Welcome to Worldwide Tax Summaries – Corporate Taxes 2010/11, which provides quick and easy access to information on corporate tax rates and rules in 139 countries worldwide. The country summaries – written by our local PwC tax specialists – include information about changes in legislation, residency, gross income, deductions, tax credits, tax administration, other taxes and tax rates. All information in this book, unless otherwise stated, is up to date as of 28 May 2010. Please also visit our online version of these summaries at www.pwc.com/taxsummaries. Each country summary is reviewed and updated as necessary on a periodic basis and each web page shows the date of the latest update to that information.

If you have any queries, or need more detailed advice on any aspect of tax, please get in touch with us. The PwC tax network has member firms throughout the world who can offer you high quality advice and support, whenever and wherever you need it, and our specialist networks can provide both a domestic and cross-border perspective to the tax challenges you are facing. We've also included for reference a list of some of our key specialists at the back of this book, to help you locate the right person, in both our major territories and networks.

We hope this book will be a useful reference tool, to help you manage taxes around the world.

Yours sincerely

Richard Collier-Keywood
Vice Chairman, Tax

Significant developments

All taxpayers must submit tax returns electronically. Depending on the category of taxpayers, the electronic filing comes into force on the following dates:

- Taxpayers registered with the Regional Directorate of Large Taxpayers – starting from 1 January 2010;
- Taxpayers registered for VAT and corporate income tax with the regional tax offices – starting from 1 March 2010;
- Taxpayers registered for VAT and subject to personal income tax for small business – starting from 1 July 2010; and
- State institutions submitting tax returns for personal income tax and social and health contribution – starting from 1 March 2010.

Taxes on corporate income

The corporate income tax rate in the country is 10%.

The following entities are exempt from tax on profit: foundations or non-banking financial institutions established to support development policies of the government through credit activities. In addition, film studios and cinematographic productions (among other types of entity/activity) that are licensed and funded by the National Cinematographic Centre are exempt from the corporate income tax.

Corporate residence

Based on Albanian legislation, a legal entity is deemed to be resident in Albania if either of the following is true:

- The legal entity has its head office in Albania; or
- The legal entity has its place of effective management in Albania.

Other taxes

Value-added tax (VAT)

Taxable persons are all individuals and legal entities registered, or required to be registered for VAT purposes. The VAT registration threshold in Albania is ALL 5 million. However, for specific services defined in the VAT law, the VAT registration threshold is ALL 2 million. Any person providing taxable supplies and whose annual turnover does
Albania

not exceed ALL 5 million is not required to register, although voluntary registration is possible.

The standard VAT rate is 20% and the standard VAT period is the calendar month.

Foreign entities that carry out business activities in Albania are subject to 20% VAT in Albania when one of the following conditions exists:

- Services rendered are related to immovable property located in Albania; or
- Services are rendered in Albania.

In both cases, total turnover must exceed ALL 5 million per annum. If these conditions are met, the foreign entity is obliged to register and pay the VAT in Albania by nominating a tax representative.

In case of a foreign entity’s noncompliance, the tax liabilities and respective penalties derived from such noncompliance will be paid by the local beneficiary of these services.

The following activities are subject to 0% VAT:

- Export of goods;
- The provision of services relevant to the processing of semi-finished goods intended for export;
- The supply of goods and services related with the international transport of goods or passengers; and
- The supply of goods and services in relation to trading and industrial activities at sea.

The VAT on machinery and equipment imported by Albanian registered entities for use in their own business activity (i.e., not for resale) is subject to the VAT deferral scheme under which the payment of the VAT is postponed for up to 12 months, with a possibility of extension for an additional 12-month period.

Taxable transactions include the import of goods into Albania by a taxable person. The following transactions are also taxable:

- Transactions performed for no consideration or for a consideration less than the market value;
- Barter transactions; and
- The private use of taxable goods by a taxable person (self-supply).

The following services are exempt from VAT in Albania:

- The lease of land (unless the rental period does not exceed two months);
- The lease of buildings is exempt from VAT, except cases where there is a contract between parties in which the supply is deemed as taxable;
- Financial services;
- Postal service (only if there are no imports or other postal service and the annual turnover doesn’t exceed ALL 8 million);
- Gambling, casino and totalisator services;
- Written media and books;
• Advertising in electronic media (TV);
• Interest payments on leasing transactions; and
• Export of services.

The sale of land and buildings is not subject to VAT, although the construction process itself is subject to VAT.

A supply made by a non-profit organisation against a reduced payment is an exempt supply in the following case:

• The supply of services by religious or philosophical organisations for the purpose of spiritual welfare; and
• If the organisation makes the above supplies against a full payment and the annual turnover is above ALL 5 million, then this entity is required to be registered for VAT.

Non-profit organisations that do not supply the goods mentioned above are subject to VAT if the annual turnover is above ALL 5 million.

When commodities are transferred through a lease contract or through a sale contract, the VAT is applied to the whole value of the commodities and is calculated on each instalment, regardless of when the ownership is transferred.

Taxable entities have the right to claim for VAT reimbursement if the following two conditions are met:

• The period in which VAT credits are carried forward exceeds three months; and
• The total amount of VAT credits is equal to or greater than ALL 400,000.

VAT registered taxpayers who are in a VAT credit position have the right to request (if all legal conditions are met) the reimbursement of the VAT credit within 30 days after the request is submitted to the relevant tax authority. In case the tax authorities do not proceed with the reimbursement, the taxpayer is entitled to reduce payment of other tax obligations up to an amount equal to the VAT reclaimed.

In relation to the VAT evaluation by tax authorities and the right of the taxpayer on appealing this evaluation with the Tax Appeal Directorate, the taxpayer is entitled to reimbursement in case the VAT evaluation after appealing is decreased or waived.

All taxpayers are required to submit their tax returns and sales and purchase books electronically.

Depending on the category of taxpayers, the electronic filing, after it comes into force, is due on the following dates:

• The deadline for the electronic filing of the VAT books is the fifth day of the consecutive month.
• The deadline for the electronic filing of tax returns and the payment of the related tax liability is the fourteenth day of the consecutive month.

Excise duties
Albania levies excise tax on the following products: fruit juice and refreshments; beer, wine, tobacco and other alcoholic drinks; petroleum; cosmetic articles, perfumes and
candescent lamps. The excise tax on candescent lamps, cosmetic articles and perfumes is defined as a percentage of the sales turnover, whereas the excise tax for other products is based on quantity.

The excise tax paid on fuel used in greenhouses as well as in production of industrial and agricultural products is reimbursable.

Importers of “malt” and “cigarette paper in tubular form together with the filter” that are not authorised as excise taxpayers and are engaged in the production of beer and cigarettes, must provide a request to the General Directory of Tax in order to receive the authorisation to import “malt” and “cigarette paper in tubular form together with the filter” for trading purposes. The authorisation is issued by the General Director of Taxation and is valid for one year with the right of renewal.

**Branch income**

Branch offices in Albania are subject to the same taxes as all other forms of legal entities.

**Income determination**

**Inventory valuation**

Inventory is valued at the end of each tax period using the methods stipulated in the Accounting Law, which should be applied systematically.

**Capital gains/losses**

Capital gains/losses derived from the sale of a company's fixed assets are taxed at the same rate as the company’s ordinary business income.

Fiscal losses may be carried forward up to three years. Losses may not be carried forward if more than 25% of direct or indirect ownership of the share capital or voting rights of the company are transferred during the tax year.

**Transfer pricing**

Transfer pricing adjustments may be made if the conditions set in a transaction between related parties differ from those that would have been set if the parties were independent. In particular, the following are regarded as related parties: (1) a legal entity and any person who owns, directly or indirectly, at least 50% of the shares or voting rights in that entity; and (2) two or more legal entities if a third person owns, directly or indirectly, at least 50% of the shares or voting rights in each entity.

**Controlled foreign company legislation**

There is no controlled foreign company legislation.

**Deductions**

**Depreciation and depletion**

The declining balance basis method of depreciation is used for buildings and machinery and other fixed structures installed in the building. They are depreciated at an annual rate of 5%. The depreciation of intangible assets is calculated separately for each asset using the straight-line method at the rate of 15%. For other assets, depreciation is calculated on a declining balance basis. The maximum depreciation...
rates are 25% for computers, software products and information systems, and 20% for all other assets. Land, fine art, antiques and jewellery are non-depreciable assets.

**Other deductions**
Representation and reception expenses exceeding 0.3% of the annual turnover are not deductible.

Sponsorship expenses exceeding 3% of profit before tax and sponsorships of press and publications exceeding 5% of profit before tax are also not deductible.

The costs of in-kind benefits not taxed via payroll, dividends, fines and other tax-related sanctions, expenses for gifts as well as any expense which the taxpayer does not support with a fiscal invoice, are not deductible for corporate income tax purposes.

The interest paid on outstanding loans and prepayments exceeding four times the amount of net assets should be added to the corporate tax base. This rule does not apply to banks and insurance companies.

The corporate income tax base should be increased by the amount of interest paid in excess of the average 12-month credit interest rate applied in the banking system, as determined by the Bank of Albania.

Bad debts are only deductible if all of the following conditions are met:

- An amount corresponding with the bad debt was included earlier in income;
- The bad debt is removed from the taxpayer’s accounting books; and
- All possible legal action to recover the debt has been taken.

The amounts allocated to special reserve accounts in banks and insurance companies are deductible.

**Group taxation**
There is no group taxation in Albania.

**Tax incentives**
There are no tax incentives applicable in Albania.

**Withholding taxes (WHT)**
The gross amount of interest, royalties, dividends and shares of partnerships’ profits paid to non-resident companies are subject to 10% withholding tax, unless a double tax treaty provides for a lower rate.

Withholding tax of 10% is levied on the gross amount of payments for technical, management, installation, assembly or supervisory work, as well as payments to management and board members.

If a non-resident company does not create a permanent establishment in Albania, and a double tax treaty exists between Albania and the home country of the foreign company, the payment of withholding tax can be avoided.
Albania

**Double tax treaties**
Albania has signed 30 double tax treaties, of which 28 are already in force.

**Tax administration**

The tax year is the calendar year. The final tax return for corporate income tax is due by 31 March of the year immediately following that tax year. Predetermined advance payments of corporate income tax are due by the fifteenth of each month.

Advance payments of profit tax payable by the small business category are payable on a quarterly basis.

For advance payments, companies can decide to use their prior fiscal year after tax profit within six months of the subsequent year and submit the decision to the tax authorities no later than 31 July. The decision should state the amount allocated as statutory reserves, the amount to be used for investments and/or for increase in share capital as well as the amount to be distributed as dividends.

Companies have the obligation to pay the tax on dividends to the tax authorities no later than 30 July of the year the financial results are approved, regardless of whether the dividend has been distributed to the shareholders.

Companies have the obligation to submit to the National Registration Center every decision taken by their board of directors within 30 days from the decision’s date.

Significant developments

The most significant corporate tax change in 2009 was the approval of the new minimum taxable income for corporate income tax purposes, which is structured by sector of activity and province in Angola where the company is located.

Taxes on corporate income

The standard tax rate of 35% is levied on the taxable income of the following corporate income taxpayer groups:

- Group A – Tax is levied on actual profits as shown in taxpayers’ accounting records (e.g., public and private companies, permanent establishments of foreign entities);
- Group B – Tax is levied on taxpayers’ presumable profit (taxpayers not included in groups A or C); and
- Group C – Taxation is based on profits that taxpayers could normally earn/obtain (e.g., small family companies).

Special regimes, rules and tax rates are provided for the oil and gas industry and the mining industry.

Exemptions from corporate income tax are provided for:

- Agricultural companies (for up to 10 years);
- “Corporative organisms”;
- Culture associations;
- Companies that manage their own property; and
- Non-resident shipping operators (as long as reciprocity exists).

Corporate residence

Tax is assessed on the worldwide income of business entities with a head office or effective management in Angola, or on income attributable to a non-resident company deemed to have a permanent establishment in Angola.

Other taxes

Stamp tax
Stamp tax is payable on a wide variety of transactions and documents, at rates that are of value set in specific amounts or on a percentage basis of value.
Important examples include:

- Receipts – 1%;
- Companies’ incorporation – 0.20%; and
- Share capital increase – 0.50%.

**Consumption tax**
There is no value-added tax (VAT) or sales tax in Angola.

A consumption tax exists, which is similar to that of an excise duty. Local production, importation of goods, and a few services (e.g., hotels, restaurants, electricity, water supply and telecommunications) are subject to this tax.

The rates vary from 2% to 30%, depending on the service or goods imported or produced locally.

**Real estate income tax**
Real estate income tax (IPU) is due on actual or deemed income from real estate located in Angola.

Buildings used for activities subject to corporate income tax are exempt from IPU.

Other exemptions are provided for:

- “Corporative organisms” and economic associations;
- Recognised religious associations;
- Buildings owned by public services, humanitarian organisations, charity organisations, schools, museums and other public and social services;
- Consular representations of foreign countries (reciprocity applies); and
- New habitation buildings.

The IPU tax rate is 30%. Hotel buildings considered to be of public interest may benefit from a 50% tax reduction over a period of 15 years.

Taxable income is 80% of the annual rent received. Maintenance and conservation expenses are deductible if exceeding 20% of rental income.

**Investment income tax**
Investment income tax (IAC) is due on interests, dividends and royalties and other income of a similar nature. In Angola, the IAC code divides such income into two taxable sections as follows:

- Section A
  - Interest on loans and credit facilities;
  - Income derived from credit contracts; and
  - Income derived from deferred payments.

Tax is due at the moment that the interest or income is earned or at the moment when it is presumed to have been earned.

A minimum annual interest rate of 6% is deemed on loan agreements.
• Section B
  • Dividends;
  • Capital remunerations of members of “corporative organisms”;
  • Bonds interest;
  • Interest on shareholders’ loans;
  • Income derived from dividends not collected until the end of the year; and
  • Royalties.

For the purposes of this group of income, note that:

a. The concept of royalties includes the remuneration of any kind attributed to the use of or consent to use copyrighted literature; arts or science works, including movies and films or recordings for radio or television transmissions; patents; brands; drawings or models of a plan; formulas or secret processes. The concept of royalties also applies to the use of or the consent to use industrial, commercial or scientific equipment and information related to an experience acquired on the industrial, commercial or scientific sector.

b. A minimum annual interest rate equal to the rate used by commercial banks on credit operations is deemed interest for shareholders’ loans, except if proven that these loans do not earn any interest.

Tax is due at the moment the effective attribution of income (dividends) is earned (interest) or paid (other income).

The IAC rate is 15%, except for the following income for which the rate is 10%:

• Dividends;
• Capital remuneration of members of “corporative organisms”;
• Bonds interest; and
• Royalties.

Tax is withheld by the payer on dividends, royalties and bonds and shareholders’ loans. In any other situation, tax is assessed by the competent local tax office (i.e., on interest from ordinary loans – other than domestic bank loans – and credit facilities, current accounts, sales on credit and late payment on these loans). When the payment of interest is made to a non-resident company that is not a shareholder, Angolan law establishes that the tax obligation shifts to the Angolan resident entity paying the interest. This investment income tax payable is a cost for corporate income tax purposes and, in addition, 65% of its value is credited against corporate income tax.

**Branch income**

Branch taxable income is taxed on the same basis as separate legal entities. Income remitted by a branch to the head office is not subject to (dividends) taxation.

**Income determination**

The taxable income results of the profits computed in accordance with Angolan accounting regulations, and adjusted in accordance with the provisions of the corporate income tax code, most commonly relate to:
Angola

- Costs, if not contributing to generate profits;
- Excessive depreciation;
- Provisions other than for bad debts (limited), stocks (limited) and pending court decisions;
- Penalties;
- Non-documented costs; and
- Adjustment to intergroup charges (although transfer pricing regulations are vague and the tax authorities have not been enforcing them systematically).

**Depreciation**
Depreciation should be computed using the straight-line method; any other method must be approved by the tax authorities.

Furthermore:

a. The tax depreciation rates should respect the limits imposed by Government Ruling 755/72.
b. Depreciation not accounted for at cost are not permitted as a deduction in the following years.
c. 30% of the increase on depreciation resulting from a legal revaluation of fixed assets is not accepted for tax purposes, as well as the total increase in depreciation resulting from free revaluation of the fixed assets.

**Bad debts**
Write-off of debts is considered as a tax cost only if the write-off resulted from a bankruptcy court process.

**Provisions**
The only provisions accepted as costs for tax purposes are:

- Doubtful debts – within an annual limit of 2% of the client’s current total account value and provided that a 6% accumulated provision limit is not exceeded;
- Inventory depreciation – within limits that vary from 1% and 8% (annual and accumulated) depending on the nature of the company’s activity;
- Those respecting the limits and rules imposed by the Insurance Supervision Institute for insurance companies, as well as the Central Bank for Financial Institutions; and
- Provisions for possible losses resulting from a court process.

**Donations**
Donations are accepted as a tax cost up to a limit of 2% of the taxable income if the donations are granted to Angolan education, science, charity and cultural institutes. If granted to Angolan government, central and local administration bodies, the donations are totally accepted as tax costs.

**Deductions**
The following values can be deducted from the net profit on the calculation of the taxable income:
• Dividends received, provided that the share participation is owned for two consecutive years (or since the incorporation of the entity where the participation is held) and the share participation is not less than 25%;
• Dividends and interest of public bonds owned by insurance companies to fund their technical reserves; and
• Profits retained and that, in the three following financial years, have been reinvested by the company in new installations or, equipment may be deductible from the taxable profit the following three years after the investment is finalised (benefit not yet regulated).

**Transfer pricing**
Despite the existence of the arm’s-length principle in Angolan corporate tax law, there are no detailed regulations on transfer pricing. Taxpayers should be aware that, in light of existing generic rules included in the corporate tax code, the tax authorities do have means to adjust inter-company charges.

**Losses carried forward**
Tax losses are deductible from the taxable income of the following three years. Carryback of losses is not allowed.

**Group taxation**
There are no special rules for group taxation in Angola.

**Tax incentives**
Special regulations, such as the law of private investment and following regulations such as Decree Law No. 17/03, provide tax and customs incentives for investment projects in strategic economic development areas and sectors (that can go up to 15 years of corporate tax exemption). The oil and gas, financial and mining economic sectors are, however, regulated by specific laws.

**Withholding taxes (WHT)**
Withholding tax is applicable to payments for services provided to Angolan entities. For Angolan taxpayers this is regarded as an advance payment of the corporate income tax due at the year-end, and for non-resident companies it is a final tax.

The payments subject to this withholding tax are those related to:

a. Construction, improvement, repair or conservation of immovable property withheld at a rate of 3.5% on the gross payments (corporate income tax rate of 35% applicable on a 10% deemed margin); and

b. Other services, namely technical assistance and management fees, withheld at a rate of 5.25% on the gross payments (corporate income tax rate of 35% applicable on a 15% deemed margin).
Angola

**Tax administration**

**Tax returns**
The tax year follows the calendar year, and the annual corporate tax return must be submitted by the last business day of May of the year following the year to which the income relates.

**Tax payment**
Tax is paid in four instalments. The first three correspond to advance payments based on the expected tax to be paid or, if unknown at that date, 75% of the taxable income computed on the previous year multiplied by the tax rate (35%). The instalments are paid in January, February and March, and the final instalment is paid with the submission of the annual tax return on the last business day of May.
Corporate taxes in Antigua and Barbuda

Significant developments

There have been no significant tax or regulatory developments in the past year.

Taxes on corporate income

Corporation tax currently is imposed at a rate of 25% on all companies except financial institutions registered under the Banking Act. If a financial institution maintains its residential mortgage rates at or below 7% throughout the taxation year, then it shall pay income tax at a rate of 22.5%. The corporate tax rate was 30% prior to 1 January 2008.

Corporate residence

A corporation is deemed to be a resident if it is incorporated in Antigua, if it is registered as an external company doing business in Antigua, or if the central management and control of its business are exercised in Antigua.

Other taxes

Life insurance premium tax
A premium tax of 3% is levied on the premium income (net of agent’s commission) of all life insurance companies, whether resident or non-resident.

General insurance premium tax
A premium tax of 3% is levied on the premium income, excluding motor business (net of agent’s commission), of all general insurance companies, whether resident or non-resident.

Stamp tax on transfer of property
Stamp tax is levied on the consideration for the sale or the value of property as assessed by the Chief Valuation Officer, whichever is higher.

<table>
<thead>
<tr>
<th>%</th>

<tbody>
<tr>
<td>Vendor (parent or grandparent) (husband or wife)</td>
</tr>
<tr>
<td>Purchaser (child or grandchild) (husband or wife)</td>
</tr>
</tbody>
</table>
Vendors who are citizens of Antigua 7.5%
Vendors who are non-citizens of Antigua 7.5%

In addition, non-citizens will be required to pay a land value appreciation tax at the rate of 5%, which is assessed on the difference between the value of property when purchased, plus improvements, and the value of property at the time of sale.

Purchasers who are citizens of Antigua 2.5%
Purchasers who are non-citizens of Antigua 2.5%

In addition, non-citizens will be required to pay 5% of the value of property with reference to a non-citizens license required to hold property in Antigua and Barbuda.

**Stamp tax on transfer of shares**

Stamp tax is levied on the market value of the shares or book value of the shares, whichever is higher.

Vendors 5.0%
Purchasers 2.5%

Non-citizens must obtain a license (at a cost of XCD 400) to hold shares or be a director in a company that owns land or has a lease on land in excess of five acres for a period greater than five years.

**Property tax**

Property tax is levied at graduated rates on the basis of the market value of the real property (as assessed by the Property Valuation Department) and its use (residential or commercial).

Rates of tax are as follows:

- Agricultural land 0.10%;
- Residential land 0.20%;
- Residential building 0.30%;
- Buildings classified as other property 0.50%; and
- Land classified as other property 0.40%.

Allowances and tax rebates available as follows:

- Dwelling house allowance of XCD 150,000 from the taxable value;
- Rebates to pensioners of between 10% and 50% depending on the annual income of the pensioner;
- 5% rebate for payment of tax on or before the due date;
- New dwelling house will be exempt from tax for the first two years of being habitable; and
- Tax rebate available to special development property and property for public use of between 25% and 100%.
Sales tax
Antigua and Barbuda Sales Tax (ABST) was introduced on 29 January 2007. The ABST is applicable to a wide range of goods and services. The standard rate is 15%; hotel accommodation carries a rate of 10.5%.

A period in the ABST Act represent one month. The XCD 300,000 registration threshold covers a period of 12 months. The threshold for registration is XCD 300,000 in taxable activity per 12 month period.

A number of services including financial services, international and local transportation, sale of residential land, education, long-term accommodation (greater than 45 days), medical and veterinary services, are exempt. Certain supplies are zero-rated, including exports, basic food items, water, electricity for residential use, sale of residential property, construction of new residential premises and fuel. Intergroup transactions are taxable.

Hotel tax
Hotel taxes were repealed on 29 January 2007 with the introduction of the Antigua and Barbuda Sales Tax.

Branch income
Branch income is taxed on the same basis and at the same rate as that of corporations.

Recharges of expenses from head office to the branch will be subject to withholding tax at a rate of 25%. The recharges have to be justifiable, consistent and cannot just be based on a percentage allocation.

A resident branch of a foreign company shall be regarded as a separate company and shall be taxed on the same basis as that of a locally registered corporation.

Inventory valuation
Inventories are generally stated at the lower of cost or net realisable value. First-in, first-out (FIFO) and average cost methods of valuation are generally used for book and tax purposes. However, the Commissioner of Inland Revenue will normally accept a method of valuation that conforms to standard accounting practice in the trade concerned. Last-in, first-out (LIFO) is not permitted for tax or book purposes.

Capital gains
Capital gains are not subject to tax.

Inter-company dividends
Dividends received by a company resident in Antigua from another company resident in Antigua are taxed at the rate of 25%. Credit is given to the recipient for the tax on the dividend in computing the tax liability.

Foreign income
An Antiguan corporation is taxed on foreign branch income as earned and on foreign dividends as received. Double taxation is avoided by means of foreign tax credits where active tax treaties exist and through deduction of foreign income taxes in
Antigua and Barbuda

other cases (UK and The Caribbean Community, CARICOM). There is also relief from Commonwealth taxes.

**Stock dividends**
An Antiguan corporation may distribute a tax-free stock dividend proportionately to all shareholders.

**Deductions**

**Depreciation and depletion**
Depreciation allowed for tax purposes is computed by the diminishing-balance method at prescribed rates. Initial allowances are granted on industrial buildings and on capital expenditures incurred on plant and machinery by a person carrying on a trade or undertaking, as defined. In addition, an annual allowance of 2% is granted on all buildings. Conformity between book and tax depreciation is not required. Any gain on the sale of depreciated assets is taxable as ordinary income up to the amount of tax depreciation recaptured.

**Net operating losses**
Income tax losses may be carried forward for six years following the year in which the loss was incurred. However, the chargeable income of a company in any one income year may not be reduced by more than one half by losses brought forward. No carryback of losses is permitted.

**Payments to foreign affiliates**
An Antiguan corporation may claim a deduction for royalties, management fees and interest charges paid to foreign affiliates, provided the payments are equal to or less than what the corporation would pay to an unrelated entity. The deductibility of any payments to a foreign affiliate will be subject to an arm’s-length test.

**Cultural and social contribution**
A deduction of 50% of all substantial contributions made by any person with respect to sport, education or culture in Antigua and Barbuda is allowed against a person’s assessable income from trade, business or profession. Contributions must be in excess of XCD 10,000 in any assessment year and deductions during any assessment year will be limited to XCD 250,000.

**Interest**
No deduction is allowed for interest on loans owing to shareholders, directors, their spouses, children or relatives, or to any related parties. Only interest paid to banks and financial institutions licensed under the Financial Institutions (Non-Banking) Act on loans borrowed at commercial rates and terms is deductible.

**Restriction on rents paid**
Rents paid by a company to shareholders, directors, their spouses, children or relatives, or to any related parties in excess of 5% of the otherwise chargeable profits of the company may not be deducted.

**Restriction on compensation**
Salaries, wages, directors’ fees and other payments made for services rendered by the shareholders, directors, their spouses, children or relatives in excess of 25% of otherwise chargeable profits may not be deducted.
**Group taxation**

Group taxation is not permitted.

**Tax incentives**

**Inward investment and capital investment**

Tax incentives are currently available under the following legislation:

1. **Fiscal Incentives Ordinance 1975**: This ordinance provides to manufacturers of an “approved product” exemption from taxes for varying periods, up to a maximum of 15 years. After the period of exemption, relief by way of tax credits of up to 50% of income tax paid on profits derived from certain export sales may be obtained. The net losses arising during the tax holiday period (i.e., the excess of accumulated tax losses over total profits) may be carried forward and relieved against profits following the expiration of the tax holiday in accordance with the normal rules for set-off of losses.

2. **International Business Corporations Act 1982**: An international business company is exempt from the payment of corporate income tax and withholding tax.

3. **The Investment Authority Act 2006**: The Act provides the framework for the promotion of investment opportunities in Antigua and Barbuda by introducing a system of registration of businesses, an investment code and a range of incentives that are available to both local and foreign investors. The available incentives and concessions to which an investor would be entitled for consideration are as follows:

   a. Exemption from the payment of customs duty;
   b. Reduction of property tax;
   c. Exemption from income tax;
   d. Reduction of stamp duty; and
   e. Exemption from withholding tax.

The amount of the incentive and concessions will depend on the amount of the investment and the number of employees in the proposed business.

The investment categories are as follows:

1. **Capital investment of up to XCD 1 million or employs up to 26 persons**: This investor could qualify for exemption from the payment of customs duty on certain imports, reduction in property tax by up to 10%, exemption from the payment of corporate income tax and withholding tax for up to three years and a reduction of stamp duty by up to 10% on the sale of land and buildings used in the business operation;

2. **Capital investment of over XCD 1 million, employs over 26 persons and has at least one director or owner who is a resident of Antigua and Barbuda**: This investor could qualify for exemption from the payment of customs duty on certain imports, reduction in property tax by up to 20%, exemption from the payment of corporate income tax and withholding tax for up to five years and a reduction of stamp duty by up to 20% on the sale of land and buildings used in the business operation;

3. **Capital investment of over XCD 10 million, employs over 51 persons and has at least one director or owner who is a resident of Antigua and Barbuda**: This investor could qualify for exemption from the payment of customs duty on certain imports, reduction in property tax by up to 30%, exemption from the payment of corporate income tax and withholding tax for up to six years and a reduction of stamp duty by up to 30% on the sale of land and buildings used in the business operation;
income tax and withholding tax for up to 10 years and a reduction of stamp duty by up to 30% on the sale of land and buildings used in the business operation;
4. Capital investment of over XCD 25 million, employs over 75 persons and has at least one director or owner who is a resident of Antigua and Barbuda: This investor could qualify for exemption from the payment of customs duty on certain imports, reduction in property tax by up to 40%, exemption from the payment of corporate income tax and withholding tax for up to 12 years and a reduction of stamp duty by up to 40% on the sale of land and buildings used in the business operation;
5. Capital investment of over XCD 75 million, employs over 100 persons and has at least one director or owner who is a resident of Antigua and Barbuda: This investor could qualify for exemption from the payment of customs duty on certain imports, reduction in property tax by up to 50%, exemption from the payment of corporate income tax and withholding tax for up to 15 years and a reduction of stamp duty by up to 50% on the sale of land and buildings used in the business operation; and
6. Capital investment of over XCD 100 million, employs over 150 persons and has at least one director or owner who is a resident of Antigua and Barbuda: This investor could qualify for exemption from the payment of customs duty on certain imports, reduction in property tax by up to 75%, exemption from the payment of corporate income tax and withholding tax for up to 20 years and a reduction of stamp duty by up to 75% on the sale of land and buildings used in the business operation.

Withholding taxes (WHT)

Interest payments on bank deposits made to non-resident individuals are not subject to withholding tax. Interest payments on bank deposits made to non-resident corporations are taxed at the rate of 25%.

Where a non-resident lends money at arm’s length for the purpose of promoting industrial, commercial, scientific, housing, or other development, the rate of withholding tax is 10%. Prior approval must be sought from the Commissioner of Inland Revenue and it is recommended that Cabinet approval also be obtained.

Withholding taxes become due at the time of payment or accrual and must be paid within seven days thereof.
Antigua and Barbuda

**Tax treaties**
There is a tax treaty with the United Kingdom and a double taxation agreement between member states of CARICOM.

**Tax administration**

**Returns**
Taxes are assessed on a fiscal-year basis. The taxpayer must file a corporate income tax return within three months of the fiscal-year end, which includes audited financial statements, and the authorities would subsequently raise an assessment.

If a return is not filed on a timely basis the authorities have the power to issue estimated assessments. There is a 5% penalty for late filing (minimum of XCD 500). The taxpayer can object to assessments raised within 30 days and ask the Commissioner of Inland Revenue to review and revise. In the event that the objection is unsuccessful, the taxpayer may appeal to the Tax Appeal Board. The Commissioner of Inland Revenue has the power to enforce the collection of tax prior to the determination of any objection or appeal. The Commissioner also has the discretion to order a stay on the collection and payment of the whole or part of any assessed tax until such time as the objection or appeal is finalised if it would be unjust not to do so. Assessments for the past six years may be reviewed and revised.

**Payment of tax**
Advance tax is payable in monthly instalments and is ordinarily based on the tax chargeable and assessed in the previous fiscal-year. The standard amount of each instalment is determined as one-twelfth of the tax chargeable in the previous fiscal-year. If the assessment for the prior year has not been finalised, the Commissioner of Inland Revenue can raise an assessment based on his best judgment.

The balance of tax due after deduction of advance tax, as notified in the assessment, is payable at the time of submitting the annual corporate tax return, which must not be later than three months after the financial year-end or one-month of service of the final assessment.

Tax is deemed to be in default if not paid within 30 days of the date on which it becomes due and payable. A penalty of 20% and interest of 1% per month is charged on unpaid taxes in default.

Significant developments

From a Tax Treaty network perspective, Argentina has revoked the double tax treaty with Austria. The termination of the tax treaty became effective on 1 January 2009. On the other hand, five tax information exchange agreements (TIEAs) were signed with Andorra, Bahamas, Monaco, San Marino and Costa Rica.

The Argentine Executive Power, on 21 October 2009, introduced new rules that provide tax benefits for investments in new capital assets earmarked for industrial activities and infrastructure works (Law No. 26,360). The tax benefits consist of either accelerated depreciation (three, four, or five years) or a reimbursement of VAT for the relevant investment, but the taxpayer will be able to request both benefits in some cases (please refer to Tax incentives section).

An amnesty programme (Law No. 26,476) was approved in December 2008, allowing delinquent taxpayers to satisfy tax liabilities with substantial discounts on interest charges. The amnesty applied to tax and social security liabilities accruing prior to 31 December 2007. Delinquent taxpayers could pay down the balances in up to 120 instalments. The amnesty programme closed on 31 August 2009 and also permitted employers to formally declare disguised labour relationships free of any obligation for unpaid payroll taxes and social security contributions. The amnesty also provided for forgiveness of tax penalties (fines). The amounts collected by the Argentine Revenue Service, however, fell short of expectations.

The tax cost of doing business in the city of Buenos Aires has been increased. On 1 January 2009, all contracts executed in or with effects in the city of Buenos Aires, as well as financial transactions related to this jurisdiction that involve a financial entity established in Buenos Aires, become subject to stamp tax. Stamp tax had been abolished in the city of Buenos Aires as from January 2003 and re-established as from 12 January 2009. (Please refer to section Stamp tax.)

The Province of Buenos Aires passed a regional measure (Law No. 14,044) that raised local tax rates and imposed a new tax called “tax on charitable donations and transfers of wealth”.

Taxes on corporate income

Profits tax
The rate of profits tax on net taxable business profits is 35%. Legal entities resident in Argentina are subject to tax on Argentine and foreign-source income. Legal entities
resident are able to claim any similar taxes actually paid abroad on foreign-source income as a tax credit. The tax rate applies on net income determined on a worldwide basis.

Corporations, limited liability partnerships and branches, as well as other entities, are required to make a flat and final income tax withholding of 35% from dividend payments to resident or non-residents beneficiaries, to the extent that the amount of such dividends exceeds the net taxable income determined at a corporate level in accordance with the general tax rules.

Argentine-source income (royalties, interests, etc.) received by foreign entities is subject to withholding tax in full and final settlement at source. (Please refer to section Withholding Taxes.)

**Tax on minimum notional income**
In addition to the profits tax, there is a tax on minimum notional income. The rate is 1% on the value of fixed and current assets. The presumed tax, imposed annually is applied only in excess of the profits tax of the same fiscal year. In addition, payment of this presumed tax, not offset by the profits tax, will be treated as payment on account of profits tax chargeable during a maximum period of 10 years.

Banking and insurance entities are only subject to this tax on the 20% of the corresponding taxable assets.

**Corporate residence**

Corporate residence is determined on the basis of centres of activity, which may be the location of a company’s economic activity or management activity. Centres of activity in Argentina of non-Argentine corporations are treated as permanent establishments.

Argentina taxes its corporate residents on a worldwide basis, and a tax credit for taxes paid abroad is available.

**Other taxes**

**Value-added tax (VAT)**

It is assessable on the sales value of products (e.g., raw materials, produce, finished or partly finished merchandise) with few exemptions, and on most services (such as construction, utilities, professional and personal services not derived from employment, rental, etc.) and on import of goods and services. The general tax rate is 21%, although certain specific items are subject to a 10.5% and 27% rate. It is payable by filing monthly tax returns.

The increased rate of 27% applies on “utilities services” not rendered to final consumer in family (e.g., telecommunications, household gas, running water, sewerage and energy).

A reduced rate of 10.5% will apply on certain transactions, such as (but not limited to):

- Construction of housing;
- Interest and other costs on personal loans granted to final consumers by financial institutions;
Argentina

- Sales and imports of living bovine animals, supply of publicity and advertising in some specific cases;
- Any passenger transportation operating inside the country when the distance does not exceed 100km;
- Medical assistance in some specific cases; and
- Certain capital goods depending on the Custom Duty Code.

Exemptions

Among others, the following transactions are exempt from VAT:

- Sales of books, ordinary natural water, common bread, milk, medicine, postage stamps; aircraft used in commercial activities and for defence or internal safety, and ships or boats acquired by the National Government; and
- Supply of services such as: services rendered by the Government (National, Provincial or Local) or by public institutions, school or university education provided by private institutions subject to public educational programmes; cultural services supplied by religious institutions; hospital and medical care and related activities, transportation services for sick or injured persons in vehicles specially designed for the purpose; tickets for theatre, cinema, musical shows and sport events, the production and distribution of motion picture films; local transport of passengers (taxis, buses, etc.) up to 100km., international transportation; rental of real estate for housing purposes.

Exemption on importation

The following transactions shall be exempted from taxation:

- Final importation of goods qualifying for exemption from customs duties under special regimes for tourists, scientists and technicians, diplomatic agents, etc.; final importation of samples and parcels exempted from customs duties.

Exports of goods and services are treated as a zero rated transaction. Nevertheless, input VAT related to these transactions can either be used as a credit against output VAT or refunded pursuant to a special procedure. *(Please refer to Other issues.)*

Services rendered within the country shall be deemed to be exports if they are effectively applied or economically utilised outside the country.

VAT law also establishes that services rendered abroad but utilised in Argentina (“importation of services”) are subject to tax through a self-assessment mechanism.

There is also a system of standard VAT collections and withholdings under which liable parties (who are registered as such), Custom and other entities are required to act as a VAT collection or withholding agent with regard to sale, purchase or import transactions.

VAT paid on purchases, final imports, and rental of automobiles not considered as inventory, cannot be computed by the purchaser as a VAT credit. The same tax treatment applies to other services, such as those provided by restaurants, hotels and garages.
**Turnover tax (gross income tax)**

Each of the 24 jurisdictions into which Argentina is divided imposes a tax on gross revenues from the sale of goods and services. Exports of goods are exempt, and certain industries are subject to a reduced tax rate. Rates, rules and assessment procedures are determined locally.

Information on tax rates of the economically largest jurisdictions is as follows:

<table>

**Excise taxes**

This tax is assessable on a wide variety of items sold in Argentina (not on exports), principally on tobacco, wines, soft drinks, spirits, gasoline, lubricants, insurance premiums, automobile tires, mobiles services, perfumes, jewellery and precious stones. The bases of the assessment and tax rate of some items are:

<table>

**Tax on financial transactions – on credits and debits on bank accounts**

Bank account movements (deposits and withdrawals) are subject to this national tax at the following rates:

- 0.6% of deposits and withdrawals in bank accounts opened in local financial entities; and
- 1.2% of any transactions made in a bank without using a bank account.

The 34% or 17%, respectively, of tax paid on bank account deposit transactions and movement of funds, respectively, is creditable against income tax and minimum notional income tax and/or respective tax advances.

**Wealth tax**

This annual tax is levied on the shares or holding in the capital of local companies owned by individuals or undivided estates domiciled in Argentina or abroad, and/or companies and/or any other type of legal person domiciled abroad. It shall be assessed and paid directly by the local company, as a full and final payment on behalf of the shareholders (the issuing company has the right to recover from the shareholder the tax paid).
Argentina

The applicable tax rate is 0.5% on the value of the participation, which is generally calculated on the difference between assets and liabilities arising from the financial statements closed at 31 December or during the respective fiscal year.

**Stamp tax**
Levied by each of the 24 jurisdictions, and applies principally to contracts and agreements, deeds, mortgages, and other obligations, agreements and discharges of a civil, financial or commercial nature of which there is written evidence or, in certain instances, that are the subject of entries in books of account. The average tax rate is 1% applicable on the economic value of the contract.

In the city of Buenos Aires, the standard tax rate is 0.8% of the aggregate amount of the transactions, contracts, and deeds that are subject to the stamp tax. It also establishes special rates of 0.5%, 1%, and 2.5%; and in the case of transactions involving uncertain consideration, a fixed tax of ARS 1,000 (on the fulfilment of certain conditions).

**Payroll taxes**
Foreign and local nationals working for a local company must be included on the local payroll and will be considered as a local employee for local labour, tax and social security purposes and so both the local company and the employees will be subject to the corresponding regulations.

All the compensation paid in Argentina or abroad for work performed for the local company will be considered as local compensation and should be reported to the tax and social security authorities, as the case may be, and included in the salary slips and recorded in the local labour books.

The local employer must withhold income tax on an actual and monthly basis and make the corresponding payments to the tax authorities through monthly withholding tax returns. Individual tax rates range from 9% to 35% and personal deductions are available.

The local entity must issue salary slips every month for each employee included on its payroll, considering the total compensation mentioned above.

Employer social security contributions add up to 23% to 27% to payroll cost. There is a compulsory thirteenth-month salary. There is no restriction regarding the employment of foreigners, provided they hold working visas.

Workers’ (Employees’) Compensation: Argentine labour regulations determine different forms of compensation for employees. These include, but are not limited to, the following:

- Vacation compensations; and
- Compensation in a case of termination of employment contract with employee (prior notice of dismissal and to a severance payment, both based on seniority), etc.

Main social taxes and contributions assessable on salaries are as follows:
Percentage of gross monthly earnings (including 13th month salary)

<table>

</tbody>
</table>

1. Social security charges borne by employees are applicable up to a monthly salary cap which currently amounts to ARS 10,119.08 (updated as of May 2010).
2. Contributions made by employers are applicable to total compensation without application of any cap.
3. Employer's contribution to the national unemployment fund, family allowances fund, and social services institute for pensioners is paid at a unified rate of 17%. The rate is increased to 21% for companies the main activity of which consists of service rendering or commerce, provided the amount of their total annual sales average for the last three years exceeds USD 13.67 million (at the current exchange rate of USD 1.00 = ARS 3.90 equivalent to ARS 48 million).

Import and export duties
The levels of import duty currently range between 0% and 35%, except in cases where specific minimum duty is applied or which involve merchandise with a specific treatment. These percentages were established considering the individual competitive conditions prevailing in different production sectors and the relative advantages of contributing to the introduction of equipment and technology for local industry. In general, merchandise originating from LAIA (Latin America Integration Association – ALADI) countries is entitled to preferential duty.

In the case of export transactions, goods are valued based on the FOB clause and the approach is based on their theoretical value, rather than a positive basis as in the case of imports.

Since March 2002, definitive exports of all goods are subject to export duties. The rates vary from 5% to 45%, depending on the tariff code of the merchandise (while 5% is the current typical applied higher rates are considered for exports of agricultural products or hydrocarbons).

Branch income
The rate of profits tax on net taxable profits from Argentine sources and from activities performed abroad by the branch is 35%. Branches are also subject to Minimum Notional Income Tax.

Income determination

Inventory valuation
Inventory valuation is based on the latest purchase. Thus, LIFO may not be elected for tax purposes. Conformity between book and tax reporting is not required.
Capital gains
Capital gains and losses attract normal profits tax treatment, except that losses from the sale of shares and other equity interests may be offset only against the same type of income.

Inter-company dividends
These dividends are not included in the tax base by the recipient if distributed by an Argentine company. However, see “Withholding taxes”; tax is levied if the dividends are distributed by a foreign company.

Foreign income
Foreign income received or held undistributed abroad (in case of investments in non-stock companies) by resident corporations is subject to tax. Argentina does not have a CFC regimen. Tax losses from foreign source can only be offset against income of foreign source.

Stock dividends
These dividends are tax exempt if distributed by an Argentine company. However, see “Withholding taxes” section; tax is levied if the dividends are paid by a foreign company.

Transfer pricing rules
The transfer pricing regulations governing inter-company transactions, adopt principles similar to those of the Organisation for Economic Co-operation and Development (OECD) pursuant to which companies must comply with the arm’s-length principle in order to determine the value of goods and services in their transactions with foreign related companies.

The following taxpayers, among others, must generally file, together with their annual income tax return, a supplementary return (transactions encompassed by regulations governing transfer prices) and the transfer pricing study:

a. Taxpayers carrying out transactions with related individuals or legal entities.
   Related parties - “Two or more persons are considered to be related parties when one of them takes part, either directly or indirectly, in the administration, control or capital of the other, or when a person or group of persons takes part either directly or indirectly in the administration, control or capital of those persons” set up, domiciled or located abroad;

b. Taxpayers carrying out transactions with related individuals or legal entities set up, domiciled or located in countries with low or no taxation, whether related or not;

c. Argentine residents carrying out transactions with permanent establishments located abroad and owned by them; and

d. Argentine residents, owners of permanent establishments located abroad, for transactions carried out by the latter with persons or other type of related entities domiciled, set up or located abroad.

The Regulatory Decree provides the specific applicable rules to determine the fairness of the transfer pricing methodology. These rules are similar to those set by the OECD and contemplate six methods, including the following:

1. Comparable Uncontrolled Price – CUP;
2. Resale Price Method – RPM;
3. Cost Plus;
4. Profit Split Method – PSM;
5. Transactional Net Margin Method – TNMM; and

There is no specific hierarchy, as each particular transaction must be analysed based on the assets, functions and risks involved and on information available. Regulations establish that the most appropriate method is that which reflects the economic reality of the transactions.

**Deductions**

**General rule**
Expenses necessary to generate, maintain and preserve taxable income, and related to the company activity, are usually tax deductible, with a few exceptions, to the extent they are fair and reasonable.

**Net operating losses**
Net operating losses (NOLs) may be carried forward five years. Loss carrybacks are not permitted. Furthermore, foreign source losses must be offset by income from similar sources.

Losses on derivatives and hedging transactions can be only offset against income from the same transaction.

**Payments to foreign affiliates**
Transactions between related parties should be at arm’s length. This principle is extended to transactions with companies located in low or no tax jurisdictions. (Please refer to *Transfer pricing rules* section above). Payments to foreign affiliates or related parties and companies located in low or no tax jurisdictions that represent income of Argentine source are tax deductible, provided they are paid before the due date for filing the tax return and the corresponding withholding is paid to the tax authorities. Otherwise they would be deducted in the fiscal year in which they are paid.

Technical assistance and services that involve transfer of technology should be covered by agreements duly registered with the National Institute of Intellectual Property for information purposes. These transactions are governed by the Transfer of Technology Law (Law No. 22,426).

**Taxes**
Except for profits tax and the tax on minimum notional income, all taxes are deductible.

**Depreciation and depletion**
Depreciation is generally computed on a straight-line basis over the technically estimated useful life of the assets or, alternatively, over their standard useful lives (e.g., machinery and equipment – 10 years; furniture – 10 years). Depreciation of buildings and other constructions on real estate is 2% per annum on cost (on a straight-line basis), unless it can be proved that useful life is less than 50 years.

Depreciation of automobiles whose original cost exceeds ARS 20,000 is not deductible. Related expenses (gasoline vouchers, insurance, rentals, repairs and maintenance, etc.) are deductible up to an amount of ARS 7,200 per car per year.
Argentina

Conformity between book and tax depreciation is not required.

Profit or loss on the sale of depreciated property is determined with reference to cost less depreciation, restated for inflation as at March 1992, and is included in ordinary taxable income.

Percentage depletion is available for natural resources (mines, quarries, woods).

**Foreign exchange**
The general rule is that the foreign exchange results (gain or losses) have to be recognised on an accrual basis. However, in some cases cash basis is applicable.

Foreign exchange losses can only be offset against foreign source taxable income.

**Other significant items**

*Donations*
When made to societies and associations expressly exempt from assessment to profits tax, donations are admissible deductions up to a maximum of 5% of the donor's net taxable profits, provided certain requirements are fulfilled.

*Representation expenses*
If adequately documented, representation expenses are permissible deductions up to 1.5% of the amount of salaries accrued during the fiscal year. According to Regulatory Decree, the representation expenses are payment made in order to represent the company in the market, improve and maintain its relationship with suppliers, client, etc.

*Directors’ fees*
Amounts up to the greater of 25% of after-tax profit or ARS 12,500 per individual are deductible in the financial year to which they refer, provided they are approved and available for the director before the due date of the tax return, or in a later year of payment.

*Convertible Law*
Although the Convertibility Law is no longer in place, the adjustment of inflation for tax purposes is not yet in force. There is a strong debate regarding the reinforcement of this procedure for fiscal years ended up to December 2002. However, no final decision is in view. The wholesale price index for 2004 was 8%, for 2005 was 11% and for 2006 was 7.8%.

*Thin capitalisation*
Thin capitalisation rules apply as a restriction on the deductibility of interest arising from debts of a financial nature, contracted by taxpayers with controlling non-resident entities and can be summarised as follows:

- Interest subject to a 15.05% withholding (i.e., paid on loans granted by certain banking institutions), the portion of interest stemming from financial liabilities exceeding two times the shareholders’ equity are not deductible for tax purposes and treated as dividends.
- Interest subject to a 35% withholding tax is fully deductible.
Argentina

- According to the Regulatory Decree of the Income Tax Law, the thin capitalization rules would also be applicable to any case where a lower withholding rate of 35% is applicable (for instance, interest payments to a controlling company resident of certain tax treaty countries).

**Group taxation**

Group taxation is not permitted.

**Tax incentives**

**Province of Tierra del Fuego Regime**

Companies set up in province of Tierra del Fuego enjoy a general tax exemption and important benefits in customs matters, based on a system established by Law No. 19,640 and supplementary regulations. Tax exemption includes income tax, tax on minimum notional income, tax on personal wealth and excise tax. The VAT benefit consists on the release from payment of the technical balance of the tax (VAT debits less VAT credits). Also a reduction of the prevailing rate for tax on financial transactions and the exemption from taxation on the transfer of fuels is contemplated.

**Mining activity**

Law No. 24,196/93 created an investment regime for mining activity and is applicable to natural and legal persons. Mining ventures included within this regime enjoy fiscal stability (i.e., tax rates will remain basically the same) for a term of 30 years, except for VAT, which will adjust to the general regime. Furthermore, the regime grants incentives for profits tax, tax on assets, import duties, and any other tax for introduction of certain assets. Additionally, the possibility to obtain a VAT reimbursement during the exploration stage set forth by Law No. 24,196/93 has been regulated by General Resolution 1641 (Official Gazette 27 February 2004).

**Forestry**

Law No. 25,080 established an investment regime for plantation, protection and maintenance of forests. It contains rules similar to those for mining activity tax incentives:

- Fiscal stability for a period of thirty (30) years. The period may be extended to 50 years.
- Refund of value-added tax (VAT) resulted in the purchase or final importation of goods, leases, or services effectively for forestry investment project in a period of less than 365 days.

**Export incentives**

Exports of goods and services are exempt from value-added and excise taxes. The temporary importation of raw materials and intermediate and packaging goods for the manufacture of products for export is free from duties with the obligation of offering sufficient guarantees for the import. A reimbursement regime is in place for VAT credits paid to suppliers in relation to the export activity.

**Oil and gas industry**

Argentine government has enacted Law No. 26,154 through which grants attractive benefits to the oil and gas sector to encourage the exploration of the nation’s hydrocarbons reserves.
Argentina

This new legislation grants special incentives to investments in underdeveloped regions, speeding reimbursement of VAT (after a three-month period, inputs will be credited against other federal taxes or returned to the taxpayer), exempting from import duties, and offering an accelerated depreciation – three years – for income tax purposes.

In addition, a three-year relief from minimum notional income tax, which is levied at 1% rate on the company assets, is provided by the law.

The incentive package will be in effect for 15, 12 or 10 years, depending on whether the activities are performed in areas identified as i) continental platform, ii) within the country other than continental platform and iii) currently in production, respectively.

The above benefits will apply to the exploration permits granted as from the enactment of the Law (1 November 2006) and up to five years, for the cases mentioned in i), four years, for those described in ii) and three years in the latter cases.

There also exists a Promotion Regime established by the Law No. 26,190, which grants similar benefits for the exploration of alternative source of energy (e.g., wind energy).

**Biotechnology industry**

A promotional tax regime for development and production of modern biotechnology was introduced by Law No. 26,270. Pursuant to this law, the beneficiaries of the projects that qualify for this regime will be entitled to the following benefits:

- Income tax: accelerated depreciation of capital goods, special equipment, parts or components of newly acquired goods destined for the promoted project;
- VAT: Early refund of the tax applicable to the assets acquired for the project; and
- Social security contributions: the amount representing 50% of social security contributions actually paid on the payroll salaries involved in the project shall be converted into a tax credit bond that may be applied to payment of national taxes.

**Software industry**

A Software Promotion Regime was established through the enactment of Law No. 25,922. Taxpayers carrying out software related activities as their main purpose may qualify for the benefits granted by the new legislation. The main tax incentives contemplated by the Regime are as follows:

- Fiscal stability for a ten-year period covering national taxes;
- Reduction of social security charges (70% of these charges may be credited against certain national taxes); and
- Income tax relief (up to 60% of the applicable tax).

While most of the software related activities qualify for the fiscal stability benefit, the remaining incentives only apply to software research and development, quality control procedures and software exports.

**Capital investment and infrastructure works**

Law No. 26,360 introduced a transitory regime aimed at promoting investments in new capital goods other than automobiles addressed to industrial activities as well as infrastructure works – excluding civil works – from October 2007 until September 2010. According to this regime, taxpayers will be able to obtain (i) early recovery
of value-added tax paid for the purchase of assets or infrastructure works by means of a refund or a credit against certain other national taxes; or, alternatively, (ii) an accelerated depreciation system for income tax purposes applicable to investments on new projects made during the above period.

Province incentives on local taxes
Most of the provinces have legislation establishing incentives for the development of industries within their boundaries, especially industries that utilise or develop their natural resources and provide work for their residents. The incentives, in general, consist of exemptions from provincial and municipal taxes.

Various provinces have investment promotion regimes. Even when there are certain differences among these regimes, generally they include the following incentives:

- Exemption from provincial taxes such as turnover tax, stamp duty, real estate tax, etc;
- Reduced public utility rates;
- Support for infrastructure and equipment projects; and
- Facilities for the purchase, rental, or lease without charge of public property.

These regimes are not automatically applied and a special procedure should be followed to be entitled to the respective benefits.

Free trade zones
The free trade zones offer exporters the possibility to import free from customs duties, statistics rate and VAT, all the necessary equipment for construction of a “turnkey plant” within the zones. Furthermore, exporters manufacturing within the zones enjoy the benefit of buying supplies and raw materials from third countries, without having to pay duties or taxes that lead to increased prices.

Customs authority regulating these goods considers them as stored in a third country; therefore, incoming products are subject to inspection with the sole purpose of classifying quantity and type. In other words, goods enjoy a duty-free status until they enter the Argentine customs territory. Goods may remain in the free zone for a maximum period of five years.

Withholding taxes (WHT)

Equalisation corporate tax
Corporations, limited liability partnerships, and certain other entities are required to make a flat and final income tax withholding of 35% from dividend payments or profit distributions to resident or non-resident payees, to the extent that the amount of such dividends or profit distributions exceeds the taxable income of the distributing company, determined by applying the general tax rules (i.e., without considering any exemptions, abatements and other adjustments arising from special promotional laws) included in their retained earnings at the end of the fiscal year, immediately preceding the date of payment or distribution.

Other payments
Other payments to residents and to non-residents are subject to withholding tax rates as following:

Notes

The numbers in parentheses refer to the following notes:

1. Withholding from payments of interest and royalties to non-residents is based on a flat rate of 35% applied to an assumed percentage gross profit margin. This margin is not contestable, but the resultant rate may be limited by bilateral treaty. Under the 1998 tax reform, the general margin for interest paid for credits obtained abroad is 100%. However, a margin of 43% is applicable (1) if the debtor is a local bank, (2) if the creditor is a foreign financial institution located in a country not considered as a low or no tax jurisdiction or in countries that have signed an agreement with Argentina for exchange of information and have no bank secret, which are under the supervision of the respective central bank, (3) if the interest is paid on a loan dedicated to the purchase of tangible assets other than cars, (4) if the interest is paid on debt certificates (private bonds) issued by local companies and registered in certain countries that have signed an agreement with Argentina for the protection of investments, and (5) on interest paid on time deposits with local banks.

“Royalties” covers a variety of concepts. The rates given in this column relate specifically to services derived from agreements ruled by the Foreign Technology Law, as follows:

a. Technical assistance, technology and engineering not obtainable in Argentina – 21% (35% on assumed profit of 60%);

b. Cessation of rights or licenses for invention patents exploitation and technical assistance obtainable in Argentina – 28% (35% on assumed profit of 80%). (On non-registered agreements the rate is 31.5% (profit of 90% is assumed) or 35% (profit of 100% is assumed), depending on the case.)
Several other concepts of “royalties” are subject to rates that, in turn, may be limited by treaty. A broad sample of these concepts and the non-treaty effective rates is set forth in Note 2.

2. Payments to non-residents (only) for “royalties,” rentals, fees, commissions, and so on, in respect of the following are subject to withholding at the rates given below on the basis of assumed gross profit margins (Note 1) unless limited by treaty. The treaty concerned should be consulted to determine any limitation in each case.

| % |  
|-------------------|---|
| Freight and passenger bookings (other than those covered by special treaties), news and feature services, insurance underwriting | 3.5 |
| Containers | 7.0 |
| Rental of movable assets | 14.0 |
| Motion picture, video and sound tape rentals and royalties; radio, television, telex and telefax transmissions; any other means for projection, reproduction, transmission, or diffusion of image or sound; sale of assets located in Argentina (9,10) | 17.5 |
| Rental of real estate (9) | 21.0 |
| Any other Argentine-source income (unless the non-resident is or was temporarily resident) | 31.5 |

3. The higher tax rate is applicable on non-registered taxpayers. On interest paid to corporations by financial entities or stock exchange/open market brokers, income tax must be withheld at 3% (10% if not registered); individuals are tax exempt.

4. Resident corporations and individuals who are registered for tax purposes are subject to 6% withholding (28% if not registered).

5. Interest is exempt if paid on credit sales of machinery or other equipment, specific bank loans at preferential rate or loans by public entities.

6. The treaty limits taxation of interest to 20% (registered).

7. The 10% rate is applicable to interest on credit sales of capital equipment, any bank loan or any financing of public works; otherwise 15%.

8. Interest paid on loans with guarantee of the Norwegian Institute for Credit Guarantees, or paid in relation to imports of industrial equipment is tax exempt.

9. Deduction of actual costs and expenses may be optionally exercised.

10. Gains on the sale of shares are exempt, except for companies, permanent establishments, or other entities residing abroad whose main activity based on their statutes consists of investments to be made outside of their country of formation. These entities are subject to income tax withholding at the definite flat rate of 17.5%.

**Tax administration**

**Returns**

Tax is assessed on a fiscal-year, self-assessment basis. The due date for filing the profits and the notional income tax return is during the second week of the fifth month after the fiscal year end. Tax returns are filed electronically.

**Payment of tax**

Instalment payments on account of both profits tax and minimum notional income tax must be made in the course of the tax year. The instalment payments must be made at a monthly basis beginning in the first month after the due date of filing of the tax returns.
Argentina

**Penalties**

Penalties derived from tax infractions may be applied by tax authorities, as follows:

- Failing to file the tax return: fines range between ARS 200 and ARS 400 (approximately USD 50 – and USD 100).
- Tax omission or incorrect tax determination: The fines that range from 50% to 100% of unpaid taxes or incorrect tax calculation.
- Tax avoidance: fines range between two and 10 times the avoided tax.
- Certain tax infractions may be penalised by closing the business premises for three to 10 days. In addition, fines ranging between ARS 300 – ARS 30,000 (approximately USD 76 to USD 7,600) may be imposed.
- Simple evasion: Entities or individuals evading payment of social security contributions or withholdings, or both, payable to the Tax Authorities under the social security regime, through deceitful declarations, malicious concealment or any fraudulent or deceitful procedure, either through action or omission, in excess of twenty thousand pesos (ARS 20,000) per fiscal period, shall be punished with two to six years’ imprisonment. Such amount will be ARS 100,000 in the case of taxes, it being applied by tax and by fiscal year.
- If the infringement qualifies as aggravated evasion: Imprisonment could be extended from three years and six months to nine years in certain situations.

**Interest on late payments**

Late payment of taxes is subject to a monthly 2% interest rate. Interest will start accruing on the day after the filing due date.

**Exchange control regime**

As a result of the devaluation of the Argentine peso at the beginning of 2002, several regulations were issued to limit the transfer of money abroad. They have been made more flexible up to date.

Regulations referring to the entrance of funds to the country, the obligation of liquidation of foreign currency in the Exchange Market of payments of exports of goods and services, remain in force. The terms to comply with the liquidation obligation vary between 60 and 360 days.

There are no restrictions for the payment abroad of interest, dividends or profits, royalties and other commercial payments duly supported by the corresponding documentation. Payment abroad for other concepts may be subject to further filing requirements.

In addition, it should be particularly highlighted that a rule issued by the central bank in mid-2005 requires a compulsory one-year temporary deposit equivalent to 30% of funds brought by non-residents to Argentina, which must be kept in a reserve (encaje) for the term of one year. This deposit is made in foreign currency and does not earn interest.

There are some exceptions, as for instance, direct investments such as interest in Argentine companies (minimum 10%) or real estate which are not subject to this rule, or if the funds were borrowed for the acquisition of fixed assets and the re-payment term is longer than two years.
Other issues

VAT – export reimbursement regime
Exporters are able to file an export return with the tax authorities, reporting the VAT receivables related to their exports to be reimbursement on VAT paid in relation to the export operations. This return has to be filed within the following tax period in which the export took place. A report certified by a public accountant with respect to the value, registrations and other characteristics related to the refund must be attached to the export return.

The tax credit related to exports and other taxable activities can only be refunded in proportion to the exports, and can be fully refunded to a cap of 21% of the FOB value of the exported products.

There is no specific method stated in the legislation for allocating the tax credit related to exports, but taxpayers are able to use any methods of calculation that would be suitable to their business model. This calculation has to be approved by the tax authorities.

Finally, it is important to highlight that the tax authorities have to approve the tax credit to be refunded.

Legal entities
Foreign Companies in Argentina, carrying out their business or activity in Argentina, must have a local legal vehicle, being the most common legal entity types the following.

- Branch;
- Corporation (Sociedad Anónima, so-called “S.A.”); and
- Local Limited Liability Company (Sociedad de Responsabilidad Limitada, so-called “S.R.L.”).

Argentine Corporations and Limited Liability Partnerships, as Argentine residents, are subject to the Argentine tax system. Branches of foreign companies, whatever the nature of their activities, are taxed under the same rules as those applicable to Corporations and Limited Liability Partnerships.

Several documents are required to register an entity with the relevant authorities. Some of said documentation must be filed in the original language, duly translated and certified with the Apostille issued pursuant to The Hague Convention or legalised by the Argentine Consulate of the company’s place of origin.

At present, the minimum capital requirement to incorporate a local Corporation (“Sociedad Anonima”) is ARS 12,000 (approximately USD 3,000). There are not special requirements regarding the minimum amount of capital for Limited Liability Partnerships.

A Branch does not require capital contributions unless it is engaged in certain specific activities (e.g., banking and financing). The Branch must carry its financial statements separately from those of the foreign company.

The three legal types are subject to the same legal, tax and accounting regulations.

Significant developments

The simplified tax rules were repealed, effective 1 January 2009. As a transitional measure, the profit tax liability of taxpayers moving from simplified tax to the profits tax may not be less than 2% of revenues or more than 10% of revenues for the 2009 calendar year.

In conjunction with the repeal of the simplified tax, the annual revenue threshold requiring monthly value-added tax (VAT) reporting increased from AMD 60 million to AMD 100 million per year.

Businesses with sales exceeding AMD 58.35 million in the preceding calendar year (other than businesses that require a license that costs more than AMD 100,000 to operate and businesses producing excisable goods) are not required to account for VAT on their sales in the subsequent calendar year, until their sales in that subsequent year exceed AMD 58.35 million. However, there are no clear rules to explain how businesses should deal with input taxes once they are required to report VAT on the sales exceeding the threshold.

Businesses may register voluntarily for VAT.

Until 2008, qualifying small legal entities could opt to use the simplified taxation system if their gross turnover for the previous year did not exceed AMD 50 million.

Taxes on corporate income

Armenian entities and foreign entities doing business in Armenia through a permanent establishment are liable for corporate income tax. The standard rate is 20%.

Taxpayers engaged in agricultural production are exempt from tax on that income.

Taxpayers engaged in certain activities (e.g., car repair service, casinos, public baths and showers, gas refilling stations for motor vehicles, billiard games, organisation of computer games) must use the presumptive tax system. Under that system, the taxpayer pays a fixed tax based on the location and area occupied by the business, and will not be required to pay profit tax or VAT. The rate of tax depends on the activity undertaken.
**Corporate residence**

Resident entities are legal and business entities whose existence is established under Armenian law. Non-resident entities are those whose existence is established under foreign law.

**Other taxes**

**Value-added tax (VAT)**

Armenia's current VAT law was enacted in 1997 and is based loosely on the principles of the EU Sixth Directive. Armenia operates the input-output model of VAT. VAT-registered persons may deduct the VAT paid on their inputs from the VAT charged on their sales and account for the difference to the tax authorities.

The standard rate of VAT on domestic sales of goods and services and the importation of goods is 20%. Exported goods and related services are zero-rated. Advertising, consulting, engineering, legal, accounting, translation, data processing, banking, financial and insurance services provided to non-residents are zero-rated if the non-resident's place of business is outside Armenia. Various supplies, including most financial and education services, are VAT-exempt.

Services supplied in Armenia by non-residents that are not registered in Armenia are subject to application of a VAT reverse charge.

Except for cash purchases up to AMD 300,000 per transaction up to a maximum of AMD 3 million per month, an input tax credit will only be available if payment is remitted through a bank and the goods or services are obtained for commercial purposes.

**Excise tax**

Excise tax is payable on alcoholic beverages, tobacco products, petrol and diesel fuel, whether imported or produced domestically.

**Property tax**

Property tax is assessed on buildings, motor vehicles and means of water transport. The tax base for buildings is determined based on their cadastral value. The tax rate on public and industrial buildings is 0.3% annually of the property value. Property tax is assessed and collected at the municipal level.

**Land tax**

Land tax is paid by landowners and the permanent users of state-owned land. Tax on rented land is levied on the lessor. The land “cadastre” (valuation system) is used to determine the value of the land. Land tax for agricultural lands is calculated at 15% of the net income determined by the “cadastre” valuation. For non-agricultural land the rate is 0.5% to 1.0% of the “cadastre” value of the land. Land tax is assessed and collected at the municipal level.

**Branch income**

When a foreign company conducts business in Armenia through a permanent establishment and maintains separate accounting records for that permanent establishment, taxable income generally should be determined on the same basis as
Armenia

for domestic entities. The law on profit tax indicates that a permanent establishment is taxable on dividends received from Armenian companies and may not carry forward losses, which differs from the treatment of domestic entities. However, the permanent establishment may be able to overcome this restriction under a relevant tax treaty.

If it is not possible to determine taxable profit based on the “direct” method (taxable income less deductible expenses), income is determined based on a method agreed upon between the taxpayer and the tax authorities. The law explicitly recognises the allocation method (the taxpayer allocates a portion of its worldwide income and expenses to Armenia) as a possible approach.

Armenia has no special tax rules for non-commercial representative offices established to engage in liaison-type activities. Such offices are subject to the normal corporate income tax, but an exemption from income tax may be available under a relevant tax treaty if the activities of the representative office are not sufficient to constitute a permanent establishment for the foreign entity.

**Income determination**

Taxable profits are defined as the difference between a taxpayer’s gross income and deductible expenses. Gross income encompasses all revenues received by a taxpayer from all economic activities, unless the revenues are expressly exempt from inclusion under the law. Deductible expenses encompass all necessary and documented expenses that are directly related to conducting business or earning profit, unless a specific provision in the law restricts the deduction.

**Deductions**

Expenses incurred in the furtherance of a taxpayer’s business activities generally are deductible, unless a specific provision in the law provides otherwise (refer below).

As a general rule, interest is deductible if the related debt is used to fund business activities of the taxpayer and the interest rate is not more than double the Central Bank of Armenia rate (currently, the deductible interest rate is capped at 26%). Armenia does not have thin capitalisation rules.

Lease payments on operating leases are deductible. The lessor claims a deduction for depreciation of the leased assets. Financial leasing is treated for tax purposes as if a sale had been made. The lessee includes the value of the property in the relevant group of fixed assets and claims depreciation charges. The lessee also deducts the interest and commission elements of the lease payments in the period in which they are payable. Similarly, the lessor recognises taxable income for the total principal amount of the lease at the time when the asset is transferred, and recognises the interest and commission element of the payments over the term of the lease.

The following are key items that are not deductible for corporate income tax purposes:

- Expenses that are not supported by relevant documentation;
- Expenses incurred for advertising outside Armenia are limited to the greater of 3% of gross income or 20% of the value of services or goods exported from Armenia;
- Training of staff outside Armenia is limited to the lesser of 4% of the gross income of the reporting year or AMD 3 million per employee;
• Expenses for foreign trips are limited to 5% of the gross income of the reporting year;
• Representative expenses are limited to the lesser of 0.5% of the gross income of the reporting year or AMD 5 million; and
• Payments with respect to goodwill and amortisation of goodwill.

Companies are entitled to carryforward losses to the five subsequent income years.

**Group taxation**

There is no group taxation in Armenia.

**Tax incentives**

Taxpayers engaged in agricultural production are exempt from tax on that income.

**Withholding taxes (WHT)**

Payments to non-residents are subject to the following withholding tax rates:

• Payments for insurance, reinsurance, and transportation are taxed at 5%.
• Other income received from Armenian sources is taxed at 10%.

Withholding tax rates for non-residents may be reduced under a relevant tax treaty.

**Tax administration**

**Returns**

The annual profits tax return for resident entities must be filed by 15 April. The corresponding tax is payable by 25 April.

**Payment of taxes**

Taxpayers are required to make advance profits tax payments by the twenty-fifth day of each month. Each advance payment is equal to 1/16 of the profits tax paid for the previous year. For payments before the previous year’s tax is calculated (e.g., January to March), tax is paid based on the last filed tax return, and an adjustment is made in the first advance tax payment made after the previous year’s tax is calculated to correct the amount paid. If advance payments exceed the profits tax liability for the year, the excess may be refunded.

Advance payments are not required if a taxpayer’s profit for the proceeding year was less than AMD 500,000. Thus, newly established companies do not need to make advance payments until 25 April of the year following the start of operations.

Armenia also has a monthly minimum profits tax. If the advance profits tax payable is less than 1% of revenues for the previous month less depreciation charges (up to a maximum of 50% of revenues), the excess is paid as a minimum profits tax. The minimum profits tax is applied against profits tax payable for the year. Any excess is applied against the profits tax liability for the subsequent year.
Branches of foreign companies pay advance profits tax biannually, but only if their profit tax for the proceeding year exceeded AMD 2 million. Each advance payment is equal to 1/4 of the profits tax paid for the previous year. Branches are not subject to the minimum profits tax. The annual tax return for branches is filed by 15 April. However, the corresponding tax only needs to be paid within one month of receiving a payment notification from the tax authorities about the final amount of the calculated profit tax.
Corporate taxes in Aruba

Significant developments

Corporate income tax
As of 1 January 2007, the corporate income tax rate was reduced from 35% to 28% (except for special regime companies).

As of 1 January 2007 two fiscal facilities were abolished. Specifically, it is no longer possible to claim a deduction for investments or recover capital costs by using the accelerated depreciation method.

Turnover tax
As of 1 January 2007, Aruba introduced a turnover tax on revenues realised on the sale of goods or provision of services. At introduction, the turnover tax rate was 3%. On the export of goods, a 1% tariff may apply. As of 1 January 2010, the 3% rate was reduced to 1.5%.

Offshore regime
Officially, the Aruba offshore regime was abolished as of 1 January 2003. As a result of transitional legislation, existing offshore companies could follow the previous regime up until 31 December 2007.

Taxes on corporate income

Resident companies are taxed on worldwide income. Non-resident companies are taxed on the following Aruba sourced income:

- Income allocated to a permanent establishment or permanent representative in Aruba;
- Income from real estate located in Aruba; and
- Interests on loans secured by a mortgage on real estate located in Aruba.

The corporate income tax rate on Aruba as of 1 January 2007 amounts to 28%. Aruba does have some special tax regimes (imputation payment company, free zone company, Aruba Exempt Company), which are ultimately taxed at a lower tax rate.

Corporate income tax is levied on the income as reflected in the profit and loss statement less any allowable deductions based on local Aruba tax and case law.
Aruba

Corporate residence

A corporation that is organised under Aruba laws is a resident. Furthermore, corporations that are managed and controlled in Aruba will often be deemed residents, depending on each corporation’s specific circumstances.

Other taxes

Ground tax
If a person or company owns real estate property in Aruba as of 1 January of the respective tax year, a 0.4% ground tax is due on the amount that exceeds the value of the real estate minus a general exemption of AFL 60,000.

Real estate transfer tax
If real estate situated in Aruba is transferred, the buyer of the real estate must pay transfer tax on the sales price of the real estate (unless the value registered at the tax department is higher, in which case the registered value is the basis for the levy). The rate for the transfer of the legal ownership of real estate with a value not exceeding AFL 250,000 is 3%. The rate for the transfer of the legal ownership of real estate with a value exceeding AFL 250,000 is 6% (due on the total amount).

If shares in a real estate company are sold, no transfer tax is due.

Import duties
Import duties are imposed by a tariff, which is set as a percentage of the Cost, Insurance and Freight value of the product. A classification rule has been published that categorises various imported products into groups. A tariff ranging from 0% to 50% is levied on the various groups of products.

Foreign exchange commission
A foreign exchange commission (FEC) is due when residents make a payment abroad. The FEC is calculated as 1.3% of payments abroad. In the text of the law, a payment abroad is defined as:

- A payment with local currency or a payment against a florin account, whether or not by electronic transfer;
- A payment with foreign currency or a payment against a foreign currency account, whether or not by electronic transfer; or
- A payment against a foreign currency account abroad or against an inter-company account with a person or entity abroad, whether or not by electronic transfer.

Insofar as the payment is a result of one of the following legal transactions:

- The purchase of foreign currency or foreign exchangeables;
- Obtaining control over receivables in one or more foreign currencies; or
- An addition to an account of a non-resident of Aruba at a bank or an institution abroad.
An exemption from the FEC exists for inter-island bank transactions, as follows:

- Purchase of Antillean banknotes by Aruba residents and the purchase by Aruba residents of bank cheques in Antillean guilders and drawn from exchange banks situated in the Dutch Antilles;
- Transfers in Antillean guilders to residents of the Dutch Antilles by Aruba residents; or
- Transactions in Aruba and Antillean banknotes between exchange banks on Aruba and on the Dutch Antilles.

Furthermore, FEC will be levied on the purchase of foreign currencies (except Antillean guilders) with Aruba florins.

According to the policy of the Central Bank of Aruba, another exemption for the foreign exchange tax applies when cash is transferred to a foreign bank account of an Aruba resident. In order to apply for this exemption, certain formalities must be met. First, the foreign bank account of the Aruba resident must be registered at the Central Bank of Aruba. Secondly, the Central Bank of Aruba must grant a so-called exemption for requirements. Also, certain overviews of transactions regarding the foreign bank account must be filed with the Central Bank of Aruba on a quarterly basis.

**Turnover tax**

Every company that sells goods or provides services in Aruba is subject to a business turnover tax (“Belasting op Bedrijfsomzetten” or BBO) on the company's entire turnover or operating revenues, excluding interest. The general turnover tax rate is 1.5% as of 1 January 2010. The rate levied on the revenues realised by the export of goods is 1%.

Goods are defined as all physical objects except water, gas and electricity. Services are defined as all services rendered for payment. A payment is defined as all income received relating to the sale of goods or services. If a payment is non-monetary, the fair market value should be taken into account.

In the case of goods, the taxable event occurs either where the transportation starts (if sold abroad) or the physical location of the goods. In case of services, case law stipulates (contrary to the text of the law) that the taxable event occurs where the services are rendered.

Some exceptions apply. For example, no BBO is levied on the supply of immovable property if transfer tax is paid on the supply. Furthermore, exemptions apply to interest received, payments for hotel rooms or leasing of apartments (insofar as room tax has been paid on the proceeds) and casino revenues (insofar as gambling duties are due on these revenues).

**Branch income**

Tax rates on branch profits are the same as on other corporate profits. In principle, the transfer of profits to the head office is not subject to taxation.
Aruba

**Income determination**

**Inventory valuation**
Inventories may generally be stated on a LIFO (last-in, first-out) or FIFO (first-in, first-out) basis, provided the method chosen conforms to the sound business practice. Conformity of book and tax reporting is not required.

**Capital gains**
Capital gains are taxed as ordinary income. However, capital gains realised on the disposal of a shareholding qualifying for the participation exemption, are tax exempt. The capital gain realised on the disposal of assets may be carried over to a special tax deferral reinvestment reserve, but must be deducted from the acquisition costs of the new asset. In principle, this reinvestment reserve cannot be maintained for more than four consecutive years. If the reserve has not been used after four years, the remainder will be subject to taxation. Capital losses are tax-deductible, unless these losses are incurred on shares to which the participation exemption is applicable.

**Inter-company dividends**
Provided the conditions of the participation exemption are met, an Aruba company is exempt from taxation on all benefits from the participation, including inter-company (cash) dividends. In general, the participation exemption applies if an Aruba company holds shares in another company. If shares are held in a foreign entity, the participation exemption only applies if the shares are not held as an investment and the foreign entity is subject to tax on its profit. Please note that costs that are made for participation (this includes administration costs, interest, management expenses and such) are not deductible from the taxable result of the Aruba parent company.

**Foreign income**
An Aruba resident company is subject to corporate income tax on its worldwide income. Double taxation of certain foreign source income is avoided by means of the exemption method. If there is no legal possibility to exempt income and prevent double taxation, the foreign tax paid can be claimed as a deduction.

**Stock dividends**
Stock dividends are allowed and treated as regular dividend income. The stocks will be valued at market value for tax purposes.

**Deductions**

**Depreciation and depletion**
Depreciation of tangible fixed assets, excluding land, is taken over the estimated useful life of the asset. The basis for the depreciation includes all costs incurred with the purchase of this asset less the residual value. The straight-line method is customary; however, the declining balance method is also acceptable.

**Net operating losses**
A net operating loss (NOL) may be carried forward to the five years following the tax year that the loss was incurred. If the NOL has not been offset against profits within this period, the remaining NOLs expire. Losses incurred by an imputation payment company may be carried forward indefinitely. Carrybacks are not permitted.
**Payments to foreign affiliates**

If interest or other payments (all compensation paid for the use of material and/or immaterial goods or rendered services) are made, these payments should be made at arm's length. If the transaction is not at arm's length, only the arm's-length payment may be deducted from the taxable income.

Even if the transaction is at arm's length, the interest or other payments are still not deductible from the taxable result of the Aruba company, unless the Aruba company provides evidence that one of the following is true:

- The receiving company is not (in)directly related to the Aruba company;
- The receiving company pays an effective tax rate of at least 15%; or
- The shares in the receiving company are (for at least 50% of the shares and the voting rights) directly or indirectly listed at a qualified stock exchange.

A relation with the taxpayer is deemed to exist if one of the following is true:

- The taxpayer has an interest of at least one-third in another entity;
- An individual or entity has an interest of at least one-third in the taxpayer; or
- A third party has an interest of at least one-third in another entity, while this third party also has an interest of at least one-third in the taxpayer.

If an at arm's-length payment is made to an affiliated company that is subject to taxation, but pays an effective tax rate of less than 15%, 75% of the payment made is allowed as a deduction.

**Taxes**

Taxes paid by the company, with the exception of the corporate income tax, are tax-deductible. Taxes paid by the company with respect to the purchase of an asset (for instance paid real estate transfer tax in case of obtaining real estate) should be included in the cost of the asset.

**Other significant items**

As of 1 January 2007, it is no longer possible to claim the investment allowance or recover capital costs by using the accelerated depreciation method.

**Group taxation**

Aruba tax authorities allow Aruba resident companies with wholly owned companies to file a consolidated tax return (fiscal unity). In order to apply for this facility, a request must be filed with the Aruba tax authorities. The Aruba tax authorities provide conditions for the application of this regime. Advantages of this regime are that recognition of inter-company profits may be deferred and that losses may offset profits within the group.

**Tax incentives**

Aruba corporate income tax legislation no longer provides tax incentives. The legislation does provide incentives for certain special purpose vehicles, such as the Imputation Payment Company, the Aruba Exempt Company and the transparent company that can be used to reduce the overall tax liability.
**Withholding taxes (WHT)**

**Dividend withholding tax**

A dividend withholding tax is levied on all (formal and non-formal) dividend distributions of Aruba-based companies. The tax rate is:

- 10% of the dividend distribution;
- 5% of the dividend distribution if the shares of the distributing company or the receiving company are (for at least 50% of the shares and the voting rights) directly or indirectly listed at a qualified stock exchange; and
- 0% if the participation exemption (see Taxes on corporate income section) is applicable.

Dividends between countries of the Dutch kingdom are subject to the Regulation for the Dutch kingdom (hereinafter: the Regulation).

In certain situations the Regulation reduces the rate of the dividend withholding tax from 10% to 7.5% or even 5%. The dividend withholding tax can be reduced to:

- 7.5% if the parent company owns at least 25% of the paid in capital of the distributing company; or
- 5% if the parent company owns at least 25% of the paid in capital of the distributing company and the dividend is at the parent company level, subject to a profit tax of at least 5.5%.

If a company is incorporated under Aruba law and transfers its factual place of management to another country, all dividend distributions by this relocated company will remain subject to the Aruba dividend withholding tax.

Dividend distributions include, among others:

- Formal dividend distributions;
- Liquidation payment;
- Bonus shares;
- Paying back of share capital, unless strict conditions are met; and
- Imputation payment.

**Formal requirements**

Within 15 days after a dividend becomes payable, a dividend withholding tax return must be filed, together with payment of the amount due. A dividend is payable if it is at the disposal of the shareholder, i.e., the board of directors of the distributing company does not have to take any more action in order for the shareholder to claim the dividend. A dividend is also payable if the debt becomes interest bearing, because of the distribution.

A statement of approval of the Central Bank of Aruba is required if dividends are distributed to a foreign shareholder. If the dividend exceeds AFL 750,000 a license from the Central Bank of Aruba is required.
**Tax administration**

**Returns**
Once a corporate income tax return is issued by the authorities, taxpayers are obliged to file annual returns within two months. If within six months after the tax year has ended no return has been issued, the taxpayer is obliged to request a return within two weeks after the six months have passed. It may be argued that this obligation does not exist if a taxpayer is not subject to taxation.

If the final corporate income tax return cannot be filed within the required two-month period, a request for an extension may be filed. The tax inspector may grant an extension for a maximum period of 12 months.

**Payment of tax**
The corporate income tax, individual income tax and ground tax are due upon receipt of an assessment. The amount of tax due must be paid within two months after the date of the assessment.

**Significant developments**

New measures for the “taxation of financial arrangements” (TOFA) were enacted in March 2009 with effect for income years commencing on or after 1 July 2010 (although a taxpayer may have been able to elect to apply the new measures to income years commencing on or after 1 July 2009). These measures provide tax timing rules – accruals, realisation, fair value, retranslation, financial reports and hedging – for gains or losses in respect of financial arrangements, along with revenue account treatment of the resulting gains or losses. “Financial arrangement” is widely defined to cover arrangements that involve a cash settleable legal or equitable right to receive, or obligation to provide, something of economic value in the future. Exemptions from the new regime may be available having regard to the duration of the arrangement or the nature of the relevant taxpayer and the annual turnover or value of assets of that taxpayer. See “Income determination”.

For thin capitalisation purposes, following the cessation of a four-year transitional period after the introduction of International Financial Reporting Standards (IFRS) in Australia, which applied from tax years commencing on or after 1 January 2005, when calculating safe harbour debt amounts for thin capitalisation purposes, the provisions were amended to allow departure from the Australian equivalents to IFRS in relation to certain intangible assets and to exclude deferred tax assets and liabilities and surpluses and deficits in defined benefit superannuation funds. See “Interest” under “Deductions”.

Legislation was enacted in May 2009 to provide a one-off tax benefit for certain capital expenditure in respect of ‘depreciating assets’, where the taxpayer commences to hold the asset under a contract entered into between 13 December 2008 and 31 December 2009 (or where the taxpayer commences to construct the asset between those dates) and the asset is used or installed ready for use by 31 December 2010. The “investment allowance” provides an additional deduction of up to 50% for “small business entities” and up to 30% for other business taxpayers for the cost of purchasing new depreciating assets, and on expenditure that enhances existing depreciating assets where the cost of the asset or the expenditure is at least AUD 10,000 (or AUD 1,000 in the case of small business entities). For further details, see “Investment allowance” under “Tax incentives”.

On 5 January 2010, the Assistant Treasurer released a consultation paper setting out the proposed high-level design of the taxation laws to modernise the controlled foreign company (CFC) rules. The Government announced the modernisation of the CFC rules in May 2009 as part of wider reforms to Australia’s foreign source income anti-tax-deferral (attribution) rules. Details of the changes have yet to be finalised. It is expected that the earliest commencement date for the new rules will be for income
years commencing on or after 1 July 2010. For further details, see “Foreign income” under “Income determination”.

Legislation was introduced into Parliament in May 2010 to change the tax treatment of expenditure on research and development (R&D) from 1 July 2010. The current concessional deductions will be replaced with an R&D tax credit. For companies with an annual turnover of less than AUD 20 million, there will be a 45% refundable tax credit, equivalent to a 150% tax concession, and for companies with a turnover of greater than AUD 20 million, they will have access to a non-refundable 40% tax credit, equivalent to a 133% tax concession. See “Tax incentives”.

In May 2010, the government released its interim response to the recommendations made following the comprehensive review of Australia’s tax system (“Henry Review”) which commenced in May 2008. One of the key changes proposed by the government is that it will reduce the company tax rate from its current rate of 30% to 29% in the 2013-14 income year and to 28% from the 2014-15 income year (with a 28% rate to apply to small business companies from 2012-13), in conjunction with the introduction of a proposed new Resource Super Profits Tax (RSPT) on natural resource projects from 1 July 2012. No legislation has been developed for these proposals which will be subject to extensive consultation.

**Taxes on corporate income**

Companies are subject to federal tax on their income at a flat rate of 30%. There are no state or municipal taxes on income.

**Corporate residence**

A company is a resident of Australia for income tax purposes if it is incorporated in Australia or, if not incorporated in Australia, it carries on business in Australia and either (1) its central management and control are in Australia or (2) its voting power is controlled by shareholders who are residents of Australia.

**Other taxes**

**Goods and services tax (GST)**

The federal government levies GST at a rate of 10%, and distributes the revenue to state governments. The GST is a value-added tax (VAT) applied at each level in the manufacturing and marketing chain and applies to most goods and services, with registered suppliers getting credits for GST on inputs acquired to make taxable supplies.

Food with some significant exceptions, exports, most health, medical and educational supplies, and some other supplies are “GST-free” (the equivalent of “zero-rated” in other VAT jurisdictions) and so not subject to GST. A registered supplier of a GST-free supply can recover relevant input tax credits, although the supply is not taxable.

Residential rents, the second or later supply of residential premises, most financial supplies, and some other supplies are “input-taxed” (“exempt” in other VAT jurisdictions) and are not subject to GST. However, the supplier cannot recover relevant input tax credits, except that financial suppliers may obtain a reduced input tax credit of 75% of the GST on the acquisition of certain services.
Health insurance is GST-free. Life insurance is input taxed. General insurance is taxed. “Reverse charges” may apply to services or rights supplied from offshore, where the recipient is registered or required to be registered, and uses the supply solely or partly for a non-creditable supply.

**Luxury car tax**
The luxury car tax is levied by the federal government at the rate of 33% of the value of the car that exceeds the luxury car tax threshold (AUD 57,180 for the 2009-10 financial year) and is payable on the GST-exclusive value above the threshold. No input tax credit is available for luxury car tax, regardless of whether the car is used for business or private purposes.

**Wine equalisation tax (WET)**
The federal government levies WET at the wholesale level at a rate of 29%, in addition to 10% GST, which is calculated on the price including the WET, and it applies to wine from grapes, fruit and certain vegetables, mead and sake. Retailers do not receive an input tax credit for WET. Up to a maximum of AUD 500,000, a rebate is available to a wine producer of 29% of the wholesale price (excluding WET or GST) for wholesale sales, and of 29% of the notional wholesale selling price for retail sales and applications for own use.

**Import and excise duties**
Imports into Australia are subject to duties under the Australian Customs Tariff. The top duty rate is 5%, other than for clothing and finished textiles which are currently taxed at 10% (to be reduced to 5% in 2015). A TCF Strategic Investment Program will operate until 2015.

Australia now has comprehensive free trade agreements with the United States, Thailand, Singapore, New Zealand and Chile. In addition, a regional free trade agreement between Australia, New Zealand and Southeast Asian nations commenced on 1 January 2010, which progressively eliminates all barriers to trade in goods, services and investments.

Excise duties are imposed at high levels on beer, spirits, liqueurs, tobacco, cigarettes and petroleum products. A fuel tax credit system provides a credit for fuel tax (excise or customs duty) that is included in the price of taxable fuel. Broadly, credits are available to entities using fuel in their business and to households using fuel for domestic electricity generation and heating.

**Fringe benefits tax (FBT)**
The federal government levies FBT on employers at the rate of 46.5% on the “grossed-up value” of non-salary and wages fringe benefits provided to employees (and/or the employee’s associates) by the employer or associates. The grossing-up of the value ensures tax neutrality between providing benefits and cash remuneration. FBT generally is deductible for income tax purposes. There are some exemptions from FBT, including some minor benefits, remote area housing in certain circumstances, and specified relocation costs. In addition, there are some concessional valuation rules, in particular for living-away-from-home benefits.

**Stamp duty**
All states and territories impose a stamp duty on a wide variety of transactions at different rates. All jurisdictions impose a stamp duty on real estate conveyances, but
most exempt conveyances of goods (not associated with other property) from stamp duty. The imposition of duty on share transfers involving unlisted entities differs from state to state. Corporate reconstruction exemptions are available. Advice from a stamp duty specialist should usually be obtained where substantial stamp duty may be imposed because the amount of duty may depend on the form of the transaction.

**Payroll tax**
States and territories impose a tax on employers’ “payroll” (broadly defined). The various jurisdictions have harmonised their payroll tax legislation, but some differences remain, particularly tax rates and the thresholds for exempting employers whose annual payroll is below a certain level, after taking into account grouping rules. For example, in New South Wales the rate is 5.75% from 1 January 2009, 5.65% from 1 January 2010 and the annual exemption threshold is AUD 638,000. In Victoria the rate is 4.95% from 1 July 2008 and the annual exemption threshold is AUD 550,000. A variety of rates and thresholds apply in other state and territory jurisdictions.

**Insurance tax**
States impose taxes on insurance premiums, which may be substantial.

**Land tax**
All states and territories (except the Northern Territory) impose a tax based on the unimproved capital value of land. In general, the principal place of residence and land used for primary production is exempt from land tax.

**Local municipal taxes**
Local taxes, including water, sewerage and drainage charges, are levied based on the unimproved capital value of land and include a charge for usage (for example water usage).

**Superannuation guarantee levy**
The federal government effectively requires employers to contribute 9% of an employee’s earnings base, subject to limited exceptions, to a registered superannuation fund or retirement savings account on behalf of the employee. Failure to make these contributions will result in the employer being liable for a non-deductible superannuation guarantee charge.

No level of Australian government imposes a social security levy.

**Branch income**
Branch profits are subject to ordinary corporate rates of taxation, and there is no withholding on repatriated profits.

**Income determination**

**Inventory valuation**
Inventory generally may be valued at cost (full absorption cost), market selling value or replacement price. Where, because of obsolescence or other special circumstances, inventory should be valued at a lower amount, the lower valuation generally may be chosen, provided it is a reasonable valuation. Special rules apply, however, regarding the valuation of trading stock for certain companies joining a consolidated group.
Australia

Last-in, first-out (LIFO) is not an acceptable basis of determining cost, nor is direct costing in respect of manufactured goods and work-in-progress.

Conformity is not required between book and tax reporting. For tax purposes inventory may be valued at cost, market selling value or replacement price, regardless of how inventory is valued for book purposes. Those who choose to come within the small-business entity measures (broadly defined as taxpayers who carry on business and who, together with certain “connected” entities, have an “aggregated turnover” of less than AUD 2 million for the year) may ignore the difference between the opening and closing value of inventory, if on a reasonable estimate this is not more than AUD 5,000.

**Capital gains**

A capital gains tax (CGT) applies to assets acquired on or after 20 September 1985. Capital gains realised on the disposal of such assets are included in assessable income and are subject to tax at the company’s corporate tax rate, if the disposal is by a company. In order to determine the quantum of any gain for any assets acquired before 21 September 1999, the cost base is indexed according to price movements since acquisition, as measured by the official Consumer Price Index until 30 September 1999 (provided the asset has been held for at least 12 months). There is no indexation of the cost base for price movements after 1 October 1999. Disposals of plant and equipment are subject to general rules rather than the CGT rules. Capital losses are allowable as deductions only against capital gains and cannot be offset against other income. In calculating capital losses there is no indexation of the cost base.

Residents of Australia generally are liable for the tax on gains on the disposal of assets wherever situated, subject to relief from double taxation if the gain is derived and taxed in another country. However, the capital gain or capital loss incurred by a company from a CGT event in relation to shares in a foreign company is reduced by a percentage reflecting the degree to which the foreign company’s assets are used in an active business, if the company holds a direct voting percentage of 10% or more in the foreign company for a certain period before the CGT event. Attributable income from CGT events happening to shares owned by a controlled foreign company (CFC) are reduced in the same way. Capital gains and capital losses made by a resident company in respect of CGT events happening in respect of “non-tainted” assets used to produce foreign income in carrying on business through a permanent establishment in a foreign country are disregarded in certain circumstances.

For CGT events occurring on or after 12 December 2006, non-residents are subject to Australian CGT only where the assets are “taxable Australian property” – that is, Australian real property, or the business assets of Australian branches of a non-resident. Australian CGT also applies to “indirect Australian real property interests”, being non-portfolio interests in interposed entities (including foreign interposed entities), where the value of such an interest is wholly or principally attributable to Australian real property. “Real property” for all these purposes is consistent with Australian treaty practice, extending to other Australian assets with a physical connection with Australia, such as mining rights and other interests related to Australian real property. A “non-portfolio interest” is an interest held alone or with associates of 10% or more in the interposed entity.

CGT rollover relief is available for scrip-for-scrip (stock for stock) takeovers between companies (and also trusts) provided at least 80% of the target entity is acquired. This
rollover is not limited to listed or Australian entities. Special rules apply to determine the cost base of interests acquired by the acquiring entity in the target where the scrip-for-scrip arrangement consists of a “restructure” (broadly where just after completion of the arrangement the market value of the replacement interests issued under the arrangement by the replacement entity is more than 80% of the market value of all the shares (including options, rights and similar interests to acquire shares) issued by the replacement entity).

“Demerger” rollover relief is available where the head entity of a group transfers ownership of one or more of its subsidiaries to its shareholders provided at least 80% of the interests in the demerged entity are acquired by the owners of the head entity of the group and they receive interests in the demerged entity in the same proportion as their original interests. There are other requirements which must be satisfied in respect of each of these rollovers.

Rollover relief from CGT is available on the transfer of unrealised gains on assets, which are taxable Australian property between companies sharing 100% common ownership where the transfer is between non-resident companies, or between a non-resident company, on the one hand, and, on the other hand, a member of a consolidated group or multiple entry consolidated (MEC) group, or a resident company that is not a member of a consolidated group. See “Group taxation.”

Inter-company dividends
A “gross-up and credit” mechanism applies to franked dividends (dividends paid out of profits which have been subject to Australian tax) received by Australian companies. The corporate shareholder grosses up the dividend received for tax paid by the paying company (i.e., franking credits attaching to the dividend) and is then entitled to a tax offset (i.e., a reduction of tax) equal to the gross-up amount. A company with an excess tax offset entitlement converts the excess into a carryforward tax loss using a special formula. Dividends paid to another resident company that are unfranked (because they are paid out of profits not subject to Australian tax) are taxable, unless they are paid within a group that has chosen to be consolidated for tax purposes. Dividends paid between companies within a tax consolidated group are ignored for the purposes of determining the taxable income of the group.

An exemption from withholding tax is available for dividends that are “unfranked” under the dividend imputation rules (see below) and are declared to be conduit foreign income (CFI) received by non-resident shareholders (or unitholders) in an Australian corporate tax entity (CTE). These rules may also treat the CFI component of an unfranked dividend received by an Australian CTE from another Australian CTE as not taxable to the recipient, provided it is on-paid within a specified timeframe. Broadly, income will qualify as CFI if it is foreign income, including certain dividends, or foreign gains, which are not assessable for Australian income tax purposes or for which a foreign income tax offset has been claimed in Australia. Alternatively (and subject to certain conditions), if a foreign owned company resident in Australia receives a taxable unfranked dividend with no CFI component from a resident company in which they hold at least 10% of the voting power, a deduction may be allowed to the extent that the dividend is on-paid to a non-resident 100% parent company. In that case, the unfranked dividend on-paid to the non-resident parent generally will attract dividend withholding tax (subject to treaty relief – see “Withholding taxes”).
Foreign dividends are not assessable and are not eligible for a tax offset if received by an Australian resident company from a foreign affiliate where the recipient company has a voting power of at least 10% in the foreign affiliate. Income of a non-resident entity in which Australian residents hold interests is not assessable when repatriated to Australia where the income has been previously attributed to those residents and taxed in Australia (see below).

Dividends paid out of share capital accounts are unfrankable.

Where a company transfers an amount (e.g., profits) to a share capital account from another account, the capital account will become a tainted share capital account. Until it becomes “untainted,” any distribution debited to such an account is treated as an unfrankable dividend, and not as a return of capital.

A dividend imputation system allows Australian corporations (and New Zealand companies that have chosen to be a “New Zealand franking choice company”) to pass tax credits to individual resident shareholders, certain superannuation entities, life insurance companies in respect of their superannuation (Australian retirement plan) business and certain registered organisations, such as registered trade unions and friendly societies, in respect of Australian tax imposed on profits from which dividends (including stock dividends treated as dividends) are paid.

A resident corporation (or New Zealand company that has chosen to be a “New Zealand franking choice company”) receiving a franked dividend, that is, a dividend paid out of Australian taxed profits, may further distribute the imputed tax credits to its own resident shareholders.

Franked dividends paid to non-residents are exempt from dividend withholding tax.

Companies that are effectively wholly owned by non-residents (known as “exempting companies”) may provide franking benefits only in limited circumstances. However, non-resident shareholders in receipt of franked dividends from exempting companies are exempt from dividend withholding tax.

There is legislation designed to prevent the selective streaming of franking credits to different shareholders. Selection plans under which shareholders are given a choice of a tax-free bonus share (stock dividend), unfranked dividend or franked dividend in lieu of another dividend are no longer effective.

Under debt and equity classification rules there may be situations where interest income is treated as if it were a dividend. Similarly, dividends paid on shares that are debt interests will not be frankable.

The dividend imputation system operates in the following way. The company’s franking account is credited with tax paid. The corporate entity paying a dividend may determine the extent to which a dividend is franked, subject to anti-streaming rules and benchmarking rules that limit the ability to change the franking percentage in later periods. As indicated above, fully franked inter-company dividends effectively are untaxed under a “gross-up and credit” method. A shareholder is entitled to franking credits on dividends only in respect of ordinary shares held “at risk” for at least 45 days (90 days for preference shares). There is an exemption from these franking credit trading rules for individuals, provided the imputation rebates received in the year of
Foreign income
On 5 January 2010 the Assistant Treasurer released a consultation paper setting out the proposed high-level design of the taxation laws to modernise the controlled foreign company (CFC) rules. The government announced the modernisation of the CFC rules in May 2009 as part of wider reforms to Australia’s foreign source income anti-tax-deferral (attribution) rules. Details of the changes have yet to be announced by the government, although consultation on the new rules has commenced. The current basis upon which the foreign income of corporations resident in Australia is taxed is set out below, together with some of the key features of the proposals as released for consultation. The commencement date for the new rules has not been announced but is expected to be no earlier than for income years commencing on or after 1 July 2010.

1. Non-active income of foreign companies controlled by Australian residents (determined by reference to voting rights and dividend and capital entitlements) may be attributed to those residents under rules which distinguish between companies resident in “listed countries” (e.g., Canada, France, Germany, Japan, New Zealand, the UK and the US) and in other “unlisted” countries. In general, if the CFC is resident in an unlisted country and it fails the “active income test” (typically because it earns 5% or more of its income from passive or “tainted” sources), the CFC’s “tainted income” (very broadly, passive income and gains, and sales and services income which has a connection with Australia) is attributable.

If a CFC is resident in a listed country, a narrower range of tainted income is attributed even if the CFC fails the active income test. It is currently proposed under the new rules that the term “control” will take its ordinary meaning, rather than the current bright-line test of voting interest and entitlements to capital and dividends. With regard to the type of income to be attributed, it is proposed that sales and services income, which has a connection with Australia derived by a CFC will no longer be attributable. It is proposed that passive income, defined in broadly similar terms to the existing rules, will continue to be attributable, however, a carve out is proposed where the income arises in the ordinary course of the active conduct of a trade or business, or which are profits from assets or financial arrangements that were held for the predominant purpose of producing “active income”. It is also proposed that passive income received from a company which is a member of the same “CFC group” will not be attributable provided that payment of the amount does not provide a “benefit”, such as a deduction, to the payer for Australian tax purposes (either as a resident or as a CFC).

2. When income previously taxed on attribution is repatriated, it is not assessable for tax.

3. Dividends received directly by a resident company from a foreign company are not assessable for tax where the resident company has a (non-portfolio) voting interest of at least 10% in the foreign affiliate and does not receive the dividend in its capacity as a trustee. The basis upon which distributions may qualify for such relief (i.e., where the payee has a voting interest of at least 10% in the payer) is currently under consideration as part of the redesign of the CFC rules. The proposal is currently that the relief should only be available where the distribution is in respect of an “equity interest” (as defined for tax law purposes) and the Australian resident recipient company holds a “total participation interest” of at least 10% or the Australian resident is an attributable taxpayer. It is proposed that the relief will also
be available where the distribution is received by an Australian resident company indirectly through a trust or partnership.

4. Active foreign branch profits of a resident company from carrying on business through a permanent establishment in a foreign country and capital gains made by a resident company from the disposal of “non-tainted assets” used in deriving foreign branch income are not assessable for tax, except income and capital gains from the operation of ships or aircraft in international traffic. It is not known at this stage whether the changes mentioned above to the rules governing the CFCs will necessitate changes to the taxation treatment of foreign branch profits to align the treatment of offshore investment through a permanent establishment with investment made via a subsidiary.

5. Foreign income of Australian resident corporations and income of such taxpayers which is subject to foreign income taxes that is not effectively exempt (as broadly described above) is subject to tax, but, in most cases an offset for foreign income tax paid is allowed to the extent of Australian tax payable on such income. For income years commencing prior to 1 July 2008, such offsets generally were confined to foreign tax paid in respect of foreign sourced income and computed in three separate classes: passive income, offshore banking income and other income. In addition, it was possible to carryforward excess credits for a period of up to five years. The ability to carryforward excess credits was removed for income years commencing on or after 1 July 2008, subject to transitional rules permitting conversion of some existing carried forward balances to foreign income tax offsets. For income years commencing on or after 1 July 2008, there is no longer a quarantining of deductions or losses associated with the derivation of foreign source income.

6. There are also measures to deal with passive foreign investment funds (FIFs) (including interests in foreign companies, foreign trusts and foreign life insurance policies). Essentially, and subject to important qualifications, the FIF rules tax (attribute) increases or deemed increases in the value of interests held by Australian residents in offshore entities (wherever located), except for some categories that are specifically exempted. Investments in foreign companies listed on approved stock exchanges that are principally engaged in certain active businesses are exempt. There are several other exemptions. Legislation is currently proposed to repeal the FIF rules (with effect from the 2010-11 income year) and replace them with a narrow anti-avoidance rule (proposed Foreign Accumulation Fund (FAF) regime) which, in broad terms, is directed at schemes entered into for holding or acquiring an interest in a FAF with the sole or dominant purpose of obtaining a “tax deferral benefit”.

7. In certain circumstances, foreign limited partnerships, foreign limited liability partnerships, US limited liability companies and UK limited liability partnerships will be treated as partnerships (i.e., as a flow-through entity) rather than as a company for the purposes of Australia’s income tax laws.

**Stock dividends**

Stock dividends, or the issue of bonus shares, as they are known under Australian law, are in general not taxed as a dividend, and the tax treatment is the spreading of the cost base of the original shares across the original shares and the bonus shares. However, if a company credits its share capital account with profits when issuing bonus shares, this will “taint” the share capital account (if it is not already a tainted share capital account), causing the bonus share issue to be a dividend. Certain other rules may apply to bonus share issues, depending on the facts.
Financial arrangements

New measures for the “taxation of financial arrangements” (TOFA) apply for arrangements entered into from income years commencing on or after 1 July 2010, although a taxpayer may elect to apply the new measures to arrangements entered into from income years commencing on or after 1 July 2009. A taxpayer may also elect to have the new rules apply to all pre-existing financial arrangements that the taxpayer has at the start of the first income year to which new rules apply.

“Financial arrangement” is widely defined to cover arrangements that involve a cash settleable legal or equitable right to receive, or obligation to provide, something of economic value in the future.

The new measures provide for six tax timing methods for determining gains or losses in respect of financial arrangements, along with revenue account treatment of the resulting gains or losses to the extent that the gain or loss is made in earning assessable income or carrying on a business for that purpose. The default methods are the accruals method and the realisation method, one or other of which will apply depending on the relevant facts and circumstances of a particular financial arrangement. The accruals method will apply to spread an overall gain or loss over the life of the financial arrangement where there is sufficient certainty that the expected gain or loss will actually occur. A gain or loss that is not sufficiently certain is dealt with under the realisation method. Alternatively, a taxpayer may irrevocably choose one of four elective methods – fair value, retranslation, financial reports and hedging – to determine the tax treatment of financial arrangements covered by the legislation. Qualification criteria must be met before the elective methods may be used. Generally, these criteria require that the taxpayer prepare a financial report in accordance with Australian (or comparable) accounting standards and be audited in accordance with Australian (or comparable) auditing standards.

Exemptions from the new regime may be available having regard to the duration of the arrangement or the nature of the relevant taxpayer and the annual turnover or value of assets of that taxpayer. Certain types of financial arrangements are excluded from the new rules, including leasing and hire purchase arrangements. Foreign residents are taxable on gains from financial arrangements under the new measures to the extent that the gains have an Australian source.

Foreign exchange gains and losses

Foreign currency gains and losses are recognised when realised regardless of whether there is a conversion into Australian dollars, and are included in or deducted from ordinary income, subject to limited exceptions. There are exceptions to the timing and characterisation aspects of the realisation approach where the foreign currency gain or loss is closely linked to a capital asset. Rollover relief is available for the issuer of a succession of short-term foreign currency bill or securities, to the extent that money remains outstanding under the facility. To reduce compliance costs with foreign currency denominated bank accounts caused by the first-in, first-out (FIFO) approach mandated in the rules, taxpayers may elect to disregard gains or losses on low balance transaction accounts that satisfy a de minimis exemption, or may elect for retranslation by annually restating the balance of the account by reference to deposits, withdrawals, and the exchange rates at the beginning and end of each year. Entities or parts of entities, satisfying certain requirements, are able to choose to account for their activities in a currency other than Australian dollars for income tax purposes as an intermediate step to translating the result into Australian dollars. For foreign exchange
gains and losses associated with “financial arrangements” as defined, the practical impact of these foreign exchange rules will be reduced for those taxpayers eligible to elect certain tax timing methods under the taxation of financial arrangement measures (as previously discussed).

**Deductions**

**Depreciation and depletion**
A capital allowances regime allows a deduction for the decline in value of depreciating assets held by a taxpayer. The “holder” of the asset is entitled to the deduction and may be the economic, rather than the legal owner. A “depreciating asset” is an asset that has a limited effective life and can reasonably be expected to decline in value over the time it is used, but does not include land, trading stock or, subject to certain exceptions, intangible assets. Deductions are available for certain other capital expenditure.

Intangible assets that are “depreciating assets” (if they are not trading stock) are:

- Certain mining, quarrying or prospecting rights and information;
- Items of intellectual property;
- “In-house” software;
- Indefeasible rights to use an international telecommunications submarine cable system;
- Spectrum licenses under radio communications legislation;
- Datacasting transmitter licenses; and
- Telecommunications site access rights.

Goodwill and trademarks are not depreciating assets, and tax amortisation is not available.

Taxpayers that do not qualify as a small-business must depreciate the asset over its useful life (known as “effective life”), using either straight-line (known as the “prime cost” method) or diminishing-value method (straight-line rate multiplied by 200% for depreciating assets acquired on or after 10 May 2006).

Taxpayers may self-determine the effective life of a unit or plant or may choose the effective life contained in a published determination of the Commissioner of Taxation.

Non-small-business taxpayers are able to choose to write-off all items costing less than AUD 1,000 through a low-value pool at a diminishing-value rate of 37.5%.

For those who satisfy the “small business entity” threshold (broadly defined as taxpayers who are carrying on business and who, together with certain “connected” entities, have an “aggregated turnover” of less than AUD 2 million for the year), a simplified depreciation system applies with more attractive depreciation rates.

“Project pool” rules allow expenditure that does not itself form part of a depreciating asset to be deductible over the life of a project that is carried on for a taxable purpose. Amongst other things, items that fall within the rules include the following:

- Amounts paid to create or upgrade community infrastructure for a community associated with the project.
Site preparation costs for depreciating assets (except horticultural plants in certain circumstances).

- Amounts incurred for feasibility studies for a project.
- Environmental assessment costs applicable to the project.
- Amounts incurred to obtain information associated with the project.
- Amounts incurred in seeking to obtain a right to intellectual property.
- Costs of ornamental trees or shrubs.

The so-called “blackhole” expenditure provisions allow a five-year straight-line write-off for capital expenditure incurred on or after 1 July 2005 in relation to a past, present or prospective business, to the extent that the business is, was or is proposed to be carried on for a taxable purpose. The expenditure is deductible to the extent that it is not elsewhere taken into account (for example by inclusion in the cost base of an asset for capital gains tax purposes) and that it is not denied deductibility for the purposes of the income tax law (for example, by the rules against deducting entertainment expenditure).

Special rules apply for primary producer assets, such as horticultural plants, water and land care assets, and the treatment of expenditure on research and development (R&D) (see “Tax incentives”) and expenditure on certain Australian films.

A “luxury car” cost limit applies for depreciating the cost of certain passenger motor vehicles (AUD 57,180, cost limit for the 2009-10 income year).

Expenditure on the development of “in-house” software may be allocated to a “software development pool” and written off over three years, starting in the year after the expenditure was incurred (40% in year two, 40% in year three, and 20% in year four). Amounts spent on acquiring computer software or the right to use it (except where the acquisition is for developing in-house software) generally is treated as incurred on acquiring a depreciating asset, deductible over its “effective life” commencing in the first year it is first used or installed ready for use. Such effective life recently was amended from two and one-half to four years. “Shrink-wrapped” software acquired or manufactured for sale generally will be treated as trading stock.

A loss arising on the sale of a “depreciating asset” (depreciated value of the asset less sale consideration) is generally an allowable deduction. A gain on the sale of a “depreciating asset”, to the extent of depreciation recaptured, generally is taxed as ordinary income. Gains exceeding the amount of depreciation recaptured are also taxed as ordinary income.

A one-off tax benefit is available for certain capital expenditure in respect of “depreciating assets” (see above) where the taxpayer commences to hold the asset under a contract entered into between 13 December 2008 and 31 December 2009 (or where the taxpayer commences to construct the asset between those dates). This “investment allowance” provides an additional tax deduction of between 10% and 50% for the cost of purchasing new depreciating assets, and on new expenditure that enhances existing depreciating assets, where the cost of the asset or the new expenditure meets certain investment thresholds. See “Investment allowance” under “Tax incentives”.

www.pwc.com/taxsummaries
Australia

The cost of income-producing structural improvements, the construction of which started after 26 February 1992 is eligible for write-off for tax purposes on the same basis as that of income-producing buildings, that is, at a rate of 2.5% per annum.

Subject to exceptions referred to below, capital expenditure incurred after 15 September 1987 in the construction or improvement of non-residential buildings used for producing assessable income is amortised over 40 years at an annual 2.5% rate. Capital expenditure on the construction of buildings used for short-term traveller accommodation (e.g., hotels, motels) and industrial buildings (typically, factories) is amortised over 25 years at an annual 4% rate where construction commenced after 26 February 1992. The cost of eligible building construction that commenced after 21 August 1984 and before 16 September 1987 (or construction contracted before 16 September 1987) is amortised over 25 years at an annual 4% rate. There is no recapture of the amortised amount upon disposal of the building, except where the expenditure is incurred after 13 May 1997, in which case recapture will apply, subject to certain transitional rules.

Similar provisions apply in relation to income-producing residential buildings on which construction commenced after 17 July 1985.

The cost of consumables may be either written off immediately, or as used. The following expenditure attracts an immediate 100% deduction: environmental protection activities, dealing with pollution and waste; “landcare” operations; exploring or prospecting for minerals; mine site rehabilitation; and certain expenditure in respect of the establishment of carbon sink forests.

Tax depreciation is not required to conform to book depreciation.

Percentage depletion based on gross income or other non-cost criteria is not available.

Net operating losses
Losses may be carried forward indefinitely, subject to compliance with tests of continuity of more than 50% of ultimate stock ownership or compliance with a “same business” test. For consolidated group companies, the ability to utilise these losses is determined by a modified version of these tests. See “Group taxation”. More liberal rules apply when determining continuity of majority underlying ownership of certain “widely held” companies and companies which are majority-owned by “widely held” companies or certain other entities. These more liberal rules have two main effects: (1) the continuity of majority underlying ownership test may be satisfied by testing at certain points of time, without testing throughout the intervening periods, and (2) in certain cases, special concessional tracing rules deem entities to hold voting, dividend or capital stakes in the company so that tracing through to the ultimate beneficial owners of those stakes is not needed. In particular, registered shareholdings of less than 10% are taken to be held by a single notional shareholder, in general avoiding the need to identify small ownership interests and the risk of failing the continuity of ownership test because of small shareholder “churn”. Companies (including tax consolidated groups) can choose the proportion of their carryforward losses to be deducted in a year. Making this choice deals with the situation where untaxed franked dividends and the imputation credit on such dividends would otherwise absorb carryforward and current year losses.
Payments to foreign affiliates
A corporation can deduct royalties, management service fees and interest charges paid to non-residents, provided the amounts are commercially realistic and referrable to activities aimed at producing assessable income.

Interest
Special rules classify financial arrangements as either debt or equity interests. These rules focus on economic substance rather than legal form and take into account related schemes, and extend beyond shares. In this situation, interest expense on non-share equity would be treated as a dividend, which is potentially frankable, and would be non-deductible for the paying company/group.

Thin capitalisation measures apply to the total debt of the Australian operations of multinational groups (including branches of those groups). The measures cover investment into Australia of foreign multinationals and outward investment of Australian-based multinationals, and include a safe-harbour debt-to-equity ratio of 3:1. Interest deductions are denied to the extent that borrowing exceeds the safe-harbour ratio. Where borrowing exceeds the safe-harbour ratio, multinationals are not affected by the rules if they can satisfy the arm’s-length test (that the borrowing could have been borne by an independent entity). A further alternative test is available for outward investing entities based on 120% of their worldwide gearing.

The thin capitalisation rules apply to inward investment into Australia, where a foreign entity carries on business through an Australian permanent establishment or has direct investments in Australia or in broad terms five or fewer non-residents have at least 50%, or a single non-resident has at least 40% of an Australian entity that has incurred interest expenses that might otherwise be deductible against its Australian taxable income. Separate rules apply to financial institutions. To facilitate their inclusion in the rules, branches are required to prepare financial accounts.

International Financial Reporting Standards (IFRS), equivalents of which apply in Australia from 1 January 2005, make it more difficult for some entities to satisfy thin capitalisation rules because of the removal of internally generated intangible assets from the balance sheets. A four year transitional measure, applying from tax years commencing on or after 1 January 2005, allowed taxpayers to calculate safe harbour debt amounts using the pre-1 January 2005 standards. Legislation now allows departure from the Australian equivalents to IFRS in relation to certain intangible assets and to exclude deferred tax assets and liabilities and surpluses and deficits in defined benefit superannuation funds from applicable calculations.

Financial arrangements
New measures for the “taxation of financial arrangements” (TOFA) apply with effect for arrangements entered into from income years commencing on or after 1 July 2010, although a taxpayer may elect to apply the new measures to arrangements entered into from income years commencing on or after 1 July 2009. The new measures provide for two default methods and four elective methods for determining gains or losses in respect of financial arrangements, along with revenue account treatment of the resulting gains or losses to the extent that the gain or loss is made in earning assessable income or carrying on a business for that purpose. See “Financial arrangements” under “Income Determination”.
Australia

Foreign exchange gains and losses
Foreign currency gains and losses are recognised when realised, regardless of whether there is a conversion into Australian dollars, and are included in or deducted from ordinary income, subject to limited exceptions. See “Foreign exchange gains and losses” under “Income Determination”.

Taxes
In general, goods and services tax (GST) input tax credits, GST and adjustments under the GST law are disregarded for income tax purposes. Other taxes, including property, payroll, fringe benefits tax and other business taxes, excluding income tax, are deductible to the extent they are incurred in producing assessable income or necessarily incurred in carrying on a business for this purpose, and are not of a capital or private nature.

Other significant items
Where expenditure for services is incurred in advance, deductibility of that expenditure generally will be prorated over the period during which the services will be provided, up to a maximum of 10 years.

Subject to limited exceptions, deductions are denied for expenditure on “entertainment”, which broadly is defined as entertainment by way of food, drink or recreation, and accommodation or travel to do with providing such entertainment.

The amount of a commercial debt “forgiven” (other than an intra-group debt within a tax consolidated group) that is not otherwise assessable or does not otherwise reduce an allowable deduction is applied to reduce the debtor’s carryforward tax deductions for revenue tax losses, non-deducted capital losses, non-deducted capital expenditure, and other capital cost bases in a certain order. Any amount not so applied is not assessable to the debtor. “Forgiveness” includes the release, waiver or extinguishment of a debt (other than by full payment in cash) and the lapsing of the creditor’s recovery right by reason of a statute of limitations. Under current law, the net forgiven amount may in certain circumstances be apportioned among a non-consolidated group of companies related to the debtor (legislation to effectively repeal this rule, with effect for debts forgiven in the 2010-11 and later income years, has been introduced into Parliament, but is not yet law).

General value shifting rules apply to shifts of value, direct or indirect, in respect of loan and equity interests in companies or trusts. Circumstances in which these rules may apply include where there is a direct value shift under a scheme involving equity or loan interests, or where value is shifted out of an asset by the creation of rights in respect of the asset, or where there is a transfer of assets or the provision of services for a consideration other than at market value. The value shifting rules may apply to the head company of a tax consolidated group or MEC group for value shifts also involving entities outside the group, but not to value shifting between group members, which the tax consolidation rules address. See “Group taxation”.

Group taxation
A tax consolidation regime applies for income tax and capital gains tax purposes for companies, partnerships and trusts ultimately 100% owned by a single head company (or certain entities taxed like a company) resident in Australia. Australian resident companies that are 100% owned (either directly or indirectly) by the same foreign
company and that have no common Australian head company between them and the
non-resident parent are also allowed to consolidate as a multiple entry consolidated
group (MEC group). The group that is consolidated for income tax purposes may
differ from the group that is consolidated for accounts or for GST purposes. Groups
that choose to consolidate must include all 100%-owned entities under an “all-in”
rule and the choice to consolidate is irrevocable. However “eligible tier-1 companies”
(being Australian resident companies that have a non-resident shareholder) that are
members of a potential MEC group, are not all required to join a MEC group, when it
forms, but may form two or more separate MEC groups, if they so choose, of which the
same foreign “top company” is the 100% owner. If an eligible tier-1 company joins a
particular MEC group, all 100% subsidiaries of the company must also join the group.
While the rules for forming and joining MEC groups allow more flexibility than with
consolidated groups, the ongoing rules for MEC groups are more complex, particularly
for tax losses and on the disposal of interests in eligible tier-1 companies, which are
subject to cost pooling rules, although for practical purposes these rules are relevant
only if the non-resident is holding or disposing of an “indirect Australian real property
interest”. See “Capital gains” under “Income determination”.

A single entity rule applies to members of a consolidated or MEC group so that for
income tax purposes the subsidiary members are taken to be part of the head company,
while they continue to be members of the group and intra-group transactions are
not recognised. In general, no group relief is available where related companies are
not members of the same consolidated or MEC group. However, see previously under
“Capital gains” in “Income determination” for exceptions with regard to certain capital
gains tax rollovers.

Consolidated groups file a single tax return, and calculate their taxable income or loss
ignoring all intra-group transactions.

When a consolidated group acquires 100% of an Australian resident entity, so that it
becomes a subsidiary member, the cost base of certain assets (in general, those that
are non-monetary) of the joining member are reset for all tax purposes, based on the
purchase price plus the entity’s liabilities, subject to certain adjustments. In this way,
an acquisition of 100% of an Australian resident entity by a consolidated group is
broadly the tax equivalent of acquiring its assets. Subject to certain tests being passed,
tax losses of the joining member may be transferred to the head company, and may
be utilised subject to a loss factor, which is broadly the market value of the joining
member divided by the market value of the group (including the joining member).
The value of the loss factor (referred to as “the available fraction”) that applies for
transferred losses may be reduced by capital injections (or the equivalent) into the
member before it joined, or into the group after the loss is transferred.

Franking credits, foreign tax credits carried forward under the former foreign tax
credit regime and tax losses remain with the group when a member exits, and the cost
base of shares in the exiting member is calculated based on the tax value of its assets at
the time of exit, less liabilities subject to certain adjustments.

Generally members of the group are jointly and severally liable for group income tax
debts on the default of the head company, unless the group liability is covered by a tax
sharing agreement (TSA) that satisfies certain legislative requirements. A member who
enters into a TSA generally can achieve a clean exit from the group where a payment is
made to the head company in accordance with the TSA.
**Australia**

**Tax incentives**

**Inward investment**
Depending on the nature and size of the investment project, state governments may give rebates from payroll, stamp and land taxes on an ad hoc basis and for limited periods.

**Capital investment**
Incentives for capital investment are as follows.

1. Accelerated deductions are available for capital expenditures on the exploration for and extraction of petroleum and other minerals, the rehabilitation of former mineral extraction sites, certain environmental protection activities, the establishment of certain “carbon sink” forests and for certain expenditure of primary producers.

2. A temporary “investment allowance” provides an additional deduction of between 10% and 50% for the cost of purchasing new tangible “depreciating assets” (see “Depreciation and depletion” under “Deductions”), and for new expenditure on enhancing existing depreciating assets where the cost of the asset or the new expenditure is at least AUD 10,000 (or AUD 1,000 in the case of small business entities, such that generally where the annual “aggregated turnover” of the taxpayer and certain associated taxpayers is under AUD 2 million).

In summary, the investment allowance deduction that can be claimed is as follows:

<table>
<thead>
<tr>
<th></th>
<th>First use time (Note 2) is on or before 30 June 2010</th>
<th>First use time (Note 2) is after 30 June 2010 but on or before 31 December 2010</th>
</tr>
</thead>
<tbody>
<tr>
<td>Small business entity</td>
<td>Investment commitment time (Note 1) between 13 December 2008 and 31 December 2009 (inclusive)</td>
<td>50%</td>
</tr>
<tr>
<td>Other taxpayers</td>
<td>Investment commitment time (Note 1) between 13 December 2008 and 30 June 2009 (inclusive)</td>
<td>30%</td>
</tr>
<tr>
<td></td>
<td>Investment commitment time (Note 1) between 1 July 2009 and 31 December 2009 (inclusive)</td>
<td>10%</td>
</tr>
</tbody>
</table>

Note 1: The investment commitment time is generally the time at which the taxpayer enters into a contract under which the taxpayer starts to hold the depreciating asset (or incurs expenditure to enhance an existing depreciating asset), or starts to construct the asset.

Note 2: The first use time is generally the time at which the taxpayer starts to use the asset or have it installed ready for use.

There is no entitlement to the investment allowance outside the parameters specified above.
In each case, to be entitled to make the claim, it must be reasonable to conclude that at the time the asset is first used or installed ready for use, or the new expenditure is incurred on improving the asset, the asset will be principally used in Australia for the principal purpose of carrying on a business. This investment allowance deduction is available to the “holder” of the depreciable asset and is in addition to the normal capital allowance deductions able to be claimed in relation to such assets. This means that except in the case of the lease of a “luxury car”, it will generally be the lessor who is entitled to the investment allowance (assuming the other criteria are satisfied). In the case of hire purchase contracts and arrangements treated as such under the tax law, the holder of the asset is generally the entity that hires the asset from the hirer.

The investment allowance is not available for the purchase of trading stock or land, or to improvements to land which are not treated under the tax law as depreciable assets but the cost of which may be deducted under the structural improvement capital allowance provisions (see “Depreciation and depletion” under “Deductions”). Intangible assets, which may qualify for a capital allowance as a depreciable asset – such as “in-house software”, patents, copyright, registered designs (and licences in respect thereof) and mining, prospecting and quarrying rights/information – do not qualify for investment allowance.

3. Subject to changes proposed with effect from 1 July 2010 (see below), deductions of up to 125% of amounts expended apply to eligible R&D expenditure incurred by a company incorporated in Australia on projects whose details are set out in an R&D plan that has previously been approved by the company’s board of directors or an authorised person. To qualify the company must lodge a registration application with Innovation Australia not later than 10 months after the end of the relevant income year. The concessional deduction may be cancelled retrospectively if subsequent exploitation of the results is not on normal commercial terms and is not “of the kind to be expected of hypothetical persons dealing with each other at arm’s length and from positions of similar or like or roughly equivalent bargaining power.” Expenditure in acquiring or gaining access to certain pre-existing technology, known as “core technology expenditure,” is deductible at a rate of 100% of the amount expended if the purpose of acquiring the technology is to carry on eligible R&D. The deduction in any year cannot exceed one-third of the amount of expenditure incurred in that year on R&D related to that core technology. Undeducted “core technology expenditure” may be carried forward for deduction in future years, subject to the same requirements. There is an R&D tax offset for certain small companies and a 175% premium rate deduction for certain expenditure years where companies increase their R&D expenditure over the average expenditure for the preceding three-year period. In certain circumstances, an Australian company undertaking R&D activities in Australia wholly or principally on behalf of a foreign related entity, may be able to claim the 175% rate. Special grant programmes may be available to assist corporations in the conduct of certain research and development in Australia. These grants are awarded on a discretionary basis.

Within a consolidated regime, R&D concessions are claimed by the head company on behalf of the group.

As mentioned above, the government proposes to change the tax treatment of expenditure on R&D. For income years commencing on or after 1 July 2010, the
current concessional deductions will be replaced with an R&D tax credit. For companies with an annual turnover of less than AUD 20 million, there will be a 45% refundable tax credit, equivalent to a 150% tax concession. This equates to a cash saving of 15% every dollar of R&D spend, and will be refundable where the company is in a tax loss position. For companies with a turnover of greater than AUD 20 million, they will have access to a non-refundable 40% tax credit, equivalent to a 133% tax concession. This equates to a cash saving of 10 cents for every dollar of R&D spend. Generally, only R&D activities undertaken in Australia qualify for the new R&D tax incentive. However, R&D activities conducted overseas also qualify in limited circumstances where the activities cannot be undertaken in Australia. The 175% premium concession and international premium concession will be abolished. Eligibility criteria will be tightened to support “only genuine R&D”. Legislation to give effect to the proposals was introduced into Parliament on 13 May 2010.

4. There are a number of tax concessions aimed at encouraging investments in the venture capital sector. Non-resident pension funds that are tax-exempt in their home jurisdiction, are residents of Canada, France, Germany, Japan, UK, US, or another country prescribed by regulation, and satisfy certain Australian registration requirements are exempt from income tax on the disposal of investments in certain Australian venture capital equity held at risk for at least 12 months. A similar exemption is extended to other tax-exempt non-resident investors, including managed funds and venture capital fund-of-funds vehicles and taxable non-residents holding less than 10% of a venture capital limited partnership. These investors are able to invest in “eligible venture capital investments” through an Australian resident venture capital limited partnership or through a non-resident venture capital limited partnership. For periods from 1 July 2002 until the end of the 2006-07 income year, the exemption applies only to investors from the United States, United Kingdom, Japan, Germany, France and Canada, Finland, France, Italy, the Netherlands, New Zealand, Norway, Sweden, and Taiwan. Thereafter, the restriction on the country of residence of non-resident investors no longer applies (although general partners of specified classes of limited partnership are excluded). “Eligible venture capital investments” is limited to specified interests in companies and trusts. Detailed rules in the legislation prescribe the nature of such investments and the characteristics, which such companies and trusts and their investments must possess.

5. There is a venture capital tax concession for “pooled development funds” (PDFs). PDFs are investment companies established to provide equity capital to small and medium-size enterprises. PDFs are taxed on their net income at 25%, except for income from small and medium-size enterprises, which is taxed at 15%. PDFs are entitled to imputation credits on the receipt of franked dividend income. Dividends from PDFs are tax exempt. Gains on the sale of shares in a PDF are exempt from tax, and losses are not deductible. The existing PDF arrangements have been progressively replaced by a newer investment vehicle called an early stage venture capital limited partnership (ESVCLP). The existing PDF arrangements closed to new registrations from 21 June 2007. For income years commencing on or after 1 July 2007 a new investment vehicle called an early stage venture capital limited partnership (ESVCLP) has been introduced. The thresholds for qualification include requirements that, amongst other things, the committed capital of ESVCLP must be at least AUD 10 million but not exceed AUD 100 million, the investments made must fall within prescribed parameters as to size and proportion of total capital and the ESVCLP must have an investment plan approved by Innovation Australia. Where the thresholds for their application are met, the ESVCLP provisions provide...
flow-through tax treatment to domestic and foreign partners with the income and capital received by the partners being exempt from taxation. As the income will be tax exempt, the investor will not be able to deduct investment losses.

6. The taxable income derived from pure offshore banking transactions by an authorised offshore banking unit in Australia is taxed at the rate of 10%.

7. Taxation incentives currently are provided to both investors in, and producers of, films in Australia. However, the provisions which, subject to a number of conditions, provided an accelerated deduction for certain capital expenditures on films made wholly or substantially in Australia are being phased-out, with no deductions being available after the 2009-10 income year. These provisions regarding film incentives have been replaced with refundable tax offsets which are available to companies for certain expenditure incurred in Australia in producing specified classes of film or undertaking specified post, digital or special effects production activities in respect of specified classes of films. The concessions are only available to a company that is either an Australian resident or a non-resident carrying on business through an Australian permanent establishment and which has been issued with an Australian Business Number. The availability of the offsets is subject to a number of conditions, including meeting registration and “minimum spend” requirements. The rate of the offset varies from 15% to 40% depending upon the nature of the relevant film and activities undertaken.

8. There is an Entrepreneurs’ Tax Offset (ETO) of up to 25% for businesses run by small business entities, which can include companies with an annual turnover of up to AUD 75,000.

Other incentives
Cash grants for export-market development expenditure are available to eligible businesses seeking to export Australian-source goods and services.

**Notes**

Numbers in parentheses refer to the following notes:

1. Dividends paid to non-residents are exempt from dividend withholding tax except when paid out of a company that has not borne Australian tax (i.e., unfranked dividends). Dividends include those stock dividends that are taxable. The rates shown apply to dividends on both portfolio investments and substantial holdings other than dividends paid on or after 26 June 2005 in connection with an Australian permanent establishment (PE) of the non-resident. Unfranked dividends paid to non-residents are exempt from dividend withholding tax to the extent that the dividends are declared by the company to be “conduit foreign income”. There is also a deduction from 1 July 2000 in certain cases to compensate for the company tax on inter-entity distributions where these are on-paid.
by holding companies to a 100% parent that is a non-resident (see “Inter-company dividends” under “Income determination”). Dividends paid to a non-resident in connection with an Australian PE on or after 26 June 2005 are taxable to the non-resident on a net assessment basis (i.e., the dividend and associated deductions will need to be included in the determination of the non-resident’s taxable income – the dividend is not subject to dividend withholding tax), and a franking tax offset is allowable to the non-resident company for franked dividends received.

2. Australia’s interest withholding tax rate is limited to 10% of gross interest although the treaty may allow for a higher maximum limit. An exemption from withholding tax can be obtained for interest on certain public issues or widely held issues of debentures. Provisions exist to ensure that discounts and other pecuniary benefits derived by non-residents on various forms of financings are subject to interest withholding tax. Interest paid to non-residents by offshore banking units is exempt from interest withholding tax where offshore borrowings are used in offshore banking activities (including lending to non-residents). An offshore borrowing is defined as a borrowing from (1) an unrelated non-resident in any currency or (2) a resident or a related person in a currency other than Australian currency.

3. Royalties paid to non-residents (except in respect of a PE in Australia of a resident of a treaty country) are subject to 30% withholding tax (on the gross amount of the royalty), unless a double taxation agreement provides for a lesser rate.

4. For Australian-sourced dividends which are “franked” under Australia’s dividend imputation provisions and paid to a person who directly holds at least 10% of the voting power of the company, the limit is 10% (although note that Australia does not impose withholding tax on franked dividends). For Argentinean-sourced dividends paid to a person who holds at least 25% of the capital in the company, the limit is 10%. A 15% limit applies to other dividends.

5. Source-country tax is limited to 10% of the gross amount of royalties in relation to copyright of literary, dramatic, musical, or other artistic work; the use of industrial or scientific equipment; the supply of scientific, technical or industrial knowledge; assistance ancillary to the above; or certain forbearances in respect of the above. Source-country tax is limited to 10% of the net amount of royalties for certain technical assistance. In all other cases it is limited to 15% of the gross amount of royalties.

6. Tax is limited to the indicated percentage of gross royalty.

7. Under a protocol signed on 23 January 2002 the maximum withholding tax rate on interest is 10%. The Protocol adopts a 5% dividend withholding tax rate to franked dividends paid by an Australian resident company and in the case of dividends paid by a Canadian resident company (other than a non-resident owned investment corporation) to a company that holds directly at least 10% of the voting power in the dividend company (although note that Australia does not impose withholding tax on franked dividends). Otherwise the maximum withholding tax rate on dividends will continue to be 15%. The protocol has effect in Australia in relation to dividends, interest and royalties derived on or after 1 January 2003.

8. Except Hong Kong and Macau.

9. The treaty between Australia and the Czech Republic allows Australia to impose a 5% withholding tax on the franked part of a dividend in certain circumstances (although note that Australia does not impose withholding tax on franked dividends). In the Czech Republic a rate of 15% applies to the gross amount of dividends if the dividends are paid to a company, which holds directly at least 20% of the capital of the company paying the dividend.

10. East Timor does not have a comprehensive double tax agreement with Australia. However, the Timor Sea Treaty governs the taxation rights between the two countries for petroleum-related activities conducted in the Joint Petroleum Development Area of the Timor Sea by any person or entity, irrespective of the residency status of that person or entity.

11. Where the Timor Sea Treaty applies to third-country resident payees, only 10% of the total gross interest, dividend or royalty payment is subject to Australian withholding tax, as follows: interest – 10% of total gross interest paid is subject to withholding tax at a rate of 10%; dividends – 10% of total gross unfranked dividends paid is subject to withholding
tax at a rate of 15%, or at the relevant double tax agreement rate of the recipient; royalties – 10% of total gross royalties paid is subject to withholding tax at a rate of 10%, or at the relevant double tax agreement rate of the recipient. However the other 90% of each such amount is subject to East Timorese withholding tax at the same rates.

12. The current agreement came into force on 10 November 2007 and has effect in Australia in respect of withholding taxes for income derived on or after 1 January 2008 and in respect of other income, profit or gains derived on or after 1 July 2008.

13. On 20 June 2006 Australia and France signed a new agreement. The new agreement has effect in Australia in respect of withholding tax on income derived on or after 1 January 2010, being the calendar year next following 1 June 2009, which was the date on which the new agreement entered into force. The source country will exempt inter-corporate non-portfolio (i.e., minimum 10% shareholding) dividends paid out of profits that have borne the normal rate of company tax. There is a 5% rate limit for all other non-portfolio dividends. A rate limit of 15% will continue otherwise to apply for dividends. A rate limit of 10% applies to interest except no tax will be chargeable in the source country on interest derived by a financial institution resident in the other country or a government or political or administrative subdivision or local authority or central bank of the other country. The rate limit for royalties reduced to 5% from 1 January 2010. Amounts derived from equipment leasing (including certain container leasing) are excluded from the royalty definition and treated either as international transport operations or business profits.

14. The source-country limit under the Indian agreement is 10% for royalties paid in respect of the use of or rights to use industrial, commercial or scientific equipment or for the provision of consulting services related to such equipment. In other cases the limit is 15%.

15. The source-country limit under the Indonesian agreement is 10% for royalties paid in respect of the use of or the right to use any industrial, commercial or scientific equipment or for the supply of scientific, technical, industrial, or commercial knowledge or information, and it is 15% in other cases.

16. A nil dividend withholding tax rate applies to franked dividends paid by an Australian resident company to an entity that holds directly at least 10% of the voting power in the dividend paying company, otherwise a 15% withholding tax rate applies. In relation to dividends paid by a company resident of Malaysia, no withholding tax applies.

17. Source-country tax in Malta is limited to the tax chargeable on the profits out of which the dividends are paid.

18. A nil dividend withholding tax rate applies to franked dividends paid (in Mexico, those dividends that have been paid from the net profit account) to a company that holds directly at least 10% of the voting power in the dividend paying company, otherwise a 15% withholding tax rate applies. In all other cases, a 15% withholding tax rate will apply to dividends.

19. Source-country tax is limited to 10% when interest is paid to a bank or an insurance company, derived from bonds and securities that are regularly and substantially traded on a recognised securities market, paid by banks (except where the prior two criteria apply) or paid by the purchaser to the seller of machinery and equipment in connection with a sale on credit. It is 15% in all other cases.

20. For Australian-source dividends, the limit is 15%. Where dividends are sourced in Papua New Guinea, the limit is 20%.

21. Source-country tax is limited to 15% where relief by way of rebate or credit is given to the beneficial owner of the dividend. In any other case, source-country tax is limited to 25%.

22. Source-country tax generally is limited to 15% of gross royalties if paid by an approved Philippines enterprise. In all other cases, the rate is limited to 25% of the gross royalties.

23. Source-country tax (Australia) is limited to 5% where a dividend is paid to a Romanian resident company that holds directly at least 10% of the capital of the Australian company paying the dividend to the extent that the dividend is fully franked. Source-country tax (Romania) is limited to 5% where a dividend is paid to an Australian resident company that holds directly at least 10% of the capital of the Romanian company paying the dividend if the dividend is paid out of profits that have been subject to Romanian profits tax. In other cases it is limited to 15%.

24. Source country tax generally is limited to 15%. However, a rate of 5% applies where the dividends have been fully taxed at the corporate level, the recipient is a company which has a minimum direct holding in the paying company and has invested a minimum of
AUD 700,000 or the Russian ruble equivalent in the paying company; and where the dividends are paid by a company that is a resident in Russia, the dividends are exempt from Australian tax.

25. The agreement with the Russian Federation is the first of Australia’s new treaties to include spectrum licenses in the definition of royalties.

26. Source-country tax (Taiwan) is limited to 10% of the gross amount of the dividends paid to a company which holds at least 25% of the capital of the company paying the dividends. A rate of 15% applies in all other cases. To the extent that dividends are franked because they are paid out of profits that have borne Australian tax, they are exempt from dividend withholding tax. See Note (1) above. The treaty allows Australia to impose a 10% withholding tax on the franked part of a dividend.

27. The source-country limit where the recipient has a minimum 25% direct holding in the paying company is 15% if the paying company engages in an “industrial undertaking”; 20% in other cases.

28. The source-country limit is 10% when interest is paid to a financial institution. It is 25% in all other cases.

29. Source country tax is generally limited to 15%. However, an exemption applies for dividends paid to a listed company which satisfies certain public listing requirements and which controls 80% or more of the voting power in the company paying the dividend, and a 5% limit applies to dividends paid to other companies with voting power of 10% or greater in the dividend paying company.

30. Source country tax is generally limited to 10%. However, generally nil interest withholding tax is payable where interest is paid to a financial institution or a government body exercising governmental functions.

31. Source country tax is generally limited to 15%. Exceptions are: no source country tax is chargeable on dividends to a beneficially entitled company, which satisfies certain public listing requirements, and holds 80% or more of the voting power in the company paying the dividend. A 5% limit applies to dividends paid to other companies with voting power of 10% or greater in the dividend paying company. No limit applies to US tax on dividends paid on certain substantial holdings of Australian residents in US real estate investment trusts (REITs). In practical terms US tax on these dividends is increased from 15% to the current US domestic law rate of 30%. The 15% rate applies to REIT investments made by certain listed Australian property trusts subject to the underlying ownership requirements not exceeding certain levels. Investments in REITs by listed Australian property trusts acquired before 26 March 2001 are protected from the increased rate.

32. Source country tax generally is limited to 15%. However, generally nil interest withholding tax is payable where interest is paid to a financial institution or a government body exercising governmental functions. Rules consistent with US tax treaty policy and practice will allow interest to be taxed at a higher 15% rate (the rate that generally applies to dividends) and for tax to be charged on intra-entity interest payments between a branch and its head office.

33. Amounts derived from equipment leasing (including container leasing) are excluded from the royalty definition.

34. Source-country tax is limited to 15% (Australia) and 10% (Vietnam).

35. A nil withholding rate will apply in certain cases to inter-corporate dividends where the recipient holds directly at least 80% of the voting power in the dividend paying company for the 12-month period prior to payment. A rate of 5% applies to all other inter-corporate dividends where the recipient holds directly 10% or more of the voting power of the company paying the dividend. A general limit of 15% applies to all other dividends.

36. Prior to 1 January 2009, a nil withholding tax rate applied to dividends paid out of profits that have borne the normal rate of company tax and are paid to a company which holds directly at least 10% of the capital of the dividend paying company. A 15% rate applied in all other cases.

37. For dividend income derived on or after 1 January 2008, a nil withholding rate applies to inter-corporate dividends where the recipient holds directly 80% or more of the voting power of the company paying the dividend. A 5% rate limit applies on all other inter-corporate dividends where the recipient holds directly 10% or more of the voting power of the company paying the dividend. A 15% rate applies in all other cases.
38. A rate limit of 10% will apply to interest except no tax will be chargeable in the source country on interest derived by a financial institution resident in the other country or a government or political or administrative subdivision or local authority or central bank of the other country.

39. Amounts derived from equipment leasing (including certain container leasing) are excluded from the royalty definition and treated either as international transport operations or business profits. The rate of 5% applies to royalties derived on or after 1 January 2008. Before that date, a 10% rate applied.

40. On 31 January 2008 Australia and Japan signed a new agreement. The new agreement has effect in Australia in respect of withholding taxes on income derived on or after 1 January 2009. The source country will exempt inter-corporate dividends where the recipient holds directly 80% or more of the voting power of the company paying the dividend and certain “limitation of benefit” thresholds are met. A 5% rate limit will apply on all other inter-corporate dividends where the recipient beneficially holds directly 10% or more of the voting power of the company paying the dividend. A rate limit of 10% will otherwise apply for dividends. However where the dividends are paid by a company that is a resident of Japan, which is entitled to a deduction for the dividends in Japan, the rate limit is 15% where more than 50% of the assets of the paying company consist, directly or indirectly of real property situated in Japan and 10% in all other cases. Special rules apply to distributions to Japanese residents by real estate investment trusts (REITs). A rate limit of 10% applies to interest except no tax will be chargeable in the source country on interest derived by a financial institution resident in the other country or a government or political subdivision or local authority or central bank or other specified entity of the other country. From 1 January 2009, a 5% withholding tax rate on royalties applies. Before 1 January 2009, a general limit of 10% withholding tax on royalties applied. Under the new agreement, amounts derived from equipment leasing (including certain container leasing) will be excluded from the royalty definition and treated either as international transport operations or business profits.

41. A general rate limit of 10% applies to interest. However, in respect of interest derived on or after 1 January 2008 no tax will be chargeable in the source country on interest derived by a government of the other country (including its money institutions or a bank performing central banking functions) from the investment of official reserve assets and on interest derived by a financial institution resident in the other country on or after 1 January 2009. A 5% rate limit applies to royalties derived on or after 1 January 2008. Before that date, a 10% rate applied.

42. The rate limit for royalties of 5% applies to royalties derived on or after 1 January 2008. Before that date, a 10% rate applied.

43. On 31 March 2008 Australia and South Africa signed a protocol amending the agreement. The provisions of the new Protocol relating to Australian withholding taxes have effect in respect of income derived by a non-resident on or after 1 January 2009. A 5% rate limit will apply on all inter-corporate dividends where the recipient beneficially holds directly 10% or more of the voting power of the company paying the dividend. A rate limit of 15% will otherwise apply for dividends. From 1 January 2009, a general rate limit of 10% applies to interest. However no tax will be chargeable in the source country on interest derived by a government of the other country (including a bank performing central banking functions) and on interest derived by a financial institution resident in the other country (excluding interest paid as part of a back-to-back loan arrangement). From 1 January 2009, a 5% rate on royalties applies. Before 1 January 2009, a general limit of 10% withholding tax on royalties applied.

44. On 28 October 2008, it was announced that the Australian and the United Kingdom governments would commence negotiations on a revised tax treaty. Submissions were due to be lodged with Australian Treasury by 14 November 2008.

45. On 26 June 2009, a new double tax agreement was signed between Australia and New Zealand. The new treaty will replace the existing agreement signed in 1995 and the 2005 amending protocol. The new treaty takes effect for withholding tax purposes on 1 May 2010. From 1 May 2010, a nil withholding tax rate will apply in certain cases to inter-corporate dividends where the recipient holds directly at least 80% of the voting power in the dividend paying company. A rate of 5% will apply on all other inter-corporate dividends where the recipient holds directly 10% or more of the voting power of the
company paying the dividend. A general limit of 15% will apply for all other dividends, including those paid prior to 1 May 2010. From 1 May 2010, source country tax on interest will continue to be limited to 10%. However, no tax will be chargeable in the source country on interest derived by a government or a political subdivision or local authority of the other country (including a government investment fund or a bank performing central banking functions) or on interest derived by a financial institution which is unrelated to and dealing wholly independently of the payer (excluding interest paid as part of a back-to-back loan arrangement and, for New Zealand payers, where that person has not paid approved issuer levy). From 1 May 2010, the royalty withholding tax rate reduced from 10% to 5%.

46. The government announced on 4 February 2010 that negotiations to update Australia’s tax treaty with Austria would take place in March 2010.
47. Australia and Chile signed a new DTA on 10 March 2010. The new agreement has not yet entered into force.

**Other payments**

A Pay-As-You-Go (PAYG) withholding regime applies to require the deduction and remittance of taxes on behalf of foreign resident individuals and entities that are in receipt of the following types of payments:

<table>
<thead>
<tr>
<th>Type of payment</th>
<th>Rate of withholding</th>
</tr>
</thead>
<tbody>
<tr>
<td>Payments for promoting or organising casino gaming junket arrangements</td>
<td>3%</td>
</tr>
</tbody>
</table>
| Payments for performing artists, sportspersons, including payments to support staff such as art directors, bodyguards, coaches, hairdressers and personal trainers | – if recipient is a company, 30%  
– if recipient is an individual, the applicable non-resident marginal tax rate, (this effectively codifies existing ATO practice in relation to these types of payments) |
| Payments under contracts entered into after 30 June 2004 for the construction, installation and upgrading of buildings, plant and fixtures and for associated activities | 5%                 |

**Managed investment trust distributions**

For income years commencing on or after 1 July 2007, a “non-final” withholding tax at the rate of 30% applied to distributions (“fund payments”) to non-residents, directly or through an intermediary, of income (other than dividends, interest, royalties, foreign source income and capital gains on assets that are not taxable Australian property) by a “managed investment trust” with defined connections to Australia. For fund payments made in income years commencing on or after 1 July 2008, a new regime applies, with divergent outcomes, depending upon whether or not the recipient of such fund payments is resident of a country identified as being one with which Australia has an effective exchange of information (EEOI) arrangement. For EEOI countries, the tax changes to a non-final withholding tax at a 22.5% rate in the first year of income commencing on or after 1 July 2008, a final withholding tax at a 15% rate in the second year (i.e., 2009-10 income year) and a final withholding tax at a 7.5% rate thereafter. For residents of non-EEOI countries, a final withholding tax at a 30% rate applies. EEOI countries have been identified by regulation to be the Netherlands Antilles and Bermuda and the countries with which Australia has concluded DTAs.
other than Austria, Belgium, Greece, Korea, Malaysia, the Philippines, Singapore, and Switzerland. Australia has entered into EEOI agreements with Antigua & Barbuda, Aruba, Belgium, Jersey, Isle of Man, the British Virgin Islands, Gibraltar, Malaysia, Samoa Singapore, Guernsey and the Cook Islands, however, these countries have not yet been identified in regulations to be EEOI countries.

Tax administration

Returns
A corporation (including the head company of a tax consolidated group) generally lodges/files a tax return on the basis of a 1 July to 30 June year of income. However, a corporation may apply to adopt a substitute year of income, for example, 1 January to 31 December. A return is lodged/filed under a self-assessment system that allows the Australian Taxation Office (ATO) to rely on the information stated on the return. Where a corporation is in doubt as to its tax liability regarding a specific item, it can ask the ATO to consider the matter and obtain a binding private ruling.

Payment of tax
A PAYG instalment system applies to companies other than those whose annual tax is less than AUD 8,000 that are not registered for GST. Most companies are obliged to pay instalments of tax for their current income year by the twenty-first days of the fourth, seventh and tenth months of that year and by the twenty-first day of the month immediately following that year. Instalments are calculated on a quarterly basis by applying an “instalment rate” to the amount of the company's actual “ordinary income” (ignoring deduction) for the previous quarter. The instalment rate is notified to the taxpayer by the ATO and determined by reference to the tax payable for the most recent assessment. The ATO may notify a new rate during the year on which subsequent instalments must be based. Taxpayers can determine their own instalment rate, but there may be penalty tax if the taxpayer's rate is less than 85% of the rate that should have been selected.

Final assessed tax is payable on the first day of the sixth month following the end of that income year or such later date as the Commissioner of Taxation allows by a published notice.

Significant developments

As a result of two Austrian Tax Reforms made in 2009 (“Budgetbegleitgesetz 2009” and “Konjunkturbelebungsgesetz 2009”), inter alia, the international participation exemption was extended to also cover portfolio dividends (investments less than 10% and no minimum holding period) from European Union (EU) based companies which therefore are exempted from corporate income taxation on shareholder level. Furthermore, for economic recovery reasons, an accelerated depreciation for fixed assets in the year of purchase was introduced. The accelerated depreciation (30%) covers acquisitions of assets made in 2009 and 2010. Moreover, a new recapture taxation mechanism was established being relevant for the Austrian tax group scheme.

In April 2010, a draft for a reform of the Austrian Corporate Income Tax Act (“Abgabenänderungsgesetz 2010”) was forwarded to the Austrian Parliament, which contains the introduction of an advanced ruling opportunity. If this new regulation is implemented, legally binding information in the fields of transfer pricing, group taxation and mergers & acquisitions can be requested from the Austrian tax authorities for the payment of an administrative fee.

Furthermore, a first draft for Austrian transfer pricing guidelines was recently issued by Austrian tax authorities, which is expected to enter into force within the year 2010. The guidelines represent the Austrian authority’s understanding of the OECD transfer pricing guidelines and will be of relevance for the interpretation of Austrian income tax law by the tax administration.

Taxes on corporate income

Basis of corporate income tax (Körperschaftsteuer)
Corporations (i.e., GmbH, AG) are subject to unlimited taxation in Austria with their entire (domestic and foreign) income if they have their legal seat or place of effective management in Austria. A non Austrian corporate tax resident (neither legal seat nor place of effective management in Austria) is subject to limited taxation with certain sources of income in Austria.

Due to the qualification of corporations as independent tax subjects, a distinction must always be made between tax ramifications at the level of the company and those at shareholder level. At the level of the company, profits are taxed at the standard rate of 25% while at shareholder level the profit distributions are usually subject to a withholding tax of 25%.
Austria

Profits of corporations are subject to (federal) corporate income tax only. There is no additional local income tax levied at company level.

**Rates of corporate income tax (Körperschaftsteuer)**

The corporate income is taxed at a flat rate of 25% regardless of whether profits are retained or distributed.

There is also a minimum corporate income tax, payable by companies in a tax-loss position. The minimum corporate income tax amounts to EUR 437.50 for limited liability companies (GmbH) and EUR 875 for stock corporations (AG) for each full quarter of a year. To promote the formation of new companies the minimum corporate income tax is reduced to EUR 273 for the first four quarters. The minimum corporate income tax can be carried forward without time limitation and be credited against future corporate income tax burdens of the company.

**Corporate residence**

A corporation is resident in Austria for tax purposes if either it is registered in Austria (legal seat) or its place of effective management is located in Austria. The “place of effective management” is located where the day-to-day management of the company is actually carried out and not where singular board decisions are formally made. However, the definition of place of effective management under Austrian tax law does not significantly deviate from its definition under the OECD guidelines (see commentary to the OECD Sample Double Tax Convention).

**Other taxes**

**Value-added tax (Mehrwertsteuer)**

Generally, the Austrian valued-added tax (VAT) law is based on the 6th EU VAT Directive. Under the Austrian VAT law, companies and individuals carrying out an active business on a permanent basis are qualified as entrepreneurs for VAT purposes. As entrepreneur they have to charge their supplies of goods or services provided to their customers with Austrian VAT at a rate of 20%. A certain limited range of goods and services (such as food, books, passenger transportation, cultural events) is taxed at the reduced rate of 10%. Certain transactions are exempted from Austrian VAT (e.g., export transactions).

Entrepreneurs are entitled to deduct Austrian input VAT insofar the input VAT does not result from goods/services purchased which are directly linked to certain VAT exempt sales (interest income, insurance premium, etc.). However, certain transactions are exempt from Austrian VAT (e.g., export transactions) without limiting the ability of the entrepreneur to deduct the related input VAT. To be entitled to deduct input VAT, the entrepreneur must obtain an invoice from his supplier which fulfils certain formal requirements.

Entrepreneurs have to file monthly or quarterly VAT returns by the fifteenth of the second month following the month concerned or by the fifteenth of the second month following the quarter concerned. The balance of the VAT due and the input VAT deducted has to be paid to the tax office (if VAT burden) or is refunded by the tax office (if input VAT position) to the electronic tax account of the entrepreneur. A separate report has to be filed by the entrepreneur at the tax office showing the cross-border intra EU-transactions made (EC sales listings report).
**Excise taxes**
Excise taxes are imposed on certain products including petroleum, tobacco products and alcoholic beverages.

**Stamp duty**
Stamp duty is imposed in connection with certain legally predefined transactions for which a written contract has been established (e.g., lease contracts, loan or credit agreements, bills of exchange, assignments of receivables). The Austrian administration’s understanding of a “written contract” is very broad and covers not only paper-contracts but also contracts concluded by electronic means (e.g., electronically signed e-mails).

The stamp duty is triggered upon the establishment of a legal relationship if at least one Austrian party is contractually involved or – even if a contract is concluded between non-Austrian parties only – if the subject of the contract relates to Austria (e.g., lease contract on Austrian real estate).

However, various possibilities are available for most legal transactions subject to stamp duty to structure them in a way without triggering stamp duties (e.g., setting up of contracts abroad, offer-acceptance procedure, usage of audio-tapes).

The stamp duty rates for the most common legal transactions follow:

<table>
<thead>
<tr>
<th>Legal transactions</th>
<th>Duty</th>
</tr>
</thead>
<tbody>
<tr>
<td>Lease agreements</td>
<td>1.00%</td>
</tr>
<tr>
<td>Certificates of bonds</td>
<td>1.00%</td>

<tr>
<td>Cash credit agreements non-recurring or revolving during a period of five years</td>
<td>0.80%</td>
</tr>
<tr>
<td>Cash credit agreements with a maturity exceeding five years</td>
<td>1.50%</td>
</tr>
<tr>
<td>Bill of exchange</td>
<td>0.13%</td>
</tr>
<tr>
<td>Assignment of receivables</td>
<td>0.80%</td>
</tr>
</tbody>
</table>

**Capital transfer tax (Gesellschaftsteuer)**
Capital transfer tax is imposed at a rate of 1% on the initial contribution of capital, other contractual or voluntary contributions in cash or in kind and certain hybrid financing instruments to Austrian corporations. However, in many cases a taxable event for capital transfer tax purposes can be eliminated by careful structuring (e.g., contributions made by the indirect shareholder of an Austrian company – so called “grandparent contributions” – do not trigger capital transfer tax).

**Real estate tax**
Local authorities annually levy real estate tax on all Austrian real estate property whether developed or not. The tax is levied on the assessed standard ratable value (“Einheitswert”) of immovable property. The assessed value is usually substantially lower than the market value. The effective tax rate depends on the intended use of the real estate and is calculated using a special multiplier.
Austria

Tax rates:

- Agricultural area and forestry
  - 1.6% for the first EUR 3,650 of the assessed standard ratable value; and
  - 2% for the amount of the assessed standard ratable value exceeding EUR 3,650.
- Buildings and property is taxed at 2% of the assessed standard ratable value.
  This multiplier is reduced for:
    - Single family houses
      - To 0.5% for the first EUR 3,650 of the assessed standard ratable value; and
      - To 1% for the next EUR 7,300.
    - Leasehold und shared property
      - To 1% for the first EUR 3,650 of the assessed standard ratable value; and
      - To 1.5% for the next EUR 3,650.
    - All other property
      - To 1% for the first EUR 3,650 of the assessed standard ratable value.

After the assessed standard ratable value is multiplied by the relevant multiplier the real estate tax is calculated by using a special municipal rate fixed by each municipality (maximum 500%). Finally the tax amount is reduced by a general reduction of 25% as stated by law and increased by a 35% inflation adjustment.

Real estate transfer tax
Tax is levied on any transaction which causes a change in the ownership of Austrian real estate or in the person empowered to dispose of such property. Tax liability arises when a sales contract or other legal transaction is concluded transferring the right of title to another party. Generally speaking, tax on the sale of real estate is calculated on the payment received for the transfer of the property. Real estate transfer tax is generally calculated on the basis of the acquisition price. However, in the case of corporate restructuring under the Reorganisation Tax Act and in case of real estate transfers free of consideration, the two-fold (in the case of the former) and the threefold (in the case of the latter) assessed standard ratable value for tax purposes is taken as the tax base.

Tax exemptions:

- Real estate transactions with a tax base of EUR 1,100 or below.
- Real estate transactions in connection with business transfers free of charge with a tax base of up to EUR 365,000 if the donee is an individual and the donor is older than 55 years of age or is (due to physical or mental illness) permanently unable to work.
- Donation of real estate to a husband or wife for the acquisition or construction of a dwelling of up to 150 square metres in order to fulfil immediate living space requirements.
- Under certain circumstances the splitting of real estate within the scope of a partnership.
Austria

Tax rates:

<table>
<thead>
<tr>
<th>Facts of the case</th>
<th>Percentage</th>
</tr>
</thead>
<tbody>
<tr>
<td>Transfer to the husband, wife, parent, child, grandchild, stepchild, adopted child, son in law or daughter in law of the transferor</td>
<td>2%</td>
</tr>
<tr>
<td>Acquisition by the husband or the wife in the case of a divorce or an annulment of a marriage</td>
<td>2%</td>
</tr>
<tr>
<td>Acquisition by other individuals</td>
<td>3.5%</td>
</tr>
</tbody>
</table>

An additional 1% registration fee (same tax base as Real Estate Transfer Tax) becomes due upon incorporation to the land register.

**Branch income**

Austrian branches of foreign corporations are taxed in the same way as Austrian corporations, except that inter-company dividends received by Austrian branches of non-EU corporations are not tax exempt (see Income determination), and Austrian tax losses can be carried forward only if they exceed non-Austrian profits. Books and records generally can be kept abroad but must be brought to Austria in case of a tax audit (upon official request).

**Income determination**

Taxable income is determined based on statutory accounts under Austrian GAAP adjusted for certain deductions and additions prescribed by the tax law.

**Inventory valuation**

In general, inventories are valued at the lower of cost or market. If specific identification during stock movements is not possible, other methods, such as last-in, first-out (LIFO) and first-in, first-out (FIFO) are permitted when shown to be appropriate. Conformity between financial book keeping and tax reporting is required.

**Capital gains/exit taxation**

Generally, capital gains (short-and long-term) are part of the normal annual result of a corporation and therefore are taxed at the ordinary corporate income tax rate (25%).

A special tax treatment applies to capital gains with respect to the exit of taxable assets. In the case of a transfer of assets which formed part of a business from Austria to a foreign country (e.g., allocation of assets to foreign branch), latent capital gains generally are taxed at the time of the transfer. However, if these assets are transferred to an EU member state, capital gains taxation can be postponed upon request until the assets are sold or transferred outside the EU.

**Inter-company dividends (inbound)**

*Domestic dividends/EC portfolio dividends*

Dividends received from an Austrian company at corporate shareholder level are generally excluded from the tax base (no minimum stake, no minimum holding period). However, this tax exemption does refer to domestic dividends only but not to capital gains or losses.
Additionally, dividends received from companies located within the EU or from countries within the European Economy Area (EEA) with which an agreement on comprehensive administrative assistance was established (currently only Norway), are also tax exempt if the foreign company is subject to a tax similar to the Austrian corporate income tax and if the foreign corporate income tax rate is not below 15%.

**International participation exemption**
Dividends received from a foreign company are also tax exempt at corporate shareholder level, if the Austrian company holds at least 10% of the issued share capital for a minimum holding period of one year (international participation exemption). Furthermore, both capital gains and capital losses derived from shares qualifying for the international participation exemption are tax neutral. This means a deduction of capital losses is no longer available. However, the parent company can exercise an (irrevocable) option for each single participation acquired to treat both capital gains and capital losses taxable (spread of losses and depreciations over a period of seven years). The option refers to capital gains (losses) only and does not affect the tax treatment of ongoing dividend distributions. In the case of presumed tax abuse, the participation exemption for dividends and capital gains is replaced by a tax credit (switch-over-clause). The credit system will be applied if the foreign subsidiary does not meet an active-trade-or-business test (i.e., passive income from royalties, interest, etc. is greater than 50% of total income of subsidiary) and is not subject to an effective foreign minimum corporate income tax rate of more than 15%. The domestic and foreign participation exemptions are available to Austrian resident corporations and to Austrian branches of EU corporations only, but not to Austrian branches of non-EU corporations.

**Austrian withholding tax (WHT) on inter-company dividends (outbound)**
Under Austrian domestic law, there is generally a 25% WHT on dividends (profit distributions) paid to a foreign parent company. The WHT has to be deducted and forwarded by the Austrian subsidiary to the tax office.

**Reduction of WHT according to double taxation treaties (DTT)**
To end up with the reduced WHT rate as defined under the DTT applicable, Austrian tax law provides for the following alternative methods of WHT relief refund method or exemption at source method.

**Refund method**
The Austrian subsidiary generally has to withhold 25% WHT on profit distributions to the foreign parent company and the parent company has to apply for a refund (of the difference between 25% WHT and the lower DTT rate). In the course of the refund process, the Austrian tax administration analyses whether the foreign shareholder can be qualified as beneficial owner of the dividends paid. If the refund is approved by the Austrian tax authority, dividend distributions within the following three years can be done without deduction of WHT (for distributions of a comparable size and provided the foreign holding structure did not change in the meantime).

**Exemption at source method**
Relief at the source is available only if the direct parent company issues a written declaration confirming that it is an “active” company carrying out an active business that goes beyond the level of pure asset management and has own employees and office space at its disposal (substance requirements).
WHT on dividends paid to EU-companies
With regard to dividends paid to EU-resident corporate shareholders Austria has implemented the EU Parent/Subsidiary Directive according to which domestic WHT is reduced to zero. The requirements for the reduction are that the EU-resident parent company – which also has to meet the substance requirements mentioned above (Exemption at source method) – must directly own at least 10% of the share capital of the Austrian subsidiary for a period of at least one year. In case of foreign EU shareholders being qualified as pure holding companies, the Austrian tax administration does not allow an exemption at source but claims the application of the refund method (as discussed above).

Provided the requirements according to the EU Parent/Subsidiary Directive are not met, Austrian WHT has to be deducted. If an EU parent company cannot credit the Austrian WHT deducted against the CIT of its resident state (e.g., because the foreign dividend income is exempted from the CIT or due to a loss position of the shareholder), it is entitled to apply for a refund of the Austrian WHT. This application has to include a confirmation/documentation that the Austrian WHT could (fully or partly) not be credited at the level of the parent company.

Foreign income
Austrian resident corporations are taxed on their worldwide income. If a double taxation treaty is in force, double taxation is mitigated either through an exemption or by granting a tax credit equal to the foreign withholding tax at the maximum. If foreign withholding tax cannot be credited at the level of the Austrian corporation (e.g., due to a loss position), Austrian tax law does not allow to carry forward the foreign withholding tax to future assessment periods. However, if the source of the income is a non-treaty country, exemption or a tax credit shall be available based on unilateral relief (representing a discretionary decision of the Austrian Ministry of Finance only but no legal entitlement for the applicant). Special rules for taxing undistributed income of foreign subsidiaries are applicable only to foreign investment funds.

Please note that Austrian Tax Law does not define special CFC rules. However, under certain circumstances, Austrian tax administration – under a substance over form approach – taxes passive income of foreign subsidiaries of Austrian companies located in low tax jurisdictions (see switch-over rule under section Inter-company dividends-inbound).

Stock dividends
A conversion from revenue reserves (retained earnings) to capital by a company does not lead to taxable income for the shareholder (but triggers capital transfer tax). However, capital reductions are treated as taxable income if within 10 years prior to the capital reduction the above-mentioned increase in capital was repaid to the shareholder. Otherwise, they are tax exempt.

Interest income
Interest income is taxed at the general rate of 25%. Interest payments to non-resident companies are – under Austrian tax law – not subject to WHT (provided no Austrian real estate property is used as security).

Rents and Royalties
Rental income is treated as normal business income.
Austria

On royalties paid to a non-resident company, Austrian WHT at a rate of 25% has to be deducted. This tax rate can be reduced under an applicable DTT (see topic Withholding taxes) or under the application of the EU Interest Royalty Directive which was implemented in Austrian Tax Law.

**Partnership income**
Partnerships are not classified as tax subjects separate from their owner (partners). The partnership income is calculated at the level of the partnership but taxed at the level of its owners as income from trade or business (see Individual taxes).

**Deductions**
Expenditures in connection with the conduct of one’s personal life are basically not deductible.

There is no carryback period for deductions. However, losses can be carried forward to a certain limit (see section Tax losses).

**Depreciation and depletion**
Only the straight-line method is accepted for tax purposes, whereby the cost is evenly spread over the useful life of an asset. For certain assets, depreciation rates relevant for tax purposes are prescribed by the tax law and shown in the chart below:

<table>
<thead>
<tr>
<th>Allowed amount</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Buildings (industrial use)</td>
<td>3.0%</td>
</tr>
<tr>
<td>Buildings (banking, insurance)</td>
<td>2.5%</td>
</tr>
<tr>
<td>Other buildings</td>
<td>2.0%</td>
</tr>
<tr>
<td>Automobiles</td>
<td>12.5%</td>
</tr>
</tbody>
</table>

Goodwill arising in the course of an asset deal for tax purposes must be amortised over 15 years. Goodwill arising in the course of a share deal can be amortised only if the acquired company is included in a tax group (see Group taxation). Goodwill arising as a result of a corporate merger cannot be amortised.

Trademarks are usually amortised over 15 years. Other intangibles have to be depreciated over their useful lives.

For tangible fixed assets subject to depreciation and acquired within the fiscal years 2009 and 2010, an accelerated depreciation of 30% is allowed in the first year. Items excluded from this regulation include buildings, automobiles and low value items.

Tax depreciation is not required to conform to financial depreciation under Austrian GAAP. If depreciated property is sold, the difference between tax value and sale proceeds is taxed as a profit or loss in the year of sale.

**Taxes losses**
Tax losses can be carried forward without any time limit. However, tax loss carryforwards generally can be offset against taxable income only up to a maximum of 75% of the taxable income for any given year. Again, some exceptions to that rule apply, such as, in connection with tax groups (see section Group taxation rules) or in
case of liquidations allowing to charge tax loss carryforwards available against 100% of annual taxable income.

**Payments to foreign affiliates**

Generally, there are no restrictions on the deductibility of royalties, interest and service fees paid to foreign affiliates, provided they are at arm’s length (which should be appropriately documented by agreements, contracts, calculation sheets, etc.). Payments to affiliated companies not meeting arm's-length standards are treated as a hidden distribution of earnings, i.e., they are not tax deductible and withholding tax is usually triggered at source. *For further information see section Transfer pricing.*

However, the domestic implementation of the EU Interest Royalty Directive which abolishes withholding taxes on cross-border payments of interest and license fees (regardless of whether taken out by deduction or by assessment) between affiliated companies in the Member States, has to be considered.

**Taxes**

Austrian and foreign taxes on income and other personal taxes, as well as the VAT insofar as it relates to non-deductible expenditures, are non-deductible. Other taxes, such as payroll or capital transfer taxes, are deductible.

**Interest payments**

Interest payments (also inter-company) are generally tax deductible, if they meet the general arm’s-length requirements. *For further information see section Thin capitalisation rules.*

**Fines and penalties**

Fines and penalties are generally not tax deductible.

**Meals and entertainment**

The deductibility of entertainment expenses is restricted to advertising expenses. The deductibility of costs for business lunches generally is limited to 50% of actual expenses incurred (provided the business lunch had the purpose of acquiring new business).

**Accrued expenses**

Certain accruals (such as provisions for liabilities and impending losses) running for more than 12 months as of the closing date of the accounts are accepted for tax purposes at 80% of their value only. Exempted from this reduction are provisions for personnel benefits (severance payments, pensions, vacations and anniversary awards) for which specific reduction and computation methods have been provided and provisions which were already calculated by discounting a future obligation.

In general, lump-sum accruals and accruals for deferred repairs and maintenance are not allowed for tax purposes.

**Financing costs**

A deduction of interest incurred in connection with loans/credits used for the acquisition of participating interests is allowed from 2005 onwards even if the respective dividend income is tax exempt under the international participation exemption (*see Inter-company dividends*). Other financing cost (fees, legal advice, etc.) being directly related to tax exempt dividend income are not deductible. However, foreign exchange expenses or profits accumulated in connection with the financing
of tax exempted international participations are treated as deductible respectively taxable item.

**Charitable contributions**
Charitable contributions are tax deductible up to a limit of 10% of the prior year profit.

**Organisational and start-up expenses**
Generally, organisational and start-up expenses are tax deductible.

**Payment to directors**
Payments to a member of the supervisory board (“Aufsichtsrat”) are tax deductible up to a limit of 50%. Payments to members of the executive (managing) board are tax deductible without special limitation.

**Group taxation**

**Group taxation rules**
In 2005, a new group taxation system replaced the “Organschaft” concept under which Austrian resident companies as well as foreign companies (with restrictions) may be taxed as a unit. Under the 2005 system, two or more companies can form a tax group provided the parent company directly or indirectly owns more than 50% of the shares in the subsidiaries. The tax group also can include foreign group members. If a group member withdraws from the group within a minimum commitment-period of three years, all tax effects derived from its group membership must be reversed.

Within a tax group, all of the taxable results (profit and loss) of the domestic group members are attributed to their respective group parent. From foreign tax group members, tax losses in the proportion of the shareholding quota are attributed to the tax group parent. Foreign tax losses utilised by the Austrian tax group parent are subject to recapture taxation at the time they are utilised by the tax group member in the source state, or in the moment the group member withdraws from the Austrian tax group. Under the recapture taxation scheme, the Austrian tax group has to increase its Austrian tax base by the amount of foreign tax losses used in prior periods (limited to the amount of tax losses actually utilised by the foreign tax group member).

For the purpose of the application of the recapture taxation scheme, a withdrawal from the tax group is also assumed if the foreign group member significantly reduces the size of its business (compared to the size of the business at the time the losses arose). Reduction of size is measured on the basis of business parameters such as turnover, assets, balance sheet totals and employees, while the importance of the respective criteria depends on the nature of the particular business.

Goodwill / badwill arising in the course of a share deal (acquisition of an active business company from a third party contractor) must be amortised/appreciated over 15 years provided that the acquired company is included in a tax group.

Write-downs of participations in tax group members are not tax deductible.

**Transfer pricing**
Under Austrian Tax Law there are no explicit transfer pricing regulations available defining in detail the local requirements with regards to arm's length, the documentation standards required, penalties, etc. However, Austria applies the OECD
transfer pricing guidelines referring to the OECD model tax convention. According to these guidelines, all business transactions between affiliated companies must be carried out under consideration of the arm’s-length principle. Where a legal transaction is deemed not to correspond to arm’s-length principles, the transaction price is adjusted for corporate income tax purposes. Such an adjustment constitutes either a constructive dividend or a capital contribution. Currently, there is the option of applying for a non-binding ruling at the tax authorities only.

In March 2010, a draft for a reform of the Austrian Corporate Income Tax Act was published, which covers the introduction of an advanced ruling mechanism. If this new regulation is implemented, binding information in the fields of transfer pricing, group taxation and mergers & acquisitions can be requested from the Austrian tax authorities against payment of an administrative fee (the fee rate depends on the size of the applicant’s business).

Furthermore, a first draft of Austrian transfer pricing guidelines was recently issued by Austrian tax authorities, which is expected to enter into force within 2010 (the guidelines are still under review and were not disclosed to the public). The guidelines represent the Austrian authority’s understanding of inter-company business relationships with regards to their arm’s-length classification and will be based on the OECD transfer pricing guidelines.

**Thin capitalisation rules**

There are no explicit tax regulations available under Austrian tax law stipulating the minimum equity required by a company (thin capitalisation rules). Basically, group financing has to comply with general arm’s-length requirements. Therefore, an Austrian group entity being financed by an affiliated entity must be able to document, that it would have been able to obtain funds from third party creditors under the same conditions as from an affiliated financing entity. Therefore, the appropriate ratio between an Austrian company’s equity and debt will mainly depend on the individual situation of the company (profit expectations, market conditions, etc.) and its industry. Nonetheless, the fiscal authorities in administrative practice (no “safe-harbour” rule) tend to accept a debt-equity ratio of approximately 3:1-4:1. However, the debt-equity ratio accepted by tax authorities also strongly depends on the average ratio relevant for the respective industry sector. If an inter-company loan for tax purposes is not accepted as debt, it is reclassified into hidden equity and related interest payments into (non deductible) dividend distributions.

Furthermore, under Austrian commercial law (for companies subject to statutory audits) a minimum equity ratio of 8% is claimed. If the equity ratio of the company falls below 8% and its earning power (virtual period for debt redemption) at the same time does not meet certain requirements, a formal and public reorganisation process would have to be initiated.

**Tax incentives**

**Research and development (R&D)**

R&D costs are fully deductible at the time they accrue. An R&D tax bonus payment at 8% (R&D expenses x 8% = tax refund) or alternatively an allowance of 25% to 35% of qualifying R&D expenses (R&D expenses x 25% / 35% = tax allowance) can be claimed. Since 2005, the R&D tax bonus payment and allowance is also available in case of contract R&D, however, R&D incentives cannot be claimed by both principal
Austria

and agent. Also R&D expenses incurred at foreign EU/EEA-permanent establishments of Austrian companies qualify for the allowance or the tax bonus payment (however, it qualifies for the tax bonus payment only if the permanent establishment suffers a tax loss).

**Employment**
A tax bonus payment of 6% or alternatively an allowance of 20% can be claimed for expenditures in connection with the training of employees. These incentives can be claimed for external training expenditures and for in-house training expenditures, provided that there is a dedicated in-house training department (for in-house training expenditures the allowance only can be applied for).

A new premium scheme for apprenticeships started in June 2008. This premium is based on the amount of actual wage as set out in the applicable collective contract, and provides tax free subsidies, depending on the duration of the apprentice’s employment.

**Inward investment**
For investment in certain regions, government grants and subsidies are available and are generally individually negotiated.

**Withholding taxes (WHT)**
The following table lists the countries with which Austria has signed a double taxation treaty (DTT) and provides details of the amount of Austrian withholding taxes.

Numbers of letters in parenthesis in the chart refer to footnotes with more explanation below the chart.

**Notes**

1. Dividends – Dividend distributions attributable to a prior release of paid-in surplus or other shareholder contributions (classified as capital reserves) are deemed to be a repayment of capital, i.e., no withholding tax is incurred. At the shareholder’s level, dividends received and those classified as contribution refund will reduce the tax basis assessment for investments. To the extent to which the tax basis would become negative, such dividends are treated as taxable income (unless taxation is eliminated by a tax treaty). Regarding tax free dividend distributions refer to chapter “Holding companies” and chapter “Exemption for domestic investments”.

2. Under certain treaties the amount of the withholding tax is dependent on the extent of the proportion of issued share capital held by the recipient. Where this is the case, all rates are given. Those marked with + refer to an investment of 10%, ++ to 15%, those marked with +++ refer to an investment of 20%, those marked with * refer to an investment of 25%, those marked with ** refer to an investment of 50% and those marked with *** refer to an investment of 70%.

3. Interest – Interest on cash deposits in EUR or foreign currency in bank accounts and fixed interest bearing securities in foreign currency (issued after 31 December 1988) and on fixed interest bearing securities denominated in Austrian Schillings or EUR (issued after 31 December 1983) are subject to a 25% withholding tax. If the recipient is an individual, this...
withholding tax is final (no further income taxation and inheritance taxation). Companies receiving interest payments may obtain an exemption from withholding tax if they provide the bank or other custodial agent with a written confirmation from the recipient that such interest payments constitute a part of the recipient's operating revenues (exemption statement). Interest payments to non-residents without a permanent establishment in Austria are generally not subject to withholding taxation. At interest payments between affiliated companies the regulations stipulated by the EU interest directive have to be taken into consideration.

4. Royalties, etc. – In case of payments to countries marked with “**” the rate is nil unless more than 50% of the issued share capital of the company paying the royalties is held by the recipient, in which case the rate given applies. At royalty payments between affiliated companies the regulations stipulated by the EU interest directive have to be taken into consideration.

5. If the recipient holds a participation of less than 25% in the distributing company, the dividends are subject to a 25% withholding tax. Since dividends distributed by an Austrian corporation to another Austrian corporation are generally not subject to taxation (see “Determination of income”), the withholding tax is credited against corporation income tax upon assessment of the recipient corporation for the respective tax year.

6. Withholding tax on dividends from Austrian companies is final, i.e., no further income tax is collected from the recipient (provided an individual).

7. The treaty was signed on 14 December 2007 and entered into force on 1 September 2008. It is applicable by the beginning of the fiscal year 2009.

8. The treaty was recalled by Argentina in 2009. Austrian tax citizens are protected by § 48 BAO against double taxation. Austria will try to enter into new negotiations with Argentina.

9. 5% for shares of at least 25% and worth at a minimum of USD 250,000, 10% for shares of at least 25% and worth at least USD 100,000, 15% in all other cases.

10. 5% for industrial licenses and know-how not more than three years old; 10% in all other cases.

11. The new treaty was signed on 2 July 2009 but has not entered into force yet. It will not be applicable before 2011.

12. The treaty entered into force on 1 April 2007 and will be applicable by the beginning of the fiscal year 2008.

13. 10% for copyright license fees in connection with literature, science and art; 25% for trademarks license fees; 15% in all other cases.

14. The new treaty was signed on 12 February 2009 but has not entered into force yet. It will not be applicable before 2011.

15. Industrial, commercial or scientific equipment – 6%, 10% in all other cases.

16. The treaty was entered into force on 22 March 2007 and will be applicable by the beginning of the fiscal year 2008.

17. 5% for license income from copyrights, brands, plans, secret formulas or procedures, computer software, industrial, commercial or scientific use of equipment and information.

18. 0% for copyright royalties in connection with the production of literary, dramatic, musical or artistic work – 5% in all other cases.

19. The new treaty was signed on 25 May 2007 and entered into force on 27 March 2008. It is applicable by the beginning of the fiscal year 2009.

20. 5% for leasing of mobile goods and 10% for other licenses.

21. 0% for shares of at least 50% and worth at a minimum of EUR 2,000,000, 5% for shares of at least 10% and worth at least EUR 100,000, 10% for shares in all other cases.

22. The treaty entered into force on 1 April 2009 and is applicable by the beginning of the fiscal year 2010.

23. 2% for license income from industrial, commercial or scientific use and 10% for other licenses.

24. The treaty entered into force on 16 May 2007 and will be applicable by the beginning of the fiscal year of 2008.

25. For the use of commercial or scientific equipment – 10% in all other cases.

26. 5% in case of direct (or indirect over a patent-realisation-company) payments of royalties by companies of the other member state (with an industrial establishment in the other member state) and 10% for other licenses.
Austria

27. 5% in case of license income from industrial, commercial or scientific use and 10% for other licenses.
28. 0% for copyright license fees in connection with literature, art and scientific use and 10% for other licenses.
29. The treaty was signed on 7 September 2007 and entered into force on 20 January 2008. It is applicable by the beginning of the fiscal year 2008.
30. 10% for the right of use of copyrights to artistic, scientific or literary as well as cinematographic works and 5% for other licenses.
31. The new treaty was signed on 13 September 2006 and entered into force on 13 November 2006. It was applicable by the beginning of the fiscal year 2007.
32. The treaty was signed on 21 September 2006 and entered into force on 1 December 2007. It is applicable by the beginning of the fiscal year 2008.
33. The treaty entered into force on 1 June 2007 and will be applicable by the beginning of the fiscal year 2008.
34. For Portugal, the rate of withholding tax is 5%, but 10% if more than 50% of the issued share capital is owned by the recipient.
35. 5% if capital share amounts to at least 10% and worth at least USD 100,000. 15% in all other cases.
36. The treaty applies to Tajikistan and Turkmenistan. With Russia a new treaty has been ratified.
37. The treaty entered into force on 1 June 2007 and will be applicable by the beginning of the fiscal year 2008.
38. Until a new treaty will be established, the treaty with Czechoslovakia remains applicable.
39. For dividend distributions retroactive as of 1 January 2000.
40. The new treaty was signed on 28 March 2008 and entered into force on 1 October 2009. It is applicable by the beginning of the fiscal year 2010.
41. The treaty entered into force on 17 March 2007 and will be applicable by the beginning of the fiscal year of 2008.
42. The new treaty was signed on 2 June 2008 and entered into force on 1 January 2010. It is applicable by the beginning of the fiscal year 2011.
43. 7.5% on fees for technical services, 10% on royalties.

**Tax administration**

**Tax returns**
The standard tax assessment period in Austria is the calendar year. However, a company’s financial year may deviate. When the tax and financial years deviate, the tax assessments for a year are based on the profits derived in the financial year(s) ending in the respective calendar year (e.g., if tax year 1 June 2009 – 31 May 2010: assessment FY 2010).

**Tax return due dates**
Generally, the CIT return has to be submitted electronically by June 30 of the calendar year following the year in which the fiscal year of the company ends. However, if the company submits the tax return via a certified tax advisor the tax return can be submitted by 31 March of the second following year at the latest, if the company will not be formally requested by the tax office to file it earlier.

**Statute of limitation**
The right to assess CIT is subject to a limitation period of five years after the end of the calendar year in which the fiscal year ends. Additionally, the limitation period can be extended for another year in case of certain interruptive events (e.g., tax audit, tax assessment) take place within the general limitation period. According to the Austrian tax law the maximum limitation period is 10 years.
Payment of tax
Corporate income tax is prepaid in quarterly instalments during the calendar year, with a final settlement subsequent to the annual assessment. Prepayments of corporate income tax generally are based on the most recently assessed tax year’s tax burden (unless the taxpayer can show that its tax charge for the current year will be lower).

The difference between income tax or corporate income tax as per the final assessment and the prepayments made is interest bearing, from 1 October of the year subsequent to the year when the tax claim arose up to the date when the assessment is released (late payment interest). Interest at a rate of currently 2.38% is applied to underpayments (as well as overpayments) of tax.

Electronic filing of annual corporate income tax returns
The annual corporate income tax return (as well as the annual VAT return) has to be filed by electronic means. In the case of a company that reasonably be expected to file tax returns electronically due to the lack of technical prerequisites, filing of the tax return is allowed to be done via pre-printed forms.

Audit cycle
In general, companies are audited every three to four years. The audit period usually covers three to four fiscal years, so generally each fiscal year is audited.

Other issues
Choice of business entity
The most important types of companies in Austria are the limited liability corporation (GmbH), and the joint stock corporation (AG). Foreign investors generally choose the GmbH since it provides a higher degree of corporate law control and allows for lower equity provision.

As a legal entity the GmbH exists upon registration with the Companies’ Register. The application for registration must contain the notarised signatures of all managing directors. The articles of association must be drawn up in the form of a notarial deed (written document executed by a public notary) and must as minimum requirements include the name of the company as well as its seat, the business purpose, the amount of registered capital and the capital contribution of each of the various owners.

A GmbH’s minimum registered capital amount is EUR 35,000. Generally, one half of the registered capital must be raised in cash while the remainder may be contributed in the form of assets (contributions in kind). Of the original capital contributions to be paid in cash one fourth, however at least EUR 17,500 must actually be paid upon incorporation. Under certain conditions, the capital can be provided exclusively in the form of assets (incorporation in kind). The articles of association may provide for additional capital contributions payable by the owners on the basis of a resolution adopted by the shareholder meeting.

The minimum share capital of an AG is EUR 70,000. For an AG, the same payment regulations apply as for a GmbH. But the owners can agree upon a further capital contribution going beyond the nominal value of the shares (premium). The premium is shown on the company’s balance sheet as a capital reserve.
Austria

Since 2004 the company type Societas Europaea (SE) can be chosen in Austria. The SE is a stock corporation based on community law. The advantages of this legal form are the simplification of organisational structures (in particular for international groups) and the possibility of cross-border transfers of corporation seats without loss of the legal identity. The SE allows the choice of a business location under an economic point of view as well as the choice of the most favourable legislation. The minimum share capital required for the incorporation of a SE is EUR 120,000 while the statutory seat of the corporation must be located in the same country where the place of management is located in.

**Restructuring measures (M&A from a business perspective)**

Transfers of assets and undertakings can be realised with retroactive effect and be tax neutral within the framework of the Austrian Reorganisation Tax Act.

The legislation administers the following areas (Article I-VI):

- Mergers (within EU also cross border) of corporations;
- Special conversion (from corporations to partnerships);
- Contribution of businesses and exchange of shares;
- Merger of partnerships;
- Demerger of partnerships; and
- Demerger of corporations.

If the reorganisation qualifies for the application of the Austrian Reorganisation Tax Act, the reorganisation steps are realised tax neutral. Existing tax loss carryforwards can be transferred under certain conditions as well. Furthermore, several other tax privileges are granted under the Reorganisation Tax Act for stamp duties, capital transfer tax, etc.
Corporate taxes in Azerbaijan

Significant developments

Electronic value-added tax (VAT) invoices
Electronic VAT invoices (e-VAT) have been implemented, replacing hardcopy VAT invoices, effective as of 1 January 2010. E-VAT invoices are generated in the Ministry of Taxes’ electronic tax filing system, which provides an automatic record of the issuance date. Unused hardcopies of VAT invoices should be destroyed after 1 January 2010.

The Law on the Special Economic Regime for Export-Oriented Oil and Gas Activities
The Law on the Special Economic Regime for Export-Oriented Oil and Gas Activities was implemented on April 2009 and will remain effective for 15 years. This law avails the following tax incentives to contractors and subcontractors (excluding foreign subcontractors without permanent establishment in Azerbaijan):

- Local companies are permitted to choose between the application of i) profit tax at a rate of 20%, or ii) 5% withholding tax on gross revenues.
- Foreign subcontractors are taxable only by a 5% withholding tax.
- A 0% VAT rate.
- Exemption from dividend tax and taxation on branch’s net profits.
- Exemption from customs duties and taxes.
- Exemptions from property tax and land tax.

In order to enjoy these benefits, the relevant taxpayer should obtain a special confirmation certificate from the Ministry of Industry and Energy.

The Law on Special Economic Zones
The Law on Special Economic Zones (SEZ) became effective on 6 June 2009 and introduces the concept of SEZ. The companies operating in these zones will derive the following tax benefits:

- A 0.5% tax levied on profits from supplied goods, performed services or works;
- A 0% VAT rate; and
- Customs exemptions.

In order to operate from a SEZ, a special residency certificate is necessary. However, the following companies may not apply for this certificate:

- Parties producing or processing oil and gas;
- Parties producing alcoholic beverages and tobacco; or
- Television or radio broadcasting companies.
**Exemptions for banks**
From 1 January 2009 until 2012, Azerbaijani banks, insurance and re-insurance companies are exempt from corporate income tax (CIT) on the portion of their income directed to increase their charter capital.

**Taxes on corporate income**

According to the changes into the Tax Code (Code) in June 2009, effective as of 1 January 2010, the profit tax rate is reduced from 22% to 20%. Profit tax is imposed on domestic enterprises, as well as permanent establishments (PE) of non-residents.

The Code also stipulates payment of taxes based on a simplified system for enterprises not registered as VAT payers and whose annual gross revenue is less than AZN 150,000 starting from 1 January 2010, except for enterprises producing excisable goods, credit and insurance organisations and investment funds and professional participants in the securities market. The simplified tax is imposed on gross revenue at a rate of 4% in Baku and at a rate of 2% in other regions of Azerbaijan. A special rate of simplified tax is set for enterprises involved in residential construction at a fixed amount of AZN 10 per square metre plus an applied co-efficient, which is determined by regional executive authorities.

There are other tax regimes applicable under special agreements concluded between the Azerbaijan government and foreign oil companies: Production Sharing Agreements (PSA) and Host Government Agreements (HGA). The PSA and HGA regimes apply to all enterprises involved in these agreements, including foreign oil companies functioning as contractors and foreign service companies providing services to the contractor or the operating company.

As of 1 January 2010, there are 31 signed and ratified PSAs and two HGAs, each with its own separate tax regime. Each PSA and HGA contains a tax article that outlines the tax regime for that particular agreement. While there are several similarities with respect to tax terms in the various PSAs, there are some differences, other than merely differing tax rates (e.g., taxation of foreign subcontractors) or reporting requirements. Additionally, Tax protocols for each PSA and HGA, which provide specific guidance regarding the procedures for payment of taxes and filing of reports, are negotiated with the Ministry of Taxes and other executive authorities.

**Corporate residence**

A resident enterprise is any legal entity established in accordance with the legislation of the Azerbaijan Republic and performing entrepreneurial activity or any entity that is managed in Azerbaijan.

A PE of a foreign legal entity is also subject to taxation with respect to the income attributable to such PE. A PE is an establishment of a foreign legal entity, through which it fully or partially performs commercial activities (for these purposes, a PE may be considered a management unit, office bureau, agency, construction site, etc.) for more than 90 consecutive days within any 12-month period. Activities of auxiliary or preparatory nature (e.g., exclusively storing or exhibiting goods or products belonging to a non-resident, purchasing goods, or collecting data by a non-resident enterprise for its own purposes, etc.) do not create a PE.
Other taxes

Value-added tax (VAT)
VAT is levied on the supply of goods and services and on the import of goods.

Taxable persons
Any person who is, or is to be, registered as a VAT payer is regarded a taxable person.

Companies are required to register for VAT if their taxable income exceeds AZN 150,000 for the previous 12 months beginning from 1 January 2010 (previously, it was AZN 22,500 and three months respectively).

Taxable transactions
Supply of goods and services in Azerbaijan and imports into Azerbaijan are subject to VAT.

Taxable amount
The taxable base is established by starting with the value of the goods and services without adding the VAT amount, but including any customs duty and excise duty if applicable.

The value of taxable imports consists of the value of the goods determined in accordance with the customs legislation and taxes and duties (other than VAT) to be paid upon importation to Azerbaijan.

The amount of VAT to be paid is the difference between the amount of VAT received on taxable supplies of goods and services and VAT paid on the purchase of goods and services necessary to generate taxable supplies of goods and services.

The Cabinet of Ministers can grant exemptions for the import of goods and equipment used for production purposes or to provide advanced technology know-how. Such exemptions are granted for a specific period and in a specific area, and can only be granted if it is impossible to satisfy the respective needs from local resources.

Rates
The standard rate of VAT is 18%.

The zero rating applies to:

- Exportation of goods and services;
- Importation under the PSA and HGA regimes;
- Importation of goods, the supply of goods, and the implementation of works and provision of services to grant recipients on the expense of financial aid (grants) received from abroad;
- International and transit cargo and passenger transportation, as well as the supply of works and services directly connected with international and transit flights; and
- The supply of gold and other valuables to the National Bank of Azerbaijan.

Excise duty
Excise duties are paid by companies and organisations, including companies with foreign investment, as well as branches, divisions and other independent subdivisions of companies in Azerbaijan that render services and sell self-produced goods.
Azerbaijan

The following operations are subject to excise duties:

- Release of excise goods produced in Azerbaijan outside the premises of the building in which they were produced; and
- Import of excise goods pursuant to the customs legislation of Azerbaijan.

Excise duties are imposed on tobacco products and alcoholic beverages, light vehicles, leisure and sports yachts, petroleum and lubricants.

Property tax
Property tax is levied on both movable and immovable tangible assets owned by individuals and companies.

Taxable persons
Taxable persons comprise:

- Resident companies, including companies with foreign investment that are treated as residents under Azerbaijani law, international organisations engaged in economic activities, and other enterprises;
- Branches and affiliated companies of such taxpayers;
- Agencies and representative offices of foreign legal entities located in Azerbaijan; and
- Non-resident companies performing activities through a PE on the territory of Azerbaijan.

Enterprises can combine their assets and cooperate as joint owners. Joint owners are liable to pay tax according to their interest in the property concerned.

Tax base
The tax base varies according to the residency status of the taxpayer. Resident companies are subject to tax on their tangible assets recorded on their balance sheet. Non-resident companies carrying out a business activity through a PE in Azerbaijan are only subject to tax on their tangible assets connected with the PE.

The following assets are exempt:

- Facilities used for the purposes of the environment, fire protection and civil defence;
- Product lines, railways and motorways, communication and power lines, melioration and watering facilities;
- Automobile transport taxed for the road tax; and
- Facilities of companies involved in education, health, culture and sports that are used only for the purposes of such areas of activity.

Tax rates
The tax is imposed on the average annual book value of the taxable property at the rate of 1%.

Administration
Companies are required to report the average annual value of taxable property and pay tax on a quarterly basis, subject to any necessary recalculations at the end of the
year. Tax payments are due within 15 days of the second month of each quarter. The payment should be 20% of the previous year property tax amount.

The tax on water and air transport means is estimated on 1 January each year by the tax offices based on data provided by the organisations responsible for registration of means of transport. The tax is assessed on the person named in the registration document.

Where an asset changes ownership during the tax year, the tax liability is defined as the liability of the new owner.

**Land tax**
Land tax is levied on the land resources on the territory of Azerbaijan that are in the possession of or used by individuals or companies.

**Taxable persons**
Companies and individuals who own, hold or use land must pay land tax.

**Taxable base**
Land plants that are in ownership or used are subject to land tax. Exemptions apply to various types of land owned or used for public purposes by the state or other public authorities. The government may grant further tax exemptions and reliefs.

**Tax rates**
The rate of land tax for agricultural land is AZN 0.06 per unit. The units are determined by the relevant authority on the basis of the purpose, geographical location and the quality of agricultural land in the administrative regions.

The rate of land tax for industrial, construction, transport, telecommunications, trade and housing servicing and other dedicated land varies from AZN 2 to 10 per 100 m², depending on the city or region.

**Assessment and procedure of payment**
Companies must compute the exact amount of the land tax each year on the basis of documents evidencing the title of ownership, possession and use. The computation must be submitted to the tax authorities by 15 May of each year. The tax must be paid by 15 August and 15 November in equal amounts.

Individuals receive each year before 1 July a calculation from the authorities for the tax amount due by them. The tax must be paid by 1 August.

**Branch income**

In addition to profit tax paid by a PE of a non-resident, the amounts transferred from the net profit of such PE to the non-resident is taxed at a rate of 10%.

**Income determination**

Profit tax is levied on an enterprise’s taxable profits. Profits are defined as the difference between the gross income and deductions.
Inventory valuation
Inventory valuation is determined according to national accounting standards.

An inventory valuation method is not stipulated for tax purposes.

Capital gains
There is no separate capital gains taxation in Azerbaijan. Proceeds from the disposal of capital assets are included in the ordinary taxable income.

Inter-company dividends
Inter-company dividends distributed to residents and non-residents are taxable at payment of source. Therefore, the received dividend amounts of legal entities and physical persons are not taxable for profit (income) tax purposes.

Foreign income
Resident taxpayers must pay tax on worldwide income. A non-resident enterprise operating in Azerbaijan through a PE must pay tax on the gross income generated from Azerbaijan sources less any related deductions attributable to the PE.

According to the Tax Code, if a resident of Azerbaijan Republic directly or indirectly holds more than 20% of charter capital or possesses more than 20% of the voting shares of a foreign legal entity that, in turn, received income from a state with a favourable taxation, then such income of the resident shall be included in its taxable income.

A state with a favourable taxation is considered a country in which the tax rate is two or more times lower than that determined under the Tax Code of Azerbaijan Republic, or a country in which the laws on confidentiality of information about companies exist, which allow secrecy to be maintained concerning financial information, as well as the actual owner of property or income receiver.

Gross income of a non-resident enterprise generated from Azerbaijan sources and not connected with a PE will be taxed at the source of payment without any deductions allowed for expenses.

A non-resident enterprise generating income through the assignment of property not connected with a PE shall pay tax on the gross income received during a calendar year from Azerbaijan sources, after deducting expenses for the period that relates to such income.

Dividends
Dividends received from Azeri sources and previously taxed at the source of payment are not included in the taxable profits of the recipient.

Deductions
All expenses connected with generating income, except for non-deductible expenses and expenses with limited deductibility, are deductible from income.

Road, property, land and mining taxes are also deductible.
**Non-deductible expenses**

Non-deductible expenses are as follows:

- Capital expenses
- Expenses connected with noncommercial activity
- Entertainment and meal expenses, accommodation and other expenses of a social nature incurred for employees

**Expenses deductible within certain limits**

- Interest on loans received from overseas and/or from related parties may be deducted, limited to the interest rate on loans with similar currency and maturity at the interbank credit auction. In absence of such an auction, deductions for interest may not exceed rates of 125% of the interbank auction credit rates published by the National Bank of Azerbaijan Republic.
- The amount of repair expenses deductible each year is limited to the amount of the tax written down value of each category of fixed assets as of end of the previous year. For building and premises, the limit is 2%, for machinery and equipment the limit is 5%, and for other fixed assets the limit is 3%. An amount exceeding these limits shall be taken as an increase of the residual balance value of the fixed assets in the appropriate category.
- Actual business trip expenses are deductible from income within the standards established by the Cabinet of Ministers.
- A legal entity engaged in insurance activities is entitled to deduct allocations to reserve insurance funds within the standards established by the legislation of the Azerbaijan Republic.
- A taxpayer shall be entitled to a deduction for doubtful debts connected with goods, work and services that have been realised where income from them was previously included in the gross income received from entrepreneurial activity. Doubtful debt deduction shall be allowed only if the debt is written off as worthless in taxpayer’s books. Banks and credit entities engaged in certain types of banking activities shall be entitled, dependent from classification of assets in order established under legislation, to deduct from income amounts assigned for establishment of special reserve funds in accordance with procedures established by the relevant executive authority.

**Depreciation**

Depreciation may be calculated at the following rates:

- Buildings and premises – up to 7%;
- Machines, equipment and calculation appliances – up to 25%;
- Means of transportation – up to 25%;
- Working cattle – up to 20%;
- Expenses incurred for geological and exploration works, as well as for preparatory works for the production of natural resources – 25%;
- Intangible assets with an undetermined period of use – up to 10%; for those with a determined period of use – pro-rata amount as per the useful life, in years; and
- Other fixed assets – up to 20%.

**Net operating losses**

Taxable losses incurred by legal entities may be carried forward for five years to offset future taxable profit, without limitations.
Azerbaijan

**Foreign tax credit for residents**
Azeri legal entities are taxed on worldwide profit; however, any tax paid overseas up to the tax amount that would be calculated under Azeri law will be allowed to offset the Azeri profits tax. The tax credit may not exceed the tax that would be imposed on such income in Azerbaijan. This credit applies only to residents of Azerbaijan.

**Group taxation**
Each taxpayer is liable to fulfil his own tax liabilities. Azeri Tax Legislation does not have the concept of “group taxation”.

**Tax incentives**
The rate of profit tax levied on production enterprises, in which the number of employees belonging to public organisations of invalids includes a minimum of 50% of invalids, shall be reduced by 50%. In determining the right to such privileges, invalids substituting permanent employees or subcontractors (i.e., those without an employment contract) are not included into the average number of employees.

**The Law on the Special Economic Regime for Export-Oriented Oil and Gas Activities**
The Law on the Special Economic Regime for Export-Oriented Oil and Gas Activities was adopted in April 2009 and will remain effective for 15 years. This law avails the following tax incentives to contractors and subcontractors (excluding foreign subcontractors without permanent establishment in Azerbaijan):

- Local companies are permitted to choose between i) profit tax at a rate of 20%, or ii) 5% withholding tax on gross revenues.
- Foreign subcontractors are taxable only by a 5% withholding tax.
- A 0% VAT rate.
- Exemption from dividend tax and taxation on branch's net profits.
- Exemption from customs duties and taxes.
- Exemptions from property tax and land tax.

In order to derive these benefits, the relevant taxpayer should obtain a special confirmation certificate from the Ministry of Industry and Energy.

**The Law on Special Economic Zones**
The Law on Special Economic Zones (SEZ) became effective in June 2009. The companies operating in these zones shall have the following tax benefits:

- A 0.5% tax levied on profits from supplied goods, performed services or works;
- A 0% VAT rate; and
- Customs exemptions.

In order to operate in a SEZ, a special residency certificate is necessary. However, the following companies may not apply for this certificate:

- Parties producing or processing oil and gas;
- Parties producing alcoholic beverages and tobacco; or
- Television or radio broadcasting companies.
As of April 2010, no SEZ were established in Azerbaijan.

**Withholding taxes (WHT)**

Income received from Azerbaijan sources not attributable to a PE (base) of a non-resident in Azerbaijan is subject to withholding tax at the following rates:

- Dividends paid by resident enterprises – 10%;
- Interest paid by residents, PEs of non-residents, or on behalf of such PEs (except for interest paid to resident banks or to PEs of non-resident banks) – 10%;
- Rental fees for movable and immovable property and royalties – 14%;
- Leasing, risk insurance or reinsurance payments – 4%;
- Telecommunications or international transport services – 6%; and
- Other Azeri source income – 10%.

If a resident enterprise or a PE of a non-resident receives interest, royalties or rental fees taxable at the source of payment in Azerbaijan, it is entitled to consider the tax deducted from the source of payment, providing the documents supporting the tax deduction are in place.

**Tax administration**

**Returns**

Resident enterprises and PEs of non-residents must file profit tax returns for a calendar year by 31 March of the following year. During liquidation of a legal entity or a PE of a non-resident, the tax return should be submitted within 30 days after the adoption of a decree on liquidation.

A non-resident that has no PE in Azerbaijan and receives income subject to withholding tax at the source of payment (except for dividends and interest) may file a tax return with respect to such income and expenses, connected with the generation of the income, for purposes of reassessment of profit tax at the rate of 20%.

If a taxpayer applies for an extension of time to file the profit tax return prior to the expiration of the filing deadline and at the same time settle the full tax amount due, the filing deadline may be prolonged for up to three months. The prolongation of the terms for filing the return will not modify the terms of tax payment.

Legal entities and entrepreneurs that withhold tax at the source of payment are obliged to file the withholding tax report with the tax authority within 20 days following the end of the quarter.

**Tax payments**

Taxpayers must make advance quarterly tax payments of profit tax by the fifteenth day of the month following the end of the calendar quarter. Payments are determined either (1) as 25% of tax for the past fiscal year or (2) by multiplying the amount of actual income through the quarter by a ratio of tax to gross income for the previous year.
Corporate taxes in Bahrain

Significant developments

There have been no significant legislative or regulatory developments in Bahrain.

Taxes on corporate income

There are no taxes in Bahrain on income, sales, capital gains or estates, with the exception in limited circumstances to businesses (local and foreign) that operate in the oil and gas sector or derive profits from the extraction or refinement of fossil fuels (defined as hydrocarbons) in Bahrain. For such companies, a tax rate of 46% is levied on net profits for each tax accounting period. A company's accounting period should normally follow the (Gregorian) calendar year.

Corporate residence

The income tax law No. 22 of 1979 does not define residence. In the case of businesses operating in the oil and gas sector, profits from taxable activities in Bahrain are taxed in Bahrain irrespective of the residence of the taxpayer.

Other taxes

There are no other taxes on corporate income levied in Bahrain. However, companies are subject to stamp duties, customs duties, as well as a series of corporate registration fees, licence fees and certain municipal taxes (for example, on leases of property and registration of land title).

Branch income

Profit from branch income is taxable in Bahrain if it is derived from activities in the oil and gas sector.

Income determination

There are no specific rules with respect to the calculation of specific items of income, such as inventory valuation, capital gains, inter-company dividends, foreign income or stock dividends. However, the income tax law requires the taxable profits to be calculated using generally accepted accounting principles.
Deductions

The law generally allows deductions for all costs associated with taxable activities in Bahrain, such as the cost of production, refinement and other operational losses.

Depreciation and depletion

Tax deductions may be claimed with respect to reasonable amounts for depreciation, obsolescence, exhaustion and depletion incurred during the taxable year for properties used by the taxpayer in a trade or businesses from which income, taxable under the income tax law, is derived. Generally, such amounts may be claimed on a straight-line basis over the estimated remaining useful life of the properties, unless otherwise approved by the Minister of Finance.

Net operating losses

Unutilised losses may be carried forward and deducted up to an amount equivalent to the net income in future years as defined by the Bahrain income tax law. Carryback of losses is not permitted.

Payments to foreign affiliates

There are no specific restrictions in the income tax law pertaining to payments made to foreign affiliates.

Taxes

All taxes and duties not imposed by the Bahrain income tax law, including customs duties, may be deducted from the taxable income as stipulated in Bahrain’s income tax law.

Other significant items

All reasonable and justifiable costs of production and exploration of products sold during the current taxable year are deductible for tax purposes, provided that these expenses have not been deducted elsewhere in calculating net taxable income.

Group taxation

There is no legislation or mechanism for group relief or the taxation of group activities in Bahrain.

Tax incentives

There are no tax incentives in Bahrain.

Withholding taxes (WHT)

There are no withholding taxes on the payment of dividends, interest or royalties.

Tax administration

Returns

An estimated income tax statement must be submitted on or before the fifteenth day of the third month of the taxable year. Where applicable, a taxpayer may also be required to file an amended estimated income tax statement quarterly, unless a final income tax statement has been provided.
Bahrain

Approved accountants must prepare a certified tax return for the return to be acceptable to the authorities.

Payment of tax
Taxes are payable in 12 equal monthly instalments. Payments are due starting the fifteenth day of the fourth month of the taxable year. Income tax as per the final/amended income tax statement will form the basis of tax payments for the next 12 months, and any excess income tax paid will be credited and used in the first invoice following the establishment of the credit by the Minister.
**Significant developments**

As a result of major tax reform in 2009, the Tax Code of Belarus (Tax Code) has replaced all other tax laws, effective 1 January 2010. From the effective date forward, in order to establish a new tax or to change an existing tax, the Parliament will have to amend the Tax Code, except in cases when a new state tax is established by order or decree of the President of Belarus.

A new rule has been established for cases where there is uncertainty or ambiguity surrounding tax legislation for a taxpayer. In these situations, the tax authorities must resolve the issue in favour of the taxpayer.

Another significant development entitles a taxpayer to appeal any decision of the tax authorities related to the taxpayer’s request concerning application or enforcement of the tax legislation, with regards to a certain tax issue, in court.

Several new amendments resulted from the tax reform effective 1 January 2010, which abolished the following taxes:

- 1% turnover tax (state);
- 3% vehicle acquisition tax (state);
- 5% retail sales tax (local); and
- Parking tax (local).

Certain modifications in tax rates and administering and filing procedures with regard to value-added tax (VAT) and corporate income tax (CIT) have been set by the Tax Code.

The standard VAT rate increased from 18% to 20% and is levied on supplies of goods, works and services in 2010. The requirement to maintain records of purchases in support of input VAT deductions was abolished. Taxpayers are no longer required to issue and maintain VAT invoices of mandatory form for work and services supplied. Certain taxpayers, whose total sales revenue does not exceed BYR 3,815 billion calculated on an accrual basis from the beginning of the year, may qualify for VAT filing and payment on a quarterly basis.

The timeframe for tax refund decisions, notifications and distributions from the tax authorities was adjusted. Tax authorities now have two days to make a determination of a refund (reduced from 10 days). Once the determination is made, a taxpayer must be notified of the offset of tax within five business days (reduced from 10 days). The
Belarus

tax refund from the budget after the offset is made should be received from the tax authorities within five business days (reduced from one month).

Contrary to VAT, a company may file and pay CIT on a quarterly basis, irrespective of the amount of sales revenue. A reduced 12% CIT is levied on dividends derived from local or foreign sources, and capital gains from disposal of shares or stocks in Belarusian entity.

A company is entitled to deduct for CIT any business related costs if supported by proper documents, except for certain costs specifically restricted by the Tax Code.

Restrictions on the deductibility of marketing and advertising expenses, and management and consultancy fees for CIT purposes were annulled as of 1 January 2010.

Significant changes in land tax were also introduced. In 2010, a company will have to calculate land tax in percentage to cadastral value of a land plot, rather than at a flat rate in BYR per hectares as it was calculated in 2009. Provided that average rate of 1% is levied on cadastral value of the land plots (related to production/manufacturing areas located in Minsk, the capital of Belarus), the amount of land tax charged may significantly increase in 2010.

Local authorities (Councils of Deputies) are entitled to change (increase or reduce, but not more than twice) the established rates of land tax and immovable property tax for certain taxpayers.

Pursuant to the e-filing initiative of the ministry of taxes all Belarusian taxpayers will benefit from electronic tax filing starting from 2011, which is not currently mandatory.

**Taxes on corporate income**

The standard corporate income tax (CIT), also known as profits tax, rate is 24%.

**Exemptions**
The following types of income are exempt from CIT:

1. “Target financing” received from the budget. The taxpayer is required to hold separate accounting records of income and expenses derived and incurred within “target financing”.
2. Amounts payable to a shareholder, whether in cash or in kind, not in excess of its contribution to the statutory capital of a legal entity in case of:
   - Its liquidation;
   - A shareholder’s withdrawal from a legal entity; or
   - If the shares are purchased by a legal entity from its shareholder.
3. Payments to a shareholder in the value of its shares or as a result of an increase in their nominal value made by the legal entity’s sources, as long as such payments do not change the percentage of participation of either shareholder.
4. Goods (works, services), material rights and monetary means granted:
   - To the successors by a legal entity in case of its restructuring; and
   - As an inter-company transfer pursuant to corporate decision;
Belarus

- To taxpayers engaged in crop production, animal husbandry, fish farming and beekeeping, provided that this income is spent for the appropriate activities; and
- As a foreign gratuitous help on conditions stipulated by the president.
5. Monetary means or assets received by a taxpayer from its shareholders as their contributions to the statutory capital, not in excess of amounts provided by the statutory documents.
6. Penalties paid by a taxpayer as a result of a violation of contract terms.
7. Fees associated with court cases (court related fees).

**Local taxes**

*Area development tax*

There is a local area development tax due on net profits.

The tax is paid by any legal entity, including foreign companies acting via a permanent establishment in Belarus, conducting business in the prescribed territory (city, region, and area).

The tax base for area development tax is the taxpayer’s taxable profits minus the amount of CIT paid. The permitted rate for area development tax should not exceed 3%.

The tax is reported and paid on a quarterly basis, and is not deductible expenses for the purposes of CIT.

**Corporate residence**

A company is resident in Belarus if it is incorporated in Belarus. According to local legislation, a foreign company is deemed to have a permanent establishment (PE) in Belarus in cases where:

- It permanently carries out commercial activities in Belarus in whole or in part;  
- It carries out its activities through a dependent agent;  
- It uses a building site or construction, assembly or equipment objects; or  
- It provides services or performs works within a period of 90 days continuously or in the aggregate during a calendar year.

Double taxation treaties (DTT) may establish different rules of PE recognition. According to domestic law, where there is a DTT, the provisions of the treaty shall prevail.

Notwithstanding the activities which create a PE in Belarus, a foreign company must be registered with the local tax authorities controlling the territory where activities are carried out, before starting a business in Belarus.

Any profits derived by a foreign company via a PE in Belarus are subject to 24% CIT and 3% area development tax. Expenses incurred by a foreign company either in Belarus or abroad that relate to a PE can be deducted subject to local deductibility restrictions.
Other taxes

Value-added tax (VAT)
The standard VAT rate is 20%, whereas the preferential rate is 10%.

In general, local supplies of goods, works and services made by a taxpayer performing its economic activities in Belarus, as well as the importation of goods are subject to VAT.

Place of supply rules established by the Tax Code of Belarus should be followed to determine whether goods, works and services are supplied locally, and therefore, subject to tax in Belarus.

When a foreign company, which does not have a PE registered in Belarus, sells goods or provides works and services that are considered local supplies according to the place of supply rules, the VAT due on such supplies is paid by the purchaser registered with the local tax authorities from its own funds. This VAT could be deducted against output VAT, if any, or refunded from the budget in the established order.

Some exceptions apply to provision of construction and other similar works.

Exemptions with credit (zero-rated) include, but are not limited to:

- Supply of goods exported outside of Belarus;
- Provision of works and services involving maintenance, loading, reloading and any other similar works and services related to supply of exported goods;
- Transportation and any directly linked ancillary services related to the export or import of goods, including transit forwarding, as well as exported works for goods processing;
- Works and services related to the manufacturing of goods (excluding processing of imported goods) exported from Belarus to Russia; and
- Works and services related to repair (modernisation, conversion) of vehicles (including parts of vehicles) imported from Russia to Belarus for the mentioned purposes, with subsequent export of renovated vehicles.

In order to apply zero-rated VAT on goods carried out from Belarus, VAT payers must hold supporting documents as evidence that these goods were actually exported from Belarus to other state. Application of zero-rated VAT on respective works and services must be supported by the appropriate documents, which have to be provided to the local tax authorities where the taxpayer is registered for tax purposes.

Exemptions without credit include, but are not limited to:

- Disposal of shares in resident legal entities;
- Supply of material rights for industrial property objects (e.g., inventions, utility models, industrial designs, breeding achievements, integrated circuits, know-how, trade names, trademarks and service marks);
- Supply of securities, derivatives and other similar financial instruments, certain limitations apply;
- Fiduciary management services related to funds and assets owned by an individual or an entity, securities, derivatives and other similar financial instruments;
Belarus

- Provision of all types of insurance and re-insurance (co-insurance) services rendered by insurance and re-insurance agents;
- Supply of medicines, medical equipment, instruments, medical products, as well as drugs, devices, equipment, veterinary products, under certain conditions;
- Personal or public health care services, under certain conditions;
- Social services supplied by institutions for children and young people care, nursing homes for the elderly and/or by care/guardianship institutions for disabled or by other non-profit entities;
- Supply of services in the field of culture and art, under certain conditions;
- Public services (services of barbers, baths and showers; laundry and dry cleaning services; watch repairing; manufacturing and repair of clothing and footwear; repair and maintenance of household appliances; repair of personal and household goods);
- Services provided by religious organisations, if these services correspond to the purposes set out in their canons, statutes and other documents;
- Funeral services, maintenance of the graves, tombstones, fences and other objects associated with burial, as well as works on their production, under certain conditions;
- Supply of postage stamps, postcards and envelopes marked, excise and control (identification) stamps for marking of goods at their nominal value, stamps which can be used as a confirmation of fees and charges payable in accordance with the legislation;
- Supplies of jewels as well as related services, under certain conditions;
- Retail trade of goods in duty-free shops, under certain conditions;
- Communication services rendered to individuals;
- Legal services supplied by certified lawyers;
- Research and development, design and technological works and services, under certain conditions;
- Education and training services;
- Lotteries and gambling, under certain conditions;
- Financial services supplied by the banks, under certain conditions; and
- Goods and equipment imported into Belarus, under certain conditions.

In order to apply exemptions, taxpayers should ensure that their services and goods supplied meet the appropriate VAT exemption requirements.

**State dues**

State dues are payable by legal entities that apply to the state institutions for the issuance of documents having legal force or other deeds, bring the cases before the courts for consideration, use bills of exchange in their activities, etc.

State dues include the following payments and duties:

- State fees (payable on suits, applications, appeals and other documents that are submitted to or claimed from the courts or prosecution authorities, payable on applications for state registration of a legal entity, notary public services, real estate registration services, etc.);
- Patent fees (payable for registration and use of intellectual property);
- Stamp fees (payable on activities with bills of exchange); and
- Consular fees (payable on the activities of state consular and diplomatic departments performed under the request of any applicant).
Belarus

**Offshore charge**
An offshore charge is levied upon the following activities of domestic entities:

- Any transfer of funds to an entity registered in an offshore jurisdiction (blacklisted territory) or to a third party who is a creditor of that entity, or to the bank account of a blacklisted territory;
- In kind performance of obligation to an offshore entity, with some exceptions; and
- Any transfer of material rights and obligations as a result of changes in commitment (cession or transfer of debt) between a domestic entity and an offshore entity.

Tax relief is granted to: (1) repayment of loans including interests on them, borrowed from entities located in blacklisted territories, (2) payments due under international marine cargoes and forwarding services and (3) payments for bank operations under certain conditions.

An offshore charge is paid at 15% rate and is deductible for CIT purposes.

**Land tax**
Belarusian and foreign entities are subject to land tax collected by the local tax authorities with respect to land that they own or use in Belarus.

Tax base depends on a plot location and purpose and is normally determined pursuant to cadastral value of a land plot.

Land for public roads and railways, as well as forest land, is exempt.

The tax is payable on an annual basis at the rates established by the Appendixes to the Tax Code of Belarus. Tax rates for agricultural plots vary from BYR 90 to BYR 24,402 per hectare. Tax rates on the land plots located in towns and rural areas range from 0.36% – 12% payable on the cadastral value.

Land tax is deductible, with some exceptions, for CIT purposes.

**Real estate tax**
Real estate tax is levied at the annual rate of 1% on the residual value of the following objects:

- Buildings, including separated premises, and constructions, late construction in progress (if construction works take longer than the deadline established in technical documentation), owned by legal entities; and
- Buildings and constructions, including houses, garden houses, villas, other kind of accommodation (e.g., apartments, rooms), farm buildings as well as construction in progress, located in the territory of Belarus, owned by individuals.

The tax base of buildings and constructions, located in the territory of Belarus and leased by individuals to legal entities, will be the contract value of the leased real estate not less than its value established by the evaluation. Evaluation is conducted in the manner approved by the President of Belarus.

When the real estate subject to taxation is located in Belarus and leased by a resident company to a lessee, the lessee is considered a real estate taxpayer provided that the leased real estate is accounted for in its balance sheet. The lessee is also obliged to pay
the tax due on real estate leased from foreign companies that are not considered as having a PE in Belarus.

For objects located in Belarus such as trunk pipelines, oil pipelines, gas pipelines, stations, warehouses, plants and other objects related to the trunk pipelines, which are owned by a foreign company and leased to any legal entity, the tax is paid by the owner (i.e., by the foreign company).

Amount of tax, except the tax due on late construction in progress (if construction works take longer than the deadline established in technical documentation), is deductible for CIT purposes.

**Excise taxes**

Excise taxes are imposed on the following goods produced and sold in or imported to Belarus:

- Rectified ethyl alcohol and alcoholic drinks, including beer and wine;
- Alcohol-containing food products in the form of solutions, emulsions, suspensions, produced with the use of ethanol from all types of raw materials, other alcohol-containing products;
- Tobacco (excluding raw tobacco), including cigarettes, cigars, cigarillos and smoking tobacco;
- Energetic products, including petrol, kerosene, diesel and bio diesel, gasoline, fuel, marine fuel, oils for diesel engines and engines with a carburetor and an injector;
- Liquefied hydro carbonated gas and compressed natural gas used as motor fuel; and
- Vans and passenger cars, including those converted to cargo (HS codes 8702, 8703 and 8704).

The tax rate depends on the type and quantity of goods. Rates of excise taxes are stipulated by the Appendixes to the Tax Code of Belarus.

The Tax Code of Belarus provides a detailed procedure for calculation and inclusion of the excise tax into deductible expenses as well as into the accounting records of a taxpayer.

Excise taxes paid on the purchasing/importation of excisable goods to be used in manufacturing of goods or provision of works and services in Belarus are considered as deductible for CIT purposes, with certain exceptions.

**Customs payments**

The following charges are considered customs payments:

- Import duties;
- Export duties;
- Special anti-dumping and countervailing duties;
- VAT and excise taxes due upon importation of goods; and
- Fees for customs processing/services.

Rates of import duties as well as description of goods subject to them are established by the Belarus Customs Tariff.
Belarus

Export duties are not levied on exported goods, with the following exceptions: certain soft oil, light distillates; fuels and gasoline, wasted petroleum products, propane, butane, ethylene, propylene and other liquefied gases, petroleum coke, petroleum bitumen, benzol, toluene, xylenes, etc.

Import duties are temporarily not levied on importation of certain goods such as some food products, some textile fabrics, latex, certain chemical substances, coke and semi-coke of peat, whether or not agglomerated, retort carbon, soluble classes of wood pulp, high tenacity fibres made of nylon or other polyamides with certain exceptions, and some others.

Import and export duties are calculated on the customs value of the goods, which is defined pursuant to methods and procedures established by the Customs Code of Belarus. Generally, the following components are considered when calculating the customs value of imported goods:

- Contract price of the goods;
- Rebates and discounts provided by a supplier, under certain conditions;
- Transportation related expenses;
- Insurance premiums;
- Cost of containers and other package;
- Royalties or other similar fees; and
- Part of direct or indirect income to be derived by the seller from future resale, transfer or other use of imported goods.

Special, anti-dumping, and countervailing duties could be imposed as a measure to protect economic interests of Belarus.

Tax base for VAT calculation due on imported goods (further – import VAT) includes the total amount of customs value, import duty and excise tax paid, if any.

Generally, the taxpayer is required to pay customs duties before the customs clearance of the appropriate goods; however, under certain conditions, a taxpayer may be provided with an extension of payment deadlines or allowed to pay only part of customs duties. It is also possible to pay customs duties in advance.

**Ecological (environmental) tax**
The tax is imposed on pollutants discharged into the environment, storage and disposal of industrial wastes; production and (or) importation of plastic, glass containers, container-based paper and paperboard, other products that could generate waste or do harm to the environment after the loss of their consumer characteristics, importation of goods packed in plastic, glass bottles and containers from paper and paperboard with certain exceptions, oil refining, oil transportation via trunk pipelines, oil products in transit, etc.

The following are excluded from taxation, including but not limited to:

- Pollutants discharged into the air by mobile sources (cars, vehicles, etc.);
- Importation of plastic, glass containers, container-based paper and cardboard used for packing goods for export, if they are accounted separately; and
- Seizure of minerals from the subsoil during the construction of underground parts of buildings and other construction projects not related to mining.
The tax base of environmental tax is the actual quantity of respective pollutants used/discharged. Tax rates of environmental tax are stipulated by the Tax Code of Belarus.

Environmental tax paid, with certain exceptions, is treated as deductible for CIT purposes.

**Tax on natural resources**
This tax is payable on the actual value of extracted natural resources. It depends on the kind and quantity of extracted resources.

Tax rates are established by the Tax Code of Belarus and are applied on natural resources that have been extracted by a taxpayer within established limits. Natural resources extracted over established limits are taxed by a standard tax rate multiplied by 10.

Tax paid on resources extracted within established limits or if the limits are not established (for certain type of resources), is treated as deductible for CIT purposes.

**Local taxes**

**Service tax**
Taxpayers of service tax are all legal entities. Tax base is the taxpayer’s income derived from the provision of respective services, excluding the amount of service tax.

Provision of the following services is subject to service tax:

- Markets, fairs, exhibitions;
- Hotels (campgrounds, motels);
- Restaurants (bars, cafes);
- Disco, billiards, bowling clubs, hairdressers (beauty salons), solarium, cosmetic services;
- Real estate, cellular mobile telecommunication, cable TV, maintenance and repair of vehicles for individuals; and
- Tourism.

The service tax rate should not exceed 5%. The tax is added to the price of services including VAT.

**Tax on providers (suppliers)**
The tax is levied on legal entities engaged in gathering/purchasing of wild plants (or parts thereof), mushrooms, and technical and medical raw materials of floral origin for their further industrial processing or resale.

Tax base is the cost of gathered items defined on the basis of procurement (purchasing) prices.

Tax rates do not exceed 5%. Tax on providers is treated as CIT deductible expenses.

**Branch income**
Foreign legal entities pay tax on profits attributable to a PE. A PE is broadly defined as “a branch, division, office, bureau, agency, or any other place through which a foreign legal entity regularly carries out its business activities in Belarus”. Belarus’ various DTT
Belarus

may define a PE differently, which could in some cases result in tax relief. Conducting business through an agent may also create a taxable PE in Belarus.

A PE’s profits are computed on substantially the same basis as Belarusian legal entities, including the composition of tax deductible expenses. The Tax Code provides for the deductibility of expenses incurred abroad by a head office with respect to its PE in Belarus (including a reasonable allocation of administration costs).

To calculate a PE’s taxable income, a foreign company is required to provide a tax authority with financial documents (i.e., accounting records, income statement, general ledger accounts, invoices, statements of services/works fulfilment, etc.) supporting the amount of revenue earned and expenses incurred. Generally, PE’s taxable income is defined on revenue less costs basis. Documentary support of each revenue and/or costs item is required.

When it is not possible to calculate a profit attributable to a PE, this profit can be calculated by the Tax Authority using one of the following methods:

- A profit sharing method (i.e., gross foreign profit is allocated to PE by using one of the following coefficients related to a PE – working time costs, expenses incurred, services/works performed); or
- Benchmarking method (tax authority performs benchmarking study by collecting the respective ratios/indexes of other entities engaged in similar activities).

Head office expenses related to a PE are considered for calculation of taxable income in Belarus and require confirmation of an independent foreign auditor. Splitting of expenses is highly recommended in the audited financial statements of the parent company (head office).

If a foreign company is deemed to have a PE in Belarus, it will have to register with a local tax authority and declare related profit. Profit related to a PE will be taxed by CIT at a rate of 24% and 3% area development tax.

Foreign legal entities operating in Belarus through a PE are required to follow the filing and payment schedules established for Belarusian legal entities, although they shall submit CIT returns on a quarterly basis within established reporting deadlines and annual tax report by 15 April of the following year.

Foreign legal entity is allowed to operate in Belarus via its representative office or to set up a resident legal entity.

A representative office of a foreign company is defined as the structural subunit registered with the ministry of foreign affairs, which is entitled either to engage in commercial activities in Belarus or not, conclude contracts and undertake obligations according to the power of attorney issued to the management official of the branch by its head company (founder).

The representative office is not considered a legal person.

A representative office conducting commercial activities is taxed in the same manner as a PE or as a local resident company, with some exceptions.
A non-commercial representative office pays taxes due on its primary and auxiliary activities, such as real estate tax (with some exceptions), customs duties, input VAT, personal income tax, social security contributions due on employment of individuals, etc.

**Income determination**

**Inventory valuation**
Under domestic accounting legislation, stock used in the production and included in the cost of produced goods could be generally valued by the following methods:

- Cost of each unit;
- Average cost;
- Weighted-average cost;
- Last-in, first-out (LIFO); and
- First-in, first-out (FIFO).

The inventory valuation method must be established by the taxpayer’s accounting policy and the same method is to be used for CIT purposes.

**Capital gains**
Capital gains from disposal of shares/stocks in a Belarusian entity are taxed as part of the taxpayer’s profits and are subject to 12% CIT. No tax exemptions are provided by the Tax Code for the capital gains taxation.

**Inter-company dividends**
Dividends distributed by a resident company to another resident company are subject to 12% CIT, which is withheld by a paying company.

The Tax Code provides no exemptions for taxation of inter-company dividends.

Dividends distributed by a foreign entity represent non-operating income of a receiving Belarus entity and are subject to 12% CIT payable by the receiving entity in Belarus, irrespective of the fact that the foreign entity has paid the withholding tax (WHT) on dividends distributed.

**Foreign income**
If a Belarusian legal entity derives income subject to taxation abroad, the tax paid abroad may be deducted from the calculated CIT according to domestic legislation.

In accordance with the Tax Code, the amount deducted from CIT may not exceed that part of the tax calculated in Belarus that is attributed to the income received in a foreign jurisdiction. If there is a valid DTT with the country in question, the provisions of the treaty regarding avoidance of double taxation shall apply.

**Deductions**

**Depreciation**
Intangible and tangible assets may be depreciated using the directly proportional (straight-line) depreciation method, indirect disproportionate depreciation method, production depreciation method, or a declining-balance depreciation method. Depreciation may not exceed maximum rates established by the law.
**Belarus**

**Net operating losses**
Pursuant to local tax rules, net operating losses shall not be carried forward nor carried back. They must be fully recognised in the year incurred.

**Taxes**
Generally, the following taxes, dues and other compulsory charges to the budget are deductible for CIT purposes (including but not limited to):

- Excise taxes paid at purchasing/importation of excisable goods to be used in manufacturing of goods or provision of works and services in Belarus, with some exceptions;
- Environmental tax, with certain exceptions;
- Real estate tax, except the tax due on late construction in progress;
- Land tax, with some exceptions;
- Tax on natural resources, with some exceptions;
- State dues;
- Offshore charge;
- Tax on providers; and
- Payments for social and other mandatory security.

The following taxes shall not be deducted for CIT purposes:

- VAT paid, with certain exceptions;
- Corporate income tax; and
- Area development tax.

VAT can be treated as deductible for CIT purposes only if acquired goods, works or services are used for production or sale of goods, works or services that are VAT exempt.

**Other significant items**
Deductible expenses include all the usual costs that an entity actually incurs for the purpose of earning income or receiving economic benefit unless the Tax Code of Belarus or presidential regulations provide otherwise.

Limited deductible expenses are:

1. Depreciation or amortisation of fixed assets (for tax purposes assets cannot be depreciated faster than indicated in the relevant tax and accounting legislation);
2. Modernisation and reconstruction of fixed assets (the value of modernisation or reconstruction is included in the acquisition costs);
3. Business trips;
4. Representation;
5. Management fees payable to outsourcing companies, deductible with restrictions
6. Natural losses, with certain exceptions;
7. Cost of fuel and energy resources, deductible with restrictions established for certain entities;
8. Environmental tax and tax on natural resources, deductible with restrictions;
9. Bad debts, deductible only if proved and specific criteria are met;
10. Social insurance contributions and expenses for the benefit of employees, deductible with restrictions;
11. Membership fees, contributions and premiums, deductible with restrictions; and
12. Premiums on certain types of voluntary insurance, deductible with restrictions.

Non-deductible expenses:

1. Expenses on provision or acquisition of works and services not related to the taxpayer's business activities;
2. Construction, maintenance and other works, including all types of repair of assets that are not used for the purpose of earning income or receiving economic benefit;
3. Default interest (forfeit), fines and other sanctions paid to the state budget;
4. Certification related expenses (testing (analysis) of samples, if the results are negative);
5. Dividends paid and similar type of payments;
6. Contributions made to the authorised share capital;
7. Expenses incurred on purchase and/or creation of depreciable assets;
8. Depreciation for tangible and intangible assets not used in business, as well as for tangible assets that are not in operation;
9. Cost of assets or material rights transferred as advance or a pledge to a third party;
10. Expenses covered by reserves for future expenses created by a taxpayer in the prescribed manner;
11. Interest on overdue loans, as well as on loans related to the acquisition of tangible and intangible assets, other long-term assets; and
12. Other expenses, not related to the deriving of income and not attributed to operating activities of the entity as well as expenses that are not considered as allowable deductions under the Tax Code of Belarus.

**Group taxation**

Currently, group taxation legislation and regimes are not available in Belarus. Each Belarusian entity is regarded as a separate taxpayer and may not deduct tax losses of any other group entity. Belarus Tax Code does not allow the deduction of foreign losses from domestic taxable income, or domestic losses from foreign taxable income.

**Tax incentives**

Amounts not exceeding 5% of entity's gross profit granted to the health, education, social welfare, culture, sports state institutions, or spent for acquisition of goods, works or services for the benefit of the named institutions, are not taxed with CIT.

Entities employing disabled persons, if their number exceeds 50% of the average number of employees for the reporting period, are exempt from CIT due on taxable profit derived from production activity.

Profit of entities engaged in baby food production is exempt from CIT.

Profit derived by insurance companies from investments of insurance reserves under the contracts of voluntary life insurance is not taxable with CIT.

Entities engaged in manufacturing of prosthetic and orthopedic devices (including dental prostheses), provision of rehabilitation and disability services are exempt from CIT due on profit derived from sales of these items.
Belarus

Entities deriving profit from sales of plants (except for flowers, ornamental plants), livestock (except for farming), fish farming and beekeeping, provided the entities raise them, are not considered as taxpayers of CIT.

Profit from the services provided by hotels located at tourist sites established by the President of Belarus is exempt from CIT for three years starting from the commencement of its activities, with certain exceptions.

Profit derived by motels, hotels, campgrounds, maintenance stations, objects of trade and catering, cleaning, located on the roadsides of national highways is not taxable with CIT for five years starting from the day when the permission for such activities was received.

The profit is excluded from CIT if it is spent for financing of capital investments for production purposes (capital investments tax incentive) as well as for the repayment of bank loans received and used for this purpose. Capital investments are defined as any purchase of fixed assets or construction in progress, any capital construction in the form of new construction and (or) creation of fixed assets, reconstruction and modernisation of fixed assets or construction in progress. This tax relief is provided if a taxpayer meets certain established requirements.

Entities engaged in production of laser-optical equipment, accounting for at least 50% of the entity's total production, can benefit from a reduced CIT rate of 10% (whereas standard CIT rate is 24%), under certain conditions.

Entities that are members of the Scientific and Technological Association established by Belarusian State University, in accordance with legislation are entitled to apply 5% CIT rate on their profit derived from sales of IT and provision of IT development services.

High-technology producers included in the special list approved by the President of Belarus are taxed at 12% CIT with regard to the profit derived from sales of their own high-tech goods, works and services, under certain conditions.

Entities, which are registered in Belarusian Free Economic Zones, are exempt from CIT in relation to goods, works and services of their own production for five years starting from the date when the profits were declared. After expiration of this term, the CIT rate is 12%.

Moreover, residents of Free Economic Zones are granted, under certain conditions, a partial VAT relief, and a relief for a real estate tax on buildings and constructions located in Free Economic Zone.

Withholding taxes (WHT)

**Domestic legislation**
The following income of a foreign entity in Belarus not derived through a PE is deemed to be Belarusian-source income:

- Freight charges, (including demurrage) and freight-forwarding services (excluding freight charges for the marine transportation and forwarding services) – 6%;
- Interest on any type of debt obligations including securities – 10%;
- Royalties – 15%;
• Dividends and other similar income – 12%;
• Penalties, fines and other sanctions received for breach of contractual liabilities – 15%;
• Income derived from sports, entertainment activities or performers’ activities – 15%;
• Income derived from innovative, design, research and development activities, design of technological documentation engineering design and other similar works and services – 15%;
• Income from provision of guarantees – 15%;
• Income from provision of disk space and/or communication channel for placing information on the server and services for its maintenance – 15%;
• Proceeds from the sale, transfer (with title) or lease of immovable property located in Belarus – 15%;
• Income derived by a foreign entity from the sale of an enterprise as a complex of assets located in Belarus – 15%;
• Capital gains (income from the sale of shares/stocks) in local companies – 12%;
• Income from the sale of securities (except shares) – 15%; and
• Income derived from provision of works and services – 15%.

In calculation of WHT due on certain types of income a taxpayer is permitted to deduct related expenses following the rules specified by the Tax Code.

Generally, the tax is withheld and paid to the budget by a local entity, an individual entrepreneur, a branch or a PE of a foreign company. When certain types of Belarusian-source income is received (capital gains, sale, transfer of title of ownership or lease of immovable property, provision of licenses for software and other copyright objects, etc.), a WHT shall be paid directly by a foreign entity.

Currently Belarus has approximately 60 DTT with foreign countries. Where a treaty for the avoidance of double taxation with the country in question contradicts the local tax regulations, the treaty provisions prevail.

Reduction of or an exemption from withholding taxes under a DTT may be obtained if a special residence certificate is completed and provided to the tax authorities before the payment is made.

If the payment that is covered by the DTT has already been made and WHT at the local rate was withheld, it is possible to obtain an appropriate refund (reduction) by completing a special claim for a refund. The claim for a refund must be filed with additional documents, such as a residence certificate, copies of the contract and other documents related to the payment.

**Dividends, interest, royalties**
Currently, foreign entities are subject to WHT on loan interest paid by Belarusian companies and PEs of foreign companies at a rate of 10%. WHT is not applied on:

• Interests on loans to domestic entities when these loans are made from accumulated profits on securities/shares issued by a foreign entity; and
• Interest on loans under syndicated loan agreements.

Belarusian WHT rate on royalties paid to a foreign entity is 15%. Dividends paid are subject to WHT at the rate of 12%.
Belarus

DTT include provisions for reduction of withholding taxes on dividends, interest and royalties.

**Offshore companies**
A blacklisted territory is a territory which is included in the list of offshore territories established by the president, has a preferential tax treatment and/or does not disclose of the information related to financial transactions made by resident entities.

A list of 52 offshore territories has been published. With certain exceptions specified in the law, all payments to offshore companies or their branches for any kind of work or services, commodities, interest on loans, insurance premiums, guarantees, etc. are subject to offshore charge, which is deductible for CIT purposes.

**Special tax treatments**
Belarus Tax Code provides special tax treatments, which are applicable to a certain taxpayer depending on its location, amount of revenue and individuals employed, types of business, etc. Special tax treatments include but not limited to:

- Simplified taxation;
- Tax on farmers and other producers of agricultural products;
- Tax on gambling business;
- Tax on lotteries;
- Tax on electronic interactive games; and
- Free economic zones.

In case where activities fulfil the criteria of a special tax treatment, the taxpayer is not permitted to use the general taxation regime with regard to income deriving from those activities, with certain exceptions. Concerning simplified taxation and tax on farmers, the taxpayer is entitled to determine whether to apply such treatment or not.

**Tax administration**

**Returns**

*Corporate income tax*

Whether a company has taxable income or not, the CIT return shall be submitted on a monthly or quarterly basis, depending on the reporting period applied by the taxpayer, by the twentieth day of the month following the reporting period.

PEs of foreign companies shall submit tax returns on a quarterly basis within established reporting deadlines and an annual tax report by the fifteenth of April of the following year. Annual CIT return must be audited by a local certified auditor.

CIT withheld on inter-company dividends must be reported by a tax withholding entity no later than the twentieth day of the month following the month in which the dividends were accrued.

*WHT on payments other than inter-company dividends*

A tax-withholding entity must submit a WHT return to the tax authorities no later than the twentieth day of a month following the month when the payment was made.
VAT
VAT return shall be submitted on a monthly basis, by the twentieth day of the month following the reporting period.

Offshore charge
The tax is reported on a monthly basis, no later than the twentieth day of the month following the reporting period.

Land tax
The tax is reported annually, no later than 20 February of the next reporting year.

Immovable property tax
Tax reporting obligation must be fulfilled by a taxpayer before 20 January of the reporting year.

Excise taxes
The tax is reported on a monthly basis, no later than the twentieth day of the month following the reporting period.

Customs payments
Customs payments are calculated in customs declarations (i.e., no special customs return).

Ecological (environmental) tax
The tax is reported and paid on a quarterly basis. Certain exemptions are provided to legal entities effecting tax payments on the basis of established annual limits. These taxpayers will have to fill an annual tax return and provide it to a tax authority no later than 20 April of the calendar year.

Tax on natural resources
The tax is reported and paid on a quarterly basis. Those taxpayers, who calculate the tax on the basis of annual limits for extraction, fulfil tax reporting and payment liability on an annual basis.

Service tax
The tax is reported and paid on a quarterly basis.

Tax on providers (suppliers)
The tax is reported and paid on a quarterly basis.

Payment of tax
Corporate income tax
CIT must be paid before the twenty-second day of a month following the reporting period.

PEs of foreign entities are subject to quarterly tax payments due no later than the twenty-second day of the month following the reporting period (quarter). Furthermore, the remaining CIT, if any, shall be paid within 10 days after the date established for filing the annual tax return (i.e., no later than 25 April).

CIT on inter-company dividends shall be paid no later than the twenty-second day of a month following the month when dividends were paid.
Belarus

WHT on payments other than inter-company dividends
WHT is to be calculated, withheld and paid by a Belarusian company or a PE of a foreign company no later than the twenty-second day of a month following the month when the payment was made.

VAT
VAT shall be paid on a monthly basis, no later than the twenty-second day of the following month.

Offshore charge
The tax is paid on a monthly basis, no later than the twentieth day of the month following the reporting period.

Land tax
Generally, the tax is paid quarterly by equal parts, before the twenty-second of the second month of each quarter. Concerning payment terms for land tax due on agricultural plots, some exceptions can be applied.

Immovable property tax
The tax is paid on a quarterly basis by equal parts, no later than the twenty-second day of a first month of each quarter.

Excise taxes
The tax is paid on a monthly basis, no later than the twentieth day of the month following the reporting period.

Customs payments
Generally, customs payments are made before customs clearance. Payments in advance are also possible. A taxpayer may be provided with a payment extension or qualify for payment in instalments, if certain conditions are met.
Significant developments

Dividends-received deduction (DRD)
Belgian tax-resident companies (or Belgian branches) can deduct 95% of dividends received from qualifying holdings from their net taxable income. The previous conditions were that the company (or branch) had to have held or committed to maintaining a shareholding of at least 10% or having a minimum acquisition value of EUR 1,200,000 in the subsidiary for at least one year. Credit institutions, insurance companies and broker-dealer companies did not have to meet this condition. As of 1 January 2010, the minimum acquisition value has been raised from EUR 1,200,000 to EUR 2,500,000.

In addition, the exemption provided for credit institutions, insurance companies and broker-dealers companies has been abolished. As from tax year 2010, the minimum threshold requirement also applies to these companies.

Under Belgian tax law, any “excess” DRD in a given tax year (i.e., that could not be used in the year in which it arose due to a lack of net taxable income) could in principle not be carried forward, and thus was forfeited. Pursuant to judgments against Belgium by the European Court of Justice (ECJ) for breach of the EU Parent-Subsidiary directive, the Belgian tax administration issued two practice notes in June and October 2009 in which it acknowledged that excess DRD for European Economic Area (EEA) dividends and certain non-EEA dividends (subject to conditions) can be carried forward to future tax years.

Any unused portion of the DRD from dividends received from an EEA subsidiary or a subsidiary from a country with which Belgium has concluded a double tax treaty with a non-discrimination clause on dividends can be carried forward to future tax years. The possibility of carrying forward the unused portion of DRD from qualifying non-EEA dividends has not been codified, but should continue to apply based on the October 2009 practice note. The same is also true for dividends from Belgian subsidiaries.

Payments made to tax havens
Starting 1 January 2010, companies subject to Belgian corporate income tax or Belgian non-resident corporate income tax that make direct or indirect payments to recipients established in tax havens are obliged to declare them, if they exceed EUR 100,000 during the tax year. The reporting has to be made on a special form to be attached to the (non-resident) corporate tax return.
Belgium

A tax haven is defined as: (i) a jurisdiction regarded by the OECD as not being cooperative concerning transparency and international exchange of information or (ii) a jurisdiction where the nominal corporate tax rate is less than 10%. A royal decree containing the list of countries where the nominal corporate tax rate is lower than 10% is published. The countries which are mentioned in the royal decree are the following:

Abu Dhabi / Ajman / Andorra / Anguilla / the Bahamas / Bahrain / Bermuda / British Virgin Islands / Cayman Islands / Dubai / Fujairah / Guernsey / Jersey / Jethou / Maldives Islands / Isle of Man / Micronesia (Federation of) / Moldavia / Monaco / Montenegro / Nauru / Palau / Ras el Khaimah / Saint-Barthelemy / Sark / Sharjah / Turks and Caicos Islands / Umm al Qaiwain / Vanuatu / Wallis-and-Futuna

In the event of non-reporting, the payments will be disallowed for corporate income tax purposes. Where the payments have been reported duly and timely, their tax deductibility will be subject to the ability of the taxpayer to prove that (i) said payments were made as part of genuine, proper transactions and (ii) they were not made to an entity under an artificial construction.

**Notional interest deduction (NID)**
Belgian companies (and Belgian branches) can claim tax relief for their cost of capital by deducting notional (deemed) interest, which is calculated on their adjusted accounting net equity. The NID rate for a given tax year is based on the 10-year government bond interest rate of the calendar year, two years prior to the tax year (e.g., for tax year 2011 reference is made to 2009 government bonds).

For budgetary reasons, the NID rate for tax years 2011 and 2012 (i.e., financial years ending between 31 December 2010 (included) and 30 December 2011 (included)) has been capped at 3.8% (4.3% for SMEs).

A provision has been included in Belgium’s non-resident (corporate) tax rules for the tax credit for research and development and NID to be transferable to an acquiring company in the case of a tax-exempt reorganisation, as if a reorganisation had not taken place. A similar provision already has been included in the resident (corporate) tax rules. It applies on and after 12 January 2009.

**Automobile costs**
Rules related to the tax deductibility of automobile costs in the hands of Belgian companies (and Belgian branches) recently have been changed to introduce a system where the deductibility rate varies in a range between 50% and 120% of the automobile costs, depending on the CO2 emission of the automobile. Prior to 1 January 2010, the deductibility ranged from 60% to 90%.

Moreover, after 1 January 2010, the deduction for fuel costs has been limited to 75%.

Finally, the rules for determining the benefit in-kind arising from the private use of company automobiles are also amended. Prior to 1 January 2010, the benefit in-kind was calculated on the basis of a fixed number of privately-driven kilometres (in principle 5,000 or 7,500), multiplied by a coefficient related to the fiscal horsepower of the automobile. From 1 January 2010, this is determined on the basis of a coefficient related to the CO2 emission of the automobile.
Research and development (R&D) incentives

As of 1 July 2009, 75% of the payroll tax withheld from wages of qualifying researchers by a Belgian company or establishment does not need to be remitted to the Belgian Tax Revenue provided that the researchers are employed in research and development programmes and have a qualifying degree (such as a degree in (applied) sciences, veterinary medicines, bio-technology, etc.). For the employee's personal tax liability, the Belgian Tax Revenue considers that the payroll withholding tax amount entirely was withheld.

Taxes on corporate income

The corporate tax is levied at a rate of 33% plus a crisis tax, which is a 3% surtax, for an effective rate of 33.99%.

Reduced rates

A progressive scale of reduced rates applies to taxpayers with lower amounts of taxable income. If the taxable income is lower than EUR 322,500, the following scales apply (including the 3% crisis tax):

<table>
<thead>
<tr>
<th>EUR range</th>
<th>%</th>
</tr>
</thead>
<tbody>
<tr>
<td>EUR 0 up to EUR 25,000</td>
<td>24.98</td>
</tr>
<tr>
<td>EUR 25,001 up to EUR 90,000</td>
<td>31.93</td>
</tr>
<tr>
<td>EUR 90,0501 up to EUR 322,500</td>
<td>35.53</td>
</tr>
</tbody>
</table>

Even if their taxable income does not exceed the aforesaid ceilings, certain companies are excluded from the reduced rate, and thus, always subject to the basic corporate income tax rate. These companies include:

1. Finance companies which are defined as companies that own participations whose investment value exceeds, at the closure date of the annual accounts, 50% of the paid-up capital, possibly revalued, or 50% of the paid-up capital plus taxable reserves and recorded (taxable or tax free) capital gains of the companies that want to benefit from the reduced rates. Participations that exceed 75% of the paid-up capital of the companies held are not taken into account for the purpose of this computation;
2. 50% or more subsidiaries;
3. Companies that distribute dividends exceeding 13% of their paid-up capital at the beginning of the taxable period;
4. Companies that, per taxable period, do not attribute a tax deductible remuneration of at least EUR 36,000 to at least one key individual (known as dirigeant d’entreprise/bedrijfsleider);
5. Companies belonging to a group that also holds a coordination centre. (Note that the status of coordination centre (whereby companies and permanent establishments could benefit from a special (low) tax regime) expires on 31 December 2010 at the latest); and
6. Collective investment companies (e.g., BEVEK (Beleggingsvennootschap met veranderlijk kapitaal)/SICAV (Société d’investissement à capital variable), BEVAK (Beleggingsvennootschap met vast kapitaal)/SICAF (Société d’investissement à capital fixe), VBS (Vennootschap voor belegging in schuldvorderingen)/SIC (Société
Belgium

d’investissement en créances)), organisations for financing pensions and recognised coordination centres).

**Surcharge**
A surcharge is due on the final corporate tax amount upon assessment. For tax year 2011 (financial year as per 31 December 2010), this surcharge equals to 2.25%. However, such surcharge can be avoided if sufficient advance tax payments are timely made. The advance tax payments can be made in quarterly instalments. In the situation where the company’s financial year ends on 31 December 2010, the due dates for the advance tax payments are 12 April 2010, 12 July 2010, 11 October 2010 and 20 December 2010. Advance tax payments give rise to a tax credit. The tax credit amounts to 3%, 2.25%, 2%, or 1.5% of the advance tax payment made, depending on whether such payment has been made respectively in the first, second, third or fourth quarter (percentages applicable for tax year 2011). If the total amount of credits exceeds the surcharge, no surcharge is due, but the excess is not further taken into account for the final tax computation. The taxpayer can choose to either have the excess reimbursed by the tax authorities as the excess can be used as an advance tax payment for the next year.

**Secret commissions tax**
A special assessment of 309% (300% plus 3% crisis tax) is applicable to the so-called “secret commissions,” that is, any expense of which the beneficiary is not identified properly by means of proper forms timely filed with the Belgian tax authorities. These expenses consist of:

- Commission, brokerage, trade or other rebates, occasional or non-occasional fees, bonuses or benefits in kind forming professional income for the beneficiaries;
- Remuneration or similar indemnities paid to personnel members or former personnel members of the paying company; and/or
- Lump-sum allowances granted to personnel members in order to cover costs proper to the paying company.

The secret commissions tax is not applicable if the payor demonstrates that the payments have been reported in the beneficiary’s Belgian tax return. The 309% rate also is applicable to hidden profits that are not part of the property of the company, with the exception for certain specific hidden reserves. The special assessment of 309% and the expenses themselves are, however, fully deductible for corporate income tax purposes.

**Belgian ruling practice**
Belgium has a long tradition of providing formal and informal rulings. Currently, a taxpayer may request an advance tax ruling on a wide range of subjects including but not limited to: corporate tax, individual tax, non-resident income tax, legal entity income tax, VAT, customs, and registration duties. The request should cover a “specific and concrete” operation, which effectively is envisaged to be realised in a foreseeable future. The ruling should be filed before the transaction takes place. In practice the ruling decision should be granted prior to the filing of the corporate tax return of the year of the transaction. A ruling is binding upon the Belgian tax authorities for five years. Delivery of a requested ruling takes, on average, three months.

The Ruling Office is autonomous from the Belgian tax authorities and has the legal authority to issue decisions, which are binding upon the Belgian tax authorities. The
Ruling Office increasingly has adopted a constructive approach towards the taxpayer and is seen in the Belgian tax practice as a powerful insurance instrument ascertaining the Belgian tax treatment of contemplated operations.

**Corporate residence**

A company that is not excluded from the scope of Belgian corporate income tax is, in principle, considered to be a resident of Belgium for tax purposes if it has its registered office, its principal place of business, or its seat of management in Belgium. The seat of management has been defined by Belgian case law as the place from where directing impulsions emanate or the place where the company’s effective management and central administration abide, meaning the place where the corporate decision-making process actually takes place.

**Other taxes**

**Value-added tax (VAT)**

**Scope of VAT**

The following transactions are subject to VAT in Belgium:

a. The supply of goods effected for consideration by a taxable person acting as such;
b. The supply of services effected for consideration by a taxable person acting as such;
c. The importation of goods; and
d. Intra-Community supply of goods for consideration by a taxable person acting as such or by a non-taxable legal person.

**Standard and other rates and their application to goods and services**

The standard rate is 21%. It applies to all goods and services not qualifying for one of the reduced VAT rates.

12% for supplies of goods and services including, but not limited to:

a. Restaurant and catering services, excluding beverages;
b. Phytopharmaceutical products;
c. Pay television;
d. (Inner) tubes; and
e. Certain combustible material.

6% for supplies of goods and services including, but not limited to:

a. Works on immovable property (limited in time and with strict conditions);
b. Basic necessities such as food and pharmaceuticals;
c. Some printed materials;
d. Transport services of persons;
e. Hotels and camping; and
f. Admission to cultural, sporting and entertainment venues.

Exempt with credit (‘zero-rated’) for supplies of goods and services including, but not limited to:

a. Exports and certain related services;
b. Intra-Community supplies of goods;
c. Certain transactions on goods placed in a Customs or VAT warehouse cross-border passenger transportation by ship or aircraft;
d. Supplies to diplomats and international organisations; and
e. Certain supplies of goods and services to certain vessels and aircraft mainly involved in international passenger transport.

Exempt without credit for supplies of goods and services such as:

a. Healthcare services;
b. Social services;
c. Education services;
d. Sport services;
e. Cultural services;
f. Services of lawyers and notaries;
g. Banking services;
h. Interest charges;
i. Financial services;
j. Insurance services;
k. Land and real estate sales; and
l. Property leasing and letting.

It should be noted that specific conditions may apply to the above two categories.

VAT grouping
VAT grouping came into effect in Belgium on 1 April 2007. Under a VAT group, independent legal persons are treated as one single taxable person for VAT purposes if they are closely linked financially, economically, and organisationally. Hence, for VAT purposes, all supplies of goods and services to or by the group members are deemed to be made to or by the group itself.

The application of a VAT group has, amongst other, the following consequences:

- No issuance of “inter-company” invoices between companies in the VAT group;
- No charging of VAT between companies in the VAT group;
- Filing of one VAT return for all companies in the VAT group;
- No risks of incorrect VAT treatment of transactions between companies in the VAT group; and
- No cascade of the limitation of the right to deduct VAT when charging costs to companies in the VAT group.

The biggest advantages for entering into a VAT group are in our view the cost saving further to administrative simplification, the elimination of the risk of an incorrect VAT treatment for intra-group transactions and potential cash flow benefits.

Registration duties
Purchases and transfers of real estate located in Belgium, including buildings (except new buildings, which are subject to VAT as described above), are subject to registration duties at the rate of 12.5% on the higher of transfer price or fair market value (except in the Flemish Region, where the applicable rate is 10%). Note that the registration duties on the sale of real estate can be lowered to 1%-2% in a so called split sale of the real estate, whereby, the long-lease right is transferred to a special purpose vehicle (SPV) and the bare ownership is transferred to another SPV. However, a ruling is recommended (specific conditions apply).
No registration duty is due upon a capital contribution; only a fixed fee of EUR 25 is due. However, the contribution (in property or usufruct, which is the right to use or benefit from property) to a Belgian or foreign company by a natural person of real estate located in Belgium that wholly or partially is used as a dwelling is subject to a registration duty of 12.5% (10% in the Flemish Region).

**Stamp duties**
Stamp duties are due on transactions relating to public funds that are concluded or executed in Belgium, irrespective of their (Belgian or foreign) origin, to the extent that a professional intermediary intervenes in these transactions. Exemptions for non-residents and others are available.

**Branch income**
Branch profits are subject to the basic tax rate for Belgian corporations of 33.99% (including the 3% crisis tax) plus the possible surcharge for absence/insufficiency of advance payments (see “Taxes on corporate income”). Transfers of branch profits to the head office abroad do not give rise to further taxation in Belgium. Branches can benefit from the reduced corporate income tax rates under specific conditions (see “Taxes on corporate income”). The specifications for the applicable conditions include:

1. To determine whether the EUR 322,500 ceiling of taxable income is exceeded and whether the “EUR 36,000 remuneration” requirement is satisfied, reference needs to be made to the branch’s results only.
2. All other conditions must be satisfied at the level of the foreign company, taken as a whole.

Capital gains realised on real estate located in Belgium by non-resident companies are subject to a professional withholding tax at the basic tax rate of 33.99%. The professional withholding tax is in fact an advance payment of the final Belgian non-resident corporate income tax. Indeed, the professional withholding tax can be offset against the final Belgian non-resident corporate income tax. Any balance is refundable.

In general, the taxable basis will be determined on the basis of the separate set of accounts of the Belgian branch. The taxable basis would then be determined as the difference between the profits actually realised and the tax deductible costs actually incurred in the hands of the Belgian branch. Please note, however, that no legal requirement exists to keep a separate set of accounts in the hands of the permanent establishment (PE), in case no legal branch is deemed to exist in Belgium.

Should no separate set of accounts be kept, the taxable basis in the hands of the Belgian branch, in principle, will be determined on the basis of article 182, §1, 3°, a) of the Royal Decree implementing the Belgian Income Tax Code. As a result, the yearly taxable basis would be determined on 10% of the gross turnover realised in Belgium with a minimum of EUR 7,000 per employee and an absolute minimum of EUR 19,000. Note that the European Court of Justice ruled that this “minimum taxable basis” is in violation with the freedom of establishment. It is still applied in practice, though. Note that such determination of the taxable basis is often formalised in a written agreement with the local Belgian tax inspector without, however, deviating from the tax law criteria as mentioned before.
Belgium

**Income determination**

**Inventory valuation**
Belgian accounting law provides for the following four methods of inventory valuation: the method based on the individualisation of the price of each item; the method of the weighted average prices; the last-in, first-out (LIFO) method; and the first-in, first-out (FIFO) method. All of these methods are accepted for tax purposes.

**Capital gains**
Capital gains are subject to the standard corporate income tax rate. For tax purposes, a capital gain is defined as the positive difference between the sale price less the costs related to the disposal of the asset (which are tax-deductible) and the original cost of the acquisition or investment less the depreciations and write-offs, which have been deducted for tax purposes. However, capital gains realised on tangible fixed assets and on intangible assets on which depreciation has been claimed for tax purposes and which have been held for more than five years can be subject to a deferred and spread taxation regime, provided the proceeds of the transfer are reinvested fully in tangible or intangible assets (subject to depreciation) in Belgium within three years (or five years in case of reinvestments in buildings, vessels, or aircrafts). If all the above conditions are met, the taxation of the net capital gain is spread over the depreciation period (allowed for tax purposes) of the asset that is acquired to fulfil the reinvestment obligation. Deferred and spread taxation occurs at the basic corporate income tax rate.

Net capital gains realised on shares are exempt if dividends from such shares would – in case of distribution – meet the so-called “taxation conditions” under the participation exemption regime (see below). The “minimum participation condition” provided under that regime needs not be satisfied for capital gain exemption.

**Inter-company dividends**
Dividends received by a Belgian company are first included in its taxable basis on a gross basis when the dividends are received from a Belgian company or on a net basis, that is, after deduction of the foreign withholding tax, when they are received from a foreign company.

Then, a dividend-received deduction (DRD) of 95% of the above amount can be applied under certain conditions. Any unused portion of the DRD from dividends received from an EEA subsidiary or a subsidiary from a country with which Belgium has concluded a double tax treaty with a non-discrimination clause on dividends can be carried forward to future tax years. The possibility of carrying forward the unused portion of DRD from qualifying non-EEA dividends has not been codified, but should continue to apply based on the October 2009 practice note. The same also applies for dividends from Belgian subsidiaries.

The DRD is subject to a minimum participation condition and a taxation condition.

According to the minimum participation condition, the recipient company must have, at the moment of attribution, a participation of at least 10% or an acquisition value of at least EUR 2,500,000 in the distributing company. However, that condition, does not apply to dividends received or attributed by investment companies, nor to dividends attributed by inter-municipal organisations. The beneficiary of the dividend must have been holding the full legal ownership of the underlying shares for at least one year prior to the dividend distribution or commit to hold it for a minimum of one year
(share-per-share test). Furthermore, the shares should be booked as “financial fixed assets”. This condition was contested by the European Commission.

The taxation condition, in summary, means that the dividend income received must have been subject to tax at the level of the distributing company or its subsidiaries.

The taxation condition is based on five so-called “exclusion” rules and certain exceptions to these rules. Basically, the exclusion rules apply to:

1. Tax haven companies, that is, companies that are not subject to Belgian corporate income tax or to a similar foreign tax, or that are established in a country where the common taxation system is notably more advantageous than in Belgium. Countries, in which the minimum level of (nominal or effective) taxation is below 15% qualify as tax havens for the application of the regime (a list of tainted countries has been published). The common tax regimes applicable to companies residing in the EU are, however, deemed not to be notably more advantageous than in Belgium.

2. Finance, treasury or investment companies that, although are subject in their country of tax residency to a taxation system similar to that of Belgium, as mentioned in item 1 above, nevertheless benefit from a taxation system that deviates from the one commonly applicable.

3. Offshore companies, which are companies receiving income (other than dividend income) that originates outside their country of tax residency and in these countries such income is subject to a separate taxation system that deviates substantially from the common taxation system.

4. Companies having branches that benefit globally from a taxation system notably more advantageous than the Belgian non-resident corporate taxation system. This exclusion is deemed not applicable to EU companies with an EU branch.

5. Intermediary holding companies, that is, companies (with the exception of investment companies) that redistribute dividend-received income, which, on the basis of regulations mentioned under items 1 through 4 above, would not qualify for the dividend-received deduction for at least 90% of its amount in case of direct holding.

While this is a summary of the major exceptions, numerous exceptions to these exclusion rules exist and need to be analysed on a case-by-case basis.

**Thin capitalisation rules**

There is no general thin capitalisation rule in Belgium, but only two specific rules.

The deduction of interest paid by a Belgian company or branch can be denied partially when the beneficial owner of such interest is not subject to tax or is subject, with respect to the interest received, to a tax regime that is significantly more advantageous than the ordinary Belgian income tax system. In that case, the interest charge is considered a disallowed expense to the extent that the outstanding total amount of loans (on which the interest is calculated) – other than fixed interest securities – from such beneficiary exceeds seven times the sum of taxable reserves (at the start of the financial year) and paid-up capital (at the end of the financial year) of the interest paying company (7/1 debt equity ratio).

Payments that are subject to the special thin capitalisation rule, interest due on advances or loans (other than bonds) granted to a Belgian company by shareholders (private individuals only) of that company or by any person (not being a Belgian tax
resident company) acting as a director, manager (known as gérant/zaakvoerder), payments to liquidators or those exercising a similar function in the company, or by the spouse or minor children of such persons, may be recharacterised as dividend income to the extent that the interest rate exceeds the applicable market rate, or the amount of such advances or loans exceeds the sum of the paid-up capital (at year-end) and taxable reserves (at the start of the financial year) of the Belgian company.

**Foreign income**
A Belgian resident company is subject to corporate tax on its worldwide income. However, the following exceptions apply.

- Foreign source profits not exempt from taxation by virtue of a double tax treaty are taxable at the basic corporate tax rate in Belgium (i.e., 33.99%). Income realised by foreign branches located in countries with which Belgium has concluded a double tax treaty is exempt from Belgian corporate income tax.
- Unless a more advantageous provision (e.g., a so-called tax sparing provision) would apply based on a double tax treaty concluded by Belgium (see list in the Withholding tax section), a foreign tax credit is granted under Belgian tax law with respect to foreign royalty income, provided that this income has effectively been subject to taxation in its source country. This foreign tax credit is equal to 15/85 of the net frontier amount (i.e., after deduction of foreign withholding tax) of the royalty. The foreign tax credit is included in the taxable basis of the recipient company (grossing-up). It is only creditable against Belgian income tax to the extent that said foreign income is included in the taxable basis of the Belgian company. Excess foreign tax credit, if any, is not refundable.
- Unless a more advantageous provision (e.g., a so-called tax sparing provision) would apply based on a double tax treaty concluded by Belgium (see list in the Withholding tax section), the Belgian beneficiary of foreign interest income is entitled to a foreign tax credit under Belgian tax law, provided that this income effectively has been subject to taxation in its source country. The computation of the foreign tax credit is based on the net frontier interest income (i.e., after deduction of foreign withholding tax). The tax credit as described above is included in the taxable base of the Belgian lender (grossing-up). It is creditable against the corporate income tax due but is not refundable in case of excess.
- Undistributed income of subsidiaries, whether or not they are foreign, is not subject to any Belgian income tax.

**Bonus shares – stock dividends**
Distribution of bonus shares to the shareholders in compensation for an increase of the share capital by incorporation of existing reserves is, in principle, tax-free. The situation may be different if the shareholder has the choice between a cash or stock dividend.

**Depreciation**
Depreciation of an asset is tax deductible to the extent that it results from a devaluation of the asset and the devaluation effectively occurred during the taxable period concerned. The depreciation methods that are accepted by Belgian tax law are the straight-line method (linear method) and the double-declining balance method. In the latter case, the annual depreciation may not exceed 40% of the acquisition value. The double-declining method may not be used for intangible fixed assets, automobiles, minibuses and automobiles used for mixed purposes and for assets, the use of which has been transferred to a third party (e.g., in the case of operational leasing).
Depreciation rates are based on the estimated lifetime of the assets concerned. However, intangible fixed assets have to be depreciated over a period of at least five years for tax purposes (except R&D expenses, for which the minimum depreciation period is three years).

Belgian accounting and tax laws allow depreciation of goodwill arising at the occasion of an asset deal. For Belgian tax purposes, the depreciation period, which depends on the elements included in the goodwill, is a minimum of five years (according to the Minister of Finance, “clientele” (client lists) should be depreciated over a period of 10 to 12 years), and the straight-line method must be applied. The aforesaid accounting and tax depreciation is not available in the case of mergers or de-mergers that occur tax-free (i.e., that, among other things, follow the continuity principle from an accounting perspective).

For the year of acquisition of an asset, only the proportionate share of an annual depreciation calculation can be accepted as depreciation for income tax purposes (in principle to be computed on a daily basis). This provision, however, does apply only to companies that cannot be considered as small- or medium-sized companies (SMC) as defined by article 15 of the Belgian Companies Code. An SMC is a company that does not exceed more than one of the following criteria: 50 employees, a turnover of EUR 7.3 million, or total asset value of EUR 3.65 million. These thresholds are to be evaluated on a consolidated level. According to the position of the central tax administration, no depreciation can be accepted for the year in which the asset is disposed of. On the other hand, ancillary expenses incurred at the time of acquisition will have to be depreciated in the same way as the asset to which they relate (thus, no full deduction in the year of acquisition, except for SMCs). Alternatively ancillary expenses relating to the acquisition of land can be written down and such write-downs, if they are justified, may constitute a deductible expense.

Incorporation costs, at the election of the taxpayer, may be deducted fully in the year of incorporation or spread in fixed amounts over a number of years as determined by the taxpayer.

**Net operating losses**

Tax losses can be carried forward without any limitation in time. However, in case of change in control of a Belgian company (e.g., if the shares of this company are transferred and along with them the majority of the voting rights), the amount of tax loss carryforward available in that company (before the change of control) can no longer be offset against future profits, unless the change can be justified by legitimate needs of a financial or economic nature in the hands of the loss realising company (i.e., evidence must be brought that the change is not purely tax driven). A ruling can be obtained from the Belgian tax authorities to obtain upfront certainty on the Belgian tax treatment of the contemplated operation, so as to ensure the losses are not forfeited as a result of a change of control. The condition of legitimate needs of a financial or economic nature is considered to be fulfilled when the employees and activities of the company are maintained by the new shareholder or when the company’s control is acquired by a company belonging to the same consolidated group of companies as the former controlling company.

In the case of a tax-free merger or (partial) de-merger, Belgian tax law provides for a partial transfer/maintenance of the rollover tax losses of the absorbed/absorbing company. The carried forward tax losses of the companies involved are then reduced
based on the proportionate net fiscal value of the company (before the restructuring) compared to the sum of the net fiscal values of both the merging entities (before the restructuring).

There is no tax loss carryback provision under Belgian tax law.

**Payments to foreign affiliates**
A Belgian corporation can claim a deduction for royalties, management service fees, and interest charges paid to foreign affiliates, provided such amounts are at arm’s length. However, when such payments are made, either directly or indirectly, to a foreign person or entity or to a foreign branch, which is not subject to tax or is subject with respect to the payments received to a tax regime that is notably more advantageous than the Belgian tax regime on such income, there is a reversal of the burden of proof. Such charges will be disallowed unless the Belgian enterprise can prove that the payments are reasonable and that they correspond to genuine and real transactions.

Effective 1 January 2010, companies subject to Belgian corporate income tax or Belgian non-resident corporate income tax that make direct or indirect payments to recipients established in tax havens are obliged to declare them if they exceed EUR 100,000 during the tax year. The reporting has to be made on a special form to be attached to the (non-resident) corporate tax return. In the event of non-reporting, the payments will be disallowed expenses for corporate income tax purposes.

Fees, commissions, etc., paid to beneficiaries located in foreign countries, which are not properly reported on Form 281.50 and Summary Form 325.50, will, in principle, be subject to the secret commissions tax (of 309%), unless the taxpayer can prove that the beneficiaries have declared this income in their Belgian tax return.

**Disallowed expenses**
As a general rule, expenses are tax deductible in Belgium provided that they are incurred in order to maintain or to increase taxable income, they relate to the taxpayer’s business activity, they are incurred or have accrued during the taxable period concerned, and that evidence of the reality and the amount of such expenses is provided by the taxpayer. Notwithstanding the aforesaid rule, the following expenses are not tax deductible in Belgium (this list is not exhaustive):

- Belgian resident and non-resident corporate income tax including advance tax payments, any surcharge imposed in case of insufficient advance tax payments and any interest for late payment of the corporate income tax, Belgian movable withholding tax as well as any foreign tax credit granted in relation with foreign movable withholding tax. Immovable withholding tax (i.e., real estate tax), secret commissions tax and foreign taxes, however, are considered as tax deductible.
- Regional taxes and contributions, including penalties, increases, ancillary expenses and interest for late payment (certain exceptions apply).
- Any administrative and judicial fines or penalties (except for VAT proportionate fines).
- Depending on the CO2 emission of the automobile, a rate from 0% to 50% must be disallowed (except for financial costs incurred in relation to automobiles and automobile telephone expenses that remain fully tax deductible). Costs relating to automobiles that have a zero CO2 emission (electric vehicles) are 120% tax deductible.
Belgium

- 25% of fuel expenses for automobiles.
- 31% of restaurant expenses.
- 50% of representation expenses and business gifts (there are exceptions).
- Advantages granted to employees for social reasons with certain exceptions (e.g., hospitalisation insurance premiums, gifts of a small value).
- Capital losses on shares (except in the case of liquidation, up to the amount of paid-up capital of the liquidated company).
- Brokerage, commissions, commercial discounts, or others allocated directly or indirectly to a person in the form of a Belgian public bribery.
- Interest, royalties, or fees paid or attributed, either directly or indirectly, to non-resident taxpayers or foreign branches that are not subject to tax or are subject with respect to the income received at a notably more favourable tax regime than the Belgian tax regime on such income, unless the Belgian taxpayer can prove that those payments are made with respect to real and genuine transactions and provided that the payments do not exceed normal limits for such transactions (arm's-length principle).
- Interest paid, to the extent that it exceeds an amount corresponding to the market rate, taking into account factual circumstances proper to the appraisal of the risk linked to the operation, and particularly the financial situation of the debtor and the duration of the loan. The latter test, however, is not applied with respect to interest paid to a Belgian-based financial institution.
- Direct or indirect payments to recipients established in tax havens, which are not properly reported (if they exceed EUR 100,000 per tax year).

Provisions – bad debt reserve

Provisions and bad debt reserve are tax deductible provided that:

- They are set up to cover clearly identified losses and charges, and thus, not to cover “general” risks that have been rendered probable by events, which took place during the taxable period concerned;
- They are booked at the end of the financial year in one or more separate accounts on the balance sheet;
- They are reported on a specific form enclosed with the tax return; and
- They relate to losses and charges that are deductible for Belgian tax purposes.

Group taxation

Belgium does not apply any tax consolidation mechanism with respect to corporate tax.

Transfer pricing

The arm’s-length principle is formally codified in the Belgian Income Tax Code. Indeed, Belgian tax law contains standard anti-abuse provisions dealing with artificial profit shifting (deductibility of costs, excessive expenses, granting and receiving of so-called abnormal or benevolent benefits, deductibility of interest paid to a tax haven, deductibility of excessive interest).

If a Belgian resident company grants an “abnormal” or “benevolent” advantage (this is, generally speaking, an advantage which has no arm’s-length character) this abnormal or benevolent advantage should be added back to its taxable income as a disallowed expense (= permanent difference), unless the advantage is taken into account to determine the taxable basis of the beneficiary. Notwithstanding the above exception, the abnormal or benevolent advantage should be added back to the taxable income.
when the advantage is being granted to a non-resident affiliated company. Such
granted abnormal or benevolent advantages can be offset against any tax deductible
items (i.e., tax losses carried forward, notional interest deduction, etc.).

If a Belgian tax resident company receives an “abnormal” or “benevolent” advantage,
and to the extent that such benefit is received from a related company, the advantage
received cannot be offset by the Belgian company against its (current year or
carryforward) tax losses or other tax deductions (e.g., dividends-received deduction,
notional interest deduction, investment deduction). According to the tax authorities
(Parliamentary Question of 2004), the taxable basis of a Belgian company must be at
least equal to the amount of the advantage received.

No specific transfer pricing documentation requirements or rules on the selection of
transfer pricing methods are foreseen in the Belgian tax legislation. Nevertheless,
transfer pricing requirements have been developed, mainly by the tax authorities,
which are in line with the OECD transfer pricing requirements and the EU Code of
Conduct. Based on these requirements, it is advisable to proactively compile a coherent
and consistent documentation set, although there is no legal obligation to do so.

**Tax incentives**

**Notional interest deduction (NID)**

Belgian corporate income taxpayers are allowed to claim a NID for tax purposes
reflecting the economic cost of the use of capital, equal to the cost of long-term,
risk-free financing. The NID-rate is, in principle, based on the average rate on 10-year
Belgian government bonds. The NID rate will be adjusted annually (with a maximum
upwards or downwards variation of, in principle, 1%) again by making reference to
the average interest rate on 10-year Belgian government bonds of the prior year, but
capped at maximum 6.5% (7% for SMEs). For tax years 2011 and 2012 (financial years
as per 31 December 2010 and 31 December 2011), the NID rate is capped at 3.8%
(4.3% for SMEs).

As for determining the basis on which this deduction is calculated, the company's share
capital plus its retained earnings, as determined for Belgian GAAP purposes and as per
the last year-end date, will have to be taken into account.

Certain adjustments to the equity should be made in order to avoid double use. The
accounting equity as per the last year-end date has to be reduced by, among other
things, the following items (all valued at the same year-end date): (1) the fiscal net
value of financial fixed assets qualifying as “participations and other shares” and (2) in
the case of a company that has foreign PE, located in a jurisdiction with which Belgium
has concluded a tax treaty, the positive difference between the net book value of assets
attributable to the foreign PE and the liabilities (other than equity).

In addition, adjustments should be made in order to avoid abuse. The accounting
equity as per the last year-end date has to be reduced by, among other things, the
following items:

1. The net book value of tangible fixed assets whose corresponding costs unreasonably
   exceed the needs of the company;
2. The book value of any other passive investment that are not acquired in order to
   produce a regular income;
3. The book value of real estate (rights) used/occupied by either individuals having a director or liquidator mandate in the company or by their spouse or dependent children;
4. Revaluation gains in respect of assets, other than the aforementioned assets, and capital subsidies.

Components of the accounting equity and adjustment items (e.g., qualifying participations) are adjusted upwards or downwards on a proportionate basis in cases where these change occur in the course of the financial year.

The unused part of the NID can be carried forward for a maximum of seven years if there is insufficient tax capacity in the year that the deduction is claimed. No advance ruling from the Belgian Ruling Office is required for claiming the deduction. Furthermore, a FIFO approach (first in, first out) applies regarding the combined application of carryforward NID and NID of the current financial year. This means that the carryforward NID can be utilised to offset taxable profits before the current year NID.

The Belgian ruling commission already has issued several positive ruling decisions, whereby, it has confirmed that a company may opt to waive partially or fully the notional interest deduction. Notional interest deductions that have been waived, however, may not be carried forward to later tax years.

**Investment deduction**
Belgian tax residents can claim an investment deduction, which corresponds to a part of the acquisition or investment value of investments in new fixed assets, irrespective of whether these assets have been purchased or produced. These assets, however, should be used exclusively for professional purposes and cannot be placed at the disposal of a third party. Furthermore, the assets should be amortisable.

The deduction equals a percentage of the investment made, which depends on the nature of the investment and on the person claiming the deduction. For assessment year 2011, the percentages are:

<table>

</tbody>
</table>

* This is only applicable for companies held for more than 50% by private individuals and for SMCs as defined by article 15 of the Belgian Companies Code (see the “Depreciation” section).

Companies can spread the investment deduction with respect to environmentally friendly R&D investments over the amortisation period of the asset. In such a case, the applicable percentage is increased up to 20.5%.
Belgium

In case of insufficiency or absence of taxable profits, the investment deduction can be carried forward without any limitation in time or in amount. Certain restrictions apply as to the maximum amount of investment deduction carried forward that is tax deductible in a given year.

Under certain conditions the investment deduction carried forward can be lost after a change of ownership (see “Net operating losses” section). Note that the investment deduction for patents and R&D cannot be combined with the tax credit for patents and R&D.

**R&D tax credit**
As an alternative to the above investment deduction for patents and R&D, a company can opt for a tax credit for which the advantage corresponds to the advantage of the investment deduction. The investment deduction implies a deduction of the taxable basis, while the tax credit is a reduction of the tax due. A key advantage of the tax credit for patents and R&D patents is that it is refundable if it has not been deducted for five subsequent tax years. The amount of the tax credit should be deducted from the basis of the notional interest deduction.

**Reduced payroll tax for qualifying researchers**
As from 1 July 2009, 75% of the payroll tax withheld from wages of qualifying researchers by a Belgian company or establishment does not need to be remitted to the Belgian Tax Revenue provided that the researchers are employed in research and development programmes and have a qualifying degree (such as a degree in (applied) sciences, veterinary medicines, bio-technology, etc.). For the employee’s personal tax liability, the Belgian Tax Revenue considers that the payroll withholding tax amount entirely was withheld.

**Patent income deduction (PID)**
The PID allows a taxpayer to deduct – as an extra tax deduction in the tax return – 80% of qualifying gross patent income. Therefore, only 20% of gross patent income will be taxable at the normal corporate tax rate, resulting in an effective tax rate of maximum 6.8%.

Qualifying taxpayers are corporate taxpayers in Belgium that are involved in the development or further improvement of patents through an in-house R&D centre. They include both Belgian companies and Belgian PEs of foreign companies. The company must be the owner, licensee, or usufruct holder of the patents for which they claim the benefits of the PID. To benefit from the PID, the R&D centre should qualify as a “branch of activity” or “line of business”, which means that it should be a division of an entity that is capable of operating autonomously. The Belgian company or PE should have relevant substance to perform and supervise research and development activities, but may use subcontractors, related or unrelated, in its development of the patents or extended patent certificates. The law specifically provides that the R&D centre can be located outside Belgium but must belong to a Belgian legal entity.

Belgian companies or PEs, acting as “contract R&D” service providers on behalf of another company cannot qualify for PID because they are not the owners, holder of beneficial rights to or licensee of the patent.

**Qualifying patents**
The PID applies where patents or supplementary protection certificates are owned by a Belgian company or establishment as a result of its own patent-development activities.
Belgium

(partly or fully) in an R&D centre in Belgium or abroad. The PID also applies where patents or supplementary protection certificates are acquired by a Belgian company or establishment from a related or unrelated party, in full ownership, joint ownership, usufruct, or via license agreement, provided it has further improved the patented products or processes in the company’s R&D centre in Belgium or abroad.

Other intellectual property (IP), such as copyrights, know-how, designs, trade or marketing intangibles, are not eligible for the Belgian PID.

The Belgian company or establishment can license the patents to other parties. Alternatively, it can use the patents, which are owned by it or licensed to it, to manufacture and supply patented products or services.

For patents licensed by the Belgian company or establishment to any party, whether related or unrelated, the tax deduction amounts to 80% of the relevant patent income to the extent the income does not exceed an arm’s-length price, is permitted.

For patents used by the Belgian company or establishment for the manufacture of patented products, manufactured by itself or by a contract manufacturer on its behalf, the tax deduction is 80% of the license fee (known as embedded royalties) that the Belgian company would have received had it licensed the patents used in the manufacturing process to an unrelated party.

The tax deduction for patent income is available to all corporate taxpayers in Belgium. This includes essentially all Belgian resident companies and Belgian permanent establishments of non-resident companies.

No advance ruling is required to benefit from this deduction since it is applicable generally and automatically. Only minor compliance formalities apply. The taxpayer should submit a special application form together with the corporate income tax return.

“Excess profit” rulings
Belgium introduced the arm’s-length principle in the Belgian Income Tax Code. While it already had instruments to adjust upward a taxpayer’s Belgian taxable basis in case of non-arm’s-length dealings, the new measure now also allows multinational companies to achieve a unilateral downward tax adjustment. Belgium will refrain from taxing profits that a Belgian tax-resident company would not have realised if it had not been a party to related-party dealings.

As the cost structure (or the profit potential) of a member of a multinational group of companies will normally differ from that of a stand-alone entity, its profit will normally also be higher. Applying the arm’s-length principle, this profit differential, which does not result from the functions performed and risks assumed by the respective entities, should not be allotted to the Belgian group member. As such, Belgian tax law allows for unilateral adjustments of the Belgian tax base similar to the corresponding adjustments in article 9 of the OECD Model Convention. The underlying assumption is that the “excess profit” forms part of the profits of the foreign related party.

The part of profit that is deemed to derive from related-party dealings and that is exempted from taxation in Belgium and how the “part-of-the-profits-of-the-foreign-related-party” condition should be interpreted will need to be submitted to the Belgian
Belgium

Ruling Office to obtain a ruling in advance. Such rulings are granted for renewable periods of five years and are based on a detailed functional, economic analysis of the relevant Belgian activities with a view to determining a profit level commensurate with the company's functional and risk profile.

**Withholding taxes (WHT)**

Domestic corporations and branches of foreign corporations paying dividends, interest, royalties, and/or certain rentals are required to withhold tax. The standard rates applicable under Belgian tax law are fixed at 25% for dividends and 15% for interest, royalties, and certain rentals. However, some withholding tax reductions/exemptions are foreseen under Belgian domestic tax law.

1. A reduced Belgian withholding tax of 15% applies to dividend distributions relating to non-preference shares subscribed in cash, issued as from 1 January 1994 and which, upon issuance, are nominative or have been deposited with a financial institution in Belgium, on condition that the distributing company does not irrevocably renounce its right to benefit from the reduced rate of withholding tax.

2. A reduced Belgian withholding tax of 15% is possible for dividend distributions relating to non-preference shares issued as from 1 January 1994 in the context of a public offering (i.e., shares quoted on the stock exchange) on condition that the distributing company does not irrevocably renounce its right to benefit from the reduced rate of withholding tax.

3. Under certain conditions, a reduced withholding tax of 15% applies to dividend distributions made by companies quoted on a stock market or by companies whose capital has been (partly) contributed by a PRIVAK/PRICAF, which must also be quoted on a stock market. A PRIVAK/PRICAF is a company with the sole objective of collective investment in non-quoted companies and in growth companies.

4. A withholding tax exemption on dividends is foreseen if both the receiving and distributing companies are subject to Belgian corporate income tax, if the receiving company holds a minimum shareholding of at least 10% for at least one year in the capital of the subsidiary and if certain formalities are complied with. If the one-year holding requirement is not fulfilled at the time of distribution, the distributing company provisionally should withhold the amount of withholding tax due (but it does not have to pay the tax authorities). Once the one-year holding requirement is met, the provisionally withheld tax amount can be paid out to the parent company. If the one-year holding requirement eventually is not complied with (e.g., because the Belgian participation is disposed of by the parent company before the one-year holding requirement is met) then the Belgian company has to pay the amount provisionally withheld increased by interest for late payment (at an annual rate of 7%) to the competent services of the Belgian tax authorities.

5. A withholding tax exemption is foreseen also for the distribution of profits made by a Belgian subsidiary to an EU parent company, if both the parent and subsidiary have a legal form that is mentioned in the Annex to the EU Parent-Subsidiary directive, if both are subject to corporate income tax, and if the parent company holds during an uninterrupted period of at least one year a shareholding of at least 10% in the capital of the distributing company. The same procedure as that described under point 4 above applies in case the one-year holding requirement is not met at the moment of the dividend distribution.

6. A 10% tax is applicable to profits that are attributed or made payable as a result of the full or partial liquidation of a company or the acquisition by a company of its own shares. However, the exemption of Belgian withholding tax is maintained for liquidation proceeds distributed by a BEVEK (Beleggingsvennootschap
7. The application of the Parent-Subsidiary directive to dividend payments has been extended towards non-EU-resident companies. Dividends distributed towards a country that has concluded a tax treaty with Belgium containing a qualifying exchange of information clause, can be exempt from withholding, tax subject to the same conditions as laid down in the Parent-Subsidiary directive.

8. There is a withholding tax exemption on interest on loans granted by professional investors to banks established in the EEA or in a country which has concluded a double tax treaty with Belgium. For example, banks situated in France, the UK or the US, thus, should be able to benefit from this exemption.

9. No Belgium interest withholding tax arises where two related companies with tax residence outside Belgium are involved in a financial transaction with the intervention of a Belgium based intra-group financial enterprise. Under these circumstances, the Belgium intra-group financial enterprise is not required to retain Belgium interest withholding tax if the entity merely intervenes as “paying agent intermediary.”

10. Belgian domestic tax law also provides for a withholding tax exemption on the following movable income sourced in Belgium (this list is not exhaustive):

   a. Income from deposits allocated or attributed to non-resident savers by Belgian banks.
   b. Income from bonds, treasury bonds, or other similar instruments of which the beneficiaries are identified as financial institutions.
   c. Income from receivables (this includes income from commercial receivables) or loans of which the beneficiaries are identified as financial institutions or professional investors. Professional investors are defined as any Belgian resident company or branch not being a financial institution or any equivalent. As a result, interest payments between two Belgian companies are exempt from withholding tax. This exemption has been extended by virtue of the Royal Decree of 3 July 2005. As a result, on transactions with banks situated in a country with which Belgium has concluded a double tax treaty, no withholding will be due. In practice this means that on transactions with inter alia French, UK and US banks no withholding will be due.
   d. Income from bonds paid by a Belgian resident financial institution or by a Belgian resident company to non-resident savers, provided that such bonds are registered on a nominal basis with the debtor of the income during the entire period to which the interest relates and that the foreign beneficiaries of the interest are not located in a tax haven country or held by more than 50% by Belgian residents.
   e. Income from bonds and loans granted by “eligible quoted companies” and “eligible intra muros financial companies” to non-residents (under certain conditions).
   f. Interest payments between a Belgian company and an EU tax resident company in case of direct or indirect shareholding of at least 25% for an uninterrupted period of at least one year (i.e., transposition of EU Interest & Royalty directive in Belgian tax law).
With respect to payments made to non-resident corporations or individuals, withholding tax exemptions and/or reductions can also be found in the double taxation treaties concluded by Belgium.

Notes

1. The treaty concluded with ex-Yugoslavia is still applicable to Bosnia-Herzegovina, Macedonia, Serbia and Montenegro.
2. Not applicable to Hong Kong. Note that a new treaty with China has been signed (but not yet into force). The rates under the new treaty are 5% and 10% for dividends, 10% for interest, and 7% for royalties.
3. The treaty concluded with the (ex-) USSR is still applicable to Kyrgyzstan, Moldova, Tajikistan, and Turkmenistan.
   a. The treaty contains a qualifying exchange of information clause. Hence, the rate of 0% is applicable subject to the same conditions as invoked by the Parent-Subsidiary directive (see above).
   b. Under the Bilateral II agreement concluded between Belgium and Switzerland, a rate of 0% is applicable under certain conditions.
   c. With respect to EU countries, a withholding tax exemption is applicable provided that the conditions laid down in the Interest & Royalty directive are met (see above).
   d. Since the Belgian domestic rate for interest and royalties is maximum 15%, the higher treaty rate will in principle not be applicable on interest and royalties arising from Belgium.

The treaties which are currently in force are listed above. The following tax treaties are signed, modified, or under renegotiation but have not yet entered into force (including some for the exchange of information clause): Armenia, Azerbaijan, Australia, Bahrain, China, Congo, Croatia, Denmark, Isle of Man, Finland, France, Germany, Iceland, Italy, Japan, Luxembourg, Macao, Malaysia, Malta, Moldova, the Netherlands, New Zealand, Norway, Qatar, Rwanda, San Marino, Seychelles, Singapore, Spain, Tajikistan, Uganda, and the United Kingdom.

**Tax administration**

**Tax returns**

As a general rule, the annual resident or non-resident corporate tax return cannot be filed less than one month from the date when the annual accounts have been approved and not later than six months after the end of the period to which the tax return refers. For instance, assuming that the accounting year has been closed on 31 December 2009, the corporate tax return needs to be filed, in principle, by 30 June 2010 at the latest (this deadline is often postponed).

**Payment of tax**

Corporate income tax is payable within two months following the issue of the tax assessment. Interest for late payment is charted at the rate of 7% per year.

Significant developments
There have been no recent significant developments.

Taxes on corporate income
Income tax and taxes on capital gains are not imposed on corporations in Bermuda.

Corporate residence
Entities that are incorporated in Bermuda are considered to be resident in the country.

Other taxes
Bermuda does not impose withholding taxes on payments made from Bermuda.
Bermuda does impose an Annual Company Fee based upon the capital of the company.

Bermuda does impose a stamp duty; however, exempt companies are not subject to the stamp duty. All companies that employ persons in Bermuda must pay a payroll tax and a social insurance tax.

Social insurance tax
If an employer has employees in Bermuda for 26 or more weeks in a calendar year, the employer will have to register and obtain an account number from the Department of Social Insurance (DSI) (unless previously registered) and pay social insurance tax for its employees. At the same time, the employer must also apply for and obtain from the DSI a social insurance number for each employee, which is required to pay social insurance. Once the employer has registered for a social insurance account number and the employees have obtained social insurance numbers, the DSI will automatically send an electronic print-out to the employer with an itemised list of employees as well as the amount of social insurance tax due for the month. Under certain facts and circumstances, the employer may also file an Employee Amendment Form, which shows any change in status (i.e., termination or unpaid leave) of employees that could affect the amount of social insurance tax due.

The amount of social insurance tax due is calculated as BMD 60.80 per employee per week (effective 1 April 2010), with the employer and employee each paying half of the liability (or BMD 30.40). The employer must pay and remit monthly (for all employees) to the DSI the total social insurance tax due per employee. The amount of social insurance tax due per month is based on the number of Mondays in the month and must be paid by the end of the following month.
Bermuda

**Payroll tax**

Under Section 3 of the Payroll Taxes Act of 1995, an employer (viewed as the entity that has control over an individual’s remuneration) is required to remit payroll taxes (currently 16% on all remuneration paid or given up to a maximum compensation of BMD 750,000) for each of its employees whose employment in Bermuda exceeds four consecutive weeks in a calendar year (whether or not with one or more employers). If an employee’s stay in Bermuda is for a period of less than four consecutive weeks, the employer is not obligated to remit the payroll taxes.

Once an employee’s service period in Bermuda has exceeded four consecutive weeks, the employer must register the employee with the Office of the Tax Commissioner (OTC). The employer must obtain a payroll tax account number by filing an application with the OTC, if no previous account exists for such employee. The application must be filed within seven days after the end of the quarterly tax period (the four quarters end on 1 January, 1 April, 1 July and 1 October) in which the employee’s stay exceeded four consecutive weeks. A payroll tax return and remittance of tax must be filed with the OTC 15 days after the end of each quarterly period (i.e., 15 January, 15 April, 15 July and 15 October). A return is due only when an employee’s stay exceeds four consecutive weeks in a tax period. The employer may recover from the employee a maximum of 5.75% of the 16% payroll tax, and the employer is allowed an exemption of BMD 600 (of remuneration paid) per employee for each quarterly tax period. Penalties for tax returns filed late are 5% of the payroll tax due for each month (or part thereof) that the tax return is late (with a maximum of 30%).

Compensation subject to the payroll tax under the Payroll Taxes Act includes all remuneration paid or given to the employee. Remuneration includes:

- Wages, salary, leave pay, commission, gratuity, fee, bonus, perquisite, or allowance;
- Money paid under a profit-sharing scheme;
- Money or anything of value paid or given to an employee or ex-employee in connection with the permanent termination of his employment;
- Any amount paid with respect to a retirement or provident fund, scheme or society, or under a hospital or health insurance scheme;
- The value of meals, boarding, lodging, or other benefit of any kind, whether provided in cash or otherwise;
- The rental value of any place of residence provided rent-free or the difference between the rent paid and the rental value if the rent paid is lower than the rental value; and
- Any gain on the exercise or right to acquire company stock based on services rendered.

All employers or self-employed persons are required to report remunerations up to a maximum of BMD 350,000 per annum per employee, deemed employee or self-employed person. There is no payroll tax on remunerations above BMD 750,000.

The Payroll Taxes Act is extremely broad in its definition of remuneration. Therefore, a Bermuda employer should take caution when calculating the amount of remuneration paid to an employee.
**Bermuda**

**Annual company fee**
Every exempted company shall in the month of January forward to the Registrar of Companies a declaration signed on behalf of the company as to the company’s principal business and its assessable capital, together with the appropriate fee payable.

Where the assessable capital of the exempted company is:

Significant developments

Bolivian citizens approved the project of the State Political Constitution (CPE) through the referendum dated 25 January 2009, which was entered into force in February 2009. The CPE introduced three main changes with respect to tax policies, which are as follows:

- Debts caused by economical damage to the state have no statute of limitations. Note, that to date, there are no regulations that provide what should be interpreted as economical damage, and it is not yet clear whether taxes should be included within this definition. If the definition does apply to taxes, this would apply from the moment the new CPE was effective (i.e., as of February 2009);
- Municipal governments now have legal authority to create, modify and eliminate taxes (including council taxes and special contributions) previously approved by the Bolivian congress, that are not analogous to national taxes. However, regulations related to this matter have not yet been passed; and
- Coming into force is the “worldwide income” concept, through which the municipal governments have legal authority to tax income generated by their residents and companies abroad. Legislation has not yet regulated how this change will be implemented, such as providing clear definitions of residence and domicile, etc.

Taxes on corporate income

Pursuant to Law 1606, all companies in Bolivia are subject to corporate income tax at a rate of 25%. The taxable base is the profit arising from financial statements prepared in accordance with Bolivian generally accepted accounting principles, adjusted for tax purposes (i.e., by nondeductible and non-taxable items), as per the requirements established in the tax law and regulations.

Surcharge

Law 1731 introduced an additional corporate income tax at a rate of 25%, which affects only extractive activities of nonrenewable natural resources (mining and oil/gas). This additional tax is calculated on the same basis as the normal corporate income tax, except that two additional deductions are allowed: (i) up to 33% of the accumulated investment as from 1991; and (ii) 45% of the gross revenue of each extractive operation (e.g., a field or a mining site) with a threshold of BOB 250 million for each extractive operation.
Special industries
In addition to the general corporate income tax rate of 25%, all mining companies are also subject to an additional tax, calculated on the taxable net profits of: (i) 12.5%, if the mining company carries out exploitation activities; and (ii) 7.5%, if the mining company carries out manufacturing activities with raw minerals that add value.

Mining companies are also subject to mining royalties at a rate of between 1% and 7% (depending on the kind of mineral), calculated on the total sales price. Note that there is a 60% discount on the rates of mining royalties if minerals are sold within the Bolivian market. Mining royalties can be offset with corporate income tax if official mineral prices are lower than the prices established by the tax law; however, in this case, mining royalties paid will not be deductible for corporate income tax purposes.

Taxes on professionals working as independents
Professionals (e.g., lawyers, accountants, economic or engineering advisors, etc.) are subject to corporate income tax at a rate of 12.5% on their revenue net of value-added tax (VAT). Professionals can offset 50% of this tax with input VAT paid on purchases for their personal consumption.

Corporate residence
A corporation is considered resident in Bolivia if it has been incorporated in Bolivia.

Note that Bolivian commercial laws allow foreign corporations to carry out isolated commercial acts in Bolivia without the obligation to constitute a permanent representation in Bolivia, however such corporations cannot carry out habitual commercial acts without fulfilling the requirements established to constitute a company in Bolivia. Unfortunately, Bolivian legislation does not include provisions to regulate situations that could trigger “permanent establishment” issues, nor does it define what should be understood by “carrying out habitual commercial acts”.

Other taxes

Value-added tax (VAT)
VAT is levied on the sale of movable goods and provision of services carried out within Bolivian territory at a rate of 13%, including definitive imports. Since this tax is included in the final price, the effective tax rate amounts to 14.94% (13% / 87%).

Tax on gross income
The tax on gross income (also known as “transaction tax”) generally taxes gross income arising from the performance of any economic or commercial activity (including non-profitable activities) at a rate of 3% on a monthly basis. However, exceptions exist for the sale of investments (as defined by the Stock Exchange Law) and the sale of minerals, oil and gas within the local market, as long as such sales will ultimately be exported.

Corporations pay either corporate income tax or transaction tax, whichever is higher, on an annual basis. From an administrative perspective, corporate income tax is due and paid at the end of each tax year and is considered an advanced payment of transaction tax, while transaction tax is due monthly. If during the year the cumulative monthly transaction tax due exceeds the corporate income tax prepayment, the taxpayer will be subject to transaction tax on a monthly basis until the end of the tax year.
year. For example, a corporation pays corporate income tax for the 2009 fiscal year in April 2010. This payment is considered a prepayment for the transaction tax due between May 2010 and April 2011.

**Property tax on real estate and vehicles**
Real estate and vehicles are subject to a property tax calculated at different rates based on a scale value determined by the municipal government. Corporations pay this tax based on book values. However, for accounting purposes, book value can never be less than BOB 1. Please note that, in the case of vehicles, when accounting residual values are equal to BOB 1, the property tax should continue to be paid based on tax residual values determined by the tax law (10.7% on the gross value of the asset) until the vehicle is written-off.

**Taxes on specific goods for consumption (excise tax)**
Specific goods are taxed at the following rates:

<table>
<thead>
<tr>
<th>Product</th>
<th>Tax rate (%)</th>

Fuel oil | 0.39/Litre

**Direct tax on hydrocarbons**

Direct tax on hydrocarbons (IDH) is applied on the production of hydrocarbons, measured at the wellhead point, at a rate of 32%. To determine the taxable base for this tax, production of hydrocarbons must be valued taking into account the average sales price and considering the market (internal/external) where such hydrocarbons were sold.

**Financial transaction tax**

The financial transaction tax is levied on bank transactions (deposit or transfer of funds), carried out within the domestic financial system, at a rate of 0.15%.

**Branch income**

Branch income is subject to the same tax applicable to other types of Bolivian corporations (i.e., corporate income tax of 25%). However, note that net profits of Bolivian branches are deemed to be distributed to the head office at the annual filing due date for corporate income tax (i.e., 120 days after the fiscal year end); hence, a Bolivian branch must withhold 12.5% on such deemed distributed profits – note this can be avoided as long as the head office decides to reinvest Bolivian branch’s net profits.

**Income determination**

Bolivia taxes the income generated by corporations following the “income source” principle. Therefore, income arising from goods and assets located or utilised economically within Bolivian territory and from any activity carried out within the country is considered Bolivian income source. Hence, such income is subject to corporate income tax, regardless of the nationality/residence of the parties involved in generating such income or the place where the contracts were subscribed.

Taxable income is determined based on the financial statements prepared under Bolivian generally accepted accounting principles; then the income is adjusted for tax purposes in accordance with guidelines provided by Law 843 and Supreme Decree 24051 with respect to nondeductible and non-taxable items. In general terms, expenses may be deducted as long as they are necessary to generate Bolivian-sourced income and are properly documented.

**Foreign income**

Bolivian corporations are taxed only on income generated within Bolivian territory.

**Deductions**

As a general principle, all expenses required to generate or preserve taxable income may be deducted for corporate income tax purposes.

In broad terms, the following items are nondeductible for tax purposes, according to current legislation:

1. Owners’ or shareholders’ personal withdrawals and living expenses;
Bolivia

2. Salaries, as well as associated compensations, paid to employees without the application of withholding taxes (i.e., RC-IVA);
3. Fees paid to individuals (i.e., acquisition of goods and services) for which no withholding taxes have been withheld;
4. Amortisation of trademarks and other intangible assets, unless a price has been paid to acquire them;
5. Interest paid to owners or shareholders, to the extent the interest rate exceeds the rate of LIBOR (London Interbank Offered Rate) plus 3% in the case of foreign owners/shareholders, and to the extent the interest rate exceeds the official interest rate on loans published by the Central Bank of Bolivia for national owners/shareholders. Interest deductible on shareholder loans may not exceed 30% of the total interest paid to third parties;
6. Corporate income tax;
7. Taxes paid in the acquisition of fixed assets. These taxes must be included in the cost of the asset and depreciated accordingly;
8. Provisions that are not specifically authorised by the tax law and regulations;
9. Depreciation of fixed assets that include a revaluation reserve; and
10. Losses arising from illegal acts.

**Net operating losses**
Tax losses can be carried forward with no time limit.

**Payments to foreign affiliates**
Payments to foreign affiliates are subject to a 12.5% withholding tax with no restriction, if the Bolivian company is remitting Bolivian-sourced income (e.g., interest on loans, provision of any kind of services, royalties, etc.).

**Taxes**
Taxes effectively paid by the corporation as a direct taxpayer are deductible for tax purposes. Any transaction tax (tax on gross income) that has been offset against corporate income tax paid is not deductible for corporate income tax purposes.

**Other significant items**
Donations are not deductible unless made to nonprofit organisations that are not subject to corporate income tax. These donations are deductible up to a maximum of 10% of the donor’s net taxable profit.

Provisions for employees’ severance payments are also deductible. Provisions of other bonuses (e.g., Christmas, productivity bonuses, etc.) accrued on behalf of employees are tax deductible, as long as they are paid prior to the annual income tax filing due date and the company demonstrates it has withheld taxes (if applicable).

**Group taxation**
Bolivia does not include group taxation rules within its legislation.

**Tax incentives**

**Inward and capital investments**
No incentives are granted for domestic or foreign investment.
**Other incentives**

Foreign exchange transactions are legal, and a system of free-floating exchange rates exists.

Export activities benefit from reimbursement of VAT and customs duties paid in the process of producing goods to be exported (with some limitations for oil/gas companies). Note that tourist and lodging services by hotels to foreign tourists without a residence or address in the country are exempt from VAT.

**Regional tax incentives**

New investments in manufacturing in the states of Oruro and Potosi are entitled to tax exemptions granted by Laws 876, 877, 967 and 2809.

<table>

</tbody>
</table>

**Withholding taxes (WHT)**

**Payments made to Bolivian residents**

Dividends paid to Bolivian residents, either individuals or corporations, are not taxable.

Payments made by corporations to individuals with respect to the acquisition of goods or provision of services that are not supported with an invoice or fiscal receipt are subject to a withholding tax of 8% on goods and 15.5% on services.

**Payments to non-residents**

Dividend payments, distributions of profits to the head office by Bolivian branches, interest payments, royalty payments and fees paid for any type of services made to non-residents are subject to a withholding tax of 12.5%.

**Tax treaties**

Bolivia currently has in force double tax treaties with the Andean Community, Argentina, France, Germany, Spain, Sweden and the United Kingdom.

Beneficial withholding tax rates on dividend distributions are provided by double tax treaties with Spain and Sweden at 10% and 0%, respectively, provided the Spanish or Swedish holding company demonstrates it is the ultimate beneficial owner and holds more than a 25% interest in the Bolivian company.
**Bolivia**

**Tax administration**

**Returns**
Corporate income tax is assessed on a self-assessment basis every fiscal year. Tax returns must be accompanied by audited financial statements (if applicable) and ancillary tax information as requested by the tax authorities.

The fiscal year varies according to the activity of the corporation. Banks and commercial and other service activities have a fiscal year end as of 31 December; industrial, oil and gas companies as of 31 March; agribusiness and forestry companies as of 30 June; and mining companies as of 30 September.

**Payment of tax**
Corporate income tax is payable in one annual payment except for mining companies, which are obliged to make advance payments on a monthly basis with respect to the additional tax (i.e., 12.5% and 7.5% for exploitation and manufacturing mining companies, respectively).
**Significant developments**

**Stabilisation and association agreement**
The agreement is taking Bosnia and Herzegovina (BiH) a step closer to European Union (EU) accession. The custom tariff for products from the EU is being lowered to zero. The agreement is applicable as from 1 January 2009.

**Excise duty**
The law on excise duties prescribes that cigarettes will be subject to proportional duty (42% of retail price) and specific duty (BAM 0.15 for a pack of cigarettes – 20 cigarettes per pack).

The BiH Indirect Tax Authorities (ITA) have also introduced a minimal excise duty that will be paid, which is being calculated on the basis of the most popular cigarette brand in the last period. The excise duty paid may not be lower than the excise duty paid for the most popular brand.

In accordance with law and according to reports on issued excise duty stamps by the ITA, the retail price of the most popular brands in the period 1 July 2008, through 30 June 2009, was BAM 1.20 for a pack of cigarettes.

By using the adequate methodology, the ITA announced the minimal excise duty in the amount of BAM 40 for 1,000 pieces (BAM 0.80 for one package of 20).

The minimal excise duty is applicable as from 1 January 2010.

Taxpayers and other persons who sell cigarettes were required to count their inventory of cigarettes on 1 January 2010, and submit the count to the relevant regional centre by 10 January 2010.

**Taxes on corporate income**

**Corporate income tax (CIT)**
Bosnia and Herzegovina consists of two entities: Federation of Bosnia and Herzegovina (FBiH) and Republika Srpska (RS), and a separate administrative-territorial body: Brčko District. Direct taxes are imposed on entity and district level, while indirect tax regulations are on the state level. Corporate income tax systems in BiH have been partially harmonised in the past few years, but significant differences remain.
**Federation BiH (FBiH)**
A taxpayer is a business association or other legal entity performing independent and permanent business activity through the sales of products and providing services on the market for the purpose of generating profit.

A taxpayer is also a non-resident who generates profits through business activity from a business unit in the territory of FBiH.

A non-resident, whose registered seat or management is not in FBiH, and does not have a business unit in FBiH, is subject to withholding tax for income generated in FBiH.

The CIT rate in FBiH is 10%.

**Republika Srpska**
A CIT payer in Republika Srpska is:

- A legal entity from Republika Srpska that generates income from any source in Republika Srpska or abroad;
- A business unit of a legal entity that generates income in the territory of Republika Srpska;
- A foreign legal entity that conducts business activity and has a permanent establishment (PE) in Republika Srpska, for income that is related to that PE;
- A foreign legal entity that generates income from immovable property in Republika Srpska, for the income generated in Republika Srpska; and/or
- A foreign legal entity that generates income in Republika Srpska, not mentioned above, and is subject to withholding tax (WHT) in accordance with the CIT law of Republika Srpska.

The CIT rate in Republika Srpska is 10%.

**Brčko District**
CIT payers per Brčko District income tax law are business persons that generate income from their business entities:

- Unlimited taxpayers are resident persons no matter where the income was generated; and
- Limited taxpayers are foreign persons whose non-resident entity generated income in the territory of Brčko District.

Business persons are physical and legal entities, as well as associations and organisations.

If a legal entity or the management is seated in Brčko District, then that business entity is a resident of Brčko District.

The CIT rate in Brčko District is 10%.
Corporate residence

Federation BiH
Under Federation BiH (FBiH) CIT law, a resident is a legal entity whose headquarters (registration) is entered into a court registry or whose management and supervision over the business activities is located in the FBiH.

A PE of a non-resident is a permanent place of business through which the non-resident performs activity in whole or partially throughout the territory of the FBiH.

A PE as per FBiH CIT law is considered as follows:

• Management headquarters;
• Branch office;
• Business office;
• Factory;
• Workshop;
• Location of natural resources extraction;
• Construction site (construction or mounting project) when the work is performed during the period exceeding six months;
• Providing consulting or business services lasting for the period exceeding three months consecutively over a 12-month period; and
• A representative acting independently on behalf of a non-resident related to the activities of signing a contract or keeping supplies of products delivered on behalf of a non-resident.

Republika Srpska
In CIT law of Republika Srpska, a resident is a legal entity registered in Republika Srpska.

A PE shall be considered a place of business of a non-resident in Republika Srpska (i.e., construction works, installation and assembly works, infrastructure used for research or exploitation of natural resources or supervisory of the same). A PE shall also be a place of business where an individual or legal person has the authorisation to conclude contracts for a foreign legal entity.

Brčko District
A business entity is considered to be a resident of Brčko District if it is a legal person seated in the Brčko District or the management of a legal entity is seated in the Brčko District.

Other taxes

Value-added tax (VAT)
The standard rate is 17%. The VAT regime applies equally throughout the state of BiH. There is no reduced VAT rate in BiH.

Taxable persons are all individuals and legal entities registered, or required to be registered, for VAT. Any person making taxable supplies of goods and services that exceeds or is likely to exceed a threshold of BAM 50,000 (EUR 25,000) is required to register as a VAT payer.
Bosnia and Herzegovina

The export of goods is zero-rated.

Taxable transactions include the supply of goods and services in BiH by a taxable person, as well as the importation of goods to BiH by any person. The following transactions are also taxable:

- Transactions for no consideration or for a consideration less than the market value; and
- The private use of taxable goods by a taxable person (self-supply).

The following services are exempt from VAT in BiH:

- The leasing and subletting of residential houses, apartments and residential premises for a period of longer than 60 days;
- The supply of immovable property, except for the first transfer of the ownership rights or the rights to dispose of newly constructed immovable property;
- Financial services;
- Insurance and reinsurance services;
- Educational services provided by private or public educational institutions; and
- Postal services.

The VAT period is one calendar month.

Any tax credit that has not been used after a period of six months shall be refunded. Registered exporters are to be refunded within 30 days.

**Excise duties**

BiH levies excise tax on the following products: petroleum products; tobacco products; non-alcoholic drinks; alcohol and alcoholic drinks; beer and wine; coffee (unroasted, roasted and ground coffee and coffee extracts). The duties on petroleum products and drinks are set at a specific amount per litre, and the coffee excise is a specific amount per kilo.

There is a single excise regime throughout BiH.

**Customs duties**

The customs policy law and the rates of customs tariffs to be applied exist and are largely based on EU standards. BiH has signed the Stabilisation and Association Agreement (SAA) and the Central European Free Trade Agreement (CEFTA).

**Branch income**

Representative offices of foreign companies are permitted, although the concept of an international branch has not been recognised.

**Income determination**

Taxable profit is profit determined by adjusting the accounting profit as stated in the profit and loss statement and determined in accordance with International Financial Reporting Standards (IFRS) and accounting legislation, in accordance with the provisions of the CIT law.
**Federation BiH**

Income for assessment of taxable profit shall be income from the sales of products, services, goods, materials and financial, extraordinary and other income calculated in the profit and loss balance in accordance with accounting regulations and International Accounting Standards (IAS).

Dividends realised based on participation in the capital of other taxpayers shall not be included in the tax base. Shares in the profit of a business association will be considered dividends.

Income on the basis of collected written-off debt, in the event when these were included in the income in a previous period and were not subject to tax allowable or recognised expenditure, shall not be included in the tax base.

Expenses of production in accordance with accounting regulations and IAS shall be recognised in the value of stocks of unfinished production, semi products and finished products for the calculation of taxable profit.

Taxable base shall include profit from liquidation, and capital gain from the balance sheet.

**Republika Srpska**

The tax base for a fiscal year is the difference between taxable revenue and deductible expenditures for such fiscal year.

Taxable revenue for the purpose of computing the tax base includes all revenue from whatever source derived whether in cash or in kind or whether related or unrelated to the legal person's economic activity.

In the event of revenue received in the form of property (other than cash) or services, the amount of revenue is equal to the market price of the property or services received.

Expenditures are deductible from revenue in computing the tax base if the expenditures directly relate to the realised revenue.

Capital gain is realised through the sale or other type of transfer of capital or investment assets and represents a difference between the sales price and adjusted base of an asset. The sales price is the contracted price (i.e., the market price established by the competent tax authority in case it finds the contracted price to be lower than the market price).

**Deductions**

**Depreciation – Federation BiH**

Depreciation cost shall be allowed only if it relates to the property subject to depreciation and being used.

Depreciation of fixed assets shall be recognised as an expenditure in tax balance up to the amount established by proportionate application of the highest annual depreciation rates, prescribed by the BiH government.
Bosnia and Herzegovina

The property being depreciated with a value of less than BAM 1,000 may be fully deducted in the purchase year, on condition that the property was put in function.

Purchase value of computer hardware and software may be deducted fully in the year the purchase was made.

Depreciated assets, once depreciated, shall not be re-included in depreciation calculation for the purposes of tax balance.

Depreciation expenditure is tax allowed for increase of fixed assets value due to revalorisation in accordance with IAS/IFRS, up to the amount of calculated depreciation on the revalorisation base, and by using the proportion method prescribed by law.

**Other tax allowable expenses**

Expenditures are deductible from revenue in computing the tax base if the expenditures directly relate to the realised revenue.

Representation costs pertaining to business activity shall be recognised as expenditures in the amount of 30% of representation costs.

Costs of humanitarian, cultural, educational, scientific and sports purposes (except professional sports) shall be recognised as an expenditure in the amount of up to 3% of total income in the tax period.

Expenses of membership fees to the chambers shall be recognised as an expenditure in the amount not exceeding 0.1% of total income in the tax period, with the exception of membership fees regulated by the law.

Expenses based on sponsorship shall be recognised in the amount of 2% of total income in a tax period.

Tax allowable expenditures include expenditures of reservation for risks and expenditures in accordance with the laws and other regulations and reservations based on the contract for the following:

- Reservations for severance pay paid up to the prescribed amount;
- Reservations for expenditures of natural resources renewal;
- Reservations for expenditures in guaranteed time frames;
- Reservations for initiated court procedures; and
- Reservations for potential credit losses of banks and microcredit organisations.

The expenses occurring based on the write-off of disputable bills received are considered as tax allowable.

**Tax treatment of losses**

Tax losses shown in tax balance may be transferred against the profit in a future tax period but not exceeding five years. Tax losses are utilised on a first-in, first-out (FIFO) basis.
**Tax credit for tax paid outside BiH**

When a taxpayer generates income or profit through business activities outside of FBiH (directly or through a business unit) and pays the profit tax on such activities, the tax paid abroad shall be credited up to the amount of the profit tax that would have been paid for the income or profit generated by the same activities in FBiH.

**Depreciation – Republika Srpska**

Depreciation deductions are allowed only with respect to depreciable assets that are being used.

A depreciable asset is any tangible or intangible asset that is held for use in the production or supply of goods and services, for rental to others, or for administrative purposes. Land or any other asset that does not decrease in value through wear and tear or obsolescence is not considered a depreciable asset.

**Other tax allowable expenses**

Expenditures that are recognised and deductible from revenue also include the following:

- 30% of the cost of entertainment, meals and amusements related to the legal person’s economic activity;
- Contributions to public institutions, humanitarian, cultural and educational organisations in the amount not exceeding 3% of the fiscal year’s total revenue, and any excess contribution may be carried forward three years to apply against future contributions;
- Sponsorship expenses in an amount not exceeding 2% of the fiscal year’s total revenue; and
- Scholarships to students in an amount up to 75% of average monthly net salary per employee in Republika Srpska in accordance with the latest published data from the body in charge of statistics.

A legal person using the accrual form of accounting is allowed a deduction with respect to bad debts and reserves.

Legal persons – other than banks, authorised credit institutions or insurance companies – shall be entitled to a bad debt deduction that arose in connection with a sale of goods or services but only if the revenue from the sale was previously included in the tax base of the legal person. For this purpose, a credit or trade receivable is considered a bad debt only if one of the following is true:

- It is more than 12 months past the due date for payment of the invoiced receivable;
- The creditor has sued for the receivables or an enforced collection procedure is initiated due to receivables;
- They are registered in the bankruptcy procedure of the debtor; or
- An agreement has been reached with the debtor who is not a physical or related person in the bankruptcy or liquidation procedure.

In the case of a bank or other authorised credit institution, a deduction is allowed for increases in the reserve account for customary losses due to unpaid loans, and the amount may not exceed 20% of the tax base.
Bosnia and Herzegovina

In the case of an insurance or reinsurance company, a deduction is allowed for increases in reserves as registered in accounting documents and as authorised according to applicable law. For insurance contracts pertaining to reinsurance, reserves are to be reduced so that they cover only part of the risk remaining with the insurer, and the amount may not exceed 20% of the tax base.

The tax savings resulting from a reduction or cancellation of any reserve that is collected later on comprises the taxable revenue at the moment of collection in accordance with this law.

**Tax treatment of losses**

Losses are carried forward and compensated for through reduction of the tax base in the following five years.

Tax losses are utilised on a FIFO basis.

**Payment of foreign profit tax**

If a legal entity from Republika Srpska obtains revenue from a foreign state and the revenue is taxed both in Republika Srpska and in the foreign state, then the tax paid to the foreign state, whether paid directly or withheld and remitted by another person, is to be credited from the Republika Srpska’s profit tax, unless such legal entity from Republika Srpska elects to treat the foreign tax as a deductible expenditure in determining the fiscal year tax base.

**Group taxation**

**Federation BiH**

A headquarters company and its branches shall form a business association when there is direct or indirect control between them with no less than 90% share.

A business association shall hold the right to request tax consolidation on the condition that all businesses in the group are residents of FBiH.

A request for tax consolidation shall be filed to the authorised branch office of the tax authorities by a headquarters company.

Each group member is required to file its tax balance, and the headquarters of the business association shall file a consolidated tax balance for the group.

The consolidated tax balance shall offset losses of one or more businesses against the profit of other businesses in the association.

Individual group members shall be liable for the tax calculated per consolidated balance proportionately to the profit from the individual tax balance, and the payer of calculated tax per consolidated balance shall be the headquarters.

Once approved, tax consolidation shall be applied for the consecutive period of no less than five years.

When one, several or all the businesses in the association later opt for individual taxation, all group members shall be obliged to pay the difference proportionately on behalf of the tax privilege they used.
Bosnia and Herzegovina

Republika Srpska
An affiliated group of legal persons located within Republika Srpska may elect to file a consolidated annual tax declaration.

An affiliated group of legal persons is a group of one or more legal entities from Republika Srpska that are connected through the ownership of stock with a common parent provided that the common parent owns at least 80% of the stock in a legal person that is included in the affiliated group. If the common parent does not own at least 80% of the stock in a legal person that is included in the affiliated group, then the parent may file a consolidated tax declaration if one or more other legal persons in the affiliated group own at least 80% of the stock in such legal person.

Tax incentives

Federation BiH
For a taxpayer who established in the year for which the CIT is calculated, more than 30% of totally generated income by exportation is being relieved from CIT for that year.

A taxpayer who invested in production within the territory of FBiH for five consecutive years for a minimum fee of BAM 20 million will be relieved from taxation for a period of five years, starting with the first year in which it has invested at least BAM 4 million.

A taxpayer who employs more than 50% of handicap or special needs individuals within its company for a period of time longer than one year is relieved from CIT for the year in which more than 50% of handicap or special needs individuals are employed within the company.

Republika Srpska
There are no CIT incentives available in Republika Srpska.

Withholding taxes (WHT)

Federation BiH (FBiH)
WHT in FBiH shall be the tax calculated on non-resident income generated throughout the territory of FBiH.

The base for calculation of WHT is the gross amount paid by a resident of FBiH to a non-resident based on the dividends, interest, royalties and other intellectual property rights, compensations for market research, tax consulting services, auditors' services, fun and sports events, premium insurance for insurance or reinsurance of risk in FBiH, telecommunication services between FBiH and other countries, as well as all other services performed on the territory of FBiH.

Withholding tax shall be paid at the rate of 5% on dividend payments and 10% for interest, royalties and other, if not reduced under a tax treaty.

Republika Srpska
Any legal or physical person from Republika Srpska, as well as any foreign legal or physical person with PE in Republika Srpska who pays revenue to a foreign legal person is to withhold tax from the total payment of revenue and is to remit the withheld tax to the Public Revenues Account of Republika Srpska.
Bosnia and Herzegovina

The WHT applies to the following revenue payments, regardless of whether the revenue is received in Republika Srpska or abroad:

- Payment of interest or its functional equivalent under financial instruments and arrangements from a resident;
- Payment for entertainment or sporting activities carried out in Republika Srpska regardless of whether the revenue is received by the entertainer or sportsman or by another person;
- Payment for the performance of management, consulting, financial, technical or administrative services, if the revenue is from a resident or if the revenue is paid by or included in the books and records of a PE in Republika Srpska or if such payment is deducted for the purpose of determining the tax base;
- Payment in the form of insurance premiums for the insuring or reinsuring of risks in Republika Srpska;
- Payment for telecommunication services between Republika Srpska and a foreign state;
- Payment of royalties;
- Payment of lease for movable property; and
- Payment for the performance of other services in Republika Srpska.

Withholding tax is not due on dividend payments.

The WHT rate in Republika Srpska is 10%.

**Tax administration**

*Federation BiH*

A taxpayer is obliged to file correctly and accurately a completed tax return (declaration) with the tax balance to the authorised branch office of the tax administration within 30 days after the deadline for submitting financial statements.

The deadline for submission of annual calculation of business results is 28 February of the following year.

*Republika Srpska*

Tax declaration for a tax year shall be filed no later than 90 days upon the end of the tax year, and in case of a calendar year, no later than 31 March of the current year for the previous year.

A taxpayer shall pay the profit tax pursuant to the final tax declaration.
**Significant developments**

The following changes to taxation were confirmed by the Ministry of Finance and Development Planning and will take effect on 1 July 2011 (i.e., in the tax year 2011/12):

- The current two-tier system of company tax and additional company tax (ACT) is to be abolished and to be replaced with a flat corporate tax rate of 25% with no ACT component; and
- Withholding tax (WHT) on dividends to resident and non-resident shareholders is to be reduced from 15% to 7.5%.

**Taxes on corporate income**

Company tax is imposed at a rate of 15% for non-manufacturing companies and 5% for manufacturing companies. ACT is imposed at a rate of 10% and the ACT amount could be carried forward up to 5 years to be set off against WHT payable on dividends paid.

International Financial Services Centre (IFSC) companies are taxed at a flat rate of 15%. Companies must apply for a certificate to be classified as IFSC companies, which deal only in specified services and only with non-residents.

### Notes

1. Exchange rate of the pula at 31 December 2009: USD 1 = BWP 6.76.
2. CIT at a rate of 15% plus ACT at a rate of 10%/proposed rate of 25%.

### Corporate residence

Corporate residence is determined on the basis that a company’s registered office or place of incorporation is in Botswana or it is managed and controlled in Botswana.

### Other taxes

There are no other taxes on income.

### Branch income

Company tax at the rate of 25% is payable on branch profits.

### Income determination

#### Inventory valuation

Inventories are valued at cost less such amounts, if any, that the Commissioner General believes are reasonable as representing the amount by which the value of such stock has been diminished because of damage, deterioration, obsolescence or other cause. Although not expressly excluded by legislation, last-in, first-out (LIFO) has not been accepted in practice by the tax authorities.

#### Capital gains

Gains from disposal of specified capital assets (immovable property and marketable securities, including shares in private companies) are included in taxable income in the hands of the corporate taxpayer. Acquisition costs of immovable property are subject to a 10% compound annual addition for inflation for the period from acquisition to
30 June 1982, and thereafter to an inflation addition based on the increase in the consumer price index to the date of sale. For other gains, no inflation allowances are granted, but the taxable gain is set at 75% of the total gain.

The aggregate amount of capital losses is set-off against the aggregate amount of capital gains in the same tax year. Any excess of loss is deducted from aggregate gains over losses accruing in the succeeding tax year only. Capital losses cannot, in any circumstances, be deducted against other income.

**Inter-company dividends**
Dividend income is not subject to tax. A withholding tax of 15% (proposed rate – 7.5%) is deducted from dividend payments.

**Foreign income**
Resident corporations are not generally taxed on a worldwide income basis. However, interest and dividend income from a foreign source is taxed in the hands of the resident company on an accrual basis. Relief is given for any withholding tax imposed on such income.

**Deductions**

**Depreciation and depletion**
Annual and capital allowances available are as follows.

*Companies other than mining companies:*
Annual taxation allowances for expenditures incurred on machinery and equipment before 30 June 1982 can be claimed up to 100%. This allowance may be for any proportion of previously unclaimed expenditure. For expenditure incurred on machinery and equipment after 30 June 1982, annual allowances are granted, calculated on cost by the straight-line method on the basis of the expected useful lives of the individual assets. Guidelines are provided for expected useful lives of different categories of assets, which vary from four to 10 years. Book depreciation is not required to conform to tax depreciation. The capital allowance claimable on a company motorcar is restricted to a maximum of BWP 175,000.

An initial allowance of 25% of cost is granted on certain industrial buildings. All industrial and commercial buildings (excluding residential properties) are granted a 2.5% annual allowance based on cost or, in the case of an industrial building on which an initial allowance has been claimed, the original cost less the initial allowance.

Balancing allowances and charges are brought to account on the disposal of assets on which allowances have been claimed. Where disposal value of an item of machinery or equipment exceeds the difference between expenditure incurred on the asset and allowances granted, the whole amount is taxable as corporate income or the balancing charge can be offset against further additions of new equipment, thus providing rollover relief.

However, there is no rollover relief on motorcars except where the cars are used in a car rental or taxi service business.
Botswana

**Mining companies:**
Mining companies are taxed in accordance with the provisions of the Twelfth Schedule to the Botswana Income Tax Act. A summary of the information contained in this schedule is set out below:

1. Mining profits, other than profits from diamond mining, shall be taxed according to the following formula:

   \[
   \text{Annual tax rate} = 70 \text{ minus } \frac{1,500}{x}
   \]

   where \( x \) is the profitability ratio, given by taxable income as a percentage of gross income provided that the tax rate shall not be less than the company tax rate (currently 25%).

2. Head office expenses allowed as a deduction in ascertaining gross revenue from mineral licence shall be limited to 1.5% of gross income for the year of assessment, and any excess of such expense above the limit shall be treated and taxed as a dividend.

3. Where a foreign controlled resident company has a foreign debt-to-equity ratio in excess of 3:1 at any time during the year of assessment, the amount of interest paid by the resident company during that year on that part of the debt that exceeds the ratio shall be disallowed as a deduction and the amount so disallowed shall be treated and taxed as a dividend.

4. Where the interest rate on a loan made by a foreign-based company to an affiliate company resident in Botswana is considered by the commissioner to be in excess of the market rate, such excess will be disallowed as a deduction and taxed as a dividend.

5. In ascertaining the business chargeable income of any person for any tax year from a business of mining, there shall be deducted from his business income an allowance, to be known as a mining capital allowance, computed in accordance with 100% of the mining capital expenditure made in the year in which such expenditure was incurred, with unlimited carryforward of losses.

6. Diamond mining is usually taxed in terms of an agreement with the Government of Botswana.

**Net operating losses**
Losses may be carried forward for five years, with the exception of farming, mining and prospecting operations, for which there is no time limit. There is no allowance for carrybacks.

**Payments to foreign affiliates**
Royalties, interest and service fees paid to foreign affiliates are generally deductible, provided such amounts are at arm’s length and withholding tax is paid.

**Taxes**
Any taxes paid are specifically disallowed in computing a company's taxable income.

**Other significant items**
An allowance is granted for dwelling houses erected for employees by a business other than a mining business. The amount of the allowance is the lower of cost or BWP 25,000 for each dwelling house constructed.

A deduction of 200% of the cost of an approved training expenditure is allowed.
As of 13 February 1984, companies with shareholders having 5% or more of the equity, either directly or indirectly, are classified as close companies, and there are additional tax regulations in respect of these shareholders.

Small companies, that is, resident private companies whose gross income does not exceed BWP 300,000, may elect that the company be taxed as a partnership.

Expenses incurred by the company for having its shares listed on the Botswana Stock Exchange are deductible in determining the chargeable income of the company.

**Group taxation**

There are no concessions for group taxation, other than for wholly-owned subsidiary companies of the Botswana Development Corporation.

**Tax incentives**

**Inward investment**

To encourage investment in Botswana, extra tax reliefs on revenue or capital account will be granted for specific business development projects if the government is satisfied that such projects are beneficial to Botswana.

**Withholding taxes (WHT)**

WHT at the following rates must be deducted from payments to residents and non-residents unless a double taxation agreement exists.

Notes

* 5% or 7.5% rate of withholding tax is applicable if the beneficial shareholder is a company resident in the double taxation agreement country and holds at least 25% of the share capital in the company paying dividends. Otherwise, the other rate applies (10% or 12% as the case may be).

** 10% rate of WHT is applicable if the beneficial shareholder is a company resident in the double taxation agreement country and holds at least 25% of the share capital in the company paying dividends.

Tax administration

Returns
Botswana has a fiscal year ending on 30 June. However, a business may select its own accounting year, which may end on a date other than 30 June. This accounting year is accepted for the computation of the company’s taxable income, which will be the last accounting period prior to 30 June.

The system is one that requires all taxpayers to file tax returns in standard format (providing information relating to taxable income earned). Self-assessment, which means that the return submitted constitutes the assessment, was introduced effective 1 July 2001.

Payment of tax
Under the self-assessment tax procedures, if the tax payable for a tax year exceeds BWP 50,000, then the tax is required to be paid in equal quarterly instalments over the period of the 12 months ending on the company’s financial year-end date. Where the tax is less than BWP 50,000, then the tax is payable within four months from the company’s financial year-end date.

Significant developments

On 16 December 2009, Brazil’s Executive Branch published Provisional Measure (PM) 472 which, among other provisions, includes new thin capitalisation rules that can be summarised as follows:

- Interest paid or credited by a Brazilian entity to a related party (individual or legal entity), not resident or domiciled in a tax haven jurisdiction, may only be deducted for income tax purposes if the interest expense is viewed as necessary for the activities of the local entity and the amount of debt granted by the related party does not exceed twice the amount of its participation in the net equity of the Brazilian entity. A second test also needs to be performed including the total amount of debts with any foreign related party. If under either “debt/equity” test a 2:1 ratio is exceeded, the portion of interest related to the excess debt amount will not be deductible for Brazilian income tax purposes.

- Similar provisions are also applicable to interest paid or credited by a Brazilian entity to an individual or legal entity (whether or not a related party) resident or domiciled in a tax haven or favourable tax regime jurisdiction. In these cases, the interest expense would only be deductible for Brazilian income tax purposes if the expense is viewed as ordinary and necessary as referenced above, and the total amount of the Brazilian entity’s debt with any foreign party resident or domiciled in a tax haven jurisdiction does not exceed 30% of the entity’s net equity.

The two above-mentioned rules also apply to cases where a guarantor, representative or any other intervening party is a related party or resident of a tax haven jurisdiction (respectively).

It should be noted that the above-mentioned rules are still pending final approval by the authorities and as such might be subject to further changes.

Taxes on corporate income

Corporate income tax (IRPJ)

Federal income tax is assessed at the fixed rate of 15% on taxable income.

Corporate income tax is generally computed on the basis of annual taxable income. For tax purposes a company’s year-end is 31 December. A different year-end for corporate purposes is irrelevant.
Corporate taxpayers are also subject to a surcharge of 10% on the annual taxable income in excess of BRL 240,000.

Social contribution on net income (CSLL)
All legal entities are subject to a social contribution to the federal government at the rate of 9% (except for financial and insurance institutions, which are taxed at the rate of 15%), which is not deductible for income tax purposes. The tax basis is the profit before income tax, after some adjustments.

Brazilian taxpayers have the option (subject to some restrictions) to calculate IRPJ and CSLL on net income using an “actual profits” method (“Lucro Real”), which is based on total taxable income (book results before taxes), adjusted by certain additions and deductions as determined in the legislation. Brazilian taxpayers have also the option to calculate IRPJ and CSLL using a “presumed profits” method (“Lucro Presumido”). Under the “presumed profits” method, the income is calculated on a quarterly basis on an amount equal to different percentages of gross revenue (based on the entity’s activities) and adjusted as determined by the prevailing legislation.

Whenever the tax basis is negative (tax loss), it may be carried forward without any time limitation. However, the use of tax losses is limited to 30% of each year’s taxable income. There is no carryback.

Corporate residence
A corporation is considered resident in Brazil if it has been incorporated in Brazil, and its tax domicile is where its head office is located.

Other taxes

Import tax
Import tax (“Imposto de Importação”, or II) is levied on the CIF (Cost, Insurance and Freight) price of the imported good. The rates depend on the degree of necessity and are defined in accordance with the product’s tariff code contained in the Mercosur Harmonised System (NCM/SH). The rates tend to be in the range of 10% to 20%, although there are many exceptions which are subject to higher or lower rates.

Value-added tax (VAT)
VAT is payable on imports, sales and transfers of goods and products in the form of a federal excise tax (“Imposto sobre Produtos Industrializados”, or IPI) at various rates in accordance with the nature of the product (normally around 10% to 15%, but in certain cases ranging to over 300%); and a state sales and service tax (“Imposto sobre as operações relativas à Circulação de Mercadorias, e sobre a prestação de Serviços de transporte interestadual e intermunicipal e de comunicação”, or ICMS) with rates ranging from 7% to 25%.

Except for services related to freight and transportation, communications, and electric energy, which are subject to ICMS, income from services rendered is normally subject to a municipal service tax (“Imposto Sobre Serviços de qualquer natureza”, or ISS) – which is not a value added tax – with rates ranging from 2% to 5%.
**COFINS**

COFINS (“Contribuição para o Financiamento da Seguridade social”), levied at the rate of 7.6% is a monthly federal social assistance contribution calculated as a percentage of revenue. A COFINS credit system is meant to ensure the tax is applied only once on the final value of each transaction. However, some taxpayers (such as financial institutions, telecommunication companies, cooperatives and companies, which opt to calculate Brazilian corporate income tax and social contribution on net income using a “Presumed Profit” method) are still subject to the previous COFINS system, that is, COFINS is applied at the rate of 3% and no credit system is allowed.

**PIS**

PIS (“Programa de Integração Social”) levied at the rate of 1.65% is also a federal social contribution calculated as a percentage of revenue. A PIS credit system is meant to ensure the tax is applied only once on the final value of each transaction. However, some taxpayers (such as financial institutions, telecommunication companies, cooperatives and companies which opt to calculate Brazilian corporate income tax and social contribution on net income using a “Presumed Profit” method) are still subject to the previous PIS system, that is, PIS is applied at the rate of 0.65% and no credit system is allowed.

**PIS and COFINS on imports**

Importation of goods and services are also subject to PIS and COFINS (in addition to all other taxes imposed on import transactions). PIS and COFINS are imposed on the Brazilian entity or individual (the importer of goods or services) and applied at the rates of 1.65% and 7.6%, respectively. The contributions paid upon import transactions may, in some instances, be creditable.

**IOF**

IOF (“Imposto sobre operações de crédito, câmbio, seguro e sobre operações relativas a títulos e valores mobiliários”, or Tax on Financial Transactions) is a tax levied primarily on certain financial transactions, such as loans, foreign exchange operations, insurance and securities and transactions with gold (as a financial asset) and foreign exchange instruments. The applicable rate will vary depending on the transaction. The IOF rate may be reduced to 0% in some cases, such as: (i) exchange transactions relating to the inflow of revenues in Brazil deriving from the export of goods and services; (ii) exchange transactions relating to the inflow and outflow of resources in and from Brazil, stemming from foreign loans and financing obtained as from 23 October 2008; (iii) liquidation of exchange operations for the purposes of repatriation of funds invested in the stock market; and (iv) remittances of interest on net equity and dividends relating to investment in the stock market.

**CIDE**

CIDE (“Contribuição de Intervenção no Domínio Econômico”, or Contribution for the Intervention in the Economic Domain) is a contribution levied at the rate of 10% on remittances made by corporate taxpayers for royalties and for administrative and technical services provided by non-residents. CIDE is payable by the local entity, and therefore, not creditable to the non-resident. CIDE does not represent a liability to the foreign recipient. CIDE is not applied on the payments relating to the license to use, market or sublicense software, provided that it does not involve transfer of technology.
Brazil

**Property taxes**
A property tax named IPTU (“Imposto Predial e Territorial Urbano”) is levied annually based on the fair market value of property in urban areas at rates that generally vary according to the municipality and location of the property. In the municipality of São Paulo, the basic IPTU rate is 1% for residential properties or 1.5% for commercial properties (both rates may be increased or decreased according to the market value of the property). Another property tax – ITBI (“Imposto de Transmissão de Bens Imóveis Inter Vivos”) is levied at the transfer of immovable property, with rates also varying based on the municipality were the property is located. The ITBI rate in the municipality of São Paulo is currently 2%, applied over the market value of the property.

A state property transfer tax – ITCMD (“Imposto sobre Transmissão Causa Mortis e Doações”) is normally payable at rates varying from state to state on inheritances and donations of goods and rights. In the State of São Paulo, ITCMD is charged at the rate of 4%.

**Branch income**
Profits of branches of foreign corporations are taxable at the normal rates applicable to local corporations.

**Income determination**

**Inventory valuation**
Brazilian income tax regulations require that inventory may be valued at the actual average cost or by the cost of the most recently acquired or produced goods. Rulings to the effect that last-in, first-out (LIFO) is not acceptable have been given.

**Capital gains**
Capital gains deriving from the sale of assets and rights, including shares/quotas, are taxed as ordinary income. However, profits on certain long-term sales of permanent assets may be computed for tax purposes on a cash basis. Profits on long-term contracts may be computed on a percentage-of-completion basis. When these contracts are entered into with the government or government-owned companies, the profit may be recognised on a cash basis for tax purposes.

Except during the year when incurred, capital losses may be offset only against capital gains. Unused capital losses are treated similarly to income tax losses with regard to limits on use and carryforward period.

Capital gains derived by non-residents (including transactions carried out abroad between two non-resident investors, involving assets or rights located in Brazil), are taxed in Brazil. The Brazilian source performing the remittance of capital gains to the non-resident (whether a Brazilian acquirer or the local solicitor of a foreign acquiring entity) would withhold the applicable income tax on such amounts on behalf of the latter at the rate of 15% (or 25% if the beneficiary is located in a tax haven jurisdiction).

**Foreign income**
Brazilian resident companies are taxed on worldwide income. Profits of foreign subsidiaries, affiliates and controlled companies are taxed at the date of the financial
statements in which the profits are calculated, regardless of remittance. Double taxation could be avoided by means of foreign tax credits.

**Foreign exchange gain**
With respect to foreign exchange gain, which may arise from receivables or liabilities denominated in foreign currency, Brazilian tax legislation allows the local company to elect to consider the related effect, for tax computation purposes, either upon accrual or cash basis (i.e., actual receipt/payment of funds).

**Stock dividends**
Stock dividend distributions are not subject to withholding tax.

**Financial income**
Fixed-rate interest income from short-, medium-, or long-term financial market transactions, including swap transactions, is subject to withholding income tax at rates ranging from 15% to 22.5%. Non-fixed financial gains related to stock/commodities exchange and/or futures market transactions are taxed at the rates of 20% (day-trade) and 15% (all other cases). The total income or gain is considered taxable income, and the tax withheld may be offset against the total tax due by the corporate taxpayer.

**Interest on net equity**
Companies can pay interest (calculated on a pro rata basis and up to a given rate known as the “long-term interest rate” (TJLP) – which is currently set at 6.00% in 2010) to partners and/or share/quotaholders, based on the company's net equity. Such interest, which may not exceed the highest of 50% of the annual profits or 50% of the accumulated earnings and profits, is deductible for both income tax and social contribution purposes and is subject to 15% tax at the source. Whenever the beneficiary is a legal entity subject to normal income tax in Brazil, the tax withheld at the source may be taken by the recipient as a tax credit against the normal corporate income tax due or the tax due at the source on distributions of interest. If the beneficiary is a Brazilian resident individual, such interest will not become subject to any further taxation.

**Deductions**

**Depreciation and depletion**
Depreciation is allowable on a straight-line basis over the useful life of the asset. The annual rates normally allowable are 10% for machinery, equipment, furniture and installations; 20% for vehicles; and 4% for buildings. Accelerated depreciation is allowed for companies with a two or three working shift operation by increasing normal rates by 50% and 100%, respectively.

Depletion allowances are allowed for natural resources on a useful-life basis. Special incentive depletion allowances are granted for mining operations.

**Net operating losses**
Tax losses may be carried forward without any time limitation. However, the tax loss compensation may not reduce taxable income by more than 30% of its amount prior to the compensation itself. Tax loss is defined as the accounting loss adjusted for tax purposes. There is no carryback.
Brazil

**Payments to foreign affiliates and related companies**
Royalties and technical service fees payable to foreign companies with a direct or indirect controlling interest in the Brazilian company are deductible for tax purposes (observing applicable deduction limits), provided the contract has been duly registered with the National Institute of Industrial Property (INPI) and approved by the Brazilian Central Bank. Brazilian legislation recently introduced thin capitalisation rules, which restrict the deductibility of interest expenses in Brazil. Deductibility of interest is also conditioned to approval of the respective contract by the Brazilian Central Bank. However, on unregistered related-party loans the deductible interest may not exceed interest calculated using the six-month US dollar deposit LIBOR (London Interbank Offered Rate) rate plus 3%. Amounts paid, credited, delivered or remitted at any title, direct or indirectly, to individuals or legal entities residing in tax haven jurisdictions (as provided by Brazilian legislation) should not be considered tax deductible provided that operational substance can be allocated abroad.

**Foreign exchange loss**
With respect to foreign exchange loss, which may arise from receivables or liabilities denominated in foreign currency, Brazilian tax legislation allows the local company to elect to consider the related effect, for tax computation purposes, either upon accrual or cash basis (i.e., actual receipt/payment of funds).

**Losses on bad debts**
Losses are tax deductible, depending on the amounts, time overdue and administrative and/or legal actions taken to recover losses. Losses arising from inter-company transactions are not tax deductible.

**Taxes/contributions**
Taxes, contributions and related costs, such as late-payment interest, are deductible for tax purposes on the accrual basis. This rule does not apply to taxes/contributions being or to be challenged by the taxpayer at any level of litigation, which are deductible for tax purposes only on a cash basis.

**Other deductions**
Among others, travel expenses may only be considered deductible if they are duly documented and substantiated. Donations are deductible up to certain limits if recipients are registered as charitable institutions. At the option of the company, research and development expenditures may be deducted when incurred or deferred until termination of the project and then amortised over a period of not less than five years. Expenses of group medical care and health insurance programmes for employees and contributions to private supplementary pension schemes are considered deductible if supplied to all employees indistinctly.

**Group taxation**
Consolidated tax returns are not permitted in Brazil.

**Tax incentives**

**Inward investment**
Total or partial exemption from duty, excise tax and social contributions on imported equipment is granted on certain approved investment projects.
Regional incentives
Income tax exemptions or reductions are also available for companies set up in specified regions within Brazil, primarily the north and northeast regions. These incentives are designed to accelerate the development of certain less-developed regions and industries considered to be of importance to the economy.

Capital investment
Approved investment projects are granted accelerated depreciation on nationally produced equipment and access to low-cost financing. Sales of some capital equipment are exempt from state sales tax.

Other incentives
Brazilian corporate taxpayers can apply a percentage of their income tax liability on deposit for reinvestment and investment in their own approved investment projects. These approved investment projects are normally granted total or partial income tax exemption. Excise and sales tax exemptions are granted to exporters of manufactured goods.

As from 2005, Brazilian legislation has introduced tax incentives for projects focusing on technological innovation.

Withholding taxes (WHT)
Profits/dividends distributed to resident or non-resident beneficiaries (individuals and/or legal entities) relating to periods beginning on or after 1 January, 1996 are not subject to withholding income tax. This provision is also applicable to dividends paid to non-resident companies located in a tax haven jurisdiction.

The withholding tax rate applicable to payments for services rendered by non-resident companies or individuals is generally 15% but can be increased to 25% in certain cases.

Payments for services, royalties and interest to non-resident companies located in a tax haven jurisdiction are subject to withholding income tax at the rate of 25%.

Certain types of income paid by Brazilian companies to non-resident recipients are subject to withholding tax as follows:

</table>

Notes

1. Note that the remittance of dividends is not subject to taxation in Brazil, since 1 January 1996.
2. Treaty rates in excess of those in force for non-treaty countries are automatically reduced.

*The treaty concerned should be consulted to confirm that the tax reduction is applicable in each case.

Tax administration

Returns

With few exceptions, corporate entities, including those that are foreign-controlled, must file an annual adjusting tax return consolidating the monthly results of the previous calendar year. This tax return must normally be filed by the end of June following the tax year ending on 31 December.

Supporting documentation must be retained for at least five years.

Payment of tax

In the case of income tax, it is calculated monthly and prepayments must be paid by the last working day of the subsequent month. Any amounts of income tax due for the year (exceeding the prepayments performed) must be paid by the last working day of March of the subsequent year.
When income tax is calculated quarterly, the taxpayer must perform the applicable payment by the last working day of the month subsequent to the end of the quarter. There is an option to pay the tax due at the end of each quarter in three instalments, the first one starting from the subsequent month to the end of the quarter.

**Public digital bookkeeping system – SPED**

Brazil is currently implementing a new public system of digital bookkeeping known as SPED, which aims at gradually replacing paper copies of invoices and tax records for electronic files. SPED can be defined as an instrument that unifies the activities of reception, validation, storage and legalisation of records and documents that are part of the commercial and tax bookkeeping of companies, through a single, computerised flow of data.

Comprised by three pillars (electronic invoice, digital fiscal bookkeeping and digital accounting bookkeeping), the implementation of the SPED requires adjustments on the relationship with tax authorities, clients, suppliers and, mainly, on the internal operational processes, which will demand an integrated action from different areas (tax, accounting, IT, supplies, production, commercial, and others). On the other hand, occasional inconsistencies from databases, as well as operational errors related to tax and accounting information to be generated, usually unknown to the companies’ administration, will be subject to an increased visibility and monitoring by the Brazilian tax authorities.

**Other issues**

**Transfer pricing**

The Brazilian transfer pricing rules apply to import and export transactions of goods, services and rights between related parties (the legislation provides a broad list of the parties considered as “related” for transfer pricing purposes). Under such rules, the transfer price determined between related parties will be acceptable, for Brazilian tax purposes, if it is determined that such price is at arm’s length according to one of the traditional methods established by the legislation (no profit methods available). Moreover, all operations with jurisdictions considered as tax havens will also be subject to transfer pricing rules whether involving related parties or not.

Furthermore, interest arising from loans contracted with foreign related parties, which are not registered with the Brazilian Central Bank (BACEN), will also be subject to compliance with such rules. Operations involving royalty agreements will not be subject to the rules below if the related contract is registered with the BACEN and the Brazilian Institute of Industrial Property (INPI).

Therefore, the adequacy of the price practiced between the related parties in any operations involving goods, services and rights, may be supported through the application of one of the following methods, as determined under the Brazilian transfer pricing regulations (the company may choose the most convenient method):

- Methods used on import transactions:
  1. Comparable Independent Price Method (PIC);
  2. Resale Price Less Profit Method (PRL); and

- Methods used in export transactions:
  1. Export Sales Price Method (PVEx);
Brazil

2. Resale Price Method; and
3. Acquisition or Production Cost Plus Taxes and Profit Method (CAP).

Relief of proof rules for inter-company export transactions is available.

Significant developments

Corporate income tax rate
The rate of corporate income tax is 10%.

Withholding taxes
The withholding tax rate on interest, royalties, capital gains, rentals and technical services is 10%. The withholding tax rate on dividends and liquidation quotas is 5%.

One-off taxes
All one-off taxes (applicable to certain types of expenses) are levied at a rate of 10%.

Tax exemption for dividends payable between European Union (EU)/European Economic Area (EEA) companies
As from 1 January 2009, dividends and liquidation quotas payable to or by an EU/EEA-based company are tax exempt without special conditions, similar to dividends and liquidation quotas payable between Bulgarian companies.

Thin capitalisation
The Bulgarian debt-to-equity ratio for thin capitalisation purposes is 3:1. In addition, the period for carryforward of restricted interest costs is five years.

Corporate reorganisations
Deferral of taxation is provided in the tax law for certain types of corporate reorganisations in accordance with the EU Merger Directive.

Taxes on corporate income

Corporate income tax
In general, corporate income is subject to tax at a flat rate of 10%.

Alternative tax
Income earned by organisers of games of chance is subject to 12% or 15% alternative tax, applied on a specific tax basis (e.g., the total value of the stakes made). In addition, a special tax regime applies to the operation of commercial maritime vessels as per their net tonnage at a rate of 10%.
Bulgaria

**Corporate residence**

A corporation is resident in Bulgaria for tax purposes if it is incorporated in Bulgaria. Permanent establishments (PE) of foreign tax residents (e.g., branches) are treated as separate entities similar to Bulgarian residents for tax and accounting purposes.

**Other taxes**

**Value-added tax (VAT)**

VAT was initially introduced on 1 April 1994. As of the date of Bulgaria’s accession to the European Union (EU) on 1 January 2007 new VAT legislation entered into force, which is based on the provisions of Council Directive 2006/112/EC. Respectively, new concepts (e.g., intracommunity supplies and acquisitions, triangulation, distance sales) and a number of changes (e.g., VAT treatment of real estate, place of supply rules for certain services) were introduced. As of 1 January 2010 the so called VAT Package amendments were implemented in the Bulgarian VAT legislation.

The tax base includes the agreed price, customs and excise duties, if any, and certain other expenses (e.g., commission, packing, transport, insurance costs charged by the supplier to the purchaser, statutory taxes and fees), but does not include damages and interest for late payment.

The standard VAT rate is 20%. A reduced VAT rate of 7% applies to certain tourist services. Some activities are zero-rated, including intracommunity supplies, exports of goods to countries outside the EU, as well as international transport of goods (i.e., transport to or from countries outside of the EU).

Some supplies are VAT exempt without the right to a VAT credit, including (but not limited to) certain land transactions; leasing of residential property to individuals, financial, insurance, gambling, educational and health services. Options to charge VAT exist for certain land transactions, leasing of residential property to individuals and finance lease contracts.

The following statutory periods for VAT refunds apply:

- 30 days – For persons that have performed supplies subject to zero-rate within the last 12 months, exceeding 30% of the total value of all taxable supplies performed by them in the same period as well as by large investors meeting certain specific conditions; and
- Two months and 30 days – In all other cases.

The following mechanism for VAT recovery applies to VAT-registered companies: the positive or negative difference between the output VAT charged by the company and the input VAT for the respective month for which recovery is claimed results, respectively, in VAT payable or refundable. The VAT payable should be remitted to the state budget not later than the fourteenth day of the month following the respective month. VAT refundable is offset against any VAT payable in the following two months, and any remainder is effectively recovered within 30 days thereafter.

It is possible to claim a refund for VAT paid with respect to assets acquired not earlier than five years prior to the VAT registration, under certain conditions. If the assets are real estate, the term is 20 years.
Excise duties
Excise duties are charged as a percentage of the sales price or customs value or as a flat amount in BGN per unit unless a suspension regime applies. For 2010, excisable products include petrol and diesel fuel, heavy oil, beer and spirits, tobacco products and electricity.

The Excise Duties and Tax Warehouse Act introduced the tax warehousing regime and regulates the production, storage and movement of excisable products.

Property tax
The property tax rate is determined by each municipality and currently ranges from 0.01% to 0.25% of the tax value of property. Individuals and legal entities that are owners of immovable property, that is land and buildings, are liable for property tax. For individuals and residential properties of the enterprises, the tax value is determined by the municipal authorities based on certain statutory criteria. The tax value of non-residential properties of the enterprises is the gross book value. As of 1 January 2011 the taxable based for such properties would become the higher between the property's gross book value and its tax value determined by the respective municipal authorities.

A garbage collection fee is payable for immovable property at a rate determined by the local municipal council annually.

Transfer tax
A transfer tax is due on the value of transferred real estate or motor vehicles, subject to certain exemptions (e.g., contributions in kind and acquisitions under the Law on Privatisation and Post-privatisation Control). The rate of the transfer tax ranges from 0.1% to 3% and is determined by each municipality.

Company expenses
The following corporate expenses are subject to one-off tax:

- Representative expenses related to a company's business;
- Social expenses provided to employees in kind (monetary social expenses are subject to personal income tax); and
- Expenses related to the exploitation and maintenance of cars where they are used for management activities (as distinguished from administrative activities).

The rate of the one-off tax with respect to the above expenses is 10%. Both the expenses and the related one-off taxes are deductible for corporate income tax purposes.

Branch income

Corporate income tax
Although branches are not deemed to be separate legal persons, branches of non-resident companies have separate balance sheets and profit and loss accounts and are subject to corporate income tax at the standard rate of 10% as well as other general taxes (e.g., VAT, property tax).

Representative offices of foreign entities are not allowed to carry out business activities and are not subject to corporate income taxation. A representative office registered
under the Encouragement of Investments Act may perform only those activities that are not regarded as “economic activities” (e.g., marketing activities normally carried out by a representative office and auxiliary to the activities of its head office). Representative offices do not constitute PEs of the non-resident entities, unless they engage in business activities in breach of the law.

**Withholding tax (WHT)**

Profits repatriated by a branch to its head office abroad are not subject to WHT. However, certain income payable by a Bulgarian branch or a PE to other parts of the enterprise abroad may trigger WHT (e.g., income from technical services, interest, royalties), unless the respective expenses are not tax allowed at the branch or the PE or are recharged at cost.

**Income determination**

**Taxable result**

The taxable result is based on the statutory accounting principles relating to profit/loss and adjusted for tax purposes. Statutory accounting is maintained on an accrual basis in line with the applicable accounting standards.

Small and medium-sized companies may apply specific national standards for the financial statements of small and medium-sized companies, or optionally, International Financial Reporting Standards (IFRS). The principles provided by the Standards for the Financial Statements of Small and Medium-sized Companies are similar to those provided by IFRS. Certain types of companies, including banks and insurance companies, are obliged to apply IFRS.

**Inventory valuation**

Inventory valuation and revaluation methods applicable under accounting standards may be used for tax purposes. Companies may choose the method of inventory valuation, but must apply the chosen method consistently throughout the accounting period. An inventory of assets and liabilities is carried out in each accounting period. Accounting gains and losses realised upon revaluation of inventory would not be recognised for tax purposes and would form a temporary tax difference. These gains and losses would be recognised for tax purposes in the period when the inventory is disposed.

**Capital gains**

Realised capital gains are included in corporate income and are taxed at the full corporate tax rate. Exchange rate gains and losses are reported in the profit and loss account and reflected in the assessment of taxable profit. Capital gains from securities will not be subject to taxation if resulting from shares in listed companies and tradable rights in such shares on a regulated securities market in the EU/EEA.

**Inter-company dividends**

Inter-company dividend payments between Bulgarian companies and dividends distributed by EU/EEA residents to Bulgarian companies (except for dividends from special purpose investment companies or in case of “hidden distribution of profits”) are not included in the tax base of the recipient company. Dividends distributed by Bulgarian companies to foreign shareholders and resident individuals are subject to 5% withholding tax under the domestic legislation (see Withholding taxes section for exceptions for payments to EU/EEA tax residents and under double tax treaties (DTTs)).
**Foreign income**
Income derived outside Bulgaria by resident legal entities and income derived in Bulgaria by Bulgarian branches of non-residents is included in the taxable base for the purpose of corporate income tax, regardless of whether such income is subject to taxation abroad.

In instances where the provisions of a DTT are applicable, a tax credit or exemption for the foreign tax paid may be allowed. There is also a unilateral tax credit which may not exceed the amount of the tax that would be payable in Bulgaria for the same type of income. Undistributed income of foreign subsidiaries of a Bulgarian resident company is not taxed.

**Stock dividends**
No explicit regulation with respect to stock dividends exists in the Bulgarian corporate income tax act. Rather, the tax treatment of stock dividends would follow accounting treatment.

**Deductions**

**Depreciation and depletion**
For accounting purposes, depreciation is calculated in accordance with the straight-line, progressive, or declining methods of depreciation. Accounting regulations permit Bulgarian companies to establish a depreciation schedule for each tangible and intangible fixed asset on the basis of the method chosen by the company.

For tax purposes, only the straight-line method is permitted. For machines and equipment that are part of the initial investment, accelerated depreciation may also apply, subject to certain conditions.

**Net operating losses**
The taxpayer has the right to carryforward tax losses incurred in a given year over the following five years. The loss subject to carryforward is the negative amount of the financial result adjusted for tax purposes with certain add-backs and deductions specified in the tax legislation.

Tax losses may be reversed up to the amount of the positive financial result after tax adjustments (without the effect of the loss subject to be carried forward itself).

Carryforwards of foreign-source losses may only offset income from the same source. However, EU/EEA-source losses may offset income from other sources, including Bulgarian sources. Loss carryback is permitted in very specific cases.

**Payments to foreign affiliates**
Payments to foreign affiliates may be subject to recalculation by the tax authorities if such payments are not made at arm’s length.

**Thin capitalisation rules**
Interest payable by local companies to local or foreign persons may be restricted by the thin-capitalisation rules (which also apply to interest due to non-affiliated companies).

The tax deductibility for interest expenses that exceed interest income is restricted to 75% of the accounting result of the company, exclusive of interest income and expense.
Bulgaria

If the accounting result of the company before including the effect of the interest income and expenses is a loss, none of the net interest expense will be deductible for tax purposes. Interest on bank loans and interest under financial lease agreements are subject to thin capitalisation regulations only when the agreements are between related parties or guaranteed by or extended at the order of a related party.

The thin capitalisation rules do not apply if the debt-to-equity ratio does not exceed 3:1 for the respective tax period.

Interest expenses restricted in a given year under the thin capitalisation rules may be deducted from the financial result for tax purposes during the following five consecutive years. This reversal may be made up to the tax allowed interest expenses, as per the above formula.

**Other significant items**

Companies may deduct for tax purposes the tax-allowable depreciation costs (booked depreciation costs are added back to the taxable income).

Capital gains from shares in listed public companies, tradable rights in such shares as well as from units of collective investment schemes realised on a regulated stock exchange in the EU/EEA are not recognised for tax purposes.

**Group taxation**

No group consolidation is permitted for tax purposes in Bulgaria. All companies must pay tax on the basis of individually assessable profits and losses.

**Tax incentives**

Tax incentives may apply in certain circumstances, including:

- Performance of agricultural activities (the incentive is awaiting the approval of the European Commission);
- Hiring of long-term unemployed, handicapped or elderly persons; and
- Investment in regions with high unemployment.

**Withholding taxes (WHT)**

*Income subject to withholding tax*

Bulgarian companies are required to withhold tax on payments of dividends and liquidation proceeds; interest (including that incurred under finance lease agreements and on bank deposits); royalties; fees for technical services; payments for the use of properties; payments made under operating leasing, franchising and factoring agreements; and management fees payable to non-residents.

Capital gains from the transfer of shares in a Bulgarian company or immovable property located in Bulgaria realised by a non-resident are also subject to domestic withholding tax, however, the tax is payable by the non-resident. Capital gains from securities are not subject to withholding tax, if result from shares in listed companies and tradable rights in such shares on a regulated securities market in the EU/EEA.
Dividends and liquidation proceeds are taxed also where payments are made to resident individuals and non-profit organisations. *(For details on dividend payments between domestic companies see Inter-company dividends under the Income determination section.)* Dividends capitalised into shares (stock dividends) are not subject to withholding tax.

In addition, Bulgaria has negotiated a transitional period for implementing the Directive 2003/49/EC on a common system of taxation applicable to interest and royalty payments made between associated companies of different EU member states, which abolishes withholding tax on income from interest and royalty payable between EU resident companies. During the transitional period, the tax rate on such income in Bulgaria should not exceed 10% until 31 December 2010 and 5% between 1 January 2011 and 31 December 2014.

Certain types of income (other than dividends) accrued by a PE of a foreign person to other parts of its enterprise located outside the country is subject to withholding tax (except for that mentioned under the “Branch income” category).

**Dividends**

When a dividend is accrued to a non-resident company or a resident individual, it is subject to withholding tax at a rate of 5% unless the rate is reduced by an applicable DTT. No differentiation is made between portfolio and substantial holdings for purposes of this withholding tax on dividends.

Dividends distributed by a Bulgarian resident company to an entity that is a tax resident in an EU/EEA member state are not subject to Bulgarian withholding tax.

**Interest**

A 10% rate applies to interest (including interest from bank deposits) payable to a non-resident, unless the rate is reduced by an applicable DTT.

Interest on borrowings by the government or the Bulgarian National Bank from international financial institutions is not taxable if the respective loan agreements contain relevant exemption arrangements (international treaties override domestic legislation).

**Royalties**

Royalties payable to foreign persons are taxed at a rate of 10% at source unless the rate is reduced by an applicable DTT.

**Capital gains and technical services**

Capital gains and technical service fees payable to foreign residents are subject to 10% withholding tax, unless the rate is reduced by an applicable DTT. As per the domestic legislation, technical services include installation and assembly of tangible assets as well as consultancy services and marketing research.

The following is a summary of the main parameters of the Bulgarian DTTs as of 11 May 2009:

Notes

*Under Bulgarian domestic legislation, dividends distributed to non-residents are subject to 5% withholding tax, unless the recipient is a resident of an EU/EEA member state.

1. The lower rate applies to dividends paid out to a non-resident that is the direct owner of at least USD 40,000 forming part of the capital of the company making the payment.
2. The withholding tax on royalties for use of (or right to use) industrial, commercial or scientific equipment is reduced to 7%.
3. The lower rate applies to dividends paid out to a foreign company that controls directly at least 25% of the share capital of the payer of the dividends. In the specific cases of the different countries, more requirements may be in place.
4. There is no withholding tax on royalties for the use of (or the right to use) scientific or cultural works.
5. The lower rate applies to dividends paid out to a foreign company that controls directly at least 15% of the share capital of the payer of the dividends.
6. There is no withholding tax on interest when paid to public bodies (government, the central bank, and, in several cases, certain governmental bodies).
7. 5% royalties are applicable if the Netherlands applies withholding tax under its domestic law.
8. Up to 10% branch tax may be imposed on PE profits.
9. The 10% rate on capital gains from securities applies in specific cases that are described in the respective treaty.
10. The zero rate on interest applies if the loan is extended by a bank and also for industrial, trade and scientific equipment on credit.
11. The zero rate on interest applies if the interest is paid to public bodies (government, municipality, the central bank or any financial institution owned entirely by the
12. The Council of Ministers has stated its intention to renegotiate the DTTs with Austria, Malta and Finland.

13. A 5% rate on royalties applies if the Swiss Confederation introduces in its domestic law withholding tax on royalties paid to non-residents.

14. The 10% rate on interest applies if the interest is received from a financial institution, including an insurance company.

15. The 5% rate on royalties applies if the royalties are paid for the use of copyright for literary, art or scientific work.

16. The lower rate applies to dividends paid out to a foreign company that controls directly at least 10% of the share capital of the payee of the dividends.

17. The zero rate applies to dividends payable by a Bulgarian resident entity to an entity resident in Malta. The 30% rate applies to dividends payable by a Maltese entity to a Bulgarian entity.

18. There are indications that there may be some amendments to the treaty, which are not yet officially promulgated in Bulgaria.

19. The 10% rate applies to dividends distributed by companies that enjoy a reduced or zero corporate income tax by virtue of a tax incentive for investments. In all other cases the rate is equal to one half of the applicable rate as per the national legislations of Bulgaria and Israel. Nevertheless, the withholding tax rate may not be less than 7.5% or more than 12.5%.

20. The 5% rate applies to interest payable to banks or other financial institutions. The zero rate applies to interest payable to certain public bodies (governments, municipalities, central banks) or to residents of the other country when the loan or credit is guaranteed, insured or financed by a public body of that country or by the Israeli International Trade Insurance Company.

21. The rate on royalties is equal to one half of the applicable rate as per the national legislations of Bulgaria and Israel. Nevertheless, the withholding tax rate may not be less than 7.5% or more than 12.5%.

22. The rate on capital gains from securities is equal to one half of the applicable rate as per the national legislations of Bulgaria and Israel. Nevertheless, the withholding tax rate may not be less than 7.5% or more than 12.5%. However, capital gains from transfers of shares in entities whose real estate properties exceed 50% of their assets are taxed in the country in which the real estate is located.

23. The zero rate applies to dividends and interest paid to certain public governmental and local bodies as well as entities fully owned by the state.

24. The 5% rate on royalties applies if the royalties are paid for the use of copyright for literary, art or scientific work; as well as for the use of industrial, commercial or scientific equipment.

25. There is no withholding tax on interest when paid to and beneficially owned by public bodies (government, local public authorities, the central bank or any financial institution wholly owned by the government), as well as on interest derived on loans guaranteed by the foreign government or based on an agreement between the governments of the states.

26. The 7% rate on royalties applies if the royalties are paid for the use of, or the right to use, cinematograph films and films or tapes for radio or television broadcasting, any patent, trademark, design or model, plan, secret formula or process.

27. The zero rate applies for capital gains from shares in a Bulgarian resident company that are traded on the Bulgarian Stock Exchange.

28. In accordance with the EU Parent-Subsidiary Directive implemented in the Bulgarian legislation, dividends distributed by a Bulgarian resident company to an entity that is a tax resident in an EU member state may not be subject to Bulgarian withholding tax.

29. Full withholding tax at source may be levied on capital gains from the sale of shares in companies, the main assets of which are directly or indirectly holdings in real estate situated in Bulgaria, and in some other cases (subject to the specifics stipulated in the respective treaty).
30. There is no withholding tax on interest when paid to public bodies (government, the central bank, governmental institutions) or any financial institution wholly owned by the government.

31. Pension funds and charities are considered resident persons.

32. The zero rate does not apply to dividends distributed to real estate investment trusts (REITs).

33. The zero rate does not apply to interest paid under a back-to-back loan.

34. The benefits of the treaty are limited to entities that satisfy certain criteria (Limitation of Benefits clause).

35. The 5% rate on royalties applies if the royalties are paid for the use of, or the right to use, any patent, design, model, plan, secret formula, process, or know-how.

Under some DTTs, technical service payments fall within the definition of royalty payments and are taxed accordingly. The Bulgarian government has signed a new DTT with Austria which has not entered into force yet.

**Tax administration**

**Returns**

Annual profit must be declared no later than 31 March of the year following the financial (tax) year. The financial and tax years coincide with the calendar year. Along with their annual corporate income tax returns companies are required to file financial information for their business activities during the year in a standard statistical form not subject to a financial audit. Up until 2008, companies were required to file audited annual financial statements along with their returns but this practice was abolished in 2009. The self-assessment principle is applied.

**Payment of tax**

If a company ended the preceding financial year with a taxable profit, it is liable for advance corporate income tax payments each month in the current year at the rate of 10%. The monthly taxable base for the second, third and fourth quarters is one-twelfth of the annual taxable profit for the preceding year multiplied by a coefficient determined in the State Budget Act for the current year. However, the taxable base for the advance payments during the first quarter is one-twelfth of the taxable profit of the company for the year before the preceding year multiplied by a coefficient defined in the State Budget Act for the current year.

Corporate taxpayers having a tax loss or zero taxable result in the previous year and companies established during the current year make quarterly advance payments during the current fiscal year. The base of the quarterly advance payments is the profit for the corresponding period accumulated from the beginning of the current year.

Companies with a net sales revenue below BGN 200,000 for the preceding year and newly incorporated companies (if not established as a result of a transformation of another entity) are not required to make advance payments of corporate income tax.

Overpayment of corporate tax may be offset against advance and annual payments of the respective taxes due for the next period. The difference between the annual tax declared in the corporate income tax return and the advance tax paid for the corresponding year must be paid by the deadline for submitting the tax return on 31 March of the following year.

Significant developments

Accommodation tax
The accommodation tax is effective from 1 January 2007. The accommodation tax rate is 2% and is imposed on the room charges including all taxes and all other charges except accommodation tax and VAT. Hotel owners or their representatives are required to submit the return on a monthly basis and make lodgement and payment of taxes to the tax department by the fifteenth day of the following month for real regime taxpayers and by the tenth day of the following month for estimated regime taxpayers.

Statutory audit requirement
The Ministry of Economy and Finance (MoEF) issued a Prakas dated 26 July 2007 requiring all enterprises (physical or legal persons) that meet the following criteria to have their financial statements audited by an independent external auditor registered with the Kampuchea Institute of Certified Public Accountants and Auditors (KICPAA):

- Annual turnover above KHR 3,000,000,000;
- Total assets above KHR 2,000,000,000; and
- More than 100 employees.

Qualified Investment Projects (QIP) registered with the Council for the Development of Cambodia (CDC) are required to have their financial statements audited by independent external auditors registered with the KICPAA.

The enterprises and QIP are required to prepare their financial statements in accordance with Cambodian Accounting Standards.

The Prakas does not state the deadline for enterprises and QIP to submit their audited financial statements. However, the deadline for financial statements to be audited is six months after year-end, i.e., for the financial year ending 31 December 2009, the deadline is 30 June 2010.

Taxes on corporate income

Corporate tax
Cambodia's taxation rules vary according to the taxpayer's regime. Real regime taxpayers include large or incorporated taxpayers. The majority of foreign investors will fall into the real regime. Unless otherwise stated, our comments are therefore restricted to real regime taxpayers.
Resident taxpayers are subject to tax on worldwide income/profits while non-residents are taxed on Cambodian sourced income/profits only. Residents earning foreign sourced income can receive credits for foreign taxes paid. A permanent establishment (PE) is taxable on its Cambodian sourced income only.

Resident taxpayers include companies organised, managed or having their principal place of business in Cambodia.

The standard rate of corporate income tax (Tax on profit or ToP) for companies and PEs is 20%. Oil and gas and certain mineral exploitation activities are subject to tax at the rate of 30%. Insurance activities are taxable at a rate of 5% on the gross premium income. QIP are entitled to tax holidays.

**Additional tax on profit on dividend distribution**
The dividend-paying company is required to pay an additional ToP at the time of dividend distribution if the profit was previously subject to a 9% or 0% ToP.

A shareholder is entitled to establish a special dividend account from which the relevant dividend may be paid without further additional ToP obligations.

A dividend will be exempt from tax in the hands of the shareholder if additional ToP and withholding Tax (for non-resident shareholders) has been paid by the company.

**Corporate residence**

Any legal person or pass-through organised or managed in Cambodia, or having its principal place of business in Cambodia is a resident. A PE shall be considered a resident legal person with respect to its Cambodian source income only.

The term legal person means any enterprise or organisation carrying on a business whether or not officially recognised by the competent institutions of the Royal Government. The term legal person includes any government institution, religious, charitable, or non-profit organisation. For a non-resident person, the term legal person means any permanent establishment in Cambodia. The term legal person does not include a pass-through or a sole proprietorship.

**Other taxes**

In addition to the ToP, the following taxes may affect certain investors:

**Minimum tax**
Real-regime taxpayers are subject to a separate minimum tax, unless the taxpayer has been granted the status of a QIP by the CDC. The minimum tax is an annual tax with a liability equal to 1% of the annual turnover of the taxpayer for the year in question. The tax is due irrespective of the taxpayer’s profit or loss position.

If a taxpayer’s ToP liability exceeds the minimum tax, the taxpayer will only pay the ToP, otherwise minimum tax will apply.
Cambodia

**Value-added tax (VAT)**
VAT is applicable to real-regime entities and is charged at 10% on the value of the supply of most goods and services. Exported goods and services rendered outside Cambodia are zero-rated. In addition, 0% VAT applies to the supporting industries or contractors who directly supply goods or services to the export-oriented garment manufacturers, textile and footwear industries. Some supplies are VAT exempt, the main categories being public postal services, medical and dental services, electricity, transportation of passengers by wholly state-owned public transport systems, insurance services and primary financial services. Strict record-keeping requirements exist.

**Specific tax on certain merchandise and services**
The Specific tax is a form of excise tax that applies to the importation or domestic production and supply of certain goods and services. Specific Tax on domestically produced goods is generally applied to the “ex-factory selling price”. The “ex-factory selling price” is defined as 65% of the selling price before VAT and any discount. For imported goods, the tax is due on the CIF (cost, insurance and freight) value inclusive of customs duty. For hotel and telecommunication services, the tax is payable based on the invoice prices. For local and international air transportation of passengers the tax is payable based on the air ticket value issued in Cambodia for travel within and outside Cambodia.

**Import and export duties**
Import duties are levied on a wide range of products at varying rates, although exemptions may be available as an investment incentive. As a requirement of Cambodia’s membership of Association of South East Asia Nations (ASEAN), various import duties have been reduced as part of the Common Effective Preferential Tariffs scheme. Export duties are levied on a limited number of items, such as timber and certain animal products (including most seafood).

**Tax on house and land rent**
Businesses (other than real-regime entities) that rent land, buildings, certain equipment, storage facilities and so forth, are liable for the Tax on house and land rent. The tax is levied at 10% of the rental fee. This tax may not apply where the ToP has been withheld from the rental payment.

**Patent tax**
Registered businesses must pay a (relatively nominal) patent tax on initial business registration and annually thereafter. Patent tax is levied with reference to turnover or estimated turnover.

**Fiscal stamp tax**
Fiscal stamp tax is paid on certain official documents and, perhaps more importantly for foreign investors, certain advertising costs.

**Tax for public lighting (TPL)**
The TPL applies to the distribution of tobacco and alcohol products. TPL is imposed on all chains of supply at the rate of 3% on the value of the taxable products inclusive of other taxes (but not VAT for real-regime taxpayers). The tax is payable on a monthly basis.
**Tax on unused land**

Land in towns and other specified areas that have no buildings, construction sites not in use and even certain built-upon land, is subject to the Tax on Unused Land. The tax is calculated at 2% of the market value of the land per square metre, as determined by the Commission for Evaluation of Unused Land as at 30 June each year. The owner of the land is required to pay the tax by 30 September each year.

**Registration tax (property transfer tax)**

The transfer of title of certain assets (such as land and vehicles) is subject to registration tax, which is generally levied at 4% of the transfer value.

**Tax on means of transportation**

This tax imposes a number of statutory fees on the registration of certain vehicles used to transport goods including trucks, buses, motor vehicles and ships.

**Branch income**

Tax rates for branch income are the same as those for corporate profits.

**Income determination**

**Inventory valuation**

Inventory can be valued at weighted-average cost, first-in, first-out (FIFO) or current value at the close of the period, where this value is lower than the purchase price or production cost. Work-in-progress should be valued at production costs.

**Capital gains**

Capital gains form part of taxable profit.

**Inter-company dividend**

Inter-company dividends may be exempted (*see Withholding tax section*).

**Foreign income**

Residents are taxed on their worldwide income/profits. Tax credits are available for foreign taxes suffered.

**Deductions**

**Depreciation**

Property should be depreciated at rates according to four classes of assets as specified in the tax legislation. Land is not considered a depreciable asset. The straight-line or the declining-balance method is specifically required to be used for each class of assets. Special depreciation is available to assets purchased by a QIP and used in manufacturing and processing. The special depreciation regime allows the use of 40% depreciation in the year of purchase or first year of use of assets.

**Net operating losses**

Tax losses may be carried forward for up to five years subject to certain criteria. The criteria include:

- The loss must be recorded in the ToP return and submitted to the tax department on time;
Cambodia

- The business objective of the company has not changed; and
- The ownership of the company has not changed. The tax regulations contain various provisions indicating that losses will be forfeited if there is a change of ownership of a company. However, the tax regulations do not provide clear guidance on what constitutes “a change in ownership”.

In addition, a tax loss carried forward cannot be used if a company is subject to a unilateral tax reassessment during a tax audit. The tax department can issue a unilateral reassessment if there is evidence of obstruction of the tax laws. Losses cannot be carried back.

Payments to foreign affiliates
Certain losses incurred on sales to (51%) related parties are non-deductible. Other transfer pricing provisions are present where there is 20% common ownership.

Taxes
Non-deductible taxes include taxes that are not a charge to the enterprise (e.g., withholding taxes and ToP).

Other significant items
Interest deductibility in any year is limited to the amount of interest income plus 50% of the net profits excluding interest income and interest expense. The excess non-deductible interest expense can be carried forward to the following tax years indefinitely.

Group taxation
There is no provision for group taxation.

Tax incentives

Inward investment
Most investments will require registration with the Ministry of Commerce (MoC) and other relevant ministries. The Council for the Development of Cambodia (CDC) may also be approached for purposes of seeking investment incentives. CDC licensing is however, not mandatory (except for certain large or politically sensitive projects) and may in fact not be possible for projects that fall within the Negative List, i.e., trading activities, import and export, any transportation services (except for the railway sector), currency and financial services, production of tobacco products, provision of value-added services of all kinds, telecommunication services and real estate development. The investment incentives available have been significantly changed following the implementation of the New Law on Investment. The current investment incentives include ToP holiday of up to six years, import duty exemptions and exemption from minimum tax.

Under the New Law on Investment, all QIP registered with the CDC are required to obtain a certificate of compliance from the CDC on an annual basis in order to continue enjoying the investment incentives.

Capital investment
There are no tax incentives for capital investment in Cambodia.
Withholding taxes (WHT)

WHT only needs to be withheld on payments made by resident taxpayers. The WHT constitutes a final tax when withheld for payments to non-residents/residents.

WHT must be remitted by the payer on a monthly basis, by the fifteenth day of the succeeding month.

At the time of writing Cambodia had not negotiated any double taxation agreements.

Tax administration

Returns and payment of tax

Returns for the Tax on Profit are to be filed annually within three months of year-end. The standard tax year is the calendar year, although different accounting year-ends may be granted upon application. 1% Prepayments of Tax on Profit are due on a monthly basis, by the fifteenth day of the succeeding month.

Cambodian incorporated companies are technically required to adopt the Cambodian Accounting Standard, which is similar to International Accounting Standards, as their accounting system.

Significant developments

No significant tax or regulatory developments have taken place regarding corporate taxation in the past year.

Taxes on corporate income

Taxable profits
Cameroon corporate tax rate is 38.5%. The 38.5% corporate tax rate is 35% + 10% surcharge.

The basic corporate tax rate of 35% is reduced to 30% for companies during their first three years of listing on the national stock exchange of Cameroon.

The minimum tax is 1.1% based on the turnover.

The profits subject to the company tax are determined with sole regard to profits earned by businesses carried on or transactions effected in Cameroon.

The net taxable profits are established after deduction of all charges directly entailed by the exercise of activities subject to assessment in Cameroon.

Corporate residence

Resident corporations in Cameroon are taxed on their worldwide income; non-resident corporations are taxed only on Cameroon source income.

An entity is deemed resident if its registered office, centre of activity or management is located in Cameroon or if it has resident employees in Cameroon that provide services to customers.

Other taxes

Value-added tax (VAT)
VAT shall be levied on natural persons or corporate bodies which automatically, habitually or occasionally carry out taxable transactions consisting of provisions of services or sales of goods.

The standard VAT in Cameroon is 19.25%. This is a 17.5% basic tax rate plus 10% surcharge. Exports are zero VAT rated. An excise duty to the rate of 25% is applicable.
to the cigarettes, drinks, cosmetics or products known as of luxury: jewels, precious stones. A reduced rate of excise duty (12.5%) shall apply to soft drinks and private vehicles with engine capacities of 2 000 cm³.

The VAT paid upstream is recoverable, except where otherwise stated.

**Business licence tax**  
Any natural person or corporate body carrying on trade, industry or profession in Cameroon shall be liable to a business licence tax. The business licence is paid annually according to a graduated scale. The tax is assessed on turnover.

New enterprises shall be exempt from the payment of the business licence during the first two years of operation.

**Registration duty**  
The registration duty applies to certain deeds listed by the general tax code. The assessment basis depends on the nature of transactions and the rate varies from 1% to 15%.

**Social security contributions**  
Employer and employee must contribute on a monthly basis to Cameroon’s National Social Insurance Fund 11.2% and 2.8%, respectively. The basis of contribution is capped at XAF 300, 000 per month. Employers in Cameroon must also contribute 1.75%, 2.5% or 5% of total salaries, depending on the risk category of activities performed by employees. The calculation basis in this category is the gross salary including the benefits in kind assessed for their actual amount.

**Capital duty**  
The formation of a company and subsequent capital increases in Cameroon are not subject to registration duties. This exemption has been provided by the Finance Law for 2010.

**Payroll tax**  
Employers in Cameroon are required to make monthly contributions of 2.5% of the total amount of salaries and fringe benefits of their employees to the Housing Loan and Employment Fund of Cameroon.

**Real property tax**  
Cameroon property tax is payable annually on real estate with or without an ownership certificate or an administrative or judicial order issued. Tax is charged at 0.1% of the assessed property value, with the usual 10% local tax.

**Transfer tax**  
The sale of a business in Cameroon is subject to a transfer tax rate of 15%.

**Branch income**  
The local branch of any foreign company is taxed at the same rate as a company. The net profits (after corporate income tax) of entities having their residence or head office outside Cameroon (such as the branch of a foreign company) are assumed to be distributed each fiscal year to companies not located in Cameroon.
Income determination

Inventory valuation
Stocks shall be valued at cost price; however, if the market price is lower than the cost price, the undertaking shall make provisions for depreciation of inventory.

Capital gains
Capital gains are normally taxed at full corporate rates.

Inter-company dividends
Subject to international conventions, inter-company dividends are subject to a 16.5% withholding tax.

Foreign income
As matter of both fact and law, except in a few cases, revenue from entities located outside Cameroon but earned by corporate bodies situated in Cameroon shall be subject to the corporate income tax in Cameroon.

Stock dividends
Subject to international conventions, stock dividends shall be subject to a 16.5% withholding tax.

Deductions

Depreciation and depletion
Depreciation is generally computed on a straight-line basis over the useful life according to the rates provided for by the Tax Code, including those which might have already been deferred in times of deficit.

The following depreciation rates are generally accepted for tax purposes:

- Construction – the rates vary from 5% to 20%.
- Stationary equipment and tools – the rates vary from 5% to 20%.
- Portable equipment – the rates vary from 10% to 100%.
- Transport equipment – the rates vary from 10% to 33.33%.
- Railway lines – the rates vary from 1% to 10%.
- Engines – the rate is 5%.
- Rehabilitation – the rates vary from 5% to 25%.
- Furniture fittings and other equipment – the rates vary from 10% to 33.33%.
- Fishing equipment and fishing vessels – 15%.

The deduction of depreciation can be carried forward indefinitely.

Net operating losses
Any loss sustained in a given year can be carried forward up to the fourth year following the recording of the loss.

Payments to foreign entities
Head office overhead expenses for operations carried out in Cameroon and the remuneration of certain effective services (studies, technical, financial or accounting assistance) provided to Cameroonian firms by foreign natural persons or corporate
bodies are not totally deductible. Fees paid are deductible up to a maximum of 10% of the taxable profit before deducting the expenses concerned.

**Group taxation**

There is specific taxation of groups within the Economic and Monetary Community of Central Africa (CEMAC) area.

Where a joint stock company and a private limited company own either registered stock in a joint stock company or shares in a private limited company, the net proceeds of the share in the second company paid to the first during the financial year shall be deducted from the total net profit of the latter, less a percentage for costs and charges. This percentage is fixed at 10% of the total amount of the proceeds. This system shall apply in the following circumstances:

- When the stocks or shares owned by the parent establishment represents at least 25% of the capital of the subsidiary firm;
- When the parent and subsidiary firms have their registered office in a CEMAC state (Cameroon, Central African Republic, Chad, Gabon, Equatorial Guinea and Republic of Congo); and
- When the stocks or shares allotted at the time of issue are still registered in the name of the participating company which undertakes to retain them for at least two consecutive years in registered form.

**Tax incentives**

Three major tax incentives are granted in Cameroon under the tax systems.

**The system of reinvestment relief**

Any natural person or corporate body reinvesting in Cameroon may be granted, under certain conditions, a reduction in company tax or personal income tax.

The reinvestment must take a form described by the general tax code as construction or extension of permanent buildings for industrial, agricultural, forestry, tourism or mining purposes, including technical offices, housing salaried workers free of charges, etc.

Note that, total investment less than XAF 25,000,000 are not eligible for reinvestment relief.

The reinvestment relief consists of deduction from the taxable basis an amount equal to 50% of the investment effected by the undertaking and approved by the tax authorities.

**The special fiscal regime for structuring projects**

This regime applies to major enterprises with annual turnover not less than XAF 1 billion and small- and medium-sized enterprises with annual turnover of less than XAF 1 billion.
Cameroon, Republic of

The tax incentives consist of:

- Exemption from payment of the business license tax for the first two years of operation;
- Fixed registration fee of XAF 50,000 for transfers of real estate which directly concern the establishment of the project;
- Exemption from payment of VAT on local purchases of building materials and on imports related to the establishment of the project; and
- Extension of the carryover period for deficits from four to five years.

A taxpayer must apply, required conditions must be met and authorisation must be issued for this tax incentive to be granted.

The system applicable to the exchange sector
Companies whose ordinary shares are listed on the Cameroon Stock Exchange shall be entitled to the following company tax reductions:

- 20% for a period of three years for capital increases which represent at least 20% of the share capital;
- 25% for a period of the three years for capital increases or transfers of shares which represent at least 20% of the share capital; and
- 28% for a period of three years from the date of listing for capital increases or transfers of shares which represent less than 20% of the share capital.

Companies whose ordinary shares are listed on the bond market in Cameroon shall be entitled to pay company tax at a reduced rate of 30% for three years, effective from the date of listing.

Withholding taxes (WHT)
A special tax is levied at an overall discharging rate of 15% on income paid to natural persons and corporate bodies domiciled outside of Cameroon by enterprises or establishments based in Cameroon for various services provided or used in Cameroon. The tax is withheld at source by the Cameroonian entity which pays the remuneration.

Dividends
A withholding tax of 16.5% (15% withholding tax plus 10% surcharge) applies to dividends paid to both Cameroon residents and non-residents. The tax rate may be reduced under an applicable tax treaty.

Interest
The payment of 16.5% withholding tax on interests from foreign loans has been suspended by decree N° 76-64 dated February 1976.

Royalties
Royalties paid to non-residents are subject to a 15% withholding tax (the 10% local tax is not applicable). The tax rate may be reduced under an applicable tax treaty.

Tax treaties
Cameroon has tax treaties with France, Canada, Tunisia and States members of CEMAC (Cameroon, Gabon, Equatorial Guinea, Congo, Chad and Central African Republic).
**Tax administration**

**Payment of taxes and tax return (corporate tax)**
An instalment representing 1.1% of turnover realised during each month shall be paid to the tax authorities not later than the fifteenth of the following month.

Advance payment of 1% on imports or purchases of goods for resale is withheld at source by the supplier.

The balance is paid at the latest on 15 March following the fiscal year-end when submitting the tax return.

On or before 15 March, taxpayers are expected to submit to the tax administration the annual return of revenue derived from their business venture during the period serving as tax base.

This return must be presented in conformity with the Organisation for the Harmonisation of Business Law in Africa (OHADA) accounting system.

The tax year in Cameroon is the calendar year.

**Tax credit**
A surplus tax payment can be offset against future taxes of the same nature to be paid. For the specific case of VAT, a reimbursement process is provided for by the General Tax Code under certain conditions.

Taxes paid abroad are not considered as tax credits unless provided as such by international tax treaties.

Significant developments

Canada’s corporate summary includes all 2010 federal, provincial and territorial budgets. The numerous tax changes this year, many of a highly technical nature, may affect taxpayers engaged in international transactions. Other measures enhance targeted programmes, such as film and media tax credits and incentives for scientific research and experimental development. The summary is based on enacted and proposed legislation and assumes that the proposed legislation will become law.

Corporate income tax rates
Federal corporate income tax rates decreased commencing 2008, and will continue to decline gradually until 2012. Provincial corporate rates tend to be on the decline.

Capital tax
All provincial general capital taxes are scheduled to be eliminated by 1 July 2012.

Taxable Canadian property
Commencing 5 March 2010, taxable Canadian property will exclude shares of corporations, and certain other interests, that do not derive their value (over a 60-month look-back period) principally from real or immovable property situated in Canada, Canadian resource property, or timber resource property. Therefore, with some exceptions, non-residents will no longer be required to report dispositions of these properties and obtain a clearance certificate.

Stock options
Significant changes to the rules for stock options permit only the employer or employee (not both) to claim a tax deduction for cashed-out stock options and eliminate employee elections to defer the payment of tax on stock option benefits until the shares are sold (relief may be available). The changes also eliminate the undue hardship exemption for withholdings on stock option benefits and require withholdings in connection with these benefits after 2010. Grandfathering rules may apply.

Tax avoidance
A proposed regime will make an “avoidance transaction” that meets certain conditions a “reportable transaction” that must be reported to the Canada Revenue Agency. The proposals (as modified to reflect public consultations) will apply to transactions entered into after 2010, and those that are part of a series of transactions completed after 2010.
Non-resident trusts (NRTs) and foreign investment entities (FIEs)
The 2010 federal budget announced that the draft rules for NRTs and FIEs will be somewhat simplified and better targeted. The revised proposals will be subject to further public consultation. The NRT rules generally will apply commencing 2007; trusts subject to the draft rules will be considered resident for Canadian income tax purposes. An election will allow a trust to elect to be deemed resident for the 2001 and subsequent years.

The FIE rules have been essentially eliminated. The enacted version of the rules for offshore investment funds property will continue to apply, with some modifications, for taxation years ending after 4 March 2010. A taxpayer that filed under the FIE proposals for previous years can either have those years reassessed or be entitled to a deduction in the current year for the income previously included.

Specified investment flow-throughs (SIFTs)
Certain earnings of SIFTs (i.e., publicly traded income trusts and partnerships) are subject to a SIFT tax and are deemed to be a dividend when distributed. These rules apply starting the 2007 taxation year, for SIFTs first publicly traded after 31 October 2006, and starting the 2011 taxation year, for other SIFTs. New rules facilitate the conversion of SIFT trusts into corporations, generally for transactions that occur after 13 July 2008 and before 2013.

Group taxation
The federal government will consider whether the tax system could be improved by new rules for the taxation of corporate groups, such as the introduction of a formal system of loss transfers or consolidated reporting.

International Financial Reporting Standards (IFRS)
Canada will move to IFRS from Canadian generally accepted accounting principles (GAAP), which could affect the measurement and reporting of income taxes for financial statement purposes and the calculation of Canadian taxes payable. Canada’s adoption of IFRS is effective for fiscal years beginning after 31 December 2010, with earlier adoption permitted in certain circumstances. IFRS will be mandatory for “publicly accountable enterprises” and elective for other enterprises.

Provincial sales tax harmonisation
On 1 July 2010, provincial sales tax in British Columbia and Ontario will be harmonised with the federal goods and services tax (GST).

Taxes on corporate income

Federal income tax
The following rates apply for 31 December 2010 year-ends. For non-resident corporations, the rates apply to business income attributable to a permanent establishment in Canada. Different rates may apply to non-resident corporations in other circumstances. Non-resident corporations may also be subject to branch tax (see below).

### Notes

1. The basic rate of federal tax is reduced by a 10% abatement to give the provinces and territories room to impose corporate income taxes. The abatement is available in respect of taxable income allocated to Canadian provinces and territories. Taxable income allocable to a foreign jurisdiction is not eligible for the abatement and normally is not subject to provincial or territorial taxes.

2. The general rate reduction does not apply to the first CAD 500,000 of active business income earned in Canada by Canadian-controlled private corporations (CCPCs), investment income of CCPCs, manufacturing and processing (M&P) income, income of credit unions, most deposit insurance corporations, mutual fund corporations, mortgage investment corporations and investment corporations, which may benefit from preferential tax treatment.

3. The general rate reduction and M&P deduction increased from 9% to 10% on 1 January 2010, and will increase to 11.5% on 1 January 2011 and to 13% on 1 January 2012.

4. Provincial taxes apply in addition to federal taxes. Provincial tax rates are noted below.

5. For small CCPCs, a federal rate of 11% applies to the first CAD 500,000 of active business income. A federal rate of 18% (19% before 2010) is levied on active business income above CAD 500,000. Investment income (other than most dividends) of CCPCs is subject to tax at the federal rate of 28%, in addition to a refundable federal tax of 6-2/3%, for a total federal rate of 34.7%.

### Provincial/territorial income tax

All provinces and territories impose income tax on income allocable to a permanent establishment in the province or territory. Generally, income is allocated to a province or territory by using a two-factor formula based on gross revenue and on salaries and wages. Provincial and territorial income taxes are not deductible for federal income tax purposes. The rates given apply to 31 December 2010 year-ends. The rates do not take into account provincial tax holidays, which reduce or eliminate tax in limited cases.

</tr>
</tbody>
</table>
Notes

1. When two rates are indicated, the lower rate applies to M&P income.
2. In all provinces and territories, the first CAD 500,000 (CAD 400,000 in some jurisdictions) of active business income of a small CCPC is subject to reduced rates that range from 0.9% to 8.0%, depending on the jurisdiction. British Columbia, Manitoba, Newfoundland and Labrador, Nova Scotia, Ontario and Prince Edward Island intend to decrease their rates for small CCPCs.
3. British Columbia’s rate decreased from 11% to 10.5% on 1 January 2010 and will decrease to 10% on 1 January 2011.
4. Manitoba’s rate decreased from 13% to 12% on 1 July 2009, and subject to balanced budget requirements, will decrease to 11% at a date to be determined.
5. New Brunswick’s rate decreased from 13% to 12% on 1 July 2009, and will decrease to 11% on 1 July 2010, to 10% on 1 July 2011 and to 8% on 1 July 2012.
6. The lower Ontario rate applies to profits from manufacturing and processing, and from farming, mining, logging and fishing operations carried on in Canada and allocated to Ontario. This rate will decrease from 12% to 10% on 1 July 2010. Ontario’s non-M&P rate will decrease from 14% to 12% on 1 July 2010, to 11.5% on 1 July 2011, to 11% on 1 July 2012 and to 10% on 1 July 2013.
Corporations subject to Ontario income tax may also be liable for corporate minimum tax (CMT) based on adjusted book income. The CMT is payable only to the extent that it exceeds the regular Ontario income tax liability. The CMT rate will decrease from 4% to 2.7% on 1 July 2010 and the CMT thresholds will increase as shown in the following table:

<table>
<thead>
<tr>
<th>Taxation years ending</th>
<th>before 1 July 2010</th>
<th>after 30 June 2010</th>
</tr>
</thead>
<tbody>
<tr>
<td>Thresholds for CMT to apply*</td>
<td>Total Assets &gt; CAD 5 million or and Annual gross revenues &gt; CAD 10 million</td>
<td>Total Assets &gt; CAD 50 million or and Annual gross revenues &gt; CAD 100 million</td>
</tr>
</tbody>
</table>

* Thresholds apply on an associated basis.

7. Saskatchewan’s M&P rate is as low as 10% (reduced from the 12% non-M&P rate), depending on the extent to which the corporation’s income is allocated to the province.

**Corporate residence**

As a general rule, corporations resident in Canada are subject to Canadian income tax on worldwide income. As a result of special provisions in the Income Tax Act, almost all corporations incorporated in Canada are resident in Canada. A corporation not incorporated in Canada may be considered resident in Canada if its central management and control are exercised in Canada.

A corporation incorporated in Canada will cease to be a Canadian resident if it is granted articles of continuance in a foreign jurisdiction or if it is a predecessor corporation in a cross-border amalgamation. Similarly, a foreign corporation will become resident in Canada if it is continued in Canada or is a predecessor corporation of an amalgamated corporation that is resident in Canada.

Non-resident corporations are subject to income tax on income derived from carrying on a business in Canada and on capital gains arising upon the disposition of taxable Canadian property. The purchaser of the taxable Canadian property is generally required to withhold tax from the amount paid unless the non-resident vendor has obtained a clearance certificate.
Taxable Canadian property includes, among other things, real or immovable property situated in Canada, both capital and non-capital property used in carrying on a business in Canada and shares in Canadian-resident corporations that are not listed on a stock exchange. In certain circumstances, shares in Canadian-resident corporations that are listed on a stock exchange, shares in non-resident corporations and interests in non-resident trusts will be considered taxable Canadian property. However, commencing 5 March 2010, taxable Canadian property will exclude shares of corporations, and certain other interests, that do not derive their value (over a 60-month look-back period) principally from real or immovable property situated in Canada, Canadian resource property, or timber resource property. Therefore, with some exceptions, non-residents will no longer be required to report dispositions of these properties and obtain a clearance certificate.

Withholding tax at a rate of 25% is imposed on interest (other than most interest paid to arm’s-length non-residents, commencing 2008), dividends, rents, royalties, certain management and technical service fees, and similar payments, made by a Canadian resident to a non-resident of Canada.

Canadian income tax and withholding tax can be reduced or eliminated if Canada has a treaty with the non-resident’s country of residence. A list of treaties that Canada has negotiated and applicable withholding tax rates is provided under “Withholding taxes arising in Canada”, below.

Other taxes

Goods and services tax
The federal goods and services tax (GST) is levied at a rate of 5%. It is a value-added tax applied at each level in the manufacturing and marketing chain and applies to most goods and services. However, the tax does not apply to sales of zero-rated goods, such as exports and groceries, or to tax-exempt supplies, such as certain services provided by financial institutions.

Generally, businesses pay GST on their purchases and charge GST on their sales, and remit the net amount (i.e., the difference between the GST collected and the input tax credit for the tax paid on purchases). Suppliers are entitled to claim input tax credits on zero-rated goods and services, but not on tax-exempt supplies.

Harmonised sales tax
Newfoundland and Labrador, New Brunswick and Nova Scotia harmonised their sales tax systems with the GST and impose a single sales tax rate of 13% (15% in Nova Scotia starting 1 July 2010). The 13% rate includes an 8% provincial sales tax component (10% in Nova Scotia starting 1 July 2010) and the 5% GST. It is imposed on essentially the same base as the GST. On 1 July 2010:

• In British Columbia, the 7% Social Services Tax and the 5% federal GST will be replaced with a 12% harmonised sales tax; and
• In Ontario, the 8% Retail Sales Tax and the 5% federal GST will be replaced with a 13% harmonised sales tax.

Transitional rules will apply in British Columbia and Ontario.
Retail sales tax
British Columbia, Manitoba, Ontario, Prince Edward Island and Saskatchewan levy retail sales tax at rates ranging from 5% to 10% on most purchases of tangible personal property for consumption or use in the province and on the purchase of specific services. As mentioned, on 1 July 2010, retail sales tax in British Columbia and Ontario will be replaced with the harmonised sales tax.

Quebec’s sales tax is structured essentially in the same way as the GST. Quebec has widened its sales tax base to include most of the goods and services subject to the GST. The general Quebec sales tax rate is 7.5% (8.5% in 2011 and 9.5% after 2011). Quebec administers the GST in that province.

Only Prince Edward Island and Quebec levy their sales tax on prices that include the GST.

Property tax
Property taxes are levied by municipalities in Canada on the estimated market value of real property within their boundaries and by provinces on land not in a municipality. In most provinces, a general property tax is levied on the owner of the property. Some municipalities levy a separate business tax, which is payable by the occupant if the premises are used for business purposes. These taxes are based on the assessed value of the property at tax rates that are set each year by the various municipalities. School taxes, also generally based on the value of real property, are levied by local and regional school boards or the province.

Land transfer tax
All the provinces and territories levy a land transfer tax or registration fee on the purchaser of real property within their boundaries. These levies are expressed as a percentage, primarily on a sliding scale, of the sale price or the assessed value of the property sold, and are generally payable at the time title to the property is registered. Rates generally range from 0.02% to 2%, depending on the province or territory, but may be higher if the purchaser is a non-resident. Some exemptions (or refunds) are available. Additional land transfer taxes apply for properties purchased in the municipalities of Montreal or Toronto. Other municipalities may also impose these taxes and fees.

Federal capital taxes
The federal Large Corporations Tax (Part I.3 Tax) was eliminated on 1 January 2006. The Financial Institutions Capital Tax (Part VI Tax) is imposed on banks, trust and loan corporations and life insurance companies at a rate of 1.25% when taxable capital employed in Canada exceeds CAD 1 billion. The tax is not deductible in computing income for tax purposes. It is reduced by the corporation’s federal income tax liability. Any unused federal income tax liability can be applied to reduce Part VI Tax for the previous three and the next seven years. Unused income taxes that can be carried back from taxation years ending after 30 June 2006 are calculated using capital tax rates and thresholds that applied before 1 July 2006 (i.e., 1.25% rate for capital over CAD 300 million; 1% between CAD 200 million and CAD 300 million; nil below CAD 200 million). The thresholds are shared among related financial institutions. In effect, the tax constitutes a minimum tax on financial institutions.
Canada

**Provincial capital taxes**

Every province, except Alberta, imposes a tax on capital employed within the province. The tax is deductible for federal income tax purposes. The federal government has proposed to limit the deductibility of capital taxes, but has delayed implementing this proposal indefinitely. As an interim measure, any increase in these taxes, with certain exceptions, is not deductible. Furthermore, the federal government has proposed to provide financial incentives to provinces that eliminate their capital taxes before 1 January 2011.

Provincial capital taxes are imposed at the following rates for 31 December 2010 year-ends. Certain exemptions and reduced rates apply.

**Notes**

1. British Columbia’s financial institutions capital tax was eliminated on 1 April 2010. On 1 April 2009, for financial institutions with either a head office in British Columbia or net paid-up capital of CAD 1 billion or less, the rate decreased from 0.67% to 0.33% and for other financial institutions, the rate decreased from 2% to 1%. A financial institutions minimum tax that was to apply starting 1 April 2010, will not come into effect.

2. Manitoba’s general rate decreased from 0.3% to 0.2% for taxation years commencing after 1 January 2010, and will be eliminated on 1 January 2011. These changes do not apply to Crown corporations, for which the rates will remain 0.3%, nor to certain manufacturing and processing companies for which capital tax was eliminated on 1 July 2008. Other rates apply to the first CAD 21 million of taxable capital employed in Manitoba.

3. Nova Scotia’s general rate decreased from 0.2% to 0.15% on 1 July 2009, and will decrease to 0.1% on 1 July 2010 and to 0.05% on 1 July 2011. These rates are doubled for corporations with taxable capital under CAD 10 million. The general capital tax will be eliminated on 1 July 2012.

4. Ontario’s general capital tax was reduced or eliminated for certain manufacturing and resource corporations on 1 January 2007. On 1 January 2010, Ontario’s general rate decreased from 0.225% to 0.15%, and its financial institutions rate decreased from 0.675% (deposit-taking institutions) and 0.54% (other) to 0.45% and 0.36%, respectively. Lower rates apply to financial institutions with taxable capital of CAD 400 million or less. Capital tax will be eliminated for all corporations on 1 July 2010.

5. Quebec’s general rate decreased from 0.24% to 0.12% on 1 January 2010, and will be eliminated on 1 January 2011. In addition, capital tax was reduced or eliminated for certain manufacturing corporations, commencing with taxation years ending after 13 March 2008. Quebec’s financial institution rate of 0.49% includes a 0.24% base rate and a 0.25% compensatory tax on paid-up capital. A compensatory tax of 3.9% (2% for taxation years ending before 31 March 2010 or beginning after 31 March 2014) on payroll also applies.
Quebec’s base rate decreased from 0.48% to 0.24% on 1 January 2010, and will be eliminated on 1 January 2011.

6. Saskatchewan’s rate for financial institutions that have taxable paid-up capital of CAD 1.5 billion or less is 0.7%.

Additional taxes on insurers
All provinces and territories impose a premium tax ranging from 2% to 4.4% on insurance companies (both life and non-life). In addition, Manitoba and Nova Scotia impose a capital tax on all insurance companies, while Ontario and Quebec impose a capital tax on life insurance companies only. Quebec also levies a compensatory tax on insurance premiums at a rate of 0.55% (0.35% for taxation years ending before 31 March 2010 or beginning after 31 March 2014).

Part III.1 tax on excess designations
Federal Part III.1 tax applies at a 20% or 30% rate if, during the year, a CCPC designated as eligible dividends an amount that exceeds its general rate income pool (GRIP), or a non-CCPC pays an eligible dividend when it has a positive balance in its low rate income pool (LRIP). A corporation subject to Part III.1 tax at the 20% rate (i.e., the excess designation was inadvertent) can elect, with shareholder concurrence, to treat all or part of the excess designation as a separate non-eligible dividend, in which case Part III.1 tax will not apply to the amount that is the subject of the election.

Eligible dividends are designated as such by the payor and include dividends paid by:

- Public corporations or other corporations that are not CCPCs, that are resident in Canada and are subject to the federal general corporate income tax rate (i.e., 18% in 2010); or
- CCPCs, to the extent that the CCPC’s income is:
  - Not investment income (other than eligible dividends from public corporations); and
  - Subject to the general federal corporate income tax rate (i.e., the income is active business income not subject to the federal small business rate).

Non-eligible dividends include dividends paid out of either income eligible for the federal small business rate or a CCPC’s investment income (other than eligible dividends received from public companies).

Provincial payroll taxes
Employers in Manitoba, Newfoundland and Labrador, Ontario and Quebec are subject to payroll tax. Maximum rates range from 1.95% to 4.3%. In addition, Quebec employers with payroll of at least CAD 1 million must allot 1% of payroll to training or to a provincial fund. Employers in the Northwest Territories and Nunavut must deduct from employees’ salaries a payroll tax equal to 2% of employment earnings.

Social security taxes
For 2010, employers are required to pay, for each employee, government pension plan contributions up to CAD 2,163.15 and employment insurance premiums up to CAD 1,046.30. However, Quebec employers contribute, per employee, a maximum of CAD 822.53 in employment insurance premiums and up to CAD 442.50 to a Quebec parental insurance plan.
Excise taxes and duties
Excise duties are levied at various rates on alcohol, alcoholic beverages (other than wines) and tobacco products manufactured in Canada, while imports are subject to customs duties (see below).

Excise tax is imposed on petroleum products and automobiles. In addition, a 10% federal excise tax applies to insurance premiums paid or payable by a Canadian resident to an insurer that is not authorised under Canadian or provincial law to transact the business of insurance. Certain premiums are exempt, including those for life, personal accident, marine and sickness insurance.

Custom duties
Custom duties are generally intended to protect Canadian industry from foreign competition and not as a source of revenue. The majority of most-favoured-nation (MFN) duty rates are below 10%; notable exceptions are textiles and apparel and certain food products (the latter is subject to “tariff rate quotas”). Many products are duty-free regardless of their country of origin. Goods imported from developed countries with which Canada does not have trade agreements will attract the MFN duty rate.

Qualifying goods that originate in the North American Free Trade Agreement (NAFTA) territory (Canada, the United States and Mexico) can enter Canada duty-free. Canada has implemented free trade agreements (FTAs) with several other countries (i.e., Chile, Costa Rica, the European Free Trade Association countries, Israel, Peru) and has signed or is negotiating agreements with several other countries. Like the NAFTA, these agreements set out rules of origin for determining whether the goods are eligible for preferential duty rates under the particular FTA.

Canada extends preferential duty rates to most (but not all) products imported from developing countries (the General Preferential Tariff) and has granted further concessions to goods originating in Least-Developed Developing Countries. In either case, goods must satisfy rules of origin and be shipped directly to Canada from the beneficiary countries to qualify for these rates. Canada applies the general duty rate of 35% to only two countries (North Korea and Libya).

Branch income
A non-resident corporation will be subject to income tax at normal corporate rates on profits derived from carrying on a business in Canada. However, Canada’s tax treaties generally restrict taxation of a non-resident’s business income to the portion allocable to a permanent establishment located in Canada.

In addition, a special 25% “branch tax” applies to a non-resident’s after-tax profits that are not invested in qualifying property in Canada. The branch tax essentially is equivalent to a non-resident withholding tax on funds repatriated to the foreign head office. In the case of a company resident in a treaty country, the rate at which the branch tax is levied may be reduced to the withholding tax rate on dividends prescribed in the relevant tax treaty (generally 5%, 10% or 15%). Some of Canada’s treaties prohibit the imposition of branch tax or provide that branch tax is payable only on earnings in excess of a threshold amount. The branch tax does not apply to transportation, communications and iron-ore mining companies. Nor does it apply to non-resident insurers, except in special circumstances.
Whether or not a treaty applies, a non-resident corporation that has a permanent establishment in Canada may be subject to federal capital taxes (i.e., financial institutions capital tax) and provincial capital taxes (see Provincial capital taxes under Other taxes above).

**Income determination**

**Inventory valuation**
In most cases, all property included in an inventory can be valued at fair market value, or each item can be valued at its cost or fair market value, whichever is lower. Most well-established and reasonable approaches to inventory costing can be used for tax purposes, except for the last-in, first-out (LIFO) method. Conformity between methods used for book and tax reporting is not mandatory, but the method chosen should be used consistently for tax purposes. Inventory must be valued at the commencement of the year at the same amount as at the end of the immediately preceding year.

**Capital gains**
Half of a capital gain constitutes a taxable capital gain, which is included in the corporation’s income and taxed at ordinary rates. Capital losses are deductible, but generally only against capital gains. Any excess of allowable capital losses over taxable capital gains in the current year can be carried back three years and forward indefinitely, to be applied against net taxable capital gains from those years, except in the case of an acquisition of control. No particular holding period is required. Intent is a major factor in determining whether the gain or loss is income or capital in nature. Complex transitional rules ensure that gains and losses accrued to the end of 1971 have no tax effect. Capital gains were not taxable before 1972.

**Interest, rents and royalties**
Interest that accrued, became receivable by or was received by a corporation, and rents and royalties received by a corporation are taxable as income from a business or property, as the case may be.

**Inter-company dividends**
Dividends received by one Canadian corporation from another Canadian corporation generally can be deducted in full in determining taxable income. However, dividends on certain preferred shares are an important exception and are taxed at full corporate rates. The intent is to allow preferred share investors to transfer benefits of accumulated deductions or losses from the entity that incurred the expense.

Dividends on most preferred shares are subject to a 10% tax in the hands of the recipient, unless the payer elects to pay a 40% tax (instead of a 25% tax) on the dividends paid. The payer can offset the tax against its income tax liability. The tax is not imposed on the first CAD 500,000 of taxable preferred-share dividends paid in a taxation year. Nor does it apply to dividends paid to a shareholder with a “substantial interest” in the payer (i.e., at least 25% of the votes and value).

Dividends received by private corporations (or public corporations controlled by one or more individuals) from Canadian corporations are subject to a special refundable tax of 33¹/₃%. The tax is not imposed if the recipient is connected to the payer (i.e., the recipient owns more than a 10% interest in the payer) unless the payer was entitled to a refund of tax in respect of the dividend. When the recipient pays dividends to its shareholders, the tax is refundable at CAD 1 for every CAD 3 of dividends paid.
Canada

**Foreign income**

Corporations resident in Canada are subject to Canadian federal income taxes on worldwide income, including income derived directly from carrying on business in a foreign country, as earned. In addition, resident corporations may be taxable currently on certain passive and active income earned by foreign subsidiaries and other foreign entities. Relief from double taxation is provided through Canada’s international tax treaties, as well as foreign tax credits and deductions for foreign taxes paid on income derived from non-Canadian sources.

Canada intends to sign Tax Information Exchange Agreements (TIEAs) with non-treaty countries. To encourage non-treaty countries to enter into TIEAs:

- An exemption will be available for dividends received out of active business income earned by foreign affiliates resident in non-treaty countries that have agreed to a TIEA with Canada; and
- Active business income earned by foreign affiliates in non-TIEA, non-treaty countries will be treated as foreign accrual property income (FAPI), which is taxable on an accrual basis, if a TIEA with Canada is not concluded within a specified time period.

Foreign investment income earned directly, other than dividends, is taxed as earned, with foreign tax credits available in respect of foreign withholding taxes. Dividends received by private corporations from non-connected foreign corporations are subject to the special refundable tax of 33¹/₃% referred to above, to the extent that the dividends are deductible in determining taxable income.

The tax treatment of foreign dividends depends on whether the payer corporation is a foreign affiliate of the recipient. A foreign corporation is considered a foreign affiliate of a Canadian corporation if the Canadian corporation owns, directly or indirectly, at least 1% of any class of the outstanding shares of the foreign corporation and the Canadian corporation and related persons (together) own, directly or indirectly, at least 10% of any class of the outstanding shares of the foreign corporation.

Dividends received from foreign corporations that are not foreign affiliates are taxed when received, with foreign tax credits available in respect of foreign withholding taxes. Dividends received from foreign affiliates are permitted to flow tax-free between corporations, subject to certain limitations. These limitations pertain to the nature of the earnings from which the dividends were paid, the underlying foreign taxes paid and withholding tax paid.

Canadian corporations are taxed on certain investment income (foreign accrual property income) of controlled foreign affiliates (e.g., more than 50% voting shares owned by the Canadian corporation, related parties or a limited number of Canadian residents, among other things) as it is earned, whether or not distributed. A grossed-up deduction is available for foreign income and withholding taxes paid in respect of the income.

In light of recommendations made by the Advisory Panel on Canada’s System of International Taxation and others, the federal government has reconsidered the draft rules that change the tax treatment of certain investments in foreign investment entities (FIEs) and in non-resident trusts (NRTs) that generally were to apply for taxation years beginning after 2006. The 2010 federal budget announced that the draft
rules for FIEs and NRTs will be somewhat simplified and better targeted. The revised proposals will be subject to further public consultation.

The FIE rules have been essentially eliminated. The enacted version of these rules for offshore investment funds property will continue to apply, with some modifications, for taxation years ending after 4 March 2010, and the normal reassessment period will be extended by three years for these properties. A taxpayer that filed under the FIE proposals can either have those years reassessed or be entitled to a deduction in the current year for the income previously included.

The NRT rules treat non-resident trusts as being resident for Canadian income tax purposes. The NRT rules will generally apply commencing 2007. An election will allow a trust to elect to be deemed resident for the 2001 and subsequent years.

**Stock dividends**

If the payer is resident in Canada, stock dividends are treated for tax purposes in the same manner as cash dividends. The taxable amount of a stock dividend is the increase in the paid-up capital of the payer corporation because of the payment of the dividend. Stock dividends received from a non-resident are exempt from this treatment. Instead, the shares received have a cost base of zero.

**Foreign exchange gains and losses**

The foreign exchange gains and losses of a Canadian taxpayer that arise from business transactions (i.e., on income account), including the activities of a branch operation, are generally fully includable in income or fully deductible, as the case may be. Any method that is in accordance with generally accepted accounting principles may be used to determine foreign exchange gains or losses on income transactions, providing the treatment is consistent with previous years and conforms to the accrual method of accounting.

A foreign exchange gain or loss that is on capital account is treated the same as any other capital gain or loss. The accrual method of accounting cannot be used for purposes of reporting gains or losses on capital account. This follows from the Canada Revenue Agency’s view that a taxpayer has not made a capital gain or sustained a capital loss in a foreign currency until a transaction has taken place. Therefore, paper gains and losses are disregarded.

**Partnership income**

For Canadian tax purposes, a partnership is treated as a conduit, and the partners are taxed on their share of the partnership income, whether or not distributed. A corporation is not restricted from being a member of a partnership. Income is determined at the partnership level and is then allocated among the partners according to the terms of the partnership agreement. However, certain deductions, such as depletion allowances, exploration and development expenses and donations, will flow through to be deducted by the various partners directly, as will any foreign tax credits, dividend tax credits or donation credits. Partners may deduct expenses incurred directly, such as interest on borrowings to acquire partnership interests, in computing income from the partnership.

**Earnings of specified investment flow-throughs (SIFTs)**

Certain earnings of SIFTs (i.e., publicly traded income trusts and partnerships) are subject to a SIFT tax and are deemed to be a dividend when distributed, starting
Canada

the 2007 taxation year for SIFTs first publicly traded after 31 October 2006, and starting the 2011 taxation year for other SIFTs. These rules are intended to discourage corporations from converting to income trusts and effectively force existing trusts to consider either restructuring or abandoning the income trust model. The rules do not apply to Real Estate Investment Trusts that meet certain conditions.

**Deductions**

**Business expenses**

Business expenses that are reasonable and paid out to earn income are deductible for income tax purposes unless disallowed by a specific provision in the Income Tax Act. Some expenses are deductible subject to limitation, e.g., charitable donations, entertainment expenses and the cost of providing an automobile to employees. Deduction of capital expenditures is specifically prohibited, but special provisions may allow depreciation or amortisation of these expenditures. Because Canadian corporations are taxable on worldwide income, there are basically no territorial limits on the deductibility of related expenses. Payments to affiliates are deductible if they reflect arm’s-length charges.

**Depreciation**

Generally, depreciation for tax purposes (capital cost allowance) is computed on a pool basis, with only a few separate classes (pools) of property. Annual allowances are generally determined by applying a prescribed rate to each class on the declining-balance basis. For example, the prescribed annual rate on most furniture and fixtures is 20%, on automotive equipment 30% and on most buildings 4% to 10%. In the year of acquisition, only half of the amount otherwise allowable may be claimed on most classes of property. Generally, capital cost allowance may not be claimed until the taxation year the property is available for use. The taxpayer can claim any amount of capital cost allowance up to the maximum. Capital cost allowance previously claimed may be recaptured if assets are sold for proceeds that exceed the undepreciated cost of the class.

Temporary incentives to accelerate depreciation:

- For eligible manufacturing and processing machinery and equipment acquired after 18 March 2007, and before 2012, revise the rate and method from 30% declining balance to 50% straight-line; and
- For eligible computers and systems software acquired after 27 January 2009, and before 1 February 2011, increase the rate from 55% declining balance (half-year rule) to 100% (no half-year rule).

**Mining and oil and gas activity**

Generally, mining and oil and gas companies are allowed a 100% deduction for exploration costs and certain preproduction development costs. Other development costs are deductible at the rate of 30% on a declining-balance basis. Capital property costs are subject to the depreciation rules noted above under Depreciation section. In addition, in certain cases, significant asset acquisitions and assets acquired for a new mine or major expansion benefit from accelerated depreciation up to 100% of the income from the mine. For certain oil sands assets acquired after 18 March 2007, accelerated depreciation will be reduced gradually starting 2011 and will be eliminated by 2015.
Provinces levy mining taxes and royalties on mineral extraction and on oil and gas production. These provincial levies are mostly deductible.

Investment tax credits (ITCs) are available federally (and in some provinces) to individuals who invest in shares to fund prescribed mineral exploration expenditures. The federal credit in 2010 for qualified “flow-through” share investments is 15% of qualifying mining grassroots exploration expenditures. Certain mining exploration and preproduction expenditures that are incurred by a Canadian corporation and not used for flow-through are eligible for a 10% ITC. These credits can be used to offset current taxes payable or carried over to certain previous or subsequent taxation years.

**Net operating losses**
Net operating losses generally may be carried back three tax years and forward 20 (10 years if the loss was incurred in taxation years ending before 2006 and after 22 March 2004, seven years if before 23 March 2004). Special rules may prohibit the use of losses from other years when there has been an acquisition of control of the corporation.

**Losses from a business or property**
In 2003, the federal government released draft legislation that would have allowed a loss from a business or property to be claimed only if there is a “reasonable expectation of profit” from that business or property. Subsequently, the federal government announced that a revised proposal would be developed and released, although one is still forthcoming. When released, the measures likely will apply only prospectively. Furthermore, Quebec has rules that limit the deductibility of investment expenses for Quebec tax purposes.

**Payments to foreign affiliates**
Royalties, management fees and similar payments to affiliated non-residents are deductible expenses to the extent that they are incurred to earn income of the Canadian company and do not exceed a reasonable amount (fair market value in most cases).

**Interest**
Interest on borrowed money used for earning business or property income or interest in respect of an amount payable for property acquired to earn income is deductible, provided the interest is paid pursuant to a legal obligation and is reasonable in the circumstances.

Thin capitalisation rules can limit interest deductions when debt owing to certain non-resident shareholders (or persons not dealing at arm’s length with a non-resident shareholder) exceeds two times the corporation’s equity.

The Anti-Tax-Haven Initiative, which would have restricted the deductibility of certain interest payable after 2011 on investments in debt or equity of foreign affiliates, was repealed. The rule would have prevented multinational corporations from using tax havens and other tax avoidance structures to generate two expense deductions (one in Canada and another in a foreign subsidiary) for only one borrowing (so-called double-dipping).
Taxes
Neither federal nor provincial income taxes are deductible in determining income subject to tax. The tax treatment of federal capital taxes and provincial payroll and capital taxes is discussed above.

Scientific research and experimental development (SR&ED)
Canada provides a generous combination of deductions and tax credits. Current and capital expenditures on research and development can be deducted in the year incurred or carried forward indefinitely to be used at the taxpayer’s discretion to minimise tax payable.

In addition, a taxpayer can benefit from the ITC, which is generally a 20% non-refundable credit on SR&ED expenditures that can be applied against taxes payable. Alternatively, this tax credit can be carried back three years or forward 20 to be applied against taxes owing.

A qualifying CCPC can qualify for a 35% refundable tax credit annually on its first CAD 3 million in expenditures. This enhanced credit is subject to certain income and capital limitations.

SR&ED ITCs have been extended to certain salary and wages (limited to 10% of salary and wages directly attributable to SR&ED carried on in Canada) incurred in respect of SR&ED carried on outside Canada.

In addition to the federal research and development incentives, all provinces (except Prince Edward Island) and the Yukon provide tax incentives to taxpayers that carry on research and development activities.

Business meals and entertainment
Deductions by a corporation for business meals and entertainment expenses are limited to 50% of their cost. This includes meals while travelling or attending a seminar, conference or convention, overtime meal allowances and room rentals and service charges, etc., incurred for entertainment purposes. If the business meal and entertainment costs are billed to a client or customer and itemised as such, the disallowance (i.e., the 50% not deductible) is shifted to the client or customer.

Doubtful accounts and bad debts
A reasonable reserve for doubtful accounts may be deducted for tax purposes. The reserve calculation should be based on the taxpayer’s past history of bad debts, industry experience, general and local economic conditions, etc. Special rules apply for determining reserves for financial institutions. A taxpayer may deduct the amount of debts owing that are established to have become bad debts in the year, provided the amount has previously been included in the taxpayer’s income or relates to loans made in the ordinary course of business. Recoveries of bad debts previously written off must be included in income in the year of recovery.

Fines and penalties
Most government-imposed fines and penalties are not deductible. Fines and penalties that are not government-imposed are generally deductible, if they were made or incurred by the taxpayer for the purpose of gaining or producing income from the business or property.
Other significant items

Transfers of losses and other deductions between unrelated corporate taxpayers are severely limited after an acquisition of control.

Three-quarters of capital expenditures for goodwill and certain other intangible properties can be amortised at a maximum annual rate of 7%, on a declining-balance basis. A portion of proceeds may be taxable as recapture or as a gain on disposition.

Charitable donations made to registered Canadian charitable organisations are deductible in computing taxable income, generally to the extent of 75% of net income. A five-year carryforward is provided.

Insurance premiums relating to property of a business are generally deductible, but life insurance premiums are generally not deductible if the company is the named beneficiary. However, if a financial institution lender requires collateral security in the form of life insurance, a deduction is allowed for the associated net cost of any pure insurance for the period.

Group taxation

Group taxation is not permitted. However, the federal government will explore whether the tax system could be improved by new rules for the taxation of corporate groups, e.g., the introduction of a formal system of loss transfers or consolidated reporting.

Transfer pricing

Canadian transfer pricing legislation and administrative guidelines are generally consistent with the Organisation for Economic Co-operation and Development (OECD) Guidelines. Statutory rules require that transactions between related parties be carried out under arm’s-length terms and conditions.

Penalties may be imposed when contemporaneous documentation requirements are not met. A taxpayer will be deemed not to have made reasonable efforts if the taxpayer does not maintain complete and accurate documentation to evidence that it has determined and used arm’s-length prices for its related party transactions. The documentation must be prepared on or before the taxpayer’s documentation due date, which is six months after the end of the taxation year.

The transfer pricing penalty is 10% of the transfer pricing adjustment, if the adjustment exceeds the lesser of CAD 5,000,000 and 10% of the taxpayer’s gross revenue for the year. The penalty is not deductible in computing income, applies regardless of whether the taxpayer is taxable in the year and is in addition to any additional tax and related interest penalties.

Canada has an Advance Pricing Agreement (APA) programme that is intended to help taxpayers determine transfer prices acceptable to the local tax authorities and, when negotiated as bilateral or multilateral APAs, with tax authorities in other jurisdictions. Under this programme, 210 APAs have been completed or are in progress.

Many of Canada’s international tax agreements contain provisions concerning income allocation in accordance with the arm’s-length principle. These include a Mutual Agreement Procedure, which is a treaty-based mechanism through which taxpayers...
Canada

can petition competent authorities for relief from double taxation resulting from transfer pricing adjustments

**Tax incentives**

**Regional incentives**
In specified regions of Canada (i.e., Atlantic provinces, the Gaspé region and Atlantic offshore region) a 10% federal ITC is available for various forms of capital investment (generally, new buildings and/or machinery and equipment to be used primarily in manufacturing or processing, mining, oil and gas, logging, farming or fishing). The ITC is fully claimed against a taxpayer’s federal tax liability in a given year. Unused ITCs reduce federal taxes payable for the previous three years and the next 20.

The provinces and territories may also offer incentives to encourage corporations to locate in a specific region. Income tax holidays are available in Newfoundland and Labrador, Nova Scotia, Ontario, Prince Edward Island and Quebec for certain corporations operating in specific industries (e.g., in Ontario and Quebec, commercialisation of intellectual property; in Prince Edward Island, bioscience or aviation) or meeting certain conditions (e.g., major investment projects for Quebec; job creation for Newfoundland and Labrador).

**Industry incentives**
Canada offers many tax incentives at the federal, provincial and territorial level, for various industries and activities, including those related to:

- Research and development (see Scientific research and experimental development under Deductions above);
- Film, media, computer animation and special effects and multi-media productions;
- Manufacturing and processing; and
- Environmental sustainability.

**Withholding taxes (WHT)**

**Withholding taxes arising in Canada**
Canada is continually renegotiating and extending its network of treaties, some with retroactive effect. This table summarises withholding tax rates on payments arising in Canada. The applicable treaty should be consulted to determine the withholding tax rate that applies in a particular circumstance.

Notes

1. Dividends – In its treaty negotiations, Canada is prepared to accept a withholding tax rate of 5% on “direct dividends”, i.e., dividends paid by a Canadian affiliate to a foreign parent or other corporation with a substantial interest in the affiliate.

2. Interest – Commencing 2008, Canadian withholding tax is eliminated on interest (except for “participating debt interest”) paid to arm’s-length non-residents, regardless of their country of residence. Most treaties have an explicit provision for higher withholding tax on interest in excess of fair market values in non-arm’s-length circumstances.

3. Royalties – In its treaty negotiations, Canada is prepared to eliminate the withholding tax on arm’s-length payments in respect of rights to use patented information or information concerning scientific experience. It is also willing to negotiate exemptions from withholding tax for payments for the use of computer software. Canada does not levy withholding tax on “cultural royalties”, other than payments in respect of motion picture and television films, etc. Different rates may apply in the case of immovable property (e.g., payments that relate to Canadian natural resources). Most treaties explicitly provide for higher withholding tax on royalties in excess of fair market value in non-arm’s-length circumstances. A nil rate of tax may apply in certain circumstances.

4. The treaty has been signed, but is not yet in force. Absent a treaty, Canada imposes a maximum 25% rate of withholding on dividends, interest and royalties.

5. The lower (lowest two for Vietnam) rate applies if or when the beneficial owner of the dividend is a company that owns/controls a specified interest in the paying company. The nature of the ownership requirement, the necessary percentage (10%, 20%, 25% or higher) and the relevant interest (e.g., capital, shares, voting power, equity percentage) vary by treaty.

6. If the other state (Canada for the treaty with Oman) concludes a treaty with another country providing for a lower withholding tax rate (higher rate for Kenya), the lower rate (higher rate for Kenya) will apply in respect of specific payments within limits, in some cases.

7. Canada’s treaty with China does not apply to Hong Kong.

8. The treaty status of the republics that comprise the former USSR is as follows:
   - Azerbaijan, Estonia, Kazakhstan, Kyrgyzstan, Latvia, Lithuania, Russia, Ukraine and Uzbekistan—new treaties entered into force (see table for rates); and
   - Other republics – no negotiations are underway.
   Belarus, Tajikistan and Turkmenistan will not honour the treaty with the former USSR As a result, Canada will impose a maximum 25% rate of withholding on dividends, interest and royalties until a new treaty enters into force. For other republics that comprise the former USSR, the status of the former treaty with the USSR is uncertain. Because the situation is subject to change, Canadian taxpayers are advised to consult with the Canada Revenue Agency as transactions are carried out.

9. A new treaty with Italy was signed on 3 June 2002. Upon ratification, its provisions will apply:
   - For purposes of non-resident withholding tax, to amounts paid or credited after 31 December of the calendar year the treaty is ratified; and
   - For other taxes, for taxation years beginning after that date.
   The rates in the table are from the new treaty. Under the new treaty, the withholding tax rate will:
• Be reduced from 15% to 5% on dividends paid to a company that owns at least 10% of the payor’s voting stock (the rate will remain 15% on other dividends);
• Be reduced from 15% to 10% on interest, but certain interest payments will be exempt; and
• Remain 10% on royalties, but certain royalties for the use of computer software, patents and know-how will be subject to a rate of 5% and certain copyright royalties will be exempt.

• For purposes of non-resident withholding tax, to amounts paid or credited on or after 1 February 2009; and
• For other taxes, to taxable years beginning after 2008.

The rates in the table are from the Protocol. Under the Protocol, the withholding tax rate will:
• Remain 5% on dividends paid to a company that owns 10% or more of the payor’s voting shares and 15% on other dividends;
• Be eliminated on cross-border interest payments between:
  • Arm’s-length persons – retroactive to 1 January 2008 (however, Canada has already eliminated withholding tax on most interest paid to arm’s-length non-residents, see footnote 2); and
  • Related persons – subject to the Limitation of Benefits article, over three years from 10% to 7%, retroactively on amounts paid or credited after 31 December 2007, to 4% on 1 January 2009 and to nil on 1 January 2010; and
• Remain 10% or zero on royalties.

Tax administration

Returns
Both the federal and the provincial corporation tax systems operate on an essentially self-assessing basis. The tax year of a corporation, which is normally the fiscal period it has adopted for accounting purposes, cannot exceed 53 weeks. The tax year need not be the calendar year. Once selected, the tax year cannot be changed without approval from the tax authorities.

All corporations must file federal income tax returns. Alberta and Quebec tax returns must also be filed by corporations that have permanent establishments in those provinces, regardless of whether any tax is payable. Corporations with permanent establishments in other provinces that levy capital tax must also file capital tax returns. Tax returns must be filed within six months of the corporation’s tax year-end. No extensions are available.

Effective for taxation years ending after 2009, certain corporations with annual gross revenues exceeding CAD 1 million are required to electronically file (E-file) their federal corporate income tax returns via the Internet. Also, starting 2010, information return filers that submit more than 50 information returns annually must E-file via the Internet. There will be a one-year transitional period before penalties are assessed for failure to E-file.

Functional currency
The amount of income, taxable income, and taxes payable by a taxpayer is determined in Canadian dollars. However, certain corporations resident in Canada can elect to determine their Canadian tax amounts in the corporation’s “functional currency” commencing taxation years beginning after 13 December 2007.
Payment of tax
Corporate tax instalments are generally due on the last day of each month (although some CCPCs can remit quarterly instalments, if certain conditions are met). Any balance payable is generally due on the last day of the second month following the end of the tax year.

Assessments, audit cycle and statute of limitations
The tax authorities are required to issue an assessment notice within a reasonable time following the filing of a tax return. These original assessments usually are based on an initial high level review of the corporation's income tax return and either indicate agreement with the return (which is the result in the majority of cases) or outline in detail any differences that arise from this limited initial review.

A reassessment of the tax payable by a corporation that is not a Canadian-controlled private corporation may be made within four years from the date of mailing of the original notice of assessment, usually following a detailed field audit of the return and supporting information. The limitation period is three years for Canadian-controlled private corporations. The three- and four-year limits are extended a further three years to permit reassessment of transactions with non-arm’s-length non-residents. Reassessments generally are not permitted beyond these limits unless there has been misrepresentation or fraud. Many larger corporations have their returns audited annually. Smaller corporations generally are subject to less frequent audits, covering more than one year’s return. Occasionally, a specific industry or a particular type of transaction may be selected for more intensive examination. Different time limits may apply for provincial reassessments.

Appeals
A taxpayer that disagrees with a tax assessment or reassessment may appeal. The first step is to file a formal notice of objection within 90 days from the date of mailing of the notice of assessment or reassessment, setting out the reasons for the objection and other relevant information. Different time limits may apply for provincial reassessments. Corporations that qualify as “large corporations” must file more detailed notices of objection. The Canada Revenue Agency will review the notice of objection and vacate (cancel), amend or confirm it. A taxpayer that still disagrees has 90 days to appeal the Canada Revenue Agency’s decision to the Tax Court of Canada, and if necessary, to the Federal Court of Appeal and the Supreme Court of Canada. However, the Supreme Court accepts few income tax appeals.

Topics of focus for tax authorities
Topics of interest to Canadian tax authorities include:

- The deductibility of:
  - Royalty payments made by Canadian corporations to non-arm’s-length non-residents;
  - Business restructuring expenses incurred by a group of corporations located in more than one country;
  - Interest paid on loans if the funds derived from the loans are used offshore; and
  - Guarantee fees paid by Canadian corporations to related non-resident corporations;
- The offshoring of Canadian-source income by factoring the accounts receivable of Canadian corporations;
- Treaty shopping to reduce Canadian withholding taxes and capital gains tax; and
Canada

• Surplus stripping to reduce Canadian withholding taxes by artificially increasing a Canadian corporation’s paid-up capital and subsequently distributing the surplus as a return of capital.

**Foreign reporting**
Reporting requirements apply to taxpayers with offshore investments. The rules impose a significant compliance burden for taxpayers with foreign affiliates. Failure to comply could result in substantial penalties.

**Other issues**

**Forms of business enterprise**
Canadian law is based on the British common-law system, except in Quebec where a civil-law system prevails. The principal forms of business enterprise available in Canada are the following:

• Corporation – Whether public or private, incorporated federally or provincially, a Canadian corporation is a legal entity distinct from its shareholders.
• Partnership – A business relationship between two or more “persons” (i.e., individuals, corporations, trusts or other partnerships) formed for the purpose of carrying on business in common. A partnership is not treated as a legal entity distinct from its partners.
• Sole proprietorship – An unincorporated business operated by an individual that is carried on under the individual's own name or a trade name.
• Trust – A relationship whereby property (including real, tangible and intangible) is managed by one person (or persons, or organisations) for the benefit of another. Trusts may hold commercial enterprises.
• Joint Venture – Generally, refers to the pursuit of a specific business objective by two or more parties whose association will end once the objective is achieved or abandoned. A joint venture is not treated as a legal entity distinct from the participants.

Foreign investors usually conduct business in Canada through one or more separate Canadian corporations, although during the start-up period, operation as a branch of a profitable foreign corporation may be preferable. In addition, foreign investors may participate as partners in partnerships carrying on business in Canada or as joint venturers.
Corporate taxes in Cayman Islands

Significant developments
There are no recent significant developments.

Taxes on corporate income
Corporate, capital gains, value-added tax (VAT), profits, payroll or other direct taxes are not imposed on Cayman companies.

Corporate residence
Since no corporate, capital gains, VAT, profits, payroll or other direct taxes are currently imposed on Cayman companies, corporate residency is not relevant in the context of Cayman Islands taxation.

Entities engaged in “scheduled” trade and business in the Cayman Islands (as defined in the Trade & Business Licensing Law) are required to have a trade and business license. Effecting and concluding contracts in the Cayman Islands and exercising, in the Cayman Islands, powers necessary for the carrying on of a business outside the Cayman Islands is generally not considered to be engaging in trade and business in the Cayman Islands.

Other taxes
Stamp duty and/or import duty is paid, at various rates, on importation of most goods, transfers of land/property and execution of certain documents.

Branch income
Branches are treated the same as other corporations doing business in the Cayman Islands.

Income determination
Since no corporate, capital gains, VAT, profits or other taxes are imposed on Cayman companies, income determination is not relevant in the context of Cayman Islands taxation.
Cayman Islands

**Deductions**

Not applicable as corporate, capital gains, VAT, profits or other taxes are not imposed on Cayman companies.

**Group taxation**

Not applicable as corporate, capital gains, VAT, profits or other taxes are not imposed on Cayman companies.

**Tax incentives**

Not applicable as corporate, capital gains, VAT, profits or other taxes are not imposed on Cayman companies. However, Cayman entities carrying on business outside the Cayman Islands can register as exempted companies (i.e., a company formed primarily to do business outside of the Cayman Islands and subject to certain requirements) and can apply under the Tax Concessions Law for an undertaking to be issued by the Governor-in-Council (i.e., the Cayman Islands government) exempting such company from any tax on profits, income, gains or appreciation which might be introduced in the period of 20 years following the grant of such concessions. The concession is extendable for a further 10 years after expiry. “Exempted limited liability partnerships” – certain partnerships formed primarily to do business outside of the Cayman Islands – can apply under the Exempted Limited Partnership Law for a similar concession which is for 50 years (rather than 20 years).

**Withholding taxes (WHT)**

Currently, no withholding taxes are imposed on dividends or payments of principal or interest.

**Tax administration**

There are no tax treaties; however, there are tax information exchange agreements between the Cayman Islands and a number of countries. Please refer to the Cayman Islands Tax Information Authority’s website for the latest list (http://www.tia.gov.ky/html/assistance.htm).

The Cayman Islands agreed with the United Kingdom government to implement the Savings Directive and so the Reporting of Savings Income Information (European Union) Law (2007 Revision) came into force, setting out a reporting regime whereby Cayman paying agents making interest payments to individuals who are tax resident in a EU member state may have to report interest paid. The Cayman Tax Information Authority receives or facilitates submission of such information reporting.

No tax returns, forms or procedures are required to be completed for tax compliance purposes.
**Corporate taxes in Chile**

*For more information, contact:*

Francisco Selame  
PricewaterhouseCoopers  
Avenida Andrés Bello 2711  
Torre de la Costanera, Cuarto Piso  
Santiago, Chile  
Tel: +56 2 940 0460  
Email: francisco.selame@cl.pwc.com

**Significant developments**

Law No. 20,326, dated 29 January 2009, introduced amendments to the stamp tax. For operations performed during 2009, the stamp tax duty rate is reduced to 0%. For operations performed during the first half of 2010 (i.e., until 30 June), the normal rate, which varies, is reduced by half.

Law No. 20,316, dated 9 January 2009, introduced amendments to the tax benefits of charitable donations.

Law No. 20,343, dated 28 April 2009, introduced a beneficial tax regime applicable to capital gains in the transfer of certain publicly offered debt instruments, the purpose of which is to promote non-banking financing and to increase the liquidity on companies’ cash flows to generate more activity in the stock market.

**Taxes on corporate income**

*First category tax*

The basic tax on income of a Chilean legal entity domiciled or resident in Chile and engaged in commerce, mining, fishing or industry is the First Category income tax, which is assessed at a rate of 17% on the entity’s worldwide income. Non-domiciled and non-resident shareholders and partners are subject to an “additional” withholding tax of 35% on their Chilean-source distributions or remittances, with a credit granted for the First Category tax paid on the underlying profits. This results in an effective tax rate of 35%.

*Corporate residence*

Companies incorporated in Chile are considered to be domiciled in the country.

*Other taxes*

*Value-added tax (VAT)*

VAT is payable on transfers and services at a rate of 19%. The same tax is applicable to imports.
Stamp tax
Stamp tax is payable on the execution of certain legal documents, and its rate varies depending on the document being executed. However, pursuant to Law No. 20,326 of 29 January 2009, the stamp tax duty rate for operations performed during 2009 was 0%. For the first half of 2010 (i.e., until June 30), the normal stamp tax duty rate has been reduced by half.

Special taxes
Alcoholic and non-alcoholic beverages and certain luxury items, such as jewels, are subject to additional sales taxes ranging from 13% to 50%.

Branch income
Branches of foreign corporations that are operating in Chile are taxed on their Chilean-source income. Branches are subject to the First Category income tax, which is assessed at a rate of 17%. Branches are also subject to a 35% “additional” tax on amounts remitted or withdrawn during a given calendar year, less a credit for the First Category income tax paid, which is payable in April of the year following the distribution. Thus, the tax burden for a branch is 35%.

Income determination
For purposes of the First Category tax, as a general rule, corporate revenue must be determined on an accrual basis.

Inventory valuation
Last-in, first-out (LIFO) is not allowed. Inventories must be valued in accordance with monetary correction provisions, basically by adjusting raw material content and direct labour to replacement cost (which is generally the most recent cost), but excluding indirect costs. No conformity is required between book and tax reporting for income determination.

Capital gains
Capital gains are subject to normal taxation unless special provisions, such as those pertaining to gains on the sale of shares or monetary correction on capital repayments, establish exemptions.

Inter-company dividends
Dividends received from Chilean corporations are exempt from the First Category tax.

Foreign income
Resident corporations are subject to taxes on their worldwide income. In general, foreign income and dividends received by a domestic corporation are subject to Chilean taxation in the financial year when received (i.e., on a cash basis). A tax credit for taxes paid abroad is granted, subject to the regulations of the income tax law.

Branches of foreign corporations are taxed on their income without regard to the results of the head office.

Stock dividends
Stock dividends are not taxed.
Deductions

Net taxable income of a taxpayer is arrived at by deducting from gross income the expenses incurred to generate the income that have not been already deducted from gross revenue as costs.

Depreciation and depletion

Depreciation rates are calculated based on the estimated useful life of the assets. The normal periods of depreciation for new assets under normal conditions are as follows: heavy machinery, 15 years; trucks, seven years; factory buildings, in general, 20 years to 40 years. At the request of the Foreign Investment Committee or the taxpayer, the Internal Revenue Service (IRS) may reduce the normal useful life.

Taxpayers may recover capitalised costs by using the accelerated depreciation method for up to one-third of the normal useful life with respect to new or imported fixed assets, provided that the normal period of depreciation is at least three years.

Accelerated depreciation may be used only to reduce the taxable basis of the First Category tax. For the purpose of the tax applicable to distributions, accelerated depreciation is not considered.

No conformity is required between book and tax depreciation.

Annual depreciation is taken by the straight-line method. Gains or losses on the sale of fixed assets are considered ordinary profits or losses.

Normally, the sale of fixed assets is not subject to VAT, unless the assets are sold before the end of their useful lives or within four years from the date of acquisition. The sale of immovable property as fixed assets is subject to VAT only when the sale takes place within 12 months from the date of acquisition. For tax purposes, depletion for natural mineral resources is allowed on a unit-of-production basis.

Net operating losses

An indefinite carryforward of losses is allowed. Consistent with monetary correction, losses are carried forward, adjusted by the cost-of-living increase. No carrybacks are allowed, except in a case where a taxpayer has retained tax profits and has a subsequent tax loss.

Payments to foreign affiliates

The deductibility of payments made abroad for the use of trademarks, patents, formulas, and consulting and similar services is limited to a maximum of 4% of the income derived from sales and services in the corresponding year, unless the royalty is subject to income tax of greater than 30% in the country of the beneficiary.

Transfer pricing regulations are in line with general Organization for Economic Co-operation and Development (OECD) principles.

Taxes

Taxes imposed by Chilean laws are deductible, provided they are related to the normal activities of the company. However, income taxes and special contributions for promotion or improvement are not deductible.
**Chile**

**Other significant items**
As a general rule, expenses are not deductible for income tax purpose if they are not incurred to generate taxable income.

**Group taxation**
Consolidated returns are not allowed.

**Tax incentives**

**Inward investment**
The principal incentives are the following:

- Tax benefits and other incentives for companies operating in the northernmost and southernmost parts of the country; and
- Tax benefits to forestry companies, contracts for oil operation and nuclear material operations.

**Capital investment**
The principal incentives to encourage foreign capital contributions are statutory guarantees covering the repatriation of capital, remittance of profits, non-discrimination toward foreign investment, and access to the foreign exchange market for remittance purposes. In general, foreign investors are subject to the same legislation as national investors. A guaranteed income tax rate of 42% may be granted for 10 years or, provided the capital investment project exceeds USD 50 million, 20 years for the development of industrial or extractive projects.

The overall rate comprises the corporate tax on profits and withholding tax on dividend or branch profit distributions. The tax rate on dividend or profit distributions is the difference between 42% and the underlying tax paid at a corporate level. The option to be subject to an overall effective tax rate of 42% without change for 10 or 20 years is usually not exercised by foreign investors, because the current combined effective tax rate on profits and dividend distribution is 35% under the general tax regime.

Under the Foreign Investment Contract, a foreign investor may petition for tax stability with respect to VAT and customs duty regimes. With respect to customs duties, however, stability is granted only for the importation of certain machinery and equipment not available in Chile.

The Andean Pact is not in force in Chile.

**Other incentives**
The principal incentives for exports can be summarised as follows:

- Taxes paid in the importation or acquisition of goods required in the export activity are reimbursed;
- VAT on exports is zero-rated; and
- Chile has signed free-trade agreements with Australia, Bolivia, Canada, Central America (i.e., Costa Rica, El Salvador, Guatemala, Honduras, Nicaragua), China, Colombia, the European Union, Mexico, Panama, Peru, Republic of South Korea, Turkey, and United States. All these agreements provide for reduced customs duties.
**Withholding taxes (WHT)**

Dividends paid to a non-resident recipient are subject to a 35% withholding of “additional” tax, with a credit available that is equivalent to the income tax effectively paid at the corporate level, corresponding with the First Category tax paid by the corporation. This credit is added to the amount that is distributed to form the taxable base for the “additional” tax. Consequently, the tax burden for a non-resident recipient of dividends, including taxes at the company level, is 35%.

Branches are subject to a 35% “additional” tax on amounts remitted or withdrawn, less the First Category tax credit. See Branch income section.

In the case of a foreign investor that has applied for the 42% tax invariability, the effective tax burden is also 42%.

Interest paid to non-residents is subject to additional withholding tax at a general 35% rate. Interest on loans granted by foreign banking or financial institutions is subject to a sole 4% Additional withholding tax. Thin capitalisation rules requesting a 3:1 debt: equity ratio become applicable when the debt generating interest subject to the 4% rate is secured by related entities.

Royalties paid to non-residents are subject to additional withholding tax at a 30% rate. Royalty payments in connection to software are subject to additional withholding tax at a 15% rate. Such rate is increased in case the beneficiary of the payment is resident in a tax haven or in case the payment is made to a related entity.

**Tax treaties**

Chile has in force double taxation treaties with the following countries: Argentina, Brazil, Canada, Colombia, Croatia, Denmark, Ecuador, France, Ireland, Malaysia, Mexico, New Zealand, Norway, Paraguay, Peru, Poland, Portugal, Republic of South Korea, Spain, Sweden and the United Kingdom.

Please note that Chile has signed double taxation treaties with Belgium, Russia, Switzerland, Thailand, Australia and the United States of America, which are not yet in force.

**Tax administration**

**Returns**

The tax year coincides with the calendar year. The tax system is one of self-assessment by the taxpayer, with occasional auditing by the tax authorities. Tax returns must be filed with the IRS before 30 April of each year with respect to the income of the previous calendar year.

**Payment of tax**

Taxes are payable when the annual tax return is submitted in April of each year. Taxpayers, in general, are subject to monthly advance payments on account of their yearly income taxes. The difference between the advance payments and the final tax bill is payable in cash at the time the tax return is filed. If prepayments exceed the final tax bill, the excess is reimbursed by the Treasury.

Significant developments

The Ministry of Finance and the State Administration of Taxation (SAT) jointly released a tax circular Caishui [2009] No.59 on 30 April 2009 to outline the corporate income tax (CIT) treatment for corporate restructuring transactions. Circular 59 addresses the CIT treatments for six forms of restructuring transactions, namely, change in legal form, debt restructuring, equity acquisition, assets acquisition, merger, and spin-off. The general principle is that enterprises undergoing corporate restructuring should recognise the gain/loss from the transfer of relevant assets/equity at fair value when the transaction takes place. However, if certain prescribed conditions are satisfied, the parties involved could opt for special tax treatments, which are essentially tax deferral treatment. In other words, recognition of gain/loss of the transferor from transfer of assets/equity can be deferred with respect to the equity-payment portion and the transferee may take over the transferor’s tax basis of the acquired assets/equity. Such special tax treatments are only available to a very few specific types of cross-border transactions. Circular 59 is retroactively effective from 1 January 2008.

Also since year 2009, the Chinese tax authorities have strengthened their tax administration on transfer pricing and income derived by non-tax resident enterprise (TREs). The SAT has released a number of tax circulars addressing the tax administration of transfer pricing, foreign contractors and service providers, withholding tax on passive income, direct and indirect transfer of an equity interest in a Chinese company by non-TREs, etc. In addition, the SAT has also released circulars relating to the claiming of treaty benefits by non-TREs and interpretation of certain articles and terms in the tax treaties, such as dividends, royalties, beneficial ownership, etc. Aggressive tax planning (including but not limited to tax-avoidance and treaty-abusive arrangements) not supported by reasonable commercial purposes and substance will be subject to scrutiny of the Chinese tax authorities.

Taxes on corporate income

Under the CIT law effective 1 January 2008, the standard tax rate is 25%. There is no local or provincial income tax in China.

A lower CIT rate is available for the following sectors/industries:

- Qualified new/high tech enterprises are eligible for a reduced CIT rate of 15%. An enterprise has to fulfil a set of prescribed criteria and be subject to an assessment in order to qualify as a new/high tech enterprise.
• Integrated circuit (IC) production enterprises with a total investment exceeding RMB 8 billion, or which produce integrated circuits with a line-width of less than 0.25um are eligible for the reduced CIT rate of 15%.
• From 1 January 2009 to 31 December 2013, qualified technology-advanced service enterprises in 20 cities (such as Beijing, Shanghai, Tianjin, Guangzhou, Shenzhen, etc.) are eligible for the reduced CIT rate of 15%. This incentive is only available to certain technology-advanced service sector members and an enterprise has to fulfil a set of prescribed criteria and be subject to an assessment in order to qualify as a technology-advanced service enterprise.
• Qualified small and thin-profit enterprises are eligible for the CIT rate of 20%. An enterprise has to fulfil certain conditions in order to qualify as a small and thin-profit enterprise.

Corporate residence

The TRE concept is introduced in the CIT law whereby TREs are subject to CIT on their worldwide income. Enterprises established in China are always TREs. A foreign enterprise with a place of effective management in China is also regarded as a TRE.

A non-TRE that has no establishment or place in China is taxed only on its China-source income. A non-TRE with an establishment or place in China shall pay CIT on income derived by such establishment or place from sources in China as well as income derived from outside China which effectively is connected with such establishment or place. “An establishment or a place” is defined in the CIT regulations as establishments and places in China engaging in production and business operations, including:

1. Management organisations, business organisations, representative offices;
2. Factories, farms, places where natural resources are exploited;
3. Places where labour services are provided;
4. Places where contractor projects, such as construction, installation, assembly, repair and exploration, etc., are undertaken;
5. Other establishments or places where production and business activities are undertaken; and/or
6. Business agents who regularly sign contracts, store and deliver goods, etc., on behalf of the non-TRE.

If the non-TRE is from a tax jurisdiction which has entered into a tax treaty with China, the definition of “permanent establishment” in the treaty should prevail over the above definition of “establishment or place” in the CIT regulations.

Other taxes

Turnover taxes
China has a turnover tax system consisting of three taxes – value-added tax (VAT), business tax, and consumption tax. The regulations for the turnover taxes were amended in late 2008 and the amended regulations became effective from 1 January 2009.

Value-added tax (VAT)
The sales or importation of goods and the provision of repairs, replacement, and processing services are subject to VAT. VAT is charged at a standard rate of 17% and the
rate for small-scale taxpayer is 3%. The sales of certain necessity goods may be subject to VAT at a reduced rate of 13%, as specified in the VAT regulations.

Starting on 1 January 2009, the VAT system was changed from a production-based VAT system to a consumption-based VAT system which means that input VAT on fixed assets is fully recoverable except for situations specified in the VAT regulations.

Export of goods from China may be entitled to a refund of VAT incurred on materials purchased domestically. The refund rates range from 0% to 17%. There is a prescribed formula for determining the amount of refund, under which many products do not obtain the full refund of input VAT credit and suffer different degree of export VAT costs.

**Business tax**
A business tax is imposed on services, transfer of intangible assets and immovable property taking place within China. Starting from 2009, services taking place within China are referring to services where either the service provider or the service recipient, or both are in China. This may make services even being rendered outside China subject to business tax in China. Business tax rates are 3% or 5%, except for the leisure and entertainment industry which may be subject to a rate of up to 20%. Business tax is not recoverable but is deductible for income tax purpose.

**Consumption tax**
A consumption tax is imposed on 14 categories of goods, including cigarettes, alcoholic beverages, certain luxury and environmental unfriendly items. The tax liability is computed based on the sales amount and/or the sales volume depending on the goods concerned. It is not recoverable but is deductible as an expense for income tax purposes.

**Real estate tax**
A real estate tax, which is based on the value of the property or rental received, is assessed on land and buildings used for business purpose or leased. The tax rate is 1.2% of the original value of buildings. A tax reduction of 10% to 30% is commonly offered by local governments. Alternatively, tax may be assessed at 12% of the rental value. Real estate tax is deductible for income tax purpose.

**Land appreciation tax**
A land appreciation tax is levied on the gain from the disposal of properties at progressive rates from 30% to 60%. Land appreciation tax is deductible for income tax purpose.

**Customs duties**
In general, a customs duty is charged in either specific or ad valorem terms. For specific duty, a lump sum amount is charged based on a quantitative amount of the goods (e.g., RMB 100 per unit or per kg). For ad valorem duty, the customs value of the goods is multiplied by an ad valorem duty rate to arrive at the amount of duty payable. The applicable duty rate generally is determined based on the origin of the goods.

An exemption from customs duty applies to machinery and equipment imported by a foreign investment enterprise within the amount of its total investment, for its own use if the project falls within the encouraged category of the “Catalogue for the Guidance
of Foreign Investment Industries”, and the imported machinery or equipment is not within the list of commodities that are not exempted from customs duty.

A customs duty and VAT exemption may be allowed on importation of raw materials for contract processing or import manufacturing. Goods may be imported into, and exported out of, designated Free Trade Zones and Bonded Logistics Zones without liability to customs duty or VAT.

**Stamp tax**
All enterprises and individuals who execute or receive “specified documentation” including 11 types of contracts and a few specified documents are subject to stamp tax. The stamp duty rates vary between 0.005% on loan contracts to 0.1% for property leasing and property insurance contracts. A flat amount of RMB 5 applies to certification evidencing business licences and patents, trademarks or similar rights.

**Motor vehicle acquisition tax**
A motor vehicle acquisition tax at a rate of 10% of the taxable consideration will be levied on any purchase and importation of cars, motorcycles, trams, trailers, cart and certain types of trucks.

**Deed tax**
A deed tax, generally at rates from 3% to 5%, may be levied on the purchase or sale, gift or exchange of ownership of land use rights or real properties. The transferee/assignee is the taxpayer.

**Vehicle and vessel tax**
A vehicle and vessel tax is a tax that is levied on all vehicles and vessels registered within China. A fixed amount is levied on either a yearly or quarterly basis. Transport vehicles generally are taxed on a fixed amount according to their own weight, with passenger cars, buses and motorcycles being taxed on a fixed unit amount. Vessels are taxed on a fixed amount, according to the deadweight tonnage.

**Urban and township land-use tax**
An urban and township land-use tax is levied on taxpayers who utilise land within the area of city, country, township and mining districts. It is computed annually based on the space of area actually occupied by a taxpayer multiplied by a fixed amount per square metre that is determined by the local governments.

**Resource tax**
A resource tax may be levied, generally on a tonnage or volume basis, at rates specified by the Ministry of Finance in consultation with relevant ministries of the State Council on natural resources including crude oil, natural gas, coal, other raw nonmetallic metals, raw ferrous metals, nonferrous metallic minerals and salt (including solid and liquid salt). In lieu of a resource tax, mine area usage fees are collected from joint ventures exploiting crude oil or natural gas.

**Branch income**
Under the CIT law, a branch of a non-TRE in China is taxed at the branch level. If there is more than one branch, they may elect to file their tax at the main office in China on a consolidated basis. There is no further tax upon remittance of branch profits.
**Income determination**

Taxable income is defined as “gross income in a tax year after deduction of non-taxable income, tax exempt income, various deductions and allowable losses brought forward from previous years”. The accrual method of accounting should be used.

Gross income refers to monetary and non-monetary income derived by an enterprise from various sources including but not limited to the sales of goods, provision of services, transfer of property, dividend, interest, rental, royalty, and donation.

Non-taxable income refers to fiscal appropriation, governmental administration charges, governmental funds and other income specified by the central government.

An unrealised gain or loss due to changes in the fair value of financial assets, financial liabilities and investment properties held by an enterprise is not taxable/deductible for CIT purpose. The gain/loss is taxable/deductible only when the asset/liability actually is disposed or realised.

Capital gains are treated in the same way as ordinary income of a revenue-nature for a TRE.

An exemption exists for CIT on dividend derived by a TRE from the direct investment into another TRE except for where the dividend is from stocks publicly traded on the stock exchanges and the holding period is less than 12 months.

The worldwide income of a TRE and its branches both within and outside China is taxable. A foreign tax credit is allowed for foreign income taxes paid on foreign-source income. The CIT law contains a controlled foreign enterprise rule under which the unremitted earning of a foreign company controlled by Chinese enterprises may be taxable in China.

Interest, rental and royalty income and income from stock transactions are treated as ordinary income.

Inventory must be valued according to costs. In computing the cost of inventories, the enterprise may choose one of the following methods: first-in first-out (FIFO), weighted average or specific identification.

Unrealised exchange gain (loss) from the year-end translation of assets (liabilities) denominated in foreign currency generally is taxable (deductible).

Partnerships registered in China are not subject to CIT. The income of a partnership is taxable at the partners' level.

**Deductions**

Generally, an enterprise is allowed to deduct reasonable expenditures which actually have been incurred and are related to the generation of income.

**Depreciation of fixed assets**

Fixed assets with useful lives of more than 12 months must be capitalised and depreciated in accordance with the CIT regulations. Generally, depreciation is
calculated by the straight-line method. Shorter tax depreciation life or accelerated depreciation may be allowed due to advancement of technology or suffering from constant vibration or severe corrosion. Production-nature biological assets, such as livestock held for breeding and commercial timber, also have to be capitalised and depreciated using the straight-line method.

Under the straight-line method, the cost of an item less residual its value is depreciated over the useful life of the asset. Residual value should be reasonably determined based on the nature and usage. The CIT law provides minimum useful lives for the following assets.

<table>

<td>10</td>
</tr>
<tr>
<td>Production-nature biological asset in the nature of livestock</td>
<td>3</td>
</tr>
</tbody>
</table>

**Amortisation of intangibles and goodwill**
A deduction is allowed for amortisation of intangible assets, such as, but not limited to, patents, trademarks, copyrights, land use rights. Generally, intangible assets have to be amortised over a period of not less than 10 years. For an intangible asset obtained through capital contribution or assignment, it can be amortised according to the useful life prescribed in the laws or agreed in the contracts, if any. However, acquired goodwill is not deductible until the invested enterprise entirely is transferred or liquidated.

**Wages and staff welfare**
Reasonable wages and salaries of employees incurred by an enterprise are tax-deductible. Directors’ fees are also tax-deductible.

Basic social security contributions including basic pension insurance, basic medical insurance, unemployment insurance, injury insurance, maternity insurance and housing funds, that are made by an enterprise in accordance with the scope and criteria as prescribed by the State or provincial governments are deductible.

Commercial insurance premiums paid for investors or employees shall not be tax-deductible unless it is paid for safety insurance for workers conducting special types of work.

Staff welfare expense, labour union fees and staff education expenses are tax-deductible up to 14%, 2% and 2.5% of the total salary expenses respectively.

**Reserves and provisions**
Provisions for asset impairment reserves (e.g., bad debt provisions) and risk reserves generally are not tax-deductible unless otherwise prescribed in the tax rules. Financial institutions and insurance companies may deduct certain provisions and reserves subject to the caps specified in the relevant tax circulars.
**Contingent liability**
The CIT law does not specifically address the deductibility of contingent liability. According to the general principle of the CIT law, contingent liability is a liability that an enterprise has not actually incurred and thus shall not be tax-deductible.

**Assets loss**
The tax deduction of most types of assets loss (including bad debt loss) is subject to approval by the tax authorities.

**Research and development (R&D) expense**
For R&D expenses incurred for new technology, new products or new craftsmanship, an extra 50% of the actual expenses incurred are also tax-deductible as an incentive.

**Interest expense**
Interest on loans generally is tax-deductible. For interest expenses on borrowings from non-financial institutions by a non-financial institution, the portion that does not exceed the commercial rate is deductible. The tax deduction of interest paid to related parties is subject to the thin capitalisation rule under the CIT law.

**Payment to affiliates**
Management fees for stewardship nature are not deductible but services fees paid for genuine services provided by affiliates in China or overseas and charged at arm’s length should be deductible. Other payment to affiliates, such as royalty, is also tax-deductible provided that the charge is at arm’s length.

**Entertainment expense**
Entertainment expenses are tax-deductible to the less of 60% of the costs actually incurred and 0.5% of the sales or business income of that year. The excess amount must not be carried forward to and deducted in the following tax years.

**Advertising expense and business promotion expense**
Advertising expenses and business promotion expenses are deductible up to 15% (30% for certain specified industries) of the sales (business) income of that year unless otherwise prescribed in the tax regulations. Any excess amount is allowed to be carried forward and deductible in the following tax years. Advertising expenses and business promotion expenses incurred by the tobacco industry are entirely not tax-deductible.

**Charitable donation**
A charitable donation is tax-deductible up to 12% of the annual accounting profit.

**Organisational and start-up expense**
Organisational and start-up expense is tax deductible fully in the first year of operation.

**Other non-deductible expenses**
In addition, the following expenditures are non-tax deductible expenditures: CIT payments; tax surcharges; penalty, fine and loss arising from confiscation of property; non-charitable donation; and sponsorship expenditures which are non-advertising and non-charitable in nature.

**Tax loss**
Tax losses can be carried forward for no longer than five years starting from the year subsequent to the year in which the loss was incurred.
Group taxation

Group taxation is not permitted under the CIT law unless otherwise prescribed by the State Council.

Transfer pricing regime

All enterprises are required to conduct transactions with related parties on an arm's-length basis. The Chinese tax authorities are empowered to make adjustments to transactions between related parties which are not conducted at arm's length and resulting in the reduction of taxable income of the enterprise or its related parties using the following appropriate methods: comparable uncontrolled price method, resale price method, cost plus method, transactional net margin method, profit split method, and other methods which are consistent with the arm's-length principle. China also adopts stringent requirements on the disclosure of related party transactions in the filing of the annual tax return. In addition, there is also a requirement to prepare contemporaneous transfer pricing documentation if the amount of related parties’ transactions with an enterprise exceed a certain prescribed threshold.

The CIT law also contains transfer pricing provisions relating to cost sharing arrangements and advance pricing arrangements. In addition, it also contains a few tax avoidance rules such as controlled foreign corporation rules (CFC rules), thin capitalisation rule and general anti-avoidance rules.

Controlled foreign company (CFC) rule

Under the CFC rule, the undistributed profits of CFCs located in low-tax jurisdictions with an effective income tax rate of less than 12.5% may be taxed as a deemed distribution to the TRE shareholders. The Chinese tax authorities have published a list of countries (“White List”) that they do not regard to be low-tax jurisdictions.

Thin capitalisation rule

The CIT law has a thin capitalisation rule disallowing interest expense arising from excessive related party loans. The safe harbour debt/equity ratio for enterprises in the financial industry is 5:1 and for enterprises in other industries is 2:1. However, if there is sufficient evidence to show that the financing arrangement is at arm's length, these interests may still be deductible fully even if the ratios are exceeded.

Dividend

CIT is exempted on dividend derived by a TRE from the direct investment into another TRE except where the dividend is from stocks publicly traded on the stock exchanges and the holding period is less than 12 months.

Tax incentives

The CIT law adopts the “Predominantly Industry-oriented, Limited Geography-based” tax incentive policy. Key emphasis is placed on “industry-oriented” incentives aiming at directing investments into those industry sectors and projects encouraged and supported by the state. The tax incentive policies mainly include the following and are applicable to both domestic and foreign investments:

Tax reduction and exemption

CIT may be reduced or exempted on income derived from the following projects:
### Projects/industries

<table>
<thead>
<tr>

<td>5 + 5 years tax holiday</td>
<td>Starting from the first profit-making year</td>
</tr>
<tr>
<td>Integrated Circuits production enterprises which produce integrated circuits with a line-width of less than 0.8um</td>
<td>2 + 3 years tax holiday</td>
<td>Starting from the first profit-making year</td>
</tr>
</tbody>
</table>

### Notes

In the above table, “2 + 3 years tax holiday” refers to two years of exemption from CIT followed by three years of 50\% reduction of CIT. Likewise, “3 + 3 years tax holiday” refers to three years of exemption plus three years of 50\% reduction of CIT.

For income derived from the transfer of technology in a tax year, the portion that does not exceed RMB 5 million shall be exempted from CIT; and the portion that exceeds RMB 5 million shall be allowed a 50\% reduction of CIT.

A CIT exemption applies to the dividend derived by a TRE from the direct investment into another TRE except where the dividend is from stocks publicly traded on the stock exchanges and the holding period is less than 12 months.

A CIT exemption applies to the income derived by recognised non-profit-making organisations engaging in non-profit-making activities.

**Reduced tax rate**

The CIT rate may be reduced under certain conditions. For details, please refer to the *Taxes on corporate income section*.

**Reduction of revenue**

Where an enterprise uses resources specified by the state as its major raw materials to produce non-restricted and non-prohibited products, only 90\% of the income derived is taxable.

**Offset of certain venture capital investment**

For a venture capital enterprise that makes an equity investment in a non-listed small- to medium-sized new/high tech enterprise for more than two years, 70\% of its investment amount may be used to offset against the taxable income of the venture capital enterprise in the year after the holding period has reached two years. Any portion that is not utilised in that year can be carried forward and deducted in the following years.
**Investment tax credit**

Enterprises purchasing and using equipment specified by the state for environmental protection, energy and water conservation, or production safety purposes are eligible for a tax credit of 10% of the investment in such equipment. Any unutilised amount can be carried forward and creditable in the following five years.

**Other incentives**

There are also tax incentives in relation to the deduction of expenses and cost. For details, please refer to the Deductions section.

**Foreign tax credit**

A TRE is allowed to claim foreign tax credit in relation to foreign income tax already paid overseas in respect of income derived from sources outside China based on a country-basket principle. The creditable foreign tax also includes foreign income tax paid by qualified CFCs. However, the creditable amount may not exceed the amount of income tax otherwise payable in China in respect of the foreign sourced income. In addition, there is a five-year carryforward period for any unutilised foreign tax.

**Withholding taxes (WHT)**

Foreign enterprises without establishments or places in China shall be subject to a unilaterally concessionary rate of withholding tax at 10% on gross income from dividend, interest, lease of property, royalties, and other China-source passive income unless reduced under a tax treaty. Nevertheless, dividends distributed by a foreign investment enterprise out of its pre-2008 profit are still exempted from withholding tax.

Withholding tax rates under China’s tax treaties with other countries/nations are as follows (as at 30 April 2010).

Notes

Source: State Administration of Taxation, China

- This table is a summary only, and does not reproduce all the provisions relevant in determining the application of withholding taxes in each tax treaty/arrangement.
- The former Czechoslovak Socialist Republic is divided into Czech Republic and Slovak Republic.
China, People’s Republic of

- The former Yugoslavia is divided into Bosnia, Croatia, Macedonia, Serbia, Slovenia, and Yugoslavia.
- There is no tax treaty signed between China and Bosnia and Serbia.
- The numbers in parentheses refer to the following numbered Notes.

1. Nil on interest paid to government bodies except for Australia, Brunei, Cyprus, Israel, Slovenia and Spain. Reference should be made to the individual tax treaties.
2. The lower rate on royalties applies for the use of or right to use any industrial, commercial or scientific equipment.
3a. The lower rate applies where the beneficial owner of the dividend is a company (not a partnership) that directly owns at least 25% of the capital of the paying company.
3b. The lower rate applies where the beneficial owner of the dividend is a company that directly owns at least 25% of the voting shares of the paying company.
3c. The lowest rate (i.e., 0%) applies where the beneficial owner is a company (not a partnership) that directly owns at least 25% of the capital of the paying company and the investment exceeding EUR 2 million. The lower rate (i.e., 5%) applies where the beneficial owner is a company that directly or indirectly owns at least 10% of the capital of the paying company and the investment exceeding EUR 100,000.
3d. The lower rate applies where the beneficial owner of the dividend is a company that directly owns at least 25% of the capital of the paying company.
3e. The lower rate applies where the beneficial owner of the dividend is a company that directly or indirectly owns at least 25% of the capital of the paying company.
3f. The lower rate applies where the beneficial owner of the dividend is a company that directly owns at least 10% of the voting stock of the paying company.
3g. The lower rate applies where the beneficial owner of the dividend is a company that directly owns at least 10% of the capital of the paying company.
3h. The lower rate applies where the beneficial owner is a company (other than a partnership) which directly owns at least 10% of the capital of the paying company.
4a. The lower rate applies to interest payable to banks or financial institutions.
5a. The higher rate applies to trademarks.
5b. The higher rate applies to copyright of literary, artistic or scientific work including cinematograph films or tapes for television or broadcasting.
5c. The lower rate applies to royalties paid for technical or economic studies or for technical assistance.
6. These tax treaties have not yet entered into force as of 30 April 2010.

In addition to the above tax treaties, a number of these countries have entered into investment protection treaties with China.

**Tax administration**

**Tax return due dates and payment of tax**
The tax year commences on 1 January and ends on 31 December. Enterprises are required to file their annual income tax return and settle the tax payment within five months after the end of the tax year, together with an audit certificate of a registered public accountant in China. Information on related party transactions must be filed with the annual income tax return. In addition, enterprises are required to file and pay provisional income taxes on a quarterly or monthly basis within 15 days following the end of each month/quarter. Three options are available to the taxpayer in computing the provisional tax: (1) actual profits of the month/quarter, (2) average monthly or quarterly taxable income of the preceding year, or (3) other formulas approved by the local tax authorities.
Statute of limitations
For unintentional errors, such as, calculation errors, etc., committed by the taxpayer in its tax filing, the statute of limitation is three years and extended to five years if the amount of tax underpaid is RMB 100,000 or more. For transfer pricing adjustments, the statute of limitation is 10 years. There is no statute of limitation for tax evasion, refusal to pay tax or defrauding of tax payment.

Audit cycle
There is no fixed audit cycle in China. Tax audit targets are selected pursuant to certain criteria.

Recent focus of Chinese tax authorities
Since year 2009, the Chinese tax authorities have strengthened their tax administration on transfer pricing and income derived by non-TREs. The SAT has released a number of tax circulars addressing the tax administration of transfer pricing, foreign contractors and service providers, withholding tax on passive income, direct and indirect transfer of equity interest of a Chinese company by non-TREs, etc. In addition, the SAT has also released circulars relating to the claiming of treaty benefits by non-TREs and interpretation of certain articles and terms in the tax treaties, such as dividends, royalties, beneficial ownership, etc. Aggressive tax planning (including but not limited to tax-avoidance and treaty-abusive arrangements) not supported by reasonable commercial purposes and substance will be subject to scrutiny of the Chinese tax authorities.

Other issues

Foreign investment incentives and restrictions
The tax incentives under the corporate income tax law are applicable to both Chinese domestic enterprises and foreign investment enterprises. Foreign investment is categorised as encouraged, permitted, restricted or prohibited. The details of each category are provided in the “Catalogue for the Guidance of Foreign Investment Industries” promulgated by the Ministry of Commerce on a needed basis from time to time.

Choice of business entity
Foreign companies, enterprises or individuals may, subject to approval from the Ministry of Commerce or other relevant ministries, establish equity joint ventures, contractual joint ventures, wholly foreign-owned enterprises or representative offices in China. Certain foreign financial institutions including banks and insurance companies may, subject to approval, set up branches in China. Starting from 1 March 2010, foreign investors are allowed to establish foreign invested partnership in China.

Exchange controls
Foreign exchange transactions are administered by the State Administration of Foreign Exchange (SAFE) and its branches. The regulatory administration on foreign exchange transactions of an enterprise depends on whether the transaction is a current account item or a capital account item. Current account items refer to ordinary transactions within the context of international receipts and payments, including, but not limited to, balance of payments from trade, labour services, and unilateral transfers. Capital account items refer to items of increase or decrease in debt and equity due to inflow or outflow of capital within the context of international receipts and payments, including, but not limited to, direct investment, all forms of loans, and investment in securities.
China, People’s Republic of

If a transaction falls under the category of capital account items, generally prior approval from the SAFE should be obtained. Generally, a payment that falls under the category of a current account may be remitted to overseas if supported with proper contracts, invoices and tax payment/exemption certificates.

**Intellectual properties**
Patents, trademarks and copyrights are governed by separate laws and administered by separate governmental bodies. The government encourages the development and transfer of intellectual properties. The transfer of technology and technical services are currently exempted from business tax.

**Mergers and acquisitions (M&A) activities**
Both Chinese domestic and foreign investors increasingly are using M&A transactions to establish or expand their Chinese operations.

The Ministry of Finance and the SAT jointly released a tax circular Caishui [2009] No.59 on 30 April 2009 to outline the “CIT treatment for corporate restructuring transactions. Circular 59 addresses the CIT treatments for six forms of restructuring transactions, namely, change in legal form, debt restructuring, equity acquisition, assets acquisition, merger, and spin-off. The general principle is that enterprises undergoing corporate restructuring should recognise the gain/loss from the transfer of relevant assets/equity at fair value when the transaction takes place. However, if certain prescribed conditions are satisfied, the parties involved could opt for special tax treatments, which are essentially tax deferral tax treatment. In other words, recognition of gain/loss of the transferor from transfer of assets/equity can be deferred with respect to the equity-payment portion; and the transferee may take over the transferor’s tax basis of the acquired assets/equity. Such special tax treatments are only available to a very few specific types of cross-border transactions. Circular 59 is retroactively effective from 1 January 2008.

**General anti-avoidance rules (GAAR)**
There is a GAAR provision in the CIT law allowing the Chinese tax authorities to make adjustments to taxable revenue or taxable income where business arrangements, structures, or transactions are entered into without reasonable commercial purpose. The Chinese tax authorities may initiate GAAR investigation if they suspect that an enterprise undertakes any of the following arrangements: abuse of preferential tax treatments, abuse of tax treaties, abuse of corporate structure, use of tax havens for tax avoidance purposes or other arrangements that do not have a reasonable commercial purpose.
Significant developments

Colombia has signed double taxation treaties with Spain, Chile, Switzerland, Canada and Mexico, the first two of which are in force as of 30 April 2010 while the others are still being finalised or awaiting ratification process. In addition, negotiations for double taxation treaties with China, Korea, and Germany have recently commenced.

The last tax reform of Colombia was enacted in late December 2009 as Law 1370 (promulgated 30 December). The scope of this reform is quite limited and refers to three tax matters basically, as follows. The equity tax originally due to expire in 2010 has been rolled over into 2011 (accruing only once), at rates substantially higher than those that applied from 2007 through 2010. The so-called 40% fixed asset super-deduction, which was enacted as an investment incentive, has been reduced to 30% without any other changes. Lastly, beginning 2010, Free Trade Zone users subject to the corporate income tax (CIT) of 15% can no longer claim the 30% fixed asset super deduction as noted below.

A tax reform is likely to take place in Colombia in 2010 or in 2011 amid a fall in tax collections and slow recovery of the economy.

Taxes on corporate income

National companies (i.e., incorporated in Colombia under Colombian law) are taxed on worldwide income. Foreign non-resident companies and local branches of foreign companies are taxed on their Colombian source income only. The current general income tax rate is 33% which is applied on taxable income, with taxable income being generally defined as the excess of all operating and non-operating revenue over deductible costs and expenses. The current general capital gains tax rate is also 33%. However, qualifying businesses located at Free Trade Zones enjoy a reduced rate of 15% (while subject to capital gain tax at 33%).

The customary costs and expenses of a business are generally acceptable as deductible expenditure for income tax purposes provided they are necessary, reasonable and provided they have been realised during the relevant tax year under the accrual or cash method of accounting, as the case may be.

Corporate income taxpayers are required to pay a minimum amount of income tax which is determined based on the so-called presumptive income method, an alternate and rather simple income tax computation method. Under it, presumptive income is measured as 3% of net assets (or tax equity) as of 31 December of the prior tax year.
Colombia

as reported by the tax payer on the corresponding income tax return. Income tax rate is then applied to the greater of regular taxable income (revenue less allowable costs and expenses) or presumptive taxable income (certain business activities are exempted from presumptive taxable income).

Shares and equity interests held in national companies, the net value of assets affected by force majeure events or the net value of assets that are being used in start-up, unproductive enterprises are excluded from the minimum presumptive tax computation.

There are no graduated tax rates for corporate income tax purposes in Colombia; the general rate is a flat rate. Also, the income tax is a national tax that applies to every qualifying taxpayer operating anywhere in the country, under the general rule noted above and the specific rules noted below.

In an effort to continue to attract local and foreign investments, a 2005 law created a Stability Agreement Regime whereby taxpayers can, upon satisfaction of several requirements, including the payment of a fee on the investment commitment, agree with the government on a contract that any future adverse changes to direct taxes are not to apply. However, to the extent changes are for the benefit of the taxpayer (i.e., income tax rate reduction), these are to be applied. An investor has to satisfy certain requirements to obtain a legal stability contract, which include the payment of a premium of 0.5% or 1% on the investment commitment, the definition of which is a new investment or enhancement of one existing which is worth over COP 3,862,500,000 or more.

In Colombia, as a general rule there are no industry-specific income tax rates, there are no dual income tax rates or hybrid tax systems relating to corporate income or tax consolidation. The only material deviation from the statutory income tax rate that is worth mentioning is the special income tax rate that applies for certain free trade zone users, which is 15% (as opposed to the statutory 33% income tax rate).

**Corporate residence**

Corporate residence is determined by the place of incorporation of any given company. For income tax purposes, companies incorporated under foreign laws and which have their main domicile abroad are considered “foreign companies”, whereas any company incorporated in Colombia under Colombian law qualifies as a national company even if fully owned by foreign shareholders.

The concept of permanent establishment has not been defined by Colombian income tax laws. This concept is only relevant in the context of double taxation treaties.

**Other taxes**

**Equity tax**

For taxable years 2007 through 2010, individual (required to make income tax filings) and corporate income taxpayers are subject to an equity tax based on net equity held as of 1 January 2007 provided it amounted to COP 3,000,000,000 or more, at the annual rate of 1.2%. Net equity is generally defined as gross assets less allowable liabilities as reported on the income tax return.
The life of the equity tax has been extended to 2011 for those taxpayers who hold an amount of tax net equity that is also equal to or greater than COP 3,000,000,000 but less than COP 5,000,000,000 as of 1 January 2011 (the tax rate being 2.4%). Where the tax net equity is equal to or greater than COP 5,000,000,000, a 4.8% rate will apply.

The 2011 equity tax is payable in eight equal instalments starting in 2011 through 2014. The 2011 equity tax is not deductible for income tax purposes and cannot be offset against any tax receivables.

Beginning 2010, cross-border related party liabilities (other than for short termed imports) are not to be treated as such to arrive to a net equity basis for purposes of equity tax and presumptive taxable income.

**Value-added tax (VAT)**
The Colombian sales tax or value-added tax (VAT) taxes the sale in the country of any items of tangible personal property that are not fixed assets and are not covered by an exemption, the provision of services within the national territory (certain services supplied outside Colombia but imported also attract VAT) and the importation of tangible personal property that is not covered by an exemption.

The Colombian sales tax is a value-added tax based on a credit-debit system throughout the entire chain of a business. However, certain products are only taxed at the manufacturer level (one-phase VAT). For purposes of VAT calculation, the VAT taxpayer may credit against any output VAT collected to customers that (input) paid to vendors (certain limitations apply).

The general VAT rate is 16%. However, certain services and goods are taxed at 10% (i.e., coffee, rice) and 20% (i.e., mobile phone services). Luxury goods attract higher rates.

Under current law there are VAT exemptions available for the following items, among others:

- Equipment and materials for the construction, installation, assembly and operation of environmental monitoring and control systems;
- Imports of raw materials and supplies made under the so-called Plan Vallejo (see below for description) for further processing and incorporation into products that are to be exported subsequently;
- Temporary importation of heavy machinery and equipment for basic industries (mining, hydrocarbons, heavy chemistry, the iron and steel industry, metallurgy, power generation and transmission, and the water industry);
- Importation of machinery and equipment that is not produced in the country for recycling and processing of waste and refuse;
- Regular imports by major exporters of industrial equipment not produced in the country for the transformation of raw material;
- Freight transportation;
- Public transportation of passengers in the national territory by water or land;
- Transportation of gas and hydrocarbons,
- Interest and other financial income from credit operations;
- Financial leasing;
- Medical care services; and
Colombia

- Public utilities.

A non-resident supplier of VAT-subject services does not require a VAT registration. Rather, it is the locally-based recipient that must apply a reverse-charge rule. No VAT fiscal representation is allowed.

**Vallejo plan for raw materials**

This type allows the receipt, within the national customs territory, under Decree Law 444 of 1967 and Order 1860 of 1999, with total or partial suspension of customs duties, of specific goods destined to be totally or partially exported within a certain period of time, after having undergone transformation, manufacture or repair, including the materials needed for these operations. Under this type, machinery, equipment and spare parts may also be imported, to be used partially or entirely in the production and sale, of goods and services destined for export. The goods so imported remain under restrictions of sale.

Starting on 1 January 2007, customs duty exemptions for the importation of capital goods, spare parts and intermediate goods were eliminated, except for products for the agricultural sector not related with subsidies (Order 11 of 2003, Ministry of Commerce). Plan Vallejo benefits are granted by direct operation to the importer of goods, raw materials or supplies, who produces and exports the finished goods, or by indirect operation to the importer or producer of intermediate goods sold to the exporter, or to whoever provides the associated services with the production of the goods to the exporter.

**Stamp tax**

The stamp tax rate has been reduced to 0% for documents executed beginning 2010.

As a rule, a 0.5% to 1.5% stamp tax applied until 2009 on written agreements and contracts where the related contract value exceeded a certain threshold (COP 142,578,000 approx. in 2009). Under certain circumstances, the deductibility for income tax purposes of the expenditures associated with a written contract can depend upon full payment of the related stamp tax.

**Financial transactions tax**

The financial transactions tax, which is formally known as the Gravamen a los Movimientos Financieros (GMF), is a permanent tax on financial transactions the collection of which is the responsibility of regulated financial institutions and the Central Bank (Banco de la República).

The taxable event is the carrying out of financial transactions that involve the withdrawal of resources deposited in checking or savings accounts as well as in deposit accounts with Banco de la Republica, and the issuance of cashier’s cheques.

The tax rate is 0.4%. After 2007, 25% of the total tax paid is deductible for income tax purposes, regardless of whether or not the transactions have a causal nexus with the income producing activity of the taxpayer.

The law establishes a series of operations and transactions that are exempted from this tax.
**Industry and trade tax**
This is a municipal tax that is imposed on revenue obtained from the exercise of industrial, commercial or service activities in any Colombian municipal jurisdiction. It can be viewed as a special form of a turnover tax.

The industry and trade tax rates are determined by each municipality, and as a rule they range between 0.2% and 1%. All of this tax can be deducted for income tax purposes when effectively paid.

**Property tax**
The property tax is another municipal tax which is imposed on real property located in urban, suburban or rural areas. It is levied on both improved and unimproved real estate. Therefore, the property taxpayers are the owners or holders of real property.

The taxable base of this tax is the current cadastral value of the property, as adjusted for inflation. In some cities, such as Bogotá, the taxable base is the value of the property as appraised by the taxpayer directly.

Property tax rates depend upon the nature and usage of the property, and generally range between 0.4% and 1.2%.

This tax is fully deductible for income tax purposes provided the same has a causal nexus with the income producing activity of the taxpayer (for example, where the tax is paid on rental property).

**Branch income**
Branch income is taxed at the same rate as corporate income, which is 33%. Beginning 2007 the 7% remittance tax on branch profits was eliminated. However, the 7% remittance tax will still apply to retained profits incurred prior to 2007.

**Income determination**

**Income taxes on dividend income**
The so called double income taxation on corporate earnings was eliminated from the Colombian tax system many years ago. This means that shareholders of Colombian companies are, as a rule, not required to pay any income taxes on dividend distributions, but only to the extent that dividends are paid out from earnings that were taxed at corporate level prior to distribution. When the dividends are paid out from earnings that went untaxed at corporate level, a foreign shareholder is required to pay income taxes on the dividends at 33% (in which case the tax is paid as a withholding tax collected by the distributing company). Certain double taxation treaties offer limited or full relief for the 33% dividend income tax.

**Deductions**
In Colombia, the customary costs and expenses of a business are generally acceptable as deductible expenditure for income tax purposes provided they are necessary, reasonable and have been realised during the relevant tax year under the accrual method of accounting. Examples of common (and not so common) deductions include the items below.
Depreciation
As a general rule, the acquisition cost of tangible fixed assets is fully depreciable for income tax purposes. The normal estimated useful lives are as follows:

<table>
<thead>
<tr>
<th>Asset</th>
<th>Years</th>
</tr>
</thead>
<tbody>
<tr>
<td>Buildings and pipelines</td>
<td>20</td>
</tr>
<tr>
<td>Machinery and equipment, office furniture</td>
<td>10</td>
</tr>
<tr>
<td>and fixtures</td>
<td></td>
</tr>
<tr>
<td>Vehicles and computer equipment</td>
<td>5</td>
</tr>
</tbody>
</table>

Depreciation rates can be increased by 25% for each additional eight-hour shift of asset use (and pro rata for fractions thereof). When tax depreciation exceeds book depreciation, the taxpayer is required to establish a reserve equivalent to 70% of the difference. Recapture of depreciation on the sale of depreciated property is taxed at 33%.

Depletion
It is available under certain specific circumstances, since generally recovery of costs takes place via amortization.

Amortisation of intangible assets
Taxpayers can amortise, for income tax purposes, the cost of any acquired intangible asset over a period of five years at a minimum, unless the taxpayer is able to prove that the amortization period should be less because of the specific nature or conditions of the business.

Interest
Taxpayers are generally entitled to deduct any interest paid to financial institutions or to third parties.

Tax loss carry-forwards
Net tax losses (adjusted for inflation) incurred in 2007 or thereafter may be carried forward without limitation. There is no loss carryback. Certain limitations apply to the offset of losses transferred on merger reorganisations.

Payments to foreign related parties
Royalties and similar charges
Royalties and the costs of exploitation or acquisition of all kinds of intangible property that are charged by foreign related parties are admissible as income tax deductions, provided that the corresponding withholding taxes are collected at generally 33% (10% in most double taxation treaties). Other types of payments are subject to the general rules for expenses incurred abroad.

Management overhead expenses
Management overhead expenses paid to a foreign related party (e.g., the parent company) are deductible provided they are subject to transfer pricing regulations and meet the arm's-length test, and provided the management services are real and are specifically related to the income producing activity of the local subsidiary which pays them. These expenses must also be carefully documented such that the local subsidiary can provide evidence to the authority of the fact that they are specifically related to its Colombian operations: to the planning and direction of the operations, the setting and implementation of management controls, the measurement of progress...
made toward specific business goals, the related financial results, etc. Where these services are supplied inside Colombia, a 33% withholding tax is also required to ensure deductibility.

**Interest**
Interest and related financial costs (including foreign exchange losses) paid to foreign related parties are deductible provided they are subject to transfer pricing regulations and meet the arm’s-length test. Furthermore, interest and the related financial costs paid on short-term financing relating to imports of merchandise and raw materials directly supplied by foreign related parties are also deductible for income tax purposes. In most cases, interest paid to non-resident lenders is not subject to withholding tax while at the same time being fully deductible (arm’s-length principle must be satisfied for related party loans). However, only financial institutions registered with the Colombian Central Bank are permitted to extend loans into Colombia.

**Net operating losses**
**Expenses incurred abroad**
As a general rule, expenses incurred abroad which are not subject to withholding taxes are limited to 15% of the taxpayer’s net income as computed before deducting such expenses. However, these expenses are fully deductible when they have to be capitalised under Colombian Generally Agreed Accounting Principles (GAAP).

**Special deductible items**
Colombian income tax laws have established certain special deductible items which include the following:

- All of the industry and trade tax and real property tax actual payments and 25% of the financial transactions tax actual payments are deductible;
- The so-called productive fixed asset super-deduction, which is equal to 30% of the acquisition cost of any productive, tangible fixed assets is deductible for the taxpayer in the year in which the qualifying assets are acquired (or built, as the case may be). In addition, all of the acquisition cost’s are available as a tax amortisation or depreciation base;
- 125% of the investments made in certain scientific and/or technological projects or in professional training projects of governmental, public or private institutions of higher education are deductible. This deduction cannot exceed 20% of the taxpayer’s net income as determined before subtracting the amount of the investment;
- All of the investments made for the control and improvement of the environment. This deduction cannot exceed 20% of the taxpayer’s net income as determined before subtracting the amount of the investment; and
- Starting in 2007, tax losses may be carried forward and set-off against the regular taxable income obtained by the taxpayer in any subsequent taxable year.

**Group taxation**
Group taxation or group consolidation is not allowed for income tax purposes in Colombia.
Colombia

**Tax incentives**

Special corporate income tax relief items or incentives include the ones noted below.

As items of exempt income, the law has established the following:

1. Income obtained by publishing companies from the publication of scientific and cultural books, until year 2013;
2. The principal and interest (as well as related commissions and fees) paid pursuant to public foreign debt operations;
3. Income from the sale of electric power generated from wind, biomass, or agricultural waste, for a period of 15 years, provided the seller issues and negotiates Greenhouse Gas Reduction Certificates;
4. Income obtained from slow yield crops and plantations, including cocoa, rubber, palm oil, citrus and other fruits;
5. Income obtained from river transportation services with shallow draft vessels and barges, for a period of 15 years, starting in 2003;
6. Income obtained from hotel services offered in new hotels that are built within 15 years counted from 2003, for a term of 30 years, until 2032;
7. Income obtained from hotel services offered in refurbished or enlarged hotel facilities, where the related work is started within 15 years counted from 2003, for a term of 30 years;
8. Income obtained from ecotourism services, for 20 years starting in 2003;
9. Income obtained from investment in new forestry plantations, sawmills and plantations of timber-yielding trees; and
10. Income obtained from new medicinal and software products developed in Colombia and protected under new patents registered with the authorities, with a high content of national research and technology, until 2013.

**Special income tax rate for free trade zones**

Free trade zone (FTZ) industrial users enjoy a special income tax rate. The so-called FTZ industrial goods users and industrial service users pay corporate income taxes at a rate of 15% only, on income earned from their FTZ operations. Effective 1 January 2010, the 30% fixed asset super-deduction is not available for 15% income tax rate-subject taxpayers.

**Withholding taxes (WHT)**

The Colombian tax system provides for withholding taxes as a general mechanism of advance tax collection. Under the law, as a general rule all corporate entities (and big individual merchants) are required to collect or withhold taxes from payments made to third parties. The withholding tax collection agents must collect the applicable withholding tax amounts, deposit the withheld amounts with the authority, file monthly withholding tax returns and issue withholding tax certificates to the payees. The payees who are also income tax return filers credit the withheld taxes against the annual income tax liability computed on their returns.

As noted above, foreign non-resident persons are taxed on their Colombian source income only. Generally, the full tax liability accruing on payments made to foreign non-resident persons is satisfied via the collection of the applicable withholding taxes. The withholding tax rate on payments made to foreign non-resident persons for taxable dividends, royalties, and taxable interest is 33%. On payments made for
Colombia

consulting, technical assistance and technical services the withholding tax rate is 10% (whether supplied inside or outside Colombia). On payments made for software licences the withholding tax rate is 26.4%.

On other types of payments which give rise to Colombian source income the general withholding tax rate is 14%, with the foreign non-resident payee being required to file an income tax return in Colombia to report the final income tax liability, at 33% of net income (and being entitled to a refund where the final liability is less than the amount withheld at the 14% rate or being required to pay the deficit should the case be the opposite).

**Exempt interest**
Interest paid under foreign loans is not treated as Colombian-source income and thus is not subject to withholding taxes where the operations carried out by the local debtor qualify as activities that are considered of interest for the economical and social development of the country.

The scope of the activities that are considered of interest for the economic and social development of the country is relatively wide. The applicable regulations mention as qualifying activities for these purposes those related to the primary, manufacturing, and services sectors; as examples of qualifying service activities the regulations mention transportation, engineering, hotel services, tourism, health care services and the construction and sale of housing units.

**Tax administration**

**Tax returns**
For income tax purposes, the taxable period is the calendar year, with no exceptions being admissible. The statute of limitations is generally two years following the actual filing of the return (a longer or shorter statute of limitations applies in certain cases).

**Payment of tax**
For income tax purposes, corporate taxpayers are divided into “large taxpayers” and “other taxpayers.” Large taxpayers pay their estimated outstanding income tax liability (outstanding after deducting applicable withholding taxes from the estimated final liability) in five instalments over the year in which they file their annual income tax return.

Income tax return filing due dates are set by the government every year. Usually they fall in the months of April and May.
Colombia

**Foreign tax credit**
Foreign income taxes are creditable subject to certain limitations. Generally, the amount of the credit cannot exceed the Colombian income tax rate (33% or 15%, as the case may be). Double taxation treaties provide for more comprehensive credit systems as well.

**Other issues**

**Choice of business entity**
The most common type of company used in Colombia since the beginning of 2009 has been the so-called simplified stock company or simplified corporation, known as a SAS (sociedad por acciones simplificada). Besides SAS, foreign investors also use branch offices of an offshore entity as their investment vehicles in Colombia.

As a general rule, from a high-level perspective, there are no differences between a branch office and a subsidiary (such as a SAS) as far as Colombian taxation is concerned. All the taxes discussed above would apply equally to a branch operation or a subsidiary operation. Now, from a commercial perspective, and specifically from the perspective of corporate liability, operating through a branch office means that the head office is exposed to direct liability for all the obligations of the branch, tax obligations included. Operating through a subsidiary means that only the subsidiary is liable for its obligations as a general rule, that is to say that the shareholders are not liable for company obligations. Of corporations, the advisable choice would be a SAS which is very flexible in nature, easy to incorporate and can be held by one single shareholder (regular corporations require a minimum of five shareholders).
**Significant developments**

No significant developments in corporate taxation have occurred in the Democratic Republic of Congo (DRC) in the past year.

**Taxes on corporate income**

Corporate tax in the DRC is paid on profits realised by a company, which carries out any operational activity in the country.

Foreign-sourced profits (e.g., dividends received from a foreign subsidiary, for instance) are exempt from corporate tax.

The corporate tax rate is currently 40% (30% for mining companies), with a minimum of 0.1% of the yearly turnover, which cannot be less than USD 2,500.

Please note that turnover includes all exceptional profits and interest received, in essence any credits on the income statement, which have the nature of income or gain.

**Corporate residence**

The set of rules related to tax residence are determined by:

- Ordinance-Law No. 69/009 dated 10 February 1969.
- Tax doctrine:
  - Circular No. 02372/CAB/FIN/73 dated 8 May 1973;
  - Circular No. 3749 dated 27 November 1989; and

The set of rules can be summarised as follows:

- Article 68 of Ordinance-Law No. 69/009 dated 10 February 1969 states that:
  - Foreign companies that carry out an activity in the DRC are taxable on profits they realised through permanent establishments or fixed establishments located in the DRC.
  - According to Article 69, a foreign company is deemed as having a permanent establishment (PE) in the DRC in the following cases:
    - It has a material place of business (head office, branch, etc.) or any other fixed or permanent installations producing revenues in the DRC; or
Congo, Democratic Republic of

- Without having a material place of business, it carries out a professional activity under its own name during a period of at least six months, insofar as such an activity cannot be considered as a technical assistance to a local company.

**Other taxes**

*Tax on rental income*

Rental income related to buildings, houses, offices, premises, warehouses, etc. is taxed in the DRC at the rate of 22%.

In order to secure the payment of this tax, the tax code has put into practice a withholding tax system.

The tenant is liable to withhold 20% of the rentals paid and to refund this tax to the authorities.

**Branch income**

Tax rates on branch profits are the same as on corporate profits.

However:

- The costs involved abroad by the head office of the branch are not deductible in the DRC.
- The branch is submitted to the taxation of deemed distributed profits on top of corporate tax, i.e., on profits realised branch will pay:
  - Corporate tax on profits (40%); and
  - A 20% tax based on 50% of the net profits after deduction of corporate tax.

**Income determination**

Taxable income consists of profits from any industrial, commercial, agricultural or real estate operations entered into by the taxpayer in the DRC, as well as any increases of assets invested as a result of such activities and any increases derived from capital gains either realised or not, of any nature and origin.

To arrive at taxable income, the taxpayer may deduct all costs actually incurred in the production of income of the company, during the year, such as:

- Rents actually paid and rental expenses linked to buildings or parts of buildings used in the exercise of the activity and any overheads derived from their maintenance, lighting, etc.;
- Overheads costs, from maintenance of furniture and equipment used in connection with the company's activities;
- Wages, salaries, bonuses and allowances of employees and workers used in the operation, benefits in kind if these have been added to remunerations paid;
- Depreciation of fixed assets used in the company's operations; and
- Interest costs on funds borrowed from third parties and invested in the company's operations and similar type expenses, such as annuities or fees related to the operation.
Please note if the borrower is a private limited company ("Société Privée à Responsabilité Limitée" or SPRL) and if the lender is one of its shareholders, the interests on loan paid are not deductible from the corporate tax basis.

**Deductions**

Professional expenses directly related to the acquisition of income are tax-deductible.

The following are examples of expenses which may not be deducted to arrive at taxable income:

- Expenses of a personal nature, such as accommodation, school fees, leave indemnities and any other expenses not necessarily incurred in the business;
- Income tax;
- Legal or administrative fines of any nature;
- Expenses linked to rental properties as a landlord as well as related depreciation expenses; and
- Provisions.

Estimated tax losses can be carried forward for the next five years following the tax loss year; however, the losses must be deducted from the first profits of the company. A company may get audited up to five years after submission of tax return, in practice there is a tax audit every year.

In respect of payments made by a local company to a foreign one, for services (management services, technical assistance services), Ordinance No. 69/009 of 10 February 1969 and its subsequent modifications, provides that such expenses are deductible, provided:

- The services rendered can be clearly identified;
- The services cannot be rendered by a local company; and
- The amount paid for the service is not overstated and is commensurate to the nature of the service itself.

Technical assistance/management services must be clearly formalised in an agreement, including the modalities of calculation of the corresponding fees payable.

**Group taxation**

There is no group taxation regime per the DRC tax legislation.

**Tax incentives**

An Investments Code was issued by Law No. 004/2002 dated 21 February 2002.

This code allows for a certain number of tax, customs and general order measures designed to favour direct investments.

The preferential tax treatment measures of the Investments Code apply to direct investments and/or to entities that carry them out.
The regime of the Investments Code does not apply to numerous sectors, notably:

- Mining and hydrocarbons;
- Banking and insurance; and
- Trade.

Particularly, the Investments Code grants appointed investors an exemption of corporate tax during the investment period.

Moreover, such advantages are granted for a determined period depending on the location of the investments – three years (Kinshasa), four years (Lubumbashi, Kolwezi) and five years (Katanga).

**Withholding taxes (WHT)**

According to Article 13 of the Tax Code, the following payments are subject to a WHT:

- Dividends paid by a local company to its shareholders;
- Royalties: the tax law defines royalties as any kind of remuneration paid for the use, or for the concession of a copyright on art works, scientific works, film works, brands, charts, any design, or formula or any secret process or recipe, as well as for the use of industrial, commercial or scientific equipment and for intellectual property in any industrial, commercial or scientific field;
- Interest on funds borrowed for business purposes.

Please note, if the interest is paid to a local company, the WHT does not apply as the interest is included in the taxable income of the company charging such interest.

The DRC has not entered into a double tax treaty (DTT) with any other nation.

As such, in order for a beneficiary to benefit from WHT paid, it will have to take advantage of its own country’s tax legislation, in order to identify double tax credits. Therefore, it is impossible to get any WHT reimbursed.

**WHT rate and payments**

The rate of WHT is 20% which is based on the gross amount of sums paid.

If the payee does not withhold the tax from the amount invoiced and pays on his own the tax of 20%, then the tax authorities consider that the basis of the 20% tax is composed of the amount invoiced plus the amount of the tax. Consequently, in the case that the DRC company takes in charge the corresponding WHT, the WHT rate will be 20/80 and the amount of tax will not be tax-deductible.

However, for royalties, the WHT is charged on the net amount of the royalties paid.

The tax authorities consider that the net amount of royalties is calculated by deducting 30% from the royalties invoiced (i.e., the taxable basis will be 70% of the royalties invoiced).

Mining companies are, under certain conditions exempt from withholding tax on interest paid and are subject to a 10% withholding tax on dividends paid to their shareholders.
Tax administration

Payment of corporate tax is required when submitting the yearly tax return (by 31 March of the following year).

Like other taxes, the corporate tax is payable in local currency through a DRC bank account by a wire transfer to the bank account of the Public Treasury. Consequently, in order to operate in the DRC, the opening of a bank account in a DRC bank is mandatory. Moreover, the Tax Authorities require the bank account number of the applicant in order to grant a taxpayer number.

However, the collection of corporate tax is on an instalment basis or by way of prepayments (depending on taxpayer type).

Instalments of corporate tax
Instalments, in respect of corporate tax only, apply to taxpayers who come under the supervision of two specific kinds of tax departments – the Directorate General (DGE), the department of the tax authorities in charge of the most important taxpayers, and the Centre des Impôts (CDI), tax centres.

These taxpayers have to pay two instalments each representing 40% of the corporate tax paid during the previous fiscal year (including the amounts assessed by the Tax Authorities). This, therefore, totals 80% of the tax actually paid in the previous year. The first instalment must be paid before 1 August, and the second instalment before 1 December. Both payments are offset against the final corporate tax due for the fiscal year. The balance is paid when the tax return is submitted.

Prepayments of corporate tax (Précompte BIC)
Prepayments of corporate tax are to be paid by taxpayers (excluding those under the supervision of DGE and the CDI), in respect of import and export activities by wholesalers, and on the settlement of invoices relating to provisions of services or for building works.

Prepayments of corporate tax are withheld at source and collected by the Customs Authorities (OFIDA) for imported and exported goods, local manufacturers, wholesalers or semi-wholesalers, beneficiaries of services rendered and employers or contracting authority, for building works on the settlement of the invoices.

Amounts withheld at source must be refunded monthly to the Tax Authorities and they are creditable against the final corporate tax to be paid at the end of the fiscal year by the importer, exporter, service provider, etc.

The prepayment rate is 1% based on invoice value.

Significant developments

The Republic of the Congo had no major tax developments in 2010.

Taxes on corporate income

The majority of corporate income tax (CIT) provisions in the Congolese General Tax Code arise from the implementation, under Congolese law, of CEMAC regulation No. 02/01/UEAC-050-CM-06, which revised the Act No. 3/72-153-UDEAC dated 22 December 1972.

Tax rates

The standard corporate income tax (CIT) rate in the Republic of Congo is 36%, with certain exceptions.

The minimum tax payable is 1% of the annual turnover and cannot be less than EUR 1,524.49 (EUR 762.25 if annual turnover is less than EUR 15,244.90).

A 2% minimum tax is payable by companies showing losses during two consecutive fiscal years. The 2% rate is applied to the sum of gross turnovers and products and benefits realised by the company in the most recent year in which it earned a profit. The 2% tax is not deductible for CIT purposes. However, in a company’s first profit-making year after incurring the losses, half of the 2% tax is deductible.

The CIT rate for agricultural companies is 25%.

A tax rate of 30% applies for:

- Property companies;
- Revenues resulting from leasing or occupation of built or empty lands received by public establishments and non-profit making organisations; and
- Revenues resulting from capital assets that are not subject to tax on securities received by public establishments, non-profit-making organisation or communities.

A tax rate of 35% is applied on a deemed profit equal to 22% of the total gross remuneration (i.e., an effective tax rate of 7.70% of the taxable turnover made in Congo) derived from services rendered by:

- Foreign companies that qualified for the simplified tax regime; and
Congo, Republic of

- Local companies and branches realising more than 70% of their annual turnover with oil companies and oil services companies (in this case, the deemed profit tax is regarded as an advance payment of CIT levied at the rate of 36% on net profits).

A 20% witholding tax (WHT) is imposed on income sourced in Congo that is derived by foreign companies not necessarily engaged in activities in Congo.

**Corporate residence**

**Resident companies**
Congoese registered companies are taxed on the territoriality principle. As a result, Congoese companies carrying out business out of Congo are not taxed in Congo on the related profits.

**Non-resident companies**
In the absence of a tax treaty providing otherwise, a non-resident company is liable for CIT on income realised in the Congo or deriving from or resulting from work or services of any nature supplied or used in the Congo.

**Other taxes**

**Value-added tax (VAT)**
Under the provisions of the VAT Law No. 12-97, dated 12 May 1997, all economic activities conducted in the Republic of Congo are subject to VAT, regardless of their purpose, their profitability or the legal status of the business performing them, and irrespective of whether these activities are habitual or occasional or originate in Congo or from a foreign country. Therefore, any person, natural or legal, engaged in an industrial, commercial or professional activity is subject to VAT unless specifically exempt by law.

Section 8 of the VAT law states a service is considered as provided in the Republic of Congo, when this service is used or exploited in the Republic of Congo.

The Congolese VAT rate is 18%. In addition to VAT, there is a sales tax (surtax), calculated at the rate of 5% applied to the amount of VAT, which must be invoiced and paid at the same time as the VAT. Therefore, the VAT rate is globally 18.9%. The surtax is not deductible (final cost).

A VAT return must be filed on a monthly basis before the fifteenth of every month.

**Business tax and accessory taxes**
The business tax is a tax paid by traders and professionals. The business tax is imposed on most commercial, industrial and professional enterprises (including branches of foreign enterprises), although some traders are exempt.

Tax is charged on the actual or deemed annual rental value of the tangible assets of the enterprise, on the power of the machines and on the average number of employees.

Any new taxpayer undertaking an activity requiring a trading licence must declare it in writing to the tax administration, within 15 days following the start of the business.
For the first tax year, the business tax is paid on the basis of the date on which the business started. The tax is due from the first day of the quarter during which the business started.

The contribution called business tax ("patente," in French) is a tax collected by local communities. This tax, paid during the first three months of every year, includes both a fixed and variable fee depending on the specifications of the profession. The principal amount of the tax is increased with “additional centimes”, “communal centimes”, and “contributions to the National Investment Fund” (accessory taxes).

**Computer royalty**
The 2003 Finances Act instituted a computer royalty, applicable without exception or exemption to all importation and exportation of goods. The royalty applies on the customs taxable value of any imported or exported goods in the Republic of Congo. The rate is fixed at 2%, as per the 2004 Finances Act.

**Oil and gas**
Specific rules and caps apply for the upstream (production) oil and gas industry.

**Customs duties**
When applicable, import duties are payable at rates ranging from 5% to 30% on the customs value of imported goods. Customs value is calculated on the cost, insurance and freight level (CIF).

### Customs duties rates

<table>
<thead>
<tr>
<th>Group</th>
<th>Rates (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Basic necessities</td>

<td>10%</td>
</tr>
<tr>
<td>Intermediate and miscellaneous goods</td>
<td>20%</td>
</tr>
<tr>
<td>Consumer goods</td>
<td>30%</td>
</tr>
</tbody>
</table>

**Additional entry taxes**
Additional entry taxes apply on the importation of goods:

- CEMAC integration tax: 1% on CIF value;
- Statistic tax: 0.20% on CIF value;
- Organisation for the Harmonisation of Business Law in Africa (OHADA) contribution: 0.05% on CIF value; and
- Economic Community of Central African States (CEEAC) contribution: 0.04% on CIF value.

**Rent tax**
Rent tax is payable annually on the rental of built property. The tax is equal to one-twelfth of the rents due within the year. The tax also applies on non-built property for business purposes. The tax is imposed on the occupant of the premises (whether the occupant is the owner, a tenant or a subtenant).

The tax is due annually on 28 February at the latest. For new lease agreements, the tax is due within three months of the effective date of the lease agreement and is calculated as a proportion of the rents due until the end of the year.
The tax is paid by the tenant on behalf of the owner, or by the subtenant on behalf of the tenant.

Tenant and subtenants make a once-a-year deduction between 1 January and 30 April of the same year from all the rents due to the owner.

A 50% fine, assessed on the amount of the tax, is due for any late payment of the real estate tax.

**Registration fees and stamp duties**
Registration fees amount to 5% of the value of the annual rent paid during the tax year, including premises charges if any (Article 18 of the Congolese General Tax Code, Part II, Book I). “Additional centimes” also apply at a 5% rate of the registration fees. Stamp duties and registration fees should be paid for the total duration of the lease agreement. In the case where the lease agreement is renewed, stamp duties and registration fees should be paid for the renewable period.

Stamp duty ranges from XAF 200 to XAF 20,000 on certain documents.

Examples of documents that are subject to stamp duty include:

- Letters of agreement and other letters, which are prepared for use as evidence of act, fact or condition of civil nature;
- Notarial deeds and their copies; and
- Visas and flight tickets.

Transfer of company shares are subject to a 5% registration fee.

**Tax on company-owned cars**
This tax, which applies to company-owned cars from the previous fiscal year, is due 1 March at the latest.

With the exception of estate cars, private company cars, which fall into the category of own-used cars for the issuance of vehicle registration documents, are subject to tax. The tax rates vary from XAF 200,000 for engine ratings nine horsepower and below, to XAF 500,000 for the rest. Any late payment of the tax is subject to a 100% penalty.

Cars registered more than 10 years ago are exempt from tax.

**Land tax on built properties**
Land tax is payable annually on built properties. However, properties built for the purpose of accommodation are exempt for 10 years and properties built for business purposes are exempt for five years. The effective rate is determined every year by the local council.

The tax is levied on the rental value after a deduction of 25% (decline, maintenance and repair expenses) for properties built for business purposes. The tax is levied on the cadastral value after a deduction of 25% (Decline, maintenance and repair expenses) for properties built for accommodation purposes. The tax is due from the owner.
Land tax on non-built properties
Land tax is payable annually on non-built properties. However, properties intended for plantations and breeding are temporarily exempt for a three to 10 year range. The effective rate is determined every year by the local council.

The tax is levied on 50% of the cadastral value, determined every year by the Ministry of Finances. The tax is arbitrarily assessed by hectares in rural areas according to the nature of the plantations. The tax is due from the owner.

Branch income
Tax rates on branch profits are the same as for domestic corporations. No tax is withheld on transfers of profits to the head office.

Income determination

Determination of income
Taxable income is based on financial statements prepared according to generally accepted principles and the standard statements of the Organisation for Harmonisation of Business Law in Africa (OHADA) treaty.

Business expenses are generally deductible, unless specifically excluded by law.

Capital gains
Capital gains are treated as ordinary business income and are taxed at the standard corporate income tax rate of 36%.

However, a capital gain realised on the disposal of a fixed asset in the course of trading is excluded from income for a period of three years, if the taxpayer reinvests the gain in new fixed assets for the business.

If the business is totally or partially transferred or discontinued, only half of the net capital gain is taxed if the event occurs less than five years after the start-up or purchase of the business and only one-third of the gain is taxed if the event occurs five years or more after the business is begun or purchased. However, if the business is not carried-on in any form, the total gain is taxed.

Dividends
Dividends paid by a Congolese company are subject to a 20% withholding tax on securities income (Impôt sur les Revenus des Valeurs Mobilières or IRVM) unless a different rate applies under an international tax treaty (France, CEMAC, OCAM). This IRVM is regarded as an advance payment for the final calculation of CIT.

Dividends are treated as ordinary business income and are taxed at the standard income tax rate of 36% for resident corporations.

After three years, profits credited to the non-compulsory reserve are considered to be dividends and are accordingly subject to the 20% WHT on dividends.
**Inter-company dividends**
Dividends received from a Congolese company (DivCo) by a commercial company incorporated in Congo (HoldCo) are exempt from CIT and subject to a final 20% WHT if the following conditions are met:

- HoldCo and DivCo are incorporated in the CEMAC;
- HoldCo holds 25% of the capital of DivCo; and
- HoldCo holds the shares for at least two years from the date of purchase.

However, 10% of dividends that are deemed to represent the share of cost and expenses are included in the taxable profits of HoldCo and liable for the CIT.

If the above conditions are not met, dividends received from a Congolese company by another Congolese company are subject to a 20% WHT, which is an advance payment of the recipient's CIT.

**Deductions**

Generally, a deduction is allowed for all expenditures incurred to obtain, collect and maintain business profits.

To be deductible, expenses should be incurred necessarily for the normal purposes of the business, and be supported by suitable evidence.

**Depreciation and depletion**

In general, all types of fixed assets, except land, are depreciable for tax purposes, as long as they can be shown to have been acquired for business purposes of the corporation. Goods costing less than EUR 152.44 per item may be written-off on purchase as expenses. Depreciation must be calculated on the original purchase price. The straight-line method is used. The General Tax Code sets forth maximum rates of depreciation.

Depreciation recorded when the company is in a loss position may be carried forward without limitation and deducted from the first available taxable profits, provided it was appropriately disclosed in the annual corporate income tax return.

 Recoverable and identifiable packaging is regarded as fixed assets. They are recorded in a fixed asset account at the time of purchase. This packaging is regarded as returnable packaging when the supplier intends to act as the sole owner of the packaging.

 Unrecoverable packaging is recorded as an expense and deductible for tax purposes.

 Exceptional accelerated depreciation may be authorised in certain circumstances for heavy equipment with a value of more than EUR 60,979.60. This special accelerated depreciation does not apply to private vehicles owned by the enterprises.

**Exceptional depreciation method**

The exceptional depreciation method is an accelerated depreciation method.

Companies may elect the accelerated depreciation method for heavy materials and equipments that:
Congo, Republic of

- Are purchased new for a value higher than EUR 60,979.60;
- Have a useful life of at least three years;
- Are used for manufacturing, processing, transport and handling; and
- Are bound to an intensive use.

The application for the accelerated depreciation must be submitted to the head office of taxes within three months of the purchase of the assets to be depreciated. The option is granted upon approval of the ministry in charge of finances. According to the implementation instructions adopted by the head office of taxes on 24 January 2003, if the administration fails to respond to the application for accelerated depreciation within three months, the application is tacitly granted.

The accelerated depreciation rate is 40%.

The normal annual depreciation is calculated on the residual value of the assets.

According to the implementation instructions adopted by the head office of taxes on 24 January 2003, a 40% deduction may be taken in the year of acquisition of the previously mentioned assets, increased with the normal rate calculated on the residual value after application of the accelerated depreciation. These assets are depreciated on a straight-line basis thereafter.

**Net operating losses**

For tax purposes, losses may be carried forward to offset profits earned in the three succeeding fiscal years. Carryback losses are not permissible. Tax consolidation is not available.

**Payments to foreign affiliates**

Allowable deductions include sums paid abroad to foreign companies for:

- Actual services, notably overheads for the operations made for the benefit of a company based in Congo, including: costs of studies, technical, financial and accounting assistance, commissions and fees, and interests; and
- Use of patents, licenses, trademarks, drawings, manufacturing processes, patterns and similar rights to the extent the payer proves they correspond to actual operations, and they are neither abnormal, nor excessive.

Subject to the provisions of tax treaties (France, CEMAC and OCAM), the deduction is allowed within a limit of 20% of taxable profits before deduction of the expenses in question.

In the event of losses, the rate is applied on the results of the last profit exercise, which is not prescribed. In the absence of profits during the period out of prescription, the sums paid are not allowed as tax deductions.

When the sums are not allowed, as a whole or in part, in the deductible expenses, they are deemed to be paid benefits, and are subject to tax on the dividends at the rate of 20%.

Royalties for the transfer or concession of patents, trademarks, drawings and other similar titles, are deductible to the extent the payer proves they are still valid. When these royalties benefit an enterprise contributing in the management or share capital
of an enterprise in the Republic of Congo, they are deemed to be paid benefits, and are subject to tax on the dividends at the rate of 20%.

Commission or brokerages, relating to goods purchased on behalf of enterprises based in Congo, are allowable tax deductions up to 5% of the purchase amount made by the central purchasing office, the head office or the intermediaries. The reductions shall benefit enterprises based in Congo. An original supplier’s invoice must be attached to the intermediary’s invoice.

The payer shall prove that:

• The purchases necessitated the interventions of a broker or intermediary;
• The commissions provided better supply conditions compared with the actual situations on the market; and
• The commissions are not excessive compared with the nature of the services.

**Taxes**

Taxes, other than income taxes, are usually deductible. Examples of deductible taxes include: customs duties, excise duties, payroll taxes, business license tax, registration taxes and unrecoverable value-added tax.

Corporate income tax itself is not deductible, nor is the special tax on company-owned cars.

Taxes withheld on remuneration paid to third parties (third parties taxes) and remitted to the tax office by a Congolese enterprise are not deductible.

**Interest paid to shareholders**

Interests are deductible subject to the following two conditions:

1. General limit – regardless of the form under which a legal entity is registered, the deduction is allowed in the limit of the interest calculated at the rate of the advances in current accounts on states funds of the Bank of the States of Central Africa (BEAC) raised by two points. Currently, the ceiling for the deduction of interests is 7.25%.

2. For private limited companies and public limited companies – the deduction is allowed according to the status of control over the management of the enterprise.
   a. Shareholders who have control over the company de facto or de jure: The deduction is allowed only to the extent that the sums paid do not exceed, for the shareholders as a whole, half of the paid-up capital and are within the limit sets forth in condition 1 (General limitation).
   b. Other shareholders:
      The limit indicated in condition 1, General limitation applies.

**Group taxation**

There is no tax provision in Congo for group taxation.

**Tax incentives**

Law No. 008-92 of 10 April 1992 giving rise to the Investment Code, modified by Law No. 07/96 of 6 March 1996, was repealed by Law No. 6-2003 of 18 January 2003.
The new investment regime in Congo was set out by Law No. 6-2003 of 18 January 2003, which established the investment charter. The charter’s application, Decree No. 2004-30 of 18 February 2004 established modes of business registration.

1. **Scope** – the following may be registered under the investment charter:
   - Businesses wishing to pursue an activity in the Republic of Congo, except for activities such as brokerage, trade, import and production of arms, import or processing of toxic waste and by products;
   - Under certain conditions, commercial activities linked to collection, storage, distribution and export of locally produced products, except alcoholic beverages and tobacco;
   - New activities (as opposed to pre-existing activities);
   - Forestry businesses benefiting from a forestry permit called the forestry development unit; and
   - New companies coming from the redemption of a registered company.

2. **Conditions of eligibility for the investment charter** – which are required to be eligible for the investment charter, the company must satisfy the conditions below:
   - Be registered with the Trade and Personal Credit Registry in Congo;
   - Create permanent employment, to be carried out over a minimum of 280 days per year;
   - Maintain company share capital equal to or greater than 20% of investments;
   - Primarily use local principal materials necessary for the production of the finished or semi-finished product, with equal conditions concerning price, quality and time of delivery to outside, in the case of industry;
   - Primarily use local business services, with equal conditions concerning quality, price, time of realisation regarding payments to external businesses, for the case of service businesses;
   - Be registered at the Congolese National Welfare Fund;
   - Open an account at a local bank or any other financial, savings or credit establishment duly established; and
   - Primarily use a local workforce, with the same expertise as the foreign workforce.

3. **Registration procedure** – entitlement to the benefits prescribed by the charter is subject to obtaining a registration agreement, provided by the National Investment Commission.

4. **Fiscal and customs benefits set out by the Investment Charter** – these benefits vary according to privileged regimes, motivation measures and in a general manner.

**Privileged regimes**
The charter sets out three privileged regimes:

- General regime (G);
- Special regime (S); and
- Preferential development zone regime.

**General regime (G)**
The general regime applies to businesses that fulfil the aforementioned general requirements, and carry out investments greater than or equal to EUR 152,450.

Special advantages are conferred according to the period of activity of the registered business.
During the set-up period and the first three exploitation tax years, the company receives several benefits.

In customs matters, the company benefits from the provisions of the CEMAC customs code relative to asset improvement mechanisms for export activity and from the suspension of customs duty in the form of temporary admission or franchise for natural resource research activities.

In fiscal matters, the company benefits from the 50% reduction of registration fees for business foundation, increases in capital, company mergers, transfer of company stocks and shares.

For the three first exploitation tax years and until the first year of sale or first service, the following fiscal benefits are added with the aforementioned reduction of registration duties:

- **Total exemption from the tax on company earnings:**
  - Companies that are subject to CIT because of their size of activity will be exempt from CIT; and
  - Businesses that are subject to personal income tax because of their size or activity will be exempt from personal income tax.
- The authorisation to proceed to accelerated depreciation;
- The authorisation to carryforward losses for the first three tax years; and
- The application of zero-rate VAT on exported products.

**Special regime (S)**

The special regime applies to businesses that fulfil the aforementioned general requirements, and carry out investments between EUR 45,734 million and EUR 152,450 million.

As well as the advantages of the aforementioned (G) regime, businesses registered under the (S) regime benefit during the set-up period and the first three exploitation tax years, from the moderation of registration duties for the foundation of the business, increases in capital, company mergers, transfer of company stocks and shares.

This moderation of registration duties is granted exclusively by decree of the Minister in charge of the Economy and Finances, upon a decision of the National Investment Commission.

**Preferential development zone regime**

All exporting businesses registered under the investment charter are eligible for the preferential development zone system, including free-trade zones.

The institution, organisation and function of the preferential development zone are fixed by a specific text.

**Incentive measures**

Respect for the aforementioned general requirements set out by the charter is a prerequisite for benefiting from these motivation measures.

**Export incentives**

This measure is reserved for businesses that export at least 20% of their production.
Congo, Republic of

The benefits are:

- The provisions of the CEMAC customs code, relating to asset improvement mechanisms;
- Customs exemption, export duties and taxes on manufactured products, except computing fees and statistic tax; and
- Application of a zero-rate VAT on exported products.

Non-manufactured goods remain subject to the common law export system.

**Incentive to reinvest earnings**

This measure is reserved for businesses that carry out new investments of at least one-third of existing assets.

The benefit conferred consists in a 50% reduction of the tax on company earnings, for the three years following the realisation of the investment.

Notwithstanding, this benefit is granted upon the following conditions:

- The business declares to the permanent secretary of the National Investment Commission its investments, planned investment and the state of existing capital assets;
- The National Investment Commission, on the report of checking teams, verifies if the new investments correspond to one-third of the preceding capital assets;
- All investments are realised within one year;
- Investments generate new employment;
- Investments increase capacity of production by at least 10%; and
- The business has sound ethical concerns.

**Incentives to set up in remote areas**

All new businesses registered under (G) or (S) regimes, which are located in a remote area, benefit from a reduction of 50% on the tax on company earnings in the fourth and fifth year following the first three tax years for which the business benefited from total exemption from the tax on earnings or the tax on businesses subject to personal income tax.

The business is considered as belonging to a remote area from the moment its production units are set-up and 90% of the production unit workforce is working in the remote location.

The appraisal of a zone’s location results from the exclusive competency of the National Investment Commission.

**Incentives for social and cultural investment**

All new businesses registered under (G) or (S) regimes, carrying out investments of a social and cultural character, may benefit from a fiscal reduction by ministerial decree of the Minister in charge of Finance and the Economy, upon the decision of the National Investment Commission.

These benefits may not, however, be added to those mentioned above and allocated to remote areas, even if the business concerned is set-up in such a location.
General measures
For the duration of the privileged regime, and subject to current texts, the company shall enjoy fiscal stability in terms of local and state taxes.

Privilege regimes (G) and (S) are allocated only once and are not renewable. The business may receive fiscal and customs advantages pertaining to the set-up period.

Fiscal advantages concerning the exploitation period are applicable only after the set-up period.

The end of the set-up period is certified by decision of the Minister in charge of Economy and Finance, after the adoption of the verification report by the National Investment Commission.

General guarantees
During the privileged regime period, and subject to respect for the currently applicable texts, the company benefits from local and state fiscal stability.

Withholding taxes (WHT)
The Republic of Congo is a member of the Economic and Monetary Community of Central Africa (CEMAC), established by the treaty signed on 16 March 1994 in N’Djamena (Chad) that became effective in June 1999. The organisation replaced what was then the Customs and Economic Union of Central Africa (UDEAC) and adopted its commitments. The CEMAC unites the following six states: Cameroon, Central African Republic, Republic of Congo, Gabon, Equatorial Guinea, and Chad.

The Republic of Congo has signed the following tax treaties:

The tax treaty of the Common Organisation for Africa and Madagascar (OCAM): The member states of this organisation adopted a tax cooperation agreement 29 January 1971, which was ratified by the Republic of Congo on 3 September 1971. The OCAM, which initially had 14 members, had 17 members when it was dissolved by the Conference of Heads of State in 1985. Those members were Cameroon, Central African Republic, Chad, Congo, Ivory Coast, Dahomey, Gabon, High Volta, Madagascar, Mauritius, Niger, Rwanda, Senegal, Togo, and the Democratic Republic of Congo. The Republic of Congo has not denounced the application of this tax treaty.

The tax treaty of the CEMAC Convention: The Republic of Congo signed the UDEAC Convention of 13 December 1966, which was designed to avoid or to limit double taxation among the member states: Cameroon, Central African Republic, Congo, Gabon, Equatorial Guinea and Chad. This tax treaty remains significant to companies interested in affiliate creation in Central Africa countries.

The tax treaty between the Republic of Congo and the French Republic: This tax treaty, which concluded on 27 November 1987, was designed to avoid double taxation and to prevent tax evasion related to income tax, inheritance tax, registration law and stamp duty.
Congo, Republic of

Services, dividends, attendance fees

Services
The tax regime set forth for foreign suppliers is defined in Section 185 Ter of the Congolese General Tax Code, Part 1. According to the provisions of Section 185, as well as the wide interpretation made by the Congolese Tax Authorities, the services rendered by the foreign suppliers should be subject to a 20% WHT.

In addition, Section 185 Ter provides that companies, which have no tax residence in the Congo, are subject to a 20% WHT if they earn revenues realised in the Congo or coming from the Congo, and which come from works or services of any nature performed or used in the Congo.

The provisions of the Section 185 Ter do not apply to resident suppliers of a country, which has signed an international tax treaty with the Congo, provided certain conditions are met.

Dividends
Dividends distributed by a Congolese company are subject to a 20% WHT unless a different rate applies under an international tax treaty (France, CEMAC, OCAM). The same rate applies for dividends distributed to a resident shareholder.

Under the tax treaty between France and Congo, the applicable WHT rate is 15%. There is no specific rate defined in the CEMAC and OCAM tax treaties.

Attendance fees
Attendance fees are subject to a 22% WHT unless a different rate applies under an international tax treaty (France, CEMAC, OCAM).

Payments to local independent contractors
Payments to local independent contractors (self-employed contractors – i.e., those not registered with the Congolese Trade Registry) are subject to a WHT at the rate of 5% from such payments to be remitted to the Public Treasury.

Late remittance of the tax is subject to a penalty of 100% if the late payment exceeds two months, and a penalty of 50% if the late payment does not exceed two months.

**Tax administration**

**Tax returns**
Taxable business profits are computed on the basis of normal accounting principles as modified by certain tax adjustments.

The final corporate tax return (annual tax return) is a specific form (Document Statistique et Fiscal “DSF”, in French) which should be prepared in accordance with OHADA accounting principles. The form cannot be completed electronically.

The books must be maintained in French and in XAF. This accounting system must follow the OHADA chart of account. All entries have to be booked under OHADA standard, throughout the year.

The annual tax return must be filed within four months following the end of the fiscal year of the company (i.e., before 1 May).

**Payment of tax**
Resident companies are required to pay quarterly instalments of tax (15 February, 15 May, 15 August and 15 November).

These quarterly instalments are generally calculated with reference to the most recent corporate tax return.

Special calculations of instalments apply to new taxpayers.

Based on the self-assessment system, when submitting annual tax returns due by 1 May every year, taxpayers must pay the amount of tax calculated in the annual tax return to the extent this amount exceeds tax instalments paid during the year.

Significant developments

There have been no significant tax or regulatory developments regarding corporate taxation in the past year.

Taxes on corporate income

Taxable income is taxed at a 30% rate.

However, the law establishes special regulations for small companies whose gross income does not exceed CRC 78,231,000. For this category, the following tariffs will be applied: 10% will apply for companies with gross income up to CRC 41,112,000; 20% for companies with gross income of more than CRC 41,112,000, but not more than CRC 82,698,000. Companies with gross over CRC 82,698,000 will pay the regular 30% income tax rate.

Please note that these income tax brackets are adjusted yearly, effective 1 October to 30 September. The tax brackets listed are for the 2010 fiscal year.

Corporate residence

In most cases, the place where a company is incorporated is regarded by Costa Rican authorities as the corporate residence. However, any business that carries on industrial, agricultural or commercial activity in Costa Rica is subject to income taxation on local income in the same way as a registered business, irrespective of the place of incorporation. Such corporations doing business in Costa Rica are subject to the permanent establishment (PE) rules.

On the other hand, under the Costa Rican income tax law, income from transactions carried out abroad may be regarded as non-Costa Rican-source income and, therefore, are not subject to income taxes.

Other taxes

Franchise tax
The payments realised abroad for the use of a franchise will be subject to remittances abroad, with a 25% withholding tax (WHT).
**Capital gains tax**
At present, there is no capital gains tax on the sale of real estate or securities when such sales are not a habitual activity. There is capital gain tax, at the regular rate, on the sale of depreciable assets when their sale price is higher than their adjusted basis (book value).

**Sales tax**
A fixed sales tax rate of 13% is applied at all stages of the sale of merchandise or the invoicing of certain limited services. The tax is levied on (i) sales of merchandise within the national territory (except sales of land, buildings, exports, and certain basic necessity items, such as basic foodstuffs, certain medicines and veterinary products); (ii) the value of services performed by restaurants, bars, motels, printing companies, social and recreational clubs, and painting and repair shops, and others; and (iii) imports consisting of merchandise for personal use or consumption or to satisfy commercial needs.

**Selective consumption tax**
The selective consumption tax may be applied at a rate of up to 100% and is levied on goods that are considered non-essential. The tax base is either the cost, insurance and freight (CIF) price plus import duties for imported items or the sales value for item produced in Costa Rica. The tax is levied at only one stage in the sale of merchandise. Payment of the tax is required at the time of importation or, for articles produced in Costa Rica, within 15 days of the month of the sale.

**Property tax**
Each local municipal government is in charge of real estate appraisal. The property tax to be applied throughout Costa Rican territory is 0.25% of the appraised value, registered in the respective municipality when the tax liability originates. The first CRC 13,203,000 is exempt from property tax if the taxpayer is an individual who owns only one piece of property within the country. Tax will be levied on the amount in excess of CRC 13,203,000 for the year 2010.

**Real estate transfer tax**
Real estate transfer is calculated as 1.5% of the selling price of the real estate or its tax value, whichever is greater.

**Branch income**
Branch income is subject to income tax at the rates applicable for corporate income taxes. There is a WHT of 15% on dividends distributed within the country and a 15% tax, in lieu of a dividend WHT, on profits transferred abroad.

**Income determination**

**Inventory valuation**
Inventories are generally stated at cost and may be valued at the compound average cost, first-in, first-out (FIFO), last-in, last-out (LIFO), retailer, or specific identification methods. Because all entities are required to keep legal records, any adjustments necessary as a result of the use of different inventory valuation methods for tax and financial purposes should be recorded.
Costa Rica

Capital gains
Capital gains and losses on the disposition of non-depreciable fixed assets or shares of other companies are excluded for income tax purposes if such dispositions are not a habitual activity.

Inter-company dividends
Dividends between domestic subsidiaries and other domestic corporations are not subject to taxes. There are no ownership requirements to qualify for this exclusion.

Foreign income
Foreign-source income is not taxable.

Stock dividends
Stock dividends are subject to income tax at 15% or 5% if the stock is registered at an approved Costa Rican stock market.

Dividends paid in the form of stock of the distributing company are allowed and exempt from taxes.

Deductions

Depreciation and depletion
The straight-line and sum-of-the-years-digits methods of depreciation are allowed.

The tax administration, at the request of the taxpayer, could adopt technically acceptable special depreciation methods in cases duly justified by the taxpayer. In addition, the tax administration could authorise, through general resolution, accelerated depreciation methods on new assets, acquired by corporations with monetary activities requiring constant technological update, higher installed production capacity and productive reconversion processes, in order to maintain and strengthen their competitive advantage.

Net operating losses
Losses incurred by industrial and agricultural enterprises may be carried forward and deducted from the taxable profits for the following three and five years, respectively. Loss carrybacks are not allowed.

Payments to foreign affiliates
Corporations may claim deductions for royalties, technical and management service fees, and interest charges paid to foreign affiliates, provided that a tax of 25% for royalties, franchises and other services, and a tax of 15% for interest is withheld. However, the deductions for technical and management service fees may not exceed 10% of gross sales in the aggregate if paid to the parent company.
**Taxes**

With the exception of sales tax, selective consumption tax, specific taxes over consumption and special duties over them established by law, penalties and interest paid over any tax obligation, and the income tax itself, all other taxes are deductible expenses when determining taxable income.

**Group taxation**

There is no group taxation in Costa Rica.

**Tax incentives**

**Free zones**

Entities established in free zones may enjoy exemption from import duties on goods, income tax, sales tax, export tax, selective consumption tax, real estate transfer tax, and WHT on payments abroad, as well as the discretionary use of foreign currency generated abroad. However, these incentives will be affected by the rules established by the World Trade Organisation, in force in the year 2015.

**Drawback industries**

Special benefits exist for industries that import semi-manufactured materials for assembly in Costa Rica and export finished products. Benefits consist of duty-free imports of raw materials for subsequent export as manufactured products. Machinery for these industries may also be imported duty-free.

**Tourism development**

The Incentive Law for Tourism Development grants several tax benefits, such as exemption from import duties on certain tourism service-related goods and from property tax for companies dedicated to tourism, but only for those with a signed tourism agreement.

**Withholding taxes (WHT)**

**Payments to non-domiciled foreign corporations or individuals**

Regarding payments to non-domiciled foreign corporations or individuals, taxes are withheld as follows:

1. Dividends – 15%
   
   Withholding depends on the origin or source of the retained earnings. Total or partial exemption will be authorised by the tax authorities to the extent that a foreign tax credit is totally or partially disallowed to the taxpayer in the taxpayer’s country of residence. This exemption will not be allowed, however, if this type of income is not taxable to the taxpayer in the country of residence.

2. Interest and other financial expenses – 15%
   
   No tax is withheld if the recipient is a bank or a financial institution recognised as a first-class bank by the Central Bank of Costa Rica or a supplier of merchandise. Interest or financial expenses paid to parties other than those aforementioned are subject to a 15% WHT.

   An 8% WHT applies to interest on bearer documents issued by financial entities registered at the Central Bank’s General Auditor’s Office or stock exchange. No WHT applies to interest paid on securities issued by the Workmen’s Bank or the
Costa Rica

Mortgage Housing Bank and its authorised institutions or on foreign currency securities issued by the state banks.

3. Special tax on banks and non-resident financial entities
   Banks or non-resident financial entities that are part of a local financial group are payers of taxes established in this article. The taxpayers mentioned in the “interest and other financial expenses” section should pay, in lieu of tax on remittances abroad, a local currency tax equivalent to USD 125,000 per annum. The tax period will run from 1 January to 31 December of each year.

4. Royalties, patents, trademarks, franchises, and formulas are subject to a 25% WHT.

5. For technical service and management fees, a 25% tax is withheld.

6. Personal services from a Costa Rican source are subject to the following withholdings: employees, 10%; directors, 15%; others, depending on the nature of the services rendered, 30%.

7. Transportation and communication services are subject to an 8.5% WHT.

Tax treaties
Costa Rica is a full member of the Central American Common Market, which guarantees free trade among the countries of the area. It also has a free-trade bilateral treaty in force with Mexico (1994), the Dominican Republic (1998), Chile (1998), Canada and Panama, and the CAFTA-DR entered into force on 1 January 2009. These agreements aim to provide favourable conditions for the exchange of merchandise between contracting parties.

The only tax treaty in force between Costa Rica and the United States, effective since 12 February 1991, is a Tax Information Exchange Agreement, whereby both countries agree to exchange information, from and/or in relation to public and private entities and individuals, at the request of the party’s corresponding authority, in relation to any tax relevant issue.

Tax administration

Returns
With certain exceptions, all corporations must file by 15 December a tax return on the basis of a fiscal year ended 30 September. Entities with an operating period of less than four months may present a return together with the following year’s tax return. Current legislation contemplates that other fiscal year-ends may be adopted with the prior approval of the tax authorities.

The tax system is one of self-assessment with occasional auditing by the tax authorities.

Payment of tax
In March, June and September all corporations and taxpayers must prepay instalments that total 75% of the average income taxes paid in the past three fiscal years, or the amount paid in the prior year, whichever is greater. Failure to pay on these dates results in the accrual of interest unless the taxpayer has requested, on a timely basis, that the tax authorities eliminate the corresponding payments. Any amount owed in excess of the instalments should be paid by 15 December.

Significant developments

The Corporate Income Tax Act was introduced on 1 January 2007.

The amendments of the Corporate Income Tax Ordinance were introduced on 1 January 2010.

The Tax Incentives Act was introduced on 1 January 2007.

The Act on Special State Care Areas was introduced on 1 July 2009.

Taxes on corporate income

Profit tax

Profit tax is paid by: enterprises engaged in independent activities on a long-term basis for the purpose of deriving profit; branches of foreign enterprises; enterprises that control shares in capital (unless the object of investment itself pays profit tax); and natural persons who choose to pay profit tax instead of personal income tax.

The tax base is the difference between revenue and expenditures, adjusted for increasing and decreasing items. Croatian residents pay profit tax on profit derived in Croatia and abroad, and non-residents, for example, branches, pay profit tax only on profits derived in Croatia. The tax base also includes gains arising from liquidation, sale, change of legal form and division of the taxpayer where it is determined at the market rates.

The profit tax base is reduced by the following items:

- Revenues from dividend and profit sharing;
- Unrealised profits from value adjustments of shares (increase of financial asset value), if these were included as profit in the P&L account;
- Revenues from collected written-off claims that were included in the tax base in the previous tax periods, but not excluded from the tax base as recognised expenditure;
- The amount of depreciation not recognised in previous tax periods, up to the amount prescribed by the Corporate Income Tax Act; and
- The amount of tax relief or tax exemption in line with special regulations (i.e., costs of education, costs of research and development (R&D) and costs of a new employee’s salary).
Croatia

The profit tax base is increased by the following items:

- Unrealised losses from value adjustments of shares (decrease of financial asset value), if these were included as expenses in the P&L account;
- The amount of depreciation in excess of the amounts prescribed by the Corporate Income Tax Act;
- 70% of entertainment costs (food and drink, gifts with or without the printed firm logo or product brand and expenses for vacation, sport, recreation and leisure-time, renting cars, vessels, airplanes and holiday cottages);
- Entertainment costs will not include the costs of goods and merchandise adapted by a taxpayer for business entertainment purposes, labelled “not for sale”, and other promotional objects with the name of the firm or merchandise or other advertising objects (glasses, ashtrays, table cloths, mats, pencils, business diaries, cigarette-lighters, tags, etc.) put to use in the selling area of the purchaser and given to consumers provided that their value does not exceed HRK 80 per item;
- 30% of the costs, except insurance and interest costs, incurred in connection with owned or rented motor vehicles or other means of personal transportation (personal car, vessel, helicopter, airplane, etc.) used by managerial, supervisory and other employees, provided that the use of means of personal transportation is not defined as salary;
- Non-business costs, incurred in connection with the private life of shareholders and company members (withdrawals) as well as employees (entertainment, relaxation, sport and recreation costs), including value-added tax;
- Hidden profit distribution;
- The costs of forced collection of tax and other levies;
- Fines imposed by competent bodies;
- Penalty interest accumulated between associated persons;
- Privileges and other economic benefits granted to natural or legal persons for the purpose of causing or preventing a certain event in favour of the company (generally related to commissions paid to parties acting on behalf of the taxpayer);
- Gifts in excess of the amounts prescribed by the Corporate Income Tax Act;
- Interest not recognised as expenditure pursuant to the provisions of the Corporate Income Tax Act; and
- Any other expenditure not directly related to profit earning, as well as other increases in the tax base, which were not included in the tax base.

**Thin capitalisation**

Interest on loans from a shareholder or a member holding at least 25% of shares or voting power of the taxpayer will not be recognised for tax purposes, if the amount of the loan exceeds four times the amount of the shareholder’s share in the capital or their voting power. Interest on loans obtained from financial institutions is exempt from this provision. A third-party loan will be considered to be given by a shareholder if it is guaranteed by the shareholder.

**Related party transaction**

Prices between a Croatian entity and its foreign related parties must be set at fair market value (the arm’s-length principle).

If the prices between related entities are different than those between non-related resident and non-resident entities, the tax base must be calculated with prices that would be charged between unrelated companies. In order to determine the market value of the related party’s transaction, the following methods can be used:
• Comparable uncontrolled price;
• Resale price;
• Cost plus;
• Profit split; and
• Net-profit.

**Tax incentives and exemptions**
Investment incentives are usually organised as corporate tax credits. Tax rates can be reduced for up to 10 years upon completion of various conditions. See Tax incentives section below.

**Tax losses**
Tax losses may be carried forward and utilised within five years following the year in which the losses were incurred and must be utilised in the order in which they occurred. The losses may not be transferred to any third entity except in the case of merger, demerger or acquisition.

**Local taxes**
A trade name may be subject to taxation at the amount up to HRK 2,000, depending on the decision of the municipal or city.

**Corporate residence**
Profit tax is payable by enterprises engaged in independent activities in Croatia on a long-term basis for the purpose of deriving a profit, including Croatian domestic entities, branches of foreign enterprises and domestic business units of foreign entities.

**Permanent establishment**
Definition of a business unit of a non-resident is based on the Organisation for Economic Co-operation and Development (OECD) guidelines, which provides that a non-resident’s business unit is a place of management, a branch, an office, a factory, a workshop, a mine, an oil or gas well, a quarry or any other place of extraction of natural resources or construction site or project for a period longer than six months, including agents acting in its name, having the right to conclude contracts or hold stock of products which it distributes on the Croatian market in the name of a foreign entrepreneur. The business unit of a non-resident also includes the performance of services (i.e., advisory and business consulting services) for the same or a related project, which lasts for more than three months in a 12-month period.

**Other taxes**

**Value-added tax (VAT)**
VAT was introduced on 1 January 1998 at a rate of 22%. As of 1 August 2009, the general VAT rate was increased to 23%. VAT is a consumption tax and has a neutral effect on enterprises by operation of the input and output mechanism. Accordingly, the tax burden is borne by the final consumer. A VAT-registered entity must calculate its VAT liability or refund and submit a monthly (by the end of the following month) VAT return to the relevant Tax Authority Office or a quarterly VAT return if the taxpayer is classified as small. An annual VAT return must be submitted by 30 April of the following year.
Croatia

Where the amount of input tax credits exceeds the entity’s VAT liability, a taxpayer is entitled to a refund of the difference or may choose to use the difference as a VAT prepayment.

VAT taxpayers are defined as entrepreneurs that deliver goods or perform services in Croatia. An “entrepreneur” is a legal entity or a natural person that continuously and independently performs an activity for the purpose of deriving profit. In addition to those that may be regarded as “normal” taxpayers, domestic enterprises receiving imported services from foreign enterprises and legal entities and individuals that issue invoices or receipts including VAT without authorisation are also liable to pay VAT.

A taxpayer is required to register for VAT where turnover in the previous year exceeded HRK 85,000. Voluntary registration is also possible.

Foreign entrepreneurs may also become VAT registered in Croatia through a tax representative. This will entitle them to reclaim input VAT incurred in Croatia.

In addition to foreign individuals, foreign legal entities are now also entitled to claim a VAT refund under reciprocity agreement terms.

VAT is also payable on the sale of new buildings.

The VAT base for goods and services supplied domestically is the consideration received. Where no consideration is provided, for instance where goods are exchanged, the VAT base is the market value of the good or service. The VAT base of imports is the customs value as prescribed by customs regulations, increased by customs duties, import duties, special taxes and other fees paid during customs clearing.

VAT paid to the customs office at the time of import can be credited to the taxpayer’s VAT account and offset against any domestic VAT liability. If goods are exempt from import duty, they are also VAT exempt. A VAT entity must self-assess VAT on imported services provided by a foreign entity. This VAT can be reclaimed through the VAT return as described above.

Exempt supplies are similar to those contained in the EU’s Sixth Directive and include rental of residential property (with some exceptions); granting of credits and credit guarantees; transactions related to bank accounts, interest, winnings from special games of chance in casinos, slot machine clubs and other forms of gambling; supplies of domestic and foreign legal tender, securities and shares and supplies of gold by the central bank.

The most significant change is that banks, insurance companies, medical and educational institutions are no longer institutionally exempt from VAT. Other exemptions include:

- Services and deliveries of goods by public institutions in the field of culture, such as museums, galleries, archives, libraries, theatres including religious communities and institutions, primary and secondary schools, universities and student catering and boarding institutions;
- Medical services, including services conducted by doctors, dentists, nurses, physiotherapists, and biochemistry laboratories engaged in private practices including services of medical care performed in healthcare institutions,
and services performed by social care institutions and child and adolescent care institutions;
• Supplies (transfers) of real estate (land, buildings, parts of buildings, housing premises, and other structures) with the exception of newly built buildings; and
• Temporary imports of goods which are exempt from customs duty.

The following supplies are zero-rated or ‘VAT free’ under the Croatian VAT legislation:
• Bread and milk including baby food used as a substitute for mother’s milk;
• Books of a scholarly, scientific, artistic, cultural and educational character as well as school textbooks (primary, secondary and tertiary education, including materials printed on paper and other media, such as CD-ROMs, video cassettes and audio tapes);
• Certain medicines and surgical implants;
• Scientific journals; and
• Services rendered by cinemas.

There is also a reduced rate of 10% for services related to:
• Organised stays (accommodation or accommodation with breakfast, full or half board, in all kinds of commercial hospitality facilities) and agency fees with respect to the above mentioned services.
• Daily and periodic newspapers and magazines (with the exception of those that consist entirely of advertisements or are used mainly for advertising purposes).

VAT-registered entities are required to issue an invoice (R-1 or R-2) which clearly illustrates the VAT base amount and the rate of VAT charged (0%, 10% or 23%) as well as the tax amount as a separate figure.

On 26 March 2008, the new Regulation on Modifications and Amendments to the VAT Ordinance came into force, introducing new customs duty and tax relief on financial aid from the European Union (EU). The VAT regulations set tax relief rates for the provision of goods and services abroad when this is stated in an international agreement which is binding on the Republic of Croatia. There is a wider range of customs duty and tax relief, and special tax and VAT relief for project beneficiaries who have received financial aid from EU for the purchase of goods and services from abroad or inland.

**Real estate tax**
The acquisition of real estate is subject to taxation. Real estate includes agricultural, construction and other land as well as residential, commercial and other buildings. Transactions include the sale, exchange and any other means of acquiring real estate for consideration.

Tax is charged at 5% of the market value of the real estate on the contract date.

**Excise duties**
There are a number of excise duties levied on specific products. They are levied at a fixed amount and are payable by the producer or importer. VAT is applied first, after which the fixed amounts are added.

• Oil derivatives: Tax ranging from HRK 300 to HRK 3,600 per 1,000 litres.
Tobacco products: Tax on cigarettes may reach up to HRK 180 per 1,000 pieces plus 30% proportional special (excise) tax from retail price; for cigars HRK 1,100 per 1,000 pieces; for cigarillos HRK 220 per 1,000 pieces and HRK 136 per kilogram for tobacco.

Beer: HRK 40 per 1% volume fraction of the actual alcohol contained in one hectolitre of finished product.

Soft drinks: HRK 40 per hectolitre for domestically produced brands and imported soft drinks. Some soft drinks, including mineral water and natural fruit juices are exempt.

Alcohol:
- Excise duty on products with the volume of actual alcohol content between 15% and higher, wages in the amount of HRK 800 per hectolitre of finished product.
- Excise duty on products with the volume of actual alcohol content of less than 15%, is paid in the amount of HRK 500 per hectolitre of finished product.
- Excise duty on ethyl alcohol is to be paid in the amount HRK 5,300 per hectolitre of pure alcohol.

Imported coffee: HRK 5 to HRK 20 per kilogram.

Passenger cars and motor cycles: from 13% to HRK 177,500 plus 63% of the amount exceeding HRK 500,000.

Imported boats and aircrafts: from 5% to HRK 445,000 plus 16% of the amount exceeding HRK 4,000,000.

Luxury products: 30% of the sales value of the product without VAT.

Liability and comprehensive road vehicle insurance premiums: for obligatory motor vehicle insurance premium, 15% of the contractual amount; and for comprehensive motor vehicle insurance premium, 10% of the contractual amount.

**Chamber of Commerce contribution**
Employers pay a mandatory contribution to the Croatian Chamber of Commerce. The amount varies between HRK 55 to HRK 5,500 depending on company size and 0.0075% of total income.

**Branch income**
Foreign corporations carrying on business in Croatia are taxed on their Croatian source income at a 20% rate.

**Income determination**

**Inventory valuation**
Inventories are generally valued at the lower of their acquisition cost or net realisable value. Taking into consideration the accounting principles set out in the Accounting Act and the International Accounting Standards (IAS), a company can choose to adopt the most favourable method.

**Capital gains**
Capital gains or losses are covered by the profit tax regime. They are either an increasing or decreasing item to the profit tax base.

**Inter-company dividends**
Inter-company dividends are treated as income under the profit tax regime but are not included in the tax base.
Deductions

Depreciation
Most companies depreciate assets on a straight-line basis. This is because depreciation calculated this way at the prescribed rates is recognised for tax purposes. Companies are, however, free to use any depreciation method defined in the IAS and to estimate the useful lives of all fixed assets in accordance with their accounting policies.

However, depreciation expenses in excess of the amount allowed for tax purposes are taxable. The value adjustment of tangible fixed assets rarely occurs in practice, except in the case of financial assets and claims.

The Corporate Income Tax Act no longer allows taxpayers to wholly write-off plant and equipment acquired or built during the tax period.

Plant and equipment depreciation begins in the period in which it is installed or ready for use. Plant and equipment includes: tools of trade, information technology infrastructure including software, furniture and fittings and motor vehicles (excluding vehicles for personal use).

If the taxpayer writes off a portion of a depreciable asset, the remaining undepreciated portion will be depreciated at the rate prescribed by law. According to the Corporate Income Tax Act, the taxpayer can double depreciation rates.

Land and forests are not depreciated.

Goodwill paid on the acquisition of a business must be amortised over five years. It is usually the difference between the estimated statistical value of assets and liabilities and their book value.

However, goodwill arising from mergers and acquisitions is not recognised for taxation purposes.

Tax losses
Tax losses can be carried forward for up to five years. If a taxpayer does not utilise a tax loss within five years, the tax loss will expire.

Payments to foreign affiliates
The treatment of payments made to foreign affiliates is dealt with through the mechanism of the profit tax base. The profit tax base is increased for any concealed profit payments made. The Tax Administration may audit the expenditure of non-resident taxpayers, examining expenditure on goods and services abroad as well as management, intellectual property and other fees and payments that may have the character of a profit transfer. If the Tax Administration discovers that transactions have been used to conceal profit transfers, the difference between the declared price/fee and the average market price/fee will be added back into the taxpayer’s tax base.

Group taxation
There are no group taxation provisions in Croatia.
Croatia

**Tax incentives**

The Corporate Profit Tax Act provides the following relief and incentives for taxpayers.

**Investment incentives**

Investment incentives are usually organised as corporate tax credits. It means that tax rates can be reduced for up to 10 years upon completion of various conditions.

General incentives apply for investors profit earned as a result of an investment under the following conditions:

<table>
<thead>
<tr>
<th>Investment amount</th>
<th>Tax benefit rate (%)</th>
<th>Period</th>
<th>Necessary to employ</th>
</tr>
</thead>
<tbody>
<tr>
<td>From EUR 300,000 to EUR 1.5 million</td>
<td>10</td>
<td>10 years</td>
<td>10 employees</td>
</tr>
<tr>
<td>More than EUR 1.5 million</td>
<td>7</td>
<td>10 years</td>
<td>30 employees</td>
</tr>
<tr>
<td>More than EUR 4 million</td>
<td>3</td>
<td>10 years</td>
<td>50 employees</td>
</tr>
<tr>
<td>More than EUR 8 million</td>
<td>0</td>
<td>10 years</td>
<td>75 employees</td>
</tr>
</tbody>
</table>

Tax benefits cannot exceed investment amount.

**Other concessions and exemptions**

Other concessions and exemptions are generally available to companies including the following:

- Companies established in mountain regions that employ more than five persons on a permanent basis, will enjoy up to a 75% corporate income tax reduction in the period starting from 2008 until the end of 2010.
- Taxpayers in custom free zones can take advantage of incentives prescribed in the Investment Incentives Act. Taxpayers that were engaged in or participating in the building of infrastructure within a zone, in projects with a value exceeding HRK 1 million before July 2008, and that did not fully utilise the incentive prescribed by the Investment Incentive Act, are exempt from paying profit tax until the full amount has been used but no later than 31 December 2016.
- Taxpayers whose business activities are based on agriculture or fishing in areas under special state care and employing more than five persons on a permanent bases (certain limitations apply), will be exempted from the payment of any corporate income tax until EU accession up to 100%.
- Taxpayers with business activities other than agriculture or fishing in areas under special state care and who employ more than five persons on a permanent basis (subject to certain limitations and depending on the area) will be exempt from tax, up to a certain amount of the CIT rate, as prescribed by local legislation. Exemptions will be gradually decreased until year 2014 or 2017, when it will no longer be applicable.
- Companies established in the territory of the City of Vukovar and employing more than five persons on a permanent basis will be exempted from the payment of any corporate income tax until EU accession.
Major investment incentives:

- Non-refundable money subsidy in an amount of up to 5% of justified costs related to investment in significant projects (max amount of up to EUR 1 million) may be granted to a company providing that certain conditions are met.
- A significant project investment consists of high economic activity, such as the construction of a new plant or industrial facility, initiation of a new economic activity or new technology development, with investment in assets greater than EUR 15 million. At least 100 workplaces must be opened upon expiration of one year of investment.

**Research and development incentives**
Registered scientific organisations, centres of scientific excellence, individual scientists and groups of scientists are entitled to apply for the state subsidies and tax incentives for scientific research, basic research, applied research and development research.

Depending on the type of research (e.g., scientific, basic, applied research or technical feasibility) and size of entrepreneur (i.e., small, medium or large entrepreneur, according to the Accounting Act), the percentage of the costs covered by state subsidy can vary between 25% and 100%. Additionally, the corporate income tax base can be decreased (depending on the same criteria) by up to 150% of the amount of the costs covered by the state subsidy, where the corporate income tax liability decrease is granted up to the amount of the percentage of the costs covered by state subsidy.

**Withholding taxes (WHT)**

Taxpayers who pay fees for the use of intellectual property rights (the right to reproduction, patents, licenses, copyrights, designs or models, manufacturing procedures, production formulas, blueprints, plans, industrial or scientific experience and such other rights), or fees for market research services, tax consulting services, legal, auditing or such other services, or interest to foreign legal entities, natural persons excluded, shall, when making the payment, calculate and withhold tax at a rate of 15%. In addition to the current withholding tax rate of 15%, an increased rate of 20% is introduced. It applies to all services paid to foreign entities whose place of seat or management is in a country with the profit tax rate below 12.5%. This provision does not apply to the European Union member countries.

Tax is not withheld from interest payments on the following:

- Commodity loans for the purchase of good used for carrying out a taxpayer’s business activity;
- Loans granted by a non-resident bank or other financial institution; and
- To holders of government or corporate bonds, who are non-resident legal persons.

The withholding tax rate on dividends is 0% regardless of the period in which the dividends were received.
Croatia

**Tax administration**

All profit tax taxpayers are obliged to submit an annual profit tax return to the tax authorities no later than four months after the end of the tax period for which profit tax is assessed. Every taxpayer is required to make monthly profit tax instalments (on the last day of each month) on the basis of the previous year’s tax return.

In the first year of operation, taxpayers are not obliged to pay any corporate income tax advances.

Profit tax is assessed at the end of the calendar year, and the assessed amount, less any instalments made, is payable by the day of submission of the tax return (i.e., at the latest by the end of the fourth month following the end of the tax and accounting year). If a domestic taxpayer has paid tax abroad on profit derived abroad, the tax paid will be included in its profit tax, up to the amount of tax paid abroad where no double-tax treaty exists with the country in question.

The Ministry of Finance administers taxation matters through the Tax Administration and the Financial Police. These organisations have responsibilities and powers defined by law.

Significant developments

No significant developments in corporate taxation have occurred in Cyprus in the past year.

Taxes on corporate income

Corporation tax
The corporate tax rate in Cyprus is 10% on taxable income.

Life insurance companies
When the tax payable on profits arising from the life insurance business does not exceed 1.5% of the gross amount of premiums, the difference is paid in addition to the corporate tax.

International Collective Investment Schemes
The International Collective Investment Schemes (ICIS) law, enacted in 1999, provides the required legal framework for the registration, regulation of operations, and supervision of ICIS.

ICIS can take the following legal forms:

1. International fixed capital company;
2. International variable capital company;
3. International unit trust scheme; and
4. International investment limited partnership.

The sole objective of ICIS is the collective investment of funds of the unitholders. ICIS are exempt from tax on profits arising on disposal of titles. Dividend income is also exempt (with minor limitations) whereas interest income is taxed at the rate of 10%.

ICIS set-up in Cyprus can utilise the double taxation treaty (DTT) network of Cyprus.

Corporate residence

All companies managed and controlled in Cyprus are treated as tax resident in Cyprus.
Other taxes

Defence contribution
A contribution for the defence of the Republic is imposed on certain types of income. Dividends are generally exempt from defence contribution subject to certain rarely applicable limitations (see section titled Tax incentives).

Interest received by closed-ended or open-ended (collective investment schemes (CIS) is taxed under income tax law after deducting expenses at the standard corporate tax rate of 10%.

Interest received by other companies in the ordinary course of business including interest closely connected to the ordinary course of business is taxed under income tax law after deducting expenses at the standard corporate tax rate of 10%. When companies receive interest that does not satisfy the conditions prescribed immediately above, the interest is subject to special defence contribution (SDC) without expense deduction at the rate of 10%.

Rental income (reduced by 25%) is subject to defence contribution at the rate of 3%.

Value-added tax (VAT)
The standard rate of VAT is 15%. There are also two reduced rates of VAT, 5% and 8%. Exports, most foodstuffs (except those taxed at 5% or 15%) and most medicines (except those taxed at 5%), are zero-rated. Some supplies are exempt, the main categories being rents, insurance, financial services, certain education, health and welfare, and supplies of real estate (except supply of new buildings before the first use) including supplies of land and second-hand buildings.

Social security
Employed persons are compulsorily insured under a state-administered social insurance fund. Contributions to the fund are borne by both employer and employee.

The employer’s contributions are made as a percentage of earnings to the following funds:

<table>
<thead>
<tr>
<th>Fund</th>
<th>%</th>
</tr>
</thead>
<tbody>
<tr>
<td>Social insurance fund</td>
<td>6.8</td>
</tr>
<tr>
<td>Redundancy fund</td>
<td>1.2</td>
</tr>
<tr>
<td>Training development fund</td>
<td>0.5</td>
</tr>
<tr>
<td>Social cohesion fund</td>
<td>2.0</td>
</tr>
<tr>
<td></td>
<td>10.5</td>
</tr>
</tbody>
</table>

With the exception of the social cohesion fund, the maximum amount of monthly earnings on which the contributions are made is EUR 4,216.

The referenced contributions are an allowable deduction for corporate tax purposes.

Immovable property tax
Immovable property is subject to property tax, which is levied on the market value of the property as of 1 January 1980, and is payable by the end of September each year.
The tax rates vary from 0 per thousand to 3.5 per thousand on values of up to EUR 854,300 and 4 per thousand on any excess.

**Branch income**

The rate of tax on branch profits is the same as on corporate profits. No further tax is withheld on transfers of profits to a foreign head office.

**Income determination**

**Inventory valuation**
Inventories are generally stated at the lower of cost and net realisable value. Last-in, first-out (LIFO) is not permitted for taxation purposes. First-in, first-out (FIFO) is permitted. Conformity between book and tax reporting is not required.

**Capital gains**
Capital gains tax is imposed at the rate of 20% on gains arising from the disposal of immovable property situated in Cyprus, and of shares in companies (other than companies whose shares are listed in any recognised stock exchange) that own immovable property situated in Cyprus. Liability is confined to gains accruing since 1 January 1980. The costs deducted from gross proceeds on the disposal of immovable property are its market value at 1 January 1980, or the costs of acquisition and improvements of the property, if made after 1 January 1980, as adjusted for inflation up to the date of disposal on the basis of the consumer price index in Cyprus.

**Inter-company dividends**
All dividends are excluded from the taxable income of the recipient company.

**Foreign income**
Resident corporations are subject to tax on their worldwide income. However, foreign-branch income, as well as dividend income from abroad, is exempt from taxation in Cyprus (with some minor limitations). Where foreign income is taxed in Cyprus, double taxation is avoided, either through unilateral relief by giving credit for foreign taxation or by treaty relief. This credit may not exceed the Cyprus taxes imposed on the same income.

**Stock dividends**
A Cyprus corporation can distribute tax-free dividends of common stock (bonus shares) proportionately to all common stock shareholders.

**Deductions**

**Depreciation and depletion**
Depreciation is computed on a straight-line basis at rates that vary, depending on the life and type of asset. Tax depreciation is not required to conform to book depreciation. Gains on the sale of depreciated property are taxable as ordinary income to the extent of depreciation allowed.

**Net operating losses**
Tax losses can be carried forward indefinitely and set-off against taxable profits of future years. Carrybacks are not permitted.
Cyprus

Payments to foreign affiliates
A Cyprus corporation can claim a deduction for royalties and interest charges paid to foreign affiliates, and a reasonable amount of head office expenses of an overseas company, provided such expenditures can be justified as having been incurred in the production of the income. In the case of insurance companies, the amount of head office expenses should not exceed 3% of the net premiums in Cyprus for the general insurance business and 2% for the life insurance business.

Taxes
Taxes that are deducted in computing profits for corporate tax purposes include VAT not recovered and the employer’s share of contributions to the social insurance and other funds.

Other significant items
Charitable donations or contributions made for educational, cultural, or other charitable purposes to the Republic, or to approved charitable institutions, are wholly deductible, provided that these expenses are supported with relevant vouchers.

Any expenditure on scientific research of a capital nature for which no capital allowance is granted is deductible from taxable income and spread equally over the year in which it has been incurred and the five subsequent years. Scientific expenditure of a revenue nature is deducted in the year incurred.

Any expenditure incurred on the acquisition of patents, patent rights and intellectual property is deductible from taxable income, and spread equally over the life of the patents or patent rights.

Group taxation
Group relief provisions allow, subject to certain conditions, companies of the same group to transfer losses from the loss-making companies to profitable companies.
A group includes only Cypriot resident companies with a 75% direct or indirect holding relationship.

Tax incentives
The following tax incentives exist:

1. Profits from disposals of corporate titles are unconditionally exempt from income tax. Titles is defined as shares, bonds, debentures, founders’ shares, and other titles of companies or other legal persons incorporated in Cyprus or abroad and options thereon as well as futures/forwards on titles, short positions on titles, swaps on titles, depositary receipts, repos, units in open or close CIS, ICIS, undertakings for collective investments of transferable securities, investment trusts and funds, mutual funds, real estate investment trusts and units in stock exchange indices.
2. Dividends earned from foreign investments are exempt from income tax in Cyprus. Dividend income is also exempt from defence contribution unless:
   a. More than 50% of the paying company’s activities result directly or indirectly in investment income; and
   b. The foreign tax is significantly lower than the tax burden in Cyprus, i.e., less than 5%.
3. Profits from a permanent establishment (PE) abroad are exempt from income tax. This exemption is always applicable unless:
   a. More than 50% of the foreign PE’s activities result directly or indirectly in investment income; and
   b. The foreign tax on the income of the foreign PE is significantly lower than the tax burden in Cyprus, i.e., less than 5%.
4. For ship-owning companies, the profits derived by the owner or bare boat charterer of an European Union (EU) or European Economic Area (EEA) (as well as foreign subject to conditions) ship from its operation, as well as the salaries and benefits of the captain, the officers and the crew, are fully exempt from corporate and income tax. A similar exemption applies to charterers and ship managers. Instead of corporate tax, ship owners, charterers and managers pay tonnage tax (TT) on the net tonnage of the ships they own, charter or manage. In addition, there is no tax on dividends paid at all levels of distribution by the above persons out of profits subject to TT and related capital gains and no capital gains tax on the sale or transfer of a ship, share in a ship or shares in a ship owning company. This treatment applies until 2020.

Reorganisations
Transfers of assets and liabilities between companies can occur without tax consequences within the framework of a tax-exempt qualified reorganisation.

Reorganisations include mergers, demergers, partial divisions, transfers of divisions of activities and exchanges of shares.

Withholding taxes (WHT)

The following tables give a summary of the WHT provided by the DTT entered into by Cyprus.

### Notes

The numbers in parentheses refer to the following numbered notes:

1. Under Cyprus legislation there is no WHT on dividends, interests and royalties paid to non-residents of Cyprus.
2. Royalties earned on rights used within Cyprus are subject to WHT of 10%.
3. A rate of 5% on film and TV royalties.
4. Nil if paid to a government or for export guarantee.
5. Nil on literary, dramatic, musical or artistic work.
6. Nil if paid to the government of the other state.
7. This rate applies for patents, trademarks, designs or models, plans, secret formulas or processes, or any industrial, commercial or scientific equipment, or for information concerning industrial, commercial or scientific experience.
8. A rate of 15% if received by a company controlling less than 25% of the voting power.
9. A rate of 15% if received by a person controlling less than 10% of the voting power.
10. Nil if paid to a government, bank or financial institution.
11. The treaty provides for WHT on dividends but Greece does not impose any withholding tax in accordance with its own legislation.
12. A rate of 5% on film royalties.
13. A rate of 5% if received by a person controlling less than 50% of the voting power.
14. This rate applies to individual shareholders regardless of their percentage of shareholding. Companies controlling less than 10% of the voting shares are also entitled to this rate.
15. A rate of 10% for payments of a technical, managerial or consulting nature.
16. Treaty rate is 15%, therefore restricted to Cyprus legislation rate.
17. A rate of 10% if a dividend is paid by a company in which the beneficial owner has invested less than USD 100,000.
18. If investment is less than EUR 200,000, dividends are subject to 15% WHT which is reduced to 10% if the recipient company controls 25% or more of the paying company.
19. No WHT for interest on deposits with banking institutions.
20. Armenia, Kyrgyzstan, Tajikistan and Ukraine apply the USSR/Cyprus treaty.
21. A rate of 10% on interest received by a financial institution or when it relates to sale on credit of any industrial, commercial or scientific equipment or of merchandise.
22. This rate applies for any copyright of literary, dramatic, musical, artistic or scientific work. A 10% rate applies for industrial, commercial or scientific equipment. A 15% rate applies for patents, trade marks, designs or models, plans, secret formulas or processes.
23. This rate applies to companies holding directly at least 25% of the share capital of the company paying the dividend. In all other cases the WHT is 10%.
24. This rate does not apply if the payment is made to a Cyprus international business entity by a resident of Bulgaria owning directly or indirectly at least 25% of the share capital of the Cyprus entity.
25. A rate of 7% if paid to a bank or financial institution.
26. Slovenia, Serbia and Montenegro apply the Yugoslavia/Cyprus treaty.
27. The treaty is effective from 1 January 2009.
28. This rate applies if received by a company (excluding partnerships) that holds directly 25% of the shares. A rate of 10% applies in all other cases.
29. The treaty is effective as from 1 January 2010.
30. This rate applies if received by a company (excluding partnership) that holds directly at least 10% of the shares for an uninterrupted period of no less than one year. A rate of 5% applies in all other cases.
31. A rate of 10% for patent, trademark, design or model, plan, secret formula or process, computer software or industrial, commercial or scientific equipment, or for information concerning industrial, commercial or scientific experience.

**Tax administration**

**Returns**
Business organisations are required to prepare audited accounts based on International Financial Reporting Standards (IFRS). Tax returns are completed based on these accounts on a calendar-year basis. The tax return needs to be submitted to the tax authorities by 31 December of the year following the relevant tax year.

**Payment of tax**
Corporate entities must pay provisional tax on the current year’s income in three equal instalments on 1 August, 30 September, and 31 December. A final payment must be made on or before 1 August of the following year on a self-assessment basis to bring the total payments of tax to the total actually due according to the tax return.
Corporate taxes in Czech Republic

Significant developments

The amendment to the Income Taxes Act broadens the scope of non-residents’ income from sources in the Czech Republic to include income in connection with the transfer of shares in Czech-seated companies, even in the case of a transfer between two non-residents (only income from a Czech tax resident buyer was included until 2008). The capital gain participation exemption now applies to gains from the sale of Czech subsidiaries’ realised European Union (EU) incorporated companies (previously, the exemption applied only to Czech permanent establishment of these companies). The amendment cancels participation exemption for EU companies when the Czech subsidiary is in the liquidation process (taxation of dividends is contrary to Parent Subsidiary Directive). Thin capitalisation rules have been softened retroactively from January 2008 when the inclusion of non-related party loans into debt/equity ratio was cancelled as well as the cap for interest rate. Dividend and interest exemption paid to Norway or Iceland is now available and exemption of licences from Czech withholding taxes based on the EU I/R Directive will be available from 1 January 2011.

The elections in May 2010 may result in tax changes implemented by the Parliament and new government. There are discussions that tax rates should be slightly increased after the elections. If any changes are approved, they will likely be effective from 1 January 2011, at the earliest.

Taxes on corporate income

Corporate income tax applies to the profits generated by all companies, including branches of foreign companies. Corporate partners in general partnerships (i.e., unlimited) and corporate general partners (i.e., unlimited) in a limited partnership are subject to corporate income tax on their share of the profits in the partnership.

The corporate income tax rate is 19% for 2010, going forward. The corporate income tax rate was 20% in 2009. The 19% rate applies to all business profits, including capital gains from the sale of shares (if not exempt under the participation exemption regime).

There is a special tax rate of 15% levied on dividend income of Czech tax resident entities from non-resident entities.

Corporate residence

A company is resident in the Czech Republic for tax purposes if it is registered in, or has a place of management located in the Czech Republic.
Czech Republic

**Other taxes**

The taxes discussed below may apply in addition to the corporate income tax.

**Value-added tax (VAT)**

VAT is charged at 20% on the supply of goods and services within the Czech Republic, but certain supplies (such as groceries) are taxed at a rate of 10%. Exports are generally exempt from VAT with a credit. Some supplies are exempt without a credit, including the lease of real estate (with certain exceptions), financial and insurance services, radio and TV broadcasting, education, health, and welfare.

**Road tax**

Road tax is payable with respect to vehicles (including private vehicles) used for commercial purposes. Foreign vehicles are also liable to road tax while in the Czech Republic. Rates vary depending on engine capacity and vehicle size.

**Real estate tax**

Real estate tax is payable by the owner of land or buildings. The amount of the tax is dependent on area, location and usage of the land or buildings.

**Transfer taxes**

Real estate transfer tax is levied on the transferor of real estate at a rate of 3% on the greater of the transaction price or the officially appraised value. Inheritance and gift taxes are levied on the recipient of other property transferred by inheritance or gift. The inheritance tax rates range from 0.5% to 20%, and the gift tax rates range from 1% to 40% on the value of the transferred property.

**Excise taxes**

Excise tax is charged on the production or import of tobacco products, wines, spirits, beer, fuel, and lubricants.

**Environmental taxes**

Environmental taxes are imposed on electricity and natural gas, and on certain solid fuels. The environmental taxes have a character similar to excise taxes.

**Branch income**

A foreign company can trade in the Czech Republic through a Czech branch. A branch usually creates a Czech permanent establishment (PE) of the foreign entity for corporate income tax purposes (depending on the character of the activities carried out through the branch). The basis of taxation is the same as for corporations (i.e., tax base is calculated as taxable revenues less tax-deductible costs). In some cases, it may be possible for taxpayers to negotiate with the tax authorities regarding the basis on which profits are attributed to the branch.

A branch is liable for tax on its attributable profits at the standard corporate income tax rate.
Czech Republic

Income determination

Capital gains
No separate capital gains tax is levied in the Czech Republic. Capital gains are included in the corporate income tax base and taxed as ordinary income in the year in which they arise.

Capital gains from the sale of shares may be exempt from Czech taxation if the following conditions are met:

1. The Czech or EU parent holds at least 10% of the shares of the subsidiary for at least 12 months;
2. The subsidiary is a tax resident of the Czech Republic;
3. Both the parent and the subsidiary have one of the legal forms listed in the Annex to the EU P/S directive; and
4. If the subsidiary is not a tax resident of the Czech Republic or another EU member state, the exemption can be applied, provided that the subsidiary is a tax resident of a country where there is a double-tax treaty in place with the Czech Republic, it has a legal form similar to a limited liability company or a joint stock company, and it is subject to corporate income tax at the nominal rate of at least 12% in a year when dividends are paid.

Inter-company dividends
Dividends received by Czech tax resident corporations from non-resident entities are subject to a special tax rate of 15% (unless exempt under the participation exemption regime – see discussion below).

Dividends paid by Czech tax resident corporations to Czech resident entities are subject to 15% final withholding tax, unless exempt under the participation exemption regime.

Dividends paid by Czech tax resident corporations to Czech non-resident entities are subject to 15% final withholding tax, unless exempt under the participation exemption regime or decreased under the relevant double-tax treaty.

Participation exemption regime
Dividend income may be exempt from Czech taxation (i.e., withholding tax, when a Czech company is paying dividends and corporate income tax or a Czech company is receiving dividends) if the following conditions are met:

- The Czech or EU parent holds at least 10% of the shares of the subsidiary for at least 12 months;
- The subsidiary is a tax resident of the Czech Republic or another EU member state.
- Both the parent and the subsidiary have one of the legal forms listed in the Annex to the EU P/S directive;
- Regarding dividends paid, provided that conditions above are met, the exemption also applies when dividends are paid by a Czech subsidiary to Switzerland, Norway or Iceland; and
- Regarding dividends received, if the subsidiary is not a tax resident of the Czech Republic or another EU member state, exemption on dividends received by a Czech resident may be applied, provided that the subsidiary is a tax resident of a country where a double-tax treaty with the Czech Republic is in place, it has a legal form similar to a limited liability company or a joint stock company, and it is subject to
Czech Republic

corporate income tax at the nominal rate of at least 12% in a year when dividends are paid.

**Foreign income**
Companies resident in the Czech Republic are taxed on their worldwide income. A Czech corporation is taxed on its foreign branch income when earned (accrual basis) and on foreign dividends when approved by general meeting.

Participation exemption regime is available (see above).

There is no controlled foreign companies (CFC) legislation in the Czech Republic.

**Exchange gains and losses**
Realised as well as unrealised foreign exchange gains and losses are accounted for in profit and loss accounts and represent taxable revenues or tax-deductible costs, respectively.

The default functional currency is Czech crown (CZK). A Czech company cannot opt for any foreign currency to be the functional currency for tax purposes.

**Inventory valuation**
Stock (i.e., inventory) is valued at cost. Czech legislation specifically provides for the use of the arithmetical average cost and first-in, first-out (FIFO) methods to value stock. Last-in, first-out (LIFO) and the replacement-cost methods (except for livestock) may not be used.

**Deductions**

**Depreciation and depletion**
Methods of tax depreciation are prescribed by tax legislation and are independent from depreciation methods for accounting purposes. Tax depreciation is calculated on an asset-by-asset basis, applying the straight-line or accelerated basis methods of depreciation at statutory rates. Under both methods, depreciation expense in the first year is lower than for subsequent years. The company may choose which method to apply to a new asset, but once the choice is made, it cannot be altered. All assets are classified into six groups, which determine the number of years over which the asset will be written off, as follows:

<table>
<thead>
<tr>
<th>Depreciation group</th>
<th>Minimum depreciation period (years)</th>
<th>Examples</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>3</td>
<td>Office machines and computers, tools</td>
</tr>
<tr>
<td>2</td>
<td>5</td>
<td>Engines, motor vehicles, machines, audio-visual equipment</td>
</tr>
<tr>
<td>3</td>
<td>10</td>
<td>Elevators, escalators, turbines, air conditioning equipment, electric motors and generators</td>
</tr>
<tr>
<td>4</td>
<td>20</td>
<td>Buildings made of wood and plastic, long-distance lines and pipes</td>
</tr>
<tr>
<td>5</td>
<td>30</td>
<td>Buildings (except for those listed in groups 4 and 6), roads, bridges, tunnels</td>
</tr>
<tr>
<td>6</td>
<td>50</td>
<td>Administrative buildings, department stores, historical buildings and hotels</td>
</tr>
</tbody>
</table>
“Tangible assets” (i.e., assets which are subject to tax depreciation) are defined by tax legislation generally as assets with economic useful lives of greater than one year and acquisition prices higher than CZK 40,000. Certain assets, such as buildings, are always considered tangible assets.

Taxpayers are not obliged to depreciate a tangible asset for tax purposes every year. Depreciation may be interrupted in any year and continued in a later year without a loss of depreciation potential.

Tangible assets are generally depreciated by the taxpayer with ownership title. Certain exceptions apply, for instance, technical appreciation of a rented asset carried out by a tenant may be depreciated by that tenant, subject to certain conditions.

Depreciation can start only once the assets are put into use and comply with the requirements of specific laws.

Certain assets have special depreciation methods (e.g., moulds are depreciated based on expected life or number of products).

The value to be used as the basis for tax depreciation depends on how the asset is acquired, for example:

- Acquisition cost (construction and equipment costs, architect fees, legal fees, notary's fees, etc.), if the asset is acquired for consideration; or
- Internal costs incurred, if the asset is acquired or produced internally.

“Intangible assets” are also defined by tax legislation as software, valuable rights, intangible results of research and development (R&D) and other assets regarded as assets for accounting purposes, provided that they:

- Were acquired from a third party or developed internally for the purpose of trading with them;
- Have an acquisition price of more than CZK 60,000; and
- Have a useful life of greater than one year.

Intangible assets are depreciated for tax purposes based on the number of years that the taxpayer has a license for the assets, if the license is for a limited number of years. Otherwise, depreciation for tax purposes will vary depending on the asset (e.g., software is depreciated over for 18 months, results of R&D is depreciated over 36 months, etc.).

**Travel expenses and meal allowances**
Payments for travel expenses and meal allowances that are made to employees are tax-deductible, but only within the statutory limits.

**Net operating losses**
Losses incurred in a tax year may be carried forward to offset taxable profits generated in the following five tax years. Losses may not be carried back.

**Payments to foreign affiliates**
Generally, deductions may be claimed for royalties, management service fees and interest charges paid to foreign affiliates, provided such amounts are at arm’s length.
**Thin capitalisation**

Thin capitalisation rules apply in the Czech Republic and may limit the tax deductibility of interest payments on debt financing from related parties as well as from third parties.

Below is a brief summary of the thin capitalisation rules:

- The tax-deductibility test applies not only to interest but also to all so-called “financial costs” on loans (e.g., interest plus other related costs, such as bank fees).
- Thin capitalisation applies only to related-party loans.
- The debt-to-equity ratio for related-party loans is 4:1.
- Unrelated-party loans (e.g., bank loans) guaranteed by a related party are not considered related-party loans for thin capitalisation purposes. If, however, a bank provides a back-to-back loan to a Czech entity where the loan is provided to the bank by a related party, such a bank loan to the Czech entity is considered a related party loan.
- Interest on profit-participating loans is not deductible for tax purposes.

**Taxes**

Road tax, real estate tax and most other taxes, with the exception of gift and inheritance taxes, are deductible, as are social security contributions paid by an employer with respect to employees.

Income tax is not tax-deductible.

**Other deductions**

Fees paid to members of other statutory bodies of companies for their services are not deductible for tax purposes.

Certain charitable donations are deductible. The minimum deductible donation is CZK 2,000 and the maximum deductible donation is 5% of the tax base (a maximum of up to 10% of the tax base is possible if gifts are granted to universities or R&D centres).

**Research and development (R&D) credits**

Costs (e.g., salaries, depreciation of assets) incurred by a taxpayer on R&D projects may be deducted twice for tax purposes: once as normal tax-deductible costs and then again as a special tax allowance. However, not all R&D costs may be deducted, including fees for services purchased.

**Group taxation**

Currently, the Czech Republic does not permit group taxation. Each company in a group is taxed individually.

**Tax incentives**

**Investment incentives**

Investment incentives are available only to Czech entities (including Czech subsidiaries of foreign companies) engaged in the manufacturing industry. Incentives include income tax relief, financial support for the creation of new jobs, financial support for training or retraining of employees and a transfer of land at a specially reduced price.
The former programmes for the support of business support service centres and for the development of technology centres, which were focused primarily on investments in human capital as well as the training or retraining of skilled staff, were abolished based on the decision of the Ministry of Industry and Trade in July 2008. However, these activities currently are supported by the EU structural funds, especially under the operational programmes Enterprise and Innovation.

**Film industry support programme**

Film production or co-production companies may apply for cash subsidy to cover a part of costs incurred in the Czech Republic in respect of production of audiovisual work. Eligible costs are represented by payments for goods and services related directly to the project if they were provided by the Czech tax residents in the territory of the Czech Republic. In this case, the subsidy amounts to 20%. Remuneration paid to actors and members of film unit can be also considered as eligible provided that they are subject to Czech withholding tax. The amount of subsidy for these costs is 10%. The amount of the subsidy is paid after the project finalization. In order to qualify for subsidy, the project has to fulfil certain financial and objective conditions. One of the conditions is a cultural test, which may ensure that only quality projects connected to the European culture are supported.

**R&D allowance**

Up to 100% of specific R&D expenses (or costs) incurred in a given tax year may be deducted from the tax base as a special tax allowance. These costs are deducted twice for tax purposes: once as a normal tax-deductible cost and then again as a special tax allowance.

The following costs can be included in the R&D tax allowance:

- Direct costs (e.g., personnel costs of research and development engineers, consumed materials);
- Tax depreciation of fixed assets used for R&D activities; and
- Other operational expenses directly related to the realisation of R&D activities (e.g., telecommunications fees, electricity, water, gas).

Only qualifying expenses are deductible for tax purposes and must be separately identified from other expenses (or costs). This allowance does not apply to costs of purchased services or intangible results of R&D acquired from other entities, except for expenses (or costs) incurred in connection with the certification of the results of R&D projects. In addition, expenses that were supported from public sources are also excluded.

Any non-utilised R&D allowance may be carried forward for three subsequent years.

A taxpayer may request a binding ruling with respect to R&D costs from the respective tax office in the event that the taxpayer is unsure of whether certain R&D costs are eligible for the allowance.
Czech Republic

**Withholding taxes (WHT)**

Czech corporations are required to withhold tax on payments of dividends, interest and royalties as follows:

<table>
<thead>

Notes

1. The lower rate applies if the recipient is a company that owns at least a certain amount of the capital or a certain amount of the voting shares of the company paying the dividend directly.
2. The lower rate applies mostly in situations when the interest is received by the government or a state-owned institution or is paid by the government.
3. The lower rate applies mostly to cultural royalties.
Czech Republic

**Tax administration**

**Returns**
A corporation may choose between the calendar year or an accounting year as its tax year.

Returns must be filed within three months of the end of the tax period.

A three-month extension of the filing deadline is available if a taxpayer is represented by a registered tax advisor or if the taxpayer is subject to a statutory accounting audit.

In some special cases, a filing deadline of less than three months may apply (e.g., upon merger or liquidation). This shorter deadline may, however, be extended if approved by the tax office.

**Payment of tax**
Tax payments are due on the same day as the filing deadline.

A company is obliged to make corporate income tax advances based on its last known tax liability. The tax advances are paid semi-annually or quarterly, depending on the amount of the last known tax liability.

Upon filing a tax return, tax advances paid during the year for which the tax return is filed will offset the tax liability declared in the tax return. Any outstanding amount must be paid on the date the tax return is due. Any overpayment will be refunded upon request or may be credited against future tax liabilities.

Significant developments

Participation exemption improved with effect from 2010
Previously, a company was required to pay tax on any capital gain on the sale of shares in a subsidiary, unless the company owned the shares for at least three years. Effective 2010, the three-year holding period requirement has been removed. As a consequence, shares can now be disposed of free of capital gains tax, regardless of the length of the ownership period, provided that the shares qualify as either “subsidiary shares” or “group shares”. See Income determination.

The change in law also removes the requirement that shares in a subsidiary must be held for at least 12 months for a dividend to be distributed in a tax-free manner. This requirement has been removed with effect for dividends declared in the calendar year 2010 and later. Consequently, dividends on “subsidiary shares” and “group shares” are tax-free.

On the other hand, the new law introduces harsh rules for taxation of shareholdings that do not qualify as “subsidiary shares” or “group shares”. Dividends received and capital gains realised or accrued on such shareholdings are fully taxable to the corporate shareholder.

Taxes on corporate income

Since 2007, the corporate income tax rate has been 25%. There is no local corporate income tax or similar surcharge.

Corporate residence

A corporation is resident in Denmark for tax purposes if it is incorporated in Denmark and registered in the Companies Register as having a Danish place of business. Further, foreign companies having their actual place of management in Denmark are also tax resident in Denmark. The actual place of management is typically the place where the management decisions concerning the company’s day-to-day operations are made.

Other taxes

Value-added tax (VAT)
The general VAT rate is 25% of the price charged (exclusive of VAT).
Denmark

**Stamp tax**
Stamp tax is payable on a few documents, such as a deed of transfer of real estate (0.6% of the transfer sum). There is no stamp duty on transfer of shares.

**Hydrocarbon income tax**
A special corporate income tax is levied on profits from the exploration and extraction of oil and gas on the Danish continental shelf at a rate of 52% under the new system (70% in the old system). Corporation income tax (25%) is deductible in computing the hydrocarbon tax.

**Employer’s tax (social security charges)**
The employer’s contribution to ATP (old-age pension) charges is DKK 2,160 per annum for a full-time employee.

Companies that provide VAT-exempt services are liable to pay the employer’s tax, which is calculated on the total annual salary cost. The rate can be up to 9.13%, which is the rate for banks and other financial institutions, the most significant sector paying the employer’s tax. This tax is deductible for income tax purposes. Other than these taxes, an employer’s obligation for social security taxes is minimal. The main social security charge is an additional income tax of 8% on salaries and wages, which is borne by employees.

**Environmental taxes**
Danish companies must pay environmental taxes, which were introduced to reduce companies’ energy consumption, discharges of fluids with an environmental impact and emission. The tax is paid to the company that provides the energy, who pays the tax to the Danish tax authorities.

In general, almost all VAT registered companies in Denmark can receive a reimbursement of some of the taxes. From 2010 the environmental taxes have increased, the possibilities to get a reimbursement have been decreased and the majority of companies will likely suffer a significant increase in tax costs from 2010.

**Branch income**
Danish branches and permanent establishments (PE) of foreign companies are taxed under the same rules and rates as Danish resident companies. There is no branch remittance tax or other similar tax on branch profits.

**Income determination**
Taxable income generally is calculated as income determined for accounting purposes that is adjusted and modified for several items, as prescribed by the tax laws. Typical timing differences include reserves, work in progress and depreciation.

A Danish company is not taxed on its worldwide income. Instead, income from a PE outside Denmark or from real estate located abroad is excluded from taxable income. This main rule is subject to modifications, particularly where the PE would constitute a taxable controlled foreign corporation (CFC) *(more details follow).*
Capital gains
Gains and losses realised on the sale of tangible and intangible assets, including goodwill, are generally included in taxable income. However, gains realised on the sale of shares are tax-exempt if the shares qualify as either “subsidiary shares” or “group shares”.

“Subsidiary shares” are shares held by a corporate shareholder that holds a minimum of 10% of the share capital in a subsidiary that is located in the European Union (EU), European Economic Area (EEA) or a country with which Denmark has a double taxation treaty. A special anti-avoidance rule applies, which is targeted at Danish shareholders joining their shareholdings in order to reach the 10% threshold.

“Group shares” are defined as shares in companies with which the shareholder is jointly taxed or might be jointly taxed. The definition of a group is therefore the same as in the joint taxation rules and generally corresponds to the definition of a group for accounting purposes. The location where the companies are registered is irrelevant, as long as the companies are affiliated.

If the shares do not constitute group shares, subsidiary shares or treasury shares, they constitute portfolio shares. Gains on portfolio shares are fully taxable regardless of holding period. Losses on the sale of portfolio shares generally are tax-deductible. However, special rules may apply for losses on unlisted shares.

Gains realised on the sale of real estate property are taxable whereas losses are not tax-deductible unless the property is a building qualifying for tax depreciation. A loss realised on the sale of land and other buildings may be utilised only against taxable profits on the sale of real estate properties in the same year or may be carried forward infinitely.

Gains and losses on financial instruments generally are included in taxable income, according to the mark-to-market principal, which is required. There are special rules for losses on certain share-based contracts.

Inter-company dividends
Dividends received on “subsidiary shares” or “group shares” are tax exempt regardless of the length of the ownership period, whereas dividends received on portfolio shares are fully included in taxable income.

Despite whether the shares qualify as “subsidiary shares” or “group shares”, dividends are fully taxable if received from a foreign company that can deduct the dividends paid, unless a tax exemption is provided for in the EU parent/subsidiary directive.

Foreign income
As a general rule, foreign source income, such as interest, is included in taxable income. However, income from a PE or real estate outside Denmark is excluded from taxable income.

The income of a foreign subsidiary may be taxed in the hands of its Danish parent company if the subsidiary constitutes a CFC.
**Stock dividends**
Stock dividends may be distributed to shareholders free of tax provided that the dividends are in proportion to the existing shareholdings (bonus shares).

**Deductions**

**Depreciation and depletion**
Tax depreciation need not be in conformity with book depreciation.

Annual depreciation allowances on machinery and equipment may be claimed under the diminishing-balance method at up to 25%. The depreciation base is the cost of fixed assets less (1) sales proceeds from disposals and (2) depreciation allowances previously claimed.

For ships, the depreciation rate is 20% in the year of construction and a 12% declining balance basis in subsequent years.

Depreciation allowances on buildings (other than residential buildings and office buildings not adjoining an industrial building) may be claimed at up to 4% on the straight-line basis.

Acquired goodwill and other intangible property rights can be amortised at up to one-seventh per year on a straight-line basis. Costs related to the purchase of patents or know-how (including rights/licenses to utilise patents or know-how) can either be fully expensed in the year of acquisition or amortised over a seven-year period on a straight-line basis.

Certain restrictions regarding the depreciable value of goodwill apply in the case of group transactions. Goodwill on the purchase of shares cannot be amortised for tax purposes.

Amortisation of the cost of acquisition or exploitation of natural resources is subject to special rules.

Airplanes, trains and utility plants can be depreciated only at a 15% declining balance (presently subject to phasing-in rates).

Rails, telecommunications facilities and certain other long-life plant and equipment can be depreciated only at a 7% declining balance.

Depreciation allowances that are recaptured as part of a capital gain on the sale of an asset generally are fully taxable.

**Net operating losses**
Tax losses may be carried forward indefinitely.

Certain restrictions on the right to carry tax losses forward apply when more than 50% of the share capital or 50% of the voting rights at the end of the financial year are owned by shareholders different from those that held control at the beginning of the income year in which the tax loss was incurred.
Similarly, under certain circumstances, tax losses are cancelled if a Danish company receives a debt forgiveness or comparable transaction. However, there are numerous exceptions (e.g., inter-company transactions).

**Payments to foreign affiliates**
A Danish corporation can claim a deduction for royalties, management fees and similar payments made to foreign affiliates, provided that such amounts are made on an arm’s-length basis and reflect services received. Interest at normal commercial rates paid to foreign affiliates generally will be allowed as a deduction but is subject to very complex thin capitalisation and interest relief limitation rules.

**Taxes**
Taxes are non-deductible for income tax purposes, except for employer’s tax and nonrecoverable VAT.

**Group taxation**

**Mandatory Danish tax consolidation**
A mandatory tax consolidation regime obliges all Danish resident companies and Danish branches that are members of the same domestic or international group to file a joint group tax return. The definition of a group generally corresponds with the definition of a group for accounting purposes. The tax consolidated income is equal to the sum of the taxable income of each individual Danish company and branch that are a member of the consolidated group.

The top parent company participating in the Danish tax consolidation group will be appointed the role of a so-called management company; this company is responsible for settling advance and final corporate tax payments of all group members.

**Elective cross border tax consolidation**
A non-Danish subsidiary may be included as a member to a Danish tax grouping provided that the group includes all of its foreign companies and branches in the Danish tax grouping. In effect, this all-or-nothing provision rules out the possibility for major international groups to have their Danish subgroup file a Danish group tax return that includes only certain hand-picked (typically loss-making) foreign group members.

If a general cross-border tax consolidation is established, it will be binding for 10 years – however, with certain possibilities of “breaking” the 10-year period (e.g., in connection with takeovers).

The comments under *Mandatory Danish tax consolidation* with respect to the calculation of the tax consolidation income, “management” company, etc., generally also apply to international tax consolidation.

**Thin capitalisation and interest relief limitations**
Danish resident companies and Danish branches of foreign companies are subject to three sets of restrictions, each of which may seriously limit or disallow Danish tax relief for financing costs. There is no recharacterisation of interest as dividends.

Firstly, there is the thin capitalisation rule under Section 11 of the Corporate Income Tax Act. This rule works to disallow gross interest costs on related party debt to the
extent the overall debt to equity ratio exceeds 4 to 1. Related party debt is defined so as to include external bank debt if group member companies or shareholders have provided guarantees to the bank. Section 11 does not apply if the controlled debt is less than DKK 10 million.

Secondly, there is an asset-based rule under Section 11B. To the extent a Danish tax group as a whole has net financing costs in excess of DKK 21.3 million (full-year amount for 2009 and 2010), tax relief may be obtained only within an amount equal to 6.5% (rate applicable for 2009) of the tax basis of certain assets of the group (rate applicable for 2010 is 5%).

Thirdly, there is an Earnings before Interest & Tax (EBIT) based rule under Section 11C. This rule works to limit interest relief to an amount equal to 80% of the Danish tax group's taxable EBIT income. The rule applies the same definition of net financing costs as Section 11B, and it also allows for a minimum deduction of DKK 21.3 million in cases where EBIT is too low or negative.

**Controlled foreign company rules**

According to the Danish CFC rules, a Danish company has to include in its taxable income the total income of a subsidiary, foreign or Danish, if such subsidiary qualifies as a CFC. A subsidiary qualifies as a CFC if all of the following criteria are met:

1. The Danish company, together with other group member companies, directly or indirectly owns more than 50% of the capital or controls more than 50% of the voting rights in the subsidiary
2. More than half of the subsidiary’s taxable profits, as hypothetically assessed under Danish tax laws, are predefined CFC income types (mainly interest, royalty, capital gains, etc.)
3. During the income year, the subsidiary’s CFC assets (assets, where the return is characterised as CFC income type) make up more than 10% of the subsidiary's total assets.

There is no black-or-white list that exempts subsidiaries resident in certain countries.

**Transfer pricing**

Danish transfer pricing rules apply to transactions between related parties (e.g., intergroup transactions), whether the transactions are made between residents or non-residents. The rules apply when a company or person directly or indirectly owns at least 50% of the share capital or 50% of the voting rights in another company.

Companies are obliged to disclose in the annual tax return certain information regarding type and volume of intragroup transactions. Companies also are obliged to maintain detailed and extensive transfer pricing documentation to substantiate that intragroup transactions are conducted in accordance with arm's-length principles. A company is subjected to fines for failure to comply with the documentation rules.

**Tax-free restructuring**

Restructuring such as mergers, demergers, share exchanges, drop-down of assets, etc., can in many cases be carried out tax-free under the provisions of the EU Mergers Directive as implemented into Danish law. These types of restructuring can be carried out in a tax-exempt manner without prior approval from the tax authorities. However,
several objective conditions must be fulfilled. Formation, merger, reorganisation and liquidation expenses are mostly non-deductible.

**Tax incentives**

**Capital expenditures**
A small variety of tax incentives are available in the form of deductions for capital expenditures.

Danish tax law allows for an immediate write-off of capital expenditures for research and development (R&D). Alternatively, the taxpayer may choose to take tax depreciation in the same year and the following four years on a straight-line basis. Costs incurred in connection with the exploration for raw materials may also be fully deducted in the same year.

Costs related to purchase of patents, know-how (including rights/licenses to utilise patents or know-how) may either be fully expensed in the year of acquisition or amortised over a seven-year period on a straight-line basis.

**Tonnage Tax Scheme**
Danish tax law provides for a special tax scheme for shipping entities.

The main principle of the Tonnage Tax Scheme is that qualifying shipping entities are not taxed on the basis of their actual income derived from their business, but on a fictitious income based on the net tons carrying capability of their fleet used for purposes covered by the Tonnage Tax Act.

The Tonnage Tax Scheme is available to Danish shipping entities organised as limited liability companies (A/S or ApS), foreign shipping companies with the place of management and control in Denmark, and EU shipping companies with a PE in Denmark.

The Scheme is available upon application to the Danish tax authorities. A decision to enter into the scheme is binding for a period of 10 years.

As a general rule, group related shipping companies based in Denmark must make the same choice regarding the Tonnage Tax Scheme. However, shipping companies that do not have the same management or operating organisation and do not conduct business in related fields may be exempt from the joint decision provision.

The Tonnage Tax Scheme is restricted to certain types of business activities. The entity must carry out commercial transportation of passengers or cargo between different destinations. The ships must be owned, or chartered on a “bareboat” or “time-charter with a call/buy option by the company” basis, and have a minimum gross tonnage of 20 tons. Certain restrictions apply for ships chartered on a time charter basis without a call/buy option. The ships must be strategically and commercially run from Denmark.

Income from activities that are carried out in close connection with this business, such as the usage of containers and loading facilities, etc. may also be included in the Tonnage Tax Scheme. Ships used for exploration, diving, fishing, towing, sand dredging, etc., are specifically exempt from the Scheme. The same applies for certain types of ships, such as barges, floating docks, etc. However, EU or European Economic
Community registered ships used for towage activities at sea (i.e., not in and around ports) during at least 50% of its operating time during the income year may be included in the tonnage tax system.

Ship operating companies may also use the Danish Tonnage Tax Scheme. A ship operator is defined as a company doing business with crew management and technical management of ships qualified for use in the tonnage tax system. It is a requirement that the ship operator has taken over the full operating responsibility and all obligations and responsibilities according to the International Safety Management codex.

**Taxable income**
The taxable income for the part of the business that qualifies for the Tonnage Tax Scheme is determined for each ship as a fixed amount per 100 net tons (NT) per day according to the following:

<table>
<thead>
<tr>
<th>Ship net ton</th>
<th>Fixed amount per day</th>
</tr>
</thead>
<tbody>
<tr>
<td>0 to 1,000 NT</td>
<td>DKK 7.8 per day per 100 NT</td>
</tr>
<tr>
<td>1,001 to 10,000 NT</td>
<td>DKK 5.6 per day per 100 NT</td>
</tr>
<tr>
<td>10,001 to 25,000 NT</td>
<td>DKK 3.35 per day per 100 NT</td>
</tr>
<tr>
<td>Over 25,000 NT</td>
<td>DKK 2.2 per day per 100 NT</td>
</tr>
</tbody>
</table>

The income is taxed at the ordinary corporate tax rate (25%). No deductions relating to shipping income will be allowed. Special rules apply for financial income and financial expenses, and in relation to so called “thin capitalisation”. Income that does not qualify for the tonnage tax scheme is taxed according to the general tax provisions in Denmark.

**Depreciation**
Shipping entities that apply the Tonnage Tax Scheme from the time of their establishment may not deduct depreciation for tax purposes. Special rules apply for shipping entities that were already in existence when they elected to become subject to the Scheme and for entities that elect to include certain other assets at a later point in time that were not previously subject to the Scheme.

**Gains on the sale of ships**
Gains on the sale of ships that have not been used in the Scheme prior to 1 January 2007 are tax exempt. The same applies to gains on the sale of contracts on the delivery of ships, provided that the ship was destined to be delivered after 1 January 2007.
Gains on the sale of ships used in the scheme in prior years are taxable. The taxable gain is calculated as the sale price minus the purchase price plus improvements. Any losses on ships acquired and sold within the same income year as the income year in which a gain is realised may be offset against the gain.

**Withholding taxes (WHT)**

**On payments to foreign corporations and non-resident aliens**

**Dividends**
Dividends paid to a parent company in another EU member state or a state with which Denmark has a double tax treaty are exempt from withholding tax provided that the shares qualify as subsidiary shares. The same applies for dividends paid on group
shares (that are not also subsidiary shares, i.e., holding below 10%) provided that the recipient company is resident within the EU/EEA.

Dividends paid on portfolio shares to a foreign shareholder are levied withholding tax of 28%. A change in law has reduced the rate to 27% with effect from 2012. If the portfolio shareholder is situated in a country with which Denmark has a Tax Information Exchange Agreement (TIEA), the tax rate on the dividend is reduced to 15% and the difference between the higher withholding rate and the lower tax rate may be reclaimed. However, the reduced rate does not apply if the shareholder is resident outside the EU and together with related entities own more than 10% of the capital in the Danish distributing company.

**Interest**

Interest generally is not subject to withholding tax unless paid to a foreign group member company that is tax resident outside the EU and outside any of the states with which Denmark has concluded a tax treaty. In this situation, interest withholding tax is levied at 25%. Certain other exemptions apply, mainly relating to CFC taxation.

**Royalties**

Royalties are subject to a 25% withholding tax. In most cases, the payer may reduce its withholding in accordance with the tax treaty applicable to the payee. Also, the EU Interest/Royalty Directive may provide an exemption from withholding tax if the payee is an immediate parent, sister or subsidiary company resident in the EU.

Notes

1. Denmark does not operate a system of withholding tax on dividends when the parent company holds:
   a. At least 10% of the share capital of the distributing Danish company, provided the receiving company is resident in a EU/EEA member state or a state with which Denmark has entered a double tax treaty (subsidiary shares).
   b. Less than 10% of the share capital in the distributing company provided that the receiving company is an EU/EEA-resident and the distributing and the receiving company are affiliated companies (group shares).

2. Interest generally is not subject to withholding tax unless paid to a foreign group member company that is tax resident outside of the EU and outside of any of the states with which Denmark has concluded a tax treaty. In this situation, interest withholding tax is levied at 25%.

3. Exemptions apply if the receiving company is directly or indirectly controlled by a Danish parent company or if the receiving company is controlled by a company resident in a state with which Denmark has a double tax convention and that company may be subject to CFC taxation. Finally, an exemption applies if the receiving company establishes that the foreign taxation of interest is not less than three-quarters of the Danish corporate taxation and that the interest is not paid to another foreign company subject to taxation less than three-quarters of the Danish corporate taxation.

4. Denmark has terminated its treaty with Spain and France with effect from 1 January 2009. The termination means that each country will tax the relevant income according to its domestic tax rules. New treaties are not expected to be agreed in the near future. Companies in Spain and France receiving dividends from a Danish company may, however, qualify for tax exempt dividend since they are EU member states.

5. The EU Interest/Royalty Directive may provide an exemption from withholding tax if the payee is an immediate parent, sister or subsidiary company resident in the EU.

6. Serbia has succeeded in the treaty between Denmark and Yugoslavia.

7. A new protocol to the treaty between Denmark and Switzerland has been signed, allocating taxing rights of 15% on dividends to the source state. The amendment has, however, not yet entered into force.

**Tax administration**

**Returns**
Tax returns are completed on the basis of audited financial accounts with adjustments for tax. Tax returns should be filed no later than six months following the end of the accounting year. Corporations with an accounting year-end that falls in the period from January 1 to March 31 must file a tax return no later than 1 August in the same calendar year.

The tax system, in practice, is based on self-assessment. Tax assessments are made automatically by the tax authorities on the basis of the tax return. However, the tax authorities may subsequently audit the tax return. The general statute of limitations is 1 May in the fourth calendar year after that of the end of the relevant accounting period. This limitation is extended for another two years with respect to inter-company (transfer pricing) issues.

**Payment of tax**
Corporate income tax must be paid on a current year basis in two equal instalments due on 20 March and 20 November. The authorities request payments of 50% of the average of the last three years' final income tax. In addition, voluntary additional payments may be made at the same dates; such voluntary payments are adjusted by 0.7% when set against the final tax bill.

The final tax bill is settled by 20 November in the following year. Underpaid tax is then payable by 20 November with a surtax of 5.1% of the tax amount (rate for 2010 tax year). Overpaid tax is refunded by November of the following year with interest of 1.6% (rate for 2010 tax year).

Significant developments

No significant developments from January through to April 2010.

Taxes on corporate income

The current corporate income tax rate is 25%.

Corporate residence

A company is resident when it is registered and/or incorporated under the Law of the Dominican Republic (DR). However, a foreign entity registered in the DR as a branch or permanent establishment is subject to local tax in the same manner.

Dividends remitted abroad or paid locally are subject to a withholding tax of 25%. This withholding tax may be used as a credit against the company’s corporate income tax of the same period, as long as the dividends were paid out of profits which had already been subject to the corporate income tax.

Other taxes

Internal and consumption taxes collected at customs upon import

These taxes are assessed at various rates depending on the nature of the goods and its origin since free trade agreements exist (such as the United States-DR-Central American Free Trade Agreement (CAFTA)), which decrease the custom duties rates for goods imported from the member countries.

Excise tax

There are two kinds of selective consumption tax:

• Specific tax for alcoholic goods and cigarettes (adjusted by inflation annually):
  • Alcohol: range from DOP 335.88 to DOP 411.86 for every litre of absolute alcohol; and
  • Cigarettes: DOP 31.29 for a 20 pack and DOP 15.64 for a 10 pack.

• Ad valorem which ranges from 19.50% to 130% and is applied on the consumption of certain imported goods (listed in the law) that are considered to be nonessential, rendering of telecommunications services (10%), insurance services (10%) and
Dominican Republic

0.0015% over the value of cheques or wire transfers made through financial entities (this tax does not apply to cash withdrawals or credit card use).

**Value-added tax (VAT)**

VAT is applied to industrialised goods (movable) and services. The rate is 16%. Zero rates apply to exports.

**Real estate transfer tax**

This tax is assessed at a basic rate of 3%.

**Stamp taxes**

Stamp taxes have been abolished.

**Asset tax**

Asset tax/Law No. 557-05 imposes a 1% tax on total assets. Share investments in other companies, land in rural areas, immovable property pertaining to livestock and agriculture, and tax advance payments are excluded from this tax base.

Depreciation, amortisation and reserves for bad debts are allowable deductions for application of the 1% tax on total assets.

This tax shall be filed and liquidated through the Annual Corporate Income Tax Return (Form IR-2) and paid, applying the following rule:

- The asset tax is an alternative/minimum tax.
- The income tax is allowed as a credit against the asset tax.
- If the income tax is greater than the asset tax, the obligation to pay the asset tax is considered to be cancelled and instead the income tax is paid.

If the income tax is less than the asset tax, the difference (in order to complete the asset tax value) shall be paid in two equal instalments as follows:

- First instalment: shall be paid during 120 days subsequent to closing date; and
- Second instalment: shall be paid within six months after first quote’s due date.

The entities may request a temporary exemption from the asset tax, such as entities that require large capital (among other requirements established by General Ruling 3-06) may make such request, which shall be submitted at least 90 days before the filing due date. The local internal revenue service (IRS) shall evaluate the merits of the request and approve or deny as appropriate.

If the entity has an income tax credit arising from excess advance payments, it may request the refund of such balance be applied against the asset tax.

In the case of financial institutions, power generation and distribution, pension funds entities and stock brokerage companies, the tax is calculated based on the book value of fixed assets.

According to rule 07-2007, construction companies may seek exemption from the asset tax, provided that such entities meet the requirements established in this rule.
**Branch income**

Branch profits are taxed at the same rate as corporate profits (25%). There is no withholding tax on branch profit remittances to the company’s headquarters, provided corresponding annual corporate tax has been paid.

**Income determination**

**Inventory valuation**
The last-in, first-out (LIFO) method of inventory valuation is accepted for fiscal purposes. Other methods may be authorised upon request.

Conformity between book and tax reporting is not required.

**Capital gains**
Capital gains are added to the ordinary taxable income and subject to the same tax rate of 25%. Capital gain is determined by deducting the acquisition cost adjusted by the inflation rate from the sale amount.

**Inter-company dividends**
Dividends distribution is subject to a 25% withholding tax that should constitute a tax credit against the annual corporate income tax corresponding to the same fiscal period of the distribution.

**Foreign income**
Dominican-resident companies, branches and permanent establishments are subject to taxation on income from Dominican sources and on income from foreign sources arising from investments and financial gains. Tax determined on income from foreign source is subject to a credit mechanism. Taxes paid in the country where the income is originated can be credited up to the amount of the tax payable in DR on the same income.

**Stock dividends**
Stock dividends are not subject to taxation.

**Deductions**

**Depreciation and depletion**
Depreciation allowances on fixed assets are determined by the declining balance method at the following rates:

<table>
<thead>
<tr>
<th>Class</th>
<th>%</th>
</tr>
</thead>
<tbody>
<tr>
<td>Buildings</td>
<td>5</td>
</tr>
<tr>
<td>Furniture, fixtures, computers, vehicles, etc.</td>
<td>25</td>
</tr>
<tr>
<td>Other assets not specified</td>
<td>15</td>
</tr>
</tbody>
</table>

The fiscal book value is adjusted by the annual inflation rate.

**Net operating losses**
The carryforward of losses of legal entities can be used to offset profits up to the fifth period following the period in which the losses were generated, with a maximum
Dominican Republic

amortisation of 20% in each period. For the fourth period the deduction allowed should not exceed 80% of the net taxable income. In the fifth period, the percentage is 70%.

**Payments to foreign affiliates**
Payments to foreign affiliates for royalties, interest, or service fees are deductible, provided 25% withholding tax was paid.

Payments on interest (loans) abroad to foreign financial institutions are subject to a withholding tax of 10%.

**Taxes**
In principle taxes are not deductible neither interest and surcharges imposed on it, inheritances, donations, fringe benefit tax and penalties related to all taxes.

**Other significant items**
For tax purposes, the following significant items should be considered:

- Bad debts are deductible only in the year the loss is suffered. Authorisation may be obtained to use an alternative method which consists in creating a provision, allowing the deduction only in the year the bad debts qualify as doubtful, up to 4% of the balance of the accounts receivable at year-end;
- Amortisation of intangible assets, such as patents, author’s rights, drawings, franchises, and contracts without set expiration date, is not deductible;
- Changes in method are not allowed without advance approval; and
- Bonuses to employees are deductible within the year if paid before 120 days after year-end.

**Group taxation**
Group taxation is not permitted.

**Tax incentives**
In the DR the following incentive laws exist:

- Tourism;
- Alternative energy;
- Industrial renovation and modernisation;
- Industrial Free Trade Zone operations; and
- Border development.

**Withholding taxes (WHT)**
Dividends in cash to resident and non-resident individuals and corporations are subject to a WHT of 25%.

The WHT on payments to foreign corporations, which are not permanently established in the Dominican Republic, are as follows:
Dominican Republic

<table>

<td>Treaty (Canada)</td>
<td>18</td>
<td>18</td>
<td>25</td>
</tr>
</tbody>
</table>

Note

* Payments on interest (loans) to foreign financial institutions are subject to a withholding tax of 10%.

**Tax administration**

**Returns**
The Corporate Annual Tax Return must be filed and taxes paid within 120 days after year-end. Tax authorities may allow extensions of up to 60 days, upon request.

Tax returns are based on self-assessment and must be filed on electronic forms supplied by the Internal Tax Department.

**Payment of tax**
The balance of any tax due must be paid no later than the due date for filing the return. Corporations domiciled in the country and permanent establishments of foreign enterprises shall be obliged to make monthly advance payments of tax related to the period in progress.

**Year-end dates established by the DR tax code**
Corporate bylaws should establish as year-end, one of the following: 31 December, 31 March, 30 June, or 30 September. Once the year-end is selected, any change should be authorised by the tax authorities.

**Year ending 31 December 2009**

Significant developments

A new tax reform was introduced at the end of 2007, 2008, 2009 and 2010 modifying many subjects on local tax legislation.

The reforms include a remittance tax (“Impuesto a la Salida de Divisas” – ISD) and changes to the Income Tax Law, including income tax (creating additional limitations on deducting expenses) and value-added tax (VAT) (imposing a 12% VAT on the importation of services).

The International Financial Reporting Standards' (IFRS) final implementation deadline for companies (except for financial institutions) was suspended until 2012 (for companies with assets lower than USD 4 million).

Taxes on corporate income

Taxes on corporate income are levied at the following rates:

<table>
<thead>
<tr>
<th></th>
<th>Rate %</th>
</tr>
</thead>
<tbody>
<tr>
<td>Distributed or undistributed profits of local corporations and branches</td>
<td>25.0</td>
</tr>
<tr>
<td>Reinvested profits of local corporations and branches</td>
<td>15.0</td>
</tr>
<tr>
<td>Oil companies with production sharing contracts</td>
<td>25.0</td>
</tr>
<tr>
<td>For oil companies with risk service contracts:</td>
<td></td>
</tr>
<tr>
<td>Distributed profits</td>
<td>44.4</td>
</tr>
<tr>
<td>Undistributed profits (under certain investment conditions)</td>
<td>25.0</td>
</tr>
</tbody>
</table>

Resident entities are taxed their on worldwide income. Non-resident entities are subject to tax on Ecuadorian-source income only.

Corporate residence

Corporate residence is determined by the place of incorporation. For foreign branches, it is the place stated in the domiciliary deed.
**Other taxes**

**Value-added tax (VAT)**

VAT is levied at the rates of either 12% or 0% on the ownership transfer of goods, import of goods and services, as well as services rendered within the country. Royalties and intangible property imported or locally paid are also levied with a 12% VAT.

The following are transactions exempt from VAT:

- In-kind contributions to capital of companies;
- Inheritance and assets obtained from liquidation of companies;
- Transfer of business as a whole, amalgamations, mergers, takeovers and spin-offs;
- Donations to public entities and non-profit organisations; and
- Transfers of shares and securities.

Goods and services, which are subject to 0% rate, are explicitly listed in the law. Among others, the following goods are taxed at a 0% rate upon either importation or local transfer of ownership:

- Most agricultural goods and foodstuff when these remain in their natural state; this includes refrigerated or packaged goods that have not undergone further processing. Also included in this category are milk, meats, sugar, salt, bread, butter and margarine, flour and cooking oil;
- Drugs, medicines and other pharmaceutical products, including raw materials for their production;
- Fertilisers, insecticides, animal foods and similar products, including the raw materials required for processing such goods;
- Agricultural machinery and equipment;
- Goods that are exported; and
- Paper, books, magazines and newspapers.

Among others, the following services are taxed at a 0% rate:

- Transportation of persons and cargo, except air transportation of persons and local air transportation of cargo;
- Book printing services;
- Housing rental;
- Water, electric, sewage and other public services, including garbage collection;
- Financial services; and
- Exported services.

12% VAT paid on imports and local purchases can be deducted from 12% VAT charged on sales or services rendered. The VAT paid on raw materials, fixed assets or components required for the production of goods or rendering of services is also creditable when the final product is considered taxable at 12%. Similarly, VAT paid on raw materials, services, components or fixed assets necessary for production of export goods is also recoverable.

VAT may not be recovered (by either tax credit or other means) on the local acquisition or import of goods and services that are used for the production of goods or services taxed at a rate of 0%. In these cases, nonrecoverable VAT is part of the cost of
Ecuador

the purchased goods and services or an expense, both deductible for income tax computation purposes.

Companies designated by the government as special taxpayers are required to withhold 30% of VAT applicable on their purchases of goods taxed at 12% and 70% of VAT applicable on their purchase of services taxed at 12%, except with respect to services rendered by professionals, in which case 100% of VAT charged must be withheld.

**Municipal assets tax**
The municipal asset tax is levied on all individuals and companies required to keep accounting records in accordance with Ecuadorian tax legislation. This tax is levied at a rate of 1.5 per thousand (or 0.15%) of total assets less current and contingent liabilities as shown on the balance sheet.

**Municipal real estate tax**
The city government assesses the municipal property tax, which ranges from between 0.25 per thousand and 5 per thousand (0.025% to 0.5%) of the commercial value of the property, as determined by valuation carried out every five years by the city government, for both urban and rural properties (rural property is taxed at a maximum of 3 per thousand or 0.3%).

**Municipal tax on capital gain in the transfer of real estate (Plusvalía)**
The real estate transfer tax applies to the transfer of real estate. It is taxed at 10% of profits, except in the case of first transfer after September 2004. In that case the rate is half of the property’s value.

**Special consumption tax (Impuesto a los Consumos Especiales – ICE)**
This tax is imposed on domestic and imported goods which are explicitly listed in the law. This tax is levied at a progressive rate from 5% to 35% on certain automobiles and 15% on airplanes, helicopters and boats. The tax on cigarettes, alcoholic beverages and soft drinks ranges from 10% to 150%. It must be paid monthly and is collected upon sales. The ICE tax base for imported goods is the “ad valorem” value.

**Foreign assets tax (Impuesto a los Activos en el Exterior)**
The tax base is the average monthly balance of cash deposits held in foreign entities by private entities registered in the stock market and regulated by the Superintendent of Banks and Companies. Monthly tax rate is 0.084%.

**Remittance tax (Impuesto a la Salida de Divisas)**
Remittance tax is imposed on the transfer of money abroad in cash or through cheques, transfers or courier of any nature carried out with or without the mediation of the Ecuadorian financial system. Beginning January 2010, the rate is 2%.

**Branch income**
Distributed or retained branch profits (as well as reinvested profits of oil companies operating under risk-service contracts) are taxed at a 25% rate. No further taxes are payable when profits are remitted to headquarters. Re-invested profits are levied at a 15% income tax rate. Companies must increase their share capital within the following fiscal year to be beneficiaries of the income tax rate reduction. There is not a branch remittance tax in Ecuador.
**Income determination**

**Inventory valuation**
The valuation of inventories is not specifically treated in the tax law. Ecuadorian accounting standards must be applied; inventories are carried at acquisition cost. Last-in, first-out (LIFO); first-in, first-out (FIFO) and average cost methods are used, with average cost being the preferred method.

**Capital gains**
Occasional gains from stock sales are tax exempt, and gains from investment funds and investment trusts are income tax exempt, as long as the income has been taxed at source. Gains on the sale of fixed assets are added to the taxable base and levied at regular income tax rates, except gains derived from occasional sales of real estate, which is tax exempt.

**Dividends**
Dividends received by a resident company from another resident company’s profits that have been subject to tax are exempt. However, dividends paid to tax havens are taxable subject to withholding at source.

**Inter-company dividends**
Dividends received by an Ecuadorian company from another domestic company are exempt from income taxes. The same treatment applies to dividends received by a branch of a foreign company from a domestic company. Dividends remitted abroad to non-tax haven countries are not subject to additional income tax withholding.

**Foreign income**
Foreign-source income is considered exempt for tax purposes; companies must demonstrate the income tax payment abroad. Tax haven countries are not considered to be part of this exemption.

**Stock dividends**
The distribution of stock dividends is not subject to tax.

**Deductions**

**Depreciation and amortisation**
Straight-line depreciation at rates specified by law applies. The director of the Internal Revenue Service of Ecuador authorises higher rates of depreciation in cases such as obsolescence, excessive use and faster than expected wear-out of assets.

Depreciation rates are as follows:

<table>
<thead>
<tr>
<th>Description</th>
<th>%</th>
</tr>
</thead>
<tbody>
<tr>
<td>Real estate (except land), aircraft, naval crafts, and similar property</td>
<td>5</td>
</tr>
<tr>
<td>Facilities, machinery, equipment and furniture</td>
<td>10</td>
</tr>
<tr>
<td>Vehicles, trucks and tractors used for construction</td>
<td>20</td>
</tr>
<tr>
<td>Computer equipment and software</td>
<td>33</td>
</tr>
</tbody>
</table>

Depreciation rates apply to the cost of assets.
Ecuador

**Net operating losses**
The carryforward of losses is allowed to a maximum of five years, with an amortisation limit of 25% per year over the taxable base. There is no loss carryback.

**Payments to foreign affiliates**
In most cases, payments made abroad are deductible, as long as income taxes have been withheld (at the rate of 25% over the taxable base). Professional fees, royalties, commissions or any payment made abroad is subject to withholding at a rate of 25% over the taxable base. Payments on imports are deductible and are not subject to withholding of income taxes.

**Taxes**
Taxes, rates, levies and contributions to the social security system related to the generation of taxable income are deductible. Interest and fines paid as penalties imposed on late payments of tax obligations and on income tax payments are not deductible for income tax calculation purposes.

**Other significant items**
The tax law refers to other deductions, the most important of which are as follows:

- Organisation, experimentation and preoperational expenses. These expenses are to be amortised over five years at the rate of 20% per year.
- Interest on debts incurred for business purposes.
- Foreign loan interests are deductible to the extent that they are registered with the Ecuadorian Central Bank (ECB) and do not exceed the maximum rates established by ECB. Interest on foreign loans that are not registered with the ECB are non-deductible.
- Intangible assets are amortised either within the terms specified in the contract or over a 20-year period.

**Statutory profit sharing**
According to the Ecuadorian Labour Code, companies must distribute 15% of their pre-tax earnings amongst their employees. This profit sharing is a deductible expense for corporate income tax purposes.

**Financial system**
As a general rule, operations that exceed USD 5,000 should be performed through any institution of the Ecuadorian financial system, otherwise such operations will become non-deductible.

**Thin capitalisation rule**
A thin capitalisation rule on foreign loans granted by related parties at a 3:1 ratio over equity must be considered. For branches of a foreign corporation, only capital must be considered.

**Group taxation**
Group taxation is not permitted.
**Tax incentives**

**Social security system**
Taxes, rates, levies and contributions to the social security system that are related to the generation of taxable income are deductible.

**Net employee increase and handicapped employees**
An amount equivalent to one and a half and one times remunerations of handicapped and new employees, respectively, can be considered an additional deduction for income tax calculation purposes. New employees must be working with the company for at least six months.

**Withholding taxes (WHT)**

Dividends paid to a non-resident generally are not subject to WHT. However, dividends paid to a non-resident in a tax haven are subject to WHT at source.

Interest paid on loans obtained from non-residents is subject to a 25% WHT unless reduced by tax treaty. Royalties paid to a non-resident are subject to 25% WHT unless reduced by tax treaty.

Revenues from occasional services provided by non-resident individuals are levied at 25% of the total revenue. Payments made abroad to non-resident individuals and companies are subject to a 25% withholding tax. Other payments made abroad, other than dividends or profits, are subject to a 25% income tax withholding. For 2009, a 5% income tax withholding applied on interest remitted abroad. The rates at which the loan has been contracted should not exceed the rates set by the ECB.

Periodically, the Internal Revenue Service of Ecuador establishes withholding percentages on local payments, which are not greater than 10%. Local payments (including interest paid by financial institutions) are subject to 1%, 2% or 8% withholding.

**Tax treaties**
As a member of the Andean Community, Ecuador has adopted Decision 578, which provides relief from double taxation for individual or company members. Furthermore, Ecuador has similar tax treaties with Belgium, Brazil, Canada, Chile, France, Germany, Italy, Mexico, Romania, Spain and Switzerland.

**Tax administration**

**Returns**
The fiscal year is the calendar year from 1 January to 31 December. The tax system operates on the basis of self-assessment, with subsequent inspection by the tax authorities.

**Payment of tax**
Tax filing deadlines begin on April 10 and continue up to April 28. The tax due dates are determined by the ninth digit of the company’s Tax Identification Number (TIN).

Corporations are required to keep accounting records and must make advance income tax payments based on the following calculation:
Ecuador

The sum of 0.4% of the taxable income plus 0.4% of total assets plus 0.2% of total equity, and 0.2% of deductible expenses less withholdings taxes held on the fiscal year.

Advance payments are made in two equal payments in July and September. Differences between advance payments and the income tax returns must be paid. If the difference is in favour of the taxpayer, the taxpayer must request a reimbursement from the Internal Revenue Service.

**Other Issues**

**Transfer pricing**
The transfer pricing regime is based on the Organisation for Economic Co-operation and Development (OECD) guidelines. Related party transactions must be carried out at arm’s length. Documentation requirements exist.

Significant developments

On 10 June 2005, the Egyptian Cabinet passed a new income tax law that replaced Law 157 of 1981. The following information summarises some of the developments in the tax system under the new law.

Corporate definitions

The term "corporate" covers the following definitions under the new tax law:

1. Juridical Persons – The following shall be considered juridical persons:
   - Associations of capital and partnerships under whatever the law they are subject to, as well as de facto corporations;
   - Cooperative societies and their unions subject to the exemptions prescribed for them by the law;
   - Public authorities and other public juridical persons, with regard to the taxable activity they exercise, subject to the exemptions prescribed in the laws establishing them; and
   - Foreign banks, companies and establishments even if their head offices are abroad and their branches are in Egypt.

2. Corporation de facto – A de facto corporation is a partnership established between natural persons without fulfilling the procedures of establishment or registration, with the exception of cases resulting from inheriting an individual firm.

Taxes on corporate income

The corporate tax rate is 20% for the income generated for all types of business activities except for oil exploration companies, the profits of which are taxed at 40.55%. In addition, the profits of the Suez Canal Authority, the Egyptian Petroleum Authority and the Central Bank of Egypt are taxable at a rate of 40%.

The foreign tax paid by a resident company on its profits earned abroad is deductible from the tax payable in Egypt; however, losses incurred abroad are not deductible.

Non-resident corporations and partnerships pay taxes on income derived from their permanent establishments (PE) in Egypt.
Corporate residence

A foreign business can incorporate under the Egyptian law, choosing one of several legal forms including Joint Stock Company, Limited Liability Company, Branch or a Representative Office.

Corporations and partnerships are classified as residents of Egypt if they meet one of the following conditions:

- The entity is established according to the Egyptian law;
- The government or a public authority owns more than 50% of the capital of the entity; and/or
- The effective place of management is in Egypt.

The executive regulations of the law indicate that Egypt is considered as the effective place of management if the entity meets two of the following conditions:

- Managerial decisions take place in Egypt;
- Members of the board of directors hold their meetings in Egypt;
- Members of the board of directors reside in Egypt; and/or
- The major shareholders (owners of more than 50% of the shares or voting rights) reside in Egypt.

Other taxes

Sales tax

The standard sales tax rate is 10% of the value of commodities (except for those referred to in special schedules of the law) and 5% to 10% for specific services.

The Sales Tax Department is responsible for assessing the tax on the sales of locally produced goods and imported goods, except for those exempted by a special decree.

Consequently, all natural persons and legal entities are required to collect general sales tax and remit it to the Sales Tax Department. This includes manufacturers and providers of taxable services and every importer of commodities or taxable services. In addition, there are plans to introduce a newly developed sales tax law.

Stamp tax

There are two distinct types of stamp tax, which is imposed on legal documents, deeds, banking transactions, company formation, insurance premiums and other transactions, as follows:

- The nominal stamp tax is imposed on documents, regardless of their value. The tax rate for items such as contracts is EGP 1 for each paper; and
- Percentage or proportionate stamp tax is levied based on the value of transactions.

A proportional tax at the rate of 0.4% is imposed on the balances of credit facilities and loans and advances provided by Egyptian banks or branches of foreign banks during the financial year, with the bank paying 0.1% on the balance at the end of each quarter of the year. The bank and the customer each bear half of the tax.

Loans from other establishments are not subject to this tax.
**Real estate taxes**
The new real estate tax law was effective from January 2010. The new law takes into consideration the different variables that can affect the value of a property, such as location, value of similar buildings and the economic situation of the district in which the property is located. This is to be updated every five years.

**Branch income**
The Egyptian tax treatment of a branch is similar to that of a Joint Stock Company/Limited Liability Company.

In addition, the Egyptian tax law treats every company in a group of companies as a separate legal entity. Thus, affiliated companies or subsidiaries cannot shift the profits/losses within the group.

Branches of foreign corporations operating in Egypt receive tax treatment identical to that of corporate entities for the results of their activities in Egypt.

Treaties allow Egypt to tax only those business profits attributable to PE of foreign enterprises in Egypt.

A branch, but not a subsidiary, may deduct a ‘head office charge’ of an amount up to 7% of its taxable income.

**Income determination**

**Capital gains**
A foreign company is taxed on all capital gains realised in Egypt. However, capital gains on the sale of Egyptian securities listed on the Egyptian Stock Exchange are not taxable.

**Dividends**
Dividends distributed by a company residing in Egypt are not subject to corporate taxes. Conversely, dividends that non-resident companies distribute are subject to the Egyptian corporate tax, after deducting foreign taxes paid abroad.

**Foreign income**
Income from any source, domestic or foreign, received by a corporation within Egypt is subject to corporate tax. The scope of tax covers the activities carried out inside and outside Egypt, which are administered or managed within Egypt.

The foreign tax paid by a resident company on its profits incurred abroad is deductible from the tax payable in Egypt; however, losses incurred abroad are not deductible.

**Stock dividends**
Stock dividends receive the same treatment as ordinary dividends.

**Transfer pricing**
Transfer pricing rules were introduced in Egypt for the first time by Law No. 91 for the year 2005. The law introduced the arm’s-length principal, specifying that any transaction between related parties should be at arm’s length (i.e., market value).
Egypt

The law does not specify penalties with regard to transfer pricing. However, the law states that the Egyptian tax authorities may adjust the pricing of transactions between related parties if the transaction involves elements that would not be included in transactions between non-related parties, and whose purpose is to shift the tax burden to tax exempt or non-taxable entities. Where this is the case, the tax authorities may determine the taxable profit on the basis of the neutral price. The acceptable methods for determining such neutral price, according to the rule of the law, are as follows:

- Comparative free price same as Comparable Uncontrolled Price method (CUP);
- Total cost with an added margin of profit (same as Cost Plus method); and
- Resale price.

The law does not provide any documentation specifications and no guidelines have been issued.

For the time being it is advisable for all multinational enterprises established in Egypt to locate their group/company’s transfer pricing policy, review it, and assess what documentation is available to prove this policy.

**Deductions**

**Depreciation**
The new tax law changed the depreciation rates for tax purposes to the following:

- 5% of the cost of purchasing, establishing, developing, and renovating buildings and establishments is deductible based on the straight-line method;
- 10% of the cost of purchasing, developing, and improving intangible assets is deductible based on the straight-line method;
- Computers, information systems, software, and data storage sets are depreciated at a 50% rate on a declining balance method; and
- All others assets are depreciated at a rate of 25% of the depreciation basis for each fiscal year, on a declining balance method.

**Accelerated depreciation**
A company may deduct 30% accelerated depreciation from the cost of new or used machines and equipment used in industries during the first fiscal year of their employment.

**Net operating losses**
A company may carry losses forward for a period not to exceed five years. Nevertheless, if a change occurs in the ownership of its capital exceeding 50% of the shares, stocks, or the voting rights, and if the company changes its activity, the company cannot carry the losses forward.

In general, companies cannot carry losses back, except for contracting companies, which are allowed a loss carryback period of five years.

**Other significant items**
Donations to the government are tax deductible, and donations to Egyptian charities are deductible up to 10% of taxable income.
**Payments to head office**
A branch may deduct head-office charges up to 7% of its taxable income. Refer to Article No. 74 of the Egyptian executive regulations of the Law 91/2005 (ER). Moreover, the branch or subsidiary should withhold taxes before the payment of interest, royalties, and service fees to non-resident foreign corporations or affiliates.

**Non tax-deductible costs**
The following items are not tax-deductible costs:

- Reserves and appropriations of all different types;
- Financial fines and penalties paid by the taxpayer because he or one of his subordinates has committed a deliberate felony or misdemeanour;
- Income tax payable according to the income tax law;
- Interest settled on loans that exceeds twofold the credit and discount rates announced by the Central Bank;
- Interest on loans and debts of all different kinds, as paid to non-taxable or tax-exempt individuals;
- Profit shares, distributed dividends, and the attendance fees paid to shareholders for attending the general assembly’s meetings;
- Compensation and allowances obtained by the chairmen and board members; and
- Workers profit share to be distributed according to the law.

**Group taxation**
There are no group taxation rules in Egypt.

**Tax incentives**
Egypt offers no specific tax incentives. Under the new income tax law, the tax incentives granted to investment companies were abolished.

**Withholding taxes (WHT)**

A corporation paying invoices must withhold 0.5% to 5% of payments, depending on the services and commodities, to local taxpayers and remit them quarterly to the Tax Department.

Payments of interest, royalties, and services by a domestic corporation to foreign or non-resident bodies are subject to WHT as follows:

**Interest**
Interest expenses are deductible for tax purposes after offsetting any tax-exempt interest income.

Interest expense deductions are limited to an interest rate that does not exceed twice the discount rate as determined by the Central Bank of Egypt at the beginning of the calendar year in which the tax year ends.

Interest on loans with a three-year term or more entered into by private sector companies are exempt from WHT, while loans of less than three years are subject to 20% tax on interest. However, an applicable tax treaty between Egypt and the foreign country may result in the reduction of such tax rate.
Egypt

**New ministerial decree**
A new ministerial decree was issued on 29 December 2009, declaring that the reduced rate of WHT on interest or royalties provided by an applicable double tax treaty (DTT) should be ignored when withholding the tax. However, under certain conditions, the foreign recipient of payments would be able to get a refund for the amount resulting from the variance between the normal rate of 20% and the reduced treaty rate.

**Tax treaties**
Egypt has concluded DTTs with about 50 countries, which could change the tax treatment of transactions carried out between Egyptian entities and residents of a treaty country.

**Royalties**
Royalty payments are subject to the WHT. However, an applicable DTT signed between Egypt and the foreign country might result in a reduction in this rate. *(Please refer to the new ministerial decree affecting the treatment of interest and royalty payments.)*

**Service payments**
Service payments may be exempt from the WHT if there is an applicable DTT signed between Egypt and the foreign country.

**Tax administration**

**Tax returns**
The tax year is the financial year of the taxpayer. The taxpayer is required to assess taxes due for every financial year and settle them with the tax return.

**Payment of tax**
A taxpayer is subject to a WHT system for all money received from other taxpayers. These advance payments are deducted from taxes assessed per the tax return, and the balance is payable in a lump sum at the date of submitting the tax return.

**Other issues**
In Egypt, there are several laws regulating projects, such as: the Investment Law, Companies’ Law, Tax Law, Capital Market Law, etc. These laws cover all investment activities in Egypt; whether in the industrial or commercial field.

**Changes to the Egyptian law**
Since May 2008, Egypt witnessed many changes in its economy as a result of the Law no. 114. This law has been issued with the intention of decreasing the gap between those who are financially secure and those who are not.

The Law was designed to increase the tax rates imposed on several commodities and services, as well as decreasing the subsidies of some (e.g., petroleum) from one side, and increasing the basic salaries of employees (especially government employees) from the other.
The main points of the Law are as follows:

- All government employees are granted a special monthly increase at a rate of 30% of April 2008’s basic salary. This is optional for private companies, and is exempt from tax for both government and private company employees;
- An amendment to law 147 for the year 1984 with the imposition of a state development duty on vehicles and driving licenses;
- An increase in general sales tax rates imposed on cigarettes and petroleum products;
- An abolishment of law no. 17 for the year 1991 which previously provided an exemption of treasury bills from income tax;
- An addition of a final paragraph to article 29 of the law of investment guarantees and incentives (Law 8 of 1997) which indicates that in all cases, projects in the fields of: fertiliser industries, iron and steel, oil processing, and natural gas processing, transport, and liquidification, will not be authorised for establishment under the free zone system; and
- All licenses of investment projects established under free zone systems existing on the enactment date of this law (5 May 2008) will terminate in the fields of: fertiliser industries, iron and steel, oil processing, and natural gas processing, transport, and liquidification.

Significant developments

In mid-2007, the tax authorities improved the system for filing and paying the monthly tax returns electronically (i.e., value-added tax (VAT) and income tax advance payment returns). Since 2008 this benefit was also extended to the annual corporate income tax (CIT) returns.

These improvements include:

• Reduction of steps needed to complete registration;
• Reduction of steps needed to complete the process of filing tax returns;
• Speed-up of payment process by providing more effective links to the banks accepting payment in the local financial system;
• The system issues a certified copy of the tax return filed and payment; and
• Previously, a formal contract had to be downloaded and installed but now the taxpayer only has to check a box to accept or not check the box to reject the stated terms and conditions.

Recent changes in legislation approved on December 2009 include:

• Tax Code: transfer pricing regulations, new obligations on representations, billing and reports;
• VAT: new reform on VAT and restrictions on deduction of tax credits; and
• ISR: new income taxed in El Salvador, and new conditions/deductions for costs and expenses.

Taxes on corporate income

The corporate income tax rate applicable is 25%.

Taxable income is net of costs and expenses considered necessary for generating and maintaining the related source of income, and other deductions allowed by law. Gross income, on the other hand, comprises income or profits collected or accrued, either in cash or in kind, from any sources such as business, capital and all types of products, gains, benefits or profits, whatever their origin might be, as well as condoned debts.

Juridical entities are required to follow the accrual method of accounting, which means that income is reported although not collected, and costs and expenses are reported when incurred and not when paid for.
For tax purposes, income is computed for 12-month periods, also known as taxable periods, and the tax period for juridical entities begins on 1 January and ends on 31 December of each year.

**Corporate residence**

A company incorporated in El Salvador is a domiciled entity in the country for tax purposes and subject to 25% CIT. Also, branches from foreign companies authorised in El Salvador and/or entities operating as a permanent establishment are considered domiciled for tax purposes and subject to the mentioned income tax rate.

**Other taxes**

**VAT (“Impuesto al Valor Agregado” or IVA)**

VAT is levied at a rate of 13% over the taxable amount. As a general rule, the taxable amount is the price or remuneration agreed upon by the parties. For imports, the taxable amount is the customs value.

The following transactions are subject to VAT when performed within the Salvadoran territory:

1. Transfer/sale of tangible movable goods;
2. Withdrawal of tangible movable goods from the inventory made by the company for self-consumption by its partners, directors or personnel;
3. Import of goods and services; and
4. The supply of services of any type whether permanent, regular, continuous or periodic; technical advice and project designs; lease and sublease agreements over tangible goods; lease and sublease agreements over real estate for commercial purposes; lease of services in general; construction of real estate properties or building contracts; auctions; freight, whether inland, air or maritime; lease, sublease and any form of use regarding trademarks.

The following imports are exempt from VAT:

- Imports made by diplomats and consulate representatives of foreign nations with presence in the country according to international agreements adopted by El Salvador;
- Imports made by international organisations to which El Salvador is a party;
- Traveller's luggage according to customs regulations;
- Donations to non-profit organisations;
- Imports made by municipalities, if the goods imported are for the public benefit of the community;
- Imports of machinery by taxpayers duly registered for this purpose which will be part of the taxpayer’s fixed assets; and
- Vehicles for public transportation, which can only be transferred after five years.

The following services shall be exempt from VAT:

- Health services rendered by public institutions;
- Lease and sublease of real estate properties for housing;
- Services rendered under a labour relationship, and those rendered by public and municipal employees;
El Salvador

- Cultural public performances authorised by competent authorities;
- Educational services rendered by authorised entities, i.e., “Ministerio de Educación” (the Ministry of Education);
- Interest on deposits and loans, provided by local financial institutions or entities registered at the Salvadoran Central Bank (BCR);
- Interest on securities issued by the government and/or private entities traded through a stock exchange;
- Water supply by public institutions;
- Public transportation; and
- Insurance premiums covering individuals, and reinsurance in general.

Exports are levied at 0% VAT. Foreign source income is not subject to VAT.

VAT taxes paid by a registered VAT taxpayer company on its purchases (tax credits) are credited against VAT taxes charged to its customers (tax debits), on a monthly basis.

**Income tax advance payment**
A 1.5% tax rate is applied to gross revenues obtained, and paid monthly as advance payments which are applied against the CIT at the end of the year.

**Tax on transfer of real estate properties**
Transfers of real estate property are taxed according to the value of the real estate, at a tax rate of 3% applicable over amounts exceeding USD 28,571.43.

**Tax on simple or sweetened soft drinks**
This is an \textit{ad valorem} tax levied at 10% over the selling price to the public as suggested by the manufacturer, importer or distributor, excluding VAT and returnable bottle taxes.

**Tax on the production and importation of alcohol and spirits**
This tax is levied on domestic or imported alcohol and spirits at rates ranging from 0.0825 and 0.15 over each 1% of alcohol volume per litre or in proportion thereof. At the beginning of 2010 spirits and alcohol also have an \textit{ad valorem} tax levied at 5% over the selling prices to the public as suggested.

**Tax on tobacco products**
This tax is levied at USD 0.005 per cigarette, cigar, little cigarette or any other tobacco product. Also, an \textit{ad valorem} tax is levied at 39% over the suggested consumer selling price reported, excluding items such as VAT taxes, the specific tax established by the law.

**Annual business tax**
Companies are required to register themselves with the Registry of Commerce, and pay an annual business licence fee assessed on the company’s assets, as follows:

<table>
<thead>
<tr>
<th>Band of Assets</th>
<th>Annual Licence Fee</th>
</tr>
</thead>
<tbody>
<tr>
<td>From USD 2,000 to USD 57,150</td>
<td>USD 91.43</td>
</tr>
<tr>
<td>From USD 57,151 to USD 114,286</td>
<td>USD 137.14</td>
</tr>
<tr>
<td>From USD 114,287 to USD 228,572</td>
<td>USD 228.57</td>
</tr>
<tr>
<td>An additional charge for each office, branch or agency property of a company</td>
<td>USD 34.29</td>
</tr>
</tbody>
</table>
If the assets exceed the amount of USD 228,572, there is an additional duty of USD 11.43 for each USD 100,000 or fraction thereof. In any case, the relevant duties are limited to USD 11,428.57.

**Social security contributions**

<table>
<thead>
<tr>
<th>Monthly employee's salary USD</th>
<th>Employer's rate</th>
</tr>
</thead>
<tbody>
<tr>
<td>0 – 685.71</td>
<td>7.50%</td>
</tr>
<tr>

</tr>
</thead>
<tbody>
<tr>
<td>0 – 685.71</td>
<td>1%</td>
</tr>
<tr>
<td>Over 685.71</td>
<td>0%</td>
</tr>
</tbody>
</table>

**Municipal taxes**

Municipal taxes are assessed according to a progressive tariff list issued by each municipality applicable to the company’s assets located in each municipality. Taxes are paid on a monthly basis. The tariff lists are applied separately to commercial, industrial and financial sectors.

**Stamp taxes**

No stamp taxes are assessed as the pertinent law was abrogated in 1992.

**Branch income**

In El Salvador tax rates on branch profits are the same as for domestic corporations. No tax is withheld on transfers of profits to the head office provided the entity distributing them reports them and pays the corresponding income tax thereon.

Administrative offices: the law does not provide a separate treatment to administrative offices located in El Salvador. The general regulations in this respect indicate that branches, agencies and/or establishments permanently operating in the country, with owned or leased installed infrastructure, employing domestic staff, and performing their economic activities in a material and perceptible manner in the country are subject to the same taxes as companies duly incorporated.

**Income determination**

**Inventory valuation**

For tax purposes, taxpayers are authorised to use any one of the following inventory methods, provided they are technically appropriate for the particular business and are consistently applied and their audit is easy:

- Purchase or manufacturing costs;
- Last purchase costs;
- Direct average allocation costs;
- Average costs;
El Salvador

- Last-in, first-out;
- First-in, first-out;
- Specific methods for fruits and farm products; or
- Specific method for cattle.

Other than the methods enumerated above, taxpayers are not permitted to use other methods for valuing their inventories except with prior authorisation of the tax office, provided that in the latter’s judgement, the method in question contains clear determination and bona fide elements available to the office. Once an inventory valuation method is adopted, the taxpayer may not change it without the tax office’s prior authorisation.

**Capital gains**
Capital gains are taxed at a flat rate of 10% of net profits, except when gains are realised within 12 months following the purchase date, as capital gains in this case are taxed as ordinary income. Capital losses can be offset against capital gains only. Whenever capital losses exceed capital gains, the remaining balance may be carried forward to future capital gains within a five-year period.

**Inter-company dividends**
Profits or dividends remitted or credited to shareholders are non-taxable provided the entity distributing them reported and paid the correspondent income taxes.

**Foreign income**
Under the territoriality source of income principle, extraterritorial income is not taxable in the country, with the exception of income/other benefits from securities and other financing operations.

**Stock dividends**
Stock dividends are not taxable provided the entity distributing them reported and paid the correspondent income taxes.

**Deductions**
All business expenses considered necessary to produce taxable income and/or maintain income sources (freight, marketing, power, telecommunications, water, salaries, lease contracts, merchandise and transport insurance, fuel and interest paid on loans used by income generating sources, and similar ones, among other items) are deductible for income tax purposes.

**Depreciation**
Depreciation is normally calculated by a straight line method.

<table>
<thead>
<tr>
<th>Category</th>
<th>Rate %</th>
</tr>
</thead>
<tbody>
<tr>
<td>Buildings</td>
<td>5</td>
</tr>
<tr>
<td>Machinery</td>
<td>20</td>
</tr>
<tr>
<td>Vehicles</td>
<td>25</td>
</tr>
<tr>
<td>Other movable assets</td>
<td>50</td>
</tr>
</tbody>
</table>

**Depletion**
Amortisation of new software is admitted at a constant and maximum 25% over purchase or production costs.
**Interest expense**

If a loan is made by a foreign company or bank that is not registered by the Central Bank, income tax will be withheld at 20%. If the foreign bank is registered by the Central Bank in 2010 then 10% income tax will be withheld.

**Net operating losses**

Operating losses cannot be carried forward to future years. Salvadorian legislation does not allow for the carryback of losses except for capital losses.

**Payments to foreign affiliates**

Remittance of royalties, interest income and service fees to foreign affiliates are deductible provided proper contracts are in place and withholding tax of 20% is applied and if these services have actually been received. Payments to entities located in tax haven regimes, are subject to a withholding tax rate of 25%.

**Taxes**

Other than penalties and interest charges on unpaid taxes, income, VAT and conveyance of real estate property taxes, and state and municipal taxes and duties on imports of goods and services rendered by the company are not deductible.

**Other significant items**

The deductibility of charitable donations is limited to 20% of the amount resulting from deducting the donation amount from the donor’s net income of the respective tax period.

Amortisation of goodwill, trademarks and other similar intangible assets are not deductible for income tax purposes.

**Group taxation**

**Tax grouping**

There are no grouping rules in El Salvador between independent entities.

**Tax incentives**

El Salvador offers a wide range of incentives to attract foreign investment and drive new commercial and industrial developments. There are no restrictions on foreign ownership or on mergers, acquisitions or joint ventures. There are three specific laws in El Salvador that seek to encourage foreign investment by improving the country’s competitiveness in all areas involving the granting of tax incentives. These laws are the Industrial and Commercial Free Zone Law, Law of International Services and the Export Reactivation Law.

The Industrial and Commercial Free Zone Law No. 405 dated 3 September 1998, grants companies the following incentives:

- Income tax exemption;
- VAT exemption;
- Municipal tax exemption;
- Exemption from real estate transfer taxes when land is intended to be used for productive activities;
El Salvador

- Exemption from duties for imports on machinery, raw materials, equipment and intermediate goods used for production; and
- Option to sell merchandise or services linked to international trade produced in the free zone in the Salvadoran market is permitted as long as companies pay the corresponding import taxes, income tax, VAT, and municipal taxes on the final goods admitted.

Any foreign company may establish and function in a free zone or bonded warehouse if they are engaged in: production, assembly, manufacturing, processing, transformation, or commercialisation of goods and services; and/or rendering of services linked to international or regional trade, such as gathering, packaging and repackaging, cargo consolidation, distribution of merchandise and other activities connected or complementary to them.

The most recently approved Law of International Services No. 431, dated 11 October 2007, grants the same benefits as the Free Zone Law, but the beneficiaries are companies operating in Service Centres specially created according to this law and dedicated to international services as defined therein.

The Export Reactivation Law No. 460 (“Ley de Reactivación de las Exportaciones”) dated 15 March 1990, grants reimbursement of 6% free on board (FOB) value of exports destined outside the region.

**Withholding taxes (WHT)**

Payments or amounts credited to non-residents arising from income obtained in El Salvador are subject to a 20% withholding tax. Income earned in El Salvador covers income from assets located in the country, and from any activities performed or capital invested in the land, and from services rendered or used in the national territory, regardless of whether they are provided or paid outside the country. Income from services used in the country is income earned in El Salvador by the service provider, irrespective of whether the relevant income generating activities are performed abroad. Payments to foreign entities located in tax haven regimes are subject to a withholding tax rate of 25%.

Payments to domiciled individuals with respect to services rendered other than under a labour relationship, are subject to a 10% withholding tax.

The acquisition of intangible goods among domiciled entities in the country is subject to a 10% withholding tax.

**Tax administration**

Taxing authorities: national taxes, fees and other contributions on all types of goods, services and income in El Salvador are levied by the National Congress, while local governments (municipalities) may suggest contribution rates and propose their approval to the National Congress by way of a specific law.

Ministry of Finance (“Hacienda”): The Ministry controls the State’s finances and defines and guides the government’s financial policy, and also harmonises, directs and implements its policies on taxation, through the following agencies:
• Internal Revenue Service (“Dirección General de Impuestos Internos” or DGII): was created by Law No. 451, dated 22 February 1990, replacing the former Direct Revenues Services, and is charged with managing and collecting the country’s main internal revenues.
• Customs Authority (“Dirección General de Aduanas” or DGA): DGA was created by Law No. 903, dated 14 December 2005, replacing the former Customs Revenues Service, and its main function is the exercise of its customs powers, to facilitate and control international trade within its domain, and monitor and collect duties and taxes imposed upon merchandise entering and exiting the territory.

Returns
VAT returns are filed on a monthly basis within the first 10 working days of each month following the period under taxation.

In addition, public and private legal entities, domiciled in the country for tax purposes, other than farm and cattle concerns, are required to make income tax advance payments at 1.5% of gross revenues. These advance payments are due, together with the corresponding return, within 10 working days following the corresponding calendar month.

CIT annual returns must be filed each year no later than 30 April, following the end of the year under taxation. In El Salvador the fiscal year is from 1 January to 31 December.

These requirements are mandatory irrespective of the fact that no income taxes are ultimately payable.

Payment of tax
Taxes are due on the date established for filing the tax returns. In El Salvador tax payments are made together with the filing of tax returns, and payments shall be made at the banks of the local financial system.
Corporate taxes in Equatorial Guinea

Significant developments
There have been no significant tax regulatory developments regarding corporate taxation in the past year.

Taxes on corporate income
The corporate income tax rate is 35%.

Corporate residence
If a legal entity exceeds a total of three months within a calendar year or a total of six months within two calendar years performing activities in Equatorial Guinea, the legal entity is considered as resident. On the contrary, a non-resident company is, according to the regulations in force, a company, which spends less than three months in Equatorial Guinea performing its activities.

Other taxes

Social security
Employers contribute 1% of gross salary to the worker protection fund (Fondo de Proteccion del Trabajador) and 21.5% to the National Social Security Fund (INSESO). This is done monthly.

Minimum income tax
Minimum income tax is 1% of the turnover of the company for the previous year.

Transfer tax
For the transfer of goods between residents and non-residents, there is a 3% tax on the value of the consideration.

Real estate transfers between residents are taxed at the rate of 5%. The rate increases to 25% on real estate transfers between residents and non-residents.

Value-added tax (VAT)
VAT is 15% in Equatorial Guinea.
**Real property tax**
Urban property tax equals 1% of 40% of the value of the land and building on such land. Rural property tax is XAF 100 for each hectare or fraction thereof.

**Stamp taxes**
Stamp duties are payable on a variety of instruments and transactions and vary depending on the contract.

**Branch income**
Branch income is treated the same as corporate income. See Taxes on corporate income. There is no branch remittance tax.

**Income determination**

**Inventory valuation**
Inventory is generally stated at market value.

**Capital gains**
Capital gains are usually subject to corporate income tax. Some exemptions are possible.

**Dividends**
All dividends received by a resident company are subject to corporate tax. However, the recipient company may offset any domestic tax withheld from dividends against its company tax liability.

A participation exemption applies so that only 10% of the net dividends received by a corporate shareholder is subject to tax if the:

- Shareholder holds at least 25% of shares; and
- Shareholder holds these shares for at least two consecutive years.

Dividends received by foreign shareholders are subject to a 25% tax.

**Inter-company dividends**
Whenever an incorporated company or a limited company has, either registered shares in an incorporated company or interest in a limited company, the net proceeds of the shares of stock or the interest in the second company earned through the first during the fiscal year will be deducted from the total net profit of the parent company, minus a quarter of expenses and liens. This proportional part is established at 10% of the amount of these proceeds, and represents the management expenses already deducted from overhead. Nevertheless, this provision is only applicable in the following conditions:

1. That shares of stock or interest owned by the parent company represent at least 25% of the capital of the subsidiary; and
2. That the shares of stock or interest conferred in the share issue have always remained registered in the name of the participating company and the latter is committed to keeping them as registered for at least two consecutive years.
Equatorial Guinea

**Foreign income**

Resident corporations are taxed on their worldwide income. Controlled foreign company legislation applies if at least 35% of share capital is held by a resident.

Non-resident entities are subject to a 10% withholding tax on gross income derived from sources in Equatorial Guinea.

**Deductions**

**Depreciations**

Interest
No thin capitalisation rules exist in Equatorial Guinea.

Net operating losses
Net operating losses can be carried forward for three years (five years if in the oil and gas industry). Losses cannot be carried back. Losses of one entity cannot be transferred to another entity in a reorganisation. Except for new companies, companies with losses for three consecutive years will be de-registered from the tax registry.

Payment to foreign affiliates
There is a deduction limit of 50% of the intermediary tax result for technical assistance.

Group taxation
Equatorial Guinea law does not provide for taxation of groups.
Equatorial Guinea

**Tax incentives**

Some exemptions are approved for some specific economic sectors (oil and gas exploration, public work, etc.). Investment law also provides tax exemptions.

There is no foreign tax credit.

**Withholding taxes (WHT)**

WHT is 6.25% on payments to residents.

There is a 10% tax on interest, royalties, and incomes earned in Equatorial Guinea by non-residents. This is not a withholding tax in principle but tax authorities consider it as a WHT. Dividends paid to non-residents are subject to 25% WHT.

**Withholding tax on the oil and gas sector**

The tax regime of the 6.25% or the 10% WHT linked to the oil and gas sector is defined by Sections 466 to 477 of the Tax Code.

In Equatorial Guinea, according to Section 461-2 of the Tax Code:

- A 6.25% withholding tax is imposed in the oil and gas sector on payments made to a resident registered entity;
- A 10% withholding tax is imposed in the oil and gas sector on payments made to a non-registered entity.

The tax basis is composed of the total amount paid to the provider.

**Withholding tax on movable incomes**

There is a withholding tax on movable incomes paid to non-residents.

**Tax administration**

A company’s tax year must correspond with its financial year.

**Returns**

Corporate income tax returns must be filed within the first four months of the year following the taxable fiscal year.

The minimum company tax of 1% of the previous year’s turnover is payable by 31 March with final instalment paid on 30 April.

**Payment of tax**

Payment of the corporate income tax must be made within fifteen days of the date of receipt of the tax liquidation from the Tax Authorities.

**Penalties**

Penalties apply for late payment, failure to pay and understatement of tax liability.
Significant developments

Estonia is regarded as offering a relatively favourable income tax regime as all undistributed corporate profits are tax exempt. However, the provision in the tax legislation that would have further reduced the income tax rate was abolished in 2009 and thus the 21% income tax rate continues to be levied in 2010. The previous version of the legislation gradually reduced the income tax rate by 1% per annum until reaching an 18% income tax rate in 2012.

On 1 January 2010, the tax treaties with Isle of Man, Israel and Macedonia became effective.

Taxes on corporate income

All undistributed corporate profits are tax exempt. This exemption covers both active (e.g., trading) and passive (e.g., dividends, interest, royalties) types of income, as well as capital gains from the sale of all types of assets, including shares, securities and immovable property. This tax regime is available to Estonian companies and permanent establishments (PE) of foreign companies that are registered in Estonia.

The taxation of corporate profits is postponed until the profits are distributed as dividends or deemed to be distributed, such as in the case of transfer pricing adjustments, expenses and payments that do not have a business purpose, fringe benefits, gifts, donations and representation expenses.

Distributed profits are generally subject to the 21% corporate income tax (21/79 on the net amount of profit distribution). For example, a company that has profits of 100 available for distribution can distribute dividends of 79, on which it must pay corporate income tax of 21.

From the Estonian perspective, this tax is considered a corporate income tax and not a withholding tax, so the tax rate is not affected by an applicable tax treaty. Certain distributions are exempt from such tax (see Inter-company dividends section).

Corporate residence

A legal entity is considered resident in Estonia for tax purposes if it is established under Estonian law. There is no management and control test for the purpose of determining corporate residency. All tax treaty tie-breakers for legal entities are based on competent
Estonia

authority procedures. Estonian general partnerships and limited partnerships have legal identity and therefore are considered residents in Estonia for tax purposes.

A PE (including a branch registered in the Commercial Register) of a foreign entity is deemed to be a non-resident taxpayer.

Other taxes

Value-added tax (VAT)
The following transactions are subject to Estonian VAT:

- Taxable supplies of goods and services (the place of supply of which is Estonia);
- Taxable imports of goods; and
- Taxable intra-community acquisitions of goods.

The standard VAT rate is 20%. A reduced rate of 9% is applied to books, periodicals with few exceptions, hotel accommodation services and listed pharmaceuticals.

The VAT rate on the export of goods and certain services is 0% (i.e., exemption with credit). Some services, such as health care, insurance, certain financial and transactions with securities, are exempt (i.e., exempt without credit).

Transactions in real estate are generally exempt from VAT but there are certain significant exceptions (e.g., transactions in new and significantly renovated buildings). Taxpayers can elect to add VAT to real estate transactions if certain conditions are met.

If the taxable supplies of Estonian businesses or a PE of a foreign business in Estonia exceed EEK 250,000 in a calendar year, VAT registration is required. Voluntary registration is also possible. Certain transactions of foreign businesses require Estonian VAT registration without any threshold.

The VAT accounting period is generally a calendar month, and the VAT should be declared and paid on or before the twentieth day of the following month.

Under certain conditions, a European Union (EU) taxable person that is not registered for VAT in Estonia will be entitled to a refund of input VAT paid in Estonia. Non-EU taxable persons are entitled to claim VAT refunds based on reciprocity.

On 1 January 2008, Estonia implemented a system which allows, under certain conditions, a company to account for VAT on imports on the VAT return without paying VAT to the customs authority (Article 211 Recast of 6th Directive).

Excise duties
Excise taxes are levied on tobacco, alcohol, electricity, some packaging materials and motor fuel.

Customs duties
After becoming a member of the EU, Estonia also became a member of the Customs Union. The Community Customs Code and related implementation regulations will apply, meaning that:

- Trade between Estonia and other EU countries is customs-free;
• Imports from non-EU countries are subject to EU customs tariffs; and
• Numerous free trade agreements concluded between EU and non-EU countries apply to Estonia.

**Social security and unemployment insurance**
Employers operating in Estonia (including non-residents with a PE or employees in Estonia) must pay social tax on certain payments to individuals at the rate of 33% (where 20% is used for financing public pension insurance and 13% is used for financing public health insurance). Social tax paid by employers is not capped and mainly applies to salaries, directors’ fees and service fees paid and fringe benefits granted to individuals.

In addition to social tax, employers are also required to pay and withhold unemployment insurance contributions. From 1 August 2009, employers must pay 1.4% and employees must pay 2.8% (collected by employers through payroll withholding). The contributions mainly apply to salaries and service fees paid to individuals.

**Compulsory accumulative pension scheme**
Resident employees born after 31 December 1982 are obliged to join the compulsory accumulative pension scheme and make 2% contributions to the scheme (mostly collected by employers through payroll withholding). The contributions mainly apply to salaries, directors’ fees and service fees. For resident employees born before 1983, joining the pension scheme is voluntary, but after joining, it becomes compulsory and the employees may not subsequently exit the scheme. In addition to the 2% contribution made by the employee, 4% of the social security contribution payable by the employer (33%) will be transferred to the employee’s pension account.

Due to the recession and weak economic situation, state contributions (4%) have been temporarily suspended for the period from 1 June 2009 through to 31 December 2010. However, upon voluntary request, an employee may continue (2%) contributions from 1 January 2010 and the state will continue its contributions at a 2% rate from 1 January 2011.

**Land and property taxes**
Land is subject to an annual land tax, which is calculated on the assessed value of land at rates between 0.1% and 2.5%, depending on municipality. The tax is paid by the owners of land, or sometimes by the users of land, generally in two instalments by 31 March and 1 October. There is no property tax (i.e., tax on the value of buildings).

Property transfers are generally subject to state and notary fees.

**Heavy goods vehicle tax**
The heavy goods vehicle tax is paid for the following classes of vehicles that are registered with the Estonian National Motor Vehicle Register and are intended for the carriage of goods: (1) lorries with a maximum authorised weight or gross laden weight of not less than 12 tons; (2) road trains composed of trucks and trailers with a maximum authorised weight or gross laden weight of not less than 12 tons. The tax is paid by the owners or users of the vehicles.
Estonia

**Gambling tax**
Gambling tax is imposed on amounts received from operating games of skill, totalisator, betting, lotteries and promotional lotteries. Tax is also charged on gambling tables and machines used for games of chance located in licensed premises. The tax is paid by authorised operators.

**Local taxes**
Local taxes can be imposed by rural municipalities or city councils. The list of local taxes which the local authorities may impose include sales tax, boat tax, advertisement tax, road and street closure tax, motor vehicle tax, tax on keeping animals, entertainment tax and parking charges. Most commonly, the Estonian local authorities have imposed parking charges, advertisement tax, sales tax and road and street closure tax, but the fiscal significance of these taxes is almost non-existent. The 1% sales tax has been introduced in Tallinn, the capital of Estonia, from 1 June 2010.

**Branch income**
Registered PEs of non-residents, much as with resident companies, are subject to corporate income tax only in respect of profit distributions, both actual and deemed, as defined in domestic law.

Transactions and dealings between a head office and its PE(s) should be conducted on arm’s-length terms. Thus, such profits should be attributed to a PE of a non-resident taxpayer that the PE would be expected to make if it were a distinct and separate taxpayer engaged in the same or similar activities, and under the same or similar conditions, and dealing in a wholly independent manner with its head office.

**Income determination**
Distributable profits are determined based on financial statements drawn up in accordance with Estonian GAAP or IAS/IFRS and there are no adjustments to accounting profits for tax purposes (e.g., tax depreciation, tax loss carryforward or carryback, etc.).

The corporate income tax liability associated with the distribution of dividends is accounted for as an expense at the time the dividends are declared, regardless of when the profits were generated or distributed.

**Inter-company dividends**
Dividends paid by Estonian companies are generally subject to 21/79 corporate income tax at the level of the distributing company. However, dividends distributed by Estonian companies are exempt from corporate income tax if the distributions are paid out of:

- Dividends received from Estonian, EU, European Economic Area (EEA) and Swiss tax resident companies (except tax haven companies) in which the Estonian company has at least a 10% shareholding;
- Profits attributable to a PE in EU, EEA or Switzerland;
- Dividends received from all other foreign companies in which the Estonian company (except tax haven companies) has at least a 10% shareholding, provided that either the underlying profits have been subject to foreign tax or if foreign income tax was withheld from dividends received; or
Profits attributable to a foreign PE in all other countries provided that such profits have been subject to tax in the country of the PE.

Certain domestic and foreign taxes can also be credited against the 21/79 corporate income tax charge under domestic law or tax treaties.

**Deductions**

**Depreciation and depletion**
There is no adjustment of accounting profits for depreciation or depletion for tax purposes. Distributable profits are determined based on financial statements drawn up in accordance with Estonian GAAP or IAS/IFRS.

**Net operating losses**
There is no adjustment of accounting profits for net operating losses for tax purposes. Distributable profits are determined based on financial statements drawn up in accordance with Estonian GAAP or IAS/IFRS.

**Payments to foreign affiliates**
Payments to foreign affiliates are deductible for tax purposes (i.e., not subject to 21/79 corporate income tax as deemed profit distributions) if the payment serves a business purpose, provides a benefit to the payer, is at arm's length and is substantiated by sufficient documentation.

Payments to foreign affiliates may also be subject to various withholding taxes. Certain payments to affiliates located in tax haven countries are always subject to 21/79 corporate income tax or a 21% withholding tax rate.

**Taxes**
All taxes paid are deductible for income tax purposes. In certain circumstances domestic or foreign taxes may be creditable against the 21/79 corporate income tax charge under domestic law or an applicable tax treaty.

**Fringe benefits**
Employers operating in Estonia (including foreign companies that have a PE or employees in Estonia) are liable to Estonian taxation on any fringe benefits granted to their employees (including directors).

Fringe benefits are subject to an exceptional tax treatment in Estonia, as only the employer is obliged to pay taxes on the fringe benefits furnished to the employee. Taxable fringe benefits received by a resident employee are generally not included in the taxable income of the employee for Estonian tax purposes. Fringe benefits are subject to 21/79 corporate income tax and 33% social tax. For example, where the amount of the benefit is 100, the income tax due by the employer would be 27 (21/79 x 100) and the social tax due 42 (0.33 x 127), for a total fringe benefit tax charge of approximately 69.

**Gifts, donations and representation expenses**
The 21/79 corporate income tax is generally due on gifts and donations. Gifts and donations made to certain qualifying recipients are only subject to 21/79 corporate income tax if such expenses exceed one of two limitations:
Estonia

- 3% of the calculated social tax base for the existing calendar year; or
- 10% of the profit of the last financial year according to statutory financial statements.

Representation expenses, those expenditures whose character and primary purpose is for representational or entertainment-related activities, are generally subject to 21/79 corporate income tax only if they exceed the threshold of EEK 500 per month plus 2% of the calculated social tax base of the calendar month in which the expenses are paid.

**Other significant items**
The 21/79 corporate income tax is generally due on expenses and payments that do not have a business purpose and that are regarded as deemed profit distributions. These may include, for example, late payment interest on tax arrears, penalties imposed by law, bribes, purchase of services or settlement of obligations not related to taxpayer's business and acquisition of assets not related to taxpayer's business.

Furthermore, there are specific anti-tax haven rules treating certain transactions and dealings with tax haven companies as deemed profit distributions, which are therefore subject to 21/79 corporate income tax. These include:

- Acquisition of securities issued by a tax haven entity (exception for certain listed securities);
- Acquisition of an ownership interest in a tax haven entity;
- Payment of fines or penalties to a tax haven entity, unless settled by court or arbitration; and
- Granting loans or making prepayments to a tax haven entity or otherwise acquiring a claim against a tax haven entity.

**Group taxation**

There is no form of consolidation or group taxation for corporate income tax purposes.

**Tax incentives**

There are no special tax incentives in Estonia. However, the entire Estonian corporate tax system, which provides for an indefinite deferral for taxing corporate profits, may be viewed as a tax incentive that promotes reinvestment of profits and thus stimulates economic growth.

**Withholding taxes (WHT)**

Withholding agents must withhold income tax from certain payments. Withholding agents include resident legal entities, resident individuals registered as sole proprietors or acting as employers, and non-residents having a PE or acting as employers in Estonia. The tax must be reported and paid by the tenth day of the month following the payment. Income tax is not withheld from payments to resident companies, registered sole proprietorships and registered PEs of foreign companies. The following rules are in place with respect to payments that are subject to WHT:

1. There is no WHT on dividends.
2. There is no WHT on interest payments to non-residents on the condition that the interest charged does not significantly exceed the arm’s-length rate at the time the debt is incurred and the interest payments are made. A 21% Estonian WHT rate will thus apply only to the part of interest that significantly exceeds the arm’s-length amount.

3. Royalties (including payments for the use of industrial, commercial or scientific equipment) paid to non-residents are generally subject to a 10% WHT rate under domestic law, but reduced rates may be available under double tax treaties. Certain royalty payments to associated EU and Swiss companies that meet certain conditions are exempt from withholding tax.

4. Rental payments to non-residents for the use of immovable property located in Estonia and movable property subject to registration in Estonia (excluding payments for the use of industrial, commercial or scientific equipment) are subject to a 21% withholding tax rate under domestic law, but double tax treaties may exempt payments for the use of movable property from WHT.

5. Royalties and rental payments to resident individuals are subject to a 21% WHT rate.

6. Payments to non-resident companies for services provided in Estonia, including management and consultancy fees, are subject to a 10% withholding tax rate under domestic law, but may be exempt under double tax treaties. Service fee payments to tax haven entities are always subject to a 21% WHT rate.

7. Salaries, directors’ fees and service fees paid to individuals are subject to a 21% withholding tax rate under domestic law, but double tax treaties may exempt service fee payments to non-resident individuals from WHT.

8. Payments for the activities of non-resident artistes or sportsmen carried out in Estonia are subject to a 10% WHT rate.

9. Certain pensions, insurance benefits, scholarships, prizes, lottery winnings, alimony, etc., paid to non-residents and resident individuals are subject to a 21% WHT rate under domestic law.

For non-residents without a PE in Estonia, the tax withheld from these payments at domestic or treaty rates constitutes final tax in terms of their Estonian source income and they do not have any tax reporting requirements in Estonia.

For certain types of Estonian source income, non-residents are liable under Estonian domestic law to self assess their Estonian tax and submit a tax return to the Estonian tax authorities. These types of income include:

- Taxable capital gains;
- Profits derived from business conducted in Estonia without a registered PE; and
- Other items of income from which tax was not withheld but should have been withheld.

Estonia has effective tax treaties with: Armenia, Austria, Azerbaijan, Belarus, Belgium, Bulgaria, Canada, the People’s Republic of China, Croatia, the Czech Republic, Denmark, Finland, France, Germany, Georgia, Greece, Hungary, Iceland, Ireland, Isle of Man, Israel, Italy, Kazakhstan, Latvia, Lithuania, Luxembourg, Macedonia, Malta, Moldova, the Netherlands, Norway, Poland, Portugal, Romania, Singapore, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey, Ukraine, the United Kingdom, and the United States. Treaties have also been concluded with Albania, Republic of Korea, Russia and Serbia, but these are not yet effective.
The following withholding tax rates apply to dividends, interest and royalties paid to a recipient beneficial owner resident in a tax treaty country. The lower of the domestic or the treaty rate is given.

**Notes**

1. Under the domestic law, the rate is nil for all non-resident individual and corporate shareholders.
2. The rate is nil on the condition that the interest paid to a non-resident does not significantly exceed the arm’s-length rate at the time the debt is incurred and the interest payments are made. Estonian withholding tax at the domestic rate of 21% will thus apply only to the part of interest that significantly exceeds the arm’s-length amount. This withholding tax could be reduced under tax treaties.
3. The rate is nil for arm’s-length royalties paid to an associated EU or Swiss company if certain conditions are met.
4. The lower 5% rate applies to royalties paid for the use of industrial, commercial or scientific equipment.

**Tax administration**

**Tax return**
The tax period is a calendar month. The combined corporate income tax and payroll tax return (form TSD with appendices) must be submitted to the local tax authorities by the tenth day of the month following a taxable distribution or payment. Tax returns may be filed electronically via the Internet.

**Payment of tax**
Corporate income tax and payroll taxes must be remitted to the local tax authorities by the tenth day of the month following a taxable distribution or payment. No advance corporate income tax payments are required.

**Advance rulings**
An advance ruling system became available in Estonia on 1 January 2008. The aim of the procedure is to provide certainty on the tax consequences of specific transactions or combination of transactions taking place in the future. The ruling is binding on the authorities (and not on the taxpayer) if the transaction was made within the deadline and the description provided in the ruling and the underlying legislation has not been substantially changed in the meantime. Estonian legislation specifically excludes obtaining rulings when the interpretation of the legislation is objectively clear, the situation is hypothetical or the main purpose of the planned transaction is tax avoidance. In addition, transfer pricing valuation issues are excluded from the scope of the binding ruling system.
Corporate taxes in Fiji Islands

Significant developments

The following changes became effective 1 January 2010:

- The Tax Administration Decree was promulgated with the stated intention of harmonising the administration of various tax laws including income tax and value-added tax (VAT);
- Companies listed on the South Pacific Stock Exchange will be subject to a reduced corporate tax rate of 20% in 2010, provided the companies have been listed on the stock exchange for at least three years and have at least a 40% resident shareholding;
- The Branch Profit Remittance Additional Normal Tax of 15% has been repealed.
- The 150% deduction on capital expenditure by a non-resident company for reinvestment of profits in Fiji has also been repealed;
- The cap on deductible head office expenses is reduced from 5% to 3%.
- In the case of the sale of shares in a company, the total value of retained earnings is now to be deemed as dividends distributed to shareholders;
- The provisions in relation to withholding tax have been amended to include the imposition of 15% withholding tax on payments for professional services and other services of a similar nature;
- The threshold for VAT registration has been increased to FJD 50,000; and
- The VAT provisions were amended to include forfeited deposits as taxable supplies, which is subject to VAT.

Taxes on corporate income

Normal tax is payable on taxable income at the following rates:

Corporate residence

A company incorporated in Fiji is resident in Fiji. A company not incorporated in Fiji is resident in Fiji if it carries on business in Fiji and either its practical management and control are in Fiji, or its voting powers are controlled by shareholders who are residents of Fiji.

Other taxes

Resident interest withholding tax
A withholding tax of 31% is deductible from payments to, or on the accrual of, interest for resident depositors by banks and other financial institutions. However, this tax is not payable where the depositor obtains a valid certificate of exemption or where interest received does not exceed FJD 200 per annum.

Land sales tax
The profits arising from the sale of undeveloped land in Fiji, if not included in taxable income for income tax purposes, may be subject to land sales tax at rates ranging from 6.5% to 30%.

Excise tax
Excise tax is payable on tobacco and alcohol products manufactured in Fiji. The government has also removed excise duty on carbonated drinks but imposes a 3% fiscal duty on the raw materials.

The government has introduced a new import excise tax (in addition to existing tariffs imposed) that will be levied on selected goods. These include:

- Alcohol and tobacco;
- Used or second hand LPG powered motor vehicles plus 15% import excise;
- New or used licensed mini buses;
- Some goods which are also locally manufactured; and
- Certain white goods and luxury items.

Value-added tax (VAT)
The threshold amount for VAT registration has been increased from FJD 30,000 to FJD 50,000 for the supply of goods and from FJD 15,000 to FJD 50,000 for the supply of services effective 1 January 2010.

The supply of financial services, residential accommodation and education by an approved institution is exempt. The supply of exports and international transportation is zero-rated. However, as of 1 January 2009, the export of services is zero-rated only under certain conditions.

The sale of edible oil, tin fish, rice, flour, tea, powdered milk and kerosene are zero-rated.
Fiji Islands

Beginning 1 January 2009, VAT refunds can no longer be transferred or assigned to another registered person.

Directors of companies with insufficient funds may be held liable for any outstanding VAT or income tax liability of the company and may be sued in their personal capacity under certain conditions.

**Hotel turnover tax**
Under the Hotel Turnover Tax Act of 2006, hotel turnover tax (HTT) at the rate of 5% is imposed on hotel charges.

For ease of administration to both hoteliers and the Fiji Islands Revenue and Customs Authority (FIRCA), the due date for payment is aligned with the VAT Decree requirements (i.e., end of the following month).

Directors have been included in the definition of accountable persons in the HTT Act. An accountable person is a person who is operating a licensed hotel which has levied the HTT on hotel charges and must account for it.

**Record keeping**
The HTT Act includes a seven year record keeping requirement.

The HTT liability may be offset against other tax refunds consistent with the Income Tax Act, VAT Decree and the Gambling Turnover Tax Act.

**Branch income**
The tax rate on branch profits is the same as the rate on profits of a resident corporation (29% in 2009 and 28% in 2010 and subsequent years).

**Income determination**

**Inventory valuation**
Inventories are normally valued at the lower of cost and net realisable value. While the first-in, first-out (FIFO) method is acceptable, the last-in, first-out (LIFO) method is not, for either book or tax purposes. Conformity between book and tax reporting is not required. There are no special provisions for valuing inventories or determining inventory flows.

**Capital gains**
Currently, capital gains are not subject to tax, although gains realised from the sale or other disposition of property acquired for the purpose of resale or as part of a profit-making undertaking or scheme are taxable as ordinary income.

**Inter-company dividends**
Resident corporations may exclude from taxable income dividends received from a company incorporated in Fiji. There are no ownership requirements for this exclusion.
Fiji Islands

Foreign income
Resident corporations are taxed on their worldwide income. Foreign income sourced from a non-treaty country are subject to income tax in Fiji with credits available for tax paid on such income. Income derived from a treaty country is taxed according to the treaty. A credit is allowed in Fiji for foreign tax paid on the foreign income, limited to the lesser of the Fiji tax payable or the overseas tax paid on such income. There are no special provisions for taxing undistributed income of foreign subsidiaries.

Stock dividends
Bonus shares are tax-free, except where paid out of the revenue or profits of investment or service-type companies. Tax-free stock dividends issued by private companies may be taxable upon sale of the shares.

Other significant items
Where a foreign-controlled business in Fiji produces less income than might be expected, the revenue authorities may determine the income for tax purposes.

A person normally residing outside Fiji, which disposes of an interest in land in Fiji held directly or through a shareholding in a company, may be assessed to income tax on the profit on that disposal.

Liability of directors/shareholders
Directors/shareholders of companies in liquidation may be held liable for any outstanding tax liability of the company. Directors/shareholders of private companies or companies with insufficient assets may also be held liable for any outstanding tax liability of the company under certain conditions.

Deductions

Depreciation and depletion
Depreciation is calculated on the cost of an asset on the straight-line basis. The rates of depreciation are based on the estimated life of the asset. Upon disposal of an asset, recoupment of depreciation claimed is taxable or the excess of tax written-down value over sale proceeds is deductible. The taxpayer has an option to set-off recoupment of depreciation against the cost of replacement assets. Conformity between book and tax depreciation is not required.

There are seven broad bands of depreciation rates for assets acquired after 1 January 1998, and the prescribed effective life of the asset is used to determine the relevant depreciation rate.

An optional 20% loading, which applies on the broadband rate, may be claimed. Buildings have been subject to new depreciation rates from 1 January 2001. Accelerated depreciation will apply for certain buildings built up to 31 December 2010 (i.e., if the buildings are completed on or before 31 December 2010, the accelerated depreciation will apply to the building even after 2010).

Renewable energy plant and water storage facilities also qualify for accelerated depreciation.

Assets acquired before 1 January 1998 will continue to be depreciated at the former rates.
Fiji Islands

Accelerated depreciation is available on capital expenditure on buildings constructed between certain specified dates that are to be used for agricultural, commercial or industrial purposes or on multi-storey, multi-unit residential buildings, as well as on other capital expenditure considered of benefit for the economic development of Fiji. Up to one-fifth of the expenditure may be claimed in each of any five years of an eight-year period.

Capital expenditure aimed at economising on the consumption of fuel, electricity or its derivatives or on an asset using energy sources indigenous to Fiji may be eligible for accelerated depreciation at varying rates or for an investment allowance (in addition to normal depreciation) of up to 40% of expenditure.

The cost of the acquisition of a mining lease or tenement and the cost of development of mines may be written off in equal instalments in any five of the first or last eight years of a nine-year period, commencing with the year in which the expenditure was incurred.

A deduction for depletion of other natural resources is not available.

**Thin capitalisation**
There are no thin capitalisation rules in Fiji.

**Net operating losses**
Losses may be carried forward for eight years (previously six years), provided the company can demonstrate a minimum 51% continuity of shareholding between the year of loss and the year of claim. Notwithstanding the change in ownership, losses may also be carried forward where a company carries on the same business in the carried forward year as it did in the loss year. Loss carrybacks are not permitted.

Losses incurred in agricultural or pastoral pursuits may be carried forward indefinitely.

**Donations**
The deduction threshold for contributions to approved charitable organisations is FJD 100,000.

There are certain other specific donations which qualify for varying levels of deductions including donations to the Fiji Heritage Foundation, which qualify for a deduction of 150%, and cash donations exceeding FJD 50,000 to the Poverty Relief Fund for Education, which qualify for a deduction of 200%.

**Sports fund**
A 150% deduction is available to a taxpayer in respect of any cash donation made exceeding FJD 100,000 to a Sports Fund (as approved by the Commissioner of Inland Revenue) for purposes of sports development in the Fiji Islands.

**Payments to foreign affiliates**
Subject to the normal rules of deductibility, a deduction can be claimed for royalties, management service fees and interest charges. However, as of 1 January 2008, any deductions claimed by any company (whether incorporated in Fiji or not, carrying on business in Fiji) in respect of head office charges or any other like payments shall not exceed 5% of total gross Fiji income. Effective 1 January 2010, the limit was reduced to 3%.
Taxes
Taxes levied on income are not deductible.

Other significant items
Provisions for expenses not yet incurred (e.g., provisions for bad debts or future maintenance) are not tax-deductible. A deduction is permitted in respect of amounts subsequently paid or written off.

Group taxation
Group taxation is not permitted.

Tax incentives
The tax incentives are designed primarily to promote export sales and to encourage the development of industries that are considered of benefit to the economic development of Fiji.

Export income deduction
A deduction for export income is allowed in accordance with the following:

<table>
<thead>
<tr>
<th>Year of assessment</th>
<th>Percentage of export income to be deducted</th>
</tr>
</thead>
<tbody>
<tr>
<td>2008 to 2010</td>
<td>50%</td>
</tr>
<tr>
<td></td>
<td>100% (on the island of Vanua Levu)</td>
</tr>
</tbody>
</table>

“Export income” means profit derived by a taxpayer from the business of exporting goods and services, and the Commissioner of Inland Revenue may, where separate records for export income are not maintained, determine such income on the basis of a formula as set out in the legislation.

The definition of “export income” has been clarified to mean “net profit”.

The 5th Schedule of the Income Tax Act – “Export Incentives” – has been repealed. However, the existing beneficiaries are expected to continue to enjoy the incentives under this schedule until the expiry of the incentives granted.

Investment allowance
From 2001, an investment allowance equal to 40% of the qualifying expenditure is available as a deduction for agricultural, forestry or marine resources business; an information technology business; or a rural manufacturing business. This allowance may be claimed in addition to normal depreciation.

A qualifying expenditure means expenditure of FJD 50,000 or more incurred in any of the years from the 2001 year of assessment to 2010 year of assessment, for the purpose of acquiring a capital asset(s).

Information communication technology (ICT) tax incentives
The income of an information communication technology operator may be exempt from income tax as follows:

1. Operating on or before 1 January 2009 in the declared Kalabu Tax Free Zone, from 1 January 2007 to 31 December 2016; or
Fiji Islands

2. Granted a licence after 1 January 2009, for a period of 13 years from the date of issue of the licence.

Provided that the business employs 50 employees or more for six months within the income year and 60% or more of the total value of its services in that income year is exported.

“Information communication technology business” means an entity engaged in software development, call centres or internet service provision, but does not include an internet café or any retail or wholesale of information technology products or the repair, sale or service of any such products.

Employment taxation scheme
Salary and wages paid to first-time employees for the first 12 months of employment qualify for a 150% deduction. This deduction is available until 31 December 2010.

Capital investment
The following incentives are available for capital investment:

Hotel industry – The Hotels Aid Act was repealed and the Income Tax Act was amended effective 1 July 2007. Approved capital expenditure incurred in building, renovating or expanding a hotel is subject to an investment allowance of 55% of the approved expenditure, in addition to normal depreciation.

Under the Short Life Investment Package (SLIP) the following concessions are available:

- Exemption from income tax for a period of 10 years provided that the capital investment in the hotel is more than FJD 7,000,000;
- Duty-free entry of all capital equipment, plant and machinery upon receiving provisional approval from the Minister; and
- Permission to generate own electricity, the excess to be sold to the Fiji Electricity Authority.

Mining industry – An approved mining company may for a specified period be exempt from income tax or taxed at a lower rate. The holder of a valid prospecting license may write off approved expenditure on prospecting for minerals against income from all sources.

From 1 January 2005, a 150% deduction is available for direct capital expenditure incurred by commercial banks in rural banking programmes.

From 1 July 2005, a 300% deduction is available for capital expenditure of at least FJD 40,000 spent for ICT business, agriculture, forestry, mining, manufacturing, textile, clothing and footwear, timber manufacturing, fishery manufacturing or shipbuilding business set up between 1 July 2005 and 31 December 2010 on the island of Vanua Levu.

From 1 January 2006, a 200% deduction is available for capital expenditure incurred by entities in the agriculture and fisheries sector not enjoying other concessions under the Income Tax Act. The incentive will be available until 31 December 2010.
From 1 January 2006, investors engaged in value adding processes in the food processing, agricultural processing, fisheries or forestry business may be able to claim a 100% deduction with respect to amounts invested or re-invested (for expansion), provided that the businesses meet the 50% local content rule.

Tax incentives are available to taxpayers engaged in new ICT business and for existing taxpayers so engaged who are able to show a significant increase in capacity and the number of employees as follows:

- 80% tax exemption for businesses employing more than 101 employees;
- 60% tax exemption for those that employ between 60 to 100 employees; or
- 40% tax exemption for those employing 10 to 59 employees.

A 150% deduction is available for costs incurred for the development of ICT business by any taxpayer employing 500 or more employees. This deduction is available till 31 December 2012.

From 1 January 2009, the following income tax exemption may be available to a taxpayer engaged in commercial agricultural farming and agro-processing subject to certain conditions:

- Any new activity approved and established between 1 January to 31 December 2009, for a period of four to 10 consecutive fiscal years depending on the level of capital investment; or
- Any new activity approved and established from 1 January 2010 to 31 December 2014 with a capital investment of at least FJD 2,000,000, for a period of 10 consecutive fiscal years.

Effective 1 January 2009, income derived by a taxpayer from a new activity in processing agricultural commodities into bio-fuels may be exempt from income tax for a period of 10 years under certain conditions.

From 1 January 2009, exemption from income tax for a period of five years may be available to a taxpayer engaging in renewable energy projects and power cogeneration.

From 1 January 2009, an investment allowance equal to 60% of the qualifying expenditure is available as a deduction for investment in Fixed Line Next Generation Networks. A qualifying expenditure means expenditure of FJD 50,000 or more incurred in any of the years between the years of assessment 2009 and 2012, for the purpose of acquiring a capital asset(s).

**Other incentives**

Other incentives include the following:

**Filmmaking and audiovisual incentives**

Incentives are available for filmmaking and for the development of the audio-visual industry in Fiji. These incentives include:

- Availability of an exemption from tax or tax at a reduced rate on the income of non-resident employees of an approved non-resident company engaged or intending to be engaged in making a film in Fiji;
Fiji Islands

- Availability to a resident entity (excluding an entity holding a broadcast license in television or radio in Fiji or with substantial shareholdings in the same) of a deduction of up to 150% of monies expended on audio-visual production in respect of income in the year the monies are expended. “Audio-visual productions” include production for exhibition or sale of theatrical films, broadcast television, direct-to-video and video disk programme, audio recording, computer software and interactive websites;
- Exemption from tax on the income derived by a taxpayer from the commercial exploitation of a copyright until the taxpayer has received from the commercial exploitation a return of up to 60% of the monies expended. The monies expended must be of a capital nature and in relation to the audio-visual production costs in respect of a qualifying audio-visual production; and
- Tax concessions are also available for residents of areas declared as studio city zones by the appropriate government Minister.

**Dividends**

Any dividend from a company incorporated in Fiji, received or accrued to a resident company other than a unit trust, is exempt from tax.

As of 1 January 2005, transfer of property by private companies to shareholders and associates shall be deemed to be a dividend paid by that company.

A 150% deduction is available on expenses incurred in reorganising a company for the purpose of listing on the South Pacific Stock Exchange.

Entities in the following sectors with maximum turnover threshold of FJD 300,000 may be exempt from income tax:

- Agriculture;
- Fisheries; and
- Tourism.

**Tax on land sales**

Non-residents of Fiji would no longer be subject to income tax on profit from the sale of land acquired purely for investment purposes. However, land sales tax may be applicable. Profit from the business of buying and selling land is subject to income tax.

**Withholding taxes (WHT)**

Notes

1. Applies to interest (over FJD 200) on savings and deposits with commercial banks and other financial institutions, unless the taxpayer has provided a tax identification number to the financial institution.
2. Any dividend that has been paid or credited in favour of a resident individual in respect of shares of a company listed on the South Pacific Stock Exchange is not subject to tax.
3. 10% of gross amount of dividends if beneficial owner is a company (other than a partnership) that holds directly at least 25% of the capital of the company paying the dividends; 15% in all other cases.
4. 5% of gross amount of dividends if beneficial owner is a company (other than a partnership) that holds directly at least 10% of the capital of the company paying the dividends; 15% in all other cases.
5. Depending on the provisions of the applicable double taxation agreement.

**Tax administration**

The Tax Administration Decree (TAD) was promulgated effective 1 January 2010 with the stated intention of harmonising the administration of the various tax laws including income tax and VAT.

**Returns**

Tax is assessed on income derived during the calendar year preceding the year of assessment. Returns are therefore generally accepted on a calendar-year basis, although approval is also given to use a fiscal-year basis. For purposes of assessment of returns completed on a fiscal-year basis, the calendar year in which more than one-half of the fiscal year falls is deemed to be the calendar year in which the income is derived. The Fiji tax system is not based on self-assessment. Returns of income contain information on the basis of which assessments are raised by the tax authorities.

A Tax Agent Lodgement Programme was introduced in 2003 to spread the lodgement of tax returns. In conjunction with this program, the advance tax payments will be increased to 100% in three instalments by the seventh month after the end of the taxpayer’s fiscal year-end as follows:

- First advance – due on the last day of the financial year;
- Second advance – due three months after the end of the taxpayer’s fiscal year-end; and
- Third advance – due seven months after the end of the taxpayer’s fiscal year-end.
Penalties
Administrative penalty provisions have been amended and increased by the TAD.

Provisions have been introduced to allow for distress of business assets once a company goes into liquidation.

The TAD provides for various ways to ensure the collection of taxes including, but not limited to:

1. Departure Prohibition Order – A departure prohibition order may be used by the tax office to prevent taxpayers from leaving the country without settling outstanding taxes;
2. Garnishee orders – The tax office may garnish bank accounts for outstanding taxes;
3. Registration of charges on personal and real properties of the taxpayer;
4. Distress and sale of personal property; and
5. Temporary closure of business.

Binding rulings
The TAD has introduced a binding ruling system. However, the provisions will only apply after the Minister of Finance has appointed a date by notice in the Gazette.

Anti-avoidance provisions
The anti-avoidance provisions of the Fiji Income Tax Act have been amended to strengthen the same.
Corporate taxes in Finland

Significant developments

The Finnish income tax system is expected to undergo some changes in the coming years. The working group on the reform should complete its work in May 2010. According to the public conversation around the working group, most significant changes will concern taxation of dividends and a decrease in the corporate income tax rate.

Taxes on corporate income

The corporate tax rate is 26%.

Corporate residence

A company is deemed to be resident on the basis of incorporation. Consequently, a company is deemed to be resident in Finland, if it is incorporated (registered) in Finland.

Finnish resident companies are subject to Finnish tax on their worldwide income (unlimited tax liability). Also Finnish permanent establishments (PE) of non-resident companies are subject to Finnish tax on their worldwide income attributable to the PE. A PE is, in general, formed in line with the OECD Model Convention.

Other taxes

Value-added tax (VAT)

The general VAT rate increased from 22% to 23% as of 1 July 2010. The reduced rate of 12% previously applied to food and animal feed, increased to 13% effective as of the same date. The VAT rate of 13% also applies to restaurant and catering services, which were taxed at the standard rate of 22% until 1 July 2010. The reduced VAT rate of 8% applied to books, accommodation and passenger transport increased to 9% as of 1 July 2010.

A zero rate applies to, e.g., subscriptions to newspapers and periodicals, intra-Community supplies of goods and exports of goods. Additionally, certain services, including financial services, insurance services and certain educational services, are exempted from tax.
Finland

The introduction of the so-called Tax Account system as of January 2010 has changed VAT reporting and payment including the due dates. Please see more in section “Tax administration”.

Real estate tax
Municipalities impose a real estate tax. The tax is levied on the taxable value of buildings and land. The municipal council determines the applicable tax rates, although the minimum and maximum tax rates are set by tax legislation, such as from 0.32% to 0.75% for permanent dwellings and from 0.6% to 1.35% for other real estate. The tax is deductible from taxable business income if the real estate is used for business purposes. The tax is deductible from taxable income of the so-called other source of income if the real estate is used to acquire other taxable income than business income.

Transfer tax
A transfer tax of 4% of the sales price is payable on the transfer of real estate situated in Finland. The transfer of shares in Finnish companies and other domestic securities is subject to a transfer tax of 1.6%. Generally, the transfer tax is payable by the transferee.

No transfer tax is payable on the transfer of securities made through the stock exchange. Similarly, no transfer tax is payable if both the seller and the transferee are non-residents. Transfer tax is, however, always payable on transfers between non-residents if the transferred shares are shares in a Finnish housing or real estate company.

Social security contributions
According to the Finnish social security legislation both Finnish and foreign employers have a liability to pay several social security payments in Finland in case the employee performs his tasks partly or wholly in Finland. The liability concerns all employers, regardless of the form of the company and whether the foreign company has a permanent establishment (PE) in Finland. The percentage rates for the employer’s (and employee’s) social security contributions are revised on an annual basis.

Compulsory social security contributions payable by the employer in 2010 according to the paid salaries are as follows:

- Employer’s social security charge: 2.23% (no cap);
- Employer’s pension insurance contribution: 16.9% (on average, no cap);
- Employer’s unemployment insurance contribution: 0.75% for the first EUR 1,846,500 of gross salaries and 2.95% for the portion of the gross salaries exceeding EUR 1,846,500 (no cap);
- Group life insurance premium: 0.072% (on average, no cap); and
- Accident insurance premium: 1.0% (on average, no cap).

The new rates for employer’s social security charge are applicable to salaries paid as of 1 January 2010.

If the employee is regarded as a foreign-posted employee and has an E-101 certificate or a certificate of coverage from his home country, neither the aforementioned employer’s social security contributions nor the employee’s social security charges are payable in Finland.
**Branch income**

As a general rule, a branch is taxed like a corporation (tax rate 26%) on the profits attributable to it, provided the branch constitutes a PE in Finland. No tax is withheld on transfers of (taxed) profits to the head office.

**Income determination**

Companies and other legal entities can have as many as three sources of income (i.e., the Source of Income from Business Activities, the Source of Agricultural Income and the Source of Other Income). The net taxable income is calculated separately for each source. The expenses of one source of income cannot be deducted from the taxable income of another source, and a loss from one source of income cannot offset taxable income from another source. All taxable income received by a company is taxed at the rate of 26% irrespective the source to which it is attributable. Typically Finnish companies are taxed mainly in accordance with Business Income Tax Act (BITA, Business Source), but it is not rare that a company would also have income taxed in accordance with Income Tax Act (ITA Other Income). Common income taxable in the “Other Income” basket is certain kinds of rental income.

In general, Finland has a very broad income concept and taxable income includes all income derived from a company's activities, though there are some significant exceptions, including (among others):

- Capital contributions by shareholders;
- In most cases, dividends from unlisted companies (See more in Dividends section below);
- Liquidation gains and capital gains qualifying for the participation exemption (see more below in section Capital gains);
- Proceeds from disposal of company's own shares; and
- Merger gain.

There is no general distinction between capital gains and other income; capital gains of a company are taxed as part of its general income either in the “business income” basket or the “other income” basket. No rates other than the general 26% are applied to any part of taxable income of a company.

Taxable income of a company generally is computed on accrual basis: income is taxable in the year it is earned. Exemptions to this main rule exist, including unrealised exchange gains and losses, which are taxable/deductible on the year of the rate change.

**Inventory valuation**

Inventories may be written down to the lower of direct first-in, or first-out (FIFO) cost, or replacement cost or net realisable value. Conformity between book and tax reporting is required.

**Capital gains**

Capital gains and losses are generally included in the taxable business income (i.e., sales proceeds are included in the taxable income and the undepreciated balance of the asset sold is deducted in the sales year) and treated as ordinary income. However, the entire stock of machinery and equipment is treated as a single item, and the capital
Finland

gain on machinery and equipment is entered as income indirectly by deducting the selling price from the remaining value of the stock of machinery and equipment.

Capital gains arising from the sale of shares are tax exempt under certain circumstances (participation exemption). Specifically, capital gains arising from the sale of shares are tax exempt if:

- The seller is not engaged in venture capital business;
- The seller has owned continuously for a period of at least one year at least 10% of the share capital of the target company; and
- The shares must be part of the seller’s fixed assets and the shareholding must be included in the seller’s business income source for tax purposes:
  - The target company cannot be a real estate company, a housing company or a company the activities of which mainly include owning of real estates; and
  - The target company must be a Finnish company, a company referred to in the European Commission (EC) Parent-Subsidiary Directive or a company resident in a country with which Finland has concluded a tax treaty which applies to the target company’s dividend distribution.

However, a capital gain is taxable to the extent that the gain corresponds with a previous tax-deductible write-down or provision made in connection with the acquisition cost of shares, subsidies received for acquiring shares, or previous capital losses deducted for Finnish tax purposes from intragroup transfer of the shares.

Capital losses in the corresponding situations are non-deductible.

**Dividends**

Dividends received by a Finnish company are tax exempt in most cases. However, dividends received are partly taxable (75%) if:

- The dividend is received on shares belonging to the financial assets and the receiving company does not own at least 10% of the equity of the distributing company that is resident in another European Union (EU) member state and covered by the EC Parent-Subsidiary Directive (note that only financial, pension and insurance institutions may have assets which are considered as financial assets);
- The dividend is received from a company other than Finnish or EU resident; and
- The dividend is received from a publicly quoted company and the receiving company is not a publicly quoted company, and the shareholding is less than 10% of the equity of the distributing company.

Dividends that a Finnish company receives from other than a company resident in Finland or another EU member state are, however, fully taxable (100%), if there is no applicable tax treaty. Note, that most of the Finnish tax treaties include provision enabling tax exempt dividend from the tax treaty country in case of at least 10% shareholding.

**Income from controlled foreign corporations (CFC)**

The Finnish CFC regime was amended in 2009 for the purpose of bringing the regime into compliance with European Community law.
The CFC rules are applicable with respect to foreign entities in low tax jurisdictions controlled by Finnish residents. The undistributed profits of such foreign entities may be taxed as profit of the Finnish resident direct or indirect shareholders. The entity is deemed to be controlled by Finnish residents if at least 50% of the capital or total voting rights are directly or indirectly held by Finnish residents, or if Finnish residents have the right to at least 50% of the profits of the entity. The taxable person in such a case is the Finnish resident shareholder who owns directly or indirectly at least 25% of the capital of the corporate body or have right to at least 25% of the profits of the entity. A foreign entity is considered to be low taxed if the actual income tax burden of the foreign corporation in its state of residence is lower than three-fifths of the tax burden of a comparable Finnish corporation, i.e., currently effective rate is less than 15.6% (three-fifths of the Finnish tax rate of 26%).

Foreign PEs of non-resident companies can be regarded as equal to foreign companies provided that the PE’s profits are not taxed in the head office state. Due to the transitional period, the PE provision would be applicable to PEs of foreign entities only as of 1 January 2015.

Certain types of businesses are excluded from the scope of the CFC Rules (e.g., income principally from industrial, manufacturing or shipping activities, as well as sales or marketing activities related to such activities if they are directed principally to the country of residence of the sales or marketing company). Also companies resident in a country with which Finland has a double tax treaty generally are outside the scope of the CFC Rules if the company does not benefit from any special tax incentives in that treaty country. Tax treaty countries that are not covered by this rule are exhaustively mentioned in a specific “black list” provided by the Ministry of Finance. As of January 2010, these countries are Barbados, Bosnia-Herzegovina, Georgia, Macedonia, Malaysia, Moldova, Montenegro, Serbia, Singapore, Switzerland, United Arab Emirates and Uzbekistan.

In addition to these two mentioned exclusions, the Finnish CFC rules are not applicable in cases of genuine economical establishment in a foreign country, which is either an EU/European Economic Area (EEA) member state or a tax treaty state not on the “black list”. The genuine economical establishment is evaluated in light of the requirements of the business in question and paying special attention to capable personnel and office space, etc., located in the low tax jurisdiction.

**Foreign income**

A Finnish corporation is taxed on foreign dividends when the decision to distribute dividend is made and on foreign branch income and other foreign income (e.g., interest and royalties) as earned. The principal method of avoiding double taxation is the credit method, although the exemption method is still applied in few older treaties. Foreign tax can be credited at maximum in the same proportion of Finnish tax payable on the same income as the combined amount of income from foreign are in proportion to the same income source. Unused credit of foreign tax paid may be carried forward for five years.

**Stock dividends**

Stock dividends (bonus shares) may be distributed to stockholders, which are corporations and other legal entities with some exceptions, free of tax on the shareholder (see Dividends section above).
**Deductions**

As with taxable income, the concept of deductible costs is wide and covers, in general, all costs incurred in the pursuance of taxable income. Significant exceptions to this rule include (among others):

- Income taxes (see below), tax late payment interests and punitive tax increases;
- 50% of entertainment costs;
- Fines and other punitive payments;
- Capital losses, and liquidation losses if capital gains from the sale of shares of a target company would qualify for participation exemption *see the Income Determination: Capital gains section*;
- Losses from the disposal of a company’s own shares; and
- Merger losses.

As the accrual method is applied to calculation of taxable income, expenses are usually deductible on the year they are realised (obligation to pay has arisen).

**Depreciation and depletion**

Maximum annual rates of depreciation calculated on net book value (declining-balance method) are 25% for machinery and equipment and from 4% to 20% for buildings and other constructions, depending on the type and estimated life of the asset. Net book value is defined as cost less accumulated depreciation and, in the case of machinery and equipment, proceeds on disposal of the assets. The straight-line method is applied to certain intangible assets and capitalised expenditures and to assets with long economic use, such as dams. Tax depreciation is limited to the cumulative charges made in the books.

The maximum amount of depreciation from the acquisition cost of new buildings, machinery and equipment, taken into use in 2009 and 2010 in production activities, are temporarily doubled *see more detail in the Tax incentives section*.

The capital cost of mines, sandpits, quarries and peat bogs is written off in proportion to the quantities extracted. Short-lived items (the economic life of which is three years or less) may be written off immediately. Land is not a depreciable asset.

Costs related to qualifying intangible property are usually amortisable over a period of 10 years or a shorter period if the economic life is proven to be less than 10 years.

**Net operating losses**

Losses may be carried forward for 10 subsequent years. The right to carryforward may be forfeited, such as in cases where there is a direct or indirect change in the ownership of the company operating at a loss. Loss carrybacks are not allowed.

**Goodwill**

Acquired goodwill is amortisable for tax purposes over its economic life, up to a maximum of 10 years.
**Payments to foreign affiliates**
A Finnish corporation may claim a deduction for royalties, service fees and interest charges paid to foreign affiliates, provided the underlying transaction is beneficial to it and the amounts paid are at arm’s length.

**Taxes**
No income taxes are deductible when determining taxable income. However, the real estate tax is deductible.

**Group taxation**
Companies within a group are not consolidated for income tax purposes. However, via group contributions (lump sum payments of cash based on annual taxable profits), group companies may even out their taxable profits and losses, which leads effectively to the same result as would consolidation. A group contribution is a deductible cost for the granting company and taxable income for the receiving company, provided that all of the following are true:

- Both companies belong to a structure where there is a direct or indirect common ownership of at least 90% and the structure has existed for the entire tax year;
- Both companies are Finnish resident for tax purposes;
- Both companies are limited liability companies or co-operatives with business activities (have a source of income from business activities, see Income determination section);
- The contribution is recorded in the accounts for both of the companies so that it has a P/L effect;
- The accounting period for both companies ends at the same date; and
- The amount of contribution does not exceed the taxable income of the granting company.

Based on case law, the ownership chain may also be traced via foreign entities, provided there is a tax treaty between Finland and the country wherein the ultimate parent for the group is resident.

**Thin capitalisation**
There is no special legislation governing thin capitalisation. A Finnish company may deduct interest payments to affiliates provided that the amount of debt and rate of interest are at arm’s length: if not, a possibility for application of general anti-avoidance provision may exist.

**Transfer pricing**
All transactions between related parties must happen at arm’s length. The requirement is imperative even in relation to purely domestic transactions. If the arm’s-length requirement is not followed, income or deductions of a company may be adjusted for tax purposes, in addition to which a risk for substantial penalties exists.

A Finnish company is obliged to prepare transfer pricing documentation to support transactions between its non-Finnish related parties. Documentation is subject to statutory requirements regarding content, which vary depending on the volume of related party transactions. The documentation requirement does not concern small- and medium-sized companies that have less than 250 employees and feature a turnover of no larger than EUR 50 million or a balance sheet of no more than EUR 43 million.
Finland

Thresholds are calculated at group level. Failure to present appropriate documentation may lead to a punitive tax increase.

**Tax incentives**

**Small- and medium-sized companies**

It is possible for small- and medium-sized companies carrying on certain production activities or tourism in developing areas to make use of increased depreciation.

The maximum amount of depreciation allowed for the acquisition costs of new machinery and buildings, put into use in 2009 and 2010 for production activities, may be doubled for tax purposes. Accelerated depreciation rates also apply to new factories and workshops as well as new machinery and equipment acquired for use in old factories and workshops, as follows:

- 25% – 50% (new machinery and equipment used in production); and
- 7% – 14% (new buildings used in production).

Double depreciation may be deducted from taxable income for the 2009 and 2010 tax years. Depreciation is calculated as a percentage of the depreciable acquisition costs, for example:

If the capitalised acquisition cost of a piece of machinery put into use in 2009 is EUR 100,000, the depreciation would be as follows:

- Depreciation in 2009 EUR 50,000 (50% of 100,000); and
- Depreciation in 2010 EUR 25,000 (50% of 50,000).

The remaining EUR 25,000 is depreciated according to normal rules (25%, declining-balance method). Conformity with accounting is required.

**Research and development (R&D) activities**

Qualifying R&D related costs may be, under certain circumstances, deducted annually, despite the fact that under general rules they should be capitalised.

**Withholding taxes (WHT)**

Finnish corporations paying certain types of income are required to apply the following withholding tax rates on payments to foreign corporations and non-resident aliens (see Note 1).

Tax rates on dividends and other payments from Finland to non-residents in 2010 are presented in the table below.

According to domestic legislation, interest paid to a non-resident is usually tax exempt in Finland. Dividends paid to a company referred in the EC Parent-Subsidiary Directive owning at least 10% of the capital of the dividend distributing company are tax exempt.

No withholding tax is levied on dividend payments received by companies resident in the EU/EEA area (other than in Liechtenstein), which would have been tax-free if paid to a Finnish corporate body, if the withholding taxes cannot be credited in the company’s state of residence.
See below for tax to be withheld at source, by countries of residence (of recipient). For countries not included in table, the rate is 28%.

Each tax treaty should be studied carefully because there are often exceptions to general rules.

Notes

* The recipient is a company whose share in the company making the payment is at least the percentage indicated in parentheses.

*** No tax on royalties between associated companies meant in EC Directive 2003/49/EC (§ 3 b-f, Act on Tax at source).

1. Tax is not levied on literary, scientific or artistic royalties (for film royalties see text of treaty).
2. The tax rate is 10% on use of films, literary, scientific or artistic works and 25% on use of trademark or royalties paid for usufruct.
3. The tax rate is 15% on films, tapes used in television or radio broadcasts, use of copyright of literary, artistic or scientific works or royalty paid for usufruct.
4. The tax rate is 10% on literary, scientific, artistic and film royalties.
5. The tax rate for an individual is 28% if income is tax exempt in the country of residence.
6. A lower tax in certain cases, as for India see article V in protocol 1997.
7. Foreign capital > USD 100,000 when dividend becomes due and payable.
8. For additional requirements, see the treaty.
9. The tax rate is 7% on industrial, scientific and commercial royalties.
10. The tax rate is 28% if the recipient is a special holding company.
11. The tax rate is 5% on royalties from films and tapes.
12. The tax rate is 5% on royalties paid for the use of industrial, commercial or scientific equipment.
13. The tax rate is 15% if the payer is also an industrial enterprise.
14. The 10% is calculated on the total voting stock.
15. The tax rate is 28% on an unremit amount, if free from tax in Singapore.
16. The tax rate is 1% for a finance lease of equipment and 5% for an operating lease of equipment and computer software.
17. The tax rate is 5% for the use of secret process or for know-how, no tax for computer software or patent.
18. The tax rate is 10% on industrial royalty, 3% on royalties to news agency and 5% on artistic royalty to the author or his mortis causa successor.
19. The tax rate is 2.5% on royalties paid for the use of industrial, commercial or scientific equipment or computer software.
20. The tax rate is 15% if the recipient is a company.
21. No tax on dividends to qualified parents-subsidiaries and pension funds (Article 10 paragraph 3).
22. No tax if the recipient proves that he has domicile (individual) or is incorporated in the United Arab Emirates.
23. The tax rate is 19.5% if paragraph 3 of Act on Tax at source (RP 113/2008) is applicable.

Non-treaty areas include: Andorra, Antigua and Barbuda, Bahama Islands, Bahrain, Belize, Bermuda, Cayman Islands, Cyprus, Grenada, Greenland, Guernsey, Hong Kong, the Spitzbergen, Jan Mayen, Jersey, Liberia, Macao, Mauritius, Monaco, Netherlands Antilles, Panama, Vanuatu, Virgin Islands.

**Tax administration**

**Issues in focus**
Current issues in special focus of tax audits are transfer pricing and permanent establishments.

**Tax returns**
The tax year is generally the calendar year. A company having an accounting period other than the calendar year is taxed for the accounting period or the accounting periods ending during the calendar year. A company must file a corporate income tax return within four months from the end of the accounting period.
Finland

**Payment of tax**
Income taxes are levied as prepayments during the tax year. After the assessment of the taxes, any excess prepayments are refunded without application. If the total prepayments are less than the actual income tax to be paid, the remaining amount is levied by the local tax office.

**The tax account system**
As of the beginning of 2010, a new system for reporting and paying unprompted taxes – such as VAT and employer’s social charges – was introduced. Tax Account is a taxpayer-specific information system under which unprompted taxes are declared on a monthly basis. There are changes in the existing system of monthly returns, due dates, payments and refunds. Payments are made through regular payment channels.

Tax types not covered by Tax Account are income tax, real estate tax, inheritance tax, gift tax, forestry fees and transfer tax. It is important to note that withholding taxes are henceforth declared through the Tax Account.

**Other issues**

**Company restructurings**
In accordance with the EC directive 2009/133/EC on mergers, divisions, partial divisions, transfers of assets and exchanges of shares concerning companies of different Member States, it is possible to carry out the said restructurings tax neutral, if statutory conditions are met. In cross-border situations, both parties should be resident in the EU. Principal of going concern is applied in taxation, i.e., the receiving company receives the assets with the values the transferring company had for those assets in its taxation.

Significant developments

Attractive research and development (R&D) tax credit regime
The 2010 Finance Act extended for one additional year (2010) the ability for companies, which are subject to corporate income tax, to elect to receive an immediate refund of the R&D tax credit.

Tax consolidation group
Beginning in January 2009, a French subsidiary can be included in a tax consolidated group even if its parent company is not located in France. However, at least 95% of the share capital of the foreign company must be held, directly or indirectly, by the French company that is head of the tax consolidated group. In addition, the foreign company must be subject to corporate income tax, be located in the European Union or in a member state of the European Economic Area whose tax treaty with France includes a mutual administrative assistance clause to fight tax fraud and tax evasion and hold 95% of the lower-tier subsidiary’s shares.

A permanent establishment of a foreign company and subject to French corporate income tax can be a member of a French tax consolidated group if the shares of the foreign company are held by other French companies, which are members of the consolidated group.

Provisions on the tax neutrality of intra-group transaction flows (e.g., dividends, provisions, waivers of debts, interest, and capital gains on the sales of shares) have been modified to treat tax consolidated groups with an intermediate foreign company the same as other tax consolidated groups.

Business tax
The business tax has been replaced by the territorial and economic contribution, known in French as “Contribution Economique Territoriale” (CET) beginning 1 January 2010. CET comprises two different taxes: the companies’ land contribution, known in French as “Cotisation Foncière des Entreprises” (CFE) and the companies’ added value contribution (CVAE). Although they have a similar scope, the taxes are subject to very different rules. The CFE tax is based on the rental value of assets that are subject to the land tax, excluding movable goods and equipment. For industrial plants, the taxable base is reduced by 30%. There is a specific rental value for each town and an upgrading ratio is set forth at national level each year.

The CVAE is based on a company’s added value. Only taxpayers, which are not exempt from the CFE and whose turnover is greater than EUR 152,500, are subject to CVAE.
However, tax relief equal to the amount of the tax is provided for companies whose turnover is under EUR 500,000. The tax rate for companies whose turnover ranges from EUR 500,000 to EUR 50 million is assessed according to a progressive scale, which ranges from 0 to 1.5%. There is an upper ceiling on the added value that applies to the CET. As a consequence, a tax relief applies and is equal to the excess of the sum of CFE and CVAE over 3% of the added value of the company.

**VAT package**
Beginning on 1 January 2010, for VAT business-to-business (B2B) suppliers of services are taxable at the location of the customer and no longer at the location of the supplier. For business-to-consumer (B2C) suppliers of services, the place of taxation remains where the supplier is established.

With the new VAT package, taxation in the state of the customer applies only to taxable persons, partly taxable persons, and non-taxable legal persons that are registered for VAT.

Specific new VAT rules apply to transportation leases, cultural, arts and sports services, electronic and telecommunication services, and transportations of goods.

**Transfer pricing documentation**
Beginning on 1 January 2010, the Amended Finance Act of 2009 introduces new French transfer pricing documentation requirements concerning large corporations located in France (i.e., with annual turnover or amount of gross assets in excess of EUR 400 million).

According to this new provision, the documentation must contain general information regarding the relevant group of companies, including notably activities, operational and legal structures of the related companies, functions performed and risks borne, main intangible assets, group transfer pricing policy, amongst others.

**Anti-avoidance rules applicable to non-cooperative states or territories (NCST)**
Under NCST for French tax purposes, a state or territory is considered non-cooperative if it meets at least one of the following criteria:

1. It is not a member of the European Community;
2. It has been reviewed and monitored by the OECD Global Forum on Transparency and Exchange of Information;
3. It has not concluded at least twelve administrative assistance agreements/treaties that allow a complete exchange of information for tax purposes; or
4. It has not concluded an administrative assistance agreement/treaty with France.

Under the new tax regime, the French parentsubsidiary regime will no longer be applicable to dividends paid from entities located in an NCST with respect to tax years beginning on or after 1 January 2011.

Beginning on 1 January 2010, withholding tax on passive income is increased to 50% for transactions with an NCST person or entity.

Payments (e.g., interests, royalties, payments for services) made to an NCST person or entity are as a general rule not tax deductible. In addition it is no longer possible to
offset withholding tax in France with any foreign withholding tax borne by the entity located in a NCST.

Moreover, concerning shareholders (individuals and companies) located in a NCST, a tax amounting to 50% is levied on capital gains derived from the disposal of shares in French companies whatever the level of shareholding.

**Taxes on corporate income**

France levies a corporate income tax at a rate of 33.33%.

Concerning large size companies, a social contribution tax amounting to 3.3% is assessed on the corporate tax amount from which a EUR 763,000 allowance is withdrawn.

A patent box regime allows income derived from the sale or license of patents or patentable inventions to be taxed at the reduced rate of 15%, under certain conditions.

Reduced tax rates of 15% or 8% apply to certain capital gains. See “Capital gains” under the “Income determination” section.

No tax is levied on income at the regional or local level.

A withholding tax is levied on French branches of foreign non-EU corporations at the rate of 25%, or a reduced tax treaty rate (e.g., for the United States, 5%) on net profits. Refund (limited or full) of tax may be claimed to the extent that the taxable amount exceeds the dividend(s) actually distributed by the foreign corporation during the twelve months following the close of the fiscal year concerned, or the dividends are distributed to residents of France.

**Corporate residence**

France is defined as metropolitan France (excluding Monaco, but including the continental shelf), Corsica and the overseas departments (French Guyana, Guadeloupe, Martinique, Reunion).

A French company, which as a general rule is a company incorporated under French commercial laws, is subject to corporate tax in France on its worldwide income, with the exception of income attributable to foreign business activity (if there is no treaty in force between France and the relevant foreign country) or to a foreign permanent establishment (if a tax treaty does apply).

A foreign company is subject to corporate tax in France on income attributable to a French business activity or to a French permanent establishment, as well as on income from real estate located in France.

**Other taxes**

**Value-added tax (VAT) known as turnover taxes in France**

Turnover taxes are assessed on goods sold and services rendered in France. The normal rate is 19.6%. Other rates of 5.5% and 2.1% apply to specific sales and services (for example, restaurant, transports of travellers and sales of books are taxable at the 5.5%
reduced rate). Exports and certain specific services invoiced to non-French residents are zero-rated.

**Registration duties**
Registration duties mentioned hereafter are imposed on the purchaser. However, the seller may be liable for these duties in case of non-settlement by the purchaser.

**Transfer of goodwill**
The transfer of goodwill is subject to a registration duty at a rate of 3% on the part of the transfer price amounting from EUR 23,000 to EUR 200,000 and at a rate of 5% on the part exceeding EUR 200,000.

**Transfer of shares**
The transfer of shares of Société anonyme (SAs, which are corporations) and Société par Actions Simplifiées (SASs, which are simplified corporations) is subject to registration duty at a rate of 3% with a maximum of EUR 5,000 per transfer.

The transfer of interests or quotas in legal entities whose capital is not divided into shares (e.g., Société à responsabilité limitée – SARLs), which are a form of private limited liability corporate entity is subject to a registration duty of 3%.

The transfer of shares in non-quoted companies whose assets consist principally of immovable property is subject to a registration duty of 5%.

**Transfer of real estate**
The sale of land and buildings is subject to registration duty at a rate of 5.09% on the transfer price, including expenses.

**Real estate tax**
All properties located in France are subject to a 3% real estate tax. The tax is assessed on the fair market value of the real estate, in proportion to the direct or indirect interest held. All entities in the chain of ownership are jointly liable for the payment of the tax.

Automatic exemptions apply in three situations. First, to entities whose French real estate assets represent less than 50% of their total French assets. Second, to entities listed on a regulated market whose shares, units or rights are significantly traded on a regular basis. Third, to entities having their registered office in France, in an EU Member State or in a country that has concluded a double tax treaty with France providing for an administrative assistance or a non-discrimination clause, where:

1. Their direct or indirect interest in the French real estate is less than either EUR 100,000 or 5% of the fair market value of the French real estate;
2. They are pension funds or public charities recognised as fulfilling a national interest whose activities justify the need to own French real estate; or
3. They are non-listed French real estate funds (“société de placement à prépondérance immobilière à capital variable” (SPPICAV) or “fonds de placement immobilier” (FPI)) or foreign funds subject to equivalent regulations.

Where an automatic exemption does not apply, a claim may be submitted for conditional exemption.
**Branch income**

Tax rates on branch profits are the same as on corporate profits. However, as a principle, branch profits are deemed to be distributed to the head office.

Profits realised in France by foreign corporations whose head offices are located in a European country are not subject to branch withholding tax, provided that certain conditions are met (e.g., effective head office in a European country or foreign corporation subject to corporate taxation).

**Income determination**

**Inventory valuation**

Inventories must be valued at the lower of cost or market. Cost must be determined in accordance with the first-in, first-out (FIFO) or the average-cost method. The last-in, first-out (LIFO) method is prohibited.

**Capital gains**

Capital gains generally are taxable as ordinary income and subject to French corporation tax at the standard rate of 33.33%, regardless of the duration of ownership of the assets sold.

However, a reduced rate of 15% increased by the social contribution on benefits is applied to capital gains on the disposal of patents or patentable inventions, as well as on income from the licensing of patents or patentable inventions.

Gains on the sale of shares in subsidiaries held for at least two years benefit, since 1 January 2007, from a large size relief (95% of such capital gains are excluded from corporate income tax, the remaining 5% portion being taxed at the standard 33.33% rate).

Capital gains realised by non-resident investors on the sale of participations in French companies that are subject to corporate income tax continue to be taxed at the rate of 18% (if the non-resident investor has held at least 25% of the share capital of the French company at any time over the past five years) or 33.33% (for French real property companies, depending on the specific wording of the applicable tax treaties).

See also the developments concerning “Anti-avoidance rules applicable to NCST” in the “Significant developments” section.

**Inter-company dividends**

French parent companies (i.e., companies incorporated in France and holding qualifying shares that represent at least 5% of the issued capital of subsidiaries, French or foreign) have the option of excluding 95% of the subsidiaries net dividends from corporate income tax (a 5% of charges and expenses must be added back to the parent company’s taxable results). The French parent-subsidiary regime extends to certain shares without voting rights. There is no formal commitment to hold the shares for at least two years and companies can benefit from this regime from the acquisition date of the shares. However, the obligation remains to hold the shares over this period of time. Certain shares of listed real estate companies are not eligible to the French parent-subsidiary regime.
**France**

**Foreign income and new Controlled Foreign Company (CFC) rules**

Resident corporations are not taxed on foreign source income derived from activities carried out abroad through foreign branches. Foreign income is not taxable until actually repatriated to French resident corporations. As a result, undistributed income of foreign subsidiaries is not taxable. The only exception to the territoriality principle is provided by Article 209 B of the tax code, known as the Controlled Foreign Company rules. The controlled foreign company rules provide that:

- The percentage of shares, which have to be owned by the French company in the foreign legal entity or permanent establishment: French corporations are required to include in their taxable income profits made by their more than 50% owned foreign subsidiaries and branches. The 50% holding is determined by direct and indirect control of shares and voting rights.
- Introduction of an anti-avoidance rule: The minimum holding threshold has to be reduced to 5%, if over 50% of the share capital of the foreign entity is indirectly held through French or foreign companies controlled by the French parent company. However, if the shares in the foreign entity are listed on a regulated market, the French tax authorities will have to demonstrate that the French parent company, together with other entities holding shares in such foreign entity, is acting in concert.
- Notion of privileged tax regime: The CFC rules are applicable if the foreign legal entity or permanent establishment in which the French company owns the requisite percentage of shares is in a country with a privileged tax regime. A privileged tax regime is defined by the French tax code as a tax regime in which a foreign jurisdiction subjects taxable income of a foreign entity to at least 50% or lower of the income tax liability which would have been incurred in France, had the activity of the foreign entity been performed in France.
- Profits of the foreign entity which fall under the CFC rules are no longer taxed separately. They are now aggregated with the other taxable profits of the French parent company. Consequently, any tax losses incurred by the French parent company may be offset against the foreign entity's profits.
- Safety clauses: The French parent company can avoid the application of the CFC rules if it demonstrates that the foreign entity carries an effective trading or manufacturing activity, conducted from its country of establishment or registered office. Furthermore, the CFC rules in principle are not applicable with respect of foreign branches or subsidiaries located in another EU country. However, this exception is not applicable if the French tax authorities can demonstrate that the foreign entity located in another EU country constitutes an artificial arrangement, set up to circumvent French tax legislation. This concept is similar to the “abuse of law” concept, although it does not have all the same characteristics.

**Deductions**

**Carryforward of losses**

France imposes no time limit on the carryforward of losses by companies.

**Bad debts**

Bad debts which are definitively non recoverable are treated, from a tax point of view, as losses.

Under certain conditions, a tax deductible reserve can be established for debts whose recovery is uncertain.
**Charitable donations**
Charitable donations made by companies to certain foundations or societies are deductible up to 60% of their amount (limited to EUR 5,000 of the turnover before taxes).

**Depreciation and depletion**

*Tax consequences of the IAS/IFRS accounting rules*

As a result of the entry into force of IAS/IFRS accounting rules, which took effect on 1 January 2005, the definition as well as methods of valuation and depreciation of fixed assets have been modified.

The depreciation of fixed assets has to be carried out component by component. The components of a fixed asset have to be depreciated separately according to their own lifetime.

In order to mitigate the tax consequences of the change in the accounting rules, the amendments provide that the increase or decrease in the taxable profits of companies arising from the changes of adopting IAS/IFRS accounting rules will be spread over a period of five years, unless the increase or decrease does not exceed EUR 150,000.

*Declining-balance depreciation*
Declining-balance depreciation is allowed for certain new and renovated assets whose useful life is more than three years.

For assets bought or manufactured between 4 December 2008 and 31 December 2009, the rate is computed by multiplying the rate of straight-line depreciation by:

- 1.75 if the useful life of the asset is three or four years;
- 2.25 if the useful life of the asset is five or six years; and
- 2.75 if the useful life of the asset is more than six years.

For assets bought or manufactured after 31 December 2009, the rate is computed by multiplying the rate of straight-line depreciation by:

- 1.25 if the useful life of the asset is three or four years;
- 1.75 if the useful life of the asset is five or six years; and
- 2.25 if the useful life of the asset is more than six years.

**Goodwill**
Under French tax rules, goodwill (e.g., clientele, trade-marks) cannot be depreciated.

**R&D and software expenses**
Concerning R&D and software expenses, a business may elect to immediately deduct costs incurred in research and development of software or to amortise their cost straight-line over a maximum period of five years. The cost of acquiring software may be written off straight-line over 12 months.

The cost of patents acquired can be depreciated over a five year period.
**Net operating losses**
For tax purposes, the distinction between ordinary losses and losses corresponding to deferred depreciation, has been eliminated. Companies subject to corporate tax can carryforward their losses for an unlimited period of time.

Corporations may also elect to carryback net operating losses (NOLs). Losses of a given fiscal year may be offset against undistributed taxable profits of the three preceding years. The lower of the tax paid on these profits or the potential tax savings represented by the tax loss of the fiscal year is a tax credit. Such credit may be offset against corporate income tax of the following five fiscal years, and thereafter, any excess credit may be refunded.

**Thin capitalisation rules**
Under current rules, the tax deduction of interest paid by a French company to its foreign controlling shareholders is subject to the following three restrictions:

*Interest rate limitation*
Under the amended article 212 of the French Tax Code, tax deduction of interest paid to related parties is limited to the higher of (i) the average annual interest rate applied by credit institutions to companies for medium-term variable rate loans or (ii) the interest that the borrowing company could have obtained from independent banks under similar circumstances. This rate is 4.81% for financial years ending on 31 December 2009. Having passed this interest rate test, French indebted companies have to pass a second test: the debt ratio.

*Debt ratio*
That part of interest paid to related parties, which is deductible under the rate limitation test is disqualified, if it exceeds all of the three following limitations during the same financial year:

i. Interest relating to financing of any kind granted by related parties within the limit of 1.5 times the net equity of the borrower;

ii. 25% of an adjusted net income before tax ("résultat courant avant impôt" defined as the operating income, increased by certain items); and

iii. Interest income received from related parties (i.e., no limitation on thin capitalisation grounds when the borrowing company is in a net lending position vis-a-vis related entities).

The portion of the interest which exceeds the three above limits is not deductible, except if it is lower than EUR 150,000.

*Carryforward of excess interest*
That part of the interest which is not deductible immediately by the borrowing company can be carried forward, without time limit, for relief in subsequent years, provided there is an excess capacity during such years. The amount in excess is, however, reduced by 5% each year, from the second financial year following the financial year in which the interest expense has been incurred.

*Exceptions*
(i) The thin capitalisation rules do not apply to interest payable by banks and credit institutions, and also to certain specific situations such as interest in connection with intra-group cash pools or with certain leasing operations; and
(i) The thin capitalisation rules do not apply if the French indebted company can
demonstrate that the debt-to-equity ratio of the worldwide group to whom it
belongs exceeds its own debt-to-equity ratio.

Deductibility is also facilitated within a French tax consolidated group. The thin
capitalisation rules apply to each company member of the group taken on a
stand-alone basis. Any excess interest incurred by such company is, however, not
carried forward by it. Instead, it is appropriated at group level.

**Payments to foreign affiliates**
Payments to foreign affiliates are allowed, as long as they meet the arm’s-length
test. If they do not, article 57 of the French Tax Code provides that income directly
or indirectly transferred to the foreign affiliate, through either the increase or the
reduction of the purchase or sales price of goods and services, or through any other
means, must be added back to taxable income. For the purpose of this provision,
foreign affiliates are defined as parent or sister companies.

Where the payments are made to companies located in a country with a privilege tax
regime (see above in the “Significant developments” section, Foreign income and CFC
rules), the French taxpayer must prove that the transaction is bona fide and that the
amount due is not exaggerated.

**Taxes**
Most taxes, including unrecoverable VAT, registration taxes and business tax, are
deductible. The major exceptions are corporate income tax and tax penalties.

**Group taxation**

French corporations and their 95% owned domestic subsidiaries may elect to file one
single tax return, thus, allowing offset of losses of one group corporation against the
profits of a related corporation. The tax is levied on the aggregate income after certain
adjustments for intra-group provisions such as debt waivers, dividend distributions,
have been made.

Other group consolidation systems are available with the prior authorisation of the
Ministry of Finance, as follows:

1. “Bénéfice consolidé” – The 50% owned subsidiary consolidation system allows the
   combined reporting of profits and losses of all controlled branches, subsidiaries,
   and partnerships, whether French or foreign.
2. “Bénéfice mondial” – Worldwide tax consolidation allows French corporations to
   include in their French tax return the results of their foreign activities carried out
   by branches.

When shares in a company that will be integrated into the group are acquired by
a group company from individuals or legal entities that control this group, either
directly or indirectly, a portion of the group’s overall financial expense incurred by the
members of the group is progressively added back to the group’s taxable income on a
straight-line basis over a nine year period.
France

**Tax incentives**

**R&D tax credit**
The tax code classifies eligible technical and scientific research operations in three areas: fundamental research, applied research, and experimental development.

The eligible expenditures include:

- Tax deductible depreciation expenses relating to fixed assets, created or acquired newly, and assigned to eligible research and development works/projects, including patents acquired;
- Costs relating to staff qualifying as scientists and/or engineers (staff costs relating to “young graduate doctor” are retained up to 200% of their amounts during the 24 months following their hiring by the company);
- Expenses resulting from outsourced research and development works/projects;
- Expenses incurred for patent registration and/or in connection with the defense of patents;
- Expenses relating to the monitoring of technical developments; and
- Premiums paid in connection with insurance contracts relating to the legal defense of patents.

The R&D tax credit is determined on the basis of the eligible R&D expenses incurred during the calendar year.

Currently, the R&D credit equals 30% of the R&D eligible expenses incurred during the year up to EUR 100 million in eligible R&D expenses and 5% beyond this amount. In addition, eligible R&D expenses incurred by the company can be included in the basis for computation on the tax credit up to 100% of that amount.

Moreover, the 30% “standard” rate is increased to 50% and 40% for the first and the second year, respectively, during which the company incurs eligible R&D expenses, or after the expiration of a period of five consecutive years during which the company did not benefit from the tax credit, provided in both cases, that the concerned company is not affiliated with another company which benefited from the R&D tax credit within the same time period.

**Inward investment**
No particular incentives are available to foreign investors in France. However, the government offers a comprehensive programme of tax incentives and development subsidies to encourage investment in underdeveloped areas.

Capital investment is encouraged through the declining-balance method of depreciation as well as through exceptional depreciation for certain capital expenditure.

**Withholding taxes (WHT)**

Payments to resident corporations and individuals are not subject to withholding taxes.

Payments to non-resident corporations and individuals are subject to withholding taxes, as follows.

France

Explanation of columns

Column 2: Companies not qualifying as parents and individuals are subject to the withholding tax rates as indicated in this column.

Columns 3 and 4: Column 3 indicates the withholding tax rate for dividends paid to a foreign “parent” company. To be considered as a parent company, the foreign company must hold a specified percentage of the French company’s share capital or voting rights. These minimum percentages range from 0% to 50%, as indicated in Column 4, and certain other conditions must be met (see each treaty). If no percentage is indicated, either no minimum shareholding is required, or the tax treaty does not reduce the withholding tax rate of 25%.

From 1992, no withholding tax is levied on dividends paid to an EU parent company by a French company that actually are subject to corporate tax, provided the following is the case:

- The EU parent company has held a minimum percentage of the share capital of the distributing company, directly and continuously for at least two years. From 1 January 2009, with a view to benefiting from the withholding tax exemption, the participation required is 10%;
- The EU parent company is the effective beneficiary of the dividends;
- The EU parent company has its effective seat of management in an EU State and is not deemed to be domiciled outside the EU under an applicable tax treaty;
- The EU parent company is one of the legal forms enumerated by the relevant Directive.
- The EU parent company is subject to corporate income tax in the member State where it has its effective seat of management; and
- There is an anti-avoidance rule.

Column 5: French domestic law exempts interest on most types of debt from withholding tax. Minor exceptions to this general rule include interest on current accounts, claims and certain coupon bonds. French tax treaties often reduce the withholding rate to nil in these situations.

Moreover, as of 1 January 2004, there is no requirement to withhold income tax on interest and royalties paid to EU companies if all the following conditions are met:

- The taxpayer is a French resident company or a French permanent establishment of a company resident in another EU member State;
- The recipient of the income is an EU resident company; and
- The taxpayer and the recipient are at least 25% associates, which means that either one holds directly 25% or more of the share capital or voting rights in the other, or a third party holds directly 25% or more of the capital or voting rights in them both.

Column 7: Withholding tax automatically is imposed on after-tax profits of a permanent establishment unless certain conditions are met. The rate is 25% or the reduced tax treaty rate.

Notes

1. See 1 in “Explanation of Columns 3 and 4”.
2. Exceptions where the dividends are excluded from the taxable income of the company which has received the dividends.
3. A rate of 15% is applicable for dividends distributed by certain companies.
4. The dividend withholding tax rate is eliminated if the recipient owns 15% or more in votes or value of the distributing corporation and is (a) a company regularly traded on either the Japanese or the French stock market, (b) a company more than 50% owned by the government of either country, (c) an individual or a quoted company resident in either country, or (d) any combination of (a), (b), and (c): anti-avoidance rule.
5. The 1929-type Luxembourg holding companies are not entitled to any of the benefits of the France-Luxembourg tax treaty.
6. A 25% rate applies if dividends are not included in the income taxed to either corporate or income tax.
7. No withholding tax applies if dividends are taxable in Morocco.
8. Full or partial exemption is applicable when specific conditions provided by the treaty are met.
9. These are taxed when attached to a permanent establishment in France.
11. The 5% rate applies to dividends when three conditions are fulfilled, as follows. (1) The effective recipient of the dividends must have invested at least EUR 76,224.51 in the company that pays these dividends. (2) The recipient must be a company liable for corporate tax. (3) The latter company must be exempt from corporate tax. The rate is 10% when only condition (1) or conditions (2 and 3) are fulfilled. In all other cases the rate is 15%.
12. An addendum signed on 22 July 1997 modifies the provisions of the French-Swiss tax treaty relating to dividends, interest and royalties, and provides for the removal of the 5% withholding tax on profits realised by French permanent establishments of Swiss resident companies.
13. The rate indicated applies to Swiss resident companies controlled by Swiss residents.
14. The rate indicated applies to Swiss resident companies that are controlled by non-Swiss residents (non-UE) (Article 11.2.b ii) and meet the conditions of Article 14 of the tax treaty. In the case of column 3, the 15% rate applies to these companies, provided both the recipient and the distributing company are not quoted on a stock exchange. If these conditions are not met, the tax exemption applies.
15. The rate indicated applies to Swiss resident companies controlled by non-Swiss residents but not complying with Article 14 of the tax treaty.
16. The 15% rate applies to dividends paid to an industrial company.
17. The 5% rate applies to gross dividends if the effective recipient is a Ukrainian company that holds directly or indirectly at least 10% of the French company’s capital. The rate is 0% if the participation exceeds 50% and EUR 762,245. It is 15% in all other cases.
18. Non-treaty recipients of royalties and management fees are subject to a 33.33% withholding rate. Where a treaty exists, management fees are exempt from withholding tax unless they are included in the definition of royalties subject to withholding tax.
19. In France, the withholding tax is levied on a provisional basis at 25% of the net profit. This amount is reduced to the extent it exceeds the dividends actually paid by the company during the previous 12 months, and the amount of dividends paid to residents of France. Consequently, if the foreign head office undertakes not to distribute dividends in a given year, the after-tax profits of its French branch are not subject to withholding tax, even when they are transferred abroad.
20. Withholding tax on interest on loans with a contract is 0%, while withholding on other interest is in a range from 15% to 50%. For treaty rates, consult the individual entry in the table.
21. The withholding tax rate can be 60% for certain securities if the investor's identity is not disclosed.
22. The withholding tax is levied on the following amount-French net profit divided by the total foreign company net profit, multiplied by the amount of the distribution.
23. The rate of 10% is applicable on royalties for the use of literary, artistic, or scientific works, including films, 25% on royalties for the use of trademarks, and 15% otherwise.
24. Exemption is granted only to recipients actually subject to income tax on the payment in their own country.
25. No withholding tax is applicable on a royalty arising from the use of or the right to use literary, artistic, or scientific works (excluding film).
26. Withholding tax is reduced to 6% for royalties paid for the lease of industrial, commercial, or scientific equipment.
27. A rate of 5% (Cyprus) and 10% (Israel) is applicable on royalties paid for the use or the right of the use of films.
28. Profits realised in France by foreign corporations whose head offices are located in a European country are not subject to withholding taxes if certain conditions concerning
the foreign corporation are met (effective head office in a European country; foreign corporation subject to corporate taxation).

29. No withholding tax is applicable on a royalty arising from the use or the right to use literary, artistic or scientific works.

30. The rate is reduced to 10% in certain circumstances (for equipment or bank loans) mentioned in the treaty, or nil in other circumstances.

31. The rate of 25% is applicable on royalties paid for the use of trademarks.

32. No withholding tax is levied on certain royalties paid in the field of audiovisual techniques.

33. The 5% rate is levied on royalties paid for the use of literary, artistic, and scientific works.

34. The rate of 15% is applicable on royalties paid for the use of industrial property and trademarks.

35. A rate of 33.33% is applicable on royalties paid for the use of or the right to use films.

36. The rate of 5% is applicable on royalties paid for the use of literary, artistic, or scientific works, excluding films.

37. The rate of 33.33% is applicable on royalties paid for the use of literary and artistic works, including films, and for information concerning commercial experience.

38. No withholding tax is levied on royalties paid for the use of or the right to use literary or artistic works, excluding films and recordings.

39. No withholding tax is levied on royalties paid for the use of or the right to use copyrights or films.

40. No withholding tax is levied on royalties paid for the use of or the right to use industrial, commercial, or scientific equipment.

41. The rate of 20% is applicable on royalties paid for the use of trademarks, 15% for the use of industrial property, and 5% for the use of literary, artistic, or scientific works.

42. Taxed in certain circumstances provided by the treaty.

43. No withholding tax is applicable on a royalty arising from the use or the right to use literary, artistic, or scientific works, films, recordings, or computer software.

44. The rate of 5% is applicable on royalties paid for the use of literary, artistic, or scientific works, not including films.

45. The rate of 5% is applicable on royalties paid for the use or the right to use industrial, commercial, or scientific equipment.

46. The reduced rate is applicable if the beneficial owner is a company (other than a partnership).

47. Voting shares solely.

48. French domestic law decreases the withholding tax rate from 25% to 18% concerning individuals who are resident in another EU member state, in Iceland and in Norway.

49. See 49 in Explanation of column 5 above.

**Tax administration**

**Payment of tax**

Payment of tax is made during the fiscal year by way of four instalments totalling 33.33% of the taxable income of the preceding year.

Currently, for companies which have a gross income in excess of EUR 500 million, the last down-payment is now assessed on the basis of the estimated taxable income of the present year (in case of significant increase of the taxable profits in comparison with the previous fiscal year). This modification leads to an anticipated payment of corporate income tax.

**Late payment interest**

For a reassessment after a tax audit, late-payment interest is currently 4.8% per year or 0.4% per month.
The ruling system
To secure the tax status of a situation, foreign companies and individuals can request a private ruling from the French tax authorities as to whether their activities constitute a permanent establishment or fixed base.

The French tax authorities have to provide an answer within three months after the receipt of the request. In the absence of response from the French tax authorities within this period of time, the foreign company or individual will be deemed not to have a permanent establishment in France.

Individual advanced pricing agreements
Advanced Pricing Agreements (APAs) are available for taxpayers only on the basis of international agreements entered into in accordance with Article 25 of the OECD Model Tax Convention. Currently, taxpayers are allowed to enter into APAs with the French tax authorities on a unilateral basis. In practice, taxpayers are entitled to submit their transfer pricing policy to the French tax authorities. Agreement of the tax authorities to the APA precludes a later challenge.

Significant developments

There have been some significant tax and regulatory developments regarding corporate and personal taxation in Gabon.

Law No. 27/2008 dated 22 January 2009 instituted a new tax code in Gabon. The Code became applicable as of May 2009 (except for the provisions relating to payroll taxes which became applicable from 1 January 2010).

The new tax code introduced two sets of rules relating to the form and the substance of the law. Notable changes that the new tax code has introduced include:

- Tax provisions per the former Gabonese tax code;
- Provisions relating to registration duties and stamp duties;
- The last finance bills; and
- The Economic and Monetary Community of Central Africa (CEMAC) provisions as well as the Organisation for the Harmonisation of Business Law in Africa (OHADA) provisions on accountancy.

In substance, the new tax code contains a number of changes concerning the deductibility of expenses and the introduction of more consistent provisions relating to transfer pricing.

Deductibility of expenses

The former Gabonese tax code listed expenses that were permissible deductions (as well as related conditions). Per the new tax code, this list has been replaced by rules to be applied in order to determine the deductibility of an expense. It has also defined the notion of mismanagement (“acte anormal de gestion”), which had not been defined in previous tax laws.

Transfer pricing

New rules concerning transfer pricing have been introduced. All payments considered to be a result of mismanagement will be subject to the corporate income tax rate at 35% plus penalties.

Other changes

The new Gabonese tax code has introduced rules related to tax procedure (“procédures fiscales”), notably when the tax administration performs tax audits and also in the case of misuse by the tax authority (and the collection of tax). Rules relating to tax procedure were not consistent under the former Gabonese tax code. Under the new code, new rules have been introduced relating to:
Gabon, Republic of

- The basis of tax: The new tax code introduces a number of obligations which taxpayers must comply with relating to the preservation of accounting documents;
- The audit of tax: The new tax code introduces a modification to the number of years within which a tax audit may be performed, the framework in which such an audit may take place and rules regarding protection of the taxpayer; and
- The collection of tax: The new tax code introduces rules relating to the administration and recovery of taxes, which includes various sanctions which may be applicable, (e.g., notice to third party, external constraints, blocking of the taxpayer’s bank accounts); and rules relating to litigation and appeal (including identifying various parties).

**Taxes on corporate income**

Corporate tax is assessed on the profits minus deductible expenses and charges. Profits are composed of all operations carried out by enterprises during the period of taxation, including notably fixed assets capital gains.

The rate of the corporate income tax is fixed at 35%.

There is, however, a lower limit, known as the “Impôt Minimum Forfaitaire” (IMF) which is calculated as 1% of the global turnover carried out during the fiscal-year of the taxation, with a minimum of XAF 1,000,000. The tax cannot be less than this amount even in the case of a negative turnover.

New companies are exempt from this minimum tax during the first two fiscal years of their existence.

Companies liable to the corporate income tax must pay the General Tax Office two instalments on 30 November and 30 January. The balance of the due tax must be paid on 30 April. The first instalment must equal one-quarter of the tax assessed the previous year and the second instalment must equal one-third of this tax.

**Corporate residence**

Subject to the provisions of international tax treaties, companies carrying out operations in Gabon are subject to taxation in Gabon.

**Other taxes**

**Value-added tax (VAT)**

VAT is a cumulative tax levied on the sale of goods and the provision of services rendered or used in Gabon.

There are three rates of VAT:

- Standard rate: 18% (applies to all transactions unless otherwise provided for by the law);
- Reduced rate: 10% (applies to manufacturing operations and sales of products mentioned in a limitative list provided by article 221 of the new Gabonese tax code, including mineral water, chicken, sugar, cement, etc.); and
- Zero-rate: 0% (applies to exports and international transports).
Franchise tax (Patente)
Each person who carries on a trade, business or activity that is not expressly exempted is liable to franchise tax. It is a fixed duty established according to a general tariff varying from XAF 10,000 to XAF 500,000, according to the size, nature and location of the company.

Tax on property
Tax on buildings (CFPB) is 15% of the rental value of the building after deduction of 25% for deterioration and maintenance. Tax on non-built property is 25% of the taxable revenue corresponding to 4 to 5% of the rental value or 10% of the purchase value.

Registration duties
Since the publication of the Law No. 27/2008, provisions relating to registration duties are provided by the Gabonese tax code.

Registration duties are fixed, proportional or progressive, depending on the nature of the acts and transfers in question.

Stamp duty
The stamp contribution is levied on all paperwork relating to civil and judicial actions and to documents which could be produced in court as evidence.

All signatories for mutually binding contracts, lenders and borrowers for loans and ministerial officials who receive or modify deeds announcing unstamped deeds or books are jointly responsible for the payment of stamp duties and fines.

Tax on insurance premiums
Insurance or annuity agreements made with insurance companies or any other Gabonese or foreign insurer are subject to an annual obligatory tax.

The tax is levied on the sums charged by the insurer and on any accessory payments made to this party by the insured party according to the following rates:

<table>
<thead>
<tr>
<th>Nature of the policies</th>
<th>Rates</th>
</tr>
</thead>
<tbody>
<tr>
<td>Marine policies</td>
<td>5%</td>
</tr>
<tr>
<td>Life policies</td>
<td>Exempt</td>
</tr>
<tr>
<td>Fire policies</td>
<td>30%</td>
</tr>
<tr>
<td>Other (e.g., personal liability, transportation)</td>
<td>8%</td>
</tr>
<tr>
<td>Reinsurance</td>
<td>Exempt</td>
</tr>
</tbody>
</table>

Social security contributions
Employers must contribute to the social security system (National Social Security Fund or CNSS).

The taxable basis is made up of gross salaries including indemnities having the function of a salary and any benefits in kind.

However, there is an annual ceiling of XAF 18,000,000 or XAF 1,500,000 per month.
The social contributions are determined according to the following rates:

<table>
<thead>
<tr>
<th></th>
<th>Rates</th>
</tr>
</thead>
<tbody>
<tr>
<td>Family allowances</td>
<td>8%</td>
</tr>
<tr>
<td>Industrial accidents (work injuries)</td>

</tr>
<tr>
<td>Hospitalisations</td>
<td>1.5%</td>
</tr>
<tr>
<td><strong>TOTAL</strong></td>
<td><strong>20.1%</strong></td>
</tr>
</tbody>
</table>

**Branch income**

Taxation of branch income is the same as for corporate income. However, a 10% tax on profit is due at the time the profit is taken by the head office of the branch located abroad.

**Simplified tax regime for oil subcontractors**

There is a simplified tax regime specific to the oil sector which is a lump-sum tax regime granted for a triennial period. The rates for the 2009, 2010 and 2011 fiscal years is 8.68% corresponding to corporate income tax (5.6%) and personal income tax for expatriate employees (3.08%).

Features of this specific regime are as follows:

- The option for this regime is irrevocable;
- The option is granted by the Director of the General Tax Office to foreign companies;
- The subcontractor must have signed, with an oil company, a temporary agreement for the provisions of services to this company;
- The option is no longer granted to companies that have been in Gabon for more than nine years. The duration of nine years is calculated from the year during which the company started its activities in Gabon; and
- The subcontractor must constitute a Gabonese branch office.

**Specific regime for regional offices (“quartiers généraux”)**

A regional office is a company or a branch that renders various administrative services such as management or accounting exclusively to other companies of the same group based in a given geographical area (usually a group of countries).

Taxation is based on the expenses of the regional office. A lump rate ranging between 5% and 12% of the operating expenditures is applied to determine the basis taxable to corporate income tax.

**Income determination**

**Capital gains**

Capital gains arising from the transfer of assets must be used for the calculation of taxable profits. However, the tax on capital gains can be deferred if a company reinvests an amount equal to the capital gain and the sale price of the transferred asset back into its fixed assets within three years.
Inter-company dividends
Inter-company dividends are taxed at a reduced rate in full discharge of 10% if paid and received by or from companies with their registered office in a Central African Economic and Monetary Community (CEMAC) country, shares were allotted at the time of issue or kept for two years and the Gabonese company owns more than 25% of the share capital of the subsidiary.

Foreign income
Foreign interest, royalties and dividends are included in the taxable income, subject to international tax treaties (some treaties state that certain/all types of income listed are not includable in Gabon taxable income).

Deductions

Depreciation and depletion
The straight-line method and accelerated depreciation are permitted. Tax and book conformity is obligatory. Annual depreciation must be booked to preserve tax deductibility.

The main depreciation rates provided by the Gabonese tax code are the following:

<table>
<thead>
<tr>
<th>Nature of the assets</th>
<th>Rates</th>
</tr>
</thead>
<tbody>
<tr>
<td>Buildings</td>
<td>8%</td>
</tr>
<tr>
<td>Machinery, equipment</td>
<td>From 8% to 20%</td>
</tr>
<tr>
<td>Office furniture</td>
<td>15%</td>
</tr>
<tr>
<td>Office equipment</td>
<td>20%</td>
</tr>
<tr>
<td>Vehicles</td>
<td>From 20% to 33.3%</td>
</tr>
<tr>
<td>Computing equipment</td>
<td>From 25% to 33.3%</td>
</tr>
</tbody>
</table>

Net operating losses
There is a three-year carryforward for net operating losses (NOL). Depreciation deferred in the accounts can be carried forward indefinitely.

Payments to foreign affiliates
Management fees paid to a foreign parent company are deductible under the following conditions: (1) they reflect real transactions, (2) they do not present an abnormal characteristic, and (3) they are not exaggerated. Management fees determined in a lump sum basis are not deductible.

Interests paid to shareholders are deductible only within the limit of the Central Bank's (BEAC) normal rate for advances plus two percentage points, on the condition that the registered capital is entirely paid. The portion exceeding the ceiling is not deductible and is thus subject to taxation.

Other significant items
1. Legal reserve: 5% of net profit must be transferred to a special reserve until it equals 10% of the share capital.
2. To be tax deductible, provisions must relate to existing liability or loss. General provisions are not deductible.
3. Fines and third-party taxes borne by companies are not tax deductible.
Gabon, Republic of

**Group taxation**

Group taxation is not permitted.

**Tax incentives**

**Tax credits for job creation**

There is a mechanism in place for granting corporate tax credits for any salaried appointments of Gabonese personnel.

This tax credit is equal to 20% of the gross salary paid to new employees, and is subject to the creation of a minimum number of jobs, according to the size of the company:

- Two jobs, for companies with less than 20 employees;
- Three jobs, for companies with 20 to 50 employees; or
- Five jobs, for companies with more than 50 employees.

Note: The tax credit is granted only on newly created jobs since the preceding fiscal year subject that the contracts concluded with the employees are for an undetermined duration and that the new jobs do not result from the diminution of existing jobs.

**Inward investment**

The Investments Law in force in Gabon is a result of Law No. 15/98 of 23 July, 1998.

It comprises an Investments Charter by which the Republic of Gabon reaffirms its commitment to a strategy of economic and social development based on the expansion of the private sector.

Due to the provisions of the Investments Law, any private investment in Gabon can benefit from:

- A common law framework;
- Privileged frameworks; and
- Specifically agreed frameworks.

Depending on the frameworks it is eligible for, a company can benefit from customs privileges and tax breaks.

**Capital investment**

New companies are exempt from the minimum taxation of corporate income tax during the first two years of operations.

**Withholding taxes (WHT)**

**10% WHT**

This tax is due on the amounts listed in article 206 of the new Gabonese tax code when they are paid by a debtor established in Gabon to individuals or companies subject to corporate income tax or personal income tax that do not have a permanent professional base in Gabon.
This tax notably concerns sums paid as a remuneration of all types of services which have been substantially provided or used in Gabon, as well as payments such as industrial property royalties and interests to non-resident foreign individuals or companies.

Net profits carried out by branches of foreign companies having their head offices abroad are also subject to a 10% withholding tax in Gabon before they are taken into account by the foreign companies.

**Transferable securities income tax (IRCM) at rate 15%**
This tax is due on revenues from stocks and shares paid to legal entities. It is due by beneficiaries of these revenues and must be withheld by the distributing company.

**Tax treaties**
Tax treaties provide that certain/all types of income are not includable in Gabon taxable income. Gabon has tax treaties with France, Belgium, the other countries of CEMAC (former UDEAC) and the African and Malagasy Common Organisation (OCAM).

**Tax administration**

**Returns**
Returns (statistical and fiscal declaration or DSF) for the previous calendar year are to be filed before 30 April of each year. Companies are required by law to have a 31 December closing of any fiscal year.

**Payment of tax**
Tax is payable in two instalments on 30 November and 30 January, the balance of the tax being paid on 30 April.

Corporate income tax has to be paid by Gabonese public limited companies (SA), limited liability companies (SARL), Gabonese branches of foreign companies and all permanent establishments in Gabon.

**Significant developments**

To attract foreign investment, the Georgian government has reduced tax rates on passive income:

- The tax rate on dividends paid to non-residents is 5%. The rate will reduce to 3% from 1 January 2011 and to 0% from 1 January 2012; and
- The tax rate on interest paid to non-residents is 5%. The rate will reduce to 0% from 1 January 2011.

The government introduced the concept of a free industrial zone (FIZ) in 2008. Various tax and duty exemptions are available to businesses located in a FIZ.

**Taxes on corporate income**

The corporate income tax (CIT) rate is 15%. Taxable profit is defined as gross income minus deductible expenses.

**Corporate residence**

A resident enterprise is any legal entity that is established under the laws of Georgia or has its place of effective management in Georgia. Resident enterprises are subject to tax on worldwide income.

**Other taxes**

**Value-added tax (VAT)**

The standard rate of VAT is 18% and applies to the sale of all goods and services supplied in Georgia. Goods are considered to be supplied in Georgia if they are transferred in or their shipment originates in Georgia. Services generally are considered to be supplied in Georgia if they are performed in Georgia. However, special rules apply for services relating to immovable property and certain services provided to non-residents.

Zero rating applies to exported goods and international transportation. VAT-exempt supplies include financial services, goods and services required for oil and gas operations, and medical services.

Reverse-charge VAT applies to services provided to Georgian taxpayers by a non-resident entity.
A taxpayer is a person who is registered or required to be registered as a taxpayer. Any person whose annual taxable turnover exceeds GEL 100,000 in any continuous period up to 12 months or who produces or imports excisable goods must register as a taxpayer. In addition, an enterprise that expects to perform one-off taxable transaction of more than GEL 100,000 must also register as a VAT payer before effecting the transaction.

**Property tax**
Property tax is payable at the rate of 1% on the annual average residual value of fixed assets (except for land) on the balance sheet of Georgian entities or foreign entities with taxable property in Georgia. For property acquired before 2005, the average residual value must be multiplied by a coefficient of between one and a half and three, depending on the acquisition date.

**Land tax**
Land tax rates per square metre depend on the use of the land plot (urban and non-urban) and its location. The base tax rate is GEL 0.24 per square metre.

**Excise tax**
Excise tax is levied on specified goods that are produced in Georgia or imported. Excise tax generally is calculated with reference to the quantity of goods (e.g., volume, weight), or in the case of automobiles, on the basis of the engine's displacement and vehicle age.

Excise tax applies to the following goods:

- Alcoholic drinks;
- Condensed natural gas, except for pipeline;
- Oil distillates;
- Goods produced from crude oil;
- Tobacco products;
- Automobiles; and
- Ferrous and nonferrous metal scrap.

The export of excisable goods is taxed at 0%, with the exception of the export of ferrous and nonferrous metal scrap.

**Branch income**
Branch income is taxed at the general rate of 15%. There is no tax on branch profit remittances.

**Income determination**
Taxable profit is determined as the difference between the gross income of a taxpayer and the relevant deductions granted under the Georgian tax code. A foreign enterprise carrying out economic activities in Georgia through its permanent establishment (PE) is considered a taxpayer with respect to its gross income earned from Georgian sources, which can be reduced by deductions attributable to such income.
Georgia

**Deductions**

**Expenses**

Expenses connected with the receipt of income generally are deductible from income, provided sufficient primary documentation is available.

The following expenses are not deductible:

- Expenses not related to the generation of income (such as tax fines and penalties);
- Expenses related to the receipt of income exempted from corporate tax.

The deduction of certain expenses is subject to limitations, including:

- Representation expenses are deductible up to 1% of gross income;
- Charitable donations are deductible up to 8% of taxable profit; and
- Repair expenses are directly deductible up to 5% of the book value of the relevant asset at the end of the year. Any excess must be capitalised and deducted through depreciation.

**Interest paid on loans**

Interest paid on loans is deductible up to a 30% annual interest rate (this will reduce to 24% in 2011).

Georgia currently has no thin capitalisation rules in force. However, new rules will apply from 1 January 2011. Interest expense may be disallowed if a company’s debt-to-equity ratio exceeds 3:1. The thin capitalisation rules will not apply to financial institutions, entities that have gross income of less than GEL 200,000, and entities with interest expense that is less than 20% of their taxable income before deducting such interest expense.

**Bad debts**

A taxpayer is entitled to deduct bad debts only if the following conditions are all met:

- The bad debt is related to the taxpayer’s goods or services sold;
- Income received from the sale of goods or services was previously included in taxable gross income; and
- The bad debt has been written off and recorded as such in the taxpayer’s accounting records.

**Depreciation**

The declining balance method of depreciation applies to fixed assets for tax purposes. The maximum rate of depreciation is 20% for most fixed assets; though buildings and construction are subject to depreciation at the rate of 5% (there are other groups and rates – please contact us for additional information).

The taxpayer is entitled to fully deduct costs of purchased, produced or leased fixed assets in the year when the fixed assets are put into operation (a form of capital allowance). In case the taxpayer employs the right of full deduction in this manner, this method should not be changed for five years.
**Losses**
Losses may be carried forward for five years but may not be carried back.

A taxpayer may elect to extend the period to 10 years. However, this also results in the statute of limitations period being extended from six to 11 years.

International financial companies, free warehouse enterprises and international enterprises are not entitled to carryforward losses.

**Leasing**
If assets are transferred under a financial lease, the lessee is treated as the owner of the assets for tax purposes (i.e., if assets are on the lessee’s balance sheet, the lessee pays property tax on the assets and may deduct depreciation). A lease is characterised as a financial lease if any of the following requirements are met:

- Title of ownership to the leased assets is transferred to the lessee at the end of the lease period;
- The lease term exceeds 75% of the economic life of the assets;
- The expected residual value of the leased assets at the end of the lease period is less than 20% of the market value of the leased assets; and
- The current discounted value of payments for the lease period equals or exceeds 90% of the value of the leased assets.

New rules apply for assets leased from 1 January 2010. Financial leasing will be treated in the same manner as operational leasing, provided the following conditions are met:

- The discounted value of income generated from leasing applying a 15% discount rate should not be less than the difference between the present value of the asset and its expected residual value;
- At the end of the lease term, the lessee may acquire the leased asset at its residual value, which may not be higher than 15% of the asset’s fair market value at the beginning of the lease term; and
- At the end of the financial lease of the leased fixed asset may not be disposed for a price lower than the asset’s residual value.

**Offsetting taxes paid abroad**
Income tax or profit tax paid on income earned from outside Georgia may be credited against tax payable in Georgia. The amount of credited taxes may not exceed the Georgian tax payable on the foreign income.

**Group taxation**
There is no group taxation in Georgia.

**Tax incentives**
The following are exempt from profit tax (the list is not exhaustive):

- Income of budgetary, international and charitable organisations (including grants, membership fees and donations), except for the profit from commercial activity;
- Profit received from financial services conducted by international financial companies;
Georgia

- Gains on sales of securities issued by international financial companies; and
- Income received from reexporting goods from an independent warehouse via a free warehouse enterprise.

**Free industrial zone (FIZ)**
The following rules apply for enterprises located in a FIZ:

- Income received by an international enterprise from its permitted activities conducted in a FIZ is exempt from income tax;
- The importation of foreign goods into a FIZ is free of customs duties and VAT-exempt;
- Operations carried out in FIZ are VAT-exempt;
- Property located in FIZ is exempt from property tax; and
- The personal income tax of employees is paid by those individuals through self-reporting.

**Withholding taxes (WHT)**

Foreign legal entities earning income from Georgian sources, other than through a PE, are subject to WHT at the following rates:

<table>
<thead>
<tr>
<th>Source of Income</th>
<th>Withholding Tax Rate</th>
</tr>
</thead>
<tbody>
<tr>
<td>Dividends (reducing to 3% from 1 January 2011)</td>

<td>10%</td>
</tr>
</tbody>
</table>

**Tax administration**

A corporate tax return should be submitted and any taxes paid before 1 April of the year following the reporting period.

CIT is paid in advance in equal instalments on a quarterly basis before the fifteenth day of the month following the end of the previous quarter. The advance instalments are estimated according to the previous year’s annual tax. A taxpayer with no prior-year corporate tax obligation is not required to make advance payments. Excess corporate tax payments may be offset against other tax liabilities.

The tax treatment of foreign legal entities is of the same as for local companies.

The tax departments under the Ministry of Finance are responsible for administrative matters.

Significant developments

A new coalition government took office in the last quarter of 2009. It caused parliament to enact a number of specific measures for 2010 – mainly in reaction to the worldwide financial crisis – but otherwise has announced that for the next four years priority is to be given to a return to financial and budgetary stability, rather than to any major reform of the tax system. In particular, there will be no tax cuts before 2013. The main corporate tax measures enacted were:

• The suspension of the curtailment of loss relief provisions to enable corporate recovery of a troubled business in 2008 and 2009 has now been extended indefinitely. The same curtailment provisions have been repealed for reorganisations solely within groups and otherwise to the extent the loss carryforward is covered by hidden reserves in German assets other than shareholdings;
• The interest limitation threshold of EUR 3 million for 2008 and 2009 has now been prolonged indefinitely. Unutilised taxable EBITDA (earnings before interest, tax, depreciation and amortisation) above this threshold may now be carried forward; and
• The deemed implicit interest charge in property rentals has been reduced from 65% to 50% of the rent paid. The amount of rental disallowed for trade tax, thus, falls from 16.25% of the total to 12.5%.

The Accounting Modernisation Act, an accounting reform, was enacted in 2009, intended as a simpler alternative for – in particular – unquoted companies to full International Financial Reporting Standards (IFRS) statements. From the tax point of view, the most radical change is the abolishment of the strict requirement for conformity between book and tax reporting. This has been replaced by a provision allowing a company to exercise all options permitted under the tax acts in its own tax interest without regard to the accounting treatment for the item in question. As a consequence, full deferred tax accounting is now mandatory. The Accounting Modernisation Act must be applied to accounting years ending in 2010. Application of this act is permitted but not required for 2009. IFRS statements remain mandatory for the published group accounts of quoted companies, whilst the Accounting Modernisation Act statements are the basis for the tax returns of all companies.
Germany

Taxes on corporate income

Corporation tax (Körperschaftsteuer)
German business profits are subject to two taxes, corporation tax and trade tax. Corporation tax is levied at a uniform rate of 15% and is then subject to a surcharge of 5.5% (solidarity levy).

Trade tax (Gewerbesteuer)
The effective rate of trade tax varies by location from a minimum of 7%, which is the legal minimum and applies in a few small villages in depressed areas, to the Munich rate of 17.1%. The local rates in most cities range between 14% and 16%, whilst those in small towns can be as low as 12%. The basis for this tax is the adjusted accounting profit: in particular 25% of all financing costs over EUR 100,000, including the implicit financing costs in leasing, rental and royalty payments, is added back to taxable income.

If the basis for the two taxes is identical (unlikely in practice), the overall burden on corporate profits earned in Munich would be 33%. In Frankfurt the burden would be 31.9% and in Berlin 30.2%.

Corporate residence
A corporation is resident in Germany for tax purposes if either its place of incorporation or its main place of management is in Germany.

Germany taxes its corporate residents on their worldwide income.

Value-added tax (VAT)
Proceeds of sales and services effected in Germany are subject to value-added tax under the common system of the EU at the standard rate of 19% (7% on certain items, such as food and books). The taxpayer generally is entitled to deduct the VAT charged on his inputs from that payable on his outputs.

Excise taxes
Excise taxes on fuel, electric power, insurance, and some other products are not a compliance issue for businesses other than dealers in bonded goods and insurance companies, although they can be a significant additional cost factor for business users. These excise taxes also have an environmental element in as much as the rates are set to discourage excessive use of pollutants. There is, however, no tax on pollution as such. Energy producers (such as power stations) can claim a refund of the excise tax borne in the cost of the energy products used in the production process.

Social security contributions
All employers are required to account for social security contributions on wages and salaries paid up to set monthly limits. There are four separate insurances for old-age pensions, unemployment benefits, health and invalidity care. Employees regularly earning more than EUR 4,162.50 per month can opt out of the health and invalidity insurances provided they take out appropriate cover with a private insurance company. The pension and unemployment insurances are compulsory for all employees. The upper monthly salary limits are EUR 5,500 (EUR 4,650 in the eastern part of Germany) for the pension and unemployment insurances and EUR 3,750 for the health and invalidity risks. The rates are:
Germany

- Pension insurance 19.9% – of which one-half is borne by the employee by salary deduction;
- Unemployment insurance 2.8% (employee’s share is 1.4%);
- Health insurance 14.9% (7.9% employee’s share); and
- Invalidity insurance 1.95% (employee’s share is one-half).

There is also an additional charge of 0.41% (up to a monthly salary limit of EUR 5,500) on the employer alone to protect the insurance institutions from the risk of lost contributions on employer insolvency.

**Real estate transfer tax**
Real estate transfer tax is levied at 3.5% of the consideration on all conveyances of German property.

It is also levied on indirect transfers from the acquisition of at least 95% of the shares in property owning companies. This applies to shares in the shareholder throughout the corporate chain. If the transfer is indirect, and therefore without its own specific consideration, the basis for the tax is 12.5 times the annual rentable value. This value is derived from rents actually achieved over the past three years or estimated from statistics maintained by the local authority.

The tax is not levied on direct or indirect transfers without consideration in the course of a corporate reorganisation under the laws of a member state of the EEA (European Economic Area), provided at least 95% of the ultimate interest in the property remains unchanged for five years before and after the transaction.

Real estate transfer tax is currently under attack before the Constitutional Court.

**Customs duties**
Customs duties are levied under a common system on imports into the EU. The rate is set at zero on most imports from EU candidate countries and on many from countries with which the EU has an association agreement. For manufactured produce from other countries the rates generally lie within the range of 0-10%. The basis is the import value of the goods and thus includes uplifts for royalty or other payments associated with their use but not apparent from the transit documents. The European Commission also sets “countervailing” duties from time to time on specific imports from specific countries in order to counter dumping attempts. The countervailing duty rate is set to fully absorb the dumping margin and is therefore usually much higher than 10%.

**Branch income**
Both corporation tax and trade tax are imposed on the taxable income of a foreign company’s German branch. The rates are the same for branches as for resident German companies, although the withholding tax on dividend distributions by German companies is not deducted from profits transferred by a German branch to its foreign head office.
Germany

**Income determination**

**General**
Strict conformity between book and tax reporting is no longer required, once the Accounting Modernisation Act takes effect (generally for 2010). Rather, a company must draw up its financial statements according to the dictates of fair presentation, but may exercise all valuation and other options in the tax acts in its own best tax interest without regard to the accounting treatment for the item concerned. IFRS financial statements are not accepted as a basis for computing taxable income.

**Inventory valuation**
Inventories normally are valued at the lowest of actual cost, replacement cost and net realisable value. However, any write-downs below actual cost must be for specific reasons. If specific identification of the inventories is not possible, valuation at either standard or average cost is acceptable. The last-in, first-out (LIFO) method is accepted as an option. First-in, first-out (FIFO) is not accepted unless its assumption accords with the facts, although in practice the condition is often fulfilled.

**Long-term liabilities and accruals**
Non-interest bearing long-term liabilities, other than advance payments received, must be discounted at 5.5% per year. A similar provision applies to refurbishment (to restore an asset to its original condition) and other accruals which accumulate over time.

**Capital gains**
Generally, capital gains realised by a corporate entity from a disposal of business assets are treated as ordinary income. It is possible to postpone the taxation of part or all of the gain on real estate by offsetting the gain against the cost of a replacement property.

Capital gains from the sale of investments in other companies are exempt from corporation and trade taxes. Corresponding losses are not deductible. However, 5% of the capital gains are added back to taxable income as non-deductible directly related expenses.

**Dividends**
Dividends received are exempt from corporation and trade taxes, regardless of the level of shareholding and the length of time it has been held. However, portfolio dividends are subject to trade tax. 5% of the tax-free gross dividend is added back to taxable income as non-deductible business expenses. Banks do not enjoy this exemption on dividends from securities held for trading.

**Foreign income**
Foreign income, except dividends, received by a German corporation from foreign sources, is included in taxable income for corporation tax unless a tax treaty provides for exemption. Foreign permanent establishment income, in most cases, is exempt from corporation and trade taxes, whilst double taxation on most items of passive income (e.g., interest and royalties) is avoided by foreign tax credit or, at the taxpayer’s option, by a deduction of the foreign taxes as an expense.

Irrespective of any tax treaty, income from a foreign branch or partnership is not charged to trade tax.
A Foreign Tax Act sets anti-avoidance (including CFC) rules with respect to subsidiaries in certain lines of business subject to a low-tax regime. A low tax regime is one in which the rate applicable to the income in question is less than 25%. Most forms of passive income fall under the CFC rules, which essentially attribute it to the German shareholder as though he had earned it directly. Active business income is not generally caught where the business operates from properly established facilities. Investment income held in an EU/EEA subsidiary (except Liechtenstein) is also exempt from attribution, provided the subsidiary is commercially active in its country of operation and maintains at least a minimum establishment.

Other provisions give the tax office the right to insist on full disclosure of all the facts and circumstances surrounding a transaction as a condition for the deduction of a business expense incurred within an essentially tax-free environment for the supplier. This rule operates independently of ownership or shareholding considerations.

Stock dividends
In principle, a declaration of stock dividends (by converting reserves to capital stock) by a company will not lead to taxable income for the shareholder or to other tax effects. Subsequent capital reductions, however, will be treated as cash dividends in most circumstances. There is no German tax reason for distributing a stock dividend as opposed merely to leaving accumulated profits on the books to be carried forward. The decision, therefore, depends upon the situation in the investor’s home country.

Deductions

Depreciation, amortisation and depletion
Depreciation on movable fixed assets is calculated on the straight-line method over the asset’s anticipated useful life. The declining balance method is not available for assets acquired in 2008, although it may be continued for additions up to 31 December 2007. The option was reintroduced for movable fixed assets capitalised in 2009 and 2010 at a maximum of two and a half times the straight-line rate, but in no case to exceed 25%. Depreciation takes the residual value of the asset into account, only if it is material, with any gains on a sale being treated as normal business income.

Buildings are amortised on a variety of straight-line or reducing rate systems designed to reach a full write-down between 25 and 50 years, depending on the age of the building and on whether the taxpayer was its first owner.

Intangibles are amortised straight-line over their estimated useful lives with goodwill over 15 years.

In addition to normal depreciation, special depreciation is deductible for tax purposes in certain limited circumstances (small businesses, ancient monuments, buildings in designated renovated city zones).

Interest limitation
Annual net interest expense (the excess of interest paid over that received) is only deductible up to 30% of EBITDA for corporation and trade tax purposes. The 30% limitation applies to all interest, whether the debt is granted by a shareholder, related party or a third party.
This limitation does not apply where the total net interest expense for the year is less than EUR 3 million or where the net amount paid to any one shareholder of more than 25% (or his related party) is no more than 10% of the total. If the company is part of a group, this latter concession is dependent on the demonstration that the equity to gross assets ratio of the company is no more than two percentage points below that of the group as a whole. Unused EBITDA potential may be carried forward for up to five years to cover future excess interest cost. This carryforward is otherwise subject to the same principles as the loss carryforward, including the curtailment of the carryforward on change of shareholder(s).

It is emphasised that the interest limitation is additional to, and not a substitute for, the transfer pricing requirement that related party finance be at arm's length.

**Net operating losses (NOLs)**

NOLs are carried forward without time limit. For corporation tax (but not trade tax), there is an optional carryback to the previous year of up to EUR 511,500. The loss relief brought forward claimable in any one year is limited to EUR 1 million plus 60% of current income exceeding that amount. The remaining 40% of income over EUR 1 million is charged to trade and corporation taxes at current rates. This is referred to as “minimum taxation”. The loss carryforward ceases, if a single (immediate or ultimate) shareholder acquires more than 50% of the issued capital (voting rights) within a five year period.

An acquisition of between 25% and 50% leads to a corresponding reduction in the loss carryforward. These forfeiture rules do not apply to share acquisitions in connection with the recovery of a troubled business, where the change is part of a group internal reorganisation without effect on the single ultimate shareholder, or inasmuch as the loss carryforward is covered by hidden reserves in the company's assets that, on realisation will lead to German taxation. This excludes the appreciation in value of shareholdings in other companies as well as business assets held in foreign permanent establishments.

**Payments to foreign affiliates**

A German corporation can claim a deduction for royalties, management service fees and, subject to the interest limitation, interest charges paid to foreign affiliates, provided the amounts are at arm's length. Detailed provisions covering both form and substance define this. In particular, all services must be covered by prior written agreement, and it is also necessary to conclude agreements for the purchase and sale of goods in writing where this would be usual between third parties (e.g., for quantity rebates on sales). The substance tests must be satisfied, both as to value for money and as to business relevance. Thus the manager of a German subsidiary must be able to show both an adequate business benefit from a related party transaction and that the company could not have got a better deal on the open market. These and all other aspects of inter-company (related-party) trading fall under strict and extensive documentation requirements, breach of which can lead to serious penalties.

**Taxes**

All taxes borne are deductible except for corporation tax, trade tax, and VAT on non-deductible expenses. Late payment interest and similar charges are also not deductible.
**Special features for trade tax**
There are a number of differences between the income subject to trade tax and to corporation tax.

The most significant are the trade tax disallowance of one-quarter of the interest costs, including interest included implicitly in leasing, rental and royalty charges. Banks have an exemption from this interest disallowance.

**Group taxation**
If a German parent holds more than 50% of the voting rights in a domestic subsidiary, the two may conclude a formal, five-year, court registered profit pooling agreement. The ensuing relationship is then referred to as an *Organschaft*. Effectively, the annual results of an *Organschaft* are pooled in the accounts and tax returns of the parent. Profits and losses within a group, can therefore, be offset, but there is no provision for the elimination of intra-group profits from the total tax base.

**Tax incentives**
Germany does not offer tax incentives except in very limited circumstances, not usually of direct business relevance (e.g., special depreciation for buildings under a conservation order). Partly, this is a question of the state budget, partly it reflects the constitutional requirement for equal treatment for all taxpayers.

**Other incentives**
Investment grants of 10% or 20% are available on capital investment in new manufacturing facilities or hotels in the eastern part of Germany. The system is to be phased out by 2013.

Local authorities may offer facilities on favourable terms, such as the provision of cheap land on industrial estates.

**Withholding taxes (WHT)**
Domestic corporations paying certain types of income are required to withhold tax as shown in the following tables. There is also a solidarity levy of 5.5% on the tax due.

Notes

1. Corporate recipients of dividend and interest income (interest on convertible and profit-sharing bonds) can apply for refund of the tax withheld over the corporation tax rate of 15% regardless of any further relief available under a treaty.

2. Generally, only interest paid by banks to a resident is subject to a withholding tax. 25% tax is also withheld from income on convertible or profit-sharing bonds.

3. Interest paid to non-residents other than on convertible or profit-sharing bonds is generally free of withholding tax. Tax on loans secured on German property is not imposed by withholding, but by assessment to corporation tax at 15% (plus solidarity levy) of the interest income net of attributable expenses. The tax authorities can order a withholding tax of 15.825% (including solidarity levy) if ultimate collection of the tax due is in doubt. Both forms of tax are reduced by treaty relief.

4. Movable asset rentals are taxed by assessment rather than by withholding. For corporations, the rate is the standard 15% corporation tax rate (plus solidarity levy) unless reduced by treaty.

5. Where the EC Parent/Subsidiary Directive applies, dividends paid by a German company to a qualifying parent company resident in another EU member state are exempted from German withholding tax. The minimum shareholding is 10%, to be held continuously for at least one year.

6. The EC Interest and Royalties Directive exempts payments from withholding tax, if made to an associated company in another EU member state. The association must be through a common shareholding of at least 10%, to be held continuously for at least one year.

### Notes

1. Corporate recipients of dividend and interest income (interest on convertible and profit-sharing bonds) can apply for refund of the tax withheld over the corporation tax rate of 15% regardless of any further relief available under a treaty.

2. Generally, only interest paid by banks to a resident is subject to a withholding tax. 25% tax is also withheld from income on convertible or profit-sharing bonds.

3. Interest paid to non-residents other than on convertible or profit-sharing bonds is generally free of withholding tax. Tax on loans secured on German property is not imposed by withholding, but by assessment to corporation tax at 15% (plus solidarity levy) of the interest income net of attributable expenses. The tax authorities can order a withholding tax of 15.825% (including solidarity levy) if ultimate collection of the tax due is in doubt. Both forms of tax are reduced by treaty relief.

4. Movable asset rentals are taxed by assessment rather than by withholding. For corporations, the rate is the standard 15% corporation tax rate (plus solidarity levy) unless reduced by treaty.
5. The treaty does not (effectively) limit the taxation of profit-based interest income; thus the domestic rate (plus solidarity levy) applies.
6. The USSR treaty continues in force with Armenia, Moldova and Turkmenistan.
7. The lower royalty rate applies to commercial and industrial, as opposed to cultural, royalties.
8. Mortgage interest to a Belgian business is exempt unless the recipient holds at least 25% of the voting rights in the payer.
9. The Yugoslav treaty continues in force with Bosnia-Herzegovina, Macedonia and Serbia. Its applicability to Montenegro is still awaiting clarification.
10. The higher royalty rate applies to film and TV royalties, licenses to use trademarks and names, and to franchises.
11. The 5% royalty rate applies to films and TV.
12. The Czechoslovak treaty continues to apply to the Czech Republic and to Slovakia. Interest on profit-sharing bonds is taxed as a dividend.
13. The tax on trademark royalties is also subject to solidarity levy.
14. The higher royalty rate of 5% applies to commercial, industrial and scientific royalties.
15. There is no treaty relief for copyright or trademark royalties, except for those on films and TV.
16. There is no treaty relief for copyright royalties, except for those on films and TV.
17. Interest to banks is exempt. Otherwise, tax is levied at the domestic rate (including solidarity levy) without treaty relief.
18. Cultural royalties are exempt.
19. Interest on convertible and profit-sharing bonds taxed as a dividend; mortgage interest is exempt.
20. The 15% royalty rate applies to copyrights.
21. Treaty relief on interest, royalties and rentals is conditional on taxation in country of receipt.
22. The 5% royalty rate applies to copyrights.
23. Royalties for copyrights, except for films and TV are exempt.
24. The 10% interest rate applies in certain circumstances where the recipient is a bank.
25. The 15% royalty rate applies to patents, trademarks, films and TV.
26. The former UEA treaty expired on December 31, 2008. A new treaty has been initialled, but not yet signed or published. On ratification, it is to have retroactive effect to January 1, 2009.
27. The dividend exemption applies to corporate shareholders with at least 80% throughout the previous 12 months.
28. The 5% royalty rate applies to industrial, commercial, film and TV royalties.
29. The 10% royalty rate applies to access to industrial, commercial or scientific experience.

**Tax administration**

**Returns**
Returns are filed for each calendar year and reflect the financial statements for the business year ending in that calendar year. Assessments are issued once the tax office has reviewed the return.

**Electronic returns**
Monthly or quarterly returns for withholding taxes from employee salaries, dividends, interest, royalties and other payments and for VAT must be submitted electronically. Electronic filing of the annual returns for trade tax, income tax and VAT is encouraged, but is not yet required. For corporation tax, it is not yet available, though it will be required for 2011.
Germany

Payment of tax
Taxes are payable in quarterly instalments during the year, with a final settlement when the assessment is issued. The quarterly instalments are based on the estimated ultimate liability. Usually, this is the total tax due shown by the last assessment issued as adjusted by any rate changes in the meantime. The corporation tax instalments are due on the tenth of March, June, September and December. For trade tax, the due dates are the fifteenth of February, May, August and November. Failure to pay by the due date followed by three days of grace leads to a penalty of 1% per month.

Corporation and trade tax assessments bear interest on the net amount payable after deduction of all credits and previous payments. The rate is 0.5% per month simple interest and the period runs from 1 April of the second year following the year of assessment. Interest on a corporation tax assessment for 2008, for example, runs from 1 April 2010, though only on amounts unpaid by that date. The interest period is independent of the actual date of assessment. It thus runs in retrospect on assessments issued later, for example following a tax audit.

Value-added tax (VAT)
VAT is administered by the tax office responsible for the corporation tax assessment of a company. It is based on returns filed monthly or quarterly by the tenth of the following month (monthly where the output tax in the previous year was more than EUR 7,500) drawn up on the basis of the actual transactions during the filing period as shown in the books of account. A permanent filing extension of one month is available against an advance payment of one-eleventh of the total net tax due during the previous year. Otherwise, payment is due when the return is filed.

Legally, VAT is an annual tax. Each taxpayer must file an annual return for each calendar year, regardless of the actual accounting date for the business. Filing is together with the corporation and trade tax returns. If the annual return does not agree with the total of the monthly or quarterly returns, the tax office can be expected to ask for a detailed explanation and to penalise any irregularity.

Rulings
Tax offices are able to issue binding rulings in respect of planned transactions provided the taxpayer can show a particular interest in the tax consequences of the intended action. The fee varies between EUR 121 and EUR 91,456, depending upon the amount of tax involved.

Advance pricing agreements (APA)
A taxpayer can request the Central Tax Office to negotiate an APA on related-party transactions with a foreign tax authority on his behalf. The vehicle is the mutual agreement procedure under the treaty and the fee is a lump sum EUR 20,000 for each new agreement.

Significant developments

Other tax enactments are also contained in the Internal Revenue Regulations, 2001 (legislative instrument or L.I. 1675), 2002 (L.I. 1698), 2003 (L.I. 1727), 2004 (L.I. 1803), 2005 (L.I. 1811), 2006 (L.I. 1820), and 2007 (L.I 1831).

The recent budget for 2008 contained minor changes which have been enacted by Parliament. These changes related mainly to penalty amounts and branch profit tax, which is now classified as a final tax.

Taxes on corporate income

National income tax is payable on the following:

1. Income accruing in, derived from, brought into or received in Ghana in respect of gains or profits from a trade, business, profession or vocation;
2. Dividends, interest or discounts;
3. Any charge or annuity;
4. Royalties, premiums and any other profits arising from property, including rents; and
5. Receipts, including royalties and deferred payments of any kind.

The corporate tax rate is 22% (this rate is applicable for three years for companies listed after 1 January 2004) for companies listed on the Ghana Stock Exchange (GSE), and 25% for companies that are not listed. The rate for companies engaged in non-traditional export and rural banking is 8% after 10 years (due to a special exemption); bank lenders to the agricultural and leasing sectors pay 20% corporate tax; and companies in the hotel industry pay 25%.

Corporate residence

Corporate residence is determined by the place where the trade, business, profession or vocation is carried on. Hence, where a non-resident corporate body carries on any trade, business, profession or vocation in Ghana (part of the operations of which may be carried on outside Ghana), the full gains or profits of the trade, business, profession or vocation are deemed to be derived from Ghana.
If the corporate body's activities are carried on entirely outside Ghana, the mere supply of goods or services to Ghana does not constitute carrying on trade or business in Ghana.

**Other taxes**

**Gift tax**
The gift tax rate is nil up to GHC (Ghana Cedi) 50 and 5% thereafter, where the value of the gift exceeds GHC 50.

**Value-added tax (VAT)**
Service tax/entertainment; betting; hotel accommodation and food; food served in restaurants and snack bars; and advertisements, which formerly attracted a 15% service tax, are now subject to VAT at a rate of 12.5% and a national health insurance levy (NHIL) of 2.5%. Most professional services are also subject to the same VAT and NHIL rates, including the following:

- Management services;
- Insurance brokerage and other services;
- Financial, tax and economic consulting;
- Engineering and technical services;
- Accounting services;
- Courier services;
- Legal services;
- Provision of satellite television;
- Architectural services;
- Mobile cellular phone services; and
- Services rendered by surveyors.

Exports of goods and services are zero-rated. Unless specifically exempt, supplies of all goods and services are subject to VAT.

**Other taxes**
Other taxes include customs and excise duties which are imposed on the importation of goods at the port of entry and certain manufactured goods produced or imported into Ghana. There are also property taxes and business rates which are nominal amounts.

**Branch income**
The rates on branch profits are the same as on corporate profits. However, the profits for the period deemed to arise in connection with the operations of the branch may, at the discretion of the tax authorities, be computed by reference to the total consolidated profits of the entire group, taking into account the proportion that the turnover of that branch bears to the total consolidated turnover of the group. When repatriating branch profits, the amount to be repatriated is subject to an additional tax of 10%.

**Income determination**

**Inventory valuation**
There is no statutory guidance on the principles of stock valuation for income tax purposes. Any method of valuation of stock (inventory) and work-in-progress based on sound accounting principles is acceptable, provided it is adopted and consistently
applied from one period to another. In practice, inventory is normally valued for tax purposes at the lower of cost and net realisable value.

**Capital gains**
A capital gains tax is payable by every person, including a corporate body, on any capital gain accruing or derived from the realisation of any chargeable asset, including buildings of a permanent or temporary nature; business and business assets, including goodwill; land other than agricultural land; and any assets declared as chargeable by legislative instrument made under the law.

Capital gains in excess of GHC 50 are subject to tax at 5% thereafter. However, gains resulting from a merger, amalgamation, reorganisation, reconstruction and gains accruing to or derived from a venture capital financing company are exempt from capital gains tax. Details of further exemptions can be found in the income tax laws of Ghana.

**Inter-company dividends**
The gross dividends received by one Ghanaian company from another, regardless of whether it is a subsidiary of the company, are normally exempt from corporate income tax if the dividends were taxed in the first instance.

**Foreign income**
Resident corporations are taxed on their foreign income as and when it is brought into or received in Ghana. Foreign income is taxed together with other income derived in Ghana, and double taxation is avoided through treaties or foreign tax credits. No special rules exist for taxing undistributed income of foreign subsidiaries.

**Stock dividends**
The issue of stock dividends is permitted under Section 74 (1) of the Ghana Companies Code 1963, Act 179. It is, however, subject to income tax at the dividend tax rate of 8%.

**Other significant items**
Specific exemptions from tax include the following:

- Income of a local authority;
- Income of a statutory or registered building society;
- Income of an ecclesiastical, charitable or educational institution;
- Income of organisations formed for the purpose of promoting social or sporting amenities not for profit;
- Income accruing from a farming enterprise for a limited period;
- Income of a registered trade union;
- Income of rural banks for the first 10 years of operations;
- Gain or profit from the business of operating ships or aircraft by non-resident corporate bodies;
- Investment income of a pension or provident society;
- Income or profit of any registered cooperative society; and
- Income of a company engaged in the construction and sale or leasing of residential premises during the first five years following commencement of operations of the company.
Deductions

Depreciation and depletion
Depreciation of capital assets in the accounts of a business is not an allowable deduction in computing taxable profits. It is replaced by capital allowances at statutorily prescribed rates. These allowances are available on capital expenditure for the following types of depreciating assets used in a trade:

- Plant and machinery;
- Trawlers and dredges;
- Furniture, fixtures and fittings;
- Airplanes and helicopters;
- Industrial buildings;
- Mines and oil wells;
- Ships; and
- Timber concessions.

Allowances are granted only on the following conditions:

1. The taxpayer must own the asset.
2. Capital expenditure must be incurred.
3. The asset must be used in the trade.
4. The asset must be in use up to the end of the basis period.

Capital allowances are granted for every year in which the asset is in use. In some cases, balancing allowances and charges are made where use continued until immediately before disposal of the asset.

For intangibles, such as patents, trademarks and copyrights, the law allows deduction of fees and expenditure incurred in obtaining the grant and the cost of registration and renewals.

For capital expenditure for acquisition of Ghanaian mineral concessions and related interest in land, an annual write-down allowance is allowed of 80% of the cost base added to the pool during the basis period and 50% of the balance of the pool, if any. There is also an additional 5% allowance calculated on the previous year’s additions.

Net operating losses
Losses can be carried forward and deducted from assessable income of the five years immediately succeeding the year in which the loss was incurred. This provision covers the following industries: farming and agro-processing, mining, manufacturing (for export only), tourism and ICT (software development).

Carryback of losses is permitted for persons deriving income relating to a long term contract. Long term contract of a business refers to a contract for manufacture, installation or construction.

Payments to foreign affiliates
No special restrictions are imposed on the deductibility of royalties, interest and service fees paid to foreign affiliates, provided they are expenses incurred wholly, exclusively and necessarily in the production of the income. However, the Commissioner may
disallow certain transactions if the Commissioner is of the opinion that they are artificial or fictitious.

**Taxes**
No taxes are deductible in determining taxable income.

**Other significant items**
No special deductions are allowed. Principal non-deductible items include the following:

- Domestic or private expenses, including cost of travel between residence and place of business or employment;
- Any disbursement or expense not being wholly and exclusively paid or expended for the purpose of acquiring income;
- Capital withdrawn or any sum employed or intended to be employed as capital;
- Capital employed in improvement;
- Any sum recoverable under an insurance contract of indemnity;
- Rent of or any expense in connection with premises or a part of premises not occupied or used for the purpose of producing business income;
- Any amount paid or payable in respect of any income tax, profits tax or similar tax, whether due within or outside Ghana;
- Any payment to a provident, savings or other society or fund unless specifically allowed by the tax commissioner;
- Any sum payable by way of mortgage or debenture interest by any person to a non-resident person, except where tax has been deducted and accounted for; and
- Depreciation of any fixed assets of a permanent nature.

**Group taxation**
No form of combined reporting of results of operations by a group or affiliates is permitted.

**Tax incentives**

**Inward investment**
Under the Ghana Investments Promotion Centre Act 1994, various incentives are available to encourage investments in the country, particularly in the areas of agriculture, manufacturing industries engaged in export trade or using predominantly local raw materials or producing agricultural equipment, etc., construction and building industries, mining, and tourism. Incentives generally include exemption from customs import duties on plant and machinery; reduced corporate income tax rates; more favourable investment and capital allowances on plant and machinery; reduction in the actual corporate income tax payable where appropriate; retention of foreign exchange earnings where necessary; guaranteed free transfer of dividends or net profits, foreign capital, loan servicing, and fees and charges in respect of technology transfer; and guarantees against expropriation by the government.

**Capital investments**
Venture capital tax incentives:

- Relief from stamp duty in each year on subscriptions for new equity shares in venture capital funds;
Ghana

- Full tax exemption from corporate income tax, dividend tax and capital gains tax for five years;
- Carryforward of losses from disposal of shares during the tax-exempt period to the post-exempt period up to five years; and
- Chargeable income tax deduction equal to 100% of their investment for financial institutions which invest in venture capital subsidiaries.

**Withholding taxes (WHT)**

*Graduated tax rates as per regulations made under the decree.

**Tax administration**

**Returns**
The tax year runs from 1 January to 31 December. Corporations with financial periods other than the calendar year are taxed on their financial period ending during the calendar year. Separate provisions exist for commencement and cessation of business.

The tax administration system is an information return system, with subsequent assessment being issued by the tax authorities. Upon request to the Internal Revenue Service (IRS), a taxpayer is given Income Tax Form 22A for completion and submission to the IRS. This form provides the relevant information for determining taxable income and is filed by the taxpayer or an appropriate agent.

Companies are expected to submit a return four months after the end of the financial year. They may file an application for extension of filing time not to exceed two months.
The following are to be furnished together with a return:

1. Certified statement of turnover for the period covered by the return;
2. Copy of certified accounts of the business for the period; and
3. An estimate of the tax due on the income declared and remittance of the tax so computed.

**Assessments**
An assessment may be made on the company after the beginning of each year of assessment. If the return is considered incorrect and inadequate, additional assessments may be made as often as necessary. The tax authorities may make a provisional assessment before a return is filed, which can serve as a tax credit against the final assessment based on the return.

**Payment of tax**
Where the assessment has been finalised, the tax is payable within 30 days after service of the notice. At the discretion of the Tax Commissioner, the time for payment may be extended. Without notice or demand from the Commissioner, a taxpayer is required to pay not less than the total of the tax paid or payable in respect of the preceding year of assessment. This may be paid by equal quarterly instalments at the end of March, June, September and December in each year of assessment, but such payments are not deemed to be the actual tax payable.

Where tax is not paid by the due date, a penalty is assessed at 10% of the tax payable in addition to the tax unpaid up to three months after the due date; thereafter, the penalty is 20%.
Corporate taxes in Gibraltar

Significant developments

Following the 2009 budget, the following changes have taken place:

• From 1 July 2009, a 5% reduction in the corporate income tax rate from 27% to 22%;
• Confirmation that the “low rate” announced in the 2007 budget will be 10%. The effective date for this rate will be 1 January 2011. Energy and utility providers will pay a 10% surcharge and will thus suffer an effective rate of 20%;
• The preceding year basis of assessment will be abolished in favour of an actual basis as of 1 January 2011 (commencement provisions will be abolished and transitional rules will be introduced);
• Effective 1 July 2009, a “start-up” rate of 10% will be introduced, which will apply to any business established in Gibraltar after 1 July 2009, and will be assessed on an actual year basis; and
• Start-up rate will also be available, on certain conditions, to businesses that have recently been established.

Taxes on corporate income

Generally, companies are subject to Gibraltar taxation on income accrued in, derived from, or received in Gibraltar, and are assessed on the prior-year basis. The main exemption to this is dividends which are taxed on a worldwide basis, although tax can be mitigated provided certain criteria are met (see Income determination section). Audited accounting profits are subject to certain adjustments, as set out below, to arrive at taxable profits.

Commencement provisions operate, whereby a company’s profits for the first accounting period form the basis of more than one year of assessment. An imputation system is used, whereby tax paid by a company is imputed to the shareholder recipients of dividends paid from the company’s profits.

The prior-year basis of assessment will be abolished in favour of an actual basis as of 1 January 2011. Commencement provisions will be abolished and transitional rules will be introduced.

Corporation tax rates
The standard rate of corporation tax is 22%, but there is a “small company” rate of 20% that applies where the profits of an accounting period are less than GBP 35,000.
per annum and a marginal rate is charged on profits of between GBP 35,000 and GBP 43,333.

A “small company” is one whose trading activities in any year has a minimum of 80% of its total trading receipts derived from sources other than the following: dividends, interest or discounts, rents, royalties, premiums and any other profits arising from property.

The Gibraltar Government has confirmed that a “low rate” of corporation tax of 10% will be put into effect on 1 January 2011, with utility and energy providers paying an extra 10% surcharge.

**Start-up relief**

With effect from 1 July 2009, a “start-up” rate of 10% will be introduced, which will apply to any business established in Gibraltar after 1 July 2009. The start-up tax will be assessed on a current actual year basis, i.e., the tax will be assessed on the actual profits from 1 July to 30 June of the following year.

This scheme will also be available, on certain conditions, to businesses that have been recently established. Those conditions are as follows:

- The business must have commenced after 1 July 2007;
- For companies that commenced trading after 1 July 2007 but before 1 July 2008, the first tax year for which the company will be liable is 2008/2009, and tax will be payable in respect of this period at the rate of 27%, the rate for the subsequent two tax years will be 10%;
- For companies that commenced trading after 1 July 2008 but before 1 July 2009, the first tax year will be the 2009/2010 tax year and the profits assessed will be for the period from commencement of trade to 30 June 2009, taxed at the rate of 10%. The second tax year will be the 2010/2011 tax year and the company will be assessed on an actual preceding year basis at the rate of 10%; and
- For companies that have commenced trading after 1 July 2009 the first tax year will be the 2009/2010 tax year and will be based on the profits from the commencement of trade to 30 June 2010 at the rate of 10%. The second tax year will be the 2010/2011 tax year and the company will be assessed on an actual current basis.

As an anti-avoidance provision, the start-up relief will not apply in respect of any commercial activity carried out before 25 June 2009 and which is reorganised by the taxpayer in the name of a different entity for the purpose of benefiting from this scheme.

**Exempt company**

An exempt company is not subject to taxes in Gibraltar. In order to qualify for such status, the exempt company must demonstrate that it is not beneficially owned by Gibraltarians (or residents of Gibraltar) and does not trade with such persons.

The legality of this status was challenged by the European Union (EU) under the EU State Aid Rules in July 2001. In January 2005 the Government of Gibraltar reached an agreement with the EU Commission to permit existing tax-exempt companies to continue enjoying such status until 31 December 2010, provided that neither the
beneficial ownership nor the activities of the company change, in which case by default they become ordinarily resident entities taxable at the standard rate above.

No new exemptions have been granted since 30 June 2006.

On 31 December 2010 the tax exempt company legislation will be repealed and all tax exempt companies will as from 1 January 2011 be subject to taxation at the rate of 10%.

**Corporate residence**

A company will be considered resident in Gibraltar if the management and control of its business is exercised from Gibraltar.

The location of central management and control will be established under legal principles laid down in the United Kingdom and is the place of the highest form of control and direction over a company's affairs, as opposed to decisions on the day-to-day running of the business.

**Other taxes**

**Value-added tax (VAT)**

There is no VAT in Gibraltar.

**Customs and excise duties**

Goods imported into Gibraltar from outside are, with some exceptions, generally subject to import duty at the applicable rate, which is usually 12%. Different rates apply to food, alcohol and tobacco (among others).

**Estate duty**

There is no estate duty in Gibraltar.

**Property tax**

A general business property rate is levied on all businesses in Gibraltar.

**Stamp duty**

Stamp duty is payable on the transfer or sale of any Gibraltar real estate or shares in a company owning Gibraltar real estate (on an amount based on the market value of said real estate) at the following rates:

- Less than GBP 160,000 – 0%;
- Between GBP 160,000 and GBP 250,000 – 1.26%;
- Between GBP 250,000 and GBP 350,000 – 1.60%; and
- Over GBP 350,000 – 2.50%.

**Gaming tax**

Gaming tax is levied at 1% of the gaming income. The tax paid is subject to a minimum of GBP 85,000 and maximum of GBP 425,000.

**Capital duty**

Capital duty of GBP 10 is payable on the initial authorisation of capital or any subsequent increase thereto.
Social insurance
Employers are obliged to pay a proportion of social insurance on behalf of their employees.

Employers’ social insurance contribution for employees paid weekly is calculated as 20% of gross earnings, subject to a minimum of GBP 15.00 and a maximum of GBP 29.97 per week.

Employers’ social insurance contribution for employees paid monthly is calculated as 20% of gross earnings, subject to a minimum of GBP 65.00 and a maximum of GBP 129.87 per month.

Branch income
The basis for taxation of branches of foreign enterprises is the same as for companies.

Income determination
Generally, companies are subject to Gibraltar taxation on income accrued in, derived from, or received in Gibraltar, the main exception to this are dividends which are taxed on a worldwide basis, although tax on this can be mitigated (see below).

Where a taxpayer seeks to reduce their liability to tax by creating an artificial split between activities in Gibraltar and outside the Commissioner shall use the anti‑avoidance provisions of Section 13 of the Income Tax Act and any other means to defeat such an attempt.

Inventory valuation
Inventory is valued at the lower of historical cost or net realisable value. The last-in, first-out (LIFO) method is not permitted. Generally there are no material differences between accounts prepared on a normal accounting basis and those prepared on a tax basis.

Capital gains
Capital gains are not subject to tax in Gibraltar.

Dividends
Except in the case where the income forms part of the company’s trading receipts, dividend income from companies listed on a recognised stock exchange is not taxable in Gibraltar. There is no tax on dividends paid by a Gibraltar company to a non-resident individual or to a corporate entity wherever resident.

Dividends received from participating interests or from any subsidiaries in the participating interest group are not liable to taxation in Gibraltar. A participating interest exists where there is a direct or indirect shareholding of at least 10%, as from 1 January 2009, in a company registered in the EU (or a company which is registered in a country which has a bilateral agreement with the EU).

Interest
Except in the case where the income forms part of the company’s trading receipts, interest received from financial institutions is not taxable in Gibraltar.
Gibraltar

With respect to non bank loans, where the situs of a loan is outside Gibraltar there is no source of income which would give rise to a liability to tax in Gibraltar in respect of the interest received on that loan.

The situs of a loan will depend upon:

- The place of residence of the debtor;
- The source from which the interest is paid;
- The place where the interest is paid; and
- The nature and location of the security for the debt.

Unless there are compelling reasons to the contrary, where loans are primarily secured on assets situated in Gibraltar they are likely to have their situs in Gibraltar.

**Deductions**

For the purpose of ascertaining the assessable income there shall be deducted all outgoings and expenses wholly and exclusively incurred in the production of the income. No deduction shall be allowed in respect of:

- Domestic or private expenses;
- Expenses not incurred wholly and exclusively in the generation of income;
- Any expenses of a capital nature;
- Any sum recoverable under an insurance contract or contract of indemnity;
- Property expenses not incurred for the purposes of producing income;
- Any tax charges under the Income Tax Act;
- Depreciation of assets (although capital allowances are available, see below); and
- Employee remuneration not accompanied by a certified statement of name, addresses and amount of remuneration.

**Capital allowances**

*Plant and machinery*

The first GBP 30,000 of capital expenditure on plant and machinery is fully deductible. After the first year, assets are written down at a rate of 25% on a straight-line basis.

*Information technology*

The first GBP 50,000 of capital expenditure on information technology investment is fully allowable against taxable profits and as for plant and machinery, any balance over the specified amount is written down at a rate of 25% per annum on a straight-line basis.

*Motor vehicles*

Capital expenditure on motor vehicles is written down at a rate of 25% on a straight-line basis (N.B. vehicles which are primarily suited for the conveyance of any goods or burden other than passengers are considered as plant and machinery).

**Operating losses**

A trading loss incurred in an accounting period may be offset against trading income arising in the same period or subsequent period, provided that within a period of three years there has not been both a change in the ownership of the company and a major change in the nature or conduct of the trade.
There is no provision for the carrying back of losses.

**Group taxation**

Companies are assessed on an individual basis and trading losses of group members may not be offset against profits of other members of the group.

**Thin capitalisation**

There are no debt-to-equity ratio rules.

**Transfer pricing**

Where a non-resident individual transacts business with a resident individual and the transaction reduces the profits of the resident individual by more than the ordinary profits which might be expected to arise from that business, then in the case where the non-resident individual has a “close connection” and can exercise “substantial control” over the resident individual, the non-resident shall be assessable and chargeable to tax in the name of the resident individual as if such individual was an agent for the non-resident.

Also, by using the anti-avoidance provisions of Section 13 of the Income Tax Act the Commissioner is able to disregard a transaction if he is of the opinion that the transaction is either artificial or fictitious.

**Tax incentives**

**Exempt company**

*See Taxes on Corporate income section.*

**Development aid**

In order to encourage private development in Gibraltar, promoters and developers of approved projects are offered certain incentives such as tax relief, import duty relief and rates relief.

In order to qualify for the above relief the project needs to be a new project the aim of which is:

- To create a tangible immovable asset in Gibraltar that will remain in existence after the applicant has ceased to derive the benefits under the license; and
- To provide more than two additional units of housing accommodation in Gibraltar; or
- To contribute materially to the development of the tourist industry in Gibraltar; or
- To afford any new employment opportunities or career prospects in Gibraltar; or
- Otherwise to improve materially the economic or financial infrastructure of Gibraltar; and the project shall be one which is for the economic benefit of Gibraltar.

The project needs to be completed within a specified time (dependent on the type of project) following the issue of the licence and the applicant must not expend less than the prescribed amount for the project.

Application for development aid must be made to the Minister for Trade.
Deduction of approved expenditure on premises
For taxpayers with an interest in a building situated in Gibraltar an allowance is available for approved expenditure on the painting, decorating, repair or enhancement of the frontage of that building.

The approved amount will be available as a deduction against the taxpayer’s income. This deduction is in addition to any deduction, relief or allowance given in accordance with any other provision of the Income Tax Act in respect of the same expenditure.

The claim for the deduction must be made within two years after the end of the year of assessment with respect of which the deduction is claimed.

Withholding taxes (WHT)
There is no WHT in Gibraltar except in the following cases:

- Interest payments on Gibraltar situs loans payable to non-financial institutions at the corporate tax rate;
- Payments to subcontractors in the construction industry. Unless the subcontractor is in possession of an exemption certificate, tax is withheld at the rate of 25% of the amount which relates to the labour and profit element of the contract;
- Payments to employees (under the “Pay As You Earn” system).

Tax administration

Returns
Tax returns are due by 30 September following the year in which the income is assessed.

Payment of tax
Tax for any year of assessment is due on the later of 28 February in the year of assessment or 60 days after the issue of the assessment. Tax paid after the due date incurs a 10% charge.

Appeals
If a taxpayer disputes an assessment, he may appeal against that assessment by notice in writing addressed to the Commissioner within 21 days of the date of service of the notice of the assessment.

Significant developments

The new tax law 3842/2010 adopted by the Greek Parliament amended significantly the Greek tax regime, by introducing new provisions affecting all fields of taxation. The most important amendments in the field of corporate taxation are the following:

- Introduction of a system of dual corporate income tax (CIT) rates for non-distributed and distributed profits of legal entities. Non-distributed profits are taxed at a rate of 24% (which will gradually decrease to 20% by 2014), while distributed profits are taxed at a rate of 40%. The new rates apply to profits arising from balance sheets drafted as of 31 December 2010 onwards. As of that period, the withholding tax (WHT) rate of 10% on dividends distributed by Greek Societes Anonymes to resident or non-resident beneficiaries is abolished. Until then, the existing system of a 25% corporate tax rate plus 10% dividend WHT applies.
- Introduction of significant restrictions on the deduction of expenses from the gross income of enterprises paid to companies established in countries included in the catalogue of non-cooperating states or states with preferential tax treatment.
- Companies incurring a gain from the sale of listed shares are subject to a capital gains tax of 10% or 20% depending on whether the shares are sold within three or 12 months from their original acquisition, respectively (application for shares acquired from 1 January 2011).
- Introduction of certain important changes on real estate taxes.
- Moreover, by virtue of law 3833/2010 a one-off special lump sum contribution aimed to address the current fiscal deficits is imposed on the total net income of legal entities by fiscal year 2009. It is likely that such a contribution will also apply for 2010 and 2011, depending on the progress of the Greek economy, as monitored by the European Union (EU) and the International Monetary Fund (IMF).
- Finally, as of 15 March 2010, the value-added tax (VAT) standard rate is increased from 19% to 21% and the reduced rate from 9% to 10%. Such taxes are further expected to increase to 23% and 11%, respectively, as of 1 July 2010. Various exemptions from VAT are abolished (e.g., services of lawyers, notaries, freelance land registrars and judicial clerks, authors, artists, medical and hospital care, diagnosis services, etc.).

Taxes on corporate income

For companies closing balance sheets as of 31 December 2010 onwards, two CIT rates apply for non-distributed and distributed profits of legal entities respectively.
Greece

Non-distributed profits are taxed at a rate of 24%. Corporate income tax rates will gradually decrease to 20%, from 24% currently in force, by 2014 as follows:

- 24%: for accounting periods starting from 1 January 2010 to 31 December 2010;
- 23%: for accounting periods starting from 1 January 2011 to 31 December 2011;
- 22%: for accounting periods starting from 1 January 2012 to 31 December 2012;
- 21%: for accounting periods starting from 1 January 2013 to 31 December 2013; and
- 20%: for accounting periods starting from 1 January 2014 onwards.

Moreover, distributed profits will be subject to a 40% company tax paid at the level of the company. A credit is provided for corporate tax paid on such profits. The way the law is drafted, the 40% tax does not appear to apply as a dividend WHT but as an increased corporate tax payable on distributed profits. As of the drafting of this text, no further details have been provided by the Greek tax authorities on the application of this new regime.

**Local/state/provincial tax rates**

No local taxes on income are paid at a local level. However, it should be noted that the aforementioned rates are reduced by 40% for profits of companies derived from activities carried out on islands with less than 3,100 inhabitants (Article (Art.) 118 par.2 Income Tax Code (ITC)).

**Special one-off contribution on profits**

A one-off special lump sum contribution aimed to address the current fiscal deficits is imposed on the total net income of legal entities by fiscal year 2009. It is likely that such contribution will also apply for 2010 and 2011, depending on progress of the Greek economy.

The special one-off contribution is imposed on the total net income declared by legal entities or on the total net income of legal entities publishing financial statements under IFRS, whichever is higher, provided that it exceeds EUR 100,000. The abovementioned lump sum is calculated based on a progressive scale of rates and more specifically, at 4%, 6%, 8% and 10% for income from EUR 1 up to 300,000, from EUR 300,001 up to 1,000,000, from EUR 1,000,001 up to 5,000,000 and exceeding EUR 5,000,001, respectively. The amount of the lump sum is reduced so that the remaining total net income does not fall under EUR 100,000. A similar lump sum was imposed on the net income of legal entities by fiscal year 2008, provided that it exceeded EUR 5,000,000, within a progressive range of scales, from 5% for income up to EUR 10,000,000 to 10% for income exceeding EUR 25,000,000.

**Corporate residence**

Corporate residence is determined primarily by place of incorporation. However, the corporate law rules based on the effective management criterion the place of legal seat could be relevant.

**Permanent establishment (PE)**

Subject to related tax treaty provisions, foreign corporations are subject to Greek taxation if they maintain a PE in the country. Such PE may arise in cases of foreign companies maintaining inventories from which orders are filled; maintaining offices, warehouses, factories, etc.; carrying out any other operations for the purposes of
exploiting natural resources; processing raw materials or agricultural products in their own factories or through third parties; or providing services of a technical or scientific nature (surveys, designs or research) (Art. 100 ITC).

Other taxes

Value-added tax (VAT)
As of 1 July 2010, the standard VAT rate will be 23%. There is a reduced rate of 11% on basic necessities (5.5% on books, newspapers and periodicals as of 1 July 2010). Supplies of goods and services to individuals and legal entities subject to VAT and established in EU countries (intra-Union supplies) are exempt from VAT. Exports of goods and certain services to non-EU countries are also exempt. As of 1 January 2007, shopping centres lease contracts may be subject to VAT, on condition that the taxable person opts for the submission to taxation of the leasing right. The term “shopping centres” is defined by means of a Ministerial Decision. With the noted exception, real estate leases are generally exempt from VAT.

Stamp taxes
Rentals of non-residential properties are subject to 3.6% stamp duty (with the exception of shopping centres subject to VAT).

In general, loans and interest may be subject to a 2.4% stamp duty. However, there are a number of exemptions, the main one covering bank loans and bond issues.

Other stamp duties may apply, in certain limited cases.

Excise taxes
Excise taxes are imposed on energy and electricity products (e.g., petrol, natural gas, electricity etc.), tobacco and alcoholic products. The imposed tax rates vary according to the category of products and detailed provisions including:

- Industrialised tobacco products are taxed generally at a standard tax rate of 65% on the weighted average retail price, with minimum amount of collection of EUR 78 per 1,000 cigarettes. Also a proportional excise tax is calculated at the rate of 58.823%.
- Alcoholic products/beverages are taxed at EUR 1.884 per 100 litres, subject to further deductions of certain alcoholic products.
- Taxation of energy products vary significantly in respect to the classification of the product and further detailed provisions. Indicatively, petrol with lead is taxed a EUR 621 per 1,000 litres, airplane gasoline at EUR 637 per 1,000 litres, diesel fuel at EUR 382 per 1,000 litres, diesel used for heating at EUR 382 per 1,000 litres, kerosene at EUR 410 per 1,000 litres, etc.
- Electricity is subject to excise tax at the rate of EUR 5 for non-business and EUR 2.5 for industrial/commercial use.

Real estate tax
An annual real estate tax is imposed effective from 2010 onwards on real estate located in Greece, which is owned on 1 January of the tax year by individuals or legal entities, regardless of nationality or residence. Real estate tax on individuals is imposed at a progressive tax rate from 0.1% to 1% with a tax free amount of EUR 400,000 per owner. Specifically for years 2010, 2011 and 2012, taxable real estate of individuals
exceeding EUR 5,000,000 in value, is taxed at a 2% rate on the value exceeding EUR 5,000,000.

The applicable tax rate for legal entities amounts to 0.6%, 0.3% or 0.1% depending on their profit or non-profit making character and the use of the properties. The tax rate remains reduced at 0.33% for real estate owned by hotel enterprises and used for their business activities.

An exemption from real estate tax is provided for buildings built within three years from the issuance of the initial building permit, unless these have been leased or in any other way used, from the year 2011 onwards.

**Special real estate tax**

The special real estate tax of 3% effective as of 1 January 2003, on legal entities owning real estate property in Greece on the objective value of such property, is increased to 15% as of 1 January 2010. This tax is mainly directed against property held, directly or indirectly, by offshore companies for the purpose of tax avoidance of transfer and inheritance taxes by the real owners. In this context exemptions apply to listed companies, companies with registered shares up to the individual shareholder (provided such shareholder holds a tax registration number in Greece), companies for which the income derived from the real estate property does not exceed the income from other activities, EU banks, insurance companies, investment funds, etc.

**Real estate transfer tax**

Each transfer of real estate, which is not subject to VAT, is subject to real estate transfer tax. The tax rates of the real estate transfer tax amount to 8% for the value up to EUR 20,000 and at 10% for the exceeding value of the real estate.

Exemptions from real estate transfer tax for the acquisition of primary residences are determined according to the value of the property.

**Contribution tax on capital accumulation**

A 1% tax contribution is imposed on capital accumulation by (1) business companies and joint ventures; (2) associations of all degrees and any other form of company, legal entity, or union of persons or society aiming to make profits; and (3) branches of foreign companies (unless of EU origin). For Societe Anonyme (SA) companies an additional 0.1% duty is payable on capital to the competition committee.

**Branch income**

For profits arising with respect to balance sheets drafted as of 31 December 2010 onwards, profits of branches of foreign companies are subject to CIT at the standard rate of 24% currently in force, to be reduced to 20% by 2014 (Art. 99 ITC). Post-tax profits remitted to the foreign head office are taxed at a rate of 40% (i.e., equalised to a distribution from a Greek company).

**Income determination**

**Capital gains**

In general, capital gains are included in the taxable profits of Greek companies. Certain special rules apply in the case of sales of shares in listed or non-listed entities.
**Capital gains tax on sale of listed shares**
Companies incurring a gain from the sale of listed shares are subject to a capital gains tax of 10% or 20% depending on whether the shares are sold within three or 12 months from their original acquisition, respectively (application for shares acquired from 1 January 2011). Thereafter, the capital gains derived from the sale of the relevant shares is booked in a special reserve account after the deduction of losses derived from similar transactions. In case of distribution or capitalisation, capital gains are taxed at the rate of distributed profits by deducting the tax withheld. No further tax is imposed on foreign resident investors. In the case of application of taxation of capital gain, according to the aforementioned, transaction duty of 0.15%, currently in force, shall not apply.

**Transfer tax on sale of non-listed shares**
The sale of Greek shares non-listed on the Stock Exchange triggers a 5% tax calculated on the transfer value as either agreed by the parties or determined on the basis of a “minimum-value” formula set forth by law, whichever is the higher. The aforementioned 5% tax is also due in the case of transfer of foreign non-listed shares by a Greek tax resident, calculated on the consideration agreed. In the case where the seller is a Greek corporation, the payment of the 5% tax does not exhaust the transferor’s tax liability. Any capital gains arising thereof, are further subject to tax at the standard CIT rate (i.e., they are included in the taxable profits of the company). It should be noted that the 5% tax paid at the time of the transfer may, under certain conditions, be provided as a credit against the company's annual corporate liability.

Moreover, gains arising from the sale of parts of limited liability companies (LLC) are subject to a 20% tax rate. In the case the seller is an individual, the taxation exhausts any further income tax obligation regarding such income. In the case the seller is a Greek entity, the tax liability is not exhausted and the respective capital gain is taxed according to the general tax provisions with the 20% tax being credited against the final income tax liability.

**Dividend income**
Distributed profits are taxed at a rate of 40% (application for profits arising from balance sheets drafted as of 31 December 2010) at the level of the distributor company. No further WHT is imposed on dividends.

Taxation of 40% on distributed profits of the legal entities does not exhaust the tax liability of beneficiary individuals. The dividend amount is further taxed based on the progressive tax scale applicable to individuals with a credit being provided for the corporate tax paid by the distributing legal entities, based on a certificate issued by the latter in the name of the individual.

On the contrary, taxation of 40% on distributed profits of the legal entities is designed to exhaust the tax liability in case the beneficiaries are legal entities.

**Foreign income (anti-deferral regime, unremitted earnings)**
Resident corporations are taxed on their worldwide income. Foreign income received by a domestic corporation is taxed together with other income. If related income tax is paid or withheld abroad, a tax credit is generally available up to the amount of the applicable Greek income tax. Losses incurred abroad can only be offset against foreign profits.
Greece

There are no special anti-deferral regimes or CFC rules in Greece.

**Interest income**
Interest income is generally taxable. There are certain special rules that govern the receipt of interest income from bonds by banks and insurance companies.

**Inventory valuation**
Inventories are stated at the lower of cost or market (replacement value). The Greek tax system recognises various valuation methods such as first-in, first-out (FIFO), last-in, first-out (LIFO), weighted average, etc.

**Partnership income**
Both general partnerships (“Omorrythmi Etairia”, or OE) and limited partnerships (“Eterrorythmi Etairia”, or EE) are not tax transparent. They are generally taxed at a rate of 25%, but there are special rules on income determination or cases where partners are individuals.

**Rents/royalties income**
Income derived from rents and royalties is taxed as ordinary income.

**Stock transactions**
Stock dividends are treated as cash dividends for income tax purposes.

**Deductions**
In general, expenses are deductible subject to certain conditions. The following is a list of certain key conditions or restrictions on expense deductibility:

- In general, accrued interest from loans or credits of a company, with the exception of interest on arrears due to the debt of taxes, duties, contributions and fees to the state and other legal entities governed by public law, interest on loans for the purchase of shares in any type of company, to the extent that this participation is transferred within a two-year period, interest on loans used for the purchase of shares in a legal entity established in non-cooperating states or states with preferential tax regime, interest paid to companies established in such states, which cannot be deducted from gross profits of companies.
- Hotel expenses, expenses for corporate gifts, education of personnel, special clothing of personnel, mobile telephone expenses, etc., subject to specific conditions set out in Art. 31 of the ITC.
- Payroll expenses are not deducted when they are not paid through professional bank accounts or cheques paid through the same accounts.
- The value of raw and ancillary materials and other goods (plus processing thereon), which is paid to a legal entity whose role consists exclusively of the invoicing of the transactions, while the delivery of goods or provision of services is conducted by a third party, is not deducted from the gross profits of companies.
- Car expenses are generally deductible up to 70% for motor vehicles up to 1.600cc and 35% for motor vehicles exceeding 1.600cc.
- Expenses concerning transactions realised between Greek companies and entities established in preferential tax regimes may be deductible for Greek companies, on the condition that satisfactory evidence is provided that the transactions are real, usual and do not result in the transfer of profits, income or capital for the purpose of tax evasion or tax avoidance.
Greece

- Expenses concerning transactions realised between Greek companies and entities established in a non-cooperating state are non-tax-deductible.

**Accrued expenses**
Accrued expenses are, in principle, non-deductible until they become final and settled, supported by respective invoices.

**Bad debt**
Tax-deductible bad debt provisions are calculated at 0.5% on the stated value of invoices for sale of goods or provision of services, after a reduction for discounts, sales to the State or other entities governed by public law and the special consumption tax imposed in certain cases. Special restrictions and rules apply to certain transactions, while there is a recapture system for provisions which are not realised.

**Charitable contributions**
Donations and sponsorships paid to charitable institutions, non-profit making foundations, churches and monasteries and various other welfare institutions may be deductible up to 10% of the total net profits or income arising from the balance sheet of the legal entity.

**Depreciation of fixed assets/amortisation of intangibles**
Depreciation of tangible assets is compulsory for financial years ending after 30 December 1997 (not compulsory for financial years ended within the period from 1 January 1992 through 30 December 1997). Fixed assets with acquisition value of up to EUR 1,200 each may be written off to profit and loss in the year acquired or when used in operations. Depreciation is computed on the basis of the straight-line method or, in some cases, the declining-balance method on the acquisition value, increased by any additions and improvements. The straight-line method or the declining-balance method must be used consistently. However, new companies, for the three consecutive financial years that follow the financial year in which their productive operation commenced, are permitted to depreciate all their fixed assets either at 0% or at a rate equal to 50% of the applicable rate, provided that the selected rate will not change from year to year. If the declining-balance method is used, the straight-line method rates increase three times.

For each category of assets maximum and minimum annual depreciation rates are determined by a presidential decree. Companies may select any rate within this range, provided that this is consistently applied.

**Taxes**
Taxes, other than income tax and real estate tax, are recognised as deductible expenses only if supported by related tax returns and payment receipts, and are borne by the company.

**Fines and penalties**
Fees received from activities constituting a criminal offence, from penal clauses, fines and penalties are not recognised as deductible expenses.

**Goodwill**
There are some court cases which support the deductibility of goodwill as a start-up expense but the specifics of each case must be carefully considered.
Special restrictions on transactions with non-cooperative states and states with preferential tax treatment

Greek tax law has established rules in relation to non-cooperating states and states with preferential tax treatment in Art. 51A and B of the ITC.

Non-cooperating states are defined as states that on the 1 January 2010 are not EU member states and which, up to the aforementioned date, have not concluded agreements of administrative assistance in the tax sector with Greece or with, at least, 12 other states. Such states will be enumerated in an annual Ministerial Decision, and will normally follow the relevant list of the Organization for Economic Co-operation and Development (OECD).

An individual or legal entity, irrespective of its legal form, is considered located in a preferential tax regime, even if its residence of registered office is located in an EU member state, in case it is not subject to taxation in this state or is de facto not subject to taxation, or is subject to tax on income or capital at an amount which is lower than 50% of the tax that would have been due, in accordance with Greek tax legislation, if such entity were resident or were maintaining a PE in Greece.

Greek tax law enumerates a number of serious restrictions on transactions with the aforementioned entities, which could lead to a material increase of the tax burden of a Greek counterparty company.

Net operating and capital losses

Losses can be carried forward five years. Carrybacks are not permitted.

Organisational and start-up expenses

The amount of start-up expenses (including costs for acquisition of real estate) is amortised, either as a lump sum during the year of its realisation, or in equivalent instalments within a five year period. Specifically, expenses realised by financial leasing companies in relation to the acquisition of real estate, which will constitute the object of an agreement of the same law, may be depreciated in equivalent amounts, in analogy to the years of duration of the agreement.

Payments to foreign affiliates

Royalties, interest and service fees paid to foreign affiliates are deductible expenses under certain requirements and conditions.

Pension expenses

Group life insurance premiums, which include pension plans, may be deducted up to EUR 1,500 per employee.

Payment for directors

Fees of board members are taxed at source at a rate of 35%. Such amounts are tax-deductible.

Bonuses (benefits in cash, on top of regular remunerations and overtime payments) paid to executives of credit institutions up to financial year 2013 are subject to special increased taxation. Taxation is based on the general progressive tax scale applicable to individuals provided the total annual income of the executive does not exceed EUR 60,000 and the amount of the bonus does not exceed 10% of the total annual regular income.
remuneration. For amounts exceeding the outlined limitations, taxation at source based on a progressive tax scale is provided as follows:

- Up to EUR 20,000: 50%;
- EUR 20,001 – 40,000: 60%;
- EUR 40,001 – 60,000: 70%;
- EUR 60,001 – 80,000: 80%; and
- EUR 80,001 and above: 90%.

**Group taxation**

**Consolidation/group taxation rules**

Group taxation is not permitted.

**Transfer pricing regime**

Article 26 of L.3728/2008 on “Monitoring the Markets and other provisions” of the Ministry of Development (see also Ministerial Decision A2-8092/2008, 31 December 2008 and Informative Circular of 7 May 2009) introduced, for the first time in Greece, rules on the documentation of prices of intergroup transactions with the intention of “detecting possible overpricing of intergroup transactions, expanding artificially the cost of sold products and services, having as a consequence the reduction of the gross profit of enterprises in Greece, picturing the increase of sale prices to the final consumers as necessary and justified”.

In accordance with the relevant transfer pricing rules, companies operating in any form in Greece are obliged to apply to their transactions with companies that are connected to them, terms in accordance with the arm’s-length principle.

For this purpose, the companies document the prices for all their inter-group transactions with a complete and standardised study of documentation of prices. The study consists of the “basic documentation file”, concerning groups in which the parent company is Greek and the “Greek documentation file”, with regard to Greek subsidiaries of foreign groups and foreign companies operating in any form in Greece.

These files must be made available when requested by the competent authorities of the Ministry of Development within 30 days from the notification of the relevant request. Moreover, companies that have inter-company transactions submit annually, within four months and 15 days from the end of the accounting period, to the Ministry of Development a catalogue in which the data of their intergroup transactions, and specifically the number and their value, are documented. In case of non-compliance with these obligations, an independent fine is imposed, equal to 10% of the value of the transactions for which the relative documentation was not submitted or the foreseen catalogue was not submitted timely.

If an infringement of the arm’s-length principle is established, the competent tax authorities are immediately informed in order for the provisions of tax legislation and the imposition of the relevant tax penalties to apply.

In parallel to the aforementioned regimes, transfer pricing is also regulated by the ITC.

The aforementioned provisions of Art. 39 and 39A ITC were amended by Article 11, par.13 of L.3842/2010. Specifically, the provisions expanded the frame of application...
of the provision to leases of movable or immovable property, while the condition of (direct or indirect) tax avoidance taxes for the application of the provision was abolished. Moreover, the new provisions provide for a fine 20% on the surplus net profits arising on behalf of enterprises in case of infringement of the arm’s-length principle, as well as a fine equal to 20% on the value of the transaction in case of non-compliance, faulty compliance or overdue filing of the required documentation. With reference to the obligation of documentation, the deadline within which enterprises are obliged to present the file is 30 days and the minimum amount of transactions for which documentation is required is EUR 100,000 annually.

**Thin capitalisation rules**

Article 3 of L.3775/2009 established, for the first time, rules on thin capitalisation of enterprises in Greece.

According to the relevant thin capitalisation rules, accrued interest on loans paid to affiliated companies are deductible on the condition that the debt to equity ratio is 3:1.

The aforementioned provisions of Article 3 of L.3775/2009 were amended by Article 11, par.7, of L.3842/2010. Specifically, the new provisions extended the exceptions from the application of the thin capitalisation rules to banks, factoring companies, as well as special vehicle companies of L.3156/2003 and L.3601/2007 (an exception was already in force for leasing companies). It was, moreover, provided that loans assumed by third companies and for which any kind of guarantee has been issued by the aforementioned connected companies are added to the total amount of loans undertaken by the connected companies. Finally, the relevant provisions abolished the clause of non-application of thin capitalisation rules for loans that had been concluded until the publication of L.3775/2009 (namely until 21 July 2009) (grandfathering clause), thus as of 2010 the debt equity ratio covers also older loans.

**Tax incentives**

New tax incentives are expected in June 2010. The following tax incentives were provided by tax L. 3842/2010.

**Incentives for the maintenance of workplaces**

Legal entities, which suffer a reduction of turnover for two consecutive accounting periods without reducing their workforce, can enjoy a reduction of the tax rate by three percentage units. However, a revocation of the granted benefit and imposition of further tax in case of reduction of personnel or increase of the turnover within the three-year period is provided.

**Incentives for the development of young entrepreneurship**

An exemption is provided from income tax for three years regarding profits derived from the exercise of a personal business or freelancers, in the case the entrepreneur in question has not exceeded 35 years of age. The same applies to partnerships that are established exclusively by individuals, who have not exceeded 35 years of age.

Some other very specific incentives, including exemption from income tax on profits derived from activities connected with certain patents, are also provided for in Greek tax legislation.
## Withholding taxes (WHT)

**Notes**

1. The 10% WHT applies only to distribution of dividends by Greek SAs. Profits distributed by Greek Eteria Periorismenis Euthinis (EPEs, or limited liability companies) are not subject to any WHT. For dividends distributed from profits arising from balance sheets drafted as of 31 December 2010 onwards, the 10% WHT is abolished.
2. Interest earned on deposits with banks operating in Greece, as well as on any kind of bonds, is subject to WHT at the rate of 10% withheld at source. WHT on interest payable to non-Greek residents is 40%.
3. Payments of royalties and service fees to foreign residents are subject to a WHT at the rate of 25%.
4. The new double taxation treaty (DTT) concluded between Greece and Austria will apply to income earned as of 1 January 2010. For payments realised up to 31 December 2010 the former DTT applies, which provides for a WHT of 8% for interest payments and 7% for royalty payments.
5. The rate of 5% will apply if the beneficial owner is a company which holds directly at least 25% of the voting power of the company paying the dividends.
6. The rate of 5% applies in case the beneficiary is a company (excluding a partnership) and directly holds, at least, 25% of the capital of the paying company.
7. The rate of 5% is applicable only for the right to use cinematograph films.
8. Rate of 5% applies to shareholders of 25% and above.
9. A rate of 5% is applicable to shareholders of 25% and above.
10. The rate is 5% if the royalties consist of payments of any kind received as a consideration for the use of or the right to use any copyright of literary, artistic or scientific work, including cinematograph films.
11. Exemption (nil rate) applies to payments of any kind received as a consideration for the use of, or the right to use, any copyright of literary, artistic or scientific work including cinematograph films and films or tapes for television or radio broadcasting.
12. Interest (on bonds, securities, notes, debentures, or on any other form of indebtedness) received from sources within Greece by a resident or corporation of the United States...
(US) not engaged in trade or business in Greece through a PE therein, shall be exempt from Greek tax but only to the extent that such interest does not exceed 9% per annum; but such exemption shall not apply to such interest paid by a Greek corporation to a US corporation controlling, directly or indirectly, more than 50% of the entire voting power in the paying corporation.

13. The DTT will apply to income earned as of 1 January 2011.
14. The 5% rate is applicable if the royalties consist of payments of any kind received as a consideration for the use of industrial, commercial or scientific equipment, and the 10% rate is applicable for all the other cases.
15. The 8% rate is applicable when the beneficiary of the interests is a bank or a financial institution, 10% rate is applicable for all the other cases.
16. Exemption (nil rate) applies to copyright royalties and other like payments in respect of the production or reproduction of any cultural or artistic work (but not including royalties in respect of motion picture films nor royalties in respect of works on films or videotapes or other means of reproduction for use in connection with television broadcasting.

(*) Although the DTT has been ratified it is not in force, since the instruments of ratification have not been exchanged yet, as of May 2010.

In general, it should be noted that certain DDTs may include specific clauses on specific cases that are not all captured in the table; hence, a careful review of each DDT is highly advisable.

**Tax administration**

**Audit cycle**

**Tax audit procedures**

The tax audit commences with the issuance of an audit order for tax open years, usually not more than five. The order concerns the audit of all tax issues (income tax, VAT, WHT, capital gain tax, etc.). The duration of the audit may vary from a few weeks to a few months, in certain cases.

Following the audit and the notification of tax audit findings, the company may:

- Negotiate with the tax authorities in an effort to reduce the tax burden and achieve an out of court settlement. An out-of-court settlement offers the possibility to reduce additional taxes (not the principal amount of tax) at the rates provided now under the provisions of L.2238/94 (reduction of the additional tax to 3/5). The conclusion of such a settlement presupposes that the company accepts the findings of the audit (e.g., of expenses) for the audited years and is likely to face the same issues in the following years as well.
- Take the case to court (filing of a recourse), which necessitates an advance payment (25% of the taxes and penalties assessed). The first decision normally takes two to three years and another six to eight years until a decision by the Court of Appeal and Supreme Court is issued.
- Incorporate both of the aforementioned options in one document.
- Request a court settlement (after the filing of the recourse).

Criminal sanctions are also imposed on the company’s representative under certain conditions, which are waived in the case of settlement on the amount of taxes assessed.

**Tax auditors’ practice**

The complexity of the Greek tax legislation and the vagueness of its requirements enable the tax auditors to dispute either the company’s results reflected in its accounting records or to disallow expenses. This is true in all tax audits and in spite of
companies' endeavours to comply with the tax requirements, tax audits always result in assessment of additional taxes and penalties.

The amount of additional taxes depends mainly on the following:

- Company's vulnerability because of nature of business and transactions;
- Taxes already paid on the basis of the company's income tax returns;
- Profits declared by competitors; and
- Weaknesses and shortcomings which the tax auditors might reveal, if a full audit is carried out.

In respect of deductible expenses, the legislation prescribes, among other requirements, that such expenses must be of a "business" nature, without defining what a business expense is. Consequently, the tax auditors dispute the deductibility of various items arguing that, in their opinion, they are not contributing to the company's business.

In a worst-case scenario, if serious violations are detected that make the audit verifications impossible, then the validity of the accounting books may be contested, resulting in the deemed (out-of-books) profit calculation and the imposition of heavy penalties and additional taxes.

Specifically, the validity of the books may be contested on the basis of the kind and gravity of infringements, which are divided in two categories:

- Infringements determining the books as “inadequate”; and
- Infringements determining the books as “inaccurate”.

In the extreme cases, where the accounting books are treated as ‘inadequate’ or ‘inaccurate’, the taxable income and the tax due by the company will not be calculated according to book figures; but instead, the out of books determination method is applied, according to which the company's gross income of each financial year will be multiplied by the net profit rates defined by the Greek Ministry of Finance. These rates have been defined on the basis of the business activities of each company. In cases where the books are deemed to be ‘inaccurate’, these rates would be surcharged by 40% to 80%, depending on the kind of infringement from which the inaccuracy of the books has resulted.

**Statute of limitations**

The right of the Greek State to seek to collect unpaid taxes is normally five years starting from the end of the year in which the relevant tax return should be filed. For example for taxes due in 2009, the clearance VAT return should be filed in 2010 and the statute of limitation expires on 31 December 2015. However, in the case where a return is not filed then the statute of limitation is extended to 10 years. Furthermore, it should be noted that the statutes of limitation may be extended by law. This has happened many times in the past. Thus, the statutes of limitation for tax audit cases regarding accounting years 2000, 2001, 2002 and 2003 and fictitious or forged invoices' cases has been extended until 31 December 2010.

**Tax return due dates**

Income tax returns of Greek SAs, EPEs and branches of foreign companies are filed on a special form within four months and 10 days from the end of their financial year, which
can be on either 30 June or 31 December. By a decision of the Minister of Finance, the filing date for SAs may be extended a few days, depending on the last digit (figure) of their tax registration number (known in Greece as the arithmos phorologikou metroou or AFM). Branches and subsidiaries (at least 50% participation) of foreign companies may follow the financial year of the parent company. A Greek company that is at least 50% held by another Greek company that is in turn a subsidiary of a foreign company that has participation with the same or higher percentage may also follow the financial year of the foreign parent company. The income tax return constitutes the basis for assessment.

Tax returns are required to be submitted electronically from 2011 onwards.

**Payment of tax**

Income tax and tax prepayment (80% [100% for banks operating in Greece] of the current year’s income tax less tax withheld at source) based on the tax return are paid in eight equal monthly instalments, the first of which should be paid upon filing. For newly established companies the pre-payment is reduced to 50% for the first three years of their operating. A deduction of 1.5% in case of a lump sum payment of income tax liability applies to tax returns filed from 2010 onwards.

**Other issues**

**Exchange controls**

In general, exchange controls have been long abolished in Greece.

**Choice of business entity**

The main differences between a subsidiary (i.e., SA, EPE or LLC) and a branch of a company from the law/establishment perspective are as follows:

1. A subsidiary is a separate legal entity from its parent company, whereas a branch does not form a separate legal entity, does not have its own shareholders and consequently the funds needed for its operation are transferred from the overseas parent company;
2. The parent company of a branch must be either the equivalent of a Greek SA or a LLC, whereas there is no such restriction for subsidiaries;
3. The day-to-day management of a branch is exercised by the legal representative, a person appointed by the parent company, whereas an SA is represented by its board of directors (BoD) and a LLC is administered and directed by the administrator(s);
4. No minimum capital is required for the establishment of a branch, nevertheless the share capital of the parent company should be at least EUR 60,000 if it is an SA and EUR 4,500 if it is a LLC;
5. An SA appears to be a more prestigious type of company than a branch and a LLC. This has a mainly psychological effect. Certain investors still tend to opt for the establishment of an SA company, particularly if they would like to participate in public tenders, etc.

The main legal differences between a SA and a LLC in Greece from a company law/establishment perspective are as follows:

1. An SA is managed by a BoD consisting of at least three members, whereas a LLC can be managed by only one individual, the administrator (legal entities are permitted to be appointed as BoD members or administrators). Both BoD members
and administrators have to acquire a Greek tax registration number and a Greek residence permit before the establishment of the companies. Obtaining a residence permit for non-EU citizens is a time consuming procedure.

2. The shareholders of an SA are not required to be registered with the Greek tax authorities, whereas the partners of an LLC have to be registered with the Greek tax authorities and this may prove to be a time consuming procedure;

3. An SA is established by virtue of registration or approval (in case the company’s share capital is higher than EUR 3,000,000 as well as in special cases) of the notarial deed which embodies the company’s Articles of Association (AoA). The announcement of the Ministry of Development, containing a summary of the AoA, must be published in the “Bulletin of Societes Anonymes and Limited Liability Companies” of the Government Gazette. Generally, the registration of a SA requires approximately one to two working days after submission of relevant documentation. However, the time period may be extended to 10 working days, in the case that a special approval by the Ministry of Development is required. Whereas a LLC is established by a notarial deed, which incorporates the company’s AoA, filed with the relevant authority (Registry with the Court of First Instance). A summary of the AoA must be published in the “Bulletin of Societes Anonymes and Limited Liability Companies” of the Government Gazette. Such registration usually takes three to five working days after the signature of the notarial deed;

4. An SA company is supervised by the Greek Ministry of Development (Prefecture), which necessitates certain filings to be performed (e.g., minutes of BoD, general announcements, financial statements, etc.). Whereas, at least at this stage, no supervising authority exists for an LLC and thus its filing requirements are less restrictive.

As of May 2010, there is a draft law in place that is expected to materially enhance and simplify the formation process for all Greek companies.
Corporate taxes in Guatemala

Significant developments

No significant corporate tax developments noted for Guatemala in the past year.

Taxes on corporate income

The tax system of Guatemala is a unitary system, whereby income of all kinds, other than capital gains, is lumped together and subject to a single tax. The components of gross income subject to tax are usually business income, interest, dividends, rent, salaries and services. Dividends and other income payable abroad are taxed separately by way of withholding taxes.

There are two income tax regimes: general and optional.

General income tax regime
A rate of 5% is applicable to a company's gross income from Guatemalan sources (less exempt incomes).

A rate of 5% on gross revenue is applicable to juridical entities and individuals performing mercantile and non-mercantile activities, domiciled in Guatemala.

The tax is payable under flat tax withholdings (the tax is to be retained by either the customer or the recipient of services) or by direct remittances to the tax office made monthly within the first 10 working days of the month following the invoice date.

Optional income tax regime
A rate of 31% is applicable to a company's taxable income from Guatemalan sources.

A rate of 31% is applicable on net income of individuals or juridical entities domiciled in Guatemala. Under this system, the tax is determined and paid at the end of each quarter, without prejudicing the end-of-period final tax liquidation.

The annual final tax liquidation period begins on 1 January and ends on 31 December of each year.

Under this system, income taxes are payable as advance quarterly payments, and the balance is due upon filing the returns, which are due after the end of the fiscal period (31 December) but no later than 31 March of each year. Quarterly advance tax payments are applied to the final income tax liability computed as of the end of year.
Guatemala

The income tax return shall be accompanied by the documents required by the regulations, which might include:

- A balance sheet;
- A statement of results of operations;
- A statement of cash flows; and
- A statement of cost of production.

Documents must be duly certified by a professional or an independent accounting firm. The financial statements that accompany the return shall agree with both those recorded in the financial statements ledger and those destined for publication.

Both the income tax return and exhibits thereto shall be signed by the taxpayers, their agent or their legal representative or by any other responsible persons so determined by this law and the tax code.

Salaries and wages, dividends, or profits and fees are subject to withholding taxes. Remittances abroad for services, commissions, interest, rents, royalties and technical service fees are subject to flat income tax withholdings.

Although both business enterprises and individuals are required to file tax returns, individuals are not required to file tax returns if their annual income from personal services does not exceed GTQ 36,000 or if their income from personal services has been subject to withholding taxes in amounts no less than the tax due.

Corporate residence

The place of incorporation determines corporate residence. Any entity incorporated according to Guatemalan law is required to have its fiscal and corporate domicile in Guatemalan territory.

Other taxes

Value-added tax
A 12% value-added tax (VAT) is levied on the sale or transfer of merchandise and on non-personal services rendered or effected in Guatemala. The tax is payable to the government by way of the invoice method, whereby the tax charged to the customers is offset by the VAT paid over purchases, and the government collects the net resulting amount. The issuance and circulation of credit titles is VAT-exempt.

Sale of goods
The taxable amount on the sale of goods includes the sales price less any discounts provided under sound commercial practices plus other charges shown on the invoice.

Services
The taxable amount of services includes the price of the service, less any discounts provided under sound commercial practices, plus financial charges and products used to render the services.

Other issues
1. Imports: The tax base is the value declared for import duties’ computation purposes.
2. Leases of movable or immovable property: The tax base is the value of the lease.
Exempted sales and services

• Importations made by:
  • Cooperatives legally constituted as registered on imported machinery, equipment, and other goods relating to the activity or service of the cooperative;
  • Individuals and juridical entities under temporary importation regulations; and
  • Diplomatic and consular missions accredited before the Guatemalan government.
• Banking institution services and their agents.
• The issuance, circulation and transfer of credit bonds, value bonds and stocks of any kind.
• Interest accrued by credit bonds and other obligations issued by mercantile partnerships, negotiated through an authorised stock exchange.
• Exports of goods and services.
• Contributions and donations to educational, cultural, assistance or security service partnerships, constituted as not-for-profit entities.

Stamp taxes
Other than sales invoices, contracts and documents subject to VAT and other minor exemptions, a stamp tax must be paid on all documents covering commercial and legal transactions (e.g., collection of dividends), either by preparing the document on papel sellado, which is special stamped paper, or by affixing stamps on the documents. This tax is also assessed on documents issued abroad, other than drafts or promissory notes and commercial invoices from foreign suppliers. Letters of credit and acceptances involving international transfers of funds are generally exempt from stamp taxes. The normal tax rate is 3% and is calculated on the face value of the documents or on the gross value of the related transaction.

Real estate tax
Real estate taxes are assessed annually at GTQ 2 per thousand on declared property values of from GTQ 2,000 to GTQ 20,000, at GTQ 6 per thousand on values from GTQ 20,000 to GTQ 70,000, and at GTQ 9 per thousand on values in excess of GTQ 70,000 (e.g., property valued at GTQ 1,000,000 will pay real estate taxes of GTQ 9,000).

Inheritance and gift taxes
Recipients of inheritances, legacies, and gifts of personal property, real property or other rights in Guatemala are subject to inheritance taxes. Inheritance, legacies, or gifts of personal property located abroad but publicly deeded in Guatemala and debt waivers executed in Guatemala are also subject to tax. The tax is levied at progressively higher rates on amounts up to GTQ 50,000 at 1% to 9% when the recipients are related to the donor (at least 12% if not) and at 6% to 14% on amounts in excess of GTQ 500,000 (at least 25% for nonrelated recipients).

Incentive stock option (ISO) tax
The ISO tax rate of 1% is assessed on the net assets of a corporation, or on the gross income of a corporation, whichever is higher, and there is no limit on the amount to be paid. Tax paid may be credited against the corporation’s income tax. If the annual business tax exceeds the income tax, no reimbursement is possible.

The tax is to be paid quarterly on the basis of the corporation’s opening balance sheet for each fiscal period.
Guatemala

**Social security contribution**
Corporations contribute 12.67% of their monthly payroll and employees contribute 4.83% of their monthly salary to social security.

**Tax on interest income**
Interest income earned by domiciled persons other than banks is subject to a flat withholding tax rate of 10%. The interest taxed must be included by taxpayers in their income tax returns as non‑taxable income.

**Branch income**
Foreign‑source income received by a domestic corporation is generally not considered to be from Guatemalan sources for income tax purposes. In Guatemala, individuals and business enterprises are taxed on their income derived primarily from national sources. Expenses incurred abroad by non‑residents in connection with income earned from Guatemalan sources cannot be deducted for income tax purposes by merely having the supporting receipts, as the regulations to the law do not permit such a deduction for these purposes.

**Income determination**

**Capital gains**
Capital gains taxes are equivalent to 10% in the general income tax regime, and to 31% in the optional income tax regime of such gains as a flat tax. Capital losses can be netted only against capital gains.

**Inter-company dividends**
Dividends from domestic subsidiaries and other domestic corporations are not subject to income tax withholdings if Guatemalan income tax has been paid. However, a 3% stamp tax must be paid upon dividend payment.

**Foreign income**
Foreign‑source income received by a domestic corporation is generally exempt from Guatemalan income tax.

**Stock dividends**
Stock dividends are permitted by the Commercial Code and are subject to a 3% stamp tax upon dividend payment.

Individuals and business enterprises, national and foreign, resident or domiciled in Guatemala are taxed on their income from sources within the country. In addition, personal, professional and technical services are also subject to tax when rendered abroad and charged to persons or entities resident or domiciled in Guatemala or when rendered in Guatemala and charged abroad. The law allows for two systems for income tax payment purposes, at the taxpayer’s option.

**Deductions**
Deductions apply only under the optional income tax regime.
**Depreciation and depletion**
Depreciation is generally computed on a straight-line basis. Upon request by the taxpayer, the tax authorities may authorise other depreciation methods. The maximum annual rates allowed as deductible expenses are the following:

<table>
<thead>
<tr>
<th>Asset Type</th>
<th>Deductible Rate</th>
</tr>
</thead>
<tbody>
<tr>
<td>Building and improvements</td>
<td>5%</td>
</tr>
<tr>
<td>Machinery and equipment</td>
<td>20%</td>
</tr>
<tr>
<td>Furniture and fixtures</td>
<td>20%</td>
</tr>
<tr>
<td>Vehicles</td>
<td>20%</td>
</tr>
<tr>
<td>Tools</td>
<td>25%</td>
</tr>
<tr>
<td>Tree and vegetable species</td>
<td>15%</td>
</tr>
<tr>
<td>Computer equipment and software</td>
<td>33.33%</td>
</tr>
<tr>
<td>Any other depreciable asset</td>
<td>10%</td>
</tr>
</tbody>
</table>

Tax depreciation must conform to book depreciation.

**Payments to foreign affiliates**
Deduction for royalties will be allowed up to 5% of gross income. Charges for technical service fees are deductible up to 1% of gross income or 15% of total salaries paid to Guatemalans, whichever is larger.

**Taxes**
All taxes other than income tax and VAT are deductible.

**Net operating losses**
Operating losses may not be carried forward for deduction from otherwise taxable profits.

**Employee pension/retirement funds**
The deduction of provisions to establish or increase employee pension and retirement funds or reserves is allowed, provided the government approves the related plans.

**Severance compensation payments**
Severance compensation payments are allowed as deductible expenses as well as limited allocations (not to exceed 8.33% of total annual salaries and wages) to a reserve for severance compensation. Provisions pertaining to actual liability for severance compensation per year are also allowed, provided the related plans, based on collective bargaining agreements, are approved by the government.

**Interest expense**
The deduction of interest expense is limited to a maximum of 15% annually in excess of the authorised rate for commercial banks.

**Donations**
Duly proven donations made to the government, the municipalities and their agencies, as well as to duly authorised not-for-profit welfare, social service and scientific associations and foundations, and universities, political parties, and guild entities are deductible. The maximum deductible amount for income tax purposes of each period shall not exceed 5% of the donor’s net income up to a maximum of GTQ 500,000 per year.
Guatemala

**Group taxation**

No consolidation for tax purposes is permitted as each group entity is treated as an independent taxpayer, which shall file its own tax return.

**Tax incentives**

Exemption from payment of import duties on machinery, equipment and raw and packaging materials and from income tax is available for those corporations classified as exporting companies. These exemptions also apply to free trade zones. (Decrees 29-89, 65-89, and others).

The Law of Promotion and Development of Exports Activities and Drawback Industries is known in Guatemala as maquila. Decree No. 29-89. This law seeks to promote, encourage and develop the manufacture of products within areas controlled by the Customs Authority for export to countries outside the Central American region, as well as to regulate exporting and drawback activities.

The exporter may apply for authorisation to operate under any of the three systems provided by the law:

- Export under a temporary admission system;
- Export under the reimbursement of duties system; or
- Export under the total added national component system.

Tax incentives and benefits:

- Exemption of taxes, import duties and other charges on imports of machinery and equipment, including VAT;
- Discontinuance of VAT payments on temporary raw material imports, etc; and
- Exemption of income tax for 10 years on profits obtained under this law.

**Free Trade Zones Law. Decree No. 65-89**

The law seeks to encourage and regulate the establishment of free trade zones that promote domestic development by activities carried out within certain zones, particularly those that tend to strengthen export activities, generate employment and transfer technology.

Tax incentives and benefits:

- Import duties exemption; and
- Income tax exemption.
  - Ten-year period for the administrative agency;
  - Ten-year period for industrial & service permit holders;
  - Five-year period for commercial permit holders;
  - Exemption of real estate taxes for a five-year period;
  - Exemption of tax stamps on the conveyance of title over properties;
  - Dividends or profits distributed by the administrative agency and permit holders shall also be considered tax-exempted income;
  - Exemption of custom duties and any other charges on import and consumption of fuel oil, bunker, butane and propane gas used exclusively in the Free Trade Zone; and
Foreigners working in the Free Trade Zone are subject to the provisions of the immigration law and the Labour Code.

**Free Trade Zone “Santo Tomas de Castilla”-ZOLIC- Decree No. 22-73.**
The Free Trade Zones are land areas subject to a special customs regime, whereby individuals or enterprises manufacture or commercialise products for export or reexportation, or offer international trade-related services.

Tax incentives and benefits:

- Taxes exemption;
- Import duties exemption; and
- Real estate tax exemption.

**Withholding taxes (WHT)**

On payments to non-domiciled foreign corporations or individuals:

<table>
<thead>
<tr>
<th>Description</th>
<th>%</th>
</tr>
</thead>
<tbody>
<tr>
<td>Dividends, profit participations, earnings, and other benefits (1)</td>
<td>10</td>
</tr>
<tr>
<td>Commissions, salaries</td>
<td>10</td>
</tr>
<tr>
<td>Interest (2)</td>
<td>10</td>
</tr>
<tr>
<td>Professional fees, royalties, technical service fees</td>
<td>31</td>
</tr>
</tbody>
</table>

Notes

1. For taxpayers that already paid corporate income tax, there is no withholding tax.
2. Interests will not be taxed (no withholding applies) when:
   - These interests are paid to a legal bank or financial institution;
   - If the interests are in connection with a loan registered in the Guatemalan banking system; and
   - The loan was used in taxable activities.

**Tax treaties**

Guatemala has no tax treaties in force.

**Tax administration**

**Returns**

The fiscal year runs from 1 January to 31 December.

**Payment of tax**

*General income tax regime*

Tax rate 5% on gross income. There are two kinds of payments methods: direct payment method and withholdings method.

Taxes on income are governed by the income tax law, Ley del Impuesto sobre la Renta, and its related regulations. Administration of the law is vested with the SAT.

*Optional income tax regime*

All corporate taxpayers are required to prepay their estimated annual income tax liability in quarterly instalments. Taxpayers may choose one of the following procedures for computing estimated quarterly tax liability:
Guatemala

1. Tax on income shown by partial closure of accounts or computation of presumed liquidation of operations at the end of each quarter;
2. Tax on 5% of overall gross income earned during the corresponding quarter of the preceding year (5% of the 30% income tax rate = 1.5%); or
3. Tax equivalent to one-fourth of the tax paid for the immediately preceding tax year.

VAT
The amount payable to the Superintendencia de Administracion Tributaria (SAT), Guatemala's tax authority, is the difference between the debits and credits of the tax period (one month) and is paid monthly by filing a tax return in the following calendar month at the end of each tax period.

Refunds of VAT
Any tax credits at the end of the period may be carried forward the next month to offset any tax debits that month. No cash refunds are allowed other than to exporters.

Other issues
Accurate and current information regarding taxation in Guatemala is often difficult to obtain as the country lacks reporting services such as those available in the United States and other countries. It is also difficult to determine how the tax laws will be applied in practice in complex situations. The laws and regulations are limited and ordinarily cover only the most common situations. The system of legal precedent resulting from court decisions is narrowly used, and each issue is resolved by reference to the respective codes. Guatemala has shown little interest in tax planning, but it is possible to have informal consultations with the tax authorities and to obtain authoritative rulings in many cases. Discrepancies between government and management criteria are commonly brought to judgment by the Constitutional Court, whose binding sentences generally abrogate the laws in dispute.

The income tax law differs from that of the United States in several basic aspects that may be of interest to a prospective investor. The comments in the preceding sections are of a general nature only; application thereof shall often be determined by reference to other laws regulating the specific industry or taxpayer, in particular, the industrial development laws.

National income is drawn principally from agriculture, poultry and cattle-raising, which together account for two-thirds of the economically active population. Taxes collected by the central government are levied on income, property, bequests and gifts, imports, exports and sales. Local taxes at countrywide level also are levied by the municipalities.
Significant developments

The tax regime underwent radical changes with effect from 1 January 2008 with the introduction of the zero/10 tax legislation. Under this regime, the standard rate of company income tax moved to 0%, with a 10% rate applied to income derived from banking businesses and a 20% rate applied to publicly regulated utility companies and income derived from property located in Guernsey.

The new regime also saw the abolition of the “international company” designation and two categories of exempt company status with effect from 1 January 2008. As a result, a company may no longer be able to negotiate a specific rate of tax with the Income Tax Office. The only companies that may potentially qualify for the exempt company status are certain categories of collective investment schemes and unit trusts.

Taxes on corporate income

Income tax

Companies pay income tax at the standard rate of 0% on taxable income.

Income derived from a banking business is taxable at 10%. “Banking business” is broadly defined as income that arises as a result of the provision of credit facilities by any type of company and the utilisation of customer deposits. Relief is available for eligible expenses that are allocated against different streams of income.

Any income derived from the exploitation of property located in Guernsey or received by a publicly regulated utility company is subject to tax at the higher rate of 20%.

Exempt companies

Some collective investment schemes and unit trusts may qualify for exempt status, which would place them completely outside the Guernsey tax regime. For each year for which exempt status is sought, a charge of GBP 600 is levied.

One of the following conditions, among others, must be met for the company to be considered exempt:

- The company is beneficially owned outside of Guernsey; or
- No Guernsey resident individual or company has a beneficial interest in the company (with the exception of shareholders, loan creditors or nominees/trustees).
Loans to participators
If a company makes loans with preferential terms to an individual or entity connected with the company, this will be deemed to be income in the hands of the debtor, and the creditor company will be required to account for, withhold and pay the tax. Certain exemptions apply.

Corporate residence
All Guernsey-registered companies are regarded as residents in the island unless granted exempt company status. In addition, a company will be treated as a resident in Guernsey (regardless of where it is incorporated) if shareholder control is exercised by persons resident in the island.

Other taxes
The dwellings profit tax has been abolished with effect from 28 January 2009.

Branch income
Branch income is taxed in the same manner as companies, at the appropriate rate according to the activity being undertaken.

No further tax is withheld on the transfer of profits abroad to group companies, provided no Guernsey resident individual has an interest in the company.

Income determination
Inventory valuation
Inventory is valued at the lower of historical cost or net realisable value. Use of last-in, first-out (LIFO) is not permitted. Generally, there are no material differences between accounts prepared on a normal accounting basis and those prepared on a tax basis.

Capital gains
Capital gains are not subject to tax in Guernsey.

Inter-company dividends
All dividends paid by a standard tax-paying company (0%) are deemed to have been paid from income arising after 31 December 2007, (i.e., after the introduction of the new zero/10 tax regime) unless the company elects to have them treated otherwise.

Foreign income
Resident corporations are liable to tax on their worldwide income. Income tax is levied on foreign branch income when earned, and on investment income from foreign dividends, interest, rents and royalties. Double taxation is mitigated either through unilateral relief (by giving credit for foreign taxation of up to three-quarters of the effective Guernsey rate) or by treaty relief.

Stock dividends
Stock dividends may be treated as income.
Deductions

Capital allowances
Depending on the life of an asset, annual allowances (depreciation for tax purposes) are available on machinery and equipment, including vehicles, on diminishing-balance or on straight-line basis at varying standard rates. Obsolescence allowance is given when, on disposal, proceeds of a sale are less than the unclaimed annual allowances on machinery and equipment being replaced. Any surplus of realisation value of an asset over its tax written-down value is liable to tax, up to the total amount of allowances claimed.

Limited allowances are applicable to buildings but not to the depletion of natural resources.

Net operating losses
Losses from one class of income may be used to offset the profits from another class of income if both classes are subject to tax at the same rate. Unrelieved trading losses may be carried forward to offset future trading income.

Upon cessation of trade, operating losses arising from balancing allowances may be carried back to the previous two years of charge to be relieved against past trading profits.

Payments to foreign affiliates
Guernsey-source royalties and long-term interest are subject to taxation at source. Relief is obtained by the retention of the tax deducted. Short-term interest, unless owed to an authorised bank, is not deductible, unless the advance in respect of which it is paid is used wholly and exclusively for the purposes of the trade. Other fees must be paid on an arm’s-length basis.

Taxes
Local income tax paid is not deductible in computing taxable income.

Other significant items
Normally, business deductions that are incurred wholly and exclusively for the purposes of the trade are allowed.

Group taxation
Group loss relief may be claimed when both companies are members of the same group and the companies are either carrying on business in Guernsey through a permanent establishment (PE) or incorporated in Guernsey. Loss relief is available only against income taxed at the same rate.

A claim for group loss relief must be made by the claimant company within two years after the end of the calendar year in which the relevant accounting period ended, and the claim must be accompanied by a declaration by the surrendering company that it consents to the surrender.

Tax incentives
In view of the low rate of tax, no special incentives are available to local businesses.
**Guernsey, Channel Islands**

**Withholding taxes (WHT)**

**Deemed distributions**
A company will be required to withhold tax on any distributions made to or in reference to any Guernsey resident individual shareholders.

Furthermore, following certain trigger events, such as the sale of shares, death of the beneficial member, etc., the company is deemed to have distributed all of the Guernsey resident shareholder’s share of the company’s undistributed profits accumulated since 1 January 2008. All investment income is deemed to be distributed as it arises.

Although the liability to tax is the shareholder’s, the company is obligated to account for, withhold and pay tax to the Income Tax Office and may then claim this back from the shareholder.

**Agency**
A company also is required to withhold tax when it is acting as an agent and making payments to a non-resident liable to Guernsey tax.

**Tax administration**

**Returns**
An income tax return is required to be filed one year and 15 days after the end of the calendar year in which the accounting period ends. Should a company meet the conditions below, a simplified return may be filed without either a computation or financial statements.

In order to qualify for a simplified return, a company must have none of the following:

- Guernsey employees (other than directors);
- Guernsey resident individual beneficial owners;
- Income from utilities (e.g., Guernsey water or electricity companies, etc.);
- Income from Guernsey properties;
- Income from a banking business;
- Loans to Guernsey participators; or
- Distributions made to Guernsey resident individuals.

Should a company have Guernsey resident individual beneficial members and/or make loans to participators, it will be required to submit quarterly returns accounting for distributions and deemed distributions and loans advanced.

**Payment of tax**
In Guernsey, tax is payable in two instalments, on 30 June and 31 December in the year of charge (calendar year). If liabilities have not been determined, this may necessitate initially raising estimated assessments based on prior year figures and raising a final assessment when the figures are agreed.

Significant developments

Tax reforms were initiated in Decree 17-2010 that became effective on 12 May 2010.

First, a 10% tax on the distribution of profits or dividends to non-resident companies was initiated.

Distribution or payment of dividends or any other form of distribution of retained earnings or reserves to resident or domiciled individuals will be taxed at 10%.

Next, the Temporary Solidarity Contribution tax rate was increased to 10% for 2010 and 2011, 6% for 2012, 5% for 2013, 4% for 2014 and 0% for 2015.

Taxpayers with annual income over HNL 15 million will be required to withhold 1% from the payment to its suppliers on purchase of goods and machinery, if they do not use the account regime. This withholding tax will be credited against the annual income tax.

Taxes on corporate income

The corporate tax rate for a resident company is 25% of the company's period income.

In addition, the Temporary Solidarity Contribution tax rate has been increased to 10% for 2010 and 2011, 6% for 2012, 5% for 2013, 4% for 2014 and 0% for 2015. This is levied on all companies with taxable income in excess of HNL one million. For 2009 this tax was 5%. In 2007, the law established this tax as deductible for income tax purposes, however, beginning in 2008, this tax became a surcharge and non-deductible for income tax purposes.

Honduran resident companies are taxed on their worldwide income. Non-resident companies are subject to income tax only on income derived from Honduran sources.

Corporate residence

The place of incorporation is regarded by Honduran authorities as the corporate residence. Non-resident companies are companies incorporated/registered outside of Honduras. However, income taxes on corporations are levied on local income regardless of the place of incorporation. In addition, any person, natural or legal, resident in Honduras is subject to tax on both local and foreign income.
Honduras

Other taxes

Taxes and royalties
Royalties are taxed in the same manner as general income if the recipient is a local company or branch. Non-resident recipients are subject to 25% withholding tax on royalties. Royalties from mining operations are subject to 10% withholding tax. Effective 12 May 2010 all royalties paid to non-resident recipients are subject to 10% withholding income tax.

Taxes on dividends
Honduran resident individuals and non-resident individuals or companies are subject to 10% withholding tax on cash dividends. The income from dividends is considered “other income”, thus non-taxable under the general income tax rates. Stock dividends are not taxable.

Net assets tax
The net assets tax applies to the gross value of assets less reserve for accounts payable and any accumulated depreciation allowed under the income tax law and other deductions allowed by law. It is a 1% tax of the net asset value of the company. The law also allows a special deduction of HNL 3,000,000. The net assets tax is in lieu of the corporate income tax when the corporate income tax is less than the amount due for net asset tax. Resident companies during their preoperative period and companies operating in Free Zones, among others, are exempt from the net assets tax.

Non-resident companies do not apply for the Net Assets Tax.

Capital gains tax
A 10% tax is applied on capital gains, regardless of the person's residence status.

Sales tax
Sales tax is charged on all sale and purchase transactions of goods and services made in Honduran territory. The general tax rate is 12%. It applies to most goods and services, with the exception of machinery and equipment, basic grains, pharmaceutical products, raw materials for the production of non-taxable goods, petroleum products, school supplies and insecticides, among others.

The import and sale of beer, other alcoholic beverages, cigarettes and other tobacco products are subject to 15% tax.

There is a 15% tax rate applicable to some PCS, cellular, internet broad band, cable TV and energy services, depending on the amount of consumption billed by the supplier.

There is an 18% tax rate levied on first class and business class air tickets.

Municipal taxes
Companies doing business in Honduras are also subject to the rules and regulations of the respective municipality. Taxes and obligations are ruled by the “Plan de Arbitrios”. Some of these tax obligations are

- Industry, commerce and service tax – Based on sales volume per year;
- Personal municipal tax – (Individual tax);
- Public services tax – Tax paid for services such as waste management;
Honduras

- Real estate – Tax on asset and asset gains; and
- Sign tax – Taxation on public advertising.

The following table summarises other significant taxes.

<table>
<thead>
<tr>
<th>Types of tax</th>
<th>Rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Sales tax</td>
<td>12% in general, 15% to some telecommunication, PCS, cellular, internet broadband, cable TV and energy services and 18% to business class airline tickets</td>
</tr>
<tr>
<td>Customs duties</td>
<td>1 to 20</td>
</tr>
<tr>
<td>Payroll taxes or contributions, paid by employers</td>
<td>Social security 7.2% with a ceiling of HNL 4,800 INFOP 1% Housing fund – RAP/FOSOVI 1.5%</td>
</tr>
</tbody>
</table>

Municipal taxes:

- Real estate tax; imposed on companies and individuals owning real estate Various
- Industry trade and service municipal tax; imposed monthly on income derived from the operations of companies; rates vary according to the annual production volume, income or sales:
  - Up to HNL 500,000 0.0003
  - From HNL 500,001 to HNL 10,000,000 0.0004
  - From HNL 10,000,001 to HNL 20,000,000 0.0003
  - From HNL 20,000,001 to HNL 30,000,000 0.0002
  - Over HNL 30,000,000 0.00015

**Branch income**

Branch income is subject to income tax at the rates applicable for corporate income. Before 12 May 2010, there was no withholding tax on dividends distributed in the country or abroad.

Currently, there is a 10% withholding tax rate on dividends.

**Income determination**

Income is computed in accordance with generally accepted accounting and commercial principles, subject to certain adjustments required by the tax law.

- Inventories;
- Provisions;
- Tax Depreciation;
- Net operating losses/carryforwards;
- Taxes; and
- Capital gains.
Honduras

**Deductions**

The net taxable income of an enterprise is determined by deducting all the ordinary and necessary expenses incurred in the creation of income, including amortisation and depreciation; municipal taxes; donations made in favour of the State, the Central District, the Municipalities, and legally recognised educational institutions, charities and sporting facilities; mandatory employer-employee contributions to the social security system; and “reasonable” charges for royalties and management services.

In general, all expenses incurred in the generation of taxable income are considered as deductible for income tax purposes. However, there are some “non-deductible” expenses, even if incurred in the generation of income for example: a) interest paid to owners or shareholders; b) capital losses.

Inventories are generally valued using the first-in, first-out (FIFO), last-in, first-out (LIFO) and weighted-average cost methods.

Provisions for contingent liabilities, such as severance pay, are not deductible for tax purposes; actual payments for those liabilities are considered to be deductible expenses.

Depreciation may be computed using the straight-line method. Companies may obtain authorisation from the tax authorities to use other depreciation methods. However, after a company selects a depreciation method, it must apply the method consistently thereafter. The following are the applicable straight-line method rates for some common assets.

<table>
<thead>
<tr>
<th>Asset</th>
<th>Rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Buildings</td>
<td>2.5 to 10</td>
</tr>
<tr>
<td>Plant and machinery</td>
<td>10</td>
</tr>
<tr>
<td>Vehicles</td>
<td>10 to 33</td>
</tr>
<tr>
<td>Furniture and office equipment</td>
<td>10</td>
</tr>
<tr>
<td>Tools</td>
<td>25</td>
</tr>
</tbody>
</table>

Companies engaged in agriculture, manufacturing, mining and tourism may carryforward losses for three years. However, certain restrictions apply. Losses may not be carried back. Some restrictions apply.

With the exception of the solidarity tax, net asset taxes, income tax and sales tax (i.e., if sales tax paid is used as a credit to net the sales tax payable to the government), taxes and contributions paid to district or municipalities are deductible expenses when determining taxable income.

Capital losses are not deductible to determine the net taxable income. Capital losses can only be netted against capital gains. Capital gains are subject to a tax rate of 10%.

**Group taxation**

No provisions exist for group taxation.
**Tax incentives**

Companies operating under a special tax regime are exempted from income tax, sales tax, customs duties and some municipal taxes. These special tax regimes are:

- Free zone
- Industrial processing zone (“Zona Industrial de Procesamiento” (ZIP))
- Temporary import regime (“Régimen de Importación Temporal” (RIT))
- Tourism incentive law
- Law of the Tourism Free Zone of the Bay Islands (“Ley de la Zona Libre Turística de las Islas de la Bahía”)
- Law promoting the generation of electric energy with renewable resources (“Ley de Promoción a la Generación de Energía Eléctrica con Recursos Renovables”). There are tax exemptions for projects generating 50MW and over.

**Other incentives**

**Drawback industries**

Special benefits exist for industries that import semi-manufactured materials for assembly in Honduras and export finished products. Benefits consist of duty-free imports of raw materials for subsequent export as manufactured products. Machinery for these industries may also be imported duty-free.

**Withholding taxes (WHT)**

**Withholding taxes for non-residents**

For non-residents in Honduras, any income derived from Honduran sources is taxable under the following schedule of the Income Tax Law:

<table>
<thead>
<tr>
<th>Income source</th>
<th>Tax Withheld (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Real estate and movable property rent, except dividends and interest</td>
<td>10</td>

<td>Any other income not mentioned previously</td>
<td>10</td>
</tr>
</tbody>
</table>
Honduras

**Tax administration**

The Dirección Ejecutiva de Ingresos (DEI) is the tax authority in Honduras. It is responsible for the administration of the tax and customs system. Taxpayers may request approval from the DEI regarding direct or indirect taxes (e.g., accelerated depreciation methods on new assets, acquired by corporations with monetary activities requiring constant technological update, higher installed production capacity and productive re-conversion processes, in order to maintain and strengthen their competitive advantage).

The statutory tax year runs from 1 January through to 31 December. However, taxpayers may apply to use a special tax year by requesting an authorisation from the DEI. Companies must file and pay income tax on 30 April every year. Mandatory advance tax payments are payable each quarter, based on the income tax paid for the preceding tax year.
Significant developments

Developments in tax treaty network
The Inland Revenue Ordinance (IRO) was revised in March 2010 to enable the Hong Kong Special Administrative Region (SAR) Government to obtain and exchange tax information with other jurisdictions other than those of “domestic tax interest”. The legislative change paves the way for the Hong Kong SAR Government to sign comprehensive double tax agreements (CDTA) incorporating the more liberal version of Exchange of Information (EoI) article. Subsidiary legislation was also enacted to provide safeguards against possible abuse of the EoI provisions in a CDTA and for protecting the confidentiality and privacy of the information exchanged.

Following the enactment, the Hong Kong SAR Government signed a CDTA with Brunei, the Netherlands and Indonesia in March 2010 and with Kuwait, Hungary and Austria in May 2010. The newly signed CDTAs have not yet entered into force and are pending the completion of the ratification procedures of the contracting parties. Hong Kong also initialled a CDTA with Switzerland in April 2010, the formal signing of which is pending the completion of the necessary administrative procedures. In addition, agreement in principle on a CDTA has been reached between Hong Kong and Japan according to a press release released by the Hong Kong SAR Government on 31 March 2010. The third protocol to the CDTA between China and Hong Kong was signed in May 2010 to update the EoI article to the more liberal 2004 version of the Organisation for Economic Co-operation and Development (OECD) Model Tax Convention. The protocol has not yet come into force pending the completion of the ratification procedures by both sides.

New guidance on transfer pricing
Two new Departmental Interpretation and Practice Notes (DIPNs) were issued in 2009 addressing the transfer pricing issues in Hong Kong. One focuses on the administrative/procedural issues involved in providing double tax relief in a CDTA context such as when such relief is available and what are the procedures for claiming such relief while the other outlines the Hong Kong Inland Revenue Department (HKIRD)’s view on the legislative framework for transfer pricing in Hong Kong, including the statutory provisions in the IRO and the articles in a CDTA that are relevant to transfer pricing. The latter one also provides guidance on numerous transfer pricing related issues such as the application of the arm’s-length principle, the acceptable transfer pricing methodologies, which are largely in line with the OECD transfer pricing guidelines. Also, it provides for the documentation that taxpayers should consider retaining to support their transfer pricing arrangements, and the interaction between the transfer pricing and sourcing rules in Hong Kong.
Hong Kong

2010/11 budget proposals
In the 2010/11 Budget of the Hong Kong SAR Government, measures were introduced to extend the stamp duty concession in the trading of exchange traded funds to those consisting of not more than 40% holding in Hong Kong shares and to extend the concessory profits tax rate applicable to qualifying debt instruments. The offshore fund exemption regime was also enhanced by revising DIPN 43 – Profits Tax Exemption for Offshore Funds and updating the list of recognised exchanges covered by the exemption. DIPN 43 was revised to clarify that for the purpose of determining the location of a company’s central management and control, the mere fact that the majority of the directors of the management board of the company are resident in Hong Kong would not of itself mean that the company is centrally managed and controlled in Hong Kong, and hence would not adversely affect the application of the tax exemption.

The stamp duty rate on transactions of properties valued over HKD 20 million is increased from 3.75% to 4.25%; and such transactions will no longer be eligible for deferred payment of stamp duty on chargeable agreement for sale (this was proposed in the 2010/11 Budget and at the time of writing, the legislation giving effect to this proposal has not been enacted).

Taxes on corporate income
Hong Kong adopts a territorial basis of taxation. Profits tax is payable by every person (defined to include corporation, partnership and sole proprietorship, etc.) carrying on a trade, profession or business in Hong Kong on profits arising in or derived from Hong Kong from that trade, profession or business. However, capital gains and receipts that are capital in nature are not subject to tax. Dividends are also not subject to tax in Hong Kong. The tax residence of a person is generally irrelevant for profits tax purposes. The tax treatments of public and private companies are the same.

Certain income that would not otherwise be subject to Hong Kong profits tax is deemed to arise in or be derived from Hong Kong from a trade, profession or business carried on in Hong Kong and thus becomes taxable in Hong Kong. This includes royalties received by a non-resident for the use of or right to use in Hong Kong a patent, design, trademark, copyright material, or secret process or formula or other property of a similar nature.

In general, expenses that are revenue in nature and incurred in the production of assessable profits are allowed for deduction. Please refer to the section Deductions for more details.

Tax losses can be carried forward indefinitely to offset against assessable profits in subsequent years of assessment but cannot be carried backward.

The tax rates are 16.5% for corporations and 15% for unincorporated businesses for year of assessment 2010/11.

There are special rules for determining the tax liabilities of certain industries such as shipping, air services, and financial services. Incomes from certain qualifying debt instruments are subject to concessory rate. Offshore funds having Hong Kong fund managers and investment advisors with full discretionary powers will be exempt from Hong Kong profits tax on profits derived in Hong Kong from six types of "specified
transactions” which are carried out or arranged by “specified persons”. However, there are also specific anti-avoidance provisions in the IRO deeming certain resident persons to be subject to profits tax on their share of the non-resident person’s tax exempt profits.

**Corporate residence**

In general, for Hong Kong profits tax purposes, corporate residency is not important in determining taxability of an entity. The decisive factors for taxability are (1) whether a corporation is carrying on a trade, profession or business in Hong Kong and (2) whether the profits are arising in or derived from Hong Kong. However, where it is necessary to determine the corporate residence, such as for the purpose of CDTA, a company incorporated in Hong Kong or a company that is normally managed or controlled/centrally managed and controlled in Hong Kong is considered as Hong Kong tax residence.

For Hong Kong profits tax purposes, whether a foreign corporation is carrying on a trade, profession or business in Hong Kong and the source of profits rather than whether there is a permanent establishment in Hong Kong are the decisive factors in determining taxability.

**Other taxes**

**Value-added tax/goods and services tax/sales tax**

Hong Kong does not have a value-added tax (VAT), goods and services tax or sales tax.

**Stamp duty**

Stamp duty is charged on transfer of Hong Kong stock by way of sale and purchase at 0.2% per transaction, payable half by the vendor and half by the purchaser. Hong Kong stock is defined as stock the transfer of which must be registered in Hong Kong.

For conveyance on sale of immovable property, the stamp duty payable depends on the property consideration and ranges from a flat rate of HKD 100 (for property consideration of up to HKD 2,000,000) to the highest rate of 4.25% of the consideration of the property (for property consideration exceeding HKD 20,000,000), with marginal relief upon entry into each higher rate band. For lease of immovable property, stamp duty is calculated at a specified rate of the annual rental that varies with the term of the lease. Currently, the applicable rate ranges from 0.25% (for lease period of not more than one year) to 1% (for lease period of more than three years).

Exemption is available to certain transactions such as transfer of shares between associated corporate bodies and certain stock borrowing and lending transactions, provided that the specified conditions for exemption are satisfied.

**Excise tax**

See the discussion on Customs duties.

**Property tax**

Property tax is charged to the owner of any land or buildings (except government and consular properties) in Hong Kong at the standard rate of 15% on the net assessable value of such land or buildings. Net assessable value of a property is the consideration...
payable to the owner for the right to use the land or buildings less rates paid by the owner and a 20% notional allowance.

Rental income derived by a company from a Hong Kong property is subject to profits tax. The company that is subject to profits tax may apply for an exemption from property tax in respect of the property. If no exemption is applied, the property tax paid can be used to offset against the profits tax payable by the company.

**Transfer tax**
Hong Kong does not have a transfer tax.

**Turnover tax**
Hong Kong does not have a turnover tax.

**Business registration**
Every person who carries on a business in Hong Kong is required to apply for business registration with a fee within one month from the date of commencement of the business.

Special registration and licence fees are applicable to banks and deposit-taking companies.

**Customs duties**
There is no tariff on general imports. However, duties are levied on limited categories of dutiable commodities (i.e., tobacco, liquor, methyl alcohol and hydrocarbons) regardless of whether they are imported or locally manufactured.

**Capital duty**
A fee of HKD 1 for all or part of HKD 1,000 of the nominal share capital, or increase in nominal share capital, is payable as capital duty. The fee is capped at HKD 30,000 per case counted on a company (rather than group) basis.

**Government rates and rent**
Rates are an indirect tax levied on properties in Hong Kong. Rates are charged at 5% of the rateable value which is the estimated annual rental value of a property at the designated valuation reference date of 1 October.

Privately owned land in Hong Kong is normally held by way of a government lease under which rent is payable to the Hong Kong SAR Government in return for the right to hold and occupy the land for the term (i.e., duration) specified in the lease document. Currently, government rent is calculated at 3% of the rateable value of the property and is adjusted in step with any subsequent changes in the rateable value.

**Branch income**
The tax rate for branch is the same as that for corporations. The Hong Kong profit of a foreign corporation with a branch in Hong Kong is determined according to the accounts maintained for the Hong Kong operation (or business). If the Hong Kong accounts do not disclose the true profits arising in or derived from Hong Kong attributable to the Hong Kong operation, the Hong Kong profit will be computed according to the ratio of turnover in Hong Kong to total turnover (or the proportion of Hong Kong assets over total assets) on the worldwide profits. Alternatively, the HKIRD
tax assessor may estimate the profits of the Hong Kong branch. In certain situations, the profits of the Hong Kong branch could be estimated based on a fair percentage of the turnover in Hong Kong.

**Income determination**

**Capital gains**
Gains from realisation of capital assets or receipts that are capital in nature are not taxed.

**Dividend income**
Dividends from sources either inside or outside Hong Kong are not subject to Hong Kong profits tax. Hong Kong corporations may declare bonus issues (i.e., stock dividends) which are not taxable in the hands of the recipients.

**Foreign income**
Hong Kong resident corporations are not taxed on their worldwide income. Foreign-sourced income, whether or not remitted to Hong Kong, is not taxed. As such, there is no specific tax provision dealing with deferral or non-remittance of foreign earnings. Nor does Hong Kong have any controlled foreign corporation legislation.

**Interest income**
Interest income received by or accrued to a corporation carrying on a trade or business in Hong Kong is subject to profits tax. Exemption is provided to interest income derived from any deposit placed in Hong Kong with a financial institution, unless the deposit secures a borrowing the interest expense of which is deductible. This exemption, however, does not apply to interest accruing to a financial institution.

Interest accruing to a bank or financial institution will be deemed to be sourced and taxable in Hong Kong, if the interest arises through or from the carrying on of business in Hong Kong by the bank or financial institution.

**Inventory valuation**
Inventory may be stated at the lower of cost or market value. Last-in, first-out (LIFO) may not be used for tax purposes. First-in, first-out (FIFO) must be consistently applied.

The prevailing accounting standards require financial assets and liabilities held for trading purpose (e.g., shares and securities held as trading stock) to be carried at market value, with fluctuations in values of such assets and liabilities taken to the profit and loss accounts, irrespective of whether the profits or losses are realised. The HKIRD requires that this accounting treatment be followed in computing the assessable profits for tax purposes.

There are special tax provisions for valuation upon cessation of a business under which inventory is valued at market value, unless it is sold to a person carrying on business in Hong Kong who may deduct a corresponding amount as the cost of the inventory in computing the assessable profits.

**Partnership income**
Partnership business is taxed as a single entity though an individual partner can use its share of losses incurred by a partnership to offset against the assessable profits of its other business. In general, there is no special registration requirement other than
Hong Kong

business registration for a partnership. The assessable profits of a partnership are basically determined in the same way as those of a corporation with certain special rules e.g., salaries or other remunerations paid to a partner or a partner’s spouse are not deductible.

**Royalties income**
Royalties paid or accrued to a non-resident for the use of or right to use in Hong Kong or outside Hong Kong (if the royalties are deductible in ascertaining the assessable profits of a person for Hong Kong profits tax purposes), a trademark, patent, design, copyright material, secret process or other property of a similar nature; or for the use in Hong Kong of cinema or television tape or any sound recording, are deemed to be taxable in Hong Kong.

A total of 30% of the sum receivable is deemed to constitute profits subject to tax in normal situations. Where such royalties are received by or accrued to an associated corporation, however, 100% of the sum may be deemed to constitute profits.

**Unrealised exchange gains/losses**
In general, unrealised gains/losses are taxable/deductible if they are recognised in the profit and loss accounts in accordance with the generally accepted accounting principles, provided that they are revenue in nature and with a Hong Kong source. The nature and source of exchange gains/losses are determined by the nature and source of the underlying transactions. Exchange gains/losses arising from ordinary business transactions (e.g., trade receivables or payables) are taxable/deductible whereas exchange gains/losses arising from capital transactions (e.g., sale of capital assets) are non-taxable/non-deductible.

**Deductions**
Expenses that are incurred for producing profits chargeable to tax and that are not capital in nature are generally tax deductible. In addition, special tax relief is available for certain capital expenditure. There are special rules for deduction of certain expenses (e.g., interest expenses).

Accounting treatments are usually followed in determining the assessable profits except when there is explicit rule in the IRO. Accrued expenses recognised in the profit and loss accounts in accordance with the generally accepted accounting principles are usually deductible if they are incurred for producing profits chargeable/subject to tax and are not capital in nature.

Expense items of which a tax adjustment is necessary in determining the amount of taxable profits from the accounting profits include: tax depreciation allowance vs. accounting depreciation, expenses that are capital in nature, general provisions that are non-deductible and non-deductible interest expenses on borrowings used to finance non-income producing assets, etc.

Set out below are the Hong Kong profits tax treatments of some common expense items.
Interest expenses
There is no thin capitalisation rule in Hong Kong. However deduction of interest expense is subject to stringent and complicated rules which are designed to guard against loan arrangements with an intention to avoid Hong Kong profits tax.

Bad debts
A bad or doubtful debt incurred in any trade, business or profession, proved to the satisfaction of the HKIRD to have become bad during the basis period for a year of assessment, is deductible. The deduction is limited to debts which were included as a trading receipt in ascertaining the taxpayer’s assessable profits or debts in respect of money lent in the ordinary course of a money-lending business in Hong Kong.

If any bad or doubtful debt which has previously been allowed as a deduction is ultimately recovered, it will be treated as taxable profits of the basis period in which it is recovered.

Charitable contributions
A deduction is allowed for cash donations to approved charities made in the basis period for a year of assessment if the aggregate of such donations is not less than HKD 100. The deduction is limited to 35% of the assessable profits of the year of assessment.

Fines and penalties
Fines and penalties are generally not deductible as the HKIRD does not consider them to be expenses incurred for producing profits chargeable/subject to tax.

Contingent liabilities
Generally speaking, general provisions for expenses are not deductible whereas specific provisions are deductible if the HKIRD is satisfied that the amount has been incurred (i.e., the taxpayer has a legal/contractual obligation to pay such amount in future) and that the provision represents a reasonably accurate estimate of the future liability.

Tax depreciation of fixed assets
Tax depreciation allowances/deductions are available for capital expenditure incurred on the construction of buildings or structures and in the provision of machinery and plant for trade or business purposes.

1. Industrial buildings and structures – An initial allowance of 20%, in addition to an annual allowance of 4%, of the cost of construction or cost of purchase from a developer, is granted for an industrial building or structure occupied for the purpose of a qualifying trade. Provision is made for balancing allowances or charges in the year of assessment in which the building is disposed of to adjust the written-down value of the building to the disposal price. Balancing charges are restricted to the total of initial and annual allowances previously given.
2. Commercial buildings and structures – An annual allowance of 4% of the capital expenditure incurred on the construction has applied since 1 April 1998. A balancing allowance or charge applies upon disposal. Balancing charges are restricted to the total annual allowances previously given.
3. Plant and machinery – An initial allowance of 60% of the capital expenditure on machinery and plant is given for the year of assessment during the basis period in which the expenditure is incurred. An annual allowance is also given for depreciation at three prescribed rates on the reducing value of each of the three depreciation rate “pools”. The three prescribed rates are 10%, 20% and 30%, and
the reducing value of each of the three depreciation rate pools is original cost less initial and annual allowances and sales proceeds. Provision is made for balancing charges when machinery and plant within one of the three depreciation rate pools are sold or disposed of and the reducing value of that pool is less than the sale price, which is capped at the original amount incurred in the pool. In addition, balancing allowances or charges may be applicable upon cessation of business. Otherwise, sales proceeds are deducted in calculating the reducing value on which the annual allowance is calculated.

Book depreciation is adjusted for tax purposes in accordance with the above depreciation allowances granted under the IRO.

**Special deductions**

There are special deduction rules for expenditures incurred (1) for refurbishment of a building or structure, other than a domestic building or structure, (2) on environmental protection installation and machinery, (3) on environment-friendly vehicles, (4) on machinery or plant used specifically and directly for any manufacturing process, computer hardware (other than that which is an integral part of machinery or plant), computer software, and computer systems (collectively known as prescribed fixed assets), (5) for registering trademarks, designs or patents used in the production of taxable profits, (6) on the purchase of patent rights or rights to any industrial information or techniques likely to assist in the manufacture or processing of goods or materials, for use in Hong Kong, and (7) on the purchase of registered trademarks, copyrights and registered designs.

Items (3) and (7) were proposed in the 2010/11 Budget and at the time of writing, the legislation giving effect to these proposals has not been enacted.

**Goodwill**

Cost of acquisition of goodwill/amortisation of goodwill is not deductible as they are capital in nature.

**Net operating and capital losses**

Net operating losses incurred in an accounting year can be carried forward indefinitely to set off against future profits of the business. But a corporation carrying on more than one business may have losses in one business setting off against profits of the others, with any balance being carried forward. Capital losses are not tax deductible.

**Organisational and start-up expenses**

In general, company formation/start-up expenses that are incurred before the commencement of a trade, profession or business and that are for the establishment of the overall income producing structure are capital in nature and not tax deductible.

**Payments to foreign affiliates**

Royalties and service fees paid/payable by a Hong Kong corporation to foreign affiliates are deductible provided they are incurred for the production of profits chargeable/subject to tax. There is no special restriction on the deductibility of these payments. Interest payable to a foreign affiliate is not deductible if the recipient is not chargeable/subject to Hong Kong profits tax on the interest income received.
**Pension expenses**
A deduction is allowed for regular/ordinary contributions to a mandatory provident fund scheme or recognised occupational retirement scheme made by an employer in respect of an employee to the extent that the contributions do not exceed 15% of the employee's total emoluments for the period to which the contributions relate.

Special payments other than the ordinary contributions to a mandatory provident fund scheme or recognised occupational retirement scheme are capital in nature but can be deducted evenly over a five-year period under a specific provision of the IRO.

There are also specific rules for deduction of provisions for contributions to a mandatory provident fund scheme or recognised occupational retirement scheme.

**Payments for directors**
Director fees or other remunerations paid by a corporation to its directors are generally deductible under the normal deduction rule. Nevertheless, no deduction is allowed on salaries or other remunerations paid to a sole proprietor or any partners or partners’ spouses of a partnership business.

**Taxes paid**
Taxes paid on corporate profits are generally not deductible for the purpose of calculating the assessable profits. However, the HKIRD generally accepts that a foreign tax, which is an expense that must be borne regardless of whether or not a profit is derived (e.g., a foreign withholding tax levied on the gross amount of interest or royalties received), as opposed to a charge on the profits themselves, is deductible under the general deduction provision. Where interest income or gains from the sale of a certificate of deposit or bill of exchange are deemed to be subject to profits tax, a deduction is allowed for foreign taxes of substantially the same nature of Hong Kong profits tax paid in respect of the same income, provided that the taxpayer is not eligible for double taxation relief under a CDTA.

**Group taxation**

**Consolidated/group taxation regime**
Hong Kong does not have a consolidated or group taxation regime.

**Transfer pricing regime**
Strictly speaking, there is no comprehensive transfer pricing legislation in Hong Kong. While a few existing provisions in the IRO may be employed by the tax authority to tackle non-arm’s-length transactions, such provisions are primarily aimed at transactions with non-residents or tax avoidance transactions rather than specific legislation on transfer pricing.

As mentioned in the section *Significant developments*, two DIPNs were recently released by the HKIRD to address their views and positions on transfer pricing issues. In general, the HKIRD adopts arm’s-length principle and would seek to apply the OECD transfer pricing guidelines except where they are incompatible with the express provisions in the IRO.

**Thin capitalisation rules**
Hong Kong does not have thin capitalisation rules.
Controlled foreign company regime
Hong Kong does not have a controlled foreign company regime.

Related party transactions
There is no special treatment for related party transactions – see the section Transfer pricing regime above. On the other hand, there are general anti-avoidance provisions dealing with transactions entered into with a sole or dominant purpose of obtaining a tax benefit and specific anti-avoidance provisions dealing with transactions with closely connected non-residents. Under the specific provisions, if a resident person carries on a business with a closely connected non-resident person such that no profits or less than the ordinary profits are derived by the resident person in the course of such business, the non-resident person can be assessable and chargeable to tax in respect of his profits derived from such business in the name of the resident person.

Tax incentives

Foreign tax credits
Foreign tax credits are available if foreign taxes are payable/paid on income derived from a jurisdiction which has entered into a CDTA with Hong Kong and the same income is subject to tax in Hong Kong.

Research and development (R&D)
There is a specific provision allowing the deduction of expenditure incurred on research and development (including payments made to an approved research institute and in-house expenditure), provided that certain specified conditions are met.

Tax holidays
Hong Kong does not have a tax holiday programme.

Foreign investment incentives
Hong Kong does not have any specific incentives for foreign investment except that offshore funds may be exempt from profits tax under certain circumstances.

Withholding taxes (WHT)
There is no withholding tax on dividends, interest or royalties. However, the 4.95%/16.5% (for corporations) or 4.5%/15% (for unincorporated businesses) tax on royalties received by non-residents (please refer to Royalties income under the section Income determination for more details) is in effect similar to a withholding tax.

Resident consignees are required to furnish quarterly returns to the HKIRD showing the gross proceeds from sales on behalf of their non-resident consignors and to pay to the HKIRD Commissioner a sum equal to 0.5% of such proceeds. The HKIRD normally accepts this as satisfying the Hong Kong tax obligations of the non-resident.

Hong Kong has so far entered into a comprehensive double tax agreement/arrangement with Austria, Belgium, Brunei, Hungary, Indonesia, Kuwait, Luxembourg, the Netherlands, the People’s Republic of China (PRC), Thailand and Vietnam. The agreements with Austria, Brunei, Hungary, Indonesia, Kuwait and the Netherlands have not yet entered into force pending the completion of the ratification procedures of the governments concerned.
The following are the non-treaty and treaty withholding tax rates for payments made from Hong Kong payers to treaty country corporate recipients. For withholding tax rates on payments received by Hong Kong recipients from treaty country payers, please refer to the summaries of the respective treaty countries.

**Notes**

1. Hong Kong IRO does not impose withholding tax on dividends and interest currently. However, the treaties provide for a maximum withholding tax rate on dividends and interest should Hong Kong IRO impose such withholding tax in future. Some of the treaties also provide for a reduced withholding tax rate on dividends and interest if the conditions specified in the treaties are met.

2. Generally, royalties paid to non-resident corporations that are not otherwise chargeable to Hong Kong profits tax are subject to withholding tax at 4.95%. The 16.5% rate applies if the royalties are received by or accrued to a non-resident from an associate, unless the Commissioner is satisfied that no person carrying on business in Hong Kong has at any time wholly or partly owned the property in respect of which the royalties are paid.

3. Since a higher rate(s) is specified in the treaties, the lower non-treaty rate of 4.95% will apply.

**Tax administration**

**Year of assessment**

A year of assessment (or tax year) begins on 1 April of a year and ends on 31 March of the following year.

**Tax returns**

Tax return is issued on the first working day of April each year. The filing deadline is usually within a month from the date of issue. However, corporations whose financial year ended after 30 November and represented by a tax representative are normally granted an extension for filing their returns. The exact filing due date depends on the accounting year end date of the taxpayer.

The basis of assessment is the accounting profits of the financial year ending within the year of assessment with appropriate adjustments for tax purposes. A tax return is usually filed together with a tax computation showing the tax adjustments to the
accounting profits in arriving at the taxable profits or allowable tax losses for a given year of assessment.

Corporate taxpayers are also required to attach their audited accounts as supporting documents when filing a profits tax return, unless they qualify as a small corporation as defined by the HKIRD (i.e., mainly those with gross income for a basis period of not exceeding HKD 2 million plus a few other conditions). Small corporations are not required to attach supporting documents with their profits tax returns but are still required to keep those documents and submit them upon request. A branch of a foreign corporation doing business in Hong Kong is required to file a profits tax return annually, and the HKIRD may require audited accounts of the foreign corporation to support the Hong Kong branch’s profits tax return.

Notice of assessment will be issued after the tax return has been examined by the HKIRD. Taxpayers may be subject to post-assessment investigation or field audit under the computerised random selection procedures of the HKIRD at a later date.

**Payment of tax**
The dates of payment of tax are determined by the HKIRD Commissioner and specified in the assessment notice. A system of provisional tax payments applies whereby estimated tax payments are made during the current year. The provisional profits tax payable is normally estimated based on the previous year’s profits tax liability. The provisional profits tax already paid is credited against the final profits tax assessed for a year of assessment, which is determined after filing of the return.

**Statute of limitation**
An additional assessment may be made by a HKIRD tax assessor if a taxpayer chargeable to tax has not been assessed to tax or has been assessed at less than the proper amount. The assessment must be made within the relevant year of assessment or within six years after the end of that year of assessment. The time limit for making additional assessments is extended when a taxpayer either has not been assessed, or is under-assessed, due to fraud or wilful evasion. In that case an additional assessment may be made up to 10 years after the end of the relevant assessment year.

A statement of loss is not an assessment and hence, the above six-year time limit does not apply to issue or revision of a statement of loss. A tax loss year remains technically open until the sixth year after the first year in which the taxpayer has an assessable profit after utilising all the tax losses brought forward.

**Tax audit cycle**
There is no specific tax audit cycle in Hong Kong. Tax audit targets are selected with reference to certain criteria determined by the HKIRD.

**Topics of focus for tax authorities**
Issues that are often subject to close scrutiny of the tax authority include: offshore claim of profits, capital claims of income, transactions with related parties and closely connected non-residents and deductibility of expenses (e.g., interest expenses, share-based payments and intra-group management/service fees), etc.
Other issues

Foreign investment restrictions
In general, Hong Kong does not impose restriction to foreign investors to make investments in Hong Kong; and wholly foreign owned companies are allowed. The only exception is the restriction on foreign ownership of Hong Kong’s licensed television/sound broadcasters, of which the collective foreign ownership ceiling is 49% of the voting power. In addition, an approval from the Broadcasting Authority must be obtained for holding, acquisition, or exercise of voting control by a foreign investor of more than 2% of a licensee.

Exchange controls
Hong Kong does not have any foreign exchange control. There is no restriction on entry or repatriation of capital or remittance of profits from investments. Funds can be freely remitted to persons outside Hong Kong by various means such as dividends, interest, royalties, service fees and branch profits, etc.

Choice of business entity
The principal forms through which a business can be conducted in Hong Kong are:

1. Company incorporated in Hong Kong (either private or public via listing on the Stock Exchange of Hong Kong);
2. Branch of a foreign company;
3. Representative or liaison office of a foreign company;
4. Joint venture (can be set up either as a company or partnership);
5. Partnership; and

Of the above, privately incorporated companies and branches of foreign companies are most commonly used by foreign investors, as limited liability is usually desirable.

Intellectual property regulations
The Intellectual Property Department is responsible for monitoring the intellectual property regime and ensuring the protection and enforcement of intellectual property rights in Hong Kong. The Department is also responsible for investigating complaints against infringements and has extensive powers of search and seizure. Registration and protection of patents, copyrights, trademarks and registered designs are each governed by a separate ordinance.

Merger and acquisition (M&A) activities
There are no specific restrictions on M&A activities in Hong Kong. The following tax considerations are relevant in the M&A context:

1. Hong Kong does not impose any tax on dividends or other forms of distribution of profits (e.g., distribution of branch profits to the head office);
2. Capital gains arising from a M&A transaction is not taxable in the hands of the transferor whereas amortisation of the goodwill in the transferee’s accounts is not tax deductible due to its capital nature;
3. For a share deal, stamp duty is payable on the transfer of Hong Kong shares at 2% unless an exemption applies; for an asset deal, stamp duty is payable on conveyance of immovable property at progressive rate of up to 4.25%;
Hong Kong

4. Gains derived from transfer of revenue items (e.g., trade receivables) in an asset deal would be subject to profits tax;
5. There is no special tax concession/incentive relating to M&A transactions; and
6. Tax losses in the acquired company can generally be carried forward indefinitely to set off against future assessable profits. However, there are specific anti-avoidance provisions in the IRO that prevent the transfer of shares of a company with accumulated tax losses to owners of a profitable company for the sole or dominant purpose of utilising the tax losses i.e., offsetting the tax losses against the profits generated from other trade, profession or business of the transferee.
Significant developments

From 1 January 2010 the following significant changes were introduced to the Hungarian tax system.

Corporate income tax

- The corporate income tax rate has increased from 16% to 19%, but the special profit tax of 4% has been abolished.
- Sole proprietorships, foreign organisations and non-resident shareholders of a real estate company are subject to corporate income tax.
- Generally, no withholding tax is levied on payment to companies abroad. As an anti-avoidance measure, 30% withholding tax has been introduced on interest, royalties and certain service fee payments made to companies which are resident in countries with which Hungary does not have a double tax treaty.
- New definition of CFC.

Value-added tax (VAT)

Hungary was obliged to implement the EU VAT package through the Hungarian VAT legislation with effect from 1 January 2010 (that is, Regulations (EC) No. 8/2008 and No. 9/2008). The package considerably changes certain key areas of the Hungarian VAT legislation, such as the place-of-supply rules for services. The new rule contains similar rules to the EU Directive on the common system of VAT.

Environmental production product fee

From 1 January 2010, product fee is self-assessed in all cases, even imports (until 2010 the Customs Authority levied the product fee on imports as the main rule). Before 2010, the product fee return could be submitted on paper, but from 2010 it has to be submitted electronically. In 2009 the frequency of product fee return submission was not uniform (the return had to be submitted yearly, quarterly or monthly, depending on certain criteria) but from 2010 all companies have to submit their product fee returns quarterly. Unlike last year, from 2010 transactions under customs procedures (e.g., inward processing, customs warehousing), incur a product fee payment liability.

Cultural tax

The cultural tax has been abolished. (Cultural tax had to be paid on certain services, products and buildings prior to 2010.)

Energy tax

Tax rates have increased as from 1 January 2010:
Hungary

- Electricity: increased from HUF 252 (approx. EUR 0.9) to HUF 295 (approx. EUR 1.1) per megawatt hour.
- Coal: increased from HUF 2,040 (approx. EUR 8) to HUF 2,390 (approx. EUR 9) per thousand kilograms.
- Natural gas: increased from HUF 75.60 (approx. EUR 0.29) to HUF 88.5 (approx. EUR 0.34) per gigajoule.

**Excise duty**
Excise duty rates increased on 1 January 2010 and also on 1 April 2010. The rates effective from 1 April 2010 are listed in the *Other taxes* section.

**Taxes on corporate income**

**Corporate income tax**
Resident taxpayers are subject to all-inclusive or unlimited tax liability. Non-residents are subject to corporate income taxation on their income from their Hungarian branch's business activities.

The corporate income tax rate has increased from 16% to 19%. If certain conditions are met, the tax rate may be 10% on the first HUF 50 million of the positive tax base (approximately EUR 200,000), with the other 9% (of the total 19% rate) to be used for purposes defined in law, such as capital expenditure investments, loan repayments, and employment-related costs. Foreign organisations (foreign persons that receive interest, royalties, and/or service fees from Hungarian companies, provided that there is no double tax treaty with the country where the foreign person is resident) are subject to 30% witholding tax.

**Minimum tax base**
From 1 July 2007, if a company's corporate income tax base or the pre-tax profit (whichever is higher) is less than 2% of its total revenues reduced by the cost of goods sold, the value of mediated services and the income of the foreign permanent establishments (“minimum tax base”), the company can choose to file a declaration and pay corporate income tax either according to the general provisions or on its minimum tax base.

**Special profit tax**
Special profit tax has been abolished with effect from 1 January 2010. However, companies that use a non-calendar business year are not affected as they remain liable to special profit tax until their 2010 tax year begins.

**Local taxes/local business tax**
All municipalities are entitled to levy local taxes, but from 2010 their administration is delegated to the Hungarian State Tax Authority. Local taxes are deductible for Hungarian corporate income tax purposes, and are not normally treated as “income tax” in the application of the tax treaties.

The local business tax base is the net sales revenue reduced by the cost of goods sold, subcontractors’ work, the costs of materials and mediated services. General service fees, depreciation and labour costs are typically not deductible for local business tax purposes. 100% of royalty, interest or dividend income is normally exempt from local business tax. The local business tax rate may differ from municipality to municipality.
but is capped at 2% by law. From 1 January 2010, research and development costs are also deductible from the local business tax base.

Furthermore, as of 2010 the local business tax base of a foreign PE of a Hungarian company can be exempted from the Hungarian local business tax.

**Innovation contribution**
Companies defined as such in the Accounting Act are subject to this contribution, except for small- and medium-sized enterprises and branches. The tax base of the innovation contribution is the same as the local business tax base. The tax rate is 0.3%.

**Corporate residence**
Corporations are residents for tax purposes if they are incorporated in Hungary, although foreign corporations may also be deemed to be Hungarian residents for corporate income taxation purposes if their place of effective management is in Hungary.

Foreign entities may carry out business through resident corporations or through permanent establishments (branches). Commercial representative offices may be opened for auxiliary activities which do not create a taxable presence.

**Permanent establishment (PE)**
Hungary treats PEs as separate and distinct entities and profit is attributed to a PE based on the principles set out in the OECD guidelines.

A permanent establishment (PE) is defined as fixed business premises (machinery or equipment) through which the entrepreneurial activity of an enterprise is partly or wholly carried on. A permanent establishment may consist of any of the following: a place of management; offices including representative offices registered in Hungary; factories and workshops; and mines, crude oil or natural gas wells, quarries, or other places from which natural resources are extracted.

Construction sites (including assembly) and related supervisory activities constitute a permanent establishment if they last, in the aggregate, for at least three months in a calendar year. All activities carried out at the same construction site qualify together as a single permanent establishment, regardless of whether they are based on separate contracts or were ordered by different persons. Construction sites are defined as sites which represent a unit for economic, business and geographical purposes.

Permanent establishments are also created by the direct utilisation of natural resources by a foreign person. A foreign person is deemed to have a permanent establishment in Hungary if it utilises natural resources or immovable property for consideration, including the alienation of any rights related to the immovable property or natural resources.

A non-resident enterprise is considered to have a permanent establishment with respect to activities undertaken on its behalf by another person if its agent is authorised to conclude contracts in Hungary on behalf of the non-resident entity and the agent regularly exercises this right or maintains a stock of goods and products from which it regularly makes deliveries in the name of the non-resident entity.
The insurance of risks occurring in Hungary, insured on behalf of a non-resident person by another person, constitutes a permanent establishment of the foreign insurer, except for reinsurance activities.

Furthermore, as mentioned above, a foreign taxpayer must also be treated as having a permanent establishment if it has a Hungarian branch.

The definition of a permanent establishment does not include:

- Establishments used solely for the purpose of storing and presenting the goods or products of a non-resident person;
- The stockpiling of goods and products solely for the purpose of storing, presenting or processing by another person;
- Establishments used for collecting information, purchasing goods and products exclusively for the non-resident person;
- Establishments used for other activities of a preparatory or auxiliary nature; and
- Activities of independent agents, provided they are acting in their ordinary course of business.

**Other taxes**

**Value-added tax (VAT)**

VAT is payable on sales of goods and the provision of services. VAT is also payable on the importation of intra-Community acquisitions of goods and on the purchase of certain services provided to Hungarian companies by foreign suppliers.

The relevant rates are shown below:

<table>
<thead>
<tr>
<th></th>
<th>%</th>
</tr>
</thead>
<tbody>
<tr>
<td>General rate</td>
<td>25</td>
</tr>
<tr>
<td>Most medicines</td>
<td>5</td>
</tr>
</tbody>
</table>

Certain services are exempt, including most transactions in land (an option to be taxed under the general rule is available); the letting of residential property (an option to be taxed under the general rule is available); medical, cultural, sporting, and educational services provided as public services; financial and insurance services. Intra-Community supplies of services and exports are also treated as exempt transactions. In the case of industrial sites and office rental, VAT exemption is optional.

VAT deduction is available for the business-related element of purchases made partially for non-business purposes.

Under the new general VAT liability regulations, VAT is also chargeable if an invoice is issued but the supply is not carried out.

**New place-of-supply rules**

The general rule for B2B services is that the place of supply is where the customer is established, whereas for B2C services the general rule remains unchanged, i.e., the place of supply is where the supplier is established. Exceptions to these rules have also been introduced (e.g., cultural services, catering services, services connected to immovable property).
Group taxation
The VAT Act allows all companies that have established business presences in Hungary and qualify as related enterprises to form a VAT group. The essence of a VAT group is that its members act under a single VAT number in their transactions (i.e., they issue invoices under a shared VAT number and submit a single, joint tax return), and product and service supplies between the members do not qualify as business transactions from a VAT perspective.

VAT recovery
If a taxpayer has a negative VAT balance in a return period, this amount can be recovered provided that the tax balance reaches or exceeds an absolute value of HUF 1 million for monthly filers, HUF 250,000 for quarterly filers or HUF 50,000 for annual filers. The VAT Act extends the application of the reverse-charge mechanism to a variety of activities in addition to the sale of waste materials, including construction and assembly and services related to real property (repairs, maintenance). The condition that only the VAT content of financially settled invoices is reclaimable continues to apply.

Directive for refunds of foreign EU taxable persons
EU-registered non-Hungarian taxable persons can recover local VAT. In the new system, refund applications will have to be submitted electronically, and the rules governing the time available/deadlines for tax authorities in certain phases of the procedure have changed. Reclaim requests should be submitted to the Tax Authority of the country where the taxable person is established.

Reporting obligations for cross-border transactions
A new requirement is that suppliers of cross-border services must submit full statements for each VAT return period of all the services supplied to taxable and non-taxable legal persons where the latter are liable for VAT in their own country. Please note that in Hungary not only EC sales but also purchase lists are required.

Excise duties
Goods subject to excise duty are:

- Petroleum products;
- Alcohol and alcoholic beverages (Any product with an alcohol content of 1.2% or more by volume qualifies as an alcohol product.);
- Beers;
- Wines;
- Sparkling wines;
- Intermediate alcoholic products; and
- Tobacco products.

Duty rates from 1 April 2010:

- Petroleum products: HUF 97,350–124,200 (approx. EUR 340–450) per thousand litres, or HUF 4,425–116,000 (approx. EUR 15–400) per thousand kilograms, depending on the type of the product;
- Alcohol products: HUF 276,100 (approx. EUR 1,050) per hectolitre of pure alcohol;
- Beer: HUF 633 (approx. EUR 2) per hectolitre per Balling (Plato) grade;
- Wines: HUF 0 for grape wines, HUF 9,400 (approx. EUR 40) per hectolitre for wines made from other types of fruit;
• Sparkling wines: HUF 14,250 (approx. EUR 50) per hectolitre;
• Intermediate alcoholic products: HUF 22,100 (approx. EUR 80) per hectolitre;
• Tobacco products:
  • Cigarettes: HUF 9,350 (approx. EUR 30) per thousand cigarettes plus 28.3% of the retail sale price, but a minimum of HUF 17,330 (approx. EUR 70) per thousand cigarettes (the tax base per cigarette also depends on the length of the cigarette (without filter): it is double if the length of the cigarette is 9-18cm, triple if the length is 18-27cm, and so on.);
  • Cigars and cigarillos: 28.5% of the retail price;
  • Fine-cut tobacco: 52% of the retail price, but a minimum of HUF 7,280 (approx. EUR 30) per kilogram;
  • Other tobacco: 32.5% of the retail price, but a minimum of HUF 7,280 (approx. EUR 30) per kilogram.
The Customs Authority is responsible for excise duty. The European Union’s excise duty rules apply in Hungary.

Registration taxes
Registration tax is charged on passenger cars, motor homes and motorcycles before they can be registered and put into service in Hungary. The duty is payable with the first domestic registration or in the case of a conversion.

The registration tax rate is:

• Passenger cars: HUF 250,000 (approx. EUR 950) – HUF 9,622,000 (approx. EUR 37,000) (depends on the technical features of vehicles (cm3, engine type) and environmental classification);
• Hybrid or electrical cars: HUF 190,000 (approx. 750 EUR); and
• Motorcycles: HUF 20,000 (approx. EUR 70) – HUF 230,000 (approx. EUR 900) (depends on technical features of motorcycles (cm3).

The registration tax is levied by the Customs Authority.

Customs duties
Hungarian customs legislation and policies have been fully harmonised with EU legislation.

Environmental protection product fee
The following products are subject to the product fee: other crude oil products, tyres, packaging, batteries, commercial printing paper, and electrical and electronic products (based on customs tariff numbers applicable on 1 January 2010).

Entities liable to pay the product fee are:

• The first domestic distributor or user for own purposes.
• In the case of domestically manufactured commercial printing paper and other crude oil products: the first buyer from the first domestic distributor.
• In the case of toll manufacturing: the party that orders the toll manufacturing.

The product fee is calculated on the basis of the weight of the product multiplied by the fee rate. For example, it is HUF 6 (approx. EUR 0.02) – HUF 44 (approx. EUR 0.18) /kg for packaging, and HUF 83 (approx. EUR 0.33) – HUF 1,000 (approx. EUR 4) /kg for electrical and electronic products.
The Customs Authority controls the payment and reporting of the product fee and carries out product fee inspections. The Customs Authority registers taxpayers by EORI customs and GLN environmental identification numbers, thus taxpayers will need to obtain both. From 1 January 2010, the product fee is self-assessed. The product fee return must be submitted quarterly to the Customs Authority via its electronic system.

The product fee penalty is generally 100% of the product fee shortfall in cases of non-payment or underpayment.

The product fee payment liability can be reduced, e.g., by meeting the mandatory recycling rate.

**Environmental load charges**

Environmental pollution charges were introduced to protect the natural environment, to reduce its impairment, to encourage the users of the environment to engage in activities aimed at the preservation of the natural environment, and to provide funding from the central budget for environmental protection and nature preservation. Air and water load charges were introduced on 1 January 2004 and the soil load charge from 1 July 2004, on an incremental basis.

Emitting entities liable to pay include those who operate point-source emitters subject to registration, pursue activities subject to a water right permit, or who do not use available public drainage systems and dispose of their sewage under a water right permit or a permit from the local water management authorities.

Qualifying materials include sulphur dioxide, nitrogen oxides, mercury, phosphorous, cyanides and others.

The load charge is calculated on the basis of the quantity of emitted materials multiplied by the fee rate. Basically, the amount of the fee payable depends on the hazard level of the emitted material, e.g., HUF 50 (approx. EUR 0.2) /kg for sulphur dioxide and HUF 220,000 (approx. EUR 846) /kg for mercury.

**Energy tax**

Goods subject to energy tax:

- Electricity;
- Coal; and
- Natural gas.

From 1 January 2010, the list of entities that can be subject to energy tax is as follows:

- Energy traders;
- End-users; and
- Producers.

Tax rates:

- Electricity: HUF 295 (approx. EUR 1) per megawatt hour;
- Coal: HUF 2,390 (approx. EUR 9) per thousand kilograms; and
- Natural gas: HUF 88.5 (approx. EUR 0.3) per gigajoule.
Hungary

The tax is self-assessed – except in the case of imports – and the Customs Authority is responsible for the related customs administration procedures.

**Stamp duties**
The most common types of stamp duty are gift duty and duty on transfers of property for consideration. Stamp duty is levied on movable and immovable property and property rights if they were acquired in Hungary, unless an international agreement rules otherwise.

**Gift duty**
Gift duty arises on the date when a contract concerning a gift is concluded.

Transfers of movable property, immovable property and property rights without consideration are subject to gift duty. In these cases, however, gift duty is only incurred if the transaction was formally documented; except for immovable property with a market value of more than HUF 150,000 where gift duty must be paid in any event.

The base of gift duty is the net value of the gift, which is the market value minus any liabilities related to the gift. The general duty rates vary depending on the base:

- 21% – up to HUF 18 million;
- 30% – on the part exceeding HUF 18 million up to HUF 35 million; and
- 40% – on the part exceeding HUF 35 million.

Transfers of assets without consideration, and acquisitions of claims without consideration including waivers of claims and assumptions of debts are exempt from gift duty, provided that the recipient is a company.

Furthermore, if a company is 100% owned by the other company in the transaction, or both companies are 100% owned by a third party, a reduced rate should be applied.

- 11% – up to HUF 18 million;
- 15% – on the part exceeding HUF 18 million up to HUF 35 million; and
- 21% – on the part exceeding HUF 35 million.

**Duty on transfer of property for consideration**
The obligation to pay duty on the transfer of movable and immovable property for consideration arises on the date when the contract is concluded.

For acquisitions of real estate, the stamp duty is 4% of the market value of the property. For acquisitions of direct or indirect participations (stocks, shares, co-operative shares, investor shares, converted investor shares) in a company that owns real estate, the duty base is the part of the market value of the company’s properties held that represents the percentage of the participation. The stamp duty in this latter case is 4% up to HUF 1 billion and 2% of the amount exceeding HUF 1 billion up to a maximum of HUF 200 million.

There are special rules for real estate trading companies and credit institutions. Under certain circumstances, exemptions are available more generally.
Besides the above, stamp duties are also levied on certain court procedures (e.g., Court of Registration) and on submissions to certain authorities (e.g., appeals to the Tax Authority). Stamp duty is, for instance, levied in an amount of:

- HUF 100,000 on the registration of a private stock company or a limited liability company;
- HUF 600,000 on the registration of a public stock company or a European Company;
- HUF 100,000 on the registration of any other entity with legal personality;
- HUF 50,000 on the registration of a branch office; and
- HUF 50,000 on the registration of a representative office.

**Property taxes**

Hungarian municipalities can levy land tax or property tax at their own discretion.

**Property tax**

The owner of a building is subject to this tax liability on the first day of the calendar year.

The local government can determine the tax base in either of the following ways:

- The net floor space of the building expressed in square meters, with a maximum tax rate of HUF 900/m²; or
- The adjusted market value of the building, with a maximum tax rate of 3% of the adjusted market value.

**Land tax**

The owner of the land as is subject to this tax liability on the first day of the calendar year. Undeveloped plots of land situated within the area of jurisdiction of a local government are subject to this tax.

The local government can determine the tax base in either of the following ways:

- The actual area of the plot expressed in square meters, with a maximum tax rate of HUF 200/m²; or
- The adjusted market value of the plot, with a maximum tax rate of 3% of the adjusted market value

**Transfer taxes**

There is no transfer tax as such in Hungary, but transfers of direct or indirect participations in companies that own real estate may be subject to stamp duty or corporate income tax.

**Stamp duty**

Stamp duty has to be paid on the acquisition of a direct or indirect participation of 75% in a company that owns real estate (even if the real estate is a minor part of its total assets). Exceptions may be available if certain criteria are met.

**Corporate income tax**

A company and its related parties are defined as real estate holding companies if at least 75% of the market value of their assets is domestic real estate and if they have a
Hungary

foreign shareholder that is not resident in a country that has a double tax treaty with Hungary or the treaty allows capital gains to be taxed in Hungary.

The tax base of real estate holding companies in cases of share transfers and share capital decreases is the positive amount of the consideration minus the acquisition price of the shares less the costs of acquisition and of administration., The tax rate is the same as was mentioned in the General Information section.

Please note that the definition of the payer for corporate income tax purposes is very different from the definition used for stamp duty purposes.

Branch income

Foreign companies may establish branch offices in Hungary. A branch office is an organisational unit of a foreign company without legal personality, vested with financial autonomy, and registered in the Hungarian companies register as a branch office of the foreign company. The provisions of the Hungarian Accounting Act apply to branch offices, which must prepare reports using double-entry bookkeeping. Statutory audits are obligatory except for the branches of corporations whose registered office address is in the EU.

A branch office is regarded as established when it has been entered into the companies register. A branch office may start operating once the application for registering the branch office has been submitted to the Court of registration, provided that it indicates “under registration” on its corporate correspondence. Until a branch has been registered, it cannot carry out any activities that are subject to official permission. A branch office is considered dissolved upon its removal from the companies register.

Branch offices are treated as permanent establishments for taxation purposes. They must determine their tax base according to the general rules applicable to Hungarian companies. Corporate income tax at the rate of 19% (or 10% on the first HUF 50 million of the positive tax bases, if certain criteria are met) is payable on the profit for the year, calculated on the basis of the Hungarian accounting system and as adjusted by specific provisions of comprehensive double tax agreements (CDTA). The definition of “permanent establishment” is similar to that in the tax treaties, but somewhat broader. In case of treaty countries, the respective treaty definition applies.

A foreign company's corporate income tax base is determined for all its domestic permanent establishments (except for branches) collectively, and for its branches separately. A branch should account for costs and revenues as if it were independent from its foreign parent company.

For a Hungarian permanent establishment, earnings before taxes are reduced by cumulated administrative costs incurred proportionately at the headquarters and any of its permanent establishments, with the maximum proportion defined as the revenues of the permanent establishment compared to all revenues of the foreign company.

The increasing items for a Hungarian permanent establishment are the administrative costs accounted by the permanent establishment, plus 5% of the revenue earned by the permanent establishment's activities but accounted elsewhere.
However, if there is a treaty between Hungary and the other country, the provisions of the treaty have priority over domestic law. Therefore, the provisions of the treaty have to be followed in the first instance and all costs related to the activity of the branch have to be allocated to the branch – without the above restrictions in domestic law – and all profit realised with respect to the branch must also be allocated to the branch. The allocation method must be consistent from year to year, unless there is a good reason for changing it.

The foreign parent must continuously provide the assets and funds required for the operation of the branch office and the settlement of its liabilities. The employees of a branch office are in a legal relationship with the foreign company, and the foreign parent exercises employer’s rights. A branch is considered to be related to its parent company/headquarters, and therefore the prices used in inter-company transactions have to be at arm’s length, and transfer pricing documentation has to be prepared.

**Income determination**

**Corporate income tax base**
The corporate income tax base should be calculated by modifying the accounting pre-tax profit by adjustments and deductions as provided by the CDTA.

**Most common tax adjustments**
The corporate income tax base is the pre-tax profit modified by tax base adjustments such as:

- Tax losses can be carried forward indefinitely without the approval of the Tax Authority provided that the company has exercised its rights in accordance with their intended purpose;
- Provisions (except for environmental purposes) created for expected future liabilities and expenses are deductible when the provision is released;
- Expenses incurred on professional training (without reference to the aim of the training) are deductible from the corporate income tax base if certain criteria are met;
- Local business tax accounted as an expense will now be only 100% deductible from the corporate income tax base, instead of the previous 200% deduction; and
- Benefits provided in kind for entertainment purposes and business gifts will qualify as non-deductible business expenses.

**Bribes, “kickbacks”, other illegal payments**
Bribes, “kickbacks” and illegal payments are not recognised as business costs for corporate income tax purposes, thus non-deductible for the tax base.

**Capital vs. ordinary transactions**
Capital gains (losses) are treated as ordinary income (losses) for tax purposes. The gain on the sale of depreciable assets equals the sales revenue reduced by the net value of the asset for corporate income tax purposes.

If a participation (of at least 30%) is registered within 30 days of acquisition and held continuously for at least one year, capital gains will be exempt from corporate income tax in general. In addition, from 2010 any additional acquisitions may also be registered provided that the 30% participation was already registered.
Hungary

**Dividend income**
Except in the case of controlled foreign companies, dividends received and accounted as income in the given tax year are tax-free income. From 2010, the definition of CFC has changed significantly, so that foreign persons or entities established abroad and/or foreign resident entities qualify as controlled foreign enterprises if, among other conditions, they are owned by a resident private individual who is deemed to be the beneficial owner (i.e., has a certain ownership share or voting ratio or dominant influence in the enterprise) or the majority of their income derives from Hungarian sources and in both cases the effective tax rate of the persons/entities is lower than 12.66%. Certain exceptions may be available (for companies in EU member states, OECD member states and treaty countries if a real economic presence can be proved).

**Foreign investment**
No special provisions in corporate tax legislation.

**Foreign income (anti-deferral regime, unremitted earnings)**
Income (other than dividends) earned from a foreign source is taxable unless a tax treaty provides an exemption. Foreign tax credit is available for income taxes paid abroad up to the Hungarian tax payable on the creditable income (max. 90% of income tax paid abroad), after increasing the tax base by the tax paid abroad.

From 1 January 2010, taxpayers resident in Hungary and foreign entrepreneurs must calculate their corporate income tax base exclusive of:

- Any income that is subject to taxation abroad, if so prescribed by an international treaty; and
- interest income received from abroad (defined as 75% of interest income, less the costs and expenses directly or indirectly attributable to the acquisition of such income, adjusted by the items that increase and decrease the pre-tax profit).

The foreign income has to be classified by country of origin and revenue type. The deducted tax may not exceed the lesser of either the applicable foreign tax or the applicable tax based on the taxation treaty between Hungary and the given country.

If there is no taxation treaty, the cap is 90% of the tax payable abroad, or as an absolute maximum, the tax calculated on the given tax base at the average tax rate. The average tax rate is the corporate income tax, reduced by the applicable tax allowances, divided by the tax base. Indirect costs should be allocated in proportion to the revenue of the branch office to the total revenue of the whole company, as per Section 28 (4) of CDTA.

**Interest income**
No specific provision exists in Hungary. From 2010, the 50% corporate income tax base adjustment related to net interest paid/received between related parties has been abolished.

**Inventory valuation**
Inventories are generally valued at their historical cost unless their fair market value is significantly lower than their book value, in which case, the fair market value should be recorded. Cost may be determined on the basis of FIFO or average cost.
Hungary

**Partnership income**
Hungarian partnerships are non-transparent legal entities for taxation purposes, i.e., they are taxed in the same way as corporations.

**Rents/royalties income**
50% of royalty income is deductible for corporate income tax purposes up to 50% of pre-tax profit. Royalties as revenues derive from 1) permission for the exploitation of patents, from the industrial design of assets under industrial law and from know-how; 2) permission to use trademarks, business names and business secrets; 3) permission to use copyrights and similar rights attached to protected work; 4) transfers of the property described above (except for trademarks, business names and, business secrets).

**Stock transactions**
From 2010 non-resident shareholders of a real estate holding company are also subject to corporate income tax on their income from the sale of the shares in the real estate holding company.

**Unrealised exchange gains/losses**
No special provisions in corporate tax legislation.

**Deductions**

**Common tax deductions**
In general, costs and expenses incurred in relation to the taxpayer's income-generating business activity are deductible for corporate income tax purposes.

**Accrued expenses**
Accrued expenses are recognised for taxation purposes in the tax year they affect.

**Bad debts**
Under the Accounting Act, bad debts are only deductible for corporate income tax purposes if they are supported by legally valid third-party documents that the receivable cannot be collected. Expenses claimed that cannot be enforced in court and expired claims are not deductible for corporate income tax purposes.

In addition to the above, as of 2010 20% of eligible bad debts are deductible from the corporate income tax base if the debt was not settled within 365 days from the due date.

**Charitable contributions**
Grants made, or assets that are transferred without consideration, or liabilities assumed or services provided free of charge, will qualify as business expenses if the taxpayer has a declaration from the recipient stating that the recipient’s profit will not be negative without the income received.

Grants will always qualify as non-business expenses if they are provided to a controlled foreign company or to a foreign resident company.

**Contingent liabilities**
No special provisions in corporate tax legislation.
Depreciation of fixed assets/amortisation of intangibles

Accounting depreciation that is accounted as expenditure, and thus included in the accounting profit, should be added to the corporate income tax base. Tax depreciation calculated according to the CDTA reduces the tax base, even if the tax depreciation is higher than the accounting depreciation. The tax depreciation of tangible assets should be calculated using the straight-line method, on the basis of the historical value from the time when the asset was first used for business purposes.

Please find some tax depreciation rates as follows.

Assets newly acquired since 2003 can be depreciated at 50% annually; these instruments include, among other items, machinery and intellectual property.

Additionally, goodwill cannot be depreciated either for accounting or tax purposes if it does not lose its value during its use. However, if extraordinary depreciation is accounted on goodwill, the extraordinary depreciation will also be recognised for corporate income tax purpose. In the case of transformations, specific depreciation rules apply.

Fines and penalties

Fines and penalties are not deductible for corporate income tax purposes.

Goodwill

Although, theoretically, the Accounting Act allows for the depreciation of goodwill provided it does not depreciate, the opportunity for such depreciation is extremely limited in practice. A taxpayer cannot continue the depreciation of goodwill for tax purposes after a merger unless the acquired company revalues its assets and liabilities in the merger balance-sheet and goodwill that ceases to exist as a result of the merger is cancelled from the books.

Net operating and capital losses (carryback and carryforward periods)

From 1 January 2010, losses can be carried forward indefinitely and the Tax Authority's approval is not required. However, the Tax Authority may later audit whether a company has exercised its rights in accordance with the intended purpose of these rights when carrying losses forward. Furthermore, from this year, financial institutions can also carry losses forward.

The following existing restrictions regarding loss carryforward remain in force:

1. The earlier tax losses must be used first (FIFO principle);
2. The losses of predecessors are also deductible from the successor company's corporate income tax base; and
3. Losses cannot be carried back (except for agricultural companies).
Organisational and start-up expenses
Companies are not obliged to capitalise the costs of formation/reorganisation. The capitalisation of these costs is at the company's discretion, but the company should comply with its accounting policy. Furthermore, only the direct costs of formation/reorganisation that are not classified as investments or renovations and are likely to be recovered ultimately can be capitalised. Furthermore, expenses invoiced by subcontractors can also be included.

Payments to foreign affiliates
There is no general restriction on the deductibility of a consideration due to a foreign entity provided the payment is a justifiable business cost. General anti-avoidance provisions (abuse of law, substance-over-form) may also result in non-deductibility. If the parties are considered to be related parties under the definition of the CDTA, the Hungarian tax office is entitled to adjust the Hungarian party's tax base to reflect the market price (arm's-length price) if the parties did not make the adjustment themselves.

Considerations due for services are only deductible if the actual performance of the services is supported and the Hungarian taxpayer can prove that it benefits from the service.

Thin capitalisation rules may apply to interest on any non-banking debt in excess of three times the equity.

The consideration paid to a controlled foreign company (CFC) is not deductible for corporate income tax purposes unless the taxpayer is able to prove that it serves the purposes of business operations.

From 2010, the definition of CFC has changed significantly, so that foreign persons or entities established abroad and/or foreign resident entities will qualify as controlled foreign enterprises if, among other conditions, they are owned by a resident private individual who is deemed to be the beneficial owner (i.e., has a certain ownership share or voting ratio or dominant influence in the enterprise) or if the majority of their income derives from Hungarian sources and in both cases the effective tax rate of the persons/entities is lower than 12.66%. Certain exceptions are available (e.g., EU member states, OECD member states and treaty countries if a real economic presence can be proved).

Pension expense
No special provision in corporate taxation.

Payment for directors
No special provision in corporate taxation.

Development reserve
From 1 January 2008, 50% of pre-tax profit may be assigned as development reserve. The maximum value is HUF 500 million. However, the period available for using the development reserve has now increased from four years to six years for development reserves included in the 2008 financial statement. For other development reserves, the period remains four years.
Hungary

**Royalty payments**
50% of royalty income can also be deducted from the tax base (this is not limited to royalties received from related parties but applies to all royalty income).

The total deduction of 50% of royalty income from the tax base is limited to 50% of the pre-tax profit.

**Tax base allowance regarding research and development (R&D)**
From 2010, a tax base allowance is only applicable for R&D activities if the taxpayer carries out basic research, applied research or experimental research activities for its own purposes. The direct cost of the basic research, the applied research and the experimental research, or the amount of depreciation on the research activity (if the cost of R&D activity is capitalised), is deductible from the tax base.

300% of the direct costs of research activity (up to a maximum of HUF 50 million) is deductible from the tax base if the research activity is carried out jointly with a higher education institution, the Hungarian Academy of Sciences or a research institute established by them.

**Employee benefit expenses**
Employee benefits and the fringe benefit tax payable on them are tax-deductible.

**Group taxation**

**Consolidation/group taxation rules**
N/A (only available in VAT)

**Transfer pricing regime**
If parties qualify as related parties (as defined in the Hungarian Corporate Tax and Dividend Tax Act (CDTA)) and the price applied differs from the arm’s-length price, the corporate income tax base should be modified by a proper transfer pricing adjustment. In addition, from 2010 the foreign permanent establishment(s) of a Hungarian company and the Hungarian head office also qualify as related entities and are subject to transfer pricing regulations.

Taxpayers are obliged to prepare transfer pricing documentation on intra-group transactions. The documentation has to be prepared for every contract between related parties (including in-kind contributions made at the time of establishment).

According to a Minister of Finance’s Decree effective in 2010, it is possible to prepare two types of documentation (as opposed to the previous practice): country-specific documentation or consolidated transfer pricing documentation. Taxpayers may prepare consolidated transfer pricing documentation if this does not jeopardise comparability, and the contracts:

- Have the same subject matter and all their terms and conditions are identical or only slightly different; or
- Closely relate to each other.

Taxpayers are required to make a declaration in their corporate income tax returns as to which type of documentation they choose.
In summary, the requirements of the country-specific documentation have not changed as of 2010 compared to previous documentation requirements. This type of documentation must include, for example, the following:

- A functional analysis;
- Industry and company analyses;
- An economic analysis;
- A financial analysis; and
- An account of the process of selecting the transfer pricing methodology.

Consolidated transfer pricing documentation must consist of two main parts:

- The core documentation, which includes the standard data for each company within the group which is resident in any Member State of the European Union; and
- Country-specific documentation, which describes the agreements between the taxpayer and its related parties.

The documentation has to be available no later than the filing deadline for the corporate income tax return in any given year, otherwise the Tax Authority may assess a default penalty up to HUF 2 million for each case of missing or deficient documentation. We note, however, that this documentation only has to be prepared and kept in the company’s files, rather than being filed with the Tax Authority.

**Treatment of inter-company items**

**Thin capitalisation rules**

Thin capitalisation rules may apply to interest on any non-banking debt in excess of three times the equity.

**Controlled foreign company regime**

From 2010, the definition of a CFC has changed significantly, so that foreign persons or entities established abroad and/or foreign resident entities qualify as controlled foreign enterprises if, among other conditions, they are owned by a resident private individual who is deemed to be the beneficial owner (i.e., has a certain ownership share or voting ratio or dominant influence in the enterprise), or if the majority of their income derives from Hungarian sources, and in both cases the effective tax rate of the persons/entities is lower than 12.66%. Certain exceptions may be available (for companies in EU member states, OECD member states and treaty countries, if a real economic presence can be proved).

**Related party transactions**

Transactions between related parties must be accounted at arm’s-length prices for taxation purposes, irrespective of whether or not the underlying contracts are concluded on arm’s-length terms.

If the applied price differs from the arm’s-length price, and the taxpayer does not amend its tax base by the difference, the tax authority may adjust the taxpayer’s tax base and may assess penalties.
Tax incentives

Development Tax Incentive
Each development tax incentive may be claimed for a 10-year period (beginning on the completion of the development) in the corporate income tax returns over a maximum period of 14 years from the original application for the incentive. In any given tax year, the tax incentive is available for up to 80% of the tax payable, but in total up to the state aid intensity ceiling. Applications for the tax incentive only have to be submitted to the Ministry of Finance if the aggregated eligible costs of the investment exceed EUR 100 million. If the investment is below this threshold, taxpayers only need to notify the Ministry of Finance before starting the investment. Tax incentives are available for investments if:

- The current value of the investment is at least HUF 3 billion; or
- The current value of the investment is at least HUF 1 billion in certain designated areas; and provided that:
  - The investment results in the creation of new facilities or the extension of existing facilities; or
  - Substantially changed products or production processes (excluding investments in basic research, applied research and experimental development);
  - In the four years following the year in which the tax incentive is first used against the tax base:
    1. The annual average number of employees has increased by at least 150 compared with either the year before the investment was made or the average number of employees for the three years preceding the investment (by 75 in certain designated areas); or
    2. The annual wage costs have increased by 600 times the minimum wage effective on the first day of the tax year (by a multiple of 300 in certain designated areas) compared with either the annual wage costs of the year before the investment was commenced or the average annual wage cost for the three years preceding the investment.

Provided that the investment results in the creation of new facilities or the extension of existing facilities, or substantially changed products or production processes, the government may also grant tax incentives to companies that invest:

- At least HUF 100 million in equipment for zoogenic food production;
- At least HUF 100 million in environmental protection projects;
- At least HUF 100 million in broadband Internet services;
- At least HUF 100 million in the production of films and videos;
- At least HUF 100 million in basic research, applied research and experimental development projects;
- At least HUF 100 million in projects financed by an issue of stock market-quoted shares, if (1) the project is started before the last day of the third calendar year following the date of issue and (2) the total nominal value of the shares issued by the fifth year following the start of the project continuously reaches 50% of the value of the registered shares and (3) the total issue price reaches 50% of the eligible costs and (4) at the date of the application for the incentive the company has at least 25 shareholders or at least 25% of the issued shares are owned by
shareholders where each of them does not have more than 5% of the issued shares’ nominal value (from 1 January 2008); and
• At least HUF 500 million in projects initiated by small- and medium-sized enterprises if certain criteria are met.

Tax incentives may also be granted for projects that create new jobs. As of 2010, the restrictions prescribed in the CDTA regarding the headcount of staff and the percentage of new entrants to the labour market that may be claimed for such investments have been abolished. The conditions prescribed in the relevant decree remain unchanged.

**Tax holidays**
Ongoing tax holidays can be used until 31 December 2011.

**Other tax incentives**
Film production companies that receive a state subsidy for their activity may deduct the amount of the subsidy from their corporate income tax base.

A tax incentive is available for small- and medium-sized enterprises (basically, those with a maximum of 250 employees; or annual net revenue of a maximum of EUR 50 million; or a maximum annual balance sheet total of EUR 43 million). Taxpayers that take a loan from a financial institution for the acquisition or production of tangible assets may deduct 40% of the interest paid on the loan from their tax due, up to a maximum deduction of HUF 6 million. However, taxpayers engaged in certain business sectors cannot use this tax incentive (e.g., transportation, agricultural activity, etc.).

In the case of software development, a taxpayer may decrease its calculated corporate income tax by 10% (or 15% in case of small- and middle-sized companies) of wage costs which were accounted for as the costs of basic research or applied research or experimental development or which arose through employing software developers. The tax incentive may be claimed in the tax year in which these costs are incurred and in the following three years, in equal instalments. However, the tax incentive claimed may not exceed 70% of the calculated corporate income tax decreased by the tax incentives specified in the CDTA (including development tax incentives).

In addition, from 2010 the expenses and costs of the reconstruction of monuments and protected buildings are deductible from the corporate income tax base.

**Withholding taxes (WHT)**
Under the domestic rules there is no withholding tax on dividend, interest or royalties unless anti-avoidance rules apply. From 1 January 2010, 30% withholding tax has been introduced on interest, royalties and certain service fee payments made to companies which are resident in countries with which Hungary does not have a double tax treaty.

Hungary has an extensive treaty network with maximum withholding tax rates as follows:

**Notes**

1. List of the double tax treaties Hungary is a party to and the highest rates of withholding tax a foreign-source country may charge on (the gross) income paid to Hungarian residents.
2. The lower rate applies if the recipient has a stake of at least 25% in the distributing company.
3. Interest is exempt if paid in respect of (a) commercial claims (including claims represented by negotiable instruments) and instalment payments for the delivery or supply of goods and/or services, (b) current accounts or registered loans placed by a financial institution, and (c) funds and deposits not represented by bearers’ securities placed at any of the financial institutions (including public credit institutions).
4. 10% applies to bank loans used for industrial purposes, research and development, or public works.
5. 25% applies to royalties paid for the use of or the right to use trademarks.
6. The lower rate applies if the recipient has control, directly or indirectly, of 25% of the voting rights in the distributing company.
7. 10% is applicable if a non-resident owned investment corporation pays dividends to a recipient that has control, directly or indirectly, of 25% of the voting rights in the distributing company.
8. The China-Hungary Treaty does not apply to Hong Kong.
9. The lower rate applies if the recipient has a stake of at least 40% in the distributing company.
10. The lower rate applies to royalties for the use of industrial, commercial or scientific equipment, or for transmission by satellite, cable optic fibre, or similar technology.
11. The same rate applies to technical service fees.
12. The lower rate applies if the recipient has a stake of at least 10% in the distributing company.
13. Cultural royalties are exempt.
14. The lower rate applies if the recipient (other than a partnership) has a stake of at least 25% in the distributing company.
Hungary

15. The lower rate applies if the recipient has a stake of 25% in the distributing company that carries out industrial activities.
16. 10% applies if the recipient of the interest is a financial institution, including an insurance company.
17. The lower rate applies if the recipient has voting stock of at least 10% in the distributing company.
18. 10% applies to technical service fees.
19. If a lower rate is set in a treaty or agreement or minutes between India and any OECD country (excluding Hungary), then this lower rate should also be applied for India-Hungary.
20. 5% applies for the use of industrial, commercial or scientific facilities or for transmissions by means of satellite, cable, optical fibre or any similar technology.
21. 5% for commission.

**Tax administration**

**Audit cycle**
The supreme body of the company should elect an auditor for a fixed term, but not more than five years.

Auditing of annual financial statements is not statutorily compulsory if both of the conditions below are satisfied:

a. The company's annual net sales revenue (calculated for the financial year) does not exceed HUF 100 million on the average of the two financial years preceding the financial year under review; and
b. The average number of the company's employees for the two financial years preceding the financial year under review did not exceed 50 persons.

**Foreign currency book-keeping**
The Hungarian Accounting Act states that a company that uses a convertible foreign currency rather than the Hungarian forint in its primary economic environment (functional currency) can prepare its annual financial statement in the convertible foreign currency specified in its founding document, provided that at least 25% of its (i) income, costs and expenditures; and (ii) financial assets and financial liabilities were earned or incurred, as applicable, in such convertible currency in both the current year and the previous year.

A company will comply with the conditions if the total amount of the items listed in both point (i) and point (ii) is at least 25%. Point (ii) does not include off-balance-sheet items.

Furthermore, from 2010 all companies can prepare their annual financial statements in Euro (without the above limitation) if this is specified in their accounting policies. However this decision cannot be changed within five years.

**Statute of limitations**
In general, the statute of limitation is five years from the end of the calendar year in which the tax return should be filed. Self-revision interrupts the term of limitation.

For stamp duty, the statute of limitations is five years from end of the calendar year in which the tax authority gains knowledge of the acquisition of the asset(s).
**Tax return due dates**

**Returns**

Corporate income tax must be calculated by reference to the accounting year, which is either the calendar year or, for group companies, the group’s accounting year. Returns must be lodged within 150 days following the last day of the accounting year. The tax payable is determined by self-assessment.

**Electronic tax returns**

Tax returns may be submitted either electronically or in paper format. However, those who are legally obliged to submit monthly tax and contribution returns (e.g., employers and payers) may only submit tax returns electronically.

**Payment of tax**

Corporate income tax instalments must generally be reported and paid quarterly or monthly (above HUF 5 million tax payable), and 100% of the expected final payment is due by the twentieth day of the last month of the accounting year. However, a late payment penalty is only levied if the company fails to pay at least 90% of the expected final payment by the above deadline. The late payment penalty is 20% of the difference between the tax advances paid (including the top-up payment) and 90% of the actual corporate income tax liability.

**Topics of focus for tax authorities**

The tax authority will take more stringent measures against “aggressive tax planning” (tax planning that takes advantage of unintended administrative or legal loopholes,) using its international experience and cooperation agreements.

The following categories of taxpayers can expect to be scheduled for tax audits in 2010:

- Taxpayers whose records show frequent changes in registered address or ownership;
- Businesses that have operated for several years with substantial loans from their shareholders;
- Taxpayers that declared significant amounts of payable and deductible VAT during their pre-company period;
- Taxpayers that have been in continuous operation despite continuing losses;
- Taxpayers that spend a significant portion of their sales revenues on services;
- Taxpayers that have significant tax base decreasing items, tax allowances and subsidies related to investments; and
- Taxpayers that deduct research and development expenses.

The tax authority will also pay more attention to the actual content of transactions conducted between related parties and to the methods companies use to determine the arm’s-length price.

**Other issues**

**Foreign investment incentives and restrictions**

Hungary provides incentives not based on residence, but rather on the basis of the size of investment or activity (e.g., companies that create new jobs, companies with R&D activities, etc.), or company size (e.g., for small- and medium-sized enterprises). The incentives are available to both domestic and foreign investors.
Principal forms of doing business

- Branch;
- Partnership;
- Limited liability company;
- Private company limited by shares; and
- Public company limited by shares.

Business and tax treatment of intellectual property (IP)

IP is defined as inventions, patents, and the industrial design of assets protected under industrial law; copyrighted software products; other intellectual property; and assets without legal protection but monopolised through secrecy (e.g., know-how, production technologies and trademarks, whether purchased or created by the undertaking itself, and irrespective of whether or not used). IP is categorised as intangible assets in the balance sheet if it serves a company's business activity for more than one year. If it is used for less than one year, it is treated as costs or current assets.

Gains that are realised on the disposal of an intangible asset are taxable.

If a gain on the disposal of an intangible asset comes within the definition of royalty, 50% of this royalty revenue is exempt from corporate income tax.

Royalties are revenues derived from:

- Permission for the exploitation of patents, from the industrial design of assets under industrial law and from know-how;
- Permission to use trademarks, business names and business secrets;
- Permission to use copyrights and similar rights attached to protected work; and
- Transfers of the property described above (except for trademarks, business names and, business secrets).

If a taxpayer incurs a loss on the disposal of an intangible asset, the loss will be deductible for tax purposes.

Additionally, the tax value of the assets transferred is a tax base decreasing item for corporate income tax purposes, while the accounting value of the IP is a tax base increasing item.

The sale of an interest in an IP-holder company, or making a contribution in kind of IP to another company, or transferring IP without consideration, should be treated as in the case of any other asset.

No withholding tax is levied on royalty payments made to companies which are resident in countries with which Hungary has concluded a double tax treaty. Otherwise, 30% withholding tax rate applies.

Tax incentives are also available for IP-related activities. (For further details, please see the Tax incentives section).

Mergers and acquisitions (M&A) from a business and tax perspective

Mergers in Hungary are tax-free transformations provided that they qualify under the definition of preferential transformation. Preferential transformation means that a company, without going into liquidation, transfers all its assets and liabilities.
to another company in exchange for the issue to its shareholders of securities representing the capital of that other company, and a cash payment not exceeding 10% of the nominal value, or, in the absence of a nominal value, of the accounting par value of those securities.

In a preferential transformation, the predecessor company does not have to amend its tax base by the difference between the adjusted book value and the book value. The adjusted book value means the historical value of assets less any depreciation deducted from the tax base plus the readjusted amount of extraordinary depreciation. Furthermore, for shareholders, the income accounted in excess of the historical value of the shares they acquire in the preferential transformation is also not taxable for corporate income tax purposes for as long as the shareholder holds its participation.

In any other case if two companies merge, the difference between the market value and the book value of the assets and liabilities is taxable for the successor company. Furthermore, the predecessor company may decrease its tax base by the amount of the difference between the adjusted book value of its assets and their book value, if the adjusted book value is the higher of the two. The company will increase its tax base if the book value is higher than the adjusted book value.

**IFRS adoption**
Since 2005, companies defined in Section 4 of Decision no. 1606/2002/EC (mainly companies listed on the stock exchange) have had to prepare their consolidated annual reports according to the IFRS, although it was possible to obtain an exemption until 2007 due to the ongoing harmonisation of the Hungarian regulations. However, non-listed subsidiaries of EU-listed entities are exempt from the preparation of IFRS consolidated financial statements. If a company chooses IFRS, HAR financial statements must also be prepared and filed with the Court of Registration.
Significant developments

Over the past 12 months there have been numerous developments in the Indian corporate tax regime, the most significant include:

Transfer of unlisted (not tradable and not listed on any stock exchanges) shares of a company to a firm or company without consideration or for inadequate consideration is taxable income in the hands of the recipient firm or company.

Indian companies were liable to pay surcharge at the rate of 10% on the amount of income tax if the total income exceeds INR 10 million. The rate of surcharge is now reduced from 10% to 7.5% for domestic companies. There is change in surcharge in the case of foreign companies which is now 2.5%.

Minimum alternate tax
Indian companies are liable to pay Minimum alternate tax (MAT) on their income. The rate has been increased from 16.99% to 19.93%. For foreign companies the rate has increased from 15.84% to 19%. MAT is payable only where total taxable income exceeds INR 10 million.

Withholding tax
There are certain specified payments made to residents which are liable for withholding tax. The withholding tax for a fiscal year is required to be deposited with the government treasury on or before the due date of the filing of tax returns, otherwise the expense payment is not eligible as a tax deductible expense. In relation to payment made to non-residents or foreign companies, withholding tax is required now to be deposited with the government treasury within the timeline provided on a month-to-month basis.

Research and development (R&D) expenditures
Weighted deduction available in respect of expenditure incurred on scientific research in an approved in-house R&D facility has been increased from 150% to 200% for companies engaged in specified businesses.

A payment made to approved research associations undertaking research in social science or statistical research is now eligible for a weighted deduction of 125% of the payment made.
Contributions made to approved scientific research associations, universities, other institutions, are 175% deductible (which was earlier allowable at 125%) of the actual payment made.

**Audit for income tax purposes**
Persons carrying on business are required to get their books of accounts audited for income tax purposes where the turnover is INR 6 million (earlier the limit was INR 4 million). For persons carrying on a profession, the limit is INR 1.5 million (earlier the limit was INR 1 million). The penalty for non-compliance with this audit requirement is INR 0.15 million (earlier 0.1 million).

**Non-life insurance companies**
In case of non-life insurance companies, any gain or loss on realisation of investments, as the case may be, shall be added back or deducted, if it is not credited to the profit and loss account. Any provision (unrealised loss) in the profit and loss account for diminution in the value of investments is now not to be taken into consideration while computing the taxable income.

**Capital expenditures**
Certain specified categories of businesses are eligible now for 100% tax deduction of capital expenditure (other than on land, goodwill and financial instruments). The benefit is available for:

- Building and operating new hospitals with at least 100 beds;
- Building and operating new hotel of two star category anywhere in India; and
- Developing and building housing projects under a notified scheme for slum redevelopment or rehabilitation framed by the central/state government.

**Tax holiday**
Persons engaged in the business of hotels or convention centres in the National Capital Region are eligible for a tax holiday, if the date of functioning of the hotel or completion of the construction of convention centre is started by 31 July 2010 (the earlier date was 31 March 2010).

Persons engaged in the business of developing and building housing projects are eligible for a tax holiday if the housing projects (approved by the local authority on or after 1 April 2005) are completed within five years (earlier it was four years). The condition relating to built-up area of shops and commercial establishments included in the housing project has been relaxed. The amendment is applied retrospectively from tax year 2010-11.

**Conversion to LLP**
Conversion of a private company or an unlisted public company into a limited liability partnership (LLP) will no longer attract capital gains tax subject, if the prescribed conditions are fulfilment as detailed below:

- Turnover or gross receipts of the company being converted does not exceed INR 6 million in any of the three preceding tax years;
- Any unabsorbed business loss or depreciation allowance of the company is eligible for carryforward and set-off in the hands of the successor LLP;
- Any unutilised MAT credit in the hands of a company is not available to the successor LLP; and
India

- Transfer of shares by the shareholders of a company will not attract capital gains tax subject to fulfilment of prescribed conditions.

**Dispute resolution**
To facilitate quick resolution of disputes, a dispute resolution panel (DRP) comprising three Commissioners of Income Tax has been in operation since 1 October 2009 to deal with cases of foreign companies and transfer pricing orders which are prejudicial to a taxpayer.

**Transfer pricing**
In order to lessen the litigation under transfer pricing regulations, the Central Board of Direct Taxes will formulate safe harbour rules. The rules will provide the circumstances in which tax authorities would accept the transfer price declared by the assessee.

**Social Security agreements**
India has entered into social security agreements with various countries of which Belgium and Germany were recently notified.

**Taxes on corporate income**
For India, the financial year for tax purposes ends on 31 March. The corporate income tax rate applicable to an Indian company for the financial year 2010-2011 is 30% (plus surcharge, education cess and secondary and higher education cess). From tax year 2011-12, the surcharge for domestic companies is reduced from 10% to 7.5%. Foreign companies operating in India are taxed at the rate of 40% (plus surcharge, education cess and secondary and higher secondary education cess). Surcharge for foreign companies is 2.5%. The education cess, and the secondary and higher education secondary cess, is 2% and 1% respectively.

**MAT**
Companies are liable to pay the MAT on their adjusted book profits where the tax liability for the year is less than 19.93% for the assessment year (AY) 2011-12 (16.99% for AY 2010-11) of the adjusted book profits. In such cases, the tax liability is fixed at 19.93% of the adjusted book profits of the company. Sick companies (loss companies which have made losses continuously and may or may not be revived to making profits) are not subject to MAT. From tax year 2010-11, companies are allowed to take the benefit of the credit of tax paid under MAT for 10 years.

**Fringe benefit tax**
The Fringe benefit tax (FBT) (in addition to corporate income tax) was chargeable on the fringe benefits provided by an employer to its employees.

The FBT has been abolished as of tax year 2009-10.

**Direct tax code**
A new direct tax code replacing the existing Income Tax Act, 1961 is proposed and is expected to be introduced by 1 April 2011.
Corporate residence

A company is a resident of India if it:

- Is an Indian company; or
- During the financial year, the control or management of its affairs is situated wholly in India.

A company that does not fulfil either of these conditions is treated as a non-resident.

A partnership or LLP is classed as resident in India, if any portion of its control and management is in India. A partnership firm or LLP is a non-resident, if its control and management is situated wholly outside India.

Other taxes

Securities transaction tax (STT)

STT is applicable to transactions involving the purchase or sale of equity shares, derivatives, units of equity-oriented funds through a recognised stock exchange or the sale of a unit of an equity-oriented fund to any mutual fund. STT paid is eligible to be claimed as tax deductible expenditure while working out the tax computation of the income from sale of securities.

Wealth tax

All companies are liable to pay wealth tax assessed at 1% of the value of specified net assets, if the value of net wealth exceeds INR 3 million. Valuation of assets is in terms of specific rules notified by the government are detailed below.

Customs duty

Customs duty is levied by the central government on the import of goods into, and export from, India. The rate of customs duty applicable to a product proposed to be imported or exported depends upon its classification under the customs tariff. With regard to exports from India, customs duty is levied only on a very limited list of goods.

The customs tariff is aligned with the internationally recognised harmonised system of nomenclature (HSN) provided by the World Customs Organisation.

Customs duty is levied on the transaction value of the imported or exported goods. According to section 14 of The Customs Act, 1962 (CA), the concept of transaction value is the sole basis for valuation for the purposes of import and export of goods. While the general principles adopted for valuation of the goods in India are in conformity with the World Trade Organisation (WTO) agreement on customs valuation, the central government has announced independent customs valuation rules applicable to export and import of goods.

India does not have one uniform rate of customs duty. Furthermore, the customs duty applicable to any product is composed of a number of components. The types of customs duty applicable are as follows:

- The basic customs duty (BCD) is the basic component of customs duty levied at the effective rate notified under the First Schedule to the Customs Tariff Act (CTA) and
India

applied to the landed value of the goods (i.e., the cost, insurance and freight (CIF) value of the goods plus landing charges at 1%). The peak rate of BCD is 10%.

• The additional customs duty in lieu of excise duty (CVD) is equivalent to, and is charged in lieu of, the excise duty applicable on like goods manufactured or produced in India. CVD is calculated on the landed value of the goods and the applicable BCD. However, the CVD on specific consumer goods intended for retail sale in India is calculated on the basis of the maximum retail price (MRP) printed on their packs. The general rate of excise duty is currently 10% and consequently the rate of CVD is also 10%. In addition, Education Cess (EC) at 2% and Secondary and Higher Education Cess (SHEC) at 1% are also levied on the CVD.

• EC at 2% and SHEC at 1% are also levied on the aggregate of custom duties (except in cases of safeguard duty, countervailing duty and anti-dumping duty).

• Additional duty of customs (ADC) to countervail State Taxes and value-added tax (VAT) of 4% is charged in addition to the above duties on all imports subject to a few exceptions.

ADC is calculated on the aggregate of the assessable value of the imported goods, the total customs duties (i.e., BCD and CVD) and the applicable EC and SHEC.

BCD, EC and SHEC levied on the aggregate of duties of customs are a cost of any import transaction. The duty incidence arising on account of all other components may be set off or refunded subject to prescribed conditions. Where goods are imported for purposes of manufacture, the Indian manufacturer may take a credit of the CVD and ADC paid at the time of import for set-off against the output excise duty. In the case of service providers, the credit of only the CVD is available. Similarly, the central government provides exemption from payment of ADC for certain specified goods. The central government also has prescribed a refund mechanism in relation to ADC paid on goods imported for the purpose of trading in India, subject to fulfilment of the conditions prescribed under the governing notifications and circulars issued in this regard.

**CENVAT (excise duty)**

Central value-added tax (CENVAT) is an excise duty levied by the central government on the manufacture or production of movable and marketable goods in India.

The rate at which excise duty is leviable on the goods depends on the classification of the goods under the excise tariff. The excise tariff primarily is based on the eight digit HSN classification adopted so as to achieve conformity with the customs tariff.

The excise duty on most consumer goods, which are intended for retail sale, is chargeable on the basis of the MRP printed on the package of the goods. However, abatements are admissible at rates ranging from 20% to 50% of the MRP. Goods, other than those covered by MRP based assessment, generally are chargeable to duty on the “transaction value” of the goods sold to an independent buyer. In addition, the central government has the power to fix tariff values for charging ad valorem duties on the goods.

Typically, the duty rate is 10%. However notifications granting partial or complete exemption for specified goods from payment of excise duties are also available. EC at 2% and SHEC at 1% are applicable on the aggregate of excise duties.
The central excise duty is a modified VAT wherein a manufacturer is allowed credit of the excise duty paid on locally sourced goods and the CVD and ADC paid on imported goods. The CENVAT credit can be utilised for payment of excise duty on the clearance of dutiable final products manufactured in India. In light of the integration of goods and services tax initiated in 2004, manufacturers of dutiable final products are also eligible to avail CENVAT credit of the service taxes paid on input services used in or in relation to the manufacture of final products and clearances of final products from the place of removal subject to fulfilment of conditions.

**Service tax**

Service tax is levied on specified taxable services identified under Chapter V of the Finance Act, 1994 (the Act). At present over 100 services are classified as taxable under the Act. The existing rate of service tax is 10%. In addition, an EC of 2% and SHEC of 1% of the service tax have also been levied on taxable services. Thus, the effective rate of service tax is 10.30%. There is no service tax on the export of services by the service provider in India, subject to fulfilment of prescribed conditions.

The onus of payment of service tax lies with the provider of services. However, in the case of specified services such as transport of goods by road, sponsorship services import of services, the service tax liability rests with the recipient of the services.

In light of the integration of goods and services tax, a service provider can avail CENVAT credit of excise duties paid on capital goods and inputs used for providing output services, apart from availing CENVAT credit of the service taxes paid on input services subject to fulfilment of conditions.

Taxable services provided by service providers located outside India to a recipient in India are subject to service tax in terms of the Services (Provided from Outside India and Received in India) Rules, 2006. In terms of these Rules, where the taxable services are provided from outside India and received in India, the service recipient is required to become registered and to pay the tax in accordance with the relevant provisions of law.

**Advance ruling for customs, excise and service tax**

In order to enable foreign investors to ascertain their indirect tax liabilities arising from proposed business ventures in India, the central government has constituted the Authority for Advance Rulings (AAR) as a high level quasi judicial body. The functions of the AAR comprise giving advance rulings on a specific set of facts relating to specified matters under customs, central excise and service tax.

Advance Rulings may be sought by any non-resident investor entering a joint venture in India in collaboration with another non-resident or a resident of India, or a resident setting up a joint venture in India in collaboration with a non-resident. Through the Finance Act 2005, this facility has also been made available to an existing Joint Venture in India. The central government is also empowered to notify any other class or category of persons as eligible for availing the benefit of an advance ruling.

**VAT / Central Sales Tax (CST)**

Sale of movable goods in India is chargeable to tax at central or state level. The Indian regulatory framework has granted power to State Legislatures to levy tax on goods sold within that State. Such sales are, therefore, chargeable to VAT at the rates notified under the VAT laws of the relevant State.
India

All goods sold in the course of interstate trade are subject to CST.

Where goods are bought and sold by registered dealers, for trading or for use as inputs in the manufacture of other goods or specified activities (such as mining or telecommunication networks), the rate of sales tax is 2%, provided Form C is issued by the purchasing dealer. In the absence of Form C, the applicable rate would be the rate of VAT on such goods in the originating State.

CST is sought to be phased out by the year 2011. Inter-State procurement, on which CST is charged by the originating State is not eligible for input tax credit in the destination State.

State level sales tax has been replaced by VAT in all the States. Under the VAT regime, the VAT paid on goods purchased from within the State is eligible for VAT credit. The input VAT credit can be utilised against the VAT/CST payable on the sale of goods. It is, thus, ensured that the cascading effect of taxes is avoided and only the value addition is taxed.

Currently, there is no VAT on imports into India. Exports are zero-rated. This means that while exports are not charged to VAT, VAT charged on inputs purchased and used in the manufacture of export goods or goods purchased for exports is available to the purchaser as a refund.

The State VAT is charged at tax rates of 1%, 4% to 6% (range). Goods other than those notified to be covered under the above rates are charged in the range of 12.5% to 16.5%. The rate of VAT depends on nature of goods involved and varies from State to State.

Turnover thresholds have been prescribed so as to exclude small traders from the ambit of the VAT. A tax under composition scheme, at a lower rate, may be levied on such small traders in lieu of the VAT.

**Goods and services tax**

The central government took a major step towards the transition to a national integrated goods and services tax (GST) in 2006. In this regard, a joint working group (JWG) was constituted by the Empowered Committee to study global GST models and identify suitable models for introduction in India. In 2007, the JWG recommended a dual GST model for India which was subsequently studied and approved by the Empowered Committee and the Ministry of Finance.

The Empowered Committee of the State Finance Ministers (EC) on 10 November 2009 released the First Discussion Paper on the proposed GST in India. In the discussion paper the government indicated that GST shall have two components. One levied by centre (Central GST or CGST) and the other levied by states (State GST or SGST). The CGST and the SGST would be applicable on all transactions of goods and services made for a consideration except for exempted goods and services, goods which are outside the purview of the GST and transactions which are below the prescribed threshold limits. It is proposed that GST will be implemented from 1 April 2011. Details of taxes which would be subsumed in dual GST are as follows.
India

The following taxes will be subsumed in CGST:

- Excise duty;
- CVD/ADC; and
- Service tax.

The following taxes will be subsumed in SGST:

- VAT
- Entertainment tax;
- Luxury tax;
- Lottery taxes;
- State cesses and surcharges; and
- Entry tax not in lieu of octroi (a municipal levy).

CST will be phased out in GST.

The input tax credit (ITC) for the CGST and SGST would operate in parallel and would be available for utilisation only against the output payment of CGST and SGST, respectively. Both CGST and SGST will be levied on import of goods and services into the country. The incidence of tax will follow the destination principle. Full and complete set off will be available on the GST paid on import of goods and services.

Octroi duty/entry tax

“Entry Tax” is a tax on entry of goods into the state from outside the state for use, consumption or sale therein. It is levied on the purchase value, which is defined to mean the amount of the valuable consideration paid or payable by a person for the purchase of any goods. The value of the specified goods can be ascertained from the original invoice for purchase of such goods.

Octroi is a municipal levy which is levied at the time of entry of specified goods into the limits of the relevant municipal corporation. Thus, octroi can be leviable, if there is movement of goods from one city to another in the same State, in the event the cities fall under the jurisdiction of two different municipal corporations.

Branch income

Branches of foreign companies are taxed on income that is received in India, or which accrues or arises in India, at the rates applicable to foreign companies. There is no withholding tax on remittance of profits to the company’s head office.

Income determination

Capital gains
Capital gains refers to gains made on transfer of a capital asset, including extinguishment of the rights to an asset.

Short-term capital assets are capital assets held for a period of less than 36 months. In the case of shares, listed securities, or units of specified mutual funds or a zero coupon bond the period of holding requirement is 12 months. Capital assets that do not qualify as short-term capital assets are considered as long-term capital assets.
India

Normally, long-term capital gains are determined after increasing the cost by prescribed inflation factors. In the case of foreign companies, capital gains on transfer of shares or debentures in Indian companies are computed in the foreign currency in which the shares or debentures were acquired, and the capital gains are reconverted into Indian currency.

Capital gains are taxed as follows:

- Long-term capital gains on transfer of shares of a company, or units of an equity-oriented fund, which are subject to STT are exempt from taxation. However, such gains are taxable under MAT provisions.
- Other long-term capital gains are subject to taxation at 20% (plus the surcharge, education cess and secondary and higher secondary education cess). However, long-term capital gains arising from transfer of listed securities, units or zero coupon bonds are taxed at 10% (without adjusting the cost for inflation) or at 20% (after adjusting the cost for inflation) whichever is more beneficial to the taxpayer. These rates exclude surcharge, education cess and secondary and higher education cess.
- Short-term capital gains on the transfer of the shares of a company or units of an equity-oriented fund subject to STT are taxed at 15% (plus the surcharge, education cess and secondary and higher secondary education cess).
- Other short-term capital gains are subject to taxation at the normal corporate rates applicable to a company.

In the case of certain overseas financial organisations (e.g., off-shore funds and foreign institutional investors), long-term capital gains arising on the transfer of units purchased in foreign currency are taxable at 10% (plus surcharge, education cess and secondary and higher education cess) on the gross amount.

Long-term capital gains earned by non-residents on transfer of bonds relating to Indian companies (issued abroad in accordance with government guidelines or approved schemes and acquired in foreign currency) are taxable at 10% (plus surcharge, education cess and secondary and higher education cess) on the gross amount of gains.

The rules of carryforward and set-off of loss for capital gains are as follows:

- Capital losses arising from the transfer of a short-term capital asset can be set-off against capital gains arising from any other asset. However, capital losses arising from the transfer of a long-term capital asset can be set-off only against capital gains arising from the transfer of any other long-term capital asset.
- Capital losses that cannot be set-off can be carried forward and set-off against the future capital gains. Losses can be carried forward for set-off for a period of eight years after the year of loss.
- Gains and losses (computed in the manner indicated under Depreciation and Depletion separately) arising on the sale of depreciable assets are classified as short-term capital gains or losses, and the gains are taxed at the same rates as business income.

**Dividend income**

Dividend income received from Indian companies is not taxable in the hands of all the shareholders. This applies to resident as well as non-resident shareholders.
Indian companies distributing or declaring dividends are liable to pay dividend distribution tax (DDT) at 15% (plus surcharge, education cess and secondary and higher education cess). This tax is payable at each level of distribution and is in addition to the corporate taxes payable on business profits.

As of tax year 2009-10, a holding company does not have to pay DDT on dividends paid to its shareholders to the extent that it has received dividends from its subsidiary company on which DDT has been paid by the subsidiary. However, the benefit will not be available if the holding company is itself a subsidiary (if it has a shareholding of more than 50%) of another company. An exemption from this tax has been granted in the case of declaration or distribution of dividends by special economic zone (SEZ) developers. A SEZ is a designated area which has special economic regulations and where an assessee is eligible for tax holiday.

Income received by overseas financial organisations (offshore funds) from units of specified mutual funds, or from the Unit Trust of India, that is purchased in foreign currency as well as interest received by non-residents on bonds issued abroad by Indian companies following government guidelines and acquired in foreign currency, are taxable at 10% on the gross amount of income. Dividends (other than those received from Indian companies) and interest earned by foreign financial institutions from investments in the Indian capital market are taxable at 20% on the gross amount.

Income received from units of specified mutual funds is not taxable in the hands of the recipient. The distributing mutual fund is liable to pay a distribution tax of 20% or 25% (plus surcharge, education cess and secondary and higher education cess). The above tax is not chargeable in respect of income distributed by an equity oriented fund in respect of distribution under such scheme.

Stock dividends (bonus shares) distributed are not taxed at the time of receipt in the hands of the recipient shareholders, but capital gains provisions are applicable to the sale of these stock dividends.

**Foreign income**
A resident company is taxed on its worldwide income. A non-resident company is taxed only on income that is received in India, or that accrues or arises, or is deemed to accrue or arise, in India. This income is subject to any favourable tax treaty provision. Double taxation of foreign income for residents is avoided through treaties that generally provide for the deduction of the lower of foreign tax, or Indian tax, on the doubly taxed income from tax payable in India. Similar relief is allowed unilaterally where no treaties exist; the resident would be taxed at the rate which would be the lower of the Indian tax rates, or the rate of the other country in which income is already taxed.

**Interest income**
Interest income received by a resident company is chargeable to tax at normal rates. Interest income received by a non-resident company is charged at a concessional rate.

**Inventory valuation**
Inventories generally are valued at cost or net realisable value, whichever is lower. Generally, there is conformity between book and tax reporting. The first-in first-out (FIFO) and average cost methods are acceptable, provided that they are consistently applied.

India

**Partnership/limited liability partnership income**
The partnership and limited liability partnership (LLP) are taxed as a separate legal entity. The income of partners from the partnership or LLP is exempt from tax for the individual assessment of the partner. The partnership and LLP is taxed at the rate of 30% (plus surcharge and education cess and secondary and higher education cess). The interest payment to the partner on the capital or current account is allowed as deductible expenditure; however, the maximum interest allowable for tax purposes is 12% per annum. A working partner can be paid salary, bonus, commission, or remuneration. The maximum permissible deduction in respect of remuneration payable collectively to all working partners would be based on the book profit at specified percentage for different slab of book profit.

**Unrealised exchange gains/losses**
There are no specific rules under the tax law for determining the nature of unrealised foreign exchange gains or losses. However, there are various judicial precedents available which lay down certain principles for classification of foreign exchange gains or losses.

Profit/loss, is considered trading profit/loss, if foreign currency is held on revenue account or as trading assets or as a part of circulating capital invested in the business.

Profit/loss is considered capital nature if a foreign currency loan is taken for capital asset or fixed asset.

**Deductions**

**Capital v. revenue transactions**
Expenditure which is revenue-in-nature would be allowed as a deduction if:

- They are incurred wholly and exclusively for the purpose of the business;
- The expenditure is not in the nature of personal expense; and
- The expenditure is not in the nature of capital expense.

**Bribes, kickbacks, illegal payments**
Expenditure incurred by a taxpayer which is illegal is not deemed to have been incurred for the purpose of the business or profession and no deduction will be allowed for such expenditure.

**Interest**
Any interest paid by a assessee (taxpayer) on capital borrowed for the purposes of their business or profession is a tax deductible expense. If the capital is borrowed for acquiring a capital asset for the purpose of extension of an existing business or profession, then interest liability pertaining to the period, until the time the asset is put to use, cannot be allowed as a tax deduction and would have to be added to the cost of such asset.

**Depreciation and depletion**
Depreciable assets are grouped in blocks, and each block is eligible for depreciation at a prescribed rate (usually 15%–100% for machinery, 5%–100% for buildings, 10% for furniture and 25% for intangible assets) on the opening value (net of depreciation charged in preceding years), plus cost of acquisition, less deletions, during the year. A deletion is the reduction by way of sale, discarding, demolition, or destruction of
the assets and the amount realised is reduced. Depreciation is restricted to 50% of the prescribed rate if the asset acquired is used for less than 180 days during the year of acquisition. If money receivable on the transfer exceeds the opening written-down value plus acquisitions of the block concerned, the excess is taxed as a short-term capital gain at the same tax rates as that applicable to business income.

Power-generating or power-distributing companies have the option either to use the reducing balance method provided under the normal schedule or to charge depreciation on a straight-line basis. The straight-line rates are aligned to the power companies’ book depreciation rates.

Know-how, patents, licenses, franchises, and similar intangible assets form part of the block of depreciable assets provided that they are owned and put to use in the course of their business, and would be eligible for depreciation at the prescribed rate, which is 25%.

Tax depreciation is not required to conform to book depreciation.

**Bad debts**
The amount of any bad debt, or part thereof, which has been written off as irrecoverable in the accounts of the assessee (taxpayer) for the year, would be allowed as a tax deductible write-off.

**Payments for foreign affiliates**
Indian companies can claim deduction for payment of royalties, and for interest and fees for technical or management service provided by foreign affiliates, as long as they are not capital in nature, and are incurred wholly and exclusively for the purpose of the business, and that requisite tax is withheld from such payment. However, if the requisite tax is not withheld from such payment, or after withholding, it is not paid into the government treasury, a deduction for the payments is available in the year of payment of tax into the government treasury.

**Taxes**
All taxes (tax, duty, cess or fees by whatever name called) relating to business (other than income tax and wealth tax) incurred during the tax year are deductible in that year, provided they are paid by the following 30 September. Otherwise, they are deductible in the year of payment.

**Organisational and start-up expenses**
Certain expenses are incurred by taxpayers either before the start-up of a business or after start-up of business, in connection with extension of the industrial undertaking, or in connection with setting-up a new unit. One fifth of such expenditure would be allowed over a period of five years.

**Expenses allowable on actual payment basis**
Certain expenses, such as but not limited to, employees’ provident fund (i.e., retirement benefit funds) dues, bonus to employees, interest payable to financial institutions and banks, are allowed as tax deductible on actual payment.

**Offset of losses**
Loss can be carried forward and set-off against income from subsequent year(s) for periods set out in the following table:
India

<table>
<thead>
<tr>
<th>Types of losses</th>
<th>Time limit</th>
</tr>
</thead>
<tbody>
<tr>
<td>Unabsorbed depreciation</td>
<td>Unlimited</td>

<tr>
<td>Other business losses (other than speculation business losses)</td>
<td>8 years</td>
</tr>
<tr>
<td>Speculation business losses</td>
<td>4 years</td>
</tr>
<tr>
<td>Capital losses</td>
<td>8 years</td>
</tr>
</tbody>
</table>

**Group taxation**

Group taxation is not provided by Indian tax law.

**Tax incentives**

Tax incentive provisions normally have conditions applicable for the period within which the preferred activity should be undertaken, and the period for which the tax incentive is available. It may also be necessary to fulfil certain other conditions such as ‘forming’ a ‘new’ undertaking.

**Tax incentives for undertakings other than infrastructure development undertakings**

New industrial undertakings located in specified “backward” states and districts are entitled to full tax exemption of profits for the first three or five years of operation, followed by a partial tax exemption of 30% of profits for the next five years. The list of backward districts has been streamlined into category A and category B districts, depending upon the current level of infrastructure development in those areas. The initial tax holiday period is five years in the case of category A districts and three years in the case of category B districts. A similar incentive is also applicable for hotels satisfying prescribed conditions.

If certain conditions are met, a tax holiday is permitted on the profits of an undertaking engaged in any of the following:

- Integrated business of handling, storage and transportation of food grains;
- Developing and building of housing project;
- Scientific research;
- Commercial production or refining of mineral oils;
- Setting up and operating a cold chain for agricultural produce;
- Processing, preservation and packaging of fruits or vegetables; and
- Operating and maintaining a hospital in a rural area.

The tax holiday periods ranges from five to 10 years and the percentage of the rebate is either 30%, 50% or 100% in initial years and 30% in later years. The number constituting ‘initial’ and ‘later’ years varies from sector to sector.

**Tax incentives for infrastructure development undertakings**

Enterprises engaged in the business of power generation, transmission or distribution, developing or operating and maintaining a notified infrastructure facility or an industrial park or SEZ, making substantial renovation and modernisation of the existing network of transmission or distribution lines (between specified periods), or laying and operating a cross country natural gas distribution network are eligible to a tax exemption of 100% of profits for any 10 consecutive years falling within the first
15 years of operation (20 years in the case of infrastructure projects, except for ports, airports, inland waterways, water supply projects and navigational channels to the sea). Infrastructure facility means roads, including toll roads, bridges, rail systems, highway projects, water supply projects, water treatment systems, irrigation projects, sanitation and sewerage systems or solid waste management systems, ports, airports, inland waterways, inland ports or navigational channels to the sea.

**Tax incentives for exports**
The export profits from a new industrial undertaking satisfying prescribed conditions established in a Free Trade Zone (FTZ), Software Technology Park (STP), or Electronic Hardware Technology Park (EHTP), or a 100% export-oriented undertaking (EOU) or a unit in a Special Economic Zone (SEZ) are exempt from income tax for 10 years, commencing from the first year of manufacture. However, this exemption is available only until the financial year 2010-2011.

The export profits from a new industrial undertaking satisfying prescribed conditions established in an SEZ is eligible for tax exemption of 100% of profits for the first five years, from the year of commencement of manufacturing, followed by a partial tax exemption of 50% of profits for the next five years. A further tax exemption of 50% of the profits for the five years is also available after that, subject to an equal amount of profit being retained and transferred to reserves in the books.

**Tax incentives for units in the North Eastern Region of India**
Measures are in place to facilitate the development of the Indian North Eastern Region and of the state of Sikkim. Undertakings located in these states which (a) begin to manufacture or produce any eligible article, or (b) undertake substantial expansion, or (c) commence an eligible business between 1 April 2007 to 1 April 2017, are eligible for a 100% deduction of profits for 10 consecutive years.

A list of eligible businesses have been provided by the Indian government. The eligible businesses include hotels (not below two-star category), adventure and leisure sports including ropeways, the provision of medical and health services in nursing homes with a minimum capacity of 25 beds, operating a vocational training institute for hotel management, catering and food crafts, entrepreneurship development, nursing and para-medical training, civil aviation related training, fashion design and industrial training, running information technology related training centre, manufacturing of information technology hardware and bio-technology. Businesses other than the above listed eligible businesses are not entitled to claim the tax holiday.

**Tax incentives for hotels/convention centres located in specified districts**
A tax holiday of five years is provided to hotels (two, three or four star) and convention centres located in the National Capital Territory of Delhi and the districts of Faridabad, Gurgaon, Gautam Budh Nagar and Ghaziabad, provided that the construction is completed and operations are started between 1 April 2007 and 31 July 2010.

Hotels located in a specified district having a World Heritage Site, if such a hotel is constructed and has started functioning at any time during the period 1 April 2008 to 31 March 2013, it would be eligible for a tax holiday for a period of five years.
India

**Tax incentives for certain income relating to offshore banking units and international financial services centre**
A scheduled bank, or any bank incorporated by or under the laws of a country outside India, which has an offshore banking unit in an SEZ or an international financial services unit with a specified income which is subject to prescribed conditions, is eligible for a tax exemption of 100% of the specified income for five consecutive years beginning from the year in which the permission under the Indian Banking Regulation Act, 1949 was obtained and for 50% of the specified income for five consecutive years.

**Tax incentive of capital expenditure on certain specified businesses**
Capital expenditure is allowed at 100% in respect of the following specified businesses:

- Setting up and operating cold chain facilities;
- Setting up and operating warehousing facilities for storage of agriculture produce;
- Laying and operating a cross-country natural gas or crude or petroleum oil pipeline network for distribution, including storage facilities being an integral part of such a network;
- Building and operating a new hotel of two-star or above category in India;
- Building and operating a new hospital with at least 100 beds; and
- Developing and building a housing project under a scheme for slum redevelopment or rehabilitation framed by the government.

The following characteristics and conditions may be noted

- Any sum received or receivable in cash or in kind on transfer, etc., of the capital asset shall be considered as business income, if expenditure on such an asset has been allowed as a deduction under this section;
- Any loss computed in respect of the above specified businesses shall be allowed to be set-off or carried forward and set-off only against the profits and gains of specified businesses; and
- The specified business should:
  - Not be set up by splitting up or reconstruction of a business already in existence;
  - Not be set up by transfer of used machinery or plant exceeding 20% of the total value of the machinery or plant used in such business; and
  - Have been approved by the prescribed authority (i.e., the government).

**Withholding taxes**

There is an obligation on the payer (either resident or non-resident) of income to deduct tax at source (i.e., withhold tax) when certain specified payments are credited and/or paid. Some of the expenses which require withholding of tax are as shown below:

**Resident companies**

<table>
<thead>
<tr>
<th>Nature of payment</th>
<th>Rate of withholding tax (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Specified type of Interest</td>
<td>10%</td>
</tr>
<tr>
<td>Non-specified type of interest</td>
<td>20%</td>
</tr>
<tr>
<td>Professional and technical service fees</td>
<td>10%</td>
</tr>
<tr>
<td>Commission and brokerage</td>
<td>10%</td>
</tr>
<tr>
<td>Rent of Plant or machinery or equipment</td>
<td>2%</td>
</tr>
</tbody>
</table>
### India

**Nature of payment**

<table>
<thead>
<tr>
<th>Nature of payment</th>
<th>Rate of withholding tax (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Rent of Land or Building or Furniture</td>
<td>10%</td>
</tr>
<tr>
<td>Contract Payment (except for Individual / HUF)</td>
<td>2%</td>
</tr>
<tr>
<td>Contract Payment to Individual / HUF</td>
<td>1%</td>
</tr>
<tr>
<td>Royalty or Fees for technical services</td>
<td>10%</td>
</tr>
</tbody>
</table>

**Notes**

1. Payments mentioned as above have a different threshold limit, if the payment is above that limit only then this is the payer required to withhold the tax.

### Non-resident companies

**Nature of payment**

<table>
<thead>
<tr>
<th>Nature of payment</th>
<th>Rate of withholding tax (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Dividend</td>
<td>0%</td>
</tr>
<tr>
<td>Interest on foreign currency</td>
<td>20%</td>
</tr>
<tr>
<td>Royalty &amp; Technical fees</td>
<td>10%</td>
</tr>
<tr>
<td>Long-term capital gains other than exempt income</td>
<td>20%</td>
</tr>
<tr>
<td>Income by way of winning horse races</td>
<td>30%</td>
</tr>
<tr>
<td>Other income</td>
<td>40%</td>
</tr>
</tbody>
</table>

**Notes**

1. Percent to be increased by surcharge and Education assessment to compute effective rate.
2. Income from units of specified mutual funds is exempt from tax in the hands of the unit-holders.
3. Dividends received from Indian companies are tax-free in the hands of the shareholder.
4. Short-term capital gains on transfer of shares of a company or units of an equity oriented fund shall be taxable at 15%, if they have been subjected to STT.
5. Long-term capital gain on transfer of shares (through stock exchange) in listed companies or units of an equity-oriented fund, are exempt from tax if they have been subjected to STT.

### Treaty rates

Some tax treaties provide for lower withholding rates from certain types of income, as follows:

<table>
<thead>
<tr>
<th>Country</th>
<th>Dividend</th>
<th>Interest</th>
<th>Royalty (l)</th>
<th>Fee for technical services (l)</th>
</tr>
</thead>
<tbody>

Notes

a. The treaty tax rates on dividends are not relevant since under the current Indian tax legislation, most dividend income from Indian companies which is subject to Dividend Distribution Tax is exempt from income tax in the hands of the recipient.

b. 10% for equipment rental and ancillary services:
   • For other cases in the first 5 years – 15% if government or specified organisation is the payer and 20% for other payers; and
   • For subsequent years – 15% in all cases (income of government/government organisations exempt from Taxation in the country of source).

c. If at least 10% of capital is owned by the beneficial owner (company) of the company paying the dividend or interest.

d. If at least 20% of capital is owned by the beneficial owner (company) of the company paying dividend or interest.

e. In absence of specific provision, it may be treated as business profits or independent personal services under respective treaties, whichever is applicable.

f. The “most favoured nation” clause is applicable. The protocol to the treaty limits the scope and rate of taxation to that specified in similar articles in treaties signed by India with an OECD or another country.

g. If royalty relates to copyrights of literary, artistic or scientific work.

h. The company paying dividend is engaged in an industrial undertaking.

i. If at least 25% of capital is owned by the beneficial owner (company) of the company paying the dividend.

j. If at least 25% of capital is owned by the company during at least six months before date of payment.

k. If paid on a loan granted by a bank / financial institution.
I. The tax rate for royalties and fees for technical services, under the domestic tax laws, is 10%. This rate is to be increased by a surcharge at 2.5% on the income tax and education cess at 2% and secondary and higher secondary education cess at 1% on the income tax including surcharge. As a consequence, the effective tax rate is 10.558%. This rate applies for payments made under an agreement entered into on or after 1 June 2005. Accordingly, a tax resident can either use the Treaty rate or domestic tax rate, whichever is more beneficial.

m. If interest is received by a financial institution.

n. Taxable in the country of source as per domestic tax rates.

List of limited agreements between India and other countries

**Tax administration**

Accounts for tax purposes must be made up to 31 March. The electronic return of income is required to be filed by 30 September of the financial year.

**Quarterly withholding tax returns**

Quarterly statement of taxes withheld are to be filed electronically with the tax authorities on or before 15 July, 15 October and 15 January for the first three calendar quarters of the financial year and on or before 15 June following the last calendar quarter of the financial year.

**Payment of tax**

Tax is payable in advance (if tax for the year exceeds INR 10,000) in specified instalments during the financial year (April to March) immediately preceding the assessment year in respect of the income of the financial year ending 31 March. Any balance of tax due on the basis of the return must be paid on a self-assessment basis before the return is filed.
Other issues

Mergers and acquisitions
The term “merger” has not been defined in the act but has been covered as part of under the definition of the term “amalgamation”. Amalgamation is defined as merger of one or more companies with another or the merger of two or more companies to form a new company, in such a way that all the assets and liabilities of the amalgamating company or companies become the assets and liabilities of the amalgamated company and shareholders holding not less than 75% in value of the shares in the amalgamating company or companies become shareholders of the amalgamated company.

Capital gains
No capital gains tax is levied on the transfer of capital assets by an amalgamating company to the amalgamated company, provided the amalgamated company is an Indian company. Similar is the position in case of a demerger by a demerged company to a resulting company.

In case where shares of an Indian company are transferred by a foreign company or demerged foreign company to any another foreign company or resulting foreign company, there is no tax payable provided it satisfies certain specified conditions. Furthermore, the shareholder of the amalgamating company or demerged company is not liable to pay capital gains tax on the exchange of shares with that of amalgamating company or the resulting company under the scheme of amalgamation.

Carryforward of accumulated losses of amalgamating company
The losses and unabsorbed depreciation of amalgamating company are deemed to be those of the amalgamated company in the year in which the amalgamation takes place provided it satisfy certain specified conditions.

In case of amalgamation of a company owning an industrial undertaking, the amalgamated company shall achieve the level of production of at least 50% of the installed capacity of the undertaking before the end of the four years from the date of amalgamation and continue to maintain the minimum level of production till the end of five years from the date of amalgamation. If the above conditions are violated, the benefit claimed will be taxed in the hands of the amalgamated company in the year of default.

In case of demerger of a company, the accumulated losses or unabsorbed depreciation of the demerged company directly relatable to the undertaking or the division transferred is allowed to be carried forward and set-off in the hands of the resulting company.

Amalgamation or demerger of co-operative banks
An amalgamated or resulting co-operative bank is eligible for set-off and carryforward of the unabsorbed losses or accumulated depreciation of the amalgamating or demerged co-operative bank subject to fulfilment of certain conditions.
India

The following transactions are not liable for capital gains tax and, thus, tax neutral:

1. The transfer of a capital asset in business reorganisation by a predecessor co-operative bank to a successor co-operative bank; and
2. The transfer by a shareholder, in a business reorganisation of capital assets, of a share or shares held, in the predecessor co-operative bank, if the transfer is made as part of an allotment to the predecessor of any share or shares in the successor co-operative bank.

Transfer pricing
The Indian transfer pricing code stipulates that income arising from ‘international transactions’ between ‘associated enterprises’ should be computed at arm's-length price. Furthermore, any allowance for expenses or interest arising from any international transaction is also to be determined at arm's-length price.

The expressions ‘international transactions’ and ‘associated enterprises’ have been defined. Various methods for computation of arm's-length price have been specified and a taxpayer is required to adopt the most appropriate method. The taxpayer is also required to maintain a comprehensive set of prescribed information and documents relating to international transactions which are undertaken between associated enterprises. The burden of proving the arm’s-length character of the transaction is primarily on the taxpayer.

Where the transfer pricing officer is of the opinion that the arm’s-length price was not applied, he or she may re-compute the taxable income after giving the taxpayer an opportunity to be heard. Stringent penal provisions apply in cases of failure to comply with the provisions of the transfer pricing code.

To facilitate quick resolution of disputes, the Finance (No. 2) Act, 2009 has provided for an alternative dispute resolution mechanism and constituted a new Dispute Resolution Panel (DRP) comprising three Commissioners of Income-Tax. In cases of foreign companies, the transfer pricing orders passed by the tax officer (TO) on or after 1 October 2009 and which are prejudicial to the taxpayer, the AO shall be required to issue a draft order to the taxpayer. The taxpayer can file objections against the draft order before the DRP. After considering all evidence or objections and further enquiries, the DRP would issue binding directions to the AO within a period of nine months. The AO is required to pass an order within one month, in conformity with the directions of the DRP. Orders passed by an AO on the basis of directions of the DRP are appealable directly before the tax tribunal.

In order to lessen the litigation under transfer pricing regulations, provisions empowering the issue of safe harbour rules are contained in the tax law which would be separately issued by the Central Board of Direct. The safe harbour rules are not yet issued. The rules would provide the circumstances in which the tax authorities would accept the transfer price as declared by the assessee.

Taxpayers enjoying a tax holiday in India are also required to comply with the transfer pricing code.
**Tonnage tax scheme**

The tonnage tax scheme can be elected by an Indian company which has a place of effective management in India, owns at least one qualifying ship and whose main object is to carry on the business of operating ships. The tonnage tax scheme is in place of taxation on net income generated by commercial operations.

In relation to non-resident shipping companies that have a regular shipping income, there are presumptive tax provisions applicable to non-resident shipping companies with a regular shipping income. Under the tonnage tax scheme, deemed income shall be assessed at a rate of 7.5% of the amount paid or payable (whether in or out of India) for carriage of passengers, livestock, mail or goods shipped at any port in India and the amount received or deemed to be received in India on account of carriage of passengers, livestock, mail or goods shipped at any port outside India shall be treated as profits and gains of the business or profession. Tax rates as applicable to non-resident after considering the treaty provisions will be applied.

Under a presumptive tax system a taxpayer can opt to be taxed on their income at a pre-designated tax rate.

It should be noted that non-resident shipping companies who have occasional shipping income can opt for the tonnage tax scheme as well. Presumptive tax provisions are applicable to non-resident shipping companies which have occasional shipping income. For non-resident companies with occasional shipping, deemed income shall be taxed at a rate of 7.5% of the amount paid or payable (whether in or out of India) for carriage of passengers, livestock, mail or goods shipped at any port in India shall be treated as profits and gains of business or profession. Tax rates as applicable to non-resident after considering the treaty provisions.

A government company or a public company formed and registered in India with the main object to operate ships is eligible for a deduction not exceeding 50% of the profits to the extent that it is transferred to a special reserve created for the purpose which is utilised in accordance with the provisions of the Act.
Corporate taxes in Indonesia

Significant developments

The corporate tax rate was reduced from a flat rate of 28% to 25% from 1 January 2010. Public companies, subject to a minimum share listing of 40% and other conditions, are entitled to a 5% tax discount off the normal rate. Indonesian bond interest income is subject to a final tax rate of 15%, which was reduced from the previous rate of 20%.

The recent focus of the Indonesian Tax Office (ITO) has been directed at tax treaty abuse and cross-border related party transactions. This follows the general tax review that led to the 2009 and 2010 reductions in the corporate income tax rate and the introduction of the amended value-added tax (VAT) law in 2009, with effect from 1 April 2010.

The requirement to obtain the benefit of a reduced treaty withholding tax (WHT) rate as from 1 January 2010 became more difficult for foreign taxpayers to satisfy. Firstly, the ITO introduced a new form of certificate of domicile (CoD) that must be certified by a recipient's home country tax authority in the form required by the ITO. The CoD in the form prepared by the other country's tax authority may only be used in limited circumstances. Further, the CoD form also requires a number of declarations to be made by the recipient that acknowledge the use of the treaty jurisdiction was not done merely to obtain the benefit of the treaty. These declarations place onerous obligations on both the Indonesian payer and the recipient entity.

During 2009, the ITO significantly increased its focus on related party arrangements. It is now heavily focused on transfer pricing in its ongoing audits, and has indicated that it will commence a number of transfer pricing specific audits. Taxpayers must now make detailed disclosures in their annual corporate income tax return pertaining to their level of transfer pricing documentation, the method used and the reasons why the method is appropriate. Taxpayers that have not prepared adequate documentation can likely expect a tax audit.

The amendments to the VAT law, which were announced in 2009 and took effect from 1 April 2010, generally only reflect changes of an administrative nature, rather than a fundamental change in the VAT system. However, the new requirement that a valid VAT invoice be delivered at the time of the taxable delivery (as opposed to the previous deadline of the end of the month following the taxable delivery) will force a change in the administrative practices of many taxpayers.
Taxes on corporate income

Corporate tax
A flat corporate income tax rate of 25% applies from 2010. Public companies that satisfy a minimum listing requirement of 40% and certain other conditions are entitled to a tax discount of 5% off the standard rate, providing an effective tax rate of 20% in 2010. Small enterprises (i.e., corporate taxpayers with an annual turnover of not more than IDR 50 billion) are entitled to a tax discount of 50% off the standard rate, which is imposed proportionally on taxable income of the part of gross turnover up to IDR 4.8 billion.

Certain types of income are subject to a final income tax at a specified percentage of the gross amount of income, without regard to any attributable expenses:

Expenses relating to gross income subject to “final” tax are not deductible

Corporate residence
A company is treated as a resident of Indonesia for tax purposes by virtue of having its establishment or its place of management in Indonesia. A foreign company carrying out business activities through a permanent establishment (PE) in Indonesia will generally be required to assume the same tax obligations as a resident taxpayer.

Other taxes
Value-added tax (VAT) / Luxury-goods sales tax (LST)
The VAT Law has been amended and took effect from 1 April 2010. The amendments are mostly administrative and do not fundamentally change the VAT system.

With a few exceptions, VAT is applicable on deliveries (sales) of goods and services within Indonesia at a rate of 10%. VAT on export of goods is zero-rated while the import of goods is subject to VAT at a rate of 10%. From 1 April 2010 zero-rated VAT is also applicable on exported services, but subject to a Minister of Finance (MoF) limitation. Currently, only certain services, including toll manufacturing services, are subject to the 0% VAT rate. Other exported services, not specifically defined by the
MoF, are subject to a 10% VAT rate. Inbound use or consumption of foreign services or intangible goods, with a few exceptions, is also subject to a self-assessed VAT at a rate of 10%.

The VAT law allows the government to change the VAT rate within range of 5% to 15%. However, since the enactment of the VAT law in 1984, the government has never changed the VAT rate.

In addition to VAT, some goods are subject to LST upon import or delivery by the manufacturer to another party at rates ranging from 10% to 75%, however, from 1 April 2010, the maximum rate may be as high as 200%.

**Land and buildings tax**

Land and buildings tax is due annually at 5% of the government-determined sales value.

In a land and building transfer, the acquirer is liable for duty on the acquisition of land and building rights at 5% of the greater of the transaction value or the government-determined value.

**Stamp duty**

Stamp duty is nominal and payable as a fixed amount of either IDR 6,000 or IDR 3,000 on certain documents.

**Branch income**

Branch profits are subject to the ordinary corporate tax rate of 25%. The after-tax profits are subject to a withholding tax (WHT) at 20%, regardless of whether the profits are remitted to the home country. However, a concessional WHT rate may be applicable where a tax treaty is in force (see Withholding taxes).

**Income determination**

**Inventory valuation**

Inventories must be measured at cost by using either the average or first-in first-out (FIFO) methods. Once a costing method is adopted, it must be applied consistently.

**Capital gains**

Capital gains are generally assessable together with ordinary income and subject to tax at the standard corporate tax rate. However, gains from the transfer of land and buildings are no longer subject to tax but rather are subject to final income tax at a rate of 5% of the transaction value or the government-determined value, whichever is higher. (Refer to Taxes on Corporate Income.)

The proceeds from sales of shares listed on Indonesian stock exchanges are not subject to normal income tax. Instead, the proceeds are subject only to a final WHT of 0.1% of the gross sales consideration. An additional tax of 0.5% applies to the share value of founder shares at the time an initial public offering takes place, irrespective of whether the shares are held or sold. Shareholders may elect not to pay this tax, in which case the actual gain will be subject to normal tax at the time the shares are sold.
**Inter-company dividends**

In principle, dividend income received by a resident taxpayer from a limited liability company (generally referred to as a PT company) is taxable as ordinary income for the taxpayer receiving the dividend. However, if the dividend recipient is a PT company with a minimum shareholding of 25% in the company paying the dividend, the income tax is exempt. In this respect, the 2008 Income Tax Law removed the previous active business condition for obtaining the income tax exemption.

Where the recipient is not resident in Indonesia, a WHT rate of 20% applies, subject to variation by tax treaties (see Withholding taxes).

The rule regarding inter-company dividends also applies to stock dividends (bonus shares) including dividends paid out of share premium (“agio”).

**Foreign income**

Foreign branch income of an Indonesian company must be accounted for as Indonesian taxable income under the controlled foreign corporations (CFCs) regulation. These rules apply to Indonesian tax residents owning at least 50% of the paid-up capital (shares) in a CFC. The rules make no reference to such terms as tax avoidance or tax evasion and therefore, apply even if the CFC is domiciled in a non-tax haven country. The only situation in which the rules do not apply is when the CFC’s shares are listed on a recognised stock exchange. In very broad terms, under the CFC rules, the Indonesian shareholder of the CFC is deemed to receive a dividend with respect to the CFC profits based on a shareholding proportional calculation.

**Stock dividends**

The rule for inter-company dividends in general also applies to stock dividends. However, the tax exemption may not be applicable if the stock dividends represent capitalisation of agio.

**Exchange gains and losses**

Gains and losses arising from currency fluctuations are generally recognised on an accrual basis in accordance with the prevailing Indonesian Accounting Standards, which resemble International Accounting Standards in most respects.

**Deductions**

**Depreciation and amortisation**

Depreciable/amortisable assets include both tangible and intangible property with a useful life of more than one year, except land that is owned and used in business. Depreciation and amortisation may be calculated under the straight-line method or the declining-balance method on an individual asset basis. Once a method is chosen, it should be applied consistently. In calculating depreciation, depreciable assets are divided into the following classes:

<table>
<thead>
<tr>
<th>Class</th>
<th>Straight-line method</th>
<th>Declining-balance method</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>%</td>
<td>%</td>
</tr>
<tr>
<td>Property:</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Usefull life of 4 years</td>
<td>25</td>
<td>50</td>
</tr>
<tr>
<td>Usefull life of 8 years</td>
<td>12.5</td>
<td>25</td>
</tr>
</tbody>
</table>
Special rules apply for assets used in certain business fields and/or certain areas. Tax depreciation need not conform to book depreciation.

The cost incurred for acquiring the rights, with a beneficial life of more than one year, for mining, oil and natural gas concessions; forest concessions; and other rights to exploit natural resources should be amortised by the production-unit method. Except for the right to acquire oil and natural gas concessions, the depletion rate used should not exceed 20% per annum.

**Net operating losses**
Losses may be carried forward for a maximum period of five years. Carrying back of losses is not permitted. Offsetting losses within a corporate group is not permitted.

**Payments to foreign affiliates**
Withholding tax is applied as a final tax on the recipient for payments of royalties, interest and service fees to foreign non-resident companies. Excessive and non-arm’s-length payments to related parties are disallowed as deductions. The tax law denies deductions for all payments from a branch to its head office for royalties, interest and services provided by the head office (exceptions apply for loans between bank branches and their head offices).

**Taxes**
Land and buildings tax and regional taxes may be deducted from taxable income. With several exceptions, input VAT is also deductible against taxable income as long as it is not claimed as a credit against output VAT.

**Non-deductible items**

**Benefits in kind**
Most benefits received in-kind by employees, such as free housing, are not tax-deductible to the entity providing the benefit. Free motor vehicle and telephone expenses, including depreciation, are tax-deductible but only for 50% of the total expenses incurred. Expenses for meals and transportation made available to all staff are tax-deductible. Apart from these, benefits in kind, such as housing provided in remote areas as designated by the Minister of Finance and Integrated Economic Development Areas as designated by Presidential Decree, can also be claimed as tax-deductible expenses.

**Other significant items**
The Minister of Finance is authorised to make a determination on an appropriate ratio of debt to equity. Under the law, debt between related parties may be recharacterised as equity, thus giving rise to the disallowance of a tax deduction for related costs. However, the MoF has not yet issued a ruling on these matters.
Group taxation

Consolidated returns are not allowed.

Tax incentives

Inward investment

The Director General of Tax (DGT), on behalf of the Finance Minister and based on the recommendation of the National Board of Investment (BKPM) chairman, may provide the following tax concessions to Indonesian limited liability (PT) companies following their investment in certain designated business areas or in certain designated regions:

• A reduction in net income of up to 30% of the amount invested (generally amount spent on assets), prorated at 5% for six years from commercial production date, provided that the assets invested are not transferred out within six years;
• Acceleration of fiscal depreciation deductions;
• Extension of tax loss carryforwards for up to 10 years; and
• A reduction of the WHT rate on dividends paid to non-residents to 10%.

The same tax facilities may be granted by the DGT to companies conducting business in an Integrated Economic Development Area (KAPET). Specific approval must be obtained from the DGT for these tax facilities. If the company has bonded zone (KB) status, the tax facilities will also include those typically enjoyed by a KB company, for example:

• Non-collection of VAT and sales tax on certain luxury goods transactions;
• Exemption from prepaid income tax (Article 22) on the importation of capital goods and other equipment directly relating to production activities;
• Postponement of import duty on capital goods and equipment and goods and materials for processing; and
• Exemption from import duty for four years on machinery and certain spare parts.

The designation of an area as a KAPET is set out in a specific presidential decree. Currently, there are approximately 25 areas designated as KAPETs.

Reinvestment of branch profits

PEs that reinvest their after-tax profits in Indonesia within the same year or in the following year are exempt from branch profit tax on these profits. Reinvestment requires the branch head office to invest in an Indonesian company as a founder shareholder in the following tax year. Shares may not be transferred for at least two years from the date of the company commences commercial production.

Tax-neutral merger

Transfers of assets in business mergers, consolidations, or business splits must generally be dealt with at market value. Gains resulting from this kind of restructuring are assessable, while losses are generally claimable as a deduction from income.

However, a tax-neutral merger or consolidation, under which assets are transferred at book value, can be conducted but subject to the approval of the DGT. To obtain this approval, the merger or consolidation plan in question must pass a business-purpose test. Tax-driven arrangements are prohibited and therefore tax losses from the combining companies may not be passed to the surviving company.
Indonesia

Subject to a similar, specific DGT approval, the same concession is also available for business splits that constitute part of an initial public offering (IPO) plan. In this case, within one year of the DGT's approval being given, the company concerned must have made an effective declaration regarding registration for an IPO with the Capital Market Supervisory Board (BAPEPAM). In the event of complications beyond the company’s control, the period may be extended by the DGT for up to four years.

Other incentives
Income earned by venture capital companies in the form of profit-sharing from their investments in Indonesia is exempt from tax, provided that the following conditions are met:

1. Entities are small or medium-scale businesses in one of the sectors designated by the Indonesian government.
2. Investments are not listed on the Indonesian stock exchange.

Withholding taxes (WHT)
Withholding tax is levied on a variety of payments to corporations and individuals, resident and non-resident, at the following rates:

<table>

Notes

1. Fees for technical, management and consulting services rendered in Indonesia are subject to WHT at rates of 5%, 7.5%, 10% and 15% for Switzerland, Germany, Luxembourg and Pakistan, respectively.
2. VAT is reciprocally exempt from the income earned on the operation of ships or aircraft in international lanes.
3. The treaty is silent concerning branch profit tax rate. The ITO interprets this to mean that the tax rate under Indonesian Tax Law (20%) should apply.
4. Tax only applies if the profits are remitted.
5. Subject to protocol ratification, Labuan may be excluded from the territory of Malaysia for tax treaty purposes and the WHT on interest, dividends, and royalties may be reduced to 10%.
6. In the case of dividends received by a resident shareholder, “portfolio shareholding” refers to share ownership of less than 25% of the paid-up capital. In this respect, the dividend tax withheld by the payer constitutes a prepayment of the income tax liability of the shareholder. “Substantial shareholding” refers to the share ownership of 25% of the paid-up capital or more.

Domestic WHT is also payable at the rate of 2% for most types of services where the recipient of the payment is an Indonesian resident.

The issue of beneficial ownership has come under tax office scrutiny. For treaty WHT rates to apply to passive income such as interests, dividends, and royalties, the recipient of such income must be the beneficial owner. The recipient must also provide a CoD certified by their home country tax authority, certifying that the recipient is a tax resident of that country. Without a certified CoD, a WHT at a rate of 20% will apply. These aspects need to be considered when paying income of this nature.

In addition to the above treaties, Indonesia has signed tax treaties with Armenia, Hong Kong, Iran, Myanmar, Morocco, Papua New Guinea and Tajikistan. However, these treaties are not yet effective, pending the exchange of ratification documents. There are also agreements with Saudi Arabia, Croatia and Laos for the reciprocal exemption of taxes and customs duties on the activities of the two countries’ air transport enterprises.

Other than passive income such as interests, dividends, and royalties, Indonesian income tax is also collected from certain types of transactions, such as:

- Importation of goods;
- Sale of goods to the government;
- Sale or purchase of certain products;
- Sale or purchase of very luxurious goods; and
- Payment of certain services.

**Tax administration**

**Tax returns and payments**

Tax liabilities for a particular period or year must typically be paid to the State Treasury through a designated tax-payment bank and then accounted for at the DGT office through the filing of the relevant tax returns. The tax payments and tax return filing for a particular tax must be undertaken monthly or annually, depending upon the tax obligation in question.
Corporate tax returns must be filed on an annual basis. A pre-payment system operates for corporate tax whereby monthly instalments must be paid based on previous year tax liability.

Returns for transaction taxes such as WHT must be filed on a monthly basis. Payments are generally required by the tenth or fifteenth day of the following month. Under the new VAT law, which was effective from 1 April 2010, VAT filing is done on a monthly basis, with payment and filing being due no later than the last day of the month following the taxable delivery.

Significant developments

In February 2010, the Iraqi Presidency Counsel issued a new law that imposes income tax at the rate of 35% on the income realised in Iraq from contracts concluded with foreign oil companies, its branches or offices and subcontractors working in Iraq in the oil and gas production sector and related industries.

Taxes on corporate income

All income derived from Iraq is subject to tax in Iraq regardless of the residence of the recipient. In addition, income that is realised outside Iraq by Iraqi and other residents, including interest, commissions, investment returns and profits from trading in currencies, valuable metals and securities, is taxable if such income arises from funds and deposits held in Iraq.

The effective corporate income tax system method presented in Iraq for juristic persons (except partnerships), is based on the statutory income tax rate of 15% at all income levels with no progressive tax rate scale.

The income realised in Iraq from contracts concluded with foreign oil companies, its branches or offices and subcontractors working in Iraq in the oil and gas production sector and related industries should be taxed at a rate of 35%.

Corporate residence

It is important to note that the current Iraq income tax law does not clearly define a permanent establishment (PE); therefore, it is important to monitor commercial activity being performed in the country to ensure compliance with the registration requirements and tax law. The company should consult with their internal tax department and external advisers if they have signed a contract to provide any type of services inside Iraq to determine if the company should have a legal registration and begin to file corporate income tax (CIT) returns.

One of the key issues in determining when a company becomes taxable in Iraq is whether the foreign company is considered to be doing business “in Iraq” or “with Iraq”. In 2009, with Instructions No. 2/2008, the Iraqi tax administration provided a clearer distinction between business in Iraq and business with Iraq.
Other taxes

In addition to the CIT, the following taxes may apply:

Stamp duty
All direct and indirect contracts related to credit facilities and other bank’s activities (e.g., letter of credit contracts), are subject to the stamp fees at a rate of 0.2 of the contract value.

Custom duty
The customs duty system and procedures in Iraq are currently evolving. In March 2010, the Iraqi Presidency Counsel issued Law 12 of 2010 (Custom Tariff Law). The new law comprises 11 articles and primarily addresses custom duties on goods imported into Iraq. The law notes that customs duties shall be levied based on percentages set in the custom tariff and agricultural agenda that is annexed to the Custom Tariff Law. For the purposes of the Custom Tariff Law, the custom tariff and agricultural agenda refers to the schedule comprising itemised codified, section and notes based on the international harmonised system adopted by the World Customs Organization (WCO).

Other taxes
A sales tax of 10% of the value of services is imposed on services rendered by deluxe and first class restaurants and hotels in Iraq.

Branch income

The tax treatment for the branch is similar to the local Iraqi corporation. Therefore, in general, income tax is imposed on corporate entities and foreign branches with respect to taxable profit from all sources arising or deemed to arise in Iraq.

Income is deemed to arise in Iraq if either of the following is located there:

- The place of performance of work; or
- The place of delivery of work.

However, certain limitations apply to head office expenses. The limitation up to 10% of taxable income is allowed.

Income determination

A corporation has to determine its profit/loss according to its income statement for a tax period as established under the General Accepted Accounting Principle (GAAP). However, to reach the taxable income, positive or negative adjustments have to be made to the profit/loss as determined according to GAAP.

In general, all expenses incurred by the taxpayer in order to produce income during the year are deducted from income, provided that such expenses are confirmed by acceptable documents, with some exceptions. The expenses not deductible in accordance with Iraqi tax law include real estate tax, corporate tax, loss on assets sold and the difference between the depreciation and amortisation expenses in accordance with GAAP and Iraqi tax law.

Bribes and illegal payments are not allowed or deductible.
**Capital vs. ordinary gains**
Capital gains on sales of depreciable assets are taxed at the normal CIT rates. Gains derived from the sale of shares and bonds not in the course of a trading activity are exempt from tax. Capital gains derived from the sale of shares and bonds in the course of a trading activity are taxable at the normal corporate income tax rate.

**Dividend income**
Under the tax law, dividends paid out of profits that have been subject to tax, are not taxed again in the hands of the shareholder.

**Deductions**

**Net operating loss**
Under the tax law, loss of a taxpayer in some sources of income arising in Iraq, substantiated by legally accepted documents, are generally deducted from profits arising from other sources. Losses, which cannot be settled in this manner, are carried forward and deducted from the income of the taxpayer over five consecutive years, provided that losses may not offset more than half of the taxable income of each of the five years, and the loss is from the same source of income from which it has arisen.

**Depreciation**
The Iraqi Depreciation Committee sets the maximum depreciation rates for various types of fixed assets. If the rates used for accounting purposes are greater than the prescribed rates, the excess is disallowed.

**Group taxation**
Iraqi law does not contain any provisions for filing consolidated returns or for relieving losses within a group of companies.

**Tax incentives**
In accordance with the Iraqi Investment Law, approved industrial, hotels and tourism projects are given certain custom duty and tax incentives; however, oil and gas is not one of the sectors that is normally granted investment promotion exemptions incentives.

The Board of Investment Promotion has the authority to add any sector or specific project to the list of sectors or projects that benefit from the investment promotion law incentives.

**Withholding taxes (WHT)**
Under the tax law, the amount due from any residing taxpayers to a non-resident, whether the payment is made in cash or credited to the account, is subject to withholding taxes (WHT) at the rate of 15%, if such amounts are related to interest on debentures, mortgages, loans, deposits and advances, as well as annual allowances, pension salaries or other yearly payments.
**Tax administration**

**Iraqi GAAP**
The Iraqi tax law requires all taxpayers to maintain books and records in accordance with Iraq’s local unified accounting system (Iraqi GAAP).

These books shall constitute tax books/accounts. This accounting treatment will determine when income is accrued and costs are incurred for computing taxable profits.

**Returns**
The statutory time line for filing tax returns is the first day of June of the year of assessment. If the self assessment of tax is not accepted by the tax authorities, tax is assessed on the income of the taxpayer based on the information available to the tax authorities. Failure to file a tax return may lead to an estimate of income and assessment of tax by the tax authorities; however, such an assessment does not relieve the taxpayer from responsibility for non-submission of the return within the statutory time line stipulated by law.
Significant developments

Transfer pricing
In April 2010, Ireland enacted broad based transfer pricing legislation. The legislation endorses the Organisation for Economic Co-operation and Development (OECD) Transfer Pricing Guidelines for Multinational Enterprises and Tax Administrations and adopts the arm’s-length principle. The introduction of general transfer pricing legislation in Ireland was widely anticipated and brings the Irish tax regime into line with international norms in this area. The new regime applies to domestic as well as international related party arrangements and will come into effect for accounting periods commencing on or after 1 January 2011 in relation to certain arrangements entered into on or after 1 July 2010.

The new rules will be confined to related party dealings that are taxable at Ireland’s corporate tax rate of 12.5% (that is, trading transactions). Arrangements entered into between related parties prior to 1 July 2010 are excluded from the new regime and there is also an exemption for small and medium enterprises. The new rules will help multinationals to support and defend the level of income and expenses being attributed to their Irish operations.

Intellectual property (IP) regime
May 2009 saw the introduction of a new, and widely welcomed, IP regime to the Irish tax code. This regime provided for a tax deduction for capital expenditure, incurred after 7 May 2009, on the acquisition of qualifying IP assets for trade purposes. Finance Act 2010 contains a number of important and significant changes to this regime which significantly enhance the regime’s attractiveness and widen its availability. The list of qualifying intangible assets has been expanded with the inclusion of applications for legal protection (for example, applications for patents, trademarks, etc) as well as expenditure on certain computer software. In addition, the definition of know-how has been amended to bring it broadly in line with that in the OECD model tax treaty.

Taxation of foreign dividends
Up to 31 December 2009, the 12.5% rate of corporation tax applied to certain foreign dividends – broadly speaking, dividends paid out of the trading profits of a company resident in a country with which Ireland has a double taxation agreement. From 1 January 2010 the 12.5% corporate tax rate applies to the same type of dividends received from companies resident in non-treaty countries, that is, where the company that paid the dividend is a listed company or is part of a 75% listed group the principal class of the shares of which are substantially and regularly traded on the Irish Stock...
Exchange, a recognised Stock Exchange in a country with which Ireland has a tax treaty or on such other Stock Exchange as is approved by the Minister for Finance for the purposes of this relief from double taxation.

The rules for identifying the underlying profits out of which foreign dividends are paid have also been simplified.

Foreign dividends received by an Irish company where it holds 5% or less of the share capital and voting rights in that foreign company will be exempt from corporation tax where the Irish company would otherwise be taxed on this dividend income as trading income.

**Branch income**

A unilateral form of credit relief for foreign taxes paid by foreign branches operating in countries with which Ireland does not have a tax treaty is available. To the extent that there were foreign taxes on branch profits that were not utilised in the relevant period (that is, where credit for foreign tax exceeds the Irish tax payable), these unused credits were lost, unless they could be used against Irish corporation tax on other foreign branch profits arising in the same accounting period. For accounting periods ending on or after 1 January 2010 any unused credits can be carried forward indefinitely and credited against corporation tax on foreign branch profits in future accounting periods.

**Asset management**

Finance Act 2010 introduced changes aimed at enhancing Ireland as a leading location for the management of both UCITS and non-UCITS funds. UCITS III and IV brought about fundamental changes to both the management and structuring of UCITS. One of the reforms introduced permits UCITS management companies located in one EU jurisdiction to manage UCITS domiciled in another EU jurisdiction. One of the areas of concern is whether the activities of the management company could bring a foreign UCITS within the charge to tax in the management company’s home jurisdiction, for example, by creating a branch or agency or causing the fund to be regarded as tax resident there. The Finance Act provides that in the case of an Irish management company managing a non-Irish UCITS, such management company will not be regarded as a branch or agency of the non-Irish UCITS and will not bring the profits of the foreign UCITS within the charge to Irish tax or treat the foreign UCITS as an Irish regulated fund.

Following the US and OECD review of offshore domiciles, which has resulted in increased regulation and tax obligations, fund managers are being forced to consider possible alternative onshore jurisdictions for their investment fund products. As a result of its international reputation in the investment funds industry and the favourable corporate tax regime, Ireland is seeing a significant trend in investment managers moving their investment platforms there from the traditional offshore jurisdictions. Recent company law changes also allow corporate funds to migrate to Ireland through a re-registration process, whereby the fund company would benefit from its continued existence, including the ability to retain the fund’s performance track record post migration and avoid potential adverse tax consequences and costs that typically arise from a merger of an offshore fund with a new onshore fund. The Irish Financial Regulator has introduced a coordinated authorisation process to facilitate speed to market, which at present is a key advantage in comparison to delays being experienced in other EU domiciles.
Ireland

**Islamic finance**
Towards the end of 2009, the Irish tax authorities confirmed that the Irish tax treatment of certain Islamic finance transactions, such as funds, certain ijara (leasing), takaful (insurance) and re-takaful (reinsurance) was accommodated within existing Irish tax legislation. Specific legislation was however, required to facilitate the issuance of sukuk (that is, Islamic bonds) in Ireland and this legislation was introduced earlier this year. Overall, the intention of the legislature is to ensure that Islamic finance transactions are treated in the same favourable manner as conventional financing transactions. The legislation also introduced changes in relation to the taxation (and tax impact) of UCITS management companies. The UCITS structure is one of the commonly used structures for many different types of Islamic funds such as retail Islamic equity funds, Shariah-compliant money market funds, Shariah-compliant exchange traded funds (ETFs), etc. This demonstrates the Irish government and tax authorities desire to enhance the attractiveness of Ireland as a location for Islamic finance transactions by extending to this form of financing the relieving provisions which currently apply to conventional financing.

**Islamic insurance**
The Irish Revenue has recently provided guidance in respect of the Irish tax treatment of general takaful (non-Life), re-takaful (reinsurance) and family (life) takaful arrangements. Legislative changes are not currently required to facilitate Islamic insurance in Ireland.

**Carbon tax**
A carbon tax has been introduced on mineral oils (for example, auto fuels and kerosene) which are supplied in Ireland. Relief will apply where mineral oils are supplied to an ETS (Emissions Trading Scheme) installation or for electricity generation. Pure biofuels are exempt from carbon tax. From 1 July 2010 there will be full relief for the biofuel component of the fuel. As a result, from 1 July 2010 where biofuel has been mixed or blended with any other mineral oil, the relief from carbon taxes shall apply to the biofuel content of the mixture or blend regardless of the percentage.

A carbon tax has also been introduced on natural gas and solid fuel where supplied for combustion. Again reliefs apply where these fuels are supplied to ETS installations or used in electricity generation, chemical reduction or in the electrolytical or metallurgical processes.

**Tax avoidance disclosure**
Finance Act 2010 introduced provisions relating to the disclosure of tax-avoidance schemes. This requires promoters of such schemes to provide information to the tax authorities within a specified time (yet to be determined) of having made the scheme available. The rules are wide reaching and essentially cover all tax heads including corporation tax, income tax, capital gains tax, stamp duty, VAT and Customs & Excise.

**Other significant developments**
- Further enhancements to the Research and Development tax credit regime which caters for pre-trading expenditure and other specific circumstances.
- The categories of energy efficient equipment which may qualify for 100% first year capital allowances have been extended.
- Changes have been introduced to significantly ease the administrative burden in meeting the requirements for exemption from Dividend Withholding Tax (DWT).
The requirement for certain non-resident companies receiving dividends from Irish resident companies to provide a tax residence and/or auditor’s certificate, along with a signed non-resident declaration form, in order to obtain exemption from DWT at source has been removed. Instead, a self-certification system will apply under which a “qualifying non-resident company” will provide a declaration to the dividend paying company or qualifying intermediary to claim exemption from DWT.

**Taxes on corporate income**

**Corporation tax**
Corporation tax is chargeable as follows on income and capital gains:

<table>
<thead>
<tr>
<th>Standard rate on income</th>
<th>Higher rate on income</th>
<th>Capital gains rate</th>
</tr>
</thead>
<tbody>
<tr>
<td>“trading rate”</td>
<td>“passive rate”</td>
<td></td>
</tr>
<tr>
<td>12.5%</td>
<td>25%</td>
<td>25%</td>
</tr>
</tbody>
</table>

Non-trading (passive) income includes dividends from companies resident outside Ireland (with some exceptions discussed below), interest, rents and royalties. Legislation provides that certain dividend income (income from foreign trades etc.) is taxed at 12.5% – *see Income determination section below*. The higher rate also applies to income from a business carried on wholly outside Ireland and to income from land dealing, mining and petroleum extraction operations. An additional “profit resource rent” tax applies to certain petroleum activities. Depending on the profit yield of a site the tax rate applicable can range from 25% to 40%.

A rate of 10% applies until 31 December 2010 on manufacturing activities that commenced before the sunset date (July 1998) for this incentive.

Close companies (*see below for details*) may be subject to additional corporate taxes on undistributed investment income (including Irish dividends) and on undistributed income from professional services. Examples of professional services include professions such as solicitor, accountant, doctor and engineer.

**Dividend withholding tax**
Dividend withholding tax applies at 20% to dividends and other distributions, unless the recipient of the dividend is either a non-Irish company eligible for the Parent-Subsidiary Directive (which in Ireland requires a 5% or greater shareholding) or is an Irish company which directly or indirectly holds more than 50% of the share capital of the paying company.

Exemptions from dividend withholding tax also are available where the recipient of the distribution falls into one of the categories listed below, and provided an appropriate declaration is made to the company paying the distribution in advance of the distribution. In a move to significantly ease the administrative burden in applying for exemption for dividend withholding tax, this declaration is now self-assessed and valid for up to six years.

- Irish tax resident companies, which hold less than a 51% shareholding of the company;
Ireland

- Non-resident companies, which are resident in a country with which Ireland has a tax treaty or in another EU member state, where the company is not controlled by Irish residents;
- Non-resident companies, which ultimately are controlled by residents of a tax treaty country or another EU member state;
- Non-resident companies whose principal class of shares is traded on a recognised stock exchange in a treaty country or another EU member state or on any other stock exchange approved by the Minister for Finance (or if recipient of the dividend is a 75% subsidiary of such a listed company);
- Non-resident companies that are wholly owned by two or more companies the principal class of shares of each of which is traded on a recognised stock exchange in a treaty country or another EU member state or on any other stock exchange approved by the Minister for Finance;
- Individuals who are resident in a tax treaty country or in another EU member state; or
- Certain pension funds, retirement funds, sports bodies, collective investment funds, and employee share ownership trusts.

Companies that make a dividend distribution are required, within 14 days of the end of the month in which the distribution is made, to make a return to the tax authorities containing details of the recipient of the dividend, the reason for any exemption from dividend withholding tax and to pay over any tax withheld.

**Corporate residence**

A company that is incorporated, or has its place of central management and control, in Ireland will be regarded as resident in Ireland for the purposes of corporation tax and capital gains tax. This is subject to two exceptions where the company is resident in Ireland due only to its Irish incorporation.

A treaty exception applies if the Irish incorporated company is, by virtue of an Irish double tax treaty, considered to be tax resident in the treaty partner country and not resident in Ireland.

An active trading exception applies if the Irish incorporated company or its 50% affiliate carries on a trade in Ireland and the company has qualifying ownership. A 50% affiliate is essentially a company where:

- One company is a 50% subsidiary of the other or both companies are 50% subsidiaries of a third company;
- There is an entitlement to at least 50% of the profits available for distribution; and
- There is an entitlement to at least 50% of the assets available in the case of a winding up of the other company.

Qualifying ownership requires that the Irish incorporated company or a 50% or more affiliate/parent is listed on a stock exchange in an EU Member State or a territory which has a tax treaty with Ireland or, in the absence of such a listing, that the ultimate control (more than 50%) of the Irish incorporated company rests with persons who are tax resident in EU or treaty countries.

Tax residence is important because resident companies are taxable in Ireland on their worldwide profits (including gains), while non-resident companies are subject to Irish
corporation tax only on the trading profits of an Irish branch or agency, and to Irish income tax (generally by way of withholding) on certain Irish source income.

**Other taxes**

**Value-added tax (VAT)**

VAT is charged at 21% on the supply of most goods and services in the course of business.

There are two lower rates being 13.5%, which applies to most building services, labour intensive services, domestic fuel and power and other reduced rate supplies, and 4.8% which applies to livestock and greyhounds.

Most exports, food, oral medicine and children’s clothing and footwear are zero-rated.

Some supplies are exempt from VAT. The main exempt categories are most banking services, insurance services, medical services, passenger transport, education and training.

Zero rating is preferable to exemption because most VAT costs incurred in making a zero-rated supply can be recovered, while those incurred in making an exempt supply generally cannot.

**Customs and excise duties**

Many goods imported into Ireland from outside the EU are subject to customs duties. The rates of duty are provided by the EU’s Common Customs Tariff.

Excise duties are chargeable on most hydrocarbon oil products, electricity supply, alcoholic drinks and tobacco products imported into or produced in Ireland.

**Professional services withholding tax (PSWT)**

Income tax at the standard rate (currently 20%) is deducted from payments for professional services by government departments, state bodies and local authorities. Credit is granted for any PSWT withheld against the corporation tax (or income tax for an individual) liability of the accounting period in which tax is withheld.

**Relevant contracts tax (RCT)**

There are special rules relating to payments made by principal contractors to sub-contractors in respect of relevant contracts in the construction, forestry and meat processing industries. Where relevant operations under a relevant contract are carried out in Ireland the RCT system applies regardless of whether or not parties to the contract are non-resident in Ireland, parties to the contract are not liable to tax in Ireland in respect of those operations, the contract is executed outside Ireland, or payments under the contract are made outside Ireland.

The principal contractor must deduct tax at a rate of 35% from such payments and remit this to the Revenue unless the sub-contractor produces a certificate (Form C2) authorising the receipt of the amount without deduction of tax, and the principal contractor obtains a Relevant Payments Card in relation to the sub-contractor. Qualification for exemption from withholding tax is a two-part test and it is critical that both parts are satisfied before any payment is made gross. The gross amount receivable
Ireland

under the contract is included in the computation of the profit of the sub-contractor and he is entitled to credit for, or repayment of, the tax suffered.

**Local taxes**
Local taxes known as “rates” are not based on income but rather are levied on the occupiers of business property by reference to a deemed rental value of the property concerned. Rates are an allowable deduction for corporation tax purposes. Local authorities are also empowered to levy charges on all occupiers for specific services, for example, water supply. These charges are also deductible for corporation tax purposes.

**Stamp duty**
Stamp duty is a tax on instruments. It is payable on transfers of land and on other assets whose legal title cannot be passed by delivery. It is also chargeable on all instruments of transfer executed in Ireland, and on instruments, wherever executed, which relate to Irish property or activities. The transfer of assets between associated companies may not be liable to stamp duty, provided certain conditions are met. The key conditions include:

- The companies have a 90% relationship (that is, one company is the beneficial owner of at least 90% of the ordinary share capital of the other, and is entitled to at least 90% of the profits available for distribution and is entitled to at least 90% of the assets in the case of a winding-up of the other company);
- The companies are in a group 90% relationship as defined above that can be traced as far up the group chain as is necessary to establish the qualifying relationship; and
- This relationship must be maintained for a period of two years after the transfer of the assets to avoid the relief being clawed back.

There is an exemption for transfers of intellectual property and the categories of intellectual property qualifying for this exemption are broadly similar to those for which IP capital allowances are available (see Intellectual property regime section below).

Stamp duty rates are up to 6% of the value transferring (up to 9% for residential property). Stamp duty is levied at 1% on transfers of Irish shares.

A EUR 1 stamp duty applies to a policy of insurance, other than life insurance, relating to risks located in the Republic of Ireland. The stamp duty is normally collected under the terms of a composition agreement, which provides for regular, usually quarterly, payments of duty.

Health insurance policies entered into since 1 January 2009 are subject to stamp duty.

**Capital duty on share capital**
Ireland does not levy capital duty on share capital of companies.

**Capital taxes**
Ireland does not levy tax on the net worth of companies.

**Social security**
Employed persons are compulsorily insured under a State-administered scheme of pay-related social insurance (PRSI). Contributions are made by both the employer
and the employee. Contributions by the employer are an allowable deduction for corporation tax purposes.

**Insurance premium tax (IPT)**

A levy of 3% of gross premiums received applies in relation to non-life insurance policies relating to risks located in the Republic of Ireland. This levy is payable four times per annum, within 30 days of the end of each quarter (that is, within 30 days from quarters ending 31 March, 30 June, 30 September and 31 December).

A levy of 1% of gross premiums received applies in relation to certain classes of life insurance policies relating to risks located in the Republic of Ireland. This levy is payable four times per annum, within 25 days of the end of each quarter (i.e., within 25 days from quarters ending 31 March, 30 June, 30 September and 31 December). Pension business and reinsurance business are excluded from the levy.

**Environmental taxes**

In Ireland, a levy [currently 22c per bag] is imposed upon consumers provided with a plastic bag when purchasing goods in supermarkets and other retail outlets. Under the applicable legislation, retailers are obliged to collect 22c in respect of every plastic bag or bag containing plastic regardless of size unless specifically exempted, that is provided to customers, and remit all plastic bag levies collected to Irish Revenue. As a result of the levy, most non-supermarket retailers provide paper carrier bags and a lot of retailers provide “bags for life”, which are made from non-plastic material and, therefore, not subject to the environmental levy.

**Carbon tax**

A carbon tax has been introduced on mineral oils (for example, auto fuels and kerosene) which are supplied in Ireland. Relief will apply where mineral oils are supplied to an ETS (Emissions Trading Scheme) installation or for electricity generation. Pure biofuels are exempt from carbon tax. From 1 July 2010 there will be full relief for the biofuel component of the fuel. As a result, from 1 July 2010 where biofuel has been mixed or blended with any other mineral oil, the relief from carbon taxes shall apply to the biofuel content of the mixture or blend regardless of the percentage.

A carbon tax has also been introduced on natural gas and solid fuel where supplied for combustion. Again reliefs apply where these fuels are supplied to ETS installations or used in electricity generation, chemical reduction or in the electrolytical or metallurgical processes.

**Branch income**

Irish branches of foreign companies are liable to corporation tax at the rates which apply to Irish resident companies. No tax is withheld on repatriation of branch profits to the head office.

An Irish resident company with a branch or branches outside Ireland is generally taxable in Ireland on the foreign branch profits with a credit for foreign taxes paid on those profits. A unilateral form of credit relief for foreign taxes paid by foreign branches operating in countries with which Ireland does not have a tax treaty is available also. To the extent that there were foreign taxes on branch profits that were not utilised in the relevant period (that is, where credit for foreign tax exceeds the Irish tax payable),
Ireland

these unused credits were lost, unless they could be used against Irish corporation tax on other foreign branch profits arising in the same accounting period. For accounting periods ending on or after 1 January 2010 any unused credits can be carried forward indefinitely and credited against corporation tax on foreign branch profits in future accounting periods.

**Income determination**

**Basis of income determination**

Irish trading profits are computed in accordance with Irish Generally Accepted Accounting Principles (GAAP) or International Financial Reporting Standards (IFRS) subject to any adjustment required by law. Prior-year adjustments may arise on the first-time adoption of IFRS which may result in double counting of income or expenses, or of income falling out of the charge to tax. Generally speaking, in order to avoid such an outcome, transitional adjustments exist whereby amounts of income or expenses that could be double-counted or that would fall out of the charge to tax are identified and the amounts concerned are taxed or deducted as appropriate over a five year period.

**Inventory valuation**

Each item of inventory is valued for tax purposes at cost or market value, whichever is lower, and this will normally accord with the accounting treatment. The method used in arriving at cost or market value of inventory generally must be consistent and must not be in conflict with tax law. The FIFO (first-in, first-out) method is an acceptable method of calculation. The base-stock method has been held to be an inappropriate method for tax purposes, as has the LIFO (last-in, first-out) method.

**Capital gains**

Companies are subject to capital gains tax in respect of gains arising on the disposal of capital assets. The taxable gain is arrived at by deducting from the sales proceeds the cost incurred on acquiring the asset (as indexed to reflect inflation only up to 31 December 2002). The resulting gain is taxable at 25%. In cases of disposals of interests in offshore funds and foreign life assurance policies indexation relief does not apply while a tax rate of 28% applies to funds located in the European Union (EU)/European Economic Area (EEA)/DTA countries while a rate of 25% or 40% applies to funds or policies located in all other jurisdictions. Special rules apply to gains (and losses) from the disposal of development land in Ireland.

Companies that are tax resident in Ireland (that is managed and controlled in Ireland or incorporated in Ireland and not qualifying for exclusion) are taxable on worldwide gains. Non-resident companies are subject to capital gains tax on capital gains arising on the disposal of Irish land, buildings, mineral rights and exploration rights on the Irish continental shelf, together with shares in unquoted (unlisted) companies, whose value substantially (greater than 50%) is derived from these assets. Non-resident companies also are subject to capital gains tax from the realisation of assets used for the purposes of a business carried on in Ireland.

Losses arising on the disposal of capital assets may be offset against capital gains in the accounting period or carried forward for offset against future capital gains. No carryback of capital losses is permitted. There is no facility to offset capital losses against business income or to surrender capital losses within a tax group.
Irish capital gains tax legislation facilitates corporate reorganisations on a tax-free basis in situations where there is a share for share exchange.

**Withholding tax on capital gains**

Where any of the following assets is disposed of, the person by whom or through whom the consideration is paid (that is, the purchaser) must deduct capital gains tax at 15% from the payment:

1. Land or minerals in Ireland or exploration rights in the Irish continental shelf;
2. Unquoted (unlisted) shares deriving their value or the greater part of their value (more than 50%) from assets described in (1);
3. Unquoted (unlisted) shares issued in exchange for shares deriving their value or the greater part of their value from assets as described in (1); and
4. Goodwill of a trade carried on in Ireland.

The requirement to withhold tax is not required where the consideration does not exceed EUR 500,000 or where the person disposing of the asset produces a certificate from the Revenue Commissioners authorising payment in full. A clearance certificate may be obtained by making application on Form CG50 to the Revenue Commissioners supported by a copy of the agreement or contract for sale. The certificate may be obtained on the grounds that the vendor is Irish resident, or that no capital gains tax is due in respect of the disposal, or that the capital gains tax has been paid. Withholding tax is creditable against the capital gains tax liability of the vendor and any excess is refundable.

To avoid the requirement to withhold, clearance must be obtained before the consideration is paid. There is no exemption from the withholding procedure where the asset is held as trading stock or where the transaction is intragroup and a capital gains tax liability does not arise. Failure to obtain the certificate will lead to the purchaser being assessed to capital gains tax for an amount of 15% of the consideration.

**Participation exemption from capital gains**

A participation exemption is available to Irish resident companies on the disposal of a shareholding interest if:

- A minimum of 5% of the shares (including the right to profits and assets on winding up) is held for a continuous 12-month period;
- The share sale takes place during the period for which the minimum 5% holding is held;
- (the disposal is also exempt if the sale takes place within two years after meeting the holding requirement, to take account of gradual dispositions over time;
- The company whose shares are sold is resident in an EU member state (including Ireland) or in a country with which Ireland has a double taxation treaty in force at the time of the disposal; and
- A trading condition is met at the time of the disposal whereby either: (1) the business of the company whose shares are disposed of consists wholly or mainly of the carrying on of one or more trades or, (2) taken together, the businesses of the Irish holding company and all companies in which it has a direct or indirect 5% or more ownership interest consist wholly or mainly of the carrying on of one or more trades.
If the Irish holding company is unable to meet the minimum holding requirement, but is a member of a group (that is, a parent company and its 51% worldwide subsidiaries) the gain arising on the disposal still will be exempt if the holding requirement can be met by including holdings of other members of the group. Thus, the Irish company may be exempt from capital gains tax on a disposal of shares even if it does not directly hold a significant shareholding. The exemption also applies to a disposal of assets related to shares, such as options and convertible debt. However, it does not apply to a sale of either shares or related assets that derive the greater part of their value (more than 50%) from Irish real property, minerals and mining rights, exploration and exploitation rights in a designated area and these remain liable to capital gains tax. Shares deriving their value from non-Irish real property, minerals and mining rights qualify for exemption if the other conditions are met.

Capital losses arising on the disposal of a shareholding where a gain on disposal would be exempt under the participation exemption are not deductible.

**Inter-company dividends**

Dividends from Irish companies are exempt from corporation tax. Dividends paid out of the trading profits of a company resident in a country with which Ireland has a double taxation agreement may be taxed at the 12.5% rate provided a claim is made. From 1 January 2010 the 12.5% corporate tax rate applies to the same type of dividends received from companies resident in non-treaty countries, that is, where the company that paid the dividend is a listed company or is part of a 75% listed group the principal class of the shares of which are substantially and regularly traded on the Irish Stock Exchange, a recognised Stock Exchange in a country with which Ireland has a tax treaty or on such other Stock Exchange as is approved by the Minister for Finance for the purposes of this relief from double taxation.

Foreign dividends received by an Irish company where it holds 5% or less of the share capital and voting rights in that foreign company are exempt from corporation tax where the Irish company would otherwise be taxed on this dividend income as trading income.

Dividends from Irish resident companies are not liable to further tax, other than a surcharge on close companies if the dividend is not redistributed. Broadly speaking, a close company is a company which is under the control of five or fewer “participators”. Participators can include individual shareholders, corporate shareholders, loan creditors, any person with a right to receive distributions from the company, etc. Where not less than 35% of the shares of a company (including the voting power) are listed a company would not be regarded as a close company.

A close company surcharge of 20% is payable on certain non-trading income (for example, rental income, certain dividend income and interest income) if it is not distributed to shareholders within 18 months of the accounting period in which the income was earned. Since 31 January 2008 a close company making a distribution and the close company receiving a distribution have the option jointly to elect to have the dividend disregarded for surcharge purposes. This can give close companies the option of moving “trading income” up to a holding company without incurring a surcharge. Generally speaking close companies avoid the surcharge through the payment of dividends within the prescribed period.
**Foreign income**
Resident companies are liable to Irish tax on worldwide income. Accordingly, in the case of an Irish resident company foreign income and capital gains are, broadly speaking, subject in full to corporation tax. This applies to income of a foreign branch of an Irish company as well as to dividend income arising abroad.

In general, income of foreign subsidiaries of Irish companies is not taxed until remitted to Ireland, although there are special rules that seek to tax the undistributed capital gains arising from the sale of Irish land and buildings by certain non-resident close companies (see Inter-company dividends section above for further information in relation to close companies).

Foreign taxes borne by an Irish resident company (or Irish branch of an EEA resident company), whether imposed directly or by way of withholding, may be creditable in Ireland. The calculation of the credit depends on the nature of the income item, but for income sources other than dividends and some related party interest the credit is limited to the Irish tax referable to the particular item of income. A system of onshore pooling of excess foreign tax credits applies to dividends from 5% or greater corporate shareholdings and excess credits in the dividend pool can be carried forward indefinitely; a similar pooling system applies to some related party interest and also to foreign branch income (see Branch income above).

**Stock dividends**
Stock dividends taken in lieu of cash are taxed to the shareholder on an amount equivalent to the amount which would have been received if the option to take stock dividends had not been exercised. If the recipient is an Irish resident company and it receives the stock dividend from a quoted (listed) Irish company then there will be no tax. For a quoted (listed) company paying the stock dividend, dividend withholding tax with the appropriate exemptions and exclusions applies. Other stock dividends (bonus issues) are generally non-taxable.

**Controlled foreign companies (CFC)**
Ireland does not have CFC rules.

**Thin capitalisation**
Ireland does not have thin capitalisation rules.

**Leasing**
Ireland operates an eight-year tax depreciation life on most assets. For short life assets (that is, those with a life of less than eight years), Ireland has allowed lessors to follow the accounting treatment of the transaction in the case of finance leases. This basically allowed finance lessors to write-off their capital for tax purposes in line with the economic recovery on the asset. Earlier this year, Ireland extended this beneficial tax treatment to operating leases of certain assets. Heretofore, operating lessors of such assets were required to write-off their capital over a period of eight years which created a mismatch with the economic recovery. The change means that operating lessors may now elect to follow the accounting treatment so that they are charged to tax on the rentals received from operating lease (that is, rentals included in P&L account) without addback for depreciation and without a deduction for tax depreciation. The new approach therefore, provides a faster write-off of the capital cost of an asset where before they were relying on tax depreciation over eight years. The new provision
appplies to incremental expenditure incurred in accounting periods commencing on or after 1 January 2010

**Deductions**

**Depreciation and depletion**

Book depreciation is not deductible for tax purposes (except in the case of IP assets). Instead, tax depreciation (known as capital allowances) is permitted in respect of expenditure incurred on assets which have been put into use by the company. The rates applying are set out below:

<table>
<thead>
<tr>
<th>Asset type</th>
<th>Tax depreciation rate</th>
</tr>
</thead>
<tbody>
<tr>
<td>Plant and machinery</td>
<td>12.5% straight-line basis</td>
</tr>
<tr>
<td>Industrial buildings used for manufacturing</td>
<td>4% straight-line basis</td>
</tr>
<tr>
<td>Motor vehicles</td>
<td>12.5% straight-line basis</td>
</tr>
<tr>
<td>IP Assets</td>
<td>Book depreciation OR 7% straight-line basis</td>
</tr>
</tbody>
</table>

The allowances are calculated on the cost after deduction of grants, except for plant and machinery used in the course of the manufacture of processed food for human consumption. In this case, the allowances are calculated on the gross cost. Allowances on cars are restricted to a capital cost of EUR 24,000 and may be restricted further (to 50% or zero) depending on the level of Carbon Emissions of the vehicle.

**Intellectual property (IP) regime**

Legislation provides for a tax deduction for capital expenditure on the acquisition of qualifying IP assets. The definition of IP assets is widely drafted and includes the acquisition of, or the licence to use:

- Patents and registered designs;
- Trademarks and brand names;
- Know-how (broadly in line with the OECD model tax treaty definition of know-how);
- Domain name, copyrights, service marks and publishing titles;
- Authorisation to sell medicines, a product of any design, formula, process or invention (and rights derived from research into same);
- Applications for legal protection (for example, applications for the grant or registration of brands, trademarks, patents, copyright, etc.);
- Expenditure on computer software acquired for commercial exploitation; and
- Goodwill to the extent that it relates directly to the assets outlined above.

Capital allowances will be available at the same rate as the depreciation/amortisation charge for financial accounting purposes. Alternatively the company may elect to claim allowances over a period of 15 years.

Tax deductions (for example, financing costs) are available for offset against income generated from exploiting IP assets, up to a maximum deduction of 80% of the relevant IP profits. The remaining 20% is taxable at the 12.5% corporation tax rate.
Research and development (R&D) credit
Incremental R&D expenditure (over a base year of 2003) qualifies for a tax credit of 25% in addition to a tax deduction. This means that the total tax deduction on qualifying expenditure is 37.5%. Expenditure on buildings used for R&D now also can qualify for the credit as long as at least 35% of the building is used for R&D activities. This hurdle is measured over the course of four years. This is of particular assistance where R&D is carried on in a manufacturing environment.

Further enhancements to the R&D regime cater for pre-trading expenditure and other specific circumstances. Where a company incurs R&D expenditure but has not yet commenced to trade, all R&D claims in this regard must be made within 12 months from the end of the accounting period in which the company first commences to trade.

The R&D credit can be used to generate a tax refund through a carryback against prior year profits. In addition, repayment for excess credits is available over the course of a three-year cycle. Repayments are limited to the greater of the corporation tax payable by the company in the preceding 10 years or the payroll tax liability for the period in which the relevant R&D expenditure is incurred.

In addition, under Irish GAAP, companies may account for the R&D tax credit through their profit and loss account or income statement in arriving at the pre-tax profit or loss.

Accelerated capital allowances
A 100% first year capital allowance is available in respect of certain approved energy-efficient equipment. The categories of equipment that may be eligible for inclusion are:

- Information and communications technology;
- Heating and electricity provision;
- Electric and alternative fuel vehicles;
- HVAC control systems;
- Lighting;
- Motors and drives;
- Building energy management systems;
- Refrigeration and cooling systems*;
- Electro-mechanical systems*; and
- Catering and hospitality equipment*.

*Subject to Commencement Order

Trading losses
Losses are computed for tax purposes in the same way as business profits. Trading losses can be offset against other income of any nature, either in the current or preceding accounting period (of equal length). The amount of losses required to shelter the income is dependent on the tax rate which would have been applied to the income in the absence of the loss relief. Any excess losses can be carried forward indefinitely against future trading income. Certain changes in ownership may prevent the carry-forward of losses to future periods. Terminal losses which arise within 12 months of the date a company ceases to trade may be carried back three years.
Ireland

Payments to foreign affiliates
Generally, deductions can be claimed for royalties, management service charges and most interest charges paid to foreign affiliates, provided the amounts do not exceed what would be paid to unrelated entities. Depending on the circumstances certain elections may be required. As mentioned above, Ireland does not have any thin capitalisation rules.

Taxes
Taxes that are deductible in computing profits for corporation tax include value-added tax not recovered, the employer’s share of PRSI contributions, and local taxes, that is, rates levied on commercial property and local authority charges.

Other significant items
In general, expenses incurred wholly and exclusively for the purposes of the trade are tax-deductible.

A deduction for interest is allowed only to the extent that borrowings are used for the purpose of a trade or other limited purposes. Expenditure on scientific R&D and payments for the acquisition of know-how in general are allowable deductions, as are the costs of obtaining or extending patents and obtaining and renewing trademarks.

Costs incurred for third-party entertainment are not tax-deductible. Entertainment includes the provision of accommodation, food, drink and any other form of hospitality including the provision of gifts. Expenditure on bona fide staff entertainment is allowable as a deduction provided its provision is not incidental to the provision of entertainment to third parties. Certain promotional costs are tax-deductible if they are incurred wholly and exclusively for the purposes of the trade.

Companies are entitled to a deduction, as a trading expense, for qualifying donations to approved charities, educational institutions, schools, churches, research foundations, sports bodies and other approved organisations which satisfy certain conditions. To qualify for a tax deduction the donation(s) to an organisation in a 12-month accounting period must amount to at least EUR 250.

Contributions to certain employee pension schemes and the cost of setting up such schemes also are deductible. Pension contributions are allowable as a deduction in the year in which they are paid.

General accruals and provisions are not tax-deductible.

Group taxation
The concept of “fiscal unity” or consolidated group tax does not exist in Ireland. However, trading losses as computed for tax purposes may be offset on a current period basis, against taxable profits of another group company. As with loss relief in a single company, the amount of losses required to shelter the income is dependent on the tax rate which would have been applied to the income in the absence of the loss relief.

A group consists of a parent company and all of its 75% subsidiaries, with all group members being tax resident in Ireland or in another member state of the EEA. Non-Irish members may only surrender losses from activities which would, if profitable, be subject to Irish tax.
Capital losses cannot be surrendered within a group.

Relief from capital gains tax is available on intragroup transfers of capital assets. Where a capital asset is transferred from a resident company to another resident company in a 75% group, no capital gains tax charge arises. A group, for capital gains tax purposes, consists of a principal company and its 75% subsidiary companies. A 75% subsidiary is defined by reference to the beneficial ownership of ordinary share capital, owned either directly or indirectly. A capital gains tax group can include EEA resident companies for the purpose of analysing the beneficial ownership of a company.

It also is possible for an Irish resident company and an Irish branch of an EEA company in the same group to transfer capital assets without crystallising a capital gains charge, provided the asset transferred remains within the scope of the charge to Irish capital gains tax.

Subsequent to an intragroup transfer, a charge to capital gains tax will arise when either:

- The asset is sold outside the group, in which case the tax is calculated by reference to the original cost and acquisition date of the asset when first acquired within the group; or
- A company owns an asset which was transferred by a group company and subsequently leaves the group within a 10 year period of the intragroup transfer. The gain on this intragroup transfer crystallises and becomes payable at this point.

Transfer pricing

In April 2010, Ireland enacted broad based transfer pricing legislation. The legislation endorses the OECD Transfer Pricing Guidelines for Multinational Enterprises and Tax Administrations and adopts the arm's-length principle. The introduction of general transfer pricing legislation in Ireland was widely anticipated and brings the Irish tax regime into line with international norms in this area. The new regime applies to domestic as well as international related party arrangements and will come into effect for accounting periods commencing on or after 1 January 2011 in relation to certain arrangements entered into on or after 1 July 2010.

The new transfer pricing rules apply to arrangements entered into between associated persons, involving the supply or acquisition of goods, services, money or intangible assets and relating to trading activities within the charge to Irish tax at the trading rate of 12.5%. The rules confer a power on the Irish tax authorities to re-compute the taxable profit or loss of a taxpayer where income has been understated or where expenditure has been overstated as a result of certain non-arm's-length arrangements. The adjustment will be made to the Irish taxable profits to reflect the arrangement had it been entered into by independent parties dealing at arm's length. The legislation also places an obligation on a taxpayer to provide documentation “as may reasonably be required” to support the arm's-length nature of the related party arrangements and that documentation will need to be prepared on a timely basis.

However, arrangements entered into between related parties prior to 1 July 2010 are “grandfathered” and thereby excluded from the scope of the new transfer pricing rules. There is also an exemption from the new rules for small- and medium-sized enterprises. Broadly speaking, small- and medium-sized enterprises include groups employing less than 250 people and, that have either a turnover of less than EUR 50 million or assets of less than EUR 43 million.
Ireland

**Tax incentives**

The main tax incentives in Ireland are:

- 12.5% corporation tax rate on active business income;
- A 25% credit on incremental R&D spending over the base year of 2003 – total effective tax deduction of 37.5%;
- Ability to exploit IP at favourable tax rates;
- Accelerated tax depreciation allowances for approved energy efficient equipment;
- A 10% tax rate until 31 December 2010 for manufacturing and grant-aided service operations that were in progress prior to the sunset date for this incentive of July 1998;
- A tax exemption on patent royalties where the patents were developed in Ireland;
- Ability to carry out investment management activities for non-Irish investment funds without creating a taxable presence in Ireland for such funds; and
- An effective legal, regulatory and tax framework to allow for the efficient redomiciliation of investment funds from traditional offshore centres to Ireland.

**Grants**

Cash grants may be available for capital expenditure on machinery and equipment and industrial premises, training of employees, creation of employment, rent subsidies, research and development, manufacturing and exporting products, providing services to customers overseas and so on. The level of grant aid depends on a number of factors and is specific to each project. Rates depend on the location of the new industry.

**Withholding taxes (WHT)**

Irish resident companies are required to withhold tax on certain types of payments as set out below.

<table>

- Thailand
- Tunisia
- Ukraine
- United Arab Emirates

Legislation recently has been amended to allow for favourable treatment in situations where a double-tax treaty has been signed but not yet ratified.

* These treaties are currently under renegotiation.
** Awaiting ratification
*** Protocols to the double taxation treaties with Macedonia and Austria are awaiting ratification. These protocols do not have any impact upon the exemptions and rate reductions outlined above.
**** A protocol to the double taxation treaty with South Africa is awaiting ratification. The above exemptions and rates are as per the pending protocol. Currently the above payments to South African companies are exempt from withholding taxes.

Notes

1. Individuals (and most companies) resident in countries with which Ireland has a tax treaty should be able to qualify for exemption from withholding tax subject to filing appropriate documentation.

2. Financial institutions operating in Ireland are obliged to withhold tax (deposit interest retention tax, or DIRT) at 25% out of interest paid or credited on deposit accounts in the beneficial ownership of resident companies, unless the financial institution is authorised to pay the interest gross. There is no DIRT on interest paid to non-residents where a written declaration of non-residence is completed. Certain annual interest payments are subject to withholding tax at 20%. Interest payments by companies to companies resident in other EU Member States or in treaty countries are generally not subject to withholding tax. The EU Interest and Royalties Directive may also provide an exemption from withholding tax for payments between associated companies.

3. Royalties other than patents are not generally subject to withholding tax under domestic law. Documentation and reporting may be required to access lower treaty withholding rates in other cases. The EU Interest and Royalties Directive may also provide an exemption from withholding tax for payments between associated companies. Associated companies, for the purpose of this directive, are companies where one can directly control at least 25% of the voting power of the other, or at least 25% of the voting power of both companies is directly controlled by a third company – in all cases, all companies must be resident in a member state of the EU.

4. Where the beneficial owner of the dividends is a resident of a Contracting State and is a company which holds directly at least 25% of the capital of the company paying the dividends.

5. Refer to Ireland/Pakistan double taxation treaty.
6. Where the beneficial owner of the dividends is a resident of the Contracting State and is a company which controls directly or indirectly 10% or more of the voting power in the company paying the dividends.
7. Where the beneficial owner of the dividends is a resident of the Contracting State and is a company which controls directly 10% or more of the voting power in the company paying the dividends.
8. For loans from banks and in the case of Norway certain Government funds.
9. Where the beneficial owner of the dividends is a resident of the Contracting State and is a company which controls directly 20% or more of the voting power in the company paying the dividends.
10. Where the beneficial owner of the dividends is a resident of the Contracting State and controls directly or indirectly at least 10% of the voting power in the company paying the dividend and has invested more than EUR 100,000 in the capital of the company paying the dividend. The above details in general are subject to any special relationship that may exist between the payer and the recipient, and it is assumed that the recipient does not have a permanent establishment (taxable presence) in the other Contracting State.
11. Where the beneficial owner of the dividends is a resident of a Contracting State and is a company which holds directly at least 25% of the voting power of the company paying the dividends.
12. Where the beneficial owner of the dividends is a resident of a Contracting State and is a company which holds directly at least 70% of the voting power of the company paying the dividends.
13. Refer to Ireland/Vietnam double taxation treaty.

**Tax administration**

Corporation tax returns must be submitted within nine months (and no later than the twenty-first day of the ninth month) after the end of the tax accounting period in order to avoid a surcharge (maximum of EUR 63,485) or a restriction of 50% of losses claimed, to a maximum of EUR 158,715. The tax accounting period normally coincides with a company's financial accounting period, except where the latter period exceeds 12 months.

A system of self-assessment and Irish Revenue audits is in operation in Ireland. Irish Revenue may undertake a Revenue audit of a company's tax return within a period of four years from the end of the accounting period in which the return is submitted.

Corporation tax payment dates are different for “large” and “small” companies. A small company is one whose corporation tax liability in the preceding period was less than EUR 200,000. Interest on late payments or underpayments is applied at approximately 10% per year.

**Large companies**

The first instalment of preliminary tax totalling 45% of the expected final tax liability, or 50% of the prior period liability is due six months before the end of the tax accounting period (but no later than the twenty-first day of the month).

The second instalment of preliminary tax is due 31 days before the end of the tax accounting period (but no later than the twenty-first day of the month). This payment must bring the total paid up to 90% of the estimated liability for the period.

The balance of tax is due when the corporation tax return for the period is filed (that is, within nine months of the end of the tax accounting period, but no later than the twenty-first day of the month in which that period of nine months ends).
**Small companies**

Small companies only are required to pay one instalment of preliminary tax. This is due 31 days before the end of the tax accounting period (but no later than the twenty-first day of the month).

The company can choose to pay an amount of preliminary tax equal to 100% of the corporation tax liability for its immediately preceding period or 90% of the estimated liability for the current period. As is the case for large companies the final instalment is due when the corporation tax return is filed.

**New start-up companies**

A corporation tax holiday applies to certain start-up companies that commence to trade during 2009 or 2010. The relief will apply for three years where the total amount of corporation tax payable does not exceed EUR 40,000 in each year. Marginal relief is available where corporation tax payable is between EUR 40,000 and EUR 60,000.

**Other issues**

**Asset management**

The Finance Act 2010 introduced changes aimed at enhancing Ireland as a leading location for the management of both UCITS and non-UCITS funds. UCITS III and IV brought about fundamental changes to both the management and structuring of UCITS. One of the reforms introduced permits UCITS management companies located in one EU jurisdiction to manage UCITS domiciled in another EU jurisdiction. One of the areas of concern is whether the activities of the management company could bring a foreign UCITS within the charge to tax in the management company’s home jurisdiction, e.g., by creating a branch or agency or causing the fund to be regarded as tax resident there. The Finance Act provides that in the case of an Irish management company managing a non-Irish UCITS, such management company will not be regarded as a branch or agency of the non-Irish UCITS and will not bring the profits of the foreign UCITS within the charge to Irish tax or treat the foreign UCITS as an Irish regulated fund.

Following the US and OECD review of offshore domiciles, which has resulted in increased regulation and tax obligations, fund managers are being forced to consider possible alternative onshore jurisdictions for their investment fund products. Because of its international reputation of its investment funds industry and the favourable corporate tax regime, Ireland is seeing a significant trend in investment managers moving their investment platforms there from the traditional offshore jurisdictions. Recent company law changes also allow corporate funds to migrate to Ireland through a re-registration process, whereby the fund company would benefit from its continued existence, including the ability to retain the fund’s performance track record post migration and avoid potential adverse tax consequences and costs that typically arise from a merger of an offshore fund with a new onshore fund. The Irish Financial Regulator has introduced a coordinated authorisation process to facilitate speed to market, which at present is a key advantage in comparison to delays being experienced in other EU domiciles.

**Islamic finance**

Towards the end of 2009, the Irish tax authorities confirmed that the Irish tax treatment of certain Islamic finance transactions, such as funds, certain ijara (leasing), takaful (insurance) and re-takaful (reinsurance) was accommodated within existing
Irish tax legislation. Specific legislation was however, required to facilitate the issuance of sukuk (that is, Islamic bonds) in Ireland and this legislation was introduced earlier this year. Overall, the intention of the legislature is to ensure that Islamic finance transactions are treated in the same favourable manner as conventional financing transactions. The legislation also introduced changes in relation to the taxation (and tax impact) of UCITS management companies. The UCITS structure is one of the commonly used structures for many different types of Islamic funds such as retail Islamic equity funds, Shariah-compliant money market funds, Shariah-compliant exchange traded funds (ETFs), etc. This demonstrates the Irish government and tax authorities desire to enhance the attractiveness of Ireland as a location for Islamic finance transactions by extending to this form of financing the relieving provisions which currently apply to conventional financing.

**Islamic insurance**

The Irish Revenue has recently provided guidance in respect of the Irish tax treatment of general takaful (non-life), re-takaful (reinsurance) and family (life) takaful arrangements. Legislative changes are not currently required to facilitate Islamic insurance in Ireland.

**Exchange control**

Ireland does not have exchange control regulations.

**Choice of legal entity**

Foreign investors tend to operate either through an Irish legal entity or as a branch of a foreign entity. Both are equally valid means of doing business in Ireland and the choice would normally depend on the commercial fact pattern and individual circumstances of the investor parent company.

**Tax avoidance disclosure**

Finance Act 2010 introduced provisions relating to the disclosure of tax-avoidance schemes. This requires promoters of such schemes to provide information to the tax authorities within a specified time (yet to be determined) of having made the scheme available. A transaction which comes within the new law and which therefore must be reported to Revenue is not necessarily a tax-avoidance transaction for the purposes of existing legislation. The rules are wide reaching and essentially cover all tax heads including corporation tax, income tax, capital gains tax, stamp duty, VAT and Customs & Excise.
Corporate taxes in Isle of Man

Significant developments

Rates
Generally, the profits of Isle of Man resident companies are taxed at 0% with two exceptions: (i) certain profits of licensed banks, and (ii) income derived from land and property situated in the Isle of Man, which are taxed at 10%.

Tax treaties
The Isle of Man has, since 1955, had a Tax Treaty with the United Kingdom (UK). During 2009, it also signed tax treaties with Belgium, Estonia and Malta, and recently entered into Tax Information Exchange Agreements (TIEAs) with Australia and New Zealand bringing the total number of TIEAs in force to 15.

Income attributed to shareholders
Legislation has been introduced that attributes the profits of an Isle of Man resident company to any Manx resident shareholders as if that profit had been distributed to them. Although any resulting tax charge will fall on the shareholder, the legislation places reporting and filing obligations on the Isle of Man resident company in respect of profits realised and distributions made.

Taxes on corporate income

The majority of companies pay income tax at 0%. Certain profits of licensed banks and companies who receive income from the rental or development of land situated in the Isle of Man will pay tax at 10%. Companies are liable for income tax; there is no separate “corporation tax” as is the case in the UK.

Licensed banks will be taxed at 10% on income from deposit taking and interest earned from the investment of regulatory reserves only. Income earned on capital and reserves in excess of the regulatory capital, group funded lending, fiduciary deposits, assurance, insurance, custody, trust and corporate services will be taxed at 0%. Expenses are allocated against 0% and 10% income streams on a pro rata basis.

Corporate residence

A company incorporated in the Isle of Man is resident for tax purposes. A company which is incorporated elsewhere will be considered resident in the Isle of Man if it is managed and controlled in the Isle of Man. “Managed and controlled” is generally interpreted as being the place where the board of directors meets although this is not always conclusive. In cases where a company is resident in the Isle of Man and also
resident in a country with which the Isle of Man has a tax treaty then a tie-breaker may operate to confirm residence.

**Other taxes**

Value-added tax (VAT) and customs and excise duties are levied and are similar to those in the UK.

There are no other transaction taxes in the Isle of Man other than betting duty on gaming transactions.

**Branch income**

The income of branches is taxed in the same way as other corporate income.

**Income determination**

**Inventory valuation**

Inventories are generally stated at the lower of cost or market value. Any method of valuation that is in accord with sound commercial principles is acceptable for tax purposes, provided it is adopted consistently at the beginning and end of the accounting period and does not conflict with tax law. In practice, inventories are normally valued for tax purposes at the lower of cost or net realisable value. A first-in, first-out (FIFO) basis of determining cost where items cannot be identified is acceptable, but not the base stock method or the last-in, first-out (LIFO) method.

In general, the book and tax methods of inventory valuation will conform.

**Capital gains**

There is no capital gains tax in the Isle of Man.

**Foreign income**

Resident corporations are liable to tax on their worldwide income. UK tax is relieved under the treaty with the UK by way of tax credits. However, the UK treaty does not cover dividends or debenture interest. Other treaties will also operate to provide relief.

The Isle of Man grants unilateral relief from double taxation in respect of all foreign-source income arising outside the UK by way of tax credit.

Certain expenses which are deductible in the computation of profits are not allowable for tax purposes. These include depreciation, unpaid but accrued pension and bonus payments, certain lease payments and interest paid to non-Manx resident lenders.

**Deductions**

**Depreciation and depletion**

Relief for depreciation is given using “capital allowances” based on a reducing-balance method. Plant and machinery, tourist premises, industrial buildings, commercial buildings within a designated area, fish processing buildings, and agricultural buildings and works have an initial allowance of 100%. There are restrictions on allowances for expensive motorcars.
Isle of Man

Isle of Man government grants are not taken into account in determining the amount of expenditure on which allowances may be given.

Tax depreciation is not required to conform with book depreciation.

Upon disposal, allowances will be reclaimed on the resale value, restricted to cost.

**Net operating losses**
Losses can be carried forward indefinitely against future profits from the same trade.

Trading losses incurred may be carried back against preceding year profits. There are additional rules which apply in the opening years of trade. Terminal losses in the last year of trade can be carried back against profits for the previous three years of trading.

**Taxes**
No local income taxes paid are deductible when calculating net taxable profit.

**Other**
Relief is given in calculating the taxable profit of a company if the expense is incurred in the normal course of the business and is incurred wholly and exclusively for business purposes. There are however certain exceptions to this as detailed in the Income Determination section.

**Group taxation**
Trading losses and excess capital allowances may be surrendered (subject to certain restrictions) between 75% affiliates resident in the Isle of Man. Similar concessions are available to members of a consortium, but only a fraction of the loss or excess may be set-off, that fraction being equal to the members’ share in the consortium in the relevant year of assessment.

Although GAAP rules exist in the Isle of Man, there is no transfer pricing regime, no specific Thin Capitalisation rules and no Controlled Foreign Company regime. If, however, the Assessor of Taxes is of the opinion that the main purpose, or one of the main purposes, of any transaction is the avoidance or reduction of tax liability, he may make assessments to counteract that avoidance or reduction of tax liability.

**Tax incentives**

**Film industry**
Through its Media Development fund, the Isle of Man government can make equity investments of up to 100% for film and television productions filmed in the Isle of Man.

**Capital investment**
See *Depreciation and depletion for tax incentives*. Capital grants of up to 40% of costs of new buildings, building improvements, and new plant and machinery may also be available from the Isle of Man government.

**Tax treaties**
The Isle of Man has since 1955 had a tax treaty with the UK. During 2009 it also concluded treaties with Belgium, Estonia and Malta. The Isle of Man has entered into TIEAs with the United States, Netherlands, Sweden, Norway, Finland, Denmark,
Greenland, Faroes, Iceland, Ireland, UK, Australia, Germany, France and New Zealand. The Isle of Man has arrangements with the United States and Germany regarding the international operation of ships, and Shipping and Aircraft agreements with France, Netherlands and all of the aforementioned Nordic countries.

**Withholding taxes (WHT)**

WHT should be deducted from certain payments made to non-residents by Isle of Man resident companies as follows:

- Rent from Manx land and property – 10% if paid to a company, 20% if paid to an individual;
- Dividends – Withholding tax is not required to be deducted;
- Loan interest and royalties – Withholding tax is generally not required to be deducted but there are certain exceptions which may apply; and
- Other – The Assessor of Income Tax in the Isle of Man has the power to require the deduction of Isle of Man withholding tax at a rate of 20% on payments of taxable income made to non-resident individual.

**Tax administration**

**Returns**

Companies are required to submit income tax returns on an accounting period basis. The tax return is due for submission one year and one day following the end of an accounting period. An accounting period for tax filing purposes can be no more than 12 months and where the financial statements cover more than 12 months, two (or more) returns may be required. Fixed rate penalties apply if returns are filed late.

**Payment**

Payment of tax is due within one year and one day of an accounting period end. Interest is charged on tax paid late.

**Other issues**

There are several different entities through which businesses may operate. These include companies, limited liability companies, partnerships, limited partnerships and protected cell companies.

Significant developments

There have been no significant developments in corporation taxation in Israel in the past year.

Taxes on corporate income

Foreign companies that have a branch presence in Israel and Israel incorporated companies are both subject to Israeli company tax.

The current corporate tax rate is 25% as of 2010. Pursuant to tax legislation published 23 July 2009, the corporate tax rate is scheduled to be reduced to 24% (2011), 23% (2012), 22% (2013), 21% (2014), 20% (2015) and to 18% in 2016 and thereafter.

Approved enterprises (see Tax incentives) are subject to reduced rates of tax depending upon the level of foreign ownership and location.

Israel does not impose local taxes on corporate income.

Corporate residence

The following are considered to be resident in Israel.

1. A company incorporated in Israel; and
2. A company whose business is controlled and managed from Israel.

In the absence of a definition of the term “management and control” either in Israeli legislation or a direct discussion of this term by the Israeli courts, it is difficult to determine whether a company that is incorporated outside of Israel shall be viewed as managed and controlled from Israel. This is a complex subject that needs to be addressed on a case by case basis. When an entity is both an Israeli tax resident and a resident of a foreign jurisdiction which is party to an income tax treaty with Israel, most treaties provide a tiebreaker test in the determination of an entity's tax residency.

Determination of tax residency is important since under Israeli tax law, an Israeli resident entity is subject to Israeli corporate tax on worldwide income while a foreign resident entity is subject to Israeli corporate tax only on income accrued or derived in Israel. Income sourcing rules determine when income is to be considered from an Israeli source.
Foreign resident entities might be exempt from corporate tax to the extent that its activities do not constitute a permanent establishment (PE) under the tax treaty applicable between Israel and the foreign resident’s country of residency.

**Other taxes**

**Value-added tax (VAT)**
The current rate of VAT is 16%.

Exports of goods and certain services and various other transactions are zero-rated, and certain transactions are exempt. Banks and other financial institutions pay VAT-equivalent taxes at the rate of 16% based on their total payroll and on profits. Not-for-profit organisations pay VAT (wage tax) at the rate of 8% of their total payroll.

**Real estate – capital gains**
Capital gains on real estate are subject to the Land Appreciation Tax Law. The law relates to any real estate in Israel, including houses, buildings and anything permanently fixed to land; real estate rights; and leases for 25 years or more. Tax calculations closely follow the calculation of company tax on capital gains (see Capital gains below).

The tax rate on the real gain is the applicable corporate tax rate (25% in 2010).

A special tax rate may apply with respect to real estate acquired prior to 1960.

**Transfer tax**
The purchaser of real estate is generally subject to acquisition tax at rates of 0.5% up to a maximum of 5%.

**Municipal tax**
Municipal tax is levied on commercial and residential buildings by local municipalities based on the size, location and purpose of the property.

**Stamp taxes**
There are no stamp taxes imposed in Israel.

**Customs duties**
Customs duty is imposed on certain products imported into Israel. The rates of duty depend upon their classification according to the Harmonised Customs Tariff and the country of origin. Israel has concluded free-trade agreements with the United States, Canada, Mexico, the European Union, and the European Free Trade Association (EFTA).

**Employer’s national insurance contributions**
Employers are obliged to pay national insurance contributions based on a percentage of each employee’s income on a monthly basis. Employers are responsible for withholding employees’ contributions from wages and remitting these together with the employer’s own contributions. The employer’s contribution rates (current as of May 2010) for Israeli resident employees are 3.85% up to monthly income of Israeli New Shekel (ILS) 4,809 and 5.43% on the difference between ILS 4,809 and the maximum monthly income of ILS 79,750.
Israel

For non-resident employees working in Israel who are residents of a foreign country which has a social security totalisation agreement with Israel (presently 14 agreements are in force), the above mentioned rates that apply for Israeli residents shall similarly be imposed (excluding health insurance), unless they remain employed by the foreign employer during their work period in Israel (in which case the reduced rates below apply).

For all other non-resident employees, the rates are significantly lower and are 0.54% up to monthly income of ILS 4,809 and 0.77% on the difference between ILS 4,809 and the maximum monthly income of ILS 79,750. The minimal National Insurance payments for non-resident employees do not provide any retirement benefit for the non-resident but generally provides a certain element of work accident coverage.

When an irregular salary payment in excess of one quarter of the usual salary is made, special provisions apply to the computation of social charges by which the application of this payment is equally attributed to the current month and to the past 11 months.

Israel has social security totalisation agreements with 14 countries which may allow for an exemption from Israeli National Insurance throughout the employment period of the employee in Israel.

Branch income

A branch is liable to tax at the standard corporate rate on Israel-source income. No tax is withheld on transfers of profits to the foreign head office unless the branch is an approved enterprise (see Tax incentives).

Income determination

In general, the annual results (i.e., the excess of income over expenses or vice versa) of an Israeli company or branch, as detailed in the taxpayer’s financial statements, form the basis for computing the taxable income of the business.

The base amount is then adjusted pursuant to the provisions of the tax law to arrive at “taxable income”.

Inventory valuation

Inventories are generally valued at the lower of cost or market value (net realisable value). Conformity is required between book and tax reporting of inventory. The first-in, first-out (FIFO) or weighted-average basis of valuation is acceptable; the last-in, first-out (LIFO) method is not accepted.

Capital gains

Capital gains tax is generally payable on capital gains by residents of Israel on the sale of assets (irrespective of the location of the assets) and by non-residents on the sale of the following:

- Assets located in Israel;
- Assets located abroad that are essentially a direct or indirect right to an asset, or to inventory or that are an indirect right to a real estate right or to an asset in a real estate association located in Israel. Taxation applies only in respect of that part of the consideration that stems from the above property located in Israel;
• Assets that are a share or the right to a share in an Israeli entity; and
• Assets that are a right in a foreign resident entity, which is essentially a direct or indirect right to property located in Israel. Taxation applies only with respect to that part of the consideration that stems from the property located in Israel.

The cashless transfer of rights and assets arising from certain mergers, spin-offs and asset transfers may be exempt from tax upon meeting various requirements.

**Determination of the capital gain – Computation of real gain and inflationary components**

Company tax on capital gains is imposed on the disposal of fixed and intangible assets where the disposal price is in excess of the depreciated cost.

For tax purposes, the capital gain is generally calculated in local currency, and there are provisions for segregating the taxable gain into its real and inflationary components. The inflationary amount is the original cost of the asset less depreciation (where applicable), multiplied by the percentage increase in the Israeli consumer price index (CPI) from the date of acquisition of the asset to the date of its sale. The inflationary amount component is exempt to the extent it accrued after 1 January 1994 and is generally subject to tax at the rate of 10% if it accrued before that date.

The real gain component, if any, is taxed at the rates set out further below.

A non-resident that invests in capital assets with foreign currency may elect to calculate the inflationary amount in that foreign currency. Under this option, in the event of a sale of shares in an Israeli company the inflationary amount attributable to exchange differences on the investment is always exempt from Israeli tax.

**Sale of assets (including publicly and non-publicly traded shares)**

The real gain will generally be subject to tax at the corporate tax rate applicable in the year of the gain (25% in 2010). Special exemptions may apply for non-residents (see further below).

**Special rule for retained profits upon sale of shares**

In the case of a disposal by corporations of: (a) non-traded shares; and (b) traded shares when the seller generally directly or indirectly holds at least 10% of the sold Israeli company during the 12-month period preceding the sale, special provisions apply to such part of the real gain which is attributed to the seller’s share of retained profits. The share of retained profits is the amount of gain equal to the proportional part of the retained profits of the company that the seller of the shares would have rights to by virtue of those shares. Detailed rules apply in determining this profit component.

Generally, the seller’s proportionate part of the company’s retained profits is taxed as if this amount had been received as dividends immediately before the sale (i.e., at a tax rate of 0% in the case of an Israeli resident corporate shareholder or at a tax rate of 25% when the seller is a non-Israeli resident corporate shareholder that generally holds 10% or more in the rights of the Israeli company, subject to a reduced rate in accordance with the provisions of an applicable tax treaty). The part of the retained profits that is attributed to the period ending on 31 December 2002 is subject to tax at the rate of 10%.
Israel

Special exemptions for non-residents

Publicly traded Israeli shares

Non-residents corporations not having a permanent establishment in Israel are exempt from tax on capital gains from the sale of shares of an Israeli company traded on the Israeli stock exchange or on a foreign stock exchange.

Where the shares were purchased by the non-resident prior to being publicly traded, capital gains tax applies for the portion of the gain that was generated up to the day of the share’s public listing but not to exceed the capital gain actually arising upon the sale of the share and provided that the value on the day of public listing was more than their value on the date of purchase and that the proceeds upon sale exceeded the value on the date of purchase.

Non-publicly traded shares

For purchases after 1 January 2009, an exemption exists under domestic law for non-residents, regardless of their percentage holding in an Israeli company, from gains derived from the sale of securities not traded on a stock exchange provided the following conditions are met:

- The investment is not in a company the majority of whose assets are real estate assets in Israel;
- The capital gains was not derived by the seller’s permanent establishment in Israel; and
- The shares were not purchased from a relative (as defined in the Income Tax Ordinance (ITO)) or by means of a tax-free reorganisation.

For shares purchased between 1 July 2005 and prior to 1 January 2009 more restrictive conditions apply in order to be eligible for the exemption. Detailed rules apply.

Treaty exemption

Non-residents may qualify for a tax treaty capital gain exemption depending upon the particular circumstances and the provisions of the applicable tax treaty (e.g., in some tax treaties no capital gains exemption is allowed where the holding in the sold Israeli company exceeds a certain percentage).

When assets are attributable to an Israeli permanent establishment or are real estate rights (including rights in a real estate association), a treaty exemption will generally not be available.

The Israel Tax Authority (ITA) is very sensitive to treaty shopping and it would be necessary to demonstrate to the ITA that the foreign holding entity has business substance in its country of residence and that the structuring of the holding through that entity was not implemented for tax treaty benefit purposes.

Capital losses

Capital losses may offset all capital gains (including gains from Israeli or foreign securities) and gains from the sale of property (whether Israeli or foreign source).

Where the capital loss is from a non-Israeli asset (including when carried forward into future years), the loss must first be offset against foreign source capital gains.
Capital losses derived from the sale of securities may also be offset against interest and dividend income generated from the sold security and also against interest and dividend income received from other securities (where the income was not subject to tax of more than 25%).

Capital losses from the sale of shares are generally reduced by any dividends received by the selling corporation during the 24 months preceding the sale, where tax on the dividends of at least 15% was paid.

Capital losses can generally be carried forward indefinitely and set-off only against capital gains.

**Exit tax**

When an Israeli tax resident, (including a company), ceases to be an Israeli resident for tax purposes, its assets are deemed to have been sold one day before it ceased being an Israeli resident. Although exit tax is primarily applicable to individuals, this might also apply to corporations incorporated outside of Israel whose management and control is transferred from Israel to another jurisdiction at a particular time.

Any gain attributable to the deemed sale of assets may be paid on the day the residency ceased or it may be postponed until the date the assets are actually realised. When the tax event is deferred to the sale date of the assets, the amount of the Israeli capital gain portion is determined by taking the real capital gain at the time of realisation, multiplied by the period of ownership from the day on which it acquired the asset until the day it ceased being an Israeli resident, divided by the entire period from the day of the asset’s acquisition until the day of realisation. The Minister of Finance is authorised to prescribe provisions for the implementation of the exit tax including provisions for the prevention of double taxation and the submission of tax reports, but no provisions have yet been issued.

**Foreign income**

An Israeli-resident company is liable to tax on its worldwide income. Double taxation is avoided by way of a foreign tax credit mechanism that also applies unilaterally in the absence of an applicable double taxation treaty. The foreign tax credit is limited to the Israeli corporate tax payable with respect to the same income. Foreign sourced income is divided into categories (“baskets”) on the basis of the income source (e.g., dividends, business income) and a particular credit limitation applies to each basket. Excess uncredited foreign income can be carried forward for the subsequent five tax years.

**Dividend income**

*Paid to Israeli resident company*

Dividends received by an Israel-resident company from another Israeli resident company which originate from income accrued or derived in Israel are exempt from corporate tax, except for dividends paid from income of an approved enterprise (see Tax incentives). This affords the opportunity to transfer after tax profits within an Israeli group of companies for further investment.

Dividends received by an Israeli company from a non-resident company as well as dividends received from an Israeli company which arise from foreign source income of the distributing company are generally taxable for the receiving company at the rate of 25%. Under certain circumstances the receiving company may elect to be taxed on such dividends at the corporate tax rate in which case it would also be entitled to a
Israel

foreign tax credit with respect to corporate taxes paid by the company distributing the dividend, i.e., an “underlying” tax credit.

Paid to non-resident shareholder
Dividends paid by an Israeli company to non-resident shareholders are generally subject to tax at the rate of 20% (25% if paid to a 10% or more shareholder), subject to a reduced rate of tax under an applicable tax treaty.

Several of Israel’s tax treaties have very beneficial withholding tax rates for dividends and interest being paid from Israel. The ITA is very sensitive to treaty shopping and it would be necessary to demonstrate to the ITA that the foreign holding entity has business substance in its country of residence and that the structuring of the holding through that entity was not implemented for tax treaty benefit purposes. Furthermore, many of the treaties contain a beneficial ownership clause as a condition to enjoying the treaty withholding tax rates.

Interest income
Paid to Israeli resident company
Interest income paid to an Israeli resident company is subject to the regular corporate tax rate (25% in 2010).

Paid to non-residents
Interest income paid to a foreign company is generally subject to tax at the rate of 20% or subject to a reduced rate of tax under an applicable tax treaty. See comments above regarding treaty eligibility.

Interest paid to a non-resident from deposits of foreign currency with an Israel bank is exempt from tax, subject to certain conditions.

In order to promote foreign investment in the Israeli corporate bonds market, there is an exemption from tax with respect to interest income received by foreign investors on or after 1 January 2009 on their commercial investments in Israeli corporate bonds traded on the Tel Aviv stock exchange (TASE). The exemption is not granted to a foreign investor that has a permanent establishment in Israel, or is related to, or holds 10% more of the means of control in, the investee company. In addition, in order for the exemption to apply to a foreign investor that has “special relations” with the investee company, or that regularly sells products to, or provides services to, or is employed by the investee company, the investor must prove that the interest rate on the corporate bond was determined in good faith.

Controlled foreign companies (CFC)
Under the CFC regime in Israeli tax law, an Israeli company or individual may be taxed on a proportion of the undistributed profits of certain Israeli-controlled non-resident companies in which the Israeli shareholder has a controlling interest (10% or more of any of the CFC’s “means of control”). A CFC is a company to which a number of cumulative conditions apply including that most of its income or profits in the tax year were derived from passive sources (e.g., capital gains, interest, rental, dividend, royalties) and such passive income has been subject to an effective tax rate that does not exceed 20%.
Rent/royalties income
Rent and royalty income less allowable deductions for tax purposes are subject to tax at the regular corporate tax rate (25% in 2010).

Partnership income
From an Israeli tax perspective, a partnership is in principle a fiscally transparent vehicle. Accordingly, Israeli tax law does not tax partnerships as such, but generally each partner is taxed in respect of its share of the partnership income, with the taxable income allocated to a corporate partner taxed at the regular company tax rate. Consequently, the actual distribution of partnership income to a partner is a non-taxable event.

Deductions

General
Costs incurred by a branch or a company are deductible as a business expense for tax purposes where they are incurred “wholly and exclusively in the production of income”. The amount of the deduction may be limited or disallowed further to other ITO provisions and income tax regulations.

Depreciation
The ITO and tax regulations prescribe standard annual rates of tax depreciation for assets serving in the production of taxable income. Depreciation is generally on a straight-line basis for industrial and other enterprises based on the specific asset types as set out in the tax regulations. Accelerated rates of depreciation may be available in regard to certain activities (such as industrial) where there is unusual wear and tear due to additional shifts of equipment use. Detailed rules apply. Depreciation is not permitted on land.

Goodwill
In general, under Israeli tax regulations, goodwill purchased after 1 July 2003 may be amortisable by the purchaser over a 10-year period (10% annually).

Research and development (R&D) costs
Special tax relief is provided under the ITO for R&D costs incurred (see Tax incentives).

Net operating losses
Business losses can be set-off against income from any source in the same year. Loss carrybacks are not allowed. Losses may be carried forward (generally linked to the CPI) and set-off without time limit against income from any trade or business or capital gains arising in the business, but not against income from any other source.

Excess (disallowed) expenses
Israeli tax law disallows the partial deduction of certain employee-related expenses incurred by a company doing business in Israel. These include so-called “excess expenses”. Examples of these are (a) payments for business, travel and meals which exceed allowable deductions; (b) expenses incurred in respect of a benefit granted by an employer to its employees but which cannot be attributed to a particular employee, and (c) vehicle maintenance expenses.

A company is obliged to pay a monthly advance on excess expenses in the amount of 45% of the excess expense. The amount paid as an advance in respect of excess
expenses is deemed a payment on account of the regular tax advances and payments that the company must pay for corporate income tax and is set-off against them, but is not refundable (i.e., when a taxpayer’s tax liability in a given year is lower than the excess expense advances paid, the unutilised amount shall be carried forward to future tax years). Detailed rules apply.

**Accrued expenses**

Payments are generally deductible on an accrual basis for commercially justifiable expenses representing arm’s-length consideration. However, when such payments attract withholding tax, the deduction would generally be allowed provided the payment is effected within the tax year. Alternatively, such payments may be deductible in a tax year if the applicable withholding tax is deducted within three months after the tax year-end and remitted to the tax authorities within seven days of the deduction, together with index linkage differences and interest accrued since the year-end.

However, accrued expenses for severance pay, vacation pay, recreation pay, holiday allowances and sick pay are not deductible, even if there is an obligation to make these payments. They are only deductible in the year in which they are actually paid to the beneficiary or to a recognised fund.

**Charitable contributions**

Charitable contributions do not constitute a regular business expense. However a tax credit is granted in respect of donations to approved state and charitable institutions aggregating at least ILS 300 (for 2010) in a tax year. The donor is allowed a tax credit equal to the amount of the contribution times the corporate tax rate applicable during the year, provided the donations do not exceed the lower of the following: (i) 30% of the corporation's taxable income in that year or (ii) ILS 7.5 million (in 2010). The above figures are adjusted each year according to the CPI. Excess unused tax credits may be carried forward for three years subject to detailed rules.

**Bad debt**

Provisions for bad debts are deductible in the year in which it is evident that the debt has become irrecoverable. Detailed rules apply for making this determination.

**Contingent liabilities**

Based on Israeli court decisions, contingent liabilities may be deductible for tax purposes upon satisfying the following criterion: (i) According to accepted accounting principles the taxpayer must include in its balance sheet a suitable provision for the potential liability; otherwise its income will be considered to have been incorrectly reported; (ii) the circumstances of the case and the technical means according to accepted accounting practice, enable an agreed determination of the amount of the liability; and (iii) there is a high probability, that the potential debt with respect to which the provision was made, will become an absolute debt.

**Fines and penalties**

Payment of fines and penalties are generally not deductible.
**Organisational and start-up expenses**
Organisational and start-up expenses are generally not immediately deductible but rather are to be capitalised for tax purposes.

**Pension expense**
Pension fund contributions are generally deductible for the employer provided inter alia the contributions do not exceed a prescribed level and are effected on a regular basis.

**Directors’ fees**
Payments for commercially justifiable director fees should generally be deductible.

**Payments to foreign affiliates**
Payments of interest, royalties and management fees to foreign affiliates are deductible if based on normal commercial terms and practices, and evidenced by an inter-company agreement and transfer pricing documentation. Where such payments attract withholding tax, the deduction will only be allowed where such tax has been withheld and paid in accordance with certain requirements. All cross-border payments to foreign affiliates for goods and services have to comply with arm’s-length pricing standards (see Group taxation).

**Group taxation**

**Consolidated tax returns**
As a general rule, a parent company and its subsidiaries may not submit consolidated tax returns. Only groups of industrial companies in the same line of business, as well as parent companies that control industrial companies in the same line of business and have at least 80% of their assets invested in industrial companies, are eligible to file consolidated tax returns.

**Transfer pricing**
The ITO and its accompanying regulations contain elaborate transfer pricing provisions and include the arm’s-length principle which applies to any international transaction in which there is a special relationship between the parties to the transaction, and for which a price was settled on for property, a right, a service or credit. In general, the regulations are based upon internationally recognised transfer pricing principles (i.e., United States tax regulations or Organisation for Economic Co-operation and Development (OECD) rules). These regulations generally require the taxpayer to support the pricing of international transactions with a transfer pricing study, inter-company agreements and other documentation.

Since transfer pricing is a subject that receives considerable attention from the ITA in its examination of related inter-company transactions, transfer pricing principles and documentation requirements should be carefully adhered to.

A taxpayer is required to include in its annual corporate tax return a special form entitled “Declaration of International Transactions” providing details for every cross-border transaction conducted with related parties. The taxpayer must sign the form which includes a declaration that the transactions with related parties abroad were in accordance with the arm’s-length principle, as defined in the Israeli transfer pricing regulations promulgated under the ITO. As a result of this form
and declaration, the importance of appropriate transfer pricing documentation has increased.

**Thin capitalisation**
Israel has no statutory or regulatory provisions or other rules concerning thin capitalisation for tax purposes as exist in certain other jurisdictions. Since there are no thin capitalisation rules and Israel has no specific debt-equity ratio requirements, a company may be financed with minimum capital and there is no limit to the amount of debt that may be used. Transfer pricing principles shall apply with regards to interest charges.

**Tax incentives**

**Approved enterprises – General**
Approved enterprise (AE) status, which provides for cash and tax benefits, may be granted under the Law for the Encouragement of Capital Investments (the Law) to enterprises that increase the productive capacity of the economy, improve the balance of payments or provide new employment opportunities.

The Law differentiates between three geographical regions (A, B and C). Area A enjoys the most incentives, while Area C (generally the central area of the country) enjoys the least amount of incentives.

New AE programmes and expansion of prior existing AE programmes are governed by the Law which underwent a major amendment on 29 March 2005 (Amended Law).

AE programmes which commenced their period of benefits generally prior to 2005 are still subject to the Law’s provisions prior to its amendment.

We shall primarily address the AE regime under the Amended Law.

**Approved enterprises – Cash grants**
Approved enterprises located in development areas A and B are eligible for cash investment grants, which vary according to the geographic location of the enterprise. Grant amounts and conditions are subject to governmental change from time to time.

**Approved enterprises – Reduced tax rates**
In addition to financial incentives for the establishment or expansion of an AE, various tax incentives discussed below are available once a new AE or expansion thereof is operational.

The reduced tax rates generally apply for a seven-year benefit period (or a 10-year period in certain cases of local companies established in development area A or in the case of a foreign investor company, see below), commencing with the year in which the AE first generates taxable income.

Generally, this seven- or 10-year period of benefits is limited to 12 years from the year of implementation. For AE plans governed prior to the amendment, the period of benefits cannot extend beyond 12 years from the year the enterprise commenced its operations or beyond 14 years from the year in which approval of status as an AE was granted, whichever is earlier.
Locally owned companies
Income derived by a company from an AE during the maximum seven-year period of benefits is generally subject to company tax at a rate of 25%.

A withholding tax rate of 15% (subject to a possible reduction under a tax treaty) applies to dividends paid from profits of an approved enterprise earned during the benefits period, if distributed either during the benefits period or during the subsequent 12 years. Note that dividends from non-approved enterprise profits that are paid to non-residents are generally subject to a maximum 25% withholding tax rate that may be further reduced under the terms of a relevant tax treaty.

Foreign investors’ companies (FIC)
A company that qualifies as a FIC is entitled to enhanced tax benefits on AE income. In general, a FIC is a company having more than 25% of its share capital (in terms of rights to shares, profits, voting and the appointment of directors), and its combined share capital and investor loan capital owned by foreign residents.

A FIC benefits from reduced company tax on the profits of an AE for a period of 10 years (instead of seven years) commencing with the first year in which taxable income is generated. The total period of benefits is restricted as discussed earlier above.

A FIC enjoys reduced company tax rates applicable to its AE income as shown below:

<table>
<thead>
<tr>
<th>Percentage of foreign ownership</th>
<th>Company tax rate</th>
</tr>
</thead>
<tbody>
<tr>
<td>Over 25% but less than 49%</td>
<td>25</td>
</tr>
<tr>
<td>49% or more but less than 74%</td>
<td>20</td>
</tr>
<tr>
<td>74% or more but less than 90%</td>
<td>15</td>
</tr>
<tr>
<td>90% or more</td>
<td>10</td>
</tr>
</tbody>
</table>

The foreign ownership percentage is annually determined as the lowest level retained during the specific tax year.

The Amended Law also requires that to qualify for FIC status a foreign investor must make an investment in the company of at least ILS 5 million.

Dividends paid by a FIC out of the profits of its AE are subject to tax in the hands of the recipient at the rate of 15%, without limitation as to their distribution date, provided the dividends are distributed out of AE profits derived during the benefits period.

Alternative system of tax benefits for approved enterprises (tax holiday)
Companies with new or expanding AEs may elect to forego all government cash grants and receive instead a total exemption (i.e., tax holiday) from company tax on undistributed profits of the approved enterprise for 10 years in development area A, for six years in development area B and for two years in development area C (the area in which the company’s facilities are located).

The tax holiday provides an Israeli tax exemption so long as the AE profits generated in the exemption period are retained within the company. Should a subsequent distribution of such profits occur, company tax and dividend withholding tax is imposed on the income distributed, at the rates which would have been applicable if
the tax holiday had not been elected (i.e., 25% or at a lower rate if the company is a FIC with a foreign ownership percentage of 49% or more during those years).

Under certain anti-avoidance provisions applicable to tax holidays, amounts paid or credited directly or indirectly by an approved enterprise to a relative, a major shareholder or to a related entity controlled by either a relative or a major shareholder, may be treated as a deemed taxable distribution of profits by the AE.

**Ireland track and strategic investment track**

For companies having an AE in development area A that seek to distribute dividends while maintaining a low company and dividend tax burden, there is an “Ireland track” under which the aggregate Israeli corporate and dividend withholding tax for a foreign resident shareholder is 15% and for an Israeli resident shareholder is 24.8%. This track is in contrast to the standard alternative benefit track discussed above which provides a tax holiday provided that profits remain undistributed.

Furthermore, a “strategic investment track” allows for an exemption during the benefit period from company tax and dividend withholding tax for a company having (depending on its location within Area A of the country) very significant investment and revenue levels. This means that during the benefits period, a company eligible for benefits from income accrued under this track will have no tax liability whatsoever for its productive activity arising from such investment and for the distribution of profits. Detailed rules apply to these tracks.

**Qualifying for AE status**

**Minimal investment amount**

For entitlement of tax benefits under the alternative benefit track of the Amended Law, there must be a certain minimal investment amount ("Minimum qualifying investment") towards purchasing productive assets (e.g., machinery and equipment – but not buildings) within three years. In the case of a new factory, the minimum required investment is ILS 300,000.

For expansion of a factory, the amount of required investment shall be ILS 300,000 or the amount based on the formula shown below, whichever is higher:

<table>
<thead>
<tr>
<th>Value of productive assets in the factory in the tax year prior to the year the minimum qualifying investment commences (in ILS million)</th>
<th>Amount of investment required expressed as a percentage of the value of the productive assets %</th>
</tr>
</thead>
<tbody>
<tr>
<td>Up to 140</td>
<td>12</td>
</tr>
<tr>
<td>140–500</td>
<td>7</td>
</tr>
<tr>
<td>Above 500</td>
<td>5</td>
</tr>
</tbody>
</table>

Detailed rules apply in determining how to value the assets for purposes of these tests (including in regards to AEs operated by affiliated companies).

For AE plans governed by the Law prior to its amendment, a general condition for approval is that a minimum of 30% of the investment in fixed assets must be equity-financed.

For investors wanting to expand their current AE, a new requirement has been added to the Law that demands at least a two year waiting period before an investor...
can obtain AE status for its new investments. Upon completion of these investment conditions, the taxpayer must file the election of the investments implementation year. Such election must generally be filed by the filing date of the relevant annual tax return but no later than 12 months from the end of that tax year.

Automatic approval
Where an investment project meets all of the eligibility criterion under one of the alternative tracks (Standard Alternative Track, Ireland Track or strategic investment Track) as set out in the Law and in regulations to be issued, a project will automatically qualify for the AE taxation benefits under the Law with no need for prior approval from the ITA (i.e., a “green lane”). The criteria that confer tax benefits in the alternative track of the Law are handled by the ITA. A mechanism is available which enables a company to apply for a pre-ruling from the ITA, where it desires to obtain certainty as to the taxation status of its investment under the Amended Law. The application to the ITA must be submitted no later than six months following the end of the investment’s implementation year (first year of potential benefits for the AE).

For AE plans governed by the Law prior to its amendment, the certification of a new or expanding approved enterprise status required interaction with the Israeli Investment Centre (IC) which had to approve the application for approved enterprise status and was responsible for issuing a final implementation approval following its determination that all requirements relating to investments in assets and minimum capital have been met.

Interruption of entitlement to benefits
Unlike the Law prior to its amendment where an AE owner was generally required to continue to operate the AE for the entire benefit period, under the Amended Law, the examination as to whether an owner is entitled to enjoy AE benefits for a tax year is determined on a year by year basis. Consequently, under the Amended Law, if in any tax year during the benefit period a company does not meet any of the conditions required under the Law, then for that tax year it is not entitled to benefits. However, if the company again meets the conditions during the benefit period, the company is entitled to the benefits during the remainder of the benefit period.

Mixed enterprises
Special rules govern the allocation of taxable income of “mixed enterprises”. These are essentially entities that derive only part of their income from an AE or entities which operate under a number of approvals relating to separate investment projects. The company tax payable in respect of income from each part of a mixed enterprise is separately computed and a composite withholding tax is applicable to dividends distributed by a mixed enterprise.

Neutralisation of assets
Assets used in the operation of an enterprise that are not part of an AE are regarded as non-approved assets. Consequently, turnover which is deemed to be generated from the non-approved assets will result in non-approved enterprise income that should be taxed at the regular Israeli corporate tax rate applicable for the relevant year.

For plans operating under the Law prior to its amendment, in some cases, upon request, the Investment Centre granted neutralisation of assets that were not part of the approved investment plan, so that they would have no negative impact on the tax benefits. Neutralised assets have a “neutral” effect, as they are not considered part of
the approved investment plan or part of a non-approved plan. For certain industrial equipment, neutralisation is not available. Assets that are of a non-productive nature may receive neutralisation.

In accordance with the Amended Law, this issue arises only in connection to assets purchased which had previous use in Israel.

**Research and development (R&D)**

In general, under special relief provided under the ITO which was enacted for the purpose of encouraging taxpayers to invest in R&D activities, R&D costs can generally be deductible for tax purposes even when they represent capital costs.

The ITO provision generally distinguishes between two types of investors in R&D projects:

a. The R&D project is conducted or sponsored by the owner of an enterprise in the fields of industry, agriculture, transportation and energy and it is intended to develop this enterprise; or

b. The R&D costs are borne by a taxpayer that is not the owner of an enterprise in the above mentioned fields or the taxpayer participates in R&D costs of another developer in consideration for a reasonable return, when such R&D projects also enjoy government grants.

In regard to the first group of taxpayers, the R&D expenses shall be deducted in the tax year incurred when such expense has been approved as an R&D expense by the relevant government department (the approval in regard to industrial related projects is generally granted by the Office of the Chief Scientist (OCS)). When such OCS approval is not obtained, the expense shall be deducted over three tax years.

The R&D expenses incurred by the second group of taxpayers shall generally be deducted over two tax years. The deductible expenses allowed to a participant in R&D costs of another developer generally may not exceed 40% of the taxable income of the investor in the year in which the expenses had been incurred.

**Withholding taxes (WHT)**

Under Israeli domestic tax law, a 25% withholding tax on payments of Israeli-source income is generally deducted by an Israeli paying bank from all income remittances abroad, unless a tax certificate is obtained from the ITA authorising withholding-exempt remittances or a reduced rate of tax pursuant to an applicable tax treaty. Set out below is a listing of withholding tax rates for dividends, interest and royalties under domestic tax law and pursuant to tax treaties in force. Detailed rules apply under certain tax treaties for eligibility to the treaty reduced rates (e.g., beneficial ownership; having no permanent establishment in Israel etc.). The applicable tax treaty should be consulted to determine the relevant withholding tax rate and to examine detailed conditions that may apply for the specific circumstance.

Notes

* Some Israeli tax treaties provide for an exemption from withholding tax on interest involving governmental and quasi-governmental parties. Such exemptions are not separately indicated in the table above.

1. 10% where beneficial owner holds directly at least 25% of the capital of the company paying the dividends.
2. At a rate which is 50% of the rate which would have been imposed but for this provision but not to exceed 12.5% and not less than 7.5%. A 10% rate applies where paid from profits generated by an enterprise entitled to special tax rates under the Encouragement of Investment Law.
3. 5% if the beneficial owner is a company (other than a partnership) which holds directly at least 25% of the capital of the company paying the dividends; 10% rate if the beneficial owner is a company which holds directly at least 10% of the capital of the company paying the dividends where that latter company is a resident of Israel and the dividends are paid out of profits which are subject to tax in Israel at a rate which is lower than the normal rate of Israeli company tax; 15% rate applies in all other cases.
4. 5% if the beneficial owner is a company (other than a partnership) which holds directly at least 15% of the capital of the company paying the dividends; 10% rate in all other cases.
5. 0% if the beneficial owner is a company (other than a partnership) which holds directly at least 10% of the capital of the company paying the dividends; 5% rate in all other cases.
6. 5% if the beneficial owner is a company (other than a partnership) which holds directly at least 10% of the capital of the company paying the dividends; 10% rate if the beneficial owner is a company which holds directly at least 10% of the capital of the company paying the dividends where that latter company is a resident of Israel and the dividends are paid out of profits which are subject to tax in Israel at a rate which is lower than the normal rate of Israeli company tax; 15% rate in all other cases.
7. 5% if the beneficial owner is a company (other than a partnership) which controls directly at least 10% of the voting power in the company paying the dividends; 15% rate in all other cases.
8. 5% if the beneficial owner is a company which holds directly or indirectly at least 10% of the capital of the company paying the dividends; 10% rate if the beneficial owner is a company which holds directly or indirectly at least 10% of the capital of the company paying the dividends and the dividends are paid out of profits which are subject to tax in Israel at a rate which is lower than the normal rate of Israeli company tax; 15% rate in all other cases.
9. At the domestic Israeli tax rate.
10. 5% if the recipient holds directly at least 10% of the capital of the company paying the dividends.
11. 10% if the beneficial owner is a company (other than a partnership) which holds directly at least 25% of the capital of the company paying the dividends.
12. 15% if the beneficial owner is a company (other than a partnership) which holds directly or indirectly at least 10% of the voting power of the company paying the dividends.

13. 5% if the beneficial owner is a company which owns at least 25% of the voting shares of the company paying the dividends during the period of six months immediately before the end of the accounting period for which the distribution of profits takes place.

14. 5% if the beneficial owner is a company which holds directly or indirectly at least 10% of the capital of the company paying the dividends; 10% rate if the beneficial owner is a company which holds 10% of the capital of the company paying the dividends and the dividends are paid out of profits which are subject to tax at a rate which is lower than the normal rate of the corporation tax; 15% rate in all other cases.

15. 5% if the beneficial owner is a company (other than a partnership) which holds directly at least 10% of the capital of the company paying the dividends; 10% rate if the beneficial owner is a company which holds directly at least 10% of the capital of the company paying the dividends where the dividends are paid out of profits which by virtue of provisions in the Israeli Law of Encouragement of Investments in Israel are exempt from tax or subject to tax at a rate that is lower than the normal rate of Israeli company tax; 15% rate in all other cases.

16. 5% if the beneficial owner is a company (other than a partnership) which holds directly at least 10% of the capital of the company paying the dividends; 10% rate if the beneficial owner is a company which holds directly at least 10% of the capital of the company paying the dividends where the dividends are paid out of profits which by virtue of provisions in the Israeli Law of Encouragement of Investments in Israel are exempted from tax or subject to tax at a rate that is lower than the normal rate of Israeli company tax; 15% rate in all other cases.

17. 5% if the beneficial owner is a company (other than a partnership) which holds directly at least 10% of the capital of the company paying the dividends; 10% rate if the beneficial owner is a company which holds directly at least 10% of the capital of the company paying the dividends and the dividends are paid out of profits which are subject to tax in Israel at a rate which is lower than the normal rate of Israeli company tax; 15% rate in all other cases.

18. 5% if the beneficial owner is a company which holds directly or indirectly at least 10% of the capital of the company paying the dividends.

19. 5% if the recipient holds directly at least 15% of the capital of the company paying dividends.

20. With respect to dividends paid to a company which holds directly at least 25% of the capital of the company paying the dividends: (a) 10% where the dividends are paid out of profits which, by virtue of provisions in Israeli law for the encouragement of investment in Israel, are exempted from tax or subject to tax at a rate that is lower than the standard rate levied on the profits of a company resident in Israel; (b) 5% where paid out of regularly taxed profits. A 15% rate applies in all other cases.

21. 10% if the beneficial owner is a company (excluding partnership) which holds directly at least 10% of the capital of the company paying the dividends.

22. 5% if the recipient holds directly at least 15% of the capital of the company paying dividends.

23. 5% if the beneficial owner is a company (other than a partnership) which holds directly at least 25% of the capital of the company paying the dividends; 10% rate if the beneficial owner is a company which holds directly at least 25% of the capital of the company paying the dividends where that latter company is a resident of Israel and the dividends are paid out of profits which are subject to tax in Israel at a rate which is lower than the normal rate of Israeli company tax; 15% rate in all other cases.

24. 5% if the beneficial owner holds directly at least 10% of the capital of the company paying the dividends.

25. 5% if the recipient holds directly or indirectly at least 10% of the capital of the company paying the dividends.

26. 5% if the beneficial owner is a company (other than a partnership) which holds directly at least 10% of the capital of the company paying the dividends; 10% rate if the beneficial owner is a company which holds directly at least 10% of the capital of the company paying the dividends where that latter company is a resident of Israel and the dividends
are paid out of profits which are subject to tax in Israel at a rate which is lower than the normal rate of Israeli company tax; 15% rate in all other cases.

27. 10% if the recipient holds at least 25% of the capital of the company paying the dividends.

28. 5% if the beneficial owner is a company (other than a partnership) which holds directly at least 25% of the capital of the company paying the dividends; 10% rate if the beneficial owner is a company which holds directly at least 10% of the capital of the company paying the dividends where that latter company is a resident of Israel and the dividends are paid out of profits which are subject to tax in Israel at a rate which is lower than the normal rate of Israeli company tax.

29. 12.5% but only if (i) during the part of the paying corporation’s taxable year which precedes the date of payment of the dividend and during the whole of its prior taxable year (if any), at least 10% of the outstanding shares of the voting stock of the paying corporation was owned by the recipient corporation, and (ii) not more than 25% of the gross income of the paying corporation for such prior taxable year (if any) consists of interest or dividends (other than interest derived from the conduct of a banking, insurance, or financing business and dividends or interest received from subsidiary corporations, 50% or more of the outstanding shares of the voting stock of which is owned by the paying corporation at the time such dividends or interest is received). A 15% rate applies for payments from income derived during any period for which the paying corporation is entitled to the reduced tax rate applicable to an approved enterprise under Israel’s Encouragement of Capital Investments Law (1959). A 25% rate applies in all other cases.

30. 5% for interest in connection with the sale on credit of any industrial, commercial or scientific equipment or on any loan of whatever kind granted by a bank.

31. 5% for interest in the case of a bank or other financial institution.

32. 7% for interest received by any bank or financial institution.

33. 5% for interest paid on a loan granted by a bank.

34. 5% for interest paid on any loan of whatever kind granted by a bank.

35. 5% where in connection with the sale on credit of any industrial, commercial or scientific equipment, or sale on credit of any merchandise by one enterprise to another enterprise, or on any loan of whatever kind granted by a bank; 10% in all other cases. An election can be made to be taxed on the net amount of the interest as if such interest were business profits.

36. 5% for interest paid in connection with the sale on credit of any industrial, commercial or scientific equipment, sale on credit of any merchandise by one enterprise to another enterprise, or on any loan of whatever kind granted by a bank.

37. 7.5% for interest if received by any bank or financial institution.

38. 5% where paid on any loan of whatever kind granted by a bank.

39. 5% where paid on any loan of whatever kind granted by a bank.

40. 10% where paid to a bank or a financial institution.

41. 5% where paid in connection with the sale on credit of any industrial, commercial or scientific equipment, or sale on credit of any merchandise by one enterprise to another enterprise, or on any loan of whatever kind granted by a bank.

42. 2% rate applies to government debt or government-assisted debt; 5% rate applies when paid to a financial institution; 10% rate applies in all other cases.

43. 5% rate in connection with the sale on credit of any industrial, commercial or scientific equipment, or in connection with the sale on credit of any merchandise by one enterprise to another enterprise, or on any loan granted by a financial institution.

44. 5% rate for interest paid on any loan of whatever kind granted by a bank.

45. 7% rate for interest paid on any loan of whatever kind granted by a bank.

46. 10% rate for interest received by any financial institution (including an insurance company).

47. 5% rate for interest paid on any loan of whatever kind granted by a bank.

48. 10% for interest derived from a loan of whatever kind granted by a bank, savings institution, or insurance company or the like. 17.5% rate for other interest. An election may be made to be taxed on interest income as if that income were industrial and commercial profits.
49. 0% for literary, dramatic, musical or artistic work copyright royalties (excluding in respect of motion picture films or films for use in connection with television).
50. 5% for copyright royalties for literary, artistic or scientific work (excluding cinematograph films) or for the use of, or the right to use, industrial, commercial or scientific equipment or road-transport vehicles.
51. 0% for copyright royalties for literary, dramatic, musical, artistic or scientific work (excluding in respect of films for cinema or television).
52. 15% for trademark royalties.
53. The rate is 50% of the rate which would have been imposed but for the treaty provision but not to exceed 12.5% and not to be less than 7.5%.
54. 0% for copyright royalties for the production or reproduction of any literary, dramatic, musical or artistic work (but not including royalties in respect of motion pictures).
55. For industrial, commercial, and scientific equipment royalties, the 10% rate applies to the adjusted amount of the royalties (70% of the gross amount of the royalties).
56. 0% for copyright royalties for literary, artistic or scientific work (excluding cinematograph films).
57. 0% for copyright royalties for literary, dramatic, musical or artistic works.
58. 0% for copyright royalties for literary, artistic or scientific work (excluding cinematograph films or tapes for television or broadcasting).
59. 2% for industrial, commercial, and scientific equipment royalties.
60. 5% for industrial, commercial and scientific equipment royalties.
61. 10% for royalties for cinematograph films and films or video-tapes for radio or television broadcasting.
62. 5% for industrial, commercial, or scientific equipment royalties.
63. For royalties in respect of cinematograph or television films, the withholding tax rate shall not exceed tax at the rate applicable to companies on 15% of the gross amount of the royalty.
64. 5% for royalties for copyrights of literary, dramatic, musical, artistic work or for the use of, or the right to use, industrial, commercial or scientific equipment.
65. The definition of royalties does not include any royalty or other amount paid in respect of (i) the operation of a mine or quarry or of any other extraction of natural resources or (ii) in respect of cinematograph including television films.
66. 5% for royalties for literary, artistic or scientific work, excluding cinematograph films or films or tapes used for radio or television broadcasting.
67. For royalties in respect of cinematograph or television films, tax may be imposed in Israel, but not to exceed tax at the rate applicable to companies on 15% of the gross amount of the royalty.
68. 10% for copyright or film royalties
69. 5% of the gross amount of the royalties where such royalties consist of payments of any kind received as a consideration for the use or the right to use any copyright of literary, artistic or scientific work (excluding cinematograph films).
70. 5% for royalties for any patent, design or model, plan, secret formula or for the use of, or the right to use, industrial, commercial or scientific equipment or for information concerning industrial, commercial or scientific experience; 7.5% for technical fees; 15% for all other royalties.

**Tax administration**

**Returns**
The tax year is generally the calendar year. Certain entities may apply to have their tax year-end on different dates, specifically, mutual funds, government companies, quoted companies, and subsidiaries of foreign publicly listed companies.

The Israeli system is based on a combined form of assessment and self-assessment.
Israel

The statutory filing date is five months following the end of the tax year which for a calendar year taxpayer would be 31 May. It is possible however to secure extensions of the filing date.

**Payment of tax**
Generally, 12 monthly advance payments are levied at a fixed ratio of the company's turnover. Alternatively, a company may be required to make 10 monthly payments beginning in the second month of its tax year, each payment being a fixed percentage of the previous year's tax assessment. Penalties are imposed on overdue advance payments and on delays in the submission of tax returns. The balance of any taxes due is payable from the beginning of the following tax year and is linked to the CPI; it bears interest of 4% until paid.

**Statute of limitations**
The statute of limitation period for corporate tax is three years from the end of the tax year in which the relevant tax return is filed. The Commissioner of the Tax Authorities has the authority to extend this period to four years.

**Other issues**

**Choice of business entities**
Investments and business operations in Israel may be structured in a variety of ways. The following are the common types of business entities in Israel: (i) Israeli public or private company; (ii) foreign company in Israel (i.e., a branch); (iii) Israeli general or limited partnership; (iv) foreign general or limited partnership; (v) other entities such as cooperative societies; and (v) other arrangements (e.g., contractual joint ventures).

**Mergers and acquisitions**
Israeli tax law allows for non-taxable reorganisations in situations in which the ownership and business enterprise of the original parties is continued after the reorganisation takes place, allowing for the deferral of the tax liability until the shares or assets transferred in such reorganisations are actually sold. Different qualifying requirements and conditions apply (e.g., obtaining a ruling from the ITA in certain cases) depending upon the tax residency of the parties and the type of transfer.

Significant developments

The major recent changes in the tax rules enacted in 2010 are as follows:

• Penalty protection regime with transfer pricing documentation support;
• Changes to the Controlled foreign companies (CFC) rules; and
• Changes to value-added tax (VAT).

Please consider that in Italy tax updates are generally expected from June to September in connection with the finance bill and related laws approval. In this respect we suggest to review the WWTS website in order to check whether or not relevant changes affect your business.

Penalty protection regime with transfer pricing documentation support
Transfer pricing adjustments will no longer be subject to administrative penalties if during a tax audit proper documentation is provided.

Documentation content guidelines are expected to be approved by tax authorities.

Starting in 2010 the possession of the documentation must be notified with the tax authorities filing specific forms. A notification is required for previous fiscal years.

CFC rules modification
Conditions for the applicability of CFC have been modified. In addition, CFC rules may also be applicable to certain controlled companies that are not resident in tax havens.

VAT changes
The so called “VAT package” has been enacted in Italian legislation providing a new framework for the supply of services.

In order to limit abuse, from 2010 the offset of VAT credits against other taxes brings new compliance obligations.

Starting from July 2010 transactions carried out with subjects resident in “black list” countries must be disclosed in proper communication to be electronically filed with the tax authorities. An electronic communication to the tax authorities has been introduced for VAT transactions exceeding EUR 3,000. Related deadlines and conditions will be defined by the tax authorities.

**Italy**

**Taxes on corporate income**

Italian corporate entities are subject to State Corporate Income Tax, known as IRES (Imposta sul REddito delle Società), which is levied at 27.5% and to Regional Production Tax, known as IRAP (Imposta Regionale sulle Attività Produttive), which is levied at 3.9%.

An increase (surtax) in the IRES rate equal to 6.5% is applied to companies operating in the areas of oil and gas refining, production or trade and in electrical energy (production or trade) which have turnover in excess of EUR 25 million in the fiscal year preceding the application period.

The taxable base for IRES is determined according to principle of worldwide taxation such that regardless of the location/jurisdiction where the income is produced, to the extent that the income is legally attributable to an Italian entity, the income is taxed in Italy. IRES is charged on the total net income reported in the financial statements of the company as adjusted for specific tax rules.

There are different methods of computation for the IRAP taxable base, depending on the nature of the business carried out by the taxpayer. Labour costs (with limited exceptions), provisions for liabilities and risks and extraordinary items cannot be taken into account in determining the IRAP taxable base.

For sales and manufacturing companies, the IRAP taxable base is broadly represented by the company's gross margin in its financial statements. In addition to the non-deductible items mentioned above, interest income and expense and provisions for bad debts are excluded for purposes of the IRAP taxable base.

For banks, the IRAP taxable base is broadly defined as follows:

1. Intermediation margin reduced by 50% of dividends;
2. 90% of amortisation costs relating to fixed tangible and intangible assets; and
3. 90% of other administrative expenses.

Special rules apply to financial institutions, other than banks.

IRAP is levied on a regional basis. Regions are allowed to increase or decrease the standard rate of IRAP by up to 0.9176%. Companies with facilities in different regions must allocate their overall taxable base to the different regions on the basis of the employment costs of personnel located at the various sites. Facilities become relevant to the calculation of IRAP if they have been established for more than three months. Italian companies with permanent establishments abroad (as well as shipping companies qualifying for the tonnage tax regime, *(see Tonnage tax)* are not subject to IRAP on the income earned through these permanent establishments.

**Substitutive tax on reorganisations (e.g., mergers, demergers, contributions in kind)**

Corporate reorganisations such as contributions in kind, mergers and demergers are in principle tax neutral even if, for financial accounting purposes, the transaction results in the recognition of higher values for the assets in question or the recognition of goodwill. Companies may elect to obtain partial or full recognition for tax purposes.
of the higher financial accounting values of an asset or the goodwill arising from the corporate reorganisation provided they pay a substitutive tax.

The substitutive tax is calculated on the step-up in tax basis and is based on graduated rates of 12% to 16%. The first EUR 5 million is taxed at 12%, the tranche above EUR 5 million but less than EUR 10 million is taxed at 14%, and the amount in excess of EUR 10 million is taxed at 16%. The substitutive tax may also be paid in three annual instalments of 30% in the year of election, 40% in year two, and 30% in year three plus interest at the rate of 2.5% per year on the deferred amounts. The substitutive tax is not deductible for the purposes of IRES or IRAP.

In addition, stepped-up values of goodwill and trademarks may be depreciated for tax purposes over nine tax years instead of the normally allowed 18 years by paying a substitutive tax of 16%. The higher tax depreciation arising from this election takes effect from the tax period subsequent to the one in which the substitutive tax is paid. For example, if a merger transaction occurred in year one and the substitutive tax was paid in year two the increased tax depreciation would begin in year three.

**Tonnage tax**

Italian tax resident shipping companies as well as foreign shipping companies operating in Italy through a permanent establishment can qualify for the Italian tonnage tax regime. A qualifying company can elect to be subject to the tonnage tax regime. The regime basically allows the determination of a presumptive income based on the net tonnage of the qualifying ships apportioned to the effective shipping days (tonnage income). The tonnage income is subject to IRES only.

To qualify for the tonnage tax, ships must meet the following requirements: (i) a net tonnage of more than 100 net tons (NT); (ii) ships must be used for goods transportation, passenger transportation, salvage, towing and other services and (iii) must operate in international shipping as defined by the rules disciplining Italian International Registry. Ships chartered out on a bare boat charter are excluded. Chartered in ships with crew are included in the tonnage tax regime if their global net tonnage is less than 50% of the total net tonnage.

Tonnage income is calculated on the basis of the ship’s net tonnage. The daily income is determined according to the following rate system: (i) from 0 to 1,000 NT: EUR 0.0090 per NT; (ii) from 1,001 to 10,000 NT: EUR 0.0070 per NT; (iii) from 10,001 to 25,000 NT: EUR 0.0040 per NT; (iv) above 25,001 NT: EUR 0.0020 per NT.

No deductions are allowed from tonnage tax income.

Income and expenses from the following activities are all deemed to be covered by the tonnage income determined as previously discussed:

- Transport of goods;
- Transport of passengers;
- Salvage and towing;
- Other services that need to be performed on the high seas;
- Charges related to the above mentioned activities (e.g., administrative and commercial expenses, insurances fees);
Italy

- Other operations performed in close connection with the transportation operations (e.g., loading and unloading); and
- Other minor activities.

Capital gains or losses arising from the transfer of ships that have been acquired by a company, while under the tonnage tax regime, are also deemed to be included in tonnage tax income. Conversely, for capital gains arising from the transfer of a ship acquired prior to election for the tonnage tax regime, the difference between the sale price and the net tax cost as of the last tax period prior to the election for the tonnage tax regime is subject to the ordinary tax regime. Tax losses, in this latter case, are tax deductible.

An election for the tonnage tax regime should be made for all of a company's or group's qualifying vessels. So-called “cherry-picking” is not allowed. Election for the tonnage tax regime is on a voluntary basis, but once elected, it remains in effect for 10 years. The election is renewable.

**Corporate residence**

**Corporate residence of companies**
Companies having their legal or administrative headquarters or their principal business activity within the Italian territory are taxable in Italy on their worldwide income. Other companies are subject to Italian corporate income tax only on their Italian-source income. Specifically, Italian non-resident companies that have permanent establishments in Italy are subject to corporation tax with respect of the taxable income generated from the permanent establishment in Italy.

A foreign company holding one or more Italian subsidiaries is deemed to be resident of Italy for tax purposes if at least one of the following conditions exists:

- The foreign company is, either directly or indirectly, held by Italian tax resident persons; or
- The board of directors of the foreign company mainly is made up of Italian resident individuals.

**Corporate residence of a trust**
Trusts are considered as persons subject to corporate taxation.

Residence is defined on the basis of the location of the place of management and of the main object of the trust. In the first instance, trusts that operate through an appropriate structure are deemed to be tax resident in Italy, if the said structure is located in Italy. In the absence of any such structure, trusts managed by a trustee will be deemed as tax resident in Italy, if the trustee is tax resident in Italy. In addition, trusts that have the largest part of their assets located in Italy are deemed a tax resident in Italy.

There are anti-avoidance rules for Italian non-resident trusts, which set out the specific conditions on which these trusts can become Italian tax resident.
Other taxes

VAT – General rules
Italian VAT (Imposta sul Valore Aggiunto) shall apply to the supply of goods and services carried out in Italy by entrepreneurs, professionals or artists and on importations carried out by anyone. Intra-community acquisitions are also subject to VAT taxation under certain situations.

Transactions relevant for VAT purposes in Italy are:

- Supplies of goods or services;
- Carried out by an entrepreneur, an artist or professional, in the exercise of their activity; and
- Carried out in Italy.

In the absence of one of the above elements (e.g., the supply of goods does not take place in Italy), the transaction is not subject to VAT and remains outside the Italian VAT framework. This means that the supply is not subject to VAT and that it is subject to none of the VAT requirements set forth by the Italian VAT law. Specifically listed transactions are also out of the VAT application scope (e.g., transfer of money, transfer of business parts).

Input-VAT on purchases of goods and services related to the business activity generally is allowed for recovery. Special limitations apply in relation to specific items (e.g., cars, entertainment expenses).

The Italian standard VAT rate is 20%. Reduced rates are provided for specifically listed supplies of goods and services such as 4% for listed food, drinks and listed agricultural products and 10% for electric power supplies for listed uses, listed drugs. Intra-community supplies and exports are exempt from VAT.

Specific supplies of goods and services expressly listed in the law are exempt from VAT (e.g., public postal services, hospital and medical care, education, insurance services, specific financial services, supply, leasing of particular immovable property).

Intrastat (The European Union (EU) tax information system) lists and European Community (EC) lists (which in Italy are unified in a single form) are mandatory both for intra-community exchanges of goods and the services falling in the general rule (business to business) supplied and received to/from EU established taxable persons.

VAT package
With reference to the place of supply rule, new provisions for services have been implemented in accordance to the EU Directives no. 2008/8/CE. Also Directives no. 2008/9/CE (refund procedure for persons established in a Member State other than Italy) and no. 2008/117/CE (Intrastat obligations and taxable event) (i.e., the so called “VAT package”) have been implemented in Italy modifying the Italian VAT legislation (i.e., Presidential Decree No. 633/1972 and Law Decree No. 331/1993).

The main changes are:

1. Services supplied to taxable persons.
Starting 1 January 2010, services supplied by a taxable person to another taxable person (business to business) are in the scope of the Italian VAT, if the services are supplied to Italian taxable persons or to permanent establishment of an Italian non-resident entity (general rule – recipient’s country).

The general rules are as follows:

- For services related to immovable property, reference must be made to the place in which the immovable property is located;
- For the transportation of passengers, the place in which the transportation takes place must be identified including the proportion of the distance covered;
- For catering and restaurant services, the place in which the activity will be physically carried out must be identified; and
- For short term hiring, leasing and similar of means of obtaining transport services, the place in which the vehicle is used must be identified (use and enjoyment rule has been implemented on these services).

2. Services supplied to final consumers.

Starting 1 January 2010, the general rule for services supplied by a taxable person to a non-taxable person (business to consumer) identifies the place of taxation with the state of residence of the supplier.

Several rules, in addition to the business to business, exist for the following:

- Brokerage services;
- Goods transport services;
- Services related to movable goods and ancillary activities related to transports;
- Long term hiring / leasing of means of transport services;
- Electronic services supplied by extra-EU suppliers; and
- Telecommunications and television/radio broadcast services.

In addition, special rules are provided for intangible services provided to final customers established outside the EU.

**Disclosure of transactions with “black list” countries**

Starting from 1 July 2010 a new periodical obligation to communicate by electronic means to the tax authorities is applicable to taxable persons for all supplies of goods and services carried out with business entities resident in “black list” countries. The omitted, incomplete or untrue communication will be subject to an administrative penalty.

**ICI – Imposta Comunale sugli Immobili (municipal tax on real estate)**

ICI is levied either on the owner or on the financial lessee of real estate (i.e., buildings, development land and agricultural land). The tax rate ranges from 0.4% to 0.7%, depending on the rate set by the municipality (Commune) where the property is located.

The taxable basis generally is determined on the basis of the so called “cadastral value” (i.e., capitalisation of the income deriving from the real estate).
**Registration tax**
Specific deeds and contracts must be filed with the local registration tax office either on signature or if specific circumstances occur, and the relevant tax must be paid.

Depending on the nature of the contract and on the assets object of the contract, registration tax is levied as a fixed amount or as a percentage of the value of the goods and/or rights that are the object of the contract.

**VAT and registration tax on lease of immovable properties**
Leases, including financial leases, of residential and commercial buildings or portion thereof generally are VAT exempt and subject to the registration tax at 2% or 1% rate.

Please refer to the table below for an overview of the tax regime applicable to the leases, including financial leases, of both residential and commercial buildings.

**Italy**

**Branch income**

The tax regime for permanent establishments (PE) is the same as for corporate Italian entities (e.g., joint-stock companies). Accordingly, a branch is subject to IRES as well as IRAP. Both taxes are determined on the basis of the relevant financial statements related to the business activities carried out by the PE.

Transfer pricing principles apply to transactions between a head office and its Italian tax resident PE.

**Income determination**

**Basic principles for income determination**

In principle, positive and negative components of a company's income statement are, respectively, taxed or deducted on an accruals basis (accrual principle) for tax purposes. Additionally, in order to be taxed, income items have to be certain to arise under a legal definition and either objectively determined or capable of objective determination as to their amount (certain and objective determination principle). Income statement items accrued in the statutory accounts that do not meet the above criteria are not allowed as a tax deduction nor taxed as income in the tax period. Deduction or taxation of income is correspondingly deferred to future tax periods when the criteria are met (for example, treatment of provisions for liabilities and risk).

Expenses generally are deductible if they relate to activities that generate revenues which form part of the company's taxable income (inherence to business principle) and provided they are included in the relevant statutory accounts (imputation principle). An exception to this general rule is made for those income statement items accrued in the statutory accounts relating to a tax period different from that in which they become relevant for tax purposes in accordance with the principles of certainty and objective determination as described above. These items are taken into account in determining taxable income in the tax period in which the latter conditions are met.

For IRAP purposes relevant income and expense are those reported in the financial statements.

Specific rules are released for entities which have adopted IFRS for Italian statutory financial reporting purposes. These provisions bring the income determination rules into line with IFRS.

**Inventory valuation**

Italian tax law allows the application of all the most commonly used inventory valuation methods: last-in, first-out (LIFO), first-in, first-out (FIFO), average cost. For IRES only, the reference prices used to calculate the written down value of the inventory items cannot be lower than their market prices during the final month of the tax period.

Companies operating in the oil and gas sector are required to adopt for tax purposes either average cost or FIFO.

**Capital gains**

Capital gains are taxable in the tax period in which they are realised.
• Fixed assets: the gain realised on the sale of fixed assets is taxable for both IRES and IRAP purposes. Additionally, for IRES purposes, tax on capital gains can be spread over a maximum of five years. This treatment is allowed, provided that the company owns the fixed assets for not less than three years.

• Financial investments: a specific participation exemption regime (PEX) is applicable. Under this regime, capital gains realised by Italian companies on sales of shareholdings are 95% exempt from IRES.

The exemption applies if the following conditions are met:

i. The shareholding is held uninterruptedly for at least 12 months prior to the sale;
ii. The investment is classified under financial fixed assets in the financial statements relating to the first tax period of uninterrupted ownership;
iii. The subsidiary is actually carrying on a commercial activity (e.g., investments in companies mainly performing management of their own real estate are not entitled to the PEX benefits); and
iv. The majority of the subsidiary’s income is not generated in a tax haven country or one with a privileged tax regime.

Conditions (iii) and (iv) must be met both at the time of the sale of the investment and in the three years preceding the sale. If these conditions are not met, the capital gain realised by the company is taxed in the normal way. Capital losses arising from the sale or write-down of shareholdings meeting PEX conditions are basically not tax deductible. Likewise, the capital losses realised on sales of “non PEX” investments are tax deductible. Specific exemptions are provided for those entities that adopted IFRS for Italian statutory accounts reporting purposes.

Specific anti-dividend washing rules provide that where capital losses arise from the disposal of shareholdings which are not eligible for PEX, such losses are deductible only for the part which exceeds the tax exempt amount of dividends (see discussion below) received from the shares in question in the 36 months prior to the disposal. Capital gains on financial investments generally are excluded from the IRAP taxable base.

**Dividends**

Dividends received by Italian resident companies from Italian companies or from companies resident in countries other than tax havens are excluded from the IRES taxable base for 95% of the amount. Conversely, no exemption applies to dividends paid by entities that are resident in tax haven jurisdictions (unless those dividends derived from profits were already taxed under the Italian CFC rules, see below). There are specific rules for entities adopting IFRS for Italian statutory financial reporting purposes. For such entities, dividends from investments in shares and other financial instruments held for trading purposes are fully taxable.

Dividends generally are excluded from the IRAP taxable base.

**CFC rules for foreign entities**

An Italian company that controls, either directly or indirectly, an entity located in a tax haven jurisdiction is required to consolidate the taxable income arising in proportion to the percentage shareholding held, irrespective of whether the profits have been distributed or not.
Income from CFCs is taxed separately from the other taxable income of the business at the standard IRES rate (i.e., other tax losses cannot be used to offset income in the CFCs). Foreign taxes paid by the CFCs are recoverable by way of a corresponding tax credit.

Dividends received by an Italian shareholder from a CFC are excluded from taxable income up to the amount of the taxable income attributed under the above CFC provisions. The excess of any dividends over income already included through the CFC regime is fully taxable in the hands of the shareholder.

Where companies are located in a tax haven the CFC rules also apply for companies holding not less than the 20% of the company’s share capital or entitled to not less than 20% share of the company’s profits. In such instances there are specific rules to determine the taxable income attributable to the Italian resident shareholder. The taxable income is determined by applying specific income ratios to the business assets of the CFC as they appear in the relevant accounts.

Exemption from these CFC rules can be achieved by means of an advance ruling from the Italian tax authorities. To obtain such a ruling, adequate evidence must be provided to demonstrate at least one of the following:

- The foreign company is mainly and effectively engaged in sales and/or industrial activities in the “market” of the foreign host state or territory. Banks, other financial entities and insurance companies must demonstrate that most of the financial resources and related proceeds are made in or as the result of yields, respectively, from the market of the foreign host state or territory. However, this exemption cannot be requested where more than 50% of the income of the foreign subsidiary/ies derives from “passive income” (e.g., holding or investment in securities, receivables or other financial assets, transfer or license of intangible rights, etc.) or from intra-group transactions; or
- No less than the 75% of all the proceeds of the CFC have been taxed in jurisdictions that are not tax privileged countries (e.g., a company resident in Hong Kong has all of its operations in China mainland and it is subject to ordinary taxation there).

The CFC rules also extend to controlled companies that are located in a jurisdiction with a privileged tax regime that is not a tax haven, if the following conditions exist:

- The effective tax is less than 50% of the tax that would have been charged had the company been resident in Italy; and
- More than 50% of revenue derives from so-called “passive income” or from intra-group services.

By means of an advance ruling, the Italian parent company is able to obtain an exemption from these rules if it is able to provide proper evidence that the establishment of the company in the privileged tax jurisdiction is not for tax avoidance purposes (unfair tax advantage).

**Foreign income**

An Italian domestic corporation is taxable on all income whether produced in Italy or abroad. Profits earned by subsidiaries that are resident or located in countries or territories other than tax havens are taxed only on distribution of the relevant profits. Double taxation is, in principle, avoided by means of foreign tax credits.
Shell companies
Companies and permanent establishments of foreign enterprises can be qualified as non-operating entities if certain tests are not passed. In such a case, these entities will be assessed as having a minimum taxable income for both IRES and IRAP purposes.

For IRES purposes the average of the revenues recorded in the current fiscal year and in the two previous years must be compared to the total amount that would result by applying determined percentages to the average balance sheet value of specific assets in the current fiscal year and the two previous years.

The main assets to be taken into consideration are shares and shareholdings, financial receivables, owned or leased real estate, owned or leased tangible and intangible assets. The value of any assets that have been acquired or sold during the fiscal year must be adjusted according to the period of ownership.

An entity is deemed to be non-operative if the expected revenues determined on the above basis is higher than the average of actual revenues. As a consequence the entity is obliged to declare minimum taxable income for IRES, calculated by multiplying fixed percentages to the value of the above-mentioned assets.

This condition must be checked every year, and therefore, it is possible for an entity to be “non-operative” in one year and operative in the following year.

Tax losses generated in a tax period when the company was deemed to be non-operating cannot be carried forward.

For IRAP purposes, labour costs and other non-deductible items have to be added back to the deemed minimum IRES income as outlined above.

These rules are not applicable in the first year of a company's incorporation. Exemptions from these rules can be achieved:

• By means of an advance ruling from the Italian tax authorities aimed at assessing the specific circumstances that caused the company not to earn the minimum amount of income; or
• By specific objective situations provided for by Italian law (e.g., company directly or indirectly held by quoted companies, etc.).

Shell companies are also subject to limitations in their ability to recover VAT credits.

Deductions

Basic principles for deductible costs
The principles outlined in the section on Income determination also apply for deductible costs.

Interest expense
Generally, interest expense is fully tax deductible up to the amount of interest income. Thereafter, excess interest expense is deductible up to 30% of the gross operating margin (interest deduction capacity) as reported in the financial statements. Gross operating margin is defined as the difference between operating revenues and
expenses excluding depreciation of tangible and intangible assets and charges for leased assets as stated in the profit and loss account for the year.

Net interest expense in excess of the yearly limitation is carried forward indefinitely. Hence net interest expense not deducted in previous years can be deducted in any future fiscal year as long as total interest in that year does not exceed 30% of gross operating margin. If net interest expense is lower than the annual limit (i.e., 30% of gross operating margin) this difference can be carried over to increase the company’s interest deduction capacity in future years. However, this latter rule is only applicable from 2010 onwards.

Where an election is made for the domestic tax consolidation regime, (as discussed in Group taxation), the net interest expense limitation applies to the consolidated tax group. As a consequence, if a company participating in a tax group has an excess interest deduction capacity, this excess may be used against the interest deduction deficit in another company belonging to the same tax consolidation group. Under specific conditions, non-resident subsidiaries can also be “virtually” included in the tax consolidation for the sole purpose of transferring their excess capacity over 30% of gross operating margin in order to increase the overall interest deduction capacity of the Italian group.

The above-mentioned rules are not applicable for financial institutions, such as banks and insurance companies, where the deductibility of interest expense (for both IRES and IRAP purposes) is limited to a fixed amount of 96% of the interest expense shown in the income statement of these entities.

**Depreciation**

All fixed assets, except land, which are used in the business of the company, are depreciable for tax purposes (for both IRES and IRAP).

For IRES, the maximum depreciation rates for fixed tangible assets are set forth in a ministerial decree. In the event that financial accounting depreciation exceeds the amounts allowed for tax purposes, temporary differences arise. Tax depreciation of fixed tangible assets is allowed from the tax period in which the asset is first used. In the first tax depreciation period, the depreciation rate cannot exceed one-half of the normal rate.

Land is not a depreciable asset. Amortisation of goodwill derived from an acquisition and amortisation of trademarks are deductible for an amount not exceeding one-eighteenth of the cost of the goodwill in any year.

Patents, know-how and other intellectual property may be amortised over a two-year period.

Concession rights may be depreciated with reference to the utilisation period as determined either by law or in the relevant agreement.

For IRAP purposes only, depreciation and amortisation (other than as related to goodwill and trademarks, see above) are deductible in accordance with the amounts reported in the financial statements, regardless of the limits outlined above.
Net operating losses (NOLs)
For IRES purposes tax losses can be carried forward and used to offset income in future tax periods. The carryforward is limited to the five tax periods following the period in which the loss is incurred. Losses arising in the first three years of life of the enterprise can be carried forward indefinitely.

For IRAP purposes tax losses are not available for carryforward.

Specific (tax anti-avoidance) rules limit the carryforward of tax losses in the event of:

• Change of control; and
• An effective change of the main activity (performed by the company carrying forward the losses).

The aforementioned changes must occur together in order for the limitations to be applicable. The change of the main activity is relevant for these purposes if it takes place in the tax period in which the change of control occurs or in the two subsequent or preceding periods.

Specific anti-abuse provisions are also applicable to NOLs in cases of merger or demerger.

In Italy tax losses may not be carried back.

Transactions with foreign affiliates – transfer pricing rules
Transactions with foreign affiliated companies should be at “fair market value” and, generally, as defined by OECD guidelines.

Italian companies transacting business with related non-resident parties may participate in special tax ruling procedures for the transfer pricing procedures used for intra-group transactions. The agreement executed between the tax authorities and the taxpayer is binding for the fiscal year during which the agreement is executed and for the following two fiscal years, unless significant changes in the circumstances relevant for the conclusion of the agreement executed by the taxpayer take place.

Purchases from suppliers resident in tax haven jurisdictions
The costs of goods and services purchased from entities which are resident in tax haven jurisdictions are deductible on the condition that the taxpayer can, upon request of the tax authorities, provide evidence that the foreign companies carry out a real business activity or that the transactions were carried out for good and sound economic reasons (e.g., better economic conditions, the foreign supplier is the sole distributor for specific products, etc.).

An official list of tax haven jurisdictions (known as the “black list”) has been issued by the Ministry of Finance. A list of countries which are not considered to have a privileged tax regime (known as the “white list”) is expected and countries not on this white list will be deemed tax havens. Specific disclosure is required in a company’s income tax return for the expenses arising in tax haven jurisdictions.
**Taxes**
When calculating the IRES base, 10% of IRAP paid is deductible.

ICI (municipal tax on real estate) is not deductible for either IRES or IRAP.

**Entertainment expenses**
For IRES purposes expenses for gifts and entertainment which meet the requirements (both qualitative and quantitative) contained in the specific Ministerial Decree are fully deductible in the tax period in which they are incurred. Entertainment expenses which do not meet these requirements cannot be deducted.

Expenses related to gifts with a value of EUR 50 or less are entirely deductible.

**Automobile expenses**
For IRES purposes, deduction of the cost of company automobiles is limited to 40% of the total amount of the costs for the automobile. If automobiles are assigned to employees, the company may deduct 90% of the costs associated with the automobile.

Automobile costs may be deducted in their entirety if (i) automobiles are necessary for the company's business or if (ii) the automobiles are an essential element in the company's activity (i.e., vehicles owned by a car rental company).

**Telephone expenses**
For IRES purposes, up to 80% of the total expenses related to both mobile and landline telephones are deductible.

**Travel expenses**
For IRES purposes, the deduction for travel expenses incurred within the Municipality is limited to 75% of the amount incurred. However, the VAT related to such costs is fully recoverable.

**Foreign tax credit**
Where foreign-source income definitively is taxed abroad, a tax credit can be claimed for use against a company's IRES liability. The amount of the tax credit that can be claimed is the lower of the foreign tax incurred and the proportion of the IRES liability related to the foreign-source income. For partially exempt income (e.g., dividends), the foreign tax credit is reduced in proportion to the amount of the income taxable in Italy.

If an Italian company receives foreign income from more than one country, this limitation is applied separately to each country.

Foreign taxes borne by the foreign permanent establishment of an Italian resident company are allowed to be offset against the overall consolidated tax liability (IRES). For permanent establishments only, any excess over the maximum amount of foreign tax credit can be carried back or carried forward for eight years.

**Group taxation**

**Domestic tax consolidation**
Companies belonging to the same group can elect domestic tax consolidation. This allows the determination of a single IRES taxable base comprised of the taxable income
and losses of each of the participating entities. The tax consolidation does not operate for IRAP purposes.

Where an overall tax loss position arises, this can be carried forward and used against future consolidated taxable income. Conversely, tax losses arising in fiscal years preceding the domestic tax consolidation election can be carried forward and used only by the company to which these losses belong.

The taxable basis determined by each company participating in the tax consolidation arrangement is included in its entirety. No apportionment is made in relation to the percentage of control.

In order to elect validly the Italian domestic tax consolidation regime, the following conditions must be met:

- The consolidating entity must be an Italian tax resident company and it must hold, directly or indirectly, more than the 50% of the share capital of the consolidated entities (so called “legal control”);
- This control must be in place from the beginning of the tax period for which the tax consolidation is applied for; and
- All of the companies participating in the group must have the same year end.

Provided that specific requirements are met, Italian permanent establishments of foreign companies can also participate in a tax consolidation.

The consolidation arrangement operates on an elective basis. Taxpayers may select whether to be included or not and it is not necessary for all the Italian group/sub-group companies to jointly elect for the tax consolidation.

Once the election is made it cannot be revoked for three fiscal years.

**Worldwide tax consolidation group**

A worldwide tax consolidation group is available, allowing the consolidation of foreign subsidiaries.

In addition to the requirements set out for domestic tax group system the following conditions apply:

- The ultimate parent company must be either owned by individuals who are tax residents of Italy or listed on the Italian Stock Exchange; and
- The option must be exercised for all foreign companies (“all in, all out” principle).

Income for each company is apportioned in the tax consolidation based on the actual percentage of control exercised by the ultimate parent company that is an Italian tax resident.

A number of additional requirements need to be fulfilled in order for a worldwide tax consolidation to be operative including a mandatory audit of the financial statements of all the foreign subsidiaries.

Once the election is made, it cannot be rescinded for three fiscal years.
Tax incentives

Inward investment and capital investment
A number of incentives have been established to attract new industry to southern Italy and certain depressed mountain areas in central and northern Italy.

Tax credits are given to companies that increase the number of their employees and that invest in research and development.

The possibility of taking advantage of these rules, however, depends on the taxpayer fulfilling specific conditions and on the actual availability of financial resources by the Italian state. These financial resources generally are set in the annual state budget.

“Tremonti-ter” law
The “Tremonti-ter” law provides tax relief for investments in certain types of new machinery and equipment. To benefit from this new provision, acquisition of the asset must take place between 1 July 2009 and 30 June 2010.

The relief is a tax deduction for IRES purpose of 50% of the invested amount.

This tax relief can also be used for new equipment comprising part of a complex structure. Allowable investments are on a specific list approved by a decree (i.e., specific categories in the Italian statistical business activity codes).

Recapture rules apply if the object of the investment is disposed of within two tax periods.

Withholding taxes (WHT)

Withholding tax chart
Domestic corporations paying certain types of income are required to withhold as shown on the following chart.

Notes

The numbers in parentheses refer to the notes below:

1. Rates depend on the nature of the interest and/or of the recipient. The rates on debenture loans depend on the legal instruments adopted and the redemption period, mainly:
   a. 0% applies on loan agreements and ordinary notes;
   b. 12.5% on bonds if the term of the bond issue is longer than 18 months;
c. 27% if the bond issue period is shorter than 18 months.

2. 0% is applicable on dividends received by shareholders holding no less than the 20% of the share capital (2% in the case of listed entities), so called “qualified investments”.

3. The rate is applicable on 75% of the gross amount of the royalty paid.

4. Pursuant to the EU Directives and provided that the requirements set forth therein are met, payments of dividends, interest and royalties made by an Italian company to a EU resident group company can be withholding tax exempt. Specifically for the dividends, the minimum shareholding requirement (to benefit from this exemption) is currently equal to 10%.

5. Should the full withholding tax exemption not apply, 1.375% is applicable on dividends paid to EU tax residents.

6. Pursuant to the 2004 CH/EU tax agreement and provided that the requirements contained therein are met, payments of dividends, interest and royalties made by an Italian company to a CH tax resident group company can be withholding tax exempt.

7. Non-resident persons have the right to obtain reimbursement for up to four-ninths of the withholding effected, upon proof of the actual taxation of the dividends in the foreign country where the recipient is resident.

8. Provided that all conditions are met, domestic tax legislation is applicable if more favourable for the taxpayer.

9. The 0% rate applies to interest paid to public bodies or any agency or instrumentality (including a financial institution) in relation to loans made in application of an agreement concluded between the Governments of the Contracting States.

10. The 5% rate applies to royalties arising from the use of any copyright from literary, artistic or scientific work. The 15% rate applies in all other cases.

11. The 10% rate applies to royalties arising from the use of any copyright of literary, artistic or scientific work. The 18% rate applies in all other cases.

12. Withholding tax is 5% if the foreign company holds at least 10% of the capital of the Italian company (this share should be at least USD 100,000 or its equivalent in any other currency); otherwise, the rate is 10%.

13. The higher rate applies if the Austrian company directly owns more than 50% of the capital in the Italian company.

14. Withholding tax is 10% if the foreign company holds at least 10% of the capital in the Italian company; otherwise, it is 15%.

15. The 0% rate applies to interest on public bonds. Withholding tax is 10% if the interest is derived by a bank or any other financial institution. The 15% rate applies in all other cases.

16. Withholding tax is 25% on royalties arising from use or the right to use trademarks. The 15% rate applies in all other cases.

17. The 5% rate applies if the foreign company holds directly at least 25% of the capital of the company paying the dividends. Withholding is 15% in all other cases.

18. The lower rate applies to copyright royalties, excluding films, etc.

20. Withholding is 18% on dividends paid by a company which is a resident of the Republic of the Ivory Coast and which is exempt from tax on its income or which is not subject to that tax at the normal rate. The 15% rate in all other cases.

21. The lower rate applies to copyright royalties, including films, etc.

22. The 0% rate applies if the Danish company has owned directly at least 25% of the capital of the company paying the dividends for a 12-month period prior to the date the dividends are declared. Withholding is 15% in all other cases.

23. The Italian domestic rates apply as no reduction is provided under the treaty.

24. The 5% rate applies if the foreign company holds directly at least 10% of the capital of the company paying the dividends. Withholding is 15% in all other cases.

25. The 5% rate applies on royalties paid for the use of industrial, commercial or scientific equipment. Withholding is 10% in all other cases.

26. 10% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) which holds directly more than 50% of the capital of the company paying the dividends. Withholding is 15% in all other cases.

27. Non-resident shareholding companies with more (less) than 10% of the capital of the company subject to 5% (15%) withholding tax.
28. The lower rate applies to interest on public bonds and trade credits, and to interest arising from the sale of equipment.
29. Withholding tax is 5% if the company holds at least 25% of the capital of the Italian company, otherwise it is 10%.
30. Withholding tax is 10% if the company holds at least 25% of the capital of the Italian company, otherwise it is 15%.
31. Withholding tax is 5% if the company holds at least 10% of the capital of the Italian company, otherwise it is 15%.
32. The 5% rate applies to dividends if the beneficial owner is a company which owns at least 10% of the capital of the company paying the dividends for a 12-month period ending on the date the dividend is declared. The 15% rate applies in all other cases.
33. Withholding tax is 15% if the company holds at least 25% of the shares of the Italian company, otherwise it is 25%.
34. Withholding tax is 10% if the company holds at least 25% of the capital of the Italian company, otherwise it is 15%.
35. Withholding tax is 5% if the company holds directly at least 10% of the capital in the Italian company, otherwise, it is 15%.
36. The 10% rate applies on royalties in respect of payments of any kind received as a consideration for the use of, or the right to use industrial, commercial or scientific equipment, or for information concerning industrial, commercial or scientific experience. Withholding is 15% in all other cases.
37. Withholding tax is 10% if the foreign company holds at least 25% of the entire voting shares in the Italian company, otherwise it is 15%.
38. Withholding tax is 5% if the foreign company holds directly at least 15% of the capital in the Italian company, otherwise, it is 10%.
39. Withholding tax is 5% if the company holds at least 10% of the capital of the Italian company, otherwise it is 15%.
40. The 5% rate applies to dividends in the country of residence of the beneficial owner if the beneficial owner is a (joint stock) company that owned at least 25% of the capital of the distributing company for at least 12 months before the distribution. The 10% rate applies in all other cases.
41. Withholding tax is 5% if the foreign company holds directly at least 15% of the capital in the Italian company, otherwise, it is 10%.
42. Withholding tax is 10% if the company holds at least 25% of the capital of the Italian company, otherwise it is 25%.
43. Withholding tax is 5% if the foreign company holds at least 25% of the entire voting shares in the Italian company, otherwise it is 15%.
44. Withholding tax is 5% if the company holds at least 25% of the capital of the Italian company, otherwise it is 15%.
45. The 0% rate applies to interest on public bonds and to interest received by an administrative subdivision or a local authority. The 10% rate applies if the interest is received by a financial institution (including an insurance company) and the enterprise paying the interest engages in an industrial undertaking. In case of a special relationship between the parties the treaty is not applicable to the part which exceeds the amount which would have been agreed upon by the payer and the recipient in the absence of such relationship. The excess part of the payments shall remain taxable according to the law of each Contracting State.
46. Withholding tax is 10% if the company holds at least 25% of the capital of the company paying the dividends otherwise, it is 20%.
51. The 5% rate applies to copyright royalties on literary, artistic or scientific work. The 16% rate applies to a trademark, to cinematograph and television films, to industrial, commercial or scientific equipment. The 12% rate applies in other cases.

52. Withholding tax is 5% if the foreign company holds at least 20% of the capital in the Italian company, otherwise, it is 15%.

53. Non-resident shareholding companies with more than 10% of the voting power are subject to 5% withholding tax. The 15% rate applies in all other cases.

54. The 0% rate applies if the beneficial owner of the dividends is a qualified governmental entity that holds, directly or indirectly, less than 25% of the voting stock of the company paying the dividends.

The 5% rate applies to dividends if the beneficial owner is a company which owns at least 25% of the voting rights of the company paying the dividends for a 12-month period ending on the date the dividend is declared. The 15% rate applies in all other cases.

55. The 0% rate applies on certain categories of interest that are exempt from taxation in the source State:
   a. The beneficial owner is a qualified governmental entity that holds, directly or indirectly, less than 25% of the capital of the entity paying the interest;
   b. Interest is paid with respect to debt obligations guaranteed or insured by a qualified governmental entity of either Contracting State and the recipient is the beneficial owner of the interest;
   c. Interest is paid or accrued with respect to outstanding balances between enterprises for the sale of goods, merchandise, or services;
   d. Interest is paid or accrued in connection with the sale on credit of industrial, commercial, or scientific equipment.

The 10% rate is applied in all other cases.

56. The 0% withholding tax applies for the use of, or right to use, a copyright of literary, artistic or scientific work (excluding royalties for computer software, motion pictures, films, tapes or other means of reproduction used for radio or television broadcasting). The 5% rate applies for the use of, or the right to use, computer software or industrial, commercial, or scientific equipment. The 8% rate applies in all other cases.

57. Withholding tax is 5% if the company holds at least 70% of the capital of the Italian company; it is 10% if the company holds at least 25% of the capital of the Italian company, otherwise it is 15%.

58. Withholding tax is 7.5% on royalties for technical services.

59. The 0% rate applies to interest paid to the Zambian government or local authority thereof or any agency or instrumentality (including a financial institution) wholly owned by that government or local authority.

The Italian Parliament is expected to ratify tax treaties with Azerbaijan, Belgium, Canada, Cuba, Gabon, Iran, Lebanon, Moldova, Mongolia, Qatar and San Marino.

The treaties with Congo and Kenya have been ratified but have not entered into force.

Negotiations and re-negotiations have been initiated with Austria, Jamaica, India, Ireland, Liberia, Mexico, United Kingdom and Trinidad and Tobago.

**Tax administration**

**Returns**

Corporate income tax returns must be filed by the end of the ninth month following the tax year-end.

The filing deadline for VAT returns is 30 September because VAT follows the calendar year. The filing deadline for withholding tax agent returns is 31 July for both the simplified withholding tax return and the ordinary withholding tax return.
**Italy**

**Payment of taxes**
For IRES and IRAP purposes the tax law provides for both advance payments and settlement payments. The advance payments are equal to the net tax payable for the previous tax period and are due during the tax period to which they refer. Advance payments are split into two instalments:

- 40% by the sixteenth of the sixth month following the tax year-end; and
- 60% by the end of the eleventh month following the tax year-end.

Settlement payments are due by the sixteenth day of the sixth month following the tax year-end to which they refer.

Missed and/or late payments of taxes of whatever kind and nature incur a penalty equal to 30% of the unpaid/late paid tax.

**VAT credit offset with other taxes**
From 2010 to offset a VAT credit against other taxes for an amount higher than EUR 10,000, it will be necessary to wait until the sixteenth of the month following the filing of the yearly VAT return on which the credit is shown.

Furthermore, in order to avoid abuse, taxpayers intending to offset a VAT credit for an amount greater than EUR 15,000 are required to ask their tax advisors or auditors to affix their signature to the VAT return, which is known as the “conformity mark”.

**Administrative penalties**
Failure to file a tax return implies a penalty ranging from 120% to 240% of the taxes due. Minimum penalties (ranging from EUR 258 to EUR 1,032) are applicable if no tax liability emerged in the return.

Tax return showing either a taxable income lower than the one assessed or a tax credit higher than those owed to the taxpayer (i.e., untrue tax return) implies a penalty ranging from 100% to 200% of the higher taxes ultimately due.

Omitted and/or late payments of taxes of whichever kind and nature imply a penalty equal to 30% of the unpaid/late paid tax.

Special rules apply where similar violations are repeated over various years.

**Statute of limitations**
The Italian tax authorities are entitled to make an assessment in relation to direct taxes (IRES and IRAP), VAT and withholding tax returns up to the end of the fourth calendar year following the year in which the tax return was filed. Under certain circumstances (e.g., no return filed or fraud giving rise to criminal law penalties) the above deadlines may be extended.

Tax disputes can be settled by accepting all the issues raised in the tax auditor’s report without any challenge and by paying the related tax and reduced penalties. A number of other options to avoid tax litigation are provided for by law.

Administrative checks on tax returns may be carried out within the year following that in which the tax return has been filed for larger companies having a yearly turnover in excess of EUR 300 million (turnover to be progressively decreased to EUR 100 million).
With limited exceptions, corporations that usually are in tax loss position will be subject to specific control.

**Other issues**

**Transfer pricing**
Income deriving from operations with non-resident corporations which directly or indirectly control the Italian entity, are controlled by the Italian entity or are controlled by the same corporation controlling the Italian entity, have to be valued on the basis of the normal value of the goods transferred, services rendered and services and good received, if an increase in taxable income derives there from. Possible reductions in taxable income as a result of the normal value rule are allowed only on the basis of mutual agreement procedures or the EU Arbitration Convention.

The normal value is the average price or consideration paid for goods and services of the same or similar type, carried on at free market conditions and at the same level of commerce, at the time and place in which the goods and services were purchased or performed. For the determination of the normal value reference should be made, to the extent possible, to the price list of the provider of goods or services, and, in their absence, to the price lists issued by the chamber of commerce and to professional tariffs, taking into account usual discounts.

**Other regulations**
Operating guidelines provided by Ministry of Finance were released in 1980 following the 1979 OECD Transfer Pricing Report. Also the 1995 OECD guidelines are considered as a reference and the basis for any mutual agreement or advanced pricing agreements (APA) procedures. However, they have not been incorporated as such yet into the Italian tax framework and, in some cases, local practice may vary from both the 1979 and the 1995 OECD positions.

New rules to reflect the OECD guidelines are expected to be issued.

**Burden of proof**
As a general principle the burden of proof lies with the Italian tax authorities. However, a taxpayer is expected to demonstrate the fairness of its inter-company transactions in the event of an assessment by the tax authorities.

Particular rules apply to cross-border transactions involving counterparties (including third parties) resident in tax havens.

**Adoption of IFRS and taxation**
The Italian tax law provides for two basic principles and some specific rules for taxation of a company adopting IAS/IFRS in the statutory financial statements:

- Derivation principle (“Principio della Derivazione”): the taxable base of companies is determined starting from the net income arising from the profit and loss, increased or decreased by items directly booked to equity pursuant to the application of IAS/IFRS. To such “rectified” income the general tax adjustments set forth by the Corporate Income Tax Law apply. In this respect, as exception to the general tax criteria, the accrual principle and the qualification and classification criteria stated by the IFRS are relevant for the calculation of the taxable base; and
Italy

- Neutrality principle ("Principio della Neutralità"): such principle aims to neutralise the effects deriving from the movement to IAS/IFRS (First Time Adoption – FTA). Conversely, such principle does not grant an equal treatment for companies adopting or not IAS/IFRS (in fact, specific rules are applicable only to IAS/IFRS adopters – for example, taxation of dividend on HFT securities, derivatives, etc.).

The following specific rules applicable to IAS adopters must be considered:

- Adjustments or recognitions of transactions made in equity are relevant for tax purposes, to the extent that such items are in compliance with general tax principles;
- For equity instruments the legal classification is prevailing over the accounting one (debt vs. equity classification);
- At certain conditions, unrealised profits and losses recognised in the profit and loss become taxable and deductible (e.g., fair value on securities other than AFS, HTM and participations, on derivatives transactions not concluded for hedging reasons, etc.);
- The tax treatment of the transactions between IFRS adopters and non-IFRS adopters, in relation to operations concluded between an IFRS adopter and a non-IFRS adopter, is based on the accounting principle adopted by each company (for example, financial leasing); and
- Depreciation and amortisation are permitted within the rates provided by the tax rules, independently by the amounts booked. In this respect, the abolition of the imperative systematic depreciation of the goodwill and its substitution by the goodwill’s review for impairment, does not affect the tax deduction of the goodwill amortisation that should be made for sole tax purposes.
Corporate taxes in Ivory Coast (Côte d’Ivoire)

Significant developments

There have been some significant tax and regulatory developments regarding corporate taxation in the past years.

Further information is provided in the following sections.

Taxes on corporate income

Tax on industrial and commercial profits in Côte d’Ivoire is levied at 25%, subject to a minimum tax. The minimum tax is based on total turnover and is calculated at the rate of 0.5% (banking activities, 0.15%; oil companies, 0.10%), with a minimum of CFAF 2 million and a maximum of CFAF 30 million.

Corporate residence

In Côte d’Ivoire, companies are considered resident in tax jurisdictions where they have a registered fixed establishment.

Other taxes

Value-added tax (VAT)
VAT is a non-cumulative tax levied on the sales of goods and services at the rate of 18%. Subject to certain restrictions, VAT is recoverable. The rate is reduced to 9% for milk and pasta products, which contain 100% durum wheat semolina.

Tax on banking operations (TOB)
A cumulative tax of 10% is levied on bank services rendered.

Special tax for equipment
A tax of 0.08% is calculated on the total turnover and is paid monthly.

Business franchise tax
The business franchise tax includes a “turnover tax” and a proportional tax. The “turnover tax” is calculated on the turnover at the rate of 0.5% with a maximum of CFAF 3 million and a minimum of CFAF 300,000. The proportional tax is based on the rental value of the professional office location (based on general office rents). The rate is 18.5%.
Ivory Coast (Côte d’Ivoire)

**Real-estate tax**
A real estate tax is imposed at the rate of:

- 1.5% for the undeveloped lands;
- 4% on land revenue; and
- 11% on the developed land or 15% when the built property is used by the company itself. The rate is reduced to 4% for unoccupied buildings.

In case of the transfer of property through a direct sale, taxes are assessed at the following rates: 10% for lease transfers; 10% or 7.5% for the sale of real estate; and 10% for the sale of businesses.

**Advance payment of property tax**
Property owners are required to withhold 15% of rentals, payable every fifteenth of the month to the tax authorities. This is an advance payment on the annual real estate tax by the owner of the estate property.

**Payroll tax**
Taxes are levied at the rates of 2.8% for local employees and 12% for expatriate employees on the total taxable remuneration, including salaries, benefits and benefits-in-kind.

**Registration taxes**
Registration of capital contributions is taxed, whether the capital or increase in capital is made in cash or in kind. The rate is 0.6% for contributions up to CFAF 5 billion and 0.2% for contributions over CFAF 5 billion, with a minimum of CFAF 18,000. Increases in capital by incorporation of reserves are taxed at 6%.

In the event of a capital increase through a merger, the increase in the share capital of the acquiring company is taxed at half the rate – 0.3% for amounts up to CFAF 5 billion and 0.1% for amounts over CFAF 5 billion.

**Stamp duty**
A direct tax is paid for any document subject to a registration procedure, for an acknowledgment of a cash payment and for bills of exchange.

**Tax on insurance premiums**
Insurance premiums are subject to tax as follows:

<table>
<thead>
<tr>
<th>Policy Type</th>
<th>Rate %</th>
</tr>
</thead>
<tbody>
<tr>
<td>Marine policies</td>
<td>7.0</td>
</tr>
<tr>
<td>Life policies</td>
<td>Exempted when contract's duration is more than three years</td>
</tr>
<tr>
<td>Fire policies</td>
<td>25.0</td>
</tr>
<tr>
<td>Health policies</td>
<td>8.0</td>
</tr>
<tr>
<td>Export credit insurance</td>
<td>0.1</td>
</tr>
<tr>
<td>Other (e.g., personal liability, transportation)</td>
<td>14.5</td>
</tr>
</tbody>
</table>

Premiums paid under commercial shipping insurance policies for maritime risks are exempt. The tax may be paid by the insurance company, its agent or the subscriber, when the subscriber pays the premiums directly abroad.
Ivory Coast (Côte d’Ivoire)

Social security contributions
Employers must contribute to the social security system (CNPS) at the following rates:

<table>
<thead>
<tr>
<th></th>
<th>%</th>
<th>Monthly ceiling (CFAF)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Family allowance</td>
<td>5.75</td>
<td>70,000</td>
</tr>
<tr>
<td>Work injury</td>
<td>2.0-5.0</td>
<td>70,000</td>
</tr>
<tr>
<td>Retirement pension</td>
<td>4.8</td>
<td>1,647,315</td>
</tr>
</tbody>
</table>

Tax for national reconstruction
The tax for national reconstruction was eliminated in May 2009.

Withholding tax (WHT) on public contracts
Any payment made by government bodies or public institutions for a contract for goods or services is subject to a 10% withholding tax, except the companies registered at the Directorate of Large Companies (Direction des Grandes Entreprises), with a minimum turnover over CFAF 1 billion. The tax is recoverable and may be applied to VAT and to income taxes due and withheld by employers. Contractors who do not have a permanent establishment in Côte d’Ivoire are not subject to this tax. Surplus tax payments and tax credits are refundable.

Contributions for the end of the crisis
This is a new tax enforced by FY2010 fiscal law. It is calculated at a rate of 3% on some expenses of entities which have CFAF 1 billion or more in turnover. The annual amount of the due tax is capped to CFAF 150,000,000, as per the discussions with the Government.

Withholding tax on small size businesses
The FY2010 financial law has created a 5% WHT on the remunerations paid to individual service providers registered under the forfeit and synthetic tax regimes.

Branch income
The tax rate for branch income is the same as that for corporate income. After-tax branch earnings are subject to a 12% tax (IRVM) calculated on 50% of the taxable profit. This is analogous to the WHT on dividends.

Income determination

Inventory valuation
Inventory is generally stated at the lower of cost or market value. Last-in, first-out (LIFO) and first-in, first-out (FIFO) are permitted. Book and tax conformity is required.

Capital gains
Capital gains are normally taxed at full corporate rates. However, the tax on capital gains, exclusive of recaptured depreciation, can be deferred if the gain is reinvested within three years.

Inter-company dividends
Inter-company dividends are included in taxable income at 50% of the net amount received (after 12% withholding tax). The exemption is increased to 95% for dividends
Ivory Coast (Côte d’Ivoire)

received from a subsidiary if a parent company domiciled in Côte d’Ivoire owns 10% of the subsidiary.

**Foreign income**

Resident corporations are taxed on their worldwide income, except for profits derived from business conducted through a permanent establishment (PE) outside Côte d’Ivoire. Since income derived from business conducted outside Côte d’Ivoire is not taxable, no tax credit is allowed. Interest and dividends from foreign sources are entitled to certain deductions (see “Other significant items”) to alleviate instances of double taxation. Subject to provisions of tax treaties, no deductions or tax credits are allowed for revenue from royalties and services.

**Stock dividends**

Stock dividends are unusual, but in the event they are declared, they are not taxable to the recipient.

**Other significant items**

Interest from loans and dividends is brought into taxable income at 50% of the net amount earned by the company. Dividends derived from subsidiaries are brought into taxable income at 5% of the net income earned.

**Deductions**

**Depreciation and depletion**

Depreciation is generally computed on a straight-line basis over the useful life of the asset (buildings, 20 years; automobiles, three years); accelerated depreciation is sometimes permitted for machinery. The following depreciation rates are generally accepted for tax purposes:

<table>
<thead>
<tr>
<th>Asset Type</th>
<th>Rate</th>
</tr>
</thead>
<tbody>
<tr>
<td>Buildings</td>
<td>5%</td>
</tr>
<tr>
<td>Machinery, equipment</td>
<td>20%, 10%, 8%</td>
</tr>
<tr>
<td>Office furniture</td>
<td>10%</td>
</tr>
<tr>
<td>Office equipment</td>
<td>20%</td>
</tr>
<tr>
<td>Vehicles</td>
<td>33.3%</td>
</tr>
<tr>
<td>Computing equipment</td>
<td>20% to 50%</td>
</tr>
</tbody>
</table>

A time coefficient is applied to the rate of depreciation to obtain the declining balance. Depreciation rates may be amended, but only after agreement with the tax authorities.

New plants and equipment may be depreciated at twice the normal rate in the first year of use, provided they are depreciated over at least six years. Under certain circumstances, buildings used for staff housing may be depreciated at 40% of cost in the first year. Annual depreciation must be booked to preserve tax deductibility. The whole or any part of the annual charge can then be deferred in annual accounts for fiscal years showing a tax loss. Recaptured depreciation is taxed at full rates. Tax and book conformity is obligatory.

Depletion allowances as such do not exist, but tax incentives are available for exploration to replace depleted natural reserves.
**Net operating losses**
Losses may be carried forward five years. Losses derived from depreciation can be carried forward indefinitely.

**Payments to foreign affiliates**
Reasonable royalties, interest, and management and service fees paid to foreign parent companies are tax deductible. However, the deductions should not exceed 5% of the turnover and 20% of the overhead. Otherwise, the portion exceeding the ceiling is not tax deductible; the onus is on the taxpayer to prove that expenses are justified and reflect real transactions.

**Other significant items**
1. Legal reserve: 10% of net profit must be transferred to a reserve for legal fees until the reserve equals 5% of the paid-up share capital.
2. To be tax deductible, provisions must relate to existing liability or loss. General reserves are not deductible.
3. Interest paid to shareholders may be deducted. The maximum interest rate allowed is related to the Banque Central des Etats de l’Afrique de l’Ouest (BCEAO) rate plus three points. The reimbursement of the loan must take place in the five years following the loan.
4. Fines and third party taxes borne by corporations are not tax deductible.

**Group taxation**
Group taxation is not permitted.

**Tax incentives**

**Inward investment**
Investment Law No. 95-620 of 3 August 1995 divides the country into two investment zones, offering incentives for up to five or eight years in each area.

The Investment Code provides for 100% tax exemption during the first three or six years (depending on the nature of the activity and the zone), then 50% and 25% progressively for the last two years of exemption. Exemption periods may be extended to complete a scheduled investment programme.

Incentives are divided into two programmes: “prior declaration” for investments of less than CFAF 500 million that create new activity and “prior agreement” for investments of CFAF 500 million or more that create new activity or develop an existing activity. Both programmes are handled by the Centre de Promotion des Investissements en Côte d’Ivoire (CEPICICI) and are open to all sectors except trade, public works, building construction, transportation, banking and insurance.

Prior declaration investments may be exempt from tax on corporate income and the business franchise tax. Prior agreement investments benefit from exemptions varying with the size and nature of the project, as follows.

1. Creating a new enterprise or a new activity in an existing enterprise:
   - Investments of CFAF 500 million to CFAF 2 billion may be exempt from tax on corporate income; business franchise tax; import duties and taxes (with the exception of a 5% tax on machinery, equipment and spare parts).
Ivory Coast (Côte d’Ivoire)

- Investments of more than CFAF 2 billion may be exempt from property tax, in addition to the above.

2. Developing an existing activity:
   - Investments of at least CFAF 500 million may be exempt from import duties and taxes (with the exception of a 5% tax on machinery, equipment and spare parts).

These incentives may not be combined with sector-specific investment programmes, such as those for mining and hydrocarbons.

**Capital investment**

With prior approval of the tax authorities and varying with geographical location, 35% to 40% of the total investment in fixed assets related to commercial, industrial or agricultural activity may be deducted from taxable income. The deduction is limited to 50% of taxable profits. The balance of deduction of the first year may be carried forward over the three following years.

**Export incentives**

No VAT is levied on export sales.

Sales and provisions of services made to export companies, which process certain farm products (cocoa, coffee, banana, hevea, palm tree oil), and realise at least 70% of their turnover from exports are free from VAT. The exemption is granted for the purpose of avoiding new cases of VAT credits in this line of business.

**Export incentives – mining industry**

During the exploration phase, investments may be exempt from payroll tax; VAT on goods and services; additional tax (on the sale of goods) on imports and purchases; all import taxes and duties including VAT on materials, machines and equipment used in research activities; and half of the registration duties applicable to in-kind or cash share-capital contributions.

During the production phase, mining activities may have a five-year exemption from corporate income tax and relief from all import duties, including VAT on recovered investments required for exploitation. In addition, they may be granted temporary admission of machines and equipment that facilitate research and exploitation. A tax on profit is levied as soon as investment funds are recovered. Mining enterprises may not combine these incentives with those of the Investment Code.

**Export incentives – petroleum service contractors**

A special and optional tax treatment applies to petroleum service contractors that meet established criteria. Corporate tax, distribution tax, payroll tax, income tax on salaries, and the tax on insurance premiums are calculated on the turnover of the contractor. The total taxes represent 5.636% of turnover. Standard rates apply for business franchise tax and social security contributions for local personnel. The exemption from customs duties and VAT for oil companies is extended to petroleum service contractors.
Ivory Coast (Côte d’Ivoire)

**Withholding taxes**

Withholding taxes (WHT) are levied as follows.

1. Impôt sur le revenu des valeurs mobilières (IRVM) – 12% or 18% on dividends and directors’ fees;
2. Impôt sur le revenu des créances (IRC) – 18% on interest payments, reduced to 13.5% (individuals) and 16.5% (businesses) on bank deposit interest. Foreign banks are subject to 18% tax on loan interest or 9% on equipment loans with minimum three-year terms;
3. Impôt sur les bénéfices non commerciaux (BNC) – 25% of 80% of revenues on royalties, license fees, and management and service fees paid by Ivorian companies to foreign companies (effective rate– 20% of net amount paid). Treaties with Belgium, Canada, France, Germany, Italy, Norway, Switzerland, and the United Kingdom provide a maximum BNC rate of 10% on royalties and Management fees (GB). The tax treaty between the member states of West African Economic and Monetary Union (UEMOA) provides a maximum BNC rate of 15%; and
4. Interest on certificates of deposit (bons de caisse) – 25%.

**Tax administration**

**Returns**

Companies are required by law to have a 31 December fiscal year-end. The corporate income tax due is returned together with annual financial statements according local generally accepted accounting principles. The deadline for the filing is 30 April for entities with more than CFAF 1 billion turnover, 30 May for entities with less than CFAF 1 billion turnover and 30 June for the entities under the Synthetic tax regime.

**Payment of tax**

Tax withheld must be rendered to the tax authorities by the fifteenth of each month. Other taxes are rendered on varying dates.

Significant developments

Major changes were effected to the rules governing the taxation of ordinary and preference dividends. Historically, persons in receipt of dividends (whether ordinary or preference) derived from a company listed on the Jamaica Stock Exchange (JSE) suffered tax at the rate of zero percent on such dividend income. Effective 1 January 2009, ordinary dividends derived by Jamaican tax residents from resident companies are also taxed at a zero rate. This tax-free treatment does not extend to non-resident shareholders in receipt of dividends from resident companies and accordingly, all dividends paid to non-resident shareholders are now fully liable to income tax thereon (subject to any treaty protection or incentive relief available).

Subject to certain conditions being met, a company may claim an income tax deduction in respect of preference dividends paid during the year of assessment. The recipient of the dividend however, will be subject to income tax at the default rate of 33 1/3% in the case of a company and 25% in the case of an individual. To the extent that these preference dividends do not qualify for this income tax deduction, they will be treated in a similar manner to ordinary dividends (i.e., they will be tax-free in the hands of Jamaican resident shareholders).

Increase in special capital allowances

As part of a stimulus package, Jamaica increased the special capital allowances available to capital expenditure on certain machinery incurred by the owner/operator of a “qualifying business” from 50% to 100% of the capital expenditure. These new rates became effective 1 January 2010 and the operator should secure approval in order to claim allowances at these rates.

Increase in the general consumption tax rate

The rate of general consumption tax (GCT) was increased to 17.5% from 1 January 2010. This new rate applies generally to all goods and services taxable at the standard rate. Within the telecommunications industry, the standard rate of 25% applies to the provision of telephone services.

Imposition of GCT on electricity consumption

Prior to 2010, the supply of electricity to the public was exempt from GCT. The following measures now apply to the consumption of electricity both by residents and commercial users:

1. Supplies of electricity to residential customers up to 200KwH per month shall be zero-rated for GCT purposes; and
2. Supplies of electricity to residential customers (in excess of 200KwH per month) and to commercial or industrial consumers shall be subject to GCT at the rate of 10%.

**Taxes on corporate income**

Income tax at a basis rate of 33¹/³% is payable by most corporations, including Jamaican branches of foreign corporations. Building societies (similar to savings and loans) are taxed at the rate of 30% on their profits.

The income of certain organisations is specifically exempt from income tax. These include pension and superannuation funds and charitable organisations approved by the Commissioner.

There are no other local taxes on corporate income.

**Corporate residence**

A corporation, wherever incorporated, is resident in Jamaica if the central management and control of its business is exercised there. Normally, this is the case if meetings of directors and shareholders are held in Jamaica and major policy decisions of the corporation are made there.

**Other taxes**

**Annual fee**

A fee ranging from JAD 1,000 to JAD 35,000 is payable on or before 1 September, depending on the aggregate value of the company's assets. The minimum fee and maximum fee is payable where the aggregate value of the assets is less than JAD 50,000 and greater than JAD 100 million, respectively.

**Consumption taxes, custom duties**

The general consumption tax (GCT) is a value-added tax (VAT). The standard rate is 17.5%. Higher rates are applicable to some goods and services (tobacco products, liquor, motor vehicles, fuels and telephone charges). The list of items and services exempt from GCT includes a wide range of grocery and household items. Certain specified drugs, as well as other items and services, are zero-rated. GCT is also charged on imported services, hence where a taxable activity consists of imported services by a person who is not resident in Jamaica, the recipient of those services shall be deemed to be the registered taxpayer, and shall pay the tax chargeable in respect of the supply. This may be available as a credit in some cases against the tax payable by the recipient of the service.

Lower rates may be applicable to some sectors, such as hotels and other businesses in the tourism sector, which is taxed at an effective rate of approximately 10% as of 1 April 2010, rather than the standard rate of 17.5%.

In addition to normal customs duties, a user fee of 2% and an environmental levy of 0.5% are imposed on the value of imports. Also with effect from 1 January 2010, an additional 5% GCT has been levied on the commercial importation of goods subject to GCT. Certain categories of imports are however excluded from this advance GCT charge.
Real estate tax
All land in Jamaica is valued on the “site value” or “unimproved value.” Owners of properties valued at JAD 300,000 or less pay a flat rate of JAD 1,000. Where the property exceeds this value, tax is payable at 0.75% of the excess over the threshold. These new rates became effective 1 April 2010.

Construction operations levy
A levy of 2% of the gross amount is payable on contracts relating to construction and tillage operations. The levy is in the nature of tax withheld at source and must be deducted by the taxpayer from the gross payment for the construction or tillage operations and paid to the Collector of Taxes within 14 days of the month in which the gross payments are made.

The levy paid is allowable as a credit against the income tax liability of the contractor.

Branch income
Branch income is taxed at the same rate as that of local corporations and on a similar basis. The transfer of profits to head office is subject to a withholding tax of 33\(\frac{1}{3}\)% or at a lower treaty rate, where applicable.

A branch operation, irrespective of the nature of its business activities, is subject to Jamaican tax on income derived from the island and elsewhere to the extent remitted to the island. In computing the income for tax purposes, expenses incurred outside of Jamaica, wholly and exclusively for the purpose of the branch's trade are deductible, including a reasonable proportion of head office expenses.

Transactions between the branch, its head office and affiliates should be at arm's-length values.

Income determination

Inventory valuation
Inventories are valued at the lower of cost or market value. The Commissioner of Taxpayer Audit & Assessment Department (TAAD) has made no pronouncement, but last-in, first-out (LIFO) is not generally permitted.

Any method of valuation that accords with standard accounting practice is acceptable for tax purposes, provided it is consistently applied at the beginning and end of the accounting period and it is not in contravention of the Income Tax Act.

Capital gains
There is no tax on capital gains. There is, however, a transfer tax of 4% of the sales proceeds (limited to 37.5% of the capital gain payable) on the transfer of land, building, securities, and shares. There is also stamp duty of 1% payable on the transfer/disposal of shares, and 3% for real property sold/transferred. Transactions on the Jamaica Stock Exchange are exempt.

Inter-company dividends
Inter-company (ordinary) dividends paid out of profits of a company resident in Jamaica to a shareholder resident in Jamaica can be paid without further tax.
Income tax is withheld at source on dividends paid to a non-resident shareholder. Such dividends paid are taxed at the rate of 33\(\frac{1}{3}\)% and 25% if paid to corporations and individuals, respectively. Lower rates of withholding are possible provided that the recipient is resident in a country that has concluded a double taxation agreement with Jamaica.

The term “franked income” refers to dividends received by a corporation subject to income tax, resident in the island, from which tax has been deducted at source. Where such dividends are received by a Jamaican resident company, they may be paid to that company’s shareholders and all the way up the chain of companies without further deduction of tax, since the very first deduction of tax settles the tax liabilities of all subsequent recipients of the dividends.

However, the revenue authorities do not issue refunds or recognise a credit in respect of the underlying tax attributable to franked income.

**Foreign income**

A resident corporation is taxable on its worldwide income. Avoidance of double taxation is achieved by credits under tax treaties or, in the case of most Commonwealth countries, under the general Income Tax Act itself. Where recourse cannot be had to either of these, partial relief is granted by a deduction against income for the foreign tax.

**Stock dividends**

Stock dividend is not addressed specifically by our Income Tax Act. However, dividends paid, whether in cash, shares or a combination is generally subject to income tax. Where a dividend payment is not in money, it is treated as a net distribution after the deduction of income tax. Resident shareholders in receipt of stock dividends will be subject to income tax at the rate of 0%. Non-resident shareholders in receipt of stock dividends will be subject to income tax at the rate of 33\(\frac{1}{3}\)% in the case of corporations and 25% in the case of individuals.

**Deductions**

**Depreciation and depletion**

Depreciation is generally computed on the reducing balance basis over the useful life of the asset at specified rates. An election may be made for machinery and equipment to be depreciated at higher rates on the straight-line basis. Provision also exists for increased depreciation on machinery and equipment used for more than one shift in certain qualifying industries. Capital gain on depreciable property is not taxed. However, a recharge limited to the extent of the depreciation allowed (balancing charge) is taxable. Machinery and plants acquired by a “qualifying business” may be depreciated over one year instead of the estimated useful life of the asset. A qualifying business is one so designated by the Ministry of Industry Investment & Commerce.

Tax depreciation is not required to conform to book depreciation.

**Net operating losses**

Losses incurred may be carried forward indefinitely until fully utilised. There are provisions designed to disallow the deduction of such losses where the company that has accumulated them is sold under certain circumstances.
Payments to foreign affiliates
Royalties, management fees and interest charges paid to foreign affiliates are deductible to the extent that these payments are made at arm's-length rates. Withholding tax should be paid in respect of all services, unless exempted under a treaty.

Real estate taxes
Taxes on real estate from which income is derived is deductible.

Other significant items
Approved donations (not exceeding 5% of taxable income) to certain qualified charities and educational institutions are deductible.

Group taxation
Group taxation is not permitted in Jamaica.

Tax incentives
A certain number of incentive laws grant certain approved industries relief from taxation for a specified number of years. The capital may be either derived from local or foreign sources. Tax relief is given to resident shareholders on dividends paid out of tax-free profits. Relief to non-resident shareholders is generally limited to the applicable foreign tax rate.

Specific incentives are set out under the following acts:

• The Export Industry (Encouragement) Act;
• The Industrial Incentives Act;
• The Industrial Incentives (Factory Construction) Act;
• The Jamaica Export Free Zones Act;
• The Hotel Incentives Act;
• The Resort Cottages Incentives Act;
• The International Finance Companies (Income Tax Relief) Act;
• The Income Tax Act – (Agricultural & Venture Capital Incentives);
• The Urban Renewal (Tax Relief) Act 1995;
• The Motion Picture Encouragement Act;
• The Shipping Act; and
• The Factory Construction Act.

The incentives offered under the Industrial Incentives Act, the Export Industry Incentives Act and those available for the production of goods under the Jamaica Export Free Zones Act are to be phased out, given Jamaica's commitments under the World Trade Organization (WTO) agreement. This was expected to have been phased out by 1 January 2003. An extension of time has been granted for implementation until the end of 2013 with a two year phase-out period. In the meantime, approvals are being granted.

See Depreciation section for depreciation incentives available in the Income Tax Act. In addition to the aforementioned incentives, certain qualifying industries are able to write-off, over a period of time, 120% of the cost of machinery and equipment, excluding private motor vehicles.
Non-residents who place deposits with Jamaican banks can earn interest free of Jamaican tax in certain circumstances. The deposits may be designated in hard currency or Jamaican dollars.

Certain tax benefits accrue to employees and employers in respect of contributions made to an approved Employee Share Ownership Plan (ESOP) as well as the allocation of shares from such plans.

**Withholding taxes (WHT)**

The Jamaican Income Tax Act refers to deduction at source and not to withholding. The following references are to deduction at source. If it is proved that this exceeds the tax actually payable, refunds are made.

“Prescribed Persons” are required to withhold tax at source at a rate of 25% on interest income earned on investment instruments (subject to any lower rate as prescribed in a double taxation treaty). The Income Tax Act has been amended to provide a wider definition of the term “interest.” “Prescribed persons” are entities defined as such. They include the Accountant General; banks operating under the Banking Act or the Bank of Jamaica Act; institutions operating under the Financial Institutions Act; building societies, societies registered under the Industrial and Provident Societies Act, unless certain conditions are met; the Ministry of Finance & the Public Service; life insurance companies; companies registered under the Companies Act in which the government or an agency of the government holds more than 50% of the ordinary shares and which issues interest bearing securities; issuers of commercial paper; unit trust management companies; and any person who is connected with any of the persons mentioned above (with the exception of the Accountant General).

Generally, all withholding taxes, including taxes withheld from dividend, interest, royalties, and fees must be remitted to the Inland Revenue within 14 days of the end of the month in which the payment is made.

Notes

The numbers in parentheses refer to the following numbered notes:

1. No tax is deducted where the dividends are paid out of franked income.
2. No withholding tax is applicable where the interest is paid by a local bank or financial institution to an approved overseas organisation, that is, a foreign bank or financial institution to an approved overseas organisation, that is, a foreign bank or financial institution approved by the Ministry of Finance & the Public Service.
3. Tax is withheld at the rate of 0% as of 1 January 2010 where ordinary dividend is paid by a company resident in Jamaica to a resident shareholder.
4. Tax is deducted from interest paid to Jamaican residents if payment is made by a prescribed person.
5. Rates apply only to specified member states.
6. The lower treaty rates do not apply if the recipient has a permanent establishment in the other territory that is “effectively connected” with the company paying the dividend.
7. A rate of 15% applies to an individual regardless of shareholding.
8. Reduced to 10% if received by a bank recognised as a banking institution under the laws of that state.
9. A rate of 22.5% applies to an individual regardless of the shareholding.
10. Nil in the absence of a permanent establishment.

A withholding tax rate of 25% is required to be withheld in respect of interest paid or credited by prescribed persons. However, certain categories of interest income earned on long-term savings accounts (LSAs) were made exempt from tax. They are as follows:

- Interest paid or credited in respect of investments or deposits made by individuals with prescribed persons if:
  - The deposit remains a minimum of five years without any withdrawal from the principal sum invested;
  - The deposit or investment (other than interest accrued or credited) does not exceed JAD 1 million dollars in any year;
  - The account is not transferable, except on the death or bankruptcy of the depositor or investor; and
  - Not more than 75% of the interest accrued in any year is withdrawn during the year.
- Benefits derived from investments in certain life insurance policies may also be exempt from income tax if specified criteria are satisfied.
**Tax administration**

Jamaica has established five taxation departments to handle tax administration.

1. The Tax Administration Services Department (TASD), which deals with the administrative issues and provides legal support to the other departments.
2. The Tax Payer Audit and Assessment Department (TAAD), which deals with the audit and assessment functions of income tax, general consumption tax (GCT/VAT), stamp duty and transfer tax.
3. The Taxpayer Appeals Department (TAD), which processes appeals to decisions made by Tax Commissioners.
4. The Customs Department, which administers taxes at the port of entry.
5. The Inland Revenue Department, which deals with all compliance and tax collection functions.

There is also a Financial Investigations Division in the Ministry of Finance which investigates customs breaches and fraudulent acts in respect of the various tax acts.

**Returns**

A corporation is subject to tax on its income for a calendar year. Where, however, the Commissioner of Income Tax is satisfied that a corporation normally prepares financial statements to a date other than 31 December, the company may be permitted to use the profits of its own financial year rather than the calendar year as the basis of assessment.

**Payment of tax**

The balance of income tax payable for a taxation year, after deduction of the instalments of estimated tax, is due on 15 March of the following year. It is the corporation’s responsibility to determine the liability and settle it with the tax authorities. Quarterly instalments are based on an estimate of the year’s liability or the actual tax payable for the previous year. Income tax returns are due for filing by 15 March in the year following the year of assessment.

Significant developments

The main changes in Japanese corporate tax system for the year 2010 are as follows:

- A new group taxation regime was enacted for domestic companies (“group companies”) which are wholly owned by either a domestic company, foreign company or individual. Under this new regime, for example, the recognition of capital gains or losses from the transfer of certain assets between group companies is deferred until the asset is transferred to a non-group company (this rule will apply on or after 1 October 2010). Meanwhile, a group company that would otherwise qualify as a small and medium enterprise (SME) on a stand-alone basis is not eligible for the aforementioned benefits (e.g., reduced corporate tax rate, preferable allowable ratios for deductible portion of bad debt provisions, partial deductibility of entertainment expenses, carryback of tax losses, etc.) if the parent company of the group has paid-in capital of JPY 500 million or more.

- Several rules of the consolidated tax regime were amended. An important amendment states that pre-consolidation tax losses of a subsidiary can be carried forward into a consolidated tax group but may only be offset against taxable income of the subsidiary.

- Anti-tax haven controlled foreign corporation (CFC) rules are amended as follows:
  - The minimum effective tax rate for applying this rule is lowered from 25% to 20%;
  - The threshold of stock ownership which a taxpayer is required to own in a CFC is increased from 5% to 10%;
  - The holding of equity securities is disregarded on the business purpose test for the application of active business exemption where the CFC qualifies as a regional headquarters corporation; and
  - Some types of non-operating income derived by a CFC that qualifies for the active business exemption is included in the calculation of taxable income.

Taxes on corporate income

Corporation tax

The corporate tax burden (the effective tax rate) adds up from 40.87% to 42.05%, depending on the size of company. The rates are as follows:

*Note: The rates are subject to change.
First JPY 8,000,000 per annum

– Fiscal year ending on and before 31 March 2009 ........................................ 22.0
– Fiscal year ending from 1 April 2009 to 31 March 2011 ................................. 18.0
Over JPY 8,000,000 per annum ........................................................................ 30.0

*Except for a company wholly owned by the company which has paid-in capital of JPY 500 million or more.

**Enterprise tax (and special local corporate tax)**
The enterprise tax is imposed on the corporation’s income allocated to each prefecture. (Allocation generally is made on the basis of the number of employees.)

Based on FY2008 tax reform, the enterprise tax has been reduced and a national tax called ‘Special Local Corporate Tax’ has been introduced for fiscal year starting on or after 1 October 2008.

The standard rates of the enterprise tax, including the Special Local Corporate Tax are shown below.

<table>
<thead>
<tr>
<th>Taxable base</th>
<th>Fiscal year starting before 1 October 2008</th>
<th>Fiscal year starting on and after 1 October 2008</th>
<th>Special local corporate tax</th>
</tr>
</thead>
<tbody>
<tr>
<td>First JPY 4,000,000 per annum</td>
<td>5.0%</td>
<td>2.7%</td>
<td>81% of the current enterprise tax (see the immediate left column)</td>
</tr>
<tr>
<td>Next JPY 4,000,000 per annum</td>
<td>7.3%</td>
<td>4.0%</td>
<td></td>
</tr>
<tr>
<td>Over JPY 8,000,000 per annum</td>
<td>9.6%</td>
<td>5.3%</td>
<td></td>
</tr>
</tbody>
</table>

If the paid-in capital of a corporation is JPY 10 million or more and the corporation has places of business in more than two prefectures, the graduated rates above would not be applicable.

For utilities and insurance companies, the standard tax rate is shown as follows:

<table>
<thead>
<tr>
<th>Taxable base</th>
<th>Fiscal year starting before 1 October 2008</th>
<th>Fiscal year starting on and after 1 October 2008</th>
<th>Special local corporate tax</th>
</tr>
</thead>
<tbody>
<tr>
<td>Net revenue (net utility charges or net insurance premiums)</td>
<td>1.3%</td>
<td>0.7%</td>
<td>81% of the current enterprise tax (see the immediate left column)</td>
</tr>
</tbody>
</table>

In addition to the above enterprise tax, a “size-based” enterprise tax (Gaikei Hyojun Kazei) is applied to the company whose paid-in capital is more than JPY 100 million as of the year end. Factors such as the size of a corporation’s personnel costs and its capital will determine the additional amount of tax payable, whereas, the existing profit-based enterprise tax will also continue to apply at the below tax rates. Therefore, a loss company in Japan may be required to pay tax based on value-added activities and the corporation’s paid-in capital. The applicable standard rates are shown as follows:
**Japan**

</tr>
</tbody>
</table>

**Inhabitants tax**

The inhabitant's tax is imposed on the corporation’s income allocated to each prefecture and city (municipal borough). Allocation generally is made on the basis of the number of employees, in the same way with the enterprise tax above.

The standard tax rate is 5% as the prefecture tax and 12.3% as the municipal tax. It is allowed to increase the tax rate, up to 6% for the prefecture tax and up to 14.7% for the municipal tax, depending on the determination of each local government.

In addition to the above, the inhabitant’s tax is imposed on a per capita basis, in the range from JPY 70,000 to JPY 3,800,000.

**Corporate residence**

A company incorporated under the laws of Japan is a domestic corporation. The nationality of its shareholders or place of central management is not pertinent.

A corporation other than a domestic corporation is regarded as a foreign corporation.

A domestic corporation is taxed on its worldwide income. Meanwhile, a foreign corporation is taxed only on its Japan sourced income.

**Other taxes**

**Family corporation tax**

If an individual shareholder together with their family members own, either directly or indirectly, more than 50% of the total issued shares or voting rights of a Japanese corporation, the corporation is a family corporation (with exception for corporations with paid in capital of JPY 100 million or less) and it is subject to the family corporation tax in addition to the corporation tax.

A family corporation is liable for an additional tax at the rates shown below on undistributed current earnings in excess of the specified limits.

<table>

Japan

Consumption tax
Consumption tax (value-added tax) is levied when a business enterprise transfers goods, provides services or goods are imported in Japan. The applicable rate is 5%. Exports and certain services to non-residents are taxed at a zero rate. Specified transactions such as sales or lease of land, sales of securities and provision of public services are not subject to taxation. Consumption tax paid by the business enterprise shall be refundable by filing the consumption tax return to the extent that such transaction is recorded in the accounting book.

Business premises tax
This tax is levied and designated by each city in Japan such as Tokyo, Osaka, Nagoya, Fukuoka and other cities with a population of more than 300,000. A company that uses business premises in excess of 1,000 square metres and/or has more than 100 employees in a designated city is responsible to pay this tax based on the usage of the business (JPY 600 per square metre) and gross payroll (0.25% of gross payroll).

Fixed assets tax
The annual fixed assets tax is levied by the local tax authorities on real property and depreciable fixed assets used for business purposes. Real property is taxed at 1.7% (standard rate including city planning tax) of the value appraised by the local tax authorities. The depreciable fixed assets tax is assessed at 1.4% of cost after statutory depreciation.

Stamp duty
A stamp duty is levied on certain documents prepared in Japan. The tax amount is basically determined depending on the amount stated in the document.

Registration and license tax
Registration and license tax is levied where certain property is registered at the rate from 0.2% to 2% of taxable basis. The taxable basis varies with the subjects, e.g., the amount of capital for a company, and the amount of the estimated value by local tax authorities for real estate.

Customs duty
A customs duty is levied on imported goods based on the custom tariff table.

Branch income
Branch profits are taxed the same way as for corporate profits. However, the family corporation tax does not apply to a branch of a foreign corporation. In addition, no withholding tax is imposed on the repatriation of branch profits to the home office.

Income determination
General
The taxable income of a corporation is the aggregate income from all sources. There is no specific requirement to differentiate between the types of income. In principle, accounting for tax purposes follows generally accepted accounting principles in Japan, and income of a corporation is determined on an accrual basis.
**Inventory valuation**
Inventory cost should be determined by applying one of the following methods accepted for corporate tax purposes which includes actual individual cost, first-in, first-out (FIFO), weighted average, moving average, most recent retail, selling price reduction and lower of cost or market.

**Capital gains**
Capital gains and losses are classified as ordinary income and losses respectively.

Under certain circumstances, such as qualified reinvestment, exchange property to mention a few, taxes generally levied on capital gains may be deferred (rollover relief) as long as certain requirements are met. A special relief is available in the case of expropriation of real property by either the national or local government.

The recognition of capital gains or losses from the transfer of certain assets between group companies will be deferred until the asset is transferred to another group company or a non-group company (this rule will apply on or after 1 October 2010).

**Inter-company dividends**
Dividends received from a Japanese corporation are excluded from taxable income for corporate income tax purposes, provided that the recipient corporation owns 25% or more of the shares in the dividend-paying corporation. If a corporation owns less than 25% of the shares in the dividend-paying corporation, 50% of the dividends received from the dividend-paying corporation are excluded from taxable income.

An interest expense which is allocable as an investment cost of the shares that generate the dividend income (as defined above) effectively reduces the amount of dividend income. Note that this rule is not applicable to the dividends between 100% group companies.

The withholding tax for dividends is applicable at a rate of 7% (15% on and after 1 January 2012) or 20% depending on the type of stock from which the dividends were received and a tax credit may also be available for such withholding taxes.

**Exemption of foreign dividends**
95% of a dividend received by a company from a foreign company in which it has held at least 25% of the outstanding shares for a continuous period of six months or more, ending on the date on which the dividend is declared, can be excluded from the company's taxable income.

If the foreign company is resident in a country with which Japan has concluded a tax treaty for the avoidance of double taxation, and such treaty provides for the allowance of an indirect foreign tax credit for taxes paid by the foreign company on the profits out of which the dividend is paid where the company holds a certain percentage of the foreign company's outstanding shares (e.g., 10% based on the tax treaty between the US and Japan), that percentage will apply for the purpose of determining the availability of the above exemption to the extent that it is lower than 25%.

**Foreign income**
A Japanese corporation is subject to Japanese corporate income taxes on its worldwide income. However, Japanese corporations are allowed to claim a tax credit against the corporation and inhabitants taxes for foreign income taxes paid directly.
Based on the foreign dividend exemption system, as described in the *Exemption of foreign dividends section*, the indirect foreign tax credit system was repealed in 2009; any potential double taxation should be eliminated. Certain transitional measures were provided.

Foreign tax credit is not applicable for enterprise tax purposes, while foreign branch income attributable to business executed outside Japan is exempt from the enterprise tax.

Undistributed profit of a foreign subsidiary (i.e., CFCs) as well as overseas trusts located in a tax haven is included in its Japanese parent company’s taxable income under certain conditions. Please note that a dividend paid by CFCs is not deductible when calculating the undistributed income.

Tax havens are defined as certain countries or territories that do not impose corporate income tax or that tax the income of a foreign subsidiary at a rate of 20% or less. And a Japanese corporation owning a 10% or more direct or indirect interest in a CFC would be required to include in its gross income, its pro-rata share of the taxable retained earnings of the CFC.

**Deductions**

**Net operating losses**
For corporate income tax and enterprise tax purposes (indirectly for inhabitants tax purposes), tax loss can be carried forward to offset future income for seven years.

When there is a change in ownership followed by certain events, such as abolish or drastic change in the business within a five-year period since business acquisition, the use of tax loss is limited.

Carryback of tax loss generally is available for one year for national corporation tax purposes. Currently, this carryback rule generally is suspended until the fiscal year ending until 31 March 2012. But for a small- or medium-sized company, defined as a company with the stated capital of JPY 100 million or less (except for a company wholly owned by the company which has paid-in capital of JPY 500 million or more after the group taxation regime is effective), it can be applied to the tax loss recognised in the fiscal year ending on or after 1 February 2009.

No carryback of losses is allowed for enterprise tax and inhabitants tax.

**Taxes**
The enterprise tax and business promises tax are deductible in the calculation of the taxable income for corporate tax purposes, when it is paid. However, corporate tax and inhabitants tax are not deductible. Fixed assets tax and other taxes are deductible, when it is assessed. Foreign income taxes also may be deductible if the Japanese corporation does not elect to claim a foreign tax credit.

**Other significant items**
Other deductions to arrive at final taxable income are listed as follows:

1. Entertainment expenses – in principle, entertainment expenses are not deductible for tax purposes. However, a corporation with paid-in capital of JPY 100 million
or less (except for a company wholly owned by the company which has paid-in capital of JPY 500 million or more after the group taxation regime is effective) may take a tax deduction up to the smaller of 90% of the actual disbursement for the entertainment expense or JPY 3.6 million (90% of JPY 4 million) for the fiscal year beginning on or after 1 April 2003 and before 31 March 2009. For the fiscal year beginning after 1 April 2009, such a corporation may take a tax deduction up to the smaller of 90% of the actual disbursement for the entertainment expense or JPY 5.4 million (90% of JPY 6 million). With regard to the expenses for eating and drinking, it is allowed to deduct up to JPY 5,000 per person for tax purposes.

2. Charitable contributions – except for certain designated donations, the tax deduction for charitable contributions is limited to the sum of 1.25% of certain taxable income plus 0.125% of paid-in capital and capital surplus. Donations subject to this limitation include economic benefits considered to be given as a subsidy. Donations to foreign affiliates are not deductible fully. In the case that a donation occurs between group companies that are wholly owned by a corporation (domestic or foreign), there will be no tax implications for either the donor or donee, i.e., no deduction for the donor and no taxation for the donee. This rule will apply on or after 1 October 2010.

3. Reserves – reserves recorded in the books of accounts, except for reserves for doubtful receivables and return of goods not sold, are not deductible for corporate tax purposes.
   a. Reserve for doubtful receivables: The limitation consists of two components: 1) an estimate of irrecoverable amounts from a debtor, and 2) a calculation of the limit in the aggregate based on either the actual historical bad debt percentage or statutory percentage (it is reduced for large corporations), excluding the irrecoverable amount of receivable in 1 above.
   b. Reserve for return of goods not sold: This reserve is available to corporations such as publishers, wholesalers of books and others, provided that the corporation sells the merchandise under an unconditional repurchase agreement.

4. Directors’ remuneration – the remuneration paid to directors is deductible only in the three cases:
   a. Fixed monthly payments;
   b. Fixed payments in accordance with an advance notice to the tax office; or
   c. Performance bonuses paid in proportion to the company's earnings to directors who engage in the operation of the company's business, to the extent that certain requirements are met.

If the amount of remuneration is deemed unreasonable by the tax authority, only the reasonable amount is deductible for tax purposes.

5. Thin capitalisation rules – the interest paid on the debt to controlling foreign shareholders is disallowed to the extent the average balance of debt on which that interest is paid is more than three times the equity of controlling foreign shareholders.

Group taxation

Consolidated tax regime
Under the consolidated tax regime, a consolidated group can report and pay national corporate income tax on a consolidated basis. A consolidated group be formed by the Japanese parent company and its 100% owned Japanese subsidiaries (directly or indirectly). The taxpayer may file an application to elect the consolidated group filing for tax purposes, but the election must include all of the parent’s eligible
Japan

subsidiaries. Once the election is made, the consolidated filing, in principle, cannot be revoked unless there is a specific event, such as an ownership change that causes the qualifying conditions of a consolidated filing to fail, or an application to discontinue the consolidated group has been approved by the Commissioner of the National Tax Agency (NTA).

The taxable income of the consolidated group is computed on a consolidated basis by aggregating the taxable income or losses of each member of the consolidated group followed by the consolidation adjustments. Profits from intra-group transactions, except for transfer of certain assets as defined, should be included in the aggregate taxable income. Gains or losses from the intra-group transfer of certain assets would be deferred.

Pre-consolidation tax losses of a certain subsidiary can be carried forward into a consolidated tax group but may only be offset against taxable income of the subsidiary for the calculation of a consolidation income on or after 1 October 2010.

The consolidated national corporate income tax liability is determined by applying the corporate income tax rate to the consolidated taxable income and adjusted for consolidated tax credits. The total tax liabilities would be allocated back to each member company. The parent company files the consolidated return and pays the national corporate income tax for the group; however, each member company remains jointly and severally liable for the consolidated group's total national corporate income tax liability.

Local corporate income taxes levied on member companies would be paid on a separate company basis, but the amounts of local tax payable may be effected because of the consolidated filing.

**Group taxation regime**

Based on the FY 2010 tax reform, a new taxation regime has been introduced, aside from the consolidation tax regime above. This new regime is applicable to domestic companies (“group companies”) that are wholly owned by either a domestic company, foreign company or individual, and automatically applies to group companies.

The key points of this regime are summarised as below:

- The recognition of capital gains or losses from the transfer of certain assets (including the transfer of assets as a result of a non-qualified or taxable merger) between group companies is deferred until the asset is transferred to another group company or a non-group company. The scope of assets is the same as that under the tax consolidation system i.e., fixed assets, land, securities, monetary receivables and deferred expenses (excluding securities for trading purposes and assets with a book value of less than JPY 10 million).

- Where a donation occurs between group companies, there is no tax implications for either the donor or donee, i.e., no deduction for the donor and no taxation for the donee. Note that this treatment is not applied to the group company owned by individuals. This is consistent with the treatment of a donation between members of a consolidated tax group.

- A dividend received from a group company can be fully excluded from taxable income without any reduction for allocable interest expense. This is consistent with the treatment of dividends between members of a consolidated tax group.
Meanwhile, a group company that would otherwise qualify as a SME on a stand-alone basis is not eligible for the aforementioned benefits (e.g., reduced corporate tax rate, preferable allowable ratios for deductible portion of bad debt provisions, partial deductibility of entertainment expenses, carryback of tax losses, etc.) if the parent company of the group has paid-in capital of JPY 500 million or more.

The above new group taxation regime is effective on 1 October 2010.

**Tax incentives**

**Tax credit for research and development (R&D) cost**
The tax credit for R&D cost is calculated based on gross R&D cost. The limitation of credit is determined on the certain portion of the corporation tax liability, as follows:

- For the fiscal year ending on or before 31 March 2009: 20% of the corporation tax liability.
- For the fiscal year beginning for the period 1 April 2009 to 31 March 2011: 30% of the corporation tax liability.

In addition to R&D credit, for tax years beginning for the period 1 April 2008 to 31 March 2012, the taxpayer may claim additional tax credits based on incremental R&D expense or excess R&D cost over sales described as follows:

1. 5% of the excess R&D costs over the annual average of R&D costs for the last three years; or
2. Excess R&D costs over 10% of the average sales amount times tax credit ratio*

\[ \text{Tax credit ratio} = \left( \frac{\text{R&D costs}}{\text{average sales}} - 10\% \right) \times 0.2 \]

In the case that the amount of credit exceed 20% (or 30%) of the corporation tax liabilities discussed above and cannot be used in the year, this unused amount can be carried forward for one year.

**Special tax credit for staff training expenses**
SMEs that applied to file “blue form” tax returns under certain conditions (see *Returns under the Tax administration section*) are allowed to claim a tax credit against the corporation’s income tax liability for certain staff training expenses for fiscal years beginning during the period 1 April 2008 to 31 March 2011.

The amount of tax credit is calculated using the tax credit rate for staff training expenses. The range of the tax credit rate is between 8% and 12%, depending upon the percentage of training expenses over the total labour costs.

**Special tax treatment for investment in certain equipment**
SMEs filing a blue tax return may elect, under certain conditions, to claim accelerated depreciation of 30% of the base acquisition cost or a special tax credit equivalent to 7% of the base acquisition cost on designated equipment to the extent that it is acquired by 31 March 2012. The maximum tax credit is limited to 20% of the taxpayers’ corporate tax liability.
**Japan**

**Withholding taxes (WHT)**

**Tax treaty network**

As of 31 March 2010, Japan had entered into 47 tax treaties with 58 countries. Companies making certain payments are required to withhold income taxes using the following rates:

<table>

Notes

The numbers in parentheses above refer to the following notes:

The applicable treaty rates are effective as of 31 March 2010.

1. The tax treaty rates apply only to corporate shareholders. The applicable treaty should be checked for conditions required to claim the reduced rate.
2. The applicable treaty should be reviewed, because certain tax treaties exclude, such as film royalties and/or gain from copyright transfer from taxable income.
3. For certain dividends received from 1 January 2004 through to 31 December 2011, the reduced rate of 7% (for resident individuals, additional 3% will be levied) is applied instead of 20%. Thus, the withholding rate for resident individuals is either 10% or 20%, whereas, the rate for corporations or resident individuals in non-treaty countries is 7% or 20%. For residents in treaty countries, 7% or treaty rate will be applied. From 1 January 2012, 20% will be applied without exception.
4. Interest on bank deposits and/or certain designated financial instruments is subject to a 15% national withholding tax and a 5% local inhabitants withholding tax (20% combined). Taxation of such interest is fully realised by tax withholding, so resident individuals are not required to aggregate such interest income with other income. Interest on loans made by resident individuals is not subject to withholding tax; instead, it is taxed in the aggregate with other income.
5. Dividends, interest and royalties earned by non-resident individuals and/or foreign corporations are subject to a 20% national withholding tax under Japanese domestic tax laws in principle. An exception rate of 7% is applied to dividends from certain listed companies. And an exceptional rate of 15% is applied to interest on bank deposits and certain designated financial instruments. Interest on loans, however, is taxed at a 20% rate. A special exemption from withholding tax applies to certain long-term corporate bonds issued to non-residents in foreign countries.
6. Tax treaties with many countries provide reduced tax rates, as indicated. Some treaties, however, provide higher tax rates (e.g., Brazil, Thailand) or do not provide rates (e.g.,
Japan

Egypt, New Zealand). In these instances, rates specified under Japanese domestic tax laws apply. Each treaty should be consulted to see if a reduced rate for dividends (in the case of substantial holdings) is applicable.

7. Brazil – The tax treaty with Brazil provides a 25% tax rate for certain royalties (trademark). However, the withholding tax rate cannot exceed 20% on any royalties to be received by a non-resident taxpayer of Japan under Japanese income tax law. Film royalties are taxed at 15%. Any other royalties are taxed at 12.5%.

8. Czechoslovakia (former) – The treaty with the former Czechoslovakia is applied to the Czech Republic and the Slovak Republic. It stipulates that cultural royalties are tax exempt.

9. Egypt – Film royalties are taxed at 20% and other royalties are taxed at 15%.

10. Hungary – Cultural royalties are tax exempt.

11. India – The rate of 10% for royalties includes consideration for technical services.

12. Kazakhstan – The rate for royalties is reduced to 5% by Protocol.

13. Mexico – Dividends received from their subsidiaries by parent companies that have met certain conditions are exempt from withholding taxes.

14. Pakistan – The rate of 5% are applied to the company which has over 50% shares with voting right directly and the rate of 7.5% are applied to the company which has over 25% shares with voting right directly.

15. Philippines – Film royalties are taxed at 15%. Any other royalties are taxed at 10%.

16. Poland – Cultural royalties are tax exempt.

17. Romania – Cultural royalties are taxed at 10%.

18. Sri Lanka – Interest to financial institutions is tax exempt, as well as film and copyright royalties. Patent royalties are subject to 10%.

19. Sweden – If certain conditions for beneficial owners are met, dividends are taxable only in the contracting state of which the beneficial owner is a resident.

20. Thailand – Dividends paid by a corporation that is engaged in industrial undertakings are taxed at 15%. Interest to financial institutions is taxed at 10%.

21. Turkey – Interest to financial institutions is taxed at 10%.

22. The treaty with the former USSR is applied to Armenia, Azerbaijan, Belarus, Georgia, Kyrgyzstan, Moldova, Russia, Tajikistan, Turkmenistan, Ukraine, and Uzbekistan; it stipulates that cultural royalties are tax exempt.

Tax administration

Returns
Corporate income tax returns (i.e., the national corporation tax return, enterprise tax return and local inhabitants’ tax return) are self-assessment tax returns.

The tax year is the corporation’s annual accounting period specified in its articles of incorporation. The Japan branch of a foreign corporation must use the same accounting period that is adopted by the corporation in its home country.

If a corporation meets certain conditions, such as keeping certain accounting books, and makes an application for it in advance, it is allowed to file a “blue form” tax return. A blue form filing corporation may benefit from loss carryforward and other benefits.

A corporation (included branch) is required to file the final tax return within two months after the end of its annual accounting period. If a corporation cannot file the final return because of specific reasons, the due date of final return may be extended for one month with the tax authority’s approval.
Payment of tax
Income taxes payable on the final corporate income tax return should be paid on or before the filing due date of the final tax returns (usually two months after the end of the corporation’s accounting period). If an extension of time for filing is granted, the taxes may be paid on or before the extended due date with interest accrued at a rate of 4.3% (for the year 2010) per annum for the period from the day following the original due date (i.e., two months after the end of an accounting period) to the date of the actual payment.

Provisional tax payments are required for a corporation that has a fiscal period longer than six months. Provisional taxes generally are computed as one-half of the tax liabilities for the previous year, but they may be reduced by the filing of interim tax returns that reflect semi-annual results of the operations.

Consolidated taxation
The parent company will file the consolidated tax return and pay national corporate income tax for the group. The consolidated tax return and payment due dates are the same as previously discussed; however, the due date of the final return may be extended for two months.

For local corporate income taxes, the member of consolidated group would separately file the returns and pay the taxes.

Penalties
If the tax return is filed late, the late filing penalty is imposed at 15 – 20% of the tax balance due. In the case that a corporation files tax return after due date voluntarily, this penalty may be reduced to 5%.

If the amount of tax liabilities on filed tax return is assessed, the under-payment penalty is imposed at 10 – 15% of additional tax due. In the case that a corporation amends tax return and tax liabilities after due date voluntarily, this penalty may not be levied.

In addition, interest for the late payment of tax is levied at 4.3% (for the year 2010) per annum for the first two months and increasing to 14.6% per annum thereafter.

**Significant developments**

Although not part of the European Union’s (EU) fiscal territory or bound by EU law, Jersey gave commitments to change certain of its practices highlighted by the EU Code of Conduct review. This has resulted in the introduction of a zero/ten tax regime, which saw the end of the exempt company as of 31 December 2008, and the phasing out of the international business company by 2011.

The zero/ten regime was introduced in 2008 (2009 for existing companies). The new regime reduced the standard income tax rate for companies to 0%, with certain exceptions.

Financial services companies, as defined by legislation, are subject to tax at a rate of 10%. Utility companies and Jersey property source income are taxed at 20%.

All other companies are subject to 0% tax. The new zero/ten regime also has introduced a mechanism to tax Jersey resident shareholders of 0% and 10% companies on deemed distributions or attributed profits.

The new zero/ten system is currently under review and may therefore change in the future.

A 3% goods and services tax (GST) was introduced in May 2008 to raise additional revenue.

**Taxes on corporate income**

**Income tax**

Companies pay income tax at a rate of 0%, 10% or 20% on taxable income. The tax rate applies to the company as a whole the only exception being Jersey source property income, which is taxed at 20% regardless of the classification of the property holding company.

The 20% tax rate applies to Jersey based utility companies, such as telephone, gas and electricity companies. Additionally, income from Jersey real estate, including rental and property development, is subject to tax at 20%.

The 10% rate applies to financial services companies. A company is defined as a financial services company if:
• It is registered under the 1998 financial services law to carry out investment business, trust company business, or fund services business as an administrator or custodian in relation to an unclassified or an unregulated fund;
• It is registered under the 1991 banking business law; or
• It holds a permit under the collective investment funds law of 1988 as an administrator or custodian.

The 0% rate applies to all entities that are not financial services entities or utility companies, including fund managers who do not hold any of the permits mentioned above.

As a consequence of the above, companies regulated as fund managers will be liable to tax at 0% while those regulated as fund administrators will be taxed at 10%. Because these rates apply to the whole company’s profits, this would have resulted in those fund service providers that were regulated to provide both fund management and fund administration services being taxed at 10% on all of their profits, irrespective of the source. This also would apply to companies with investment business licenses.

The Jersey tax authorities have indicated that they will consider, on a case by case basis, applying a concessionary basis of taxation to existing companies that are regulated as fund functionaries under more than one category and/or to carry out investment business, only in very limited circumstances. As a result, different streams of income may be taxed based on how they are regulated. However, there is no such provision in the law.

There are provisions in Jersey tax law under which Jersey resident beneficial owners of Jersey companies are subject to tax on distributed or undistributed profits.

**Corporate residence**

A company is regarded as tax resident in Jersey if it is incorporated in Jersey or if it has its place of central management and control in Jersey, except that a Jersey incorporated company managed and controlled elsewhere will not be regarded as Jersey resident provided certain conditions are satisfied.

**Other taxes**

**GST**

A 3% GST was introduced in May 2008.

Companies with taxable supplies of more than GBP 300,000 per annum are required to register for GST.

**International services entity (ISE) status**

To address the difficulty of irrecoverable input tax in the financial services sector, and to mitigate the administrative cost of GST for exporters in general, Jersey has introduced the concept of an international services entity. Where an entity qualifies for this status:

• It will not be required to register for GST;
• Services to it will be zero-rated (i.e., treated as an export) where the supply exceeds GBP 1,000; and
Jersey, Channel Islands

- Input tax on purchases less than GBP 1,000 may be reclaimed.

ISE status will automatically be available to a wide variety of service providers and administered entities based in Jersey, on application and payment of the relevant fee, including: licensed banks, licensed trust service providers, licensed fund administrators, fund managers and managed managers.

Other entities not automatically eligible under one of the headings above, including companies, partnerships, trusts, unrecognised funds and special purpose vehicles, may still obtain ISE status if they fulfill certain criteria.

The ISE must be included on a list maintained by the comptroller of income tax. The list will refer either to the entity itself or (e.g., for administered entities) a class of entities as submitted by the administrator.

**Branch income**

Branch income is taxed at the rate applicable to the company. No further tax is withheld on the transfer of profits abroad.

**Income determination**

**Inventory valuation**

Inventory is valued at the lower of historical cost or net realisable value. The last-in, first-out (LIFO) method is not permitted. Generally, there are no material differences between accounts prepared on a normal accounting basis and those prepared on a tax basis.

**Capital gains**

Capital gains are not subject to tax.

**Inter-company dividends**

There is no requirement to withhold tax at source when paying dividends. If a dividend is paid out of profits that have suffered tax at either a 10% or 20% rate the net dividend will be accompanied by a tax credit at the applicable rate. Repayment of the tax credit can be claimed by Jersey investment companies and financial services companies receiving the dividends, subject to certain restrictions. However trading companies subject to tax at 0% are not entitled to claim a repayment of any of the tax credit.

**Foreign income**

Income tax is levied on foreign branch income when earned and on foreign dividends, interest, rents, and royalties. Double taxation is mitigated by either the granting of unilateral relief to the extent of taxing foreign income net of foreign taxes or by treaty relief, which gives credit for foreign tax, however Jersey does not have an extensive tax treaty network. Concessional credit relief might be granted in certain limited circumstances upon application.

**Stock dividends**

Stock dividends are taxed as income.
**Deductions**

**Capital allowances**
Capital allowances are available using the diminishing-balance method on machinery and equipment, including vehicles, at a rate of 25%. For this purpose, all such assets are pooled, and the allowance is calculated by reference to the value of the pool. On disposal of an asset, the lower of cost and sale proceeds of the asset is deducted from the pool. A balancing charge is levied if the proceeds exceed the balance of the pool. Motor vehicles costing more than GBP 21,000 and greenhouses are subject to special rules and are not pooled with other assets. By concession, an alternative is to claim the full cost of replacement in the year of replacement. Capital allowances are not applicable to buildings or the depletion of natural resources.

**Net operating losses**
Under zero/ten legislation, no distinction is drawn between different types of income or losses arising from different trades or sources apart from Jersey property income which is separately streamed. These should be aggregated in order to arrive at the company’s net relevant profits (0% companies) or tax-adjusted profits (financial services companies). Unrelieved net relevant losses or tax-adjusted losses may be carried forward and used to offset the net relevant profits or tax-adjusted profits in future accounting periods. Alternatively net relevant losses or tax-adjusted losses can be group relieved to group companies in the same income tax rate band. There are now only very limited circumstances where a company can obtain relief for carrying back losses under the new zero/ten regime.

**Payments to foreign affiliates**
Patent royalties are generally subject to taxation at source, and relief is obtained by retention of the tax deducted.

**Taxes**
Local income tax paid is not deductible in computing taxable income. ISE fees paid are a tax-deductible expense.

**Other significant items**
Normally, business deductions are allowed if they are incurred wholly and exclusively for the purpose of the trade.

**Group taxation**
Group taxation is not permitted.

The zero/ten legislation contains provisions for group relief between group companies subject to the same rate of tax. It is not possible to relieve losses between two companies taxed at different rates.

**Tax incentives**
There are generally no special incentives for locally owned businesses in view of the low rate of tax.
Jersey, Channel Islands

**Withholding taxes**

Interest and patent royalties paid by Jersey companies to non-residents are exempt from Jersey tax.

**Tax administration**

**Returns**

The tax year is the calendar year. Companies are assessed on income earned in respect of the financial year that ends within the applicable calendar year of assessment. The system relies on the filing of a return of information with the Island tax authority, which then raises an assessment (in the case of companies taxed at 10% or 20% on all or part of their income). The corporate tax return serves to provide the tax authorities with information regarding the type of company, details of the shareholders of the company and details of the dividends paid, deemed to be paid, profits attributable and shareholder loans. Companies taxed at 0% are required to submit a tax return but are not required to submit accounts and tax computations.

**Payment of tax**

Tax is payable in arrears during the calendar year following the year of assessment. Tax paid after a prescribed date (usually the first Friday in the December following the year of assessment) incurs a 10% surcharge.

**Other issues**

The zero/ten tax regime in Jersey is currently subject to review.
**Significant developments**

The Jordanian tax regime was previously based on the application of the Jordanian Income Tax Law No. 57 of 1985 ("Old" Tax Law). The Old Tax Law was repealed and replaced by a temporary income tax law, which is effective as of 1 January 2010. This temporary income tax law was introduced by the newly appointed Jordanian government in the absence of a Parliament (after a royal edict ordering its dissolution). When the new government was sworn in during December 2009, the introduction of a new income tax law was identified on the agenda of items to be addressed. On this basis, the temporary income tax law was introduced by the new government and will be in force until a new Parliament is elected. It is expected that a new Parliament will be elected during 2010; however, an exact date is not yet known. When the new Parliament is elected, one of its tasks will be to review temporary laws, make amendments, if appropriate, and then pass the laws as final.

**Taxes on corporate income**

The corporate tax rates are applied based on the industry/business activities from which the taxpayer generates income. The corporate tax rates are as follows:

- 30% for banks;
- 24% for telecommunication, insurance, financial intermediation companies (including exchange and finance leasing companies); and
- 14% for other companies.

**Corporate residence**

An entity will be deemed to be resident if it has been established and registered in accordance with the provisions of the Jordanian legislation in force and has an office or branch practicing management and supervision of its work in the Kingdom, or whose management head office or actual office is located in the Kingdom, or which the government or any official or public institutions own more than (50%) of its capital.

**Other taxes**

Public shareholding companies and operating branches of foreign companies are required to withhold 1% of their net profits to fund the public universities established in Jordan. The tax is collected by the Ministry of Finance and distributed annually at the discretion of the Higher Education Council. This tax will be abolished effective as of 1 January 2011.
Jordan

Jordan also has a scientific research tax imposed at the rate of 1%.

A general sales tax similar in operation to value-added tax is imposed at the rate of 16%

A social security tax is imposed on the employee and the employer. The rates are 5.5% and 11% respectively.

**Branch income**

Operating branches of foreign companies registered in Jordan are taxed based on their activities/business being carried out in Jordan at the prevailing corporate income tax rates. Non-operating branches of foreign companies registered in Jordan are generally prohibited from carrying on any commercial activity in Jordan.

**Income determination**

Any income incurred in or from the Kingdom for any person regardless of the place of payment even if it was from illegal sources, shall be subject to tax. This includes, but is not limited to income from:

- Professional services or activities;
- Interest, commissions, discounts, currency differences, deposit profits, and profits;
- from banks and other legal resident persons;
- Royalties;
- Selling goods produced in the Kingdom whether sold in the Kingdom or exported;
- Selling or leasing of movable properties located in the Kingdom;
- Leasing immovable properties located in the Kingdom and the income from key money;
- Selling or leasing intangible assets in the Kingdom, including goodwill;
- Insurance premiums due according to insurance and re-insurance agreements for the risk in the Kingdom;
- All forms of telecommunication services, including international telecommunications;
- Transportation between the Kingdom and any foreign country;
- Re-exporting;
- Service compensation gained by a non-resident person from the Kingdom for a service provided to any person if the activity or the work related to this compensation was carried out or the output of this service was used in the Kingdom;
- Any contract in the Kingdom such as construction contracting, commercial agencies profits, and any other similar entities whether their source is inside or outside the Kingdom; and
- Any other employment or business activity, or investment, which has not been exempted according to the provisions of this law.

The following shall be exempted from tax:

- The King’s allocations;
- Income of public and official institutions and municipalities, excluding its income from rent and key money;
- Income of unions, professional commissions, cooperation societies, and other societies legally registered and licensed from non-profit activities;
Jordan

- Income of any religious, charity, cultural, educational, sports, or health institutions with a public character, not aiming to achieve profit and the income of charity awqaf (public endowment), and the income from the Orphans Development Fund investment;
- Income of exempted registered companies according to the companies’ law, which is incurred from activities undertaken outside the Kingdom, except income derived from income sources subject to tax according to the provision of this law;
- Profits from stocks and dividends distributed by a resident to another resident, except profits of mutual investment funds of banks and financial companies;
- Capital gains incurred inside the Kingdom, other than profits from assets subject to depreciation;
- Income derived from inside the kingdom from trading in dividends and stocks, bonds, equity loan, treasury bonds, mutual investment funds, currencies, commodities in addition to futures and options contracts related to any of them, except that incurred by banks, financial companies, financial intermediation and insurance companies and legal persons who undertake out financial lease activities;
- Income from trading in immovable properties located in the Kingdom except the following:
  - Income incurred from such trade by a legal person; and
  - Income incurred from building and selling real-estates.
- Income of non-Jordanian resident investors from sources outside the Kingdom originated in investing his foreign capital, returns, profits, and investment liquidation return or selling his project, shares or stocks after taking them out of the Kingdom according to the effective Investment Law or any law that will replace it;
- Compensation paid by insurance entities, other than what is paid as a reimbursement for the loss of income from business activity or employment;
- Income from employment paid to members of non-Jordanian diplomatic or consular bodies representing other countries in the Kingdom subject to the reciprocal treatment principle;
- Income from distribution of estates or wills for the inheritors or the devisees according to the provisions of the effective legislations;
- End of service rewards for the employees according to the effective legislations or any group arrangements concluded according to the approval of the Minister as follows
  - 100% of any amount accrued before the effective date of this law; or
  - 50% of any amount accrued after the effective date of this law.
- The first JOD 4000 of monthly pension salary paid by a resident person;
- Income generated by the blind or any person totally incapable of working;
- Any income generated by banks and financial companies not operating in the Kingdom from banks operating in the Kingdom such as deposit interest, commissions, and deposit profits from investment in interest-free banks and financial companies;
- Profits gained by re-insurance companies from insurance contracts concluded with insurance companies operating in the Kingdom;
- Income covered by preventing double-taxation agreements concluded by the government to the extent of that which is covered under these agreements.
- Income from employment generated, with certain restrictions from the following are also exempted from tax:
  - Meals provided for the employees at the work site;
  - Accommodation services provided for employees for work purposes; and
  - Equipment and uniforms, necessary for carrying out work activities provided to the employee by the employer.
Jordan

- The income of public or private pension funds and savings funds and any other funds approved by the Minister shall not be subject to tax if this income is derived from the employees and employers contributions; and
- Certain types of local origin goods and services’ exports outside the Kingdom may be totally or partially exempted from tax as set forth in regulations issued for this purpose.

**Deductions**

Approved expenses, including the following, are deductible:

1. Foreign income tax paid for income earned from sources outside Jordan that was subject to tax under the provisions of the tax law.
2. Interest and Murabaha (profit-sharing) paid by banks or financial institutions.
3. Interest and Murabaha payable by taxpayers other than banks and financial institutions and finance leasing companies, provided that the amounts deducted do not exceed the rates set for total debt to capital or the average of ownership rights, depending on whichever is higher:

4. Bad debts.
5. Insurance premiums.
6. Depreciation of capital assets and amortisation of intangible assets, including goodwill.
7. Maintenance expenses for assets that were spent within the tax period provided that such expenses do not exceed (5%) of their value.
8. Taxes and fees paid on taxable activities.
9. Amounts paid as civil compensation under contracts concluded by the taxpayer for the purpose of carrying taxable activities.
10. Amounts paid by the employer for his employees to the Social Security Corporation.
11. Hospitality and travel expenses incurred by the taxpayer.
12. Expenditures for employees’ medical treatment, meals during duty, travel, transport and life insurance against work injuries or death.
13. Marketing, scientific research, development and training expenses.
14. Expenses of prior tax periods, which were neither defined nor final.

**Debt-to-equity rules**

Jordan has no debt to equity rules beyond those stated in the legal formation papers of a corporation.

**Group taxation**

Group taxation is not permitted in Jordan.
Tax incentives

Jordan has had tax reductions for selective sectors categorised by development zones. Generally, these have required pre-approval.

Withholding taxes (WHT)

With respect to services performed by a non-resident juristic or natural person, under the Income Tax Law, “Amounts received or earned by the non-resident person from the Kingdom, which are derived from services provided to any person if the work or service related has been performed in the Kingdom or if the outcome of such services has been used in the Kingdom as well, is subject to tax in Jordan.”

The current withholding tax rate on services performed by a non-resident juristic or natural person is 7% of the payment.

Resident juristics or natural persons that perform any services in the Kingdom are subject to a withholding tax on the services performed. The applicable withholding tax rate is the rate prevailing at the time the service is performed. The current withholding tax rate on services performed by a local subcontractor is 5% of the payment.

Services which are excluded from the 5% withholding tax regime include the following:

- Shipping services and related brokerage services;
- Road transport services and related brokerage services;
- Air transport services;
- Financing lease services;
- Hotels and restaurants services;
- Clearance services;
- Programming service provided by the companies;
- Hospital services provided by hospitals;
- Advertising services;
- Cleaning services;
- Security services;
- Training services provided by the companies;
- Insurance activities services;
- Banking services provided by banks;
- Communication activities and services provided by primary telecom companies (defined in the tax law as being communications companies individually licensed in accordance with the provisions of communications law in effect and regulations and instructions issued pursuant thereto);
- Transportation and distribution of electric power services provided by the Electricity Company Plc;
- Contracting services implemented under contractor certified by the Jordanian Contractors Association;
- Public safety services;
- Maintenance services that include value of materials and goods and labour wages;
- Food processing services, correspondence and transport and laundry provided to hospitals;
- Loading and unloading services;
Jordan

- Services that are executed by a juristic person – excluding civil companies – and have a tax number (income and sales); and
- Any other service approved by the Minister upon the recommendation of the Director General.

**Tax treaties**
Jordan has entered income tax treaties with Algeria, Bahrain, Canada, Croatia, the Czech Republic, Egypt, France, India, Indonesia, Iraq, South Korea, Kuwait, Lebanon, Libya, Malaysia, the Netherlands, Pakistan, Poland, Qatar, Romania, Sudan, Syria, Tunisia, Turkey, the United Kingdom and Yemen.

It has transportation agreements with a many countries and is negotiating treaties with more countries.

**Tax administration**

**Filing requirements**
Taxpayers are obliged to file tax returns before the end of the fourth month following the end of the tax period, including details related to income, expenses, exemptions and due tax. Tax returns are submitted by any of the following means approved by the department according to terms and procedures to be determined by instructions:

- Registered mail;
- Banks;
- Any licensed company to undertake the tasks of public or private mail post approved by the Council of Ministries upon the recommendation of the Minister; or
- Electronic means.

The date of filing is considered to be the earlier of the date of receipt by the department, post seal or deposit receipt at a bank or licensed company. In the case of sending electronic mail, implementation instructions have not yet been introduced to determine the approved date of submitting the same.

**Fines and penalties**
Failure to pay tax on the assigned dates according to the provisions of the tax law will result in a delay fine at a rate of 0.4% of the value of the tax due or any deductible amounts for each full or partial week of delay.

If a taxpayer submits a tax return and pays the declared tax in a timely manner, but the declared tax is less than the actual amount due, a shortage fee for such differences will be imposed, as follows:

- 15% of the shortage if the difference exceeds 20% but less than 50% of the tax due by law;
- 20% of the shortage if the difference does not exceed 50% of the tax due by law; and
- 80% of the shortage if the difference exceeds 50% of the tax due by law.
Other issues

The effective corporate income tax system method presented in Jordan for juristic persons (except partnerships and limited partnerships in shares), is based on statutory income tax rates at all income levels with no progressive tax rate scale; the statutory tax rates vary according to different business sectors.

Note that the corporate income tax method in Jordan does not subject all business activity to the corporate income tax. Unincorporated businesses, such as sole proprietorships and partnerships, do not pay corporate income tax. Instead, all of their income, whether it is distributed to owners as dividends or retained for additional internal investment, is “passed through” and taxed only at the level of the individual, that is, the owner or owners.
Significant developments

During November and December, 2009, the President of Kazakhstan approved a set of amendments to the Kazakhstan tax law.

The main change was the extension of the 2009 tax rates of corporate income tax and mineral production tax until 2012. Other notable changes included clarifying provisions regarding capital gains, withholding tax, double tax treaty administration, commercial discovery bonus calculations, historical costs reimbursement and excess profit tax.

Please note that some of these amendments came into force retroactively from 1 January 2009.

Customs union

From 1 January 2010, Kazakhstan, Russia and Belarus adopted a unified customs tariffs. The three countries will continue working towards unification of administrative and other procedures, which should be completed by 1 July 2010, an official date when the integrated customs territory will start functioning.

Taxes on corporate income

The tax rate for corporations is at 20% for 2010-2012 and is based on a calendar year. The tax rate will decrease to 17.5% in 2013, and 15% in 2014. All Kazakhstan legal entities and branches of foreign legal entities are subject to corporate income tax.

Corporate residence

Legal entities formed under Kazakhstan law as well as legal entities whose effective control (management) is in Kazakhstan are recognised as residents for corporate tax purposes.

Other taxes

Value-added tax (VAT)

The current VAT rate is 12%. This tax is applicable to the sales value of products, works and services, and imports. Exports of goods are taxed at a zero rate. There is a list of goods, works and services exempt from VAT.
Goods and services are subject to VAT if they are deemed to be supplied in Kazakhstan under the place of supply rules.

VAT refunds are generally available with respect to excess input VAT. However, the excess input VAT that has been formed prior to 1 January 2009, should be treated in accordance with the 2008 Tax Code. Based on these provisions, while there is a possibility of a refund of input VAT associated with zero-rated supplies, the excess input VAT not related to zero-rated supplies could only be carried forward to offset output VAT of future periods without eligibility for refund.

The VAT reporting period is the calendar quarter.

**Excise taxes**
Excise taxes apply to the sale and import of crude oil, gas condensate, petrol/gasoline (excluding aviation fuel), diesel fuel, spirits and alcoholic beverages, beer, tobacco and passenger cars.

**Social tax**
Employers must pay social tax at 11% of gross remuneration (salaries and certain benefits provided) of all employees (local and expatriate). A deduction is available for obligatory pension contributions.

**Property tax**
Property tax is assessed at a general rate of 1.5% of the average net book value of immovable property.

**Land tax**
Entities and individuals that own land plots (or land share in cases of commonly shared ownership of land plots) must pay land tax. Land tax rates vary based on the purpose for which the land is used as well as the size and quality of the land.

**Vehicle tax**
The vehicle tax rate is determined based on monthly calculation indices depending on the type of vehicle, engine volume, the operation period of the vehicle (aircraft only) and other factors.

**Mineral production tax**
The mineral production tax applies to the extracted volume of crude oil, gas condensate, natural gas, minerals and groundwater.

The tax is calculated based on the value of the extracted content, which is computed by applying average global prices to the extracted volume (adjusted for content). The determination of average global prices is based on the list of publications that are considered official sources for computation of mineral production tax (Metal Bulletin, Metal Pages, Platts Crude Oil Marketwire and Petroleum Argus).

Tax rates for crude oil and gas condensate for 2010 range from 6% to 19%, depending on the accumulated production volume for the calendar year. For hydrocarbons, rates can be reduced by 50% if they are supplied to domestic refineries on the basis of a sale/purchase agreement or tolling agreement.
Kazakhstan, Republic of

The tax rate for natural gas is set at 10%. For domestic sales of natural gas, tax rates range from 0.5% to 1.5%.

Tax rates for minerals which have undergone initial processing (except for widespread minerals) and for coal vary between 0% and 23%.

**Excess profit tax**
The excess profit tax (EPT) rates are progressive and range from 0% to 60%. The tax base is comprised of the portion of net income exceeding 25% of deductions for EPT purposes. Taxpayers may include asset acquisition costs, capital costs and losses (with certain limitations) as deductions.

**Customs duties**
Customs duties apply to the import of goods and the rates are established either based on a percentage (ranging between 0% and 30%) of the customs value of goods or in absolute terms in Euros. Kazakhstan is not a World Trade Organization member.

**Customs fees**
A customs processing fee is assessed at EUR 50 for the main page of a customs declaration plus EUR 20 for each supplemental page.

**Branch income**
The net income of branches of foreign legal entities is subject to a branch profits tax at a rate of 15%, which may be reduced under the terms of a double tax treaty.

**Income determination**
Kazakhstan legal entities are taxable on aggregate annual income earned worldwide. Non-resident legal entities, carrying out income through a permanent establishment in Kazakhstan, are taxable on income attributed to the activities of that permanent establishment. All taxpayers must apply the accrual method for recognition of income.

**Inventory valuation**
Inventory is valued in accordance with the international financial reporting standards and in compliance with Kazakhstan legislation.

**Capital gains**
Capital gains are subject to ordinary income tax rates. There is an exemption available for capital gains realised from the sale of shares and participation interests in Kazakhstan legal entities or consortiums which are not engaged in subsurface activities. There is a still-developing test for determining exactly which entities will qualify for this exemption.

**Inter-company dividends**
Inter-company dividends are exempt from corporate income tax in the hands of the recipient except for dividends paid by certain types of investment funds. This exemption applies to stock dividends, as well.

**Foreign income**
Foreign income is subject to ordinary income tax rates.
Under the controlled foreign companies (CFC) rules, if a Kazakhstan legal entity has 10% or more of direct or indirect ownership in the share capital or voting rights in a non-resident company, registered or located in a preferential tax jurisdiction, the legal entity is subject to Kazakhstan corporate income tax on the portion of the undistributed profits from the non-resident company. The list of preferential tax jurisdictions established by the government of Kazakhstan includes 63 jurisdictions.

**Transfer pricing**
According to the provisions of the Transfer Pricing Law, both customs and tax authorities have the right to monitor and adjust prices used in cross-border and certain domestic transactions when prices are perceived to deviate from market prices, even if such transactions are with unrelated parties.

**Deductions**
Allowable deductions generally include expenses associated with activities designed to generate income, unless specifically restricted for deduction by tax legislation. All expenses require supporting documentation.

**Depreciation and depletion**
Tax depreciation is calculated using the declining balance method at depreciation rates ranging from 10% to 40%, applied to the balances of four basic categories of assets:

1. Buildings and facilities;
2. Machinery and equipment;
3. Computers and equipment for information processing; and
4. Fixed assets not included into other groups, including oil and gas wells, transmission equipment, oil and gas machinery and equipment.

**Net operating losses**
Net operating losses accumulated prior to 1 January 2009, may be carried forward for up to three years. Net operating losses generated after 1 January 2009, may be carried forward for up to 10 years.

**Payments to foreign affiliates**
Payments to foreign affiliates are deductible for corporate income tax purposes if the payments are intended to generate income, are supported by documentation and comply with Kazakhstan transfer pricing law.

**Deduction of taxes**
Taxes remitted to the state treasury of Kazakhstan are deductible except for the following:

- Taxes excluded prior to the calculation of the aggregate annual income;
- Income taxes paid in Kazakhstan and other states;
- Taxes paid in the preferential tax jurisdictions; and
- Excess profit tax.

**Other items**
Certain expenses related to the activities aimed at generating income are deductible within limits, including expenses related to entertainment, business trips and interest (thin capitalisation).
Kazakhstan, Republic of

**Group taxation**

Kazakhstan tax law does not permit group taxation.

**Tax incentives**

Corporate tax investment incentives are available for certain new capital investments, including deduction of cost and subsequent repair and modernisation expenses.

Investment tax preferences do not apply to the following:

- Organisations acting on the territory of special economic zones;
- Organisations producing and/or selling excisable goods; or
- Producers of agricultural products and village consumer’s cooperatives.

**Withholding taxes (WHT)**

Kazakhstan source income of non-residents and the proceeds from the sale of shares in subsurface users are subject to withholding tax at the rates shown in the table below.

A non-resident legal entity is exempt from dividend withholding tax if the holding period is greater than or equal to three years and 50% or more of the issuer’s capital value is not a property of subsurface user.

**Notes**

The numbers in parentheses above refer to the following notes:

1. 5% if the beneficial owner is a company owning, directly (or indirectly in case of Canada, Japan and the UK), at least 10% of the voting power of the company paying the dividends.
2. 5% (10% in case of Moldova) if the beneficial owner is a company that directly holds at least 25% of the capital of the paying company.
Kazakhstan, Republic of

3. 10% if the beneficial owner is a company, directly or indirectly, holding at least 20% of the capital of the paying company.
4. 5% if the beneficial owner is a company (other than partnership) which owns not less than 10% of the capital of the paying company.
5. 5% if the recipient is a company (other than partnership) which directly owns not less than 20% of the capital of the paying company.
6. 10% if the actual owner is a legal entity that owns not less than 30% of the authorised capital of the legal entity paying the dividends.
7. 10% if the beneficial owner is a company that holds directly at least 30% of the capital of the company paying the dividends.
8. 0%, if dividends are paid in consideration of an investment of as least USD 50 million in the paying company.
9. 0% if the company receiving the dividends holds directly or indirectly at least 50% of the capital of the paying company and has made an investment in the company paying the dividends of at least USD 1 million, which investment is guaranteed in full or insured in full by the government of the first contracting state, the central bank of that state or any agency or instrumentality (including a financial institution) owned or controlled by that government, and has been approved by the government of the other contracting state.
10. 5% (or 12.5% in case of Pakistan) if the beneficial owner is a company which directly owns (or indirectly in case of the Netherlands and Pakistan) at least 10% of the capital of the paying company.

**Tax administration**

**Returns**
The tax year in Kazakhstan is the calendar year. Annual corporate income tax declarations are due by 31 March of the year following the tax year-end. For taxpayers filing electronically, a 30 calendar-day extension is usually granted upon request.

Certain taxpayers are required to submit their estimated calculation of monthly advance payments of corporate income tax.

The deadline for other tax returns is the fifteenth calendar day of the second month following the reporting period. The 30 calendar-day extension is usually granted upon request.

**Payment of tax**
For corporate income tax, advance payments are due every twenty-fifth day of the current month. Taxpayers with aggregate annual income during the tax period preceding the previous tax period of less than 325,000-times amount of the monthly calculation index established for the relevant financial year (approximately, USD 3.12 million) are exempt from the obligation to calculate and pay corporate income tax advance payments. Payment of any outstanding income tax liabilities is required within 10 calendar days following submission of the annual income tax declaration.

Most other taxes are payable by the twenty-fifth day of the second month following the end of reporting period.

**Fines and interest penalties**
Penalties are assessed on late tax payments at 2.5 times the Kazakhstan National Bank refinancing rate. As of 1 April 2010, the National Bank refinancing rate was 7% per annum.

Substantial fines are imposed for understatement of tax liabilities. Generally, the fines amount to 50% of the understated tax.
For advance corporate income tax payments, an administrative fine of 40% applies to understated advance tax payments compared with the final declared corporate income tax, if the understated amount is greater than 20% of the final declared amount.

If a taxpayer is deemed to have concealed taxable income, a fine of 150% of the concealed amount may be assessed.

**Statute of limitation**
The statute of limitation for tax purposes in Kazakhstan is five years. For taxpayers operating under subsurface use contracts, the tax authorities maintain the right to assess or revise the assessed amount of excess profit tax and other taxes and obligatory payments to the budget, where a methodology of calculation uses one of the following indices: internal rate of return (IRR) or internal revenue rate or R-factor (earning yield) during the effective period of a subsurface use contract and five years after the end of the effective period of a subsurface use contract.

**Accounting system**
Kazakhstan legal entities should maintain accounts and produce financial statements in accordance with International Financial Reporting Standards or national accounting standards (depending on the size of the company and other factors). In most cases, tax treatment follows accounting.
Corporate taxes in Kenya

Significant developments

Historically, one of the biggest tax incentives for investors into Kenya was the ability to carryforward tax losses indefinitely. This is now restricted to a maximum of five years, including the year in which the loss arises. This change is applicable from the years of income commencing on or after 1 January 2010 and applies to businesses as well as individuals.

Taxpayers may submit an application to the minister of finance to request an extension of the period in which losses may be carried forward where a person has provided evidence of inability to extinguish the deficit within that period.

Since 12 June 2009, withholding tax is applicable on payments made by Kenyan residents for the use of property that is located outside of Kenya. This change impacts businesses and individuals who rent property outside of Kenya. This measure effectively increases the cost of doing business in Kenya since a resident person is required to gross up rental payments as it is unlikely that the non-resident property owner would agree to bear the Kenyan tax.

The 2010/2011 Finance Bill introduced a significant change on interest free loans advanced by a related party to a thinly capitalised company resident in Kenya. The proposal is to deem an interest rate on interest free loans on which the deemed interest rate is pegged to the average 91-day treasury bill rate.

Taxes on corporate income

Corporations are taxed at the following rates:

<table>
<thead>
<tr>
<th>Category</th>
<th>Tax Rate</th>
</tr>
</thead>
<tbody>
<tr>
<td>Locally incorporated companies</td>
<td>30%</td>
</tr>
<tr>
<td>Branches of foreign companies</td>
<td>37.5%</td>
</tr>
<tr>
<td>Export processing zone enterprises:</td>
<td></td>
</tr>
<tr>
<td>First 10 years</td>
<td>0%</td>
</tr>
<tr>
<td>Next 10 years</td>
<td>25%</td>
</tr>
<tr>
<td>Thereafter</td>
<td>30%</td>
</tr>
<tr>
<td>Newly listed companies:</td>
<td></td>
</tr>
<tr>
<td>20% of shares listed: for three years</td>
<td>27%</td>
</tr>
<tr>
<td>30% of shares listed: for five years</td>
<td>25%</td>
</tr>
<tr>
<td>40% of shares listed: for five years</td>
<td>20%</td>
</tr>
</tbody>
</table>
There are special provisions for non-resident shipping companies and airlines, non-residents providing broadcast, internet and messaging services, and non-resident petroleum industry subcontractors providing exploration and production services in Kenya.

**Corporate residence**

A company is considered resident in Kenya if:

- It is incorporated under Kenyan laws;
- The management and control of company affairs are exercised in Kenya; or
- The company has been declared by the minister, by announcement in the gazette, to be resident in Kenya for any year of income.

**Other taxes**

**Value-added tax (VAT)**

VAT is levied on the supply of taxable goods and services in Kenya, and the importation of taxable goods and services into Kenya. Certain goods and services are designated as exempt from VAT.

Exempt supplies do not count towards the registration threshold (*discussed below*) and the related input VAT is not recoverable.

The following rates apply:

<table>
<thead>
<tr>
<th>Description</th>
<th>Rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Standard rate on all goods and services that are neither exempt nor zero-rated</td>
<td>16</td>
</tr>
<tr>
<td>Electricity, diesel oil, residual fuel oils</td>
<td>12</td>
</tr>
<tr>
<td>Export of goods and services, certain other goods and services</td>
<td>0</td>
</tr>
</tbody>
</table>

Zero rating applies to the export of goods or services. The supply of goods or services to certain designated persons and projects are also zero rated.

The threshold for VAT registration is taxable supplies of KES 5 million per year. Registered persons must record their turnover using an approved electronic tax register or signature device. Only registered persons may recover input tax. An input tax credit is not available for several items such as non commercial vehicles, office furniture, and hospitality and entertainment services. An excess input tax credit may be carried forward or refunded, subject to certain conditions.

Some entities such as central and local governmental entities, state corporations, banks and insurance companies are required to withhold VAT on supplies received and pay the tax directly to the revenue authority.

**Excise duty**

Excise duty is imposed on the manufacture or importation of certain commodities, principally bottled water, soft drinks, cigarettes, alcohol, perfumes, fuels and motor vehicles at varying rates. Excise duty is also levied on mobile cellular phone and wireless telephone services at 10% and gambling services at 5%.
Kenya

**Import (customs) duty**
Import duty is levied under the East African Community Common Customs Management Act. Imports of goods are generally subject to import duty of 0% for raw materials and capital goods, 10% for intermediate goods and 25% for finished goods. Enterprises established in export processing zones are exempt from customs duty on machinery and inputs for exported products. Under an import duty remission scheme, import duty may be remitted for raw materials used to manufacture goods for export. This is subject to a requirement for proof of export and execution of a bond.

**Compensating tax**
Where a company pays dividends out of profits that have not been subject to income tax, it will be liable to pay a compensating tax. This tax effectively ensures that all distributions are paid out of profits that have been subject to income tax, prior to distribution.

**Advance tax**
Advance tax is payable at varying rates per year on commercial vehicles and is creditable against corporate income tax for the year.

**Fringe benefit tax**
The fringe benefit tax is payable by companies at 30% of the benefit arising from a loan advanced to an employee at an interest rate lower than the rates prescribed by the Commissioner. The directors and employees are not personally taxed on the benefit.

**Branch income**
A business carried on in Kenya through a fixed place of business gives rise to a permanent establishment (PE) as does a building site, or a construction or assembly project that has existed for six months or more. The profit of the PE is taxed at the branch tax rate of 37.5%, but there is no further taxation on the distribution of branch profits. However, there are certain restrictions with respect to costs paid to the head office.

**Income determination**
Companies (including a branch of an overseas company) are subject to Kenyan tax on all income accrued in or derived from Kenya.

**Inventory valuation**
Inventory is stated at the lower of cost or net realisable value with the exception of biological assets whose value is prescribed by the Commissioner.

**Capital gains**
Taxation of capital gains was suspended in 1985.

**Foreign income**
Income from a business carried on partly in Kenya by a resident company is taxed on a worldwide basis, but otherwise foreign source income is not taxable in Kenya. An individual resident in Kenya is taxed in respect of any employment services rendered in Kenya or outside Kenya. A non-resident individual's employment income earned in respect to services rendered to an employer resident in Kenya or PE of a non-resident employer is also taxable in Kenya.
**Stock dividends**
Stock dividends issued in a ratio not proportionate to shareholding of the existing equity are considered as taxable dividends to the extent of the disproportionate increase in the value of the ownership of the company.

**Deductions**
The general principle in Kenya is that expenses are deductible if they are incurred wholly and exclusively to generate taxable income.

**Depreciation and depletion**
No deduction is allowed for accounting depreciation or impairment. However, capital allowances are permitted at varying rates for certain assets used for business purposes, including buildings and machinery used in manufacturing, industrial buildings and hotels, machinery and plant, agricultural works and mining.

**Accumulated losses**
Effective 1 January 2010, losses calculated under the tax rules may be carried forward against income from the same source for a maximum of five years including the year in which the losses arise.

**Thin capitalisation**
In Kenya, a company is thinly capitalised if:

a. The company is in control of a non-resident person alone or together with four or fewer persons;
b. The company is not a bank or financial institution; and
c. The highest amount of all loans held by the company at any time exceeds the sum of three times of the revenue reserves (including accumulated losses) and the issued and paid up share capital of all classes of shares of the company.

A company which is thinly capitalised cannot claim a deduction on the interest expense incurred by the company on loans in excess of three times the sum of revenue reserves and issued and paid up capital of all classes of shares of the company. The company also cannot claim a deduction any foreign exchange loss realised by the company with respect any loans from its shareholders in the period that the company remains thinly capitalised.

**Payments to foreign affiliates**
Transfer pricing rules based on Organisation for Economic Co-operation and Development (OECD) principles apply to transactions with foreign affiliates (both companies and branches/PE). Additionally, there are restrictions on the deductibility of expenses incurred outside of Kenya by non-residents with a Kenyan PE. Amendments in the 2010/2011 Finance Bill stated that transfer pricing is no longer limited to anti-avoidance; marital and familial relationships are now subject to transfer pricing rules.

**Taxes**
Kenyan income taxes are not deductible. However, foreign income taxes incurred are generally deductible as an expense if tax credit relief is not available under a double tax agreement (DTA).
Kenya

**Other significant items**
Donations to charities and for certain public works are deductible, subject to certain conditions.

**Group taxation**
Each company in a group is taxed as a separate entity.

**Tax incentives**

**Investment deduction**
Qualifying investments exceeding KES 200 million incurred outside Nairobi or the municipalities of Mombasa or Kisumu are allowed an investment deduction of 150%. All other qualifying investments are allowed a 100% investment deduction in the year the asset is put into service.

**Industrial building allowance**
Hostels and certified education buildings qualify for an industrial building allowance at a rate of 50% on a straight-line basis.

Qualifying rental residential or commercial buildings qualify for an industrial building allowance at a rate of 25%.

Other qualifying buildings (including hotels) qualify for an industrial building allowance at a rate of 10%.

**Wear and tear allowance**
Expenditures incurred on heavy earth moving equipment qualify for a wear and tear allowance at a rate of 37.5%, while other self propelling vehicles (including aircraft) qualify for a wear and tear allowance at a rate of 25%.

Computers and peripheral computer hardware qualify for a wear and tear allowance at a rate of 30%.

Capital allowances were introduced, effective 1 January 2010, at a rate of 20% for computer software and 20% for telecommunications equipment not falling within the 12.5% category referred to below, purchased and used by telecommunications operators. Both these allowances are computed on a straight line basis.

All other machinery (including ships) qualify for a wear and tear allowance at a rate of 12.5%.

**Export processing zone**
Companies located in an approved export processing zone, principally to export goods, are taxed at a zero rate of income tax for 10 years from its commencement and at a rate of 25% for the next 10 years.

**Listed companies**
Companies listed on the Nairobi Stock Exchange are entitled to reduced rates of income tax for a period, depending on the proportion of share capital listed.
Withholding taxes (WHT)

Withholding taxes are levied at varying rates (3% to 30%) on a range of payments to residents and non-residents. Resident withholding taxes are either final tax or are creditable against income tax. Non-resident withholding taxes are final tax.

Lower rates may apply to non-residents where there is a double tax agreement in force.

Tax administration

Returns
Resident companies and permanent establishments of non resident companies must file a self assessment tax return accompanied by audited or certified accounts annually. The return is due within six months following a company’s year end.

Payment of tax
Quarterly payments of tax must be made during the year based on the lower of 110% of the previous year’s liability or an estimate of the current year’s liability. Agricultural companies are required to pay its estimated tax in two instalments of 75% and 25% in the year. Any balance of tax at the end of the year must be paid within four months of the financial year end.

Payment of agency taxes (withholding tax and PAYE)
The tax withheld from payments must be paid by the twentieth day of the month following the month in which the deduction is made.

Penalties for noncompliance
If a self assessment tax return is not submitted by the due date, a penalty of 5% on the unpaid tax for the year may be imposed, subject to a minimum of KES 10,000. Failure
or late submission of an export processing zone company return will be subject to a penalty of KES 2,000 per day for as long as the failure continues.

A penalty of 20% and interest at 2% per month are imposed on underestimation and late payment of instalment tax and any balance of tax. Interest is charged only on the principal tax due.

Failure to make a deduction or to remit the withholding tax deducted attracts a penalty equal to 10% of the amount of tax involved (subject to a maximum of KES 1 million) and accrues interest at 2% per month.
Significant developments

**Stimulation of corporate restructuring**

Three major changes to stimulate corporate restructuring take effect on 1 July 2010. First, the types of tax-free transactions are expanded to allow companies to defer taxation in more M&A transactions. Thus, as an example, comprehensive share exchanges and comprehensive asset transfers will be eligible for the deferral of corporate income tax and dividend income tax. Further, companies engaged in these transactions will be exempt from the securities tax.

Second, the types of assets eligible for deferral of taxation on capital gains will be extended to all assets. Currently, the tax deferrals are limited to tangible fixed assets used for business purposes in the current merger and split-off taxation regime. In order to prevent possible tax evasion through M&As, the requirements for corporation's substantial consistency after a M&A transaction, which is key in determining eligibility for tax deferral, will be enhanced. Under these enhanced requirements, shareholders of the merged company will be required to hold the shares for a certain period; and the merging company will be required to hold 50% of the assets acquired in the merger for a certain period.

Third, the existing tax deferral of capital gains arising on in-kind contributions will be available in the event of capital increases through in-kind contributions and contributions by means of all assets. The current tax law limits the tax deferral to the event of corporate establishment and in-kind contributions of shares and tangible fixed assets used for business purposes.

**Extension of income tax filing period**

With proper application, the income tax filing period can be extended by up to a month from the statutory filing due date for companies undergoing the statutory external audit (i.e., companies listed on the Korea Stock Exchange and KOSDAQ and those having total assets worth KRW 10 billion as at the immediately preceding fiscal year-end). A daily 0.03% rate of interest will be charged for the extended period.

**Higher research and development (R&D) tax credit for core technologies and strategic growth industries**

Companies presently claim a tax credit in relation to qualifying R&D expenditure to the extent of either (1) 3-6% (25% for small and medium enterprises (SMEs)) of the current R&D expenses or (2) 40% (50% for SMEs) of the incremental portion of the current R&D expenses over the average of the previous four years. The tax credit will be extended to include R&D in relation to core technologies as authorised by
government ministries as well as pre-designated strategic growth industries until the end of December 2012 and for these industries, the credit rate for the current R&D expenditure would be 20% (30% for SMEs).

SMEs are defined as corporations who meet certain requirements of major business type, the number of employee, size of capital or turnover under the Special Tax Treatment Control Law (STTCL). However, in case that the parent company is a large-sized company which has more than KRW 500 billion assets at the end of the prior year and this large-sized company invests directly or indirectly more than 30% in its subsidiary company, this subsidiary company is not a SME.

**Taxes on corporate income**

**Corporation tax**
The basic Korean corporate tax rates for 2010 and 2011 is 10% on the first KRW 200 million of the tax base and 22% for the excess. In FY2012 and thereafter, the respective rates will be 10% and 20%. In 2009, the respective rates were 11% and 22%.

Capital gains from the disposal of non-business purpose land or houses may be subject to an additional capital gains tax at the rates ranging from 10% to 40% after the above corporate income taxation.

**Minimum tax**
Corporate taxpayers are liable for the minimum tax, which is defined as the greater of 10% (to the tax base of up to KRW 10 billion, 11% on the excess until up to KRW 100 billion, 14% on the excess) of the taxable income before various deductions and exemptions pursuant to the STTCL are applied to reach adjusted taxable income or the actual tax after various deductions and exemptions.

For SMEs, the minimum tax is the greater of 7% (8% for FY2009) of adjusted taxable income or actual tax liability.

**Resident tax surcharges**
A resident tax surcharge of 10% on corporate income tax liability is assessed each year.

**Agriculture and fishery surtax**
When a corporate taxpayer claims certain tax credits or exemptions under the STTCL, a 20% of agriculture and fishery surtax is levied on the reduced corporate income tax liability.

**Corporate residence**

**Permanent establishment**
A corporation having its head office or principal office in Korea is a domestic corporation. Effective for fiscal years commencing after 31 December 2005, a corporation with a place of effective management in Korea is also treated as a domestic corporation.

A non-resident corporation is generally deemed to have a tax presence (i.e., permanent establishment) in Korea, if one of the following applies:
1. It has any fixed place of business in Korea, where the business of the entity is wholly or partly carried on;
2. It is represented by a dependent agent in Korea, who has the authority to conclude contracts on its behalf and who has repeatedly exercised that authority;
3. Its employee(s) provides services in Korea for more than six months within 12 consecutive months; or
4. Its employee(s) continuously or repeatedly renders similar services in Korea for two or more years, even if each service visit is for less than six months within 12 consecutive months.

Exceptions to a permanent establishment in Korea for a non-resident corporation include fixed places of business used only for purchasing or storage of property at which no sales activities, advertising, publicity, collecting or furnishing of information, or other activities that are preparatory or auxiliary to the conduct of business occur.

Non-resident foreign corporations without domestic places of business in Korea are generally taxed through a withholding tax on each separate item of income.

The Law for Coordination of International Tax Affairs (LCITA) was enacted on 1 January 1996. This law provides the legal basis for taxation of international transactions, focusing especially on transfer pricing rules, advance pricing arrangements (APAs) and mutual agreement procedures. The relevant law for an APA came into effect from 1 January 1997.

**Other taxes**

**Value-added tax (VAT)**
The VAT is levied at a rate of 10% on sales and transfers of goods and services, except zero-rated goods and services and exempt goods and services.

Electronic VAT invoicing will be enforced as a compulsory requirement as of 1 January 2011. If a taxpayer fails to issue the electronic VAT invoice or report electronically to tax authorities, the relevant penalties shall be imposed.

**Stamp taxes**
The stamp tax is levied on a person who prepares a document certifying establishment, transfer, or change of rights to property in Korea. The stamp tax ranges from KRW 100 to KRW 350,000 based on the type of taxable document.

**Excise taxes**
The individual consumption tax is imposed on specific luxury goods, high-priced durable consumer goods, goods subject to consumption restraints, and certain luxury activities for the purpose of supplementing the VAT single-rate scheme. Tax rates range from two to 20%; in certain circumstances a fixed amount is levied (e.g., KRW 12,000 per person for golf course greens fees).

**Property taxes**
A yearly tax ranging from 0.07 to 5% is charged on the statutory value of land, buildings, houses, vessels and aircraft. Five times the property tax rate is applied to property that is newly constructed or expanded in the Seoul metropolitan area for five years from its relevant registration date.
Transfer taxes
A securities tax of 0.5% is imposed on the total value of securities at the time of transfer, but the government is authorised to adjust the tax rate in certain circumstances. The flexible tax rate prescribed by the Presidential Decree is 0.15 and 0.3% on transactions in the Korea Stock Exchange and Korean Securities Dealers Automated Quotations (KOSDAQ), respectively.

Turnover taxes
Not applicable.

Registration taxes
Registration tax ranging from 0.01 to 5% is also charged upon the transfer of title and incorporation. Registration upon the transfer of title and incorporation for corporations located in large cities may be subject to three times the rates otherwise applied.

Customs duties
Customs duties are generally assessed on imported goods. “Importation” refers to the delivery of goods into Korea (in case of goods passing through a bonded area, delivery of such goods into Korea from such a bonded area) to be consumed or to be used in Korea.

Acquisition taxes
Acquisition tax is charged on the price of real estate, motor vehicles, construction equipment, golf membership, boats, etc. The minimum rate is 2%. A 6% tax is charged on acquisitions in the Seoul metropolitan area and a 10% rate is applied to luxury items, such as villas, golf courses and yachts.

Branch income
In general, a branch office of a foreign corporation is taxed in the same manner as domestic companies.

Remittance of retained earnings from a Korean branch to its head office is subject to reporting to a designated foreign exchange bank in Korea under the Foreign Exchange Transaction Act.

If the tax treaty between Korea and the country in which a foreign corporation is residing allows the imposition of a branch profits tax, the tax is imposed on the adjusted taxable income of the Korean branch.

Where applicable, the branch profit tax is levied in addition to the regular corporate income tax, which is imposed at the rate of 20% (or at a reduced rate as provided in a treaty) of the adjusted taxable income of the Korean branch.

Income determination
Capital vs. ordinary transactions
Gross income consists of gains, profits, income from trade and commerce, dealings in property, rents, royalties and income derived from any ordinary transactions carried on for gain or profit. For the purposes of taxation, gross income does not include income derived from gains from capital transactions such as capital surplus, gains on reduction
of paid-in capital, gains from merger, divisions, comprehensive share transfer or comprehensive share exchange. But, gains from treasury stocks transactions are taxed and losses are deductible from taxable income.

**Dividend income**
All distributions to shareholders are taxed as a dividend income, whether paid in cash or in stock.

However, a qualified domestic holding company that owns more than an 80% (40% in case of listed subsidiary) share ownership in its domestic subsidiary will receive 100% deduction for dividends while an 80% deduction is allowed for shared ownership of 80% (40% in case of listed subsidiary) or less. A domestic corporation other than that is not a qualified holding company will also receive a 100% deduction for shared ownership of 100%, 50% for more than a 50% (30% in case of listed subsidiary) share ownership, and 30% for shared ownership of 50% (30% in case of listed subsidiary) or less.

**Foreign investment**
Income of foreign subsidiaries incorporated outside Korea is not included in the taxable income of a domestic company. Income is recognised by a domestic company only upon the declaration of dividends from a foreign subsidiary. Therefore, the Korean tax impact may be delayed through deferring the declaration of dividends unless the anti-tax haven rule under the LCITA is triggered.

Korean anti-tax haven rules state that accumulated earnings (distributable retained earnings) of a domestic company's subsidiary located in a low tax jurisdiction (i.e., a tax haven where the effective tax rate on the taxable income for the past three years averages 15% or less), are taxed as deemed dividends to the domestic company, which has direct and indirect interest of 20% or more in such subsidiary.

The foreign tax paid by a qualifying subsidiary is eligible for foreign tax credit against the dividend income of a domestic company if an existing tax treaty between Korea and the country of which the foreign subsidiary is a resident allows it. A qualifying subsidiary is one in which a domestic corporation owns 10% or more of its shares for more than six consecutive months after the date of dividend declaration. Unused foreign tax credits can be carried forward for five years.

**Foreign income**
Domestic companies are taxed on their worldwide income, whereas foreign companies are taxed only to the extent of their Korean sourced income. A Korean company is taxed on its foreign sourced income as earned at normal corporate tax rates. To avoid double taxation, taxes imposed by foreign governments on income recognised by a domestic company are allowed as a credit against the income taxes to be paid in Korea, or as deductible expenses in computing the taxable income. In general, foreign taxes will generally be applied as credit rather than as a deduction.

**Interest income**
Except for certain cases, all interest income must be included in taxable income. Generally, interest income is included in taxable income as it is received.
Inventory valuation
Inventories generally are stated at the lower of cost or market (LCM). Any one of seven inventory valuation methods, including LCM, specific identification, first-in, first-out (FIFO), last-in, first-out (LIFO), weighted-average, moving average, and retail method can be elected for tax purposes. The method elected should be applied consistently each year unless an application for change has been submitted before three months from the year-end. Different valuation methods may be used for different categories ((a) products and merchandise (b) semi-finished goods and goods in process (c) raw materials (d) goods in stock) and different business places.

Partnership income
A partnership taxation system is effective from 1 January 2009. It is applied to address double taxation issue for business entities, such as Hapmyong Hoesa, Hapja Hoesa and limited corporations prescribed by the Presidential Decree. A partnership's income is not subject to corporate income tax. The partners are subject to income tax on the income allocated from their partnership.

Rents/royalties income
A company engaged in the business of the rental of real properties is also taxed on the deemed rental income calculated at the financial institutions’ interest rate on the lease security money as well as on the recognised rental income. Royalties are considered to be taxable income when earned.

Stock valuation
The valuation of securities or bonds shall be made using the cost method. For cost method, the weighted average cost method or moving average cost method shall be applied for the purpose of valuation of securities and individual cost method may be used for valuation of bonds.

Unrealised exchange gains/losses
Except for qualified financial institutions, unrealised foreign exchange gains and losses recognised for financial accounting purposes are not allowed as taxable income or deductions for corporate tax purposes. Therefore, the tax base for foreign currency assets and liabilities shall be the historical amount using the exchange rate at the point of transaction date.

Deductions
Business expenses
In general, expenses incurred in the ordinary course of business are deductible, subject to the requirements for documentary support.

A corporation's disbursement of KRW 30,000 or more for goods or services provided are required to be supported by corroborating documents, such as credit card sales vouchers, cash receipts and tax invoices. The corporation is required to maintain these documents for five years. If the corporation fails to maintain proper evidences, a 2% penalty shall be levied on the amount of disbursement.

Interest expense
Interest incurred in the ordinary course of business is deductible as long as the related loan is used for business purposes. There are, however, a number of exceptions to the general rule, as follows:
1. If borrowings from a foreign shareholder or from a third party under a guaranteed payment guarantee by the foreign shareholder exceeds three times the equity of the relevant foreign shareholder, the paid interest and discount fee as to the relevant excessive portion will be treated as a dividend payment and not allowed as a deduction.

2. Debenture for which the creditor is unknown.

3. Bonds and securities on which recipient of interest is unknown.

4. Construction loans and loans for the purchase of land and fixed assets up to the date in which the assets are acquired or completed must be capitalised as a part of the cost of the asset and depreciated over the life of the asset. Interest after the date of completion or acquisition is deductible as incurred.

5. Interest on loans related to non-business purpose assets or funds loaned to related parties.

**Entertainment expenses**

Entertainment expenses of more than KRW 10,000 on an event basis must be supported by corporate credit card vouchers, cash receipts or tax invoices in order to be deductible. In addition, the entertainment expenses in excess of tax limit are not deductible.

The deductible limit for entertainment expenses in a business year is computed as follows:

i. An amount calculated by multiplying KRW 12 million (KRW 18 million for a SME) with the number of months in the respective business year divided by 12 plus

ii. An amount calculated by multiplying the amount of gross receipts for a business year with rates listed in the following table (in the case of receipts from transactions between related parties, 20% of the amount calculated by multiplying the receipts with following rates shall be applied)

<table>
<thead>
<tr>
<th>Amount of gross receipts</th>
<th>Rate</th>

<tr>
<td>KRW 10 billion – KRW 50 billion</td>
<td>KRW 20 million + 0.1% of the excess over KRW 10 billion</td>
</tr>
<tr>
<td>KRW 50 billion or greater</td>
<td>KRW 60 million + 0.03% of the excess over KRW 50 billion</td>
</tr>
</tbody>
</table>

**Employee remuneration**

There is no statutory limit for employee remuneration, which includes salaries, wages, stipends, bonuses, retirement payments, pensions, meal and housing allowances as well as all other kinds of subsidies, payments and compensation. Remuneration of foreign employees is determined according to their engagement contracts.

**Insurance premiums**

Insurance premiums paid to an insurance company are deductible if the business enterprise is the listed beneficiary. Insurance premiums for which the beneficiary is the employee are also deductible, however, they are treated as salaries for the employees and are subject to withholding tax on earned income (this excludes the severance insurance premium or social security taxes that are borne by the corporations).

**Accrued expenses**

Accrued expenses are not deductible until the expenses are fixed or paid.
Korea, Republic of

**Bad debts**
A doubtful accounts reserve is allowed for tax purposes of up to 1% (2% for certain financial institutions) or the previous year’s ratio of actual loss from bad debts to total balance of account receivables at year-end. Actual losses on bad debts are allowed when certain legal proceedings are satisfied or the statute of limitations has lapsed. The loss should first be charged against the bad debt provision.

**Charitable contribution**
Donations to public interest entities such as government authorities and social welfare organisations as well as donations for academic research, technical development, etc., are classified as Bub-jung donations. Bub-jung donations are tax-deductible up to 50% of the total taxable income for the concerned fiscal year after deduction of net operating loss (NOL). Ji-jung donations to public entities prescribed by Corporate Income Tax Law (CITL) are also tax-deductible up to 5% of the total taxable income for the fiscal year after the deduction of deductible Bub-jung donations and NOL. Apart from Bub-jung and Ji-jung donations, as a temporary tax concession, the STTCL allows the deduction of donations to certain public entities up to 50% of the total taxable income for the fiscal year after deduction of deductible Bub-jung donations and NOL.

The amount in excess of such a limit may be carried over for one or three years. Donations other than the statutory donations above will not be deductible for tax purposes.

**Contingent liabilities**
In general, contingent liabilities are not deductible, except for reserves under the following items which are counted as losses within the tax limit:

1. Reserves for retirement allowance;
2. Reserves for bad debts;
3. Liability reserves and emergency reserves prescribed in the Insurance Business Law;
4. Reserves for non-profit organisations;
5. Reserves for the write-off of a compensation claim set aside by trust guarantee funds in each business year; and
6. The amounts enumerated below are counted as losses in calculating income for the business year:
   a. The amount of gains from insurance claims used to acquire the same kinds of fixed assets as the lost fixed assets, or to improve the damaged fixed assets within two years after the beginning day of the business year following the business year in which the gains fall;
   b. The amount of a beneficiary’s share of construction costs received by a domestic corporation engaged in the electricity or gas business, etc., used for the acquisition of fixed assets; and
   c. The amount of the national treasury subsidies actually used for acquisition or improvement of fixed assets for business.

**Depreciation**
With the exception of land, depreciation of all property, plant and equipment (PP&E), which includes buildings, machineries and auto-vehicles, used to generate income is allowed as a deduction for corporate income tax. Generally, interests on debt acquired to purchase, manufacture or construct PP&E must be capitalised until the PP&E is operational. This does not apply to the interest associated with expansion or
improvement of existing PP&E. A detailed list of fixed assets, gross values (including capitalised interest), the useful lives of the assets, and the current year’s depreciation charge must be submitted to the tax authorities when filing the annual corporate income tax return.

The tax law allows the following methods for calculating depreciation:

1. Straight-line or declining-balance method for tangible fixed assets, other than plant and buildings;
2. Straight-line method for plant, buildings and intangible assets;
3. Service-output or straight-line method for mining rights; and
4. Service-output, declining-balance or straight-line method for tangible fixed assets used in mining.

In determining depreciation using a straight-line method, salvage value of the assets is regarded as zero. However, where the declining-balance method is used, 5% salvage value is required. Changes in the depreciation method must be approved by the tax authorities in advance, and such approval may only be obtained in exceptional cases (i.e., merger between two corporations having different depreciation methods). Although the tax law specifies the useful lives of assets, the useful life of a fixed asset can be increased or decreased by 25% of the specified useful life at the taxpayer’s election. There are no specific rules on recapture of depreciation. The selected depreciation method should be consistently applied.

**Fines and penalties**
Fines, penalties and interest on underpayment of income taxes are not deductible.

**Goodwill**
Goodwill for tax purposes is defined as “value transferred with consideration, apart from transferred assets included in business transfer, valuated by taking into account business premium factors of the transferor such as permission/license, legal privileges, geographical advantages, business secrets, credit, reputation, transaction partners, etc.” Goodwill may be amortised over five years using straight-line method for tax purposes.

**Net operating losses (NOL)**
In general, a NOL carryover is allowed for 10 years for fiscal years commencing after 31 December 2008 (five years for the prior years). Along with the extension of the NOL carryforward period from five years to 10 years, when a taxpayer uses the NOL incurred more than five years ago, the statute of limitation shall be one year from the filing due date of the fiscal year when the NOL is utilised.

Generally, loss carrybacks are not allowed. However, SMEs can carryback a NOL for one year.

**Organisational and start-up expenses**
Start-up expenses such as incorporation expenses, founders’ salary and registration fees and taxes are deductible when the expenses are actually paid.

**Payments to foreign affiliates**
With sufficient supporting documentation, interest, royalty and management service fees paid to foreign affiliates are deductible for income tax purposes.
Under the LCITA, the conditions for a management service fee to be deductible are:

- The services must be provided based on an agreement entered into by the service provider prior to the service transaction;
- The provision of the service can be verified by a schedule of services, description of services, description of the company providing services and its employees, detailed explanation of expenses incurred and other supporting documentation;
- A company must be able to anticipate the company’s additional profit or reduced expense through the services provided by a foreign affiliate; and
- Payment for the provided services should be consistent with arm’s-length standards.

Pension expense
For tax purposes, severance allowance may be deducted up to 5% of the annual total amount of wages paid. However, the accumulated amount of the severance allowance reserve may not exceed 30% of the actual aggregate liability to employees. If a corporation subscribes to severance insurance with an insurance company to cover future payments of retirement allowances, additional tax deductions beyond the limits described above are available.

As of 2011, employers hiring five or more employees are required to set aside retirement pensions for their employees. Defined contribution (DC) and defined benefits (DB) will be two available schemes for the new retirement pension system. Under the DC scheme, the premiums paid by the employer will be deductible upon payment while the reserve under the DB scheme would be deductible subject to the limit, similar to the existing severance insurance.

Payment for directors
Bonuses paid to directors in excess of the amount determined in the articles of incorporation or at a shareholders’ meeting, etc. are not deductible. Also, severance benefits paid to directors in excess of the amount prescribed in the tax law are not deductible.

Group taxation
Consolidation/group taxation rules
The consolidated corporate tax filing system can be adopted from the fiscal year commencing on or after 1 January 2010 for a domestic corporation in case where two or more wholly-owned subsidiaries exists. It is up to the election of the taxpayer, but it cannot be revoked for at least five years after the election of the consolidated tax filing.

Transfer pricing regime
The LCITA authorises the tax authorities to adjust the transfer price based on an arm’s-length price (ALP) and to determine or recalculate a resident’s taxable income when the transfer price of a Korean company and its foreign counterpart is either below or above an ALP.

The LCITA lists the following methods for determining an ALP: the comparable uncontrolled price (CUP) method, the resale price method, and the cost-plus method. Furthermore, the Decree elaborates upon the profit-split method, the transactional net margin method (TNMM) and the Berry Ratio method as methods for determining an ALP based on profits arising from controlled transactions.
The method used and the reason for adopting that particular one for an ALP determination must be disclosed to the tax authorities by a taxpayer in a report submitted along with his annual tax return.

**Thin capitalisation rules**

In case where a Korean company borrows from its controlling shareholders overseas, an amount greater than three times its equity (six times in the case of financial institutions) interest payable on the excess portion of the borrowing is characterised as dividends to which the article on dividends in tax treaty applies and therefore are treated as non-deductible in computing taxable income.

**Anti-tax haven rules**

In case where a Korean company invests in a company located in a tax haven, which unreasonably has reserved profits in the controlled foreign company, the profits reserved therein shall be treated as dividends paid out to that Korean company (individual), despite the fact that the reserved profits are not actually distributed.

Anti-tax haven rules are intended to regulate a company that has made overseas investments of an abnormal nature. Thus, these anti-tax haven rules apply to those Korean companies that have invested in a company incorporated in a foreign country with an average effective tax rate of 15% or less on taxable income for the past three years.

However, if a company incorporated in such a tax haven country actively engages in business operations through an office, shop, or a factory, then anti-tax haven rules will not apply.

**Related party transactions**

Under the provision of CITL, the tax authorities may recalculate the corporation’s taxable income when corporate income tax is unreasonably reduced due to transactions with related parties. Generally, if the discrepancy between the transaction price and fair market value exceeds 5% of the fair market value or KRW 300 million, the transaction will be subject to this provision.

**Tax incentives**

**Foreign taxes paid**

Taxes imposed by foreign governments on income recognised by a domestic taxpayer are allowed as a credit within the limit against the income taxes to be paid in Korea, or as deductible expenses in computing the taxable income. In general, foreign taxes will be applied as credit rather than as a deduction. The excess foreign tax credit can be carried forward five years.

**Inbound investment**

Tax credits are generally available for qualified investment in facilities for productivity enhancement, for safety, temporary investment, etc.

**Tax credit for investment in facilities for productivity enhancement**

In cases where a resident makes an investment in facilities or equipment to increase productivity by, no later than 31 December 2012, in the facilities or equipments to increase productivity, 3% (7% in the case of SMEs) of such investment amount shall be deducted from income tax. The unused tax credit can be carried forward five years.
Tax credit for investment in facilities for safety
In cases where a resident or a domestic corporation makes an investment (no later than December 31, 2012) in a facility (excluding any investment in used assets) considered to be necessary for industrial purposes, an amount of 3% of such investment shall be deducted from its income taxes. The unused tax credit can be carried forward five years.

Temporary tax credit for investment
In cases where the government deems it necessary for business adjustment, the investment amount multiplied by 7% granted by the Presidential Decree (excluding any investment in used items) shall be deducted from corporate income tax. The unused tax credit can be carried forward five years.

Research and development (R&D) tax incentive
The STTCL provides various tax incentives to stimulate R&D activities. These include deduction of R&D reserve, tax credit for research and manpower development expenses.

Reserves for development of technology and manpower
In cases where a corporation has set aside development of technology and manpower reserves for expenses on development of technology and manpower, on or before 31 December 2013, for expenses on development of technology and manpower, those reserves are considered as deductible expenses up to 3% of annual sales.

Tax credit for development of technology and manpower
A corporation, excluding those that run a consumer service business, may receive tax credit for each taxable year on expenses related to the development of technology and manpower.

The tax credit for research expenses on development of technology and manpower is calculated as the greater of 40% or 50% of the excess of expense incurred over the average expense incurred in the previous four years and 3~6% of R&D expense of the current year.

Tax credit for investment in facilities for technology and human resources development
A corporation purchasing facilities prescribed in the Presidential Decree with the purpose of R&D and job training is eligible for tax credit up to 10% of such investment. The unused tax credit can be carried forward five years.

Energy/environment
Tax credit for investment in energy-economising facilities
If a resident makes an investment (excluding any investment in used goods) in energy-economising facilities, not later than by 31 December 2011, 20% of such investment shall be deducted from the corporate income tax.

Tax credit for investment in facilities for environmental protection
In cases where a resident makes an investment (excluding any investment in used goods) in any facility for the purpose of environmental conservation (no later than 31 December 2010), 10% of the investment amount shall be deducted from the income taxes. The unused tax credit can be carried forward five years.
**Employment**
Under the STTCL, where a SME has regular employees that exceed prior year’s number of regular employees for the period from 1 March 2010 to 30 June 2011, KRW 3 million multiplied by the excess number of employees is deductible from corporate income taxes of the year. The unused tax credit can be carried forward five years.

**Foreign investment incentives**
The Korean government provides various incentives and benefits for inducing foreign investment under the Foreign Investment Promotion Law, which include the following:

- Foreign invested companies that engage in certain qualified high-technology businesses can apply for 100% exemption from corporate income tax for five years, beginning from the first year of profitable operations (from the fifth year, if not profitable until then) and a 50% reduction for the following two years in proportion to the foreign shareholding ratio. An exemption from withholding tax on dividends is available for foreign investors in the same manner as above during the same grace period. In addition, the taxpayer can apply for 100% exemption from local taxes, such as acquisition tax, registration tax, and property tax on assets acquired for their business for five years after business commencement date and 50% reduction for the following two years. For local tax exemption, some local government grants a longer exemption period (up to 15 years) in accordance with their local ordinances. Qualified foreign investment also can be eligible for the exemption from customs duties, VAT and special excise tax on imported capital goods for the first three years.

- In addition, foreign investors satisfying specified criteria are provided with tax incentives and other benefits for investment in specially designated areas including foreign investment zones (FIZ), free economic zones (FEZ), free trade zones (FTZ) and strategic industrial complexes exclusively developed for foreign invested companies. The tax incentives for qualifying foreign investors in FIZ are similar to those of the above foreign invested high-tech companies. Qualifying investors in FEZ, FTZ and strategic industrial complexes may receive the 100% exemption from corporate or individual income tax as well as local taxes for the first three years and 50% reduction for the next two years. An exemption from withholding tax on dividends is granted to qualifying foreign investors in FEZ, FTZ and such industrial complexes in the same manner as above during the same grace period. They also receive the exemption from customs duties on imported goods for the first three years.

**Withholding taxes (WHT)**
Foreign corporations with income derived from sources in Korea are subject to corporate income tax on such income. If the foreign corporation has no “domestic place of business” in Korea, it will be subject to tax on its Korean-source income on a withholding basis on its Korean-source income in accordance with the tax laws and the relevant tax treaty, if applicable. Any Korean source income attributable to a domestic fixed place of business of a foreign corporation will be subject to Korean income tax.

There are various limitations on these withholding taxes for residents of countries with a tax treaty with Korea. For dividends, interest, and royalties, the withholding tax rates are limited as follows.

Notes

1. Dividends and interests paid to resident individuals by corporations generally are subject to a 14% withholding rate and in addition to this, there is resident surtax of 10% on the income tax liability.
2. In addition to the indicated tax rate, resident surtax would be charged at a rate of 10% of the respective tax rate.
3. Lower rate applies in case of equity ownership of 10% or more.
4. 10% rate applies to royalties paid for the use of or the right associated with industrial activities.
5. 10% rate applies if the loan period extends to seven years or more, the recipient is a financial institution and the loan is used for certain designated purposes.

6. 25% rate applies to royalties associated with the use of trademarks or trademark rights.

7. 5% rate applies in case of equity ownership of 15% or more.

8. Lower rate applies in case of equity ownership of 25% or more.

9. 10% rate applies if the term of loans exceeds three years.

10. 10% rate applies when a recipient of interest income is a bank and income is connected with a loan with a term in excess of seven years.

11. Lower rate applies in case of equity ownership of 20% or more.

12. 10% rate applies if a recipient is a bank.

13. 5% rate applies if a recipient holds 10% or more ownership in a paying corporation but, even in case of 10% or more ownership, 10% rate applies if the dividends are paid out of profits subject to tax at a lower rate than the normal corporate tax rate of a country where a payer resides. In other cases, 15% rate applies.

14. 7.5% rate applies when a recipient of interest income is a bank or a financial institution.

15. 2% rate applies to royalties paid for use of or the right to use industrial, commercial or scientific equipment.

16. 10% rate applies if it is for the use of or the right to use industrial, commercial and scientific equipment or information.

17. 15% rate applies if royalties are for use of or the right to use cinematography films or tapes for radio or television broadcasting or any copyright of literary or artistic work.

18. 0% rate applies in case of equity ownership of 10% or more.

19. 5% rate applies if a recipient is a bank.

20. 5% rate applies to royalties for use of copyrighted literature, music.

21. 10% rate applies if the term of the loans exceeds seven years.

22. Lower rate applies if it is for the use of or the right to use patent, trademark, design or secret formula, or industrial, commercial and scientific equipment or information.

23. 10% rate applies in cases of equity ownership of 25% or more, or dividend paid by a resident company engaged in a preferred pioneer area and registered with the Board of Investment.

24. 10% rate applies in cases where the interest is paid in respect of public offering of bonds, debentures or similar obligations or interest paid by a company that is a resident of the Philippines, registered with the Board of Investment and engaged in preferred pioneer areas of investment under the investment incentive laws.

25. 10% rate applies in case of royalties paid by a company that is a resident of the Philippines, registered with the Board of Investment and engaged in preferred pioneer areas of investment under the investment incentives laws.

26. 5% rate applies if a recipient holds 30% or more of equity interest in the amount of at least USD 100,000.

27. 10% rate applies if a beneficial owner of the income is a financial institution (including insurance company) or resident of Thailand who is paid with respect to indebtedness arising as a consequence of a sale on credit by a resident of Thailand of any equipment, merchandise or services, except where the sale was between persons not dealing with each other at arm’s length.

28. 10% rate applies if the term of the loan exceeds two years.

29. 10% rate applies to royalties for use of copyrighted literature, music, films, and television or radio broadcasts. Otherwise, 15% rate applies.

30. 10% rate applies if equity ownership is 10% or more and not more than 25% of the gross income of a paying corporation for a preceding tax year consists of interest or dividends.

31. 10% rate applies when a recipient of interest income is a bank or an insurance company.

32. 5% rate applies when a recipient holds 25% or more of equity interest, and 10%, when a recipient holds 10% or more of equity interest. In other cases, 15% rate applies.

33. 5% rate applies to royalties paid for the use of or the right associated with industrial, commercial or scientific equipment.

34. 0% rate applies to royalties paid for the use of academic right.

35. 5% rate applies to royalties paid for the use of or the right associated with any copyright of literary, artistic or scientific work, including software, and motion pictures and works on film, tape or other means of reproduction for use in connection with radio or television broadcasts.
broadcasting. 10% rate applies to royalties paid for the use of or the right to use patent, trademark, design or model, plan, secret formula or process. 15% rate applies to royalties paid for the use of or the right to use industrial, commercial or scientific equipment, or for information concerning industrial, commercial or scientific experience.

36. 14% rate applies if interest arises from bonds issued by Korean company or government bodies.
37. 0% rate applies if a recipient of interest income is government, central bank, etc.
38. 5% rate applies to royalties paid for the use of industrial, commercial or scientific equipment.
39. Effective from 1 January 2004, fees arising from rental of industrial, commercial, scientific equipment, etc., are classified as rental income subject to 2% withholding tax.

Under the new withholding tax rules, which came into effect from 1 July 2006, if a foreign company is located in a foreign jurisdiction designated by the Minister of Strategy & Finance, any Korean-source income of such foreign company will be subject to the domestic withholding rate of 20%, beginning on 1 January 2009 (previously 25%), regardless of whether or not the foreign company is resident of a treaty country. Currently, only Labuan is designated as such jurisdiction for the purpose of the new withholding tax rules. The foreign company may claim a refund of any excess withholding tax paid within three years, if it proves to the Korean Tax Office that it is entitled to the reduced treaty rates as the substantive and beneficial owner of the income. Alternatively, a foreign company may attempt to seek a pre-approval in order to have the treaty benefits apply upfront by making an application to the Commissioner of Taxation.

**Tax administration**

**Taxable year**
In Korea, the taxable year is on a fiscal-year basis as elected by the taxpayer. However, it cannot exceed 12 months.

**Audit cycle**
In September 2009, the National Tax Service (NTS) announced the “Plan for Tax Audits,” criteria for selection of a tax audit target company are as follows.

For large companies whose sales revenue is KRW 500 billion or more, the tax audit would be conducted every four years, and the other companies are selected by the certain standards which were announced by NTS.

**Statute of limitations**
The statute of limitation is generally five years from the statutory filing due date of the annual corporate income tax return. However, the statute of limitation is extended further in the following cases:

1. 10 years if a taxpayer evades taxes by fraud or unjustifiable means;
2. Seven years if a taxpayer does not file its tax base by the statutory due date; or
3. 10 years for inheritance tax and gift tax (15 years in cases of fraudulent return, noncompliance with filing of tax base, or false or incomplete returns).

Along with the extension of the NOL carryforward period from five years to 10 years, when a taxpayer uses the NOL incurred more than five years ago, the statute of limitation shall be one year from the filing due date of the fiscal year when the NOL is utilised.
**Tax return due dates**
A corporation must file an interim tax return with due payment for the first six months of the fiscal year and the filing/payment must be made within two months after the end of this interim six-month period.

A corporation must file an annual tax return with due payment for the fiscal year and the filing/payment must be made within three months from the end of a fiscal year.

**Payment of tax**
Where the tax amount to be paid by a domestic corporation is in excess of KRW 10 million, part of the tax amount to be paid may be paid in instalments within one month of the date of the expiration of the payment period (two months for SMEs).

Where the tax amount to be paid is less than KRW 20 million, the excess of KRW 10 million shall be paid in instalments; where the tax amount to be paid exceeds KRW 20 million, 50% or less of the tax amount shall be paid in instalments.

**Topics of focus for tax authorities**
Recently, topics of focus for tax authorities are as follows:

- Increased scrutiny for the prevention of offshore tax evasion through aggressive tax planning;
- Denial of unfair transactions between related parties;
- Entertainment expenses;
- Deductibility of management service fee or allocated expenses incurred by foreign affiliates; and
- International inter-company transactions and transfer pricing.

**Other issues**

**Foreign investment incentives and restrictions**
The Foreign Investment Promotion Act (FIPA) has been enacted to facilitate foreign investment through support and provision of convenience for foreign investment. The FIPA is the basic law for foreign investment and its subordinate acts include the Enforcement of the FIPA. Enforcement Promotion Act and Enforcement Regulations stipulating matters delegated by the Foreign Investment Promotion Act and matters required for enforcement, and regulations on foreign investment and technology import.

Also, unless stated otherwise in the FIPA, the Foreign Exchange Trade Act will apply to matters related to foreign exchange and external dealings related to foreign investments. The Tax Exemptions and Exceptions Act and its regulations on tax reductions on foreign investments, etc., will apply to tax reductions for foreign investments.

However, since foreign-invested companies are local corporations established under domestic law, the same laws that apply to purely domestic corporations will apply even if the foreign-invested company has gone through the processes as prescribed in the FIPA. Therefore, if approval and permission under each law are required, the relevant business may be conducted only after the required processes are completed.
**Exchange controls**

Most transactions involving foreign exchange generally do not require approval or reporting under FETA, with a few exceptions as prescribed by the FETA. Receipt of foreign exchange from outside the ROK (Republic of Korea) is freely permitted, and payments to foreign companies are not regulated. Most restrictions on Korean companies’ foreign currency transactions with foreigners have been removed. However, the government continues to monitor certain flows of foreign currency in an attempt to minimise incoming speculative currency and outgoing capital flight.

Ever since Korea’s currency crisis, most restrictions on short-term as well as mid- and long-term borrowings from overseas by corporations have been removed. Most foreign currency loans are allowed, and are subject to reporting to a foreign exchange bank. There are no specific regulations, except the reporting requirements, on borrowings from overseas by foreign investment companies in Korea.

**Choice of business entity**

The following types of commercial entities are permitted.

1. **Corporation (Hoesa)** – There are five classes of corporation, outlined as follows:
   a. **Limited corporation:**
      i. **Jusik Hoesa (JH):** A corporation incorporated by one or more promoters, with each shareholder’s liability limited to the amount of contributed capital. This type of entity is the most commonly used in Korea.
      ii. **Yuhan Hoesa (YH):** A corporation incorporated by one or more members, with each member’s liability limited to the amount of that member’s contribution to the corporation.
      iii. **Yuhan Chegim Hoesa (a newly proposed form for legislation):** A corporation incorporated by one or more members, with each member’s liability limited to the amount of that member’s capital contribution. With significantly fewer restrictions for establishment and operation, Yuhan Chegim Hoesa provides more flexibility and self-control than YH.
   b. **Unlimited corporation:**
      i. **Hapmyong Hoesa:** A corporation incorporated jointly by more than two members who are responsible for corporate obligations, if the assets of the corporation are insufficient to fully satisfy those obligations.
      ii. **Hapja Hoesa:** A corporation composed of one or more partners who have unlimited liability and one or more partners with limited liability.
2. **Partnership** – **Hapja Johap,** a newly proposed form, is a legal form of partnership allowed under the Commercial Code.
3. **Joint venture** – A joint venture is generally established as a domestically incorporated corporation whose shareholders have limited liability regarding the obligations of the corporation under the Commercial Code.
4. **Branch** – A foreign corporation can perform its business operation in Korea by setting up a taxable presence in the form of a branch office.
5. **Liaison office** – A foreign corporation can establish a liaison office which is not allowed to execute income-generating business activities in Korea.
6. **Sole proprietorship** – Sole proprietorships are not a legal form of entity in Korea.

Significant developments

Tax law No. 2 of 2008, which was issued by the Kuwaiti government on 22 January 2008, amended the Kuwait Income Tax Decree No. 3 of 1955 and other corporate and taxation related matters in Kuwait.

One of the major changes of the new tax law is the reduction of the tax rates, which previously reached a maximum rate of 55%, to a flat rate of 15%.

Taxes on corporate income

Kuwait does not impose income tax on companies wholly owned by the nationals of Kuwait or other Gulf Cooperation Council countries (GCC), including Bahrain, Oman, Qatar, Saudi Arabia and the United Arab Emirates. Income tax is imposed only on the profits and capital gains of foreign “corporate bodies” conducting business or trade in Kuwait, directly or through an agent.

Governing laws

Kuwait Income Tax Decree No. 3 of 1955 and Law No. 2 of 2008, amending the income tax decree. These laws are applicable to business activities carried out in Kuwait, exclusive of the neutral zone.

Law No. 23 of 1961, applicable to business activities carried out in the neutral zone. Foreign companies carrying on trade or business in the offshore area of the partitioned neutral zone under the control and administration of Saudi Arabia are subject to tax in Kuwait on 50% of taxable profit under the above-mentioned Law.

Income subject to tax

Article 2 of the amended tax law, provides that income earned from the following activities in Kuwait shall be considered subject to tax in Kuwait:

1. Any activities or business carried out either entirely or partially in Kuwait, whether the contract has been signed inside or outside Kuwait, as well as the any income resulting from supply or sale of goods, or from providing services.
2. The amounts collected from the sale, rent, or granting of a franchise to utilise any trademarks, design, patents, copyright, or other moral rights, or those related to intellectual property rights for use of rights to publish literary, arts or scientific works of any form.
3. Commission earned or resulting from agreements of representation or commercial mediation, whether such commissions are in cash or in kind.
4. Opening a permanent office in Kuwait where the contract of purchase and sale is signed and acts as a work site in which the activities are performed or contracts are signed, whether the site is owned by the taxpayer, rented from another party, or the activities are performed in another party location in Kuwait.

5. Profits resulting from the following:
   • Any industrial or commercial activity in Kuwait;
   • Disposal of assets, either through the sale of the asset or part of the asset, or the transfer of the asset’s ownership to others or any other form of disposal, including the disposal of shares in a company whose assets mainly consist of non-movable capital existing in Kuwait;
   • Granting loans in Kuwait;
   • Purchase and sale of property, goods, or related rights in Kuwait, whether such rights are related to monetary assets or moral rights such as mortgage and franchise rights;
   • Lease of property used in Kuwait;
   • Providing services, including profits from management, technical and consultancy services; and
   • Carrying out trading activities in the Kuwait Stock Exchange whether directly or through portfolios or investment funds.

**Tax imposed on Kuwaiti-source income**

In cases where a contract involves the performance of work both inside and outside Kuwait, the entire revenue from the contract must be reported for tax in Kuwait, including the work carried out outside Kuwait.

**Tax rate**

Under law No. 2 of 2008, the tax rate has been reduced to a flat rate of 15% effective for fiscal years beginning after 3 February 2008.

**Capital gains**

Capital gains on the sale of assets and shares by foreign shareholders are treated as normal business profits and are subject to tax at the rate stated above. Article 1 of Law No. 2 of 2008 provides for a possible tax exemption for profits generated from dealing in securities on the Kuwait Stock Exchange (KSE), whether directly or through investment portfolios.

**Dividend or distribution of profits**

Treatment of dividends is not specifically addressed in the amended tax law or in its bylaws. The bylaws to the amended tax law, however, require investment companies or banks that manage portfolios or funds or act as custodians of shares for foreign entities to deduct corporate tax due from payments due to foreign investors. Tax payment should be made within 30 days from the date of the deduction of tax, together with a list showing names of the foreign entities and the amount withheld from each.

Under the original tax law, no tax was imposed on dividends paid to foreign shareholders by Kuwaiti companies.

**Tax exemption**

The following sources of income are exempt from tax in Kuwait, as per the amended Law No. 2 of 2008:
Kuwait

1. Kuwaiti merchants purchasing, transporting and selling goods imported on their own account where the foreign supplier has not been involved in Kuwait operations.

2. Profits of a corporate body generated from dealing in securities listed in the KSE, whether such activities are carried out directly or through investment portfolios or funds.

**Corporate residence**

A foreign corporate body is any association formed and registered under the law of any country or state other than Kuwait that is registered as having a legal existence entirely separate from that of its individual members. No Kuwait-registered company is subject to income tax. However, any foreign corporate body that is a shareholder in a Kuwait-registered company undertaking business in Kuwait is subject to tax as noted above. For the purposes of this law, GCC residents and entities wholly owned by GCC residents are treated in the same manner as Kuwaiti business entities.

**Other taxes**

*National Labour Support Tax (NLST)*

NLST Law No. 19 of 2000 was issued by the Ministry of Finance (MOF) on 21 May 2000 and came into effect a year later on 21 May 2001. The purpose of the law is to encourage the national labour force to work in the private sector by closing the gap in salaries and benefits between public and private sectors.

As per the law, Kuwaiti companies listed in the Kuwait Stock Exchange (KSE) are required to pay an employment tax of 2.5% of the company's net annual profits.

*Zakat*

Zakat Law No. 46 of 2006 was issued on 27 November 2006 and came into effect as of 10 December 2007.

Zakat is imposed on all publicly traded and closed Kuwaiti shareholding companies at a rate of 1% of the companies' net profits.

*Contribution to the Kuwait Foundation for the Advancement of Sciences (KFAS)*

Published Closed Kuwaiti Shareholding Companies are required to pay 1% of their net profits as per their financial statements after their transfer to the statutory reserve and the offset of loss carryforwards, to the KFAS, which supports scientific progress.

*Social security*

There are no social security obligations for expatriate workers. However, for foreign employees it is generally necessary to make terminal indemnity payment calculated at 15 days' pay per year for the first five years of service and one month's pay per year thereafter.

For Kuwaiti employees, contributions are payable monthly by both the employer and employee under the Social Security Law. The employer's contribution is 11% and the employee's is 7% of monthly salary, up to a ceiling of KWD 2,250 per month. Benefits provided, include pensions on retirement and allowances for disability, sickness and death.
**Branch income**

Tax rates on branch profits are the same as on corporate profits.

**Income determination**

Income tax is imposed on the profit of a business in Kuwait as calculated by the normal commercial criteria, using generally accepted accounting principles, including the accrual basis. Note that provisions, as opposed to accruals, are not deductible for tax purposes. In addition, for contract accounting, revenue is recognised by applying the percentage of completion method. Work-in-progress carried forward may not exceed 20% of work executed.

**Deductions**

All expenses, other than in the nature of capital expenses and head office expenses (refer below), incurred in the conduct of a business or trade, wherever incurred, are deductible, provided that the expenditure is supported by full documentation.

**Assets and depreciation**

In accordance with Article 4 of Law No. 2 of 2008, depreciation is taken on a straight-line basis at specified rates. However, within 90 days prior to submission of the tax declaration, the taxpayer may request that the tax department calculate the depreciation using a different method than the straight-line method. The tax department shall accept this request provided it is based on a reasonable basis in accordance with the tax accounting principles and rules.

The principal depreciation rates are specified in the law.

**Head office expenses/payments to foreign affiliates**

As noted above, the deductibility of head office expenses (e.g., allocations of head office expenses), or payments to a head office may not be deductible in full. The Bylaws to the amended tax law contain specific provisions relating to head office administrative expenses and specialist tax advice should be sought on this subject. This matter is frequently raised during tax audits in Kuwait.

**Relief for losses**

As per the amended tax law, losses may be carried forward for a maximum of three years, provided that the following situations do not arise in the fiscal period following the period in which the loss was recorded:

- The tax declaration does not include any revenue from the business activities of the taxpayer in Kuwait;
- Change in the legal structure of the taxpayer;
- Merger of the taxpayer with another entity; or
- Liquidation or ceasing of the activities of the taxpayer in Kuwait.

**Group taxation**

If a foreign company conducts more than one business activity in Kuwait, one tax declaration aggregating the income from all activities is required to be submitted in Kuwait. In addition, in the case where two affiliates are involved in similar lines of
Kuwait

business or work on the same project, their taxable results may be aggregated for the assessment of tax.

**Tax incentives**

**Law No. 8 of 2001: Direct foreign capital investment law**

Law No. 8 of 2001 aims to encourage foreign investment participation in Kuwait, allowing up to 100% of foreign ownership in Kuwaiti businesses.

Some of the privileges under this law include:

- Exemption from income tax or any other taxes for a period of 10 years from the commencing of the actual operations of the enterprise;
- Benefits under double taxation agreements;
- Benefits under investment encouragement and protection agreements;
- Total or partial exemption from custom duties on imports;
- Recruitment of required foreign labour; and
- Allotment of land and real estate.

**Law No. 12 of 1998**

Law No. 12 of 1998 provides for a five-year tax holiday to non-Kuwaiti shareholders of investment and leasing companies formed in Kuwait for five years from the date of formation, if the principal business is in Kuwait.

**Withholding taxes (WHT)**

Apart from the withholding tax on dividends arising from trading in the KSE, there are no other withholding taxes. However, under Executive Rule No. 12 of Law No. 2 of 2008, all government bodies and private entities are required to retain the final payment due to a contractor or subcontractor until presentation of a tax clearance certificate from the MOF, confirming that the respective company has settled all of its tax liabilities. The final payment should not be less than 5% of the total contract value.

**Tax treaties**

Kuwait has entered into tax treaties with several countries for the avoidance of the double taxation. Treaties with several other countries are at various stages of negotiation or ratification.

However, little experience has been gained in Kuwait regarding the application of tax treaties. As a result, disputes about the interpretation of various clauses in tax treaties between taxpayers and the Director of Income Taxation (DIT) are not uncommon. Disputes with the DIT regarding tax treaties normally arise with respect to the following issues:

- Existence of a permanent establishment;
- Income attributable to a permanent establishment; or
- Tax deductibility of costs incurred outside Kuwait.

The domestic tax law in Kuwait does not provide for withholding taxes. As a result, it is not yet known how the Kuwaiti government will apply the withholding tax procedures included in the treaties listed in the table below. The withholding rates listed in the table are for illustrative purposes only.

Notes

a. The rate is 0% for amounts paid to a company of which the government owns at least 20% of the equity.

b. The rate is 0% for interest paid to the government of the other contracting state. Under the Ethiopia treaty, the rate is also 0% for the interest paid to entities in which the
government owns a specified percentage of the equity and for interest paid on loans guaranteed by the government.

c. The rate is 0% for dividends and interest paid to the government of the other contracting state. Under the Ethiopia treaty, the rate is also 0% for dividends paid to entities in which the government owns a specified percentage of the equity.

d. The rate is 10% for dividends paid to the government of Kuwait or any of the institutions or any intergovernmental entities. The rate is 15% for other dividends.

e. The 5% rate applies if the recipient of the dividends owns directly or indirectly at least 10% of the payer. The 15% rate applies to other dividends.

f. The rate is increased to 5% if the beneficial owner of the interest carries on business in the other contracting state through a permanent establishment and the debt on which the interest is paid is connected to such permanent establishment.

g. The rate is 0% for amounts paid to the government of the other contracting state and to entities of which the government owns at least 51% of the paid-up capital.

h. For dividends and interest, the rate is 0% if the payments are made to the government or a governmental institution of the other contracting state, or to a company that is a resident of the other contracting state and is controlled by, or at least 49% of the capital is owned directly or indirectly by, the government or a governmental institution. A 0% rate also applies to interest arising on loans guaranteed by the government of the other contracting state or by a governmental institution or other governmental entity of the other contracting state.

i. A 0% rate applies if the beneficial owner of the dividends is a company that holds directly at least 10% of the capital of the company paying the dividends.

j. The rate is 0% if the payments are made to the government or a governmental institution of the other contracting state, or to a company that is resident of the other contracting state and is controlled by, or at least 25% of the capital is owned directly or indirectly by, the government or a governmental institution of the contracting state.

k. The rate is 0% if the beneficial owner of the interest is a resident in the other contracting state and the loan is secured or financed directly or indirectly by a financial entity or other local body wholly owned by the government of the other contracting state.

l. The 5% rate applies if the recipient of the dividends owns directly or indirectly at least 25% of the payer. The 10% rate applies to other dividends.

m. The rate is 5% if the beneficial owner of the dividends is a company that owns 10% or more of the issued and outstanding voting or 25% or more of the value of all of the issued and outstanding shares. The 15% rate applies to other dividends.

n. Dividends or interest paid by a company that is resident of a contracting state is not taxable in that contracting state if the beneficial owner of the dividends or interest is one of the following:
   - The government;
   - A political subdivision or a local authority of the other contracting state;
   - The Central Bank of the other contracting state; or
   - Other governmental agencies or governmental financial institutions as may be specified and agreed to in an exchange of notes between the competent authorities of the contracting state.

In addition to the above treaties, a tax treaty for the Avoidance of Double Taxation and Income Tax Evasion has recently been signed on 17 February 2010, between Japan and the State of Kuwait. However, the tax treaty has not yet been published officially and is still subject to amendment by the Parliament during their final review.

**Tax administration**

Tax is imposed on profits arising in a taxable period, which is defined as the accounting period of the taxpayer and further assumed to be the calendar year. However, the Director of Income Taxes may agree to a written request from the taxpayer to change the year-end to a date other than December 31. Also, at the taxpayer’s request, the Director of Income Taxes may agree to extend the accounting period, provided it does
not exceed 18 months. The taxpayer must submit a tax return, based on the taxpayer’s books of account, within three months and 15 days of the end of the taxable period. Upon application, the Director of Income Taxes may extend the filing period by a maximum of 60 days.

The taxpayer must keep in Kuwait certain accounting records, which are subject to inspection by the Tax Department’s officials. Accounting records may be in English and may be in a computerised system used to prepare financial statements, provided that the system includes the required records and the tax department is previously informed.

The tax return should be supported by the following:

1. Audited balance sheet and profit-and-loss account for the period;
2. Detailed list of fixed assets (e.g., additions, disposals, etc.);
3. List of inventory (e.g., quantities and values);
4. List of subcontractors and the latest payments to them;
5. Copies of current contracts and a statement of income and expenditure for each;
6. Trial balance, forming the basis of the accounts;
7. Last payment certificate from the client; and
8. Insurance companies must attach to the Public Budget and the tax declaration a detailed statement with the reinsured documents and the related terms and conditions.

As a general rule, an assessment is finalised only after inspection of records by the tax department. As indicated above, proper documentation must be kept to support expenditure and to avoid disallowances at the time of tax inspection. If support is considered inadequate, the assessment is apt to be made on the basis of deemed profitability. This is computed as a percentage of turnover and is fixed arbitrarily, depending on the nature of the taxpayer's business.

**Payment of tax**
Tax is payable in four equal instalments on the fifteenth day of the fourth, sixth, ninth, and twelfth months following the end of the tax period. If an extension is approved by the Director of Taxes, all of the tax is payable upon the expiration date of the extension. Failure to file or pay the tax on time attracts a penalty of 1% of the tax liability for every 30 days of delay or part thereof.

**Objection**
If a company disagrees with an assessment issued by the DIT, the company should submit an objection within 60 days from the date of the assessment. The DIT is required to resolve the objection within 90 days of the filing of the objection, after which a revised tax assessment is issued by the DIT. Upon issuance of a revised tax assessment, any additional tax is payable within 30 days. If the DIT issues no response within 90 days of filing the objection, this implies that the taxpayer's objection has been rejected.

**Appeal**
In case the objection is rejected or the taxpayer is still not satisfied with the revised tax assessment, the company may contest the matter further with the Tax Appeals Committee (TAC), by submitting a letter of appeal within 30 days from the date of the
objection response or 30 days from the expiry of the 90 days following submission of an objection if no response is provided by the DIT.

The matter is then resolved through appeal hearings and a final revised assessment is issued based on the decision of the TAC. Tax payable per the revised assessment must then be settled within 30 days from the date of issuance of the revised assessment. Failure to do so results in a delay penalty of 1% of the amount of the tax due per the final assessment for each period of 30 days or part thereof of the delay.

**Other issues**

**Offset program**

Kuwait has designed a counter-trade offset program to meet the objectives of its economic development plan. The offset program derives from the government’s concern that the long-term benefits from job creation and capital accumulation resulting from government contracts with foreign suppliers unfairly accrue to the suppliers, at the expense of Kuwaiti companies and citizens. The objective of the offset program is to remedy this problem by encouraging collaborative business ventures between foreign contractors and the Kuwaiti private sector. Accordingly the offset program has been established with the following objectives:

- Promoting sustainable economic development in Kuwait, by the assimilation of modern technology and know-how in the local economy;
- Supporting projects that generate high skilled jobs for Kuwaiti nationals; and
- Attract foreign investment capital to facilitate economic development in Kuwait.

The MOF initially issued guidelines for the program in 1995. The MOF has also issued Ministerial Order 13 of 2005 reactivating the program. The following are significant aspects of the program:

- All civil contracts with a value of KWD 10 million and more, and defence contracts with a value of KWD 3 million and more attract the offset obligations for contractors. The obligations become effective on the signing date of the contract.
- The contractors covered by the offset obligation are required to invest 35% of the value of the contract with Kuwaiti government bodies.
- Offset obligators have the following options for fulfilling their offset obligation:
  1. Implement investment projects suggested by the Offset Program management;
  2. Propose their own investment projects, and seek approval of the Offset Program management;
  3. Participate in any of the funds that the Offset Program management may establish; or
  4. Purchase of commodities and services of Kuwaiti origin. The MOF is however still finalising detailed regulations in this regard.
- Contractors covered by the offset obligation must provide unconditional, irrevocable bank guarantees issued by Kuwaiti banks to the MOF equal to 6% of the contract price. The value of the bank guarantee submitted will be reduced gradually based on the actual execution of its work by the foreign contractor/supplier. The MOF has the right to cash in the bank guarantee if offset obligor fails to respect their offset obligation.

Significant developments

Kyrgyzstan’s tax system is regulated by the Tax Code No. 230 which became effective starting 1 January 2009 (tax code). The Kyrgyzstan tax system consists of both national and local taxes. National taxes set out in the tax code include a profits tax on legal entities, personal income tax, value-added tax (VAT), sales tax, excise tax, and subsurface use taxes; local taxes include property tax and land tax.

Taxes on corporate income

Pursuant to the tax code, resident and foreign legal entities carrying out business activities through a permanent establishment that earns Kyrgyzstan source income is subject to the corporate income tax called “profit tax”.

Profit tax is calculated at a rate of 10% of aggregate annual income less allowed deductions. Corporate income tax is payable via quarterly advance payments (not later than twentieth day of the second month following the reporting quarter).

Corporate residence

Permanent establishment

In Kyrgyz tax legislation, a permanent establishment is a permanent place of business, through which a non-resident carries out business operations, including activities performed through an authorised person. A permanent establishment includes the following:

- Any place of management, department, office, factory, workshop, mining, oil and gas wells, land, construction site or project; and
- Any services rendered by non-residents by hiring personnel working in the territory of Kyrgyzstan for a duration of more than 183 calendar days within any consecutive 12-month period.

A permanent establishment is not created in Kyrgyzstan if a non-resident is limited to the following activities in Kyrgyzstan:

- Use of warehouses or buildings exclusively for storage, demonstration activities;
- Use of a fixed place of business exclusively for preparatory purposes; or
- Performance of activities in Kyrgyzstan through an agent in cases where such agent usually performs such activities in the ordinary course of business.
Kyrgyzstan

Creation of a permanent establishment may be connected with the establishment of a branch or subsidiary. Both branches and subsidiaries are considered appropriate business vehicles for foreign investors and the choice between them would be determined by the business the investor is engaged in, along with various other factors.

Other taxes

Value-added tax (VAT)
In Kyrgyzstan, VAT is assessed on taxable supply and taxable imports. Input VAT assessed on purchases used for business purposes is generally offset against output VAT on taxable supplies. The VAT rate is 12% except for certain zero-rated supplies (such as international transportation and exports) and certain exempt turnover.

All taxpayers registered for VAT purposes are required to charge VAT on their taxable supply, and calculate and report their VAT liabilities.

Taxpayers are required to register for Kyrgyzstan VAT purposes if their taxable supply in the preceding 12 calendar months exceeds KGS (Kyrgyzstani Som) 4,000,000. Even if an entity is not required to register for VAT purposes, it may still do so voluntarily by submitting an application to the appropriate tax committee.

Place of supply of goods
Goods and services are subject to VAT if they are deemed to be supplied in Kyrgyzstan under the place of supply rules. According to these rules, transactions are deemed to be made at the place where transport of the goods begins if the goods are transported by the supplier, and in all other cases, at the place where the goods are transferred to the customer. The rules regarding services are more complicated. Services that are not specifically mentioned are deemed to be supplied at the place where the service provider has established his place of business. Certain other services are deemed to be supplied at the place of the purchaser.

Import of goods
Generally, imports of goods are subject to import VAT.

Zero-rate VAT
There are turnovers subject to zero-rate VAT. These include exports (except for certain limited types of export), and international transportation. Supply of goods (works, services) for official use of diplomatic and consular representations is taxable, but may be refunded provided that certain conditions are met.

Exempt supplies
Certain supplies are VAT-exempt, including (among others) supplies and exports of gold alloy and refined gold, supplies of pharmaceuticals, land plots, residual buildings and construction, and financial services. When a taxpayer generates both taxable and exempt supplies, input VAT proportional to the ratio of the exempt supply to the total supply should be disallowed for offset.

VAT on supplies
Taxable supply includes any sale of goods, works and services, and taxable import in Kyrgyzstan, unless the supply is specifically exempted or if the place of supply is deemed to be outside Kyrgyzstan.
VAT offset
VAT paid on services and goods purchased by a VAT payer (i.e., input VAT) and VAT paid at customs should generally be available for offset (credit) when determining a taxpayer’s VAT liability. However, offset is not available for certain VAT (e.g., VAT incurred for the purpose of supplies which are deemed to be supplied outside of Kyrgyzstan).

VAT liability calculation and VAT offset carryforward
In general, the VAT liability of a taxpayer is calculated as output VAT (i.e., VAT charged by a taxpayer) less input VAT (i.e., VAT paid by a taxpayer to its suppliers) in a reporting period.

The excess of input VAT over output VAT may generally be carried forward against future VAT liabilities.

Non-deductible input VAT
The input VAT is not allowed for offset if it is subject to payment in connection with the receipt of goods (work, services) not related to entrepreneurial activity, or if it relates to inputs for VAT exempt supplies.

VAT incentives
Certain imports are VAT exempt, including imports of technological equipment, if it is used for own production purposes. Recently, a preferential offset method of VAT settlement in respect of certain fixed assets imported to Kyrgyzstan has been introduced, whereby the import VAT does not need to be paid to customs but is reflected simultaneously as input and output VAT in the VAT accounts.

VAT compliance
The tax period for VAT is a calendar month. The submission of the VAT declaration is due by the end of the month following the reporting period. Payment of the VAT liability is due by the twenty-fifth of the month following the reporting period.

Reverse-charge VAT
The current tax code does not have any provisions on reverse-charge VAT.

Customs duties and regimes
The new Customs Code entered into force from 1 January 2005. According to the Customs Code, the customs value of goods imported to the customs territory of the Kyrgyz Republic is determined by applying the following methods:

- Transaction value of imported goods;
- Transaction value of identical goods;
- Transaction value of similar goods;
- Deductive method;
- Computed method; and
- Provisional method.

Import restrictions
Generally all entities or persons have equal rights to import and export or transfer goods into the Kyrgyzstan territory, including when carrying out foreign trade activity, except in special cases as stipulated by legislation and international treaties.
Kyrgyzstan

Import of certain goods (e.g., weapons, nuclear materials, etc.) is subject to licensing.

Temporary import relief
There is a temporary import regime under which foreign goods are used in the Kyrgyz customs territory with full or partial conditional exemption from the payment of customs duties and taxes and without application of non-tariff regulatory measures. The term of the “temporary import” customs regime may not exceed two years.

Customs duties incentives
Certain items are exempt from customs payments, including transportation vehicles used in the international conveyance of passengers and goods and items of material and technical supply in transit; goods imported in the customs territory or imported from the customs territory for official and personal use by official state representatives of foreign states.

Kyrgyzstan provides preferential rates or exemptions on the importation (and export) of certain goods, including goods originating from the states which form free trade zones or a customs union with Kyrgyzstan and goods originating from developing countries, included on a special list provided by the government.

Documentation and procedures
Kyrgyzstan pays close attention to formalities/documentation and, thus, it is necessary to furnish the customs authorities with a set of required documents. For import, such documents usually include cargo customs declaration, invoices, contracts, etc.

Warehousing and storage
There is a bonded warehouse customs regime in Kyrgyzstan – a customs regime under which imports entering into the customs territory of the Republic of Kyrgyzstan goods are stored in special facilities or special areas that have the status of a customs warehouse under the customs legislation of Kyrgyzstan.

Generally, most goods (unless otherwise specifically provided for) can be placed under the bonded warehouse customs regime. The period for storage of goods at a bonded warehouse is determined by the person placing the goods into the customs warehouse, but cannot exceed three years from the date when the goods were placed under the bonded warehouse customs regime.

Re-exports
The re-export regime is similar to that used in international practice. It is defined as a customs regime under which goods previously imported into the customs territory of Kyrgyzstan are exported from this territory without payment or with a refund of the paid amounts of import customs duties and taxes and without applying the non-tariff regulatory measures with respect to the goods in compliance with Kyrgyz legislation on state regulation of foreign trade activity.

There are certain conditions under which goods can be re-exported. Customs duties and taxes are not charged for goods declared as goods intended for re-export. However, if the goods do not meet the re-export criteria, customs duties and taxes are paid in the amount which would be payable if the goods, at their importation, were declared for release for free circulation, as well as interest on them paid at the National Bank rates, as if deferment was provided with respect to the amounts at placement of the goods under the customs regime of re-export.
Excise tax
Certain goods manufactured in Kyrgyzstan or imported to Kyrgyzstan are subject to excise tax. These include, among others, certain alcohol and alcoholic drinks; fortified drinks; tobacco goods; jewellery made of gold, silver, or platinum; and oil products.

The rates of excise tax are adopted annually by the Kyrgyzstan government.

Subsurface use taxes
Under Kyrgyz legislation, subsurface users are legal entities and individuals who perform exploration and/or extraction of mineral resources.

From 1 January 2009, the Kyrgyz tax code introduced new taxes on subsurface users, both Kyrgyzstan legal entities and branches of foreign legal entities. These taxes include bonuses and royalty.

The government, depending on the type of mineral resources, establishes the bonus rates.

The royalty rates are estimated either as a percentage of sales turnover (1%–12%) or in absolute terms in KGS depending on the type of mineral resources.

Property tax
Property tax is a local tax payable by individuals and legal entities owning transport vehicles and immovable property in Kyrgyzstan, including apartment houses, apartments, boarding houses, holiday inns, sanatoria, resorts, production, administrative, industrial, and other buildings or facilities. Certain real estate may not be subject to this tax according to special lists approved by the government.

In respect of immovable property, the tax rate is established by the city or local authorities at a rate not to exceed 0.8% of the estimated value of taxable objects, except for apartment houses and apartments designated solely for residence, for which the rate may not exceed 0.35% of the estimated value. The estimation can be performed by the state competent body and independent appraisers. For transport vehicles, the tax is computed in KGS depending on engine volume.

Land tax
Land tax is paid by legal entities and individuals on the area of owned land plot. The basic rates are provided in the tax code depending on the location and purposes of the land plot.

Branch income
Branch income is subject to the profits tax as mentioned earlier. There is no special branch profits tax in addition to profits tax.

Income determination
Kyrgyzstan legal entities are taxable on aggregate annual income earned worldwide. Non-resident legal entities carrying out business through a permanent establishment in Kyrgyzstan are taxable on income attributed to the activities of that permanent establishment.
Aggregate annual income is comprised of all types of income, including gross revenue from the sale of goods (work, services), non-depreciable assets and other income including, but not limited to:

- Interest income (except for income already subject to withholding tax);
- Dividends;
- Royalties;
- Assets received free of charge;
- Rental income;
- Income from the reduction of liabilities;
- Foreign exchange gain; and
- Write-off liability.

The tax code envisages some profits tax privileges aimed at developing certain areas of the business economy. Currently, these include privileges/preferences for:

- Charity organisations;
- Associations of invalids of I and II groups, (i.e., persons with disability with different levels of physical disability), associations of blind and deaf persons;
- Agricultural organisations;
- Growing of berries, fruits and vegetables;
- Credit unions; and
- Companies that have been involved in the food industry for less than three years and included in the Kyrgyzstan government’s list of exempt companies.

Aggregate annual income may be reduced by the value of assets donated to charity and budget organisations (limited to 10% of taxable income).

Non-taxable revenues include, inter alia, the following:

- Property received as a charter capital contribution and income from realisation of shares of organisations; and
- Property donated to special organisations using such property for development purposes under the government’s social culture plan. Despite being designated as property used for social culture purposes, such property may still be used for other purposes (i.e., citizen defence projects, mining equipment, water intakes, heat networks, roads, stations).

**Capital gains**

Capital gains are subject to the ordinary profits tax rate. There is an exemption available for capital gains from selling shares that occur on the date of a given sale in the official lists of the stock exchange in the highest and the next-to-highest category of listing.

**Inter-company dividends and stock dividends**

Dividends from participation in Kyrgyz legal entities are exempt from profits tax. All other dividends are subject to the ordinary profits tax rate.

**Foreign income**

Generally, Kyrgyz legal entities are taxable on income earned worldwide. Foreign income is subject to the ordinary profits tax rate.
Deductions

Generally, expenses related to the earning of aggregate annual income are considered deductible for income tax purposes, including:

- Business trip expenses that were actually incurred and supported by appropriate documentation (per diems during business trips are deductible only within the established statutory limits);
- Commissions on payroll expenses for labour;
- Material and social benefits provided to employees;
- Representational expenses connected with earning income (transportation, hotel and translator services);
- Training and retraining of employees;
- Scientific development and exploration works (deductions are relevant for fixed assets); and
- Any other costs related to earning income, which can be supported by appropriate documentation in terms of their nature and amount (invoices, payment orders, receipts, etc.).

Deductions for interest actually paid on debts, where the loan proceeds were used to fund expenses incurred for the taxpayer’s business activity, are allowed within limitations provided in the tax code depending on methodology and nature of the debt. For example, interest on loans connected with the purchase of depreciable assets is not deducted, but increases their value.

The principal categories of expenses which are not deductible include:

- Capital expenses and expenses connected with the purchase, production and installation of equipment;
- Fines and interest penalties paid to the state budget;
- Taxes paid in accordance with the tax code, except for land tax, property tax, VAT that cannot be offset, subsurface use taxes;
- Any losses incurred on behalf of a spouse or other family member(s);
- Any expenses incurred on behalf of any other third persons, except in cases where documentation proves business needs for such expenses;
- Pricing losses caused by rates, understated below-market prices and price incentives;
- Any losses directly or indirectly connected with sales or exchange of property by a taxpayer with family members or business partners; and
- Expenses connected with purchases of services in entertainment, vacations and leisure.

Depreciation and depletion

The tax code establishes a deduction for depreciation based on the declining balance method. Depreciable fixed assets are divided into several groups, for which maximum depreciation rates range from 10% to 50%.

Certain expenses are deductible within specified limits, including expenses on repairs, expenses on procuring and producing capital production assets, and certain other expenses.
Kyrgyzstan

Net operating losses
Net operating losses can be carried forward for up to five years. There are no provisions in Kyrgyz legislation allowing carryback of losses.

Taxes
The following taxes are allowed for deduction:

- Land tax;
- Property tax;
- VAT not allowed for offset; and
- Subsurface use taxes.

Payments to foreign affiliates
Payments to foreign affiliates are deductible for corporate income tax purposes if they are aimed at earning income and supported by documentation.

Other significant items
Deductions are generally permitted for costs related to the activities aimed at earning income, unless specifically limited or disallowed by the tax code. Examples of expenses with deductibility limits include those related to interest, repairs, expenses on procuring and producing capital production assets, and certain other expenses.

Group taxation
Group taxation is not permitted in Kyrgyzstan

Tax incentives
The tax legislation currently provides the following tax incentives:

- Investment incentives
- Tax holidays for special economic zones

Special economic zones
There are four special economic zones in Kyrgyzstan: Naryn, Karakol, Bishkek and Maimak. The special economic zones generally provide for a tax-neutral regime, exemption from customs duties and a liberal currency control regime. However, there is a special fee for incentives which varies from 0.1% to 2% of sales (depending on the region).

Withholding taxes (WHT)
Passive income from sources in Kyrgyzstan by a non-resident that is not connected with a permanent establishment is taxable at the source of payment without deductions, at the following rates:

- Dividends and interest: 10%
- Insurance premiums received under risk insurance or re-insurance agreements: 5%
- Authorship fee: 10%

Income obtained by a non-resident from performing activities and services in Kyrgyzstan, not connected with a permanent establishment, is taxable at the source.
of payment without deductions (with the exception of VAT) via a withholding tax mechanism:

• Income from telecommunication or freight services in international communication and transportation between Kyrgyzstan and other states: 5%
• Income from management and consulting services: 10%
• Other services and activities: 10%

Withholding tax applies to Kyrgyzstan source income regardless of whether the payment is made within or outside of Kyrgyzstan.

The application of double-tax treaties often effectively provides a reduction of withholding tax rates or, in the case of non-passive income, an income tax exemption. Note that the application of treaty privileges is not necessarily automatic and taxpayers may need to comply with certain administrative procedures to secure relief.

**Tax treaties**

According to the tax code, the provisions of international tax agreements and other acts to which Kyrgyzstan is a party and ratified by the president or the parliament (as appropriate), take precedence over the provisions of the tax code.

As of 1 April 2010, Kyrgyzstan has concluded double-tax treaties with the following countries:

<table>

Notes

The numbers in parentheses above refer to the notes below:

1. 5% if the beneficial owner is a company (other than a partnership) that directly holds at least 25% of the capital of the paying company.
2. 5% if the beneficial owner is a company (other than a partnership), which owns not less than 10% of the capital of the paying company.
3. 5% if the beneficial recipient is a company, which owns not less than 50% of the capital of the paying company.

Transfer pricing

There is no special law on transfer pricing in Kyrgyzstan and rules on transfer pricing are found in the tax code. The general transfer pricing provisions set in the tax code do not follow Organisation for Economic Co-operation and Development (OECD) guidelines (thus, no advance pricing agreement (APA) mechanism is provided). According to the Kyrgyz transfer pricing regulations, the tax authorities are empowered to determine the following transactions:

- Transfers between related parties;
- Barter transactions; and
- Cross-border transactions.

Tax administration

Tax Returns and payments

The Kyrgyzstan tax code stipulates that the following key tax reports must be filed with the tax authorities:

- Aggregate Annual Income Tax Declaration (corporate and individual) – by 1 March of the year following the reporting year;
- VAT reporting – on a monthly basis, by the twenty-fifth (or, on the last day for large taxpayers) of the month following the reporting month; and
- Other tax reports – as required according to relevant legislation.

Tax authorities may grant an extension for filing a tax return for up to one month upon application by the taxpayer. Such extension does not relieve or prolong the taxpayer’s obligation to pay the tax in a timely manner.
The tax payments should be made as follows:

- Advance payments on profits tax – quarterly by the twentieth of the second month of the reporting quarter;
- Final payments on profits tax and Individual tax – by 1 March of the year following the reporting year;
- Tax withheld at the source of payment by a tax agent – by the fifteenth day of the month following the month when income was paid;
- VAT – on a monthly basis, by the twenty-fifth of the month following the reporting month; and
- Other tax payments – as required according to relevant legislation.

**Tax audits**

The State Tax Inspectorate of the Ministry of Finance of Kyrgyzstan and its local tax authorities are the only state authorities that have the right to perform tax audits. The Kyrgyzstan tax service consists of relevant subdivisions of the revenue committee of the Ministry of Finance of Kyrgyzstan and its local authorities.

A tax audit is performed based on a written notification from the Head of the State Tax Inspectorate, which specifies the name of the company to audit, the scope of the audit, and the terms of the audit. Tax audits may be performed not more than once a year by one of the tax authorities (district, city, region, or the state tax authorities) and should not last more than 30 days. If necessary, however, a tax audit may be extended for 10 additional days with written approval from the State Tax Inspectorate.
Corporate taxes in Latvia

Significant developments

Incentives for shareholders to invest profits in companies
Recent changes in corporate income tax (CIT) law encourage shareholders to invest profits in the development of their company rather than take them out as dividends. Businesses may reduce their taxable income by a notional amount of interest that a taxpayer would have to pay on a loan equal to his prior-year undistributed profit. This adjustment is calculated by multiplying the annual weighted average rate of interest on loans issued to non-financial Latvian businesses as determined by the Bank of Latvia for the tax period by undistributed profits from previous periods beginning after 31 December 2008.

Deferred tax on asset replacements
Latvia will allow a deferred payment of tax on profits arising on the sale of a replaced asset in order to encourage manufacturing companies to replace inefficient and outdated plant and machinery.

If a company acquires a functionally similar asset within 12 months before or after the old equipment is disposed of, then any income (profit) on the disposal of the old equipment is ignored in this tax period (i.e., the profit is deductible from taxable income). Tax payment is deferred until the new equipment is sold and may be further postponed if the equipment is replaced.

Value-added tax (VAT)
Because of the recent amendments to the European Union (EU) Council Directive 2006/112/EC (VAT directive) and respective amendments of the VAT Act, the new place-of-supply rules for cross-border services (i.e., transactions involving a supplier and a customer located in different countries) went into force on 1 January 2010.

Additionally, new amendments to the VAT Act have been drafted to pass some of the Sixth Directive’s optional provisions into domestic VAT law (including VAT grouping, VAT recovery on bad debts, reverse charges on imports). These amendments went into force on 1 December 2009.

Thin capitalisation
Thin capitalisation rules have been amended so that interest deductibility is restricted for resident company loans the same as for non-resident company loans.
**Taxes on corporate income**

The standard rate of CIT is 15%. There are no other taxes on corporate income. Companies operating in Free Ports (see Tax incentives section) and special economic zones and applying tax relief, apply CIT of 25%.

**Corporate residence**

A company is resident in Latvia if it is incorporated or had to be incorporated in Latvia. Under the Latvian Taxes and Duties Act, a non-resident has a permanent establishment (PE) in Latvia if all three of the following conditions are met simultaneously:

1. The non-resident uses a fixed place for activities in Latvia;
2. The place for activities is permanently used or is established for the purpose of being used permanently; and
3. The place for activities is used for the performance of commercial activities.

In addition, it is considered that a non-resident has a PE in Latvia if the non-resident performs in Latvia at least one of the following activities:

- Uses a construction site or performs building or installation activities or supervision or consultative activities related to the construction site or aforementioned activities;
- Uses equipment or installations, drilling platforms and special ships intended for the research or extraction of natural resources or carries out supervisory or consultative work related thereto;
- Within a time period, which together exceeds 30 days in any six-month period, provides services including consulting, management and technical services, utilising his or her employees or associated personnel; or
- Uses the activity of an individual, legal or other person for the benefit of his commercial activities provided that this person is authorised to enter into contracts in the name of the foreign entity and the person regularly (more than once in a taxation period) exercises such an authority.

The PE risk for the entities located in the treaty countries should be tested in accordance with the relevant double tax treaty (DTT).

**Other taxes**

**Value-added tax (VAT)**

The following rates apply:

<table>

<tr>
<td>Exemption with credit on commodity exports and imports not released for free circulation in the EU, supplies of goods and services to diplomats, supplies of goods and services financed by foreign aid, etc.</td>
<td>0%</td>
</tr>
</tbody>
</table>

A number of services are exempt, including education, financial, medical and insurance services, nursery fees and the sale of used real estate including land (except for the first sale of unused real estate, which is taxable).

Because of the recent amendments to the EU Council Directive 2006/112/EC (VAT directive) and respective amendments of the VAT Act, the new place-of-supply rules for cross-border services (i.e., transactions involving a supplier and a customer located in different countries) went into force on 1 January 2010.

Additionally, new amendments to the VAT Act have been drafted to pass some of the EU’s Sixth Directive’s optional provisions into domestic VAT law (including VAT grouping, VAT recovery on bad debts, reverse charges on imports). These amendments went into force on 1 December 2009.

**Excise duty**

An excise duty is levied on specific categories of goods, mostly as a fixed amount per unit. Excise duties are applied to the following goods, whether made in Latvia or imported:

<table>
<thead>
<tr>
<th>Product</th>
<th>Excise amount</th>
</tr>
</thead>
<tbody>
<tr>
<td>Oil and oil products</td>
<td>Up to 300 LVL depending on the type of the product</td>

<td>Tobacco products</td>
<td>11 LVL per 1,000 cigars or cigarillos</td>
</tr>
<tr>
<td></td>
<td>22.5 LVL per 1,000 cigarettes plus 34.5% of the maximum retail selling price</td>
</tr>
<tr>
<td></td>
<td>23 LVL per 1,000 grams of fine-cut smoking tobacco intended for the rolling of cigarettes</td>
</tr>
<tr>
<td></td>
<td>23 LVL for other smoking tobacco</td>
</tr>
<tr>
<td>Coffee</td>
<td>100 LVL per 100kg</td>
</tr>
<tr>
<td>Certain soft drinks</td>
<td>4 LVL per 100 litres</td>
</tr>
</tbody>
</table>

**Customs duty**

Customs duty is levied on goods imported into Latvia. The rate of customs duty generally is between 0% and 20% of the value of imported goods, depending on the type and origin of such goods. Exports are generally exempt from customs tax.

**Real estate tax**

From 2010 real estate tax is payable for engineering structures such as motorways, streets, roads, bridges, elevated highways, tunnels, pipelines, communication lines and power lines, and buildings that form part of a private dwelling house development.
The following rates apply from 1 January 2010:

- The standard rate of 1.5% on the cadastral value of land, buildings and engineering structures.
- A progressive rate for dwelling houses, their parts and any parts of a non-residential building that are functionally used for living and not used in trade or business:
  - 0.1% of cadastral values up to 40,000 LVL;
  - 0.2% of cadastral values exceeding 40,000 but not exceeding 75,000 LVL; and
  - 0.3% of cadastral values exceeding 75,000 LVL.
- A double rate of 3% for uncultivated land capable of agricultural use, unless it is up to one hectare in area or subject to statutory restrictions on agricultural activity. By law, uncultivated land capable of agricultural use is agricultural land that is not used for making or growing agricultural products (including harvesting, grazing and keeping animals for agricultural purposes) or is not kept in good agricultural and environmental condition.

Newly constructed or reconstructed buildings are exempt from real estate tax for one year after completion. Other reliefs are available under the Real Estate Tax Act or determined by municipalities.

**Natural resource tax**

Any natural resources acquired as a result of economic activities (e.g., surface and underground water, dolomite and quartz sand), the collection of edible park snails, pollution (waste, emissions and pollutants), products harmful to the environment (e.g., lubricating oil, electric batteries, oil filters and tyres), radioactive substances, packaging, disposable tableware, vehicles, the volume of emitted greenhouse gasses, and electrical and electronic equipment and appliances are subject to a natural resource tax in Latvia.

Packaging and electrical/electronic equipment as well as certain other goods are subject to recycling in Latvia.

**Lottery and gambling tax**

A lottery and gambling tax is levied on licensed organisers of games or lotteries. Licence fees range from LVL 3,000 to LVL 300,000. Game organisers, gambling places and gambling machines are subject to the gambling tax. The tax rates depend on the number and type of gambling machines.

**Car and motorcycle tax**

Cars and motorcycles registered for the first time or after modification are subject to a car and motorcycle tax. This is payable by any individual or entity registered as the owner of a car or motorcycle.

The applicable tax rates for cars registered after 1 January 2009 in foreign countries are calculated based on the carbon dioxide (CO$_2$) on each kilometre constituted by the car. The rates range from LVL 0.3 to LVL 5 where the carbon dioxide is from 120 grams to 350 grams for each kilometre. The rate for newly registered motorcycles is LVL 0.10 for each cubic-centimetre of the engine’s capacity.

For other cars, rates range from LVL 75 to LVL 850, depending on age and capacity. The rate for motorcycles depends on age and is 25% of the rate for cars.
Latvia

**Electricity tax**
This electricity tax is levied on electricity supplied to final consumers or consumed by suppliers. The rate is LVL 0.71 per mega-watt-hour. Exemptions are available to producers of electricity and for electricity used by domestic public transport and households.

**Stamp duty**
Stamp duties are levied on certain legal and other kinds of services, such as court trials, company formation and registration, licences for certain types of business activity, provision of information, notary services, operation of bills of exchange, and registration of real estate at the Land Registry (2% of the higher of deal value or cadastral value capped at LVL 30,000 per property).

Stamp duty is not payable if re-registration of real estate in the Land Registry is necessary due to the reorganisation process. From 1 November 2009, the maximum amount of stamp duty payable for re-registration of the title to immovable property in case of contribution in kind to a company's capital is reduced from LVL 30,000 to LVL 1,000.

**Local duties**
Certain activities are subject to local duties (e.g., construction permits).

**Branch income**
As a general rule, branches and companies are taxed alike, with certain adjustments for payments to the head office. Branch income is subject to a 15% CIT.

**Income determination**

**Inventory valuation**
Dictated by the matching and prudence concepts, stock should be valued at the lower of cost or net realisable value. Cost must be computed on a first-in, first-out (FIFO) basis. Cost can mean purchase price or production cost. Any unrealised losses from stock revaluation are non-deductible.

**Capital gains**
A capital gain on the disposal of a capital asset is calculated as the difference between the sale proceeds and cost. This gain is subject to a 15% CIT as ordinary income.

Losses on the sale of shares may be carried forward and offset against future profits. However, profits on trading in securities publicly quoted in the EU or the European Economic Area (EEA) are not taxable, and losses from these securities are not deductible.

Losses on the sale of public securities traded outside the EU/EEA or non-public securities (private shares, unlisted bonds and shares, claim securities) are not deductible but may be offset chronologically in eight subsequent tax periods against income from the sale of other securities. However, if a company makes a one-off sale of securities that it has held for more than 12 months, then such losses may be offset chronologically against total taxable income from operating activities in eight subsequent tax periods.
Inter-company dividends
Dividends from Latvian companies are exempt from tax, except for dividends from companies paying CIT at a reduced rate (e.g., companies operating in special economic zones or free ports such as Riga or Ventspils). Dividends paid to non-residents may be subject to a withholding tax (see the section Withholding taxes).

Dividends from companies registered in blacklisted tax havens are taxable (a list of blacklisted tax havens is approved by the Cabinet of Ministers).

Dividends paid by a non-resident company based outside blacklisted tax havens to a Latvian person, directly holding at least 25% of shares in that company at the time the dividends are paid, are exempt.

Dividends from a company resident in another EU or EEA country are also exempt.

Foreign income
Resident companies are taxed on their worldwide income. Tax paid abroad on income included in the taxable base is allowed as a credit against the CIT charged for the year. However, the credit must not exceed the Latvian tax attributable to the income taxed abroad. Any unused tax credits may not be carried forward.

Stock dividends
The distribution of new shares to a company's shareholders in proportion to their existing shareholdings (after a share capital increase by conversion of accrued capital) is not a taxable event for the shareholders.

Transfer pricing
The Latvian Regulation governing the application of the Corporate Income Tax Act states that for transfer pricing (TP) calculation purposes, use may be made of the Transfer Pricing Guidelines for Multinational Enterprises and Tax Administrations, a document issued by the Organisation for Economic Co-operation and Development (OECD).

Latvian law requires that related-party transactions be in compliance with the arm's-length principle. Under the arm's-length principle, the conditions made or imposed between two related enterprises in their commercial or financial relations must not differ from those that would be agreed between independent enterprises engaging in similar transactions under similar circumstances.

A tax audit may examine and adjust the price of a transaction in the following circumstances:

- The transaction is between related parties;
- Barters and set offs;
- A price deviation exceeds 20% of prices that the taxpayer has applied to similar goods or services over a short period; and
- Exports and imports.

The TP requirements for the arm's-length price of a related-party transaction primarily apply to transactions between two or more related companies. Latvian legislation has broadened these requirements and section 12 of the CIT Act requires the taxpayer to
adjust his taxable income for the difference between the price applied to a transaction and the arm's-length value if the transaction involves:

- Individuals related to the company;
- Related foreign companies;
- Companies exempt from CIT or enjoying CIT relief pursuant to other Latvian laws; and
- A related company with which it forms a single tax group.

This provision may apply to any transaction, ranging from purchases and sales of fixed assets and goods, supplies of services, to loans and borrowings, and intellectual property. It should also be pointed out that the traditional view that TP rules only apply to transactions with foreign related companies is no longer consistent with the law because TP issues are now also important to companies doing business with Latvian related companies.

There are no obligatory TP documentation requirements in Latvia yet. Nevertheless, it is highly advisable to prepare the TP documentation as it may be a valuable support during tax audits.

**Deductions**

Fixed assets may be depreciated for tax purposes according to the reducing-balance method by applying the following rates to tax written-down values:

<table>
<thead>
<tr>
<th>Types of property</th>
<th>%</th>
</tr>
</thead>
<tbody>
<tr>
<td>Buildings, structures and perennial plantations</td>
<td>10</td>
</tr>
<tr>
<td>Technology and energy installations, fleet, railway</td>
<td>20</td>
</tr>
<tr>
<td>Computer hardware and software, information systems, electronic equipment</td>
<td>70</td>
</tr>
<tr>
<td>Other fixed assets</td>
<td>40</td>
</tr>
<tr>
<td>Light passenger cars (except special purpose vehicles), motorcycles and air transport means</td>
<td>30</td>
</tr>
<tr>
<td>Oil rigs, oil exploration and extraction ships, sea and river transport means</td>
<td>15</td>
</tr>
</tbody>
</table>

The value of new technological equipment is multiplied by a coefficient (2009-2013: 1.5) before claiming capital allowances. The effect of applying a coefficient is reversed if the new technological equipment is disposed of within five years from acquisition.

Non-business assets are ineligible for capital allowances.

Intangible assets are eligible for capital allowances on a straight-line basis over the following recovery periods:

<table>
<thead>
<tr>
<th>Types of intangible assets</th>
<th>Years</th>
</tr>
</thead>
<tbody>
<tr>
<td>Concessions</td>
<td>10</td>
</tr>
<tr>
<td>Patents, licences and trademarks</td>
<td>5</td>
</tr>
<tr>
<td>Research and development expenses</td>
<td>1</td>
</tr>
</tbody>
</table>

Any intangible assets not fitting into any of these categories (such as goodwill) are ineligible for capital allowances.
The cost of intangible investments is increased by a coefficient of 1.5 if such investments result in a trademark or patent being registered.

**Deferred tax on asset replacements**

Latvia will allow a deferred payment of tax on profits arising on the sale of a replaced asset in order to encourage manufacturing companies to replace inefficient and outdated plant and machinery.

If a company acquires a functionally similar asset within 12 months before or after the old equipment is disposed of, then any income (profit) on the disposal of the old equipment is ignored in this tax period (i.e., the profit is deductible from taxable income). Tax payment is deferred until the new equipment is sold and may be further postponed if the equipment is replaced.

**Luxury vehicles**

Luxury vehicles (light passenger cars with a value greater than LVL 25,424 excluding VAT) are not eligible for capital allowances. A tax deduction is denied for expenses incurred in using and maintaining luxury vehicles and for lease or hire purchase payments associated with leasing such vehicles. These rules do not, however, apply to special purpose vehicles (such as emergency vehicles and special passenger vehicles).

**Net operating losses**

Starting from 2010, losses may be carried forward eight years (formerly five years). According to the transitional rules, in tax periods beginning in 2008 and 2009, taxpayers will be able to offset losses to which they were entitled but unable to offset in 2007 due to lack of taxable income. This means that losses of 2002 may be offset up to 2010 (inclusive).

A company in which more than 50% of shares (a controlling interest) have changed hands may utilise its tax losses if it continues for five years the same business that it carried on during the two years prior to the change of control. When companies are reorganised by a merger or spin-off, it may be possible to utilise losses accrued.

**Payments to foreign affiliates**

In general, a Latvian company may deduct the full amount of royalties, service fees and interest (subject to statutory limits) made to related parties to the extent that such payments are made at arm’s length. Such payments may be subject to a withholding tax (see the section “Withholding taxes”). However, if a taxpayer fails to deduct the withholding tax due, the amounts paid cease to be deductible for tax purposes.

**Taxes**

Excise duties, national social insurance contributions, natural resource taxes, customs duties and real estate taxes are deductible.

**Other significant items**

Thin capitalisation rules apply when claiming a tax deduction for interest payments on loans and leasing services.
**Latvia**

Taxable income should be adjusted for either:

1. Interest paid in excess of interest calculated by applying to the liability 1.2 times the average short-term interest rate at Latvian banks as determined by the Central Statistical Office for the last month of the tax period; or
2. Interest in proportion to the excess of the average liability over an amount equal to four times shareholders’ equity at the beginning of the tax year less any revaluation reserve.

The higher of these calculations should be added to taxable income.

The following interest payments are fully deductible:

- Interest paid on borrowings from credit institutions resident in Latvia, EEA member states or countries with which Latvia has an effective double tax treaty (DTT).
- Interest paid on Latvian or EEA debt securities in public trading.
- Interest expenses incurred by credit institutions and insurance institutions, regardless of the lender.
- Interest paid on borrowings from a financial institution that:
  - Is resident in Latvia, the EEA or a country with which Latvia has an effective DTT;
  - Provides lending services or finance leases and is monitored by the particular country’s bodies set up to supervise credit institutions or the financial sector; and
  - Is deductible up to the amount of interest calculated by applying to the liability 1.2 times the average short-term interest rate at Latvian banks as determined by the Central Statistical Office for the last month of the tax period.

**Group taxation**

Group consolidation is not permitted for tax purposes. However, the members of a group of Latvian companies, whose parent owns directly or indirectly 90% of the capital of its subsidiary or subsidiaries, may surrender their current-year tax losses to one another.

**Tax incentives**

**Donations to public benefit organisations**

Under the Latvian Corporate Income Tax Act, relief may be applied in certain cases:

- A CIT liability may be reduced by 85% of amounts donated to qualifying state-funded institutions and Latvian-registered societies, establishments and religious organisations or to institutions qualifying as public-benefit organisations under the Public Benefit Organisations Act. Such a reduction may not exceed 20% of the total CIT liability. When making a donation, the donor is not permitted to impose an obligation on the recipient of the donation or carry out any acts that may be classified and treated as consideration.
• Starting from 2011, donation relief also will be available for donations to EU/EEA entities that have statuses similar to public-benefit organisations in the country of residence.

**Incentives for shareholders to invest profits in companies**
Recent changes in CIT law encourage shareholders to invest profits in the development of their company rather than take them out as dividends. Businesses may reduce their taxable income by a notional amount of interest that a taxpayer would have to pay on a loan equal to his prior-year undistributed profit. This adjustment is calculated by multiplying the annual weighted average rate of interest on loans issued to nonfinancial Latvian businesses as determined by the Bank of Latvia for the tax period by undistributed profits from previous periods beginning after 31 December 2008.

**Accelerated tax depreciation**
The value of new technological equipment is multiplied by a coefficient (2009-2013: 1.5) before claiming capital allowances. The effect of applying a coefficient is reversed if the new technological equipment is disposed of within five years from acquisition.

The cost of intangible investments is increased by a coefficient of 1.5 for calculating capital allowances if such investments result in a trademark or patent being registered.

**Free Ports and special economic zones**
Companies operating in special economic zones are entitled to CIT and real estate tax relief. These areas include the free ports of Ventspils and Riga and the special economic zones of Rezekne and Liepaja.

**Withholding taxes (WHT)**
The following types of payments to non-residents are subject to WHT:

1. Dividends are generally subject to a 10% WHT. Double tax treaties generally reduce the rate to 5%. However, dividends paid to a company that is a resident of and meets the criteria of parent-subsidiary directive, in any EU or EEA member state, are exempt.
2. Interest payments to related non-resident parties are generally subject to a 10% WHT. Interest payments to non-related creditors are not subject to WHT. If a bank registered in Latvia pays interest to related companies at the bank’s normal interest rate level, then a 5% WHT applies. From 1 July 2013, WHT no longer will apply to interest paid by a Latvian company to a related EU member state company that holds at least 25% of the share capital or voting power in that Latvian company and meets certain other statutory criteria. Up to 1 July 2013, Latvian companies will have to comply with transitional rules of the Corporate Income Tax Act, which provide 5% WHT on interest payments to related EU/EEA member state company.
3. Payments for intellectual property (copyright in literary or artistic works, including movies, videos and sound recordings) are subject to a 15% WHT. However, if the recipient is an EU-related company or its PE, the applicable rate is 5% up to 30 June 2013 and exempt from 1 July 2013 onwards. A 5% WHT is applied on other intellectual rights, such as patents, royalties and trademarks (exempted from 1 July 2013 onwards if the recipient is an EU-related company). Double tax treaties may reduce the rate.
4. Rental payments for property in Latvia are subject to a 5% WHT.
5. Management and consulting fees are subject to a 10% WHT. The term “management and consulting services” means activities carried out by a non-resident directly or by outsourced personnel to ensure the management of a Latvian company or to provide necessary advice. Double tax treaties reduce the rate to 0%.
6. A 2% WHT applies to proceeds from real estate disposals. This applies to income from disposed shares or other participation in a Latvian- or foreign-registered company or other entity, if real estate in Latvia made up (in the period of disposal or the previous period, whether directly or indirectly through shareholdings in one or more other entities established in Latvia or abroad) more than 50% of the asset value of the company being disposed of.

A Latvian company can rely on a DTT to reduce the rate of WHT on any payments previously mentioned. To this end, the Latvian company must obtain a valid residence certificate for each type of payment to each recipient prior to making the actual payment. A valid residence certificate is one approved by the foreign tax authority and the Latvian tax authority.

Please see in the table below the WHT rates applicable to the following types of payment:

Latvia

Notes

See items (1) – (6), types of payments to non-residents subject to withholding tax, as the explanations above the table.

7. 15% applies to all payments to companies located in tax havens with the following exceptions:
   • 10% for dividends paid by Latvian residents;
   • 5% for interest on deposits and current accounts paid by Latvian banks at their general rate;
   • Repayments of loan principal are exempt; and
   • Goods originating in the tax haven are exempt.
8. A 25% minimum shareholding required.
9. A 10% minimum shareholding required.
10. A 25% and USD 75,000 minimum shareholding required.
11. A 20% minimum shareholding required.
12. 0% – a 75% minimum shareholding is required; 5% – 25% minimum shareholding is required.

Tax administration

Returns

The fiscal year may not exceed 12 months and is normally based on the calendar year. However, companies are permitted to choose alternative start and end dates for the tax year. The first year of trading may last up to 18 months. Tax returns are filed annually, together with annual accounts.

Corporate income tax usually is paid monthly on or before the fifteenth day of each month, with a final adjustment when the annual tax return is filed. Monthly tax instalments are based on the tax liability in the previous fiscal year and adjusted by the consumer price index. A company may choose quarterly instalments if its monthly advances in the previous period were less than LVL 500. For a new company, advance payments are voluntary.

**Significant developments**

On 29 December 2009, the Ministry of Finance issued Announcement No. 3509 to clarify the method and rates of calculating the deemed profit for public work contractors, based on the type of activity they perform.

The Ministry of Finance published Decision No. 1216 dated 21 November 2009, containing a list of updated forms and declarations to be used by taxpayers starting year 2010. A listing and copies of these forms and declarations is found in Official Gazette No. 62 1/2 dated 31 December 2009. Original copies of these forms and declarations may be obtained from the Ministry of Finance.

The Ministry of Finance has introduced new fiscal obligations for Lebanese representative offices, effective financial year 2010. The major obligation is that representative offices will be required to submit annual tax declarations using specific forms which were published under the above decision.

The Ministry of Labour issued Decision No. 10/1 dated 3 February 2010 to list the professions which are restricted to Lebanese citizens, with certain exceptions.

The Budget Law for the 2010 fiscal year was submitted by the Ministry of Finance to the Council of Ministers and the Lebanese President on 15 March 2010 for approval. The new budget law calls for raising the tax on interest savings from 5% to 7%.

**Taxes on corporate income**

Under the income tax law in Lebanon, tax is levied based on income type. In this connection, the income tax law divides income into the following three categories:

- Chapter I – profits from industrial, commercial and non-commercial professions;  
- Chapter II – salaries and wages and pension salaries; and  
- Chapter III – revenues from moveable capital (chapter III mainly covers all types of dividend income, board member appropriations from profits and interest income, including interest on bonds and treasury bills).

The income tax law does not deal with what is known as global tax on income, where a progressive tax is levied on the individual’s income grouped from different sources. Accordingly, where a taxpayer has income from different sources, each type of income will be taxed according to the tax chapter it falls under.
Lebanon

**Real profit tax**

*Joint-stock companies ("Société anonyme libanaise" or SAL)*
- Minimum capital: Lebanese pound (LBP) 30 million.
- Taxation: the applicable trading tax rate is 15% in addition to a dividend distribution tax of 10%, reduced to 5% in certain cases, mainly if the shares are listed.

*Limited liability companies (SARL)*
- Minimum capital: LBP 5 million.
- Taxation: the applicable trading tax rate is 15% in addition to dividend distribution tax of 10%.

**Branch offices**

Refer to section on Branch income.

**Deemed profit tax**

The deemed profit tax is imposed on, among others, insurance and savings institutions, taxable transport companies, oil refineries and public work contractors. Taxation is based on deemed profits and business income tax is levied at a flat rate of 15%. The rate of deemed profit for public contractors as approved by the Ministry of Finance is currently set at either 10% or 15% of total amounts collected per year, based on the type of activity performed by the contractor. For insurance companies the deemed profit rate varies depending on the type of insurance activity, i.e., life, motor, accident, etc. In addition to the flat rate tax imposed on deemed profits, a distribution tax of 10% is levied on dividends.

**Other tax systems**

**Representative offices**

Representative offices do not pay income taxes as long as they do not carry out commercial activities. Based on Decision No. 1/1216 effective financial year 2010, representative offices are required to submit annual tax declarations including company information and details including employee information, balance sheet, income statement, non-resident tax schedule and schedule of payments to professionals. The declaration, with all relevant documentation, should be handed as one single set. All the information included should be based on accounting records. The deadline for submitting the declaration depends on the legal form of the parent company, i.e., before 1 June of the following year for joint-stock or limited liability companies and before 1 May of the following year for others.

**Holding companies**

Lebanese holding companies are exempt from corporate income tax and from withholding tax on dividends. However, they are subject to a tax on their paid-up capital and reserves. In any given tax year, total tax payments on paid-up capital and reserves are capped at LBP 5 million. Holding companies are subject to a 10% tax on interest received from loans shorter than three years extended to companies operating in Lebanon. Management fees received by the holding company from companies operating in Lebanon are subject to a 5% tax. Capital gains on financial assets in Lebanese companies held for less than two years are subject to a 10% tax. Royalties received from Lebanese companies for patents and the like are taxed at a rate of 10%. Management fees and royalties received by the holding company from foreign companies are exempt from tax.
Offshore companies

Offshore companies are required to be registered as SAL (joint-stock) companies and, with a few exceptions, are subject to the same regulations as a joint-stock company. The business objectives of an offshore company are limited. Offshore companies are exempt from corporate income tax and from the withholding tax on dividends, and are instead subject to a lump-sum annual tax of LBP 1 million.

Corporate residence

Tax is levied on all corporeal/natural and incorporeal/artificial persons, resident in Lebanon or outside, on all profits that they generate in Lebanon. The main premise for considering profits to have been realised in Lebanon is when such profits have occurred from an effort exerted in Lebanon, irrespective of the identity of the taxpayer or his place of residency.

Income tax is levied on profits generated by two categories of taxpayers:

Taxpayers that are considered resident (for tax purposes) are every person, establishment or company even if they are not physically resident in Lebanon when they satisfy any of the following two terms:

• Have an office or a fixed place of business in their name in Lebanon even when they are not undertaking their business in a normal and repetitive manner.
• Are practising the profession or business activity in a normal or repetitive manner even if they do not have a known registered place of business in Lebanon. This is because they are considered to have practised their profession from the place in which they contact their customers even if such place is a hotel or a café.

Non-resident taxpayers consist of persons (corporeal/natural and incorporeal/artificial) residing in Lebanon and persons residing outside Lebanon. Persons residing in Lebanon subject to the non-resident tax are corporeal persons that do not satisfy any one of the following two terms:

• Practise a certain trade in a normal and repetitive manner, irrespective of whether or not they have a registered place of business; and
• Have a registered known place of business.

Persons residing outside Lebanon subject to the non-resident tax are the persons, companies and establishments that obtain from Lebanon amounts, revenues, profits or proceeds as a result of their undertaking an activity in whole or in part on Lebanese territory or as a result of their exploiting rights in Lebanon.

Other taxes

Built property tax
The built property tax is a progressive tax ranging between 4% and 14%.

Value-added tax (VAT)
The standard VAT rate in Lebanon is 10%. Unless specifically exempt, VAT is levied on all commercial transactions undertaken by business entities. Export of goods and services and export-related services, international transport and some of the
intermediate operations are zero-rated. Banking, financial services and insurance operations are exempt from VAT.

**Stamp duty**
Two kinds of stamp duties are levied. A proportionate stamp duty of 3 per mil is levied on all deeds and contracts (written or implied) that mention specific payments or other sums of money. A fixed stamp duty ranging between a minimum of LBP 100 and a maximum of LBP 2 million is applicable on documents in accordance with schedules appended to the stamp duty law.

**Registration taxes**
The estimated cost of establishing a company is USD 7,500. This includes lawyer's fees and registration fees. The registration fees will increase if the company is established with a capital exceeding the minimum requirement. However, the registration fees should not normally exceed 1% of the value of capital.

For branch offices and representative offices, establishment costs are lower and may be estimated at USD 5,000.

When transferring ownership of real estate, registration fees of approximately 6% are applicable.

**Customs duties**
Lebanon's application to access the World Trade Organization (WTO) was received on 30 January 1999 and the exchange of information about Lebanon's trade regime already took place. Lebanon went through both bilateral and multilateral negotiations with several WTO members.

Modern, simple and efficient assessment means are adopted by the customs authorities, e.g., electronic declarations, declaration in advance, applying international procedures in clearing the goods, selective inspection, auditing the goods after their release and adopting the unique declaration.

Customs rates are imposed and modified according to decisions from the Lebanese customs authorities. These decisions are adopted based on the need of the Lebanese markets of some goods and the will to protect national production sectors.

Safeguard measures are provided in relation to imported goods. The purpose behind such measures is to protect the domestic production sectors when an increase of imports is witnessed when compared to the same period during the previous year.

The rates are determined based on a specific schedule created in conformity with the Harmonised System of Nomenclature. This conformity with the unified system allows Lebanon to represent an “importer friendly” environment for importers.

The normal rates are applied where there is no preferential agreement. When the origin of the good or part of the good is from a country with which Lebanon has a preferential customs treatment, preferential rates apply.

Customs rates in Lebanon are either determined in percentage or paid as a lump sum per unit of imported products.
**Transfer tax**
Transfer tax applies to all assets (fixed and movable) that are transferred from one party to another, except the Government and municipalities, in the way of estate, donation or any other way that does not imply a fair compensation. Transfer tax is due on the date of death or the execution of the donation. Transfer tax rates vary from 3% to 45%.

The statute of limitation does not apply to transfer tax in case of death or donation (gift). Transfers made without fair compensation within two years of the donor’s death are considered part of the donor’s estate and are taxed together with other estate assets and funds.

**Branch income**
