilities, we can also coordinate the outsourcing of your compliance -- enabled by software that gives you central control and visibility to the status of your compliance across borders -- for direct and indirect taxes, statutory financial statement production and tax reporting.

Transfer Pricing

Extensive experience in dealing with revenue authorities around the world

Global Leader, Transfer Pricing
Garry Stone
+1 312 298 2464
garry.stone@us.pwc.com

The scrutiny of transfer pricing by tax authorities worldwide has intensified and our network of 2,000 transfer pricing specialists in over 75 countries has extensive experience in dealing with revenue authorities around the world. Using their expertise in accounting, economics, dispute resolution and your industry, they can help you prepare for the challenges this scrutiny will present. As a network of specialists, we help companies develop sustainable arm’s length pricing, tax efficient structures, help make them more compliant with legal requirements and help them respond quickly to an audit and resolve transfer pricing disputes. More importantly, we work to ensure they’re less exposed to transfer pricing risks in the future.

To contact the editorial team, please email us at worldwide.tax.summaries@us.pwc.com
If you are responsible for managing taxes in a business which trades or operates across a number of different territories, you will recognise how much of a challenge it can be trying to keep on top of the corporate tax rates and rules in each of those countries.

Worldwide Tax Summaries – Corporate Taxes 2011/12 is a useful reference tool, to help you manage taxes around the world. It offers quick access to information about corporate tax systems in 146 countries worldwide, in an easy to read format.

Written by local PwC tax specialists in each country, it covers the latest changes in legislation, residency, gross income, deductions, tax credits and incentives, tax administration, other taxes, and tax rates, up to date (unless otherwise stated) as of 1 June 2011.
