Net income derived from a branch’s operations in Lebanon is subject to Lebanese business income tax, levied at a rate of 15%. Taxable profits of foreign branch offices are deemed to be distributed and are subject to a dividend distribution tax at the rate of 10%.

**Income determination**

**Common tax adjustments**
Below are some of the most common adjustments done to accounting profits to reach taxable profits:

- Difference between fiscal and accounting depreciation;
- Non-deductible provisions such as provisions for bonuses, contingencies and charges;
- Fines and penalties are non-deductible;
- Withholding taxes borne by the company such as salary tax, non-resident tax are non-deductible;
- Gifts given by the company in cash are non-deductible;
- Gifts given by the company in-kind given to customers when the amount of each gift exceeds LBP 1 million per person per year and when the total amount of gifts in-kind exceeds 1% of the turnover are non-deductible; and
- Donations given to other than registered charitable organisations are non-deductible.

**Inventory valuation**
For tax purposes, inventory is valued using the weighted average cost method.

**Capital gains**
Under local legislation, companies are permitted to revalue their fixed assets every five years. Capital gains recognised from such a revaluation, as well as any profits that may be realised from the disposal of fixed assets are subject to a capital gains tax of 10%.

Income from disposal of shares realised by a company is subject to 10% capital gains tax when the shares are classified as financial assets in the company’s balance sheet.

Income from disposal of shares realised by a company whose main activity is the acquisition of investments are subject to 15% corporate tax.
Lebanon

Inter-company dividends
Dividends received as a result of a taxable person’s activity are deemed trading income and are subject to the flat corporate income tax rate of 15%. Dividends received as passive income are subject to 10% tax in Lebanon. However, dividends received from Lebanese entities are exempt from corporate tax, as the dividend tax is withheld at source, but are not exempt from further tax upon distribution from the recipient entity.

Foreign income
Income from any source, domestic or foreign, received by a corporation within Lebanon is subject to corporate tax. The scope of tax covers the activities carried out inside and outside Lebanon, which are administered or managed from Lebanon.

Stock dividends
The Lebanese law is silent on the tax implications of stock dividends. However, when share capital is increased by reducing retained earnings, no tax is applicable.

Interest income
Interest earned by corporations is added to the taxable income. Relief is given for the withholding tax suffered on bank accounts, treasury bills and bonds issue to the extent of the corporate tax due.

Partnership income
Profits of partnerships are deemed to be distributed and are taxed at progressive rates of 4% to 21%.

Rental income
Rental income should be deducted from the accounting result to reach the taxable result. Moreover, expenses related to property that is rented out should be added back to the accounting result to reach the taxable result.

A built property tax is paid on rental income at progressive rates ranging between 4% and 14%.

Royalties income
Royalties received by a holding company from Lebanese companies for patents and the like are taxed at a rate of 10%. Royalties received by holding companies from abroad are exempt from tax.

Royalties received by other than holding companies are taxed as ordinary income at 15%.

Unrealised exchange gains/losses
Unrealised exchange gains and losses are not treated differently from any other gain or loss for tax purposes, i.e., unrealised exchange gains are subject to corporate income tax at 15% and unrealised exchange losses are deductible for corporate income tax purposes.

Deductions

Depreciation and depletion
Depreciation of property, plant and equipment (at rates fixed by ministerial decree) is deductible.
**Net operating losses**
Tax losses may be carried forward for up to three years after the year in which they were originally incurred. The carryback of losses is not available.

Capital losses may be used to offset taxable profits of the current year but may not be carried forward.

**Payments to foreign affiliates**
Payments to foreign affiliates are generally subject to withholding taxes.

Based on guidance issued by the Ministry of Finance, recharges from the head office located abroad (including advertising) are deductible up to a certain limit, calculated as follows:

\[(\text{Assets of the branch in Lebanon/Consolidated assets}) \times \text{Central administrative expenses}\]

However, a ceiling of 3% of the branch's revenues is applied.

**Taxes**
Taxes and duties incurred in the course of business (except business income tax) are deductible.

Taxes due to foreign governments on income earned in Lebanon are non-deductible.

Exceptional taxes and fines are non-deductible.

**Other significant items**
Deductible expenses include:

- Cost of goods sold.
- Cost of services rendered.
- Rent of business premises or, if the premises are owned by the taxpayer, their depreciation.
- Salaries, wages and other employee benefits, including end-of-service indemnities.
- General business expenses, including insurance premiums.
- Interest on business loans, under certain conditions.
- Provisions for bad debts (if a debtor has been declared bankrupt), as well as reserves for severance payments, pensions and disability payments. Surplus provisions are added to profits.
- Charitable contributions to approved charitable, social, cultural or sporting institutions, within certain limits.
- Bad debts, after all means for collection of the debt have been exhausted.
- Advertising and publicity expenses, within certain limits.
- Travel, telephone, gifts and vehicle expenses, within certain limits.
- Entertainment expenses that are properly supported.
- Board remuneration against services performed.
- Accrued expenses as long as their occurrence is certain.
- Organisation and start-up expenses are amortised over three to five years for tax purposes.
- Employees’ life insurance premiums are deductible as long as they are included in the employees’ benefits subject to payroll tax.
Non-deductible expenses include:

- Interest paid on the taxpayer’s capital.
- With the exception of normal maintenance expenses, costs that increase the value of the property, plant or equipment (such costs should be capitalised and depreciated in accordance with the fiscal depreciation rates).
- Losses or share-in-costs resulting from enterprises, offices and branches situated outside Lebanon.
- Representation allowances in excess of 10% of an employee’s basic salary, as well as unjustifiable and unreasonable salaries.
- Personal expenses such as payments deducted by an employer or partner for the management of the business and for certain business expenses incurred by the employer or partner.
- Appropriations made to board members that do not comprise remuneration for work done.
- Fines and penalties.
- Provisions other than those specifically allowed by law. Examples of non-deductible provisions include provisions for bad debts and provisions for slow moving items.

**Group taxation**

There is no group taxation in Lebanon.

**Tax incentives**

**Holding companies**

Lebanese holding companies are exempt from corporate income tax and from withholding tax on dividends. However, they are subject to a tax on their paid-up capital and reserves. In any given tax year, total tax payments on paid-up capital and reserves are capped at LBP 5 million. Interest, management fees and royalties received by holding companies from abroad are exempt from tax.

**Offshore companies**

Offshore companies are exempt from corporate income tax and from the withholding tax on dividends; they are instead subject to a lump-sum annual tax of LBP 1 million. Contracts related to offshore activities outside Lebanon are exempt from Lebanese stamp duty.

**Permanent exemptions**

Companies and organisations that are granted an indefinite exemption from business income include the following:

- Educational institutions.
- Hospitals, orphanages, asylums and other shelters that admit patients free of charge.
- Shipping, sea and air transport associations (subject to certain restrictions).
- Farmers provided they do not display farm produce and cattle outlets or sell products and meat after conversion tax.
- Syndicates and other types of professional associations.
- Miscellaneous non-profit organisations and co-operatives.
- Holding companies and offshore companies.
- Public sector bodies that do not compete with private institutions.
**Reinvestment incentives**
Industrial companies using operating profit to finance certain capital investments are exempt from up to 50% of their income tax liabilities for a period of up to four years, provided that such exemptions do not exceed the original investments made. In areas designated “development zones”, 75% of a company’s tax liabilities may be exempt.

In order to take advantage of this regulation, investments should consist of capital expenditure designed to increase a company’s manufacturing capacity, or of investments in housing facilities for the company’s staff and other employees.

**Withholding taxes (WHT)**

**Tax on interest**
The income, revenues and interest earned from accounts opened at Lebanese banks and from treasury bonds are subject to a 5% withholding tax that is non-refundable and without the possibility of carrying forward. This tax is considered as an advance payment on the current corporate income tax due to the extent of that amount and acts as a minimum tax in situations where the tax due is lower than the tax on interest paid.

**Non-resident tax**
Revenues earned by non-residents in Lebanon are subject to an effective tax rate of 2.25% of the revenue in the case of revenue from sale of materials and equipment, and 7.5% of the revenue in the case of sale of services. The non-resident tax is a withholding tax.

**Movable capital tax**
A withholding tax at a rate of 10% is levied on income derived from movable capital generated in Lebanon. Taxable income comprises:

- Distributed dividends, interest and income from shares;
- Directors’ and shareholders’ fees;
- Distribution of reserves or profits; and
- Interest from loans to corporations.

**Tax on dividends**
Tax is withheld from dividends paid to shareholders/partners at a rate of 10%. The dividend distribution tax rate may be reduced to 5% under specific conditions.

**Notes**

1. Shall not exceed:
   a. 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) which holds directly at least 25% of the equity capital of the company paying the dividends.
   b. 10% of the gross amount of the dividends in all other cases.
2. Dividends, interest, or royalties arising in a Contracting State and paid to a resident of the other Contracting State shall be taxable only in that other State.
3. Shall not exceed:
   a. 5% of the gross amount of royalties paid for the use of, or the right to use, any industrial, commercial or scientific equipment;
   b. 10% of the gross amount of royalties paid for the use of or the right to use, any copyright of literary, artistic or scientific work, including cinematograph films and films or tapes for radio or television broadcasting any software, patent, trademark, design or model, plan, secret formula or process, or for information concerning industrial, commercial or scientific experience.
4. a. Where the dividends are paid by a company which is a resident of Lebanon to a resident of Malta who is the beneficial owner thereof, the Lebanese tax so charged shall not exceed 5% of the gross amount of the dividends;
   b. Where the dividends are paid by a company which is a resident of Malta to a resident of Lebanon who is the beneficial owner thereof, the Malta tax on the gross amount of the dividends shall not exceed that chargeable on the profits out of which the dividends are paid.
5. Shall not exceed:
   a. 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) which holds directly at least 10% of the equity capital of the company paying the dividends.
   b. 10% of the gross amount of the dividends in all other cases.
6. Shall not exceed:
a. 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) which holds directly at least 20% of the equity capital of the company paying the dividends.
b. 10% of the gross amount of the dividends in all other cases.

7. Shall not exceed:
a. 10% of the gross amount of royalties paid for the use of or the right to use, any copyright of literary, artistic or scientific work, including cinematograph films and films or tapes for radio or television broadcasting.
b. 5% of the gross amount of royalties paid in other cases.

8. Shall not exceed:
a. 10% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) which holds directly at least 15% of the equity capital of the company paying the dividends.
b. 15% of the gross amount of the dividends in all other cases.

9. Shall not exceed:
a. 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) which holds directly at least 20% of the equity capital of the company paying the dividends.
b. 15% of the gross amount of the dividends in all other cases.

**Tax administration**

**Audit cycle**
The most common ways for the tax authorities to select companies for tax audits are the size of the company, the type of business and certain risk assessment measures.

Tax audits typically cover a single type of tax.

In a typical situation, a tax audit is likely to take less than one year from first information request to substantive resolution.

**Statute of limitations**
The tax administration has four years to collect its rights. The period is calculated from the end of year that follows the current business year.

The taxable person may request the refund of excess tax within four years starting from the end of the year where the refund right was created.

The tax administration can exceed the statute of limitations in cases where a profit or revenue has been proven by a court order, arbitration or inheritance clearance. The extension is limited till the end of the calendar year following the end of the year in which the tax administration was notified of such event.

Under the statute of limitations a company should keep its accounting books and documentation for 10 years.

**Returns**
Taxes on business income in any given year are based on the profits of the previous financial year. Lebanon’s fiscal year runs from January to December and is based on the Gregorian calendar. With the special permission of the local tax authorities, companies may, however, use their own accounting year.

Tax returns by artificial persons (entities) must be filed by 31 March of the year following the year of income. Tax returns by capital companies must be filed by 31
Lebanon

May of the year following the year of income. If taxpayers fail to submit a tax return, realisation penalties will be due.

Payment of tax
The same deadlines for tax returns apply for tax payments.

If taxpayers fail to make payment, late payment penalties will be due.

Topics of focus for tax authorities
Lately, several topics have been of interest to the tax authorities in Lebanon, including transfer pricing, payments of royalties and management fees to non-resident parties, provisions and employee compensation.

Other issues

Foreign investment incentives and restrictions
Law No.360 was passed in 2001 to encourage investments, while the Investment Development Authority in Lebanon (IDAL) was established to implement the law’s provisions. This institution became operational in January 2002 and is responsible for attracting private capital investments to Lebanon and assisting investors in the development and implementation of their projects. Article 2 of the law provides that investors who will benefit from its provisions are those who invest in the sectors of industry, agriculture and agricultural products, tourism, information technology, communications, media besides other sectors to be defined by the council of Ministers through a law to be decreed based on a proposal of the prime minister.

Foreign ownership of real estate restrictions:

- Up to 3,000m² does not require Council of Ministers approval.
- Exploitation and normal lease right extending for a period of more than 10 years cannot be attained without obtaining approval.
- Real estate owned by foreigners, for which approval has been obtained, cannot exceed over all of the Lebanese territory 3% of the total area of Lebanon. In each province, the total area owned should not exceed 3% of its area and with respect to Beirut it should not exceed 10% of its area.
- The approval is nullified if not acted upon during a period of one year.
- When approval is granted the building on the real estate should be constructed within a period of five years (renewable once by the Council of Ministers).

Exchange controls
No exchange controls are applicable in Lebanon.

Choice of business entity
Lebanon’s commercial law provides for a range of business entities available to both local and foreign investors. These are:

- Sole proprietorships;
- General partnerships;
- Limited partnerships;
- Joint-stock companies (SAL);
- Limited liability companies (SARL);
- Holding companies;
• Offshore companies; and
• Representative offices.

Legal structures commonly used by foreigners in conducting business in Lebanon are joint-stock companies, limited liability companies and branch offices.

**Intellectual property**

The law in Lebanon does not contain a clear definition of author’s rights. It protects all products of the human intellect whether written, pictorial, sculptural, scriptural or oral regardless of its value, importance, destination or form of expression.

The law provides patent protection for inventions and plant varieties and a *sui generis* protection for layout designs of integrated circuits. Furthermore, the law provides protection for undisclosed information. According to an assessment conducted by the World Intellectual Property Organization (WIPO) in July 2002, the Patent law is in complete conformity with the WTO’s Agreement on Trade-Related Aspects of Intellectual Property Rights (TRIPS). It was also pointed out that the provisions of the Plant Varieties exceed the minimum requirements of the TRIPS Agreement.

The law does not explicitly protect notorious trademarks and geographical indications. However, those are provided protection via Lebanon’s membership to the Paris Convention. Moreover, Geographical indications are provided protection under the provisions of the new Law on Customs, the Law on Fraud Control and the Criminal Law.

The copyright protection originally available to literary and artistic works is now extended to computer software, video films and all kind of audio-visual works. The law provides stiffer penalties for offenders and better compensation to the persons whose rights have been infringed. The manner in which the copyright is breached has also been extended.

**Mergers and acquisitions (M&A) from a business and tax perspective**

No specific M&A rules are applicable in Lebanon. The general tax rules will apply in case of M&A.

Significant developments

The new Income Tax Law (Law 7 of 2010) became effective on 28 April 2010. The new Executive Regulations, which support the law, are still to be issued and the existing Executive Regulations will remain effective. If conflict exists between the new law and the old Executive Regulations the new law will prevail.

Taxes on corporate income

Tax is imposed annually on the same basis for Libyan controlled corporate entities, foreign controlled corporate entities and branches of foreign companies.

Tax is levied on taxable profits at a flat rate of 20%. In addition, there is a flat rate of Jehad Tax assessed at 4% on taxable corporate profits.

Corporate residence

Corporate residence is not specifically dealt with in the laws of Libya. The tax authorities will seek to assess any income derived from services provided in Libya.

Other taxes

Stamp duty
Stamp Duty Law (Law 12 of 2004, as amended by Law 8 of 2010) levies a schedule of duties and rates on various documents and transactions. The most relevant to corporate entities is Schedule 28, which prescribes the rate of duties on contracts for the provision of services or supply. The duty on main contracts is 1% and on subcontracts 0.1%. Note there is a duty of 0.5% on all payments to the Tax Department as well.

Branch income

Tax rates on branch profits are the same as on corporate profits.

However, the Income Tax Law allows the Tax Department to assess income tax on branches of foreign companies as a percentage of turnover - the “deemed profit” basis of assessment. Tax is therefore payable even where tax losses are declared.
The level of deemed profit applied to turnover varies according to the branch's type of the business activity. This ranges from 10% - 15% for civil works and contracting (turnkey projects), 15% - 25% for oil service and between 25% - 40% in the case of design/consulting engineers. The deemed profit percentage applied to any year will be higher than the profit percentage declared in the annual tax return.

**Income determination**

For any Libyan registered entity, income arising both in Libya and abroad is assessable in Libya.

**Inventory valuation**

Libyan taxation laws do not contain any special provisions regarding inventory valuation.

**Capital gains**

Any chargeable gains on the sale of capital assets are taxed as ordinary income. For entities assessed on a deemed profit basis, capital gains should be added to the deemed taxable income.

**Inter-company dividends**

Libyan taxation laws do not contain any special provisions regarding inter-company dividends.

**Stock dividends**

Stock dividends are not specifically dealt with in the laws in Libya. The current practice is for dividend distributions not to be taxed on the recipient.

**Deductions**

The taxable income is determined after deducting all expenditure and costs incurred in the realisation of the gross income (see Branch income section for more details on the deemed profit basis of assessment on branches of foreign companies).

**Depreciation**

Depreciation should be calculated in accordance with the Executive Regulations of the law.

**Net operating losses**

Losses may be carried forward and deducted from future profits, for up to five years. The Income Tax Law has no provision for the carryback of losses.

**Group taxation**

There is no recognition of a group for taxation purposes.

**Tax incentives**

Exemptions to corporate income tax exist most notably under the Investment Law. The Tourism Investment Law allows a 10 year corporate income tax holiday from the commencement of project operations. General projects registered under
Libya

the Investment Law are permitted a five year corporate income tax holiday with a possibility to extend for a further three years.

Exemptions can also exist for strategic infrastructure projects. Such exemptions must be awarded by the General People’s Committee (GPC) either by ratifying the relevant contract, which includes a tax exemption clause, or by the issuance of a separate law.

**Withholding taxes (WHT)**
Libyan law has no withholding taxes. For unregistered foreign entities seeking to register a contract with the tax authorities income tax will be assessed (and must be settled) on a deemed profit basis at the time of registration. It may be possibly to negotiate a withholding tax in preference to the aforementioned general procedure for more a significant contract where there is greater uncertainty as to the estimated contract value.

**Tax administration**

**Returns**
The tax year is generally a calendar year, although assessments can be made on the basis of a company’s own year-end, provided permission is granted in advance from the tax department and the company then adheres consistently to the same date. All corporate entities must make an annual filing within four months of its year-end or one month within its audit report, whichever is earlier.

**Statute of limitations**
The statute of limitations for income tax purposes is seven years.

**Payment of tax**
Corporate income tax is payable on a quarterly basis (10 March, 10 June, 10 September and 10 December) normally commencing the first quarter date after an assessment has been issued.

**Late payment penalties**
A late payment penalty is assessed on the tax due at the rate of 1% to a maximum of 12%. In addition, the remaining quarterly payments are due immediately for failing to make an instalment on time.

The new law also increases the following penalties:

- A fine of not less than three times the amount of unpaid tax due shall be applied to any person who fails to pay tax by the due date.
- Without prejudice to any harsher penalty, a fine of not less than four times the amount of tax due and unpaid will be applied to any person who, with intent to evade all or part of the tax, commits any of the following acts or abets, agrees, or aids a person who commits such an act:
  - The making of false statements in declarations submitted under this law.
  - The preparation of false accounts, books and records, reports, or budgets.
  - The use of fraudulent means to conceal or attempt to conceal taxable amounts due under this law.
**Statutory books**

Business entities operating in Libya are required by Libyan law to maintain a general ledger and a general journal (the “statutory books”).

Before use, these must be stamped as registered with the Revenue Authorities and the Commercial Court. It should be noted that a ledger or journal will not be registered if it already contains accounting entries, i.e., one cannot register existing books of account.

Similarly, transactions pre-dating the date the books are registered will be disallowed. In theory, transactions should be entered daily, but in practice, most companies write up their statutory records on the basis of monthly transactions summaries.

The Tax Inspector will always request production of the statutory books at the commencement of a tax audit. If these are not available, a perfunctory audit of the English language (or other language) books of account will be made and it is likely that there will be a punitive increase in taxable income as a consequence.

Note, that a new commercial code is being considered that may allow approved computer based ledgers to be used instead of the traditional manual ledgers. At this juncture uncertainty exists as to who would provide such approval and on what basis.

**Significant developments**

The government of the Principality of Liechtenstein has proposed a new tax law with the objective to create a tax system which is attractive and competitive for investment, but still compatible with international standards. The new tax law is planned to take effect for the fiscal year 2011.

Below is an incomplete extract of the new tax law highlighting the most important changes:

In principle, all corporations, foundations and establishments will be subject to a profit taxation of 12.5%.

To improve the attractiveness, the following elements are proposed:

- Introduction of a standardised deduction for interest on equity, which will reduce the effective tax rate depending on the profitability of the company.
- Dividend income and capital gains from disposal of participations will be tax exempted, irrespective of the capital ownership percentage and the holding period.
- Losses can now be carried forward indefinitely.
- The capital tax will be abolished.
- A tax deduction of 80% of the intellectual property (IP) income derived from research and development (R&D) will be introduced.
- A group taxation scheme for directly held subsidiaries in the European Union (EU), European Economic Area (EEA), and Switzerland (CH).
- The current taxation scheme for holding and domicile companies will be abolished, at the latest after the fiscal year 2015. This is mainly relevant for domicile companies that are engaged in commercial activities outside of Liechtenstein.
- For corporations, foundations and establishments, finally held by individuals, that only engage in the administration of its own assets, the new private funds companies tax scheme may apply. Such companies are only subject to taxation of 6% on the legally required minimal nominal capital, at minimum Swiss Franc (CHF) 1,800 per year.
- The 4% withholding tax (coupon tax) on profit distributions will be abolished. However, old reserves remain subject to the coupon tax. Interestingly, a transitional taxation of 2% in the first two years after enactment is suggested to encourage early settlement.

The new tax law proposes major changes to the current tax scheme. It is therefore recommended that persons with investments in Liechtenstein should have the changes analysed to determine how it may apply specifically to their situation.
Taxes on corporate income

Taxable income is taxed at basic rates ranging from a minimum of 7.5% to a maximum of 15%. The applicable rate is determined by the ratio of profit to capital and reserves, based on the following formula.

\[
\frac{(\text{Taxable income} \times 100)}{(\text{Taxable capital} \times 2)} = X\%
\]

If the dividend distribution exceeds 8% of taxable capital, a surcharge of one to five percentage points is added to the basic income tax rate applicable for the year in which the dividend is declared, on the basis of the following table.

<table>
<thead>
<tr>
<th>Dividend in excess of percentage of taxable capital</th>
<th>Increase of tax rate in percentage points</th>
</tr>
</thead>
<tbody>
<tr>
<td>8</td>
<td>1.0</td>
</tr>
<tr>
<td>10</td>
<td>1.5</td>
</tr>
<tr>
<td>12</td>
<td>2.0</td>
</tr>
<tr>
<td>14</td>
<td>2.5</td>
</tr>
<tr>
<td>16</td>
<td>3.0</td>
</tr>
<tr>
<td>18</td>
<td>3.5</td>
</tr>
<tr>
<td>20</td>
<td>4.0</td>
</tr>
<tr>
<td>22</td>
<td>4.5</td>
</tr>
<tr>
<td>24</td>
<td>5.0</td>
</tr>
</tbody>
</table>

Consequently, the maximum rate applicable is 20%.

There are two categories of companies in Liechtenstein for income tax purposes: ordinary taxed companies and privileged companies. Ordinary taxed companies are subject to income tax and capital gains tax on equity, whereas privileged companies are not taxed on income and have reduced capital taxes. Privileged companies include trusts, establishments, captive insurance companies, foreign investment companies, investment companies, domiciliary and holding companies.

For details on the taxation of domiciliary and holding companies see Tax incentives.

Corporate residence

A company is considered to be resident in Liechtenstein and thus subject to unlimited tax liability if its registered seat (address) or place of effective management is within Liechtenstein.

Other taxes

Value-added tax (VAT)

Liechtenstein has adopted the VAT law of Switzerland, having its own administration in Vaduz.

Any person, who irrespective of legal form carries on a business, is liable for VAT. Any person liable for VAT that is involved in domestic entrepreneurial activity with a taxable turnover which is less than CHF 100,000 within a financial year can be exempt.
from taxation. Companies which are not covered with this general rule are listed under Article 10 paragraph 2c VAT and Article 45 to 49 VAT. Note that various services are VAT exempt (e.g., health area, social security, education, bank and insurance services, etc.).

The general tax rate is 7.6%. A reduced rate of 2.4% is applicable to deliveries such as food, drugs, newspapers, magazines and books. Furthermore, lodging/accommodation is taxed at only 3.6%.

**Branch income**

The same principles applicable to corporations also apply for branch income, provided that transactions with the head office or other branches are at an arm's-length basis. Liechtenstein taxation is imposed on the profit attributable to the branch and on the capital invested in the branch.

There is no withholding tax on profit transfers to the head office.

**Income determination**

**Inventory valuation**

Inventories must be stated at the lower of cost or market. Cost is generally determined by the first-in, first-out (FIFO) or by the average cost method. The tax authorities permit a general reserve against stock contingencies of up to one-third of the inventory cost or market value at the balance sheet date without inquiry into its justification, provided a detailed record of inventory is available for review by the tax authorities. The need for a reserve in excess of this amount (e.g., for obsolescence, slow-moving stocks) must be substantiated to the satisfaction of the tax authorities.

**Capital gains**

Capital gains other than those arising on the sale of real estate are classified as normal business income and are subject to tax at the regular corporate tax rates.

Capital gains from the sale of real estate are subject to a separately assessed real estate profits tax. The taxable gain is basically the difference between proceeds of the sale and the original purchase price of the property plus any capital expenditure incurred. The basic tax rate is at present 1.08%, subject to various surcharges, depending, inter alia, on how long the vendor has owned the property concerned and the amount of taxable profit. The maximum rate of real estate profits tax is presently 34.02%.

**Inter-company dividends**

Dividends net of foreign taxes assessed are subject to ordinary corporate taxes unless the company has holding or domiciliary status (see Tax incentives below). For qualifying foreign and domestic dividends out of participations, participation relief similar to that in Switzerland is available.

**Foreign income**

Resident corporations operating locally are basically taxed on their worldwide income, with the exception of income from real estate and permanent establishments situated abroad.
Profits of a domestic corporation’s foreign branch are usually exempt from Liechtenstein corporate income tax. However, the progression provision (i.e., exempt foreign-branch income is nevertheless included for the determination of the applicable tax rate) is applicable, and the treatment of these profits depends on the method of allocation.

The income of a foreign subsidiary is taxable only when repatriated to the Liechtenstein parent company, e.g., in the form of dividends or interest.

The proceeds from the liquidation or sale of a foreign subsidiary in excess of the carrying value of the investment are taxable as ordinary income, unless the company is a privileged company in which case the proceeds are free of tax.

**Deductions**

**Depreciation and depletion**

Depreciation of intangible and tangible fixed assets is allowed to the extent it is “commercially justified.” For tax purposes, either the straight-line (depreciation based on the acquisition value) or the declining-balance method (depreciation based on the book value) may be used. Depreciation and amortisation not recorded in the statutory accounts are not deductible for tax purposes.

A special (higher) rate of depreciation may be allowed for assets used only for short periods or for assets for which a rapid decrease in value can be proved.

**Rate per annum (according to “Verordnung vom 15. September 2009”):**

<table>

</tbody>
</table>
Recaptured depreciation on the sale or revaluation of depreciated assets is classified as normal business income.

**Net operating losses**
A loss may be carried forward and offset against the profits for future years for up to a maximum of five years. Losses may not be carried back.

**Payments to foreign affiliates**
Interest, royalties, and other fees to foreign affiliates are allowable as deductions to the extent that they meet the arm’s-length test (i.e., equivalent to charges that would be made by an unrelated third party).

For interest payments between affiliated companies or between shareholders and companies, Liechtenstein tax authorities publish safe harbour rules annually.

**Taxes**
All taxes paid, including corporate income tax but excluding the coupon (withholding) tax, are deductible from income in the accounting period in which they are paid.

**Group taxation**
Each corporation is taxed as a separate entity; for example, a parent company and its local subsidiaries are taxed separately; only the dividends from the subsidiaries, and not their profits, are taxed in the hands of the parent company. For some investments (more than 20% or a market value of more than CHF 2 million / holding period minimum one year), the taxation of the dividends from a subsidiary to the parent company can be exempt from taxation in the parent company.

**Tax incentives**
Liechtenstein is well known for its domiciliary and holding companies. A domiciliary company is a legal entity incorporated in any of the legal forms governed by the Persons and Companies Code that has its registered seat in Liechtenstein but carries out no commercial activities within the country.

A holding company is a corporate body with its registered seat in Liechtenstein whose purpose consists entirely or mainly of the administration or management of assets or investments.

The status for qualification as a domiciliary or holding company is therefore merely a question of the company’s purpose. The legal form of the company (e.g., corporation,
establishment (Anstalt)) may be that most suitable to the shareholders or the activities to be performed.

Business entities having the status of a domiciliary or holding company are exempt from any income tax. The benefit of this income tax exemption must, however, be considered together with the absence of any significant double taxation treaty. For instance, the double taxation treaty with Austria expressly precludes foreign-owned domiciliary and holding companies from taking advantage of the treaty. Any foreign taxes levied on the company’s income are therefore final.

A capital tax of 0.1% is, however, levied on the company’s net equity, i.e., on paid-in capital, all reserves and retained earnings. The capital tax is payable annually in advance; the minimum tax is CHF 1000.

Dividend distributions of domiciliary or holding companies whose capital is divided into shares are subject to a 4% coupon (withholding) tax with the exception of captive insurance companies, trusts and investment companies.

Captive insurance companies are exempt from any income tax on that part of their income derived from the captive insurance business, whereas income from third-party insurance is subject to ordinary income tax. Captive insurance companies pay a capital tax of 0.1% on net equity. For the part of net equity exceeding CHF 50 million, there is a reduced tax rate of 0.075%; for net equity in excess of CHF 100 million, the rate is further reduced to 0.05%. Captive insurance companies can apply to be subject to ordinary income and capital taxes.

### Withholding taxes (WHT)

* A coupon tax of 4% is levied on interest from bonds and similar loans, on time deposits with domestic banks with a term in excess of 12 months and on loans in excess of CHF 50,000 with a minimum term in excess of two years, but not on interest of normal inter-company loans.

### Tax treaties

A comprehensive double taxation treaty on income is in effect with Austria, and a limited one with Switzerland.

Recently Liechtenstein initiated double taxation treaties with Luxembourg and San Marino, Uruguay and Hong Kong. Furthermore, various tax information exchange agreements (TIEAs) have been concluded.

The Governments of Liechtenstein and UK have signed a Memorandum of Understanding (MOU) Relating to Cooperation in Tax Matters, which includes the
Liechtenstein disclosure facility (LDF). According to these regulations, financial intermediaries in Liechtenstein are required to show that their UK customers have been declaring their Liechtenstein investments to HM Revenue and Customs (HMRC). Disclosure can be made between 1 September 2009 and 31 March 2015. In certain circumstances, even accounts or assets outside of Liechtenstein may be transferred to Liechtenstein in order to take advantage of the terms of the LDF.

**Tax administration**

**Returns**
Companies other than holding and domiciliary companies must file a tax return within six weeks after the adoption of the financial statements by the shareholders’ meeting but no later than 1 July of the calendar year following the fiscal year-end.

The tax assessment issued by the tax administration is based on the company’s tax return, including the attachments and the financial statements filed.

Holding and domiciliary companies do not file a tax return. Rather, these companies simply furnish audited financial statements to the tax authorities or, if appropriate, a declaration of the non commercial nature of operations to the Registry of Commerce within six months after the company’s fiscal year-end.

**Payment of tax**
Companies other than holding and domiciliary companies must pay the tax within 30 days of receipt of the assessment, which is generally in the fall of each year. Payment may be made in instalments if approved by the tax administration. The taxes for holding and domiciliary companies are regularly payable in advance.

**Other issues**

**Tax information exchange agreements (TIEA) and Liechtenstein disclosure facility (LDF)**
Recently, Liechtenstein concluded various TIEAs.

Furthermore the Governments of Liechtenstein and UK have signed a Memorandum of Understanding Relating to Cooperation in Tax Matters (MOU), which includes the LDF. According to these regulations, financial intermediaries in Liechtenstein are required to be satisfied that their UK customers have been declaring their Liechtenstein investments to HMRC. Disclosure can be made between 1 September 2009 and 31 March 2015. In certain circumstances, even accounts or assets outside of Liechtenstein may be transferred to Liechtenstein in order to take advantage of the terms of the LDF.

Significant developments

Recent amendments to the law on corporate income tax (CIT) and the law on value-added tax (VAT) that:

• Reduced the standard CIT rate from 20% to 15%.
• Reduced the CIT rate for small and medium enterprises (SMEs) from 13% to 5%;
• Increased the VAT rate from 19% to 21%;
• Allowed entities involved in investment projects are able to reduce their taxable profits up to 50% by the acquisition costs of fixed assets meeting certain criteria;
• Repealed withholding tax (WHT) on interest as of 1 January 2010 if the interest is paid to entities registered or otherwise organised in European Economic Area (EEA) member states or in countries with which a treaty for avoidance of double taxation (DTT) is applicable and fulfils other requirements of CIT law.

Taxes on corporate income

The standard corporate income (CIT) tax rate is 15%. It was reduced from 20% to 15% as of 1 January 2010.

Exemptions

The following types of income are exempt from CIT:

1. Insurance indemnity not in excess of the value of lost property or other losses or damages; the refunded part of insurance premiums in excess of the premiums deducted from income in accordance with the procedure established; and a part of insurance indemnity in excess of the premiums deducted from income in accordance with the procedure established.
2. Proceeds of a bankrupt company received from sale of its property.
3. The balance of the formation fund of an insurance company as prescribed by the law on insurance.
4. Investment income of investment companies with variable capital and closed-end investment companies acting in accordance with the law on collective investment undertakings, except for dividends and other distributable profits.
5. Income derived by health care institutions for their services that are financed from the funds of the Compulsory Health Insurance fund.
6. Income derived from revaluation of fixed assets and liabilities as established by laws and regulations, except for income derived from the revaluation of derivative financial instruments acquired for hedging purposes.
Lithuania

7. Default interest except for that received from foreign companies registered or otherwise organised in blacklisted territories or residents of such territories.
8. All or part of the profit gained from legal entities of unlimited civil liability that are payers of the corporate income tax and with income that is subject to the corporate income tax under the law or to a similar tax under respective statutes of foreign countries with certain exceptions.
9. Fees collected by seaports and airports, charges for air traffic navigation services and funds collected from the lease of seaport-owned land.
10. Results arising from adjustments made for the previous tax periods as prescribed by the law on accounting.
11. Indemnification for damages received by the company with certain exceptions.
12. Compensation received according to the Lithuanian programmes of the EU financial support relating to taking fishing ships for scrap.
13. Capital gains derived from the transfer of shares in a company incorporated in the EEA or in a country with which Lithuania has a valid double taxation treaty and which is a payer of CIT or an equivalent tax, provided: the Lithuanian holding company holds more than 25% of voting shares for a continuous period of (1) at least two years; or (2) at least three years when the shares were transferred in one of the established forms of reorganisation. Certain restrictions apply.
14. Life insurance payments received by insurance companies, provided the term of the life insurance policy is valid for not less than 10 years or at the date of the receipt of the insurance benefit, the recipient has reached the pension age in accordance with the additional law on pensions. Additionally, insurance investment income of insurance companies except for dividends and other distributable profit are exempt, along with investment insurance income of insurance companies received according to the contracts of life insurance occupational pensions concluded in accordance with the law on accumulation of occupational pensions.
15. Direct and other compensational allowances, which are received by units performing agricultural activities to maintain their level of income, which meet the requirements established in the laws and other legal acts of Lithuania.

Local taxes
There is no local or municipal CIT.

Corporate residence
A company is resident in Lithuania if it incorporates there or its activities create a permanent establishment (PE) for tax purposes. According to local legislation, a foreign company is deemed to have a PE in Lithuania when:

1. It permanently carries out commercial activities in Lithuania in whole or in part;
2. It carries out its activities through a dependent representative (agent);
3. It uses a building site or construction, assembly or equipment objects; or
4. It uses equipment, including drilling installations and ships, for exploration or extraction of natural resources.

Double tax treaties (DTTs) may establish different rules of PE recognition. According to domestic law, where there is a DTT, the provisions of the treaty take precedence.

A PE must be registered as a taxpayer with the tax authorities in the territory where its activities are carried out. Its profits are subject to the corporate income tax at the rate of 15%.
Other taxes

Value-added tax (VAT)
The standard VAT rate is 21% (applicable from 1 September 2009). The reduced rate of 9% applies to:

- Books and non-periodicals (applicable by 31 December 2010); and
- Supply of heating of residential premises and the supply of heating water (applicable by 31 August 2010).

The reduced rate of 5% applies to:

- Compensated pharmaceuticals and medical aid devices (applicable by 31 December 2010).

The compensational rate for farmers is 6%.

In general, supplies of goods and services made by a taxable person performing its economic activity for a consideration within the territory of Lithuania and imports of goods are subject to VAT.

Exemptions with credit (0%-rated; including, but not limited to):

- Supply of goods exported outside of the EU;
- Goods acquired by non-EU resident passengers in Lithuania and carried out from the EU;
- Goods and services for vessels and aircraft;
- Transportation and any directly linked ancillary services related to export of goods and any directly linked ancillary services related to the import of goods when the value of these services shall be included in the customs value of the goods;
- Transportation of imported goods carried to a VAT exemption warehouse or temporarily stored under customs' supervision, placed in a free economic zone or free warehouse, put under customs warehousing procedure, processed under customs' supervision, temporarily imported for processing without levying customs duties, temporarily imported without implicitly levying customs duties or put under internal or external transit procedure;
- Issuance of TIR and ATA documents;
- Insurance and certain financial services directly related to export of goods from the EU;
- Supply of goods to sponsorship or charity recipients registered in Lithuania and listed in the Lithuanian law on charity and sponsorship, if the goods are exported by said recipients as sponsorship or charity to non-EU organisations which may be recipients of sponsorship or charity under the law;
- Supply of maintenance and processing services for movable property supplied to non-taxable persons established outside Lithuania that have no subdivision within the country provided that the property was temporarily imported for maintenance, repair, processing, etc. in the EU and will be carried out from the EU after supply of these services;
- Services of disclosed agents participating in certain transactions of supply of goods or services to local taxable and non-taxable persons where zero-rated VAT is applied and transactions of supply of goods or services where the supply of goods or services is considered carried out outside the EU;
Lithuania

- Supply of goods to VAT payers registered in another member state when these goods are carried out from Lithuania to another member state;
- Supply of new means of transport supplied to any person when new vehicles are carried out from Lithuania to another member state;
- Supply of goods subject to excise tax when they are supplied to a company not registered for VAT purposes and the goods are carried out from Lithuania to another member state; and
- Supply of goods in certain cases related to international trade, etc.

In order to apply zero-rated VAT on goods carried out from Lithuania, VAT payers must hold supporting documents as evidence that these goods were actually exported from the EU or carried out from Lithuania to another member state.

Exemptions without credit (including but not limited to):

- Personal or public health care services under certain conditions;
- Human organs, blood, human milk and dental prostheses supplied by dentists or dental technicians;
- Transportation of ill, wounded or other persons requiring medical care by special means of transport;
- Social services supplied by institutions for children and young people, nursing homes for the elderly and/or by care or guardianship institutions for disabled or by other non-profit entities;
- Education and training services;
- Cultural and sports services rendered by non-profit entities;
- Services provided by political parties, trade unions and other non-profit membership based legal entities to their members when these services correspond to that set out in the articles of association and are provided free-of-charge, except for membership fees;
- Services provided by religious communities, other communities and centres to their members if these services correspond to the purposes of these communities set out in their canons, statutes and other documents and are provided free-of-charge, except for donations;
- Postal services and directly related goods supplied by government-listed universal postal services providers, except for individually negotiated postal services;
- Radio and TV broadcasting services provided by non-profit legal entities;
- All types of insurance and re-insurance services and related services rendered by insurance and re-insurance agents;
- Financial services meeting certain requirements;
- Lotteries and gambling;
- Postage stamps and other government-listed special signs available for sale against their nominal value (this provision shall be applied only to the postage stamps which can be used as a confirmation of payment for postal services in Lithuania);
- The letting of residential premises (except for accommodation services provided by hotels, motels, camping and other accommodation services or letting of residential premises not indicated above when the letting period is not to exceed two months);
- The letting or sale of immovable property other than residential premises (certain exceptions apply); and
- Supply of goods where the VAT payer has not deducted any proportion of the VAT on purchases and/or importation thereof (certain conditions apply).

Intra-community acquisitions are VAT-exempt provided that:
Lithuania

- The supply of such goods in Lithuania would be VAT-exempt or zero-rated or the imports of such goods would be VAT-exempt;
- The purchaser who is a foreign taxable person should be able to refund this VAT; and
- Triangular transactions meeting certain criteria.

In order to apply exemptions, companies should make sure their services and goods supplied meet the appropriate VAT exemption requirements.

Option to tax (applicable to):

- Leasing of immovable property;
- Sale or other transfer of old immovable property (i.e., used for more than 24 months); and
- Financial services meeting certain requirements.

Option to tax may be exercised only if the customer is a taxable person registered for VAT purposes. If a VAT payer decides to use the option to tax, it is valid for at least 24 months.

Starting from 2010 VAT refund from other member states may be claimed via the new electronic system. Electronic requests have to be submitted via the official website of the tax authorities, while the refund procedure is carried on by the tax authorities of the member state concerned.

**State dues (stamp taxes)**
State dues are payable on activities of state institutions, such as the issuance of documents having legal force and other deeds.

**Land tax**
Lithuanian and foreign entities are subject to land tax collected by the municipalities for the land they own in Lithuania. Roads for general use and forestland are exempt. The annual tax rate is 1.5% of the taxable value, which is determined according to the rules established by the government. The assessment and payment terms are set forth by the municipalities, which are also entitled to grant land tax incentives.

**Land lease tax**
State-owned land that is leased for Lithuanian and foreign companies is subject to land lease tax at a rate established by the municipalities. The minimum tax rate set by the government is 0.1%, and the maximum rate is 4% of the value of the land.

**Real estate tax**
Real estate tax at a rate ranging from 0.3% up to 1% is levied on the value of real estate owned by individuals and used for commercial purposes or owned by legal entities (with certain exemptions). Municipal councils establish a specific tax rate for real estate situated in their territories annually.

**Excise taxes**
Excise duty is imposed on the following goods produced in or imported into Lithuania: ethyl alcohol and alcoholic drinks, including beer and wine; processed tobacco, including cigarettes, cigars, cigarillos and smoking tobacco; energy-related products, including petrol, kerosene, gasoline, fuel oil and their substitutes and additives; coal,
Lithuania

coke and lignite; and electric energy (as of 1 January 2010). The tax rate depends on the type and quantity of goods.

**Customs duties**
EU customs law is applicable in full.

**Environmental tax**
The tax is imposed on pollutants discharged into the environment, a few specified products (e.g., tyres, batteries, etc.) and certain types of package.

**Tax on natural resources**
The tax is payable on the value of extracted natural resources.

**Branch income**
A branch of a foreign company is defined as a structural subunit of a foreign company, which has an establishment in Lithuania and is entitled to engage in commercial activities in Lithuania as well as conclude contracts and undertake obligations according to the power of attorney issued to the branch by its founder. A branch does not have the status of a legal person. It is taxed in the same manner as a PE.

**Income determination**

**Inventory valuation**
Under domestic accounting legislation, stock used in the production and included in the cost of produced products is valued in the financial statements by the first-in, first-out (FIFO) method. The last-in, first-out (LIFO), weighted-average, progressive-average, actual-price, or another method that corresponds to the stocks' movement can also be used. However, the method used must be disclosed in the notes to the annual accounts, and, among other things, the note must report the profit that would have been calculated if the FIFO method of valuation had been used. For CIT purposes usage of other method than FIFO should be approved by the tax authorities.

**Capital gains**
Capital gains are taxed as part of the corporate profit of the enterprise.

Capital gains are treated as non-taxable income when they are derived from the transfer of shares in a company incorporated in the EEA or in a country with which Lithuania has a valid double taxation treaty and that pays CIT or an equivalent tax. This holds true if the Lithuanian holding company holds more than 25% of voting shares for a continuous period of (1) at least two years; or (2) at least three years when the shares were transferred in one of established forms of reorganisation. Certain restrictions apply.

**Dividends**
Dividends distributed by a resident company to another resident company are subject to a 15% corporate income tax, which is withheld by a distributing company.

The dividends are exempt from withholding tax if the recipient company has held not less than 10% of the voting shares in the distributing company for at least a 12-month period and the distributing entity is subject to 5% or 15% Lithuanian corporate income tax rate. However, this relief is not applied if the foreign entity (recipient) is registered...
or otherwise organised in blacklisted territories, as specified by the Ministry of Finance. Please note that the requirement of the 12-month holding period does not necessarily have to be fulfilled on the day of dividend distribution.

The receiving company may reduce its payable CIT for that period when dividends were received by the amount of CIT withheld from the received dividends. Any excess credit may be offset with other taxes payable.

Dividends distributed by a foreign entity are subject to a 15% withholding tax which is to be paid by the receiving Lithuanian entity.

Dividends are exempt from withholding tax if the distributing foreign entity is established in the EEA and related profit is properly taxed in the domiciled country.

The dividends are exempt from withholding tax if the recipient company has held not less than 10% of the voting shares in the distributing company for at least a 12-month period and the receiving entity is subject to 5% or 15% Lithuanian corporate income tax rate. This participation exemption satisfies the requirements of the EC Parent-Subsidiary Directive. The exemption also applies to dividends paid by non-EU foreign companies, except those registered or organised in blacklisted territories.

The receiving company does not include the dividends received from other entities in its taxable income.

**Foreign income**
Income is not subject to taxation in Lithuania if it was received from activities through a permanent establishment in a foreign country, which is in the EEA or which has a DTT with Lithuania, and if the income was subject to taxation there. Since income is not subject to taxation in Lithuania, costs related to the income cannot be deducted from income that is subject to taxation in Lithuania.

**Deductions**

**Depreciation**
Intangible and tangible assets may be depreciated using a directly proportional (straight-line) depreciation method, a production depreciation method or a double-declining-balance depreciation method. Depreciation may not exceed maximum rates established by the law.

**Net operating losses**
Operating losses may be carried forward for an indefinite period provided that certain requirements are met.

Current year operating losses incurred after 1 January 2010 can be transferred to another legal entity of the group if certain conditions are met.

Losses incurred due to the transfer of securities and/or derivative financial instruments may be carried forward for five years.

**Taxes**
All taxes, fees and other compulsory payments to the state budget are deductible for corporate income tax purposes, except:
Lithuania

- VAT paid to the budget (with exceptions indicated in the following);
- Corporate income tax; and
- Social tax (temporary tax that was applicable only in 2006 and 2007).

VAT can be treated as deductible for corporate income tax purposes only if:

- Input or paid import VAT which is non-refundable for VAT purposes.
- This input or paid import VAT is calculated on deductible expenses.

Other significant items

Allowable deductions include all the usual costs that an entity actually incurs for the purpose of earning income or receiving economic benefit unless the law on CIT provides otherwise.

Limited deductible expenses are:

1. Depreciation or amortisation expenses of fixed assets (for tax purposes assets cannot be depreciated faster than indicated in the CIT law);
2. Maintenance, repair and reconstruction expenses of tangible fixed assets (however, if the repair or reconstruction increase the service period and improve the qualities (useful characteristics of the fixed assets), the value of repair or reconstruction shall be added to the acquisition value of the tangible fixed assets);
3. Business travel expenses (deductible with restrictions);
4. Advertising and representation expenses (75% of representation expenses are deductible);
5. Natural losses (not more than 1% of turnover);
6. Taxes (deductible with restrictions);
7. Bad debts (deductible only if proved and specific criteria met, provisions are non-deductible);
8. Contributions and expenses for the benefit of employees (deductible with restrictions);
9. Special provisions of credit institutions and insurance companies;
10. Sponsorship (the double amount deductible but only if provided to registered recipients and only up to 40% of taxable result before deduction of sponsorship and utilisation of tax losses carried forward); and
11. Membership fees, contributions and premiums (deductible with restrictions);
12. Losses of previous tax periods (losses can be carried forward for indefinite period if certain requirements are met), etc.

Non-deductible expenses:

1. VAT payable to the budget and corporate income tax;
2. Default interest (forfeit), fines and late interest paid to the state budget as well as other sanctions imposed for violations of laws and regulations of the Republic of Lithuania;
3. Interest or any other indemnity paid due to non-performance of contractual obligations by related parties;
4. Amount of the limited deductible expenses in excess of the established limits;
5. Expenses attributed to allowable deductions more than 18 months past, although the payments for goods or services supplied by the entities registered or otherwise organised in blacklisted territories have not been made;
6. Sponsorship and gifts that do not correspond to the requirements of CIT law;
7. Payments to blacklisted territories if they are not verified and payments are not subject to withholding tax;
8. Indemnification for damages inflicted by the entity;
9. Dividends or otherwise distributed profits;
10. Other expenses not related to the deriving of income and not attributed to operating activities of the entity as well as the expenses that are not considered allowable deductions under the law;
11. Amounts resulting from adjustments and corrections of errors of previous tax periods;
12. Expenses related to revaluation of fixed assets and securities;
13. Social tax (applicable for CIT calculation in 2006 and 2007);
14. Deductible or limited deductible expenses attributed to non-taxable income; and
15. Expenses related to income from certain international maritime activities, if a maritime entity chose to apply a fixed CIT.

**Group taxation**

Group taxation legislation and regimes are not available in Lithuania. Each Lithuanian entity is regarded as a separate taxpayer and may not deduct tax losses of any other group entity.

However, recent amendments to CIT law allowed transfer of current year operating tax losses incurred as of 1 January 2010 to the entity of the same group of companies if certain requirements are met.

**Tax incentives**

The rate of corporate income tax on certain maritime activities is 15%, with the base set by reference to the functional capacity of the ship. This fixed corporate income tax could be applied to maritime entities that fulfil certain conditions indicated in the law. An election must be made to the tax authorities to apply this regime.

Entities with fewer than 10 employees and less than LTL 500,000 (approximately EUR 145,000) gross annual revenues can benefit from a reduced corporate income tax rate of 5% (the standard rate is 15%).

Entities involved in an investment project are able to reduce their taxable profits up to 50% by the actually incurred acquisition costs of the long-term assets meeting certain requirements. Please note that depreciation (amortisation) expenses of such assets shall be deducted in common manner.

Taxable profits can be reduced by costs incurred in 2009 – 2013.

The costs exceeding the above mentioned 50% limit can be carried forward for four years. Consequently, the entity incurring losses in 2009 may benefit from the tax relief in subsequent periods.

There are certain criteria defining what could be considered an investment project. The project should be precisely described to meet the criteria allowing it to use the tax relief and the tax authorities should be properly notified about the project.
Moreover, entities that invest in Lithuanian free economic zones are entitled to partial or complete CIT relief (depending on the investment amount), relief of tax on real estate and 50% relief of land lease tax.

In addition, local authorities are entitled to grant reliefs on real estate tax or land lease tax.

**Withholding taxes (WHT)**

**Domestic legislation**

Income of a foreign entity in Lithuania not derived through a PE is deemed to be Lithuanian-source income:

- Interest on any type of debt obligations including securities (10% WHT rate);
- Proceeds from the sale, transfer (with title) or lease of immovable property located in Lithuania (15% WHT rate);
- Income derived from sports activities or performers’ activities (15% WHT rate);
- Income from distributed profits (15% WHT rate);
- Royalties (10% WHT rate);
- Annual payments (tantiems) to the members of the board or supervisory board (15% WHT rate); and
- Indemnities received for the infringement of copyrights or neighbouring rights (10% WHT rate).

The EC Interest and Royalty Directive have been implemented in the Lithuanian domestic tax law. However, Lithuania was granted a transitional period of six years. Withholding tax on royalties paid to related parties meeting requirements of the EC Interest and Royalty Directive is 10% until 30 June 2011 and from 1 July 2011 the rate will be reduced to 0%. Notwithstanding this, according to local tax legislation, Lithuanian withholding tax on interest paid to the entities, EU or DTT tax residents, is 0% as of 1 January 2010.

Furthermore, withholding tax is not applied on government securities issued on international financial markets, interest accumulated and paid on deposits, and interest on subordinated loans which meet the criteria established by legal acts adopted by the Bank of Lithuania.

**Blacklisted territories**

Blacklisted territory means a foreign country or territory that is included on the list of offshore territories established by the Minister of Finance and meeting at least two of the following criteria:

1. Similar tax rate in such territory is below 75% of that set in the Lithuanian CIT law;
2. In such territory different rules for levying a similar tax are applied, depending on the country where the parent company (controlling entity) is registered or otherwise organised;
3. In such territory different rules for levying a similar tax are applied, depending on the country where the business is conducted;
4. The company (the controlled taxable entity) has entered into agreement with the tax administrator of that territory with regard to the application of a tax rate or tax base;
5. There is no effective exchange of information in such territory; and
6. There is no financial and administrative transparency in such territory, the tax administration rules are not quite clear and the application thereof is not communicated to tax administrators of other countries.

A list of 58 offshore territories has been published. With certain exceptions specified in the law, all payments to offshore companies or their branches for any work or services, commodities, interest on funding, insurance premiums, guarantees, etc., are non-deductible for corporate income tax purposes unless the Lithuanian entity provides evidence to the state tax authorities that:

1. The payments are related to usual activities of the paying and the receiving business entities;
2. The receiving foreign business entity manages the property necessary to carry out such usual activities; and
3. There is a connection between the payment and the economically grounded business operation.

**Tax treaties**

Where a treaty for the avoidance of double taxation and prevention of fiscal infringement with the country in question contradicts the local regulations, the treaty provisions prevail. Lithuania has now signed 48 double taxation treaties with foreign countries.

Reduction of, or exemption from, withholding taxes under a double taxation avoidance treaty may be obtained if a special residence certificate (request for a reduction or exemption from the Lithuanian withholding tax withheld at source (Form DAS–1)) is completed and approved by the tax authorities before a taxable payment is transferred. If a payment that would have been subject to a tax treaty has already been made and withholding tax at the local rate was withheld, it is possible to obtain an appropriate refund (reduction) by completing a special claim for a refund of the Lithuanian tax withheld at source (Form DAS–2) and obtaining the approval of the tax authorities.

In addition, the tax authorities may require completion of a special certificate giving information about income received and taxes paid in Lithuania (Form DAS–3).

**Tax administration**

**Returns**

*Corporate income tax*

Corporate income tax returns must be submitted by the first day of the tenth month of the following tax period (October 1 for companies using the calendar year).

If corporate income tax is calculated based on activity results for the previous year, the advance corporate income tax return for the first nine months of the tax period is to be submitted by the last day of the first month (usually January) of the tax period. The return for the remaining months of the tax period is to be submitted by the last day of the tenth month (usually October) of the tax period. If the taxpayer has chosen to pay the advance amount based on the projected amount of corporate income tax for the current year, the return must be submitted not later than the last day of the first month of the tax period.
Lithuania

**Withholding tax on payments other than dividends**
A tax-withholding entity must submit to the tax authorities a special form of a return reporting the amounts paid and taxes withheld during the calendar month no later than 15 days after the end of the month in which the amounts were paid.

**Withholding tax on dividends**
A tax-withholding entity must submit to the tax authorities a special form of a return reporting the dividends paid and tax withheld within 10 calendar days after the end of the month of the dividend payment.

**Payment of tax**

**Corporate income tax**

Based on the activity results for the previous year, the advance amount of corporate income tax for the first nine months of the tax period is calculated based on the actual corporate income tax amount for the tax period before the previous tax period. For example, the corporate income tax for the first nine months of 2010 would be calculated based on the appropriate portion of the actual amount of corporate income tax for 2008. The advance amount for the remainder of the tax period is based on the actual amount of corporate income tax for the previous period, for example, tax for the last three months of 2010 would be based on the appropriate portion of the actual amount of corporate income tax for 2009. Thus, the advance corporate income tax amount for each quarter would be equal to one-fourth of the actual tax amount calculated for the tax periods discussed.

The taxpayer may choose to pay the advance amount based on the projected amount of corporate income tax calculated for the current year. The advance tax (one-fourth of the advance corporate income tax) must be paid no later than the last day of the respective quarter, and for the last quarter by the twenty-fifth day of the last month of the quarter.

If the amount of tax indicated in the return exceeds the amount actually paid during the tax period, the taxpayer is obliged to transfer the additional amount no later than the return submission deadline. Overpaid tax is refunded in accordance with the law on tax administration.

**Withholding tax on payments other than dividends**
Withholding tax is to be calculated, withheld and remitted by a Lithuanian company or a permanent establishment of a foreign company no later than the return submission deadline.

**Withholding tax on dividends**
Withholding tax is to be calculated, withheld and remitted by a Lithuanian company that pays dividends within 10 calendar days after the end of the month of the payment.

**Significant developments**

**The Research, Development and Innovation Act**  
As of 1 July 2009, a new legislation has been enacted in order to promote research, development and innovation within Luxembourg. Many research and development (R&D) incentives can be granted. Together with the 80% exemption regime applicable to IP rights, these incentives position Luxembourg as a highly attractive location for R&D activities, as well as IP (see “Tax incentives”).

**The circular on Islamic Finance**  
On 12 January 2010, the Luxembourg tax authorities issued a circular on Islamic Finance providing guidance on the Luxembourg corporate direct tax treatment of some of the common Shariah compliant financial instruments (i.e., Murabaha and Sukuk instruments), which further confirmed the compatibility of Luxembourg tax framework with Islamic Finance requirements.

**Exchange of information**  
As of May 2010, Luxembourg has signed 24 double tax treaties (DTTs) or amendments to comply with OECD principles on exchange of information. The country is on the OECD “white” list having “substantially implemented the internationally agreed tax standards”.

**Value-added tax (VAT) package**  
The Luxembourg VAT law has implemented as from 1 January 2010, the new rules introduced by the so-called “VAT package” in the European VAT directive 2006/112/EC. These new rules extend the principle of taxation in the country where the recipient is established in “Business to Business” transactions. Some transactions taking place in a Business to Consumer framework are also impacted. “Business” means a taxable person who performs, even partially, an economic activity or non-taxable legal person identified for VAT purposes. The reverse charge mechanism is also extended. The new rules set forth an additional VAT reporting obligation: Most of services exchanged in an European cross-border situation need to be reported as such in an “European Sales Listing”, unless they are VAT exempt in the county of the recipient. Another change came for the procedure on VAT refund in countries where an European company is not established and suffered local VAT (8th directive refund claims).

**End of the 1929 Holding tax regime**  
As announced in 2006, the phasing-out period for 1929 Holding Companies will end on 31 December 2010. Hence, it is recommended to make a tax review of the business organisation by this date for remaining 1929 Holding Companies.
Luxembourg

**Taxes on corporate income**

**Corporate income tax**
Businesses with taxable income lower than EUR 15,000 are subject to tax at a rate of 20%. The corporate income tax rate is currently 21% for companies with a taxable income in excess of EUR 15,000. Additionally, a 4% solidarity tax is imposed on the corporate income tax amount.

Taking into account the 4% solidarity tax, the aggregate corporate income tax rate is 21.84%.

The corporate income tax does not apply to tax exempt entities (e.g., 1929 Holding Companies that benefit from grandfathering rules, see “Tax incentives”), or to tax transparent entities (e.g., general or limited partnerships or European Economic Interest Grouping).

**Municipal business tax on income**
Municipal business tax is levied by the communes and varies from region to region. As of 1 January 2006, the municipal business tax for Luxembourg City has been reduced to 6.75%. No change in the rate has occurred since 2006 in Luxembourg City.

**Aggregate rate**
The effective combined corporate income tax rate for Luxembourg City (i.e., both corporate income tax and municipal business tax) is 28.59% for 2010.

**Corporate residence**
Without regard to double tax treaty provisions, a company is considered to be resident of Luxembourg, if either its registered office or place of central administration is located in Luxembourg. The registered office is designated as such in the company’s articles of incorporation. The place of central administration generally is defined as the centre from which the company's activities are directed.

Luxembourg taxes its corporate residents on their worldwide income.

**Other taxes**

**Net wealth tax**
Both Luxembourg resident companies and branches of foreign companies generally are subject to net wealth tax levied at a rate of 0.5% on their net wealth, based on prescribed valuation methods. In general, assets are taken into account at market value (except for real estate, which is subject to a special regime). Shareholdings qualifying for the participation exemption (see “Income determination”) generally are exempt from net wealth tax.

Resident companies and branches of foreign companies may claim a reduction of their net wealth tax liability by making an allocation to a special reserve before the closing of the tax year following the year for which the net wealth tax reduction is claimed. To this end, an amount corresponding to five times the net wealth tax that should have become payable must be kept in this special reserve for the five years following the year in which it was allocated. The reduction, however, may not be higher than the taxpayer's corporate income tax liability, before tax credits, for that same year.
Value-added tax (VAT)
Proceeds of sales and services, which are deemed to take place in Luxembourg, are subject to VAT at the standard rate of 15% (lowest standard VAT rate in the European Union) or, on certain transactions, at 12% (e.g., wine, advertising pamphlets), 6% (e.g., supply of gas or electricity), or 3% (e.g., food except alcohol beverages, pharmaceutical products, books, radio and television broadcasting services except adult entertainment). Some transactions, such as export and related transport, are zero-rated.

Taxpayers whose activities are subject to VAT are entitled to offset against their VAT payable the amount of such tax charged to them by their suppliers or reverse charged (i.e., self-accounted) by them on import or acquisitions of goods or services from abroad.

Banking, financial, insurance and reinsurance generally are exempt activities. The VAT paid on costs made for these transactions cannot be recovered except when related to services performed for persons established outside the European Union. VAT on expenses made in the context of “passive” holding activities, which are considered as outside the scope of VAT, are not recoverable.

Excise duties
In addition to the VAT, some products are subject to specific excise duties. In Luxembourg these products are electricity, mineral oils, manufactured tobaccos and alcohols.

Excise duties are not based on the sale price of the products but on the quantity. Excise duty becomes chargeable at the time, and in the European Union Member State, of release for consumption. This means any of the following:

a. The departure of excise goods from a duty suspension arrangement;
b. The holding of excise goods outside a duty suspension arrangement where excise duty has not been levied pursuant to the applicable provisions of Community law and national legislation;
c. The production of excise goods outside a duty suspension arrangement; or
d. The importation of excise goods, including irregular importation, unless the excise goods are placed, immediately upon importation, under a duty suspension arrangement.

Subscription tax
Certain holding companies and investment funds are subject to subscription tax (at various rates) on their market or net asset values. 1929 Holding Companies, which benefit from grandfathering rules, are subject to a 0.2% subscription tax on the value of the shares issued, with a minimum amount of EUR 48.

For investment funds, the subscription tax is applied to the total net assets evaluated at the last day of each quarter. Institutional funds and monetary funds are subject to an annual rate of 0.01%, and the other funds to an annual rate of 0.05%. Funds of institutional funds and monetary institutional funds are exempt from subscription tax.

General registration taxes
General registration taxes (inclusive of the transcription tax) are levied at 7% on the market value of real estate purchased or transferred (10% in the commune of
Luxembourg

Luxembourg City for some categories of properties) and 1% on mortgages on real estate. The taxes are deductible for income tax purposes.

Capital duty has been abolished as of 1 January 2009. As a consequence, the general registration duty regime governs all transactions previously falling within the scope of the capital duty law. The general registration duty regime has also been slightly modified as follows:

- A fixed registration duty of EUR 75 is levied on certain transactions involving Luxembourg entities (i.e., incorporation, amendment to the articles of association and transfer of seat to Luxembourg).
- For Luxembourg real estate assets, contribution made to a company remunerated by shares are now subject to a proportional registration duty of 0.6% (but 0.9% for Luxembourg City for some categories of properties) and a transcription tax of 0.5%. Contribution remunerated by means other than shares remain subject to a proportional registration duty of 6% (but 9% for some categories of properties located in Luxembourg City) and a transcription tax of 1%. Transfer made within the framework of a corporate reorganisation may be exempt from any proportional registration duty under certain conditions.

Special income tax

“Billionaire” and “financial” holding companies, which benefit from grandfathering rules, are subject to a special income tax applied at varying percentage rates to interest expenses on bonds and similar negotiable debt-claims, payments to non-resident directors, and dividends distributed to shareholders. The minimum annual tax is EUR 48,000 (see “Other incentives/holding companies” under “Tax incentives” for further information).

Commune (municipalities) real estate tax

Communes (municipalities) levy a real estate tax, the basis of which is the unitary value of real estate, which represents its estimated value in 1941. The basic rate varies from 0.7 to 1% of the unitary value, according to the category of property, and is multiplied by a coefficient, which varies with communes and different types of property. For commercial properties, the coefficient in Luxembourg City is 750%, which should be applied to 1% of the unitary value. The tax is deductible for income tax purposes.

Branch income

Branch income generally is taxed at corporate income tax rates. However, the municipal business tax generally only applies, if the branch is carrying on commercial activity within Luxembourg.

Income determination

Inventory valuation

Inventories generally are valued at the lower of actual or market cost. There is no statutory specified method. In general, the FIFO (first-in, first-out), the LIFO (last-in, first-out) and the weighted-average costs methods of inventory valuation are acceptable for income tax purposes, provided the method accords with the facts.
Inter-company dividends
Dividends received by a Luxembourg fully taxable resident company (or by a domestic permanent establishment in certain cases) should, in principle, be subject to corporate income tax and municipal business tax at the aggregate rate of 28.59% (for Luxembourg city).

However, dividends received may be tax exempt in Luxembourg under certain conditions, according to the so-called “participation exemption” regime, if the conditions described below are satisfied:

1. The distributing company is:
   • A collective entity falling under article 2 of the amended version of the EU Council directive of 23 July 1990 (90/435/EEC), hereafter the “Parent Subsidiary Directive”;
   • A Luxembourg resident joint-stock company, which is fully taxable and does not take one of the forms listed in the appendix to the paragraph 10 of article 166 of the Luxembourg Income Tax Law (LITL) (see “Withholding taxes – Note 2” for a detailed list of the entities); or
   • A non-resident joint-stock company that is fully liable (in its state of residence) to a tax corresponding to the Luxembourg corporate income tax (i.e., as a general rule, it is required that the foreign tax is compulsory levied at an effective rate of at least 10.5%, on a basis similar as the Luxembourg one); and

2. The beneficiary company is:
   • A Luxembourg resident collective entity, which is fully taxable and takes one of the forms listed in the appendix to the paragraph 10 of article 166 LITL;
   • A Luxembourg resident joint-stock company, which is fully taxable and does not take one of the forms listed in the above-mentioned appendix;
   • A domestic permanent establishment of a collective entity falling under article 2 of the amended version of the Parent-Subsidiary Directive;
   • A domestic permanent establishment of a joint-stock company that is resident in a country with which Luxembourg has concluded a double tax treaty; or
   • A domestic permanent establishment of a joint-stock company or of a cooperative society, which is a resident of a European Economic Area (EEA) member state (other than a EU member state); and

3. At the date on which the income is made available, the beneficiary has been holding or undertakes to hold, directly, for an uninterrupted period of at least 12 months a participation in the share capital of the subsidiary of at least 10% or with an acquisition price of at least EUR 1.2 million.

Capital gains
Capital gains (and losses) generally are taxed as ordinary income (or losses). It is possible to defer the taxation on gains on certain fixed assets where the gain is used to acquire replacement items. Under certain conditions, exempted capital gains and hidden reserves may be unrealised in a merger or another form of reorganisation of resident companies or other EU companies.

In general, capital gains on the disposal of qualifying shareholdings held by entities eligible to the participation exemption regime (see “Inter-company dividends”) are tax exempt, provided: (1) the total shareholding constitutes at least 10% of total ownership or an acquisition price of at least EUR 6 million; and (2) the disposing company has held or intends to hold the qualifying shareholding for at least 12 months.
A recapture system exists, under which the exempt amount of the gain is reduced by the sum of expenses connected with the participation (e.g., financing cost and write-downs in the value of the participation), to the extent that they have reduced the taxable base of that year or previous years. Basically, the effect of this rule is that the capital gain realised will become taxable up to the amount of the aggregate expenses and write-downs deducted during the respective and previous years in relation to the participation.

The purpose of the system is to avoid a taxation vacuum, which could result if the deductibility of expenses and write-downs connected to the participation were allowed, while the income arising from the participation was tax exempt. This system should, in principle, remain tax neutral as the company should have available carryforward losses for an equivalent amount (unless previously used to offset other taxable income).

**Transparent entities**
From a Luxembourg tax perspective, a transparent entity is seen as having no legal personality distinct from the one of its partners (those transparent entities are commonly referred to as “partnership”) for a corporate income tax and net wealth tax. Provided that the partnership carries out a commercial activity, it will however be liable to municipal business tax on its own. The tax transparent entity may however be regarded as a separate legal entity from a civil/corporate law point of view.

**Foreign income**
A Luxembourg tax resident company is liable for corporate income tax on its worldwide income, whether derived from Luxembourg or from foreign sources (subject to the provisions of double tax treaties, if any). Dividends from foreign subsidiaries are taxed when received, except where exempt as mentioned above. Profits of a foreign branch which are not exempt by the mean of a double tax treaty may however benefit from a foreign tax credit. Any taxes paid in excess of the tax credit are deductible as expenses. Luxembourg is however using the exemption method in most of its double tax treaties.

**Thin capitalisation**
No thin capitalisation ratio is specifically provided by the Luxembourg tax law.

In practice, the tax authorities apply an 85/15 debt-to-equity ratio for the intra-group financing of participations. Should the 85/15 ratio not be complied with by the taxpayer, the surplus of interest could be requalified by the tax authorities as a hidden distribution and therefore non-deductible and potentially subject to a 15% withholding tax.

**Deductions**

**Depreciation**
Depreciation rates must be consistent with economic reality. The depreciation must be calculated on the total acquisition cost, bearing in mind the normal life of the asset and the estimated residual value. Depreciation normally is calculated using the straight-line method. However, the declining-balance method is permitted for fixed assets, other than buildings and intangible assets. The depreciation rate may not, however, exceed three times the rate applicable according to the straight-line method, or 30% (in the case of assets used exclusively for scientific and technical research, four times the applicable rate, or 40%).
It is permissible to change from the declining-balance method to the straight-line method, but the converse is not allowed. Tax depreciation must be reflected in the financial accounts prepared for commercial purposes.

In the event of a sale of a depreciated asset, the net book value at the moment of the disposal must be compared with the sale price of that asset. If this comparison indicates a profit, corresponding income tax may be due unless the sale price is reinvested in eligible assets. Capital losses are deductible.

Under certain conditions, fixed assets with a value of less than EUR 870 or a life that is not in excess of one year can be expensed fully in the year of acquisition. Special accelerated depreciation on 60% of the cost of fixed assets is available for assets that protect the national environment, save energy in Luxembourg, or permit the development of workplaces for handicapped workers, under certain conditions.

**Shareholdings**

Expenses linked to a shareholding qualifying for the participation exemption, including write-downs in the value of the shareholding booked as a consequence of a dividend distribution, are not deductible up to the amount of the exempt dividend. Recapture rules may apply in the event of disposal of the shareholding. Basically, the effect of this rule is that capital gain realised will become taxable up to the amount of the aggregate expenses and write-downs in relation to the participation, deducted during the year of disposal and the previous years. The qualifying shareholding is exempted for net wealth tax. The excess portion of a debt linked to the qualifying shareholding (i.e., portion above the value of the exempted shareholding) is deductible from the taxable basis (see “Inter-company dividends”).

**Net operating losses**

Net operating losses can be carried forward for an unlimited period but cannot be carried back.

**Payments to foreign affiliates**

Royalties, management service fees, and interest charges paid to foreign affiliates by a Luxembourg company are deductible items, provided they are equal to what the company would pay an unrelated entity for comparable services.

**Taxes**

Several taxes are deductible in determining income subject to corporate income tax, including the registration duties and real estate tax. Also, certain taxes are credited against the computed amount of income tax owed, including taxes withheld from Luxembourg dividend income, tax withheld abroad from dividend and interest income received by a Luxembourg corporation (subject to limitations), and investment tax credits (see “Tax incentives”).

The main non-deductible taxes are corporate income tax, municipal business tax, net wealth tax as well as interest for late payment of said taxes.

**Gifts**

Gifts for scientific, charitable or public purposes and to institutions in the general interest are deductible, subject to a maximum of 20% of the net income or up to an amount of EUR 1,000,000 (the minimum being EUR 120) with a possibility to spread the deduction over two years.
Group taxation

Tax unity
Luxembourg permits tax unity. Generally, the conditions to qualify for tax unity include that:

1. Each company is a fully taxable company that is resident in Luxembourg (the top entity may be a Luxembourg PE of a fully taxable non-resident company);
2. At least 95% of each subsidiary’s capital is directly or indirectly held by the parent company;
3. Each company’s fiscal year starts and ends on the same date; and
4. Tax unity is requested jointly by the top company and each of the subsidiary that becomes member of the Group.

The tax unity lasts for a five-year period and taxable income/loss is computed on the consolidated result. Tax losses that occurred before the consolidation period may be offset only against tax profits of the company that incurred the loss. Tax losses that are sustained by a group member during the consolidation period is compensated with the tax profits of the other group members. Tax losses arising during the consolidation period that exist after the consolidation period are attributed to the parent company.

Transfer pricing
No detailed rules with respect to the determination and documentation of transfer pricing in company groups have been currently implemented in Luxembourg law.

However and as a member of the OECD, Luxembourg applies the OECD transfer pricing guidelines.

Tax incentives

Inward and capital investment
Luxembourg tax law provides for various incentives with specific requirements, in the areas of risk-capital, audiovisual activities, environmental protection as well as research and development, professional training and recruitment of unemployed persons.

The most commonly used incentives are the investment tax credits. Luxembourg tax law provides for two types of investment tax credits.

First, a tax credit which amounts to 12% on the increase in investment in tangible depreciable assets made during the concerned year. The increase in investment of a year is computed as the difference between the current value of all qualifying assets and the reference value allocated to the same type of assets.

Independently, the company may benefit from a 6% tax credit on the first EUR 150,000 of qualifying new investments, and a 2% tax credit on the amount of new investments exceeding EUR 150,000 in tangible depreciable assets as well as investments in sanitary and central heating installation in hotel buildings and investments in buildings used for social activities. The above 6% and 2% rates are increased up to 8% and 4% for investments eligible for special depreciation (i.e., investments favouring the protection of the environment, the realisation of energy savings and the creation of employment for handicapped workers). However certain investments are excluded.
from the credit calculation, including investments in real property, intangible assets, and vehicles (unless specifically stated by the law).

**Intellectual property (IP) regime**
An IP regime has been introduced by the law of 21 December 2007 and is applicable to qualifying IP rights acquired or developed after 31 December 2007. This regime provides for an 80% tax exemption of the net income and gains deriving from the use and the right to use qualifying IP rights, under certain conditions. Qualifying IP rights include patents, trademarks, design, domain names, models and software copyrights.

An 80% deduction of net deemed income is available also under certain conditions for self-developed patents, which are used internally by the taxpayer.

The net capital gain realised upon disposal of the qualifying IP rights also benefits from the 80% exemption.

Finally, qualifying IP rights may be tax fully exempt for net wealth tax purposes under certain conditions.

**Research and development (R&D) incentives**
Effective as of 1 July 2009, a new legislation has been introduced in order to promote research, development and innovation within Luxembourg.

Luxembourg entities involved in innovative and R&D activities can benefit, in addition to the specific IP tax regime and general tax incentives, from financial support (e.g., cash grants or interest subsidies).

Innovation loans may be granted by the Société Nationale de Crédit et d’Investissement and may carry a fixed interest rate lower than the market rate. Financial support may also be granted, in the form of cash grants or interest subsidies.

R&D projects or programmes receive support up to a maximum eligibility (percentage of costs eligible for the incentives) depending on the size of the beneficiary (private research companies or organisations):

- Large (25% to 100% depending on the investment);
- Mid-size (35% to 100%); or
- Small (45% to 100%).

These incentives are available for:

- Experimental development;
- Experimental development and cooperation;
- Industrial research;
- Industrial research and cooperation; or
- Fundamental research.

Innovation in process and organisation and investment in innovation pools can benefit from support between 15% and 35% (50% for public research companies).

Promotion and development of innovation pools can benefit from support up to:
Luxembourg

- 50% for private organisations; or
- 75% for public research companies.

Research regarding technical feasibility if prior to experimental development can benefit from support of up to 40% or 50% and up to 65% or 75% if prior to experimental research.

**Other incentives**

Other incentives include the following:

1. **Holding companies:** Holding companies set up under the law of July 31 1929 (so called 1929 Holding Companies) generally are exempt from income taxes (corporate income tax, municipal business tax) and withholding tax on dividends paid. These holding companies are subject to the previously described annual subscription tax and to the general registration duty regime. Luxembourg generally provides for three types of 1929 Holding Companies: ordinary (as described above); billionaire holdings, which require minimum capitalisation of EUR 24 million and provide for further tax exemptions; and financial holdings, which provide for greater flexibility for intra-group financing. Due to a European Commission decision, Luxembourg has repealed the 1929 Holding Companies tax regime. Nevertheless, subject to certain conditions, 1929 Holding Companies established before 20 July 2006 (including billionaire holdings and financial holdings) are permitted to keep the benefits of this favourable tax regime until the end of 2010.

2. **Investment funds:** Investment funds resident in Luxembourg generally are exempt from corporate income tax, municipal business tax, and withholding tax on dividends. These investment funds are subject to the previously described subscription tax and to the general registration duty regime.

3. **Financial participation company (Soparfi):** A Soparfi ("Société de Participation Financière") is not a specific type of company, rather it is a special tax regime for a resident company that holds and manages the shareholdings of subsidiaries. Unlike the 1929 holding company regimes, a Soparfi is not tax exempt, however, it does benefit from Luxembourg’s double tax treaties, EU Directives (e.g., Parent-Subsidiary Directive), the domestic participation exemption on dividends received and capital gains on qualifying participations (as discussed above).

4. **Société de gestion du Patrimoine Familial” (SPF).** The SPF has been tailored to enter the private sphere of individuals for the purpose of wealth management. Its corporate objective is restricted to the acquisition, holding, management and disposal of financial assets, to the exclusion of any commercial activity. As a general rule, an SPF is exempt from Luxembourg taxation on income and wealth tax in Luxembourg. A yearly subscription tax of 0.25% is due on the basis of paid-up capital, share premium and excessive debts. It, however, is capped at EUR 125,000. No withholding tax applies on dividends distributed by an SPF. Non-resident investors are not taxed in Luxembourg on dividends paid by a SPF or on capital gains realised on shares in a SPF.

5. **Securitisation companies,** which are incorporated under the law of 22 March 2004, are subject to normal corporate taxation. A securitisation company is a company which carries out securitisation activities or which participates in securitisation transactions. Securitisation companies are taxed based on their net accounting profit (i.e., gross accounting profits minus expenses). However, the commitment to remunerate the security holders (both capital and debt) issued by the securitisation
company qualifies as interest on debt even if paid as return on equity. Securitisation companies are not subject to net wealth tax in Luxembourg.

6. Financial services companies: Banks, securities depositaries, insurance and reinsurance companies as well as other financial service companies may benefit from preferential regulations when establishing their taxable basis for corporate income tax (e.g., provision for the neutralisation of unrealised exchange gains; general banking risk provision; provision for guarantee of deposits; mathematical reserves; and/or catastrophe reserves).

7. Shipping companies: Luxembourg-resident shipping companies are not subject to municipal business tax, and can benefit from investment tax credits and accelerated depreciation (even for used assets).

Withholding taxes
Dividends paid by a Luxembourg fully taxable company to its corporate shareholders resident in a treaty country, which hold or commit themselves to hold a participation of at least 10% in the Luxembourg company (or shares with an acquisition price of at least EUR 1.2 million) for an interrupted period of at least 12 months may be exempt from withholding tax (see “Note 2” for more details).

The following taxes are withheld on payments made. The withholding tax due on dividends paid to residents of a treaty country cannot exceed the non-treaty rate.

Notes

These notes are not extensive. The full text of the double tax treaty should be checked for a comprehensive view on the conditions of applications of reduced rates.
The numbers in parentheses refer to the notes below:

1. Dividends paid by Luxembourg 1929 Holding Companies benefiting from grandfathering rules or investment funds are exempt from withholding taxes.
2. Under Luxembourg domestic law (i.e., so called “participation exemption” regime), no withholding tax is levied on dividends paid by a Luxembourg qualifying subsidiary to an entity which is:
   • A collective entity falling under article 2 of the amended version of the Parent-Subsidiary Directive;
   • A Luxembourg resident joint-stock company, which is fully taxable and does not take one of the forms listed in the appendix to the paragraph 10 of article 166 of the Luxembourg income tax law;
   • A permanent establishment of a collective entity falling under the previous categories;
   • A collective entity that is resident in a State with which Luxembourg has concluded a double tax treaty and which is fully liable to a tax corresponding to the Luxembourg corporate income tax, or a domestic permanent establishment of such an entity; or
   • A Swiss resident joint-stock company that is subject to Swiss corporate income tax without benefitting from any exemption;
   • A joint-stock company or a cooperative society which is resident in a EEA Member State (other than a EU Member State) and is fully liable to a tax corresponding to the Luxembourg corporate income tax; or
   • A permanent establishment of a joint-stock company or of a cooperative society which is resident in a EU Member State, and at the date on which the income is made available, the beneficiary has been holding or undertakes to hold, directly, for an uninterrupted period of at least 12 months, a participation of at least 10%, or with an acquisition price of at least EUR 1.2 million in the share capital of the income debtor.

Qualifying shareholders need to be fully taxable collective entities subject in their country of residence to a tax similar to the one imposed by Luxembourg. As a general rule, this requirement is met if the foreign tax is compulsory levied at an effective rate of at least 10.5%, on a basis similar to the Luxembourg one. The term of “collective entities” has replaced “capital company” as of 2005 to take into account that the participation exemption is not restricted to capital companies.

The entities listed in appendix to the paragraph 10 of article 166 Luxembourg Income Tax Law are the following:

a. Companies under Luxembourg law known as “société anonyme”, “société en commandite par actions”, “société à responsabilité limitée”, “société coopérative”, “société coopérative organisée comme une société anonyme”, “association d’assurances mutuelles”, “association d’épargne-pension”, “entreprise de nature commerciale, industrielle ou minière de l’État, des communes, des syndicats de communes, des établissements publics et des autres personnes morales de droit public”, as well as other companies constituted under Luxembourg law;

d. Companies under Belgian law known as “société anonyme”/”naamloze vennootschap”, “société en commandite par actions”/”commanditaire vennootschap op aandelen”, “société privée à responsabilité limitée”/”besloten vennootschap met beperkte aansprakelijkheid”, “société coopérative à responsabilité limitée”/”coöperatieve vennootschap met beperkte aansprakelijkheid”, “société coopérative à responsabilité limitée”/”coöperatieve vennootschap met beperkte aansprakelijkheid”, “société coopérative à responsabilité limitée”/”coöperatieve vennootschap met beperkte aansprakelijkheid”.

r. Companies under Dutch law known as "naamloze vennootschap", "besloten vennootschap met beperkte aansprakelijkheid", "Open commanditaire vennootschap", "Coöperatie", "onderlinge waarborgmaatschappij", "Fonds voor gemene rekening", "vereniging op coöperatieve grondslag" and "vereniging welke op onderlinge grondslag als verzekeraar of keredietinstelling optreed";

s. Companies under Polish law known as "spółka akcyjna", "spółka z ograniczoną odpowiedzialnością";

t. Commercial companies or civil law companies having a commercial form and cooperatives and public undertakings incorporated in accordance with Portuguese law;

t'. Companies under Romanian law known as "societăți pe acțiuni", "societăți în comandită pe acțiuni", "societăți cu răspundere limitată";

u. Companies incorporated under the law of the United Kingdom;

v. Companies under Slovak law known as akciová spoločnosť", "spoločnosť s ručením obmedzeným", "komanditná spoločnosť";

w. Companies under Slovenian law known as "delniška družba", "komanditna družba", "družba z omejeno odgovornostjo";

3. Interest paid to non-residents generally is not subject to withholding tax in Luxembourg. However, interest that represents a right to profit participation on a bond may be assimilated as a dividend and subject to withholding tax. Further analysis should be made to determine the applicable reduced rate on the basis of the treaty (i.e., pursuant to dividend or interest clause) The withholding tax that may be due as a consequence of the EU Savings Directive (Council Directive 2003/48/EC dated June 3 2003) is not mentioned.

4. Royalties paid to non-residents are not subject to withholding tax in Luxembourg without considerations whether the companies are associated or not.

5. Since 1 January 2006, a withholding tax of 10% is withheld on defined interest income paid by a Luxembourg paying agent to resident individuals. Interest indirectly cashed through investment funds are out of the scope of this withholding tax.

6. Double tax treaties have been concluded with Albania, Argentina (limited scope), Armenia, Bahrain, Barbados, Cyprus, Kazakhstan, Kuwait, Kyrgyzstan, Lebanon, Liechtenstein, Macedonia, Monaco, Pakistan, Qatar, Serbia and Montenegro, Syria and Ukraine, but are not yet in force.

7. The recipient company holds at least 25% of the Luxembourg company’s capital. In some rare cases a holding period requirement may have to be met as well (e.g., Spain, Switzerland).

8. The recipient company owns at least 30% of the company’s capital and the equivalent of an acquisition price of USD 300,000.

9. The recipient company owns a 25% investment or the equivalent of an acquisition price of EUR 6,197,338. The investments may be held by several Belgian companies, provided one owns at least 50% of the shares of each of the others. The investment must be held since the beginning of the financial year of the recipient of the dividends.

10. The recipient company holds at least 10% of the Luxembourg company’s capital. A holding period requirement has to be met for Sweden and San Marino.

11. Hong Kong is not covered by the Luxembourg–P.R. China double taxation treaty. A double tax treaty between Hong-Kong and Luxembourg was signed on November 2007 and has entered into force on January 2009. For dividends paid to Hong Kong companies, no withholding tax is levied if the recipient company holds at least 10% of the Luxembourg company’s capital or a participation of at least EUR 1.2 million.

12. The rate of 5% of withholding tax on the gross amount of the dividends applies where the effective recipient company owns directly or indirectly at least 50% of the share capital of the paying company or has contributed more than USD 10 million or the equivalent in Luxembourg or in Vietnamese currency, in the capital of the company paying the dividends; the rate of 10% of withholding tax on the gross amount of the dividends applies where the beneficial owner is a company which holds directly or indirectly at least 25% but less than 50% of the capital of the company paying the dividends and has contributed not more than USD 10 million, or the equivalent in Luxembourg or Vietnamese currency, in the capital of the company paying the dividends.

13. The recipient company owns directly or indirectly 25% of the company’s capital. Indirect participation includes the holding through several treaty resident companies located in the same country provided one owns more than 50% of the shares of each others.

14. The substantial holding is taxable at 5% where the recipient US company owns at least 10% of the voting stock of the paying company. No withholding tax is levied when the US company has held during an uninterrupted period of two years a direct shareholding of at
least 25% of the voting power of the paying company and certain conditions regarding the nature of activities performed by the distributing company are met.

15. The recipient company owns directly or indirectly 25% of the company’s voting rights. Indirect participation includes the holding through several treaty resident companies located in the same country provided one owns more than 50% of the voting rights of each others.

16. The recipient company holds at least 25% of the Luxembourg company’s voting shares during the period of six months immediately before the end of the accounting period in which the distribution of profits takes place.

17. The dividends are taxable at a rate of 5% if the beneficial owner is a company that holds directly at least 10% of the capital of the company paying the dividends. No withholding tax is levied when the beneficiary company has held during the 12 preceding months a direct shareholding of at least 25% of the capital of the paying company. The holding period must be met before the date of distribution of the dividend. Furthermore, certain conditions regarding the nature of activities performed by the company must be met.

18. The recipient company holds at least 30% of the Luxembourg company’s capital and the acquisition price reaches at least EUR 75,000 (or equivalent).

19. The recipient company holds at least 10% of the Luxembourg company’s capital. Dividends paid to the Government of Singapore are exempt.

20. The beneficial owner is a company (other than a partnership) which controls directly or indirectly at least 10% of the voting power in the company paying the dividends.

21. The recipient company holds at least 25% of the Luxembourg company’s capital and the acquisition price reaches at least EUR 75,000 (or equivalent).

22. The rate of 5% of withholding tax on the gross amount of dividends applies where the recipient company holds at least 10% of the Luxembourg company’s capital.

23. The rate of withholding tax is 5% if the beneficial owner is a company that holds directly at least 10% of the capital of the company paying the dividends and made an investment in the capital of the paying company of more than EUR 100,000 or the equivalent in Georgian currency. No withholding tax is levied when the beneficiary company holds directly at least 50% of the capital of the company paying the dividends and made an investment in the capital of the paying company of more than EUR 2,000,000 or the equivalent in Georgian currency.

24. The recipient company holds at least 20% of the Luxembourg company’s capital.

**Tax administration**

**Returns**
Companies must file their tax returns at the latest on 31 May of each year following the calendar year during which the income was earned.

Assessments are issued after the end of the tax year and normally can be finalised within five years, although the delay may extend to 10 years, if the declaration is found to be incomplete or inexact, with or without the intention of fraud. Once issued, the tax assessment notice is in principle final (unless new facts come to light).

From 1 January 2009, tax offices also may issue a tax assessment based on the tax return filed by the taxpayer, without having to perform an immediate review of the file. The tax office will then have a five year period to perform a tax audit and issue a final tax assessment, if required.

**Payment of tax**
Quarterly tax advances must be paid. These payments are fixed by the tax administration on the basis of the tax assessed for the preceding year, or on the basis of the estimate for the first year. This estimate is given by the company pursuant to the request of the Luxembourg tax authorities.
Corporate taxes in Macau

Significant developments

Protocol to the People’s Republic of China/Macau double taxation arrangement (DTA)
The Central Government of the People’s Republic of China (the PRC) and the Government of the Macau Special Administrative Region (SAR) signed the Protocol (Protocol) to the PRC/Macau DTA on 15 July 2009. The Protocol will be effective upon completion of the necessary ratification procedures by both parties, and will be applicable to income arising from the 1st of January of the year following the year in which the Protocol will become effective.

The PRC/Macau DTA was signed in 2003. Some of the provisions of the PRC/Macau DTA are less favourable than those of the PRC/Hong Kong DTA. Under the Protocol, the treaty-based rates for withholding tax on dividends, interest, and royalty will be reduced. Further, the criteria for determination of a service permanent establishment and certain criteria for capital gains exemption under the PRC/Macau DTA will be clarified. In summary, the Protocol will bring the PRC/Macau DTA broadly in line with the PRC/Hong Kong DTA. This will no doubt increase the competitiveness of the Macau SAR and provide added incentives for Macau companies to do business or invest in the PRC. Nevertheless, as Macau adopts a worldwide taxation system in its domestic tax regime, consideration should be given as to whether the use of a Macau company as a holding company for investments in the PRC is favourable from a tax perspective.

Exchange of information
On 11 August 2009 the Legislative Assembly passed Law 20/2009, which governs the exchange of information by the Macau SAR with other tax jurisdictions within the scope of bilateral tax treaties or arrangements. Law 20/2009 is effective from 15 September 2009 and its objective is to promote the transparency of the Macau tax administration and to demonstrate the Macau SAR’s willingness to cooperate with treaty partners in combating tax avoidance or tax evasion activities.

The information to be exchanged under Law 20/2009 is strictly confined to information collected for tax purposes only, and includes the following:

• Information collected within the jurisdiction of the Macau Finance Bureau (MFB); and
• Information collected by the MFB from financial institutions that are governed by the Macau Financial System Act and offshore institutions that are governed by the Macau Offshore Law (the Institutions).
At present, the only bilateral tax arrangements/treaties entered into by the Macau SAR which have come into effect are with the PRC and Portugal. However, in response to the Organisation for Economic Co-operation and Development’s (OECD) request for cooperation in combating tax avoidance or evasion activities, and to prevent the Macau SAR from being viewed as a tax haven, it is believed that more comprehensive tax arrangements/treaties or tax information exchange agreements (TIEAs) will be signed between the Macau SAR and other tax jurisdictions in the near future.

As the information of a Macau taxpayer is becoming more transparent under comprehensive tax arrangements/treaties or TIEAs, it is important for Macau companies with cross-border transactions to perform periodic tax health checks to ensure that tax planning arrangements, if any have been put in place in the past, remain technically defensible. As Macau offshore companies continue to be a focus of investigations for many tax jurisdictions, it is important to ensure that such companies have adequate commercial substance in Macau and the companies' transfer pricing policies are supported by appropriate transfer pricing documentation and transfer pricing studies.

**Taxes on corporate income**

Complementary income (corporate) tax is imposed on the total income earned by Macau registered entities, irrespective of where their residence or headquarters are situated, and irrespective of the nature of the income. The exception to the foregoing is rental income from leasing of immovable properties located in Macau, which is taxed separately under the Property Tax Regime.

According to the Macau Complementary Tax Law, complementary tax is imposed on a progressive rate scale ranging from 3% to 9% for taxable profits below or equal to Macau Pataca (MOP) 300,000 and 12% for taxable profits over MOP 300,000. Taxable profits below MOP 32,000 are exempt from tax.

According to the Budget for the financial year 2010, which has already been approved by the Legislative Assembly (2010 Approved Budget), the tax-free income threshold for Macau Complementary Tax has been increased from MOP 32,000 to MOP 200,000 for income derived in the financial year 2009 (the next MOP 100,000 of taxable income is taxed at 9% and taxable income in excess of MOP 300,000 is taxed at 12%). Such increase in the tax-free income threshold has been granted since the tax year 2007. While it is generally believed that the direction of the Macau government policy would remain stable at least for several years, the changes in tax-free income threshold and the tax brackets beyond the tax year 2009 are subject to approval by the Legislative Assembly on an annual basis, unless such amendments are written into the relevant tax laws.

**Types of taxpayers**

*Group A taxpayers*

Taxpayer entities whose registered capital reached MOP 1,000,000 or more, or whose average taxable profits reached MOP 500,000 per year in three consecutive years will automatically become Group A taxpayers in the fourth year. A taxpayer entity can also elect to become a Group A taxpayer by filing a Group A declaration form. Profits are assessed based on the actual accounting income after making necessary tax adjustments.
**Group B taxpayers**
Group B taxpayers refer to any individual or any other form of companies not mentioned above and those taxpayers that do not keep detailed accounting records. Profits are assessed on a deemed basis if the reported income is below the internal parameters set by the Macau Finance Bureau for taxpayers in similar industries.

**Corporate residence**
Corporate residence is generally determined by reference to the place of establishment. The exception to the foregoing is a Macau offshore company or a Macau offshore financial institution that is established under Law 58/99/M. Such a Macau offshore company or financial institution is not considered as a Macau tax resident in the context of the comprehensive tax arrangement/agreement entered into between the Macau SAR and the PRC and Portugal, respectively.

There is no specific definition of permanent establishment in the Macau Complementary Tax Law. Technically speaking, there are two major criteria for determining whether a foreign entity should be subject to Macau Complementary Tax and the key phrases are “engaging in commercial/industrial activities” and/or “rendering services in Macau”. These phrases are again not defined. Generally, if an overseas company is engaged in commercial/industrial activities in Macau, the resultant gain from such commercial/industrial activities will be subject to Macau Complementary Tax.

**Other taxes**

**Property tax**
Property tax is imposed on the owner of buildings situated in Macau. This is first payable after acquiring a property or upon the expiry of the property tax exemption period, if applicable. Different exemption periods are granted, depending on the location of the property. Additional exemption periods may apply in special cases. For leased properties, property tax is charged at 16% on the actual rental income. For self-use properties, property tax is charged at 10% on the official rateable value as established by the appointed committee of the MFB. A surcharge of 5% is levied on the tax payable in both cases. If the property is not occupied, the owner can apply for an exemption from property tax, the approval of which is entirely at the discretion of the MFB. Rental income derived from leasing of real estate is not subject to complementary tax, and therefore related expenses are not deductible.

A deduction of up to 10% of the rental income or actual repair and maintenance expense, whichever is the lesser, shall be allowed upon approval by the MFB to cover repairs and maintenance expenses incurred by the taxpayer.

According to the 2010 Approved Budget, there is a standard MOP 3,500 reduction in the property tax liabilities assessed in the financial year 2010 for both self-used and rental properties.

**Annual industrial tax**
All commercial or industrial operations carried out in Macau are subject to industrial tax at the beginning of each year. The amount taxed is dependent upon the nature of the business. For example, according to the Industrial Tax Code, the tax amounts applicable to various operations are shown below.
The above annual industrial tax has been exempted since 2002. This exemption, if extended, will be published by the Macau Government on an annual basis. The exemption has been extended for 2010.

**Special gaming tax**

Special gaming tax is levied at 35% on the gross gaming revenue derived by gaming concessionaires authorised to carry on the operation of games of chance in the Macau SAR under Law 16/2001.

**Tourism tax**

Tourism tax is imposed at the rate of 5% on bill of services, excluding telecommunication and laundry services, and service charges of up to 10%, rendered in Macau by establishments such as hotels, guest houses, dancing halls, night clubs, massage/sauna parlours, gymnasium, karaoke and the like. Such tax is generally borne by consumers.

Tourism tax for restaurants has been exempted since 2002. This exemption, if extended, will be published by the Macau Government on an annual basis.

**Consumption tax (excise duty)**

Consumption tax is imposed only on specific goods entering into Macau, as follows:

- Tobacco; and
- Spirits.

There are two methods for determining the amount of consumption tax payable, by quantity or by value. The former method of assessment is based on the weight or volume of goods and the latter is based on the price of the goods imported into Macau. The rate of consumption tax varies depending on the classification of the imported goods.

**Motor vehicle tax**

Motor vehicle tax is imposed on the sale of new motor vehicles to consumers and the importation of new motor vehicles for self-use. Exemptions are available to certain persons and organisations and for certain specific usages. Generally, motor vehicle tax is levied based on the listed selling prices as registered with the MFB. The rate of motor vehicle tax varies depending on the type of motor vehicle and its value.

**Stamp duty**

Stamp duty is payable on certain types of documents and stampable transactions at a small fixed amount, or at rates ranging from 0.1% to 10% on the value represented by the documents and transactions. The charge to stamp duty has been extended to property transfers and the irrevocable transfer of certain assets. Stamp duty at progressive rates ranging from 1% to 3% is payable on transfer of immovable property.
with a surcharge of 5% on the duty payable, resulting in effective stamp duty rates of 1.05% to 3.15%. Where the transfer of the immovable property is preceded by a private sale and purchase agreement that is not registered and hence not legally enforceable, an additional 0.5% stamp duty on the transfer consideration is payable. The irrevocable transfer of certain assets without consideration is subject to a 5% stamp duty.

Stamp duty for insurance policies written or renewed and stamp duty for banking transactions have been exempt since 2005. This exemption will continue to be available in the financial year 2010.

According to the 2010 Approved Budget, an adult who holds a Macau permanent resident identity card and who does not own any properties other than one car-parking space is eligible to enjoy exemption on stamp duty levied on the purchase of a residential property for self-use purposes for the first MOP 3 million of the transfer consideration. The transfer consideration in excess of MOP 3 million will be subject to stamp duty. The stamp duty exemption has a three-year lock-in period, such that unless the residential property so purchased is transferred as part of a deceased estate, the purchaser will have to pay back the stamp duty that was originally exempt on the purchased property if such residential property is sold within three years after the stamp duty exemption granting date.

The stamp duty on admission tickets for performances, exhibitions, and any kind of entertainment programmes has been exempted for the tax year 2010. This exemption, if extended, will be published by the Macau Government on an annual basis.

**Land rent**

According to the 2010 Approved Budget, land rent below MOP 100 shall not be collected by the Macau Finance Bureau in the financial year 2010. However, any such amount already collected shall not be refunded.

**Branch income**

Branch income is subject to tax at the same rate as that for corporations. The taxable income is ascertained based on branch accounts.

**Income determination**

The paragraphs below describe the tax acceptable treatments under the prevailing Complementary Tax Law and are for reference only.

**Inventory valuation**

Inventory should be stated at actual cost, and conformity between book and tax reporting is required. Market selling price or replacement cost is allowed only in special circumstances and prior approval of the Director of the MFB is required for adoption of such inventory valuation methods. The write-down of inventory values is not permitted.

**Capital gains**

Gains or losses from the realisation of capital assets of a corporation taxpayer are treated as current revenue or expense items for complementary tax purposes.
**Inter-company dividends**

Dividends from all sources are subject to complementary tax in the hands of a recipient incorporated in Macau unless the dividends were paid out of profits that have been taxed at the corporate level in Macau. Where dividend to shareholders is paid out of profits of a Macau entity that have not been taxed in Macau, complementary tax will technically be charged on the dividend distribution to the shareholders, except for distribution of tax exempt profits of approved offshore institutions, where complementary tax, in practice, has not been charged by the MFB to date.

**Foreign income**

Companies incorporated in Macau are subject to complementary tax on all income, wherever received or credited. Currently, double taxation relief is available under the respective avoidance of double taxation agreement/arrangement that Macau has with Portugal and the People’s Republic of China.

**Deductions**

**Depreciation and depletion**

An initial allowance of 20% is granted on buildings. The rates of tax depreciation are detailed in Decree-Law No.4/90/M, dated 5 March 1990. The Decree-Law prescribes the maximum annual tax depreciation rates and the number of years of asset life for different asset classes under the straight-line method. For illustration, the maximum depreciation rates and the maximum useful life currently applicable to the general types of assets are set out below.

</table>
In the case of commercial and industrial buildings, depreciation is not allowed for the value attributable to the cost of the freehold land. Where the value of the freehold land cannot be determined from the total cost of land and buildings, a portion equal to 20% is deemed to be attributable to the land value for the purpose of determining the value of buildings to be depreciated.

Depreciation can be claimed either on a prorated basis in accordance with the prescribed annual rates for assets that are not acquired at the beginning of the financial year or on an annual basis.

The cost of repairs and maintenance exceeding 10% of the acquisition cost of the asset in a given year is deemed to be expenses of a capital nature, and should be capitalised and depreciated over the remaining life of the asset.

**Net operating losses**
Agreed tax losses can be carried forward for three consecutive years for Group A taxpayers. Group B taxpayers are not allowed to carry their tax losses forward to future years.

**Payments to foreign affiliates/foreign firms**
The regulations make no specific mention of royalties, interest, and service fees paid to foreign affiliates. The MFB generally monitors the deductibility of such payments. Payments to foreign service providers for consulting services or construction-related services are not deductible if such consulting contracts are not properly registered in Macau.

**Other significant items**
- The amount provided against doubtful trade receivables is an allowable tax deduction, but the provision cannot exceed 2% of the total receivables except in the case of banks, where the minimum provisions required under the local banking regulations are fully tax-deductible.
- Debts considered uncollectible may be written off only when adequate proof can be shown, usually by way of bankruptcy court proceedings.
- An amount provided against stock obsolescence of up to 3% of the total stock value at year-end is allowed as a tax deduction.
- A deduction of up to 0.2% of the company's turnover is allowable for donations to charitable organisations recognised by the tax authorities.
- Staff social welfare expenses paid for the benefit of employees, for example canteens and libraries, are fully tax-deductible.
- The employer’s contribution to the staff provident fund legally registered in Macau is fully tax-deductible up to 15% of the employees’ basic salary.
- Tax fines are not deductible.
- Losses arising from insurable risks are not allowable as a tax deduction.

In addition to the above, the assessor is empowered to disallow any business expenses, for example entertainment, and travelling, where the amount incurred is considered to be excessive.
Macau

**Group taxation**

There is no provision for group taxation in Macau.

**Tax incentives**

**Capital investment**
A 50% reduction in complementary tax and stamp duty on certain transactions, as well as exemptions from annual industrial tax and property tax (up to periods prescribed by the MFB) are allowable for taxpayers in the manufacturing industry (as defined in the Decree Law) whose capital investment is aimed at the introduction of new products or high technology, improvement of productivity, and increase in exports of goods to new markets.

Where profits are retained in reserves and reinvested in installation of new equipment within the following three financial years, the reinvested reserves can be deducted from taxable profits, provided that the reinvested reserves are attributable to profits earned from normal business operations and the investment is considered to be beneficial for the economic development of Macau.

**Offshore services business**
Profits derived by approved offshore institutions from prescribed offshore service-related activities are exempt from all forms of taxes, such as complementary tax, annual industrial tax (currently exempt for all taxpayers) and stamp duties. By application, the executives, staff at a supervisory level and/or specialised technicians who have obtained a residency permit in Macau are exempt from professional tax for three calendar years from the date the exemption application is approved.

**Investment in touristic facility**
Additional incentives such as an extended property tax exemption period, exemption from annual industrial tax, reduction in stamp duty, as well as acceleration of depreciation for complementary tax purposes are available to owners of facilities that qualified as touristic facilities.

**Withholding taxes (WHT)**
Currently, there is no provision in the tax regulations to withhold taxes for any payments made by domestic corporations to overseas companies.

**Tax treaties**
A comprehensive DTA was entered into between the Macau SAR and the PRC Government on 27 December 2003. Subsequently, a Protocol to the DTA was signed on 15 July 2009. The Protocol will be effective upon completion of the necessary ratification procedures by both parties, and will be applicable to income arising from the 1st of January of the year following the year in which the Protocol will become effective. The following are some of the features of the DTA:

- Withholding tax on dividends is generally levied at a rate of 10% and the rate will be reduced to 5% pursuant to the Protocol where the beneficial owner is a company directly owning at least 25% of the capital of the company that pays the dividend.
• Withholding tax on interest is generally levied at a rate of 10% and the rate is reduced to 7% for payments made to general banks or financial institutions, or 0% for payments made to recognised banks or financial institutions. Pursuant to the Protocol, the rate will be reduced to 7% for general cases and 0% for payments made to recognised banks or financial institutions.
• Withholding tax rate on royalties is 10% and will be reduced to 7% pursuant to the Protocol.
• Gains arising from the alienation of shares representing a participation of not more than 25% of the shares in a non-real property company which is a resident of one contracting state will be taxable only in the state in which the alienator is a resident. In other words, there is an exemption in the investee country for gains arising from the sale of portfolio investments situated in that country.
• The DTA also covers business profits, income from dependent and independent personal services, income of artists or athletes, teachers, researchers, students and apprentices, as well as income for government services.

In addition, a DTA is in effect between Macau and Portugal. DTAs with Belgium and Mozambique have been signed but are not effective until the necessary ratification procedures are completed.

The Macau SAR also entered into a Closer Economic Partnership Arrangement (CEPA) with the PRC Government on 17 October 2003, which came into effect on 1 January 2004. Supplements I to VII to CEPA have been promulgated subsequently to broaden or update the original CEPA. The content of the Macau SAR/PRC CEPA is similar to the CEPA between the Hong Kong SAR and the PRC Government.

**Tax administration**

**Returns**
Assessments are made by the MFB upon review of the tax returns, which must be lodged before 31 March or 30 June of each year for Group B or Group A taxpayers, respectively. The Macau tax year is on a calendar-year basis.

**Payment of tax**
A provisional tax payment calculated based on the declared taxable profit for a Group A taxpayer or final assessed profits for a Group B taxpayer is payable in two equal instalments in September and November. However, if the amount is not greater than MOP 3,000, payment would be requested in one lump sum amount in September. For Group A taxpayers, a final tax assessment would be issued upon the completion of tax assessment by the MFB.

**Statute of limitation**
The statute of limitation period is five assessment years from the relevant year of assessment for both Group A and Group B taxpayers.
Other issues

Choice of business entity
An investor conducting business in Macau is obligated to set up a legal establishment, which could be in the form of a company or a branch.

There are two types of Macau companies: companies limited by shares and companies limited by quotas. The capital and corporate governance requirements for a company limited by shares are higher than a company limited by quotas, and in general, a company limited by quotas is used by investors that are not in regulated industries.

Significant developments

Starting from 1 January 2009, important changes to profit tax legislation were introduced as part of the government’s measures in response to the financial crisis.

Under the amendments, any income realised by a corporate taxpayer will be exempt from corporate income tax (CIT) on the condition that such income is not distributed in the form of dividends (i.e., kept as retained earnings). In accordance with this, any profit distributions will be subject to CIT in the year of payment.

Effective from 1 January 2009, amendments were also made regarding tax treatment of capital revenue. The article that previously provided a tax exemption for dividends realised with participation in the capital of another resident taxpayer of Macedonia, on condition the dividends were taxed at the dividend payer, was abolished. In line with the profit tax exemption for undistributed profits, the dividends are taxable upon payment.

Capital gains
As of 1 January 2009, capital gains are fully included in the taxable base of the company. Since under the latest amendments the profits of a company are not taxable until distributed, such profits are not subject to corporate income tax before that time.

Loss carryforwards
Loss carryforwards are not allowed under the Macedonian legislation.

Taxes on corporate income

Generally, all resident and non-resident companies operating through a permanent establishment (PE) are liable to pay CIT in Macedonia. Computation and payment of the tax is performed by companies. The CIT rate is 10%.

The basis for computation of the tax is the result determined in the tax return. There are two types of returns:

- Annual returns – relating to expenses, which are non-deductible for tax purposes; and
- Returns related to profit distributions – with respect to distribution of profits accumulated by a Macedonian company.

Macedonian resident entities are taxed on their worldwide income. Non-resident entities are taxed on their Macedonian-source income. Non-business organisations (including governmental bodies) are taxed on income from their business activities.
Macedonia

The Macedonian Trade Companies Law provides for the following types of entities:

- General partnerships;
- Limited partnerships;
- Limited liability companies;
- Joint stock companies;
- Limited partnerships by shares; and
- Foreign business entities may register a branch office in Macedonia.

**Corporate residence**

A company is resident in Macedonia for tax purposes if it is established or maintains its headquarters in the territory of Macedonia. Foreign legal entities with headquarters abroad are non-residents for tax purposes, but their Macedonian branches are liable for tax on any profit generated in the territory of Macedonia.

**Permanent establishment (PE)**

In 2006, the profit tax law introduced the concept of a PE. Generally, a PE is a fixed place of business through which the business of an enterprise is wholly or partly carried on, either directly or through a dependent agent.

More specifically, the domestic law provides that a PE may include a place of management, a branch office, a factory, a workshop, mining activities, or any other place of extraction of natural resources.

A building site or construction or installation project may constitute a PE if it lasts longer than six months.

Furthermore, the provision of services, including consulting services, is deemed to give rise to a PE if such activities last longer than 90 days within a 12-month period.

**Other taxes**

**Value-added tax (VAT)**

VAT was introduced on 1 April 2000. In general, the VAT regulations are in line with the provisions of the sixth VAT European Union directive.

The standard VAT rate is 18%. This rate applies to overall turnover and imports of goods and services. A lower rate of 5% applies to supplies of certain goods, including foods, drinking water from public supply systems, and publications such as books, pamphlets, newspapers, and other printed material, except for publications mainly used for advertising purposes.

All taxpayers whose total turnover for the previous calendar year exceeded MKD 1.3 million or whose total supplies, as projected at the beginning of the business activity, will exceed this amount, are liable to register for VAT purposes.

Residents that do not meet the criteria above may voluntarily register for VAT purposes at the beginning of each calendar year.
The standard VAT period is one calendar month. However, if the total turnover in the previous calendar year did not exceed MKD 25 million, the tax period is the calendar quarter. The tax period for voluntarily VAT registered taxpayers is the calendar year.

A taxpayer is obliged to submit a VAT return for each tax period within 15 days following the end of the relevant tax period.

**Excise duties**
Excise duties are levied with respect to a limited number of goods. Petroleum products, alcohol and alcoholic beverages, and tobacco products are subject to an excise duty at a flat or percentage rate.

The excise duty for passenger motor vehicles, which was cancelled on 31 December 2003, was reintroduced as of 1 January 2005. The tax is based on engine capacity and the purchase value of the car. It ranges from MKD 0 to MKD 550,000.

**Property tax**
Property tax is paid on the ownership of real estate, including land (agricultural, construction, forest and pastures) and buildings (residential buildings or flats, business buildings and business premises, administrative buildings and administrative premises, buildings and flats for rest and recreation, and other construction facilities, as well as installations constructed on the buildings or below and permanently attached to the buildings).

The tax liable person is the legal entity or the individual owner of the property. If the owner is not known or cannot be reached, the tax liable person is the user of the property. A property taxpayer may also be the taxpayer who usufructs the property, and if the property is owned by several persons, each of them is a property taxpayer proportionately for the portion owned. A property taxpayer is also the legal entity or physical person user of the real estate owned by the state and the municipality.

The property tax base is the market value of the real estate. For the purpose of determining the market value of the real estate, Municipal Council, Municipal Council of the City of Skopje and the Council of the City of Skopje establish a commission. Market value is determined according to the methodology for determining the market value of real estate.

Property tax rates are proportional and range from 0.10% to 0.20%. The rates are determined on the basis of the type of property. Thus, property tax rates on agricultural land not used for agricultural production may be increased from three to five times in relation to the basic rates.

The amount of the rates is decided by the Municipal Council, Municipal Council of the City of Skopje and the Council of the City of Skopje pursuant to the Law on the City of Skopje.

The taxpayer paying property tax for a residential building or flat in which he/she lives with family members is entitled to a reduction of the calculated tax by 50%.

**Transfer tax**
The sale of real estate is subject to transfer tax. A sale is defined as the transfer by compensation of the right to ownership of real estate, the replacement of one piece
of real estate with another, as well as other means of acquiring real estate with compensation between legal entities and/or physical persons. In addition, the transfer of securities on the basis of compensation is subject to transfer tax.

The tax liable person is a legal entity or an individual who sells real estate. As an exception, a taxpayer may also be a legal entity or physical person who buys real estate, if the sale and purchase agreement states that the buyer is to pay the tax. When replacing real estate, the taxpayer is the participant that replaces the real estate of greater value.

If the right to ownership of real estate is transferred on the basis of a lifelong support agreement, the receiver of the real estate (i.e., the heir) is the taxpayer.

When selling real estate in bankruptcy and executive procedure, as well as when realising agreements on mortgage, the taxpayer may be the buyer of the real estate.

The tax base is the market value of the real estate at the moment of the establishment of the liability.

When replacing real estate, the tax base is the difference between the market values of the real estate being replaced.

When selling real estate in bankruptcy and executive procedure, the tax base is the attained selling price.

Tax rates are proportional and range from 2% to 4%.

**Garbage collection fee**

A garbage collection fee is payable for immovable property depending on the type of property and on the surface area used. It is calculated on the basis of a tariff. It is collected together with the bills for water usage.

Companies and individuals are liable for paying communal taxes for usage of certain rights and services (mainly for usage of the urban space in the municipalities, posting commercials, etc.).

**Branch income**

Branch offices are registered in the Trade Registry. Branches are subject to tax in accordance with the general statutory provisions. The foreign parent company is fully liable for the obligations of its established branch office in Macedonia.

A foreign company that is entitled to carry out commercial activities pursuant to its national legislation may establish a commercial representative office in Macedonia. Representative offices are not legal entities and may not carry out any commercial activities. Representative offices are not subject to CIT.

**Income determination**

Effective from 1 January 2009, taxpayers are not subject to tax on undistributed profits.
Undistributed profits is the difference between total revenue and total expenditures of the taxpayer, in amounts determined according to the accounting regulations and accounting standards, decreased by the paid tax determined in the tax return.

Starting from 1 January 2009, distributions of dividends and other types of profit are subject to profit tax. The distributed amount, regardless of whether in monetary or non-monetary form, is taxed at the time of payment. In addition, on an annual basis tax is payable on the non-deductible expenses.

Monthly advanced payments of profit tax for 2010 are calculated from the amount of tax computed on the basis of the non-deductible items on the 2009 tax return, decreased by tax credits and other tax incentives stated in the return.

**Addbacks**

Tax-deductible expenditures, for the purposes of determining the taxable base, are solely those incurred by the taxpayer within its business activity. The CIT law provides further guidance on this issue:

- The calculated gross salaries of employees are tax-deductible up to the amount paid. Salaries include employees’ income paid based on the business success of the employer as well as food and transportation allowance.
- The personal income of the managing and supervisory board members is tax-deductible up to 50% of the amount paid.
- Employees’ related expenditures such as organised transportation to/from work, organised food (canteen), business trip allowance, field allowance, family separation allowance, one-off severance payment, retirement allowance, annual holiday allowance, anniversary awards, etc. are tax-deductible up to the amount prescribed by law and collective agreement.
- The depreciation taken on intangible and tangible assets is recognised as expenditure in the tax return up to the amount calculated on the procurement value of such assets, by applying depreciation rates within the limits set by the law. Once determined, the depreciation method is used until the final depreciation of the asset or group of assets.
- The interest on credits received for the purposes of conducting a company’s business activities is fully tax-deductible, provided the interest does not fall under the thin capitalisation rules effective from 1 January 2009. Under these rules, the interest is not tax-deductible if the credit received from a shareholder who holds at least 25% of the capital in the company (which is not a bank or a financial organisation) exceeds the amount of three times its share in a tax period.
- The costs for research and development (R&D) incurred within a company’s own R&D centres or through independent scientific and research institutions are fully tax-deductible.
- The premiums paid for insurance of the taxpayer’s business property and all kinds of compulsory non-life insurance determined by law are tax-deductible.
- Property tax, fees, and other paid public duties not depending on operating performance, except withholding taxes, are tax-deductible.
- The costs for economic propaganda and marketing for the purpose of improving the taxpayer’s business are tax-deductible in the amount of actual costs suffered.
- The outlays for donations is recognised as expenditures in the tax return in the amount of 5% of the overall revenue, and sponsorship outlays in the amount of 3% of the overall revenue, pursuant to the manner, the conditions and the procedure set in the law on donations and sponsorships in public activities.
Macedonia

- The revenue realised on the basis of the funds that are strictly earmarked for performance of the taxpayer's activity (budgets, funds) is fully tax-deductible.
- The value of the supplies from the uncompleted production, intermediate products, and final products is estimated at a maximum of the full cost.
- Transfer prices between related parties have to be market-based.

**Deductions**

**Dividends**
Effective from 1 January 2009, amendments were made regarding the tax treatment of capital revenue. The article giving tax exemption for dividends realised with participation in the capital of another taxpayer-resident of the Republic of Macedonia, on condition they are taxed at the dividend payer level, was abolished. In line with the profit tax exemption for undistributed profits, dividends are taxable upon payment only.

**Capital gains**
Capital gains are treated as ordinary income of the taxpayer and are included in its general taxable base.

**Loss carryforwards**
Loss carryforwards are not permitted by Macedonian legislation.

**Group taxation**
Tax consolidation provisions were abolished starting from 1 January 2009.

**Tax incentives**
A taxpayer that is a registered user within a technological industrial development zone is exempt from profit tax payment for a period of 10 years from the commencement of the performance of the activity in the zone under terms and conditions and according to a procedure determined with the law on technological and industrial development zones.

A taxpayer that is obliged, in accordance with the law on registration of cash payments, to introduce and use approved equipment for registering cash payments is granted reduction of the calculated corporate tax for up to 10 procured fiscal machines in the amount of their value.

**Simplified tax regime for small companies**
Companies that perform economic activity (except banking, financial, insurance activities and games of chance and entertainment games) and have not earned overall revenue from any source exceeding MKD 3 million on an annual level in any of the past three years may calculate and pay annual tax on total revenue in the amount of 1% of the amount of earned total revenue presented in the annual income statement for the previous calendar year.

**Withholding taxes (WHT)**
WHT on income paid to foreign legal entities was introduced on 1 January 2006.
Macedonia

All domestic legal entities and domestic physical persons that are registered for carrying out an activity, as well as foreign legal entities or physical persons that are non-residents but have a PE in Macedonia when paying certain types of income to a foreign legal person, are obliged to withhold tax and to pay the tax withheld to a respective suspense account simultaneously with the payment of the income.

The WHT rate is 10% and is applied on the following forms of incomes payable abroad:

- Dividends;
- Interest from residents;
- Interest from non-residents with a PE in Macedonia;
- Royalties paid by residents;
- Royalties paid by non-residents with a PE in Macedonia;
- Income from entertainment or sporting activities in Macedonia;
- Income from management, consulting, financial services, or services related to R&D;
- Income from insurance or reinsurance premiums;
- Income from telecommunications services between Macedonia and a foreign country; and
- Income from the lease of immovable property in Macedonia.

As an exception, WHT is not applicable to the following forms of income:

- The after-tax profit of a PE transferred to its foreign headquarters;
- Interest from bonds issued or guaranteed by the government;
- Interest on deposits in banks located in Macedonia; or
- Income from transactions in state securities on the international financial markets.

If a double taxation avoidance agreement is in place, WHT shall be payable in accordance with the treaty provisions.

The Republic of Macedonia has signed double taxation avoidance agreements with 33 countries: Netherlands, France, Italy, Sweden, Denmark, Finland, Switzerland, Hungary, Croatia, Turkey, Yugoslavia, Poland, People’s Republic of China, Russia, Ukraine, Slovenia, Bulgaria, Egypt, Albania, Iran, Romania, Belarus, Spain, Czech Republic, Moldova, United Kingdom of Great Britain and Northern Ireland, Ireland, Qatar, Austria, Latvia, Lithuania, Estonia, Slovakia, and Germany.

Additionally, Macedonia has adopted agreements with Malaysia, Norway, and Belgium, that were concluded by the former Yugoslavia.

**Tax administration**

The taxable period for which profit tax is determined covers one calendar year.

Taxpayers are obligated to calculate and pay tax on the basis of a tax return form, which must be submitted to the public revenue office together with the annual financial statements.

Taxpayers pay profit tax during the year in monthly advance payments by filing a monthly tax return form within 15 days of the end of each month.
Macedonia

The monthly advanced payment is determined as one-twelfth of the CIT computed in the annual CIT return for the previous year, increased by the percentage of the growth of the retail prices in the country.

Monthly advanced payments of profit tax for 2010 are calculated from the amount of tax computed on the basis of the non-deductible items of the 2009 tax return decreased by tax credits and other tax incentives stated in the return.

The difference between the advance payments and the final tax liability is paid within 30 days of the deadline for submitting the annual financial statement.

Interest is due on late payments.

A request for refund of overpaid tax may be made, and the refund should be made within 30 days of submitting the request. If the requested refund is not made, the overpaid amounts will be considered as advance payment for the following period.

**Significant developments**

The most significant changes of the past three years are:

- The corporate tax decreased from 25% in 2008 to 24% in 2009 and once again to 23% in 2010.
- Tax loss may be carried forward for five years instead of three years.
- The increase in the corporate tax rate for a Madagascar branch of a foreign company was cancelled.

**Taxes on corporate income**

A corporate entity or individual person registered in Madagascar and having an annual turnover exceeding MGA 20,000,000 is subject to corporate income tax (CIT) at a rate of 23%.

The tax payable cannot be less than 5/1000 of turnover plus a fixed amount of MGA 100,000 for taxable persons carrying on agricultural, artisan, transportation, industrial, hotel, or mining activities. The minimum tax cannot be less than 5/1000 of turnover plus MGA 320,000 for other activities.

Revenue of foreign businesses that do not have a permanent establishment (PE) in Madagascar is subject to withholding income tax of 10% of any income realised in Madagascar.

**Corporate residence**

Companies are considered resident in Madagascar if they are registered in Madagascar or have a legal existence in Madagascar. Companies usually are required to have a legal existence when they carry out business in Madagascar or have revenue from ownership of assets in Madagascar.

**Other taxes**

**Value-added tax (VAT)**

VAT is applicable to all transactions realised in Madagascar by a VAT vendor. Services are considered to be performed in Madagascar if such services are used in Madagascar or invoiced to a taxpayer established in Madagascar.
Madagascar

Any corporate entity or individual person who realises an annual turnover exceeding MGA 200,000,000 is a VAT vendor. For a business realising annual revenue less than MGA 200,000,000, VAT vendor registration is an option.

A foreign company that has no permanent establishment in Madagascar but renders services to a Madagascar taxpayer must appoint a tax representative to collect and pay VAT on its behalf. Otherwise, the beneficiary of the services must collect and pay VAT on behalf of the foreign supplier.

The VAT rate is 20%, and the VAT rate on export is 0%. VAT input is recoverable under certain conditions.

**Registration fees**
Registration fees are applicable to transfers of title ownership (sales, donations) of movable and immovable assets, to transfers of interests, to share capital increases and to lease agreements.

Registration fee rates are 0.5% to 6%, depending on the nature of the transaction.

**Payroll tax**
Salary taxes are levied at a rate of 23% on the total taxable remuneration of employees, including salaries, allowances, and benefits in kind.

**Real estate ownership tax**
Real estate ownership tax is imposed annually at the rate of 5% to 10% on the rental value of the property. Land ownership is also taxable at a rate depending on the nature of the land.

**Tax on insurance contracts**
All insurance or life annuity conventions concluded with a company, insurance firm, or with any other Madagascan or other insurer are subject to an annual tax on insurance contracts at a rate of 3% to 20% levied on the insurance premiums.

**Social security contributions**
Employers must contribute to Caisse Nationale de Prévoyance Sociale (Madagascar’s national social security fund, which includes pensions and accident insurance). The contribution is capped at 13% of eight times the legal minimum salary per employee.

**Health contributions**
Employers must contribute to the health system assessment at a rate of 5% of the total amount of taxable remuneration of its employees.

**Branch income**
The tax on branch income is the same as for corporate income.

**Income determination**

**Inventory valuation**
There are no provisions for valuing inventories or determining inventory flows. The tax treatment will follow the accounting treatment.
**Capital gains**
There is no provision for capital gains in Madagascar except for capital gains on the sale of real estate by an individual. Capital gains made by a company on the sale of assets and interests are considered as normal business income, subject to income tax.

**Inter-company dividends**
Dividends received by a company are considered as business income subject to income tax. No withholding tax applies on payment of dividends.

**Foreign income**
Foreign income is considered as normal business income subject to income tax, unless a tax treaty is established and indicates otherwise.

**Stock dividend**
Stock dividends are unusual, but they are considered as business income, subject to income tax.

**Deductions**

**Deductible wages**
Salaries and wages that are not submitted to salary income tax or not declared to “Caisse Nationale de Prévoyance Sociale” are not deductible.

**Depreciation**
The amount of deductible depreciation should not exceed the amount that is calculated according to the rates of depreciation provided by the law:

- Industrial buildings: 5%;
- Plant and machinery: 10%;
- Mining exploration and development: (licence): 33%;
- Transportation: (car) 20%; (utility cars, vans, trucks) 25%;
- Computers: 25%; and
- Electricity generators: 10%.

With the exception of buildings, it is also possible to practise a graduated depreciation. In this case, the annual depreciation corresponds to 30% of the net book value of the asset.

In case of loss, depreciation of assets can be deferred and carried forward to the next financial years until absorption.

**Payments to foreign affiliates**
For branches, the deductible amount of overhead that the head office can charge to the branch is limited to 1% of the turnover of the branch.

Interest on inter-company loans: Only interest calculated on twice the amount of the share capital at a rate practised by the Central Bank plus two points is deductible.

**Net operating losses**
Accumulated loss can be carried forward for the next five financial years following the period in which the loss occurs.

**Other significant items**
To be tax-deductible, provisions must relate to existing liability or loss. Fines and third-party taxes borne by the company are not tax-deductible.
Madagascar

**Group taxation**

There is no provision regarding group taxation in Madagascar.

**Tax incentives**

The general tax legislation does not provide tax incentives with the exception of microfinance activity, which is exempt from income tax during the first five years. After this period, the microfinance company is subject to income tax at a rate of 23%.

The following activities benefit from a special tax and customs regime:

- Free-zone law for industrial and other service providers that export all products. They can be eligible under the free-zone law, which provides income tax exemption during the first two to five years and a reduced income tax of 10% after this period, and exemption from customs duties on importation.
- Big investment mining. The big investment mining law provides a minimum income tax exemption, and a reduced income tax rate for the transformation entity, exemption from custom and importation duties, and VAT reimbursement on local purchased equipment and investments.
- Petroleum code. The petroleum code provides custom and importation duties exemption for hydrocarbon research, exploration, and exploitation activities.
- Leasing law. The leasing law provides that leasing activities can benefit from income tax exemption and reduction during the first four years.

**Withholding taxes (WHT)**

WHT are levied as follow:

- Impôt sur les revenus des capitaux mobiliers (IRCM): Withholding tax on interest of 23% is applicable on financial loan interest. However, interest paid to banks, financial institution, and foreign financial organisation is exempt.
- Withholding tax of 23% is applicable on remuneration of a member of a board of directors or a single director.
- Income tax for non-resident entity: Management fees, royalties, technical and assistance fees, licence fees, equipment rental fees, and any income realised by foreign suppliers is subject to income tax of 10%.

**Tax administration**

Corporate income tax is payable bimonthly in provisional instalments. The balance is payable before 15 May each year for companies whose financial year ends at 31 December, and before 15 November each year for companies whose financial year ends at 30 June.

Withholding tax on foreign services is payable to the tax authorities within one month of the date of payment.

Withholding tax on interest and on payments to members of boards of directors are payable at 15 May or 15 November, depending on the financial year-end.

Significant developments

From 1 July 2005:
• Losses carried forward from trading operations are restricted to a period of six years. Manufacturers may carry forward losses indefinitely.
• Provisional tax is payable 30 days after the end of each quarter.
• Minimum tax on turnover is abolished.

From 1 July 2006:
• There is a 100% allowance on mining expenditures in the first year of assessment.
• No capital gain is recognised if the gain on disposal is used to acquire a replacement asset within 18 months.

From 1 July 2007:
• Consumer price indices are used for calculating the basis upon disposal of fixed assets for capital gains tax purposes.
• There is a 100% allowance on plant and machinery and industrial buildings for taxpayers in the manufacturing industry.

From 1 July 2009:
• A turnover tax is introduced for businesses with a turnover between MWK 2 million and MWK 6 million.
• Corporate tax self-assessment is introduced.
• Transfer pricing regulations and an additional tax anti-avoidance provision on transactions between related parties are introduced.
• Penalties increase for late submission of returns from MWK 30,000 to MWK 200,000.

Taxes on corporate income

Malawi does not have separate legislation for taxation applicable to the income of different types of legal persons or types of transactions such as corporate tax, personal tax, and the taxation of capital gains. All are included in the Taxation Act.

Summary of corporate tax rates

Malawi

Companies in priority industries
– Either for a period not exceeding 10 years 0%
– Or in all other cases for companies incorporated in Malawi 15%
– Or in all other cases for Malawi branches of external companies 20%

Personal tax
First MWK 120,000 0%
Next MWK 36,000 15%
Thereafter 30%

Notes
1. In the case of a mining company, an additional resource rent tax of 10% is levied on profits after tax if the company's rate of return exceeds 20%. The basis for calculating rate of return has not been defined.
2. An Export Processing Zone Appraisal Committee was established in 2000. A company in the manufacturing category may submit an application, in the prescribed manner, for the Minister's approval for its business premises to be declared an Export Processing Zone and for its products to be declared export products.
3. Priority industries have not been defined.

Corporate residence
A corporate entity is considered a resident for tax purposes in Malawi if it has a permanent establishment (PE) in Malawi. There have been no recent changes to this legislation.

Definition of a permanent establishment
The Taxation Act defines a PE as “an office or other fixed place of business through which business activity is carried on.”

This short definition is wide in scope. Care must be exercised when considering this definition in situations that may be affected by a double tax agreement. Each agreement contains a specific and far more detailed definition of what constitutes a PE.

Other taxes
Miners pay resource rent tax of 10% on after tax profits if the rate of return exceeds 20%.

Non-resident tax is payable on income due to a non-resident at the rate of 15% of the gross income.

Notes

1. The income of these trusts is aggregated with that of the beneficiaries and taxed at the personal tax rates.
2. Clubs formed or operated for pleasure or recreation are taxed at the rate applicable to locally incorporated companies on 6.25% of their total receipts from sales of goods, cinematography, performances, stage plays, and gambling machines.
3. Dividend withholding tax (WHT) is a final tax. The dividend is not included in the taxpayer's taxable income, and the WHT is not deducted from the taxpayer's tax liability.
4. Taxable income is determined by deducting from assessable income expenses that are not expenses of a capital nature and are incurred wholly, exclusively, and necessarily in the production of the income or for the purposes of the trade.
5. The fringe benefits tax expense is borne by the employer and is not a tax-deductible expense for the employer.

Branch income

There is a 35% tax on taxable income of a branch of a foreign company. Locally incorporated companies pay tax at the rate of 30%.

No dividend WHT is applicable on repatriation of profits.

Income determination

Inventory valuation
Inventory is stated at cost.

Capital gains
The tax basis for capital gains is the cost of the asset adjusted by the applicable consumer price index (inflation index). Once determined, the taxable gain is subjected to corporate tax at the rate applicable to the particular entity.

Inter-company dividends
A 10% WHT is applicable on the declaration of an inter-company dividend.

Foreign income
Generally, income whose source is not Malawi is not taxable in Malawi (see Income deemed to arise in Malawi).

Stock dividends
The conversion of shares into stock has been prohibited in Malawi since the 1984 Company's Act.

Assessable and taxable income
Section 11 of the Taxation Act defines income as the total amount in cash or otherwise including any capital gain received by or accrued to or in favour of the person in any year or period of assessment from a source within or deemed to be within Malawi. The taxpayer's assessable income excludes any amount exempt from tax under this act.
Malawi

Taxable income is calculated by deducting allowable items from assessable income. Section 28 of the Taxation Act defines tax-allowable deductions as any expenditures and losses (not being of a capital nature) wholly, exclusively, and necessarily incurred by the taxpayer for the purpose of his trade or in the production of income.

Income deemed to arise in Malawi
The liability for Malawi tax is based on the source of the income rather than residence of the person. Certain transactions may be deemed to be from a source within Malawi even if effected outside Malawi. Section 27 of the Taxation Act limits the income that may be deemed to have arisen in Malawi to the following:

- Remuneration for services rendered or work performed in Malawi;
- Pensions or annuities arising from services rendered or work performed in Malawi;
- Pensions or annuities arising from services rendered outside Malawi to the government, a local authority, or a statutory corporation where the person is resident outside Malawi solely for the purpose of rendering those services;
- Remuneration for services rendered or work performed in or out of Malawi where the amount may be claimed as a tax-deductible expense by a PE in Malawi;
- Pensions payable to pensioners of the government of the former Federation of Rhodesia and Nyasaland (reference should be made to the Twelfth Schedule of the Taxation Act for definitions of which pensioners are affected);
- Interest paid by the government to a member of its permanent pensionable staff for a loss of career or concomitant expense;
- Amounts incurred, claimed, or claimable in connection with a PE in Malawi;
- Realised exchange gains and losses arising in connection with a PE in Malawi or foreign exchange assets and liabilities held in Malawi; and
- Capital gains and losses realised with respect to tangible property located in Malawi and interests in companies incorporated in Malawi.

Tax-exempt income
The following are common examples of tax exempt income:

- The income of agricultural, mining, and commercial institutions or societies not operating for private pecuniary profit or gain of the members;
- The income of clubs, societies, and associations formed, organised, and operated solely or principally for social welfare or civic improvement or other similar purpose provided that the income of such bodies may not be divided among or used for the benefit of the members or shareholders;
- The income of ecclesiastical, charitable, and educational institutions of a public character and trusts of a public character;
- War disability or war widows’ pensions;
- Interest up to MWK 10,000 received by or accrued to or in favour of an individual;
- Capital gains arising from the disposal of personal and domestic assets not used in connection with trade;
- Capital gains arising on the transfer of assets between spouses, former spouses, to a spouse from the estate of a deceased spouse, and to a child from the estate of a deceased parent;
- A capital gain arising from the disposal of a taxpayer’s principal residence;
- Capital gains arising from the sale of shares traded on the Malawi Stock Exchange where they have been held for at least one year;
- Redundancy pay of up to MWK 50,000, excluding notice pay or commutation of leave;
Malawi

- Contract gratuity of up to MWK 40,000 with prior approval from the Commissioner General; and
- Dividends, however they are subject to a 10% dividend WHT, which is a final tax. (Although the word “final” has not been defined, it is applied as meaning that dividend WHT suffered may not be offset against an income tax liability.)

**Domestic consumption, gifts, and sales below market value**

The value of trading stock taken by the taxpayer for private or domestic consumption is determined as follows:

- In the case of non-farming stock, the value is equal to the cost price to the taxpayer or the market selling value at the time the stock was taken, whichever the taxpayer elects.
- In the case of farming stock, the value is the amount the Commissioner General accepts to be fair and reasonable at the time the stock was taken.
- If a taxpayer disposes by sale, gift, or otherwise of property being trading stock, standing, or growing crops or trees that have been planted and tended for the purpose of sale and: (a) the property constitutes or constituted the whole or part of the assets of a business which is or was carried on by the taxpayer; and (b) the disposal was not in the ordinary course of carrying on that business, then the value of that property is the market selling value at the date of disposal. The purchaser of that property is deemed to have acquired it at this market selling value.

**Commissioner General’s power to increase taxable income**

The Commissioner General is empowered to increase the taxable income and liability of a taxpayer where he is of the opinion that the main purpose or one of the main purposes of a transaction was the avoidance or reduction of tax or where the main benefit that might have been expected to accrue from a transaction was the avoidance or reduction of tax.

**Farming operations**

Farming operations receive a 100% allowance with respect to expenditures incurred during any year of assessment on:

- Stumping, leveling, and clearing of land;
- Work in connection with the prevention of soil erosion;
- Boreholes;
- Wells;
- Aerial and geophysical surveys;
- Water control work, including any canal, channel, dyke, furrow, and any flood control structure, whether or not of a permanent nature; and
- Water conservation work, meaning any reservoir, water dam, or embankment constructed for the impounding of water. In the case of water conservation work, the Taxation Act limits the amount deductible to amounts actually paid, where the farmer incurs a liability in terms of any law relating to natural resources.

Where a farmer derives taxable income from growing timber, the farmer may elect that the taxable income is determined in accordance with the following rules:

- Carry forward the cost of planting the timber until the timber reaches maturity.
- Add annually to the cost of planting the timber an amount calculated as 5% of the cost of planting the timber until the timber reaches maturity.
Malawi

- When the timber is sold, a proportionate amount of the total of (a) and (b) is deducted from the proceeds.
- In each year of assessment, the amount calculated under (b) above is treated as taxable income in the hands of the farmer.

A farmer may not claim as a deductible any expenditures that have been recovered through a subsidy or as capital allowances any assets where the expenditures have been recovered through a subsidy.

**Mining operations**

Mining operations receive a 100% allowance with respect to mining expenditures incurred during any year of assessment. Mining expenditures are defined as capital expenditures incurred in Malawi by a person carrying on or about to carry on mining operations in Malawi:

- In searching for or in discovering and testing or in winning access to deposits of minerals.
- In the acquisition of or of rights in or over such deposits, other than the acquisition from a person who has carried on mining operations in relation to such deposits.
- In the provision of plant and machinery and industrial buildings that would have little or no value to such person if the mine ceased to work.
- On the construction of any buildings or works that would have little or no value if the mine ceased to be worked.
- On development, general administration and management prior to the commencement of mining operations.

Persons engaged in mining operations are not entitled to claim the export tax allowance on non-traditional exports or the 25% transport tax allowance on international transport costs for non-traditional exports.

**Other special trades and cases**

The Taxation Act contains provisions specific to cooperative agricultural societies, consumer cooperative societies, non-life insurance business, and hire purchase or other agreements providing for postponement of ownership and approval of pension or provident funds. The detail of these provisions has not been included there.

**Pre-operating expenditures**

A manufacturer may claim as a deduction any expenditure incurred in the course of establishing the business provided that the following are true:

- The expenditure was incurred not more than 18 months before commencing business.
- The expenditure would have been allowed as a deduction if it had been incurred after commencing business.

**Capital gains and losses**

A capital gain or loss is calculated as the difference between the disposal proceeds of an asset and its adjusted cost. Capital gains are included in income and taxed at the rate applicable to the taxpayer. The determination of adjusted cost depends on whether capital allowances have previously been claimed in respect of the asset.
Asset on which capital allowances have been claimed
The adjusted cost is the tax written-down value of the asset. The whole of the excess of disposal proceeds over tax written-down value is treated as taxable income. There is no limitation to the recoupment of allowances previously claimed.

Asset on which no capital allowances have been claimed
An asset on which no capital allowances have been claimed is termed a “qualifying asset”.

The cost of the asset is adjusted by using the consumer price indices at the date of the disposal of the asset and applicable to the year in which the purchase or the construction of the asset was effected or completed, or the 1992 index where a 1992 valuation was registered. Adjustment by reference to the consumer price indices is the legal requirement.

Rollover relief
If a business asset is sold and the taxpayer acquires a qualifying replacement asset, the taxpayer may claim rollover relief. This means that the taxpayer does not immediately pay the tax on the gain. Instead, the cost of the replacement asset is reduced by the amount of the gain. The taxpayer must declare this in the tax return.

A qualifying replacement asset is an asset similar to, or related in service or use to, the asset disposed of. The replacement asset must be acquired within 18 months of the disposal giving rise to the gain.

Transactions exempt from tax on capital gains
No capital gain or loss is to be determined with respect to the following:

- The disposal of a taxpayer’s principal residence.
- Qualifying involuntary conversion of an asset or property (excluding motor vehicles) if the gain has been used to acquire a qualifying replacement asset similar to or related in service to the asset so disposed. (In such cases, any taxable gain is restricted to the excess, if any, of the proceeds of involuntary conversion over the cost of the replacement asset. The replacement asset must be acquired within two years of the year of assessment in which the gain is realised.)
- Dealings in a company’s equity shares following a qualified reorganisation. (Such a reorganisation must be pursuant to a written plan undertaken for valid business purposes and not have as its purpose tax avoidance by any person who is a party to the reorganisation. While advance approval of the plan by Malawi Revenue Authority is not required by the legislation, taxpayers may wish to obtain written confirmation from Malawi Revenue Authority that the plan is tax exempt in order to avoid potential misunderstandings and disputes.
- The disposal of personal and domestic assets not used in connection with trade.
- Dealings in shares quoted on the Malawi Stock Exchange provided that the shares have been held for more than one year.
- Transfers of capital assets between spouses, or former spouses, to a spouse from the estate of a deceased spouse, and to children from the estate of a deceased parent.

Notes on capital allowances
On disposal, assets are subject to balancing charges (capital gains) or balancing allowances (capital losses).
Malawi

If an asset is subject to extensive use, such as machinery working double shifts, so that its expected economic life is reduced, the commissioner general may agree to increase the rates of annual allowances.

1. The 100% investment allowance is available only on new and unused qualifying assets belonging to and used by a manufacturer or farmer. The rate for used qualifying assets is 40%. The investment allowance is claimable only in the first year of use.
2. Where an investment allowance is claimed, the initial allowance is not allowed on the same asset. The initial allowance is claimable when an expenditure is incurred.
3. Annual allowances at the above rates are on cost less investment/initial and annual allowances previously claimed. Assets qualifying for the 100% investment allowance are not eligible for the annual allowance.
4. Investment allowance on plant and machinery excludes motor vehicles intended or adapted for use on roads.
5. A 20% annual allowance is standard, but the Commissioner General may vary the amount.
6. No initial allowance is granted on private passenger motor vehicles. These include saloons, sedans, station wagons, and double cabin pickups. However, the restriction does not apply where the motor vehicle is used for hiring purposes.
7. The allowances for computer equipment are claimed on a straight-line basis. In a budget speech, the Minister of Finance announced that the annual allowance on computer equipment would be increased from 20% to 40%. The procedures for implementing this have not yet been followed. However, Malawi Revenue Authority has accepted computations claiming a 40% allowance. Taxpayers claiming a 40% allowance may wish to obtain written confirmation from Malawi Revenue Authority to prevent potential disputes.
8. The building must be newly constructed at a cost of no less than MWK 100,000,000.

**Foreign exchange gains and losses**

Foreign exchange gains realised on foreign currency assets or liabilities are taxable.

Foreign exchange losses realised on foreign currency assets or liabilities are tax deductible.

Unrealised gains and losses are carried forward until realised and then included in income or allowable expenditure. The maintenance of records that accurately track unrealised exchange rate adjustments from year to year is necessary to ensure correct tax computations. This, however, can prove difficult for some taxpayers.

**Export allowances**

Exporters, including those manufacturing in bond, are entitled to claim additional tax allowances for nontraditional exports:

a. On the export of nontraditional products, there is a 12% tax allowance. From the introduction of the allowance in 1988 until recently, Malawi Revenue Authority accepted that the allowance was calculated as 12% of export sales. It now states that the calculation is to be 12% of net profit derived from export sales. Malawi Revenue Authority also has recently stated that the export incentive allowances are not claimable when the taxpayer is in a tax loss situation. This is subject to dispute.
b. There is a 25% transport tax allowance on international transport costs for nontraditional exports. Traditional exports are tea, coffee, cane sugar, and unmanufactured tobacco and tobacco refuse. Export allowances may not be claimed in respect of exports from mining operations.

**Lease, patent, trademark, and copyright premium**

The tax-deductible amount of a premium paid for the right of use or occupation of land or buildings, plant or machinery, patent design, trademark, copyright, or any other property of a similar nature is one of the following:

- The amount of premium or consideration divided by the number of years for which the right of occupation or use is granted
- Where the period for which the right of occupation or use is granted exceeds 25 years, the deduction is one-twenty-fifth of the premium or consideration

The premium is tax deductible only where the asset or right with respect to which the premium or consideration is paid is used for the generation of income. If a taxpayer acquires ownership of the asset or right, no further deduction of the premium or consideration is allowed from the date ownership is acquired.

**Pension contributions**

The tax-allowable amount of ordinary pension contributions made by an employer to an approved pension fund is subject to limitations. The limit with respect to each employee is the lowest of one of the following:

- The actual contribution;
- 24% of the employee's compensation; or
- MWK 9,000 per annum.

No allowance is available if an employee is entitled to a tax-free gratuity. Employees, self-employed individuals, and nonemployed individuals may not claim tax relief on pension contributions. Tax relief on such individuals is available only to an employer.

**Training costs**

Taxpayers training a Malawi citizen to obtain a degree, diploma, or other certificate receive an additional allowance equal to 50% of the actual costs incurred.

**Donations**

Donations to approved charities and approved nonprofit institutions formed for the purpose of social welfare, civic improvement, educational development, or other similar purposes are allowable for tax. The minimum individual donation allowable is MWK 500. The minimum donation for other approved charities is MWK 250. In both cases, there is no maximum donation.

**Controlled foreign companies**

There is no controlled foreign company regime in Malawi.

**Deductions**

**Depreciation and depletion**

Depreciation allowances (capital allowances) applicable as stipulated in the Taxation Act at various rates:
Capital allowances, which are available to companies and individuals in business, are:

<table>

</tbody>
</table>

**Note**

1. The 100% investment allowance is available only on new and unused qualifying assets as indicated above, belonging to and used by a manufacturer or farmer. The rate for used qualifying assets is 40%. The investment allowance is claimable only in the first year of use. Prior to the 2008 tax year, the rates were 40% and 20%, respectively.
2. Where an investment allowance is claimed, the initial allowance is not allowed to be claimed on the same asset. The initial allowance is claimable only in the first year of use.
3. Annual allowances at the above rates are based on cost less investment and initial and annual allowances previously granted. Assets qualifying for 100% investment allowance are not eligible for annual allowance.
4. Investment allowance on plant and machinery excludes motor vehicles intended or adapted for use on roads.
5. A 20% annual allowance is standard, but the Commissioner General may vary the amount.
6. No initial allowance is granted on private motor vehicles. These include saloons, sedans, station wagons, and double cabin pickups. However, the restriction does not apply where the motor vehicle is used for hiring purposes.
7. This allowance was introduced in the 2005-2006 tax year. The building must be newly constructed at a cost of no less than MWK 100,000,000.

On disposal, assets are subject to balancing charges (capital gains) or balancing allowances.

**Net operating losses**

Current taxable income may be offset against net operating losses brought forward and current operating losses may be increased by net unexhausted trading losses brought forward. Manufacturers and taxpayers in the agricultural industry may carry losses forward indefinitely, while other taxpayers may carry losses forward for only six years. Net operating losses may not be carried back.

**Payments to foreign affiliates**

A deduction for payments to foreign affiliates if such payments are expended wholly, exclusively, and necessarily for the production of income or for the purposes of trade, and it can be demonstrated that the transaction is at arm's length.

**Research and development**

Research expenditures are fully allowable as a deduction if it is “experiments and research relating to trade”.

**Allowable deductions**

For corporate tax purposes, an expense is allowable if it is not of a capital nature and incurred wholly, exclusively, and necessarily for the production of income or for the purposes of trade.
**Group taxation**

Group taxation is not permitted.

**Tax incentives**

There is a 100% investment allowance on plant and machinery and industrial buildings for taxpayers in the manufacturing industry.

There is a 100% capital allowance on mining expenditures in the first year of assessment.

There is a 100% allowance on farming expenditures, which includes expenditures which would ordinarily be capital in nature and not allowable as a deduction in determining taxable income.

**Tax administration**

**Returns**

Income tax returns are due within 180 days after the end of the financial year.

**Payment of tax**

Tax is payable in two instalments at 30 November and 30 January, with the balance of the tax being paid on 30 April.
**Corporate taxes in Malaysia**

**Significant developments**

Real property gains tax, which was not applicable on disposals of properties on or after 1 April 2007, is reimposed on gains from disposals of properties from 1 January 2010 at the rate of 5% on gains arising from disposals of chargeable assets in respect of real properties that are disposed within five years of their acquisition.

**Taxes on corporate income**

**Income tax**

For both resident and non-resident companies, the income tax is imposed on income accruing in or derived from Malaysia at a flat rate of 25% for the year of assessment (YA) 2010. As a concessionary treatment for resident companies with paid-up capital from ordinary shares of MYR 2.5 million or less, the rate of tax is 20% on the first MYR 500,000 of chargeable income, and 25% on any income in excess of MYR 500,000 (for YA 2010). However, with effect from YA 2009, if a company meets the above capital requirement, but controls or is being controlled directly or indirectly by another company which has a paid-up capital of more than MYR 2.5 million in respect of ordinary shares, it will not be eligible for the concessionary tax rate.

Assessment of income is on a current-year basis. A company is taxed on income from all sources (whether business or non-business) arising in its financial year ending in the calendar year which coincides with that particular year of assessment. For example, a company that closes its accounts on 30 June of each year is taxed on income earned during the financial year ending on 30 June 2010 for the year of assessment 2010.

Self-assessment for companies was implemented from the year 2001. Under the self-assessment system, companies are required to submit a return of income within seven months from the date of closing of accounts. Particulars required to be specified in the return include the amount of chargeable income and tax payable by the company. An assessment is deemed to have been made on the company upon submission of the return. The return is deemed to be a notice of assessment that is deemed to be served on the company upon the date the return is submitted.

**Petroleum income tax**

Petroleum income tax is imposed at the rate of 38% on profits from petroleum operations in Malaysia. No other taxes are imposed on income from petroleum operations.
Corporate residence

A company is tax resident in Malaysia in a basis year if, at any time during the basis year, the management and control of its affairs are exercised in Malaysia. Generally, a company would be regarded as resident in Malaysia if at any time during the basis period for a year of assessment, at least one meeting of the Board of Directors is held in Malaysia concerning the management and control of the company.

Other taxes

Real property gains tax
Real property gains tax (RPGT) is charged upon gains from disposals of real properties (referred to as “chargeable assets”) situated in Malaysia, including shares of a real property company (RPC). A real property company is a controlled company that owns real property or RPC shares with a defined value of not less than 75% of its total tangible assets. However, disposals of real properties or RPC shares between 1 April 2007 and 31 December 2009 were not subject to RPGT. From 1 January 2010, RPGT is reimposed at the rate of 5% on gains arising from disposals of chargeable assets in respect of real properties that are disposed of within five years of their acquisition.

Sales tax and service tax
A single-stage ad valorem tax (sales tax) at rates ranging from 5% to 10% is imposed on all goods imported into or manufactured in Malaysia, unless specifically exempted.

Service tax is imposed at the rate of 5% on the value of taxable services sold or provided by taxable persons. A list of “taxable persons” and “taxable goods” is found in the Service Tax Regulations, 1975.

Goods and services tax
The GST Bill 2009 was tabled in Parliament for a first reading on 16 December 2009. The second and subsequent readings of the Bill were scheduled for March 2010. However, the tabling of the Bill for a second reading has been delayed to a date yet to be announced. The Goods and Services Tax (GST) of 4% was originally expected to be implemented in mid 2011. The reason reported for the delay in tabling the Bill was to allow the government more time to engage with the public in order to gather feedback on the implementation of the GST. Nevertheless, the introduction of the GST is included in the New Economic Model unveiled by the Prime Minister on 30 March 2010, as a key component of fiscal reforms aimed at transforming Malaysia into a high income nation.

GST, when implemented, will replace the sales tax and services tax currently imposed and collected under the Sales Tax Act 1972 and the Services Tax Act 1975. Companies with revenue below a certain threshold (to be gazetted separately, and expected to be MYR 500,000) are exempted from imposing GST.

Windfall profit levy
A levy is imposed on crude palm oil and crude palm kernel oil at a maximum of MYR 50 per ton where the price exceeds MYR 2,000 per ton. From 10 March 2009, the threshold has been increased to MYR 2,500 per ton in Peninsula Malaysia, and MYR 3,000 per ton in the states of Sabah and Sarawak.
Malaysia

**Contract levy**
A levy of 0.125% on contract works having a contract sum above MYR 500,000 is imposed on every registered contractor by the Construction Industry Development Board (CIDB).

**Human resource development (HRD) levy**
Employers engaged in the manufacturing and services sectors that employ more than a specified number of employees must contribute to the Human Resource Development Fund (HRDF). The levy required to be paid is at the rate of 1% of the employees’ monthly wages on a monthly basis. From 1 April 2009, all employers who contribute to the HRDF, except those in the textile industry and the electronics and electrical industry, will make levy payments at the reduced rate of 0.5% until March 2011. Employers in the textile industry and electronics and electrical industry were exempted from payment of the HRD levy for six months from February 2009, and will make payments at the rate of 0.5% from August 2009 until March 2011.

**Branch income**
Tax rates on branch profits of a company are the same as those on corporate profits. No tax is withheld on transfer of profits to a foreign head office.

**Income determination**

**Inventory valuation**
Inventories are generally stated at the lower of cost or net realisable value. Cost for this purpose may be determined by using one of several possible bases, such as unit cost, average cost or the first-in, first-out (FIFO) method, as long as the basis used is consistent from one year to another.

**Capital gains**
Generally, gains on capital assets are not subject to tax, except for gains arising from the disposal of real properties. Gains arising from the disposal of real property (which include the disposal of shares in a real-property company) situated in Malaysia is subject to RPGT *(see Other taxes)*, but for disposals of real properties or RPC shares between 1 April 2007 and 31 December 2009, RPGT was not applicable. From 1 January 2010, RPGT is reimposed at the rate of 5% on chargeable gain arising from disposals of properties which are sold within five years of acquisition.

**Inter-company dividends**
A single-tier system of taxation came into force on 1 January 2008 which replaced the previous full imputation system. There is a six-year transitional period (until 31 December 2013) for all companies to migrate into the single-tier system.

Under the previous (full-imputation) system, dividends received from Malaysian companies are taxed at gross in the hands of shareholders (whether corporate or individuals). Companies distributing dividends are required to deduct tax at source at the prevailing corporate tax rate, from gross dividends payable, but the income tax deducted or deemed deducted from the dividends is available as a credit (deducted) against the income tax liability of the shareholder. If a dividend is paid by a company which was subjected to tax at the rate of 20% *(see Taxes on corporate income)*, tax is to be deducted or is deemed to be deducted from the dividend at the normal corporate tax rate (25% for YA 2010).
Under the single-tier tax system, dividends are exempt in the hands of shareholders. Companies are not required to deduct tax from dividends paid to shareholders, and no tax credits will be available for offset against the recipient’s tax liability. Corporate shareholders receiving exempt one-tier dividends can, in turn, distribute such dividends to their own shareholders who are also exempt on such receipts.

**Foreign income**
Under the Income Tax Act, 1967 (ITA) a Malaysian tax-resident corporation and a unit trust are not taxed on their foreign-sourced income, regardless of whether such income is received in Malaysia. However, income of a resident company from the businesses of banking, insurance and air or sea transport is assessable on a global basis, except for income attributable to a Labuan business activity of the branch or subsidiary of a Malaysian bank in Labuan which is subject to tax under the legislation applicable to Labuan entities in Labuan (Labuan Business Activity Tax Act 1990). From YA 2008, a Labuan entity may also make an irrevocable election to be taxed under the ITA in respect of its Labuan business activity.

In respect of Malaysian-owned banks, insurance companies and takaful (Islamic insurance) companies, the profits of newly established branches overseas or remittances of new overseas subsidiaries are tax exempt for five years, provided that the applications to establish overseas branches or subsidiaries are received by the Central Bank of Malaysia no later than 31 December 2015.

Relief from double taxation is available by means of a bilateral credit if there is a governing tax treaty or unilateral relief where there is no treaty. The relief is restricted to the lower of Malaysian tax payable or foreign tax paid if there is a treaty, or one-half of the foreign tax paid if there is no treaty.

Undistributed income of foreign subsidiaries is not taxable.

**Stock dividends**
A Malaysian corporation may distribute bonus shares tax-free to shareholders.

**Deductions**

**Depreciation and depletion**
Tax depreciation (called capital allowance) on machinery, equipment, and industrial buildings is available at specific rates for all types of businesses. Locally acquired machinery and equipment qualify for an initial allowance of 20%, while imported heavy machinery (used in building and construction, mines, plantation, and timber industries) qualifies for 10% when the expenditure is incurred and the asset is in use. An annual allowance ranging from 10% to 20% is calculated on cost for every year during which the asset is in use for the purposes of the business. An accelerated capital allowance (ACA) is available for certain types of plant and machinery, such as computers, information technology equipment, environmental protection equipment, waste recycling equipment, and plant and machinery used in the business of plantation companies. Small-value assets costing less than MYR 1,000 each are entitled to 100% capital allowance, subject to a maximum total cost of MYR 10,000. Under the Economic Stimulus Package presented on 10 March 2009, qualifying expenditure on plant and machinery incurred from 10 March 2009 to 31 December 2010 is given ACA, which allows the cost to be fully claimed within two years. This allowance was made
Malaysia

to encourage businesses to continue investing in plant and machinery. The incentive is available from YA 2009.

Depreciation recapture on the sale of plant is taxable as ordinary income. Tax depreciation is not required to conform to book depreciation.

A depletion allowance is available on natural-resource properties.

**Net operating losses**
Up to YA 2005, the carryforward of business losses and capital allowances is unlimited in time. From YA 2006, the law has been amended so that the carryforward of business losses and capital allowances would not be available for deduction in subsequent years of assessment if the company does not meet the conditions of a shareholders’ continuity test. However, a recent guideline issued by the Ministry of Finance states that the rule restricting the carryforward of losses and capital allowances based on the shareholder continuity test would apply only to dormant companies.

Current-year business losses may be utilised against all sources of income. Set-off of unutilised carried-forward losses is restricted to income from business sources only. Utilisation of tax depreciation is also restricted to income from the same underlying business source. There is hitherto no provision for loss or tax depreciation carryback to previous tax years. However, under the Stimulus Package presented in Parliament on 10 March 2009, a taxpayer (including a company) may make an irrevocable election for the current-year loss for YA 2009 or YA 2010 to be carried back for set-off against income of the immediately preceding year, up to a maximum loss of MYR 100,000.

**Payments to foreign affiliates**
A Malaysian corporation can claim a deduction for royalties, management service fees, and interest charges paid to affiliates, provided that these are made at arm’s length (i.e., the amounts it would pay if it was dealing with an unrelated entity).

To enhance transparency of tax treatment relating to transfer pricing and thin capitalisation cases, a new provision was introduced, effective 1 January 2009, which empowers the Director General of Inland Revenue (DGIR) to make adjustments on transactions of goods and services if the DGIR is of the opinion that the transactions were not entered into on an arm’s-length basis. With regard to thin capitalisation, the portion of the interest charge that relates to the amount of financial assistance which is excessive will be disallowed a deduction. This would cover related-party transactions within a domestic group of companies. However, the specific rules to be made under this provision have yet to be issued.

**Taxes**
Taxes on income are generally not deductible, whereas indirect taxes, such as sales tax and service tax, are deductible.

**Group taxation**
From YA 2006, group relief is available to locally incorporated, resident companies. A company that qualifies may surrender a maximum of 70% (with effect from YA 2009) of its adjusted loss for a year of assessment to one or more related companies, if the following conditions are met:
1. Both the claimant and surrendering companies must each have paid-up capital of ordinary shares exceeding MYR 2.5 million at the beginning of the basis period for that particular year of assessment, and must have the same (12-month) accounting period.

2. The companies must be “related” throughout the period that forms the basis period for a particular year of assessment as well as the 12 months preceding that basis period. “Related company” is defined by law and involves the application of a two-tier test. The first test relates to the proportion of one company’s ownership in the ordinary share capital of the other company (at least 70%), or at least 70% ownership of the surrendering and claimant companies’ shares by a third company. The other test is based on the proportion of distributable profits and assets on winding up to which the holding company is entitled (at least 70%).

Companies that wish to avail themselves of group relief must make an irrevocable election to surrender or claim the tax loss in the return to be filed with the Inland Revenue Board for that year of assessment.

**Tax incentives**

**Inward investment**

**Pioneer status (PS)**

Corporations in the manufacturing, agricultural, hotel and tourism sectors, or any other industrial or commercial sector that participate in a promoted activity or produce a promoted product, may be eligible for PS. This incentive is given by way of exemption from income tax on 70% of the annual profits for five years. The remaining 30% of the profits is taxed at the prevailing corporate income tax rate. The profits exempted from tax are available for distribution as tax-free dividends.

In the following cases, the general rule of tax exemption and period of incentive is varied:

a. Corporations undertaking a project of national and strategic importance involving heavy capital investment and high technology will be granted full exemption on its profits. The tax-relief period may be extended for a further five years. Projects recognised to be of national and strategic importance include forest plantation activities, projects with Multimedia Super Corridor (MSC) status, and production of electronic wafers.

b. High-technology companies engaging in a promoted activity or in the production of a promoted product in areas of new and emerging technologies, as well as companies participating in an industrial linkage programme (only in respect of applications received before 31 December 2010), may be granted PS, which entitles them to full exemption on profits for a period of five years.

c. Corporations with projects eligible for PS that are located in the eastern corridor states of Peninsular Malaysia, Sabah, and Sarawak will be granted exemption on 85% of their profits for five years. However, for applications made on or after 13 September 2003, the incentive is enhanced to an abatement of 100% for a period of five years. An existing pioneer or ex-pioneer corporation that undertakes an expansion programme through a subsidiary or controlled company in the eastern corridor states of Peninsular Malaysia, Sabah, Sarawak and Labuan, and the state of Perlis (with effect from 2 September 2006) that involves the same promoted activities or promoted products is eligible for a second round of PS or investment...
Malaysia

tax allowances if certain conditions are satisfied. The eastern corridor states include Kelantan, Trengganu, and Pahang, and the district of Mersing in Johor.

d. Existing locally owned companies reinvesting in production of heavy machinery, machinery and equipment are to be granted exemption on 70% of the increased statutory income arising from reinvestment for five years.

e. New and existing companies utilising oil palm biomass and reinvesting to produce value-added products are to be entitled to full exemption on profits for a period of 10 years.

f. Small companies that meet with specified conditions are entitled to full exemption on profits for a period of five years.

g. A second round of PS is available for hotel and tourism companies which invest in expansion, modernising and renovation, as well as for companies providing cold-chain facilities and services for perishable agricultural produce.

A company granted PS which intends to reinvest before the expiry of its PS is eligible for reinvestment allowance provided that it surrenders its pioneer status (see section on Reinvestment allowance below).

Deduction for export expenses
Resident corporations in the manufacturing, hotel, tourism, and service sectors are entitled to double deduction for expenditure incurred on the promotion of exports, such as overseas advertising, free samples, export market research, participation in trade exhibitions, preparation of tenders, travel, participation in virtual trade shows, participation in trade portals for promotion of local products, and maintenance of overseas sales offices and warehouses. For promotion of export of services, expenses such as feasibility studies for overseas tender projects, participation in a trade or industrial exhibition in Malaysia or overseas, airfares, and sustenance are entitled to double deduction. Expenses incurred by pioneer companies are aggregated and setoff against post-pioneer (taxable) profits.

Capital investment
Incentives for capital investment are as follows:

a. Investment tax allowance (ITA)
A corporation may be granted an ITA of 60% of capital expenditure incurred on a factory or plant and machinery used for purposes of an approved manufacturing, agricultural, hotel, tourist, knowledge-intensive or other industrial or commercial activity (other than one granted PS). ITA is granted on capital expenditure incurred for a period of five years. For an integrated agricultural activity, ITA may be granted for both the agricultural and the processing activities for five years each.

The amount of ITA to be utilised for each year of assessment is restricted to a maximum of 70% of the profits, while the balance of 30% of the profits is taxed at the prevailing corporate income tax rate. Unutilised allowances may be carried forward indefinitely for set-off against future profits of the business. Dividends paid out of exempt profits are exempt from tax in the hands of shareholders.

The ITA incentive is enhanced for the following types of projects:

- A corporation undertaking a project of national and strategic importance may be granted ITA at a rate of 100% and would be able to utilise the amount of ITA granted for set-off against 100% of profits each year, without restriction.
• A high-technology company or a company participating in a promoted activity or producing a promoted product in an industrial linkage programme may be granted ITA at the rate of 60%, and the amount of ITA would be available for set-off against 100% of profits. This incentive is an alternative to PS (effective only for applications received before 31 December 2010). *(See Pioneer status (b) under Inward investment.)*

• A company granted ITA in respect of a project located in the eastern corridor states of Peninsular Malaysia, Sabah, Sarawak, and Labuan, and the state of Perlis (with effect from 2 September 2006), would be granted ITA at a rate of 80%, and the amount of ITA that could be utilised for each year would be restricted to a maximum of 85% of the profits. However, for applications made on or after 13 September 2003, the incentive is increased to a rate of 100%, and the amount of allowance can be setoff against 100% of its profits for each year. An existing ITA or ex-ITA company that undertakes an expansion programme through a subsidiary or controlled company in the eastern corridor states of Peninsular Malaysia, Sabah, Sarawak, and Labuan involving the same promoted activities or promoted products is eligible for a second round of ITA or pioneer status if certain conditions are satisfied.

• A company that provides technical and vocational training or science courses in biotechnology, medical and health, molecular biology, material sciences and food sciences in Malaysia may be granted ITA of 100% of qualifying capital expenditure incurred within a period of 10 years, and the maximum amount of ITA that could be utilised each year would be restricted to 70% of profits.

• Existing locally owned companies reinvesting in production of heavy machinery, machinery, and equipment are granted ITA at the rate of 60% on additional qualifying expenditure incurred for a period of five years.

• New and existing companies utilising oil palm biomass to produce value-added products that reinvest are granted ITA at a rate of 100%, and would be able to utilise the amount of ITA granted for set-off against 100% of profits each year, without restriction.

• A second round of ITA is available for hotel and tourism companies which invest in expansion, modernising and renovation, as well as companies providing cold-chain facilities and services for perishable agricultural produce.

• Companies upgrading an existing testing laboratory for testing medical devices, may be granted ITA of 60% on qualifying expenditure incurred within a period of five years to be off-set against 100% of profit for each year of assessment.

b. Reinvestment allowance

A corporation that embarks on a programme to expand, modernise, automate, or diversify its existing manufacturing or processing business is entitled to a reinvestment allowance. The amount of reinvestment allowance is 60% of qualifying capital expenditure incurred within a period of 15 years on a factory or plant and used for expansion, modernisation, automation, or diversification activity. The reinvestment allowance will be withdrawn if the asset for which the reinvestment allowance is granted is disposed of within five years. The amount of reinvestment allowance that can be utilised each year is limited to 70% of profits after deduction of capital allowances. The remaining 30% is taxed at the normal corporate income tax rate. Unutilised reinvestment allowances may be carried forward indefinitely for set-off against future profits of the business. The 70% restriction does not apply to projects that achieved the level of productivity as prescribed by the Minister of Finance and to projects located in the eastern corridor.
states of Peninsular Malaysia, Sabah, Sarawak, and Labuan, and the state of Perlis (with effect from 2 September 2006). A reinvestment allowance is also extended to:

- A tax-resident company undertaking an approved agricultural project that incurs qualifying capital expenditure for the purposes of expanding, modernising, or diversifying its cultivation and farm businesses
- Those who rear chickens and ducks and who reinvest to transform the chicken/duck-rearing business from an open-house to a closed-house system (verified by the Minister of Agriculture), or those who reinvest to expand the closed-house system in existing or new locations approved by the Ministry of Agriculture (available until 2010 only)

Dividends paid out of exempt profits are not taxable in the hands of shareholders.

**Venture capital company**
A company investing in approved venture companies in the form of start-up or seed capital is given a deduction equivalent to the value of the investment. To qualify for the deduction, the investment must not be in a company that is listed on a stock exchange, and it should not be in a company related to the investing company at the point of first investment. Alternatively, tax exemption for 10 years on income from all sources, other than interest income from savings or fixed deposits, is available if at least 50% of its funds are invested in venture companies (reduced to 30% in respect of applications received by the Securities Commission from 30 August 2008 to 31 December 2013).

**Other incentives**

**Operational headquarters company (OHQ)**
An OHQ company that provides qualifying services to its offices and related companies may be granted approved OHQ status.

The income (business income, interest, and royalties) derived by an approved OHQ from the provision of qualifying services is exempt from income tax for a period of 10 years. This includes income from services provided to related companies in Malaysia, provided such income does not exceed 20% of the OHQ income. Dividends distributed from exempt income are exempt in the hands of shareholders. Expatriates working in an OHQ are taxed only on the portion of chargeable income attributable to the number of days they are in Malaysia. An OHQ is also granted special facilities, including the following:

- Approvals for expatriate posts are based on the requirements of the OHQ.
- Credit facilities in foreign currency can be obtained from licensed commercial banks in Malaysia, without approval of the Central Bank of Malaysia.
- There is no restriction on investments in foreign securities and lending to related companies outside Malaysia.
- A single or foreign currency account may be opened with licensed commercial banks in Malaysia or offshore banks in Labuan.

**International procurement centre (IPC)**
An IPC is a company incorporated in Malaysia, whether local or foreign owned, that is engaged in the procurement and sale of raw materials, components, and finished products to its group companies in Malaysia or abroad.
Malaysia

Tax incentives include:

- Exemption for 10 years on income from qualifying activities in respect of export sales after deduction of tax-depreciation allowance (subject to conditions).
- Dividends paid from exempt income are exempt from tax in the hands of shareholders.
- Goods brought into free zones, bonded warehouses, or licensed manufacturing warehouses for repackaging or cargo consolidation and integration before distribution to final consumers are exempt from customs duties.

To qualify, an IPC must serve as a collection and consolidation centre for finished goods, components, and spare parts from overseas or within the country to be distributed to the dealer, importer, or its subsidiary or associated company within or outside the country.

In addition, other available non-tax incentives include:

- Approval for expatriate posts based on the requirements of the IPC.
- Ability to maintain more than one foreign currency account for the retention of export proceeds with any licensed commercial bank and without any limit on the balance in the accounts.
- Permission to enter into foreign exchange forward contracts with a licensed commercial bank to sell forward export proceeds based on projected sales.
- Exemption from foreign equity ownership restrictions.

*International trading companies*
Companies that obtained approval as “international trading companies” are exempt for five years on income equivalent to 20% of increased export value, up to a maximum of 70% of statutory income. To qualify for the incentive, the company must meet the following three conditions:

1. It must be incorporated in Malaysia, with 60% Malaysian ownership;
2. Achieve minimum annual sales of MYR 10 million, not more than 20% of which may be derived from the trading of commodities; and
3. Use local services (banking, finance, and insurance) and infrastructure (local ports and airports) in its operations.

*Regional distribution centre*
A regional distribution centre (RDC) is a collection and consolidation centre for finished goods, components and spare parts from overseas or within the country to be distributed to the dealer, importer, or its subsidiary or associated company within or outside the country. Among the activities involved are bulk breaking, repackaging, and labelling. Incentives accorded to an RDC include:

- Exemption for 10 years on income from qualifying activities in respect of export sales, after deduction of tax depreciation allowance (subject to conditions).
- Dividends paid from exempt income are exempt from tax in the hands of shareholders.
- Import duty and sales tax on goods for distribution are tax exempt.
Other non-tax incentives include:

- 100% equity holding by the promoter is allowed.
- Approval for expatriate posts based on requirement of the RDC.
- Eligibility to open one or more foreign currency accounts with any licensed commercial bank to retain their export proceeds, without any limit imposed.
- Permission to enter into foreign exchange forward contracts with any licensed commercial bank to sell forward export proceeds, based on projected sales.

**Multimedia Super Corridor status companies**

The MSC is Malaysia’s initiative for the global information technology industry and is designed to be the research and development (R&D) centre for industries based on information technology (IT). Conceptualised in 1996, the MSC has grown into a thriving information communication technology (ICT) hub, hosting multinational corporations, foreign-owned, and home-grown Malaysian companies focused on multimedia communications products, solutions services, and research and development. The Malaysian government has equipped core areas in the MSC with high-capacity global telecommunications and logistics networks. The MSC is also supported by secure cyber laws, strategic policies and a range of financial and non-financial incentives for investors.

The Multimedia Development Corporation (MDeC) was established to develop and manage the MSC. The MDeC is a fully empowered “one-stop shop” that acts as approving authority for companies applying for MSC-company status.

MSC status is awarded to both local and foreign companies that develop or use multimedia technologies to produce or enhance their products and services as well as for process development. Companies awarded MSC status are eligible for incentives which include the following:

- PS for five years (extendable up to five additional years) or investment tax allowance of 100% for five years for a new company or an existing company on its additional income.
- Eligibility for R&D grants (for majority Malaysian-owned, MSC-status companies).
- Exemption from indirect taxes on multimedia equipment.
- Unrestricted employment of local and foreign knowledge workers.
- Freedom to source funds globally for investments.
- Protection of intellectual property and cyber laws.
- No censorship of the Internet.
- MSC-status companies located within the MSC will enjoy globally competitive telecommunication tariffs and services guarantees, world-class physical and IT infrastructure, and excellent R&D facilities, including the region’s first Multimedia University.

**Biotechnology industry**

Companies undertaking biotechnology activity with approved bionexus status from Malaysian Biotechnology Corporation Sdn Bhd are eligible for 100% income tax exemption for 10 years from the first year in which the company derives profit or ITA of 100% on qualifying capital expenditures incurred for a period of five years. Dividends distributed from exempt income are tax exempt for the recipient. Double deduction is available for expenditures incurred on R&D and on promotion of exports.
The following incentives are also available:

- A company or individual investing in a bionexus company is given a tax deduction of an amount (approved by the Minister of Finance) equal to the value of investment for the purpose of financing activities at seed capital stage or early stage of a new business.
- Stamp duty and real property gains tax exemption is granted to a bionexus company undertaking a merger and acquisition with a biotechnology company within a period of five years until 31 December 2011.
- Accelerated industrial building allowance is given (over 10 years) on qualifying building expenditures for buildings used by a bionexus-status company for the sole purpose of its new business or expansion project.

Also included in the 2007 budget is a proposal to tax income from qualifying activities at the reduced tax rate of 20% for 10 years upon expiry of the tax-exempt period.

Unit trusts
Gains from the realisation of investments are not regarded as taxable income of a unit trust. Interest received by unit trusts from certain bonds and securities, as well as interest credited by banks and other financial institutions licensed under the Banking and Financial Institutions Act 1989 or the Islamic Banking Act 1983, are exempt from tax. Distributions from such gains are tax exempt to the unit holders.

Capital allowance in respect of plant and machinery used for the purpose of the letting of properties is allowed at the rate of 10% per annum against the rental income of a property unit trust.

Research and development (R&D)
Companies that provide R&D services to third parties are eligible for PS with full exemption of their profits for a period of five years. A second round of PS incentive is available for another five years. As an alternative, such companies may be granted ITA at the rate of 100% of qualifying capital expenditure incurred within a period of 10 years and a further 10 years for a second round of ITA. The ITA incentive may also be granted to companies undertaking R&D for their group.

Companies undertaking in-house R&D projects are eligible for ITA at the rate of 50% of the qualifying capital expenditure incurred within a period of 10 years.

A company that has made an investment for the sole purpose of financing a project on commercialisation of R&D findings (which must be R&D findings in the resource-based industry, wholly owned by a public research institute or public institute of higher learning in Malaysia) is given a deduction equivalent to the value of that investment.

Double deduction is granted for expenses incurred on approved research and development projects, as well as for payments made to defined R&D companies. Local universities are recognised as approved research institutes for the purposes of claims for the double-deduction incentive by companies making cash contributions or payments for the use of the services of such universities for R&D activities.

Buildings used for approved R&D activities qualify for the industrial building allowance at the normal rate.
Training
There is a double deduction for approved training expenditures incurred to train employees under an approved training programme. Manufacturing corporations with 50 or more Malaysian employees registered with the Human Resources Development Fund are not eligible for this incentive. These corporations are, however, eligible to seek financial assistance from the fund for training their employees.

Preoperating training expenses are also available as a double deduction to small- and medium-scale manufacturing companies that are not registered with the Human Resources Development Fund. The normal deduction for preoperating training expenses may also be available to certain resident companies.

Training expenses incurred by employers for employees who complete certain courses, including aircraft maintenance engineering courses and post-graduate courses in ICT, are given double deduction (for YA 2009–2012).

Approved service projects
A resident company undertaking a project in the service sector in relation to transport, communications, utilities, or other approved subsectors may elect to apply for an investment allowance or for an income tax exemption for a period of five years. The mechanisms for tax exemption and investment allowance are similar to those for PS and ITA, respectively.

For projects located in Sabah, Sarawak, and the eastern corridor states of Peninsular Malaysia, the rate of tax exemption is increased to 85% and the rate of investment allowance is increased to 80%. Service projects of national and strategic importance qualify for tax exemption of 100% for a period of 10 years or for an investment allowance of 100%.

Dividends paid out of exempt profits are exempt in the hands of shareholders.

Buildings used solely for the purposes of approved service projects qualify for an industrial building allowance.

Foreign fund management company
A foreign fund management company providing fund management services to foreign clients is taxed at a concessionary rate of 10% in respect of the income derived from the management of foreign funds, while income arising from services rendered to clients in Malaysia is taxed at the prevailing corporate tax rate. Its income after deduction of tax at 10% may be distributed as tax-exempt dividends to its shareholders.

A foreign fund management company is a Malaysian incorporated company licensed under the Securities Industry Act 1983. Its activities are regulated by the Securities Commission.

Shipping
Tax-resident corporations and individuals carrying on shipping business are exempt from tax on income derived from the operation of Malaysian ships. Dividends distributed by a company qualifying for this incentive are exempt from tax in the hands of the shareholders.
Export incentives
Partial tax exemption is granted at various rates for export-oriented companies. Manufacturing companies are eligible for exemption on profits after deduction of tax depreciation allowances on 10% (or 15%) of the value of the increase in the company's exports, provided it attains at least 30% (or 50%) value added. Companies exporting fruits and cut flowers or exporting selected services also enjoy an exemption on profits, after deduction of tax depreciation allowances, equivalent to 10% of the value of the increase in exports. Companies engaged in export of selected services are eligible for exemption on profits on 50% of the value of increased exports.

Effective from YA 2003, a Malaysian-owned manufacturing company may be granted exemption on profits, after deduction of tax depreciation allowance of an amount equal to 30% of the value of increased export value, provided it achieves a significant increase in exports. The rate is increased to 50% of the value of increased export for a company that succeeds in penetrating new markets. Full exemption on increased export value is granted if the company achieves the highest increase in export.

Resource-based industries
Malaysian companies that are engaged in the manufacture of rubber-, oil palm- and wood-based products that are of export potential, may be granted the following tax incentives when they incur capital expenditures for the purpose of an expansion:

- Companies located outside promoted areas:
  - PS for five years (exemption is restricted to 70% of statutory income); or
  - ITA of 60% of qualifying capital expenditure incurred within five years (ITA is restricted to 70% of statutory income).
- Companies located within promoted areas:
  - PS for five years (exemption is restricted to 85% of statutory income); or
  - ITA for five years (ITA is restricted to 85% of statutory income).

Manufacturing-related services
Companies providing integrated logistics, marketing support, and utility services may be given the following incentives:

- Income tax exemption of 70% of statutory income for five years. The rate of exemption is increased to 100% of statutory income for projects located in areas designated as the “Eastern Corridor of Peninsula Malaysia, Sabah and Sarawak;” or ITA of 60% of qualifying capital expenditure (QCE) incurred within five years of the date upon which QCE was first incurred, to be offset against 70% of statutory income. This ITA incentive is enhanced to 100% of QCE, to be offset against 100% of statutory income for projects in the Eastern Corridor of Peninsula Malaysia, Sabah and Sarawak.
- Exemption from import duty and sales tax on equipment in the related projects.

Offshore trading through websites in Malaysia
Income received by companies undertaking offshore trading (comprising the buying and selling of foreign goods to non-residents) via websites in Malaysia is to be taxed at a reduced rate of 10% for a period of five years. The approval of the Minister of Finance must be obtained.
Islamic banking and other Islamic financing activities

To further the government’s objective of developing Malaysia into a leading international Islamic financial centre, the following incentives are available:

- Tax deduction is allowed for expenses incurred in the issuance of Islamic securities approved by the Securities Commission or by the Labuan Financial Services Authority. (Effective from YA 2010 for securities approved by the Securities Commission and from YA 2011 for those approved by the latter authority and available until YA 2015 only.)
- Full income tax exemption for 10 years is granted to Islamic banks licensed under the Islamic Banking Act 1983 on income from Islamic banking business conducted in international currencies, and to takaful (Islamic insurance) companies on income from the takaful business conducted in international currencies. (Effective from YA 2007 until YA 2016.)
- Full income tax exemption on management fees received by local and foreign companies for managing funds of foreign and local investors established under Syariah principles is granted (effective from YA 2008 until YA 2016). Such funds must be approved by the Securities Commission.
- A special-purpose vehicle (SPV) established solely for the purpose of Islamic financing approved by the Securities Commission or one established under the Offshore Companies Act 1990, is not subject to income tax and is not required to comply with administrative procedures under the tax law. Deduction for the cost of issuance of Islamic bonds is allowed for the company that established the SPV, which is also deemed to be the recipient of income received by the SPV and taxed accordingly.
- Expenses incurred prior to the commencement of an Islamic stock-broking company is allowed to be deducted, provided the company commences business within two years from the date of approval. (Available for applications to establish such a company that is received by the Securities Commission before 31 December 2015.)
- Double-tax deduction is granted for specified expenses incurred for the purpose of its business in promoting Malaysia as an international Islamic financial centre for the years of assessment 2008 to 2015.

Real estate investment trusts (REITs)

REITs or property trust funds (PTFs) approved by the Securities Commission are exempted from income tax on chargeable income distributed to unit holders whereas its undistributed chargeable income is taxed at 25% (from YA 2009 onwards). However, with effect from YA 2007, REITs/PTFs are exempted from tax on all income, provided that at least 90% of their total income is distributed to unit holders. If the 90% distribution condition is not complied with, all income is taxed at the prevailing income tax rate and tax credit is claimed by the unit holders. Unit holders are taxed as follows:

<table>
<thead>
<tr>
<th>Unit holders</th>
<th>Income tax</th>
</tr>
</thead>
<tbody>
<tr>
<td>Individuals (whether resident or non-resident), body of persons, or other unincorporated persons</td>
<td>Withholding tax at 25% (from YA 2009 onwards)</td>
</tr>
<tr>
<td>Resident company</td>
<td>No withholding tax (income to be included in annual tax return)</td>
</tr>
<tr>
<td>Non-resident company</td>
<td>Withholding tax at 25% (from YA 2009 onwards)</td>
</tr>
<tr>
<td>Withholding tax of 15% (reduced to 10% from 1 January 2009 to 31 December 2011)</td>
<td></td>
</tr>
</tbody>
</table>
Institutional investor (pension fund, collective investment scheme, or other person approved by the Minister of Finance)

Withholding tax at 20% (reduced to 10% from 1 January 2009 to 31 December 2011)

Other incentives available are:

- Real property gains tax exemption on disposal of real property to a REIT/PTF
- Stamp duty exemption on transfer of real property to REIT/PTF
- Tax deduction given for consultancy, legal and valuation service fees incurred on the establishment of a REIT

Development corridors
As part of the Malaysian government’s plan for national economic advancement through regional development and growth acceleration in various strategic locations by promotion of domestic and foreign investments, the following “development corridors” were launched during the period from the end of 2006 to early 2008:

<table>
<thead>
<tr>
<th>Economic region</th>
<th>Location</th>
<th>Year of launch</th>
</tr>
</thead>
<tbody>
<tr>
<td>Iskandar Malaysia (renamed in April 2008 and formerly known as “Iskandar Development Region”)</td>
<td>Southern Johor</td>
<td>2006</td>
</tr>
<tr>
<td>Northern Corridor Economic Region</td>
<td>States of Perlis, Kedah, Penang, and northern Perak</td>
<td>2007</td>
</tr>
<tr>
<td>East Coast Economic Region</td>
<td>States of Kelantan, Trengganu, Pahang, and district of Mersing in Johor</td>
<td>2007</td>
</tr>
<tr>
<td>Sabah Development Corridor</td>
<td>Western, central, and eastern regions of Sabah</td>
<td>2008</td>
</tr>
<tr>
<td>Sarawak Corridor of Renewable Energy</td>
<td>Central Sarawak</td>
<td>2008</td>
</tr>
</tbody>
</table>

Basic to the strategy for promotion of investments in these development corridors is the provision of all necessary infrastructure (financial and non-financial) for the creation of a business-friendly environment, including tax and other financial incentives. Apart from existing incentives which are available for promoted activities and products provided under the Promotion of Investments Act 1986 (PS, ITA etc.) and the Income Tax Act 1967 (outlined above), special incentives customised for the purpose of each development corridor have been (or will be) developed. So far, however, special legislation has been enacted only in respect of Iskandar Malaysia (IDR) to grant the following exemptions/incentive:

- Income tax exemption for an approved IDR-status company in respect of income from the provision of qualifying services to a person situated within designated nodes in the IDR or outside Malaysia, for 10 years, provided that these operations commence before 31 December 2015.
- Income tax exemption for non-residents in respect of income from technical fees, interest, or royalties received from approved developers in designated nodes in the
IDR, or IDR-status companies. Withholding tax requirements are also waived in respect of such payments.

- Income tax exemption for an approved developer on income from the disposal of rights over land or buildings in designated nodes in the IDR or rental from such buildings until 2020. Exemption is also granted to an approved development manager on income from the provision of management, supervisory, and marketing services to such developers until 2020.
- Knowledge workers residing in Iskandar Malaysia are taxed at the rate of 15% on chargeable income in respect of a qualified activity (green technology, biotechnology, educational services, healthcare services, creative industries, financial advisory and consulting services, logistics services, or tourism) from an employment in Iskandar Malaysia (from YA 2010).

Information pertaining to each development corridor, including incentives available, may be obtained from the corridor's website, the address of which is provided above.

**Other incentives granted under the 2010 Budget**

The following are some incentives included under the 2010 Budget:

**Healthcare service providers** – Granted tax exemption on statutory income equivalent to 100% of the value of increased exports, but limited to 70% of statutory income in a year. Any unutilised allowance can be carried forward indefinitely for deduction in the future. Export income is income derived from providing healthcare services to foreign clients.

**Buildings awarded Green Building Index (GBI) Certificate** – Incentives are given to the following:

- Owners – Granted tax exemption equivalent to 100% of additional capital expenditures incurred to obtain GBI Certificate which can be setoff against 100% of statutory income for each year (for new buildings and upgrading of existing buildings).
- Buyers who purchase the building from property developers – Granted stamp duty exemption on instruments of transfer of ownership on the additional cost incurred to obtain the GBI certificate (only given once to the first owner).

**Forest plantations** – The following incentives for forest plantations (deemed to have taken effect from 21 May 2003) are available only for applications received no later than 31 December 2011.

- Alternative (1)
  - A company investing in a subsidiary that is engaged in forest plantation activities (“investor company”) – Granted a tax deduction equivalent to the amount of investment in the subsidiary.
  - For the subsidiary – Granted exemption of 100% of statutory income for 10 years commencing from the first year in which profit is derived.
  - The same exemption is given to an existing forest plantation company that reinvests for purposes of expansion of the forest plantation project, but only for five years commencing from the first year the company derives profit.
  - Any losses incurred before and during the tax-exempt period can be carried forward for deduction in the post-exempt years until fully utilised.
• Alternative (2)
  • For the investor company – Granted group relief on losses incurred by the subsidiary before it records any profit.
  • For the subsidiary – Granted exemption of 100% of statutory income for 10 years commencing from the first year in which profit is derived.
  • Any amount of loss that is not surrendered to the investor company prior to and during the exempt years of assessment may be carried forward for deduction in the post-exempt years until fully utilised.

Export of financial services – Income tax exemption is granted to Malaysian banks, insurance companies, and takaful companies on profits of newly established branches overseas or income remitted by new overseas subsidiaries. The exemption period, which is five years, may commence from a date to be determined by the company but should not be later than the third year of operations. (Applications to establish new branches or subsidiaries overseas should be received not later than 31 December 2015.)

Small and medium enterprises (SMEs) – Expenses incurred by SMEs on the registration of patents and trademarks are allowed a deduction of these expenses against business income. The term SME must come within the definitions provided in specified legislation.

Withholding taxes (WHT)

Corporations making payments of the following types of income are required to withhold tax at the rates shown in the table below. See Note (7) for other types of income.

Notes

Rate for certain rentals is shown in parenthesis […] if different from royalty rate.

*T Treaties pending ratification

Restricted tax treaties dealing with taxation of specific transport operations in international traffic have also been signed with Argentina and the United States.

The numbers in parentheses refer to the notes below:

1. A single-tier system of taxation came into force on 1 January 2008 which replaced the previous full imputation system. There is a six-year transitional period (until 31 December 2013) for all companies to migrate to the single-tier system. Under the previous imputation system, dividends are franked with (deemed to be paid net of) the tax paid by corporations. If any dividend-paying corporation has not paid sufficient tax to cover the total tax deemed deducted from dividends, it must pay the balance of the tax to the tax authorities. Under the single-tier system, dividends are exempt in the hands of shareholders. Malaysia, at present, has no withholding tax on dividends in addition to tax on the profits out of which the dividends are declared. Some treaties provide for a maximum withholding tax on dividends should Malaysia impose such a withholding tax in the future.

2. Interest on loans given to or guaranteed by the Malaysian government is exempt from tax. Interest paid to a non-resident by a commercial or merchant bank operating in Malaysia is also exempt from tax.

3. Approved royalty payments under certain treaty provisions are exempt from withholding tax.

4. Other income:
   a. Effective 21 September 2002, contract payments made by a person (including a partnership) to non-resident contractors (including professionals) in respect of services under a contract project are subject to a 13% deduction of tax (10% on account of the contractors’ tax liability and 3% on account of their employees’ tax liability). This deduction of tax at source does not represent a final tax, which is determined upon the filing of the tax return.
   b. Payments made to non-residents in respect of the provision of technical services performed in Malaysia and rental of movable properties are subject to a 10% withholding tax (unless exempted under statutory provisions for purpose of granting incentives).
5. Royalty income received by non-resident franchisors under franchised education scheme programmes approved by the Ministry of Education is exempted from tax.

6. Royalty income does not include royalty paid in respect of motion picture films or tapes for television or broadcasting or of the operation of a mine, oil well, quarry, or any other place of extraction of natural resources or of timber or other forest products.

7. From 1 January 2009 withholding tax is also applied in respect of income of a non-resident from sources other than the following:
   • Sources shown in the preceding table;
   • A business source; and
   • An employment source.

   The rate of withholding tax on such income is 10%. This is applicable on payments made to residents of all the treaty partners previously listed, except for Germany and Jordan, where the respective double taxation agreements have provided for such type of income to be taxed only in the contracting state in which the recipient is resident.

**Tax administration**

**Returns**

Returns of income for the year 2008 will be issued to companies as follows:

<table>
<thead>
<tr>
<th>Accounting year-end in</th>
<th>Return form issued in</th>
</tr>
</thead>
<tbody>
<tr>
<td>January, February, March 2010</td>
<td>April 2010</td>
</tr>
<tr>
<td>April, May, June 2010</td>
<td>July 2010</td>
</tr>
<tr>
<td>July, August, September 2010</td>
<td>October 2010</td>
</tr>
<tr>
<td>October, November, December 2010</td>
<td>January 2011</td>
</tr>
</tbody>
</table>

Returns are to be submitted within seven months after the closing of accounts.

“E-filing” or online filing of tax returns via the Internet is available. E-filing is not compulsory, although it is preferred by the Inland Revenue Board.

**Payment of tax**

Tax payable under an assessment upon submission of a return is due and payable by the “due date.” The “due date” is defined as the last day on expiry of seven months from the date upon which the accounts are closed.

Companies are required to furnish estimates of their tax payable for a year of assessment no later than 30 days before the beginning of the basis period. However, from the year of assessment 2008, a newly established company with paid-up capital of MYR 2.5 million or less that meets with certain specified conditions is exempted from this requirement for two years, beginning from the year of assessment in which the company commences operation. A revised estimate can be submitted in the sixth and ninth months of the basis period for a year of assessment.

Companies are then required to pay tax by monthly instalments (based on the estimates submitted) commencing from the second month of the company’s basis period (financial year).

From year of assessment 2011, a company commencing operations in a year of assessment is not required to furnish estimates of tax payable or to make instalment payments if the basis period for the year of assessment in which the company commences operations is less than six months.
Significant developments

A number of changes to Maltese tax legislation have been published during the first half of 2010.

In a Maltese domestic context, the new tax provisions introduce a number of anti-abuse provisions as well as some new taxing provisions. Many of these provisions target mainly transactions in immovable property situated in Malta and companies owning such property. However the new amendments also cover a number of other important aspects from a Maltese domestic tax perspective.

Some other rules dealing with international tax matters have also been introduced. The main purpose of these rules is to further facilitate the use of Malta as a financial services centre, thus demonstrating Malta’s continuing commitment to remaining an attractive jurisdiction of choice for investors.

The new innovative provisions include among others the following:

- An option for a step-up in the cost of acquisition of assets situated outside Malta owned by persons (including companies) effecting a change in domicile or residence or being Maltese companies resulting from cross-border mergers.
- An exemption is being introduced on royalties derived from qualifying patents with respect to inventions and satisfying the applicable conditions, which are to be set out in regulations.
- Provisions are being introduced in Maltese tax legislation in order to facilitate the use of Malta for international aviation activities.
- The Maltese tonnage tax regime has been extended to cover also qualifying non-Maltese-flagged vessels and ship management activities.

The exchange of information provisions under Maltese tax law have been extended in order to be more in line with those contained in the Organisation for Economic Co-operation and Development (OECD) Model Tax Convention.

The Value-added tax (VAT) Act has been amended in line with the provisions of Council Directive 2008/8/EC. Such amendments became effective as from 1 January 2010.
Taxes on corporate income

Income tax
Companies are subject to tax at a flat rate of 35%. There is no corporation tax structure separate from income tax.

Petroleum profits tax
Petroleum profits tax is levied as income tax, but taxable profits are computed in a special way, including on a production-sharing basis. Profits with respect to production sharing contracts signed after 1 January 1996 are taxed at 35%. Other petroleum profits are taxed at 50%.

Insurance profits tax
Insurance profits tax is levied as income tax and imposed at the same rate as other corporate profits, but the tax is computed in a special way. In the case of non-resident companies, the computation is applied with reference only to business carried on in or from Malta.

Corporate residence
All companies incorporated in Malta are considered to be both domiciled and resident in Malta. Other bodies of persons (including companies incorporated overseas) are considered to be resident in Malta when the control and management of their business are exercised in the country.

Other taxes
There are no other corporate taxes.

VAT
Supplies of goods and services in Malta are subject to VAT at the standard rate of 18% (5% on accommodations in hotels and licensed premises, supply of electricity, works of art, collector's items and antiques, certain confectionery, medical accessories, printed matter, and items for exclusive use by the disabled). Exports to outside the EU, food, and certain other goods and services are exempt from VAT and provide a right to credit of VAT suffered.

Customs and excise duties
Goods imported from outside the EU may be subject to customs duties. A Customs Code provides for customs procedures and concepts, which are based on European Community requirements. Excise duties are chargeable on certain energy products, certain alcoholic drinks, certain manufactured tobacco products, and mobile telephony services.

Employer’s social security contributions
Employers are obliged to pay social security contributions at the rate of 10% of the individual employee’s salary, and at fixed rates of EUR 32.91 per week for annual salaries exceeding EUR 17,115.

Stamp duty
Stamp duty is charged on, among other transactions, transfers of immovable property (5% for both residents and non-residents) and marketable securities (2%; 5% in the
case of transfers of shares in property companies). Furthermore, in the event that the market value of shares held by a person is reduced following a change in the company’s issued share capital or voting rights and the value shifts onto the other shareholders, the transferor would be deemed to have transferred the said value to the transferee(s) and such value shifting may be subject to a stamp duty liability (although certain exceptions/exemptions may apply).

There could be the possibility of a stamp duty exemption subject to the satisfaction of certain conditions.

**Branch income**

The tax rate on branch income is the same as that for resident companies. Other than the tax charged on a branch’s income, no tax is withheld on transfers of profits to the head office.

**Income determination**

**Inventory valuation**

Stock valuations are generally made at the lower of cost or market value. The last-in, first-out (LIFO) method is not accepted for taxation purposes. In general, the book and tax methods of inventory valuation will conform. Obsolescence is accepted where proved, but there are no provisions to take into account monetary inflation effects on the inventory valuation.

**Capital gains**

Tax is chargeable on capital gains realised on the transfer of immovable property (real estate), shares and other securities, business, goodwill, business permits, copyrights, patents, trade names, trademarks, and beneficial interests in a trust. In the case of transfers of immovable property, a final withholding tax of 12% on the transfer value applies as from 1 November 2005 (there are certain cases where the 12% final withholding tax on the transfer value may not apply – in many instances such cases would be subject to the normal tax on capital gains regime with the chargeable profit being taxed at the taxpayer’s applicable rate(s)).

No tax is levied on investments that yield a fixed rate of return. A tax exemption applies in certain instances and subject to the satisfaction of certain conditions on the capital gain arising on the transfer of shares in a company listed on a recognised stock exchange other than shares held in certain collective investment schemes. If the capital gain arising on the transfer of listed shares is subject to tax, then special rules apply with respect to the calculation of the gain and such gain would be subject to tax separately at the rate of 15%.

Subject to the satisfaction of certain conditions, if the asset is transferred between group companies, no loss or gain is deemed to arise from the transfer. A provision has been introduced to bring to charge the transfer of shares in property companies (as specifically defined) that were originally subject to intra-group tax deferral, when the transferor and the transferee cease to be members of the original group within six years from the date of such intra-group transfer.

Gains realised from the transfer of other assets fall outside the scope of the tax. Gains arising outside Malta and derived by a company that is either not domiciled
Malta

or not ordinarily resident in Malta are not subject to tax. There are also a number of exemptions provided in the law. For example, capital gains realised by non-residents on transfers of units in collective investment schemes, similar investments relating to linked long-term insurance business and shares, or securities in companies (except for companies holding certain Maltese immovable property) are exempt from tax.

**Rollover relief**
Group relief and reorganisation relief (subject to certain specific conditions) are granted.

**Inter-company dividends**
Dividends received by one resident company from another, whether or not a subsidiary, are taxable on the gross amount in the recipient’s hands. If the distributed profits have been taxed, no further tax should be chargeable to the recipient company. However, for resident shareholders, if the corporate rate of tax in the year in which the profits are earned is lower than that in the year in which they are distributed, an amount equivalent to the difference in rates (topping up) is payable. If the distribution is made from untaxed income, the dividend would be tax-free in the hands of the recipient company.

Dividends and gains on disposal of shares received by a corporate investor from a non-resident company (or from a non-resident limited partnership) may qualify for a participation exemption in Malta, subject to the satisfaction of certain statutory conditions.

The participation exemption has also been extended to gains upon the disposal of equity holdings in Maltese-resident entities (previously the exemption applied only to transfers of shares in companies or limited partnerships resident outside Malta); distributions of taxed income by Maltese-resident companies are not subject to further tax under the full imputation system.

**Foreign income**
A company is taxable on its worldwide income when it is ordinarily resident and domiciled in Malta. A company that is either not ordinarily resident or not domiciled in Malta is taxable on its foreign income only insofar as such income is remitted to/received in Malta. Foreign tax is relieved by way of tax credits. This may occur under the terms of a double taxation treaty. Where no treaty exists, the foreign tax can be relieved through a system of unilateral relief. Relief for underlying tax is also granted with respect to dividend income, either in terms of a double taxation treaty or as unilateral relief. Such reliefs may be available if, among other things, evidence of tax paid abroad is produced.

Profits of Malta resident companies are subdivided for tax purposes into five accounts: the Immovable Property Account, the Final Tax Account, the Maltese Taxed Account, the Untaxed Account, and the Foreign Income Account. The last of these includes, among other things, taxable profits of Maltese-resident companies resulting from foreign investments; profits of a foreign permanent establishment; and profits resulting from foreign investments, assets, or liabilities of an onshore bank licensed in Malta. Income allocated to the Foreign Income Account for which no evidence of tax paid abroad is available can qualify for a flat-rate foreign tax credit of 25%.
Malta

The Immovable Property Account would include profits and income derived directly or indirectly from immovable property situated in Malta. The Final Tax Account would include, among other items, profits that have been subject to a final tax at source or were exempt from tax and such exemption is extended to shareholders upon a distribution of such profits. The Maltese Taxed Account would include any other taxed profits while the Untaxed Account would represent the difference between the distributable profits and the profits allocated to the other taxed accounts.

Under Malta’s system of taxation of dividends, shareholders receiving distributions from the Maltese Taxed Account and/or the Foreign Income Account may be entitled to a tax refund of part or the full tax paid by the distributing Maltese company on such profits being distributed. The tax refund may be either a six-sevenths refund, a five-sevenths refund, a two-thirds refund, or a full refund of the tax suffered by the Maltese distributing company on the distributed profits. The type of the tax refund depends on the nature of the income to be distributed.

No anti-controlled foreign company/Subpart F type rules or legislation are applicable in Malta.

Stock dividends
A Maltese company may distribute bonus shares from profits, whether of an income or capital nature, and from share premium and capital redemption reserves. When bonus shares represent a capitalisation of profits, they are deemed to be dividends for tax purposes. Such bonus shares are subject to tax in the recipients’ hands, gross of any tax paid at the corporate level on the relative profits, but tax credits equivalent to the gross-up of tax are available to stockholders.

Deductions

Income tax deductions
The basic condition for deductibility of expenses is that deductions are allowable only with respect to expenditures which are wholly and exclusively incurred in the production of the income.

The Income Tax (Deductions) Rules of 2001 provide for specific conditions on deductions with respect to the use of cars and the payment of employee compensation. The cost on which capital allowances on certain motor vehicles may be claimed is restricted to EUR 7,000 (increased to EUR 14,000 as from year of assessment 2011). Deductions for lease payments on cars are restricted in a manner that corresponds with the stated restriction of EUR 7,000 (increased to EUR 14,000 as from year of assessment 2011) that applies to capital allowances on owned cars. With respect to payment of employee compensation, the Deduction Rules require that in order for employee compensation to be allowed for tax purposes in the hands of the employing company, they must have been duly accounted for, in particular, the employee compensation must have been reported on the appropriate forms and within the statutory time limit to the Office of Inland Revenue. The rules also provide for restrictions on deductibility of emoluments with respect to the payment of certain fringe benefits to employees.

Depreciation and depletion
Tax depreciation is computed on the straight-line method. The rate of depreciation on plant and machinery varies according to the category of the plant and machinery
in question. The wear and tear rate on industrial buildings and structures (including hotels) may not exceed 2% per annum. New acquisitions of industrial buildings and structures are entitled to a concurrent extra 10% allowance in the year of acquisition. Tax depreciation is not required to conform to book depreciation.

The total allowances over the asset's useful life may not exceed 100% of its cost. If on disposal of a tax-depreciated asset a surplus arises, it is either added to the year's income or utilised to reduce the cost of any replacement. If the asset has been under-depreciated, a balancing allowance is granted.

No deduction is available for the depletion of natural resources.

The rules on tax deductions for wear and tear of plant and machinery provide for certain specific treatment in particular situations including, among other things, the following:

- To establish the cost of an asset when it is transferred between related companies, the lower of the actual cost of the asset or the tax written-down value adjusted by any balancing charge or allowance incurred by the transferring company should be applied.
- Deductions for wear and tear are allowed only where proper records and documentation have been kept that support the cost of the respective assets.
- A proportional deduction is allowed where an asset is used partly in the production of income and partly for other purposes.

**Net operating losses**
Net operating losses may be carried forward indefinitely until absorbed. There is no carryback of losses, not even in terminal years. Unabsorbed capital allowances may be carried forward only against the same underlying source of income. Where the source ceases to exist, any remaining balance is lost.

**Payments to foreign affiliates**
There are no restrictions on the deductibility of royalties, interest, and service fees paid to foreign affiliates as long as the particular expenses are considered to be incurred in the production of the particular income and satisfy the applicable statutory conditions. Interest, discount, premium, or royalties derived by non-residents are exempt from tax, subject to the applicable statutory requirements.

**Taxes**
A credit for foreign taxes may be applied against the Maltese tax charge. (See Foreign income in the Income determination section.)

**Other significant items**
Capital expenditures on scientific research, patents, and intellectual property rights are written off over a number of years. In the case of scientific research, a deduction may be granted at 150% of the expenditure. Certain pre-trading expenses are allowed as a deduction (subject to the satisfaction of certain statutory conditions).

**Group taxation**
Two companies that for tax purposes are resident exclusively in Malta, where one company is a 50% plus subsidiary of the other or both are 50% plus subsidiaries of a
third Malta-resident company, qualify as members of a group of companies. Allowable losses may be surrendered by a company to another company within the group where both companies have concurrent accounting periods and form part of such group throughout the entire basis year for which this relief is claimed; however, such surrendering of losses may not occur where the surrendering or claimant company is carrying on the business of insurance. Each company must file a separate tax return, and no combined grouping or consolidated returns are permitted.

**Tax incentives**

**Inward investment**
Investments by foreigners may be readily repatriated together with profits.

The Malta Enterprise Act and other related legislation provide a comprehensive package of incentives. These incentives are reserved for enterprises carrying on certain activities in Malta, mainly manufacturing activities. The accent is on high-value-added activities. Approval of a project’s eligibility for benefits by the Malta Enterprise may be required. In general, eligibility does not depend on whether the company produces for the local or for export markets. The main tax incentives include the following:

- Enterprises carrying out qualifying activities qualify for investment tax credits whereby a percentage of up to 30% (50% in the case of small-sized enterprises and 40% in the case of medium-sized enterprises) of qualifying expenditure is set-off against the tax charge (not against taxable income). Any unused credits are carried forward and added to the credits for subsequent years. The amount carried forward is increased by a percentage rate which is based on EU parameters as updated from time to time.
- Certain tax credits and special incentives may be available, subject to certain conditions, as from basis tax year 2003. These tax credits are calculated on the basis of specific expenditures incurred by a company while the special incentives grant tax exemptions on all or part of the chargeable income in specified circumstances.
- Investment allowances of up to 50% of qualifying expenditure may be granted (subject to certain capping rules) over and above tax depreciation in the year of acquisition of plant and machinery or industrial buildings/structures.
- No further tax is charged on distributions from profits that had previously been taxed at a reduced rate. This benefit is also extended to amounts that were not subject to tax on account of the investment allowance, investment tax credits, and specific tax credits/special incentives.
- The tax rate applicable to profits reinvested in the enterprise, pursuant to a project approved by the Malta Enterprise, is set at 15.75%.
- The combination of certain tax treaties and Maltese domestic law lowers the Maltese tax rate on certain companies receiving certain industrial assistance to 15%.

**Capital investment**
In the case of qualifying companies, an investment allowance (also referred to in the previous section under point 3) of 50% on plant and machinery and of 20% on industrial buildings and structures may be available (subject to certain capping rules), bringing the total allowances granted during the lifetime of the assets up to 150% and 120%, respectively. Apart from the investment allowances, normal allowances for wear and tear are also available on such assets as set out under the heading Depreciation and depletion in the Deductions section.
Shipping profits
A tonnage tax regime is applicable under Maltese law. Such regime covers profits from shipping activities as defined under the applicable regulations which are derived by qualifying Maltese-flagged and EU/EEA vessels as well as non-EU/EEA vessels satisfying certain additional rules. Furthermore, qualifying ship management activities are also entitled to the benefits of the tonnage tax regime. Profits qualifying under the tonnage tax regime may also be distributed tax-free. The related company shares are exempt from the provisions of the Duty on Documents and Transfers Act (stamp duties).

International business profits
Tax benefits are available for shareholders with respect to distributions by such companies of specified types of income. A beneficial tax regime is also available in respect of collective investment schemes.

The Maltese fiscal implications relative to trusts vary, depending on a number of circumstances including: (i) the particulars of the parties involved (e.g., domicile or residence of the trustees or beneficiaries); (ii) the act or event under review (e.g., the settlement of property, transfers of beneficial interests, distributions of trust assets, etc.); and (iii) the nature of the trust assets. Furthermore, in certain circumstances, tax transparency provisions are set out in the law, particularly so as to allow, among other things, the application of tax exemptions that would have applied to beneficiaries if there was no trust relationship.

Withholding taxes (WHT)
Domestic corporations paying certain types of income are subject to deduction of tax-at-source obligations as follows:

<table>

Notes

Treaties relating to international air and shipping traffic are in force with Switzerland and the US.

The numbers in parentheses refer to the following notes:

1. Malta makes no distinction between portfolio and substantial holdings. The tax at source is not a withholding tax because no additional tax is imposed on distributions other than the tax charged on the company with respect to distributed profits. Under Malta’s full-imputation system of taxation of dividends, the corporate tax is assimilated with the personal income tax of the shareholder with respect to the dividend. In the shareholder’s hands, the dividend is taxed at the gross amount, and the relevant amount of corporate tax offsets the shareholder’s tax liability on income from all taxable sources. Special provisions exist for taxation of distributions from income that would not have suffered tax at the corporate level.

2. Withholding of tax may be required only where the interest is debenture interest or interest on any other loan advanced to a corporation for capital purposes. The withholding tax is in effect a prepayment of the recipient’s final liability because a reassessment on income is made upon the submission of returns. Any resulting overpayment is refunded.

3. Interest and royalty income derived by non-residents is exempt from tax in Malta as long as certain conditions are complied with (e.g., they are not effectively connected to a PE of the recipient situated in Malta).

4. Under its treaties, Malta retains the right to tax dividends at a rate not exceeding that paid by the company in question on the profits out of which the dividends are distributed. This rate is currently 35% (in certain treaties, for example those with Austria, Bulgaria, Kuwait, Libya, and Romania, the maximum tax is set at a lower rate). In a number of treaties the rate of deduction and of tax is reduced to 15% in the case of companies enjoying certain tax incentives. See also Note 1 with respect to Malta’s full-imputation system of taxation of dividends.

Tax administration

Returns

An income tax return for income earned during the previous year must be filed for every year of assessment. The year of assessment is a calendar year, but a company may obtain authorisation from the Maltese Revenue to have a different year end (i.e., other than 31 December). Companies pay tax in the currency in which their share capital is denominated. The tax return for a company must be submitted by the later of nine months following the end of the financial year or by 31 March following the year of assessment (however, in recent years the Commissioner of Inland Revenue has provided concessionary extensions to such statutory deadlines in the case where the tax return is submitted electronically). Penalties are incurred on late filing of returns. The tax return submitted by the company is a self-assessment and the Commissioner of Inland Revenue will not raise an assessment unless he does not agree with the self-assessment.
**Payment of tax**

During the basis tax year, a company is in general required to make provisional tax (PT) payments every four months. In general, the PT payments are based on the last self-assessment filed by the company and payments are divided into three instalments of 20%, 30% and 50%, respectively. Any tax liability that is still due at the tax return date after deducting all tax credits must be settled immediately with the submission of the return. Interest at 0.75% per month is charged on any unpaid tax.

In certain instances, especially for companies with mostly international operations, PT may not be payable and the tax payment is normally paid on the earlier of the date profits are distributed or 18 months after the end of the relative accounting period.

The employer is required to withhold income tax and social security contributions from employees’ salaries and pass on such tax/contributions to the Office of Inland Revenue. This system of withholding tax at source is referred to as the Final Settlement System (FSS) and the employer is legally required to operate such a system. The salary from which the withholding is to be effected should also include the value of any taxable fringe benefits. There are three main categories of fringe benefits: (i) use of motor vehicles; (ii) use of other assets including accommodation; and (iii) other benefits. The method of valuation in each case varies and the employer is required to refer to the Fringe Benefits Regulations (and also to the fringe benefits guidelines) so as to calculate the correct value of any fringe benefits being provided to the employees and to deduct the right amount of tax accordingly.

**Significant developments**

From the year of assessment commencing 1 January 2011, Mauritius-source royalties payable to a non-resident will be subject to a tax deduction at the rate that is the lower of 15% or the rate specified in the double taxation convention in place between Mauritius and the foreign country where the payee is resident. The withholding tax will be deemed to be the final tax payable in Mauritius. This does not apply to companies holding a category one global business licence.

The submission date for companies with a due date of 31 December for advance payment system statements or final tax returns has now been brought forward by two working days prior to 31 December.

**Taxes on corporate income**

Income tax is payable on total net income before distribution at the following rates:

<table>
<thead>
<tr>
<th>Tax rates</th>
<th>%</th>
</tr>
</thead>
<tbody>
<tr>
<td>Companies holding a Category 1 Global Business Licence (GBC1) and offshore trusts (see below)</td>
<td>15</td>
</tr>
<tr>
<td>Private Freeport developers and operators carrying activities other than processing</td>
<td>Exempt (until June 2011)</td>
</tr>
<tr>
<td>Third-party Freeport developers and operators carrying processing activities</td>
<td>15</td>
</tr>
<tr>
<td>All other companies</td>
<td>15</td>
</tr>
</tbody>
</table>

Companies holding a Category 2 Global Business Licence (GBC2) incorporated under the laws of Mauritius are exempt from income tax.

Under local tax law, a company may offset any foreign tax paid on any foreign-source income against the Mauritius tax on the same income. Further, where the foreign tax paid is greater than the Mauritius tax liability, the Mauritius tax would be reduced to nil.

A GBC1 may, in the absence of evidence of payment of foreign tax, claim as tax credit (presumed tax credit) an amount equal to 80% of the Mauritius tax chargeable on the foreign-source income. The presumed tax credit may also be claimed by a bank against the tax payable by it on income derived from banking transactions with non-residents and with GBC1s and GBC2s.
In the case of dividends received from abroad, a tax credit in respect of underlying tax is also available, provided that the Mauritian shareholder holds at least 5% of the share capital of the company paying the dividend. Mauritius also allows a tax-sparing credit under its local tax legislation.

Companies paying or declaring dividends must either pay tax computed in accordance with normal rules or pay an alternative minimum tax (AMT), whichever is higher.

**Corporate residence**

A company incorporated in Mauritius is resident in Mauritius for tax purposes.

A company not incorporated in Mauritius is resident in Mauritius only if it has its central management and control there. A GBC2 is not considered a resident in Mauritius for the purposes of double taxation treaties (DTT).

**Other taxes**

**Local income taxes**
Local income taxes leviable by local administration, such as urban councils, do not exist in Mauritius.

**Morcellement tax**
A capital gains (morcellement) tax is payable by every landowner who makes a parcelling of land. The tax is calculated on the excess, if any, of the sale price over the aggregate of the amounts of purchase price and the cost of infrastructure works.

**Land development tax**
Land development tax is payable by every person who makes a parcelling of land.

**Value-added tax (VAT)**
VAT is charged by VAT-registered entities at the standard rate of 15% on all goods and services supplied by them, other than exempt supplies. A person should register for VAT if his/her turnover exceeds MUR 2 million a year. However, certain persons like accountants and auditors, attorneys and solicitors, consultants, surveyors, valuers, etc., should register for VAT irrespective of their turnover.

**Branch income**

Tax rates on branch income are the same as on corporate profits. No tax is withheld on the remittance of profits to a head office.

**Income determination**

**Inventory valuation**
Inventories should be valued at the lower of historical cost or net realisable value. The last-in, first-out (LIFO) basis of valuation is not allowed for tax purposes.

Conformity is required between book and tax reporting. Where the revenue authority is not satisfied that the basis of valuation is acceptable, for example, where the LIFO basis has been applied, it will make such adjustment as it believes is appropriate to determine the profits arising from the business carried on.
Mauritius

**Capital gains**
There is no tax on capital gains. Gains realised from the sale of any property or interest in property acquired in the course of a business, the main purpose of which is the acquisition and sale of property as part of a profit-making undertaking or scheme, are taxable as ordinary income. Where a transaction is in the nature of trade, the revenue authority may take the view that it is an ordinary trading transaction and assess the gains derived as income. Any profit from dealings in units and securities, however, are exempt from tax.

**Inter-company dividends**
Companies, whether resident or not, are exempt from tax on dividends received from resident companies.

**Foreign income**
Resident corporations are taxed on their worldwide income with the following qualifications:

1. Generally, double taxation is avoided by means of a unilateral credit relief for foreign tax paid. The net amount of foreign income that has borne tax is grossed up at the foreign rate of tax, and the foreign tax paid is allowed as a credit against the Mauritius tax payable. However, the tax credit cannot exceed the Mauritius tax referable to the relevant foreign income. Unused credit is not refunded. In the case of foreign dividends, the tax credit includes foreign tax imposed on the profits out of which the dividends are paid (underlying tax), provided that the shareholding in the foreign company is at least 5%.

2. Regarding foreign income derived from countries with which Mauritius has treaties for the avoidance of double taxation, tax credit is given for foreign tax in accordance with the treaties. There are clauses in the double taxation conventions that provide that income arising from certain specified foreign sources is to be exempt from Mauritius tax. Mauritius has signed double taxation conventions with Barbados, Belgium, Botswana, the People's Republic of China, Croatia, Cyprus, France, Germany, India, Italy, Kuwait, Lesotho, Luxembourg, Madagascar, Malaysia, Mozambique, Namibia, Nepal, Oman, Pakistan, Rwanda, Seychelles, Singapore, South Africa, Sri Lanka, Swaziland, Sweden, Thailand, Uganda, the United Kingdom, Tunisia, United Arab Emirates, Senegal, and Zimbabwe. Double taxation treaties with Bangladesh, Malawi, Nigeria, Qatar, Russia, Vietnam, and Zambia have been signed and are awaiting ratification. Treaties with Canada, Czech Republic, Greece, Portugal, Egypt, and the Republic of Iran are under negotiation.

Undistributed income of foreign subsidiaries is not subject to any special taxation. The income of the foreign subsidiary before distribution must not be included in the accounts of the local parent company. Dividends paid by the foreign subsidiary to the local parent company will, however, be taxable to the latter, whether or not such dividends are actually received in Mauritius. However, dividends received from outside Mauritius by a company holding a regional development certificate are tax-exempt.

**Stock dividends**
A resident company can distribute stock dividends (bonus shares) proportionately to all its shareholders. Stock dividends per se or convertible into cash are not taxable in the hands of the recipient. Dividends in kind are treated as taxable benefits.
Other significant items
A corporate owner of a foreign vessel registered in Mauritius or of a local vessel registered in Mauritius is exempt from tax on its income derived from the operation of such vessel. In the case of a local vessel, the exemption is limited to income derived from deep-sea international trade.

Deductions
Depreciation and depletion
Annual allowance – At rates varying between 5% and 50% of base value (unless stated otherwise), as follows:

- 5% on industrial and commercial buildings and buildings used for education and training (on cost);
- 20% on ships and aircraft, furniture and fittings;
- 35% on plant or machinery generally, 25% on motor vehicles, 30% on hotel buildings, and 25% on agricultural improvements and scientific research;
- 50% on electronic and high-precision machinery, computer hardware and peripherals, and computer software;
- 100% on aircraft leased by a company engaged in aircraft leasing (on cost); and
- 100% in respect of plant or machinery costing MUR 30,000 or less.

Tax depreciation need not conform to book depreciation. Depreciation is generally recaptured on disposal or sale when balancing charges or allowances are computed.

Net operating losses
Losses made in an accounting year are carried forward for a maximum of five years, provided the corporation can demonstrate a 50% continuity of shareholding between the year of loss and the year of claim. Losses resulting from capital allowances can be carried forward indefinitely. Loss carrybacks are not permitted.

Where a sugar factory operator that is not also a sugar cane planter incurs a loss, such loss to the extent it is unrelieved may be transferred in the income year in which it is incurred to a planter related to the operator.

Where a company takes over another company engaged in manufacturing activities, any unrelieved loss of the acquiree may be transferred to the acquirer in the income year in which the takeover takes place, on such conditions relating to safeguard of employment as may be approved by the minister of finance.

Payments to foreign affiliates
Royalties, interest, and service fees payable to foreign affiliates are allowed as expenses, provided they correspond to actual expenses incurred, are reasonable and do not exceed what would be paid under an arm’s-length agreement. There are certain limitations if the recipient of the interest is not liable to Mauritius tax. Royalties paid to non-residents by GBC1s, banks out of their foreign-source income as defined in the Income Tax Act, and trusts are tax-exempt.

Taxes
Taxes paid are not normally deductible; however, municipal taxes relating to buildings that are let are deductible.
Mauritius

Other significant items
A bank or an approved financial institution may claim as deductions any irrecoverable loans due by a company in liquidation in respect of which winding-up procedures have started or by a company in receivership.

Group taxation

There are no group provisions in the Mauritius tax legislation other than the transfer of losses by tax incentive companies, sugar factory operators, subsidiaries located in the Island of Rodrigues, and manufacturing companies upon their take-over.

Tax incentives

Inward investment
Owners of foreign vessels registered in Mauritius are exempt from income tax on income derived from such vessels. Owners of local vessels registered in Mauritius are also exempt to the extent that the income is derived from deep-sea international trade.

Capital investment
Capital allowances are allowable on capital investment. Investment allowance is not deducted in computing written-down or residual values.

Withholding taxes (WHT)

There is no WHT in Mauritius for payments to non-residents not carrying out any business in Mauritius made by GBCs. A non-resident company receiving service fees or interest from Mauritius is liable to tax thereon at the corporate rate of 15% through a self-assessment system. Interest is either exempt from tax or taxed at reduced rates under certain tax treaties. For dividends see Inter-company dividends.

Since 1 October 2006 tax deduction at source has been applicable on the following:

• Interest – 15% (to be deducted by banks and deposit taking financial institutions only and for individual accounts only);
• Royalties payable to residents – 10%;
• Royalties payable to non-residents – 15%;
• Rent – 5%;
• Payments to providers of specified services – 3% (in the construction industry); and
• Payments to contractors and sub-contractors – 0.75% (in the construction industry).

Tax administration

Returns
Companies are assessed for a year beginning 1 January and ending 31 December on their income for the preceding year ending 31 December. Where a company closes its accounts at a date other than 31 December, it may elect to adopt as a basis year the accounting year ending in the 12-month period preceding the year of assessment.
Every company, both taxpayer and non-taxpayer, must file a return of its income on the basis of the income year preceding the year of assessment. Where the accounting (basis) year ends on 31 December, the return must be filed six months from the financial year-end.

**Payment of tax**

If timely payment is not made, a penalty representing 5% of the amount of tax due is payable. In addition, interest at the rate of 1% of the tax unpaid for each month or part of a month is payable until the tax is paid. A penalty of MUR 2,000 for each month or part of a month is also prescribed for failure to file a return, subject to a maximum of MUR 20,000.

**Significant developments**

The Mexican tax reform for 2008 generated a number of important changes, including the introduction of the “flat tax” (referred to as “IETU”, its Spanish acronym).

After two years of adaptation to the flat tax, the Mexican Congress approved other significant changes in the tax laws for 2010, mainly dealing with temporary income tax rate increases and a reduced timing benefit under the tax consolidation regime, as well as a 1% increase in Mexican value-added tax (VAT).

**Taxes on corporate income**

**Federal income tax**

The federal corporate income tax rate for the period 2010 to 2012 will be 30%. As from 2013 the rate will drop to 29% and back to 28% (as in force until 2009) as from 2014. There are no state taxes on corporate net income.

All corporate entities, including associations of a civil nature, branches, etc. are subject to the tax rules (unless specifically ruled out, such as not-for-profit organisations) applicable to Mexican corporations.

The income tax rate applicable to taxpayers engaged exclusively in agriculture, livestock, fishing, and forestry activities is currently 21%.

Provisions to recognise the effects of inflation for tax purposes in the areas of monetary assets and liabilities (annual monetary adjustment) and depreciable assets are provided in the income tax law, even though recent inflation rates have been decreasing.

Once a corporation has paid its income tax, after-tax earnings (i.e., earnings arising from the after-tax earnings account, “Cuenta de Utilidad Fiscal Neta”, or CUFIN) may be distributed to the shareholders with no tax charge at the corporate level and without income tax withholding regardless of the tax residence of the recipient.

Nonetheless, if a corporation makes a distribution out of earnings that for any reason have not been subject to corporate income tax, such as distributions of book earnings (i.e., not yet recognised for tax purposes in Mexico), the corporation will be subject to corporate tax on the grossed-up distributed earnings (gross-up factors are: 1.4286 from 2010 to 2012, 1.4085 in 2013, and 1.3889 as from 2014).
Tax paid on dividends distributed in excess of CUFIN can be credited against the corporate income tax of the year or in the following two fiscal years further to the year in which the tax on the non-CUFIN distributions was paid. The CUFIN of the tax years in which the credit is applied must be reduced by an amount equal to the grossed-up dividend distribution.

**Federal flat tax**

The new flat tax was effective from 1 January 2008 and replaced Mexican asset tax. The flat tax applies to Mexican resident taxpayers’ income from worldwide sources, as well as to foreign residents on the income attributed to their permanent establishments located in Mexico. As from 2010 a flat tax rate of 17.5% (16.5% in 2008 and 17% in 2009) is applied to the flat tax base.

In general, the flat tax base is the excess of income actually collected relating to: (i) the sale or disposal of property, (ii) the provision of independent services, and (iii) the granting of temporary use or enjoyment of assets (i.e., rental income and unrelated party royalty income) over amounts actually paid for: (i) the acquisition of assets, (ii) the receipt of independent services and (iii) the temporary use or enjoyment of assets, as well as certain (iv) other cash expenses, with the exceptions noted below.

Even though there are no tax losses for flat tax purposes, a tax credit (with similar results than the application of NOLs) may be available where flat tax deductions exceed income in a fiscal year, provided certain conditions are met. This credit may be used against flat tax liabilities for the subsequent 10 years.

Salaries and wages, employer contributions to the social security system, non-taxable employee benefits, most interest income, and royalties received from related parties for the temporary use or enjoyment of intangible assets are not included within taxable income under the flat tax legislation. Accordingly, payments in respect of these types of expenses are non-deductible items. Nevertheless, the employer can obtain a flat tax credit on “taxable” wages paid and social security contributions made, which is generally equivalent to deducting these two items.

Certain taxpayers are exempt from flat tax, principally those that are not considered taxpayers under the Mexican income tax law.

The flat tax operates as a supplemental tax to the income tax, to the extent the flat tax due is higher than the income tax due for the fiscal year. Hence, the initial flat tax triggered is reduced by a “credit” for an amount equal to the income tax of the fiscal year plus any income tax on distributions exceeding the balance of the after-tax earnings account (i.e., non-CUFIN distributions).

Flat tax is computed on a cash-flow basis (with certain exceptions) and determined per calendar year. Nevertheless, advanced monthly flat tax payments are made based on the year-to-date flat tax gross income, minus the authorised deductions in that same period.

Depreciation and amortisation are not deductible for flat tax purposes. However, a transitional rule allows the deduction of certain deferred charges and expenses acquired and paid between 1 September 2007 and 31 December 2007. Also, a flat tax credit is available for depreciable assets acquired in the period from 1998 through
Mexico

2007. Any payments for these types of investments made as from 2008 are deductible in-full at the time of payment.

The flat tax law also provides a transitional regime for items such as: asset tax credits carried-forward inventories and net operating losses carried forward as of 31 December 2007.

Maquiladoras (factories importing duty free materials for processing and re-exporting) are subject to specific provisions that can significantly reduce their effective flat tax rates, to the extent certain conditions are satisfied.

Financial sector entities are subject to flat tax on their financing intermediation margin, less certain cash expenses paid, pursuant to specific rules applicable to these entities in the flat tax law.

State taxes
There are no state taxes on corporate net income.

Financial system
Financial institutions must comply with reporting requirements regarding payments made to resident individuals, including the disclosing of information on the type of investment, investor identity, and the amount of interest paid.

Shares sold through the stock market
In certain specific cases the sale of shares is exempt from income tax when such shares are disposed of by individuals and residents abroad through authorised stock markets to the extent that certain requirements are met.

Interest
Income tax withholding on interest paid by financial institutions to Mexican resident investors is generally set at 0.6% of the invested capital.

To simplify the calculation of interest income from loans entered into with financial institutions, a new procedure has been proposed based on cash flow which would enter into force on 1 January 2011.

Through this procedure, financial services taxpayers would be relieved from the requirement to withhold the corresponding income tax on the principal of the loan. Income tax withheld would be considered as a final payment for individuals and an advance payment for corporations.

Corporate residence

The federal tax code provides that corporations are deemed residents in Mexico if the principal centre of administration or the effective place of management is located in Mexico. A specific definition of “tax resident” in any tax treaty overrides domestic law definitions, if the taxpayer is eligible to apply the treaty.

When a company ceases to be Mexican resident in terms of the Mexican federal tax code or any tax treaty, it is deemed to be liquidated for tax purposes. In such cases, a notification is required at least 15 days before the change and the income tax return
must be filed with the Mexican tax authorities within 15 working days following the date on which the change of tax residency takes place.

**Other taxes**

**Value-added tax (VAT)**

VAT is payable at the general rate of 16% (from 2010) on sales of goods and services, as well as on lease payments and imports of goods and services, except in the border zones, where the 11% VAT rate generally applies (except on the sale of construction and developed real estate which is subject to the general rate). Until 2009 these rates were 15% and 10% for the general border zone, respectively. The sale of medicines, as well as the sale of most food products, is zero-rated. The principal VAT-exempt transactions are the sale of land, credit instruments (including equity shares), residential construction, interest paid by banks, medical services, education, salaries and wages, rentals of residential property, and the sale of non-amortisable participation certificates on real estate investment trusts, provided specific requirements are satisfied.

The sale in Mexico of temporarily imported goods by non-residents to (i) other non-residents, (ii) Maquiladoras or (iii) companies in the automotive industry is also VAT-exempt under certain circumstances.

The 0% VAT rate, which generally means that no VAT is payable, is applicable to a substantial number of transactions, including the sale of books, magazines and newspapers published by the taxpayer, the exportation of goods and certain services (including some Maquiladora activities intended for exportation), the sale of certain basic foodstuffs, agricultural goods and services, sales and rentals of farm machinery and equipment, and other specified transactions.

Taxes paid by business enterprises on their purchases and expenses related to VAT taxable activities (including activities subject to the 0% VAT rate), may usually be credited against their liability for VAT they collect from customers on their own sales, services rendered, etc. The input VAT credit on goods or services of a general nature, or those not specially identified with either taxable or exempt activities for VAT purposes, is computed based on a VAT ratio proportional to the VAT taxable versus VAT exempt activities carried out by the taxpayer. Creditable VAT paid on purchases and expenses in excess of VAT collected from customers is recoverable via either a refund or a credit against subsequent VAT liabilities.

VAT is a “cash basis” tax, with few exceptions (e.g., VAT on some types of interest must be paid on an accrued basis), therefore only the receipt of payment for goods or services triggers the output VAT liability, and an input VAT credit may be claimed only when the taxpayer pays VAT to its providers of goods and services. VAT is calculated for each calendar month as a final tax. In addition, VAT overpayments may be used to offset the tax liabilities arising from other federal taxes.

VAT must generally be withheld by Mexican residents acquiring or leasing tangible goods from non-residents, if such foreign residents do not have a permanent establishment in the country to which income is attributed. Mexican business entities are required to withhold VAT on payments to individuals or entities for services consisting of ground transportation of goods. Mexican corporations must also withhold
Mexico

VAT on commissions paid to individuals, as well as on independent services rendered by Mexican individuals, and on tangible goods leased from individuals.

**Compulsory profit sharing**

Although not a tax, every business unit with employees (irrespective of the type of organisation) is required to distribute a portion of its annual profits among all employees, except directors and the general manager. The amount distributable to the employees in most cases is 10% of taxable income, adjusted to eliminate income or deductions that relate to the recognition of inflation and include dividend income. Special rules apply to a limited number of specific businesses.

No profit sharing is paid during the first year of operations. Also, special rules apply for personal service entities and for entities deriving their income from rental activities, both of which can limit their profit sharing payment to the equivalent of one month of regular salary.

The profit sharing amount paid out is a deductible item for income tax purposes provided certain requirements are met.

**Excise tax**

The excise tax law (“Impuesto Especial Sobre Producción y Servicios”, or IEPS) levies substantial federal excise rates on the importation and/or sale of certain taxable items, such as gasoline (% variable), beer (26.5%), wine (26.5% to 30%), spirits (53%), and cigarettes and other tobacco products (160% plus an additional quota), and on certain services related to these activities, such as commission, mediation and distribution of excise taxable items as well as services for raffles and gambling (30%). Additionally, from 2010 excise tax is also applicable to certain telecommunications services (3%).

In general terms, goods are exempt from IEPS when exported. However, since the input IEPS paid by exporters on their purchases is not creditable, that tax becomes an additional cost.

IEPS is payable (output tax) and creditable (input tax) on a cash basis. It is payable on the date that the charge invoiced is collected from the client and can be credited when the respective payment is made to the supplier. On imports, IEPS is creditable when paid at the customs offices.

In certain cases, the IEPS legislation allows taxpayers that are not subject to this tax to credit IEPS paid on the acquisition and/or the importation of certain goods, such as alcohol and semi-processed and fluid syrups (as a raw material), against income tax payable.

There is a specific procedure to calculate the tax for beer producers, bottlers and importers, however the tax can never be lower than 26.5%.

Among other obligations, IEPS taxpayers must file information regarding their 50 main clients and suppliers before the Mexican Tax Administration on a quarterly basis.

**Vehicle taxes**

Taxes are levied yearly on the ownership of motor vehicles, as well as on the acquisition of new vehicles. These two taxes are payable in addition to the VAT on the purchase. Note that some vehicles considered as “hybrid” (e.g., battery assisted vehicles) will not
be subject to the new vehicle acquisition tax and ownership tax will be levied at the 0% rate.

**Tax on Cash Deposits (IDE)**

As from 2010, IDE is applicable at 3% on monthly cash bank deposits exceeding MXP 15,000 or its equivalent in foreign currency. This tax can be credited against certain taxes, including income tax.

**Branch income**

Mexican branches of foreign corporations (i.e., permanent establishments or PEs) are generally subject to the same tax rules as Mexican corporations, with some exceptions. Such exceptions include that branches may deduct pro rata allocations of home office expenses, provided certain requirements are complied with (such as the existence of an applicable tax treaty and a comprehensive agreement for the exchange of tax information between the relevant territory and Mexico), but may not deduct remittances to their home offices, even when such remittances are classified as royalties, fees, commissions, services, or interest.

In general terms, distributions to the head office (other than those regarded as a return to the head office of the capital invested into the branch) either in cash or in kind from branches or other PEs are subject to the statutory corporate tax rate on the grossed-up distribution, unless the remittance is made from the CUFIN account balance (i.e., the after-tax earnings account).

The income tax law considers a PE to be any place in Mexico where business activities or services are carried out or rendered by non-residents, such as agencies, offices, mining exploration sites, or any other place of exploration, extraction, or exploitation of natural resources, regardless of the length of time involved.

A foreign insurance company could also be considered as having a PE when it engages in activities consisting of insuring risk or collecting premiums (with the exception of reinsurance activities) in Mexico through a party other than an independent agent.

Sites used for display, storage or purchasing facilities, inventories imported in-bond to be processed by a third party, short-term construction services, offices to carry out auxiliary or preliminary activities and information gathering or scientific research are not considered to create a PE in Mexico. A PE is taxed as a branch. Non-residents may also keep merchandise in bonded warehouses (including merchandise delivered for importation into Mexico) without being considered as having a PE.

A non-resident is not considered to have a PE in Mexico as result of the legal or economic relationships maintained with companies carrying out certain inventory processing activities (i.e., Maquiladoras) which normally process goods or merchandise maintained in Mexico by the non-resident by using assets provided by the non-resident or any related party, as long as certain requirements are met.

The requirements to avoid the creation of PE in Mexico include the conditions that the non-resident is a resident in tax treaty country and that the Maquiladora complies with the transfer pricing provisions provided in the law.
Maquiladoras under shelter programmes may not be considered creating a PE in Mexico, when assets of foreign residents are involved and certain information is provided to the Mexican Tax Administration in relation to the gross revenues earned and income taxes paid by its non-Mexican related party. This duration of benefit (in force until 2011) is expected to be extended by the Mexican Tax Administration.

A definition of “permanent establishment” in any tax treaty overrides domestic law definitions where the taxpayer is eligible to apply the corresponding tax treaty.

**Income determination**

**Recognition of income**
Income is generally recognised on an accrual basis. However, the service revenues of civil entities that render professional services (e.g., law and accounting firms) are reported on a cash basis.

**Inventory valuation**
In order to determine the cost of goods sold for income tax purposes, inventories must be determined based on the valuation methods provided in the Law (e.g., first-in, first-out (FIFO), last-in, last-out (LIFO), averages, identifiable costs, retail, etc).

**Capital gains**
Capital gains are taxed as follows:

**Securities**
Gains are included in regular taxable income. There are two different procedures for computing the tax basis of a Mexican company’s shares, depending on the period for which the shares are held (i.e., whether less or more than 12 months).

The tax basis of shares of Mexican corporations sold may be increased by the inflation adjustment applicable for the holding period.

In the case of shares with a holding period of more than 12 months, there are certain items to be considered when computing the tax basis, such as: (i) the movement in the after-tax earnings account (CUFIN) of the issuing company (including the possible negative CUFIN effects), as adjusted for inflation, (ii) the unamortised prior years’ tax losses at the date of the sale, (iii) tax losses arising prior to the date on which the shares were acquired and amortised during the holding period, and (iv) any capital reductions of the issuing company.

When the sum of: (i) the CUFIN balance at the date of acquisition of the shares, (ii) the capital reductions paid, (iii) the unamortised prior years’ tax losses at the date of the sale, and (iv) the negative CUFIN balance of the issuing corporation is higher than the sum of: (i) the CUFIN balance at the date of the sale and (ii) the tax losses arising prior to the date on which the shares were acquired and amortised during the shares’ holding period, the difference must be subtracted from the tax basis of the shares to be disposed (potentially resulting in the shares’ tax basis being equal to zero).

When the aforementioned difference exceeds the tax basis of the shares disposed, this excess (restated by inflation) must be subtracted from the tax basis of the shares in any subsequent share sale by the same taxpayer, even if the shares are issued by a different company.
The aforementioned procedure allows the average cost (tax basis) of the shares to be determined, which is then updated and considered as the acquisition cost for future sales.

A different but simpler procedure applies for computing the tax basis of shares held during a period of 12 months or less.

Deduction of losses arising from the sale of shares is limited to the value of gains from similar transactions in the same or the following five fiscal years. Losses may not be deducted by non-residents selling shares.

A gain from the sale of shares is considered Mexican source income when the transferred shares are issued by a Mexican resident or when more than 50% of their book value arises directly or indirectly from immovable property located in Mexico, including cases where the shareholding is structured in different levels.

In general terms, the sale by non-residents of shares issued by a Mexican company is subject to a 25% withholding tax applicable to the gross amount of the transaction (i.e., without deductions). However, there may be the option for gains realised by non-residents on the sale of shares issued by a Mexican company to be taxed by applying the statutory 30% rate to the net gain (i.e., the value of the transfer less the tax basis of the shares). The tax rate for these purposes is the same as that applicable to corporate taxpayers in each year, as mentioned above. Hence, in 2013 the rate will be reduced to 29% and to 28% as from 2014.

This net income election is available only if the foreign shareholder is resident of a country that is not considered a “preferred tax regime jurisdiction” (tax haven) or a country with a territorial tax system. The non-resident seller must have previously appointed a representative in Mexico, and have a public accountant assigned to issue a statutory tax audit report on the transfer of shares. The public accountant issuing the respective report must specify the accounting value of the shares sold and explain the factors used in determining the sales price and the market value of the shares if shares are sold between related parties.

The representative is jointly liable for the tax on the sale of shares, even when the statutory report is issued by a public accountant.

The tax authorities may authorise the deferral of taxes that would otherwise be triggered by the transfer of shares in a group reorganisation (the authorisation must be obtained prior to the share transfer). The price used on the transaction must be at arm's length. The tax deferred adjusted for inflation is due upon the sale of the originally transferred shares outside the same interest group. An interest group consists where shareholders have over 50% common voting stock of the companies.

In principle, authorisations for tax deferral are not granted if the party acquiring or selling the shares is resident in a tax haven, or of a country that has not signed a broad exchange of information agreement with Mexico. However, in the latter case, an authorisation may still be granted if the taxpayer provides documentation to the Mexican tax authorities stating that the taxpayer has authorised the foreign tax authorities to provide information to the Mexican authorities regarding the operation in question.
If the share sale qualifies as an exempt reorganisation under tax treaty rules, the non-resident must appoint a legal representative in Mexico prior to the sale and file a notice with the Mexican Tax Administration informing them of such appointment and the details of the reorganisation process intended to be carried out. Additionally, certain formal requirements are established in the regulations of the Mexican income tax law that must be satisfied when carrying out this type of transaction.

Tax treaty rules (optionally) override domestic law rules when the seller resides in a tax treaty country.

**Real estate**
In determining the taxable gain, the cost basis of the land and buildings may be adjusted (i.e., increased) for tax purposes on the basis of the period of time for which the assets have been held. This adjustment is performed by applying inflation adjustment factors to the net undepreciated balance. Similar rules apply to non-residents electing to pay tax on net income by appointing a legal representative in Mexico. The rate of tax on the net gain is 30% (in 2013 the rate will be reduced to 29% and to 28% as from 2014). Otherwise, the 25% final withholding tax on gross income applies to non-residents.

**Machinery and equipment**
Gains or losses from the disposal of machinery, equipment, and other fixed assets are also calculated after adjusting the basis in these assets, by applying inflation factors to the net undepreciated balance.

**Inflationary gain or loss**
Taxpayers are required to calculate an adjustment for inflation (resulting in additional taxable income or deductible expense) on an annual basis by applying the percentage increases in the National Consumer Price Index (NCPI) to the value of essentially all liabilities reduced by monetary assets, including bank balances, investments (except in shares), and some debt and receivables.

**Inter-company dividends**
Dividends received by Mexican corporations from other Mexican corporations need not be included in gross income. However, dividend income is subject to the 10% compulsory profit sharing, and must be included within the recipient corporation’s CUFIN.

No further taxes apply on dividends distributed out of the CUFIN. However, non-CUFIN distributions (i.e., distributions that for any reason have not been subject to corporate income tax) are generally subject to tax at the level of the distributing company at the general income tax rate on the grossed-up distribution.

**Foreign income**
A Mexican corporation is taxed on foreign-source income when earned. Double taxation is reduced, or possibly avoided, by means of foreign tax credits. However, the undistributed profits of a foreign subsidiary are not subject to Mexican tax until dividends are paid, with the exception of companies with investments in entities located in a tax haven (“income subject to preferred tax regimes”), in which case income is generally taxable even if no distributions are received from those entities.
Investments in tax havens (income subject to preferred tax regime)

Investments in tax havens include those made directly or indirectly in entities, branches, real property, shares, bank accounts, or investment accounts, and any kind of participation in entities, trusts, joint ventures, or investment funds, as well as in any other similar legal entities created or incorporated in accordance with foreign law and located in a tax haven, and including those that are carried out through an intermediary.

A business, entity, trust, or joint venture is considered to be located in a tax haven when it has a physical presence, an address, a post office box, or effective management in a tax haven, or when its bank account is held in or through financing entities located in a tax haven.

Unless it can be demonstrated that the taxpayer does not have management control of the foreign investments, the taxpayer must include the income generated through such entities or foreign vehicles in the proportion that corresponds to their direct or indirect participation in the capital of the entity or vehicle.

Income and profits subject to preferred tax regimes (PTR) are taxed separately. This income cannot be combined with other taxable income or losses and it is not considered for purposes of making advance income tax payments. Tax applicable to this type of income is payable together with the corporate annual tax return.

The classification of a PTR is not based on the location of the investment but on the tax effectively paid on the income generated abroad. An investment is considered subject to a PTR if the income tax paid abroad is less than 75% of the income tax that would have been incurred and paid in Mexico, if the income had been taxed under Mexican rules.

In general, interest income and the annual inflationary adjustment made to liabilities of the investment in the tax haven are included in taxable income without subtracting the annual inflationary adjustment on receivables.

However, the annual inflationary adjustment on receivables may be subtracted from interest income earned, provided an information return is filed.

Tax on investments in a PTR is determined by applying the general corporate income tax rate to taxable income. Additionally, net operating loss carryforwards associated with an investment in a PTR may be amortised against the tax profit of the following tax years arising from investments in PTR, and tax deductions related to the investment may also be applied, as long as accounting records pertaining to those investments are available and the annual information return on the investments is filed on time.

Undistributed income from investments in entities located in a PTR need not be immediately included in taxable income under the above provisions in certain particular cases (e.g., income arising from activities that qualify as active business activities in accordance with the applicable legislation and in the case of indirect investments in a tax haven when certain strict conditions are met).

Income earned in a PTR will be exempted where the PTR income arises from a business activity. This exemption will not be applicable, however, if income such as interest,
Mexico

dividends, royalties, certain capital gains, and rents (i.e., passive income) represents more than 20% of the total income generated.

Other specific exemptions may remain applicable in the case of share transfers within the same group and for income derived from royalties and interest that do not represent a tax deduction for Mexican tax residents to the extent that certain specific requirements are fulfilled.

Maquiladoras
Companies operating under an IMMEX programme (Maquiladoras/In bond processing companies) are considered to not have a PE in Mexico for the non-resident principal who owns the equipment and inventory to the extent they are residents of a country that has a tax treaty with Mexico in force, that all the terms and requirements of the treaty are complied with, and that the mutual agreements of Mexico and its treaty partner are satisfied. This relief applies only if the Maquiladora complies with any of the following options stated by the domestic law.

1. Maintenance of documentation on transfer pricing in accordance with the applicable legislation, adding to the Maquila fee 1% of the net book value of the machinery and equipment owned by the foreign related company and used by the Maquiladora in its activities.
2. Reporting of a taxable income margin of a minimum of the higher of:
   • 6.9% of the value of assets used in the Maquila activity (including the inventories and fixed assets owned by the foreign related party); or
   • 6.5% of the value of the operating costs and expenses of the Maquiladora.
3. Maintenance of documentation on transfer pricing using the transactional net margin method (TNMM) and considering a return on the net book value of machinery and equipment owned by the foreign related company used by the Maquiladora in its activities, adjusted by financing terms.

Maquiladoras that apply option 1 or option 3 may request an advanced pricing agreement (APA) from the Mexican tax authorities. However, this APA is not mandatory to obtain the PE exemption.

Maquiladoras that apply any of the three options above are not required to file an annual information return on transactions with foreign related parties. This exemption is only available in respect of the Maquila activity.

If the Maquiladora renders services other than exported Maquila services (including domestic sales), specific transfer pricing requirements apply and potential PE issues must be evaluated.

In general terms, the Maquiladoras receive a significant reduction on their effective income tax and flat tax rates to the extent certain conditions are satisfied.

The Mexican Tax Administration has recently initiated a detailed review of the Maquiladora programme, hence it is expected that significant tax reforms will be approved in the coming years.

**Deductions**

**General rule**
The applicable deduction requirements must be complied with no later than the last day of the tax year to which the deduction applies, although the invoice supporting the expense may be provided up to the date on which the tax return for the period in question is filed (or comes due). An expense invoice must contain a date within the year for which the deduction is claimed.

Deductions for certain business expenses are limited in the case of business meals and use of company owned cars.

**Cost of goods**
The costing system to be used will be the incurred cost system, based on historic costs or pre-determined costs. If the requirements provided on the regulations of the income tax law are met, the direct cost system (based on historical costs) may be used.

Inventory may be determined by any of the following methods:

- First-in, first-out (FIFO);
- Last-in, first-out (LIFO);
- Identifiable costs;
- Average cost; or
- Retail.

The FIFO and LIFO methods must be applied to each type of merchandise and each movement. The monetary FIFO and LIFO methods may not be used. Taxpayers selling goods that are identifiable by serial numbers, at a cost exceeding MXP 50,000, must determine their inventory by the identifiable cost method.

Once elected, a method is compulsory for five years and can be changed only if the requirements established in the regulations of the income tax law are fulfilled. The monetary results of the change in method are amortised over the following five years.

For accounting purposes, different methods and certain variations can be adopted. However, a record of the differences must be maintained, and such difference will not be taxable or deductible.

The cost of imported goods may be deducted (and included in the cost of goods sold) only if it can be supported that the goods were legally imported into the country.

**Depreciation, amortisation and depletion**
Straight-line depreciation is permitted at the rates specified in the law, and the deduction may be increased by applying the percentage increases in the NCPI from the month in which the asset was originally acquired. When an asset is disposed of or becomes useless, the remaining undepreciated historical cost may also be deducted, after application of the appropriate inflation adjustment factor to the undepreciated historical cost.

Mining exploration and development expenses incurred prior to the commencement of operations and the cost of mining claims may be amortised at 10% per year, after...
applying inflation adjustment factors, unless the taxpayer elects to deduct these costs as incurred.

Intangible assets for the exploitation of goods that are in the public domain, or for rendering public services under concession, are considered deferred assets (i.e., not deducted as incurred). Therefore, these assets are subject to amortisation for income tax purposes.

Specific annual depreciation rates are established for goods used in certain industries.

**Tax losses**

Subject to certain limitations, losses incurred in prior years by a business may be carried forward and deducted from income earned over a subsequent 10-year period.

Losses carried forward may be increased by the percentage increase in the NCPI between the seventh and twelfth months of the fiscal year in which they are incurred, and thereafter up to the sixth month of the fiscal year in which they are applied.

Tax loss carryforwards are non-transferable; however they can be used by the surviving entity, in a merger with certain restrictions. In the case of a spin-off, tax loss carryforwards can be divided between the surviving entity and the spun-off entities in proportion to the following:

1. Inventories and accounts receivable transferred in the case of commercial entities; or
2. Fixed assets transferred, in all other cases.

Current tax legislation limits the utilisation of tax losses in changes in ownership. The rule provides that changes in ownership representing more than 50% of the voting shares, prevents the utilisation of tax losses against income obtained in the same trade of business (“giro”), with certain exceptions.

**Payments to foreign affiliates**

Taxable income and authorised deductions must be determined on the basis of prices that would be agreed with independent parties in comparable transactions (arm’s-length values).

For this purpose, taxpayers must secure and maintain contemporaneous documentation supporting transactions with related parties residing abroad, demonstrating that income and deductions are based on market values. This documentation must be prepared per type of transaction, and must include all operations carried out with related parties.

Domestic transactions must also be supported by the application of a recognised transfer pricing method selected in accordance with the ordering preferred methods determined in the legislation.

Payments made to residents of tax havens (or PTRs described above) are considered non-deductible, unless it can be demonstrated that the price of the transaction is the same that would have been set between or among unrelated parties in comparable transactions. Unless the contrary is demonstrated, it is assumed that operations with companies, entities, or trusts resident in a PTR are carried out between or among
related parties, and that prices are not set as they would be in comparable operations between or among independent parties.

The sales price of shares (other than publicly traded shares) sold to a related party must be set at market value and the transaction must be supported by the corresponding contemporaneous transfer pricing documentation.

In order to be deductible, payments of technical assistance fees and for the transfer of technology or royalties must be made directly to companies with the required technical capabilities to provide the corresponding service, and should correspond to services actually received.

Payments to non-residents of a prorated portion of expenses (i.e., allocations of expenses) are not deductible for Mexican corporations.

**Thin capitalisation**

Interest generated by excess debt lent by a related party is non-deductible for income tax purposes. Excess debt is defined as more than three times the value of shareholders’ equity (i.e., a 3-to-1 debt-to-equity ratio) as per the taxpayer’s Mexican GAAP balance sheet.

In principle, all liabilities are considered in determining the annual average liabilities for purposes of calculating the ratio and thereby the disallowed interest expense amount. However, certain liabilities incurred for construction, operation, or maintenance of the productive infrastructure associated with the strategic areas of Mexico may be excluded from this computation.

Taxpayers may also be able to obtain a ruling from the Mexican Tax Administration in order to apply a higher financial leverage (i.e., not the 3-to-1 debt-to-equity ratio), owing to the characteristics of their activities. Also, the thin capitalisation rules do not apply to the financial sector.

In addition, taxpayers are entitled to use instead of shareholders’ equity, the sum of the average balances of the capital contributions account (CUCA) and the after-tax earnings account (CUFIN) to determine the 3-to-1 debt-to-equity ratio. Taxpayers that opt for this tax equity computation must continue to use it for at least five years. This alternative computation is mandatory for those taxpayers that do not account for capital following Mexican Generally Accepted Accounting Principles.

Specific provisions dealing with the disallowance of interest expenses for debt financing structured though back-to-back loans should also be closely observed.

**Taxes**

In general, all federal, state, and local taxes levied on a company (not including those required to be withheld from other parties) represent deductible expenses for income tax, with the following exceptions.

1. Federal income tax.
2. Flat tax.
3. Federal VAT and excise tax when the company is entitled to credit the tax.
4. Taxes on acquisitions of fixed assets and real estate, which must be capitalised and deducted as part of the total cost of such assets to be depreciated.
Mexico

**Donations**
The maximum amount for deductible donations is limited to 7% of the taxable income of the previous year.

**Group taxation**
The income tax law contains a chapter that allows certain holding companies to file a consolidated income tax return with their majority-owned subsidiaries. Tax consolidation is applicable for income tax purposes, but not for other taxes (e.g., flat tax and VAT) or compulsory employee profit sharing.

The principal requirements for a company to qualify as a holding company for fiscal consolidation are that it must be a Mexican tax resident with no more than 50% of its shares owned by other companies, regardless of their country of residence. Shares that qualify as placed among the general investing public and non-voting shares are not considered for this purpose.

Where more than 50% of the holding company's shares are held by a foreign corporation, the above qualifying rule precludes the possibility of filing a consolidated return for a Mexican group, for companies that would otherwise qualify. However, there is an exception in cases where the foreign corporation that owns the shares of the Mexican holding company is a resident in a country that has executed a comprehensive agreement for the exchange of tax information with Mexico.

At present, Australia, Belgium, Brazil, Canada, Chile, the Czech Republic, Ecuador, Finland, France, Germany, Israel, Italy, Japan, New Zealand, the Republic of Korea, the Netherlands, Norway, Romania, Singapore, Spain, Sweden, the United Kingdom, and the United States have agreements of this nature with Mexico, and other agreements or tax treaties that might contain such an agreement are awaiting ratification or being negotiated.

The Mexican Tax Administration must authorise the application of the consolidation regime and financial statements and written consent of the legal representative must be filed before August 15 of the year prior to the first year of consolidation. There is a minimum five-year period of fiscal consolidation and special consolidated tax accounts should be prepared by the consolidated group.

There are some entities that are non-qualifying entities for inclusion in the consolidation regime, such as non-profit entities, credit institutions, insurance corporations, trusts, auxiliary credit institutions, stock exchange entities, foreign exchange houses and capital investment companies, non-resident companies, companies in liquidation, civil or social associations, and cooperatives.

In general terms, the consolidation regime allows certain benefits, such as:

- Individual company loss offset against profits of other companies in the same group during a deferral period.
- Deferral of tax on dividends in excess of the individual CUFIN, to the extent that the dividend flow remains within the consolidation group.
- Capital losses in the holding company from the sale of subsidiaries deducted as an ordinary loss in the year.
Prior to 2010, these deferral benefits are subject to recapture, which can generally be triggered upon:

- A member of the consolidated group leaves the group.
- A reduction in the ownership percentage.
- Deconsolidation of the group.
- Expiration of certain carryforward limitations (i.e., tax loss and capital loss recapture is required if any of the above three events occur during the 10-year period).

The significant 2010 tax reforms introduced important modifications to the consolidation regime, including a reduction of the recapture period from ten to five years in the case of tax losses and capital losses. Moreover, the introduction of new rules now trigger for excess dividends over the CUFIN balance and other recapture items after five years while these deferrals were often considered indefinite before the reform, as long as the same group remained in the consolidation with the same ownership percentages.

As a result, most of the consolidated benefits will be reversed in five years and the deferred income tax will be payable with the submission of the tax return starting from “Year six”, as follows:

- 25% in each of years six and seven;
- 20% in year eight; and
- 15% in each of years nine and 10.

Similar transitional rules have also been implemented for the recapture and repayment of certain consolidated benefits obtained in years prior to 2010.

**Tax incentives**

**Inward investment**

Tax incentives for inward investment are as follows.

1. Duty-deferral programmes: A deferral programme is an authorisation provided by the Mexican Ministry of Economy to those companies importing raw materials and fixed assets on a temporary basis to manufacture finished products within Mexico that will be exported.

In addition to the benefits described for corporate tax purposes in the Income determination section, IMMEX companies (known as Maquiladoras - i.e., entities with a Manufacturing, Maquila and Export Service Program in force) are entitled to the following customs benefits:

- No payment of import duties and VAT for temporarily imported raw materials, as long as they are exported.
- Sales of temporarily imported goods to other Maquila companies at a 0% VAT rate.
- Temporary import of fixed assets without paying VAT.

Another programme allowing preferential duty rates is the Program of Sectoral Promotion (known as PROSEC) which allows manufacturers to apply lower duty
rates on the permanent import of raw materials and machinery required for its productive processes, regardless of their country of origin and regardless if they are for the Mexican market or for export. These programmes were created by the federal government in order to establish competitive tariff conditions for Mexican manufacturers needing to import raw materials and fixed assets from non-NAFTA countries due to the changes made in 2001, where non-originating merchandise exported to NAFTA countries must pay duties.

The Ministry of Economy also provides a Registry for High Export Companies (known as ALTEX) which provides the following benefits:

• The company can obtain the refund of its favourable VAT balances in a shorter period of time.
• The company is exempted from the second customs review of its exports which expedites the customs clearance process.

Companies in Mexico which had formerly performed import operations with values from MXP 200 million to MXP 400 million per semester could take advantage of significant customs and administrative benefits if registered into the “Certified Company Registry” (authorised by the Ministry of Finance).

In general terms, the main benefits provided by the Certified Company Registry are the following:

• Permission to perform import customs clearance through any customs office.
• Reduction in time and number of reviews when clearing goods at customs facilities.
• Permission to perform clearance of goods for export at the company’s own facilities.
• Possibility to amend information contained within the import-export documents (including origin), fines reductions, and self-correction.
• In the event of an “Administrative Customs Process Review”, the obligation to comply with non-tariff regulations can be met within 60 days of receiving notification from the Customs Authority, without the seizure of the imported goods. For 2010, 58.15% of 10,900 tariff items are exempt from import duties, and for the remaining tariff items the average import duty rate is 5.34%.

2. Investments in certain new fixed assets outside Mexico City, Guadalajara, and Monterrey are entitled to an accelerated depreciation deduction considering a present value discounted rate of the future stream of depreciation. Some taxpayers may benefit from this deduction in the aforementioned cities if they can show that their business operations do not contribute to pollution and do not require the intensive use of water.

3. An income tax incentive for taxpayers involved in certain technological research and development projects carried out during the year allows a cash subsidy to be yearly determined by the tax authorities, based on a budget to be approved by the Mexican Congress.

4. Another incentive offers a credit equivalent to 100% of the income tax corresponding to the salary paid to workers/employees with certain types of disabilities.
5. A limited credit is applicable for investments in movie production activities through an immediate tax credit which is capped at 10% of the total income tax of the prior year.

6. Taxpayers investing in specific regions of Mexico considered to be “marginal scarcely inhabited zones” (less than 50,000 inhabitants) can receive certain tax benefits, such as 100% exemption on Social Security contributions to the extent certain requirements are met and financing benefits for the development of industrial facilities according to the guidelines and limitations provided by the Ministry of Economic Affairs in Mexico.

7. Several tax benefits exist for qualifying real estate investments (i.e., Mexican REITs such as FIBRAS, SIBRAS, etc.) in Mexico.

**Capital investment**

There are certain incentives to encourage risk capital investments in Mexico.

**Other incentives**

Certain other specific and limited tax incentives are available for taxpayers engaged in certain activities (e.g., those engaged in air or sea transportation of goods or passengers with respect to aircraft and ships with a federal government commercial concession or permit; in the agricultural and forestry sectors; and in bond warehouses with respect to real property used for the storage, safeguarding, or conservation of goods or merchandise).

**Withholding taxes (WHT)**

**Payments to Mexican residents**

Payments to resident corporations and permanent establishments in Mexico are generally not subject to withholding taxes.

Payments by resident corporations to resident individuals are subject to withholding tax as follows:

<table>
<thead>
<tr>
<th>Withholding tax</th>
<th>Percentage of income tax to be withheld</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Wages, salaries and other remuneration</td>
<td>0-30</td>
</tr>
<tr>
<td>2. Fees:</td>
<td></td>
</tr>
<tr>
<td>(i) Members of boards of directors and advisory boards</td>
<td>30</td>
</tr>
<tr>
<td>(ii) Other professional fees</td>
<td>10</td>
</tr>
<tr>
<td>3. Lease payments on real property</td>
<td>10</td>
</tr>
<tr>
<td>4. Interest on securities (1)</td>
<td>0.6</td>
</tr>
<tr>
<td>5. Interest on nonqualified securities</td>
<td>20</td>
</tr>
<tr>
<td>6. Dividends</td>
<td>Nil</td>
</tr>
<tr>
<td>7. Miscellaneous types of income of individuals, usually sporadic payments</td>
<td>20</td>
</tr>
</tbody>
</table>

**Notes**

1. This withholding tax is currently calculated on the total amount of the capital invested.
**Payments to non-residents**

Income tax must usually be withheld from payments to non-resident corporations and individuals. In the case of non-tax treaty countries, the statutory withholding rates are as noted below.

Income tax of 40%, with no deductions, must be withheld on most payments made to foreign related parties located in tax havens, in lieu of the tax provided in the domestic law for non-tax haven residents. This is not applicable in certain cases, such as on income not subject to Mexican taxation in accordance with the regular provisions for income earned by non-residents from a source of wealth located in Mexico, income from dividends and certain types of interest, including interest payments made to foreign banks. In these cases, the regular provisions of the domestic law should be applied to determine the income tax withholding.

Additionally, revenues for intermediation services, including commissions for brokerage, agents, distribution, and assignment and generally all income from the negotiation of third-party interests are also subject to 40% withholding tax when paid to tax haven residents.

Non-residents’ wages and salaries are taxed on the basis of a 12-month earnings period at the following income tax withholding rates:

<table>
<thead>
<tr>
<th>Taxable income</th>
<th>From</th>
<th>To</th>
<th>%</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>0</td>
<td>MXP 125,900</td>
<td>Nil</td>
</tr>
<tr>
<td></td>
<td>MXP 125,901</td>
<td>MXP 1,000,000</td>
<td>15</td>
</tr>
<tr>
<td></td>
<td>MXP 1,000,001</td>
<td>and above</td>
<td>30</td>
</tr>
</tbody>
</table>

The above mentioned rates are also applicable to retirement fund payouts.

However, no tax arises on compensation (wages, salaries, or fees other than board fees) paid by a non-resident with no establishment in Mexico (even if not subject to tax) to which the services relate, provided the individual remains in Mexico for fewer than 183 days (consecutive or not) in any 12-month period.

The tax, when applicable, is withheld if the income is paid by a resident (or a non-resident with a permanent establishment in Mexico). Otherwise, the tax is generally payable within 15 working days of the associated payment, by the party earning the Mexican-sourced income.

Statutory withholding rates (not mentioned above) under local legislation are as follows:

<table>
<thead>
<tr>
<th>Withholding tax rates</th>
<th>%</th>
</tr>
</thead>

</tbody>
</table>
Notes

1. The non-resident may elect to pay tax at a rate of 30% in 2010 (see note 11 below for the rate applicable thereafter) on the net taxable profit, in the case of (i) time-sharing services, (ii) share sales, (iii) sales of real property, (iv) activities of sportsmen/artists, and (v) derivative stock and debt transactions provided that the non-resident recipient of the income has a legal representative resident in Mexico and to the extent that the following specific requirements are met:
   i. For time-sharing services, the resident legal representative must keep the audited financial statements of the taxpayer available for inspection by the Mexican Tax Administration.
   ii. For share sales, a tax opinion issued by a registered public accountant is required.
   iii. For shares and debt-for-equity swap transactions, this election is available only where the foreign taxpayer is not a resident of a country classified as a tax haven or a country with a territorial tax system.

   It should be noted that there is an option to defer Mexican income tax arising from the sale of shares within the same group due to a corporate reorganisation provided certain conditions are met and that no legal representative is required for sales of real property by public deed.

2. The sale of shares through the Mexican Stock Exchange and government securities are exempt from income tax withholding provided certain rules are satisfied.

3. The applicable withholding rate (based on the withholding tax rates for interest) for debt-derivative transactions is applied on a net basis, that is, gross income less authorised deductions. However, if the transaction is liquidated in kind, the applicable withholding rate (on the same net basis) is 10%.

4. Interest payments to non-residents are exempt from Mexican income tax when they are paid on the following:
   i. Loans to the federal government or to the Bank of Mexico (Central Bank) or bonds issued by the latter organisation to be acquired and paid abroad.
   ii. Loans for three or more years granted or guaranteed by duly registered financial entities that promote exports through special financing.
   iii. Preferential loans granted or guaranteed by foreign financial entities to institutions authorised to receive tax-deductible donations in Mexico, provided these institutions are properly registered and use the funds for purposes consistent with their status.
   iv. Loans derived from bonds issued by the Federal government or the Bank of Mexico placed on a recognised national stock exchange, to the extent the beneficial owner is a foreign resident.

5. In 2010, 4.9% (such rate has been extended for another year) is applicable when the interest is paid to registered banks resident in countries with which Mexico has signed a tax treaty.

6. The 4.9% withholding rate applies provided the placement is handled through banks or brokerage firms resident in a country with which Mexico has signed a tax treaty, if there is compliance with the information requirements established in the general rules issued by the Ministry of Finance. If there is failure to comply with these requirements, the 10% withholding rate applies. The 4.9% and 10% withholding rates mentioned in the preceding paragraphs do not apply, and instead a 30% (see note 11 below for the rate applicable thereafter) withholding rate is applicable to interest, when the direct or indirect beneficiaries of the interest, either individually or jointly with related parties, receive more than 5% of the interest arising from the instrument in question, and are either (a) holders of more than 10% of the voting shares of the issuing company, either directly or indirectly, either individually or jointly with related parties, or (b) business entities holding more than 20% of their shares, either directly or indirectly, either individually or jointly with parties related to the issuer.

7. The 4.9% tax withholding rate is applicable to interest payments made to foreign financial institutions in which the Mexican federal government or the Mexican Central Bank has an equity participation.

8. The withholding tax rate is applied to the gross amount of the payment.
9. The non-resident taxpayer may elect to pay 30% in 2010 through 2012 (see note 11 below for the rate applicable thereafter) tax on the net profit, if the taxpayer has a resident legal representative and so advises the customer, who then makes no withholding. When business activities last for more than 183 days, the foreign taxpayer is deemed to have a permanent establishment in Mexico for tax purposes and is taxed in the same manner as a local resident corporation or branch.

10. The 21% federal rate is applied only in the case of non-qualifying prizes (i.e., income derived from prizes that is subject to a state taxation that exceeds a rate of 6%).

11. A 30% income tax withholding rate is applicable for the period 2010 to 2012. As from 2013 the rate will reduce to 29% and back to 28% as from 2014. The statutory withholding rates mentioned above may be reduced by applying tax treaty provisions. During the last decade, Mexico has embarked on a policy of negotiating a network of tax treaties with its principal trading and investment partners.

As of 30 April 2010, the following treaties are pending ratification, in process of compliance of specific formalities by the respective governments in order to become effective, have not been published yet in the Official Gazette or are under negotiation: Colombia, Hungary, Kuwait, Latvia, Lebanon, Malaysia, Morocco, Nicaragua, Panama, Slovenia, South Africa, Thailand, Ukraine, Uruguay, and Venezuela. The treaty with India has been signed and published. However, its reduced withholding tax rates are not yet in force.

Note that the tax treaties in force with Austria, Luxembourg, Switzerland, and the UK are being renegotiated. Although, they have not been published yet in the Official Gazette, they are expected to be applicable as from 2011 (subject to certain formalities), in which case some of the rates displayed below may have to be updated.

Tax treaties with Australia, Austria, Barbados, Belgium, Brazil, Canada, Chile, China, the Czech Republic, Denmark, Ecuador, Finland, France, Germany, Greece, Iceland, Indonesia, Ireland, Israel, Italy, Japan, the Republic of Korea, Luxembourg, the Netherlands, New Zealand, Norway, Poland, Portugal, Romania, Russia, Singapore, the Slovak Republic, Spain, Sweden, Switzerland, the United Kingdom, and the United States have been published in the Official Gazette, and are in force.

The tax rates are as follows:

<table>

Notes

The numbers in parentheses refer to the following numbered Notes. The applicable tax rates on dividends paid abroad in accordance with the tax treaties executed by Mexico are detailed below. Dividends paid to parties resident abroad are not subject to withholding tax in Mexico under domestic law.

There are certain specific cases of interest paid to parties resident abroad that might be exempted by certain tax treaties (e.g., interest paid to a pension fund or paid by a bank, interest paid on certain loans granted or guaranteed by certain entities for exports under preferable conditions, etc.), which are not detailed in the information below.

As previously mentioned it should be noted that under the local law, there is no withholding tax on dividends paid to parties resident abroad, regardless of their tax residency.

1. This rate applies when the recipient corporation that is the beneficial owner of the dividend (except for civil partnerships) directly owns at least 10% of the capital of the distributing corporation. In the case of Bermuda the specific exclusion of civil partnerships is not included.
2. This rate applies where the company that is the beneficial owner of the dividends directly or indirectly owns at least 25% of the capital of the distributing company.

3. This rate applies where the company that is the beneficial owner of the dividends (except for civil partnerships) directly owns at least 25% of the capital of the company distributing dividends. In the case of Norway, the taxation is limited to the country of residence of the party receiving the dividends, provided the aforementioned substantial holding rule is satisfied.

4. This rate applies where the recipient corporation that is the beneficial owner of the dividend owns at least 10% of the voting shares of the paying corporation. The Mexico-US tax treaty contains a most favored nation clause.

5. This rate applies where a company that is the beneficial owner of the dividends (except for civil partnerships, although limited liability partnerships are included) directly owns at least 10% of the voting shares of the company distributing the dividends.

6. This rate applies where a company that is the beneficial owner of the dividends owns at least 20% of the voting shares of the company paying the dividends.

7. This is the maximum withholding rate for dividends, with no distinction for substantial holdings. In the case of Ecuador, the tax payable on dividends paid to residents in Mexico must not exceed a limit established in the treaty.

8. The 5% rate applies when a company that is the beneficial owner of the dividends owns at least 25% of the voting shares of the company paying dividends during the six months prior to the end of the tax period in which dividends are paid. Under certain particular rules and provided this ownership requirement is complied with, dividend payments are only subject to tax in the country of residence of the recipient of the dividends.

9. No withholding applies when more than 50% of the shares of the recipient corporation are owned by residents of France or Mexico or when the beneficial owner of the dividend is a resident individual. Accordingly, withholding tax applies to dividends when more than 50% of the recipient corporation's shares are owned by residents of other countries. However, the tax withholding must not exceed 5% when the party receiving the dividend is the effective beneficiary of said dividend.

Dividends paid by a company resident in France to a resident of Mexico, other than a company which directly or indirectly holds at least 10% of the capital stock of the first-mentioned company, may also be taxed in France, in accordance with the law of France, but if the recipient of the dividends is the beneficial owner, the tax thus charged must not exceed 15% of the gross amount of the dividends.

10. The 5% rate applies where the company that is the beneficial owner of dividends directly or indirectly owns at least 10% of the capital of the company paying the dividends. There is a 10% tax rate that applies when these same ownership requirements are complied with, but the company paying dividends is a resident of Israel (provided dividends are paid from earnings taxed in Israel at a tax rate lower than the regular corporate tax rate in Israel).

11. The applicable tax rate on the gross amount of the dividends when the recipient company (beneficial owner) (except for civil partnerships) directly holds at least 10% of the capital of the corporation paying the dividend must not exceed 5% in the case of Luxembourg, and 8% in the case of Mexico. The protocol of the Mexico-Luxembourg tax treaty states that this rate might be reviewed in the future by the contracting states if withholding tax is not fully creditable, and can be adjusted under the principle of avoiding double taxation, provided the adjusted withholding rate is not lower than 5%.

12. Dividends paid by a company resident in Mexico to a company resident in the Netherlands (which is the beneficiary of said dividends) are subject to a maximum tax of 5% on the gross amount of the dividends, if the beneficial owner is a company that directly or indirectly owns at least 10% of the capital of the company paying said dividends. However, as long as a company resident in the Netherlands is not subject to Dutch income tax on dividends received from a company resident in Mexico in the terms of the Dutch income tax law and any future amendments thereto, the dividends mentioned in the preceding paragraph may only be taxed in the Netherlands (not in Mexico).

13. The Mexico-New Zealand tax treaty contains a most favoured nation clause that may be applicable in the future.
14. The exemption on dividend withholding tax is not applicable in the case of deemed dividends.
15. To the extent certain requirements provided in the Protocol are met, the withholding tax may be reduced to 0%.
16. The 10% rate applies to loans from banks.
17. The 5% withholding tax rate is applicable to interest paid to banks.
18. The 5% rate applies to interest on loans from banks, insurance companies, and retirement and pension plans.
19. The 10% rate applies to interest on loans from banks, insurance companies, and securities regularly and substantially traded on a recognised national stock exchange.
20. The 4.9% rate applies to interest on loans from banks and insurance companies and to interest on securities regularly and substantially traded on a recognised national stock exchange.
21. In the case of the Netherlands the 5% rate applies to interest on loans from banks and to interest on securities regularly and substantially traded on a recognised national stock exchange. In the case of Spain and the UK the 5% rate extends to interest paid to insurance companies.
22. The 10% rate applies to interest paid by financial institutions and interest paid to the original seller of machinery and equipment.
23. The 10% rate on interest applies in the case of interest paid to the original seller of machinery and equipment.
24. The 10% rate applies to interest on loans from banks and to interest derived from bonds or securities that are regularly and substantially traded on a recognised securities market, as well as to interest paid by the purchaser of machinery and equipment to a beneficial owner that is the seller of the machinery and equipment.
25. The 10% rate applies to interest on loans from banks and insurance companies, to interest on securities regularly and substantially traded on a recognised national stock exchange, to interest paid to the original seller of machinery and equipment in a sale on credit and to interest paid by banks.
26. The 5% rate is applicable to interest on loans granted by banks and insurance companies, securities traded on a recognised securities market, and the sale on credit of machinery and equipment.
27. It is understood that the definition of royalties applies to any type of payment received for the provision of technical assistance services. The 15% rate applies to royalties arising from the use of, or the right to use, trademarks.
28. The original rate is 15%, but has been reduced to 10%, as long as the Netherlands does not impose a withholding tax.
29. Reduced withholding rate resulting from the application of the most favoured nation clause.
30. The 5% rate applies to industrial, commercial, and scientific equipment.

**Tax administration**

**Returns**
Corporate taxpayers are required to file annual income and flat tax returns for the preceding calendar year by 31 March, and/or to pay any balance of tax shown as due at that time. Holding companies in the tax consolidation regime are required to file an annual consolidated tax return within four months of the end of the tax period (i.e., usually by 30 April). Thereafter, the taxpayer is generally required to obtain the certification of tax compliance by an independent auditor and to file the related tax compliance opinion by the end of June. This certification process covers all federal taxes other than customs duties.

Employees' profit sharing payments are generally due by 31 May of the year following that in which the corresponding profit was obtained.
**Payment of tax**

Corporate taxpayers are required to make estimated payments of income tax by the seventeenth day of each month based on their estimated taxable income at the end of the previous month and calculated principally by applying the profit factor to the cumulative monthly gross income (the profit factor is determined by dividing the taxable profit by gross income shown in the annual return for the preceding year, or, if no profit factor is to be found in that annual return, the factor appearing in the year preceding that and so on, up to five years, with certain adjustments). For this purpose, gross income includes nominal income, excluding inflationary adjustments.

Definitive monthly VAT payments and flat tax advance payments are also required by the seventeenth day of the immediately following month.

Special procedures are provided for computing advance income tax payments, and for obtaining authorisation to reduce the amounts of monthly advances after the sixth month of the year. No advance payments or adjustments thereto are required in the first year of operations.

Information returns must be filed no later than 15 February each year, reporting on, amongst others, the following activities performed in the immediately preceding year:

1. Payments made to parties resident abroad;
2. Loans received from or guaranteed by non-residents;
3. Transactions conducted through a business trust;
4. Parties to which the taxpayer makes payments and withholds income tax;
5. Parties to which the taxpayer has made donations;
6. Parties to which the taxpayer has paid dividends, and the value of such payments;
7. Taxpayers making salary payments are also required to file information returns reporting salaries paid and salary credit paid in the immediately preceding calendar year;
8. An annual information return must be filed on investments made or held in a tax haven. This must be filed in February of the immediately following year;
9. An information return on transactions carried out with non-resident related parties must be filed together with the corporate annual tax return (no later than March of the following year);
10. An information return related to the VAT taxable activities carried out by the taxpayer, must be filed on a monthly basis;
11. Transactions carried out with suppliers and clients, either local or overseas; and
12. Monthly informative returns disclosing items used in the flat tax computation.

**Statute of limitations**

In general, the right of the tax authorities to collect taxes, review tax returns, or claim additional tax expires five years after the date the respective return is filed. However, in cases where the taxpayer has not secured a federal tax registration number, has no accounting records, has failed to keep accounting records for the required five-year period, or has not filed a tax return, the statute of limitations expires in 10 years. Similarly, the period for claiming a refund of overpaid tax expires after five years.
**Mexico**

**Other issues**

**Transfer pricing**

Mexican transfer pricing legislation has been significantly developed as a result of Mexico’s admission to the Organisation for Economic Co-operation and Development (OECD) in 1994. This development has resulted in the implementation of transfer pricing guidelines that are in line with the global economy and market liberalisation.

In general terms, from a Mexican transfer pricing perspective all related party transactions (including certain joint-venture relationships) must be reported at arm’s-length prices.

Local legislation allows the selection of both traditional methods and profit-based methods consistent with the OECD guidelines. However the legislation requires a strict ordering for the application of a method.

Mexican legislation is generally “form over substance” oriented and therefore contractual terms remain relevant when defining the economic substance of the transactions subject to the transfer pricing analysis.

Reliable financial information is not always publicly available for Mexican entities. Hence, reliance is often placed on foreign information, which is then adjusted to properly reflect local market conditions and render the transactions in question more comparable.

**International Financial Reporting Standards (IFRS) adoption**

Business taxpayers meeting certain size criteria or belonging to a group that as a whole meets these criteria must file a tax-compliance audit report on an annual basis with the Mexican Audit Administration. This report consists of audited financial statements and detailed schedules, together with a report by the auditor stating that no irregularities were observed in respect of the taxpayer's compliance with its federal tax liabilities. These reports must be filled electronically and the auditor must be an independent CPA registered with the Mexican Audit Administration. Since 2008, the amount of detailed information required to be filed, and the auditor's responsibility in connection therewith, have increased significantly.

All companies listed on the Mexican Stock Exchange are required to submit annual consolidated financial statements accompanied by the opinion of a Mexican independent CPA. Commencing in the year ending 31 December 2012, these financial statements must be prepared in conformity with International Financial Reporting Standards (IFRS) and cover three years. Financial institutions and insurance companies must file audited financial statements with the appropriate regulatory agency.

The adoption of IFRS in Mexico presents companies with great challenges and opportunities. Changing from Mexican Financial Reporting Standards (MFRS) to IFRS requires companies to review their financial reporting procedures. Major changes in the requirements often have a ripple effect, impacting many aspects of a company's information reporting organisation.
Nevertheless, the benefits to Mexican companies in reporting under IFRS are numerous. Among the greatest of these is the opening up of the Mexican Stock Market to overseas investors. By adopting IFRS investors are able to compare two companies on different sides of the world with greater ease, and thus it is hoped that the change will encourage investment in Mexican companies.

Adoption of IFRS is not a straightforward process, and it will require time and effort on the part of the adopting entities to be able to ensure a smooth transition from MFRS to IFRS and ensure that the changes and benefits from this transition are duly implemented.
Significant developments

Corporate income tax
The corporate income tax (CIT) rate applicable in 2010 is 0%. However, taxpayers are still liable to calculate the taxable base for CIT purposes and to submit CIT returns. Moreover, the Moldovan Tax Authorities (MTA) are entitled to apply a fine of 15% of the amount by which a taxpayer under-reported its taxable income.

Value-added tax (VAT)
Various amendments were made to the Moldovan VAT legislation, which entered into force on 1 January 2010, including the following:

- An updated list of operations that are out of the VAT scope. The list also includes free of charge supplies of goods and services for advertising purposes and/or promotion of sales, in the amount of 0.1% of the net revenues registered during the year before the year in which the current supplies are made.
- An express provision that a property transfer within the reorganisation of a company is out of the VAT scope.
- An increase in the VAT rate from 5% to 6% for import / local supply of natural and liquefied gas.
- The introduction of a reduced 8% VAT rate for certain goods produced and supplied on the Moldovan territory.
- The due date for payment of VAT in the case of imports of services is the date the service is provided, indicated on the document that confirms the completion of such services (previously, the date of the external payment of the related service fees).
- Implementation of the possibility to compensate VAT refundable amounts with the tax liabilities administered by customs authorities due by economic agents (or by their creditors, if an assignment of receivable is performed).
- Express specification of the place of supply of certain services (e.g., for marketing services (residence of the beneficiary of these services), for services in science domain, or entertainment (place these services are actually rendered), etc.).

Excise duties
Among the most important amendments enforced in 2010 with respect to excise duties are the following:

- Implementation of the possibility to compensate refundable excise duties with import duties administered by customs authorities and due by the economic agents (or by their creditors, if an assignment of receivable is performed).
• Changes of the excise duties rates for a number of excisable goods (e.g., alcoholic beverages, cigarettes, gasoline / diesel fuel, perfume, jewellery, etc.).
• Expansion of the list of goods subject to excise duties (e.g., crystal objects, lighting devices).
• New excise duty compliance rules applicable for businesses supplied by other persons (both individuals and legal entities) with articles of jewellery of precious metals and precious stones, for further sale and with no documents confirming the payment of excise duties, etc.

**Customs duties**
Among the most important changes brought to the Customs Code is the modification of regulations applicable to the determination of import duties that are due for an object of cross-border leasing (i.e., being in Moldova under the temporary admission customs regime).

**Taxes on corporate income**

The CIT rate applicable in 2010 is 0%. However, taxpayers are still liable to calculate the taxable base for CIT purposes and to submit CIT returns. Moreover, the MTA are entitled to apply a fine of 15% to the amount by which a taxpayer under-reported its taxable income.

Individual entrepreneurs and farming enterprises are also subject to the 0% CIT rate in 2010. CIT deductibility rules applicable for individual entrepreneurs and farming enterprises generally follow the same rules as are applicable for legal entities.

If an MTA tax inspection, applying indirect methods, re-assesses the income amount compared to the declared gross income, a 15% CIT rate may be applied to the excess amount.

In addition, from 2010, taxpayers that apply the nil CIT rate have to compute and pay a 15% tax of the value of the following:

• Free of charge payments to parties and other social political organisations; and
• Donations to individuals, which are tax exempt for the individual and are treated as non-deductible expenses for the taxpayer, from the perspective of CIT.

In addition, the application of this tax is maintained on any amount exceeding the deductibility limit for charity and sponsorship expenses.

**Corporate residence**

According to Moldovan tax law, a tax resident is a legal entity organised or managed in Moldova or that has its main place of business in Moldova. In practice, tax residency is determined by the place of incorporation.
Moldova

**Other taxes**

**VAT**

**VAT rates**

Under Moldovan VAT legislation, the standard VAT rate is 20%. It is applied on the VAT-able amount of local supplies of goods and services, as well as on the VAT-able amount of goods subject to import and services subject to the reverse charge mechanism.

Certain types of supplies are subject to reduced VAT rates (e.g., 8% on local supplies of bread and milk, certain bakery and diary products, import/supplies of sugar produced from sugar beets, and drugs and certain pharmaceutical products, and 6% on natural and liquefied gas imported in or supplied on the territory of Moldova).

A number of supplies are subject to the nil VAT rate (i.e., VAT exempt with the right to an input VAT credit), including exports of goods or services, international transportation, etc., as well as VAT exemptions without the right to a deduction, including sale or rental of dwellings, land, financial services, etc.

An entity may be registered as a VAT payer if input VAT related to specific capital investments performed starting with 1 January 2008 exceeds a certain threshold (i.e., VAT registration available for VAT refund purposes).

**Input VAT deductibility rules**

Input VAT incurred on the acquisition of goods or services may be deducted, provided it is incurred by a VAT payer for performing VAT-able supplies within its business activity.

If input VAT relates to acquisitions used for performing VAT exempt supplies, such input VAT would be a cost/expense for the company, except for cases of contributions in kind to the statutory capital (i.e., VAT exempt operation), when input VAT should be fully deductible at the level of the contributor.

Input VAT related to acquisitions of goods / services not used for business purposes may not be deducted and shall be treated as cost/expense.

If input VAT relates to acquisitions destined for performing both VAT-able and VAT exempt supplies without a direct allocation by type of supplies, the company is entitled to deduct input VAT based on a prorata mechanism.

The temporary prorata ratio is computed monthly by taking revenues obtained from VAT-able supplies over revenues obtained from both VAT-able and VAT-exempt operations, both amounts being computed by backing out prepayments received. The final prorata amount is computed according to the same ratio above, but based on yearly amounts of the respective indices. Related differences are correspondingly recorded in the VAT return for December.

VAT liabilities settled by a Moldovan company for services provided to it by non-resident suppliers and subject to the reverse charge mechanism may be deducted under the same conditions above.
VAT refund
Under the VAT law, the deductible input VAT exceeding the output VAT may be partially refunded, provided the company carries out any of a range of specific business activities (e.g., exports of goods or services, international transportation services, production of bakery and diary products, leasing activity). Otherwise, the recoverable VAT amount may be carried forward only to the following months, offsetting against the Company's future output VAT liabilities.

Additionally, VAT payers performing capital investments in Moldova, except for Chisinau and Balti, are entitled to refund the recoverable VAT related to investments made starting with 1 January 2008 (with few exceptions). Specific conditions shall be met for such purposes.

VAT compliance
The fiscal period for VAT purposes is considered the calendar month.

Every VAT payer (sometimes also non-registered entities for VAT purposes) must submit VAT returns and must settle related payable VAT liabilities by the end of the month following the reporting month (except for VAT on services supplied by non-residents, but which are VAT-able in Moldova).

VAT payers are also required to keep detailed records in VAT ledgers of acquisitions and supplies performed according to a set of specific rules.

VAT payers must properly document supplies of goods or services performed (i.e., generally by issuing VAT invoices on VAT-able supplies). Under certain conditions, VAT payers are allowed to issue customised VAT invoices (i.e., with the particulars of the company in question).

VAT invoices for supplies of goods generally must be issued on the date of the supply (i.e., on the date of their transfer to customers, with certain exceptions). VAT invoices for VAT-able supplies of services are issued, under the law, upon the provision of the services. No VAT invoice is issued for pre-payments received (except for a list of specific supplies) or for export supplies.

Specific VAT invoicing requirements which are provided under the VAT law should also be considered.

Taxation of services with VAT
Under Moldovan tax law, services provided by non-resident suppliers to either residents or non-residents of Moldova, whose place of supply is in Moldova, are deemed as being imported.

The place of services supply depends on their specific nature. Therefore, if the place of supply is in Moldova (e.g., consultancy, supply of staff, legal or marketing services), 20% import VAT must be settled by the recipient company at the date the services are supplied, duly confirmed by the corresponding supporting documentation (i.e., previously, VAT was due at the date the external invoice for the respective service was settled). Otherwise, (if the place the services are supplied is outside of Moldova), no Moldovan VAT is due.
Moldova

**Custom duties**
Moldova’s current customs framework is regulated by the Customs Code, Law on Customs Tariff, International Agreements concluded by Moldova to date and by other legal acts.

In general, any kind of goods and means of transport may enter and leave the territory of Moldova without any restriction. However, certain limitations specifically provided by the legislation are in force, which cover goods and means of transport crossing the border by breaching state security, public order, environment, etc.

**Customs tariff and duties**
The Law on Customs Tariff establishes standard customs duty rates applicable upon import of goods into Moldova, depending on their specific customs tariff classification code. The Moldovan Customs Tariff is based on the Harmonised Commodity Description and Coding System.

Customs duty rates are generally indicated as percentages to be applied to the customs value (i.e., *ad valorem* duty rates) of goods imported into Moldova. The maximum *ad valorem* standard customs duty rate is 25%. There are also specific customs duty rates established, as well as combined rates.

**Customs valuation**
Under Moldovan customs legislation, the customs valuation is generally performed in accordance with the customs valuation principles in the General Agreement on Tariffs and Trade (GATT).

The customs value is determined based on one of the six provided valuation methods (i.e., transaction value, transaction value of identical goods, transaction value of similar goods, deductive value, computed value, and reserve method). If the first method is not applicable, then the second method should be applied and so forth.

**Preferential tariff treatment**
A preferential tariff treatment presumes a reduction of or exemption from customs duty, which may also be applied within a specific quota (settled either as value or quantity).

The preferential tariff treatment is granted for specific categories of goods depending on their origin and in accordance with the free trade arrangements (FTAs) to which Moldova is a party.

Moldova has concluded FTAs to date with most of the Commonwealth of Independent States (CIS) countries and is also a Central European Free Trade Agreement (CEFTA) contracting state.

From 1 March 2008 until 31 December 2012, Moldova benefits from Autonomous Trade Preferences (ATP) from the European Union, which allows unlimited duty-free access to the EU market for all products originating in Moldova, except for certain agricultural products. Such agricultural products are accepted for import into the EU either with exemptions from customs duties within the limits of specific tariff quotas (e.g., fresh, chilled and frozen meat of bovine animals, dairy products, common wheat, barley, maize, white sugar) or with exemption of the *ad valorem* component of the import duty (e.g., tomatoes, grapes, apples).
To benefit from these preferential terms for imports of goods into the EU, compliance with origin and certification requirements has to be observed.

Favourable tariff treatment
A favourable tariff treatment presumes a reduction or an exemption from customs duty upon import of specific goods into Moldova, depending on their type or final destination, according to domestic customs law or international agreements to which Moldova is a party.

Moldovan customs law provides the following exemptions, among others, from customs duty:

- Goods imported by individuals for personal use not exceeding a specific threshold;
- Fixed assets aimed at being contributed in kind to the statutory capital;
- Goods released in Moldova under transit, bonded warehouse regimes;
- Moldovan goods previously exported and released back within a three-year term in the same status, as well as compensatory products obtained under outward processing relief;
- Certain movable goods imported by legal entities carrying out leasing activities for the purpose of paying off their contractual liabilities derived from lease agreements concluded with Moldovan individuals or legal entities; and
- Goods imported by legal entities for noncommercial purposes whose customs value does not exceed EUR 50.

Customs regimes
Definitive and suspensive customs regimes are provided under Moldovan law.

Definitive customs regimes refer to import and export, while suspensive customs regimes comprise: transit, bonded warehouse, inward processing relief (with suspension), processing under customs control, temporary admission, and outward processing relief.

Of these customs regimes, the following are deemed to have economic impact: bonded warehouse, inward processing relief, processing under customs control, temporary admission, and outward processing relief.

Citizens of Moldova, as well as foreigners, are allowed to move any goods in or out of Moldova under a simplified customs regime, provided these goods are not used for business or commercial purposes. Individuals are exempt from the payment of customs duties on goods whose customs value does not exceed EUR 200 and which are not used for entrepreneurial or commercial purposes.

Note that there are specific environmental pollution tax-related regulations importers should observe.

Excise duties
The following are liable to taxation with excise duties:

- Any individual or legal entity producing and/or processing excisable goods on the territory of Moldova; and
- Any individual or legal entity importing excisable goods, unless there is no specific exemption provided.
Moldova

Businesses or individuals that produce and/or process excisable goods in the territory of Moldova (or intend to do so) must possess excise duty certificates, which must be granted by the tax authorities before these operations are actually carried out. It is mandatory for individuals or businesses, upon submitting the relevant applications to the tax authorities, to attach the details of the excise premises.

Excise duty rates are set either as fixed amounts per unit of goods, as a percentage of the customs value of goods or as a combined rate. Under certain circumstances, excise duty exemptions may apply. Some excise‑liable goods are subject to mandatory excise stamp marking and labelling.

Local taxes
Moldovan tax law also provides for location taxation in the form of taxes and duties, such as: real estate tax, tax on natural resources, tax on immovable property and tax on advertising placement, among others.

Local taxation in Moldova refers to the application of the following types of taxes and duties:

- Real estate tax (i.e., building tax and local tax).
- Tax on the following natural resources:
  - Water;
  - Mineral exploration;
  - Geological exploration;
  - Mining operations;
  - Usage of underground areas for the construction of underground structures not related to mining operations;
  - Exploitation of underground structures within the performance of entrepreneurial activity, not related to mining operations; and
  - Standing wood.
- Tax on immovable property.
- Duty for the right to perform local auctions and lotteries.
- Tax on advertising placement.
- Fee for the right to use local symbols.
- Parking tax.
- Hotel room occupancy tax.
- Resort fee, etc.

Tax on immovable property
Tax on immovable property is a local tax paid on real estate (land and/or construction on the land) by the proprietor or owner of material rights. Residents and non-residents owning real estate located in the territory of Moldova have similar obligations.

The following are subject to taxation: immovable property, including land located within or outside the municipal area, and/or improvements to the land (buildings, apartments, etc.).

The maximum tax rate on immovable property used for entrepreneurial activity (i.e., due by legal entities) is 0.1% of the property's estimated value, while the maximum tax rate on property used for agricultural activities is 0.1% of the property's book value.
The land tax rate for a legal entity is established in monetary value (i.e., MDL), depending on its destination (e.g., land for agriculture usage) and location.

The tax on immovable property is paid quarterly by legal entities and in equal instalments by individuals, by 15 August and 15 October of the current year. However, if individuals settle tax on immovable property by 30 June then a 15% tax reduction may be requested.

**Branch income**

**Branches**

Moldovan tax law does not distinguish between branches of non-resident companies and local companies established by a foreign investor. As such, a non-resident’s branch is registered in Moldova as an enterprise fully owned by the foreign investor, and is subject to the same tax regime as local incorporated companies.

**Representative offices**

Representative offices are often established as a first step to operating in Moldova. According to the tax law, a representative office can engage only in auxiliary or preparatory activities. A representative office can perform only a limited range of activities without being considered a permanent establishment of the non-resident.

All representative offices must submit by 31 March of the year following the reporting year the required Tax Reporting Statement on the activity conducted during the year concerned.

**Income determination**

Resident legal entities are taxed on their worldwide income, while non-resident entities are taxed on their Moldovan-source income.

Taxable income is computed as accounting income adjusted in accordance with tax legislation.

**Inventory valuation**

Moldovan law provides for the following inventory valuation methods: standard cost method, retail method, weighted average cost, first-in, first-out (FIFO), and last-in, first-out (LIFO).

Assets are generally valued at their acquisition cost, production cost, or market value.

**Capital gains**

The capital gains rule applies to Moldovan companies selling capital assets on an occasional basis and whose ordinary activity does not include transactions with land, buildings and shares. Shares and other investment assets (e.g., land, property) are treated under the tax law as capital assets. The income earned from the sale of capital assets is deemed to be a capital gain in the amount of 50% of the difference between the purchase price (i.e., including all costs related to the acquisition of capital assets) and the sale price. This capital gain must be included in the total gross amount of income for the year in which the shares were sold. This amount is subject to CIT. For 2010, the CIT rate is set at 0%.
Moldova

Capital gains may be decreased by capital losses registered in previous years.

**Dividends**

Dividends received by Moldovan legal entities both from Moldovan or foreign legal entities are taxed in Moldova with the applicable CIT rate (i.e., in 2010, the 0% CIT rate is in force).

Moldovan legal entities performing dividend payouts to resident individuals apply a 15% final withholding tax on the dividend amount, except those related to the fiscal periods prior to 1 January 2008.

Starting with 1 January 2010, a 15% withholding tax applies to amounts withdrawn from share equity, related to previously increased share equity, upon the distribution of net profit and/or other sources recorded in owner’s equity between shareholders (associates), according to the participation share in the equity.

**Exchange gains and losses**

Foreign exchange losses are CIT deductible in the period they are incurred. Revenues obtained from foreign exchange differences are to be included in the taxable income.

In certain circumstances (e.g., high depreciation of the national currency), foreign exchange differences should be capitalised to the value of assets in relation to which the expenses were incurred.

**Non-taxable revenues**

Moldovan tax law provides for the following main types of non-taxable revenues:

- Contributions to the capital of an entity.
- Income earned while benefiting from an income tax exemption.
- Monies received from special funds and which are used in accordance with fund destination.
- Interest derived by legal entities on bank deposits with a period exceeding three years, as well as the interest derived from corporate securities issued in the form of bonds for a period exceeding three years, is tax exempted until 1 January 2010.
- Interest derived from state bonds (up to 1 January 2015).

**Deductions**

**Deductible expenses**

As a general rule, expenses incurred by a company are deductible for CIT purposes only if these expenses are deemed as ordinary and necessary, aimed at deriving taxable income, and justified with adequate supporting documentation.

Among others, the following expenses are CIT deductible:

- Depreciation of fixed assets calculated under the diminishing balance method;
- Amortisation of intangible assets computed under the straight-line method;
- Research and development expenses incurred during the fiscal year as current expenses, should certain conditions be met;
- Business trip expenses, representation expenses, and expenses on insurance of business entities, within the limits approved by the government;
• Waste, spoilage, and expiration expenses, within the annual limitation established by the company’s manager;
• Bad debts, under certain conditions;
• Charity and sponsorship expenses borne for the benefit of specific beneficiaries, up to 10% of taxable income; and
• Interest payable, in specific cases.

**Depreciation**
Fixed assets are subject to CIT depreciation under the diminishing-balance method if their useful economic life exceeds one year and acquisition costs exceed MDL 3,000.

According to the fiscal law, fixed assets are divided into five categories. These categories are set out according to specific rules, mainly on the assets’ useful life (i.e., the number of years during which the assets’ utilisation generates economic advantages; the useful life for each type of depreciating asset is regulated by governmental decision). The depreciation rates vary as follows:

• First category – 5%;
• Second category – 8%;
• Third category – 10%;
• Fourth category – 20%; and
• Fifth category – 30%.

Intangible assets are subject to CIT depreciation according to the straight-line method.

**Thin capitalisation rules**
Different CIT deductibility rules apply for interest on loans used for carrying out operational activities and for loans used for investment activities performed on an occasional basis.

As a general rule, deductions for interest and foreign exchange losses are allowed for CIT purposes, provided such expenses are deemed as ordinary and necessary for carrying out the activities of the business. Expenses should also be incurred for the purposes of obtaining taxable income and justified by adequate backup documentation.

If the interest paid by a Moldovan company relates to its operational or day-to-day activities, the related expenses are CIT-deductible. A few other provisions should also be considered, namely the following:

• Starting in 2010, interest expenses incurred, for the benefit of individuals and legal entities (except financial institutions and micro-financing organisations), by businesses are CIT deductible limited to the base rate (rounded to the next whole percentage), established by the National Bank of Moldova in November of the previous fiscal year, and applied to short-term monetary policy transactions (i.e., the limit is 5%).
• If the loan is obtained to acquire/build fixed assets, the related interest expense should be capitalised to the initial fiscal value of assets until they are commissioned. The deductibility of this expense would be capped at the above limit. The excess difference is treated as a CIT non-deductible expense for that fiscal year.
Moldova

- If interest relates to an investment activity, the interest expense is CIT-deductible within the limit of the income derived from the investment.

**Fiscal losses**
Fiscal losses may be carried forward in five equal instalments for five consecutive years following the year the losses were incurred, provided the company records taxable income. If the company recorded fiscal losses for more than one year, such losses are carried forward in the order in which they arose. Fiscal losses are recorded on off-balance-sheet accounts.

The carryforward of the fiscal losses of previous years does not represent a tax advantage in the view of the current 0% CIT rate applicability.

**Transfer pricing (TP)**
TP regulations are currently at the initial stage of development, as the law does not list any specific TP methods. Moreover, taking into account that Moldova is not currently an Organisation for Economic Co-operation and Development (OECD) member country, there is no possibility of applying the OECD TP Guidelines.

According to the law in force, transactions carried out between related parties should observe the arm's-length principle. Transactions that do not follow this rule are disregarded for tax purposes.

In accordance with Moldovan tax law, a company is considered the taxpayer’s related party if it controls the taxpayer, is controlled by the taxpayer or both the company and the taxpayer are under the common control of a third party.

From a tax perspective, control is the ownership (either directly or through one or more related parties) of 50% or more in value of the capital or voting power of one of the companies. In this case, an individual is treated as owning all equity interest owned directly or indirectly by members of his or her family.

Two individuals are related parties if they are spouses or relatives up to the fourth degree.

Losses incurred in dealing between related parties carried out directly or through intermediaries are treated as non-deductible for CIT purposes. The Moldovan government foresees implementing TP provisions into Moldovan tax law, which will comply with the OECD TP Guidelines for Multinational Enterprises and Tax Administrations.

**Group taxation**
Moldovan tax law does not provide for group consolidation of gains or losses. No group taxation is envisaged under Moldovan tax law.

**Tax incentives**

**Investment related CIT incentives**
CIT incentives provided under the tax law are suspended during the period of applicability of the nil CIT rate.
Tax incentives for IT companies
CIT incentives are available to legal entities performing certain software development activity businesses up to 2012. In addition, their employees may also benefit from a personal income tax exemption for employment salaries earned from such companies, if certain conditions are met.

Free Trade Zones
Free entrepreneurial zones (FEZ) are territories where domestic and foreign investors can carry out entrepreneurial activities on preferential terms (i.e., favourable tax, customs, visa and other regimes). There are currently seven FEZ in Moldova.

The following types of activities may be carried out in a FEZ:

- Production of goods preferentially for export (supply of goods in the territory of Moldova does not exceed 30% of the total amount of goods and services supplied within one year);
- Sorting, packing, marking, and other similar operations of goods transiting the customs territory of Moldova; and
- Other supportive activities.

According to the customs provisions, goods are introduced into the FEZ with no VAT or customs duty and are not subject to economic policy measures, according to specific criteria. However, certain taxes in specific situations might be incurred by residents of the FEZ. Investors in the FEZ are guaranteed and protected from changes in legislation for a general period of up to 10 years, while under certain conditions this period may be extended to 20 years.

Withholding taxes (WHT)

Residents
Resident legal entities making payments to individuals must withhold and pay WHT to the budget at the following rates:

- 5% preliminary withholding of payments made for the benefit of resident individuals, unless such payments are tax exempt or are computed as employment salaries. The beneficiary deducts (i.e., recovers) the 5% WHT from his/her annual income tax due.
- 10% final withholding of an individual’s income derived from leasing, rent, usufruct of movable and immovable property, advertising campaign (according to certain specific rules), or gambling activities.
- 15% final withholding of dividends paid out to individuals, except those related to the fiscal periods prior to 1 January 2008.
- 15% preliminary withholding from royalties and interests; the beneficiary deducts (i.e., recovers) the 15% WHT from his/her annual income tax due.
- 18% final withholding from gambling revenues.

Further to the applicability of the 0% CIT rate in 2010, the WHT is not applied to payments between resident legal entities.

Non-residents
Under the 2010 domestic tax provisions, the following WHT rates apply upon payments to non-residents:
Moldova

- 15% for dividend payouts;
- 15% for (non)monetary payments whose amount is non-deductible for CIT purposes for the payer thereof; and
- 15% for other revenues.

**Double tax treaties (DTT)**
The DTTs in force between Moldova and other countries may provide for more favourable tax rates than those provided by the local provisions. For their application, the foreign beneficiary of such income should provide the paying entity with its fiscal residency certificate before the payments are actually made.

Operational DTTs to which Moldova is a party are outlined below:

Tax administration

Returns
An annual corporate income tax return must be submitted to the MTA by 31 March of the year following the reporting year. For new business entities, the fiscal year is considered the period beginning with the registration date until the end of the calendar year.

The law also provides for various reporting deadlines for payments of withholding tax and VAT.

For WHT and VAT purposes, the fiscal period is the calendar month starting the first day of the month. WHT and VAT liabilities must be declared and settled monthly by the end of the month following the reporting month.

Individual entrepreneurs and farming enterprises with an annual average number of employees not exceeding three and not registered as VAT payers must submit a unified tax return, if certain conditions are met.

Moldovan tax law provides for a specific procedure for taxpayers submitting adjusted tax returns (after the taxpayer identifies previous errors) within a limited period of time.

Payment of tax
Taking into account that, as of 1 January 2008, the nil CIT is applied in Moldova, no income tax needs to be paid.

Still, legal entities that exceed the legally allowable limit on sponsorship expenses must declare and pay the applicable CIT by 31 March of the year following the reporting year.

Fines and penalties
From 1 January 2010, the MTA is entitled to apply a fine of 15% to the amount by which a taxpayer under-reported its taxable income for CIT purposes.

Taxpayers who settle amounts as assessed by the MTA within three business days and have no other outstanding liabilities qualify for certain tax incentives (i.e., 50% reduction of fines).
Moldova

In addition, certain special provisions regarding tax evasion apply. Tax evasion is assessed on a case-by-case basis but usually assumes the insertion into financial statements, tax returns, and accounting documents of false information on revenues and expenses. In addition, hiding other taxable income may also be considered tax evasion.

Under tax law, the MTA is entitled to apply a fine in the amount of the undeclared tax if this is a result of tax evasion.

Should the amount of the tax due exceed MDL 50,000, the tax evasion is regarded as a criminal offence. According to the Moldovan Criminal Code, legal entities can be punished for tax evasion with a fine up to MDL 120,000 and preclusion from performing certain activities or winding-up.

In 2010, the daily penalties for failing to pay social security contributions is 0.1%; for health insurance contributions, 0.1%; and for other taxes, 0.027%.

**Rulings**

The law does not provide for the possibility of obtaining binding rulings. However, taxpayers that inadequately computed tax liabilities due to incorrect written explanations issued by the MTA may not be subject to sanctions (i.e., fines and late-payment penalties). Tax liabilities may still be recomputed by the MTA. Written explanations are issued by the MTA free of charge and may remain valid for an indefinite period of time, unless cancelled by new legislation or other rulings. Such explanations are generally issued by the Moldovan competent authorities during a period of up to one month.

Significant developments

The loss carryforward provisions were amended on 25 August 2009. Previously the loss carryforward period for all business sectors was two years. Now, companies operating in the infrastructure and mining sectors can carry their net operating and capital losses forward for a four-eight year period depending upon the exact nature of their business. In other sectors, losses are still allowed to be carried forward for two years.

Taxes on corporate income

Mongolian corporate income tax (CIT) is levied at the following rates, using a progressive-rate scale that ranges from 10% to 25%, as follows:

- 10% applies to the first MNT 3 billion of annual taxable income; and
- 25% applies to any excess of MNT 3 billion of annual taxable income.

However, certain types of income are taxed at different tax rates:

<table>

Corporate residence

Residents and non-residents
A resident legal entity is an economic entity formed under the laws of Mongolia or a foreign economic entity that has its headquarters (place of effective management) in Mongolia.

A non-resident company is a foreign economic entity that conducts its business activities in Mongolia through a permanent establishment (PE) or a foreign economic entity that derives income from Mongolia in forms other than a PE.
A PE includes the following that partially or wholly conduct business activities of a foreign economic entity in Mongolia:

- Branches;
- Plants;
- Trade and services providers; and
- Oil and natural gas wells or mines.

As yet, the concept of a PE is not well developed.

**Other taxes**

**Value-added tax (VAT)**

VAT at the rate of 10% is imposed on the supply of taxable goods and services in Mongolia and on imports into Mongolia.

VAT is levied on the following:

- Goods sold in Mongolia;
- Work performed and services rendered in Mongolia;
- All goods imported into Mongolia to be sold or used; and
- Goods exported from Mongolia for use or consumption outside Mongolia.

**Excise tax**

Excise tax is levied on goods manufactured in or imported into Mongolia, such as tobacco, alcohol, gasoline and diesel fuel, and passenger vehicles. Excise tax is also levied on the physical units of special-purpose technical devices and equipment used for betting games and gambling, and activities of individuals and legal entities that conduct such activities.

**Immovable property tax**

An immovable property tax is levied at 0.6% of the value of the immovable property. For tax purposes, the value used is the value registered with the government registration authority. If the property is unregistered, the insured value is used. In the absence of either a registered or insured value, the accounting value is used.

This tax does not apply to property owned by persons and financed through the state budget, or to all dwelling houses and buildings and constructions for public use.

**Stamp duty**

Under the Law of Mongolia on State Stamp Duties, stamp duties are imposed on the following:

- Monitoring of and decisions on matters of legal status by a court of law;
- Registration of business entities and organisations;
- Permission to register business entities with foreign investment and allowing persons to be employed with representative offices of foreign organisations;
- Permission to carry out services and carry out production which requires special permission or expertise;
- Grant of certification for copyright, patent, or trademarks;
- Registration of copyrights;
• Granting of permission to carry out activities with respect to securities and registration of securities, and for authorisation to issue and register securities; and
• Other services.

The amount of duty varies according to the type of services involved.

**Customs duty**
A flat customs tariff of 5% applies with respect to goods imported into Mongolia, except computer technology devices, medical equipment and livestock. Heavy machinery and equipment purchased and imported by entities investing in priority sectors with foreign-sourced funds are exempt from the customs tariff.

Export duties apply to certain exported goods, such as waste iron, aluminium, copper, brass, and indentured cashmere.

**Windfall profits tax**
A windfall profits tax is imposed on the sale of gold and copper ore and concentrate if the prices exceed a certain base price. The tax is levied at the rate of 68% on gold and copper profits when profits reach USD 850 per ounce and USD 2,600 per ton, respectively. Note that windfall profits tax is to be annulled from 1 January 2011.

**Branch income**
The repatriation of profits from branches of foreign legal entities is subject to branch profits tax at a rate of 20%.

**Income determination**
Mongolian legal entities are taxable on aggregate annual income earned worldwide. Non-resident legal entities carrying out business activities in Mongolia are taxable on the income earned in the territory of Mongolia.

Common tax adjustments:

• Finance lease payments (except for interest); and
• Fines and penalties.

Any other expenses not specifically stated as deductible by the Mongolian Tax Code.

**Bribes, kickbacks, illegal payments**
Tax law is silent on these matters. However, per anti-corruption law, monetary amount involved for such payments will be confiscated and criminal proceedings will be applied.

**Capital vs. ordinary transactions**
Tax treatment is same for both types of transaction except immovable property sales income which is subject to income tax of 2%.

**Dividend income**
Dividend income earned by Mongolian resident entity is subject to income tax of 10%. Dividend income to be remitted out of country to foreign tax resident is subject to
Mongolia

withholding tax at 20%, but which may be reduced by an applicable double taxation treaty (DTT).

Foreign investment
Tax stability and other incentives are available for investments of a certain level.

Foreign income (anti-deferral regime, unremitted earnings)
Unremitted earnings have same tax treatments as ordinary earnings. Mongolia does not have an anti-deferral regime with regard to condition or countries.

Interest income
Interest income is subject to a special income tax of 10%.

Inventory valuation
There is no specific provision in the tax law on this matter.

Partnership income
Partnership income has same tax treatment as CIT.

Rents/royalties income
Rents/royalties income is treated as an income and, therefore, subject to tax implication. Rent income is included in taxable income for tax determination whereas royalty income is taxed at a special rate of 10%.

Stock transactions
Capital gains on stock transactions are taxable income.

Unrealised exchange gains/losses
Unrealised exchange gain/loss does not have a tax implication.

Deductions
Expenses mostly associated with generating aggregate annual income are deductible for corporate income tax purposes (provided proper documentation is in place). However, there are limits with respect to the deductibility of interest expense.

The corporate income tax law stipulates that finance lease payments (except interest) and fines and penalties are not deductible for tax purposes.

Common tax deductions
Interest expense, meals, and officers’ compensation from which the social insurance and personal income tax is deducted are tax-deductible whereas entertainment expenses are not deductible for tax purposes. As life insurance is not in practice in Mongolia, tax law is silent on this issue.

Accrued expenses
Accrued expenses are tax-deductible.

Bad debt
Bad debt is not tax-deductible.
Charitable contributions
Charitable contributions are not tax-deductible except donations to the fund of vocational training.

Contingent liabilities
Contingent liability is not tax-deductible.

Depreciation of fixed assets/amortisation of intangibles
Depreciation of fixed assets/amortisation of intangibles is tax-deductible.

Goodwill
There is no specific provision in the tax law on this matter.

Organisational and start-up expenses
Organisational and start-up expenses are tax-deductible.

Payments to foreign affiliates
Deductibility depends on the nature of the payment:

- Interest payment – deductible but with restrictions.
- Dividend payment – non-deductible.
- Technical assistance service payment – deductible.
- Other services – deductible.

Pension expense
Compulsory pension insurance premium paid to Social Security Authority of Mongolia is deductible. Additional voluntary insurance premiums are tax-deductible but shall not exceed 15% of taxable income. Pension provision or internal pension fund expense is not tax-deductible.

Payment for directors
If a payment for directors is a salary payment from which the social insurance and personal income tax is deducted, it is considered as deductible.

Net operating losses
Net operating losses generally may be carried forward for up to two years. However, the annual amount of loss deductible from taxable income may not exceed 50% of the taxable income in the tax year.

Starting 1 January 2010, legal entities involved in the infrastructure and mining industries may carryforward 100% of their losses for up to four to eight years, depending on their investment period and based on government regulations.

Group taxation
There are no rules permitting grouping for tax purposes in Mongolia.

Tax incentives
A 50% tax credit is available for an economic entity that produces or plants the following products:
Mongolia

- Cereal, potatoes, and vegetables;
- Milk;
- Fruits and berries; and/or
- Fodder plants.

A 10% investment credit may be available for certain types of industries.

**Withholding taxes (WHT)**

Domestic inter-company dividends are exempt from WHT. Dividends, interest, and royalties paid; goods sold; and work/services provided to non-residents are subject to withholding tax at a 20% rate. Dividends, interest, and royalties paid to resident individuals are subject to withholding tax at a 10% rate.

**Double taxation treaties (DTT):**

**Tax administration**

*Tax returns and assessment*

The tax year is the calendar year. Companies must submit a quarterly return by the twentieth day of the month following the end of each quarter.

An economic entity or organisation that has withheld tax from a payment of dividends, royalties, sale of rights or a payment of income to a participant should transfer the withholding tax to the budget within seven working days. Tax withheld relating to the sale of immovable property should be transferred to the budget within 10 working days. A withholder must prepare and submit a quarterly return of the tax deducted by the twentieth day of the first month of the following quarter and an annual return by 10 February after the end of the tax year.

*Payment of tax*

Tax is paid in advance by the twenty-fifth day of each month. In practice, the Mongolian tax authorities allow concessions as follows:

A company with annual taxable income of less than MNT 500,000 may pay tax on a quarterly basis.

Where total tax paid exceeds the tax liability, the excess may be credited against other taxes due or credited against future tax payments. The overpayment also may, theoretically, be refunded, however, the practice of refunding in Mongolia is less clear and consistent.
Significant developments

The most recent changes to the corporate profit tax (CPT) law, effective from 1 January 2010, introduced taxation of 100% rather than 50% of capital gains. The amendments reduced a number of tax incentives, including abolishing tax deductions for newly employed staff and tax incentives for investment in efficient production of energy.

Taxes on corporate income

The taxable profit of the entities operating in Montenegro is taxed at 9%. This tax is levied at a state level and no local corporate income taxes exist.

Corporate residence

A legal entity is considered to be a tax resident if it is incorporated in Montenegro. In addition, a foreign corporation may also be deemed a Montenegrin tax resident if the corporation has a place of effective management in Montenegro.

Other taxes

Value-added tax (VAT)

VAT replaced the previous sales tax system in April 2003. The main principles of the Montenegrin VAT are in line with the European Union Sixth Directive guidelines. Taxable supplies are subject to a general 17% VAT rate; however, certain supplies are taxed at reduced 7% and 0% rates.

Taxable amount

In principle, consideration (in cash, goods, or services) received for supplies, including taxes except VAT (e.g., customs, excise duty), and direct costs (commissions, cost of packing, transport) comprises the VAT base.

If the consideration is not paid in cash, or if an exchange of goods for services takes place, the tax base will be the market value of the goods or services received at the time of supply.

Registration

Registration for VAT in Montenegro may be either as voluntary or mandatory. Voluntary VAT registration is possible for small taxpayers who have not realised turnover exceeding EUR 18,000 in the last 12-month period. Once registered, a company may not apply for deregistration for at least three years.
VAT registration is mandatory for an entity that realises turnover exceeding the EUR 18,000 threshold in any 12-month period.

**VAT liability**
A calendar month is the period for which VAT is calculated and paid (i.e., a VAT return must be submitted and VAT liability cleared monthly). VAT calculated on imports is paid along with custom duties.

**Payroll tax**
Employment income includes all receipts paid or given to an individual based on employment (salaries, pensions, benefits in kind, insurance premiums, benefits and awards above the non-taxable thresholds).

Income generated through other types of personal engagements similar to employment (temporary jobs and similar) is also considered employment income.

Employees are the taxpayers, however, the employer is responsible for calculating and withholding personal income tax on behalf of its employees.

The taxable base is gross salary, including fringe benefits.

Employment income is subject to withholding tax at a flat rate of 9% from 1 January 2010.

**Social security contributions**
Social security contributions are calculated and withheld by an employer from the salary paid to an employee. Unlike two other types of social security contributions, only pension and disability insurance contributions are subject to a specific annual cap (EUR 31,015.60 for 2010). These contributions are payable by the employer and employee at different rates. The amount borne by the employer is treated as an operating cost, while the portion payable by the employee is taken from the gross salary.

The rates are as follows:

- On behalf of employee:
  - Pension and disability insurance 15%;
  - Health insurance 8.5%; and
  - Unemployment insurance 0.5%.
- On employer’s behalf:
  - Pension and disability insurance 5.5%;
  - Health insurance 3.8%; and
  - Unemployment insurance 0.5%.

**Excise duty**
Legal entities that are importers or producers of the following products are subject to the excise duty:

- Alcohol and alcohol beverages;
- Tobacco products; and
- Mineral oils, their derivatives and substitutes.
Montenegro

When excise is paid for the mentioned products, there is no difference with respect to the origin of the product (local and imported). Excise duty can be prescribed as a fixed amount and/or as a certain percentage (ad valorem).

Environmental charges
Legal entities are subject to environmental charges for the following:

- Use of firing or electrical feed equipment with power greater than 1MW;
- Import of substances harmful to the atmosphere;
- Production or deposit of dangerous waste; and
- Tax for use of road vehicles (Vignettes).

Property tax
Property tax is payable by legal entities who own or have user rights over real estate located in Montenegro. The tax is levied at proportional rates, ranging from 0.08% to 0.8% on the market value of assets as of 1 January of the current year. A taxpayer is obliged to submit a tax return to the tax authorities within 30 days from the acquisition date. Tax is payable in two instalments, based on decisions issued by the tax authorities.

Property transfer tax
Transfer tax is payable on the acquisition of ownership rights over immovable property at a 3% rate.

The taxable base is the market value of the immovable property at the time of the acquisition. A taxpayer (i.e., the acquirer of immovable property) is obliged to submit a tax return within 15 days from the contract date. The liability is payable within 15 days from the receipt of the tax administration decision.

Branch income
Non-residents carrying out business in Montenegro through a permanent establishment (PE) are taxed on their Montenegrin source income at a rate of 9%. A branch is considered to be a PE.

Income determination
Taxable profit is calculated by adjusting the accounting profit (determined in accordance with IFRS and accounting legislation) in accordance with the provisions of the CPT law.

The following expenditures are recognised for corporate profit tax purposes up to the prescribed threshold:

- Depreciation computed in accordance with tax legislation;
- Expenses for health care, scientific, educational, humanitarian, religious, environment protection and sports-related purposes, up to 3.5% of total revenue;
- Entertaining expenses up to 1% of total revenue;
- Membership fees paid to chambers of commerce and other associations (except political parties) up to 0.1% of gross revenue;
- Provisions for redundancy payments and jubilee awards recognised as expenditures up to the amount prescribed by the labour law;
Montenegro

- Provisions made by banks and insurance companies will be deductible as expenditures for CPT purposes in an amount not exceeding the amount prescribed by the legislation that regulates operation of these entities;
- Provisions for special risks of brokers and dealers up to amount prescribed by the securities law; and
- Provisions for renewable natural resources, the warranties for the sale of goods and service (guarantee period) and the expected loss from court process (delicate agreements) if accounted for in accordance with the accounting legislation.

**Provisions and write-offs**
Write-offs and provisions for doubtful debts are considered deductible, provided that:

- Written-off/provided receivables were previously included in taxpayer’s revenues;
- Doubtful debts were written-off/provided as uncollectible; and
- Proof of unsuccessful collection of these debts exists.

**Inventory valuation**
The cost of materials and of goods sold is tax-deductible up to an amount calculated by applying the average-weighted-cost method or the first-in, first-out (FIFO) method. If another method is used, an adjustment for tax purposes should be made.

**Capital gains**
Capital gains realised by the sale or transfer of real estate or other property rights, as well as shares and other securities, are subject to the 9% CPT rate. Recent law changes, applicable from January 2010, levy tax on capital gains at 100% rather than 50% of the capital gains amount.

Capital gains may be offset against capital losses occurring in the same period. A capital loss may be carried forward for five years.

**Inter-company dividends**
Dividend income of the recipient is exempt from corporate taxation in Montenegro if the distributor is a Montenegrin corporate taxpayer.

**Foreign income**
Resident taxpayers are entitled to a tax credit for up to the amount of corporate tax paid in another state on income realised in that state. This tax credit is equal to the tax paid in another country, but may not exceed the amount of the tax that would have been paid in Montenegro.

**Deductions**

**Depreciation and depletion**
Depreciable assets are tangible and intangible assets with a useful life of at least one year and an individual acquisition value of at least EUR 300.

Intangible and fixed assets are divided into five depreciation groups, with depreciation rates prescribed for each group (I – 5%, II – 15%, III – 20%, IV – 25%, and V – 30%). A straight-line depreciation method is prescribed for assets classified in the first group (real estate), while a declining-balance method is applicable for assets classified in the other groups.
Montenegro

**Net operating losses**
The taxpayer is entitled to carry losses incurred in an accounting period forward over the following five years.

**Payments to foreign affiliates**
In general, no specific restrictions apply for payments made to foreign entities.

Supplies of goods or services from a foreign group entity not established in Montenegro to a Montenegrin entity must be valued at arm's length. Excess expenses recorded over market value are treated as non-deductible expenses.

With respect to payment of charges of a PE, CIT law provides that administrative costs charged by the non-resident head office are non-deductible for CIT at the level of PE.

**Taxes**
The basic deductibility rule is that business expenses incurred for business purposes are CIT deductible. Following that rule, CIT law provides for full deductibility of taxes. However, penalty interest for late payment of taxes is not CIT deductible.

**Group taxation**
Tax consolidation is permitted for a group of companies in which all of the members are Montenegrin residents and the parent company directly or indirectly controls at least 75% of the shares in the other companies. Each company files its own tax return and the parent company files a consolidated tax return for the entire group.

Each company is taxed based on its contribution to the consolidated taxable profit (or loss) of the group.

Tax consolidation is binding for at least five years.

**Tax incentives**
The CPT law provides only two tax incentives related to businesses in non-developed municipalities and nongovernment organisations. The amendments to the CPT law greatly reduced the incentives available, including abolishing the tax incentives for newly employed staff and energy-efficient production.

**Tax exemption/tax credit for newly established business in non-developed municipalities**
Newly established production companies located in non-developed municipalities are entitled to a three-year tax exemption on the profits attributable to operations in these municipalities. The exemption period starts from the year in which production began.

**Tax exemption for non-governmental organisations**
Non-governmental organisations (NGO) registered for business activity are permitted to decrease the corporate tax base by EUR 4,000 with the condition that this money is used for realisation of the main goals of an NGO.
**Withholding taxes (WHT)**

Montenegrin CPT law imposes WHT on income distributed to a non-resident realised from a Montenegrin source.

The scope of the withholding tax applies to dividends and profit distribution, capital gains, interest, royalties, intellectual property rights fees, and rental income, as well as fees for consulting, marketing, and audit services.

Exceptionally, distributions of dividends and share of profits are subject to withholding tax if the recipient is a Montenegrin resident or non-resident (both individual or legal entity).

The general withholding tax rate is 9%.

Application of a double-tax treaty may reduce or eliminate Montenegrin withholding tax. To qualify for the beneficial rates prescribed by the treaty, a non-resident must prove tax residency of a relevant treaty country and beneficial ownership over the income. No further guidance has been issued up to date.

**Tax administration**

**Returns**

The tax year in Montenegro is the calendar year. Tax returns and supplementary documents (e.g., tax depreciation form) must be filed with the tax authorities by the end of March of the following year.

**Payment of tax**

Amendments to the corporate profit tax applicable from 1 January 2010 abolished monthly advance payments of the corporate tax and introduced annual payment of tax.
Significant developments

Mozambique has been undergoing major tax reform since the beginning of 2003, which has consisted of replacing the existing corporate income tax and strengthening the tax administration by improving collection procedures and increasing enforcement capacity. Effective as from 1 January 2003, a new Corporate Income Tax Code (“Código do Imposto Sobre o Rendimento das Pessoas Colectivas”, or CIRPC) came into force and was further amended on 1 January 2008. In September 2009 the Corporate Income Tax Code was further again to accommodate the introduction of IFRS rules in Mozambique.

Mozambique also introduced, with effect from 1 July 2002, a new Code of Fiscal Benefits, replacing the general tax benefits conceded under the previous Code as well as sectarian incentives granted under specific legal diplomas. In January 2009, the referred Code was amended by changing and, in some situations reducing, some of the customs and tax incentives granted under the previous Code.

Taxes on corporate income

Corporate tax is payable on corporate income at the rate of 32%. For tax years prior to 2010, income arising from agricultural or cattle breeding activities was subject to a reduced rate of 10%.

Capital gains are considered as profit and, therefore, taxed as normal income of the company jointly with other income earned during a certain year at the general tax rate of 32%.

Undocumented expenses as well as illicit or confidential expenses are taxed separately at a rate of 35%.

Corporate residence

Corporate residence is determined on the basis of a company’s place of incorporation or effective management. Thus all companies with headquarters in Mozambique are considered tax residents, as well as any permanent establishments (PE) of non-resident entities.
Other taxes

Value-added tax (VAT)
VAT is chargeable on the sale of most goods and services as well as on imports. The standard rate is 17%. Usually, VAT is recoverable by corporate entities, except for those engaged in special business activities (e.g., financial and insurance operations, leasing (exemption with restrictions), sale of immovable property, some exempt activities, etc).

Property transfer tax
In Mozambique this tax is charged on transfers of real estate excluding the land, which is owned by the State. The rate of tax is 2% of the selling price of the building.

Gifts and inheritance tax
This tax is payable on transfers of all movable and immovable property by way of gift or bequest to persons resident in Mozambique or with respect to possessions situated in Mozambique. The tax is payable by the beneficiary and the rates vary from 0% to 15%, depending on the extent of the relationship between the donor and donee and the value of goods or rights transferred.

Stamp tax and service charges
Various documents require the payment of stamp duties. Service charges are payable for the performance of certain services for official purposes, such as those rendered by public notaries. These duties have been recently amended and vary generally from 0.03% to 50% on the amount of the transaction supported by the document to be stamped. In some other cases, the stamp tax comprises fixed amounts, ranging from MZN 0.50 to MZN 5,000.

Municipality taxes
Municipality taxes that should be considered for corporate purposes include:

- Municipality tax on real estate – This tax replaces the Property Tax on Buildings on immovable property situated within the municipality. It is levied on the value of immovable assets owned or possessed by corporate entities. Effective tax rates range from 0.2% to 1% of the building value, depending on the decision of each municipality.
- Municipality tax on economic activities – Levied on commercial or industrial activities carried out within the municipal territory. The tax depends on the activity being carried out, adjusted by coefficients, which are based on the zone and total area of the premises in square metres. In Maputo, this tax is calculated based on the following formula:

  \[
  \text{Rate} = \text{Basis rate} \times \text{Index of location} \times \text{Index of area occupied}
  \]

  Where,

  - The basis rate varies from MZN 2,000 to MZN 4,000, depending on the nature of the activity carried out:
    - MZN 2,000 for industry;
    - MZN 2,500 for commerce;
    - MZN 3,000 for services in general; and
    - MZN 4,000 for hotels.
Mozambique

- The index of the location varies from 1 to 1.5 depending on the location of the premises within the municipality.
- The index of the area occupied varies from 1 to 1.5 depending on the nature of the activities and the space occupied by the premises (per m²).
- The tax payable is the amount resulting from applying the basic tax due on certain coefficients that are based on both the location and total area of the premises in square metres.

- Municipal surtax – This local surtax (called Derrama) may be imposed by the municipalities at a rate up to 15% of the following taxes: (i) corporate tax; and (ii) tax on real estate.

  The local surtax is levied in relation to profits derived from activities carried out in the territory of each municipality.

  When the municipalities decide to impose the surtax, the final corporate taxation will be increased by adding the surtax (at a rate of up to a maximum of 15%) to direct taxes (e.g., corporate tax). For example, normal corporate tax (32%) + municipal surtax (15%) = 32% + 4.8% = 37.25%, final corporate tax rate.

**Branch income**

From a tax perspective, branches are liable for Mozambican corporate tax as a separate entity and, therefore, the regime is the same that would apply to a Mozambican resident company. However, on the grounds that branches do not distribute dividends, no withholding tax would apply to the after-tax profits arising in Mozambique.

**Income determination**

**Inventory valuation**

Special rules regarding valuation of inventories are waiting for approval from the Minister of Finance. In the meantime, all inventory valuation methods generally accepted and according to international accounting principles are permitted for tax purposes, provided that the method is:

- Used by the taxpayer consistently; and
- Based on arm's-length prices duly documented and effectively exercised.

Based on the above assumptions, last-in, first-out (LIFO) and first-in, first-out (FIFO) methods are allowed. Write-downs and depreciation of inventories are not allowed. Conformity between book and tax reporting is required.

In principle, large companies will adopt IFRS beginning in 2010. New legislation in this regard is being currently prepared.

**Capital gains**

Capital gains less any capital losses derived from the sale or disposal of tangible fixed assets, including insurance indemnities received in case of accident, are taxed as part of normal income. If a taxpayer reinvests the sale proceeds within three tax years following the year of sale, the gain may be deferred until the end of the third year. A four-year reinvestment period may be accepted provided a prior application is submitted to the Minister of Finance. However, if the taxpayer does not realise the
reinvestment, the corporate tax that was not assessed during the three-year period will be assessed, along with compensatory interest.

**Inter-company dividends**

In the case of resident companies, income arising from dividends is excluded from taxable income, provided that the shares that a resident company holds in another resident company represents at least 25% of the total capital and are held for at least two consecutive years (or with an undertaking to hold the shares for this period). The same applies to income arising from risk capital companies and holding companies (Sociedade Gestora de Participações Sociais (SGPSs)) or from subsidiaries as a result of the application of technical reserves in insurance companies. However, in the case of holdings, the percentage of share capital decreases to 10% and shares should be held for at least one year.

If the shareholding falls outside the parameters indicated above, the tax withheld (20%) constitutes a payment on account. A tax credit corresponding to 60% of the corporate tax is attributable to the gross-up dividend.

**Foreign income**

Mozambican resident companies are taxed on the total income earned on a worldwide basis. Double taxation treaties allow tax paid abroad to offset Mozambican corporate tax. Mozambique has signed double tax treaties (DTT) with Portugal, Mauritius, Italy, the United Arab Emirates, South Africa, and Macau.

**Other significant items**

Companies generally may create specific provisions for doubtful or bad debts and also for depreciation of stock, which are allowed as tax-deductible costs.

**Deductions**

**Depreciation and depletion**

Depreciation is a deductible cost for corporate tax purposes, according to the regulations of the Corporate Income Tax Code, subject to restrictive and specific rules. Depreciation rules are contained in a specific legal diploma, which is Portaria nº 20 817, of 27 January 1968, which established the rates and limits legally allowed for depreciation purposes.

The main legal principles regarding depreciation are as follows:

- The establishment of the applicable rates falls under the competence of the Ministry of Finance.
- The calculation is carried out on a straight-line basis in accordance with the rates applicable.

The main depreciation rates are:

</tbody>
</table>

### Notes

1. Subject to certain conditions set forth by the tax authorities.
2. Depreciation allowed in cases of effective reduction of value within the limits regarded as reasonable by the tax authorities.

### Net operating losses

Carryback of losses is not allowed in Mozambique. On the other hand, losses may be carried forward for a period of five consecutive years.

### Payments to foreign affiliates/related companies

Any payments to non-residents are allowed as deductible expenses provided that the amount does not exceed normal rates and that the taxpayer is able to prove that a business transaction was carried out with the non-resident company. The tax authorities may redetermine taxable income if, due to a special relationship between the Mozambican and non-resident companies, certain conditions existed that allowed a calculation of profit that differed from the profit that would have been calculated without the existence of such relationship (i.e., the arm’s-length principle).

Where loans from related foreign corporations exceed twice the corresponding equity in the borrowing Mozambican corporation, the interest on the excess borrowing is not tax-deductible. Thin capitalisation rules are in force.

### Taxes

Taxes paid in relation to the activities of a company are tax-deductible, excluding the corporate tax itself.
**Group taxation**

There are no group taxation provisions available in Mozambique. Each member of a group of companies preparing consolidated accounts for accounting purposes must file separate tax returns in order to be taxed on its profits on a stand-alone basis.

**Tax incentives**

**Inward investments**

In addition to the guarantees of ownership and remittance of funds abroad, the Mozambican government also guarantees the concession of tax and customs incentives. The incentives vary depending on whether a company is starting a new venture or rehabilitating one, and also on the nature of the project to be developed. The incentives discussed in this section are the generic benefits applicable to standard projects. Certain specific benefits also may be applicable depending on the activities of the industry for the investment project (e.g., industry, agriculture, tourism, science and technology, etc.).

**Exemption of import duties**

An exemption from customs duties and VAT applies upon the importation of capital equipment, listed in Section “K” of the Customs Tariff Schedule.

**Tax credit for investment**

Investments in new fixed tangible assets used in the operations of an enterprise within the Mozambican territory may benefit from an investment tax credit equal to 5% of the total investment realised, for a period of five years. This investment tax credit is offset against corporate income tax, up to the total amount of the tax assessment. This incentive does not apply when the investment in tangible fixed assets is with respect to the construction, acquisition, restoration or extension of buildings, passenger vehicles, furnishings and articles of comfort and decoration, leisure equipment, advanced technology or other assets not directly associated with the production activity carried out by the enterprise. When the project is located outside Maputo City, this tax credit is increased to 10%.

**Accelerated depreciation**

New immovable assets, used for the furtherance of the business, may be depreciated by increasing to 50% the normal depreciation rates approved by law. This benefit is also granted to rehabilitated immovable assets, machinery, and equipment used in agro-industrial activities.

**Deduction from taxable income**

The amount invested in specialised equipment classified as advanced technology, during the first five years from the date of commencement of activity, may be deducted from taxable income for purposes of calculating the corporate income tax up to a maximum of 10% of taxable income. Also, investment expenditures for professional training of Mozambican workers shall, up to a maximum amount of 5% of the taxable income (10% in case of professional training related to new/high technology equipment), be deductible from taxable income for the purposes of calculating the Corporate Income Tax during the first five years from the date of the commencement of such activities.
Mozambique

During a period of five years counting from the date of exploration, the following expenditure may be treated as deductible expenditures for purposes of calculating the corporate income tax:

- In the case of undertakings carried out in the City of Maputo, 110% of the value of expenditures for the construction and rehabilitation of roads, railways, airports, telecommunications, water supply, electric energy and other works of public utility, is deductible for tax purposes;
- In the case of undertakings carried out in the rest of the Provinces, an amount equal to 120% of the expenditures referred to in the paragraph above is deductible for tax purposes; and
- In the case of expenditures for the acquisition for personal ownership of works of art and other objects that are representative of Mozambican culture, as well as activities that contribute to the development of such works, 50% of the expenditures is deductible for tax purposes.

**Withholding taxes (WHT)**

Any non-resident entity carrying out economic activities in Mozambique, without being registered as a taxpayer, is liable to a final and definitive 20% withholding tax that is applied on all income earned. An exception exists for telecommunications and international transport as well as the respective installation and assembly of equipment made by those same entities, which are subject to a 10% withholding tax rate.

Both Mozambican resident and non-resident recipients are liable to tax on dividends at a tax rate of 20%.

**Tax treaties**

Mozambique has double tax treaties in force with Portugal, Mauritius, Italy, the United Arab Emirates, South Africa, and Macau. In accordance with these DTTs, the following tax rates will be applicable to dividends, royalties, and interest:

<table>

**Tax administration**

**Returns**
The tax year is, as a general rule, the calendar year. A different tax year may be applied (if previously authorised by the Ministry of Finance) for companies that carry out activities that justify a different year or non-resident companies with a permanent establishment in Mozambique.

Corporate tax assessment must be prepared by the companies on annual returns, based on the accounting records and on adjustments prescribed by the tax regulations.

The submission of the annual tax return is due by the last working day of May for companies using the calendar year as their tax year. For companies with a tax year that is not coincident with the calendar year, the presentation of the tax return is due by the last day of the fifth month subsequent to the respective year-end.

**Payments**
Mozambican companies and non-resident companies with a permanent establishment in Mozambique must pay corporate tax as follows:

- In three advance on account payments (based on 80% of the preceding tax year’s corporate income tax), due in May, July, and September of the respective tax year; or if the tax year chosen is not coincident with the calendar year, on the fifth, seventh, and ninth months of the respective tax year; and
- In three special advance on account payments (0.5% of the preceding year’s turnover less the advance on account payments made in previous years, which cannot be less than MZN 30,000 or more than MZN 100,000) due in June, August, and October of the respective tax year or if the tax year chosen is not coincident with the calendar year, on the sixth, eighth, and tenth months of the respective year.

Significant developments

The latest annual budget speech was held on 30 March 2010. No tax changes were announced for the coming year. However, in the 2009 budget speech, presented by the Minister of Finance, Saara Kuugongelwa-Amadhila, amendments were proposed. Some of these amendments have since been promulgated but those that have not yet been promulgated are not yet effective.

Some of the announcements are summarised as follows.

Environmental taxes
An environmental levy was announced on disposable products that are harmful to the environment. No further details are available and this amendment has not yet been promulgated.

Value-added tax (VAT)
The zero-rating of essential basic items, such as milk and sugar, became effective on 1 May 2010. VAT will thus be levied at a rate of 0% on these products and registered vendors may claim input VAT paid on products acquired in the course of selling such essential products (provided that it is not denied input tax credit or subject to apportionment where both taxable and tax exempt supplies were made).

Medical services, previously exempt from VAT, are now zero-rated. VAT, will thus, be levied at a rate of 0% on these products and registered vendors may claim input VAT paid on products acquired in the course of selling such essential products (provided that it is not denied input tax credit or subject to apportionment where both taxable and tax exempt supplies were produced).

Income tax
The corporate tax rate for companies (other than mining companies, but including branches) was reduced from 35% to 34%, effective for financial years beginning on or after 1 January 2009.

The reduction in the corporate tax rate also affects the following taxpayers and tax rates:

• Long-term insurance companies are taxed at 40% of gross investment income multiplied by the corporate tax rate. The effective rate has now been reduced from 14% (40% x 35%) to 13.6% (40% x 34%).
• The withholding tax on royalties or similar payments is reduced from 10.5% (30% x 35%) to 10.2% (30% x 34%).
Transfer duty
It was announced that transfer duty will be payable on the transfer of membership interest in a close corporation or shareholders’ interest in a company in terms of the 2008 budget speech of the Minister. No legislation in this regard has been promulgated.

Transfer duty rates have been amended, effective 1 May 2010, as follows:

**Natural person: Non-agricultural**

<table>
<thead>
<tr>
<th>Value of property (NAD)</th>
<th>Transfer duty payable</th>
</tr>
</thead>
<tbody>
<tr>
<td>0–400,000</td>
<td>Nil</td>
</tr>
<tr>
<td>400,001–800,000</td>
<td>1% of the value exceeding NAD 400,000</td>
</tr>
<tr>
<td>800,001–1,500,000</td>
<td>NAD 4,000 + 5% of the value exceeding NAD 800,000</td>
</tr>
<tr>
<td>1,500,001 and above</td>
<td>NAD 39,000 + 8% of the value exceeding NAD 1,500,000</td>
</tr>
</tbody>
</table>

**Natural persons: Affirmative Action Loan Scheme for commercial farmland**

</table>

**Taxes on corporate income**

Namibia has a source-based tax system, which means that income from a source within Namibia or deemed to be within Namibia will be subject to tax in Namibia, unless a specific exemption is available.

Income earned by foreign companies from a source within or deemed to be within Namibia will be subject to tax in Namibia. In such case, the foreign entity must determine whether it is obliged to register a local entity or branch. A company is required to register a branch if it has established a place of business in Namibia. A local subsidiary company may be registered as an alternative to a branch.

In the event that Namibia has entered into a double tax agreement with the country where the foreign company resides, such entity will only be taxable in Namibia if it has established a permanent establishment (PE) in Namibia. A PE includes, in most cases, a fixed place of business and the establishment of a local entity or branch will most often create a PE; however, the provisions of the related tax treaty should be considered. If a PE exists, only the portion of income attributable to the PE will be subject to tax in Namibia.
Non-residents that do not have a place of business in Namibia may, however, be subject to withholding tax. *(See Withholding taxes.)*

No capital gains tax is payable in Namibia.

**Calculation of taxable income**

<table>
<thead>
<tr>
<th>Gross income</th>
<th>The total amount, in cash or otherwise, received by or accrued to any person from a source within, or deemed to be within Namibia, excluding receipts of a capital nature (provisions for specific inclusions in gross income and amounts deemed to be from a Namibian source exist).</th>
</tr>
</thead>
<tbody>
<tr>
<td>Less exemptions</td>
<td>The Income Tax Act provides for certain amounts to be specifically exempt from tax.</td>
</tr>
<tr>
<td>= Income</td>
<td></td>
</tr>
<tr>
<td>Less: Deductions</td>
<td>Expenditures and losses actually incurred to generate income may be deducted, provided that these expenses are not of a capital nature. The Income Tax Act specifically provides for certain expenditures to be deductible and allows a deduction for capital allowances. Only expenses incurred to generate 'income' may be deducted. Expenses incurred to generate income exempt from tax are not deductible. Apportionment should be considered when expenses are incurred to generate both taxable income and tax exempt income.</td>
</tr>
<tr>
<td>Taxable income</td>
<td>Taxable income is taxed at the corporate tax rate as set out under the tax rate section below.</td>
</tr>
</tbody>
</table>

**Tax rates**
The corporate tax rates can be summarised as follows:

<table>
<thead>
<tr>
<th>Entity</th>
<th>Current tax rate</th>
</tr>
</thead>
<tbody>
<tr>
<td>Domestic companies and close corporations (excluding entities mentioned below)</td>
<td>34%</td>
</tr>
<tr>
<td>Branches of foreign companies</td>
<td>34%</td>
</tr>
<tr>
<td>Registered manufacturers (only applicable for the first 10 years of registration)</td>
<td>18%</td>
</tr>
<tr>
<td>Diamond mining companies and companies that render services to such companies in connection with diamond mining</td>
<td>55%</td>
</tr>
<tr>
<td>Mining companies (other than diamond mining companies) and companies that render services to such companies in connection with mining</td>
<td>37.50%</td>
</tr>
<tr>
<td>Long-term insurers (the rate is applied to gross investment income)</td>
<td>13.6%</td>
</tr>
<tr>
<td>Petroleum income tax rate</td>
<td>35%</td>
</tr>
</tbody>
</table>

**Anti-avoidance**
Note that the Income Tax Act, Act 24 of 1981 (Act), contains an anti-avoidance section, Section 95, that enables the Receiver of Revenue to disregard the implications of a transaction or scheme if it can be proven that:

i. Such transaction or scheme had been entered into to avoid or postpone the payment of any duty or levy imposed by the Act; and
ii. Such transaction or scheme was entered into or carried out by means or in a manner that would not normally be employed in the entering into or carrying out of a transaction, operation or scheme of the nature of the transaction, operation or scheme in question, or has created rights or obligations that would not normally be created between persons dealing at arm's length under a transaction, operation or scheme of nature of the transaction, operation or scheme in question; and

iii. Such transaction or scheme was entered into or carried out solely or mainly for the purposes of the avoidance or the postponement of liability for the payment of any tax duty or levy.

The Receiver of Revenue can, at its sole discretion, impose Section 95 on any transaction or scheme, which will place the onus on the taxpayer to prove that any/all of the requirements noted above will not be applicable to the transaction or scheme.

**Transfer pricing**

Namibia introduced transfer pricing legislation on 14 May 2005. The legislation was aimed at enforcing the arm's-length principle in cross-border transactions carried out between connected persons. On 5 September 2006, the Directorate of Inland Revenue issued Income Tax Practice Note 2 of 2006 that contains guidance on the application of the transfer pricing legislation. The Practice Note is based on guidance set out by the Organisation for Economic Co-operation and Development (OECD) Transfer Pricing Guidelines for Multinational Enterprises and Tax Administrations.

The objective of this practice note is to provide taxpayers with guidelines regarding the procedures to be followed in the determination of arm's-length prices, taking into account the Namibian business environment. It also sets out the Minister of Finance's views on documentation and other practical issues that are relevant in setting and reviewing transfer pricing in international agreements.

Transfer pricing legislation is essentially aimed at ensuring that cross-border transactions between companies operating in a multinational group are fairly priced and that profits are not stripped out of Namibia and taxed in lower tax jurisdictions. The legislation achieves this by giving the Minister of Finance (who essentially delegates to the Directorate of Inland Revenue) the power to adjust any non-market related prices charged or paid by Namibian entities in cross-border transactions with related parties to arm's-length prices and to tax the Namibian entity as if the transactions had been carried out at market-related prices.

In terms of the normal penalty provisions of the Income Tax Act, the Directorate of Inland Revenue may levy penalties of up to 200% on any amount of underpaid tax. Consequently, the Directorate of Inland Revenue may invoke such provisions in the event that a taxpayer's taxable income is understated as a result of prices that were charged in transactions, not carried out at arm's length. Further, interest will be charged on the unpaid amounts at 20% per annum.

**Thin capitalisation**

The Minister may, if any amount of financial assistance provided by a foreign connected person is excessive in relation to a company's fixed capital (being share capital, share premium, accumulated profits, whether capital or not), disallow the deduction for income tax purposes of any interest or other charges payable by the Namibian person on the “excessive portion” of the financial assistance provided by the foreigner.
There is no guidance that provides a definition for “excessive”. Therefore, each case should be considered on the basis of the facts provided. The 3:1 ratio is applied by the Bank of Namibia for exchange control purposes and this guideline is therefore deemed suitable, until otherwise determined by the Directorate of Inland Revenue.

**Treaty relief**
Namibia has entered into double tax agreements with the following countries:

- Botswana;
- France;
- Germany;
- India;
- Malaysia;
- Mauritius;
- Romania;
- Russian Federation;
- South Africa;
- Sweden; and
- United Kingdom.

Namibia has negotiated tax treaties with the following countries, but these treaties have not yet been signed:

- Singapore;
- Zimbabwe; and
- Canada.

The following treaties are in negotiation:

- Belgium;
- Seychelles; and
- Zambia.

**Corporate residence**

The Namibian tax system is based on source and not on residency. Income derived or deemed to be derived from sources within Namibia are subject to tax.

The source is determined as the place where income originates or is earned, not the place of payment. If goods are sold pursuant to a contract entered into within Namibia, the source of income is deemed to arise in Namibia, regardless of the place of delivery or transfer of title.

Certain types of income arising outside Namibia may, in the hands of a domestic company, be deemed to arise in Namibia and be taxed as such. Examples are interest and certain copyright royalties arising outside Namibia.

Otherwise, and except for the PE concept embodied in the tax treaties, corporate residence is of little tax significance.
Other taxes

VAT
VAT is a transaction tax and the implications will vary for different transactions. Some transactions are taxed at a rate of 15% or 0% while other transactions are exempt from VAT. Input tax deductions may be claimed, subject to certain provisions.

VAT is levied on every taxable supply by a registered person. A taxable supply means any supply of goods or services in the course or furtherance of a taxable activity.

A taxable activity means any activity that is carried on continuously or regularly in Namibia, which involves the supply of goods or services for consideration.

VAT is payable on all imports for home consumption in Namibia, subject to certain exemptions (e.g., in terms of a technical assistance agreement, donations to the State, goods of which the local supply is zero-rated, etc).

Import VAT is payable on the greater of the free on board (FOB) value plus 10%, or the market value. The payment may be deferred in terms of an import VAT account registered with the Directorate of Inland Revenue to the twentieth day of the month following the month of importation. Penalties of 10% per month or part of a month and 20% interest on outstanding import VAT, according to the Customs Asycuda reports on import VAT account numbers, are levied by the Directorate of Inland Revenue.

A company/branch is required to register for VAT if it supplies goods or services on a regular basis for consideration and if their taxable supplies (standard rated and zero-rated supplies) exceed NAD 200,000 in any 12-month period.

Registered vendors are required to levy VAT on all taxable supplies at the standard rate of 15%.

A registered VAT vendor is entitled to deduct input tax credits paid in the course of taxable supplies made to such person, provided that a tax invoice is available to support the input tax deduction. It is also important to take note of deemed input tax deductions, and prohibited input deductions. Import VAT paid may be deducted only as input tax if the import was in furtherance of a taxable activity and the required documentation (e.g., stamped customs entries) is held by the importer.

Customs and excise

Namibia is a member of the Southern African Customs Union (SACU) and customs duties are not levied on intra SACU trade (i.e., between Botswana, Lesotho, Namibia, South Africa and Swaziland).

Customs duties are payable according to the Common Customs Tariff of SACU on imports from outside SACU. Preferential duty rates apply on imports from Southern African Development Community (SADC) countries while goods may be imported free of customs duties from Zimbabwe in terms of the Namibia-Zimbabwe Free Trade Agreement.

Excise duties are levied on local production of excisable products and are included on most excisable products imported from another SACU country in terms of the Duty at source procedures. Identical excise duty rates are applied throughout the SACU.
Importation of excisable products from outside the SACU is subject to customs duties and specific customs duties. *Ad valorem* duties are levied on certain products (e.g., motor vehicles, perfumes, etc.) in addition to the normal customs duties.

Fuel levies are payable on petrol, diesel and illuminating kerosene and may be claimed back for certain non-road operations (e.g., mining, farming, and construction).

Security is required by customs on all temporary importations to cover import VAT and customs duties (if applicable).

It is possible to import goods that are subject to customs duties into registered customs bonded warehouses, where goods are kept for later use. In this case, the payment of duties may be deferred until the goods are taken out of the bonded warehouse for home consumption or acquitted if the goods are subsequently exported.

**Annual duty**
Annual duty is levied in terms of the Companies Act at an amount of NAD 4.00 for every NAD 10,000 (or part thereof) of the issued share capital of a company, with a minimum duty of NAD 80.00 per annum. Issued shares include ordinary shares, share premium, and preference shares.

Since a branch does not issue share capital, the issued share capital of the head office will be used to calculate the annual duty payable in Namibia.

**Stamp duty**
Certain transactions may attract stamp duty. The amount of stamp duty payable differs and is based on the nature of every individual transaction.

The basic transactions can be summarised as follows:

<table>
<thead>
<tr>
<th>Transaction</th>
<th>Stamp duty</th>
</tr>
</thead>
<tbody>
<tr>
<td>Agreements or contracts (other than those where duty is specifically provided for in the Act)</td>
<td>NAD 5.00</td>
</tr>
<tr>
<td>Lease agreement or lease</td>
<td>The stamp duty will be based on lease payments, together with additional considerations specified in the lease agreement</td>
</tr>
<tr>
<td>Transfer or issue of marketable securities and other share transactions</td>
<td>Between NAD 2.00 and NAD 5.00 for every NAD 1,000 or part thereof of the value/consideration, depending on the specific transaction</td>
</tr>
</tbody>
</table>

**Transfer duty**
Transfer duty is payable on the acquisition value of property acquired.

Transfer duty is normally payable by the buyer but the agreement for the sale of the property may determine the person liable to pay these costs.

**Exchange control**
The Exchange Control Regulations in Namibia are administered by the local banking institutions.
Foreign exchange transactions that involve the transfer of funds to countries outside the Rand Common Monetary Area (RCMA) are subject to Bank of Namibia approval. Countries within the RCMA are South Africa, Namibia, Lesotho and Swaziland.

The issuance of shares to countries outside the RCMA will involve the transfer of funds to these countries once dividends are declared. Bank of Namibia approval is thus required prior to the issuance of the related shares.

Bank of Namibia approval is also required if funds are transferred to countries outside the RCMA.

**Branch income**

Branch income that is received or accrued from a source within or deemed to be within Namibia is taxable in Namibia based on the normal corporate tax rules.

A branch is regarded as an extension of its foreign head office. A branch may, therefore, not deduct fees paid to its foreign head office (unless a tax treaty provides for such a deduction), as it is argued that a branch cannot transact with itself. Reimbursement of actual expenses may, however, be deducted, subject to the normal deduction rules.

Transfer pricing rules apply between a branch and its foreign head office or other cross-border related parties.

**Income determination**

*Please refer to the Taxes on corporate income section.*

**Deductions**

**Capital allowances**

The cost (including finance charges) of machinery, equipment, and other articles used by the taxpayer to generate income is deductible in three equal annual allowances. No apportionment is required where an asset is held for less than 12 months.

Buildings used by the taxpayer to generate income qualify for an initial allowance of 20% of erection costs in the year they are first brought into use. Thereafter, an annual allowance of 4% is deductible for each year following the year of erection. Additions to existing buildings (not alterations or repairs) qualify for the same 20% and 4% deductions. Note that the allowance is calculated on the cost of erection and not the cost of acquisition. The allowance is also only calculated for a period of 21 years from the date of erection.

Mining exploration expenditures incurred before commencement of production are deductible in full in the first year that income is generated from the mine. Subsequent developmental expenditures are written off in three equal annual allowances.

Capital allowances may also be deducted with respect to patents, trademarks, leasehold improvements, etc.

A recovery or recapture of allowances previously claimed should be included in the gross income of a taxpayer in the event that the allowance is recovered or recaptured
by way of disposal, withdrawal from trade for non-trade purposes, or removal from Namibia. The recapture is calculated at the market value of the asset.

**Trading losses**
Assessed tax losses may be carried forward indefinitely provided the company continues to trade. Tax laws do not allow losses to be transferred to other members of a group and anti-avoidance provisions may be triggered by transactions designed to transfer or exploit assessed losses.

If a company ceases to trade for a full fiscal year, its assessed losses are forfeited, regardless of subsequent activities. Assessed losses are also reduced in the event of a compromise agreement with creditors.

**Group taxation**
No taxation of combined operations is allowed in Namibia where operations are conducted by more than one company.

**Tax incentives**

**Manufacturing**
The following is a high-level summary of tax incentives available for the manufacturing industry and does not consider the specific conditions that should be met in order for these incentives to be utilised.

<table>
<thead>
<tr>
<th></th>
<th>Tax treatment for normal taxpayers</th>
<th>Tax incentive for manufacturers</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Building allowance</strong></td>
<td>A building allowance is deductible with respect to buildings used for purposes of trade.</td>
<td>The allowance is calculated as 20% of the cost of erection in the year in which the building is put into use and 4% during the 20 years that follow the year of erection.</td>
</tr>
<tr>
<td></td>
<td>The allowance is calculated as 20% of the cost of erection in the year in which the building is put into use and 4% during the 20 years that follow the year of erection.</td>
<td></td>

</tr>
<tr>
<td>allowance</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
 Tax treatment for normal taxpayers

Export allowance

Any taxpayer that derives income from the export of manufactured goods, excluding meat or fish, may deduct an export allowance equal to 80% of the taxable income derived from the export of manufactured goods. Gross profit derived from the export of manufactured goods as a percentage of total gross profit should be used to determine the percentage of taxable income that is used to calculate the export allowance.

Transport allowance

Land-based transport costs (i.e., transport by road or rail) are deductible for tax purposes. An additional allowance of 25% of land-based transport costs in respect of material and components used in the manufacturing process or equipment imported for direct use in the manufacturing process may be deducted.

Preferential tax rate

The normal tax rate for companies other than mining companies or registered manufacturers is 34%. The tax rate for a registered manufacturer for taxable income with respect to the manufacturing activity for which they are registered is 18%. This preferential rate is applicable for a period of 10 years from registration as a manufacturer.

Note that only the building allowance and preferential tax rate (as set out above) may create or increase a tax loss.

Export processing zones (EPZ)

In order to become an export processing zone company, a particular entity must register with the EPZ governing body and obtain approval from the Directorate of Inland Revenue.

An EPZ company qualifies for the following benefits:

• The company is exempt from income tax;
• No VAT is payable on the sale of goods or services rendered in a zone;
• No VAT is payable on goods imported or manufactured in the zone;
• No customs or excise duty is payable on goods imported into the zone;
• No stamp duty or transfer duty is payable in relation to the transfer of movable or immovable property in a zone;
• A 75% refund of expenditures incurred in training Namibian citizens; and
• Some of the provisions in the Labour Relations Act do not apply in a zone.

Enterprises must comply with the following requirements in order to qualify for EPZ status:

• Goods must be exported to countries other than countries in the SACU;
• Industrial employment must be created or increased; and
Namibia, Republic of

- Namibia’s export earnings must be increased as a result of manufactured goods exported.

EPZ companies may not be involved in retail business operations.

**Withholding taxes (WHT)**

WHT are applicable where dividends and royalties or similar payments are declared or distributed to non-Namibian residents.

**Dividends**

Dividends declared by a Namibian company to a non-resident holding company are subject to non-resident shareholders tax (NRST), a WHT. NRST is payable at a rate of 10% unless treaty relief is available. NRST is payable within 30 days after declaration of a dividend.

**Royalties or similar payments**

WHT on royalties are payable when a Namibian company pays a royalty to a non-resident. WHT is levied at a rate of 10.2% (30% of the corporate tax rate of 34%) and is payable within 14 days after the end of the month during which the liability for payment is incurred.

A royalty includes payment for the use or right to use any patent or design, trademark, copyright, model, pattern, plan, formula, process, property rights, or right of a similar nature. A royalty also includes the imparting of any scientific, technical, industrial or commercial knowledge, or information for use in Namibia. The nature of fees payable should therefore be carefully considered in order to determine whether the relevant amount represents a royalty.

**Interest**

A WHT of 10%, calculated on the gross amount of interest, is payable on interest accruing to any person, other than a Namibian company, from a registered Namibian banking institution or unit trust scheme.

The tax withheld is a final tax and the financial institution is responsible to withhold the tax.

Namibian companies are however taxed on interest at the corporate tax rate.

It is the obligation of the financial institution to withhold the tax and pay such tax to the revenue authorities.

**Summary of WHT payable**

The WHT rates and treaty relief for Namibian double tax agreements can be summarised as follows. Note that the tax treaties contain certain requirements that should be met before the reduced tax rate may be applied.

The definitions of dividends, royalties, and interest in the various treaties should also be considered.

<table>
<thead>
<tr>
<th>Country</th>
<th>Dividends</th>
<th>Royalties</th>
<th>Interest</th>
</tr>
</thead>
<tbody>
<tr>
<td>Namibian tax legislation</td>
<td>10%</td>
<td>10.2%</td>
<td>10%**</td>
</tr>
</tbody>
</table>
Country Dividends Royalties Interest
Botswana 10% 10% 10%
France 5% 10% 10%
Germany 10% 10% 0%
India 10% 10% 10%
Malaysia 5% 5% 10%
Mauritius 5% 5% 10%
Romania N/A 5% 10%
Russian Federation 5% 5% 10%
South Africa 5% 10% 10%
Sweden 5% 5% 10%
United Kingdom 5% 5% N/A

** Namibian companies are taxed at the corporate tax rate on interest received.

N/A means that the provisions of the tax treaty limited the rate to a rate that is higher than the local Namibian rate. It should be noted that a treaty may only provide tax relief and cannot impose a higher tax rate.

**Mining royalties**

The Minerals (Prospecting and Mining) Act levies a royalty on minerals won or mined by a licence holder in Namibia, based on the table below:

<table>
<thead>
<tr>
<th>Group of Minerals</th>
<th>Percentage of market value of minerals leviable as a royalty</th>
</tr>
</thead>
<tbody>
<tr>
<td>Precious metals</td>
<td>3%</td>
</tr>
<tr>
<td>Base and rare metals</td>

<tr>
<td>Semi-precious stones</td>
<td>2%</td>
</tr>
<tr>
<td>Nuclear fuel minerals</td>
<td>3%</td>
</tr>
<tr>
<td>Industrial minerals</td>
<td>2%</td>
</tr>
<tr>
<td>Non-nuclear fuel minerals</td>
<td>2%</td>
</tr>
</tbody>
</table>

* Applicable to all licence holders on nuclear fuel minerals, except Rössing Uranium Mine Ltd where a 6% royalty is applicable.

**Tax administration**

The due date for filing of returns can be summarised as follows:

**Tax return submission**

<table>
<thead>
<tr>
<th>Return</th>
<th>Due date</th>
</tr>
</thead>
<tbody>
<tr>
<td>Income tax return</td>
<td>Within seven months after the financial year-end of the company</td>

Significant developments

After the fundamental changes in the Dutch Corporate Income Tax Act as of 1 January 2007, the Ministry of Finance proposed major amendments at the end of 2008, followed by a more detailed set of possible proposals in June 2009 laid down in a consultation document. The Ministry of Finance has indicated that a bill for amending the Corporate Income Tax Act will be submitted in 2010. It currently would appear that the primary focus lies on the limitation of interest deduction for takeover companies and the exclusion of permanent establishment losses from the Dutch tax base.

This reform must be seen as a reaction to a series of developments which have negatively impacted the competitive position of the Netherlands relative to other member states of the European Union (EU). Therefore, it is necessary to improve the Dutch international position from a fiscal perspective. The potential amendments should make substantially lower corporate income tax rates possible.

In this respect, the 2010 Tax Package, as published by the Dutch government on 15 September 2009, already provides for an important liberalisation of the participation exemption regime in the corporate income tax and a further expansion of the patent box (now “innovation box”) as of 1 January 2010.

Since 2008, the government has taken several measures, including tax measures, in order to deal with the consequences caused by the worldwide economic crisis. New temporary provisions provide for accelerated depreciation up to 50% a year of the value of qualifying assets bought and investments made in 2009 and 2010, under certain conditions. Furthermore, for the years 2009 and 2010 the first corporate income tax bracket has been extended substantially. Finally, corporate taxpayers may opt for a temporary extension of the carryback period of losses.

The 2009 Tax Package, which was announced in September 2008, included some minor amendments. The most important change, which was retroactive to 1 January 2008, provided for a substantial extension of the first corporate income tax bracket for the years 2008, 2009 and 2010. Other relevant amendments were related to the Dutch tonnage tax regime, making the Netherlands more attractive for ocean shipping, and to the regime for investment companies, removing some bottlenecks for those investment companies that exploit real estate in separate subsidiaries. Finally, the 2009 increase of the Dutch main value-added tax (VAT) tariff from 19% to 20% announced in 2007 was cancelled, mainly to protect the consumer purchasing power, to strengthen the economy and to restrict inflation.
Most discussed in 2008 was the Government’s plan to tax so called “excessive” remuneration suggesting on the one hand an employer levy on certain qualifying severance payments and past service pension premiums, and on the other hand taxation on carried interest arrangements qualifying as “lucrative investments”. Both provisions became effective as of 1 January 2009.

As of 1 January 2009, the provisions of the amended tax treaties with Ghana and South Africa to avoid double taxation on income became applicable. As of 1 January 2010, the tax treaties with Azerbaijan, Bahrain and Qatar came into force.

Several tax bills are pending, including a proposal to create the possibility for partnerships to opt for legal personality, which will also will consequences for, among other things, the Dutch real estate transfer tax.

**Taxes on corporate income**

**Standard corporate income tax rate**

The Dutch standard corporate income tax rate has been reduced significantly over the past years. While it is 25.5% for the years 2007 to 2010, it was 31.5% in 2005 and 29.6% in 2006. The Dutch corporate income tax rate is determined based on taxable income brackets. The tax rate on the first bracket is 20%. For 2009 and 2010 the upper limit of the first bracket was extended to a taxable amount of EUR 200,000. For 2008 the upper limit of the first bracket was retroactively extended to EUR 275,000.

**Fiscal investment fund regime**

In general terms, under the existing regime, the corporate income tax rate for fiscal investment funds is 0%, provided that their profit is made available to the shareholders and holders of certificates of participation no later than eight months after year end. This regime was amended on 1 August 2007. One of the main amendments is the possibility for fiscal investment funds to invest in real estate development (or redevelopment) activities, provided that these activities take place through a subsidiary subject to Dutch corporate income tax and the development (or redevelopment) activities are exercised for the benefit of real estate that is (or will be) forming part of the fund’s own portfolio, an affiliated fiscal investment fund's portfolio, the portfolio of a company in which the fund or the affiliated fund has a substantial interest, or for the benefit of the subsidiary’s own portfolio. The amended law applies to fiscal book years ending after 1 August 2007.

As of 1 January 2009, the regime for investment companies has been changed in order to remove some bottlenecks for those investment companies that exploit/hold real estate in separate subsidiaries.

**Exempt investment fund regime**

On 1 August 2007, a new tax exempt investment fund regime became effective. In accordance with this regime, if an investment fund is (or considered as) a public interest entity or a mutual investment fund subject to the Dutch Financial Supervision Act (“Wet op het financieel toezicht”), and further conditions are met, such investment fund can request an exemption from corporate income tax. Apart from the exempt status for corporate income tax purposes, the exempt investment fund will not be obliged to withhold dividend withholding tax with regard to profit distributions to its shareholders. The exempt investment fund regime can be applied to fiscal book years starting on or after 1 August 2007. In March 2008, the Ministry of Finance
issued a decree with, among other things, directives to determine whether or not the investment fund is considered open-ended.

As of 1 January 2009, the definition of the notion “financial devices” has been extended to include bank credits (e.g., current, savings or deposit accounts).

**Innovation box regime**
As of 1 January 2007, a special regime applies with respect to profits, including royalties, derived from a self-developed intangible asset by the taxpayer developed after 31 December 2006. In this so called “patent box”, the taxpayer may opt, under certain conditions, for the application of a 10% effective rate on taxable profits derived from these intangible assets. This patent box is applicable provided that at least 30% of the profits have been originated by the patent. However, the 10% rate applies only to a maximum of four times the production costs of the intangible asset included in the patent box (pre-2010). As of 1 January 2008, this regime has been expanded in a substantial way. Companies which have incurred certain qualified research and development (R&D) costs for the development of intellectual property for which no patent was granted are also entitled to the favourable effective tax rate. The extension of the scope is subject to the condition that these qualified R&D assets become part of the company's assets after 31 December 2007.

As of 1 January 2010, the patent box is further expanded and renamed as “innovation box”. The effective tax rate is lowered to 5%. Furthermore, the different limits that apply to patented assets and R&D assets are cancelled, resulting in a widening of the scope of the regime and an equal treatment of all innovative activities. In addition, the lower effective tax rate of 5% only applies to positive income, allowing innovation losses to be taken into account in full. Based upon a favourable decree, the latter has also been approved for innovation losses arising in 2009.

**Other corporate/business taxes**
There are no provincial or municipal corporate income taxes.

**Corporate residence**
In the Netherlands, corporate residence is determined by each corporation’s circumstances. Management and control are important factors in this respect. Companies incorporated under Dutch law are deemed to be residents of the Netherlands (although, not with respect to certain provisions, such as participation exemption and fiscal unity).

**Other taxes**

**Value-added tax (VAT)**
Known in Dutch as the BTW (“Belasting over de Toegevoegde Waarde”), VAT is payable on sales of goods and on services rendered in the Netherlands as well as on the importation of goods and on the “intra-European” acquisition of goods. There are three VAT rates, which are 19%, 6% and 0%.

The main VAT rate remains at 19%. The proposed increase announced in 2007 from 19% to 20% has been cancelled.
The reduced VAT rate (6%) is on certain prime necessities (and as from 2 July 2009, also on certain energy-saving insulation activities on houses).

The special VAT rate (0%) is applicable mainly to intra-European Union supplies, exports, imports stored in bonded warehouses, services rendered in connection with the above, and certain other services.

The following are exempt from VAT:

• The supply of immovable property two years after putting it into use and lease. However, if the lessee’s use of the immovable property is 90% or more for input VAT-deductible purposes, the lessor and lessee may opt to be subject to VAT on rent, in which case the lessee may deduct the VAT charged in respect of the property;
• Medical, cultural, social, and educational services. The medical exemption has been changed slightly as of 1 January 2009;
• Services provided by banks and other financial institutions in connection with payment transactions and the granting of credit facilities;
• Insurance transactions; and
• Transactions in shares.

Transfer tax on immovable property
Acquisition of economic or legal ownership of immovable property in the Netherlands is subject to 6% transfer tax on market value. Some exemptions are available.

Capital tax
The capital tax was abolished as of 1 January 2006. Transactions within the scope of the capital tax that occurred prior to the date of abolishment are still subject to capital tax.

Other indirect taxes
An insurance tax of 7% is payable on insurance premiums if the insured is a resident of the Netherlands or if the insured object is in the Netherlands. Several exemptions are available.

Municipalities impose immovable property tax on the owners of the immovable property. The rates depend on the municipality. The taxable basis is the market value of the immovable property. Please note that the (assessment of the) value as of 1 January 2007 also is of importance for corporate taxation, as depreciation might be limited based on this value (see Deductions section and specifically, Limited depreciation of immovable property).

An excise tax is levied on certain consumer goods (e.g., cigarettes, cigars, mineral oils, alcoholic products, etc.). If the goods are used solely as raw materials, no excise tax is levied. The excise tax is refundable if the article is exported.

Environmental charges on packaging
As of 1 January 2008, producers or importers have to pay taxes on packaging. The tariff depends on the type and method of packaging. An exemption is granted to companies that bring less than 15,000 kilos of packaging materials a year on the market. In the summer of 2008, the Ministry of Finance declared a simplification of the rules after consulting with the business community. For example, it is now possible to arrange a special agreement with the Dutch tax authorities, the number of tariffs
on packaging has been reduced, and the definition of “packaging” has altered. Most changes became effective as of 1 January 2009, however, some of the new rules have retroactive effect to 1 April 2008 or even to 1 January 2008.

The threshold for liability to the packaging tax has increased from 15,000kg to 50,000kg as of 1 January 2010. On the other hand, the tax rates have risen by more than 8%. Further, a refund of the packaging tax for indirect export also is available to foreign entrepreneurs as of 1 January 2010.

**Branch income**

Rates for branch profits are the same as for other corporate profits, but no tax is withheld on transfers of profits to the head office. The tax-base is in principle calculated on the same rules as for Dutch resident companies.

**Income determination**

**Inventory valuation**

In general, stocks/inventory are stated at the lower of cost or market value. Cost may be determined on the basis of first-in, first-out (FIFO), last-in, first-out (LIFO), base stock, or average cost. The LIFO system can be used for commercial/financial and tax purposes.

There is no requirement of conformity between commercial/financial and tax reporting.

**Capital gains**

Capital gains are taxed as ordinary income. However, capital gains realised on disposal of shares qualifying for the participation exemption are tax exempt *(see Inter-company dividends section)*.

The gain on disposal of depreciable assets may be carried over to a special tax deferral reinvestment reserve but must then be deducted from the acquisition cost of the later acquired assets. Except in special circumstances, the reserve cannot be maintained for more than three consecutive years. If the reserve has not been fully applied after three years, the remainder will be liable to taxation.

Capital losses are deductible, unless attributable to the disposal of a shareholding qualifying for the participation exemption.

**Inter-company dividends**

Subject to meeting the conditions for the participation exemption, a Dutch company or branch of a foreign company is exempt from Dutch tax on all benefits connected with a qualifying shareholding, including cash dividends, dividends in kind, bonus shares, hidden profit distributions, and capital gains.

In general, the participation exemption will apply to a shareholding in a Dutch company, if the holding is at least 5% of the investee’s capital. Due to the amendments of the participation exemption, the non-inventory requirement is not applicable after 1 January 2007. When the shareholder’s interest is a portfolio investment in a company, that is not subject to a tax rate that is considered adequate (meaning subject to a profit
tax that equals at least an effective tax rate of 10% over a taxable base according to Dutch tax standards) the exemption cannot be applied.

Whether or not a shareholder’s interest in a company is a portfolio investment is determined solely by the assets of that company (participation exemption regime 2007-2009). If the company’s assets consist predominantly (more than 50%) of portfolio investments, the interest in the company is considered a passive participation. A distinction in this respect is made between portfolio investments held by a company in its line of business and free portfolio investments. Only the presence of free portfolio investments can lead to the qualification of a portfolio investment participation. Portfolio investments held by a company in its line of business are qualified as good assets. Assets that are used for more than 50% for intra-group financing activities are deemed to be held as free portfolio investments. This applies, unless credible evidence to the contrary can be given. In that case, the participation exemption could apply. Furthermore, participations whose assets consist of at least 90% real estate (real estate participation) are not considered low taxed portfolio investment participations, which means that the participation exemption applies.

In February 2008, the Ministry of Finance issued an important decree stating, among other things, several commitments regarding the asset test, the subject-to-tax requirement and the real estate participation.

As of 1 January 2010, the participation exemption regime has been further liberalised. As a general rule, the participation exemption is applicable as long as the participation is not held as a portfolio investment. The intention of the parent company, which can be based on particular facts and circumstances, is decisive as of 1 January 2010. Regardless the company’s intention, the participation exemption also is applicable if the new sufficient tax test, which is if the income is subject to a real profit tax of at least 10%, or the revised asset test, which has been relaxed in comparison to the asset test of the participation exemption regime 2007-2009, as discussed above, is met.

For portfolio investment participations not qualifying for the participation exemption, double taxation will be avoided by applying the tax credit method, unless the portfolio investment shareholding effectively is not subject to tax at all. For EU shareholdings, it is optional to credit the actual underlying tax.

Dividends not qualifying under the participation exemption are taxable in full at the ordinary corporate income tax rate.

Interests of 25% or more in a company of which the assets consist (nearly) exclusively of portfolio investments should be annually valued – as an asset – at the fair market value.

Costs related to the acquisition and disposal of a participation, such as legal fees, compensations, notary fees, are not deductible for corporate tax.

Losses arising from the liquidation of a (foreign) subsidiary are deductible for corporate tax, subject to certain conditions. This regime has been changed slightly as of 2008 to make it more in-line with EU directives.

Profits derived from a company that was created by converting a foreign permanent establishment, only qualify for the participation exemption after they exceed the losses
from the permanent establishment during the previous years, insofar as those losses reduced the taxable profits in the Netherlands. Under certain circumstances, such as the alienation of (part of) the shares of the company, all non-recaptured losses will be added to the profits of the Dutch parent company at once. As of 9 March 2007, the scope of these anti-abuse provisions has been extended by including situations in which a foreign intermediate holding company is interposed.

**Foreign income**
A Dutch resident company is subject to corporate tax on its total worldwide income.

Double taxation of certain foreign-source income, including foreign branch income, is avoided by reducing Dutch tax by the ratio of foreign income (subject to a foreign income tax and/or covered by certain tax treaty provisions) to total income, the so-called exemption method. Currency exchange profits or losses on the head office’s investment in its foreign branch are not considered “foreign income” for the purposes of these relief provisions.

Unilateral relief from double taxation for income from foreign financing branches is provided by means of a credit of 17.5% of the passive financing income for foreign taxes deemed paid or the foreign tax actually paid. However, the exemption method will apply only if the taxpayer can demonstrate that the foreign branch is actively engaged in intra-group financing activities.

Double taxation of foreign dividends, interest and royalties is relieved by a tax credit provided by Dutch tax treaties or unilaterally, if the payer of the income streams is a resident of a developing country, designated by Ministerial Order. If no treaty or unilateral relief applies, a deduction of the foreign tax paid is allowed in computing the net taxable income.

However, relief by exemption is given for dividends from foreign investments qualifying for the participation exemption, as discussed above. In that case, there is no Dutch tax to credit against taxes withheld in the subsidiary’s country of residence.

In most circumstances the foreign dividend is exempt for Dutch corporate tax under the participation exemption, as previously discussed. As a consequence, foreign withholding taxes cannot be credited, and thus, withholding taxes constitute a real cost for the companies concerned. A credit of the foreign withholding tax is granted against Dutch dividend withholding tax due on the distribution to foreign parents of the Dutch company. The credit amounts to a maximum of 3% of the gross dividend paid, to the extent that it can be paid out of foreign-source dividends received that have been subject to at least a 5% withholding tax and the foreign company is liable for corporate tax. This tax credit does not result in taxable income for corporate income tax purposes.

**Stock dividends**
Stock dividends are taxed as dividend income to the extent that they are paid out of earned surplus. They are not taxable if paid out of share premium (“agio”), provided the share premium account was not created pursuant to a share-for-share merger, in which only Dutch companies were involved. In the case of a share-for-share merger, in which shares in foreign subsidiaries were contributed to a Dutch company, the Dutch company can distribute the difference between the fair market value and the paid-in capital of the subsidiaries being contributed as a stock dividend without triggering
The Netherlands

Dutch dividend withholding tax (step-up in basis), provided certain requirements are met.

**Work in progress**
As of 2007, the rules with regard to work in progress have changed. Up to 2007 for tax purposes it was allowed to postpone the realisation of taxable profit until a project was fully completed (“completed contract method”). However, as of 1 January 2007, this method, in principle, is no longer permitted as profit should be accounted based on the percentage of completion of a project. Moreover as of 2007, all project costs should be recognised as opposed to the previous rules that allowed certain costs to be deducted in the year the costs occurred.

**Deductions**

**Depreciation and depletion**
To meet companies’ urgent need for cash due to the worldwide credit crunch a temporary provision has been introduced, allowing accelerated depreciation of certain assets in 2009 and 2010. This temporary provision is discussed under “Accelerated depreciation” below.

Generally, depreciation may be computed by a straight-line or a reducing-balance method or, in accordance with any other sound business practice on the basis of historical cost. Depreciation is applied from the date the asset comes into use. As of 1 January 2007, Dutch tax law includes specific rules that potentially limit the depreciation of assets (e.g., immovable property, goodwill and other fixed assets).

**Limited depreciation of immovable property**
For immovable property the legislation of 1 January 2007 introduced special provisions, which, in principle, limited depreciation. A distinction is made between immovable property held for investment purposes and buildings used in a trade or business.

The investment property cannot be depreciated to an amount lower than the official property’s fair market value for tax purposes, which is known as WOZ-waarde. In other words, a property will not be subject to depreciation unless the carrying amount of the building and the land on which it is located is higher than its value for tax purposes. This value is determined by the municipal tax authorities annually. As this value is based on the assumption that the property is free of lease, the value for tax purposes of commercial real estate may be lower than fair market value.

Alternatively, the depreciation of buildings employed in a trade or business will be limited to 50% of the property’s value for tax purposes. It should still be possible to value immovable property at fair market value, if this is demonstrably lower than the current book value. In addition, anti-abuse measures apply to prevent the division of land and buildings into separate legal entities or to related individuals. A limited transitional provision for recent investments in buildings allows depreciation according to pre-2007 rules for a period of three years. The reinvestment reserve (see Capital gains under Income determination section), will remain applicable.

These changes are mitigated since maintenance costs continue to qualify for tax relief and any maintenance-related value increase does not lead to a compulsory upward
revaluation of the property. Moreover, a property is not required to be revaluated as its value increases due to market developments.

Depreciation of land is not permitted.

The sale of depreciated assets triggers tax on the difference between the sale price and the depreciated book value unless a reinvestment reserve is set up (see Capital gains under Income determination section).

**Limited depreciation of goodwill and other fixed assets**

Besides the introduction of rules limiting the depreciation of immovable property after 1 January 2007, rules entered into force that limit the depreciation of goodwill and other fixed assets. With regard to goodwill, the period of depreciation is reduced to 10 years. Therefore, depreciation of goodwill in five years, which was common practice under the pre-2007 rules, is no longer permitted.

Furthermore, the depreciation period of other fixed assets (i.e., inventory, equipment) is reduced to five years. The rules also affect fixed assets acquired before 1 January 2007 and certain transitional rules are applicable.

**Accelerated depreciation**

The law provides for accelerated depreciation of several specific assets. Accelerated depreciation applies to investments in assets, at least 30% of whose environment-improving results accrue to the Netherlands and that appear on the so-called VAMIL (“Vervroegde Afschrijving Milieu-investeringen”) list. In March 2009, the Dutch government increased the budget for the execution of this provision of accelerated depreciation (along with the budget for the deduction regarding investments in certain new environmental assets, discussed in Investments in environmental assets under the Tax incentives section) to stimulate the economy.

Accelerated depreciation of production costs of qualifying Dutch films was abolished after 1 July 2007.

Accelerated depreciation also is available for certain other designated assets, for example, investments of starting entrepreneurs.

Investment costs minus residual value of sea-vessels that are operated mainly from the Netherlands may be depreciated straight-line over five years. Instead of accelerated depreciation these taxpayers may choose immediate taxation (see Tonnage tax regime under Tax incentives section).

As a temporary provision to stimulate the economy, companies may depreciate under certain conditions, the value of assets bought and investments made in 2009 and 2010 in two years (or more), provided that the assets are not used formerly and the assets are not meant to be mainly put at the disposal of third parties, directly or indirectly. Further, the asset has to be brought into use before 1 January 2012 and 1 January 2013, respectively.

The temporary possibility for accelerated depreciation, however, is prohibited for among other things buildings; ground, road and hydraulic works; cars (except environmentally very clean and efficient cars); and intangible fixed assets. It is possible to depreciate up to 50% of the asset’s value in the year of investment (2009 or 2010).
The Netherlands

The remainder may be depreciated, without the 50% limitation, in subsequent year(s). The annual amount to be depreciated is limited to the payments or investments made in a year.

A depletion allowance for natural resources may be granted for tax purposes, when it conforms to sound business practice and is appropriate for accounting purposes.

**Net operating losses**
As of 1 January 2007, the tax loss carryback has been reduced from three years to one year. A tax loss carryforward, which was not subject to time limitations, up to and including 2006, is limited to nine years. This also applies to start-up losses.

With regard to losses arising in the years 2009 and 2010, corporate taxpayers may opt for a temporary extension of the carryback period for losses from one to three years. This option, however, also means that the maximum period for loss carryforward will be limited to six years (instead of nine). Furthermore, the extended measure is limited to EUR 10 million loss carryback per extra year.

Complex rules may prohibit the utilisation of net operating losses after a change of 30% or more of the ultimate control in a company. Furthermore, limitations exist on loss utilisation for holding/finance companies. Based on these rules, losses incurred by a mere holding or group finance company can be offset only against holding or finance income in preceding and following years, provided that certain strict conditions are met. These conditions are meant to counter tax planning, whereby, the Dutch company concerned acquires (e.g., by way of equity contribution or exchange) other assets that enhance its income streams, and therefore, its capacity to make use of the losses. Companies carrying out significant other activities (with 25 or more employees) are, in principle, unaffected by these loss relief restrictions.

**Payments to foreign affiliates**
A Dutch corporation generally can claim a deduction for royalties, management service fees, and interest charges paid to foreign affiliates, to the extent that the amounts are not in excess of what it would pay an unrelated entity (i.e., arm's-length principle). Dutch companies are obliged to produce transfer pricing documentation describing the calculation of the transfer price and the comparability of the transfer price with third party prices.

**Taxes**
Certain taxes, such as the tax on insurance transactions, are deductible. Tax paid on the transfer of immovable property must be included in the cost price and taken into account in the course of normal depreciation.

**Other deductions**
Deduction of certain expenses (e.g., costs for food, drink, and entertainment) paid by employers for employees are not deductible, in part. The non-deductible portion is 0.4% of the total taxable wages of all employees but never less than EUR 4,200 per year. Alternatively, the employer may choose to deduct only 73.5% of the actual expenses.

**Anti-abuse rules regarding interest and loans**
Due to existing anti-abuse rules, the deduction for interest paid on intra-group debts relating to certain transactions is disallowed. However, if the taxpayer provides
credible evidence of overriding commercial reasons for the transaction as well as the loan, or of effective taxation of the interest in the hands of the recipient that is comparable to Dutch taxation as far as the base and rate of taxation are concerned, the interest may be deductible.

Furthermore, interest paid on certain profits depending on participating loans, will be qualified as a dividend, and thus, will not be tax deductible. Interest received upon these loans may meet the definitions for the participation exemption if the creditor also holds a qualifying participation in the debtor. Intra-group conduits may be denied a credit of foreign withholding tax with respect to royalties or interest received if no economic risk is deployed.

Until 2007, interest due on a loan from a group company related to an acquisition of a company from outside the group, which was included in a fiscal unity, was deductible only as far as the acquiring company had its own profits. Full deductibility was granted only eight years after the acquisition. This 2007 interest provision is replaced by the regular inter-company interest deduction limitations. If the interest payment to a group company relates to a loan, which is directly or indirectly, granted by a group company in order to finance an acquisition or capital contribution, the interest will be deductible only if the loan and the underlying transaction are based predominantly on sound business considerations or if the interest received is effectively and sufficiently taxed.

When the debt ultimately is financed externally (outside the group) and a direct relationship exists between the internal debt and the ultimate external financing, it can be substantiated that there are sound business reasons for the loan. Furthermore, the use of tax losses or similar relief claims by the recipient of the inter-company interest, may affect adversely the deductibility of the interest paid. Also the law states that the interest deduction related to indebted dividend distributions, paid back capital and capital contributions is not only possible in case of sound business reasons but also if the interest is taxed in the hands of the creditor at an effective tax rate that is considered adequate by Dutch standards. The latter requirement means that the interest needs to be subject to an effective tax rate of at least 10% over taxable profits determined according to Dutch standards. For the determination of “a taxable base according to Dutch tax standards” the tax base limitation for the patent box is not taken into account.

As of 1 January 2008, a change of law has entered into force with regard to this limitation of deduction of intra-group interest payments. If the taxpayer makes a reasonable case that the interest is taxable at a tax rate of at least 10%, the tax authorities, nevertheless, have the option to substantiate that either the liability or the corresponding transaction is not based on sound business reasons. The tax authorities also have the option to substantiate that the liability is incurred in order to compensate losses or other rights that were formed in that year or that will be formed shortly thereafter. The change also is applicable to existing loans.

**Thin capitalisation rules**

Thin capitalisation rules, which limit the deductibility of interest paid on intra-group debts, were introduced as of January 2004. These rules apply to all Dutch companies that are part of a domestic or international group of companies. The allowed debt-to-equity ratio is 3:1, based on the average of the tax equity at the beginning and at the end of the year. A higher ratio may apply at the request of the taxpayer, if the group to which the Dutch company belongs has, according to the financial statements,
The Netherlands

a higher, worldwide debt-to-equity ratio. Interest paid on loans exceeding the 3:1 ratio, are disallowed only to the extent it exceeds inter-company interest received. The deduction of interest paid on genuine third party loans is not limited by the thin capitalisation rules.

**Limited deductibility of costs relating to remuneration by way of shares**

Any remunerations by way of shares, profit-sharing certificates, option rights on shares or similar rights are not deductible as of January 2007. However, grandfathering rules exist for situations where option rights have been granted to employees before 24 May 2006.

As of 1 January 2009, costs related to so called stock appreciation rights for employees that earn an income which exceeds EUR 500,000 are not deductible, as a result of the tax legislation on “excessive” remuneration. However, grandfathering rules apply for situations where stock appreciation rights were granted before 1 January 2009.

**Group taxation**

**Fiscal unity regime**

A parent company and its Dutch-resident subsidiaries (if the parent owns at least 95% of the shares) may, under certain conditions, file a tax return as one entity (fiscal unity). Group taxation is available for companies having their place of effective management in the Netherlands, both for Dutch tax and treaty purposes.

The main feature of the fiscal unity is that profits of one company can be set off against losses of another company forming part of that fiscal unity. Furthermore, inter-company transactions are eliminated.

In the summer of 2008, the Dutch Supreme Court referred a question to the European Court of Justice (ECJ) whether the “place of effective management” condition is allowed under the EU Treaty. In February 2010, the ECJ decided that the Dutch fiscal unity regime does not violate EU law (the freedom of establishment), insofar as it disallows a cross-border fiscal unity. However, the ECJ has not yet explicitly dealt with the effects of the fiscal unity regime, other than cross-border loss utilisation, such as the transfer of assets between group companies without immediate taxation and the use of “final losses”. The Dutch Supreme Court will possibly deal with those issues at a later stage (the case has been referred back to this Court for final judgment).

**Transfer pricing rules**

Based on a general transfer pricing provision in the corporation tax, all transactions between related parties must be at arm's length. Furthermore, a specific transfer pricing provision exists with respect to the transactions of an interest and royalty conduit company. Dutch companies are obliged to produce transfer pricing documentation describing the calculation of the transfer price and the comparability of the transfer price with third party prices. If a transaction between related parties is not at arm's length, the taxable income may be corrected by the tax authorities. Moreover, transactions that do not meet the arm's-length test may constitute a contribution of informal capital or a hidden profit distribution.

On the basis of a decree of the State Secretary for Finance regarding transfer pricing, companies may request an advance tax ruling (ATR) and an advance pricing agreement (APA). An ATR may be requested on the classification of activities and an
APA may be required on the classification of activities and the arm’s-length character of the transfer price.

**Tax incentives**

**Small investments**
A system of allowances for small investments is in place. To calculate this annual allowance, investments of more than EUR 450 each are totalled to determine the percentage of the allowance. Under the system, a deduction of 28% of the value of the total annual investments from corporate income is granted on investments exceeding the amount of EUR 2,200 up to and including EUR 54,000. On investments exceeding EUR 54,000 up to and including EUR 100,000, a fixed deduction of EUR 15,120 is granted. On investments exceeding EUR 100,000 up to and including EUR 300,000, the deduction is EUR 15,120 minus 7.56% of the amount exceeding EUR 100,000. If the investments total more than EUR 300,000 in a year, no allowance is given.

**Investments in energy-efficient assets**
For investments in energy-efficient assets, there is a deduction from corporate income of 44% of the value of the total annual amount of investments exceeding EUR 2,200 up to and including EUR 115,000,000. From 1 June 2009 until 1 December 2010, this deduction is possible in case of certain energy-saving investments in existing rental houses limited to a total investment of EUR 15,000.

**Investments in environmental assets**
For investments in certain new environmental improving assets exceeding EUR 2,200 per calendar year (with a maximum of EUR 25 million per asset), a deduction from corporate income of 40%, 30% or 15% exists, depending on the ministerial classification of the assets. In March 2009, the Dutch government decided to increase the budget for this deduction (and also for the execution of the provision of accelerated depreciation of environment-improving assets, the so-called VAMIL, see *Depreciation and depletion under Deductions section*), in order to stimulate the economy. If additional conditions are met, the deduction for investments in new environment improving assets may be increased to 60%, 50% or 30%.

**New technology**
R&D of applied new technology are subsidised by a reduction of wage tax to be paid on wages of employees engaged in research and development of technologically new products. The subsidy accrues to the employer when the employee is credited for the normal amount of wage tax. The benefit for each employer (or group of companies) may not exceed EUR 14,000,000 per year, being the amount substantially raised for the purpose of the years 2009 (retroactively) and 2010 to stimulate the economy.

To obtain the relief under the R&D incentive programme, taxpayers must file an application with the Ministry of Economic Affairs. The budget for this subsidy is fixed, so the amount of the subsidy is dependent on budget availability. As of 2009, self-developed and utilised software falls within the scope of the R&D incentive under certain conditions.

**Tonnage tax regime**
In order to stimulate entrepreneurs engaged in ocean shipping, a favourable regime (known as the Dutch tonnage tax regime) may be available to certain shipping companies. Under this regime the taxable profit of a sea-going vessel is based on its
The Netherlands

registered net tonnage multiplied by a fixed amount of deemed profit per ton, instead of the actual profits from the exploitation. The regime only applies to the calculation of the profit related to the qualifying shipping activities. These activities include operating vessels in international traffic (including transportation for the purpose of the exploitation of natural resources at sea), towing and dredging and connected activities. The tonnage tax regime applies upon request and for a fixed period of 10 years or multiples of the 10-year period.

The Dutch government has proposed to expand the tonnage tax regime as of 1 January 2010, by including the transportation activities of sea-going ships involved in cable- and pipe-laying and the transportation activities of research and crane ships. The European Commission needs to approve this proposal. Further, adding a fifth bracket to the current four bracket degressive scale system with retroactive effect as of 1 January 2009, and introducing a significant lower amount of deemed profit per ton for large vessels with a net tonnage of more than 50,000, has been proposed.

Withholding taxes (WHT)

Domestic corporations are required to withhold taxes as follows:

### Notes

1. A nil withholding tax rate applies to payments to a resident corporation when its shareholding qualifies for the participation exemption and the shares form part of a company whose activities are carried on in the Netherlands. However, dividend withholding tax may be levied on certain profit participating loans.
2. The lower rate applies if the foreign company owns directly at least 25% of the capital of the Dutch company.
3. The 5% rate is applicable if the foreign company directly owns 10% of capital of the Dutch company. The 0% rate is applicable if the dividend originates from ordinary taxed profits and the dividend is tax exempt in the hands of the recipient.
4. Based upon the treaty concluded with former Yugoslavia.
5. Negotiations on (revisions of) tax treaties are currently pending with Algeria, Australia, Barbados, Brazil, Canada, China, Costa Rica, Cyprus, Cuba, France, Germany, Iran, Japan, Kenya, Kyrgyzstan, Lebanon, Libya, Peru, Republic of Korea, Serbia and Montenegro, Slovak Republic, Tanzania, Turkey and Turkmenistan. Revised (new) tax treaties with Switzerland (26 February 2010) and the United Kingdom (26 September 2008) have been signed, but are not yet in force. New tax treaties (with new countries) that have
been signed but not yet effective: Hong Kong (22 March 2010), Oman (5 October 2009), Saudi Arabia (13 October 2008) and United Arab Emirates (8 May 2007).

6. Indicates member state of the EU. The EU Parent/Subsidiary Directive applies from January 1 1992. According to the Directive, dividends paid by a Dutch company (BV or NV) to a qualifying parent company resident in another EU member state must be exempt from Dutch withholding tax, provided certain conditions are met. Among other things, the EU parent company must hold at least 15% (from 2009, to the EU parent must hold 10%) of the Dutch dividend-paying company's capital (or, in certain cases, voting rights) for a continuous period of at least one year. A provisional exemption from dividend withholding tax will apply from the start of the one-year holding period. The exemption will be cancelled retroactively if, following the dividend distribution, the one-year holding requirement is not actually met. The Dutch dividend-distributing company must provide to the Dutch tax authorities a satisfactory guarantee for the payment of dividend withholding taxes that, but for the provisional exemption, would be due. The exemption is also applicable if the parent company is a resident of a EU member state and owns at least 10% of the (voting) shares in the Dutch company but only on the basis of reciprocity (Finland, Germany, Greece, Luxembourg, Spain, and United Kingdom). Should the withholding tax exemption not be available under the EU Parent/Subsidiary Directive the treaty rate(s) set out in the right-hand side of the same column (following "/") will apply.

7. The lower rate applies if the foreign company owns, directly or indirectly, at least 25% of the capital of the Dutch company.

8. The lower rate applies if the foreign company directly owns at least 10% of the capital of the Dutch company.

9. The nil rate applies if the foreign company directly owns at least 50% of the capital of the Dutch company, or invested more than EUR 250,000 in the Dutch company or owns directly 25% of the capital of the Dutch company and has a statement indicating that the investment in Dutch capital is, directly or indirectly, guaranteed by the government of Belarus.

10. The 5% rate applies if the foreign company owns, directly or indirectly, at least 25% of the capital or at least 10% of the voting rights in the Dutch company.

11. The treaty is not applicable for Hong Kong and Taiwan.

12. The lower rate applies if the foreign company owns at least 25% of the voting shares of the Dutch company.

13. The lower rate applies if the foreign company owns at least 25% of the voting rights in the Dutch company.

14. The 5% rate is applicable if the Italian company owns at least 50% of the voting shares in the Dutch company for a continuous period of at least 12 months prior to the date chosen for distribution of a dividend. The 10% rate is applicable if the Italian company owns at least 10% of the voting shares in the Dutch company for the continuous period mentioned above. In other cases, the dividend withholding tax rate is 15%.

15. The lower rate applies if the foreign company owns at least 25% of the voting shares of the Dutch company for a continuous period of at least six months immediately before the end of the book year to which the dividend distribution relates.

16. The lower rate applies if the foreign company owns, directly or indirectly, at least 10% of the capital of the Dutch company.

17. The zero rate is applicable if the foreign company owns, directly or indirectly, at least 50% of the capital of the Dutch company or if it has invested more than USD 1 million in the Dutch company, insofar as the government of Kazakhstan has guaranteed the investment; the 5% rate applies if the recipient company owns at least 10% of the capital of the paying company.

18. These rates do not apply to dividend payments to Luxembourg “1929” holding companies.

19. The dividend article of the treaty is not applicable anymore. The national withholding tax rate is applicable.

20. The zero rate is applicable if the foreign company owns, directly or indirectly, at least 50% of the capital of the Dutch company and invested more than USD 300,000 in the Dutch company. The 5% rate is applicable if the foreign company owns directly 25% or more of the capital of the Dutch company. The 15% rate is applicable on portfolio investments.
The Netherlands

21. The rate is 15% unless the dividend is paid to an Antillean company holding at least 25% of the paid-up capital in the Dutch company. In this latter case, the withholding tax rate will be reduced to:
   a. 5% if the dividends received are subject to Antillean profits tax of at least 5.5% on the dividend; or
   b. 7.5% if the profits tax is less than 5.5%.
   The combined Netherlands Antilles corporate income tax and Dutch dividend withholding tax for participations of at least 25% must not exceed 8.3%. Depending on the tax percentage levied in the Netherlands Antilles, the Dutch dividend withholding tax will be restituted accordingly.

22. The 5% rate is applicable if the recipient of the dividend is the beneficial owner and directly owns 10% of the capital of the Dutch company. The zero rate is applicable if the recipient of the dividend is the beneficial owner and directly owns at least 25% of the capital of the Dutch company.

23. The 5% rate is applicable if the recipient of the dividend is the beneficial owner and directly owns at least 25% in the capital of the Dutch company with a minimum investment of at least EUR 75,000.

24. The Netherlands applies the treaty with the former Soviet Union unilaterally to Kyrgyzstan, Tajikistan and Turkmenistan.

25. The lower treaty rate applies if the Spanish company owns 50% or more of the capital of the Dutch company, or if the Spanish company owns 25% or more of the capital of the Dutch company and another Spanish company also owns 25% or more of that capital.

26. The zero rate is applicable if the foreign company owns, directly or indirectly, at least 50% of the capital of the Dutch company or invested more than USD 300,000 in the Dutch company. The 5% rate is applicable if the foreign company owns directly 20% or more of the capital of the Dutch company.

27. The lower rate applies if the foreign company owns directly at least 10% of the voting rights in the Dutch company. On 8 March 2004, the Netherlands and the United States signed a protocol amending the applicable tax treaty. Based on this protocol, the withholding tax on dividends will be reduced to 0% if the receiving company owns 80% or more of the voting power of the distributing company, provided that certain other conditions are also met. This reduction of the dividend withholding tax has taken effect as of 1 January 2005.

28. The 5% rate is applicable if the foreign company owns directly 25% or more of the capital of the Dutch company. The zero rate is applicable if the dividend for that company qualifies for the participation exemption in the Netherlands. The 15% rate is applicable to portfolio dividends.

29. The 5% rate is applicable if the foreign company owns, directly or indirectly, at least 50% of the capital of the Dutch company or invested more than USD 10 million in the Dutch company. The 7% rate applies to the foreign company owning, directly or indirectly, at least 25% of the capital of the Dutch company.

30. No dividend withholding tax is due provided the share in the participation is at least 50% and at least USD 250,000 capital is paid in, in the participation. A dividend withholding tax of 5% is due if the share in the participation is at least 25%.

31. A dividend withholding tax of 5% is due if the share in the participation is at least 10%. No dividend withholding tax is due provided the share in the participation is at least 50% and at least USD 2,000,000 capital is paid in, in the participation.

32. Based upon most-favoured nation principle.

33. In case the dividend is not taxed in the Netherlands due to the application of the participation exemption, a zero dividend withholding tax is applied.

34. In case a Thai company holds at least a 25%-share in a Thai company, the Dutch dividend withholding tax rate is 5%.

35. If a share of at least 50% is held by a company, no dividend withholding tax is due. If the share the company holds is less than 50%, 5% dividend withholding tax is due.

36. As per 29 December 2004 Switzerland and the EU concluded a treaty in the light of the EU savings directive. The treaty, amongst others, contains a clause that no dividend tax is withheld if certain requirements are met. The main requirements are that a shareholding of at least 25% is held directly for a period of at least two years and both corporations
are not subjected to a special tax regime. Please note that even though the treatment of dividend appears to be equal to the treatment on the basis of the EU-parent subsidiary directive, the directive is in fact not applicable to Switzerland.

37. The zero rate applies if the foreign company owns directly at least 5% of the capital of the Dutch company.
38. The 5% rate applies if the foreign company owns directly at least 25% of the capital of the Dutch company with a minimum investment of at least EUR 200,000 in the Dutch company.
39. The nil rate applies if the foreign company directly owns at least 7.5% of the capital of the Dutch company.

**Tax administration**

**Returns**
Tax returns must be filed either every calendar year or every financial year. The Dutch tax authorities generally make a provisional assessment before issuing the final assessment after a full examination of the return.

**Payment of tax**
The corporate tax assessed must be paid within two months of the date of the assessment. In addition, provisional assessments are issued for the current tax year on the basis of the prior year’s taxable income.

Significant developments

Amendments to the profit tax
The Parliament of the Netherlands Antilles has approved several changes to the profit tax. These changes impact provisions to the participation exemption, the exempt companies and foreign subsidiaries.

Participation exemption
The participation exemption has been changed as follows:

- The exemption for foreign participations is extended from 95% to 100%.
- An activity and a subject-to-tax clause have been introduced.
- A definition of “dividend” has been included.
- The minimum cost price limit for participations less than 5% is reduced to ANG (Netherlands Antilles guilder) 890,000.

Please see the section on Income determination for more information on changes to the participation exemption.

Exempt company and foreign subsidiaries
The possible use of an exempt company has been expanded. In addition to investments in debt instruments, securities and deposits, relevant amendments to the profit tax have been added to include the licensing of intellectual and industrial property rights and other comparable property and usage rights as permitted activities.

A new limitation requires that no more than 5% of the revenues of the exempt company may consist of dividends from subsidiaries that are not subject to a tax regime comparable to that of the Netherlands Antilles. A profit tax regime is comparable to that of the Netherlands Antilles if the foreign tax regime provides for a profit tax rate of at least 15% (50% of the Netherlands Antilles tax rate, excluding island surcharges). The subject-to-tax requirement is also met if the foreign tax regime appears on a list of comparable tax regimes issued by Ministerial Decree.

Based on the amount and kind of dividends received, the Inspector may issue a notification that the company no longer meets the requirements for exempt status. The exempt status will then terminate starting the first day of the year following the year in which the notification becomes final.
Netherlands Antilles

Entry into force
The new regime became effective in December 2009 and was made retroactive to 1 January 2009. According to a transitional clause, a taxpayer may elect to continue the application of the old regime up to and including the tax year 2010. The request must be filed with the Inspectorate of taxes before the end of March 2010.

Compliance with sound international fiscal standards
In recent years, the Netherlands Antilles has complied with international standards as set forth by the Organisation for Economic Co-operation and Development (OECD) and the European Union (EU). There is, for example, no distinction in the fiscal treatment of offshore and onshore taxpayers. Well-known incentives such as a participation exemption comparable to that applied in the Netherlands and Luxemburg apply to all taxpayers, as well. The Netherlands Antilles does not have bank secrecy laws, and has in recent years concluded tax information exchange agreements (TIEAs) with several countries.

Tax treaties
The Netherlands Antilles currently has tax treaties in effect with the Netherlands, Aruba and Norway. A double tax agreement (DTA) has recently been negotiated with Jamaica.

Furthermore, the Netherlands Antilles has signed TIEAs with several countries, including Australia, Canada, Denmark, Mexico, Spain, Sweden, New Zealand and the United States. As a result, the Netherlands Antilles has been moved to the white list of the OECD Global Forum.

Transitional legislation
In 2001, the old offshore legislation was abolished. Qualifying offshore companies incorporated before 1 January 2002 may continue to apply the old regime until 2019, provided that certain conditions are met.

Latest political developments
The Netherlands Antilles consists of five islands: Curaçao, Bonaire, St. Maarten, Saba and St. Eustatius. Together with Aruba and the Netherlands, the Netherlands Antilles belong to the Kingdom of the Netherlands.

An agreement between the Netherlands and the Netherlands Antilles has been reached, which will result in the dissolution of the Netherlands Antilles. Maintaining two levels of government has been burdensome and not cost effective; therefore, the central (federal) level of government will be abolished and the Netherlands Antilles, as such, will cease to exist. Bonaire, Saba and St. Eustatius (the BES islands or the BES) will become a public body of the Kingdom of the Netherlands. St. Maarten and Curaçaø have each chosen to become autonomous states within the Kingdom of the Netherlands. This means that each of the islands will remain within the Kingdom of the Netherlands structure, but the ties between the islands will be loosened. Defence and foreign affairs will remain within the province of the government of the Kingdom of the Netherlands. Also, the judiciary system will remain an integral part of the Kingdom of the Netherlands. The change is scheduled to become effective fourth quarter 2010.

In November 2009, a draft of the new tax system for the islands of Bonaire, St. Eustatius and Saba was introduced to Parliament. The system will deviate substantially from the systems that currently apply to the Netherlands Antilles and to the...
Netherlands Antilles

Netherlands, respectively. The new tax system proposes to replace the profit tax with two new taxes.

One of these taxes is levied on the revenue from real estate. Taxable revenue is computed as 4% of the market value of the real estate. This amount would be taxed at a rate of 20%. The second new tax is on all revenue derived from legal entities. This applies, for example, to dividends and interest, as well as to payments to beneficiaries by a trust or private foundation. The tax rate in this case is 5%.

The new tax system will also apply to legal entities that are sufficiently connected to the BES islands. As a general description, a legal entity is said to be sufficiently connected to these islands in cases where more than 50% of its assets are employed locally, or the entity employs at least three local citizens and owns an office there.

Please note, the dissolution of the Netherlands Antilles is planned to take effect in fourth quarter 2010. Accordingly, the new tax laws are expected to take effect starting January 2011.

Taxes on corporate income

General

Resident corporations are taxed on worldwide income. Non-resident companies are taxed on the following Antillean-source income:

- Income attributable to a permanent establishment;
- Income from real property situated in the Netherlands Antilles; and
- Interest on loans secured by a mortgage on property situated in the Netherlands Antilles.

Capital gains are not differentiated from operating income and are subject to the same applicable rates. Corporations are taxed on their income as reflected in their profit and loss account, less certain deductible items.

Companies are generally taxed at a flat rate of 34.5% (consisting of a 30% profit tax rate and a 15% municipal surtax) as per 1 January 2000.

Special minimum rates apply to the taxable income of certain companies:

Shipping business

Shipping companies are subject to the general profit tax rate of 34.5%. Shipping companies can however apply for the tonnage regime. If applicable, their profit is calculated based on the rates in the table below. If a shipping company applies the tonnage regime, the actual profits or losses are not taken into account, regardless of whether they are regular profits or capital gains.

The calculated profit based on the table below is subject to the general tax rate of 34.5%.

**Exempt company**

*Please see the section on Tax incentives for more information on exempt companies.*

**Companies under transitional offshore rules**

The transitional rules distinguish three types of offshore companies.

1. **Offshore companies** which, on the last day of the financial year that ended before 1 January 2002, had all (or almost all) investments in or revenues from portfolio investments, royalties, holding companies, finance companies, or technical support will be grandfathered through the last day of the financial year of the company that starts before 1 July 2019.

2. **Offshore companies** which, on the last day of the financial year that ended before 1 January 2002, had all (or almost all) their profit subject to the tax rates of the Guarantee Ordinance Profit Tax (GOPT) 1993 (i.e., 15%, 24% to 30% and 2.4% to 3%) and which had a valid ruling with the tax inspector (e.g., trading companies, banks, captives commissions and fee-earning companies) on the aforementioned date or for which a request for (extension of) such a ruling had been filed on that date, will be grandfathered through the last day of the financial year of the company that starts before 1 July 2019.

3. **Companies** that, on the last day of the financial year that ended before 1 January 2002, had invested all (or almost all) investments in or revenues from real estate property or rights connected thereto, located outside the Netherlands Antilles. For profit tax purposes these companies will be grandfathered through the last day of the financial year of the company that starts before 1 July 2019.

Specific rules are applicable to companies that were incorporated after 30 June 1999 but before 31 December 2001. These companies may also qualify for the aforementioned transitional rules provided that these companies have been active in a meaningful way. In principle, a company will not be considered to have been active in a meaningful way if the assets of the companies consist predominantly of deposits or receivables on shareholders or affiliated parties.

The grandfathering period continues until 2019.

**Corporate residence**

Corporate residence is, in principle, determined by the place of incorporation. However, other factors may also determine residence. For example, a foreign company with effective management in the Netherlands Antilles is considered to be a resident. A company that has been established in the Netherlands Antilles will always be considered a resident of the Netherlands Antilles.

Offshore entities in the Netherlands Antilles must have a local managing director. This function is easily provided by one of the many trust companies established in the Netherlands Antilles.
Netherlands Antilles

**Transfer of legal seat**
Legislation has been enacted under which a Netherlands Antilles company is allowed to transfer its legal seat to another jurisdiction (if permitted under the laws of the outside jurisdiction), and allows a foreign company to migrate to the Netherlands Antilles.

**Other taxes**

**Turnover tax**
In Curaçao and Bonaire, a turnover/sales tax is levied on the revenue derived from services and deliveries rendered by an entrepreneur or company in the relevant territory. A limited number of services and deliveries are exempt, such as:

- Exports;
- Certain services to non-residents;
- Medical services;
- Services at the airport or in the harbour regarding imported or exported goods or goods in transit; and
- Advisory and management services provided to or by offshore companies and offshore banks.

An entrepreneur liable to turnover/sales tax must file a declaration, with the Tax Inspectorate before the sixteenth day of month following the month concerned, at the Tax Collector’s office. The turnover tax rate is 5%.

In St. Maarten, Saba and St. Eustatius the applicable turnover tax rate is 3%.

**Land and property taxes**
The transfer of Netherlands Antilles-located immovable property is subject to a 4% transfer duty. A land tax is levied on real estate located in the Netherlands Antilles at an annual rate of 0.3% on the value of the land.

**Dividend withholding tax**
Dividend tax is not applicable.

**Branch income**
The Netherlands Antilles has adopted a definition of a branch (permanent establishment/permanent representatives) that is in line with the definition in the OECD Model Double Taxation Convention on Income and Capital.

The profits of a permanent establishment in Aruba or the Netherlands are tax exempt based on the tax arrangement with the Kingdom of the Netherlands. In the case of a permanent establishment outside the Kingdom of the Netherlands (the Netherlands, the Netherlands Antilles and Aruba), the income realised through the permanent establishment, after deduction of foreign taxes, is tax exempt. In the case of a foreign loss, this is not deductible.

Foreign real estate is always deemed to be part of a permanent establishment and, as such, is fully tax exempt.
Netherlands Antilles

The current regime became effective in December of 2009, and was made retroactive to 1 January 2009. Changes were also introduced to the participation exemption and the exempt company.

A taxpayer may elect to continue to apply the old regime for up to two years, until 2010. If the election is made, then it must be made for all the corporate tax amendments. It is not possible, for example, to continue to use the old regime for branch income but apply the new regulations for the participation exemption.

**Income determination**

**Inventory valuation**
Both the last-in, first-out (LIFO) and first-in, first-out (FIFO) methods of inventory valuation are permitted provided the chosen method conforms to sound commercial practice. Conformity of book and tax reporting is not required. However, occasions or situations for differences are very rare.

**Capital gains**
Capital gains or losses are, in principle, considered ordinary income and subject to standard corporate rates. An exemption from profit tax is granted for advantages (dividends and capital gains) from a qualifying participation (see Inter-company dividends).

Under the transitional regime for offshore companies (investment, holding, finance and patent holding companies), capital gains and losses are tax exempt.

**Inter-company dividends**
In December 2009, an amendment to the profit tax entered into force retroactively from 1 January 2009. Based on this amendment, the participation exemption applies as follows:

- In general, a full participation exemption applies to all local as well as foreign participations. The exemption applies for dividends as well as for capital gains. However, it is now required that dividends be derived from an active participation (non-portfolio investment) or a participation that is subject to tax.
- Expenses incurred in connection with a qualifying participation (including capital losses) are not deductible, unless it can be demonstrated that these are indirectly incurred to realise profits that are subject to tax in the Netherlands Antilles.

**Non-portfolio investment clause**
A participation is deemed to be active if the gross income of that participation consists of not more than 50% of dividends, interest or royalties received other than from an enterprise of that participation.

**Subject-to-tax clause**
A participation is deemed to be subject to tax if it is subject to a tax rate of at least 10%.

If at least one of these clauses has been met, the 100% participation exemption will apply. If none of these clauses are met, the participation exemption is limited to 70% of dividends. Consequently, the dividends would be subject to an effective tax rate of 10.35% (30% * 34.5% regular tax rate).
Netherlands Antilles

The 100% exemption also applies to income other than dividends, such as capital gains derived from qualifying participations.

**Immovable property**
The aforementioned clauses do not apply to dividends from a participation that (almost) exclusively (directly or indirectly) holds immovable property. The 100% participation exemption applies to these dividends.

**New definition of dividend**
A dividend is defined as a distribution of profits on shares or profit-sharing notes, paid from statutory profits or profit reserves. Dividends shall not be considered payments for the purchase of own shares or profit-sharing notes, distributions on shares upon liquidation, repayment of paid-up capital, or the distribution of bonus shares.

**Minimum cost-price threshold for participations**
The minimum cost-price threshold for shareholdings, profit-sharing notes or voting rights of less than 5% is reduced from the current ANG 1 million to ANG 890,000.

Under the old regime, a foreign participation was exempt for 95%. The same applied to a participation in an exempt company. However, the non-portfolio investment clause and the subject-to-tax clause are new amendments provided under the current regime.

**Transitional regulation**
A taxpayer may elect to continue to apply the old regime for up to two until 2010. This also applies to the amendments with regard to the exempt company and foreign branch income. The request for the continuation of the old regime must be filed with the Inspectorate of Taxes before the end of March 2010.

**Foreign income**
A Netherlands Antilles corporation is taxed on foreign interest and other income as earned, and on foreign dividends when received. Except as provided in treaty arrangements, there is no general provision in the tax law allowing credits for foreign taxes paid. Undistributed income of foreign subsidiaries is not taxable.

The profit of a permanent establishment is tax exempt. Foreign losses would not be deductible.

**Deductions**

**Depreciation and depletion**
Depreciation of tangible fixed assets, excluding land, is taken over the estimated useful life of the asset. The depreciable base includes purchase price, customs duties, shipping costs and installation costs, less residual value, if any. The straight-line method is customary, but the declining-balance method is also acceptable. In addition, an accelerated deduction of one-third of the assets’ depreciable basis may be taken. The assets’ remaining cost basis (two-thirds) is depreciated using one of the acceptable methods.

The cost basis of certain intangible assets, such as patents, trademarks and copyrights, can be amortised over their expected useful lives. Goodwill and other intangibles resulting from the excess of purchase price over the cost basis of assets purchased are amortised over three to five years.
Net operating losses
Losses may be carried forward for a period of 10 years. Start-up losses during the first four years for companies having tax holidays may be carried forward indefinitely. Carrybacks are not permitted.

Payments to foreign affiliates
The Corporate Tax Act provides for specific limitations for deduction of interest in certain cases of restructuring and refinancing involving the creation of artificial flows of interest payments to persons who are tax exempt or subject to lower taxes in their jurisdiction.

Taxes
Taxes, other than the corporate tax itself, incurred in the course of doing business are deductible.

Other significant items
Charitable donations to qualifying entities within the Kingdom of the Netherlands may be deducted to the extent that they exceed 1% of net income and ANG 100 after utilisation of tax loss carryforwards. The maximum deduction is 3% of net income.

Group taxation
Fiscal unity
The Corporate Tax Act provides for fiscal unity treatment for corporate income tax purposes. Resident companies with wholly owned resident subsidiaries could qualify for this regime. The parent company is entitled to submit one consolidated income tax return on behalf of the entire fiscal unity group. As a result, only the parent company is assessed.

Within certain limitations, losses of one company can be offset against the profits made by another company in the fiscal unity group. No profits need to be recognised on inter-company transactions, as these are disregarded for tax purposes. The fiscal unity applies for profit tax purposes only; the participating entities remain separate and identifiable under civil law.

Fiscal unity relief is confined to companies organised under the laws of the Netherlands Antilles, the Netherlands or Aruba. The companies which invoke this relief must have their place of management in the Netherlands Antilles.

On the basis of the non-discrimination provision of a relevant tax treaty, entities established under the laws of a tax treaty party may also be admitted to the fiscal unity regime provided that they are resident in the Netherlands Antilles.

Mergers
The Corporate Tax Act provides for a tax facility for business mergers. In a business merger, a company acquires all or a substantial part of the trade or business of another company with a view towards combining the business operations of the two companies into a permanent financial and economic organisation. If the business is transferred as part of a business merger, the gains realised by the transferor are not subject to profit tax if certain conditions are met.
Netherlands Antilles

Although there is no specific provision in the Corporate Tax Act with regard to legal mergers, legal split-ups and reincorporations, the Tax Inspectorate has announced that when certain conditions are met, a tax facility also applies in these cases.

**Tax incentives**

**Inward investment and capital investment**
There are tax incentives or holidays for the establishment of new economic enterprises and hotels with a predetermined minimum employment and capital investment. Special provisions relate to the taxation of shipping and insurance companies.

**Investment allowance**
For a minimum investment of ANG 5,000, an 8% investment allowance on acquisitions and improvements (for new buildings, 12%) is permitted as a deduction from taxable profit in the year of investment and in the subsequent year, for businesses operating within the Netherlands Antilles.

**Accelerated depreciation and tax rollover reserve**
An accelerated deduction of one-third of the assets' depreciable basis may be taken. If a profit results at the time of sale of capital assets with the intention to replace that asset, the profit may be placed in a tax rollover account.

**Tax exempt company**
It is possible to elect tax-exempt status for a private limited company (Besloten vennootschap or NABV). To qualify for the exemption, a number of conditions must be met, including (but not limited to) the disclosure of beneficiaries, management, financials, and the activities (only investment and financing activities) of the company. Recently, the licensing of intellectual and industrial property rights and other comparable property and usage rights have been added to the list of allowed activities.

Another condition has been added that requires that no more than 5% of the revenues of the exempt company consist of dividends from subsidiaries that are not subject to a tax regime comparable to that of the Netherlands Antilles. A profit tax regime is comparable to that of the Netherlands Antilles if the foreign tax regime provides for a profit tax rate of at least 15% (50% of the Netherlands Antilles tax rate, excluding island surcharges).

The subject-to-tax requirement is also met if the foreign tax regime appears on a list of comparable tax regimes. The list that has been issued includes all EU and OECD member states and all jurisdictions with which the Netherlands Antilles has a tax treaty. According to the list, the subject-to-tax requirement is also met in the case of a jurisdiction that is included in the white list issued by the OECD, provided that no special tax regime is applicable.

**Independent expert**
Currently, an independent expert is required to certify that the exempt company meets the requirements for exempt status. If more than 5% of the revenues of the exempt company consist of dividends from subsidiaries that are not subject to a tax regime comparable to that of the Netherlands Antilles, the independent expert must inform the Inspectorate of Taxes. The inspector notifies the company that it no longer meets the requirements for exempt status. The exempt status is then terminated starting the first day of the year following the year in which the notification becomes final.
Other incentives

Ocean shipping companies
These companies are taxed on a fixed profit per net ton of ANG 0.60 up to ANG 2.00 (or per 10 net ton in case of management and control). International aviation companies may apply a reduced tax rate against 80% of their profit, as their profits are deemed to be gained outside of the Netherlands Antilles. As a result, the overall effective tax rate is 9.66%.

E-zone companies
E-zone companies are subject to a minimum 2% corporation tax until 1 January 2026. They will be granted special facilities regarding turnover tax and will not be subject to import or export duties. The e-zone area also includes a full free processing zone and an international service centre (e.g., repair and maintenance of machinery situated outside the Netherlands Antilles and other export services are now allowed).

New industries and hotels
These are granted partial exemption from profit tax and a minimum 2% tax rate for a period of five to 11 years. They are afforded an exemption from import duties on materials and goods necessary for construction and initial equipment and from land tax for a period of 10 years. A minimum investment is required. Losses incurred during the first four years of operations may be used to offset taxable income for an indefinite period of time.

Land development companies
Land development companies are granted a tax holiday and exemption from import duties on materials and goods used in development/construction activities. They are exempt from tax on profits realised on the sale of the developed land. A minimum investment of ANG 1 million is required. Activities should be expected to enhance the economic development of the Netherlands Antilles.

Private foundations
The “private” foundation is a variant of the long-existing “common” foundation. The most important difference is that the purposes of a common foundation may not include making distributions (other than distributions of an idealistic or social nature). This restriction does not apply to private foundations, whose purpose may include making distributions to the founders and others. A private foundation may not run a business or enterprise for profit. Acting as a holding company or investment company is not considered running a business. Private foundations are exempt from Netherlands Antilles profit tax, and their distributions are exempt from Netherlands Antilles gift tax, as are contributions of assets to the foundation by a non-resident. Gift tax in the contributor’s country may be applicable. The private foundation is intended to be an alternative to the Anglo-Saxon trust, especially in civil law jurisdictions.

Mergers, split-ups and reincorporations
In cases of a business merger, relief is granted under certain circumstances. Although there is no specific provision in the Corporate Tax Act with regard to legal mergers, legal split-ups and reincorporations, the Tax Inspectorate has announced that when certain conditions are met, a tax facility also applies in these cases.

Fiscal unity treatment
Fiscal unity treatment is available for corporate income tax purposes.
Netherlands Antilles

**Exchange controls**
In general, exchange control regulations are very liberal for offshore companies. Offshore companies established in the Netherlands Antilles can obtain non-resident status for exchange control purposes, which basically provides for total exemption from exchange controls. Onshore companies are subject to slightly stricter rules. These companies are subject to a licence fee of 1%.

**Withholding taxes (WHT)**
Although a dividend WHT was approved in 1999, it has been decided that for the foreseeable future this tax will not enter into force. If it is decided that the tax will enter into force, there is a mandatory transitional period during which the tax will not be applicable to legal entities resident at that time in the Netherlands Antilles.

**Tax treaties**
The Netherlands Antilles currently has tax treaties in effect with the Netherlands, Aruba and Norway. A double tax agreement (DTA) has recently been negotiated with Jamaica. Furthermore, the Netherlands Antilles has signed TIEAs with several countries including Australia, Canada, Denmark, Mexico, Spain, Sweden, New Zealand and the United States. As a result, the Netherlands Antilles has been moved to the white list of the OECD Global Forum.

**Tax arrangement for the Kingdom of the Netherlands Antilles (TAK)**
As part of the Kingdom of The Netherlands, the Netherlands Antilles is party to a federal tax agreement with The Netherlands and Aruba (TAK). Subject to this treaty, dividends, interest, and royalties paid out to the Antilles company may qualify for reduced rates of withholding taxes in the subject countries.

Dutch dividend withholding taxes are 15% if the Antilles company owns less than 25% of the Dutch company. In the Netherlands Antilles, only 5% of these dividends are taxed, at a rate of 34.5%, which results in an effective profit tax rate of 1.725%.

If the Antilles company's interest is 25% or more, Dutch withholding tax can be reduced to 8.3%. This tax is then paid, under a special procedure to the Netherlands Antilles tax authorities. These dividends are fully exempt from profit tax in the Netherlands Antilles.

Capital gains derived from shareholdings in Netherlands' corporations are fully exempt from profit tax in the Netherlands Antilles, provided that the shareholding amounts to at least 25% interest in the corporation. If the shareholding amounts to less than 25%, the capital gain is tax exempt for 95%.

The withholding tax regime in the TAK also applies to the old Netherlands Antilles offshore companies.

The TAK is to be revised.

**Netherlands Antilles**

**Tax administration**

**Returns**
Profit tax is levied by way of a self-assessment system. Returns are to be filed on a calendar-year basis. Non-resident corporations may file their returns based on a calendar year basis or on a different book-year. On request, this may also apply, for example, when a resident company is the subsidiary of a foreign parent company (i.e., only a local company must request for a different tax year end).

A provisional return must be filed within three months after the end of the book-year. A final return must be filed within six months after the end of the book-year.

**Payment of tax**
Payment is to be made at the time of filing and in a lump sum on the basis of the self-assessment.

In general, at the time of filing the provisional return, an amount equal to the profit tax of the previous year must be paid; the remaining balance due for the year for which the return is filed must be paid at the time of filing the final return.

For example, if the tax due for the year 2007 was 100, then at the time of filing the provisional return for 2008, that same amount must be declared and paid. If there is reason to believe that the amount for the year 2008 will be lower than for 2007, upon request, the estimated lower amount may be paid at the time of filing the provisional return.

At the time of filing the final return for the year 2008, the balance due must be paid, or if the total amount is less than the amount already paid up, a repayment will follow.

Significant developments

Corporate tax rate reduced
The Taxation (Budget Measures) Act 2010 enacted in May 2010 reduces the company tax rate from 30% to 28% with effect from the beginning of the 2011/2012 income year, which for most companies is 1 April 2011. The reduced rate applies to all resident and non-resident companies, including branches.

There will be a two year transition period to allow tax paid at 30% to be imputed or credited to dividends at a rate of 30%.

Portfolio investment entity rates reduced
From 1 October 2010, the top portfolio investment entity (PIE) tax rate is also reduced to 28%. At the same time, the other PIE rates will also be reduced to align with the new lower levels of personal taxes. From 1 October 2010, the current PIE rates of 12.5% and 21% will reduce to 10.5% and 17.5%, respectively.

Increase in goods and services tax (GST)
The recently enacted Taxation (Budget Measures) Act 2010 increases the GST rate to 15% (currently 12.5%) from 1 October 2010.

For transactions spanning 1 October 2010, the GST rate is equal to the rate applicable at the “time of supply”. The “time of supply” is generally the earlier of an invoice being issued or any payment being received. For recurring or successive supplies, the time of supply may be triggered upon each payment being made or falling due.

Changes to the thin capitalisation threshold
The recently enacted Taxation (Budget Measures) Act 2010 reduces the safe harbour threshold for the inbound thin capitalisation rules from 75% to 60% effective from the beginning of the 2011/2012 income year.

Broadly, New Zealand’s inbound thin capitalisation rules limit the scope for non-residents to fund New Zealand operations with debt and thereby reduce taxes paid in New Zealand. Under the existing rules New Zealand taxpayers controlled by non-residents may be denied an interest deduction in New Zealand to the extent that their debt percentage (total group debt/total group assets) exceeds both 75% and 110% of the worldwide group’s debt percentage. Under the change announced in the government’s 2010 budget, the 75% safe harbour will decrease to 60%.
Removal of depreciation (on certain buildings and loading rates)
The Taxation (Budget Measures) Act 2010 removes the 20% depreciation loading on new plant and equipment for assets purchased after 20 May 2010.

The depreciation rate for buildings with an estimated useful life of 50 years or more (regardless of when they were purchased) will also reduce to 0% from the 2011/2012 income year.

Changes to qualifying companies and loss attributing qualifying companies
The government announced changes to the tax treatment of qualifying companies, including loss attributing qualifying companies (LAQCs) in the May 2010 budget.

Shareholders in qualifying companies (including LAQCs) are currently able to deduct losses at their marginal tax rate but have their profits taxed at 30%.

The government announced that, from 1 April 2011, all qualifying companies (including LAQCs) will become proper “flow-through” entities for tax purposes. This means that income and losses will flow through to shareholders in proportion to their interest in the qualifying company. As such, shareholders will be taxed at their marginal tax rate on profits.

An Officials’ Issues Paper released May 2010, sets out how this change could be implemented. One option is to treat qualifying companies and LAQCs as partnerships. Submissions close on 5 July 2010.

Capital contributions
Capital contributions are contributions made to fund the acquisition of a capital asset.

Many recipients of capital contributions currently treat the contribution as a capital receipt and depreciate the full cost of the resulting capital asset. For capital contributions made after 20 May 2010, recipients can either:

• Exclude the capital contribution from the tax cost of the resulting depreciable asset; or
• Amortise the capital contribution as income over 10 years.

Changes to prevent GST phoenix fraud
In the 2010 budget, the government also announced that it will introduce rules to prevent GST fraud through “phoenix” arrangements. These schemes typically involve a purchaser claiming GST refunds, but no GST being paid by a vendor.

From 1 April 2011, transactions between GST registered persons involving the transfer of land will be zero-rated for GST.

International tax rules
The Taxation (International Taxation, Life Insurance, and Remedial Matters) Act 2009 (the Act), which was enacted on 6 October 2009, includes new rules which change fundamentally the way in which income derived from investments in foreign subsidiaries is taxed.

The new rules apply for all income tax years beginning on or after 1 July 2009.
A key feature of the reform is the exemption from New Zealand income tax for active income derived by New Zealand residents from interests in controlled foreign companies (CFCs). Passive income (such as dividends, interest, royalties and rents) is taxed on an attribution basis.

For CFCs that pass an “active business” test, no income from the CFC is attributable to the New Zealand shareholders. A CFC passes the active business test if its passive income is less than 5% of gross income. The active business test replaces the previous grey list exemption. However, an exemption from attribution of income is retained for CFCs in Australia.

The Act provides CFCs that are insurance companies with the opportunity to apply to the Commissioner for a determination qualifying them for the active income exemption. This exemption has not been extended to other financial institutions that may also actively derive “passive income”.

The Act also:

- Extends the current thin capitalisation rules to New Zealand companies that are controlled by New Zealand residents and have interests in CFCs. However, the new rules do not apply where the New Zealand resident has 90% or more of their assets in New Zealand, or less than NZD 250,000 of interest deductions;
- Amends the definitions of “debt” and “assets” for thin capitalisation purposes by treating fixed rate shares issued by a foreign company to New Zealand taxpayers as debt, excluding equity investments in CFCs from assets and aligning the definition of debt for the worldwide group with that for the New Zealand group;
- Abolishes the ability to claim conduit tax relief;
- Exempts most foreign dividends received by New Zealand companies from domestic tax, unless the dividends are received on fixed rate shares and for which the CFC has received a tax deduction in its home jurisdiction or the dividends are from portfolio foreign investment funds (FIFs) (i.e., interests under 10%) that are exempt from the FIF rules (e.g., interests in Australian listed companies); and
- Repeals the foreign dividend payment (FDP) and underlying foreign tax credit (UFTC) rules.

The government is also considering:

- Special rules to extend the active income exemption to non-portfolio FIFs; and
- A relief mechanism for non-resident withholding tax (NRWT) on dividends paid to non-resident shareholders if those dividends represent distributions of active offshore income.

A discussion document asking for input on extending the active income exemption to non-portfolio FIFs was released in March 2010.

**“Associated persons”**

The Act introduces significant changes to the definitions and conditions of associated persons in the Income Tax Act 2007, including:

- A standardised definition of associated person;
- Tests associating a trustee and a beneficiary, a trustee and a settlor, a settlor and a beneficiary, and the trustees of two trusts that have the same settlor;
New Zealand

- Tighter rules for aggregating the interests of associates;
- A tripartite test associating two persons if they are each associated with the same third person;
- Limiting the associated persons test for relatives to two degrees of relationship instead of four degrees; and
- A new definition of “settlor” that excludes a person who provides services to a trust for less than market value.

The new standardised definition is modified in some respects under the land sales context. The application of the tripartite test is limited in certain circumstances.

The new rules apply generally from the 2010/2011 income year. In the land context, the new rules apply to land acquired on or after 6 October 2009.

**Life insurance**

The Taxation Act introduces comprehensive changes to the taxation of life insurance businesses. Income from a life insurer’s business will be separated into shareholder income (income earned by the equity owners of the company) and policyholder income (income earned by policyholders from life insurance savings products).

Under the new rules, shareholder base income will be taxed at the corporate tax rate in a similar manner to other businesses. The current portfolio investment entity (PIE) rules will apply to policyholder income, allowing savers in life products to be taxed on their investment income at a maximum rate of 30%.

The new rules apply generally from 1 July 2010.

**Australia – New Zealand (NZ) double tax agreement (DTA)**

On 19 March 2010 a new DTA between Australia and New Zealand came into force.

The new DTA lowers withholding tax rates on dividends, interest and royalties.

The standard withholding tax rate on dividends stays at 15% in the new agreement but is reduced to 5% for an investing company that has at least 10% of the voting power or shareholding in the company paying the dividend. The rate reduces to 0% if the investing company holds 80% or more of the shares in the other company and meets other criteria.

The withholding tax rate on interest stays at 10% in the new agreement but is reduced to 0% if it is payable to eligible financial institutions (subject to the 2% approved issuer levy).

The withholding tax rate on royalties is reduced from 10% to 5%.

The DTA provides that pensions exempt in the person’s home country are exempt in the other country. Lump sum payments are to be taxed only in the country where the pension is sourced and not in the country in which the pensioner has retired.

For withholding taxes, the new DTA applies from 1 May 2010. For other taxes it applies in New Zealand to income years commencing on or after 1 April 2010.
New Zealand

**Singapore – NZ DTA**

The key changes to the DTA include amendments to the withholding tax rates on dividends, interest and royalties.

The standard withholding tax rate on dividends is 15% reduced to 5% for an investing company that has at least 10% of the voting power or shareholding in the company paying the dividend.

The withholding tax rate on interest is reduced from the current 15% to 10%.

The withholding tax rate on royalties is reduced from 10% to 5%.

Other changes include:

- Revising the treatment of interest paid between associated persons. The interest Article in the 1973 DTA does not limit the rate of tax applicable to interest paid to an associated person. The 15% rate is a minimum rate of tax, which means that the net income (after deducting expenses) must be included in the non-resident’s New Zealand tax return along with all other New Zealand sourced income. The new DTA removes the associated persons restriction. Consequently, all interest paid will benefit from the 10% rate;
- Amending the definition of a “permanent establishment” to include a building site, a construction, installation or assembly project if the project lasts more than 12 months, instead of six months as found under the current DTA; and
- Incorporating the new internationally agreed upon standard for the exchange of information between tax authorities.

The new DTA will come into force once both parties have given it legal effect, which in New Zealand's case will occur through an Order in Council.

In New Zealand, the DTA will apply for withholding taxes on interest, profits, or gains paid or credited on or after the first day of the second month following the date on which the DTA enters into force.

In respect of all other taxes the DTA will apply in New Zealand for any income year beginning on or after 1 April following the date the DTA enters into force.

**US – NZ DTA**
The US and New Zealand Governments have signed a protocol updating the double tax agreement between the two countries. The key changes include a reduction in withholding tax rates on dividends, interest and royalties.

The Protocol also makes changes to the Business Profits article and Limitation of Benefits article.

The changes will come into effect after the Protocol has been ratified in both countries and both governments have formally notified each other that their ratification procedures have been satisfied.
The withholding tax provisions will apply in both countries on the first day of the second month following the Protocol’s entry into force. In the US, other provisions will apply from the 1 January following the Protocol’s entry into force. In New Zealand the other provisions will apply from the 1 April following the Protocol’s entry into force.

**Changes to FITC regime**
The recently enacted Taxation (Consequential Rate Alignment and Remedial Matters) Act 2009 brings an end to the general availability of supplementary dividend tax credits.

The foreign investor tax credit (FITC) regime ensures that foreign investors are not taxed at more than the New Zealand corporate tax rate. Foreign investors are allowed a FITC equalling the non-resident withholding tax (NRWT) that they would have had to pay on their New Zealand-sourced investment income.

The new double tax agreements with US, Australia and Singapore all reduce the NRWT rate on dividends paid to corporate shareholders that hold voting power of 10% or more of a New Zealand company from 15% to 5% or 0%. Consequently, in some circumstances, there will no longer be a need for the FITC regime in its current form.

The changes are as follows:

- Only portfolio investors (i.e., those with less than 10% voting power) with NRWT rates of at least 15%, and supplementary dividend holding companies, will qualify for relief under the supplementary dividend rules;
- A zero rate of NRWT applies to dividends paid to non-portfolio shareholders (i.e., shareholders with more than 10% voting power) and to any other dividends subject to lower tax rates, to the extent they are fully imputed; and
- These changes will apply from 1 February 2010.

The supplementary dividend regime will cease to apply to holding companies from the 2013/14 income tax year.

The changes affect provisional tax calculations for taxpayers who take into account their anticipated FITC in calculating their provisional tax. Taxpayers should also consider the need to impute dividends where a tax treaty applies to reduce the NRWT rate.

**Stapled securities**
The Act introduces new rules so that certain stapled securities are treated as equity for tax purposes – meaning that no deductions are available for interest payments.

**Research and development (R&D) tax credits**
The Taxation (Urgent Measures and Annual Rates) Act 2008 repealed the R&D tax credit regime. However, businesses are still able to lodge R&D credit claims for the 2008/2009 income year.

New R&D funding measures were announced in the 2010 budget. Broadly, NZD 321 million of targeted funding has been allocated to research, science and technology activities over the next four years.
New Zealand

The most significant measure is NZD 189.5 million of funding for technology development grants. These grants will be available to medium to large research-intensive businesses that can show that their activities result in wider benefits for New Zealand. The government will contribute 20% of these businesses’ expected R&D expenditure for three years, up to a set maximum. The grants will not be administered through the tax system.

**KiwiSaver**
The Taxation (KiwiSaver) Act 2007 introduced compulsory employer contributions to KiwiSaver from 1 April 2008. Compulsory employer contributions are capped at 2% of an employee’s gross salary or wages from 1 April 2009. A tax credit for employers that reimburses them partially for their contributions to KiwiSaver (capped at NZD 20 per week per employee) was discontinued from 1 April 2009.

Employer contributions to KiwiSaver (or other qualifying registered superannuation schemes) are exempt from employer superannuation contribution tax (ESCT) capped at 2% of compulsory employer contribution from 1 April 2009 (previously 4%).

**Approved issuer levy and bonds**
Officials are seeking feedback on possible changes to the approved issuer levy (AIL) and NRWT rules.

An Officials’ Issues Paper examines whether AIL should apply at a zero rate, rather than the usual 2%, on interest paid to non-residents on corporate bonds that meet widely-held or stock exchange tests.

The Officials’ Issues Paper suggests that AIL could apply at a zero rate to interest paid on qualifying bonds. A “qualifying bond” would include a debt security that belonged to a group of identical debt securities that satisfied a widely held test or a stock exchange test. The proposed widely held test would require:

- The debt securities to be held by at least 100 unassociated investors; and
- No person (or group of associated persons) to hold more than 10% of the debt securities (disregarding an underwriter for the first year).

The issuer would be required to apply the test annually to ensure the thresholds are still satisfied. The proposed stock exchange test requires the debt securities to be listed on a recognised stock exchange.

A debt security would not be a qualifying bond if it:

- Is issued through a private placement that is limited to a select group of investors;
- Is not openly advertised to the target market during the book-build process; or
- Is an asset-backed security, i.e., a security where the interest payments are financed by cashflows from a pool of financial assets.

**GST: Accounting for land and other high-value assets**
The government has released a discussion document which proposes to introduce a domestic reverse charge (DRC) on business-to-business transactions for land, going concerns and high value transactions (NZD 50 million or more); and to change the rules on recovering GST (which will mainly affect taxpayers who cannot fully recover GST).
**Legal expenditure**
From the 2009/2010 income tax year onwards, taxpayers with business-related legal expenditures of NZD 10,000 or less are able to deduct the full amount of the expenditure in the year it is incurred, whether or not it is capital in nature.

**Profit distribution plans**
The government is considering legislation to ensure that bonus issuances of shares distributed under profit distribution plans (PDPs) are taxed in the same way as shares issued under other dividend reinvestment plans.

Under standard dividend reinvestment plans shareholders choose between receiving cash dividends or shares. Both are taxed as dividends and are subject to the imputation regime. Under a PDP a company declaring a dividend makes a bonus issuance of shares to all shareholders, which can be sold back to the company for cash. When the shareholder chooses to retain shares, the receipt of the shares may not be taxable as a dividend. For certain taxpayers, this could provide a tax advantage relative to the treatment of standard dividend reinvestment plans.

Until legislation is enacted, the taxation of dividend reinvestment plans will continue to be governed by the existing tax rules including the anti-avoidance rules.

**Relocation expenditure and overtime meal allowances**
The Act provides that most relocation costs and overtime meal allowances paid by employers to employees are exempt from income tax and fringe benefit tax. The changes apply retrospectively from 1 October 2001.

**Tax information exchange agreements (TIEAs)**
New Zealand has signed tax information exchange agreements with the Cook Islands, Dominica, Guernsey, Jersey, Isle of Man, Cayman Islands, British Virgin Islands, Gibraltar, Bahamas, St Vincent and the Grenadines and St Kitts and Nevis.

The new TIEAs come into force once the countries involved in each agreement have given legal effect to them.

**Taxes on corporate income**

**Income tax**
From the beginning of the 2008/2009 income year, resident and non-resident companies (including branches) are subject to income tax at a flat rate of 30% (previously 33%).

From the beginning of the 2011/2012 income year, the 30% rate is reduced to 28%.

There are not state and municipal income taxes.

**Corporate residence**
Residence is determined by place of incorporation, location of head office or centre of management, or by directors’ exercising control of the company in New Zealand.
New Zealand

Other taxes

**Accident compensation levy**
A statutory-based scheme of accident insurance is funded in part by premiums payable by employers and employees.

Premiums paid by employers (including the self-employed) fund insurance for work-related accidents. Employers are liable to pay a residual claims levy and an employer levy.

**Excise duty**
Excise duty is levied on petroleum products, tobacco and alcohol.

**Goods and services tax (GST)**
GST is a form of value-added tax. It applies to most supplies of goods and services. The rate applied to taxable supplies is currently 12.5% or 0%, with the 12.5% rate increasing to 15% from 1 October 2010. The 0% rate applies to a few supplies, including exports and financial services supplied to other registered businesses. There is also a “reverse charge” mechanism that requires the self-assessment of GST on the value of certain services imported by GST registered persons.

Refer to Significant developments – GST: Accounting for land and other high-value assets for changes proposed in a recent discussion document.

**Fringe benefit tax**
Employers are subject to a tax-deductible fringe benefit tax (FBT) on the value of non-cash fringe benefits provided to their employees. Employers can elect to pay FBT at flat rates (for the 2010/2011 income year, 55% on attributed benefits and 46% on pool benefits, i.e., those benefits which cannot be attributed to a particular employee) applied against the value of the benefit, or can attribute fringe benefits to individual employees and pay FBT based on each employee's marginal tax rate. Under the attribution option, the applicable FBT rate depends on the net remuneration (including fringe benefits) paid to the employee. The attribution calculation treats the fringe benefit as if it was paid in cash and calculates FBT as the notional increase in income that otherwise would have arisen.

From 1 April 2011, the 55% and 46% FBT rates are reduced to 49% and 43%, respectively.

The multi rates for the 2009/2010 income tax year are:

</table>

Fringe benefits include motor vehicles available for private use, loans at below prescribed interest rates, contributions to medical insurance schemes, and employer contributions to superannuation schemes.

In relation to motor vehicles, employers can value a vehicle on an annual basis either using 20% (previously 24%) of the cost price or market value (GST inclusive) of the vehicle (depending on whether the vehicle is owned or leased by the employer) or 36% of the vehicle’s tax written down value (GST inclusive). In each case, the FBT value must be reduced proportionately for whole days when the vehicle is not available for private use at any time.

FBT is also applicable to benefits received by an employee from a third party where there is an arrangement between the employer and the third party, and where the benefit would be subject to FBT if it had been provided directly by the employer.

**Employer superannuation contribution tax (ESCT)**

Employers’ contributions to an approved superannuation fund (excluding foreign schemes) are subject to ESCT, formerly known as “specified superannuation contribution withholding tax.” Employer contributions made to a KiwiSaver scheme or a superannuation scheme that has comparable lock-in requirements will be exempt from ESCT (up to the lesser of the employee’s contributions or 2% of the employee’s gross salary or wages)

**Fund withdrawal tax (FWT)**

The FWT provisions make the superannuation fund liable to income tax at a rate of 5% on amounts withdrawn from a superannuation fund prior to retirement, to the extent they include employer contributions since 1 April 2000 (and earnings thereon). FWT applies where the superannuation fund member’s income is above NZD 70,000.
New Zealand

**Branch income**

A New Zealand corporation is taxed on foreign branch income as earned. Double taxation with respect to all types of taxable income, including interest, rents and royalties, is avoided by foreign tax credits.

**Income determination**

**Inventory valuation**

Inventory must be valued by a cost-valuation method or, where market-selling value is lower than cost, may be valued at a market-selling value. If the inventory is shares, it must be valued at cost. Cost is determined under generally accepted accounting principles. Acceptable cost flow methods are first-in, first-out (FIFO) or weighted-average cost. Some valuation concessions are available to small taxpayers.

**Capital gains**

There is no capital gains tax. However, the income tax legislation specifically includes various forms of gain that would otherwise be considered a capital gain within the definition of “income.” Taxable income includes gains on the sale of real estate in certain circumstances and on personal property where the taxpayer acquired the property for resale or deals in such property or where a profit-making purpose or scheme can be deemed or imputed.

**Inter-company dividends**

Dividends derived from resident companies are exempt where there is 100% common ownership and the companies have the same balance date.

Previously, dividends paid by non-resident companies were exempt from income tax, but subject to a Foreign Dividend Payment (FDP) at the corporate tax rate.

However, new rules exempt most foreign dividends received by New Zealand companies from domestic tax and repeal the FDP and underlying foreign tax credit rules (refer to Significant developments – International tax rules).

The foreign investor tax credit (FITC) regime effectively eliminates NRWT on fully imputed dividends. The FITC regime provides that total New Zealand tax paid on a non-resident investor’s earnings through a New Zealand company can be limited to 30%. It does not operate by exemption from NRWT. Rather, where a dividend is imputed, the paying company qualifies for a reduction in its income tax if it pays a supplementary dividend. The amount of reduced company income tax is equal to the supplementary dividend. The combination of reduced income tax plus NRWT on both dividends can result in total New Zealand tax on the earnings of 30%. Deemed dividends may arise from transactions between related companies where the transactions are not at market value.

The Taxation (Consequential Rate Alignment and Remedial Matters) Act 2009 introduced significant changes to the FITC regime (refer to Significant developments – Changes to FITC regime).

**Foreign income**

A New Zealand corporation is taxed on foreign income as earned. Double taxation with respect to all types of taxable income, including interest, rents and royalties, is
avoided by foreign tax credits. Foreign dividends received are exempt from income tax but may be subject to the foreign dividend withholding payment. New rules exempt most foreign dividends received by New Zealand companies from domestic tax and repeal the foreign dividend payment and underlying foreign tax credit rules (refer to Significant developments – International tax rules).

**Controlled foreign companies (CFCs)**

Previously, New Zealand residents were taxed on deemed income derived from an interest in a non-resident company, foreign investment fund or foreign trust. New Zealand tax was imposed on residents with income interests of 10% or more in certain CFCs on the notional share of income attributable to their interest in the CFC. The regime applied to all types of income but did not apply to CFCs resident in “grey list” countries, except where the CFC derived exempt income from carrying on a business outside its country of residence. Grey list countries included Australia, Canada, Germany, Japan, Norway, Spain, the United Kingdom (UK) and the United States.

Previously no distinction was made between passive and active (business) income. However, there is now an exemption from New Zealand income tax for active income derived by New Zealand residents from interests in CFCs. Passive income (such as dividends, interest, royalties and rents) is taxed on an attribution basis. An “active business” test replaces the current grey list exemption (except in relation to Australia) (refer to Significant developments – International tax rules).

**Foreign investment funds (FIFs)**

The FIF regime, an extension of the CFC regime, subjects persons with interests in certain foreign entities (which are not CFCs) to New Zealand tax. This regime also applies in cases where the investor does not have a sufficient interest in a CFC.

Examples of investment vehicles that are commonly classified as FIFs include foreign companies (including unit trusts), foreign superannuation schemes and life insurance policies issued by foreign entities not subject to New Zealand tax.

Generally, however, a New Zealand resident does not have an interest in a FIF when:

- The foreign entity in which the interest is held is a company or unit trust resident in a “grey list” country – this exemption does not apply to portfolio FIF interests or interests in foreign superannuation schemes or life insurance policies;
- The total cost of FIF-type interests held by an individual does not exceed NZD 50,000;
- The interest is an “employment-related foreign superannuation scheme”;
- The interest is a “qualifying foreign private annuity”;
- A natural person acquired interests in foreign life insurance policies or foreign superannuation schemes before first becoming resident in New Zealand – these interests will be exempt from the FIF regime for the rest of the initial income year in which the individual first became resident and for the following three income years; and
- Certain other limited exceptions apply.

The exemption includes interests in foreign employment-related superannuation schemes, interests held by returning residents as well as new migrants arriving in New Zealand from 1 April 2006. A permanent exemption is provided for interests that a
New Zealand

person acquired before he/she became a New Zealand resident and interests acquired within the first five years of New Zealand residence.

New Zealand residents with an interest in a FIF are required to include in their New Zealand gross income, the amount of FIF income calculated using one of the following six methods:

- The fair dividend rate (FDR) method (available for portfolio interests only);
- The comparative value method;
- The cost method (for portfolio interests only);
- The deemed rate of return method;
- The branch equivalent method; or
- The accounting profits method.

The choice of method is restricted by the nature of the interest held and the availability of information.

Where an interest is exempt from the FIF rules (e.g., the interest is a certain pension or annuity provided by a foreign entity), distributions will be taxed on a receipts basis in accordance with normal principles.

Interests in FIFs must be disclosed by taxpayers in their annual tax returns. Failure to provide disclosure gives rise to potentially stringent penalties.

Offshore portfolio equity investments
The key features of the taxation of offshore portfolio equity investments are:

- The “grey list” does not apply to investments that fall within the new regime;
- Individual and family trust investors are taxable on the lower of the actual return (all gains and dividends) from their investments or 5% (the “fair dividend rate” or FDR) of the opening market value of the investments each year;
- Shares in certain Australian resident listed companies are excluded from the rules;
- Temporary exclusions apply to holdings in Guinness Peat Group (GPG) and the New Zealand Investment Trust;
- If an individual’s non-excluded investments have an aggregate cost of NZD 50,000 or less, the entire portfolio is excluded from the new rules and is taxed in accordance with ordinary principles; and
- Distributions from all investments excluded from the new rules (either permanently or temporarily) are taxed on a receipts basis in accordance with ordinary principles.

These rules impact investors with a shareholding or interest of less than 10% in a foreign company, unit trust, certain foreign superannuation schemes or any life insurance policies.

Portfolio investment entities (PIEs)
A collective investment vehicle (e.g., a managed fund) that meets the eligibility requirements and elects to become a PIE is taxed on its investment income at the marginal tax rates of its investors – currently capped at 30% (and reduced to 28% from the 2011/2012 income year). The rules align the tax treatment of investments made through PIEs with the tax treatment of direct investments made by individuals. PIEs
are not taxable on the capital gains and losses they make on New Zealand shares and certain Australian shares.

**Conduit tax relief**
Previously, the conduit tax relief (CTR) regime provided relief for non-resident investors who invested in non-New Zealand companies through a New Zealand subsidiary (the “conduit” company). The regime was complex but effectively deferred New Zealand tax on the non-resident shareholder's share of the New Zealand company's conduit income that was not distributed by the New Zealand company. NRWT was imposed on dividend income distributed by the New Zealand company to the non-resident shareholder. However, new rules enacted recently abolish the conduit tax relief regime *(refer to Significant developments – International tax rules)*.

**Stock dividends**
Bonuses issues can be taxable or non-taxable. With a taxable bonus issue, the amount capitalised becomes available for tax-free distribution upon a subsequent share cancellation. With a non-taxable bonus issue, the amount capitalised is not available for tax-free distribution upon a subsequent share cancellation.

**Other significant items**
Financial instruments/Income or expenditure (including foreign exchange gains and losses) from financial arrangements must be recognised on an accrual basis (generally, yield to maturity or other commercially acceptable method). These rules do not apply to the income or expenditure of a non-resident if the financial arrangement does not relate to a business carried out in New Zealand *(see also Deductions – Financial arrangements, and Other issues – International Financial Reporting Standards)*.

The government is considering legislation to ensure that bonus issues of shares distributed under profit distribution plans (PDPs) are taxed in the same way as shares issued under other dividend reinvestment plans *(see also Significant developments – Profit Distribution Plan)*.

**Deductions**

**Depreciation and depletion**
For tax purposes, depreciation of property can be computed under the diminishing value (DV) method, the straight-line (SL) method or a pooling method. The rates of depreciation depend on the following factors:

1. Type of asset; and
2. Whether the asset is acquired new or second-hand (i.e., used).

Taxpayers must use the economic depreciation rates prescribed by the Inland Revenue Department (IRD), together with a 20% uplift in the case of new assets (other than buildings and imported motor vehicles) purchased on or before 20 May 2010 (the 20% uplift has been removed for assets purchased after this date). Fixed-life intangible property (including the right to use land and resource consents) is depreciable on a straight-line basis over its legal life. Any depreciation recovered on the sale of an asset (up to its original cost) is taxable in the year of sale.

The double-declining-balance (accelerated) method applies to most plant and equipment. Under the double-declining-balance method, equipment with an estimated
New Zealand

useful life of 10 years results in DV depreciation deductions of 20% per annum (i.e., double the straight-line rate of 10% over the equipment’s 10-year life). Buildings, certain motor vehicles, high-residual-value property, fixed-life intangible property and property acquired prior to the introduction of the new rules cannot be depreciated under the double-declining-balance method.

The depreciation rate for buildings with an estimated useful life of 50 years or more (regardless of when they were purchased) is reduced to 0% from the 2011/2012 income year pursuant to the Taxation (Budget Measures) Act 2010.

**Entertainment expenditure**
Entertainment expenditures are generally only 50% deductible; however, entertainment expenditures incurred overseas are 100% deductible.

**Legal expenditure**
Legal expenditure is deductible if the expenditure is:

- Incurred in deriving assessable or excluded income; or
- Incurred in the course of carrying on a business for the purpose of deriving assessable or excluded income.

However, the expenditure is not deductible if it is of a capital, private or domestic nature.

The Taxation (Business Tax Measures) Act 2009 provides that from the 2009/2010 income tax years, taxpayers with business-related legal expenditure of NZD 10,000 or less will be able to deduct the full amount of the expenditure in the year it is incurred, whether or not it is capital in nature.

**Interest**
Generally, interest incurred by most companies is deductible, subject to thin capitalisation rules.

New rules have extended the thin capitalisation rules to New Zealand companies that are controlled by New Zealand residents and have interests in CFCs (refer to Significant developments – International tax rules).

**Net operating losses**
Losses may be carried forward indefinitely for offset against future profits, subject to the company maintaining 49% continuity of ownership. Carryback of losses is not permitted. A legislative amendment in 2002 ensures that losses of a subsidiary are preserved on a spinout (i.e., when shares in the subsidiary are transferred to shareholders of its parent company).

**Payments to foreign affiliates**
A New Zealand corporation can claim a deduction for royalties, management service fees and interest charges paid to non-resident associates, provided the charges satisfy the arm’s-length principle which forms the basis of New Zealand’s transfer pricing regime.
Research and development (R&D)
R&D costs, which are expensed under New Zealand’s Financial Reporting Standard (FRS)–13: Accounting for research and development activities, are tax-deductible. Expenses written off as immaterial and not tested against the asset-recognition criteria in FRS–13 are not automatically deductible for tax purposes.

From the 2008/09 income year businesses that met certain criteria were eligible for a 15% tax credit for qualifying research and development expenditure. The Taxation (Urgent Measures and Annual Rates) Act 2008 repealed the R&D tax credit regime. Businesses are able to lodge R&D tax credit claims for the 2008/09 income year.

New funding for R&D was announced in the 2010 budget. The most significant measure is NZD 189.5 million of funding for technology development grants over the next four years. These grants will be available to medium to large research-intensive businesses that can show that their activities result in wider benefits for New Zealand. The government will contribute 20% of these businesses’ expected R&D expenditure for three years, up to a set maximum. The grants will not be administered through the tax system.

Taxes
Fringe benefit tax is deductible, as is GST payable on the value of fringe benefits.

Financial arrangements
For income tax purposes specific timing rules apply to the recognition of income and expenditure in relation to financial arrangements, applicable to New Zealand residents or entities carrying on business in New Zealand.

A number of changes to the financial arrangements rules have been enacted to ensure that taxpayers who adopt International Financial Reporting Standards (IFRS) can continue to use tax rules that rely on the financial arrangement rules. For other taxpayers, the existing tax spreading methodologies continue to apply but without the option of using the financial reporting method.

The new rules include a combination of compulsory methods and elective methods that are available subject to the taxpayer meeting certain qualification criteria. Two new methods (the expected value method and the equity-free fair value method) have been introduced to assist in reducing exposure to volatility that might otherwise arise under IFRS fair value accounting.

Group taxation
Companies that are 66% or more commonly owned constitute a “group.” Group companies are able to offset losses by election as well as by subvention payment. A subvention payment is a payment made by the profit company to the loss company and is equal to the amount of loss to be offset. The payment is deductible to the profit company and assessable to the loss company. Certain companies subject to special bases of assessment (e.g., mining companies other than petroleum extraction companies) are excluded from the grouping provisions. Branches of non-resident companies may be included, provided they continue to carry on business in New Zealand through a fixed establishment.
New Zealand

Groups of resident companies that have 100% common ownership may elect to be subject to the consolidated group regime. The group is effectively treated as a single company and transfers of assets, dividends, interest, and management fees among members of the group are generally disregarded for tax purposes. The group files a single return and is issued a single assessment. Group members are jointly and severally liable for tax purposes.

Losses incurred by a dual-resident company are not available for offset by election or subvention payment.

Tax incentives

Inward investment
There are limited specific tax incentives designed to encourage the flow of investment funds into New Zealand.

Legislation enacted in 2004 encourages foreign venture capital investment into unlisted New Zealand companies. Gains derived by certain non-residents from the sale of shares (held on revenue account and owned for at least 12 months) in New Zealand unlisted companies that do not have certain prohibited activities as their main activity, are exempt from income tax. The rules apply to foreign investors who are resident in all of the countries with which New Zealand has a DTA (except Switzerland) and who invest into New Zealand venture capital opportunities.

Capital investment
Investment allowances on fixed assets are not available.

Trans-Tasman imputation
Elective rules allow trans-Tasman groups of companies to attach both imputation credits (representing New Zealand tax paid) and franking credits (representing Australian tax paid) to dividends paid to shareholders.

Withholding taxes (WHT)

Resident corporations paying certain types of income are required to withhold tax on gross income, as shown in the table below.

### Notes

Numbers in parentheses refer to the notes below:

1. Resident withholding taxes apply to both interest and dividends. Unless the recipient corporation holds an exemption certificate, and if the recipient provides a tax file number, the default rate of the interest withholding tax is 33% (reducing to 28% from 1 April 2011). Recipients can elect for the rate of interest withholding to be 38%. The rate of interest withholding tax is 38% where the recipient does not provide a tax file number. To align the RWT rate on interest paid to companies with the new 30% company tax rate, an optional RWT rate of 30% is available to payers of interest for the 2010/2011 income year. This rate is reduced to 28% to align with the company tax rate from 2011/2012. The rate of withholding tax on dividends paid is 33%, but the tax is reduced by the aggregate imputation and withholding payment credits attached to the dividend or taxable bonus share. Interest and dividends paid between group companies and in certain other limited circumstances are exempt from the withholding tax.
2. Non-resident investors – the foreign investor tax credit and conduit tax relief regimes provide relief to companies paying dividends to non-resident investors. However, the Taxation (International Taxation, Life Insurance, and Remedial Matters) Act 2009 introduces new rules which abolish the conduit tax relief regime (refer to Significant developments – International tax rules).

The Taxation (Consequential Rate Alignment and Remedial Matters) Act 2009 amended the FITC regime (refer to Significant developments – Changes to FITC regime).

3. Resident corporations paying interest to non-associated non-resident corporations and individuals need not withhold tax if they have approved-issuer status and the security under which interest is payable is registered with the IRD. In this case, the resident corporation pays a 2% levy (tax-deductible) on the interest payments instead of the withholding tax otherwise applicable.

4. NRWT is imposed on dividends at the following rates regardless of the jurisdiction to which the dividends are paid:
   - 0% – Fully imputed dividends paid to a shareholder holding 10% or more of the direct voting interests in the company and fully imputed non-cash dividends;
   - 15% – Fully imputed cash dividends paid to a shareholder holding less than 10%; or
   - 30% – In most other cases, subject to any relief available under a DTA.

5. Net interest income is subject to reassessment at the company tax rate where the payer and the recipient are “associated persons,” but withholding tax is the minimum liability. Non-resident withholding tax is not imposed where the recipient of the interest has a fixed establishment in New Zealand.

6. 10% if the interest received is derived from loans granted by banks or insurance companies. In all other cases, 15%.

7. Net income from industrial royalties is subject to reassessment at the company tax rate, but withholding tax is the minimum liability.

8. 10% if the interest is received by a financial institution or relates to indebtedness arising from a credit sale between non-associated persons. In all other cases, 15%.

9. 10% or 15%, depending on the type of royalty.

10. The government has announced that it is re-negotiating New Zealand’s DTA with the UK.

11. A Protocol to update the DTA between the United States and New Zealand was signed on 1 December 2008. The key changes include amendments to the withholding tax rates on dividends, interest and royalties:
   - The withholding rate on dividends is reduced from 15% to a maximum of 5% for an investor who holds at least 10% of the shares in the company that pays the dividend, and to 0% if the investor holds 80% or more of the shares in the company and meets other criteria;
   - The withholding tax on royalties is reduced from 10% to 5% and the definition of “royalties” will be revised to exclude payments for leased equipment; and
   - The rate on interest will generally remain at 10%, although it will drop to 0% for interest paid to lending or finance businesses, provided that the 2% approved issuer levy is paid on New Zealand-sourced interest (refer to Significant developments – US – NZ DTA).

12. The new DTA that applies to withholding tax from 1 May 2010 lowers withholding tax rates on dividends, interest and royalties (refer to Significant developments – Australia – NZ DTA).

13. On 21 August 2009, New Zealand and Singapore signed a new double tax agreement (DTA) replacing the current DTA dating from 1973. The key changes to the DTA include amendments to the withholding tax rates on dividends, interest and royalties (refer to Significant developments – Singapore – NZ DTA).

14. The government has announced that the DTA with Canada will be re-negotiated.

15. The government has signed an amending Protocol which updates the 1981 double tax agreement between New Zealand and Belgium.
**Tax administration**

**Returns**
Tax returns are based on the fiscal year ending 31 March, although other fiscal year-ends are possible if permission is obtained. The system is one of self-assessment, under which the corporation files an income tax return each year. For those not linked to a tax agent, returns must be filed by 7 July for March balance dates, or by the seventh day of the fourth month following a substituted balance date. Those linked to a tax agent with a substituted balance date have extensions of time for filing their tax returns.

**Payment of tax**
The terminal tax due date is extended by two months for taxpayers linked to a tax agent.

Where provisional tax paid is less than the amount of income tax deemed due on that instalment date, interest is imposed. If provisional tax is overpaid, interest is payable to the taxpayer. Interest is deductible for tax purposes by business taxpayers, and interest earned on overpaid provisional tax is gross income for tax purposes. From 29 June 2009, the interest rate for unpaid tax is 8.91%, while the rate for overpaid tax is 1.82%.

**Calculating provisional tax**
Provisional taxpayers have four options available for calculating their provisional tax for the 2009/2010 income year (i.e., year ending 31 March 2010).

These options are:

- Where the 2008/2009 return of income has been filed, 2009/2010 provisional tax can be based on 100% of the 2008/2009 residual income tax;
- Where the 2008/2009 return of income has not been filed, due to an extension of time for filing, 2009/2010 provisional tax can be based on 105% (previously 110%) of the 2007/2008 residual income tax, but only for the first two instalments or for companies and other 30% rate taxpayers, 95% of the 2007/2008 residual income tax. The final instalment must be calculated based on the first option above; or
- Provisional tax can be based on a fair and reasonable estimate of 2009/2010 residual income tax or the GST ratio option.

For the 2010/2011 income year (i.e., year ending 31 March 2011), provisional taxpayers have the following options:

- Where the 2009/2010 return of income has been filed, 2010/2011 provisional tax can be based on 105% of the 2009/2010 residual income tax;
- Where the 2009/2010 return of income has not been filed, due to an extension of time for filing, 2010/2011 provisional tax can be based on 110% of the 2008/2009 residual income tax, but only for the first two instalments. The final instalment must be calculated based on the first option above; or
- Provisional tax can be based on a fair and reasonable estimate of 2010/2011 residual income tax or the GST ratio option.

For the 2011/2012 income year (i.e., year ending 31 March 2012), provisional taxpayers have the following options:
New Zealand

- Where the 2010/2011 return of income has been filed, 2011/2012 provisional tax can be based on 100% of the 2010/2011 residual income tax;
- Where the 2010/2011 return of income has not been filed, due to an extension of time for filing, 2011/2012 provisional tax can be based on 105% (previously 110%) of the 2009/2010 residual income tax, but only for the first two instalments. The final instalment must be calculated based on the first option above; or
- Provisional tax can be based on a fair and reasonable estimate of 2011/2012 residual income tax or the GST ratio option.

The GST ratio method has been introduced to enable smaller taxpayers to align their provisional tax payments with their cash flow and reduce their exposure to use of money interest. The option is intended to benefit those taxpayers with declining, seasonal or fluctuating income. This option calculates provisional tax by reference to the taxpayer’s GST taxable supplies in the relevant provisional tax instalment period.

Taxpayers can also make voluntary payments. Such payments can be made to minimise exposures to assessed interest. A taxpayer choosing to estimate residual income tax is required to take reasonable care when estimating.

When the taxpayer’s return of income for the year is furnished, the provisional tax paid for that year is credited against the tax assessed. This results in either a refund or further tax to pay by way of terminal tax.

**Tax pooling**

Taxpayers are able to pool their provisional tax payments with those of other taxpayers through an arrangement with a commercial intermediary. Tax pooling allows underpayments to be offset by overpayments within the same pool and vice versa.

**Tax penalties**

An initial late payment penalty of 1% applies if a tax payment is not made on the due date. A further 4% late payment penalty applies if the payment is not made within seven days of the due date. An incremental late payment penalty of 1% is then imposed monthly until payment is made.

Inland Revenue (IR) is required to notify a taxpayer the first time their payment is late rather than imposing an immediate late payment penalty. If payment is not made by a certain date, a late payment penalty will be imposed. Taxpayers will be entitled to one notification every two years. After receiving a first warning, the IR will not send further notifications for two years and an initial late payment penalty will be imposed in the normal manner.

**Shortfall penalties**

Shortfall penalties, calculated as a percentage of the tax shortfall resulting from the action or position taken by the taxpayer in a tax return, may also apply.

There is a 50% discount on certain penalties where the taxpayer has a past record of “good behaviour” and, in certain circumstances, a cap of NZD 50,000 on shortfall penalties for not taking reasonable care or for taking an unacceptable tax position.
Other issues

International Financial Reporting Standards (IFRS)
The relationship between statutory accounting and taxable income is quasi-dependent.

The year of final adoption was 2007.

The impact of IFRS adoption on significant areas of tax law is as follows.

Comments on tax regime
New Zealand’s determination of taxable income starts with the statutory accounts’ accounting profit and then specific tax adjustments are made based on rules for revenue recognition and deductible expenditure in the tax legislation. Changes have been made to the tax treatment of ‘financial arrangements’ (a defined tax legislative term) to allow for the alignment to the accounting recognition of fair values on such arrangements in specific cases.

Year of adoption cash impact
Mandatory adoption of NZ IFRS accounting standards for most entities (except for small & medium enterprises) applied for balance dates beginning 1 January 2007. Depending on the specific IFRS adoption adjustment, the resulting income or expenditure is taken into taxable income based on the ordinary statutory tax provisions. The key areas which were changed for tax under IFRS adoption are the trading stock provisions (which align tax with accounting standards subject to some provisions) and the financial arrangement rules. These rules are very broad and deal with the tax treatment of accrual income or expenditure on debt instruments, debt type instruments, derivatives, etc.

Thin capitalisation
The thin capitalisation rules work on a debt over assets percentage. It relies mostly on the tax legislative definition for debt and the amount disclosed in the financial statements under generally accepted accounting practice as assets (although there are some other measurement alternatives).

Debt versus equity classifications
The classification of debt and equity instruments for tax is dependent on the tax legislative definitions for specific purposes (such as the spreading of any deductions or income where the financial arrangement rules apply, thin capitalization, etc). Tax applies legal form and does not strictly rely upon the classification applied under IFRS.

Lease versus sale determinations
There are specific tax provisions dealing with finance leases.

Distributable reserves
The level of distributable reserves is based on the company law requirements of solvency and not specifically on the amounts shown as reserves in the financial statements.

Transfer pricing determination
There have been no specific comments released yet by the New Zealand Revenue Authority on the adoption of IFRS impact for transfer pricing.

Significant developments

Equity Tax Law Reform No. 712 and Decree No. 93-2009 on Regulation of Equity Tax Law Reform were recently made effective.

Significant modifications include:

- Dividends and profits remitted abroad are subject to a definitive 10% withholding tax. Interests obtained by a loan that are provided by non-resident financial institutions are subject to a 10% definitive withholding tax.
- Interest earned on government bonds and the equivalent is considered taxable income subject to a 10% definitive withholding tax.
- 1% definitive minimum tax is applied to gross taxable income.
- Excise tax on tobacco cigarettes will apply on imports. It will not be a creditable tax.

Taxes on corporate income

Income taxes are levied only on domestic-sourced income at a flat rate of the higher percentage of:

- 30%, applied to net taxable income (gross taxable income less allowed deductions by law); or
- 1% definitive minimum tax on gross income obtained during the fiscal year.

The law establishes exceptions to the 1% definitive minimum tax, as follows:

- First three fiscal periods of recently incorporated entities;
- Taxpayers whose sales are controlled by government; and
- Taxpayers that ceased operations on account of force majeure.

Corporate residence

Corporate residence is determined by the place of incorporation.

Other taxes

Real estate municipal tax

This annual tax is levied at a rate of 1% on 80% of cadastral/surveyed value, as recorded by the government. If the cadastral/surveyed value is not available, the cost or fiscal appraisal value could be used.
**Value-added tax (VAT)**

VAT is imposed at 15% rate on the:

- Sale of goods;
- Rendering of services;
- Grant of use of assets; and
- Import of goods.

VAT liquidation is determined by subtracting VAT debts (sale of goods or rendering services), from VAT credits paid on transactions needed to generate taxable income for VAT purposes. VAT credits are applicable or allowed when related to goods/services subject to VAT. VAT paid on transactions to generate non-taxable income for VAT purposes are not allowed as VAT credits but may be proportionally applied.

VAT exemptions include:

- Medicine;
- Real estate transfer;
- Sale of used goods;
- Basic food products;
- Credit instruments;
- Tuition; and
- Textbooks and educational supplies.

**Selective consumption tax**

It is applied to goods that are considered to be nonessential. The tax base is the CIF price for imported items, and the tax is levied and paid only at that stage.

**Municipal sales and services tax**

A monthly 1% tax is levied on all sales of goods and rendering of services in each of the municipalities of the country.

**Municipal registration tax**

An annual 2% tax is levied on the average gross income received during the last trimester. In the case of the incorporation of new establishment or enterprise, municipal registration tax is 1% of the capital invested.

**Branch income**

Income received is subject to corporate income tax.

**Income determination**

**Inventory valuation**

LIFO (last-in, first-out) and FIFO (first-in, first-out) as well as average methods are accepted. Tax Authorities shall authorise the change of a valuation method.
**Capital gains and losses**
Capital gains and losses are treated as ordinary taxable corporate income. Capital gain transactions that require any annotation in public registry (real state, vehicles, other) will be subject to withholding tax depending on the amount of transaction, as follows:

<table>
<thead>
<tr>
<th>Good Value (USD)</th>
<th>Percentage applicable</th>
</tr>
</thead>
<tbody>
<tr>
<td>From 0.01</td>
<td>Through 50,000.00</td>
</tr>
<tr>
<td>50,000.01</td>
<td>100,000.00</td>
</tr>
<tr>
<td>100,000.01</td>
<td>A más</td>
</tr>
</tbody>
</table>

**Foreign income**
Business enterprises are subject to income tax only on Nicaraguan source income.

**Stock dividends**
Stock dividends paid by Nicaraguan entities to resident or non-resident shareholders are subject to 10% definitive withholding tax.

The Equity Tax Law Reform regulations define “stock dividends” as stock dividends paid as well as remittance of net income after income tax made by branches to headquarters and any payments considered as advance net income remittance abroad or locally.

**Other significant items**
Interest earned on government bonds and equivalent certificates are taxable subject to a 10% definitive withholding tax.

**Deductions**

**Depreciation**
Depreciation must be computed by the straight-line method. Depending on the type of construction and the estimated life of fixed assets, annual rates for depreciation are as follows:

<table>
<thead>
<tr>
<th></th>
<th>%</th>
</tr>
</thead>
<tbody>
<tr>
<td>Buildings</td>
<td>3, 5, 10</td>
</tr>
<tr>
<td>Vehicles</td>
<td>12.5, 20</td>
</tr>
<tr>
<td>Plant and equipment</td>
<td>10, 15, 20</td>
</tr>
<tr>
<td>Other assets</td>
<td>10, 20</td>
</tr>
</tbody>
</table>

**Alternative method of depreciation**
Taxpayers under the Temporary Admission for Active Processing (TAP) regimen could, at their convenience, request a different depreciation rate (accelerate depreciation) from tax authorities. Used fixed assets acquired abroad could also be subject to a different depreciation rate.

**Net operating losses**
Carryforward losses are deductible in the following three fiscal periods in which they were incurred.
Payments to foreign affiliates
Payments made from affiliates to foreign related parties are deductible for income tax purposes provided the requirements below are met:

- The expense (royalties, interest, and services) is needed to generate taxable income.
- This expense is duly supported (agreement, invoices, payment receipts).
- The expenses are incurred within the fiscal period.
- The withholding tax is applied and paid to Tax Authorities.

Taxes
In principle, income tax expense is not deductible for income tax purposes. Municipal or local taxes (real estate tax, monthly income tax, annual registration tax) are deductible for income tax. Many types of penalties or charges made by tax, customs, Social Security or municipal authorities are not deductible for income tax purposes.

Group taxation
Section 3 of Equity Tax Law recognises “Unite Economy” as a taxpayer formed by many entities of one Group.

Tax incentives
Inward investment
Under present law and on a case-by-case basis, new companies with tourist activities may request and the government may grant, during the facilities’ construction phase, total exemption of customs duties and, for income tax law, partial or total exemption for a maximum period of 10 years.

The renewable energy sector is covered by a special law with tax benefits or exemptions in corporate income tax, VAT, customs duties and municipal tax.

Free Trade Zone industries have a special law with tax benefits or exemption in tax and duties customs in imports and corporate income tax, VAT and municipal taxes.

Withholding taxes (WHT)
Payments to residents
Dividend payments to residents or non-resident shareholder (corporations or individuals) are subject to 10% income tax withholding.

Payments of royalties to resident individuals or corporations are subject to 2% withholding income tax.

Interest paid to a resident or non-resident individual or legal entity is subject to 10% definitive withholding tax.

Payments on the local acquisition of goods and services are subject to 1% withholding tax.
Nicaragua

**Payments to non-residents**
Payments of royalties, interest, dividends and technical service fees to non-resident individuals and corporations are subject to withholding tax, as follows:

<table>
<thead>
<tr>
<th>Taxable income</th>
<th>Tax rate</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>%</td>
</tr>
<tr>
<td>Royalties</td>
<td>70</td>
</tr>
<tr>
<td>Dividends</td>
<td>–</td>
</tr>
<tr>
<td>Technical assistance, generally</td>
<td>35</td>
</tr>
<tr>
<td>Interest:</td>
<td></td>
</tr>
<tr>
<td>Non-financial companies</td>
<td>–</td>
</tr>
<tr>
<td>Financial companies</td>
<td>0</td>
</tr>
</tbody>
</table>

Present administrative taxing procedure requires that taxable income for technical assistance be determined on a case-by-case basis by the Tax Authorities.

**Tax administration**

**Returns**
Without exception, all corporations and individuals are required to file tax returns for a fiscal year within the following three months after the fiscal year end, which commonly ends on 30 June; however, companies can obtain authorisation from tax authorities in order to change or have a different year-end: March, September or December.

**Payment of tax**
Corporations shall pay fiscal-year income tax in monthly advanced payments. The monthly payable amount is calculated as 1% of gross income.

Significant developments

There are a number of ongoing reforms in the Nigerian tax environment including administrative and legislative changes. One of the key reforms is the recently approved national tax policy, which seeks to establish a set of principles, rules, regulations and guidelines necessary to create a modern tax system in Nigeria. The necessary legislative processes are now being initiated to give effect to the provisions of the policy.

Other key changes include the ongoing legislative process to combine 16 different national petroleum laws into a single document called the Petroleum Industry Bill. The bill aims to ensure transparency, make industry participation more equitable and maximise government revenue through increased royalty rates and rationalisation of tax incentives.

Taxes on corporate income

Income tax
The corporate income tax rate is 30% assessed on a preceding year basis, i.e., tax is charged on profits for the accounting year ending in the preceding year of assessment.

For small companies in the manufacturing industry and wholly export-oriented companies with turnover not exceeding NGN 1 million, the corporate tax rate is 20% in the first five calendar years of operation.

Minimum tax was introduced effective 1 January 1990. The tax is payable by companies having no taxable profits for the year or where the tax on profits is below the minimum tax. However, companies in the first four calendar years of business, companies engaged in the agriculture business or companies that have foreign equity capital of at least 25%, are exempt from minimum tax.

Minimum tax payable is calculated as follows:

1. Where the turnover of the company is NGN 500,000 or below, minimum tax is the highest of:
   a. 0.5% of gross profits;
   b. 0.5% of net assets;
   c. 0.25% of paid up capital; or
   d. 0.25% of turnover of the company for the year.
Nigeria

2. Where the turnover is higher than NGN 500,000, minimum tax is the highest of the calculations noted in (1), plus 0.125% of turnover in excess of NGN 500,000.

There is a tax on distributions where a company pays a dividend in excess of its taxable profit. Such a company will be charged tax on the dividend paid as if the dividend is the taxable profit of the company for that year of assessment.

Non-resident companies are subject to tax on the income or profit derived from Nigeria. The revenue authorities often assess non-resident companies on a deemed income basis. This is done by applying 20% of turnover as deemed profit and charging 30% corporate tax, resulting in an effective tax rate of 6% on turnover.

**Corporate residence**

A company is considered resident in Nigeria if such a company is registered or incorporated under the Companies and Allied Matters Act. This means that a company formed outside Nigeria under the laws in force in the foreign territory will be considered a non-resident company for tax purposes.

**Other taxes**

**Education tax**
The tax is levied on every Nigerian company at the rate of 2% of the assessable profit for each year of assessment. The tax is payable within two months of an assessment notice from the revenue authority. In practice, many companies pay the tax on a self-assessment basis along with their corporate income tax.

For companies subject to the petroleum profit tax, the education tax is to be treated as an allowable deduction. For other companies, income/profit taxes are not deductible in arriving at taxable income. Non-resident companies and unincorporated entities are exempt from the education tax.

**Capital gains**
Gains accruing to a chargeable person (individual or company) on the disposal of chargeable assets shall be subject to tax under the capital gains tax (CGT) Act at the rate of 10%. There is no distinction between long-term and short-term gains and no inflation adjustment to cost for CGT purposes. All forms of assets including options, debts and foreign currency, other than those specifically exempt, are liable for capital gains tax.

The gains on the disposal of shares are exempt from capital gains tax.

CGT is applicable on the chargeable gains received or brought into Nigeria in respect of assets situated outside Nigeria.

Capital losses are not allowed as an offset against chargeable gains accruing to a person from the disposal of any assets.

**Information technology levy**
The National Information Technology Development Agency (NITDA) Act No. 27 was introduced in 2007 and took effect beginning from the 2008 year of assessment. The act stipulates that a company with an annual turnover of NGN 100 million or more is
required to pay 1% of its profit before tax as information technology tax. This levy is tax-deductible when paid (typically in the year of assessment following that in which the payment was made).

This tax is applicable to companies in:

- Banking and other financial activities including capital and money market operators, mortgage institutions and micro-finance banks;
- Insurance activities including brokerage;
- Pension fund administration, pension management and related services;
- Global system for mobile communications (GSM) services providers and telecommunication companies; and
- Cyber and internet services providers.

**Value-added tax (VAT)**

VAT has been in effect since 1994. The standard rate is 5% but there is a proposal to increase the rate to 10%. Some of the latest amendments include the re-introduction of zero-rated products covering non-oil exports, goods and services purchased by diplomats, and goods and services purchased for use in humanitarian donor-funded projects. Exempt items include plants and machinery for use in export processing zones or free trade zones, basic food items, medical and pharmaceutical products.

Effective since 1 September 2007, oil and gas companies are required to deduct VAT at the source and remit it to the tax authority.

VAT is payable in the currency of the transactions.

**Petroleum profit tax (PPT)**

The petroleum profit tax as amended is a tax on the income of companies engaged in upstream petroleum operations.

The PPT rates vary as follows:

1. 50% for petroleum operations under Production sharing contracts (PSC) with the Nigerian National Petroleum Corporation (NNPC).
2. 66.75% for non-PSC operations in its first five years during which the company has not fully amortised all pre-production capitalised expenditure.
3. 85% for petroleum operations carried out under a joint venture (JV) arrangement with the NNPC after the first five years.

Tax is payable on the actual year basis.

The estimated tax returns must be filed within two months of the fiscal year (which runs from 1 January to 31 December). Actual tax returns should be filed within five months after the end of the accounting period, that is, not later than 31 May.

Payments in any accounting period of 12 months are made in 12 instalments, with a final thirteenth instalment (if there is an underpayment). The first instalment for the year is due by the end of March.
Nigeria

Late submission of returns attracts an initial penalty of NGN 10,000 and NGN 2,000 for each day such failure continues while late payment of tax attracts a penalty of 5% of the tax not paid.

Branch income

Except in rare circumstances, it is illegal for a foreign company to operate through a branch in Nigeria. The income of a foreign corporation derived from Nigeria, where applicable, is taxable at the corporate tax rate of 30%.

Income determination

Inventory valuation
The first-in, first-out (FIFO) valuation method is commonly used. Average and standard cost methods are also allowed but last-in, first-out (LIFO) is not permitted. Other than the accounting requirement in the local generally accepted accounting principles (GAAP), there are no special statutory provisions for inventory valuation.

Inter-company dividend
Other than withholding tax (WHT), a dividend received from a Nigerian company by a foreign investor is exempt from further tax in the hands of the recipient company.

The rate of WHT on a dividend is 10%. This tax is also the final tax for resident investors.

Dividends received by a Nigerian company from another Nigerian company are not subject to further tax. Also, dividends distributed by unit trusts are tax-exempt and are not subject to further WHT.

Foreign income
A Nigerian company is taxable on its worldwide income. On the other hand, a foreign company is subject to tax only on income derived from Nigeria.

Dividends, interest, rents and royalties earned abroad and brought into Nigeria through Government approved channels are exempt from Nigerian tax. Government approved channels means the Central Bank of Nigeria and any bank or financial institution authorised to carry out foreign exchange transactions.

The WHT rate on dividends, interest and royalties payable to beneficiaries under the double taxation treaty (DDT) agreements with Nigeria is 7.5%.

Stock dividend
Stock dividends (bonus shares) are not taxable at source or included in the taxable income of the recipient company.

Taxable income
The following income is taxable in Nigeria under corporate tax:

1. Profits accruing in, derived from, brought into, or received in Nigeria in respect of any trade or business;
2. Dividends, interest, royalties, discounts, charges or annuities;
3. Rent or any premium arising from the right granted to any person for the use or occupation of any property, where applicable;
4. Any source of annual profits or gain not falling within the preceding categories;
5. Any amount deemed to be income with respect to any benefit arising from a pension or provident fund, of the Personal Income Tax Act;
6. Fees, dues and allowances (wherever paid) for services rendered; and
7. Any amount of profits or gains arising from the acquisition or disposal of short-term money instruments like federal government securities, treasury bills, treasury or savings certificates, debenture certificates and treasury bonds.

**Deductions**

**Depreciation and depletion**
Capital allowances are calculated on a straight-line basis. Capital allowances claimable in any year are restricted to 66.67% of assessable profits for all companies except companies in the manufacturing and agricultural sectors, which are excluded from this restriction.

The following are the capital allowance rates on fixed assets (qualifying expenditures):

<table>
<thead>
<tr>
<th>Qualifying expenditure</th>
<th>Initial allowance</th>
<th>Annual allowance</th>
</tr>
</thead>
<tbody>
<tr>
<td>Building (industrial and non-industrial)</td>
<td>15</td>
<td>10</td>
</tr>
<tr>
<td>Furniture and fittings</td>
<td>25</td>
<td>20</td>
</tr>
<tr>
<td>Plant expenditure (1)</td>
<td>95/50</td>
<td>Nil/25</td>
</tr>
<tr>
<td>Mining expenditure</td>
<td>95</td>
<td>Nil</td>
</tr>
<tr>
<td>Plantation equipment</td>
<td>95</td>
<td>Nil</td>
</tr>
<tr>
<td>Motor vehicle (2)</td>
<td>50/95</td>
<td>25/Nil</td>
</tr>
<tr>
<td>Ranching and plantation expenditure</td>
<td>30</td>
<td>50</td>
</tr>
<tr>
<td>Housing estate expenditure</td>
<td>50</td>
<td>25</td>
</tr>
<tr>
<td>Research and development</td>
<td>95</td>
<td>Nil</td>
</tr>
</tbody>
</table>

**Notes**

1. 95% initial allowance for plant used in agricultural production; others 50%.
2. 95% initial allowance is granted for motor vehicles used for public transportation if the company has a fleet of at least three buses; all other motor vehicles 50%.

The initial allowance is first deducted and the balance is written off on a straight-line basis over a fixed period, depending on the rates of annual allowance. There is a requirement that assets not yet disposed of cannot be fully written off in the books. A nominal amount of NGN 10 per asset must be retained in the books until the assets are disposed. However, where 95% has been claimed as an initial allowance, the 5% balance is the value that must be maintained on the books until the final disposal of the asset.

When assets are sold, the proceeds over the tax written-down value are taxed at 30% to the extent of the allowances already claimed.
Nigeria

**Expenses**
Expenses are deductible for tax purposes if they are wholly, reasonably, exclusively and necessarily incurred for the business or trade. Some such expenses are:

- Sum payable by way of interest on capital borrowed;
- Rent for the period;
- Expenses incurred in respect of salary and wages;
- Expenses incurred for repair of assets;
- Bad debt incurred in the course of trade;
- Liability incurred for purpose of trade;
- Research and development costs; and
- Donations subject to the provisions of the law.

**Net operating losses**
Losses can be carried forward indefinitely except for insurance companies where losses can only be carried forward for four years. Losses made from one line of business cannot be relieved against another line of business. Loss carryback is not permitted.

**Group taxation**
There are currently no provisions for group taxation, group relief or group filing of tax returns in Nigeria. Each legal entity within a group is treated as distinct and separate for tax purposes.

**Payments to foreign affiliates**
Payments considered to be artificial are not deductible for tax purposes. Royalties, management and technical fees require the approval of the National Office for Technology Acquisition and Promotion (NOTAP) for exchange control purposes and for tax deduction. NOTAP approved royalties and technical fees are limited to a range of 1% to 5% of net sales, while management fees are limited to a range of 2% to 5% of profit before tax and consultancy fees are limited to 5% of total project cost. Technical fees are limited to approved man-hour rates.

Trademark fees are disallowed where the trademark owner has more than 75% equity participation in the local company.

**Tax incentives**
Nigeria has various tax incentives intended to encourage investment in key sectors of the economy as follows:

Pioneer companies investing in specified industrial activities may, on application, be granted a tax holiday for a maximum period of five years. Examples of economic activities that may be granted a tax holiday include: glass and glassware manufacture, manufacture of fertilisers, steel manufacture, etc.

A new company that engages in the mining of solid minerals is exempt from tax for the first three years of its operation.

Certain incentives are available to companies located in rural areas. The incentives take the form of tax reductions at graduated rates for enterprises located at least 20 kilometres from available electricity, water and tarred roads.
Interest accruing on deposit accounts of a non-resident company is tax-exempt, provided the deposits are made by transfer of funds to Nigeria on or after 1 January 1990 and the depositor does not become non-resident after making the deposit while in Nigeria.

Interest on foreign-currency domiciliary accounts is also tax exempt.

A company engaged in an approved manufacturing activity in the export processing zone (EPZ) and incurs expenditure in its qualifying building and plant equipment is entitled to 100% capital allowance in that year of assessment.

In addition, a company that is 100% export oriented but located outside an EPZ will enjoy a three year tax holiday, provided the company is not formed by splitting up or reconstruction of an already existing business and the export proceeds form at least 75% of its turnover.

Profits of companies whose supplies are exclusively inputs to the manufacture of products for export are exempt from tax. Such companies are expected to obtain a certificate of purchase of the input from the exporter in order to claim tax exemption.

Where plant and machinery are transferred to a new company, the tax written-down value of the asset transferred must not exceed 25% of the total value of plant and machinery in the new company. The company should also repatriate at least 75% of the export earnings to Nigeria and place it in a Nigerian domiciliary account in order to qualify for a tax holiday.

Profits of any Nigerian company in respect of goods exported from Nigeria are exempt from tax, provided that the proceeds from such exports are repatriated to Nigeria and are used exclusively for the purchase of raw materials, plant, equipments and spare parts.

For companies engaged in gas utilisation, they are entitled to:

- A tax-free period for up to five years;
- Accelerated capital allowance after the tax-free period; and
- Tax-free dividend during the tax-free period.

25% of the income derived from tourism by hotels in convertible currencies is exempt from tax if such income is put in a reserve fund to be utilised within five years for expansion or construction of new hotels and other facilities for tourism development.

Interest on any foreign loans, and interest on any loan granted by a bank for the purpose of manufacturing goods for export are exempt from tax as follows:

<table>
<thead>
<tr>
<th>Repayment period</th>
<th>Moratorium</th>
<th>%</th>
</tr>
</thead>
<tbody>
<tr>
<td>Over 7 years</td>
<td>Not less than 2 years</td>
<td>100</td>
</tr>
<tr>
<td>5-7 years</td>
<td>Not less than 1.5 years</td>
<td>70</td>
</tr>
<tr>
<td>2-4 years</td>
<td>Not less than 1 year</td>
<td>40</td>
</tr>
<tr>
<td>Under 2 years</td>
<td>Nil</td>
<td>Nil</td>
</tr>
</tbody>
</table>
Nigeria

Interest on any loan granted by a bank to a company engaged in agricultural trade, fabrication of local plant and machinery or as working capital to any cottage industry is 100% tax-free if the loan has a moratorium of not less than 18 months and the rate of interest is not more than the base lending rate.

An investment allowance of 10% on the cost of qualifying expenditures in respect of plant and machinery is available as a deduction from assessable profits in the year of purchase. There is no restriction to the full claim of capital allowance in any year of assessment for companies in the mining, manufacturing and agricultural sectors.

**Double tax treaties (DTT)**

Nigeria now has tax treaties with South Africa and China. The treaty with South Africa was signed in 2000, ratified in 2008 and came into effect on 1 January 2009 while the treaty with China was signed in 2002, ratified in 2009 and came into effect on 1 January 2010.

Nigeria also has tax treaties with other countries including: Belgium, Canada, Czech Republic, France, the Netherlands, Pakistan, Philippines, Romania, Slovak Republic, and the United Kingdom.

The provisions of Nigeria’s tax treaty allows a reduced WHT rate of 7.5% on dividends, royalties and interest payable to a beneficiary resident in a treaty country, compared to 10% for non-treaty residents.

**Withholding taxes (WHT)**

The principal legislation governing WHT in Nigeria is the Company Income Tax Act 2007 (Section 60 – 64), the Personal Income Tax Act (Section 68 – 72), and the WHT regulations and rules. Guidelines are normally issued by the Federal Inland Revenue Service (FIRS) through information circulars.

WHT is applicable on specified transactions as follows:

<table>
<thead>
<tr>
<th>Types of Payment</th>
<th>Applicable for rates</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>

<td>5%</td>
</tr>
</tbody>
</table>

The period for filing WHT is 21 days after the duty to deduct arose (previously 30 days) for deductions from companies, while for non-companies WHT is due within 30 days.

The penalty for failure to deduct or remit tax is now 10% (previously 200%) of the amount not deducted/remitted.
Companies are permitted to carry unutilised tax credits forward to future periods.

Effective September 2008, companies are required to submit in electronic form a schedule of all their suppliers for the month showing the tax identification number (TIN), address of the suppliers, the nature of the transaction, WHT deducted and invoice number.

**Tax administration**

**Returns**
Companies are required to register for tax and file their audited accounts and tax computations with the Federal Inland Revenue Service (FIRS or the Revenue) within six months of their financial year-end on a self-assessment basis or 18 months after incorporation (whichever comes first). A company may file an application for extension of filing tax returns for up to two months at the discretion of the FIRS.

Upon registration, a company is issued a TIN which will serve as the company's file number for all federal taxes and future correspondence with the Revenue authority.

The company must file the following documents with the tax authority:

- Tax computation for the relevant year of assessment;
- The audited financial statements for the respective period (this should be in conformity with the local GAAP);
- A duly completed and signed self-assessment form for company income tax; and
- Evidence of remittance of the income tax liability (partly or in full).

**Assessment**
Nigerian companies file their tax returns based on a self-assessment system where the taxpayer prepares its annual returns and determines its tax liability. However, the FIRS may apply a best of judgment (BOJ) assessment where it is of the opinion that the tax returns filed are deliberately misstated or where no returns are filed within the stipulated period.

**Payment of tax**
Companies are required to pay provisional tax of an amount equal to the tax paid in the preceding year, within three months from the commencement of each assessment year. This amount must be paid in one lump sum.

Provisional tax payment is not applicable to companies that file self-assessment returns. Tax charged by an assessment is payable within two months after service of the notice of assessment on the company. However, where the notice of assessment is served within the approved period of payment of provisional tax, the tax is to be paid within two months after the end of the approved period and, in any case, not later than 14 December of the assessment year.

A company that files its self-assessment within six months after the accounting year-end could apply to the revenue authority in writing to pay its income tax in instalments. The maximum number of instalments the Revenue authority may approve is six. Evidence of the first instalment has to accompany the tax returns filed in order to qualify for the instalment payment. However, all payments have to be made on or before 30 November of the year of assessment.
Assessments are made on a preceding year basis. This means that the financial statements for a period ended in 2009 will form the basis for the 2010 year of assessment.

Late payment of taxes attracts a 10% penalty and interest at commercial rate.

A company that files its annual tax return late or fails to submit its accounts by the due date is liable to a nominal penalty.

Significant developments

As part of the measures against the financial crises, tax losses incurred in 2008 and 2009 may be used to offset profits earned in the previous two income years. The deduction is limited to NOK (Norwegian Krone) 20 million per year. Furthermore, machinery, equipment and cars acquired or upgraded in 2009 may, in addition to the regular annual depreciation of 20%, be depreciated an additional 10%.

Taxes on corporate income

Income tax
Corporate tax is assessed at a rate of 28%.

Petroleum tax regime
All upstream activity on the Norwegian Continental Shelf (NCS) is taxable to Norway.

Taxation is based on net income at a marginal tax rate of 78%. The income tax is comprised of the ordinary 28% corporate tax rate, and the 50% special tax. All income is subject to the 28% corporate tax, while only income from offshore production and pipeline transportation of petroleum from the NCS (offshore tax regime) is subject to the additional 50% special tax. Income is taxable when the right to the benefit is earned, and costs are deductible when the liability to cover the cost is imposed on the taxpayer. Actual payment is not relevant.

Upstream activity on the NCS is consolidated within the company. There is no ring fence per oil field. Tax consolidation against other activity is limited. Crude oil sales from most of the fields are taxed at a predetermined market price set by an official board (i.e., the norm price). A norm price may be imposed on gas sales, but this has not been implemented. Investments in installations for exploitation and production of petroleum as well as investments in pipelines are depreciated linearly over six years.

An investment-based “supplementary depreciation” (“uplift”) of 30% (7.5% per year for four years) is granted on investments in installations for exploitation and production of petroleum as well as investments in pipelines. The uplift is deducted against the special tax base. Loss and unused uplift may be carried forward indefinitely with an annual interest. If the upstream activity on the NCS ceases, the tax value of loss carryforward and unused uplift may either be sold or compensated by the Norwegian state. Exploration costs are tax deductible as incurred. If a loss is created due to exploration cost, the taxpayer may claim the tax value of such loss repaid in the year following the income year in which the loss was created.
Special rules apply as to the deductibility of net interest cost in the offshore tax regime (78%). Upstream activity on the NCS is exempt from VAT. A CO2 tax is calculated on petroleum that is flared and natural gas emissions to air, as well as on CO2 that is separated from petroleum and emitted into the air, on installations used for production or transportation of petroleum. The CO2 tax is regarded as a normal operating cost for income tax purposes and is a fully deductible cost both for corporate and special tax calculations.

**Hydro power tax regime**

The hydro power tax regime is applicable on taxation of income derived from production, sales, transfer or distribution of hydro power.

Taxation is based on net income at a marginal tax rate of 58%. The income tax is comprised of the ordinary 28% corporate tax rate, and a 30% resource rent tax.

All income is subject to the 28% corporate tax, while only income from hydro power production is subject to the additional 30% resource rent tax.

The resource rent is calculated per hydro power plant. The gross income is, with some exceptions, calculated based on spot market price per hour multiplied with actual production. Deductible costs will be the same as for the corporate income tax (CIT); that is, expenses related to the power plant except for interest expenses, which are not deductible. Special rules apply to depreciations of investments in hydro power plants. Effective from 2008, tax consolidation is mandatory within the company and, provided the conditions for group taxation are fulfilled, available on a group level. Losses (negative resource rent) on a company (eventually on a group) level will be compensated by the Norwegian state. Transitional rules apply for losses derived before 2007.

In addition, a NOK 0.013 per kWh natural resource tax will apply, based on 1/7 of the produced kWh for the income year in question and the six previous years. The natural resource tax is creditable against the 28% ordinary corporate tax.

Hydro power producers also have to pay a 0.2–0.7% (decided by the local municipality, usually 0.7%) property tax on the hydro power plant’s capitalised value.

**Corporate residence**

Companies incorporated in Norway in accordance with Norwegian law and registered in Norway are, as a general rule, regarded as a resident in Norway. If management at the board/director level is carried out outside Norway, the residency in Norway for tax purposes may cease, and the company may be subject to liquidation for tax purposes. Note that several factors should be considered in order to determine whether the residency has been moved.

Foreign corporations will be regarded as resident in Norway if the place of effective management is in Norway. The place of effective management will, for example, be deemed to be in Norway if the board of directors makes its decisions in Norway.
**Other taxes**

**Value-added tax (VAT)**
The general VAT rate is 25% and applies to all supplies of goods and services not qualifying for another rate or an exemption. A reduced rate of 14% applies to supply of food and beverages, excluding tobacco, alcohol, medication and water from waterworks. The reduced rate is not applicable to the supply of food and beverages consumed in restaurants and other food establishments.

A reduced rate of 8% applies to the television licence fee charged for broadcasting services provided by the Norwegian Broadcasting Company (NRK), domestic passenger transport services and procurement of such services, domestic ferry services related to transport of vehicles, accommodation services and cinema tickets.

Exemptions with credit (zero-rated) include but are not limited to:

- Export of goods and services;
- Goods and services for Norwegian offshore and non-resident ships;
- Transfer of a going concern; and
- Supply of newspapers and books to recipients.

Exemptions without credit include but are not limited to:

- Supply of works of art owned by the artist;
- Health services;
- Social services;
- Financial services including banking, insurance and the sale of shares;
- Educational services;
- Lease of real estate (accommodation and lease of parking lots are taxable); and
- Services supplied by cultural and entertainment institutions.

Exemptions, whereby an option to tax is available, include the letting of immovable property to VAT liable lessees following a specific VAT registration with the VAT authorities.

The registration threshold is met when VAT taxable supplies (including self-supplies) exceed NOK 50,000 during a 12-month period. For charitable and public utility institutions and organisations, the threshold is set at NOK 140,000.

**Net wealth taxes**
Private limited companies (AS) and public limited companies (ASA) are not liable to net wealth tax or other capital taxes.

**Branch income**

Branch income is taxed at the corporate rate of 28% (the same as Norwegian companies). Branches of foreign companies are taxed more or less in the same way as Norwegian limited liability companies.
Norway

There is no branch profit tax or other repatriation taxes. However, if assets and/or liabilities are transferred from a permanent establishment (PE) in Norway to the head office or another foreign PE of the same company, this may trigger exit taxation. As before, a transfer of assets, etc. to another corporate entity is subject to regular taxation.

Branches of foreign limited liability companies are not subject to net wealth tax.

**Income determination**

**Inventory valuation**
Inventory is valued at cost. Cost is normally determined using the first-in, first-out (FIFO) method. The last-in, first-out (LIFO) method is not acceptable for tax purposes. Conformity between book and tax reporting is not required.

**Capital gains**
Capital gains realised in the course of a business activity are almost always regarded as taxable income. Gains resulting from real estate transactions are taxed, regardless of whether they are incurred in connection with business activity. Losses may be offset against the taxpayer’s other income.

Capital gains realised on both business-related and non-business-related securities are, in principle, taxable. In general, any capital gains realised on bonds at maturity are regarded as taxable income. Correspondingly, realised losses will be eligible for deductions.

**Tax exemption rules for corporate shareholders**
Under the tax-exemption rules, corporate shareholders will be exempt from tax on dividends received and capital gains on all shares and on derivatives where the underlying object is shares, regardless of the level of the holding or the time for which shares have been held. Losses on shares will accordingly not be tax-deductible. All expenses related to exempt income from shares are fully tax-deductible. In order to limit the benefit of these deductions, the tax-exemption method is limited to 97% of the relevant income, and the remaining 3% is taxable for Norwegian corporate shareholders (at a 0.84% effective tax rate). The 3% taxable income is calculated on dividends and net gains/losses in the income year. Unused losses may not be carried forward.

In addition, an investment in a company resident in a low-tax country in the European Economic Area (EEA) has to fulfil certain substance requirements to qualify for the tax-exemption rules. These requirements are intended to be in line with the substance requirements of the European Court of Justice’s (ECJ’s) decision in the Cadbury Schweppes case. A country is considered a low-tax country if the level of effective taxation is less than two-thirds of the tax that would have been due had the foreign company been resident in Norway. This is the same test used for the controlled foreign company (CFC) regime, which means that a comparison shall not be made on a year-by-year basis, but rather that an overall comparison is required. The Directorate of Taxes has published a non-exhaustive list of low tax jurisdictions (black list) and non-low tax jurisdictions (white list).

However, for investments outside the EEA, the exemption would apply only if a shareholder holds 10% or more of the share capital and the voting rights of the foreign
company for a consecutive period of two years or more. To be able to deduct losses on realisation of shareholdings outside the EEA, the shareholder and/or a related party may not hold 10% or more of the share capital and the voting rights of the foreign company in a two-year period prior to the realisation. For dividends, the holding period of two years would not have to be met when dividends are distributed but may be met after the ex-dividend date.

Shareholdings in low-tax countries (see above) outside of the EEA do not qualify for the tax-exemption rules.

Acquisition and sales-related costs (e.g., broker fees, etc.) must be activated (i.e., added to the cost price of the shares for tax purposes). Costs incurred to manage acquired tax-exempt shares are, however, tax-deductible.

Norway's internal tax rules do not allow taxation of a non-resident's capital gain on disposal of financial instruments including, among others shares in Norwegian companies, unless the non-resident has a PE to which the financial instrument may be allocated.

**Foreign income**

A Norwegian resident company is subject to corporate tax on its worldwide income. Double taxation of foreign-source income including foreign branch income and CFC income, is avoided either through tax treaties or domestic tax provisions. A deduction for foreign tax may either be claimed as an expense or as a credit against Norwegian tax payable on that income. In most circumstances the foreign dividends are exempt according to the tax-exemption rules. As a consequence, foreign withholding taxes may not be credited, and therefore constitute a real cost for the companies concerned.

**Controlled foreign companies (CFCs)**

Norwegian residents (individual or company) will be taxed directly for their allocable part of the profits from a CFC's income if the company is resident in a low-tax country, irrespective of whether income is distributed to the Norwegian investor. A low-tax country in this respect is a country where the assessed foreign income tax on the company's profits is less than two-thirds of assessed taxes calculated according to Norwegian tax rules as if the company had been a resident in Norway. A condition for such taxation is that 50% or more of the foreign company's shares or capital is held or controlled, directly or indirectly, by Norwegian taxpayers (alone or together), based on ownership status at the beginning and end of the income year in question.

The control requirement is, as mentioned, fulfilled if at least 50% of the shares or capital is controlled directly or indirectly by Norwegian taxpayers both at the beginning and end of the income year. However, if Norwegian taxpayers own or control more than 60% of the shares or capital at the end of the income year, Norwegian control exists irrespective of the level of control at the beginning of the year. Norwegian control ceases to exist if Norwegian taxpayers own or control less than 50% of the shares or capital at both the beginning and end of the income year or less than 40% of the shares or capital at the end of the income year.

On condition that Norway has signed a tax treaty with the country involved and the company in question is covered by the treaty, the CFC rules will be applicable only if the income of the entity in question is mainly of a passive nature. Furthermore, CFC taxation may also be prohibited if the company in question is resident within the EEA.
and cannot be deemed as a wholly artificial arrangement as outlined in the ECJ’s decision in the Cadbury Schweppes case. Hence, CFC taxation will be avoided for EEA companies that fulfil certain substance requirements.

**Stock dividends**
Stock dividends (bonus shares) are not taxable on receipt, provided that the dividends have been distributed in accordance with the Limited Liability Company Acts and distributed in proportion with the ownership level of the shares.

**Exit tax**
The exit rules levy taxes upon the migration of assets or liabilities. The tax is calculated by reference to the accrued but unrealised gains at the time of migration. Exit charges are levied if a company:

- Transfers its operational headquarters to another country.
- Has assets, etc. that are transferred to a PE that is tax-exempt pursuant to a double tax treaty (DTT).
- Has assets, etc. that are transferred from a Norwegian PE of a foreign company to the head office or a foreign PE of the same company.

Transfer of operational equipment to a PE in a country where the DTT in question is based on the credit method is, however, not regarded as a taxable event.

According to the rules, the tax treatment is different depending on the type of assets being transferred. Business-related operational equipment and financial assets being transferred out of Norwegian taxing jurisdiction are considered as taxable events, but the tax charges may be deferred if certain conditions are met. In addition, the tax charges may be completely avoided if the assets are not sold within five years after they are transferred out of Norway. Transfer of intangible assets and inventory would trigger immediate and unconditional exit charges.

Threshold rules apply when determining whether the exit tax may be levied. Exit tax on the transfer of tangible assets is applicable only if the unrealised capital gains exceed NOK 5 million. Exit tax on the transfer of other assets and liabilities is applicable only if the unrealised capital gains exceed NOK 1 million.

Exit charges at both the corporate and shareholder level will be triggered when companies migrate from Norway because these companies will be deemed to have liquidated.

**Deductions**

**Depreciation and depletion**
For depreciation, the declining-balance method is mandatory. The depreciation rates given below are the maximum rates.

There is a duty to capitalise if the value of an asset subject to declining-balance method of depreciation is NOK 15,000 or higher and has an economic life of at least three years.

<table>
<thead>
<tr>
<th>Asset</th>
<th>%</th>
</tr>
</thead>
<tbody>
<tr>
<td>Office machines, etc.</td>
<td>30</td>
</tr>
</tbody>
</table>
Asset %
Acquired goodwill/business value 20
Trucks, lorries, buses, taxicabs, vehicles for persons with disabilities 20
Cars, tractors, other vehicular machinery, instruments, fixtures and furniture, etc. 20
Ships, vessels, offshore rigs, etc. 14
Aircraft, helicopters 12
Construction for transmission and distribution of electric power and electronic equipment in a power company 5
Buildings and construction, hotels, hostels, inns, etc. 4 (8)*
Office buildings 2
Fixed technical installations in buildings, including heating plant, cooling and freezing plant, electrical installation, sanitary installation, elevator, etc. 10

* The applicable rate would be 8% if, from the date of its erection, the structure has an economic life of 20 years or less.

Special depreciation rules apply to assets moved in and out of Norwegian jurisdiction to and from companies, etc resident outside the EEA.

**Net operating losses**
Losses may be carried forward indefinitely. Losses incurred in the year of ceasing business may be carried back for a period of two years. If a loss is incurred in the next to last year, it may be carried back to the preceding year.

**Payments to foreign affiliates**
Royalties and service fees paid to related foreign companies are fully deductible, provided they meet the arm’s-length standard. There are no formal thin-capitalisation or income-stripping rules in Norway. In practice the tax authorities require that the entity in question is able to service its debts. In addition, any loan terms should be comparable to those that would have been agreed upon by unrelated parties. Interest on financing to the extent that these rules are not satisfied may be regarded as dividends and thus non-deductible and, in addition, may be subject to Norwegian withholding tax.

**Taxes**
Real estate tax, as well as foreign income and capital taxes paid by the taxpayer, is deductible in determining corporate income. Foreign taxes are deductible only if they have not been credited against Norwegian payable tax.

**Goodwill**
Acquired goodwill may be depreciated according to the declining-balance method at a maximum of 20% per annum. The tax authorities have, however, on several occasions recently questioned the allocation to goodwill and claimed that a part of the purchase price should be allocated to brand and firm names, etc. (which may, as a rule, not be depreciated unless it is of a time-limited nature). Other intangibles are depreciable on condition that they are subject to an evident loss in value or if they are time-limited.

These rules do not apply to companies engaged in oil- and gas-producing activities subject to the Petroleum Tax Act.
Norway

**Thin capitalisation**

There is no fixed debt to equity ratio in Norwegian tax law. However, if Norwegian income from the subsidiary is reduced due to the affiliation between the Norwegian company and a foreign company, adjustments may be made under the arm's-length provisions, cf. section 13-1 of the General Tax Act. Generally, these provisions apply only if the company has obtained a larger loan from a group company than an independent credit institution would have granted, or if the agreed level of interest is higher than an independent credit institution would have required. As a rule of thumb 25% to 30% equity is feasible. Naturally this analysis will vary based on the actual company's credit worthiness, which would consist of several elements such as the nature of the business, financial status, future income possibilities and group relationship, etc. The company must also be able to service its debts.

If a Norwegian entity is regarded as being thinly capitalised, part of the entity's interest and debts will be reclassified to dividend and equity. Such dividend will not be covered by the participation exemption rules as they are not distributed in accordance with the rules and regulations of the Limited Liability Companies Acts.

**Group taxation**

Income taxes are assessed on companies individually, not on a consolidated basis. This may be avoided through group contributions between Norwegian companies, provided common direct or indirect (including foreign) ownership and voting rights is more than 90%. Furthermore, the Norwegian group contribution rules are, under certain conditions, also applicable to branches of companies that are resident within the EEA. Group contributions are not deductible for companies engaged in oil- and gas-producing activities subject to the Petroleum Tax Act.

Assets may be transferred tax-free between group companies as defined above at tax book value for tax purposes and at market value for financial book purposes. Payment in this respect must equal market value of the assets transferred for tax and financial book purposes. The same applies to payment in shares. If the transferee loses the affiliation with the tax group while still owning the transferred assets, the transferor will be taxed for the difference between the tax book value and the market value of the assets.

**Tax incentives**

**Shipping taxation rules**

Effective for the income year 2007, a new tonnage tax model has been introduced in Norway. The new rules imply substantial changes to the taxation of shipping companies resident in Norway.

The new rules are in line with the tonnage tax rules found in other EU/EEA countries and imply that shipping income will be tax-exempt on a permanent basis. This is the main difference compared with the previous model that was based on deferral of the tax liability.

Norwegian tonnage-taxed companies are allowed to keep only certain kinds of assets inside the model (legal assets) and are not allowed to have income from non-tonnage-taxed activities except financial income. If the requirements are not
fulfilled, the company would fall outside the scope of the model and be taxed at ordinary rates (28%).

**Qualifying assets**
A tonnage-taxed company must own at least one qualifying asset (i.e., a vessel, for example bulk, tankers, container vessels, car carriers, tugboats, and entrepreneurial vessels and auxiliary vessels for use in the petroleum industry) new building contracts, a 3% share in another tonnage-taxed limited company, or a 3% ownership interest in a partnership or CFC company.

**Qualifying and legal business activities/income**
Qualifying business income is income from operation of the company's own and chartered vessels. A tonnage-taxed company may, for example, charter vessels in and out on bareboat and time charter terms without limitations. Furthermore, gains upon disposal of vessels and new building contracts are exempt from taxation.

Income from related activities such as sales of goods and services onboard vessels, loading and discharging vessels or leasing out containers and operations of ticket offices is also exempt from taxation. The exemption also applies to income from the strategic and commercial management of the company's owned and chartered vessels, as well as vessels owned or operated by group companies (more than 50% joint ownership), and vessels operated according to a pool agreement. Pure management companies are not included (i.e., all companies must have at least one qualifying asset).

Financial income is permitted except for income from shares in unlisted companies and ownership interests in partnerships that are not taxed under the tonnage tax system. The condition is that financial activities do not constitute a separate business.

**Entrance into the tonnage tax system**
Entry into the new tonnage tax system is optional and may take place with effect from 1 January every year provided that the company has fulfilled the conditions for application of the tonnage tax system from the beginning of the year. Newly established companies will have direct entry and may enter into the tonnage tax system from the date of incorporation. All qualifying companies within the same group should be obliged to make the same election (tonnage taxation or ordinary taxation) with effect from the income year 2009.

Upon entry into the tonnage tax system (from 2010) the difference between market value and tax value of the company's assets (including vessels, new building contracts, ownership interests in partnerships and shares in CFC companies/tax exempt assets) is taxed as a capital gain (28%). There is continuity for financial assets and assets covered by the tax-exemption rules (qualifying shares and derivatives).

**Transitional rules applicable in 2007, 2008 and 2009**
Companies that were taxed under the old tonnage tax system prior to 2007 had to elect between exit from the tonnage tax system or transition to the new tonnage tax system effective from 1 January 2007. Transition into the new tonnage tax system resulted in an income settlement that was based on the difference between book value and tax value of the company's tax-exempt assets (3/3). According to the transitional rules 2/3 of the gain was to be entered as income over 10 years (1/10 each year), while the tax liability related to the last 1/3 (optional) may be waived if the company invested an
amount equal to the tax amount in qualifying environmental measures (environmental fund). On 12 February 2010, the majority of the Norwegian Supreme Court concluded that the transitional rules are unconstitutional. The ruling implies that the gain \((2/3)\) calculated upon entry into the new tonnage-taxed system may not be subject to taxation until untaxed profit is distributed to non-tonnage-taxed shareholders, or the company leaves the tonnage tax system. For the time being, companies that have offset \(1/3\) to an environmental fund may continue this fund.

An ordinarily taxed company could enter into the new system according to transitional rules effective from 1 January 2007, 2008 or 2009. Entry into the tonnage tax system resulted in an income settlement. The gain was calculated based on the difference between book value and tax value of the company's tax-exempt assets. The gain could be offset to the company's gain and loss account and be entered as income with 20% of net balance each year. If the company sells vessels or ownership interests in partnerships owned by the company at the time of entry into the tonnage tax system within three years after entry or exits the model within three years after entry, the difference between market value and book value upon entry into the system will be subject to taxation.

**Exit from the tonnage tax system**

A shipping company may exit the regime on a voluntary basis, or is obliged to do so after breaching specific requirements for companies within the tonnage tax system. As a starting point, no income settlement will have to be made when leaving the regime and the tax value on the company's assets will be adjusted to market value at the time of exit. However, a possible exit while the company has untaxed reserves calculated upon entry into the tonnage tax system could result in tax liability. The same applies if a company that was previously taxed under the ordinary tax regime exits the tonnage tax system during the first three years after it has benefited from the transitional rules applicable in 2007, 2008 and 2009 (or disposes of vessels or ownership interests in partnerships owned upon entry).

**Lock-in period**

Companies that enter into the tonnage tax system are subject to a formal 10-year lock-in period. If a company exits the tonnage tax system before the lock-in period expires, it will be excluded from the tonnage tax system until after the initial lock-in period has ended.

**Withholding taxes (WHT)**

Norway does not levy withholding taxes on payments of royalties and interest except interest derived from primary capital certificates (“No. grunnfondsbevis”). The internal withholding tax rate is 25%, which either may be reduced under the tax-exemption rules or an applicable tax treaty. To qualify for the tax-exemption rule, the recipient of the dividends has to be a corporate investor resident in an EEA country and also fulfil certain substance requirements. If these requirements are met, no dividends withholding tax is imposed.

**Tax administration**

**Returns**
The income tax year normally runs from 1 January to 31 December, with assessments being issued in the early fall of the following calendar year. Companies are liable for both advance payments and final settlements in the calendar year of assessment. Companies with a financial year other than the calendar year may, if they belong to a foreign group with a deviating accounting year, use the financial year of the group for tax purposes.

Companies are required to file their tax returns by the end of March in the year following their financial year. If filed electronically, the return must be filed by the end of May. Upon application, an extension of the time limit to file normally will be granted.

The annual assessment is made by various local tax assessment offices and independent, locally elected boards, which notify the taxpayer if taxable income is determined to deviate from what was submitted in the tax return.

**Payment of tax**
Companies are required to make advance payments of tax on 15 February and 15 April in the year following the income year. The two payments should together cover all of the expected corporate tax to be assessed. Any balance must be paid three weeks after the assessment has been made public (i.e., in early autumn of the year following the relevant accounting year).

Significant developments

The new tax law replaces the Company Income Tax Law No. 47/81 and the Profit Tax Law on Commercial and Industrial establishments No. 77/89.

The new tax law covers all taxable entities which include:

- Omani establishments;
- Omani companies; and
- Permanent establishments including branches of foreign companies.

The major changes introduced in the new tax law are highlighted below:

- Under the prior law, Oman followed a territorial concept of taxation, although in practice the tax authorities sought to tax income arising outside Oman. The new law has effectively replaced the territorial concept with a global basis of taxation. Under the new law, companies formed in Oman will now be taxed on their global (worldwide) income. Foreign taxes paid are allowed as a deduction (subject to limitation) under the new law.
- The definition of the term permanent establishment (PE) is expanded and now includes a stipulation that a stay of 90 days or more during any 12-month period is deemed to create a PE in Oman for persons (legal or natural) who render consulting or other services.
- Under the old law, branches of foreign companies were taxed at rates ranging from 5% to 30%. Under the new law, these branches are taxed at the same rates as Omani companies. This rate is 12% on taxable profits over OMR (Omani Rial) 30,000.
- New rates for calculating tax depreciation have been specified and the concept of “blocks of assets” has been introduced, in which assets falling under the same rates of depreciation are pooled together.
- Finance and leasing companies are treated as banks for purposes of allowing a deduction for loan loss provisions.
- Executive regulations to clarify positions on head office expenses, shareholders loans, thin capitalisation rules and related party transactions are expected to be issued by the end of 2010.
**Taxes on corporate income**

Effective 1 January 2010 (tax year 2010), the rate of tax has been made uniform for all types of business entities, regardless of whether it is a corporate entity and/or whether it is registered.

The tax rate is as follows:

<table>
<thead>
<tr>
<th>Taxable profits</th>
<th>Rates %</th>
</tr>
</thead>
<tbody>
<tr>
<td>First OMR 30,000</td>
<td>Nil</td>
</tr>
<tr>
<td>Over OMR 30,000</td>
<td>12</td>
</tr>
</tbody>
</table>

Special provisions are applicable to the taxation of income derived from the sale of petroleum. The tax rate specified for such companies is 55%. However, the tax rates are applied on income as determined by the individual Exploration and Production Sharing Agreement entered into between the government of Oman and the company engaged in the sale of petroleum. Under these agreements, the government pays the company’s share of income tax from amounts withheld from the government’s share of production. Therefore, the income tax is not actually borne by the company.

**Corporate residence**

The Income Tax Law (Royal Decree 28/2009) seeks to tax worldwide income of entities formed in Oman, and the Oman source income of branches and other forms of permanent establishments. The term “resident” is not defined in the tax law.

Permanent establishment (PE) is defined in very broad terms and includes places of sale, places of management, branches, offices, factories, workshops, mines, quarries, and building sites for construction. However, the mere use of storage or display facilities does not constitute a permanent establishment. The definition of PE references carrying on business in Oman either directly or through a dependent agent.

Additionally, the definition now stipulates that a total stay of 90 days during a 12-month period creates a PE in Oman. However this 90 day period would apply to rendering of consultancy services or other services only.

Under this definition, while the sale of goods into Oman will not be deemed to be a taxable activity, a contract for the supply and installation of equipment is likely to attract tax. By the same criterion, services rendered by personnel visiting Oman will be treated as taxable activities, applying the 90 day rule.

**Other taxes**

No other taxes are levied on sales or profits other than the withholding taxes discussed below.

There is no value-added tax or sales tax in Oman.

Customs duty of 5% of cost, insurance and freight (CIF) value applies to most non-Gulf Corporation Council (GCC) source goods. Exemptions apply for certain food items, medical supplies, etc.
Oman

Municipal taxes apply to the following items:

- Property rents (3%);
- Hotel occupancy (5%); and
- Leisure and cinema houses (10%).

**Branch income**

Branches of foreign entities (regardless of country) are subject to tax at the rate of 12% on income over OMR 30,000. The tax rate for branches is now the same as that for Omani legal entities. This change is effective 1 January 2010.

Rules for the deduction of head office expenses for branches are expected to be changed. New executive regulations providing guidance are expected shortly.

**Income determination**

**Inventory valuation**
Inventory should be valued using a method that complies with International Accounting Standards.

**Capital gains**
Gains on sales of securities listed on the Muscat Securities Market are exempt from taxation. A recent Supreme Court ruling held that gains on transfers of other assets are taxable as ordinary income.

**Inter-company dividends**
Dividends received from Omani entities are exempt from taxation. Foreign source dividends are taxable. Foreign source dividends are taxed as the same rates as corporate income.

**Foreign income**
Worldwide income of an entity formed in Oman is taxed in Oman. Credit for foreign taxes paid is given under the law; however this may not exceed the amount of Omani tax payable on such income.

**Stock dividends**
There are no provisions in the tax law which address stock dividends.

**Illegal payments**
Payment of bribes, kickbacks and other illegal payments is not deductible.

**Capital or revenue**
The law does not recognise a difference between capital receipt and a revenue receipt.

**Interest, rent/royalty income**
Interest income is taxable as business income. Similarly rental income and royalties are taxed as business income.

**Unrealised gains or losses**
Unrealised exchange gains are not taxable. Similarly any unrealised loss is not deductible from the total taxable income.
Deductions

Depreciation and depletion
Depreciation is taken on a straight-line basis on the following classes of assets at the annual rates shown.

<table>
<thead>
<tr>
<th>Asset</th>
<th>Rate %</th>
</tr>
</thead>
<tbody>
<tr>
<td>Permanent buildings</td>
<td>4</td>
</tr>
<tr>
<td>Semi-permanent buildings</td>
<td>15</td>
</tr>
<tr>

<td>10</td>
</tr>
<tr>
<td>Aircraft and ships</td>
<td>15</td>
</tr>
<tr>
<td>Hospital buildings, educational establishments and equipment for scientific research</td>
<td>100</td>
</tr>
</tbody>
</table>

The rate of depreciation allowed is doubled in the case of buildings used for industrial purposes.

The tax law now provides for calculation of depreciation on a net book value basis for the following class of assets. A “pooling” concept has been introduced, whereby assets subject to same rate of depreciation may be pooled together for purposes of depreciation.

<table>
<thead>
<tr>

</tr>
</tbody>
</table>

Net operating losses
Carryforward of losses is limited to five years except in the case of companies that incurred losses during a mandatory tax-exempt period, where the losses may be carried forward indefinitely for set-off against future profits.

Payments to foreign affiliates
Payments to foreign affiliates normally receive in-depth scrutiny from the tax authorities. Accordingly, proper documentation should be obtained in order to establish that these transactions are made at an arm’s-length basis.

Social security payments
Social security contributions paid by employers in respect of employees may also be deducted. There are no other indirect taxes such as VAT or sales tax.

Start-up expenses
Expenses incurred before the commencement of business are allowed as a deduction in the first taxable year (or period).
**Oman**

**Interest expenses**
Deduction of expenses incurred for the purpose of earning income is generally allowed. Interest expense is allowed for loans from unrelated parties or on loans from banks. Interest paid to related parties is allowed only to the extent the loan terms are at arm's length.

**Meals, entertainment, officers’ compensation, etc.**
All expenses incurred for the generation of gross total income are allowed. There are no specific restrictions on deduction for expenses like meals and entertainment, compensation for officers and life insurance payments for employees. There are limits on the deductibility of directors’ fees.

**Pension payments**
The law provides a deduction for contributions towards pension funds, subject to the executive regulations that are expected to be issued shortly.

**Fines and penalties**
Civil fines and penalties are not deductible.

**Other significant items/restrictions on allowable expenses**
The Law has imposed restrictions on the deductibility of certain expenses. The principal items affected are the following:

- Sponsorship fees paid to Omani sponsors are restricted to 5% of net taxable income before sponsorship fees. Net taxable income is determined after setting off any losses carried forward.
- Charges or expenses allocated from the head office or other group companies are currently restricted to the lower of the following:
  - Expenses allocated to Oman operations;
  - Average of such expenses approved for the Oman operations during the three years immediately preceding the most recent taxable year subject to assessment; or
  - 3% of the total income derived from Oman operations during the year subject to assessment. This percentage is increased to 5% in respect of branches of foreign banks and insurance companies and to 10% in respect of operations of major industrial companies that use the latest and most advanced production techniques, pursue scientific research, provide technical assistance, or use patents that require exchange of information and technical assistance with their associates. The Minister of Finance has discretionary authority to increase this percentage above 10%, but such authority is exercised very rarely.
- Executive regulations on head office expenses are expected by the end of 2010. These regulations may change the treatment and percentages described above. Commissions paid by insurance companies are restricted to 25% of net premiums collected.
- Amounts charged to the profit and loss account for creating provisions in respect of bad debts, stock obsolescence, warranties, and similar types of contingencies are not tax deductible. Deduction is allowed only at the time of write-off. However provisions created by licensed banks in respect of bad debts are allowable within the limits approved/required by the Central Bank of Oman.
- Leasing companies are treated on par with banks as far as deduction for loan loss provision is concerned. Leasing companies are allowed deductions for loan loss provisions subject to the limits or recommendations of the Central Bank of Oman.
Losses arising on sale of investments listed on the Muscat Securities Market are not allowed as a deduction from taxable income.

Any expenses or costs which have been incurred to generate income exempted from tax are not allowed as a deduction from taxable income.

Charitable donations are limited to specified institutions and organisations and are subject to an overall limitation of 5% of total income.

Amounts paid as tax consultancy or advisory fees are disallowed.

**Group taxation**

Businesses are taxed as separate entities and the tax law does not recognise group taxation.

**Transfer pricing regime**

The new tax law proposes to issue executive regulations that would define the transfer pricing policies. Under prior law, there were no defined policies on transfer pricing, though the tax authorities by practice followed arm's-length principles in most cases.

**Inter-company payments**

All inter-company payments are scrutinised in detail to ensure that the profits are not transferred to avoid payment of tax.

**Thin capitalisation**

The new tax law proposes to issue executive regulations that will define the thin capitalisation rules. Under the previous law, there were no defined policies on thin capitalisation, though the tax authorities by practice did look into the terms of loans and interest payments in most cases.

**Controlled foreign companies**

There is no controlled foreign company regime.

**Tax incentives**

**Exempt activities**

Income from the principal activities listed below is exempt from tax, if an exemption is applied for and obtained:

- Industry and mining;
- Export of products manufactured or processed locally;
- Operation of hotels or tourist villages;
- Agriculture and animal husbandry and the processing of agricultural produce;
- Fishing and fish processing and aquaculture; and
- University education, college or institutes of higher studies, private schools, nurseries, training colleges and institutes.

**Period of exemption**

The exemption is valid for a period of five years from the date of commencement of production or the practice of activities and may be made subject to such conditions as the Minister of Commerce and industry may specify. The exemption is renewable for a period not exceeding five years, subject to approval by the Financial Affairs and Energy Resources Council.
Oman

**Exempt incomes**

- Dividends received from an Omani company.
- Profits or gains on disposal of securities listed on Muscat Securities Market.
- Omani marine companies, whether wholly owned by Omanis or with foreign and Omani ownership and registered in Oman, are exempt from tax. Foreign marine companies conducting activities in Oman through an authorised agent are exempted from tax with effect from the date of commencement of activity provided that reciprocal treatment is afforded by the country of the foreign company.
- Income realised by foreign airlines carrying on business through establishments in Oman is exempt from tax. This exemption is limited to the extent of the income from operating airplanes for international transport, provided reciprocal treatment is accorded in the airline's home country.
- Income realised by investment funds established in Oman under the Capital Market Authority Law or established overseas for dealing in shares and securities listed on Muscat Security Market is exempt.
- Foreign companies engaged in oil and gas exploration activities, while taxable under the law, normally have their tax obligations discharged by the government under the terms of the Exploration and Production Sharing Agreement.
- Foreign companies working for the government in projects deemed to be of national importance may be able to negotiate a tax protection clause whereby any tax paid by them is reimbursed by the government.
- Foreign taxes paid to a country with whom Oman has a double tax treaty are eligible for a credit to the maximum of the Oman tax that would have been payable on such income. The taxpayer is required to submit an application to the Secretariat General for Taxation to claim such credit.

**Withholding taxes (WHT)**

WHT was introduced under an amendment effective November 2 1996. The new tax law effective 1 January 2010 made certain changes to the categories that attract withholding taxes.

Foreign companies that do not have a PE in Oman for tax purposes and that derive income from Oman in the nature of the following are subject to withholding tax at 10% of gross income from such sources:

- Royalties;
- Consideration for research and development;
- Consideration for use of or right to use computer software; and
- Management fees.

Such withholding tax is required to be withheld by the Omani-based company and paid to the tax department within 14 days of the end of the month in which tax is deducted or payments are due or made to the foreign company.

There is no withholding tax on dividends and interest payments.

The term royalty has been defined under the law to include consideration for the use of intellectual property, including computer software, cinematography films, tapes, discs, or any other media, patents, trademarks, drawings etc. The term further includes consideration for using industrial, commercial or scientific equipment and consideration for information concerning industrial, commercial or
scientific experience or consideration for granting rights to exploit mining or other natural resources.

**Double tax avoidance agreements**

At present, Oman has double taxation treaties with France, India, Tunisia, the United Kingdom, Mauritius, Pakistan, Algeria, Egypt, Lebanon, China, Yemen, South Africa, Russia, Seychelles, Singapore, Thailand, Vietnam, Canada, Korea, Iran, Turkey, Belarus, Moldova, Brunei, Belgium, Morocco and Uzbekistan. There are also agreements with various countries which are pending ratification.

Under the new tax law, in respect to international tax treaties, foreign taxes paid are eligible for a credit to the maximum of the Oman tax that would have been payable on such income. The taxpayer is required to submit an application to the Secretariat General for Taxation to claim such credit.

**Tax administration**

**Returns**

The tax year is the calendar year. Assessments can be made on the basis of a year-end other than 31 December, provided permission is granted in advance by the Omani tax authorities and the company then adheres to the year-end on a consistent basis.

A provisional declaration of tax must be submitted in the prescribed form within three months from the end of the accounting period to which it relates. The final annual return of income should be submitted in the prescribed format within six months from the end of the accounting period to which it relates. Reasonable time extensions can be sought and are normally provided for filing the provisional and annual returns of income but these do not defer payment of tax which will be subject to additional tax at 1% per month from the due date to the actual date of payment.

In the case of companies having a paid-up capital in excess of OMR 20,000, the annual return of income should be accompanied by audited accounts signed by an auditor registered in Oman. The law requires accounts to be drawn up in accordance with the International Financial Reporting Standards (IFRS) consistently applied. It specifically provides for accrual accounting unless prior permission of the Secretary General of Taxation (the Secretary General) has been obtained. The accounts must be submitted in local currency unless prior approval of the Secretary General has been obtained for submitting them in foreign currency.

Delay or failure in submitting the provisional or annual returns may attract a penalty of not less than OMR 100 and not more than OMR 1,000.

Failure to file the provisional or annual returns of income may result in an estimated profit assessment by the Secretary General.

Failure to submit audited accounts as required under the Law is deemed to result in an incomplete annual return of income and may attract an estimated profit assessment.

The law confers wide powers on the Secretary General for requesting information. Experience has shown that notwithstanding the presentation of audited accounts, the tax department requests very detailed information and supporting documentation relating to revenue and expenses. Failure to provide such information or the provision
of incorrect information can result in an additional assessment by the Secretary General and/or various penalties on the company and/or the officer responsible for providing the information.

**Objections and appeals**
A company has a right to object to any assessment issued by the Secretary General. The objection document should be prepared in writing (in English and in Arabic) and filed with the office of the Secretary General for Taxation within 45 days from the date of assessment. The Secretary General is required to give a judgment within five months extendable up to another five months at his discretion from the date of receiving the objection. The tax demanded may be kept in abeyance on request. No additional tax is payable until the Secretary General issues the judgment.

The company has the right to file a petition against the judgment of the Secretary General for Taxation with the Tax Committee at the Ministry of Finance within 45 days of the date of the judgment. The petition should be in Arabic, however, before filing the petition the company must pay the tax demanded or include a request to be granted dispensation from paying the additional tax demanded in the judgment. The Tax Committee may, when the company furnishes a bank guarantee, grant such dispensation. In practice the Tax Committee takes one to two years to issue its judgment.

The company has the right to appeal against the judgment given by the Tax Committee within 45 days of the date of the judgment. The appeal is to be filed with the Court of First Instance. The appeal should be in Arabic, and the company must be represented by an authorised lawyer. However, before filing the appeal, the company must pay the fee to the Secretariat of the Court.

The final judicial authority is the Supreme Court, and petitions can be filed with this court within 45 days of receiving a decision from the Court of First Instance. All proceedings in the above courts are in Arabic.

**Maintenance of records**
The Law requires accounting records and supporting documentation to be maintained for 10 years after the end of the accounting period to which these records relate.

**Payment of tax**
Any tax estimated to be payable in respect of an accounting period should be paid with the provisional assessment and "topped up" for any additional amount computed as payable following submission of the annual return of income. Failure to pay taxes by the due date attracts interest at the rate of 1% per month from the date on which such tax was due to the date of payment.

The difference between the amount paid and the amount assessed, subject to filing of an objection, should be paid within one month from the date of the assessment. The additional amount assessed attracts interest at the rate of 1% per month from the date on which such tax was due to the date of payment.

Under the Law, the Secretary General has the authority, with the approval of the Minister and the Tax Committee, to sequester and sell the assets of a taxable entity to recover the taxes due.
If decisive proof is presented to the Secretary General that any person has paid tax for any year exceeding the tax due and payable for such tax year as finally settled, such person has the right to recover the tax. However, if any tax has become payable by such person in respect of another tax year, the excess amount will be adjusted against the future tax liability. Any request for recovery must be presented within five years from the end of the tax year to which it relates.

Where the taxpayer fails to declare correct income in the tax return for any tax year, the Secretary General may impose a fine not exceeding 25% of the difference between the amount on the basis of the correct taxable income and the amount of tax as per the return submitted.

The tax authorities have a period of up to five years from the end of the year in which a tax return is submitted to complete the assessment for that tax year. However where the entity has not submitted any tax return, the tax authorities have a period of 10 years to complete the assessments.

**Other issues**

**Exchange controls**
There are no exchange controls on any payments made from Oman.

**Choice of business entity**
Basically there are two common forms of doing business in Oman:

- Subsidiary of a foreign company (up to 70% foreign holding); or
- Branch of a foreign company.

**Mergers and acquisitions (M&A)**
There are no provisions in the tax law concerning M&A. M&A law in general is not well developed.
Significant developments

The following significant developments in corporate taxation occurred in Pakistan in the past two years:

• Remittance of profits by a branch of foreign company engaged in the exploration and production business are excluded from the definition of “dividend”;
• Minimum tax on the revenue of resident companies is reintroduced;
• The administrative structure of Pakistan’s tax authorities was amended – the Income Tax Ordinance 2001, Sales Tax Act 1990 and Federal Excise Act 2005 have been brought in harmony with each other;
• A first year allowance at the rate of 90% is allowed on the cost of plant, machinery and equipment installed for generation of alternate energy and put to use after 1 July 2009;
• Salaried taxpayers with income of more than PKR 500,000 are now required to e-file their returns: and
• Tribunal (second appellate forum) of income tax and sales tax are combined.

Taxes on corporate income

The federal corporate tax rates on taxable income for the tax year ending after 1 July 2007 onwards are as follows:

<table>
<thead>
<tr>
<th>Category</th>
<th>Tax Rate</th>
</tr>
</thead>
<tbody>
<tr>
<td>Banking company</td>
<td>35%</td>
</tr>
<tr>
<td>Public company other than a banking company</td>
<td>35%</td>
</tr>
<tr>
<td>Any other company</td>
<td>35%</td>
</tr>
<tr>
<td>Small company</td>
<td>20%</td>
</tr>
</tbody>
</table>

The term “public company” implies a company listed on any stock exchange in Pakistan or one in which not less than 50% of the shares are held by the federal government or a public trust.

In the case of a modaraba (see Other significant items for a definition), except relating to trading activities, income is exempt from tax, provided that 90% of its profit is distributed to the certificate holders as cash dividends.

The final tax regime (FTR) for resident taxpayers, a presumptive tax scheme where taxes are withheld at the source on the sale of goods, execution of contracts or
collected at the time of import (for other than industrial raw materials) is considered a final tax liability in respect of income arising from the sale, contract or import.

In the case of exports, tax collected at the time of realisation of foreign-exchange proceeds is treated as final tax for that income.

The FTR is also applicable to non-resident taxpayers, at their option. However, it is only applicable in cases of receipts on account of the execution of a contract for construction, assembly or installation, including a contract for the supply of management activities in relation to such project as well as, certain contracts for services and contract for advertisement services rendered by TV satellite channels.

Tax at the rate of 10% is payable on remittance of profits by a branch of a non-resident company to its head office, except for companies engaged in oil and gas exploration and production business.

**Corporate residence**

A company is resident in Pakistan if it is incorporated or formed by or under the law of Pakistan or if the control and management of its affairs is situated wholly in Pakistan in that year. The term “company” includes a trust, a co-operative society, a finance society or any other society established or constituted by or under any law, a corporate body incorporated outside Pakistan as well as any foreign association, incorporated or unincorporated, which the Central Revenue authorities may declare to be a company.

**Other taxes**

**Value-added tax (VAT)**

VAT (locally termed as “sales tax”) is ordinarily levied at 16% on the value of goods, unless specifically exempt, after allowing related input credits. Federal excise duty is levied on certain types of manufacturing, import of goods and rendering of services (telecommunication services are levied at a VAT rate of 19.5%).

In the case of sale or transfer of immovable property, stamp duty is payable (with varying rates on the basis of location of the property) on the value of the property.

**Branch income**

The rates of tax for a branch of a company incorporated outside Pakistan are the same as those applicable on resident companies, other than public and banking companies. Tax at the rate of 10% is levied on the transfer of profits to the head office, with an exception for companies engaged in oil and gas exploration and production business.

Payments to a branch in Pakistan of a non-resident are subject to deduction of tax at the source, on the same basis as a resident in the case of sale of goods, rendering of professional services and execution of contracts. In other circumstances, a reduced/Nil withholding rate certificate can be obtained from the Commissioner of Income Tax.

Pakistan has signed agreements for avoidance of double taxation with over 60 countries.
Pakistan

**Income determination**

**Inventory valuation**
Inventories are to be stated at the lower of cost or market. The first-in, first-out (FIFO) and average methods are accepted. Conformity of methods used for book and tax reporting is desirable, and the method used should be consistently applied.

Depreciation is to be calculated on a reducing-balance method. Extra depreciation is also available in the first year of acquisition of capital asset. However, total depreciation is not to exceed the cost of the capital asset. Depreciation rates are discussed under “Deductions”.

**Capital gain**
Capital gain on the sale of immovable property, on which depreciation is not allowed, is not taxable. Gain on the disposal of shares of a resident company or a non-resident company, whose assets wholly or principally consist of immovable property situated in Pakistan or rights to explore/exploit natural resources in Pakistan, shall be Pakistan-source income. Capital gains on the sale of shares of public companies or modaraba (profit sharing) certificates are exempt from tax up to the assessment year ending on or before 30 June 2010. Capital gain, other than on statutory depreciable assets, realised within one year of acquisition is fully taxed; after one year, 75% of such gains are taxed and 25% are exempt.

Capital gains on statutory depreciable assets (other than immovable property) are chargeable to tax as normal business income in the year of sale. Gains are measured as the difference between the sale proceeds and the tax written-down value of the relevant asset sold.

In the case of an asset disposal transaction that is on a non-arm's-length basis, fair market value of the asset shall be taken to be the consideration received by the seller, as well as the cost for the buyer.

Where assets are transferred outside Pakistan, the original cost is treated as the sale price, which means that the entire depreciation is recaptured at the time of export, except if the assets are used in oil or gas exploration, in which case only the initial depreciation is recaptured.

No gain or loss shall be taken to arise on disposal of an asset by a resident company to another resident company, if certain conditions are met. The required conditions include, inter alia, that the transferor is 100% owned by the transferee or vice versa or both companies are 100% owned by a third company, and the transferee income is not exempt in year of transfer. The scheme of arrangement must be approved by the Securities and Exchange Commission of Pakistan or State Bank of Pakistan.

Any distribution to the shareholders of a company to the extent that it relates to undistributed profits is treated as dividend.

Capital loss can be offset only against capital gains. Unabsorbed capital loss can be carried forward for adjustment against capital gains for six years.
Tax on dividend income

<table>
<thead>
<tr>
<th></th>
<th>%</th>
</tr>
</thead>
<tbody>
<tr>
<td>Public company or an insurance company</td>
<td>10*</td>
</tr>
<tr>
<td>All other cases</td>
<td>10*</td>
</tr>
</tbody>
</table>

*Or lower treaty rate

The above deduction at source shall be a full and final discharge of tax liability on dividend income.

Foreign income

A resident company is taxed on its worldwide income and on its foreign income as earned. Double taxation of foreign income is avoided by means of foreign tax credits; this relief is allowed to the resident company on the doubly taxed income at the lower of the Pakistan or foreign tax rate. Undistributed income of a non-resident subsidiary is not subject to tax.

Stock dividends

Stock declared by resident companies is exempt.

Other significant items

Liabilities allowed as a tax deduction in a tax year and remain unpaid for three subsequent years are deemed to be income in the first tax year following the said three-year period. Such items are then allowed as a deduction in the year the liability is discharged.

Royalties received by non-residents are deemed to accrue or arise in Pakistan and are taxable if paid by a resident in Pakistan or borne by a permanent establishment (PE) of a non-resident in Pakistan.

Income from “fees for technical services” (FTS) is deemed to accrue or arise in Pakistan if paid by a resident in Pakistan or borne by a PE of a non-resident in Pakistan. FTS means any consideration for the rendering of any managerial, technical or consultancy services (including the provision of the services of technical or other personnel), but does not include consideration for any construction, assembly or like project undertaken by the recipient or consideration that would be income of the recipient chargeable under the head salary.

Withholding tax (WHT) on payments of royalty and FTS, when royalty or FTS are not attributable to a PE in Pakistan, is 15% or a lower treaty rate, of royalty or gross fees. The tax withheld would be deemed to be the final tax liability of the non-resident. In the case of a non-resident where royalty or FTS is attributable to a PE in Pakistan, the amount of royalty/FTS shall be chargeable to tax as normal income, and withholding on payments can be avoided subject to approval of the commissioner. If a reduced rate is available in a tax treaty, such rate would be applicable.

Modaraba (profit sharing) is a financing vehicle which enables a management company to control and manage the business of a modaraba company with a minimum of 10% equity participation. The management company is entitled to remuneration based on an agreed percentage (but not exceeding 10%) of annual profits of the modaraba business. A modaraba can be for a specific purpose or many purposes and for a limited or unlimited period. The income of a modaraba not relating to trading activity is free from tax, if 90% of its profits are distributed as a cash dividend.
Agricultural income is exempt from income tax.

**Deductions**

**Pre-commencement expenditure**
Expenditure incurred before the commencement of a business wholly and exclusively to derive income chargeable to tax can be deducted over a period of five years.

**Intangibles**
The cost incurred on acquisition of a patent, invention, design or model, secret formula or process, copyright, software, quota, license, intellectual property or other like property or rights and any expenditure that provides an advantage or benefit for a period of more than one year is allowed as deduction on a straight-line basis over the useful life of the asset, but not exceeding a period of 10 years.

**Depreciation**
Normal depreciation is allowed at the following prescribed rates by applying the reducing-balance method.

<table>
<thead>
<tr>
<th>Assets</th>
<th>%</th>
</tr>
</thead>
<tbody>
<tr>
<td>Buildings</td>
<td>10</td>
</tr>
<tr>
<td>Furniture</td>
<td>15</td>

<td>15</td>
</tr>
<tr>
<td>Computer hardware, including monitors and printers</td>
<td>30</td>
</tr>
<tr>
<td>Aircraft and aero engines</td>
<td>30</td>
</tr>
<tr>
<td>Below-ground installation in mineral oil concerns</td>
<td>100</td>
</tr>
<tr>
<td>Offshore platform</td>
<td>20</td>
</tr>
</tbody>
</table>

All depreciable assets put into service for the first time in Pakistan during a tax year – other than road transport vehicles not plying for hire, furniture including fixtures, plant and machinery used previously in Pakistan or plant and machinery for which deduction has been allowed under another section of this ordinance, for the entire cost of the asset – shall be entitled to an initial allowance at 50% of the cost of the asset.

Book depreciation need not conform to tax depreciation. Unabsorbed tax depreciation not set-off against the income of the year is carried forward and added to depreciation of the assets of the same business in the following year. Tax depreciation can be carried forward without limit until fully absorbed.

**Net operating losses**
Operating loss may be carried forward and set-off against the profits of the succeeding six years of the same business in which the loss was incurred. Unabsorbed depreciation can be carried forward indefinitely.

Carried forward loss of an entity in the case of group relief cannot be utilised if the ownership of the holding company is reduced to less than 55% and 75% if one of the companies is a listed company or none of the companies is a listed company, respectively.
Business loss can be carried forward up to a period of six years in the case of the amalgamation of two companies, with the condition that the same business is continued for a minimum period of five years.

Carryback of loss is not permitted.

**Taxes**
Taxes on income are not deductible. Sales tax and excise tax are tax-deductible.

**Other significant items**
The deductibility of a head office expenditure of a non-resident taxpayer is limited to the same proportion of total head office expenditure as the Pakistan turnover has with the total world turnover. However, such domestic rules are overridden if the branch is a tax resident of a country having an agreement for avoidance of double taxation (treaty) and that treaty provides a different basis.

Expenditure on scientific research incurred in Pakistan wholly and exclusively for the purpose of deriving income chargeable to tax is an allowable expenditure.

Exchange gains and loss on foreign currency loans specifically obtained for acquiring an asset are adjusted against the depreciable cost of the asset.

Any lease rental incurred by a person in the tax year to a scheduled bank, financial institution, approved modaraba or approved leasing company shall be a deductible expense. However, financial charges paid for the above-mentioned leases are added back into the taxable income of the company.

**Group taxation**
A locally incorporated holding company and subsidiary of a 100% owned group may be taxed as one group by giving an irrevocable option for taxation as one fiscal unit. The relief is not available for losses prior to formation of the group. The group is available if the companies are designated as entitled to avail group relief by the Securities and Exchange Commission of Pakistan.

Any company that is the subsidiary of a holding company may surrender its loss for the year to its holding company or its subsidiary, or between another subsidiary of the holding company, provided that the holding company holds directly 55% or more capital of the subsidiary, if one of the companies is a listed company. However, if none of the companies is a listed company, the holding requirement is 75% or more. The loss can be surrendered for a maximum of three years and the required holding is for at least five years.

**Tax incentives**
Any tax relief from Pakistani income tax, which is provided in any other law and not provided for in the Income Tax Ordinance or the treaty, is not valid.
Pakistan

**Inward investment and capital investment**
Incentives are available as follows:

- Profits and gains derived from an electric power generation project set up in Pakistan are exempt;
- Profits and gains derived by a company from the export of computer software, IT services or IT enabled services are exempt through to 30 June 2016; and
- Profits and gains derived by a joint venture capital company registered under the Venture Capital Companies and Funds Management Rules 2000, between 1 July 2000 and 30 June 2007, are exempt.

**Small companies**
Incorporation of companies as small businesses is encouraged. A small company has been defined to mean a company which:

- Is registered on or after 1 July 2005 under the Companies Ordinance of 1984;
- Has a paid-up capital plus undistributed reserves not exceeding PKR 25 million;
- Has an annual turnover not exceeding PKR 250 million; and
- Is not formed by splitting up or the reconstitution of business already in existence.

Income is taxed at a special rate of 20%.

**Withholding taxes (WHT)**

Resident corporations paying certain types of income must withhold as follows:

<table>
<thead>
<tr>
<th>Recipient</th>

Notes

1. This table is a summary only and does not reproduce all the provisions that may be relevant in determining the application of WHT in each tax treaty.
2. Resident and non-resident imply tax status.
3. Individuals and companies are required to render annual returns of income and pay tax at the applicable rates. Credit is given for WHT deducted.
4. Withholding rates for interest and royalties given to non-resident corporations (treaty countries) also apply to non-resident individuals.
5. The withholding rate for companies would be 30%.
6. The following remarks for dividends should be noted:
   a. The intercorporate rate of tax on dividends received by a foreign corporation is 10%; corresponding, treaty withholding rates in excess of 10% have been specified;
   b. The rates given in the table for treaty countries relate to recipient corporations. The maximum rate, as stated above, in respect of intercorporate dividends is 10%. The lower rates are expressly provided in respect of dividends paid to a parent/associated
corporation that has a certain minimum holding in a Pakistan industrial undertaking. The level of holding are noted:

<table>
<thead>
<tr>
<th></th>
<th>%</th>
</tr>
</thead>
<tbody>
<tr>
<td>Japan</td>
<td>33.33</td>
</tr>
<tr>
<td>United States</td>
<td>50</td>
</tr>
</tbody>
</table>

7. Certain treaties provide for tax exemption of interest paid to the government or the central bank of the contracting state and on foreign loans specifically approved by the federal government.
8. No concession is provided under the treaty.
9. A fair and reasonable consideration for royalties is exempt from tax, provided the recipient does not have a PE in Pakistan.
10. Intercorporate dividend where companies are entitled to group relief is exempt.

**Tax administration**

**Returns and assessment**
All companies are required to file an income tax return each year by 31 December for the preceding financial year (1 July through to 30 June) by accounting for business income on accrual basis. Tax authorities are empowered to approve a special year-end. If the special year ends on 31 December, then the tax return is required to be filed by 30 September following the year-end.

An across-the-board self-assessment scheme is in place whereby assessment is taken to be finalised upon filing of the return. The Commissioner, however, has powers to amend the assessment if he believes the ordinance has been incorrectly applied or otherwise has definite information that the assessment made is incorrect. These powers are to be exercised within a prescribed time frame. In the case of transactions between associates/related parties, the Commissioner can substitute the transaction value with the fair market consideration. The Commissioner is also empowered to determine tax liability according to the substance of the transaction, disregarding formal arrangements between the parties.

**Payment of tax**
Companies are required to pay advance tax on the basis of tax liability of the immediately preceding tax year in respect of their income (excluding capital gains and presumptive income). The advance tax is to be paid after adjusting the taxes withheld at source (other than the tax withheld relating to final tax regime).

Advance tax is required to be paid in four quarterly instalments on or before 15 October, 15 January, 15 April and 15 June in each financial year. Credit for tax paid in a tax year shall be allowed against tax liability of that year.

The total tax liability is to be discharged at the time of filing the return of income.

Advance taxes and taxes withheld are adjustable against the tax payable with the return of income.

Significant developments
Significant developments on taxation issues, mostly initiated after the second quarter of 2009, have taken place under the new Panamanian government of President Martinelli’s Administration.

Panama has totally changed its international taxation policy, and plans to sign 12 double taxation treaties in 2010. Currently, tax treaties with Mexico, Italy and the Netherlands have been signed.

The National Deputies Assembly also passed three laws amending tax matters: Law No. 49 of 2009, Law No. 69 of 2009 and Law No. 8 of 2010.

Taxes on corporate income
As of 1 January 2010, corporations are subject to income tax at a fixed rate of 27.5%. Beginning in 2011, this rate will be reduced to 25%. Certain businesses and the related parties that render services to them will be subject to a 30% tax rate until 31 December 2011. Beginning on 1 January 2012 this tax rate will be reduced to 27.5%, and from 1 January 2014 will be reduced even further to 25%.

The higher tax rate (i.e., the 30% rate) applies to either the generation or distribution of energy; telecommunication services in general; insurance; reinsurance; financial institutions regulated by Law No. 42 of 2001; cement industries; the operation and management of gambling games; mining in general and entities dedicated to banking activities in Panama.

For companies in which the State owns more than 40% of the stock the tax rate will remain at 30%.

The tax base (amount to which the tax rate will apply) for companies whose taxable income is greater than USD 1,500,000 will be the greater of:

- Net taxable income calculated on the normal basis, or
- 4.67% of the gross taxable income (excludes exempted and non-taxable income and foreign-source income) – this is called the Alternate Calculation of Income Tax (“Calculo Alternativo del Impuesto sobre la Renta” or CAIR).
Panama

If the entity’s tax year results in a loss due to the alternative calculation, the taxpayer may request to the Tax Administration (the General Directorate of Revenues, i.e., DGI or “Dirección General de Ingresos”) not to be subject to the CAIR.

The taxpayer may also request not to apply the CAIR if its effective income tax rate is higher than the applicable income tax rate.

The DGI has a six-month period within which to reach a decision on the request, otherwise the petition will be considered as granted.

**Corporate residence**

A company is considered as a tax resident when it has been incorporated in Panama, regardless of where the main office is located or whether central management is exercised in Panama or abroad. Entities incorporated abroad may also be registered with the Tax Administration in order to avoid withholdings.

Since the Panamanian income tax is levied based on the territoriality principle, Panamanian income is subject to taxation whether it is received by a resident or non-resident entity. Residency is only relevant to determine if the entity is subject to withholding or not.

Panama does not have permanent establishment rules.

**Other taxes**

**Franchise tax**

Franchise income tax must be paid by all corporations on an annual basis. The deadline for payment depends on the date of incorporation of the company. If the company was incorporated on any date between the first six months of the year, the due date for payment will be on 15 July of each year. If it was incorporated in the last six months, the due date will be 15 January of each year.

Non-profit organisations, cooperatives and civil partnerships are not subject to franchise tax.

**Movable goods and services transfer tax (ITBMS)**

The movable goods and services transfer tax (ITBMS) is the Panamanian value-added tax (VAT).

The general tax rate is currently 5% but will increase to 7% after 30 June 2010.

Alcoholic beverages are taxed at 10% and tobacco and tobacco-derived products are taxed at 15%.

ITBMS is calculated on the value-added through a method of tax credits (ITBMS paid on transactions to produce taxable transactions) and tax debits (ITBMS collected on transactions).

Exports are not taxed and the ITBMS paid to generate the exports may be refunded. The sale of goods such as medicines, foods, and certain products for babies are not
taxed, and may allow the supplier to recover the ITBMS as an exporter if certain criteria is met.

Medical services and transportation among other services are not taxed, but do not produce ITBMS credit for the supplier.

**Excise tax (selective consumption tax)**
The selective consumption tax is applied to goods (jewellery, expensive automobiles, guns, tobacco, alcoholic beverages, etc.) and services that are considered as non-essential (mobile, cable TV or satellite TV). The tax base is the cost, insurance and freight (CIF) price plus import duties for imported items and sales price for all other activities. The tax is levied at only one stage: on the importation of the taxed products, the sale of taxed goods produced in Panama, and for services, it may be levied at the time when the service is invoiced, the service is completely rendered or upon receipt of advance payments, whichever first occurs.

Different tax rates apply depending on the type of service or good, with a minimum of 5% on sodas and 100% on tobacco products.

**Custom duties**
All goods introduced into the Panamanian territory from another country are subject to customs duties. The duty rates are provided by the Panamanian Customs and Tariffs Office.

Customs duties may only be assessed by authorised customs brokers.

**Local municipal tax**
Local municipal tax is charged, depending on the gross income generated by the business through the corresponding accounting period; it will also depend on the type of activity being conducted by the corporation. In most cases, it cannot exceed USD 1,000 per month for each activity performed.

**Operations notice tax**
The notice of operations is an annual tax on equity at a rate of 2%, with a minimum tax amount of USD 100 and a maximum tax amount of USD 60,000.

The tax base is the outcome from total assets less total liabilities (excluding liabilities with related parties abroad).

**Stamp duty**
Stamp duty is charged at a rate of USD 0.10 per USD 100 (or fraction thereof) of value on non ITBMS taxed transactions.

**Branch income**
For tax purposes, branches are considered separate entities from the Head Office and must therefore keep accounts separately and will have separate tax liability.

Branches located within the Panamanian territory must pay dividend tax through definitive withholding of 10% over 100% of net taxable income generated by the Panamanian branch, less all income taxes paid by the same corporation in Panama. This amount will be paid jointly on filing the corresponding income tax return.
Panama

**Income determination**

**Tax base**
Taxable income is determined by deducting from the Panamanian source income all costs, expenses and non-taxable income applicable and permitted by law. The deductibility of costs and expenses depend on the relation of such costs and expenses with the generation or preservation of income source. Special restrictions will apply to the following:

- Bad debts;
- Depreciation; and
- Donation.

Costs and expenses related to non taxable income are not considered as deductible. Thus, the taxpayer must split the expenses and costs related to taxable transactions from those related to non-taxable transactions. As of 1 July 2010 the expenses and costs allocated to taxed transactions may not exceed the amount from multiplying the portion of taxable income from the total income, by the total costs and expenses. The following deductions are not subject to the deductions cap: deductions on bad debts, donations to the State and non-profit organisations and education institutions (limited to 1% of the taxable income).

In the specific case of companies whose gross taxable income is greater than USD 1,500,000, the tax base will be the greater of the outcome of the aforementioned method or 4.67% of gross taxable income. The taxpayer may request not to pay based on his gross income, in which case the Tax Administration shall grant approval. See corporate tax for CAIR exemption process.

**Inventory valuation**
Inventory should be valued at the start of any business and subsequently at least once every accounting period. All assets must be put together, depending on their nature and indicate different aspects such as: the unit of measurement, the name of the asset, the price of the unit and the total value of units. It shall also include the reference to the accounting records.

Inventories are generally stated at cost and can be valued using the compound average cost method, first-in, first-out (FIFO) method, retailer method, or specific identification method. Since all entities must keep legal records, any adjustment resulting from using different methods of inventory valuation for tax purposes and financial purposes should be recorded and must be reported to the proper authorities. Once a taxpayer adopts a method, they must maintain it for up to five years.

**Capital gains**
The transfer of real estate property and securities is subject to withholding on the gross transactions amount, but the taxpayer may make a special income tax assessment to pay over the capital gain and may request a rebate of the difference between the withholding and the capital gain.

In the case of the transfer of real estate property the withholding rate is 3% (over the gross transaction amount, or the cadastral value, whichever is greater) and the tax rate on the capital gain is 10%. If the transfer of real estate properties is part of the taxpayer's business, there would only apply a 3.75% tax over the gross transaction or
the cadastral value. An additional 2% property transfer tax (non income tax) applies on the gross transaction amount, or the adjusted cadastral value, whichever is greater.

The transfer of securities is subject to a 5% withholding and the tax rate on capital gain is 10%.

The sale of fixed assets is subject to 10% on the capital gain, and there is no withholding tax.

**Inter-company dividends**
The distribution of dividends derived from income received as dividends from other entities is not subject to income tax or dividend tax as long as the entity that paid the dividend in the first instance was exempt from withholding any dividend tax, or if it was required to, made the corresponding withholding.

**Foreign income**
As stated previously, Panamanian resident companies are taxed on their income generated within the Panamanian territory. Any other income generated abroad will be exempt from income tax payment, but may be subject to dividend tax.

**Dividends**
Panamanian legislation establishes that distribution of dividends is subject to definitive withholding, applied at the moment of distribution. Generally dividends are subject to income tax at a rate of 10% rate without taking into consideration the form of payment, types of stock, assets or money.

Dividend tax applies at a 5% rate on dividends paid from foreign source income, from income derived from exports, as well as exempt income from banking account interests and interests and earnings derived from securities issued by the government.

Free zone users are taxed at a 5% rate as well for local source income.

Notwithstanding the aforementioned, if the entity's shares are issued to bearer they will be subject to dividend tax at a rate of 20%.

Dividend tax is not levied if the entity meets one of the following: (a) does not require an operation permit to operate in Panama, (b) does not require an operation key to operate at the Colon Free Zone; (c) is not established in a Petroleum Free Zone; (d) is not established in a free zone or special zone; (e) does not produce Panamanian-source taxable income. Dividend tax also does not apply to dividends paid on income received as a dividend if the entity is not required to withhold dividend tax or if the entity withheld the tax.

A complementary tax applies each tax year that the entity distributes less than 40% of the net profits after income tax. The complementary tax is an advance payment of the dividend tax, calculated on the difference of the distributed dividends and 40% of the net profits after income tax and applies the corresponding tax rate. If complementary tax is paid, when the corresponding dividend is decreed, the entity may offset the paid complementary tax with the dividend tax.
Deductions

Depreciation and depletion
The straight-line and sum-of-the-years-digits methods of depreciation are allowed.

<table>
<thead>
<tr>
<th></th>
<th>% Straight-line</th>
</tr>
</thead>
<tbody>
<tr>

<td>33% as maximum</td>
</tr>
<tr>
<td>Vehicles</td>
<td>33% as maximum</td>
</tr>
</tbody>
</table>

In the case of mines, depletion will be deductible during its useful life or depending on the state contract methodology.

Net operating losses
Losses incurred by common taxpayers may be carried forward and deducted from the taxable profits for the following five years, at a rate of 20% each year, but limited to 50% of taxable income. Loss carrybacks are not allowed. And, losses are not allowed for estimated income tax purposes.

Payments to foreign affiliates
A payment to a foreign entity (including affiliates) in a foreign country will be subject to withholding tax, anytime it represents a cost or expense for the payer. The tax base will be 50% of the remittance and the income tax rate applicable is 27.5%.

Taxes
All income received by foreign entities or corporations located outside Panama, from the performance of any act or service which benefits any person located within the Panamanian territory, (which includes but is not limited to the following: copyrights, royalties, trademarks, patents, know-how, scientific and technological knowledge) will be considered as taxable income generated within the Panamanian territory. Any time these services have a direct effect on the generation of income in Panama, its value has been considered a deductible expense by the person who incurred the expense.

Under the territoriality principle, the following will not be considered as taxable income: all income produced outside Panama, all income generated from operations or services performed outside the Panamanian territory, distribution of dividends from income not generated within the Panamanian territory.

The tax will be calculated by multiplying the corresponding tax rate by 50% of remittances.

Group taxation
In Panama there is no group taxation.

Tax incentives
Free zones
Entities established in free zones may enjoy exemption from import duties on goods, income tax, sales tax, export tax, selective consumption tax derived from royalties on
exportation and re-exportation activities. However these incentives may be affected by the World Trade Organization (WTO) rules.

**Incentives for exporters**
Export Process Zones: Special benefits exist for industries that import semi-manufactured materials for assembly in Panama and export finished products. Benefits consist of duty-free import of raw materials for subsequent export as manufactured products and exemption of income tax. Machinery for these industries may also be imported duty-free. However, these incentives may be affected by the World Trade Organization (WTO) rules.

**Tourism, industry and agriculture allowances**
The Incentive Law for Tourism Development grants several tax benefits, such as exemption from import duties on certain tourism services, related goods, and from property tax for companies dedicated to tourism, but only for those corporations with a signed tourism agreement with the government. Income tax exemptions may apply in special cases.

In general, income from individuals or corporations that engage in agricultural production activities will be exempted from income tax if annual gross income is lower than USD 250,000.

Forestry plantations are totally exempted from income tax payment until 2018 if the lot planted has been duly registered at the Forestry Registry of the Environmental National Authority and resolution with approval from this authority has been issued.

**Special laws**
The Panamanian government has enacted special laws regarding tax exemptions for certain activities performed in Panama such as call centres (Law No. 54 of 2001) and tax exemptions for certain appointed areas such as the Panama Pacific Economic Zone (Law No. 41 of 2004) and Law No. 41 of 2007 which creates a special regime for the establishment and operation of Regional Headquarters in Panama.

**Withholding taxes (WHT)**

**Payment to entities abroad**
Royalties and commissions on services paid to foreign entities are taxed through the application of the corresponding tax rate (generally 27.5%) over 50% of remittance under the concept of withholding tax (effective tax rate is 13.75%). The taxpayer may decide not to withhold taxes, and consequently not deduct the expense.

Payment of interest is also subject to income tax on 50% of the interest paid to a beneficiary abroad on loans invested in the Republic of Panama, but the payer must proceed with the withholding even if he does not deduct the interest.

If the beneficiary is registered as a taxpayer in Panama before the Tax Administration, no income tax withholding may be required.

Panama

**Tax administration**

**Returns**
The accounting period is the period for which the company makes its accounts. Returns shall be made upon completion of the accounting period and may not exceed 12 months. For most companies it is usually from 1 January to 31 December.

**Payment of tax**
Income tax payment shall be made depending on the income tax return, and shall be made no longer than three months after closing of the corresponding accounting period.

Additionally, taxpayers must pay estimated taxes (usually the same amount as generated income), at the sixth, ninth and twelfth month after the end of the corresponding accounting period.

As of 1 January 2011 no estimation will be made, but the taxpayer will have to pay 1% of its monthly gross income as an income tax advance payment. The taxpayer will have to file monthly income tax returns assessing the advance payment within the next 15 days following the end of the month. VAT on purchases may be offset against this advance payment if the taxpayer is a seller in the local market of pharmaceutical products or food and meets certain criteria.

**Statutes of limitation**
The statute of limitation depends on the type of tax. The Tax Administration may audit the income tax returns filed within the last three years from the last day of the year on which the tax return was filed. The statute of limitation for the ITBMS is five years.

Significant developments

Papua New Guinea’s 2010 National Budget was handed down on 17 November 2009; however, no corporate taxation changes were announced.

It has been reported that Papua New Guinea (PNG) is in the process of entering into a double taxation treaty (DTT) with Indonesia, although the terms of the DTT are currently unknown.

Taxes on corporate income

PNG resident companies are liable for income tax on their income from all sources. Trading profits and other income of resident companies (except income which is specifically exempt) are liable for PNG income tax at the following rates:

<table>
<thead>
<tr>
<th>Income category</th>
<th>Resident company</th>
<th>Non-resident company</th>
</tr>
</thead>
<tbody>
<tr>
<td>Income other than income from mining, petroleum or gas operations</td>
<td>30%</td>
<td>48%</td>
</tr>
<tr>
<td>Income from petroleum operations – existing projects</td>
<td>50%</td>
<td></td>
</tr>
<tr>
<td>Income from petroleum operations – new projects</td>
<td>45%</td>
<td></td>
</tr>
<tr>
<td>Income from petroleum operations – incentive rate projects</td>
<td>30%</td>
<td></td>
</tr>
<tr>
<td>Income from mining operations</td>
<td>30%</td>
<td></td>
</tr>
<tr>
<td>Income from gas operations</td>
<td>30%</td>
<td></td>
</tr>
</tbody>
</table>

Most resident companies are also liable for dividend withholding tax (DWT) at a rate of 17% on dividends paid by the company. This is reduced to 10% where a dividend is paid by a company carrying on mining operations. Dividends paid out of assessable income from petroleum or gas operations are not subject to DWT.

A foreign tax credit may be available to offset foreign tax paid against PNG tax payable. The foreign tax credit is limited to either the foreign tax paid or the average PNG tax payable on that foreign income, whichever is less.

Non-resident companies are generally taxed only on their PNG sourced trading income. A non-resident’s PNG sourced passive income, including dividends, interest and royalties, is generally only subject to withholding tax. The payer of the dividend,
interest or royalty must withhold the relevant amount of the tax and remit this to PNG’s Internal Revenue Commission (IRC).

Companies are assessed for income tax separately whether or not they are part of a group of associated or related companies. Losses of one company within a group cannot be offset for tax purposes against the profits of another company within that group.

The Companies Act allows two or more companies to amalgamate and continue as one, and provisions are in place to allow this to occur without any adverse income tax consequences.

**Corporate residence**

A company is deemed a resident for income tax purposes if it is incorporated in PNG. A company incorporated outside PNG that trades in PNG and has its voting power controlled by resident shareholders, or has its central management and control in PNG is also considered a resident. What constitutes central management and control is a question of degree and fact, and it exists where the directors meet to do the business of the company. This may be divided between two places, in which case the company will be resident in both places.

**Incorporation test**

A company incorporated in PNG is automatically regarded as a PNG tax resident. However, the operation of the law of another country and a relevant tax treaty may result in a company also being treated as resident in another country.

**Management and control test**

A company is a PNG tax resident if it is managed and controlled in PNG, regardless of where it is incorporated. Generally, a company is managed and controlled in PNG if key decisions affecting the company are made at directors’ meetings held in PNG.

An entity may be a tax resident of both PNG and another country by application of domestic legislation. A DTT entered into between PNG and another country may contain a tiebreaker test to determine the country of residence for the purposes of the DTT.

**Other taxes**

**Goods and services tax**

The goods and services tax (GST) rate is 10% and applies to most goods and services supplied in PNG. Exported goods and services attract a zero rate of GST. Goods and services, other than motor cars, supplied to mining, petroleum or gas companies are also zero-rated. Some goods and services are exempt, including medical, educational and financial services. Land is excluded from GST, but buildings and other improvements are subject to the tax.

**Customs and import duties**

The majority of manufacturing inputs (including plant and machinery) attract no duty and other duty rates are being progressively reduced. The remaining rates of duty are currently 15%, 25% and 40%. Although duty is now minimal in many cases, some goods – most notably motor vehicles – now attract excise tax. Private motor vehicles
generally attract excise at the rate of 60%, whereas work vehicles attract excise of 10%. Customs bonds may be issued for the temporary importation of goods that are to be re-exported within 12 months.

**Export duty**
Export duty on timber logs (not sawn timber) is based on US dollar values.

**Stamp duties**
Stamp duty applies at varying rates on documents and certain transactions. Of particular note is duty charged on the conveyance of property, which rises to a maximum of 5% where the value of the property being transferred exceeds PGK 100,000. The duty is payable by the purchaser and a 5% duty on the unencumbered value of land may also be payable where there is a transfer of shares in certain landholding companies.

Other dutiable transactions include share transfers (including some share buy-backs) which are subject to a rate of 1%. The Collector of Stamp Duties has the power to amend assessments and refund overpayments of stamp duty.

Stamp duty is payable on documents executed outside PNG which relate to property or matters done or to be done in PNG.

**Gift duty/probate duty**
There is neither gift nor probate duty in PNG. However, stamp duty may be levied on certain gifts.

**Contributions to employee superannuation funds**
Contributions to employee superannuation funds are compulsory for entities with 15 or more permanent employees. The employer’s compulsory contribution is 8.4% of each employee’s gross basic salary. The employee’s minimum contribution is 6.0%.

Membership is generally compulsory for citizens. Non-citizens are currently exempt, although this exemption may cease to apply in May 2010 (but is under continuing review).

Contributions must be paid to an authorised superannuation fund. Contributions paid to an authorised fund are tax-deductible to the extent that they do not exceed 15% of the relevant employee’s gross taxable salary. Contributions to non-resident funds are not tax-deductible.

**Training levy**
All businesses whose annual payroll exceeds PGK 200,000 are subject to a 2% training levy, calculated on the sum of the taxable salaries, including benefits, of all personnel. Qualifying expenses incurred in training PNG citizen employees are creditable up to the actual amount of the levy. The training levy, if payable, is not tax-deductible.

**Land tax**
Land tax is imposed by provincial governments on the unimproved value of the land. The power to levy land tax is vested exclusively with the provincial governments. In PNG, land tax is difficult to implement and faces major geographical and social problems.
Papua New Guinea

**Departure tax**
A departure tax is collected by airlines issuing tickets for persons departing PNG.

**Gaming machine tax**
PNG imposes a 74% tax on gross revenue from gaming machines.

**Spice export levy**
Levies are imposed from time to time on the export of specified spices (e.g., vanilla).

**Resource project production levies**
Production royalties of 2% are payable to the national government on the net smelter return from mining operations. These royalties are tax-deductible. A royalty, at the rate of 2% of the wellhead value, is payable from the production of petroleum and gas operations. Holders of new petroleum development licences are entitled to treat royalties as income tax paid. However, new petroleum projects will also pay a tax-deductible development levy calculated at the same rate of 2% of the wellhead value.

Mining projects are also required to pay a production levy to the Mineral Resources Authority calculated at a rate between 0.25% and 0.5% of the assessable income from production.

**Branch income**
Income derived by a non-resident contractor for services in PNG is usually subject to a withholding tax at the rate of 12% of the gross income. This amount is calculated on a deemed taxable income of 25% of the gross contract income, which is taxed at the foreign contractor tax rate of 48% (subject to tax treaties). The provisions extend to payments for the following:

- The installation, maintenance and use in PNG of substantial equipment or machinery;
- Construction projects;
- For the lease or charter of any industrial, commercial or scientific equipment or any machinery or vehicle; and
- Consultancy or management services.

Where the non-resident contractor rules do not apply, the non-resident company will be subject to income tax at the foreign contractor tax rate of 48% on its PNG sourced taxable income.

PNG branch remittances are not liable to DWT or any branch profits or similar tax.

**Income determination**
Taxable income is defined as the sum of assessable income minus the allowable deductions. In practice, profits are calculated for tax purposes by reference to the profits reported in the financial accounts. Accounts must be prepared in accordance with PNG accounting principles, which follow the International Financial Reporting Standards.
Inventory valuation
There is no form of stock relief or trading stock valuation adjustment to recognise the effects of inflation in PNG. There is a once-only option to adopt the lowest of the cost amount, the market selling value or the replacement value. Where the option is not exercised the value of the stock is deemed to be the cost price. However, in special circumstances the Commissioner General of Internal Revenue may accept a lower valuation.

Capital gains
There is no general capital gains tax in PNG. However, profits arising on the sale of property acquired for the purpose of resale at a profit, or from the carrying out of a profit-making scheme, are taxable as ordinary income.

Inter-company dividends
Dividends received by a resident company from other companies whether resident or non-resident, while being assessable to tax, are generally subject to a full tax rebate and are effectively received tax-free. However, where a company has losses on other activities or losses carried over from earlier years, those losses are applied against dividend income before the calculation of the dividend rebate.

Subject to the provisions of PNG’s DTTs and the domestic law, DWT at the rate of 17% tax must be withheld from dividends paid by resident companies. The DWT applies to all dividends paid by a resident company, including dividends derived from sources outside PNG and certain deemed dividends. The rate is reduced to 10% where a dividend is paid by a company carrying on mining operations. Dividends paid out of assessable income from petroleum or gas operations are not subject to DWT.

The DWT on dividends received is available as a credit to the recipient company for up to seven years. Therefore, when an additional dividend is paid, no further withholding tax should be payable.

Foreign income
PNG resident companies are liable to income tax on their income from all sources (i.e., including foreign sourced income). A foreign tax credit may be available to offset foreign tax paid against PNG tax payable. The foreign tax credit is limited to the lesser of the foreign tax paid or the average PNG tax payable on that foreign income.

Stock dividends
In most cases, the payment of a dividend by way of the issue of shares is subject to the same taxation treatment as the payment of a dividend by way of cash or the distribution of other property.

Dividends paid wholly and exclusively out of profits arising from the sale or revaluation of assets not acquired for the purpose of resale at a profit where those dividends are paid by the issue of shares are exempt from income tax and DWT.

Deductions
General deduction provisions provide that all losses and outgoings, to the extent incurred in gaining or producing the assessable income or are necessarily incurred in carrying on a business for the purpose of gaining or producing that income, are allowable deductions. However, the general deduction provisions do not allow a
Papua New Guinea

deduction to the extent a loss or outgoing is an outgoing of capital, or of a capital, private or domestic nature, or incurred in relation to the gaining or production of exempt income.

**Depreciation and depletion**
Depreciation is allowed for equipment and other assets at prescribed rates. A taxpayer must use the diminishing value method unless an election is made to use the prime cost method. The applicable diminishing value rates are 150% of the prime cost rates.

**Plant, machinery and equipment**
Plant, machinery and equipment (including buildings) are depreciable at rates according to their estimated lives. A taxpayer other than a taxpayer who derives income from mining, petroleum or gas operations may elect to claim special accelerated depreciation rates for certain capital items. For example, flexible depreciation rates (up to 100%) may be claimed on new industrial plant with a life exceeding five years that is used for manufacturing purposes. Other new plant and articles used in manufacturing, construction, transport, storage, communication, and agricultural production are eligible for an accelerated deduction equal to 20% of cost price in the year of purchase. New plant and articles used for tourism are eligible for an accelerated deduction equal to 55% of cost price in the year of purchase.

**Motor vehicles**
Motor vehicles are generally depreciable at 20% prime cost. There is no upper limit in value for depreciation purposes.

**Buildings**
Buildings forming an integral part of plant, machinery and equipment are depreciable at a prime cost rate of up to 7.5% depending on the construction materials. Buildings housing plants eligible for the one-year write-off deduction (see comments on new industrial plant above) can be written off in the year of construction. Other income producing buildings may qualify for the accelerated deduction of 20% in the year of purchase.

**Agricultural and fishing plants**
Most items of new agricultural and commercial fishing plants qualify for 100% depreciation as do boats and ships, including ancillary equipment, used solely as dive boats or for scuba diving by accredited tour operators. Other new items having a life exceeding five years used by a person carrying on agricultural operations are eligible for accelerated depreciation in the initial year of use.

**Net operating losses – domestic**
Trading losses may be offset against all income received in the same accounting period or carried forward and offset against future trading profits. The limitation period on the carryforward of losses is generally 20 years. Losses may not be carried back against prior years’ profits. Primary production losses and resource project losses may be carried forward without a time limitation, although again they may not be carried back. The carryforward of losses is subject to a 50% or more continuity of shareholding and control test, or a continuity of business test where there is a breach of the ownership test.
Net operating losses – foreign
Losses incurred by a resident taxpayer from a source outside PNG (other than in relation to export market development) are not deductible against assessable income derived within PNG. In practice, overseas losses can be carried forward and offset against overseas income for up to 20 years.

Payments to foreign affiliates
The deduction available to a taxpayer for management fees paid to an associated person is limited to the greater of:

1. 2% of assessable income derived from PNG sources by the taxpayer; or
2. 2% of the total allowable deductions, excluding management fees incurred by the taxpayer in PNG.

The limitation applies to both resident and non-resident taxpayers. Special rules apply to mining, petroleum and gas companies. These limits may not apply where the recipient of the management fee is resident in a country with which PNG has a DTT or where it can be demonstrated that the management fee arrangements do not have the purposes or effect of avoiding or altering the income tax payable in PNG.

PNG also has transfer pricing provisions that require transactions with foreign affiliates to be conducted on an arm’s-length basis.

Taxes
A deduction is not allowable in respect of payments of income tax or training levy. Other taxes may be deductible subject to meeting the general principles for deductibility.

Double deductions
An additional amount equal to the actual amount of expenditure incurred is deductible in respect of certain expenditures (e.g., export market development costs, some staff training costs and certain donations). In other words, a “double deduction” is available in respect of these items.

Primary production
Outright deductions are allowed for certain capital expenditures including clearing, preparing or conserving land for agriculture, eradicating pests, providing labourers’ accommodation and for the conservation and conveyance of water.

In addition, a 100% deduction is available for a new plant used directly for the purposes of agricultural production and an initial 20% accelerated depreciation deduction is allowed for a new plant with a life exceeding five years.

Losses incurred in carrying on a primary production business can be carried forward indefinitely; they are not restricted to the 20-year limit that generally applies to company tax losses.

A 150% deduction is available for expenditures on services provided free of charge to smallholder growers, including the provision of advice, training and technical assistance in relation to primary production to assist growers with production, processing, packaging and marketing issues.
Papua New Guinea

Research and development (R&D)
A 150% deduction is available for expenditures on R&D. The deduction is available to all sectors of the economy. Broadly, R&D expenditures are defined as systematic, investigative and experimental activities that involve innovation or a high degree of technical risk carried out for the purpose of acquiring new knowledge, or creating new or improved materials, products, devices, processes or services.

Group taxation
Companies are assessed for income tax separately regardless of whether they are part of a group of associated or related companies. Losses of one company within a group cannot be offset for tax purposes against the profits of another company within that group.

The Companies Act allows two or more companies to amalgamate and continue as one, and provisions are in place to allow this to occur without any adverse income tax consequences.

Tax incentives

Manufacturers’ wage subsidy
Certain companies manufacturing new products are eligible for a subsidy based on a percentage of the relevant minimum wage of full-time citizen employees. The subsidy is taxable and available over a five-year period with a reduction in the relevant percentage each year.

Research and development (R&D)
A 150% deduction is available for expenditures on R&D. The deduction is available to all sectors of the economy. Broadly, R&D expenditures are defined as systematic, investigative and experimental activities that involve innovation or a high degree of technical risk carried out for the purpose of acquiring new knowledge, or creating new or improved materials, products, devices, processes or services.

Agricultural production extension services
A 150% deduction is available for expenditures on services provided free of charge to smallholder growers, including the provision of advice, training and technical assistance in relation to primary production to assist growers with production, processing, packaging and marketing issues.

Investment in primary production
Agricultural companies may transfer to their shareholders the benefit of the outright tax deduction available for many types of capital expenditures. The total deduction available to shareholders may not exceed the amounts paid on their shares.

Incentive rate primary production projects
As part of promoting investment in primary production, a 20% tax rate is prescribed in respect of “incentive rate primary production income” derived by a company (as opposed to the normal 30% tax rate for a resident company or 48% for a non-resident company). The 20% rate of income tax applies during the period commencing on the date that construction, clearing or planting was started and ending at the end of the tenth full tax year after the date of commencement.
The “incentive rate primary production income” is income from primary production derived by a company from a new primary production development project that is:

- A project with a capital cost not less than PGK 1 million;
- Located in an area in which primary production of the crop or the livestock proposed was not previously carried out, or not previously carried out on a large scale;
- Not an extension or development of an existing primary production project; and
- A project that commenced construction, clearing or planting during the period 1 January 2004 to 31 December 2011.

**Rural development incentive**
Qualifying new businesses located in certain specified remote areas of the country are exempt from income tax on their income for 10 years after the commencing year. Any loss from this exempt activity is deductible against taxable income from another activity.

**Large scale tourist accommodation facilities**
A 20% tax rate applies to income derived by a taxpayer from the operation of a large scale tourist accommodation facility or a substantially improved large scale tourist accommodation facility. The rate applies for 14 years after the end of the year of income in which the taxpayer first derives income from the facility. There are four main requirements which must be satisfied:

1. The taxpayer must derive all its income from the operation of the tourist accommodation facility;
2. Construction of the facility or improvements thereto must be commenced between 1 January 2007 and 31 December 2011;
3. The amount expended on the construction or improvement must exceed USD 7 million; and
4. There must be 100 rooms or more for the purpose of temporary accommodation of people.

**Export market development costs**
Expenditures incurred in the promotion for sale outside PNG of goods manufactured in PNG or tourism promotion is eligible for double deduction. The total tax saving cannot exceed 75% of the expenditures incurred.

**Export incentives**
The net export income from the export sale of certain types of goods is exempt for the first four years of income, with a partial exemption in the following three years.

**Staff training costs**
Certain staff training costs, including the cost of full-time training officers and tourism training, are eligible for a double deduction. The total tax saving is limited to 75% of the expenditure incurred.

**Solar heating**
Expenditures on the acquisition and installation of a solar heating plant for use in deriving income are allowable as an outright deduction.
Papua New Guinea

**Infrastructure development by agricultural, mining, petroleum and gas companies**

A tax credit is available to agricultural, mining, petroleum, gas and certain tourism companies that incur expenditure on a prescribed infrastructure development. In the case of taxpayers engaged in mining, petroleum and gas operations, the credit is limited to 0.75% of the assessable income or the amount of tax payable for the year (in respect of that mining, petroleum or gas project), whichever is less. Excess expenditure over the 0.75% or tax payable may be included in the following year’s rebate claim.

Unutilised credits or excess expenditures can generally only be carried forward for two years. In the case of taxpayers engaged in agricultural production, the credit is limited to 1.5% of the assessable income or the amount of tax payable for the year, whichever is less.

A prescribed infrastructure development includes a school, aid post, hospital road and other capital assets that have been approved as such by the Department of National Planning and the IRC. It cannot be an expenditure required under the Mining Act or the Oil and Gas Act.

**Petroleum, mining and gas operations**

Special incentives and rules apply to mining, petroleum and gas exploration, extraction and production activities. The main aspects are as follows:

*Project basis of assessment*

A project basis of assessment (ring-fencing) is adopted for all resource projects. This means losses from other operations, regardless of whether or not they are resource related cannot generally be offset against resource project income from a particular ring-fenced project. However, there are some concessions to the ring-fencing principle in respect of exploration expenditures and expenditures in respect of discontinued projects.

In general, all costs incurred in the exploration and development phases of the project are accumulated and amortised over the life of the project. Once production starts, an immediate deduction is allowed for “normal” operating and administration expenses. Capital expenditures incurred after the start of production are capitalised and amortised over the life of the project.

*Rate of tax*

The rates of tax in respect of income from a resource project are:

<table>
<thead>
<tr>
<th></th>
<th>Non-resident companies</th>
<th>Resident companies</th>
</tr>
</thead>
<tbody>
<tr>
<td>Mining</td>
<td>30%</td>
<td>40%</td>

<tr>
<td>Petroleum – incentive rate</td>
<td>30%</td>
<td>40%</td>
</tr>
<tr>
<td>Gas</td>
<td>30%</td>
<td>30%</td>
</tr>
</tbody>
</table>

*Interest deductions*

Interest is not deductible prior to the commencement of a resource project. Following the issue of a resource development licence, a person carrying on a resource project or exploration in relation to a resource project may claim a deduction against resource income for interest on money borrowed for carrying on the relevant operations.
or exploration. This is subject to a number of conditions including maintaining a debt-to-equity ratio of 3:1.

**Capital allowances**
Allowable exploration expenditure (AEE) is amortised over the life of the resource project. The deduction is calculated by dividing the unamortised balance by either the remaining life of the project or four, whichever is less. The amount of the deduction is limited to the amount of income remaining after deducting all other deductions, other than deductions for allowable capital expenditure. In other words, the deduction cannot create a tax loss.

Allowable capital expenditure (ACE) is amortised over the life of the resource project. The ACE is split into two categories: capital expenditures with an estimated effective life of more than 10 years (long-life ACE) and capital expenditures with an estimated effective life of less than 10 years (short-life ACE).

The annual deduction for long-life ACE is claimed on a straight-line basis over 10 years.

Where the remaining life of the project is less than 10 years, the rate at which the deduction is allowed is calculated by referring to the remaining life of the project. For short-life ACE, the annual deduction is calculated by dividing the unamortised balance by either the remaining life of the project or four, whichever is less. For new mining projects the deductions for both long-life ACE and short-life ACE are calculated by dividing the unamortised balance by either the remaining life of the project or four, whichever is less.

The amount of the deduction for ACE is limited to the amount of income remaining after deducting all other deductions. In other words, the deduction cannot create a tax loss.

**Off licence exploration expenditure**
A major easing of the ring-fencing principle applies to taxpayers, which are involved in a producing project, where the taxpayer or a related party incurs exploration expenditures outside the area of the productive project. In this situation, the taxpayer can elect (whether or not it is currently involved in a producing project) to add such exploration expenditures to an exploration pool that can be amortised against income from the producing project.

The amount allowable as a deduction from this exploration pool in respect of resource operations carried on by the taxpayer or a related corporation is the lesser of:

1. 25% of the total undeducted balance of expenditures in the exploration pool; or
2. Such amount as reduces the income tax (other than additional profits tax) which would, but for this deduction, be payable by the taxpayer and its related corporations in respect of those resource operations for that year of income, by 10% (or 25% for mining projects).

**Management fees**
Once a resource project derives assessable income, the deduction for management fees is restricted to 2% of operating expenses other than management fees. During the exploration phase of a project, the amount of management fees which can be treated as allowable exploration expenditure is limited to 2% of the exploration expenditure.
other than management fees. Furthermore, during the development phase the amount of management fees which can be treated as allowable capital expenditure is limited to 2% of the allowable capital expenditure other than management fees.

Transfer of expenditures
When interests are transferred from one taxpayer to another, the vendor and purchaser can agree to transfer deduction entitlements for the unamortised balances of allowable exploration expenditure and allowable capital expenditure to the purchaser.

Liquefied natural gas (LNG) project
A number of provisions with specific application to the PNG LNG project have been included in the Income Tax Act, Stamp Duties Act, Goods and Services Tax Act, Customs Act and Excise Act.

Other provisions were added or amended at the same time as the PNG LNG project-specific provisions, the most notable being the re-introduction of additional profits tax for all designated gas projects.

Withholding taxes (WHT)

Interest, dividend, royalties and technical/management fees
The following withholding tax rates apply to interest, royalties, technical fees and dividends under PNG domestic law and tax treaties. PNG domestic legislation provides an exemption from withholding tax for interest and dividends in certain circumstances. The higher rates quoted are the maximum rates allowable under the treaties.

<table>
<thead>
<tr>

* The treaty with Germany has not yet been ratified by Germany.

The rate of DWT on dividends paid by mining companies is 10%. Dividends paid to a resident or a non-resident out of income from petroleum or gas operations are exempt from income tax and are not subject to DWT.

Business income withholding tax
Income derived by local contractors in certain industries is covered by the business income withholding tax regime. The industries affected include:
Businesses affected are required to have a certificate of compliance and to produce it when entering into contracts with their customers. Payers are required to file an annual income reporting statement where either they make an eligible payment of PGK 500 or more in relation to one contract, or eligible payments for several contracts exceeding PGK 3,000 in the year of income in relation to a single payee. Payers are required to deduct a 10% withholding tax if payees do not produce a certificate of compliance.

**Non-resident insurer withholding tax**

Premiums paid to non-resident insurers in respect of insurance contracts on property situated in PNG or insured events which can only occur in PNG are subject to tax in PNG. The tax is calculated on a deemed taxable income equal to 10% of the gross premium, which is taxed at the non-resident tax rates of 48% (companies) or 30% (unincorporated associations). Tax treaties may limit the rate of tax applied.

**Overseas shippers**

Income derived by overseas shippers or charterers carrying passengers, livestock, mail or goods out of PNG is taxable in PNG. The tax is calculated on a deemed taxable income equal to 5% of the gross income which is taxable at the non-resident rate of 48% in the case of companies. The IRC may exempt the overseas shipper from tax if the shipper’s home country exempts PNG shippers from a similar tax.

**Tax administration**

**Returns**

PNG operates on a full assessment basis and companies are required to lodge an annual income tax return showing the calculation of taxable income for the year. In addition, the return must provide detailed disclosures in relation to income derived and expenses incurred during the year of income.

The tax year is generally the period 1 January to 31 December; however, application may be made for a substituted tax year end. These will normally be granted where the substituted tax year end coincides with the accounting year end of an overseas holding company. A company’s tax year does not need to be the same as its accounting period.

A company must file a tax return by 28 February in the year following the year of income to which the return relates. However, an automatic extension to 30 June applies where the company lodges its return through a registered tax agent.

**Payment of tax**

Corporate income tax is collected under a provisional tax system. Under this system, tax is paid in respect of a company’s current year profits (i.e., payments made in the year of income are in respect of income derived in the same year as the payment is due).
Papua New Guinea

Provisional tax is assessed by the IRC based on the last return lodged. In the event that no tax was payable on the previous year’s return, the Commissioner General has the right to estimate the amount of tax based on any other information available.

Provisional tax is payable in three equal instalments by 30 April, 31 July, and 31 October.

Applications may be made to reduce provisional tax assessed if the tax due for the year in question is expected to be lower than the provisional tax assessed. Where estimated provisional tax is less than 75% of the income tax ultimately assessed, additional tax may be levied. Additional tax at a rate of 20% will be assessed, based on the difference between the estimate lodged and the provisional tax originally determined, or the actual tax payable, whichever is less. The Commissioner General has the discretion to require payment of additional tax.

Mining, petroleum and gas companies are subject to advance payments tax, a system that broadly mirrors the provisional tax system in place for non-resource companies. The main difference for resource companies is they have the option to lodge an estimate of their taxable income for the year prior to 30 April, 31 July, and 31 October each year, which the IRC uses to assess each advance payments tax instalment.

Following the lodgement of the income tax return the IRC will serve a notice of assessment on the company. The balance of tax payable for a year of income, after the application of provisional tax (or advance payments tax in the case of a resource company) and other tax credits or rebates, is due to be paid within 30 days of the date of service of the notice of assessment.

Significant developments

In July 2004, Law 2421/04 introduced changes to the Tax Law (Law No. 125/91), which remain in force with some emendates.

Taxes on corporate income

There are three tax systems, depending on the type of taxpayer (determined by annual income).

- For income from commercial, industrial and service activities, the general income tax rate of 10% applies.
- For income from agricultural and cattle activities, the rate ranges from 2.5% to 10%.
- For those taxpayers with annual income of less than PYG 100 million, a single tax at a rate of 10% applies.

Corporate residence

Corporate legal residence is determined as the place where direction or central management takes place, unless the corporation’s charter states otherwise.

Other taxes

Tax on acts and documents
There is no longer a tax on acts and documents.

Value-added tax (VAT)
VAT applies to all corporations and to individuals or associations of individuals rendering personal services.

The general VAT rate is 10%, but in 2006, a special VAT rate of 5% was introduced for selling real state, basic groceries, farming products, pharmaceutical products, and loans interest.

Real estate tax
Real estate tax is levied annually at 1% of the fiscal value of the property, which is generally less than actual value. A tax rate of 0.5% applies if the area of rural property is smaller than five hectares and is used for agricultural or cattle ranching. In certain areas, an additional tax is levied on the fiscal value of vacant and semi-vacant land.
Paraguay

when the area of the built-up portion falls within certain determined percentage limits. Large tracts of land in rural areas are subject to an additional tax determined on a percentage basis and to a proportional tax of 0.5% to 1% on the fiscal value of tracts with areas ranging from 10,000 to 60,000 or more hectares.

The 1992 Paraguayan Constitution established that municipalities and departments are entitled to the tax revenues directly related to real estate. Collection of these taxes is the responsibility of municipal governments.

**Branch income**

Branches are taxed at the same rate as domestic corporations. Profits transferred or credited to the head office are subject to a 15% withholding tax when remitted to the head office abroad.

**Income determination**

**Inventory valuation**

Taxpayers may adopt any method of inventory valuation, provided it is technically acceptable, according to Tax Administration criteria (e.g., first-in, first-out, average cost). The valuation must be applied consistently and may be changed only with the prior approval of the treasury minister.

Damaged, deteriorated and obsolete inventories may be written down to fixed values by the taxpayer. The tax administration can reject valuations that are not realistic.

**Capital gains**

Gains on all assets, tangible and intangible, are taxable as part of profits and subject to income tax at a rate of 10%.

**Inter-company dividends**

Dividends are not taxable income except when the recipient (or shareholder) is a non-resident, in which case a 15% withholding tax applies. An additional 5% tax is charged to local entities when the income or dividend is distributed to a local or foreign (non-resident) shareholder.

**Foreign income**

Foreign-source income is not taxable. Interest, commissions and capital gains are considered Paraguayan source when the investor is resident in Paraguay.

**Stock dividends**

Stock dividends are not taxable income, except when dividends represent more than 30% of the taxable income of an investor. In the case when dividends represent more than 30% of an investor's taxable income, a tax rate of 15% and an additional tax rate of 5% applies (see Inter-company dividends).

**Deductions**

**Depreciation and depletion**

The maximum allowable depreciation rates range from 2.5% for urban buildings to 25% for computer equipment. Depreciation is calculated by the straight-line method based on the useful life of assets, as determined by the Treasurer. The Treasurer may
also authorise the use of other depreciation or depletion methods that are deemed to be technically justified and generally accepted. Fixed assets must be revalued annually based on the increase of the price index. Capital gains derived from the revaluation of fixed assets are not taxable income.

**Net operating losses**
Tax losses incurred in one year were permitted to be carried forward and applied against taxable income in later years until 2005. Since 2005, net operating losses are no longer permitted to be carried forward and applied against future years.

However, Congress is considering amending the law to permit carrying forward of losses for three years.

**Payments to foreign affiliates**
There are no limits on the deductibility of payments to foreign affiliates, including management fees, research and development, and general and administrative expenses, provided that the taxpayer maintains corresponding legal documentation that includes the country of origin and applies appropriate withholding taxes. For the applicable withholding tax rates, see Withholding taxes.

**Taxes**
In general, all taxes mentioned under Other taxes are deductible. Income tax and any fiscal surcharges or fines are not deductible.

**Other significant items**
Special rules apply for the deduction of donations, extraordinary losses, deferred expenses, other taxes (such as VAT), bad debts, and executive remuneration. General provisions for expenses or other potential losses are not deductible.

Other special non-deductible items include:

- Interest on capital, loans or any other investment by an owner, partner, or shareholder in a business;
- Personal expenses of an owner, partner, or shareholder;
- Money drawn on account of future earnings;
- Amortisation of goodwill;
- Direct expenses incurred in earning non-taxable income; and
- Earnings from any fiscal period that are retained in the business as capital increases or reserve accounts.

**Group taxation**

Group taxation is not permitted.

**Tax incentives**

**Inward investment**
The framework of economic investment was established in the Law No. 60/90, which offers some special tax exemption benefits to foreign and local investors.

The benefits of the Law No. 60/90 may be available for the following investments:
Paraguay

- Cash, financing, provision of credit or other financial instruments, under the conditions established by the administration of the President of Paraguay and the corresponding ministries;
- Capital goods, raw materials and inputs for local industry for the fabrication of capital goods;
- Transfers of licensing rights with respect to trademarks, industrial processes and models and other technologies;
- Technically specialised services;
- Capital leases; and
- Other forms that the administration of the President of Paraguay and the corresponding ministries determined by law.

The investment incentives included in Law 60/90 that remain enacted after tax law modification (Law No. 2421/04) are the exemptions from certain fiscal, municipal and customs duties taxes.

When the amount of financing for an investment is greater than USD 5 million, it will be exempt from withholding taxes on interest, commissions and capital that have to be paid to financial or banking entities abroad. This benefit is for five years.

If the investment is at least USD 5 million and the project is approved for a term of at least 10 years, the dividends and profits derived from the project are tax exempt. In this case, the taxes on those dividends and profits would not be creditable in the country of origin.

Other incentives
Exports are exempt from certain customs duties and from VAT. A Capital Market Law (No. 1284/98) established incentives for companies listed on the Asunción Stock Exchange. In addition, Law 536/95 established incentives for forestry activities.

Notes

1. Since 2006, local entities are required to pay an additional 5% withholding tax when the income or dividend is distributed.
2. The withholding tax on interest is based on 100% of the amount paid when remitted to the head office abroad. In other cases, when the payment is not directly made to the head office or shareholders that have control of the local subsidiary, the withholding tax is based on 50% of the amount paid. The tax rate is 30%.
3. VAT is withheld on interest, royalties and other services provided for non-resident corporations or individuals at a rate of 9.09%, except on fees for financing, which are withheld at a rate of 4.76%.
4. The withholding tax on royalties is based on 100% of the amount paid when remitted to the head office abroad. In other cases, when the payment is not directly made to the
head office or shareholders that have control of the local subsidiary, the withholding tax is based on 50% of the amount paid. The tax rate is 30%.

5. The withholding tax on fees is based on 100% of the amount paid when remitted to the head office abroad. In other cases, it is based on 50% of the amount paid. The tax rate is 30%.

6. Fees for personal services rendered by non-resident corporations are subject to withholding income tax at a rate of 50% on the amount paid. The tax rate is 30% (effective tax rate of 15%).

Fees for personal services rendered by non-resident individuals are subject to withholding of the personal income tax at a rate of 50% on the amount paid. The tax rate is 20% (effective tax rate of 10%). Congress is considering suspending this tax.

**Tax administration**

**Returns**

Returns are submitted on a fiscal-year basis as a self-assessment.

**Payment of tax**

Income tax returns must be filed and income tax that is due must be paid by the fourth month following the end of the fiscal year. The tax is due on varying days in the fourth month, depending on the taxpayer ID number, according to a calendar established by the treasury ministry. Four equal advance payments are made throughout the year, calculated based on 100% of the tax due in the previous year. Payments must be made in May, July, September, and November of each year after the due date for filing the income tax returns accordingly to the calendar established by the tax authorities.

Significant developments

Several changes to corporate taxation legislation in Peru were applicable starting 1 January 2010, including the following:

- The financial transactions tax (FTT) rate for fiscal year (FY) 2010 was reduced to 0.05%.
- The tax unit for 2010 is PEN 3,600.
- The rate of the temporary net assets tax for FY 2010 was reduced to 0.4% (applicable to net assets in excess of PEN 1 million).
- Tax exemption on income from bank deposits in local banks remains in force until 31 December 2011.
- The exemption on capital gains derived from the sale of stocks through the stock exchange and on interest from deposits in local financial institutions is no longer in force.
- The general tax treatment on mutual funds and investment funds has been changed.
- The Free Trade Agreement with China is in force as of 1 March 2010.
- The double tax agreement with Brazil is in force as of 1 January 2010.

Taxes on corporate income

Companies incorporated in Peru are considered domiciled in Peru for tax purposes and thus subject to an income tax rate of 30% on worldwide net income.

For purpose of determining taxable income, such entities are allowed to deduct expenses to the extent that they are necessary to generate or maintain the source of taxable income. Requirements, limitations and/or caps may apply to the deduction of certain expenses (thin capitalisation rules), bad debt provisions, salaries, travel expenses, gifts, etc.

The Peruvian income tax law allows crediting for various payments against income tax, including income taxes paid in advance, amounts paid for certain other taxes and income taxes paid in foreign tax jurisdictions, provided that the foreign country's tax rate is not higher than the Peruvian corporate tax rate.

Dividends and any other types of profit distributions are taxed at a 4.1% rate, upon distribution, whether the distributions are made to domiciled individuals or non-domiciled companies (either individuals or legal entities). The entity distributing dividends or profits is liable for withholding tax at a rate of 4.1%. Nevertheless,
enterprises are subject to an additional tax rate of 4.1% on every amount or payment in kind that, as result of a tax audit, is construed as taxable income to the extent that it is an indirect distribution of such income that is not susceptible to further tax control, including income that has not been declared.

**Corporate residence**

For income tax purposes, the following entities, among others, are considered as resident entities in Peru:

- Corporations duly incorporated in Peru;
- Branches, agencies and permanent establishments (PE) in Peru of non‑domiciled individuals or entities (the Regulations of the Peruvian income tax law provide the cases in which a PE is deemed to be established in Peru); and
- Partnerships and limited liability companies.

**Other taxes**

**Value-added tax (VAT)**

The general rate of VAT is 19%, applicable to the following operations:

- Sale of goods within the country;
- Rendering or first use of services within the country;
- Construction contracts;
- The first sale of real estate made by construction firms; and
- Import of goods.

For all transactions, the vendor is subject to VAT, except in the case of importation of goods or services rendered abroad, but economically used within Peru, for which VAT is self‑assessed by the importers and users, respectively.

The VAT law follows a debit/credit system, and input VAT may be offset by output VAT. Should excess input VAT be obtained in a particular month, it shall offset output VAT obtained during the following months, until it is exhausted. Cash refunds of excess input VAT may be made only if it is not possible to offset the excess input VAT related to the exportation of goods and services, as explained below, but not to domestic transactions.

The export of movable goods (including the sale of goods in the international zone of ports and airports) is not subject to VAT, nor is the exportation of certain services. Thus, VAT paid upon the acquisition of goods, performance of services, construction agreements and the importation of goods related to exported goods or services creates a positive VAT export balance.

The positive balance may offset (i) output VAT, (ii) income tax, or (iii) any other outstanding tax debt in favour of the central government. If the positive balance is not completely offset, as the amount of the aforementioned tax obligations is insufficient, the taxpayer may apply for a refund (which may be made in cash or by cheque).

**Excise tax**

The sale of specific goods, including fuel, cigarettes, beer, liquor, and vehicles, is subject to excise tax.
Excise tax rates depend on the type of goods or services.

**Financial transactions tax (FTT)**

Obligations that are fulfilled through cash payments exceeding PEN 3,500 must be made via bank account deposits, wire transfers, payment orders, credit cards, non-negotiable cheques or other means of payment provided by entities of the Peruvian financial system. Failure to use one of these payment methods when such an obligation exists will result in the disallowance of deductions for any expenses or costs for income tax purposes and the disallowance of a credit for the corresponding VAT.

Law No. 28194 also created the FTT applied at a rate of 0.05% on all debits and/or credits on bank accounts held by the taxpayers.

The following operations, among others, are exempted from the FTT:

- Operations made between accounts of the same holder;
- Credits to bank accounts for payment of salaries; and
- Credits and debits to bank accounts of diplomatic representations and international organisations recognised in Peru.

Payments of the FTT are deductible as expense for income tax purposes.

**Temporary net assets tax (TNAT)**

Companies subject to corporate income tax are obliged to pay the TNAT, except companies that are in preoperative stages or that commenced business on 1 January of the fiscal year in which the TNAT must be paid.

The taxable basis is the value of the assets set forth in the taxpayer’s balance sheet as of 31 December of the year prior to that of the tax payment, adjusted for deductions and amortisations accepted by the Peruvian law.

Thus, the amount of the TNAT is determined by applying the following rates on the taxable basis:

- 0% – Up to PEN 1 million; and
- 0.4% – Excess of PEN 1 million.

The amount paid for the TNAT may be credited against the taxpayer's corporate income tax.

**Branch income**

Branches, agencies and PEs of non-domiciled companies or entities incorporated in Peru are subject to income tax at a 30% rate on their Peruvian-source income.

For tax purposes, branches or subsidiaries are subject to the same obligations applicable to all companies in Peru, including, income tax, VAT, FTT, filing of the corresponding income tax and VAT returns, issuance of invoices, etc.

Nevertheless, the following important differences between subsidiaries and branches domiciled in Peru must be taken into account:
• Branches are subject to the income tax only for their Peruvian-source income, while subsidiaries are subject to income tax on their global-source income (both Peruvian and foreign income).
• For branches, the 4.1% rate for distribution of dividends is applied from the date the annual income tax return is submitted. Subsidiaries are subject to the 4.1% rate on the earlier of the date in which the corresponding shareholders agreement took place or the date when the beneficiary has the right to use the dividends distributed by the subsidiary.

**Income determination**

**Inflation accounting**
As of 2005, no adjustments to balance sheet accounts for inflation apply.

**Inventory valuation**
The first-in, first-out (FIFO), average, specific-identification, retail, and normal or base-stock methods are allowed for inventory valuation. The last-in, first-out (LIFO) method is not permitted.

**Capital gains**
Capital gains are taxed as ordinary income.

**Inter-company dividends**
Cash dividends distributed to resident corporations are not subject to any taxes.

**Foreign income**
A Peruvian corporation is taxed on foreign source income. Double taxation may be avoided by means of foreign tax credits.

**Deductions**

**Expenses derived from transactions entered into with entities domiciled in tax havens**
Certain expenses are not tax-deductible, including expenses incurred with respect to transactions with (i) entities domiciled in tax havens on the list attached to the Peruvian Income Tax Law regulations, (ii) PEs located in tax havens, or (iii) entities that generate revenues or income through tax havens. Nonetheless, expenses incurred from the following transactions are excluded from the above-mentioned limitations: (i) interest on loans, (ii) insurance premiums, (iii) leases of aircraft or ships, (iv) maritime freight, and (v) fees for passing through the Panama Canal.

**Depreciation**

<table>
<thead>
<tr>

</tr>
<tr>
<td>Equipment for data processing</td>
<td>25</td>
</tr>
<tr>
<td>Machines and equipment acquired as of 1 January 1991</td>
<td>10</td>
</tr>
</tbody>
</table>
There is a special depreciation regime applicable for years 2010 and 2011 for buildings and constructions that, provided certain requirements are met, can be depreciated at a 20% rate.

**Loss carryovers**

Tax losses may be offset according to either of the following systems:

- Against net income generated within the following four fiscal years after the year in which the loss was generated. Any losses that are not offset within such period may not be carried forward to any later years.
- Against 50% of the net income generated in the following fiscal years after the year in which the loss was generated. Under this system, there is no time limitation for carrying forward the losses.

After choosing one of the aforementioned systems, the taxpayers may not change the system until any accumulated tax losses from prior fiscal years are exhausted. Losses may not be carried back to years prior to the year in which the loss was generated.

**Payments to foreign affiliates**

Payment of royalties to non-domiciled affiliates is permitted and deductible from gross income.

**Taxes**

Other taxes assessable on properties and activities generating taxable income are deductible for income tax purposes.

**Profit sharing**

Entities with more than 20 employees and provided they obtain taxable income on the fiscal year must distribute a percentage (5%, 8% or 10% depending on the industry) of its profits (the basis is the tax profit of the fiscal year) among its employees, the amount of distribution for each employee depends on the effective working days during the year and annual remuneration.

**Start-up costs**

Organisation expenses, pre-operating expenses (including initial operations and further expansion of operations), and interest accrued during the pre-operating period may be expensed in the first period of operation or amortised using the straight-line method over a maximum of 10 years. However, once a company has elected to recover start-up costs via the straight-line method, it may revoke such election only upon receiving approval of the tax authorities. The total period may not exceed 10 years.

**Employee’s retributions and health insurance premiums**

Employee’s retributions paid during a fiscal year may be deducted in such year, provided the payments are made by the employer before the term to file its annual income tax return expires. Likewise, health insurance premiums for employees, their spouses and children are deductible.

**Vehicle expenses deductions**

Vehicle expenses may be deducted provided the vehicles are essential to a company’s business activities and are continually used for such purpose. There is a limitation on
the tax deductibility of car expenses, depending on the amount of income generated by the company. The number of company cars assigned to directors, managers and representatives of a company may not exceed five under any circumstances.

Vehicles subject to these limitations are those classified in categories as A2, A3 and A4, pursuant to the provisions of the Ministry of Transport.

**Group taxation**

Group taxation is not permitted.

**Tax incentives**

**Early recovery of VAT**

Companies in a preoperative stage with large projects in process may apply for early recovery of VAT prior to commencing operations. An investment agreement with the government (the Ministry of its sector) is required.

**Stability agreement**

Investors may enter into stability agreements with the government, either under the general regime or specific regimes (i.e., mining and petroleum).

Under the general regime, investors may enter into Juridical Stability Agreements that guarantee the following advantages for a 10-year period:

- Stability of the income tax regime in force at the time the agreement is entered into with respect to dividends and profit distribution;
- Stability of the Peruvian government monetary policy, according to which there is a complete absence of exchange controls, foreign currency can be freely acquired or sold at whatever exchange rate the market offers and funds can be remitted abroad without any previous authorisation; and
- Right of non-discrimination between foreign and local investors.

Under the mining regime, local mining companies may enter into stability agreements of guarantees and investment promotion measures that guarantee the following for 10 or 15 years:

- Stability of the overall tax regime;
- Stability of the overall administrative regime;
- Free disposition of funds (foreign currency) arising from export operations;
- No exchange rate discrimination;
- Free trade of products; and
- Stability of special regimes for tax refunds, temporary importation, etc.

Oil companies may enter into stability agreements that guarantee the following for the term of the contract:

- Stability of the overall tax regime;
- Free disposition of funds (foreign currency) arising from export operations;
- Free convertibility of its funds; and
- Free trade of products.
Peru

Investment promotion in the Amazon
As of 1 January 1999, certain tax benefits with regard to VAT and income tax have been established for taxpayers located in the area designated by the law as the “Amazon” and that are engaged in the following activities:

• Agriculture and livestock enterprises;
• Aquaculture;
• Fishing;
• Tourism; and
• Manufacturing activities linked to the processing, transformation and commercialisation of primary products originating in the activities listed above and in forest transformation, provided these products are produced in the area.

Special zones – Centres of Export, Transformation, Industry, Commercialisation and Services (CETICOS)
CETICOS are geographical areas duly delimited with custom primary zone status and special treatment, destined to generate development poles through industrial, maquila, assembling or storage activities. CETICOS are located in Paita, Ilo and Matarani cities.

Agribusiness and agro-exporting activities may be performed within a CETICOS. Agribusiness activity is primarily the transformation of agro-farming products produced in the country. Such transformation must be carried out at CETICOS.

Companies engaged in industrial, maquila or assembling activities, established or set up in the CETICOS, until 31 December 2012, are exempt from income tax, VAT, excise tax, municipal promotion tax, as well as from any other taxes, fees, contributions levied by the Central Administration and even taxes that require express exempt regulation.

Withholding taxes (WHT)
Domestic corporations are required to withhold income tax with respect to income paid to non-domiciled entities at the following rates:

<table>
<thead>
<tr>
<th>%</th>
</tr>
</thead>
<tbody>
<tr>
<td>Interest on non-related party loans, provided certain requirements are fulfilled</td>
</tr>
<tr>
<td>Interest paid by Peruvian financial entities or banks to foreign beneficiaries for credit lines used in Peru</td>
</tr>
<tr>
<td>Royalties</td>
</tr>
<tr>
<td>Digital services</td>
</tr>
<tr>
<td>Technical assistance, provided that certain requirements are met (otherwise 30%)</td>
</tr>
<tr>
<td>Lease of vessels or aircraft</td>
</tr>
<tr>
<td>Dividends or profit distributions</td>
</tr>
<tr>
<td>Other income</td>
</tr>
</tbody>
</table>

Note that domiciled taxpayers may not deduct the withholding tax of a third party, except in the case of loans provided by non-domiciled creditors, to the extent that the debtor has contractually assumed the obligation of bearing the withholding tax.
Capital gains derived from the sale of stocks through the stock exchange paid to a non-domiciled company have an income tax rate of 5% and are not subject to any withholding. In these cases, the income tax must be paid directly by the non-domiciled company.

Capital gains derived from the sale of stocks paid to domiciled individuals are subject of a 5% income tax rate, even though they are not sold through the stock exchange.

In the case of the services mentioned below that entail the execution of activities both in Peru and abroad, non-domiciled entities are only subject to tax on a percentage of gross income at the following rates:

<table>
<thead>
<tr>
<th>Service</th>

<td>20%</td>
</tr>
</tbody>
</table>

**Tax treaties**

Peru has entered into treaties with Canada, Chile and Brazil regarding double taxation on income tax (the last three entered into in accordance with the Organisation for Economic Co-operation and Development (OECD) Model). Recently, Peru has entered into a double-taxation treaty with Spain (also entered into pursuant to the OECD Model), but the treaty has not yet entered into force, as the Peruvian Congress ratification required for such purpose is still pending. In addition, Peru is a member of the Andean Community of Nations (ACN), which also includes Bolivia, Colombia and Ecuador.

Pursuant to the provisions of the tax treaties entered into in accordance with the OECD Model, income is taxable in the country of the service provider's residence, unless a PE is configured, in which case both countries are entitled to levy tax on income and the country of residence allows a credit for taxes paid in the other country.

On the other hand, according to the treaties with the ACN, income is taxable in the country in which its source is located, unless a PE is configured, in which case income tax is levied in the country where the PE is located. Thus, in transactions with entities resident from one of the member countries of the ACN, in certain cases income is taxable in Peru if the source of such income is located within Peru. For such purpose, the term “source” is defined as the place where the activity, right or goods that generates or will generate income is located.
Peru

**Tax administration**

**Returns**
The filing deadline for the income tax return is generally the first week of April. According to law, the fiscal year must coincide with the calendar year. The system is one of self-assessment, but the tax return filed with the tax authorities is subject to review.

**Payment of taxes**
Income tax is paid in advanced instalments calculated based on monthly revenue, either by applying a 2% rate or by a factor equivalent to the effective tax rate on net revenue of the prior year. Income tax is paid in 13 instalments (12 monthly payments and the annual income tax return). As noted, the first 12 payments must be made on a monthly basis and the last payment is due at the time that the annual tax return is filed. Late payment of interim or final instalments is subject to moratorium interest. Excess payments are subject to indexation up to the date of reimbursement or application to future taxes.

**Tax authority**
The tax authority in Peru is called “Superintendencia Nacional de Administración Tributaria” (SUNAT). SUNAT is responsible for administering all of the aforementioned taxes (income tax, VAT, etc.). Companies domiciled in Peru must be registered with the tax administration (Taxpayer's Registry).

The Tax Court (Tribunal Fiscal) is a specialised court of law that is given an administrative level from the Economics and Finances Ministry, but is otherwise autonomous regarding its specific functions. Its mission is to rule over tax contingencies that may arise between the Tax Administration and the taxpayers, by interpreting and applying the corresponding tax legislation, issuing mandatory observance jurisprudence, establishing homogenous criteria and providing legislation that continues to support the progress of the tax system.

Significant developments

Several laws were passed between 2005 and 2010 to address fiscal and other concerns of the government.

Excise tax rates imposed on alcohol and tobacco products were increased, effective 1 January 2005.

The Attrition Act of 2005 was passed to improve the revenue collection performance of the Bureau of Internal Revenue (BIR) and the Bureau of Customs (BOC). The Act created a rewards and incentives fund to reward BIR and BOC personnel if collection targets are exceeded. At the same time, a new Revenue Performance Evaluation Board was empowered to remove personnel from service if their collection falls 7.5% or more short of their collection target.

Republic Act (RA) No. 9337 made significant amendments to the value-added tax (VAT) law. The VAT rate increased from 10% to 12%. Several VAT exemptions were removed, the most notable being in the power and petroleum sectors. Payments on government contracts became subject to 5% final withholding VAT. Clearer invoicing and registration rules were introduced, and the registration threshold was increased from PHP 750,000 to PHP 1.5 million.

Two controversial provisions related to input tax credits were also introduced. Input VAT from the purchase or importation of capital goods must be spread over the lesser of five years or the depreciable life of an asset if the aggregate acquisition cost exceeds PHP 1 million (excluding VAT) in a calendar month. Creditable input taxes (other than those related to zero-rated sales) are also restricted to 70% of output tax for a quarter, although this 70% cap was removed by a subsequent enactment (RA No. 9361).

RA No. 9337 also amended some non-VAT provisions. The excise taxes on some petroleum products were reduced to mitigate the expected price effects from the imposition of VAT on power and petroleum. The corporate tax rate was, however, reduced to 30%, effective 1 January 2009.

The VAT rate increase took effect from 1 February 2006, while the other amendments were generally effective from 1 November 2005.

RA No. 9343 extended the period for establishing special purpose vehicles (SPVs), as originally provided for under the SPV Act of 2002, which grants certain tax exemptions and fee privileges to qualified SPVs that purchase non-performing loans under
conditions therein provided. Under the amendatory law, new SPVs may be established within 18 months from 14 May 2006, the date of effectivity of RA 9343. SPV privileges for the transfer of non-performing assets from financial institutions to the SPVs shall be available within two years also, from 14 May 2006.

Finally, RA No. 9504 introduced the optional standard deduction of 40% of gross income, beginning 1 July 2008.

RA No. 9640 amended the Local Government Code of 1991 by reducing the amusement tax that a province or city may levy and collect from proprietors, lessees, or operators of theatres, cinemas, concert halls, circuses, boxing stadiums and other places of amusement from not more than 30% to not more than 10% of the gross receipts derived from admission fees. The Act lapsed into law on 21 May 2009 without the signature of the President.

RA 10001 (Act) reduced the rate of percentage tax on life insurance policies from 5% to 2% of the total premiums collected. This reduced rate of 2% will only apply to insurance policies issued after the effectivity of the Act, which will be within 15 days after its publication in a newspaper of general circulation. However, with respect to insurance policies taken out before the effectivity of the Act, carrying still outstanding unpaid premiums, the 2% rate will only apply to the remaining balance and for the remaining years. Moreover, it also provides for the following revised schedule of documentary stamp taxes (DST) rates on life insurance policies:

- Exempted if the amount of insurance does not exceed PHP 100,000;
- PHP 10 for amounts exceeding PHP 100,000 but not exceeding PHP 300,000;
- PHP 25 for amounts exceeding PHP 300,000 but not exceeding PHP 500,000;
- PHP 50 for amounts exceeding PHP 500,000 but not exceeding PHP 750,000;
- PHP 75 for amounts exceeding PHP 750,000 but not exceeding PHP 1 million; and
- PHP 100 for amounts exceeding PHP 1 million.

Section 4 of the Act, however, which pertains to the exemption from premium tax and DST of life insurance policies, has been vetoed by the President. Congress, which is now in recess, has yet to act on this vetoed item of the revenue bill. A two-thirds vote to pass the Act in its entirety from both houses of Congress upon resumption of their session in May this year, would override the President’s veto of Section 4.

Revenue Memorandum Circular No. 28-2010 dated 23 March 2010, circularises the full text of RA No. 10026 entitled “An Act Granting Income Tax Exemption to Local Water Districts” which amended Section 27(C) of the Tax Code. This RA exempts Local water districts (LWDs) from payment of income taxes. Moreover, it added another section i.e., (Section 289-A under Chapter II- Special Disposition of Certain National Internal Revenue Taxes) to the Tax Code which has the following features:

The amount saved by LWDs by virtue of their exemption from income taxes shall be used by them for capital equipment expenditure in order to expand water services coverage and improve water quality in the provinces, cities, and municipalities;

The LWDs shall adopt internal control reforms that would bring about their economic and financial viability. Further, they shall not increase by more than twenty percent (20%) a year their appropriation for personal services, as well as for travel, transportation or representation expenses and purchase of motor vehicles.
All unpaid taxes or any portion thereof due from a LWD for the period starting 13 August 1996 until the effectivity date of this Act are hereby condoned by the Government subject to the following conditions: (1) that the BIR, after careful review of the financial statements of a water district applying for condonation of taxes due, establishes its financial incapacity, after providing for its maintenance and operating expenses, debt servicing and reserved fund, to meet such obligations for the period stated herein; and (2) that the water district availing of such condonation shall submit to Congress of the Philippines a programme of internal reforms, duly certified by the local water utilities administration, that would bring about its economic and financial viability.

**Taxes on corporate income**

**Domestic corporations**
The following rates apply to domestic corporations:

<table>
<thead>
<tr>
<th>Description</th>
<th>%</th>
</tr>
</thead>
<tbody>
<tr>
<td>In general, on net income from all sources</td>
<td>30</td>
</tr>
<tr>
<td>Minimum corporate income tax (MCIT) on gross income, beginning in the fourth taxable year following the year in which business operations commence. MCIT is imposed where the corporate income tax at 35% is less than 2% MCIT on gross income</td>
<td>2</td>
</tr>
</tbody>
</table>

**Proprietary educational institutions and non-profit hospitals:**

<table>
<thead>
<tr>
<th>Description</th>
<th>%</th>
</tr>
</thead>
<tbody>
<tr>
<td>On net taxable income if gross income from unrelated trade, business and other activities does not exceed 50% of the total gross income from all sources</td>
<td>10</td>
</tr>
<tr>
<td>On total net taxable income if gross income from unrelated activities exceeds 50% of income</td>
<td>30</td>
</tr>
<tr>
<td>Non-stock, non-profit educational institutions (all assets and revenues used actually, directly and exclusively for educational purposes)</td>
<td>Exempt</td>
</tr>
</tbody>
</table>

Certain passive income from domestic sources is subject to final tax rather than ordinary income tax.

**Improperly accumulated earnings tax**

An improperly accumulated earnings tax of 10% is imposed on improperly accumulated income. The tax applies to every corporation formed or used for the purpose of avoiding income tax with respect to its shareholders, or the shareholders of any other corporation, by permitting earnings and profits to accumulate instead of being divided or distributed. Exceptions are made for publicly held corporations, banks and non-bank financial intermediaries, and insurance companies.

**Resident foreign corporations**

Resident foreign corporations are taxed in the same manner as domestic corporations (except on capital gains on the sale of buildings not used in business, which are taxable as ordinary income), but only on Philippine-source income. International carriers are subject to an income tax of 2.5% on their gross Philippine billings. Where there is a tax treaty, the preferential rate provided in it applies.
Income of offshore banking units (OBUs) and foreign currency deposit units (FCDUs) of depository banks from foreign currency transactions with non-residents, other OBUs or FCDUs and local commercial banks (including branches of foreign banks) authorised by the Bangko Sentral ng Pilipinas (central bank) to transact business with OBUs and FCDUs, are exempt from all taxes except net income specified by the Secretary of Finance upon recommendation of the Monetary Board. Interest income from foreign currency loans granted to residents other than OBUs or local commercial banks shall be subject to a 10% final income tax.

**Non-resident foreign corporations**

In general, non-resident foreign corporations are taxed on gross income received from sources within the Philippines at 30%, except for reinsurance premiums, which are exempt, and on interest on foreign loans, which is taxed at 20%. Dividends from domestic corporations are subject to a final withholding tax at the rate of 15% if the country in which the corporation is domiciled does not impose income tax on such dividends, or allows a tax deemed paid credit of 15%. If the recipient is a resident of a country with which the Philippines has a tax treaty, the treaty rate applies, if lower. Otherwise, the normal corporate rates apply.

Rentals and charter fees payable to non-resident owners of vessels chartered by Philippine nationals on leases or charters approved by the Maritime Industry Authority are subject to a final tax of 4.5%. Rentals, charter fees, and other fees payable to non-resident lessors of aircraft, machinery and other equipment are subject to a final tax of 7.5%.

Regional or area headquarters of multinational corporations that do not earn or derive income from the Philippines, and that act as supervisory, communications and coordinating centres for their affiliates, subsidiaries or branches in the Asia-Pacific region and other foreign markets are not subject to income tax.

Regional operating headquarters pay a tax of 10% of their taxable income. A regional operating headquarters is a branch established in the Philippines by a multinational company that is engaged in any of the following services: general administration and planning; business planning and coordination; sourcing and procurement of raw materials and components; corporate finance advisory services; marketing control and sales promotion; training and personnel management; logistic services; research and development services and product development; technical support and maintenance; data processing and communication; or business development.

**Corporate residence**

A domestic corporation (i.e., one that is created or organised under Philippine laws) is subject to tax on its worldwide income. On the other hand, a foreign corporation is subject to tax only on income from Philippine sources. A foreign corporation that is duly licensed to engage in trade or business within the Philippines is referred to as a ‘resident foreign corporation’.

**Other taxes**

**Fringe benefits tax**

A final tax of 32%, payable by the employer, is imposed on the grossed-up monetary value of fringe benefits, for example housing, expense accounts, vehicles of any
kind, household personnel, interest on loans at lower than market rates (the current benchmark rate is 12%), membership dues for social and athletic clubs, foreign travel expenses, holiday and vacation expenses, educational assistance, insurance, and so on, furnished or granted to managerial or supervisory personnel by the employer. An exception is for fringe benefits required by the nature of or necessary to the trade, business or profession of the employer, or when the fringe benefit is for the convenience or advantage of the employer.

The following fringe benefits are not subject to the tax:

- Those authorised and exempted from tax under special laws;
- Contributions of the employer for the benefit of the employee to retirement, insurance and hospitalisation benefit plans;
- Those granted to rank-and-file employees (however, the employees may be subject to withholding tax on compensation); and
- Those of relatively small value or de minimis benefits.

The fringe benefits tax is payable on the calendar quarter basis, and is an additional deductible expense for the employer. Fringe benefits already subjected to fringe benefits tax will no longer be included in the employee’s taxable income.

The grossed-up monetary value of the fringe benefit is generally computed by dividing the actual monetary value of the benefit by 68%.

**Value-added tax (VAT)**

VAT applies to practically all sales of services and imports, and sales, barter, exchange, or lease of goods or properties (tangible or intangible). The tax is equivalent to a uniform rate of 12%, based on the gross selling price of goods or properties sold, or gross receipts from the sale of services. On importation of goods, the basis of the tax is the value used by the Bureau of Customs in determining tariff and customs duties plus customs duties, excise taxes, if any, and other charges. Where the valuation used by the Bureau of Customs is by volume or quantity, the VAT basis is the landed cost plus excise taxes, if any.

Certain transactions are zero-rated or exempt from VAT. Export sales by VAT-registered persons are zero-rated. Certain sales of services exempt from VAT, including services provided by financial intermediaries, are subject to percentage taxes based on gross sales, receipts or income. A 3% percentage tax also applies to persons who are not VAT-registered because their annual sales or receipts do not exceed PHP 1.5 million.

**Other national taxes**

Aside from income tax and VAT, other internal revenue taxes include excise tax, documentary stamp tax and percentage taxes.

**Local government taxes**

Local government units impose local (business) taxes and permit fees, which are generally based on the prior year’s gross sales or gross receipts, and real property taxes, which are levied on the basis of a fixed proportion of the value of the real property.
Philippines

**Branch income**

The income tax rate on branch profits is the same as on corporate profits. In general, profits remitted abroad by a branch office are subject to a 15% tax rate, based on the total profits applied or earmarked for remittance, without any deduction for the tax component thereof. A lower rate may apply under certain tax treaties. Profits from qualified activities remitted by a branch registered with the Philippine Economic Zone Authority (PEZA) are exempt.

**Income determination**

**Inventory valuation**

Inventories are generally stated at cost or at the lower of cost or market. LIFO is not allowed for tax purposes. Generally, the inventory valuation method for tax purposes must conform to that used for book purposes.

**Capital gains**

Capital gains arise from the sale or exchange of 'capital assets'. Capital assets are property held by the taxpayer (whether or not connected with its trade) other than the following:

1. Inventories or property held primarily for sale to customers in the ordinary course of business;
2. Real property or depreciable property used in trade or business; and
3. Property of a kind that would be included in the inventory of the taxpayer if on hand at the close of the taxable year.

Capital losses are deductible only to the extent of capital gains.

There are no holding period requirements for capital assets of corporations. A 6% final tax is imposed on the higher of the gross selling price or fair market value upon the sale, exchange or disposition of land or buildings not actually used in the business of a corporation. The tax is withheld by the buyer at the time of sale. Net capital gains derived from the sale, exchange, transfer, or similar transactions of shares of stock not traded through a local stock exchange are taxed at 5% of gains not over PHP 100,000, and 10% of gains in excess of PHP 100,000. Sales of shares of stock listed and traded on a local stock exchange, other than the sale by a dealer in securities are subject to a stock transaction tax of 0.5%, based on the gross selling price.

Capital gains from the sale of bonds, debentures or other certificates of indebtedness with a maturity of more than five years are exempt from tax.

A tax is levied on every sale, barter, exchange, or other disposition through an initial public offering (IPO) of shares of stock in closely held corporations. A 'close corporation' is any corporation of which at least 50% in value of the total outstanding capital stock, or at least 50% of the total combined voting power of all classes of stock entitled to vote, is owned directly or indirectly by, or for, not more than 20 individuals. The tax rates provided hereunder are based on the proportion of the gross selling price, or gross value in money, of the shares of stock sold, bartered, exchanged, or otherwise disposed of to the total outstanding shares of stock after listing on the local stock exchange.
Inter-company dividends
Dividends received by a domestic or resident foreign corporation from another domestic corporation are not subject to tax. These dividends are excluded from the taxable income of the recipient.

Dividends received by a non-resident foreign corporation from a domestic corporation are subject to a final withholding tax at the rate of 15% if the country in which the corporation is domiciled either does not impose income tax on such dividends, or allows tax deemed paid credit of 15%. If the recipient is a resident of a country with which the Philippines has a tax treaty, the treaty rate applies if lower. Otherwise, the normal corporate income tax rate of 30% applies.

Foreign income
A Philippine (domestic) corporation is taxed on its worldwide income. A domestic corporation is taxed on income from foreign sources when earned or received, depending on the accounting method used by the taxpayer. Double taxation is generally relieved through a credit for foreign taxes. However, a taxpayer can take a deduction for foreign taxes instead, if that leads to a more favourable outcome.

Stock dividends
A Philippine corporation can distribute stock dividends tax-free, proportionately to all shareholders.

Other significant items
Interest on bank savings, time deposits and money market placements, and royalties received by domestic or resident foreign corporations from a domestic corporation, are subject to a final tax of 20%. Interest income of domestic or resident foreign corporations from FCDU deposits is subject to a final tax of 7.5%. Such income is excluded from gross income reportable in corporate income tax returns. Interest on loans granted to residents by OBUs and FCDUs, and income from foreign currency transactions with local commercial banks (domestic), and branches of foreign banks and other FCDUs, are subject to a 10% final tax, while income derived from foreign currency transactions with non-residents is exempt from tax.

Other non-taxable items include proceeds of life insurance policies; return of policy premium; gifts, bequests and devises; interest on certain government securities; income exempt under a treaty; gains from sale, exchange or retirement of bonds, debentures or other certificates of indebtedness with maturities of more than five years; and gains from redemption of shares of stock in mutual fund companies.

Deductions
Depreciation and depletion
Depreciation is generally computed on a straight-line basis, although any reasonable method may be elected if the aggregate amount of depreciation, plus salvage value at the end of the useful life of the property, will equal the cost of the property. Gain
Philippines

on the sale of depreciated property is taxable as ordinary income. Generally, book depreciation should conform to tax depreciation, unless the latter includes incentives. Properties used in petroleum operations may be depreciated over a period of 10 years using the straight-line or declining-balance method, at the option of the service contractor. Properties used in mining operations with expected life of more than 10 years may be depreciated over any number of years between five years and their expected life.

A cost depletion allowance is available as follows:

1. For oil and gas wells – Based on actual reduction in flow and production ascertained not by flush flow, but by the settled production or regular flow; and
2. For mines – An amount not to exceed the market value as used for purposes of imposing the mining *ad valorem* taxes on the products mined and sold during the year.

**Net operating losses**
A net operating loss for any taxable year immediately preceding the current taxable year, which had not been previously offset as a deduction from gross income, may be carried over as a deduction from gross income for the next three consecutive taxable years immediately following the year of this loss (except losses during the period when the taxpayer was tax-exempt), provided there has been no substantial change in the ownership of the business or enterprise. For mines other than oil and gas wells, a net operating loss calculated without the benefit of incentives provided for under Executive Order (EO) No. 226, or the Omnibus Investments Code of 1987, as amended, incurred in any of the first 10 years of operation may be carried over as a deduction from taxable income for the next five years immediately following the year of such loss. Loss carrybacks are not allowed.

**Payments to foreign affiliates**
A Philippine corporation can claim a deduction for royalties, management service fees and interest charges paid to foreign affiliates, provided such amounts are equal to what it would pay an unrelated entity, and the appropriate withholding taxes are withheld and remitted. The registration of licensing and management agreements, now known as technology transfer arrangements (TTAs), has been liberalised. Only TTAs not conforming to certain provisions of the Intellectual Property Code require approval by, and registration with, the Documentation, Information and Technology Transfer Bureau of the Intellectual Property Office (formerly Bureau of Patents, Trademarks and Technology Transfer) to render the contracts enforceable.

**Taxes**
Corporate taxpayers can claim a deduction for all taxes paid or accrued within the taxable year in connection with their trade or business, except for the following:

1. Philippine income tax;
2. Income taxes imposed by authority of any foreign country, unless the taxpayer elects to take a deduction in lieu of a foreign tax credit;
3. Estate and donor’s taxes; and
4. Taxes assessed against local benefits of a kind tending to increase the value of the property assessed.
In the case of a foreign corporation, deductions for taxes are allowed only if they are connected with income from sources within the Philippines.

**Special deductions**
A resident foreign corporation is allowed to claim allocated head office expenses as a deduction, subject to compliance with certain requirements.

**Other significant items**
The deduction for charitable contributions ordinarily may not exceed 5% of taxable income. However, contributions to certain institutions are 100% deductible, subject to certain conditions. Special deductions are allowed for certain businesses, for example insurance, mining and petroleum. The allowable deduction for interest expense is reduced by an amount equal to 33% of interest income that is subject to final tax. Entertainment, amusement and recreation expenses should not exceed 0.5% of net sales for taxpayers engaged in sale of goods or properties, or 1% of net revenue for taxpayers engaged in sale of services, including professionals and lessors of properties.

Effective 1 July 2008, corporate taxpayers are given the option to avail of the optional standard deduction computed at 40% of gross income. The optional standard deduction shall be in lieu of the itemised operating expenses.

**Group taxation**
Group taxation is not permitted.

**Tax incentives**

**Inward investment**
See Capital investment.

**Capital investment**
Tax incentives available to export enterprises registered with the Board of Investments (BOI) are as follows:

1. Income tax holiday giving full exemption from corporate income tax for six years for pioneer firms and those locating in less-developed areas, and four years for non-pioneer firms from the date of commercial operation, or target date of operation, whichever is earlier. Expanding export-oriented firms are given three years. If prescribed conditions are met, an income tax holiday may be extended by up to three years. In no case, however, can an income tax holiday exceed eight years. Subject to certain exceptions, new and expansion projects located in the National Capital Region (NCR) or Metro Manila are no longer entitled to the income tax holiday;
2. Tax and duty exemption on imported spare parts and supplies for export producers with a customs bonded manufacturing warehouse exporting at least 70% of annual production, if foreign-owned or 50%, if Filipino-owned;
3. Full deduction of the cost of major infrastructure undertaken by enterprises in less-developed areas;
4. Additional deduction of 50% of the incremental labour expense if the prescribed ratio of capital assets to annual labour is met, and 100% of the incremental labour if located in less-developed areas within five years from date of registration (this incentive cannot be availed of simultaneously with the income tax holiday);
5. Ten-year exemption from taxes and duties on importation of breeding stock and genetic materials;
6. Tax credit on domestic breeding stocks and genetic materials (10 years);
7. Exemption from wharfage, any export tax, duty, impost, or fees; and
8. Tax credits equivalent to taxes and duties paid on purchases of raw materials, supplies and semi-manufactured products forming part of the products for export.

**Other incentives**

Other incentives available are as follows:

Export and free-trade enterprises, information technology (IT) enterprises, and special economic zone developers/operators (including IT buildings located in Metro Manila and IT parks) registered with PEZA are entitled to an income tax holiday of six years for pioneer firms, and four years for non-pioneer firms. Foreign articles brought into the zones will be exempt from import duties and taxes. Local purchases of goods from VAT-registered suppliers outside the economic zones are zero-rated. After the lapse of the income tax holiday incentives, enterprises registered and operating within special economic zones/export processing zones will pay only 5% final tax on gross income earned, in lieu of paying all local and national taxes. A regional or area headquarters established in the country as a supervisory, communications and coordination centre for a corporation’s subsidiaries, affiliates and branches in the Asia-Pacific region, and whose headquarters do not derive income from the Philippines, are not subject to any income tax nor value-added tax, and are entitled to certain non-tax incentives. Regional operating headquarters (ROHQ) that are allowed to derive income in the Philippines by performing qualifying business services to its affiliates, subsidiaries, or branches in the Philippines, in the Asia-Pacific Region and other foreign markets may avail itself of the following incentives:

1. Income tax at the preferential rate of 10% of its taxable income;
2. Exemption from all kinds of local taxes, fees, or charges imposed by a local government unit, except real property tax on land improvements and equipment;
3. Tax and duty-free importation of equipment and materials for training and conferences, which are needed and used solely for its functions as ROHQ and which are not locally available, subject to the prior approval of the BOI;
4. Importation of new motor vehicles, subject to the payment of corresponding duties and taxes; and
5. Exemption from travel tax, specific immigration fees and requirements, subject to certain conditions.

The following are the incentives granted to exporters under the Export Development Act (Republic Act No. 7844):

1. Exemption from Presidential Decree No. 1853 (requiring 100% of Letter of Credit), provided that the importation shall be used for the production of goods and services of export;
2. Tax credit for incremental export performance. The tax credit for increase in current export revenues shall be computed as a percentage to be applied on the incremental export revenue converted to pesos at the current rate. The percentages or rates are as follows:

   - For the first five percent (5%) increase in annual export revenues over the previous year – 2.5%;
• For the next 5% increase – 5.0%;
• For the next 5% increase – 7.5%; and
• In excess – 10.0%.

(This incentive, however, is not available for exporters enjoying ITH or VAT exemption or whose local value-added tax is below 10%).

3. In addition to the above incentive, all existing incentives being enjoyed by the enterprise if registered with the BOI, PEZA, SBMA, CDC, or other ecozone regulating agencies.

**Withholding taxes (WHT)**

Corporations and individuals engaged in business and paying certain types of income to non-residents are required to withhold the appropriate tax, which generally is 30% in the case of payments to non-resident foreign corporations, or 25% for non-resident aliens not engaged in trade or business. For withholding taxes on resident corporations, see the discussions under the Income determination section.

**Tax treaty rates**

For countries with which the Philippines has concluded tax treaties, the taxes to be withheld are as follows:

As of April 2010:

**Notes**

1. The lower rate generally applies if the beneficial owner of the dividends is a company with a substantial ownership in the dividend paying company.
2. Interest derived by a foreign government or its agencies is typically exempt from Philippine tax. Many treaties also contain special rules for both Philippine and home country taxation of interest paid on instruments secured by a government agency of one of the countries. Such provisions have been excluded from the analysis.
3. A 15% rate applies under domestic law if the home country exempts the dividend from tax or permits a 20% or greater credit for corporate taxes paid by the company paying the dividend.
4. Entitlement to the lower rate depends on how the dividend will be taxed in Australia.
5. The 10% rate applies to interest paid in respect of the public issues of bonds, debentures, or similar obligations.
6. The lower rate applies to royalties paid by an enterprise registered with the Philippine Board of Investments and engaged in preferred areas of activity.
7. The threshold for substantial ownership is 10%.
8. The 10% rate also applies to interest paid by a company registered with the Board of Investments and engaged in preferred pioneer areas of investment in the Philippines.
9. The treaty also contains a most-favoured-nation rule, limiting the Philippine tax on royalties to the lowest rate of Philippine tax that may be imposed on royalties of the same kind paid in similar circumstances to a resident of a third state.
10. The 15% rate applies to royalties arising from the use of, or the right to use, any copyright of literary, artistic, or scientific work including cinematograph films or tapes for television or broadcasting.
11. The threshold for substantial ownership is 25%.
12. The 25% rate applies to royalties arising from the use or the right to use trademarks and cinematographic films, films or tapes for television or radio broadcasting. The 15% applies to any other royalties.
13. The 10% rate applies to the use of, or the right to use, any patent, trademark, design or model, plan, secret formula or process, or from the use of, or the right to use, industrial, commercial, or scientific equipment, or for information concerning industrial, commercial, or scientific experience. Strictly, application of the rate is generally at the discretion of the Philippine Competent Authorities, but the BIR has never raised this as an issue.
14. The 10% rate applies to royalties arising from the use of, or the right to use, any copyright of literary, artistic, or scientific work (other than copyright of cinematograph films), any patent, trademark, design or model, plan, secret formula or process, or from the use
of, or the right to use, industrial, commercial, or scientific equipment, or for information concerning industrial, commercial, or scientific experience.
15. The 15% rate applies to royalties paid by an enterprise registered and engaged in preferred areas of activities, and to royalties in respect of cinematographic films or tapes for television or broadcasting, and for the use of, or the right to use, any copyright. The 25% rate applies to other royalties.
16. The 10% rate also applies to interest paid in connection with the sale on credit of any industrial, commercial, or scientific equipment.
17. The 10% rate also applies to interest paid on any loans granted by a bank.
18. The 15% rate also applies to royalties in respect of cinematographic films or tapes for television or broadcasting.
19. The 10% rate applies to interest paid on government securities, or bonds or debentures. The 15% rate applies to any other interest income.
20. The 15% rate applies to royalties paid for the use of, or the right to use, cinematographic films and films or tapes for radio or television broadcasting.
21. The 7.5% rate applies to the lease of containers. The 10% rate applies to royalties paid by an enterprise registered with the Board of Investments. The 25% rate applies to other royalties.
22. The 10% rate applies to royalties paid by an enterprise registered with the Board of Investments and engaged in preferred pioneer areas of activity. The 15% rate applies to rentals from cinematographic films and tapes for television or broadcasting. The 25% rate applies to all other royalties.
23. The threshold for substantial ownership is 15%.
24. The 10% rate applies to royalties paid by an enterprise registered with the Board of Investments and engaged in preferred pioneer areas of activity. The 20% rate applies to rentals from cinematographic films and tapes for television or broadcasting. The 15% rate applies to all other royalties.

**Tax administration**

**Returns**
Corporations should file their returns and compute their income on the basis of an accounting period of 12 months. This accounting period may be either a calendar year or a fiscal year. With prior approval of the Commissioner of Internal Revenue, corporations may change their accounting period from calendar year to fiscal year, or vice versa. Corporate taxpayers file self-assessing returns. Electronic filing and payment of taxes are available under the Electronic Filing and Payment System (EFPS) of the BIR.

**Payment of tax**
Every corporation files cumulative quarterly income tax returns for the first three quarters, and pays the tax due thereon within 60 days after each quarter. A final adjustment return covering the total net taxable income of the preceding taxable year must be filed on the fifteenth day of the fourth month following the close of the taxable year. The balance of the tax due after deducting the quarterly payments must be paid, while the excess may be claimed as refund or tax credit. Excess estimated quarterly income taxes paid may be carried over and credited against estimated quarterly income tax liabilities for succeeding taxable years. Once the option to carry over has been made, such option is irrevocable for that taxable period, and no cash refund or tax credit certificate (TCC) is allowed.

Significant developments

At the end of 2009, Poland adopted the law to implement three major European Union (EU) Directives on VAT (VAT Package). The law came into force as of 1 January 2010, and set new rules related to the following areas:

- Place of the supply of services;
- VAT refund (eased procedures related to cases where a business is entitled to a claim VAT refund from a foreign country belonging to the EU); and
- Reporting requirements aimed at preventing tax evasion.

On 1 July 2009, new rules came into force with respect to withholding taxes on interest and royalties paid to related companies based in the EU. Before that date, such payments were subject to a 10% preferential withholding tax rate provided that specified conditions were met. Starting from 1 July 2009, the specified conditions remained the same, however, the preferential withholding tax rate was cut to 5%.

Taxes on corporate income

The corporate income tax (CIT) is the only tax levied on corporate income. The CIT rate is 19%.

The CIT applies to all legal entities (including, but not limited to, corporations), which are companies under organisation and “organisational entities without corporate status” (with the exception of partnerships), which run business activities. Partnerships are regarded as “transparent entities,” which means that partnerships are not taxpayers. Instead, the income generated by partnerships is allocated to and taxed in the hands of the partners.

Further to these rules, the CIT applies to companies with foreign participation. Such companies may be set up as either limited liability companies or joint-stock companies. There is no limitation on the percentage of foreign participation. Both types are subject to the general CIT rules, including the 19% tax rate. The same rate applies to branches of foreign companies (see the “Branch income” section for more information).

Corporate residence

A company is considered to be a resident if its registered office or management is located in Poland. Polish residents are subject to tax on their worldwide income. Non-residents are taxed only on their Polish-sourced income.
The tax authorities’ right to tax a non-resident is further limited if the non-resident’s home country concluded a double-tax treaty with Poland. In this case, the Polish tax authorities are entitled to tax only the portion of the non-resident’s income that is derived through a permanent establishment (PE) located in Poland. The exceptions relate to specific types of income such as royalties, interest, dividend and capital gains that are taxed based on special treaty rules.

**Other taxes**

**Value-added tax (VAT)**
Polish VAT applies to the following activities:

- Supplies of goods and services within the territory of Poland;
- Exports of goods outside the territory of the EU;
- Imports of goods from countries that do not belong to the EU;
- Intra-community acquisitions of goods (imports from countries belonging to the EU); and
- Intra-community supplies of goods (exports to the countries belonging to the EU).

**VAT rates**
The VAT rates are 22% (standard rate), 7%, 3%, 0% and exemption. The standard 22% VAT rate generally applies to the supply of all goods and services, except for those that are covered by special VAT provisions that provide other rates or treatments. Supplies covered by a reduced rate of 7% include, among others, supplies of pharmaceutical products and passenger transport services. Supplies of certain agricultural products will be subject to VAT at a rate of 3% until the end of 2010 (a 7% rate will apply from 2011). Zero-rated activities include, among others, exports of goods to countries outside the EU. VAT-exempt supplies include, among others, certain financial, insurance and educational services.

**Basic calculation rules**
In general, the VAT due equals the VAT on outputs decreased by the VAT on inputs (in other words, input VAT is deducted from output VAT). Input VAT may be deducted from output VAT when a business (with a VAT payer status) receives an invoice for goods or services purchased. Input VAT may not be deducted unless a purchased supply is linked to the VAT-able activities. Furthermore, the deductibility of input VAT is restricted by the VAT law with respect to the purchase of certain goods and services. In addition, subject to numerous conditions, output VAT may be reduced when receivables, resulting from VAT-able sales, become uncollectible.

**VAT refunds**
The Polish VAT law allows direct refunds when input VAT (available for deduction) exceeds output VAT. A Polish business may also be entitled to the VAT refund owed by another country under certain circumstances. If such country belongs to the EU, the procedure is substantially simplified due to the EU Directive 2008/9/EC. The same directive provides favourable rules for businesses based in other EU countries that are seeking VAT refunds in Poland. This directive was implemented in Poland as of 1 January 2010.

**Reporting rules**
Generally, the VAT reporting period is one month. VAT returns should be submitted by the twenty-fifth day of the month following the VAT reporting period. From 1 January
2009, all taxpayers may opt for a quarterly, instead of monthly, reporting period. Note that businesses involved in intra-community acquisitions or supplies of goods are obliged to submit additional VAT returns with respect to these particular transactions.

**International services**

The treatment of international services largely depends on the place of supply, since it is determinative of whether particular services are subject to the Polish VAT. The Polish VAT applies only to those services that are supplied within Poland. If a Polish entity provides such services, it should invoice the recipient based on general rules (i.e., rules that are equally applicable to purely domestic services). If a Polish business receives services that are supplied in Poland (and such services are rendered by a foreign provider), such Polish business should recognise “import of services,” and as a result, should report output and input VAT of the same amount (equal to the value of the services multiplied by the applicable VAT rate). Therefore, in most cases, the import of services is VAT-neutral. Finally, taxpayers should consider circumstances in which a Polish business renders services outside of Poland. In this case, as previously mentioned, the services are not subject to the Polish VAT, however, the business in question is entitled to deduct input VAT paid in relation with these activities.

The rules determining the location where international services are provided changed on 1 January 2010, following the implementation of the EU Directive 2008/8/EC. Generally, the place of supply depends on the recipient of services. If the recipient is a business entity, the place of supply is determined to be the recipient’s country; if the recipient is a private person, the place of supply is determined to be the service provider’s country. However, these general rules are subject to several exceptions.

**Excise duties**

Excise duties are levied on the production, sale, import and intra-community acquisition of “excise goods,” which are listed in the excise duty law and include (among others) alcohol, cigarettes, energy products (e.g., petrol, oils, gas etc.), passenger cars and electricity.

Depending on the excise goods in question, one of four methods of calculating excise tax may be applicable:

- A percentage of the taxable base;
- An amount per unit;
- A percentage of the maximum retail price; or
- An amount per unit and a percentage of the maximum retail price.

The excise rate for car petrol is PLN 1,565 per 1,000 litres.

Passenger cars are subject to the following excise rates:

- 3.1% for cars with engine cubic capacity that does not exceed 2000cm³; and
- 18.6% for cars with engine cubic capacity that exceeds 2000cm³

Notwithstanding the above, Polish excise duty law provides for a wide system of excise duty exemptions as well as 0% taxation. Under specified circumstances such preferential treatment may apply to, specified goods that are otherwise taxed based on general rules. This concerns, for example, specific energy products used for other purposes than as a fuel or for heating.
Property tax
Property tax rates are fixed by municipalities within limits set in the Law on Local Taxes and Fees. In 2010, land used for business purposes is subject to a rate limit of PLN 0.77 per square metre. Buildings used for business purposes are subject to a rate limit of PLN 20.51 per square metre.

Capital tax
A share capital increase is subject to a 0.5% capital tax, payable by a company that receives a capital contribution. This tax applies equally to limited liability companies as well as joint-stock companies. A merger, division, or transformation of a company into another company is no longer subject to capital tax, even if the transaction results in a share capital increase for any party. A similar exemption applies to a capital increase resulting from an in-kind contribution, including a whole business or a branch thereof.

Branch income
Foreign businesses are allowed, under certain conditions, to establish their branch offices (exclusively within the scope of their “foreign” business activity) and representative offices (exclusively with regard to promotion and advertising) in Poland.

A branch office almost always has PE status in Poland. Once a branch is established, the foreign company pays CIT at the standard rate of 19%, based on the income attributable to the operations of the Polish branch. For this purpose, as well as for accounting purposes, a branch is obliged to keep accounting books that include all the data necessary to establish the taxable base. In this respect, general income determination rules relevant to Polish companies apply to branches as well. In the few cases in which a branch can demonstrate, based on a double-tax treaty, that its business presence in Poland does not amount to a PE, its profits are not subject to Polish corporate income tax.

Income determination

Tax base
The tax base is the overall income, which is a difference between aggregated taxable revenue and aggregated tax-deductible costs. A tax-deductible cost is defined as a “cost incurred in order to generate revenue” as well as the cost incurred to “protect a source of revenue.”

Subject to numerous exemptions, the tax base includes all sources of income. Consequently, there is no special treatment for income such as capital gains or interest.

In practice, taxable income is calculated by adjusting the profit reported for accounting purposes. The relevant adjustments are necessary due to differences between tax and accounting treatment of numerous revenue and cost items. As a result, the taxable base is usually higher than the accounting profit.

Inventory
Generally, the value of lost inventory may be included as a tax-deductible cost. Other write-offs in the value of inventory are not recognised for tax purposes until the inventory in question is sold.
When inventory is lost or sold, a tax deduction is allowed for the costs incurred when the inventory was purchased. The methods acceptable for inventory valuation for tax (and accounting) purposes are standard cost, average (weighted) cost, first-in, first-out (FIFO), and last-in, first-out (LIFO).

**Capital gains**
There is no separate capital gains tax. Capital gains or losses are aggregated with an entity's other taxable income or losses. Capital losses are tax-deductible.

**Domestic dividends**
Dividends received from Polish residents (domestic dividends) are excluded from overall income. Instead, such dividends are subject to a 19% tax, which is withheld and remitted to the tax office by the payer of dividends.

However, based on the participation exemption, which was introduced and effective from 1 January, 2007, domestic dividends are no longer subject to the 19% tax, provided that the Polish beneficiary holds at least a 15% share in the paying company for at least two years.

**Foreign income**
Resident corporations are taxed on their worldwide income unless there is an applicable double-tax treaty in place between Poland and the relevant foreign state that provides that the foreign income shall be exempt from taxation in Poland. In all other cases (in particular, when the income is not covered by any treaty), Poland uses the credit method to avoid double taxation. Therefore, a Polish resident is liable for income tax imposed on its worldwide income, but the tax is proportionately reduced by the income tax paid abroad.

**Dividends from abroad**
Generally, dividends collected by a Polish corporate tax resident, if paid by a non-resident, are treated as regular income and taxed at the standard CIT rate. Corporate tax on such dividends paid in other countries may be credited proportionately against Polish CIT. The CIT law also provides for an “underlying tax credit,” which is related to the CIT paid by a foreign subsidiary under a foreign tax jurisdiction, subject to a number of conditions. Specifically, a double-tax treaty between Poland and the subsidiary’s country of residence should be in place and the Polish recipient of the dividend should hold at least 75% of the shares in the foreign subsidiary.

Much more favourable rules apply to dividends received from subsidiaries having their residences in EU countries or in Iceland, Liechtenstein, Norway or Switzerland. Such dividends are CIT-exempt (i.e., participation exemption) provided that the Polish recipient holds at least 10% of the shares in the paying company for at least two years (with respect to the Swiss subsidiaries, the minimum shareholding is 25%).

**Transfer pricing**
Transactions between related parties should be conducted in accordance with the arm’s-length principle. The tax authorities may increase the taxable base if the pricing used between related parties differs from what would have been used between unrelated parties in a similar business transaction and the difference results in income being shifted from a Polish taxpayer to another entity (whether a Polish resident or not). Similar rules apply to transactions between Polish residents and the residents...
of tax haven countries. These transactions may be subject to the transfer pricing principles even if the parties thereto are not related. The CIT law also contains detailed requirements for transfer pricing documentation.

Taxpayers can reduce the transfer pricing risk by applying for an advance pricing arrangement (APA). An APA decision shall be issued by the Minister of Finance in response to a taxpayer's application. An APA will oblige a taxpayer to follow a specified methodology when calculating the transfer prices applicable to transactions between related entities. In exchange, the tax authorities may not challenge the agreed upon methodology.

**Deductions**

**Tax depreciation**

Depreciation is treated as a tax-deductible cost. Generally, depreciation allowances are calculated based on the straight-line method and the maximum rates provided in the CIT law. If this is the case, a taxpayer deducts equal annual write-offs, calculated by multiplying the maximum rate of depreciation by the asset's initial value until the total value of write-offs equals the initial value (typically, the initial value equals the purchase price).

For certain categories of machinery and vehicles (but not passenger cars) the reducing-balance depreciation method may be applied. Under this method, the tax depreciation may be accelerated during the initial period of the asset's use by multiplying the statutory maximum rate by two. The rate is then applied to the net value of fixed assets (i.e., initial value reduced by earlier annual write-offs). The reducing-balance method is applied until the annual depreciation write-off equals the hypothetical write-off that would be made under the straight-line method. From this point, the depreciation allowance is taken based on the straight-line method for its remaining useful life.

The main categories of assets and the related statutory annual tax depreciation rate:

<table>
<thead>
<tr>
<th>Category</th>
<th>Rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Various buildings and constructions</td>
<td>1.5–10.0</td>
</tr>
<tr>
<td>Machinery and equipment (general)</td>
<td>7.0–20.0</td>
</tr>
<tr>
<td>Machinery for road building and construction</td>
<td>18.0–20.0</td>
</tr>
<tr>
<td>Machinery for paper industry</td>
<td>14.0</td>
</tr>
<tr>
<td>Office equipment</td>
<td>14.0</td>
</tr>
<tr>
<td>Computers</td>
<td>30.0</td>
</tr>
</tbody>
</table>

Apart from the above, the Polish CIT law includes provisions for accelerated depreciation (within specified limits) for assets used in deteriorated conditions and for second-hand assets.

**Tax losses**

A tax loss reported in a tax year may be carried forward over the next five consecutive tax years; however, in any particular tax year, the taxpayer may not deduct more than 50% of the loss incurred in the year in which it was reported. For example, a taxpayer that incurred PLN 100 annual loss in 2010 may carry it forward to 2011-2015. However
the maximum loss deduction in any of these years may not exceed PLN 50 (assuming that there are no other losses available for deduction).

**Payments to foreign affiliates**
Deductions may be claimed for royalties, management services and interest charges paid to foreign affiliates. However, note that interest expenses are subject to the thin capitalisation restrictions (see the following section). Furthermore, note that transactions with related companies should be made according to the market conditions. Where a company shifts income to another entity (especially a foreign entity), the tax authorities may adjust the taxable base upward (see Transfer pricing section).

**Thin capitalisation**
A portion of the interest paid by a Polish company on a loan granted by a qualified lender (a qualified shareholder or a qualified sister company) will not be considered a tax-deductible cost if the value of the Polish company’s overall debt from the shareholders and other affiliates mentioned in the tax law exceeds three times the value of the Polish company’s share capital (3:1 debt-to-equity ratio). A qualified shareholder is defined as a holder of 25% or more of the voting power of a Polish company. A qualified sister company is a company of which a shareholder holds at least 25% of the value of the shares.

**Taxes**
Income tax and, in most cases, VAT are not deductible. However, VAT is deductible for CIT purposes if it cannot be offset against the company’s output VAT. Other taxes, if paid in the course of business activities, are generally deductible in full.

**Business expenses**
Generally, a tax-deductible cost is defined as a cost incurred in order to generate taxable revenue or to “protect a source of income”. The last element of the definition of a tax-deductible cost was added a few years ago to reduce uncertainties surrounding the deductibility of business expenses that do not directly generate revenue.

The CIT law provides a list of items that are not deductible for tax purposes, even if the items meet the general conditions described above. This list contains over 60 items including, among others, the following:

1. Written-off, lapsed accounts receivable;
2. Entertainment costs;
3. Accrued but unpaid interest;
4. Accounting and comparable provisions;
5. Tax penalties and penalty interest;
6. A portion of the insurance premium paid on a passenger car – the portion calculated on the excess of the car value over EUR 20,000; and
7. A portion of the depreciation write-offs made on a passenger car – the portion calculated on the excess of the car value over EUR 20,000.

Furthermore, expenses incurred in connection with the acquisition of fixed and intangible assets (e.g., licenses, trademarks, know-how) are not deductible directly. Instead, the acquired assets are subject to depreciation. If such assets are sold, a business is entitled to deduct the net value (cost of acquisition reduced by the overall value of the tax depreciation allowances made). Similar treatment relates to the
acquisition of shares or land, except that these particular assets are not depreciable. Therefore, the full cost of an acquisition of shares or land may be deducted when such assets are sold.

**Group taxation**

The CIT law includes provisions on group taxation (i.e., in theory, a group of companies) if it meets certain conditions and can be treated as a single taxpayer. However, the required conditions are extremely demanding and as such, very few taxpayers of this type exist.

**Tax incentives**

Polish legislation provides investment incentives related to business activities carried out in 14 zones defined as Special Economic Zones. A business entity can benefit from tax incentives offered by a Special Economic Zone, provided that the entity obtains a permit from the Ministry of the Economy to conduct business activities there and meets other legal requirements.

Most of the Special Economic Zones offer income tax exemption of up to 50% of the investment expenditure. In other words, the annual CIT due is reduced by 50% of the investment expenditure. If the amount available for deduction exceeds the annual CIT due, the excess may be utilised in the following years. Furthermore, entities classified as small- or medium-sized may be granted income tax exemptions of up to 65% of their investment expenditure. Consequently, in the case of significant investments, it is possible for businesses that run activities in the Special Economic Zones to enjoy total exemption from income tax for a considerable period.

**Withholding taxes (WHT)**

**Domestic provisions: General rules**

The general WHT rate for dividends is 19%. Other types of income, such as income from the redemption of shares or liquidation of a company, are taxed at the same 19% rate. The general WHT rate on interest and royalties paid to non-residents is 20%. These WHT rates may be reduced by double-tax treaties.

There is also a 20% WHT on payments made to non-residents as consideration for intangible supplies (such as consulting services). However, if a payment is made to a country that has a double-tax treaty with Poland, this tax may be avoided with the completion of certain minimal administrative formalities.

**Special treatment: EU directives**

The CIT law provisions and certain EU directives provide special treatment for dividends, royalties and interest paid to numerous European countries. Dividends paid to corporate residents of EU countries as well as Iceland, Liechtenstein, Norway and Switzerland are exempt from WHT, subject to certain conditions specified in the CIT law. The basic requirement is that the foreign beneficiary holds at least 10% of the shares in the Polish company for a minimum of two years. This exemption also applies to income resulting from the redemption of shares or the liquidation of a company.

When joining the EU, Poland was granted a transitional period to phase out the WHT on interest and royalty payments paid by Polish corporate residents to associated EU
companies. Starting from 1 July 2009, the WHT rate on these payments is 5%. Starting from 1 July 2013, a full exemption will apply. In general, the transitional rules, as well as the full exemption after 1 July 2013, only apply to interest and royalty payments between associated companies (parent‑subsidiary relationships or sister‑sister relationships) in which capital involvements are significant.

Treaty rates
If EU special rules do not apply, Polish companies are required to withhold tax on payments of dividends, interest and royalties based on domestic CIT Law provisions. However, the domestic withholding tax (WHT) rates can be decreased by a double‑tax treaty concluded between Poland and the payment recipient’s country of residence.

The following table lists the WHT rates as provided in the treaties concluded by Poland. Notably, the following table shows only rates that result from general treaty provisions; the treaties themselves occasionally include special provisions (applicable in special circumstances or to special entities) that provide lower WHT rates than the ones listed.

Furthermore, if a treaty rate is higher than a domestic one, the latter should apply.

### Tax administration

#### CIT settlements

The annual CIT return should be submitted to the tax office within three months following the end of the tax year. The same deadline applies to the settlement of the annual CIT liability. In financial terms, the final settlement is not significant, since most of the annual liability is paid by CIT advances throughout the tax year. The CIT advances should be paid for each month by the twentieth day of the following month. The CIT advances do not need to be reported and thus, the annual return is the only tax return associated with the CIT.

Entities that started business activities (except for companies organised as a result of certain transformations) and entities whose gross sales revenue (including VAT) in the prior tax year did not exceed EUR 1,200,000 are entitled to opt to make advance settlements on a quarterly basis (instead of a monthly basis).

#### VAT settlements

Similar to the CIT, the VAT reporting period is a month. VAT returns should be submitted by the twenty-fifth day of the following month. However, starting from 1 January 2009, all taxpayers are entitled to opt for filing VAT returns on a quarterly basis. Taxpayers choosing a quarterly reporting period should submit VAT returns by the twenty-fifth day of the month following the last month of the quarter being reported. Payment of the VAT due should be made by the same deadline as the one provided for filing the monthly (or quarterly) VAT return.

Finally, businesses involved in intra-community acquisitions or supplies of goods (cross-border sale transactions within the EU), are obliged to submit additional VAT returns that report these particular transactions.

Significant developments

2010 state budget
Given the elections in September 2009 and the change of government, the state budget for 2010 was published on the 28 April 2010. The most significant amendments regarding corporate income tax are summarised below.

Bonuses and other variable remuneration paid to managers or board members
These are now subject to autonomous taxation at the rate of 35%, when the respective amount (i) corresponds to more than 25% of the annual salary and (ii) exceeds EUR 27,500; no taxation arises if not less than 50% of the payment is deferred for at least three years and the company has positive results during the same period; in 2010, the rate increased to 50% in case of managers or board members of banks and financial institutions.

Tax losses carryforward
The period to carryforward tax losses has been reduced from six to four years.

Limitation to tax benefits
The corporate income tax assessed after the deduction of tax benefits or derived from special tax regimes cannot be lower than 75% (formerly 60%) of the amount that would be assessed if no deductions would apply.

Elimination of double taxation on dividends distributed by European Economic Area (EEA) subsidiaries
Portuguese parent companies are now exempt from taxation on dividends received from subsidiaries resident in a Member State of the EEA; this means that besides the 27 European Union (EU) Member States, Iceland, Liechtenstein and Norway now benefit from this regime; additionally, no withholding tax is levied on dividends paid by a Portuguese subsidiary to a parent company resident or to a permanent establishment located in a EEA member state, provided the conditions foreseen in the EU Parent/Subsidiary, as transposed by Portugal, apply (at least 10% ownership or EUR 20 million acquisition value and at least one year holding period); since Liechtenstein is black-listed, the regime will apply after the conclusion of agreements on exchange of information.
Relief from taxation on capital gains under the reinvestment regime
The reinvestment of the sales proceeds arising from the sale of shares no longer provides for a relief from a taxation on the capital gains realised, in case the reinvestment is made in Portuguese State bonds; this measure aims to harmonise with the EU law, as the regime did not apply in case of acquisition of foreign State bonds. The regime is still in force in case of reinvestment in other securities or tangible assets (conditions apply).

The Stability and Growth Programme for 2010-2013
In March 2010, the Portuguese Government presented to the Parliament the Stability and Growth Programme for 2010-2013 (PEC – “Programa de Estabilidade e Crescimento”). PEC is the Portuguese Government’s strategy to reduce public deficit, reducing tax benefits and increasing tax revenues, while at the same time aiming a structural reform towards modernisation and competitiveness of the Portuguese economy.

The measures proposed in the PEC focus in particular on the period 2010 through 2013. These are, among others, an autonomous taxation that will apply to fringe benefits, namely daily allowances, use of company car and other benefits in kind; salaries and other remuneration received by board members, directors or shareholders of loss-making companies shall be subject to autonomous taxation, above certain limits yet to be defined.

On 12 May 2010, additional measures within PEC were announced – an additional corporate income tax (CIT) of 2.5% will apply on taxable profit above EUR 2 million.

A new accounting system
The adoption of International Accounting Standards (IAS) in the EU had an important impact in Portugal, leading to the adoption of a new accounting system – “Sistema de Normalização Contabilística” (SNC). This also had a significant impact on the CIT Code and other legislation – the main changes are as follows:

• Republication of the CIT Code and publication of a new depreciation regime, which adjusts the tax terminology to the accounting terms;
• Greater independence between the accounting and tax rules (partial dependence);
• New rules for CIT assessment; and
• New and more detailed obligations at the level of the tax file (“Dossier Fiscal”).

From 1 January 2010 onwards, new tax rules are in force, including:

• Depreciation and amortisation are allowed as tax-deductible expenses to the extent they are accounted for as current year costs or costs incurred in previous tax years (formerly only tax-deductible if accounted for in the current tax year);
• Different depreciation methods, besides straight-line method and declining-balance method, may be applied without previous approval from the Portuguese Tax Authority (annual depreciation cannot exceed the depreciation resulting from using either the straight-line or declining-balance methods);
• Upon authorisation from the Tax Authorities, it is possible to change the depreciation method during the lifetime of the asset;
• Depreciation of light vehicles and capital losses realised are disallowed as a tax-deductible cost in the amount that exceeds an amount to be defined by Decree (previously EUR 40,000; EUR 29,927.87 in 2009 and previous tax years);
• Assets with an acquisition cost not exceeding EUR 1,000 (formerly EUR 199.52) are allowed as a tax cost of the year;
• Costs incurred with loans are included in the acquisition or production value of inventories with a useful life of more than one year;
• Advertising campaigns – It is no longer possible to deduct the costs over three years, except for campaigns launched prior to 2010;
• Impairment losses on depreciable assets disallowed as tax-deductible expenses are deductible over the remaining lifetime of the asset or until the period immediately prior to its transfer;
• The provision for guarantees to clients, under certain conditions, is acceptable for tax purposes;
• The criteria used for measuring provisions for accounting purposes (present value) is acceptable for tax purposes;
• The last in, first out (LIFO) inventory method is disallowed; and
• New rules have been issued for financial instruments.

Certain transitional adjustments resulting from the adoption of the new accounting system with tax impact are treated as follows:

• Adjustments in equity with tax relevance are considered for CIT purposes over a five-year period; and
• Supplementary contributions to pension funds required to cover the increase of responsibilities as a consequence of the adoption of the SNC are deductible over a five-year period.

**Taxes on corporate income**

Two thresholds of taxable income determine the application of the following tax rates:

• Up to EUR 12,500, the tax rate is 12.5%.
• The standard tax rate of 25% is applied to the remaining taxable income.

It should be noted that under the Stability and Growth Programme a new additional taxation of 2.5% (State surtax – “Derrama estadual”) will apply on the excess of taxable profits above EUR 2 million.

The CIT rate is increased in most cases by a municipal surcharge (“Derrama”) of up to 1.5%, computed on the taxable profit before the deduction of tax losses from previous years.

Special rates apply to income generated in Portugal that is attributable to non-residents, see Withholding taxes section.

**Corporate residence**

Tax is assessed on the worldwide income of business entities with their head office or effective management in Portugal. Tax is also applicable to income attributable to a permanent establishment of a non-resident company in Portugal.
Portugal

Other taxes

Surcharges
The following surcharges, self-assessed with the corporate tax, are levied on:

- Representation and entertainment expenses: 10%;
- Company car expenses: 10%; 5% for low-pollution vehicles (not applicable for electrical vehicles);
- Mileage allowance: 5%;
- Per diem allowance: 5%;
- Non-documented payments: 50% (70% for partially or fully exempted taxpayers);
- Company car expenses for which acquisition cost exceeds a limit to be determined by Decree (formerly, EUR 40,000): 20% for taxpayers in a tax loss position;
- Dividends distributed to exempt taxpayers regarding participations held for less than one year: 20%;
- The total amount of the expenses incurred with any compensation paid as a result of the termination of functions of managers or board members, if not related to the productivity targets previously established under the existing labour relation; or the amount that exceeds the remuneration that would be received by the manager or the board member until the term of the labour agreement, in case of redundancy prior to that term; or in all cases if the liability for the payment is shifted to another entity: 35%; and
- The total amount of the expenses incurred with bonuses paid to managers or board members if the respective amount corresponds to more than 25% of the annual salary and exceeds EUR 27,500; at 35%. In 2010, the rate increased to 50% in case of managers or board members of banks and financial institutions.

Value-added tax (VAT)

VAT closely follows the EU Counsel Directive 2006/112/EC, dated 28 November, and is assessed at the normal rate of 20% (14% in the Autonomous Regions of Madeira and the Azores), at an intermediate rate of 12%, and at a reduced rate of 5%.

On 12 May 2010, it was announced that all the VAT rates will be increased by 1%, with effect from 1 July 2010 – the standard rate will increase to 21% (15% in the Autonomous Regions of Madeira and the Azores), the intermediate to 13% and the reduced rate to 6%. In principle these shall be transitory measures, in force until 2011.

Restaurant services, basic canned foods, fruit jellies, fats, honey, coffee, natural water, fruit juices, decorative flowers, petroleum and diesel fuel for equipment for agricultural and fishing activities and certain ecological equipment, are subject to the 12% rate. Food, books, some pharmaceutical products, milk products and certain services are assessed at 5%. Exports and intra-EU-transfer of goods are zero-rated.

As of 1 January 2010, the general rule for taxation of business-to-business (B2B) services is the place where the customer is established or has a permanent establishment, permanent address or where he usually resides. Whereas for business-to-consumer (B2C) services, the general rule remains the place where the
supplier is established. Note that on 1 January 2011; 1 January 2013; and 1 January 2015, additional adjustments to the VAT rules will become effective.

In addition, as of 1 January 2010, the existing procedure for obtaining a VAT refund in another EU member state other than the member state of establishment has been replaced by a new electronic procedure, as indicated in Council Directive 2008/9/CE.

Finally, as of January 2010, the provisions of Council Regulation 143/2008 are in force regarding administrative cooperation and exchange of information concerning the place of supply of services, the special scheme and the refund procedures.

**Stamp tax**

Stamp duty is payable on a wide variety of transactions and documents, at rates that may be set in specific amounts or on a percentage basis. Important examples include the following:

<table>
<thead>
<tr>

**Property tax**

“Imposto Municipal sobre Imóveis” (IMI) is a municipal tax upon which taxable basis is calculated by reference to a formula based on objective criteria, such as the construction cost per square metre, area, age, construction quality and comfort indexes.

The property tax is levied in addition to corporate or individual tax assessed on actual income generated by real estate.

<table>
<thead>
<tr>
<th>Tax rates</th>
<th>%</th>
</tr>
</thead>
<tbody>
<tr>
<td>Urban real estate</td>
<td>0.4–0.7</td>
</tr>
<tr>
<td>Urban real estate (valued under the new rules)</td>
<td>0.2–0.4</td>
</tr>
<tr>
<td>Rural real estate</td>
<td>0.8</td>
</tr>
</tbody>
</table>

The tax rate of municipal tax on properties owned by entities resident for tax purposes in a blacklisted territory is 1%.
Property transfer tax

“Imposto Municipal sobre as Transmissões Onerosas de Imóveis” (IMT) is a municipal tax payable in Portugal on the onerous transfer of local real estate. The tax is levied on the purchaser, and the taxable basis is the same as for IMI, or the price agreed upon by the contracting parties, whichever is higher.

The IMT rates are set at 5% for rural real estate and 6.5% for urban real estate and land for construction. For non-residents located in blacklisted jurisdictions, the rate is 8%.

The transfer of residential property is subject to IMT at marginal and progressive tax rates from 1% up to 8%. An exemption is available for a taxable basis not higher than EUR 90,418, applicable to situations where the residential property is the permanent residence of the acquirer. Taxable basis higher than EUR 561,960 (EUR 557,500 in 2009) is subject to a 6% flat rate, in case the residential property is the permanent residence of the acquirer.

Branch income

Branch profits are taxed on the same basis as corporate profits. Income remitted by a branch to the head office is not subject to taxation.

Income determination

Taxable income is based on the accounting income adjusted according to the specific provisions of the tax legislation, when applicable.

Inventory valuation

Inventories are valued at the lower of the following values: cost or net realisable value. The first-in, first-out (FIFO) and average-cost methods of valuation are accepted.

Inventory adjustments are deductible for tax purposes on the amount accounted for in the tax year, capped at the difference between the acquisition or production value and, if lower, the net realisable value (duly documented) with reference to the balance sheet.

Capital gains

The positive net difference between capital gains and capital losses arising from the disposal of fixed assets or shares, held for more than one year, is taxed as part of normal income.

Capital gains and capital losses are determined by the difference between the sales proceeds, deducted from any related cost, and the acquisition value, deducted from impairment losses and tax-deductible depreciations or amortisations, adjusted by the inflation index (in case of at least two years ownership).

Only half the amount of the negative difference between capital gains and capital losses arising from the disposal of shares or other negative net worth variations related to participations or other parts of the equity of a company, such as supplementary capital contributions, are considered for purposes of assessing the taxable income.

In certain circumstances, only 50% of the net gains on disposal of tangible fixed assets or shares are taxed, provided the sales proceeds are reinvested.
Capital losses regarding shares owned for less than three years when acquired from related companies, offshore companies or companies subject to a privileged taxation regime are not deductible. Capital losses are also not tax-deductible if the shares are transferred to related parties, offshore companies or entities subject to a privileged taxation regime.

Capital gains/losses realised by holding companies (“Sociedade Gestora de Participações Sociais”, or SGPS) are not taxed/deductible, if the underlying shares have been held for more than one year (or three years if the shares were acquired from related parties, offshore companies or entities subject to a special tax regime).

**Inter-company dividends**

For Portuguese-resident companies holding shares in other Portuguese companies, or in companies resident in Portuguese African Speaking countries, or in companies resident in the EU or the EEA (meeting the p/Subsidiary Directive 90/435/CEE), 100% of the dividends distributed are excluded from the taxable income. In case of Portuguese, EU and EEA subsidiaries, the shares should represent at least 10% of total capital, or have an acquisition value not lower than EUR 20 million, and if it has been held for at least one year (this minimum holding period should be met before or after distribution). For holding companies or SGPS, the deduction requires only the fulfilment of the shareholding period.

This also applies to regional development corporations (“Sociedades de desenvolvimento regional”), investment companies, securities dealers and insurance companies (where technical reserves are concerned) regardless of the proportion of capital or the period held.

**Foreign income**

A Portuguese company is taxed on all its foreign income. Taxes paid abroad can be offset against corresponding Portuguese tax capped at the lower of a) the tax liability corresponding to the foreign income or b) the foreign tax paid. In both cases it is limited to the foreign tax as foreseen in the applicable double-taxation treaty. No carryforward of foreign tax is allowed.

**Other significant items**

Impairment losses on doubtful debts are deductible for tax purposes when an insolvency or recovery has been requested or the credits have been claimed in court.

The annual amount of accumulated impairment losses on doubtful debts due for more than six months with evidence that measures towards its perception were taken is capped at the following percentages of the debts:

<table>
<thead>
<tr>
<th>Accumulated impairment loss caps</th>
<th>%</th>
</tr>
</thead>
<tbody>
<tr>
<td>More than 6 and less than 12 months</td>
<td>25</td>
</tr>
<tr>
<td>More than 12 and less than 18 months</td>
<td>50</td>
</tr>
<tr>
<td>More than 18 and less than 24 months</td>
<td>75</td>
</tr>
<tr>
<td>More than 24 months</td>
<td>100</td>
</tr>
</tbody>
</table>

Amounts guaranteed by insurance or mortgage, or due or secured by the state, autonomous regions or municipalities, or due by related parties (e.g., 10%
shareholding) are not considered as doubtful debts and the respective impairment loss is disallowed for tax purposes.

The ageing of bills of exchange is calculated from the date when the respective payment is due.

Uncollectable debts are allowed as tax-deductible costs if supported under insolvency, recovery enforcement or in an out-of-court conciliation procedure for the viability of insolvent companies or companies in difficult economic situation (mediated by the Institute for the Support of Small and Medium-sized Enterprises – IAPMEI). This rule applies to the amount of the uncollectable debts which were not deducted for tax purposes as impairment losses (or for which the amount was insufficient).

**Deductions**

**Depreciation and depletion**

The qualifying cost of an asset for tax purposes is the acquisition or production cost.

Depreciation must be computed by using the straight-line method or the declining-balance method. The latter cannot be applied to buildings, passenger vehicles, furniture, social welfare equipment or second-hand assets. Straight-line rates of depreciation are normally consistent with rates privately used by business and industry and are increased, for the purposes of applying the declining-balance method, by coefficients of:

- 1.5 if assets have a useful life of less than five years;
- 2 if useful life is five or six years; and
- 2.5 for useful lives in excess of six years.

Different depreciation methods may be applied without previous approval from the Tax Authorities (annual depreciation cannot however exceed the depreciation resulting from using either the straight-line or declining-balance methods).

Rates can be reduced by 50% in any one year at the taxpayer’s option. If the reduction is more than 50%, the difference is allowed for tax purposes at a future date. Any depreciation in excess of the maximum allowed must be subsequently adjusted in the accounting records to be allowed for tax purposes in future years. A total of 60% of additional depreciation on revaluation of fixed assets, as permitted by law from time to time, is allowed for tax purposes.

Depreciation rates of tangible assets may be increased by 25% in case of companies with a schedule of two shifts (for three shifts, 50%), given the faster deterioration of those assets.

Assets with an acquisition value lower than EUR 1,000 can be depreciated in the acquisition year, unless the assets are part of a set of elements that should be depreciated as a whole.

Depreciation of yachts and airplanes that are not essential for business activities, and depreciation on the excess of a limit to be defined by Decree (formerly EUR 40,000) for passenger cars and certain other vehicles, is not allowed as a cost for tax purposes.
Start-up and research expenses are deductible for tax purposes in the respective tax year. Transitional adjustments of remaining start-up expenses incurred prior to the adoption of the new accounting system should be written off the balance sheet against equity and are deductible over a five-year period.

Development expenses, patents, trademarks, licenses and similar rights may be depreciated for tax purposes if acquired for a limited period of time.

Expenses relating to assets generated internally are deductible for tax purposes in the tax year in which the cost is incurred.

Goodwill cannot be depreciated for tax purposes (unless subject to an effective economic depreciation approved by the Portuguese tax authorities).

Some examples relating to the maximum straight-line depreciation rate are as follows:

<table>
<thead>
<tr>
<th>Type of asset</th>
<th>Rate %</th>
</tr>
</thead>
<tbody>
<tr>
<td>Office building</td>

<td>20</td>
</tr>
<tr>
<td>Furniture</td>
<td>12.5</td>
</tr>
<tr>
<td>Software</td>
<td>33.33</td>
</tr>
<tr>
<td>Light passenger vehicles</td>
<td>25</td>
</tr>
</tbody>
</table>

**Tax losses**

As of 2010, tax losses can be carried forward for four years (previously six years). Carryback of losses is not allowed. The tax losses carried forward are lost if one of the following situations occurs:

- Change in direct ownership of the company of at least 50% shareholding or voting rights; or
- Change in the scope of the business as stated in the articles of association or, regardless of any formal change, if the nature of the activity carried out by the company is substantially modified.

In special cases of economical merits, the Ministry of Finance may authorise the use of tax losses upon a request filed by the taxpayer before those changes occur.

**Payments to foreign affiliates**

A Portuguese corporation is allowed to deduct royalties, interest and other costs paid to foreign affiliates, provided the amounts are at arm’s length. Service fees paid are allowed if there is adequate proof that the service was effectively rendered, has economic substance and qualifies as indispensable for the generation of taxable revenue, as well as if the amount is at arm’s length.
Portugal

Interest on shareholder loans
If the rate applicable to interest and other compensation regarding loans provided by the shareholders to the company is higher than the Euro Interbank Offered Rate (EURIBOR) 12-month rate rounded up with a spread of 1.5% (at the date the loan was granted), the amount paid in excess is not tax-deductible. This rule does not apply when the shareholder is resident of a tax treaty country or when the interest rate is at arm’s length under the transfer pricing provisions.

Transfer pricing
The tax authorities are entitled to adjust taxable income if the taxpayer and another individual or entity, due to their special relationship, have established particular conditions which diverge from the conditions normally agreed upon between independent entities and distort the results that would arise if those relations were at arm’s length. For tax years starting on or after 1 January 2002, Portugal has implemented detailed transfer pricing legislation which broadly follows the Organisation for Economic Co-operation and Development (OECD) guidelines.

An Advance Pricing Agreement (APA) mechanism has been introduced for taxpayers and Portuguese Tax Authorities (PTA) to establish agreements on taxpayers’ future transfer pricing policy. This aims to guarantee compliance with the arm’s-length principle. This regime applies to transactions carried out with related parties and between a permanent establishment and the respective head office.

The conclusion of an APA implies the payment of a charge calculated with reference to the taxpayer’s turnover, capped at EUR 35,000. This charge is reduced by 50% in the case of a renewal or revision of an existing APA.

The assessment of an APA procedure takes 180 days for unilateral APAs, and 360 days for bilateral or multilateral APAs. This period is reduced to 100 business days for APAs concluded in connection with a relevant investment project in Portugal, as foreseen in the Tax Investment Code (“Código Fiscal do Investimento”).

For the Portuguese Tax Authority (PTA) to confirm compliance of the transfer pricing method(s) with the terms and conditions set out in the APA, the taxpayer must prepare an annual report. The report must be made available to PTA before the last business day of May in the year following that in which the transactions took place (i.e., when the tax year corresponds to the calendar year). Failure to comply invalidates the APA.

Thin capitalisation
Where loans from non-EU-resident related parties exceed twice the parties’ capital in the borrowing Portuguese entity, the interest on the excess borrowing is not tax-deductible. This rule may not apply if the company (as long as it is not resident in a blacklisted territory) proves, under a safeguard clause, that takes into account the type of activity, the sector in which it operates, the dimensions and other relevant criteria, to determine if it would be possible to obtain the same loan on similar terms from an independent entity.

Anti-avoidance
A general anti-avoidance provision is in force, pursuant to which contracts and other acts are ineffective whenever it is demonstrated that they were tax driven to reduce taxation that would be due under contracts bearing a similar economic effect, in which case taxation would be based on the latter.
Controlled foreign corporations
Profits derived by an affiliate resident in a blacklisted offshore jurisdiction or in a jurisdiction where it is subject to an effective tax rate equal to or lower than 60% of the Portuguese corporate tax rate, are imputed to the Portuguese shareholder, provided it holds, directly or indirectly, a minimum holding participation of 25% (10% if more than 50% of the capital is held by Portuguese shareholders). Upon distribution of the profits, a deduction is available for previously imputed income.

Taxes
All taxes other than corporate tax and municipal surcharge constitute a normal business expense.

Vacation accrual
Vacation pay and vacations subsidies are tax-deductible in the year in which the benefit accrues, regardless of the year in which payment is made.

Other significant items
Pension, invalidity and health schemes are tax-deductible up to 15% of annual staff expenses, provided they are available to all employees and the management and disposition of the benefits are outside the control of the taxpayer, such as under an insured scheme with vested benefits.

A specific regime applies for deduction of the additional (mandatory) contributions made to pension funds by insurance companies as a result of the adoption of the new accounting system (SNC). These contributions are not considered for purposes of computing the maximum annual amount accepted as a cost, but are considered as a cost in accordance with an annual instalment plan, during a term of five years that began in 2008.

The costs borne from the acquisition of social passes are regarded as tax-deductible costs to the extent the employer attributes them on a general basis.

Uninsured losses, including indemnities to third parties, are disallowed unless the risk could not be insured.

Donations to authorised charitable institutions are allowable up to 0.8% of turnover, with the possibility of the cost being raised up to 150%. Donations to authorised cultural institutions are allowable up to 0.6% of turnover, with the possibility of the cost being raised up to 130%.

Donations to the state, municipalities, foundations where the state or municipalities participate in the initial capital are fully deductible, with the possibility of the cost being raised up to 140%. Special application may be made by certain entities in order to be included under the referred regime.

Donations of computers, software equipment, training and consultancy in the area of computers granted to the state, municipalities, foundations, museums as well as to authorised charitable and cultural institutions are allowable up to 0.8% of turnover, with the possibility of the cost being raised up to 140%.

Non-documented expenses are not tax-deductible and are subject to a 50% tax surcharge for fully taxable entities.
Group taxation

The taxation of group income can be obtained by presenting a special form to the tax authorities for companies with a head office and effective management in Portugal. Such group taxation may apply, provided one of the companies, directly or indirectly, holds 90% or more of the statutory capital of the others and more than 50% of the voting rights. Tax grouping generally enables the group companies to offset losses incurred by one company against profits of another company. Tax losses obtained prior to the beginning of the tax grouping can be carried forward only against the particular company’s taxable income.

To be taxed under this regime, the group companies must meet the following conditions:

- Must be tax resident in Portugal;
- Must be subject to the normal regime of taxation at the highest corporate tax rate;
- Must maintain a minimum holding participation of 90%;
- All companies must be held by the parent company for more than one year (excluding newly incorporated companies);
- Cannot be dormant for more than one year;
- Cannot be dissolved or insolvent;
- Cannot have tax losses in the three years prior to the regime application, unless the companies have been held by the parent company for more than two years; and
- Cannot have a tax period different from that of the parent company.

Additionally, the parent company:

- Should not be controlled by any other Portuguese-resident company that fulfils the requirements to be the parent company; and
- Should not have renounced to the application of this regime in the three previous years.

When the regime comes to an end or when one company ceases to qualify for this regime, the tax losses obtained during the regime cannot be carried forward and deducted against future individual taxable income of the companies.

Tax incentives

General tax benefits and incentives

Contractual tax incentives

Relevant investment projects up to 2020 (minimum investment of EUR 5,000,000) that qualify for strategic economic interest and promote the creation of jobs are eligible for tax incentives, as foreseen in the Tax Benefits Code and the Investment Tax Code.

These are granted on a case-by-case basis under a government contract for a period not exceeding 10 years and include a tax credit of 10% to 20% of the investment and exemptions or reductions from property transfer tax, property tax and stamp duty.
Investment funds

- Other investment funds

Portfolio investment funds are taxable at the following final rates:

<table>
<thead>
<tr>
<th>Portfolio investment funds</th>
<th>%</th>
</tr>
</thead>
<tbody>
<tr>
<td>Capital gains (net of capital losses) on shares held &lt; 12 months</td>
<td>10</td>
</tr>
<tr>
<td>Capital gains (net of capital losses) on shares held &gt; 12 months</td>
<td>-</td>
</tr>
<tr>
<td>Other income:</td>
<td></td>
</tr>
<tr>
<td>- Earned in Portugal</td>
<td>20/25</td>
</tr>
<tr>
<td>- Earned abroad</td>
<td>20/25</td>
</tr>
</tbody>
</table>

- Real estate investment funds

These funds are subject to corporate tax at the following rates:

<table>
<thead>
<tr>
<th>Real estate investment funds</th>
<th>%</th>
</tr>
</thead>
<tbody>
<tr>
<td>Rents (net of expenses)</td>
<td>20</td>
</tr>
<tr>
<td>Real estate capital gains (net of capital losses)</td>
<td>12.5</td>
</tr>
<tr>
<td>Capital gains (net of capital losses) on shares held &lt; 12 months</td>
<td>10</td>
</tr>
<tr>
<td>Capital gains (net of capital losses) on shares held &gt; 12 months</td>
<td>-</td>
</tr>
<tr>
<td>Other income</td>
<td></td>
</tr>
</tbody>
</table>

Income paid by the two aforementioned investment funds to individuals is not subject to taxation. Income paid to companies is taxed as normal income and taxes paid by the fund are considered as payment on account against the final corporate tax due.

- Funds of funds

Income paid by investment funds is exempt from CIT. Other income is subject to the same taxation as investment funds. Income received by individuals is not subject to further taxation. Income received by companies is taxed at the standard corporate tax rate on 40% of the respective amount as normal income.

Pension funds

Are exempt from corporate tax and real estate transfer tax.

Contractors for NATO infrastructures

These contractors are exempt from corporate tax.

Net young employment creation

150% of the costs related to the net increase job creation, under labour contracts without term, for employees up to 35 years (including) of age and for long-term unemployed individuals may be deducted from taxable income. For this purposes, these costs should be considered the fixed remunerations paid and the contributions made by the employer to the social security. The maximum amount of annual increase on deductible costs for each eligible employee is 14 times the national minimum retribution (EUR 450 in 2009; expected EUR 475 in 2010).

This tax benefit is not cumulative with any other tax benefit concerning the same employee and it is applicable only once for each employee.
Portugal

This deduction applies for a period of five years for each employee.

**Inland region investment**
Companies pursuing an economic activity of industrial or service-rendering nature in inland regions have the following tax benefits:

- A reduced CIT rate of 15%;
- In case of establishment of new entities in the referred regions, the income tax rate is reduced to 10%, during the first five years of activity;
- Tax losses can be carried forward for seven years;
- Depreciation and amortisation concerning investment expenses up to EUR 500,000 (excluding land acquisition and passenger cars), can be deducted, with an increase of 30%; and
- Social security costs, concerning net employment creation, can have an increase of 50%.

**Research and development (R&D)**
Portuguese tax resident companies carrying out commercial, industrial or agricultural activities, and non-resident companies with a permanent establishment in the Portuguese territory, are allowed to deduct from the corporate tax due, up to the respective amount, the value of eligible expenses incurred with R&D, in a double percentage as follows:

- Base rate: 32.5% of the R&D expenses incurred in the tax;
- Incremental rate: 50% of the difference between the R&D expenses made in the tax year and the average amount of the R&D expenses made in the previous two years, up to the limit of EUR 1,500,000; and
- The expenses that, due to insufficient tax due, cannot be deducted in the tax year they were incurred can be carried forward for six years.

**Dividends from entities resident in the Portuguese speaking African countries (PALOP's) and in Timor-Leste**
These are not subject to CIT at the level of the Portuguese parent provided that:

i. The entity in Portugal is subject and not exempt to CIT;
ii. The entities in the PALOP and in Timor-Leste are subject and not exempt to a corporate tax;
iii. The entity in Portugal holds a direct participation in the share capital of the subsidiary not less than 25% for at least two years; and
iv. Dividends distributed have been taxed in at least 10% and do not arise from a determined type of income expressly mentioned in the law.

**Loan interest and lease rentals on imported equipment**
When paid by the State, regional authorities and public services, loan interest and lease rentals on imported equipment can qualify for partial or full exemption from tax upon an appropriate application.
Real Estate Investment Fund for Residential Lease (REIFRL)

The regime is applicable: (i) both to REIFRL and to Real Estate Investment Companies for Residential Lease (REICRL) incorporated in accordance with the Portuguese law within a term of five years following the entering into force of the State Budget for 2009; and, (ii) to the real estate properties acquired by those entities during that same term, i.e., from 1 January 2009 until 31 December 2014.

The incorporation of the REIFRL will be done in accordance with the provisions applicable to the Real Estate Investment Funds (REIFs) laid down in the Portuguese law. The REIFRL portfolio is required to be comprised in at least 75% by real estate properties located in Portugal destined for the lease of permanent residences.

The following tax regime and benefits are established:

- CIT exemption on income obtained by REIFRLs;
- Personal income tax (PIT) and CIT exemption for the income obtained by participation unit holders, except for the capital gains arising from the sale of such participation units;
- Capital gains obtained by a property owner that sells its real estate to a REIFRL are exempt from PIT, provided that the taxpayer maintains the residential lease agreement in place and that the property owner exercises the option to acquire the real estate property;
- At personal income tax level, 30% of the rents borne by the lessees as a result of the conversion of a real estate property holding right into a lease right of the same real estate property are deductible to the annual taxable income up to a maximum amount of EUR 586;
- Local property tax exemption established for the real estate properties destined for the lease of permanent residences that integrate the REIFRL;
- Municipal property transfer tax exemption on real estate property acquisition made within this regime by the REIFRL, as well as the acquisitions arising from the option for the acquisition by the lessees, until 2020, of the real estate properties that integrate the assets of the REIFRL;
- Stamp duty exemption is established for the acts arising from the transfer of the real estate properties by means of the conversion of holdings rights in real estate properties into a lease right with the option of acquisition in respect of the same real estate property by the lessee; and
- The above-referred tax regime and respective exemptions will not be applicable to entities resident in a country or jurisdiction with a more favourable taxable regime included in the Decree-Ruling published by the Ministry of Finance.

Incentives to urban rehabilitation

These incentives are applicable to real estate property covered by rehabilitation projects undertaken between 1 January 2008 and 2020.

Real estate investment funds incorporated between 2008 and 31 December 2012 may benefit from:

- CIT: the income obtained by real estate investment funds is tax exempt when the funds are incorporated in accordance with the Portuguese law, and respective assets are comprised of at least 75% of real estate subject to rehabilitation projects in qualifying areas.
Portugal

- Property transfer tax: urban property (buildings or autonomous units) destined for permanent residence and located in a rehabilitation area may benefit from an IMT exemption on the first transfer of such urban property upon undertaking of rehabilitation works. The granting of this exemption depends on a decision in this respect of the municipality of the area of the real estate property.
- Property tax: the IMI exemption granted in respect of urban properties subject to rehabilitation works is extended from eight to 10 years (it is granted for a five-year term and renewable for an additional five-year period). Again, the granting of this exemption depends on a decision in this respect of the municipality of the area of the real estate property.
- Personal income tax:
  - The real estate property owner may deduct, up to the limit of EUR 500, 30% of the expenses incurred with the rehabilitation works of the urban property eligible for the application of this regime; and
  - Rental income and capital gains arising from urban properties eligible for the application of the rehabilitation regime and obtained by resident individual taxpayers are subject to taxation at the rate of 5%.

**Tax benefits and incentives for non-resident corporate entities**

- Capital gains on the sale of shares and quotas held in a Portuguese company by a non-resident company may be tax exempt. However, there are some important exceptions, such as:
  - Where the more than 25% of a non-resident shareholder is held, directly or indirectly, by a Portuguese resident company;
  - Where the non-resident shareholder is located in a country that is included in a blacklist from the Ministry of Finance; and
  - Where the assets of the company sold consist mainly of immovable property.
- Interest and capital gains on government and corporate bonds are tax exempt (where held by entities not located in blacklisted offshore jurisdictions) under certain conditions.
- Interest paid by resident credit institutions to non-resident financial companies deriving from loans as well as gains arising from swap transactions are tax exempt.
- Interest obtained by non-resident credit institutions deriving from term deposits held on resident entities authorised to receive such deposits are tax exempt.

**Madeira and Azores international business centre**

Qualifying industrial, shipping, international services (e.g., holding and trusts) and financial entities licensed in Madeira or in the Santa Maria Island (Azores) international business centres before 31 December 2000, are eligible for a CIT exemption until 31 December 2011.

The European Commission extended the existing regime and approved a new regime for entities licensed to operate in the Madeira International Business Centre (MIBC) in the period 2007-2013, which is applicable until 31 December 2020.

The 2007 MIBC special tax regime provides, besides full exemptions from taxation to non-resident shareholders and service providers, for the following reduced CIT rates for these entities, on their qualifying foreign source income, based on thresholds of income and subject to job creation requirements:

- 4% between 2010 to 2012; and
- 5% from 2013 to 2020.
Azores and Madeira international business centre based companies generally benefit from Portugal’s network of double taxation agreements. EU laws and regulations apply to Azores and Madeira.

Companies licensed under the previous regime will have the same benefits, but will not be tax exempt on their qualifying foreign source income, being subject to the reduced rates mentioned above (and subject to the same requirements).

**Withholding taxes (WHT)**

**Notes**

The numbers in parentheses refer to the following numbered notes:

1. For residents, tax withheld constitutes a payment on account of final corporate or individual income tax due. For non-residents, tax withheld is the final tax unless in case of property income, in which it is a payment on account.
2. Not subject in the case of holdings of at least 10% or if the acquisition value was not lower than EUR 20 million.
3. Not subject if the parent/subsidiary directive applies.
4. This withholding tax rate will be in force until 30 June 2009; from 1 July 2009 until 30 June 2013, the applicable rate will be reduced to 5% and will be nil from 1 July 2013 onwards.
5. Not subject if a tax treaty is applicable.

**Tax treaty rates**

Tax treaties reduce the above-mentioned rates as follows:

Notes

1. The rate in parentheses applies to royalties when the beneficiary holds 50% or less of the paying company’s share capital.
2. There is no withholding tax on dividends if the EU Parent/Subsidiary Directive applies.
3. The rate in parentheses applies to dividends when the beneficiary directly holds 25% or more of share capital. Depending on each DTT, a two-year holding period may be required.
4. The rate in parentheses applies to interest on debentures raised in France after January 1, 1965 or on significant loans or debentures raised in Portugal or abroad under major development projects listed in the treaty annex.
5. The rate in parentheses applies to bank loans, but if interest is payable from Portugal, bank loans must qualify as being of economic or social interest or fall under an approved development plan.
6. The rate in parentheses applies to interest received by financial institutions.
7. The rate in parentheses applies to technical assistance.
8. The rate in parentheses applies on interest related to loans with a minimum maturity of two years.
9. The rate of 5% regarding interest applies to bonds interest or other securities transacted in the stock market. The rate of 10% applies to loans from banks or insurance companies or credit selling of equipment.
10. The rate of 5% regarding royalties applies to equipment lease.
11. The rate of 10% applies if the company which is paying the dividends is a resident of Israel and the dividends derive from profits which are subject to tax in Israel at a rate which is lower than the normal rate of Israel company tax. The rate of 5% applies if the beneficial owner is a company which holds directly at least 25% of the capital of the company paying the dividends.

Tax administration

Tax returns
The tax year is, as a general rule, the calendar year, and the annual corporate tax return must be submitted by electronic data transmission by the last day of May of the year following the year of income.

A different tax year is allowed in the case of companies obliged to the accounting consolidation and of permanent establishments of non-resident entities, which can adopt the tax period of the non-resident company. If this option is taken, the new tax period must be maintained for a minimum of five years.

Other entities may apply for a different tax period based on economic grounds. In these situations (i.e., whenever the tax year ends on a date other than 31 December, the annual corporate tax return shall be submitted by electronic data transmission by the last day of the fifth month following the year-end.

The system is one of self-assessment.

Payment of tax
Tax is paid in four instalments. The first three correspond to 90% of the previous year’s corporate tax assessment (for taxpayers with a turnover above EUR 498,797; 70% if below this amount). A reduction of the amount of these payments is expected. The first three instalments are paid on 15 July, 15 September, and 15 December of the year in which taxable income arises. The fourth instalment is paid (or received) through self-assessment upon filing the annual tax return in May of the following year.
Portugal

If the tax year ends on a date other than 31 December, interim payments take place in the seventh, ninth and twelfth months of the tax year. Filing of the annual tax return together with the final payment is in the fifth month following the close of the tax year. Given the expected introduction of a State surtax of 2.5% on the excess of taxable income above EUR 2,000,000, an additional payment on account of the State surtax will also be due, on the same months as the interim payments.

Payments on account are not required if the previous year’s corporate tax assessment is less than EUR 199.52, and may be suspended upon declaring that no further tax is due in respect of the current year. However, interest is assessed at a rate of 4% if this results in postponing more than 20% of the tax that would otherwise have been paid.

In particular situations, a special payment on account is due of a minimum of EUR 1,000 up to EUR 70,000, paid in March, or in March and October (the third or the third and tenth month of the tax year if it ends on a date other than 31 December).

The statute of limitation period is four years, but this period can be extended in case of tax losses.

Significant developments

Act 194 of 22 December 2009 (Act 194)
Automatic extension to file individual and corporate income tax returns – The act amended section 1053 of the Puerto Rico Internal Revenue Code (PRIRC) to increase the automatic extension of time for individuals to file an income tax return from 30 days to a three-month period. The standard three month extension applies to individuals, corporations, partnerships, trusts and estates. The Act 194 also eliminated the use of a specific number of dates and established the use of months to calculate the new filing date.

This is applicable for taxable years commenced after 31 December 2008.

Estimated tax payments by corporations and partnerships – The Act 194 amended section 1062 of the PRIRC to eliminate the filing requirement of an estimated tax declaration by corporations and partnerships. Furthermore, corporations and partnerships are allowed to reduce their estimated tax liability by income tax overpayments from prior years or any tax credits allowed by the PRIRC or special laws.

The effective date of this provision is for taxable years commenced after 31 December 2009.

Additions to the tax for failure to pay estimated tax by corporations and partnerships – The Act 194 amended sections 6069 and 6070 of the PRIRC to simplify the calculation of Schedule T (i.e., additions to the tax, or penalty for the underpayment of estimated taxes). The act states that the penalty for the failure to timely pay any estimated tax instalment would be 10% of such instalment (it was 20% before the enactment of Act 194). The effective date of this provision is for taxable years commenced after 31 December 2008.

Sales and use tax – The Act 194 amended section 2301 of the PRIRC to provide an exemption from sales and use tax for services rendered by a registered tax specialist. A registered tax specialist, as defined by section 6170 of the PRIRC, is a natural or juridical person that prepares or reviews declarations and request refunds pursuant to the PRIRC or the US Internal Revenue Code. The effective date of this provision is for taxable years commenced after 31 December 2009. Furthermore, the annual sales and use tax return (Form SC 2935) is no longer required to be filed for taxable years commenced after 31 December 2008.
Puerto Rico

Penalties for failure to file certain information returns and reconciliation statements – The Act 194 amended section 6071 of the PRIRC to limit the penalty for not filing certain information statements (i.e., Form 480.6B1 and Form 480.30) to USD 100. The penalty for not filing the quarterly payroll tax return is also limited to USD 100 for each return. The effective date of this provision is 22 December 2009.

Act 164 of 16 December 2009 (Act 164)
Annual reports – Articles 15.01 and 15.03 of Act 164, which is the current Puerto Rico General Corporation Law (PRGCL), modified the volume of business threshold to submit audited balance sheet along with the corporate annual report. The volume of business threshold was increased from USD 1 million to USD 3 million. In the event the volume of business does not exceed USD 3 million, a balance sheet prepared under generally accepted accounting principles (GAAP) by a person with a general knowledge in accounting has to be submitted along with the corporate annual report. This current volume of business requirement applies to domestic and foreign corporations. The audited balance sheet is still required when gross income exceeds USD 3 million.

This provision and the other discussed below are effective on 1 January 2010 and covers the 2009 annual report filings.

New expeditious procedure for certificate of good standing – Article 15.06 of the PRGCL provides that in order to issue a certificate of good standing, the secretary of state will review compliance with the annual reports filing requirement for the five years prior to the date the certificate is being requested. Once the certificate of good standing is issued, the secretary of state will not impose a penalty for any non-compliance attributable to years prior to the five years period mentioned above.

Penalty for failure to file an annual report – Amnesty Period – Article 22.08 establishes that the secretary of state will grant a five-month period during which any unfiled annual reports may be filed without imposing a late filing penalty.

However, the filing fee for the annual reports will apply as follow:

• Not-for-profit corporations will pay two times the amount required for the standard annual filing fee – (i.e., USD 20); and
• For-profit corporations will pay three times the amount required for the standard annual filing fee – (i.e., USD 300).

A detailed guidance of the filing procedures and the amnesty period will be covered in the regulations to be issued by the Secretary of State.

New extended due date for corporate annual report – The PRGCL authorises the Secretary of State to grant an extension of time to file the corporate annual report for up to 90 days from the original due date. As such, the Secretary of State granted a 60 days extension to file the 2009 corporate annual report, and the current extended due date is 15 June 2010. However, an additional extension of time of 30 days is available upon request in which case the final extended due date is 15 July 2010.

Act 7 of 9 March 2009 (Act 7)
The Act 7 provides for several temporary and permanent amendments or additions to the PRIRC that will affect various taxpayers, including domestic and foreign corporations doing business in Puerto Rico, insurance companies, credit and savings
cooperatives (or credit unions), insurance cooperatives, etc. The following provisions have also been updated to include the amendments from Act 15 of 23 April 2009 and Act 37 of 10 July 2009.

**Temporary provisions**

**Alternative minimum tax on corporations, partnerships, LLCs and LLPs** – For taxable years commenced after 31 December 2008 and before 1 January 2012, no deduction for expenses paid or incurred for services performed outside of Puerto Rico by a related party (as defined by sections 1221(a)(3) or 1231(a)(3) of the PRIRC) will be allowed for purposes of determining the alternative minimum tax to the extent the recipient is not subject to tax under the PRIRC. It is expected that the above adjustment will significantly increase the alternative minimum net income of those affected companies that receive a substantial amount of management or service fees’ allocations from their parent companies, home office, or related entities located outside Puerto Rico.

A 5% surtax over the tax liability – A 5% additional tax will be imposed on the income tax liability determined (not on the taxable income) for those corporations, partnerships and trusts whose gross income exceeds USD 100,000. This provision will be effective for taxable years commenced after 31 December 2008 and before 1 January 2012.

A 5% tax imposed on insurance cooperatives and credit and savings cooperatives (or credit unions) with net taxable income in excess of USD 250,000 – Cooperatives are generally exempt organisations not subject to income taxes. Nevertheless, these types of organisations will be required to pay a 5% tax on their “taxable income” for years commenced after 31 December 2008 and before 1 January 2012. Taxable income for this purpose will be determined in accordance with the PRIRC. In the case of insurance cooperatives, the net income will be determined in accordance with subchapter G of the PRIRC (i.e., similar to insurance companies). In the specific case of life cooperative insurance companies, such net income, as a general rule, would be the gain on sale of capital assets.

A 5% tax imposed on cooperative banks (credit unions) – Similarly, cooperative banks will be required to pay a 5% special tax on their “taxable income” determined under the PRIRC for years commenced after 31 December 2008 and before 1 January 2012.

A 5% tax imposed on international banking entities (IBEs) & international insurance companies – A 5% tax upon IBEs net income will be imposed for every taxable year commenced after 31 December 2008 and before 1 January 2012. IBEs operating as a branch will be subject only to the 5% tax on income otherwise not previously subject to regular tax, computed under the provisions of the PRIRC. The same provision will apply to international insurance companies.

**Deferral of tax credits** – For taxable years commenced after 31 December 2008 and before 1 January 2012 certain tax credits may not be claimed against Puerto Rico income taxes. The tax credits covered by this moratorium are:

- Purchase of products manufactured in Puerto Rico for local sale and consumption (Section 1040E of the PRIRC).
- Waste Disposal Credits Law (authorised under article 21 of Act 70 of 23 June 1978).
• Act that created a Theatrical District (from Bolivar Street to Ernesto Cerra Street in Santurce – article 11 of Act 178 of 12 August 2000).
• Urban Center Revitalization Law (article 4.03 and 4.04 of Act 212 of 29 August 2002) – Some exceptions may apply.
• Tax Credits Act for Investment in New Construction or Rehabilitation of Social Interest Housing (article 3 of Act 140 of 4 October 2001).
• Tax Credits Act for Investment in Housing Infrastructure (article 4 of Act 98 of 10 August 2001).
• Credits for Investment in the Constructions or Rehabilitation of Rental Housing projects for low or moderate income families (Act 140 of 4 October 2001).
• Credits for the Investment in projects for Tourism Activities (Act 78 of 10 September 1993) – Some exceptions may apply.
• Credits for investment in Housing Projects for the Elderly, among others (Act 7 of 9 March 2009) – Some exceptions may apply.

Credits that were acquired by purchase before 4 March 2009 will not be subject to this limitation. Also, taxpayers will be required to file an informative return on or before 31 August 2009 to properly inform the Secretary of the Treasury the amount of credits that were previously granted in order for the Secretary to evaluate the economic and tax impact of these credits. In addition, other tax credits issued by other laws (Tourism Development Act of 1993, Tax Incentives Acts of 1997 and 2008, etc.) will need to be included in the informative return.

**Deferral of tax credits to financial institutions** – Act 37 modified the Housing Tax Credits generated by financial institutions and contained in Sections 1040K and 1040L of the PRIRC. Those financial institutions that have obtained tax credit certificates from the Secretary of the Treasury of Puerto Rico and that have not been able to use them against their tax responsibility (or have not sold, ceded or transferred them) will be able to request such tax credits as a refund within the period established in the tax credit certificate. Such refund request will be based on the procedures to be established by the Secretary through Regulations or Administrative Determinations. However, the Secretary will not be authorised to issue tax refunds under section 1040K or 1040L before 1 January 2011 unless the financial institution had requested such refund before 9 March 2009.

**Permanent provisions**

**Sale and use tax** – The Act 7 significantly changed the requirements of the sales and use tax, particularly in the case of retailers. The act created two groups of taxpayers for purposes of the exemption certificate and also changed the due date to remit the sales and use tax to the corresponding Puerto Rico tax agencies and to file the monthly sales and use tax returns.

• Two groups of taxpayers for purposes of the exemption certificate:

Those merchants with an annual gross income equal or in excess of USD 500,000 (including new merchants with a reasonable estimate of annual gross income equal or in excess of USD 500,000) and that have acquired taxable articles for retail, will be entitled to request an exemption certificate on SUT subject to the requirements to be established by the secretary. On the other hand, those merchants with annual sales volume of less than USD 500,000 will be entitled to the exemption certificate if they are in good standing with the provisions of the PRIRC and comply with the
requirements to be issued by the secretary. In this regard, merchants with less than USD 500,000 in annual gross income must comply with the following requirements in order to obtain an exemption certificate: (i) should not have any pending tax liability with the P.R. Treasury Department, (ii) need to be in good standing with respect to all tax filings, including but not limited to, income tax and sales and use tax, and (iii) need to submit a volume of business declaration showing the payment of municipal license tax in all the municipalities where the merchant has operations.

- Changes in the due date of the sales and use tax filings and payments:

  The act accelerates the sales and use tax due date from the twentieth day to the tenth day of the following month after the tax is collected. For returns and payments filed by mail, the postmark will continue to support the proof of filing. When the due date falls on Saturday, Sunday or official holiday, the due date for filing and payment will be the next business day. In the case of electronic filings (including payments), the due date will always be the tenth day of the following month, unless otherwise specified by regulations.

The Secretary is also authorised to issue municipal exemption certificates to merchants for the 1% sales and use tax to be collected by municipalities to the extent merchants are also registered with the P.R. Treasury Department and they are entitled to the exemption certificate.

Credit for purchases of locally manufactured products to be exported – Corporate taxpayers will not be entitled to claim a credit against the sales and use tax for those purchases of locally manufactured products that will eventually be exported. The act provides that this credit may still be used against the taxpayer’s income tax liability.

Increase in excise taxes applicable to cigarettes and alcoholic beverages – Effective on 1 June 2009, the excise tax on cigarettes increased from USD 6.15 to USD 11.15 per 100 cigarettes or fraction thereof. Similarly, the act provides for an excise tax increase applicable to wine and beer. In the case of beer, the excise tax will increase by USD 0.30 on each gallon or fraction thereof for those that are imported and by USD 0.46 on each gallon or fraction thereof for those manufactured in Puerto Rico. The increase in the excise tax corresponding to wine will range between USD 0.35 and USD 0.70 on each gallon or fraction thereof, depending on its classification.

Excise tax on motorcycles and ATV vehicles – Act 37 states that every vehicle, truck, ATV vehicle (four tracks) and motorcycles will be exempt from the sales tax established in Subtitle BB of the PRIRC. Motorcycles and ATV vehicles will be subject to an excise tax of 10% of the taxable price in Puerto Rico effective on 1 August 2009. Furthermore, the inventory of motorcycles and ATV vehicles as of 1 August 2009 will be considered as introduced into Puerto Rico for purposes of this excise tax.

Act 73 of 28 May 2008 (Incentives Act or Act 73)
Act 73 of 28 May 2008, known as the “Tax Incentives Act for the Puerto Rico Economic Development”, attempts to create a new economic environment with the goal of developing the local industry, maintaining current investments and promoting the direct investment from the US and other countries. Act 73 changes the fixed income tax rates applicable to industrial development income (IDI), yet introduces certain credits.
Puerto Rico

to reduce the income tax determined, when applicable. The act does not provide an expiration date; therefore, it is effective until a new act replaces it.

The following are the most significant differences from the previous tax incentive act (Puerto Rico Tax Incentives Act of 1998):

1. Income tax scenarios that exempt entities may elect:
   • General scenario: 4% income tax rate with a withholding tax rate on royalty payments of 12%.
   • Alternate scenario: 8% income tax rate with a withholding tax rate on royalty payments of 2%.

2. Special deductions are eliminated, except for the capital investment in buildings, structure, machinery and equipment, and the net operating losses carryforward.

3. Credits include a credit for purchases of products manufactured in Puerto Rico, a credit for every incremental job applicable to exempt businesses, a credit for the eligible investment in research and investment activities, a credit for the eligible investment in the acquisition of machinery and equipment for the creation of energy, a credit for payments made to the Puerto Rico Power Authority during the corresponding taxable year, a credit for payments made to resident entities for the use of intangible property in Puerto Rico, a credit for the eligible investment in strategic projects, and a credit available to persons engaging in an eligible business investment.

Any exempt business with a tax-exemption grant under any of the prior acts can request to renegotiate its tax decree under this act. Such renegotiation would be possible provided certain requirements of minimal increase in investment and employment are met. The exemption period is 15 years. This act became effective on 1 July 2008.

Act 181 of 10 December 2007
Act 181 of 10 December 2007 introduced amendments to the income tax law related to capital gains tax rates for corporations. Long-term net gains (holding period of more than six months) from the sale of capital assets taking place after 30 June 2007 may be subject to a preferential tax rate of 15%.

Act 168 of 9 November 2007
Act 168 of 9 November 2007 extended up to 30 June 2008 the period within which an application for exemption pursuant to the Puerto Rico Tax Incentives Act of 1998 shall be received by the Office of Industrial Tax Exemption in order to qualify for exemption. Act 168 was enacted to give a multisector committee additional time to draft a new tax incentives legislation that will provide for the social economic development of Puerto Rico.

Act 117 of 14 July 2006
Act 117 of 14 July 2006, known as the Puerto Rico Tax Reform, enacted new sales and use tax legislation. In general terms, the sales and use tax system replaced the general excise tax system with the exception of certain articles (i.e., cigarettes, fuels, crude oils, vehicles, alcoholic beverages, cement, sugar and plastic products), which are presently subject to a special excise tax. The aggregate sales and use tax is 7% and includes two components: 1.5% for municipalities and 5.5% for the central government, effective 1 July 2006 and 15 November 2006, respectively.
Act 98 of 16 May 2006
Act 98 of 16 May 2006 imposed a special tax, known as the extraordinary tax, of 5% on net taxable income to corporations with gross income (as defined in the regulations) in excess of USD 10 million. The tax was computed based on the taxable income for taxable years ended on/or before 31 December 2005. Generally, the extraordinary tax may be claimed as a credit against the income tax liability over a four-year period commencing after 31 July 2006.

Act 89 of 13 May 2006
Act 89 of 13 May 2006 enacted a transitional additional tax of 2% on financial institutions (e.g., corporations operating according to the Puerto Rico Banking Act) for taxable years beginning after 31 December 2005 and on/or before 31 December 2006.

Act 41 of 1 August 2005
Act 41 of 1 August 2005 imposed a transitional additional tax of 2.5% on corporations with taxable income of USD 20,000 or more. This act was recently amended to be effective for taxable years commenced after 31 December 2004 and before 1 January 2007. Therefore, corporations will be subject to this tax for a period of two consecutive years.

Taxes on corporate income
The current corporate income tax rate comprises a 20% normal tax and a graduated surtax (computed on the “surtax net income”) up to a maximum combined and effective tax rate of 39%. The “surtax net income” is basically the net taxable income subject to regular tax less a surtax credit in the amount of USD 25,000.

</tbody>
</table>

If the net income subject to regular tax exceeds USD 500,000, a 5% tax will be imposed over the excess. Nevertheless, the total tax determined shall not exceed 39%.

Act 98 of 16 May 2006 imposed a special tax, known as the extraordinary tax, of 5% on net taxable income to corporations with gross income (as defined in the regulations) in excess of USD 10 million. The tax was computed based on the taxable income for taxable years ended on/or before 31 December 2005. Generally, the extraordinary tax may be claimed as a credit against the income tax liability over a four-year period commencing after 31 July 2006. The amount of the credit for each taxable year cannot exceed 25% of the extraordinary tax paid.
Puerto Rico

For taxable years beginning after 31 December 2008, corporations whose total income does not exceed USD 5,000,000 may opt to pay a normal tax rate of 25% to the extent it maintains an average of seven or more employees during the taxable year, or pay a 30% in the event that the taxpayer does not comply with the employee requirement. If the taxpayer opted for the normal tax rate, it will not be subject to the surtax of 5% to 19%.

**Temporary provision – 5% surtax over the tax liability**

A 5% additional tax will be imposed on the income tax liability determined (not on the taxable income) for corporations, partnerships, and trusts whose gross income exceeds USD 100,000. This provision will be effective for taxable years commenced after 31 December 2008 and before 1 January 2012. This 5% surtax, which is not creditable against the tax liability of future years, will be treated as a separate tax. The special surtax will also apply upon the tax on capital gains. For those corporate taxpayers in the maximum tax bracket, this special surtax will increase effective tax rate from 39% to 40.95%.

A domestic corporation is taxable in Puerto Rico on its worldwide income. Corporations resident in Puerto Rico are subject to tax on Puerto Rico-source income and on non-Puerto Rico-source income that is effectively connected with their trade or business in Puerto Rico. The net taxable income is generally defined as gross income from sources within Puerto Rico (including Puerto Rico effectively connected income) less the allowed deductions. Subject to certain limitations, taxes paid abroad on foreign-source income can be claimed as a foreign tax credit. Note that partnerships and limited liability companies (LLCs) are taxed in Puerto Rico as a corporation, which is first taxed at the entity level (at regular graduated rates up to 39%) and it is taxed again at the shareholders level (10%).

Generally, a corporation is required to prepay 90% of the actual tax for the year or, in the case an income tax return was filed by the corporation in the preceding year, 100% of such tax liability through estimated tax payments in four equal instalments.

**Corporate residence**

A corporation organised or created under the laws of the Commonwealth of Puerto Rico is a domestic corporation. A domestic corporation is a resident corporation even if it does not conduct business operations in Puerto Rico.

A foreign corporation engaged in trade or business in Puerto Rico is taxed at the regular corporate tax rates on income from Puerto Rico sources that is effectively connected income and at a 29% tax rate on its Puerto Rico source gross income not effectively connected with that business.

**Other taxes**

In addition to the regular Puerto Rico income tax, the following taxes may apply:

**Net capital gains preferential rate**

Net gains from the sale of capital assets having a holding period of more than six months may be subject to a preferential tax rate of 15%.

**Alternative minimum tax**

Alternative minimum taxes are applicable to all corporations and partnerships taxed as corporations except for not-for-profit organisations, corporations eligible for Industrial Incentives Act tax exemptions (only to the extent of the exemption) and certain investment companies. The tax is 22% of the amount to which the alternative minimum net income (AMNI) exceeds the exemption amount of USD 50,000. The AMNI is computed by adjusting the corporation’s regular taxable income by certain tax preference accounting items such as accelerated depreciation, instalment sales, long-term contract accounting, and deductions for interest expense related to exempt interest income.

**Tax on improper accumulation of income**

A surtax of 50% is imposed on corporations that improperly accumulate earnings to prevent the imposition of tax on shareholders or partners, rather than paying the earnings out as dividends. The tax is not imposed on accumulated earnings and profits but on the net income for the year computed without taking capital loss carryover or net operating loss carryover deductions, and reduced by the following items: Puerto Rico income taxes paid or accrued, disallowed net capital losses, and charitable contributions in excess of the deductible amount. The net income does not include industrial income exempted from income taxes under Industrial Incentives Acts. However, an exempt business can be subject to the penalty tax on non-exempt income.

**Special partnerships**

A partnership that meets certain requirements (i.e., mainly engaged in the construction and rental businesses, among others) may elect not to be taxed as a regular partnership but instead as a special partnership. Note that partnerships in Puerto Rico are taxed as corporations, which mean that partnerships are first taxed at the entity level and again at the shareholders level. By electing to be a special partnership, income or loss will flow through and will only be taxed to its partners.

For the partnership to qualify as a special partnership, it must satisfy certain tests regarding its source of income and must conduct a trade or business in specified industries. In addition, at least 70% of the gross income of the special partnership must be derived from sources within Puerto Rico during the year of the election.

**Corporation of individuals**

Domestic corporations (including partnerships) and US corporations engaged in a trade or business solely in Puerto Rico with no more than 75 shareholders and that meets certain requirements may elect not to be taxed as a regular corporation but instead as a Corporation of individuals (COI). If the COI election is made, income or loss flows through and will only be taxed to the corporation’s individual stockholders.

To qualify as a COI, the corporation needs to make an election on or before the fifteenth day of the fourth month of the taxable year for which the election is to be effective. The COI status is similar to the S corporation concept established in the US Internal Revenue Code.

**Municipal license tax**

Every corporation is required to file an annual volume-of-business declaration with each of the municipalities in which it establishes or conducts business operations during the year. The declaration must indicate the actual volume of business (i.e., net sales, gross income from any service rendered and other gross receipts) attributable
to each municipality. When a business operates in more than one municipality, but
does not receive income in all of them, the license tax shall be computed based on a
distribution of sales apportioned to each municipality by square feet of the building
used in each municipality.

For a non-financial business, the license tax payment varies from a minimum of 0.20%
to a maximum of 0.50% depending on each municipality. The payment must be made
in two equal instalments on or before 15 July and 15 January, on the basis of the
volume of business generated by the entity during its accounting year ended within
the immediately preceding calendar year before the due date of the declaration. A
5% discount is available when the tax is fully paid on the declaration due date (on or
before five working days after 15 April of each year).

For the first six months after a new business is established, the new company is
generally exempt from the municipal license tax, provided that the business informs
the municipality that it has established a new business in the municipality within the
first 30 days of operations and request the provisional license tax as established in each
municipality. A copy of the municipal license is generally requested as a prerequisite for
obtaining other licenses and permits in Puerto Rico.

**Personal property taxes**

Every corporation engaged in a trade or business in Puerto Rico which on 1 January
of each year owns personal property used in its trade or business within Puerto Rico,
whether it is leased to another entity or not, is subject to tax on such property. The tax
is self-assessed by the corporation and it is paid together with the filing of an annual
return. The tax ranges between 5.08% and 8.23% depending on the municipality. A
5% statutory discount is available if payment is made in full on the return due date (15
May of each year).

In general, all personal property not specifically exempted, including cash, finished
goods inventory, supplies, and depreciable property, is subject to the tax. The personal
property tax is generally based on the book value of the asset as of 1 January. Finished
goods inventory, however, is assessed on the average of the monthly balances for the
12-month period preceding 1 January of each year.

The valuation of the personal property subject to tax is determined by multiplying the
book value of such property by the applicable tax rate determined by the municipality
in which the property is located. If the book value of depreciable property is below
its estimated residual value, the property should be assessed at its estimated
residual value.

**Real property taxes**

The property tax system is administered by the Municipal Revenue Collection Center
(MRCC). The tax on real property is directly assessed by the MRCC and may be paid
in two instalments. The tax, (which varies from a minimum of 7.80% to a maximum
of 10.23% depending on the municipality), is applied to an amount based on the
hypothetical fair market value (FMV) of the relevant property in the year 1957. In
general terms, this hypothetical FMV normally ranges between 40% and 50% of the
cost of the property.
Sales and use tax
A sales and use tax was introduced in Puerto Rico on November 2006, eliminating, for the most part, the general excise tax regime. As a general rule, the SUT shall be applied, collected, and paid on all transactions of taxable items in Puerto Rico. Taxable items consist of tangible personal property, taxable services, admissions, and what is known as bundled transactions. Excluded from this definition are: professional associations and certain membership fees; stamps issued by professional associations, the Commonwealth of Puerto Rico or the federal government; human blood, tissue and organs; maintenance fees paid to resident associations; air and maritime tickets; real property; and bingos, raffles and lottery. Other transactions that are exempt from the sales and use tax include: export transactions; duty-free stores located at airport or maritime ports; prescription medicines; insulin; taxable items acquired for certain manufacturing operations (e.g., raw materials); and food and ingredients for food (except for prepared food, diet supplements, sweets and carbonated beverages).

The sales and use tax is imposed at the state level at a 5.5% and an additional 1.5% at the municipal level, for an aggregate tax of 7%. The 7% tax should be remitted to the PR government as follows: 6% to the Puerto Rico Treasury Department ("PRTD") and the remaining 1% to the corresponding municipality. However, there are some municipalities that have entered into an administration agreement with the PRTD by which the PRTD will collect the entire 7% of the sales and use tax from merchants and remit the 1% to the municipality (collected on the municipality's behalf).

Every natural or juridical person who does or wishes to do business of any kind in Puerto Rico shall request registration in the Merchant’s Registry of the PRTD at least 30 days before starting operations. Registration in the Merchant’s Registry shall be done by filling out Form AS 2914.1: Application for Merchant’s Registration Certificate and Exemption Certificate. Once this application is filled out and approved, the Secretary of Treasury will grant a Merchant’s Registration Certificate. This certificate constitutes the merchant’s authorisation to do business in Puerto Rico, and confirms the merchant’s obligation as a withholding agent. The Merchant’s Registration Certificate shall be displayed, at all times, in a visible place for the general public in the commercial establishment for which it was issued. The PRTD issues two kinds of merchant registration certificates: a certificate to indicate that the merchant is a person who collects sales tax (green certificate), or a certificate that indicates that the merchant is not a collector agent (red certificate). Please note that if a merchant is doing business in one or more of the 78 municipalities in Puerto Rico, the merchant only needs to register with the PRTD.

Unless specifically exempted, all persons selling taxable items are required to file a monthly tax return. This return shall be delivered to the PRTD no later than the tenth day of the calendar month following the month during which the sales occurred. If the merchant wishes to claim any exemption corresponding to taxable items, the merchant needs to file the monthly return and claim the exemption in it.

Excise taxes
Although the sales and use tax replaced the excise tax system; there are certain articles that continue to be subject to a special excise tax such as cigarettes, fuels, crude oils, vehicles, alcoholic beverages, cement, sugar and plastic products.
**Puerto Rico**

**Annual report**
Every corporation is required to file an annual corporation report with the Puerto Rico Department of State. This annual report must be filed by the fifteenth day of April along with a USD 100 annual fee and a balance sheet as of the close of operations of the prior year. If the volume of business exceeds USD 3 million the annual report must be accompanied by a balance sheet certified by a certified public accountant (CPA) licensed in Puerto Rico. In the event that the volume of business does not exceed USD 3 million, a balance sheet prepared under generally accepted accounting principles (GAAP) by a person with a general knowledge in accounting has to be submitted along with the corporate annual report. An extension of 60 days for filing the annual report can be obtained if timely requested. An additional 30 day period may also be requested. The Secretary of State is authorised to impose a penalty for failure to timely or accurately file a penalty for failure to timely or accurately file the annual corporate report that would be between USD 100 and USD 1,000 if a non-profit corporation, and between USD 500 and USD 2,000 if a for-profit corporation.

**Branch income**
Corporations operating in Puerto Rico as a branch may be subject to a 10% tax on the dividend equivalent amount (commonly known as the branch profit tax or BPT). The BPT should be determined and paid along with the corporate income tax return. There would not be an income tax withholding at source at the time cash transfers are made by the Puerto Rico branch to its home office outside of Puerto Rico.

**Income determination**

**Business profits**
The gross income of a corporation generally includes business income, profits from the sale of property, interest, dividends, and income derived from any source unless specifically exempted by law.

**Accounting period**
The annual accounting period may be on the basis of the calendar year, a fiscal year ending on the last day of a month or a 52/53 week year.

**Accounting methods**
A corporation’s net income is generally calculated in accordance with the method used for financial statement purposes, except for various items of income and expenses, which are treated differently. For example, the cash method of accounting may not be used by a corporation with inventory or with an average annual gross income in excess of USD 1 million. Long-term contract methods and the instalment method can be used for regular tax calculations.

**Inventory valuation**
In general, inventory is valued at the lower of cost or market. Retail merchants can use the retail method of accounting.

**Capital gains**
Tax-advantaged treatment is provided for net long-term gains (holding period of more than six months) from the sale of capital assets. For corporations, net long-term capital gains, reduced by any short-term capital losses, are subject to an alternative tax in lieu
of the regular corporate tax rates. For transactions conducted after 30 June 2007, the alternative (preferential) tax is 15%.

**Other income**
Interest income is generally taxable, except interest from obligations of the federal government or any state, or territory or political subdivisions; the District of Columbia; and the Commonwealth of Puerto Rico or any of its instrumentalities or political subdivisions.

Dividends from a corporation that derives 20% or more of its profits from sources within Puerto Rico are taxable in Puerto Rico. However, a dividend-received deduction may apply.

Royalties from property located in Puerto Rico or from any interest in such property are included in gross income.

Service fees are generally taxable as ordinary income.

**Deductions**

**Business expenses**
All ordinary and necessary expenses paid or incurred during the taxable year in carrying on any trade or business are deductible by corporations operating in Puerto Rico.

**Depreciation and depletion**
A reasonable depreciation allowance is deductible for the exhaustion, wear and tear, and obsolescence of property used in business. The most common depreciation method used by corporations is the straight-line method. Nevertheless, any other consistent method may be used in lieu of the straight-line method as long as it is in accordance with the recognised trade practice. In addition, a corporation (other than one that is exempt under an Industrial Incentives Act) can elect an accelerated depreciation method for new or used tangible property acquired by purchase, on taxable years commencing after 30 June 1995.

**Inter-company charges**
Management fees paid to a foreign affiliate are deductible to the extent that they are reasonable compensation for the services rendered. However, the Secretary of the Treasury has the authority to reallocate items of income and expense to properly reflect the Puerto Rico taxable income.

**Employee remuneration**
Corporations may deduct payments of reasonable salaries or other compensation for services actually rendered.

**Insurance premiums**
Insurance premiums paid or accrued on risks related to a trade or business are deductible as well as premiums on group life policies covering employees, where the beneficiary is not the corporation. No deduction is allowed for premiums paid to an insurance company not authorised to provide insurance in Puerto Rico, or through an agent or broker not authorised to operate in the Commonwealth of Puerto Rico.
Puerto Rico

**Net operating losses**
All corporations are generally entitled to the net operating loss deduction in computing their tax. Net operating losses may be carried over for seven years (there are no carryback provisions). Also, losses from sales or exchanges of capital assets are allowed only to the extent of gains from such sales or exchanges. The carryforward period is, however, five years.

**Dividends-received deduction**
All corporations engaged in trade or business in Puerto Rico are entitled to an 85% deduction on dividends received from a domestic corporation but not in excess of 85% of the net income of the corporation. A 100% dividend-received deduction applies for dividends received from taxable controlled domestic corporations (if ownership in a corporation is 80% or more).

**Other significant items**
Deductions for allowed charitable contributions are limited to 5% of net income, computed regardless of the contributions.

The cost of incidental repairs (not adding value to the property) is deductible as business expenses.

Subject to certain limitations, savings and retirement plans for the benefit of the employees are deductible, if qualified by the Secretary of the Treasury.

A corporation is allowed a deduction for taxes paid (except for Puerto Rico income tax), including income tax paid to the United States, its other possessions and any foreign country. The deduction is in lieu of claiming a foreign tax credit.

Corporations are entitled to a rent expense deduction if the rented property is used in the business.

Meals and entertainment expenses are deductible, subject to a 50% limitation. Travelling expenses are fully deductible if the trip is for business purposes.

**Group taxation**
Puerto Rico does not have group taxation rules. In other words, corporations can not file a consolidated return for Puerto Rico tax purposes.

**Thin capitalisation**
There are no specific thin capitalisation rules in Puerto Rico.

**Tax incentives**
A corporation engaged in specific eligible activities may apply for a reduced income tax rate through the request of a Tax Exemption Grant to the Puerto Rico Office of Industrial Tax Exemption. On 28 May 2008, Act 73 was enacted into law to create a new Incentives Act in an attempt to create a new economic environment with the goal of developing the local industry, maintaining current investments, and promoting the direct investment from the United States and other countries. Act 73 (the new act) replaces the Puerto Rico Tax Incentives Act of 1998 (the 1998 Act) which expired on 30 June 2008. The new act changed the fixed income tax rates applicable to industrial
development income (IDI) and introduced certain credits to reduce the income tax determined, when applicable. The new act does not provide an expiration date; therefore, it is effective until a new act replaces it.

Any exempt business with a tax-exemption grant under any of the prior acts can request to renegotiate its tax decree under this act. Such renegotiation would be possible provided certain requirements of minimal increase in investment and employment are met. The exemption period is 15 years. This new act became effective on 1 July 2008.

**Tax rate**
Exempt entities may elect one of the following two scenarios:

**General scenario:** 4% income tax rate with a withholding tax rate on royalty payments of 12%. Under this scenario, the amount of withholding taxes on the royalty payments is creditable against the 4% income tax.

**Alternate scenario:** 8% income tax rate with a withholding tax rate on royalty payments of 2%. Under this scenario, the withholding tax on royalty payments is creditable against the 8% income tax rate.

Companies may elect one of these scenarios at the time of applying for the benefits under the new act. However, there are other possibilities:

- 4% fixed income tax rate on IDI, excluding income from certain investments provided by section 2(j).
- Existing exempt businesses currently taxed at a rate of 2% to 4% under the 1998 Act may continue to enjoy the same tax rate under the new act when it is determined by the Secretary of the Puerto Rico Economic Development (the Secretary) that said tax rate is in the best interest of Puerto Rico and the existing business complies with an employment commitment of at least 80% of its average employment during the three preceding years before the application of exemption under the new act. Note that the secretary could require a minimum income tax payment equal to the average income tax paid during said period.
- Pioneer industries are eligible for a 1% income tax rate.
- Activities for the development in Puerto Rico of intangible property are eligible for a 0% income tax rate.
- Any exempt business having operations at a municipality located in a “low or intermediate development zone” may reduce its income tax rate by an additional 5%.
- Any exempt business having operations in Vieques and Culebra may be totally exempt from income taxes during the first 10 years of operations as established in the new act. The remaining years covered by its tax decree may qualify for a 2% income tax rate.

**Special deductions**
Special deductions are eliminated, except for capital investment in buildings, structure, machinery and equipment and the net operating losses carryforward.
Puerto Rico

Credits
Credit for purchases of Puerto Rico manufactured product: Subject to certain limitations, the credit for purchases of products manufactured in Puerto Rico will remain at 25% (35% in the case of recycled products).

Job creation credit: There is a credit for every incremental job applicable to exempt business starting operations after 1 July 2008. The amount of the credit (maximum of USD 5,000 per each employment) depends upon the location of the industrial development zone.

Research and development investment credit: 50% credit granted for the eligible investment in research and investment activities including operational expenditures, clinical trials, infrastructure, renewable energy or intellectual property.

Energy investment credit: 50% credit granted for the eligible investment in the acquisition of machinery and equipment for the creation of energy.

Energy cost credit: There is also a 3% credit (which could be increased up to 10% if certain employment requirements are met) for payments made to the Puerto Rico Power Authority during the corresponding taxable year. This credit will be available for a 10-year period starting on 1 July 2008. Additional credits (for the purpose of reducing the cost of energy) may be available to industrial units subject to certain limitations.

Technology transfer credit: 12% credit (2% in the case of exempt businesses that opted for the alternate tax) for payments made to resident entities for the use or privilege of using intangible property in Puerto Rico.

Strategic projects investment credit: There is a 50% credit for eligible investment in strategic projects including activities for the design, development and construction of dams.

Industrial investment credit: There is a 50% credit, up to a maximum of USD 8,000,000, for cash invested in the purchase of 50% or more of the stock or operating assets of an exempt business that is in the process of shutting down operations, amount used to start-up small or medium exempt business, or amounts used for a substantial expansion of an exempt business.

Several of the above mentioned credits were also made available to entities operating under prior tax incentives acts.

Property taxes
Similar to the previous incentives laws, the current act allows for a 90% property tax exemption on personal and real property. However, the current act introduced a methodology for the classification and assessment of real property owned by the exempt businesses. Under the provisions of the current act, a taxpayer can self-assess his real property tax responsibility (similar to the current personal property tax system) and remit the related tax liability due along with a real property tax return (to be issued by the MRCC) by 15 May of each year. The self-appraisal method is only applicable to real property that has not been appraised by the MRCC and is mainly limited to machinery and equipment classified as real property. Note that this method is not available for assets such as land, building and building equipment.
**Puerto Rico**

*Municipal license tax and other municipal taxes*

The current act did not introduce many changes regarding treatment of exempted businesses for municipal license tax purposes. The tax exemption remains at the same 60% as it was under the 1998 Act. Exempt businesses operating in Vieques or Culebra will be 90% exempt; small or medium exempt businesses will be 75% exempt; and central or regional corporate headquarters providing managerial services to affiliated companies will be 100% exempt during the first five years after becoming eligible for the exemption.

**Withholding taxes (WHT)**

Corporations not engaged in a trade or business in Puerto Rico are subject to a 29% withholding tax at source on certain gross income items (considered fixed or determinable annual or periodical (FDAP)) from Puerto Rico sources.

FDAP income may include interests received from a related person, rents, royalties, salaries, annuities, compensation, remuneration, and net capital gains. However, if the payment received is from dividends and partnership profits, a 10% withholding tax should apply.

The payer, as a withholding agent, is responsible for the deduction and remittance of the 29% (10% in the case of dividends) to the Puerto Rico Treasury Department. Such tax is due on or before the fifteenth day of the month following the receipt of the income by the non-resident corporation and it is reported in Form 480.31 “Deposit Slip of Nonresidents Income Tax Withheld at Source”. An annual informative return is also required to be filed (Form 480.30 “Nonresidents Annual Return of Income Tax Withheld at Source”) no later than 15 April of the following year.

**Tax administration**

**Returns**

The Puerto Rico tax system is based on the principle of self-assessment. A corporate taxpayer is required to file an annual return (generally Form 480.20) by the fifteenth day of the fourth month following the close of its tax year. In general terms, a taxpayer can obtain an additional extension of three months to file its tax return. Failure to timely file can result in penalties.

**Payment of tax**

A corporation must substantially satisfy its annual income tax liability, if any, through estimated income tax payments. The amount of estimated income taxes should be paid on equal instalments on the fifteenth day of the fourth, sixth, ninth and twelfth month of the taxable year of the corporation. The estimated payments should equal or exceed 90% of the actual tax for the year or, in the case an income tax return was filed by the corporation in the preceding year, 100% of such tax liability. Failure to pay the tax by the due dates indicated above may result in a penalty of 10% of the instalment due.

**Other issues**

**Foreign currency restrictions**

As a territory of the United States, Puerto Rico’s currency is the United States dollar.
Furthermore, there are no foreign currency regulations and/or treaties between foreign countries and Puerto Rico. However, the Puerto Rico Supreme Court has recognised that, although Puerto Rico is generally not a signatory party to a treaty entered into by the United States, if an international treaty does not explicitly exclude Puerto Rico, the treaty would be applicable to Puerto Rico.

**Audited financial statements**

Accounting records must be prepared in accordance with the general accepted accounting principles (GAAP) followed in the United States. Domestic corporations (i.e., incorporated in the Commonwealth of Puerto Rico) with volume of business of more than USD 3 million must include with their income tax return audited financial statements of the Puerto Rico operations for the accounting year ended on or before the preceding 31 December. The financial statements should be submitted with an audit report issued by a CPA licensed in Puerto Rico. Nevertheless, foreign corporations with volume of business of more than USD 1 million must include with their income tax return audited financial statements of the Puerto Rico operations.

With respect to the municipal license and personal property tax filings, the threshold amount for the audited financial statements requirement is gross revenues of more than USD 3 million regardless the corporate residency (i.e., foreign or domestic).

Significant developments

Qatar Financial Centre (QFC)
The government of Qatar established an onshore financial centre, the Qatar Financial Centre (QFC), in 2005, mainly aimed at regulated organisations operating in the financial services sector. However, the QFC law permits certain other non-regulated activities to be carried out as well, for example, acting as a holding company or providing group treasury functions.

Although the QFC tax law has been drafted, it has not yet been approved. It is expected that the QFC tax law will be enacted during 2010 and will be retroactively applied from 1 January 2010. The guidance provided in other sections therefore relates only to the law applied outside the QFC. The draft QFC tax law previously circulated contained a flat corporate tax rate of 10%.

New Qatar corporate tax law
A new tax law, Law No. 21 of 2009, came into force with effect from 1 January 2010 and replaced the previous tax law, Law No. 11 of 1993. Key highlights of the new law include the reduction of the tax rate to a flat tax rate of 10%, the elimination of progressive tax rates (with the top rate of 35% under the previous tax law), a shift to a “source based taxation” from an “activity based test” and the introduction of withholding tax.

Detailed regulations containing the implementation rules and guidelines have not yet been issued by the Qatar tax authorities.

Taxes on corporate income

The tax law with respect to QFC-based entities has not yet been enacted. Accordingly, the information provided in this section is directed towards other entities with Qatar source income.

An entity that is wholly or partially foreign owned and that derives income from sources in Qatar is subject to income tax in Qatar. In the case of a joint venture, the tax liability of the joint venture is dependent upon the foreign partners’ share of the joint venture’s profit. Currently, no corporate income tax is levied on a corporate entity that is wholly owned by Qatari nationals. Following the introduction of the new tax law with effect from 1 January 2010, the tax treatment with respect to corporate entities owned by Gulf Cooperation Council (GCC) nationals may vary from country to country.
Qatar

Unless specifically exempt from tax, an entity will be taxable in Qatar if it has generated Qatar source income, regardless of the place of its incorporation. Even if an entity has been granted exemption from tax, the entity is required to submit a tax return.

Taxable income generally is subject to a flat corporate income tax rate of 10%, with certain exceptions available. In prior periods, tax was levied at differing rates on different portions of income, with the first QR 5 million of income being taxed at an average rate of 24% and any income in excess of QR 5 million being taxed at 35%.

Since 1 January 2010, the following tax rates apply in the specific circumstances noted:

- If a special agreement has been reached with the Government of the State of Qatar prior to 1 January 2010, the rate specified in the agreement continues to apply. If no rate is specified in the agreement, a rate of 35% will be used.
- The rate applied with respect to oil operations, as defined in Law No. 3 of 2007, may not be less than 35%.
- Payments made to non-residents with respect to certain service activities not connected with a permanent establishment (PE) in Qatar are subject to withholding tax. (See Withholding taxes.)

The amount of tax payable is reduced for companies that are partly foreign owned, depending on the extent of local ownership.

**Corporate residence**

It is important to recognise that residence is not the basis used to determine whether an entity is taxable in Qatar. Accordingly, a tax exposure in Qatar may arise even if a company is not resident in Qatar. Residence is therefore primarily relevant when considering whether withholding tax will apply on payments received rather than the typical form of corporate taxation on taxable income.

A company is resident in Qatar if it is incorporated in accordance with Qatar laws, its head office is situated in Qatar or its place of effective management and control is in Qatar.

**Other taxes**

Qatar currently imposes no sales tax or value-added tax (VAT) on operations in Qatar. Customs duties are applied to goods with an origin outside the GCC countries, normally at a rate of 5%, but sometimes are applied at higher rates for specific types of goods, such as tobacco products. Temporary import exemptions are sometimes available.

**Branch income**

The profits of a branch owned by a foreign parent entity are subject to the same tax rules as apply to other forms of taxable entity, although a reduction for partial local ownership is not available.
**Income determination**

**General principles**
Corporate income tax is levied on a company’s Qatar source income. Some examples of Qatar source income include:

- Income derived from an activity carried on in Qatar;
- Income derived from contracts wholly or partially performed in Qatar;
- Income from real estate situated in Qatar, including income from the sale of shares of companies with assets consisting of mainly real estate situated in Qatar;
- Income from shares in companies resident in Qatar or listed on Qatar’s stock market;
- Interest arising in Qatar; and
- Bank interest realised outside Qatar if it results from the taxpayer’s activity in Qatar.

**Capital gains**
Any chargeable gains on the sale of capital assets are taxed as ordinary income.

**Exemptions**
A number of exemptions have been specified in the Qatar tax law, including the income generated by Qatar-based companies that are wholly owned by Qatari nationals.

Dividends are exempt from tax if the dividends are paid from profits that were either subject to tax in Qatar or distributed by a company that is exempt from tax in Qatar.

**Losses**
Losses may be deducted from net income during the year. Losses may not be carried forward for more than three years after the year in which they were incurred. Losses may not be carried back.

**Self-employed contractors**
While the Qatar sourced income of self-employed contractors is subject to taxation in Qatar, employment income is outside the scope of Qatar tax.

**Deductions**
Taxable income is determined after deducting all expenditures, costs and losses incurred to generate gross income, particularly the following:

- Interest on loans used in the activity;
- Employee costs (including salaries, wages, gratuities, and other end of service benefits);
- Tax depreciation of fixed assets;
- Losses resulting from the sale of assets;
- Bad debts approved by the tax authorities in accordance with the criteria set out in the tax law; and
- Donations, gift aid and subscriptions to charitable, humanitarian, scientific, cultural or sporting activities paid in Qatar to government authorities or public bodies, provided the value does not exceed 5% of net profit in the year in which the deduction is claimed. A deduction is usually available for expenses that are
considered ordinary rather than “capital” in nature and incurred in generating Qatar source revenue.

**Depreciation and depletion**

Depreciation should be calculated in accordance with rates specified by the Qatar tax law and regulations.

**Allocations of overheads to branches**

The branch’s share of the head office expenses (i.e., indirect or allocated overheads) generally is deductible only up to a certain limit. The deduction is capped at 3% (1% for banks) of the total revenue less certain other costs under the previous tax law. This threshold may be altered by the executive regulations, which are expected to be published later in 2010.

**Group taxation**

There is no definition of a “group” for Qatar tax purposes and therefore, there is no concept of group taxation.

There are no specific rules on transfer pricing, thin capitalisation, or controlled foreign companies. However, there is a broad anti-avoidance provision in the tax law that gives the tax department wide powers including that of restatement.

**Tax incentives**

**Qatar Science and Technology Park**

Qatar has established the Qatar Science & Technology Park (QSTP), which was aimed at entities with research and development activities. QSTP entities may be exempt from Qatar tax, however, tax exempt entities are required to file tax returns.

**Other tax exemptions**

An application for a tax exemption may be made for certain projects that are considered to be strategically significant to the Qatar economy. The exemptions are generally granted for a period of three or six years (reduced from five or 10 years under the previous tax law). Applications for an exemption are assessed based on certain criteria set out in the Qatar tax law. Notwithstanding the fact that an exemption is granted, an entity that is exempt is still required to file a tax return under the Qatar tax law.

**Withholding taxes (WHT)**

**Mechanics of the withholding tax system**

Withholding tax was introduced in Qatar for the first time on 1 January 2010 by the new tax law. Withholding tax is levied on certain payments made to non-residents in relation to royalties and technical services (the applicable rate is 5%) and on interest, commissions, brokerage fees, directors' fees, attendance fees and any other payments for services carried out wholly or partly in Qatar (the applicable rate is 7%). Withholding tax on interest is currently suspended until further notice; however, this is expected to be a temporary measure.

The company that makes the payment to its foreign supplier is required to withhold the tax and remit to the tax department the funds that were withheld by the sixteenth day.
of the following month. In the event that the company does not make a payment to the
tax department, the company will be liable for a penalty equal to the amount of unpaid
tax due, in addition to the withholding tax.

Withholding tax in Qatar may be reduced under the terms of a double tax treaty.

**Retention system**
Pursuant to circulars issued by the tax department, a retention system is in place
whereby certain final contract amounts are required to be retained from payments
made by Qatari entities to foreign entities in connection with work performed in
Qatar. However, a practice has developed over time whereby 5% to 10% of each
payment is retained rather than the final contract payment. All ministries, government
departments, public, semi-public and private establishments and Qatar tax payers
are required to retain these amounts until the recipient entity provides a final tax
clearance, which is obtained from the Qatar tax authorities. Where withholding tax is
not deducted, the retention system may continue to apply.

**Tax treaties**
Qatar has a growing network of double tax treaties with around 25 double tax treaties
currently in force.

**Tax administration**

**Returns and payment of tax**
The tax year is generally the same as the calendar year, although advance approval
may be sought from the Qatar tax authorities to use a company’s accounting
year-end.

The tax return is due within four months from the date of a company's tax filing period.
The tax payable is based on the tax declaration and should be paid on the same day
that the tax return is due.

**Late filing penalties**
The Qatar tax law contains a penalty regime, which imposes a penalty for the late filing
of a tax return. In addition, a penalty applies where there is a late payment of tax.

**Objection and appeals process**
It is possible for a taxpayer to initially object directly to the tax department regarding
a decision related to a tax position. If the objection is unsuccessful with respect to
altering the tax department’s decision, an appeal may be made by the taxpayer to the
Tax Appeals Committee. Based on the Tax Appeals Committee’s decision with respect
to the appeal, a final appeal may be made by either the tax department or the taxpayer
to the administrative chamber of the court. The law prescribes time limits for each
stage of the appeal process.

**Accounting and audit requirements**
A company’s corporate income tax return is required to be accompanied by audited
financial statements if the company’s capital or profit exceeds QR 100,000, or the
head office is situated outside Qatar. The audit report must be signed by a locally
registered auditor.
Qatar

Qatar tax law requires accounts to be prepared in accordance with International Financial Reporting Standards (IFRS). It is possible to seek approval from the Qatar tax authorities for an alternative accounting basis.

**Accounting record retention**

All accounting books, registers and documents relating to activity in Qatar are required to be retained in Qatar for a 10-year period.

**Other issues**

The tax law in relation to QFC-based entities is yet to be enacted. Accordingly the guidance in this section is directed towards other entities with Qatar source income.

**Anti-avoidance provisions**

A new anti avoidance provision was introduced by the new tax law, which gives the Qatar tax authorities very wide powers to counteract transactions that have been carried out with a tax avoidance purpose. These powers include substituting an arm’s-length value or recharacterising transactions.

Significant developments

Given the current economic environment, it is expected that the Government will enact during 2010 fiscal measures with significant impact. Among others, these measures may consist of widening the tax base for income tax, through the inclusion of the incomes from interest, capital gains, meal tickets, and compensation payments.

The Government also intends to introduce effective payment of value-added taxes (VAT) for intra-community acquisitions of certain products with high tax fraud risk (e.g., meat, fish, grains, vegetables, fruits). On the other hand, the companies that acquire such products from the Romanian market will no longer need to pre-finance the VAT, the payment being borne only by the final customer.

Taxes on corporate income

The standard profit tax rate is 16%, for Romanian companies and foreign companies operating through a permanent establishment in Romania. Starting 1 May 2009, all active companies pay the higher of the 16% corporate income tax (CIT) or the minimum tax. The minimum tax is determined based on the revenues reported on 31 December of the previous year. The annual minimum tax ranges from EUR 500 to EUR 10,000, depending on the businesses’ turnover in the prior year. Start ups are exempted from minimum tax for the tax year of their incorporation.

The profit tax liability due from nightclubs and gambling operations cannot be less than 5% of the revenue obtained from such activities.

Corporate residence

A company is considered resident in Romania if it was set-up under Romanian law, or has its place of effective management in Romania.

Starting in 2010, the tax code introduced the concept of “legal person set-up in accordance with European legislation.” Such legal persons become tax residents if they establish (or transfer) their registered office in Romania. As a result, such entities are subject to the same tax treatment as Romanian legal persons for taxation of profits and dividends.

Permanent establishment (PE)

PE is defined as being the place through which the activity of a non-resident is conducted, fully or partially, directly or through a dependent agent. Once a PE is
created, Romania has the right to tax the profits of the foreign enterprise derived from the activity performed on its territory.

The Romanian legislation explicitly states three conditions that should be met simultaneously in order to trigger a PE:

1. A place of business must exist (e.g., premises, machinery or equipment);
2. The place of business must be fixed (i.e., must be established at a distinct place with a certain degree of permanence); and
3. The activity should be carried out through this fixed place of business (i.e., there are people dependent on the enterprise and conducting its business in the state where it is located).

The registration, filing and payment requirements are similar to those for a Romanian company.

**Other taxes**

**Value-added tax (VAT)**

The standard VAT rate is 19% and is applied to all supplies of goods and services that do not qualify for an exemption (with or without credit) or for the VAT reduced rate (this includes imports).

The reduced VAT rate is 9%, and is applicable to admission fees at museums, historical monuments, architecture and archaeological monuments, zoos and botanical gardens, fairs and exhibitions, cinema tickets, supply of school manuals, books, newspapers and periodicals, supply of prostheses and orthopaedic products (except for dentures), medicine for human and veterinarian use, accommodation in hotels or in areas with a similar function.

Some operations are exempt with credit (i.e., deduction right) for input VAT, including: export of goods, transport and related services, intra-community supply of goods, international transport of passengers, certain operations performed in free-trade zones and free warehouses, supply of goods to a bonded warehouse, a VAT warehouse and related services, supply of foreign goods which are placed under suspensive customs regimes, supply of services in connection with goods placed under customs suspensive regimes, supply of goods and services to diplomatic missions, international organisations and North Atlantic Treaty Organisation (NATO) forces.

VAT exemption applies to a range of activities, including banking, finance and insurance. However, some financial services are also subject to a 19% VAT (e.g., factoring, debt collection, managing and depositing certain equity papers).

VAT on imported goods continues to be paid at customs until 1 January 2012, save for taxable persons registered for VAT purposes that obtain an import VAT deferment certificate from the customs authorities. For these taxpayers, the VAT is not paid at customs but is shown in the VAT return as both input and output VAT.

The rules for establishing the place of supply of goods and services (and therefore the place of VAT taxation) are fully aligned with the Recast of the EU Sixth VAT Directive.
Services provided by offshore entities to Romanian companies with deemed place of supply in Romania are subject to Romanian VAT.

The reverse-charge mechanism applies for services performed by offshore entities and the place of supply is where the beneficiary is established or has a fixed establishment (e.g., consultancy, marketing services, telecommunications and electronically supplied services). This is possible provided the suppliers are not established in Romania for VAT purposes. Under the VAT reverse-charge mechanism, VAT is not actually paid, but only shown in the VAT return as both input and output tax, provided the beneficiary is registered for VAT purposes.

As a general rule, the fiscal period is the calendar month. For taxable persons registered for VAT purposes whose previous year-end turnover did not exceed EUR 100,000, the fiscal period is the calendar quarter.

**Customs regulations**

The customs value is determined and declared by importers in accordance with the provisions of the WTO Customs Valuation Agreement (i.e., the Agreement pertaining to the implementation of Article VII of the General Agreement on Trade and Tariffs (GATT)).

For chain transactions with goods intended for import, the customs value may be determined, under certain conditions, based on the price in any of the transactions in the chain (“first sale principle”). This way, the customs value can be determined based on a price lower than that paid or payable by the importer (e.g., based on the price of the first transaction in the chain).

The customs value can be modified within 12 months of the acceptance of the customs declaration for the release of the goods for free circulation, in specific cases (e.g., in the case of defective goods).

Under specific conditions, determining customs value upon import is possible, even if certain elements that need to be added to the customs value are not quantifiable on the importation date (e.g., licence fees, royalties) or are missing.

The customs authorities may inspect the customs value either during the customs clearance or during a post-import audit (the customs authorities are entitled to perform such an audit during a five-year period following the date of import).

It is also possible to amend or invalidate the customs declaration, as follows:

- Amendment of the customs declaration before the customs clearance is obtained;
- Invalidation of the customs declaration within 90 days of the customs clearance being obtained; or
- Amendment after the customs clearance is obtained, which can be performed at the request of the traders within three years of the customs clearance date.

The customs duties are those specified in the EU Common Customs Tariff.

Customs duties are expressed as a percentage applied to the customs value (i.e., ad valorem taxes), or as a fixed amount applied to a specific quantity (i.e., specific taxes).
Agricultural products (i.e., products from chapters 1–24 of the EU Common Customs Tariff) are subject to specific taxation.

In certain cases (e.g., meat), the customs duty rate is established with regard to the cost, insurance and freight (CIF) or the entry price of the products. In other cases, the customs duty rate is established by adding to the ad valorem tax additional duties such as agricultural components.

Legal entities established in non-EU states can declare goods by indirect representation. The indirect representation can be used for customs regimes such as transit or temporary importation.

Moreover, legal entities established in non-EU states can occasionally declare goods on their own through direct representation, provided that the customs authorities consider this to be justified.

Customs brokers can be authorised to use the local customs clearance procedure or to submit simplified customs declarations for the companies they represent (either directly or indirectly). Any Romanian legal person can act as an indirect representative for a sole person using the simplified customs clearance procedures.

Operators that obtain Authorised Economic Operator (AEO) status benefit from simplifications regarding customs inspection, obtaining customs authorisations and performing customs formalities.

Moreover, through the AEO certificate, the holder is recognised by the customs authorities as a reliable person, giving comfort as regards observance of the safety and security standards.

Companies can obtain rulings (“binding tariff information” or BTI) from the Romanian customs authorities on the tariff classification of imported goods that are binding for the customs authorities for a six-year period, whenever goods identical to those described in the BTI are imported.

A similar type of ruling can also be obtained regarding the origin of goods (binding origin information BOI). The BOI is valid for a three-year period.

**Property taxes**

For buildings owned by individuals, the tax rate is 0.1% and is levied on the taxable value of the building, determined depending on the surface, zoning and locality rankings. Various adjustments to the taxable base are provided for dwellings, older buildings, etc. The tax increases depending on the number of buildings owned.

For buildings owned by companies, the building tax rate is set by the Local Council at between 0.25% and 1.5% of the entry value of the building, adjusted with the value of reconstruction, consolidation, modification and extension works and the revaluation, if applicable. If the building has not been revaluated in the previous three years, the tax rate is increased by the Local Council to between 5% and 10%. The taxable value of fully depreciated buildings is reduced by 15%.
Building tax is paid twice a year, by 31 March and 30 September, in equal instalments. As a general rule, if the building tax due for the entire year is paid in advance by 31 March, a reduction of up to 10% may be granted by the Local Council.

Owners of land are subject to land tax established at a fixed amount per square metre, depending on the rank of the locality where the land is located and the area or category of land use, in accordance with the classification made by the local council.

Companies are not subject to land tax on land where buildings are sited.

Similar to building tax, land tax is paid twice a year, in equal instalments, by 31 March and 30 September. A 10% reduction is granted for full advance payment of this tax by 31 March.

**Social expenses**

Employers must pay social security contributions, calculated on the gross salary costs as follows: 20.8%, 25.8% or 30.8%, depending on working conditions.

Other contributions payable by employers for employees are as follows:

- 0.85% – Contribution for medical leaves;
- 5.2% – Health fund;
- 0.5% – Unemployment fund;
- 0.25–0.75% – Commission for Labour Office;
- 0.25% of the salary fund – Guarantee fund; and
- 0.15%–0.85% – Work accidents insurance fund.

**Excise duties**

*Harmonised excisable products*

The following products are subject to harmonised excise duties: ethyl alcohol and alcoholic beverages, tobacco products, energy products (e.g., unleaded petrol, diesel oil and coal) and electricity. Excise duties are due when excise goods are released for consumption (e.g., imported into Romania, taken out of an excise duty suspension regime). Excisable products can be produced, transformed, held and received under a duty suspension arrangement only in a tax warehouse, which should have prior approval from the tax authorities.

Such excisable products can also be received from within the EU under excise duty suspension arrangements by registered consignees.

Romanian tax warehouse keepers are deemed authorised for the intra-community movement of excisable products under excise duty suspension arrangements.

Excisable products can also be dispatched under duty suspension arrangements after being released for free circulation by the registered consignor (this also applies for the holder of a single authorisation for a simplified customs clearance procedure).

The movement of these excisable products under a duty suspension arrangement has to be made based on the accompanying administrative document (AAD). From 1 April 2010 the paper AAD procedure will be replaced by the computerised system for monitoring the movement of excise goods under suspension of duty.
Romania

The production, holding and movement of excisable products under duty suspension arrangements are subject to a guarantee.

Ethyl alcohol and other alcoholic products are exempt from the payment of excise duties if they are denatured, used in nutritional, pharmaceuticals or cosmetics industry. From 1 April 2010 there will be exemptions for ethyl alcohol and other alcoholic beverages when used in a manufacturing process provided that the final product does not contain alcohol or as samples for analysis, for necessary production tests, or for scientific purposes.

The excise duty exemption for alcohol products and energy products can in some cases be granted directly based on an end-user licence or indirectly through reimbursement/compensation.

Some energy products subject to movement control can be purchased to be used for the purposes excepted from excise duty, provided that an end-user authorisation is obtained and the payment of excise duties is secured.

From 1 April 2010 the guarantee required for movement under duty suspension arrangements may be lodged by the transporter or carrier, by the owner of excise goods or by the consignee; or jointly by two or more persons involved in the movement of the excise goods (e.g., the consignor and the transporter of the goods).

In some cases, traders can claim a refund of the excise duties paid (e.g., excise duty paid for goods released for consumption in Romania, but intended for consumption in other Member States; excise duties paid for goods released for consumption and then returned to the production tax warehouse for recycling, reprocessing or destruction; excise duties paid for goods acquired from the EU or imported and then returned to the suppliers).

Before being released for consumption in Romania, spirit-based beverages and tobacco products have to be marked with duty stamps. The responsibility for such marking lies with the tax warehouse keepers, registered consignees and importers releasing such goods for consumption.

Companies selling fuel in gas stations have to register with the tax authorities.

Other excisable products
From 1 April 2010 the other excisable products are green coffee, roasted coffee (including coffee with substitutes) and soluble coffee (including blends with soluble coffee).

The excise duty for coffee will be decreased to nil by 2011.

Excise duties are due when the actual reception takes place, for the excisable products received from EU.

For imports of excisable goods, the importers holding single European authorisations for simplified customs clearance procedures issued by another EU Member State have to file a VAT and Excise Duties declaration with the customs authorities. Excise duties will be due on the date the import declaration is registered.
Excise duty exemption applies in this case, provided the excisable products are exported or placed under a suspensive customs regime.

Companies performing exports or intra-community supplies of coffee may benefit from the refund of the excise duty paid for the coffee used as raw materials.

Traders purchasing coffee are entitled to a refund of the excise duties paid, if the products are exported, supplied to another EU Member State or returned unchanged to the supplier.

**Branch income**

*Branch*
A foreign company can set up a branch in Romania.

Profits derived by the branch are taxed at the standard profit tax rate of 16%, but as of 1 May 2009, the tax due is the higher of the 16% CIT and a minimum tax. The annual minimum tax ranges from EUR 500 to EUR 10,000, depending on the businesses’ turnover in the prior year.

Branches can operate only in the same field of activity as their parent companies.

*Representative offices*
Representative offices are often established as a first step to operating in Romania. A representative office can undertake only auxiliary or preparatory activities, cannot trade in its own name and cannot engage in any contractual activity. A representative office can perform only a limited range of activities without being considered a permanent establishment for profit tax purposes.

Representative offices are subject to a yearly flat tax of EUR 4,000 (payable in local currency, i.e., the Romanian New Leu – RON). It has to be paid in two instalments by 20 June and 20 December. If a representative office is set up or closed down during a year, the tax due for that year is prorated on the basis of the number of months the representative office operated in that fiscal year.

**Income determination**

The taxable profit of a company is calculated as the difference between the revenue derived from any source and the expenses incurred for the purpose of obtaining taxable incomes, during a fiscal year, out of which non-taxable incomes are deducted and non-deductible expenses are added.

**Inventory valuation**

The methods permitted for inventory valuation under Romanian law are standard cost; detail sale price; average (weighted) cost; first-in, first-out (FIFO); and last-in, first-out (LIFO).

Assets are generally valued at their acquisition cost, production cost or market value. Fixed assets could be revalued at certain points in time for various purposes.
Romania

**Capital gains**
Capital gains earned by a Romanian resident company are included in ordinary profits and are taxed at 16%. Capital losses related to sale of shares are, in general, tax-deductible. Capital gains obtained by non-residents from real estate property located in Romania or the sale of shares held in a Romanian company are also taxable in Romania. However, the income may be subject to treaty protection.

**Dividends, interest, royalties**
Dividends received by a Romanian company from another Romanian company are not subject to the profit tax, but are subject to a final withholding tax of 10%.

Dividends received by a Romanian company from a foreign company are taxed at the normal CIT rate in Romania. Credit is available for tax paid abroad.

Moreover, as Romania joined the European Union (EU) in 2007, dividends received from a foreign or Romanian legal person from a member state of the EU are not taxable if the Romanian legal person has held a minimum of 15% of the shares in the foreign legal person for an uninterrupted period of at least two years on the date when the dividend is paid. Starting with 2009, these rules apply to companies from all member countries of the European Economic Area (EEA).

Interest and royalty payments by Romanian companies to other Romanian companies are taxable income in the hands of the beneficiary with ordinary corporate income tax.

**Foreign income**
Resident companies are taxed on worldwide income, unless a double-tax treaty between Romania and the said treaty stipulates otherwise.

**Deductions**
From the deductibility standpoint, expenses fall into three categories: deductible expenses, limited deductibility expenses and non-deductible expenses.

**Deductible expenses**
As a general rule, expenses are deductible only if incurred for the purpose of generating taxable income.

The following expenses are considered as being incurred for the purpose of generating taxable income:

- Expenses incurred for marketing, market research, promotion within existing or new markets, participation in fairs and exhibitions, business missions and publishing of own brochures;
- Advertising expenses incurred in promoting the company, products or services, based on written contracts, as well as costs associated with the production of the materials necessary for broadcasting advertisements, including goods granted as samples, for product testing at selling units, as well as other goods and services granted to stimulate sales;
- Research and development expenses that do not meet the requirements to be recognised as intangible assets for accounting purposes;
- Expenses incurred for environmental protection and resource conservation;
Romania

- Expenses incurred for improvement of management, information technology (IT), the introduction, maintenance and development of quality management systems, and obtaining quality compliance confirmation;
- Bad debts expenses in any of the following cases: the bankruptcy procedure of the debtor was closed based on a court decision; the debtor is deceased and the receivable cannot be recovered from the heirs; the debtor is dissolved or liquidated; the debtor has major financial difficulties affecting its entire patrimony;
- Travel and accommodation expenses related to business trips in Romania or abroad by employees and directors, and also individuals assimilated to these positions (directors based on mandate and secondees whose costs are covered by the Romanian company); this also includes transport of personnel to/from the workplace;
- Expenses incurred from professional training and development of employees;
- Expenses incurred in relation to work safety, prevention of work accidents and occupational diseases, the related insurance contributions and professional risk insurance premiums;
- Expenses incurred from acquisition of packaging during their useful life; and
- Fines, interest, penalties and other increased payments due under commercial contracts.

Companies can benefit from an additional deduction of 20% from the eligible expenses in respect of research and development activities they perform. Moreover, accelerated depreciation may be applied for devices and equipment used in the research and development activity.

**Limited deductibility expenses**

The deductibility of certain expenses is limited as follows:

- Interest and foreign exchange losses under thin capitalisation rules;
- Depreciation of assets under fiscal depreciation rules;
- Perishable goods capped as set by the relevant central administration bodies;
- Protocol expenses, up to the limit of 2% of the difference between total taxable revenue and total expenses related to taxable revenue, except for protocol and profit tax expenses;
- Daily allowances for expenses from domestic and foreign travel by employees, up to the level of two and a half times the ceiling set for public institutions;
- Social expenses up to 2% of salary expenses, including maternity allowances, expenses for nursery tickets, funeral benefits and allowances for serious or incurable diseases and prostheses, as well as expenses for the proper operation of certain activities or units under taxpayers' administration (e.g., kindergartens, nurseries, health services supplied for occupational diseases and work accidents prior to admission to health establishments, canteens, sports clubs, clubs); expenses incurred under a collective labour agreement, such as holiday tickets granted to employees;
- Health insurance premiums for employers, up to the limit of EUR 250 per year, per person; private pension insurance premiums, up to the limit of EUR 400 per year, per person;
- Taxes and contributions paid to non-governmental organisations and professional associations related to the taxpayer's activity, up to the limit of EUR 4,000 per year; and
Romania

- Expenses from operation, maintenance and repair of vehicles used by individuals in company leadership and management positions, within the limits of one vehicle per person.

**Non-deductible expenses**

Expenses which are specifically non-deductible include, among others, the following:

- Domestic profit tax and profit tax paid in foreign countries;
- Expenses related to non-taxable revenues (Note that revenues from dividends have no corresponding expenses);
- Expenses related to withholding tax supported by Romanian taxpayers on behalf of non-residents;
- Interest, fines and penalties due to Romanian or foreign authorities;
- Expenses incurred from management, consultancy, assistance or other supply of services if no contracts or any other lawful agreements are entered into and the beneficiary cannot justify the supply of such services for the activities performed and their necessity;
- Sponsorship and patronage expenses and expenses for private scholarships; however, taxpayers are granted a fiscal credit up to 0.3% of turnover and 20% of the profit tax due, whichever is lower;
- Other salary and/or similar expenses (if not taxed at the level of the individual), except for those specifically exempted from individual income taxation;
- Expenses incurred from insurance premiums unrelated to company assets or business, save for those regarding goods which are bank collateral on loans used to conduct the activity for which the taxpayer is authorised or those used under rental or leasing contracts;
- Bad debt expenses in excess of the deductible provision (*see below*);
- Expenses recorded without “justifying” documents;
- Expenses in favour of shareholders, other than those related to goods or services provided by the shareholders at market value;
- Expenses incurred from fixed assets impairments (i.e., losses in value defined as provisory adjustments by the accounting regulations transposing European Accounting Directives);
- During the period 1 May 2009 to 31 December 2010, fuel expenses for company vehicles weighing under 3,500kg and with fewer than nine passenger seats (including the driver’s seat) and used exclusively for passenger transport – exceptions are vehicles used in the following activities:
  - Intervention, repair, safety and security, courier services, transporting staff to and from the work place, TV vans, cars used by sales agents and recruitment agents;
  - Paid transportation services and taxi activities;
  - Rental; and
  - Driver schools.

**Thin capitalisation rules**

If the company’s equity is negative or the debt-to-equity ratio is higher than 3:1, all the interest expenses and the net losses from foreign exchange differences related to credits or loans with a reimbursement period longer than 12 months are non-deductible in the year in which they are booked. These expenses are carried forward to the following fiscal years, and they will become deductible at once when the debt-to-equity ratio becomes lower than 3:1.
The interest expenses and the net losses from foreign exchange differences related to loans from Romanian or foreign banks, leasing companies and other entities expressly mentioned by law are fully deductible, without being limited by the debt-to-equity ratio.

Loans contracted directly or indirectly from Romanian or foreign banks, leasing companies, mortgage companies and other entities expressly mentioned by the law are no longer taken into account when computing the debt-to-equity ratio.

From 2010 the tax deductibility threshold for interest on foreign currency loans from non-financial institutions is 6%.

**Depreciation**

Romanian law distinguishes between fiscal and accounting depreciation. Companies should maintain a separate record to reflect the separate computation of the fiscal and the accounting depreciation. Any accounting revaluations of fixed assets are not taken into account in computing the tax depreciation.

Assets are generally depreciated using the straight-line method. However, accelerated or digressive depreciation methods may be used to determine fiscal depreciation, while the accounting depreciation method may be different.

Accelerated depreciation (50% deduction from the book value in the first year of operation) can be used for technological equipment and other tools, installations, computers and related peripherals.

The useful lives to be used for tax purposes are the ones stated in the Official Fixed Assets Catalogue, published under government decision. Ranges are provided for classes of fixed assets, from which the taxpayers can choose the useful life (e.g., office and housing buildings: 40–60 years, commercial buildings: 32–48 years, commercial furnishings: nine–15 years, and automobiles: four–six years).

Land cannot be depreciated.

**Net operating losses**

Companies are allowed to carry forward fiscal losses as declared in the yearly profit tax returns for a period of seven years based on a FIFO method. No related adjustment for inflation is allowed.

For foreign legal persons, this rule (i.e., carryforward of losses) applies only to revenues and expenses attributable to their permanent establishment in Romania, and only for a period of five years.

**Fiscal losses**

Profit tax is not deductible, nor are late payment interest and fines related to tax liabilities or social security obligations.

**Provisions and reserves**

Amounts used for setting up or increasing reserves or provisions are deductible as follows:
Romania

- Setting up or increasing the legal reserve fund to a limit of 5% of the yearly accounting profit before tax (with adjustments) until it reaches 20% of the share capital;
- Provisions for doubtful debts recorded after 1 January 2006, up to the limit of 30% if the related receivables meet the following conditions simultaneously:
  - Booked after 1 January 2004;
  - Not collected for a period exceeding 270 days from the due date;
  - Not guaranteed by another person;
  - Due by a person not affiliated with the taxpayer; and
  - Included in the taxable income of the taxpayer.
- Bad debt provisions, if all the following conditions are met:
  - Receivables are booked after 1 January 2007;
  - The debtor is a company declared bankrupt by a court ruling;
  - Receivables are not guaranteed by another person;
  - The debtor is not a related party; and
  - Receivables were included in the taxable income of the taxpayer.
- Provisions for receivables recorded before 1 January 2004, within the limit stipulated by the Fiscal Code for provisions established for receivables recorded after 1 January 2006. Two additional conditions must be met to set up a provision for receivables: bankruptcy proceedings against the debtor must be opened and no tax-deductible provisions can be previously set up for such receivables;
- Specific provisions established by credit institutions, non-banking financial institutions and other similar entities;
- Technical reserves set up by insurance and reinsurance companies, in accordance with their regulatory legal framework except for the equalisation reserve; and
- Risk provisions for transactions carried out on financial markets, in accordance with the rules issued by the National Commission of Movable Assets.

The reduction or cancellation of any provision or reserve deducted from the taxable profit, due to changing the destination of the provision or reserve, distribution towards shareholders in any form, liquidation, spin-off, merger or any other reason, is included in the taxable revenues and taxed accordingly. The reconstruction of the legal reserve is also non-deductible.

**Group taxation**

There is no tax consolidation or group taxation in Romania. Members of a group must file separate returns and therefore are taxed separately. No provision exists for offsetting the losses of group members against the profits of other group members.

**Transfer pricing**

Transactions between related parties should observe the arm’s-length principle. If transfer prices are not set at arm’s length, the Romanian Tax Authorities have the right to adjust the taxpayer’s revenues or expenses so as to reflect the market value. Traditional transfer pricing methods (comparable uncontrolled prices, cost plus and resale price methods), as well as any other methods that are in line with the Organisation for Economic Co-operation and Development (OECD) Transfer Pricing Guidelines (i.e., transactional net margin and profit split methods) may be used for setting transfer prices. Domestic legislation expressly stipulates that when applying transfer pricing rules, the Romanian tax authorities will also consider the OECD Transfer Pricing Guidelines. There are five methods for assessing the performance of transactions at arms’ length, as follows:
1. Comparable uncontrolled price method;
2. Resale price method;
3. Transactional net margin method;
4. Profit split method; and
5. Cost plus method.

**Transfer pricing documentation**

Taxpayers engaged in related-party transactions have to prepare and make available upon the written request of the Romanian Tax Authorities their transfer pricing documentation file.

The content of the transfer pricing documentation file has been approved by order of the president of the National Agency for Tax Administration. The Order is supplemented by the OECD Transfer Pricing Guidelines and the Code of Conduct on transfer pricing documentation for associated enterprises in the EU (EUTDP).

The deadline for presenting the transfer pricing documentation file will not exceed three calendar months, with the possibility of a single extension equal to the period initially established.

Failure to present the transfer pricing documentation file or presenting an incomplete file following two consecutive requests may trigger estimation of transfer prices by the tax authorities, based on generally available information, as the arithmetic mean of three transactions considered similar.

The transfer pricing audit activity has significantly increased during the past year and requests for presenting the transfer pricing documentation file have started to become common practice. We are aware of recent cases where the Romanian tax authorities adjusted the taxable result of a local taxpayer in accordance with the applicable regulations.

**Advance pricing agreement (APA)**

Taxpayers engaged in transactions with related parties can request that the National Agency for Tax Administration issue an APA. These taxpayers can also schedule a pre-filing meeting to discuss the feasibility of the APA.

The request for an APA is filed together with the relevant documentation and payment evidence of the fee (ranging between EUR 10,000 and EUR 20,000). The required documentation is based on the EUTPD and suggests up-front the content of the APA.

The term provided by the Fiscal Procedural Code for issuance of an APA is 12 months for unilateral APAs and 18 months for bilateral and multilateral APAs. The APA is issued for a period of up to five years. In exceptional cases such as long-term agreements, it may be issued for a longer period.

APAs are opposable and binding on the tax authorities as long as there are no material changes in the critical assumptions. In this view, the beneficiaries are obliged to submit an annual report on compliance with the terms and conditions of the agreement.

If taxpayers do not agree with the content of the APA, they can notify the National Agency for Tax Administration within 15 days. In this case, the agreement does not produce any legal effects.
Romania

Tax incentives

Research and development (R&D) incentives
Companies can benefit from an additional deduction of 20% from the eligible expenses in respect of their R&D activities. Moreover, accelerated depreciation may be applied for devices and equipment used in the R&D activity.

Corporate income tax exemption for reinvested profits
The incentive is available from 1 October 2009 until 31 December 2010 and applies to reinvested profits used for the production or acquisition of new (meaning not previously used) technological equipment used in the business. Note that the amount for which the incentive is applied is deducted from the fiscal value of the equipment produced or acquired, meaning the tax deduction for depreciating the equipment will be reduced in the future (thus, in effect, this incentive represents only a deferral of tax). Other important conditions imposed in connection with the application of this incentive are:

- Reinvested profit is to be allocated for the creation of a reserve, and release of such reserve in the future might have unintended tax consequences.
- The assets created or acquired in relation to the incentive must be kept for at least half their normal useful life. If the assets are disposed of prior to this time, profit tax is recalculated and delay penalties are due from the date the exemption was granted (assets transferred in the reorganisation process, under certain conditions, and assets disposed of due to liquidation or insolvency are exempt from this penalty).

Dividend tax exemption for reinvestments
Distributed dividends are exempted from taxation as of 1 January 2009 if they are invested in the same or in another Romanian company’s share capital.

To benefit from this exemption, dividends must be reinvested to preserve and increase the number of employees and to boost existing lines of business.

Reduced VAT rate of 5% for sale of buildings
Companies selling buildings can apply a reduced VAT rate of 5% in the following cases:

- If the buildings are part of a social policy, such as homes for the elderly, retirement homes, orphanages, rehabilitation centres for children with disabilities
- The building is supplied as housing to an individual or family and has a maximum useful surface of 120 square metres and a value of less than RON 380,000 (exclusive of VAT)

Local tax exemptions for business located in industrial parks, and scientific and technological parks

Industrial parks
No property tax is due for buildings and constructions located in an industrial park. Also, land within industrial parks is exempt from land tax.

Scientific and technological parks
The incentives granted for the set-up and development of scientific and technological parks include:
• Lower taxes on tangible assets and land used by the park;
• Exemption of specific taxes on land;
• Deferred payment of VAT for materials, equipment and connection to the public utilities networks during the investment period, until the park is put into operation;
• Development programmes for infrastructure, investments and equipment endowments granted by the local and central public administration, companies and foreign financial assistance; and
• Donations, concessions and structural funds for development.

The companies operating within the park benefit from:

• Various services offered by the park administrator free of charge or with reduced fees; and
• Advantageous conditions with regard to location, use of the infrastructure and communications of the park, with payment in instalments.

**Withholding taxes (WHT)**

**Domestic dividend tax**

Dividend payments by a Romanian company to another Romanian company are subject to 10% dividend tax.

From 2009 distributed dividends are exempt from taxation if they are invested in a Romanian company to preserve and increase the number of employees and boost activity.

As of 1 January 2007, the provisions of the EU Parent-Subsidiary Directive are applicable. Consequently, the dividends received by a Romanian company from another Romanian company are not taxed if the beneficiary has held at least 10% of the Romanian company’s shares for a continuous period of at least two years by the date of dividends payment.

**Withholding tax for non-residents**

Non-resident companies are subject to a 16% withholding tax rate on other revenues derived from Romania, such as interest, royalties, revenues from services performed in Romania, dividends, revenues obtained from management and consultancy, services (irrespective of where the services are performed), commissions, and revenues derived from liquidation of a Romanian legal entity.

Certain specific provisions and exceptions apply to the above rates, as follows:

• The withholding tax rate applicable to dividends received by non-residents from Romania is 10%, for EU/EEA member states’ companies.
• As Romania is an EU member state, the provisions of the Parent-Subsidiary Directive are applied. Thus, dividends paid by Romanian companies to companies resident in one of the EU/EEA member states are exempt from withholding tax if the dividend beneficiary has held a minimum of 10% of the shares of the Romanian company for a continuous period of at least two years by the date of dividends payment.

As of 2010, the tax treatment of investment income of pension funds established in European Economic Area is harmonised with the treatment applicable to domestic
pension funds. Thus, dividend and interest income obtained from Romania by EEA registered pension funds will be exempt from withholding tax.

Romania has implemented the EU Interest and Royalties Directive with a transitional period for the application of this directive until 2010. Until 31 December 2010, a 10% withholding tax applies on payments of interest and royalties made by Romanian companies to companies resident in EU/EEA member states and holding at least 25% of the share capital of the Romanian company for a continuous period of at least two years prior to the date of payment of interest or royalties. Such payments are exempt from withholding tax from 1 January 2011, under the same conditions as stated above.

A 20% withholding tax applies on gambling proceeds obtained by non-residents.

To comply with European legislation, non-residents are required to present the certificate of tax residence and a declaration stating compliance with the necessary requirements, including that they are the beneficial owner of the income.

The following categories of income derived from Romania by non-residents are exempt from withholding tax:

- Bonds issued and/or guaranteed by the Romanian government;
- Revenues derived from interest on demand deposits or current accounts, as well as interest from term deposits or other types of saving instruments;
- Revenues from consultancy, technical assistance and similar services financed by means of non-reimbursable funds and loans granted to the Romanian state, or loans guaranteed by the Romanian state, provided that the interest rate for such loans is below 3% per annum;
- Revenues from international transportation and accessory services;
- Prizes paid from public funds; and
- Income obtained from a partnership constituted in Romania by a non-resident company. Such income is to be taxed under title II of the Fiscal Code, with corporate income tax.

**Tax administration**

**Corporate tax returns**
In Romania, the fiscal year is the calendar year.

Annual profit tax returns should be submitted to the tax authorities together with annual financial statements if the company has not chosen to submit the annual profit tax return on 25 February. Certain returns should be submitted monthly (e.g., the return on tax liabilities due to the consolidated general budget, the VAT return and social security contribution returns).

Annual profit tax returns have to be filed with the Romanian tax authorities by 25 April of the following year.

The Government postponed the introduction of the advance payments of profit tax (this system would have been applied to most taxpayers from 2010) until 2012. Until then, taxpayers (excluding banks) have to declare and pay quarterly profit tax.

**Non-resident companies**
Non-resident companies deriving income from real estate property located in Romania or the sales of shares held in a Romanian company are obliged to declare and pay the related profit tax. Non-residents may appoint a tax agent to fulfil this requirement. However, if the payer of the income is a Romanian company or a permanent establishment, they have the obligation to pay and declare the profit tax.

For capital gains tax declaration and payment, the Romanian legislation requires the following tax returns to be submitted as follows:

- Quarterly statements, starting the twenty-fifth day of the month following the quarter in which the non-resident first earned capital gains taxable in Romania; an annual profit tax return.
- The quarterly statements and annual return must be submitted during the entire period of time the non-resident is registered with the Romanian tax authorities, even if it no longer carries out transactions generating taxable revenues in Romania.

**Late-payment penalty**
Starting 1 July 2010 the late-payment interest is reduced from 0.1% to 0.05% for each day of delay and, in addition, the following late-payment penalties are due:

- 5% of the fiscal liabilities, if the payment is made after 30 days but before the expiry of the 90 days from the due date; and
- 15% of the remaining unpaid fiscal liabilities, if the payment is made after 90 days from the due date.

Late-payment penalties for the fiscal claims due to local budgets are owed in the amount of 2% of the fiscal claims, calculated for each month or part thereof.

**VAT compliance**

**Fiscal period**
As a general rule, the fiscal period is the calendar month. For taxable persons registered for VAT purposes whose previous year-end turnover did not exceed EUR 100,000, the fiscal period is the calendar quarter.

**Invoicing**
Companies are not required to use standard pre-printed fiscal invoices. Instead, they can issue invoices containing the minimum information required by law.

Taxable persons are also allowed to issue summary invoices or invoices on behalf of the supplier, and to issue and store invoices electronically. From a VAT perspective, the signing and stamping of invoices is no longer mandatory.

**Ledgers and returns**
Taxable persons must keep complete and detailed records for calculation of VAT liabilities.

VAT returns should be submitted to the tax authorities by the twenty-fifth day of the month following the end of the fiscal period; the VAT is due by the same date. The VAT return should be submitted using an electronic carrier (e.g., floppy disk).
Romania

Taxable persons not registered for VAT purposes are required to pay VAT and to submit a special VAT return on services rendered by non-residents, which have a deemed place of supply in Romania. These obligations must be fulfilled by the twenty-fifth day of the month following that in which the services are performed.

Taxable persons are required to file twice yearly for acquisitions and supplies of goods and services performed on Romanian territory.

**VAT refund**
If a company is in a VAT refundable position, it must tick the VAT refund box on the VAT return to claim the refund. Alternatively, the balance can be carried forward against VAT liabilities reported in future returns. The refund claims must be processed by the tax office within 45 days of being submitted.

Large taxpayers (as classified by law) are entitled to refund on request, with a subsequent inspection (i.e., a “fast refund”). Other taxpayers may be entitled to a “fast refund” (i.e., without a prior inspection), but only after a complex risk analysis.

If the VAT is not reimbursed within the legal term (i.e., 45 days), taxable persons are entitled to claim interest, currently set at 0.1% per day of delay.

**Refund to non-residents**
Taxable persons established in the EU and taxable persons established outside the EU (under reciprocity conditions) are entitled to VAT reimbursement from Romania, if certain conditions are fulfilled.

**Other issues**

Mergers, spin-offs, transfers of assets and exchanges of shares between two Romanian companies should not trigger capital gains tax.

In the case of a relocation of the registered office of a European Company (SE) and European Cooperative Society (SCE) from Romania to another EU Member State, if certain conditions are met there is no tax on the difference between the market value of the transferred assets and liabilities and their fiscal value. There will also be no tax on such movements at the shareholder level and, thus, in the case of Romanian shareholders a tax basis step-up may be achieved.

If a Romanian company has a permanent establishment in another Member State, and the Romanian company is dissolved as a result of a cross-border reorganisation, the Romanian tax authorities will not have the right to tax the former permanent establishment.

Significant developments

Tax law changes
From 1 January 2010, the Unified Social Tax (UST) is replaced with insurance contributions. The assessment rates are a flat 26% in 2010, which is equal to the maximum UST rate. In 2010, the UST is applied on the first RUB 415,000 of individual’s salary per year. One tax base is established for contributions to all funds.

From 2011, the overall assessment rate will reach 34%, and the ceiling will be adjusted according to an annual index. The provisions relating to the following key elements for the new insurance contribution system (payers, tax base, assessment procedures, reporting periods, and timeframes for making contribution payments) generally coincide with the relevant UST provisions.

The Russian Government has adopted a new model tax treaty that incorporates anti-abuse concepts similar to those in the OECD, US, and UN models. According to the new treaty, domestic thin capitalisation rules may be applied by contracting states to interest payments. It is not expected that effective double tax treaties will be revised in accordance with the new model tax treaty.

Expected tax law changes in 2010
New transfer pricing legislation passed the first of three readings in the Duma (the lower house of the Russian Parliament). If adopted, the legislation will come into force on 1 January 2011. The new version of transfer pricing legislation contains the following provisions:

- A significant reduction in the list of transactions for which the Russian tax authorities may control prices for tax purposes;
- Expansion of the list of related parties;
- The introduction of the arm’s-length principle as the fundamental principle of Russian transfer pricing rules;
- Formally introducing functional analysis as one of the comparability factors;
- The introduction of new methods for determining market prices;
- The introduction of reporting and transfer pricing documentation requirements; and
- The introduction of unilateral and multilateral advance pricing agreements (APAs) for companies registered as “large” taxpayers (but not earlier than 2012).

The draft law on consolidated taxpayers has been published by the Ministry of Finance. If adopted, it will come into force on 1 January 2011. After two years of discussions, the draft law framework and the majority of its provisions remain unchanged.
Russian Federation

In particular, the consolidated taxpayer regime can apply still only to profits tax. Compared to the previous version of the draft law (posted on the same Russian Ministry of Finance website in April 2008), the new version contains criteria values for creating a consolidated taxpayer (including the total revenue and the total assets of a group). The criteria are rather high – only a limited number of Russian companies will be able to satisfy them.

**Customs and duties changes**

The foundation of and deeper integration processes within the Customs Union among Russia, Belarus and Kazakhstan (Customs Union) resulted in significant developments of the customs legislation. The Customs Union proposes the united customs territory, within which no customs duties or economic restrictions will be applied. These countries should apply unified customs tariffs and customs valuation methodology, general rules of non-tariff regulation, uniform technical regulations, etc. Certain provisions of the legislation on the Customs Union took effect on 1 January 2010, in particular the Common Customs Tariff (CCT) and the Agreement on Rules of Licensing in Foreign Trade. A number of other documents, which constitute the legal framework for the Customs Union, including the Customs Code of the Customs Union (CU Customs Code) are effective as of 1 July 2010. It is worth mentioning that the CU Customs Code prevails over the domestic customs legislation within the Customs Union.

**Expected customs and duties changes in 2010**

Given that several provisions of the CU Customs Code refer to the domestic laws, decisions of the Customs Union Committee and the Eurasian Economic Community (EurAsEC) Interstate Council, a large number of regulatory documents governing imports, exports and customs clearance of goods have already been adopted or will be adopted in the near future (e.g., uniform templates of customs documents, a procedure for amending the customs declaration after the release of goods).

**Taxes on corporate income**

**Profits tax**

Corporations and their shareholders are taxed separately. The maximum profit tax rate for all taxpayers in the Russian Federation has been established at 20% from 1 January 2009. The amount payable to the budgets of constituent regions may be reduced by such regions, so the minimum tax rate may be 15.5% for taxpayers located in certain regions.

**Corporate residence**

The tax system in Russia distinguishes between Russian and foreign legal entities on the basis of their law of incorporation.

Russian legal entities pay tax on their worldwide income (credit relief is available for foreign tax paid up to the amount of the Russian tax liability that would have been due on the same amount under Russian rules). Foreign legal entities pay tax on income derived through a permanent establishment (at the rate of 20%) and are also subject to withholding tax on income from Russian sources not related to a permanent establishment (at rates varying from 10% to 20%, depending on the type of income and the method used to calculate it).
All taxpayers are required to obtain tax registration and be assigned a taxpayer identification number, irrespective of whether their activities are subject to Russian taxation.

**Other taxes**

**Value-added tax (VAT)**

The VAT system, while not originally based on the EU model, gradually is moving towards it. VAT applies to the value added by each element in the chain of production, from producer to consumer. The standard rate is 18% (with a lower rate of 10% for certain basic foodstuffs, children’s clothing, medicines and medical goods, and printed publications). The same VAT rates are applied for the import of goods into Russia. Exports and related services are taxed at a zero rate of VAT.

The list of exempt goods and services includes basic banking and insurance services, educational services by certified establishments, the sale of certain essential medical equipment, passenger transport, and certain other socially important services. Most accredited offices of foreign legal entities (as well as the accredited employees of these offices) may be exempt from VAT on property rental payments. The majority of exemptions from VAT carry no right to input credit in Russia, instead input VAT is, in most cases, deducted for profits tax purposes.

Most taxpayers are on an EU-type input-output VAT system, whereby, a VAT payer accounts for VAT on its full sales price, and deducts VAT incurred on inventory costs and other related expenses. VAT should be calculated on an accrual basis only.

The export of goods to destinations outside Russia, including the Commonwealth of Independent States (CIS) countries, transport and other services related to the export of goods from and import of goods into Russia, international passenger transport, sales to diplomatic functions, and certain other transactions are zero-rated with a right to offset input VAT. To apply the 0% rate and achieve input credit for exported goods, there must be proof available of the actual export. A significant number of documents must be submitted to the tax authorities.

Under the reverse-charge mechanism, a Russian company must account for VAT on any payment it makes to a non-tax registered foreign company, if the payment is connected to the sale of goods or services in Russia. The VAT withheld is eligible for normal input VAT credit by Russian payers. Foreign suppliers are allowed only to offset VAT collected through the reverse-charge mechanism against Russian VAT paid on imported and domestically acquired supplies by registering for taxes in Russia. There is no special VAT registration.

Russian VAT law contains an EU-type set of place-of-supply rules for determining where services are supplied for VAT purposes. These rules divide all services into different categories for determining where they are deemed to be supplied for VAT purposes. For example, certain services are deemed to be supplied where they are performed, some where the “buyer” of the services is located, and others where certain property is located.

Uniform invoicing for VAT purposes applies to all Russian-registered taxpayers that provide goods and services. Standard invoices are to be issued within five days after a supply of goods or services. A duplicate copy of the invoice is registered in a sales
Russian Federation

journal, and incoming invoices are recorded in a purchase book. Compliance with invoicing procedures is critical to the supplier's ability to recover input VAT.

From 1 January 2007, VAT returns are due on a quarterly basis. VAT must be paid to the Russian Government after the end of each quarter in three instalments not later than the twentieth day of each of the three consecutive months following the quarter.

**Import VAT**

A limited range of goods is granted exemption from import VAT. The list of such goods includes, for example, humanitarian aid and goods designated for diplomatic corps. Relief from import VAT is available on certain machinery and equipment and their components and spare parts.

**Import duties**

In addition to VAT, customs duties are levied on assets imported into the Russian Federation. The rate varies according to the tariff code of the goods imported and the country of origin (generally the rate varies from zero to 20% of the customs value of imported goods). There is special relief from customs duties for qualifying goods contributed to the charter capital of Russian companies with foreign investments.

**Excise duty**

Excise taxes apply to the production and import of cars, tobacco, alcohol, petrol and lubricants. Special excise rates for each type of excisable goods are established in the tax code. The rates are widely variable and are based on multiple factors.

**Customs processing fee**

Goods transported across the Russian Federation customs border are subject to a customs processing fee with a flat rate. The fee depends on a customs value of transported goods. Generally the fee is not significant.

**Property tax**

The property tax base includes only the book value of fixed assets recorded on the taxpayer's balance sheet (including property leased out). Intangible assets, inventories, work-in-progress, and financial assets are not subject to property tax in Russia. The maximum property tax rate is 2.2%, and regional legislative bodies have the right to reduce this rate. Certain types of property are exempt from the tax. The relief is also available to a limited number of categories of taxpayers.

**Transport tax**

A transport tax is imposed on certain types of land, water and air transport registered in Russia. Fixed rates apply (per unit of horsepower, gross tonnage, or unit of transport), which are differentiated based on engine capacity, gross tonnage, and type of transport. The actual rates in the regions may be subject to a maximum 10-fold increase/decrease by the legislative bodies of Russian Federation constituent subjects. Reporting and payment rules are established by regional legislative authorities.

**Branch income**

Foreign legal entities pay tax on profits attributable to a permanent establishment (PE). A PE is broadly defined as “a branch, division, office, bureau, agency, or any other place through which a foreign legal entity regularly carries out its business activities in Russia”. Russia's various double taxation treaties may define a PE differently, which
could in some cases result in tax relief. Conducting business through an agent also may create a taxable PE in Russia.

A PE’s profits are computed on substantially the same basis as Russian legal entities, including the composition of tax-deductible expenses. The tax code does not provide specifically for the deductibility of expenses incurred abroad by a head office with respect to its PE in Russia (including a reasonable allocation of administration costs), although most double tax treaties provide for such an option. If a foreign legal entity conducts free-of-charge preparatory and/or auxiliary services for the benefit of third parties, a PE is considered to have been formed, and the tax base is calculated as 20% of its expenses relating to such activities.

Foreign legal entities operating in Russia through a PE are to follow the filing and payment schedules established for Russian legal entities, although they do not make monthly advance payments, but pay profits tax on a quarterly and annual basis only.

**Income determination**

The accounting period in Russia is a calendar year. Different periods are not permitted. The taxable base is calculated on an accrual basis (only small-scale taxpayers are still allowed to use the cash basis).

Taxable income is to be computed following the rules and principles established in the tax code. Taxpayers must maintain tax accounting registers. Statutory accounts may be used for computing tax items for which accounting methods are the same. In practice, most taxpayers use statutory accounts as a basis and apply adjustments to arrive at the taxable income.

**Inventory valuation**

Inventory can be valued using one of the following methods: first-in, first-out (FIFO), last-in, first-out (LIFO), average cost and individual unit cost methods.

**Capital gains**

Capital gains are subject to the same 20% rate and are added to ordinary income to arrive at the taxable income. An exception applies to gains/losses from securities (e.g., shares, bonds, notes) and financial instruments, which are generally taxed separately.

Gains from the sale of fixed assets and other property equal the difference between the sale price and their net book value for tax purposes. Losses resulting from the sale of fixed assets should be deducted in equal monthly instalments during the period, defined as the difference between their normative useful life and the actual time of use.

**Dividends**

Dividends received by Russian legal entities from Russian or foreign legal entities are taxed in Russia at a 9% flat rate.

Dividends received from “strategic investments” are exempt from Russian income tax. An investment is considered strategic when:

- The owner (recipient of dividends) owns at least 50% of the capital of the payer of dividends, or owns depository receipts entitling it to receive at least 50% of the total amount of paid dividends;
Russian Federation

- The share or depository receipts have been owned for at least 365 calendar days on the day dividends are declared; and
- The value of the investment is at least RUB 500 million (This requirement will be abolished from 2011).

Dividends from companies residing in “offshore” zones with preferential tax regimes will not be eligible for the tax exemption. The list of the offshore zones is established by the Ministry of Finance.

Tax on dividends from abroad withheld in the source country may be credited against Russian tax, if a special provision exists in the relevant tax treaty.

The standard 15% tax rate is applicable to dividends paid by Russian legal entities to foreign legal entities. The tax should be withheld by the Russian legal entity paying dividends. The tax may be reduced based on a relevant double tax treaty (typically to 10% or 5%).

**Interest**
Interest income is taxed on the accrual basis. A standard tax rate of 20% is applied to interest income, except for interest on state and municipal securities, which is taxed at 0%, 9% or 15%, depending on the type of security. The rate may be reduced (typically to zero) based on a relevant tax treaty.

**Foreign income**
Russian legal entities pay tax on their worldwide income. Credit relief is available for foreign taxes paid up to the amount of the Russian tax liability that would have been due on the same amount under Russian rules.

**Exchange gains and losses**
Foreign exchange gains and losses are recognised for tax purposes on the accrual basis. However, gains and losses from settlements in a local currency of amounts denominated in (tied to) a foreign currency are taxable (deductible) on payment.

**Deductions**

**General**
Expenses generally are deducted on the accrual basis. The main criteria for the deductibility of expenses is that the expense is (a) incurred in the course of an income-generating activity, (b) properly documented, (c) not mentioned in the tax code as non-deductible for tax purposes.

**Loss carryforward**
Tax losses may be carried forward 10 years without limitations (i.e., they can be used to offset the entire taxable profit before a loss carryforward deduction). Carryback of losses, however, is not allowed. Losses from the sale of securities can be credited only to the future income from the sale of the same type of securities (either listed or non-listed). Losses from the sale of fixed assets are recognised evenly during the remaining useful life.

Under the tax code, interest on loans received from foreign shareholders (as well as their Russian affiliates, or loans guaranteed by foreign shareholders or their Russian affiliates) owning more than 20% of capital is deductible provided the loans do not exceed by three times the equity allocable to the shareholder (12.5 times for banks and leasing companies). If the loans exceed this limit, the excess part of interest on the loans will be reclassified for taxation purposes as dividends paid to foreign shareholders. Such dividends are not deductible for profit tax purposes and are subject to withholding income tax at the rate of 15% (treaty benefits may apply to reduce the rate).

**Doubtful (bad) debt reserve**

Losses in the form of bad debts written off generally are deductible. Companies may create a bad debt reserve. The method of accrual for a bad debt reserve for tax purposes may differ from that in financial accounting because it is based only on the overdue payment period: if the delay exceeds 90 days, the full amount of the account receivable is charged to the reserve. Generally, a debt written off is recognised as a taxable income for a debtor. The debts usually are written off where a debtor disappeared or became bankrupt.

**Insurance premiums**

Expenses related to all types of obligatory insurance are deductible subject to state tariff limitations, where established. Voluntary insurance expenses are deductible to the extent that they relate to the insurance of damage and losses related to certain classes of assets, and the insurance of construction activity risks. Contract liability insurance expenses are deductible to the extent that such insurance is required by an international treaty to which Russia is a party or a generally accepted international trade custom.

Long-term life and pension insurance is deductible within a limit of 12% of the payroll fund. Voluntary medical insurance is deductible within a limit of 6% of the payroll fund.

**Research and development (R&D) expenses**

R&D expenses (including R&D with a negative result) are deductible within one year after completion. From 1 January 2009, certain R&D expenses may be deducted using a coefficient of 1.5. The list of such types of R&D is established by the government.
**Russian Federation**

**Depreciation**
Two methods of depreciation are allowed: the straight-line method and the declining balance method. The useful life of assets for tax purposes is established in the Classification of Fixed Assets adopted by the Russian Government. Accelerated depreciation is permitted for leased property – a special ratio of up to three may be applied (with some exceptions).

From 2008, an upfront premium is allowed, which means that a taxpayer has the right to deduct 10% (from 1 January 2009: 30% for certain categories of fixed assets) of the cost of fixed assets purchased (or constructed) in the month when the depreciation started. The balance is depreciated over the useful life of the asset. A premium must be recaptured if a relevant asset is sold within five years of its acquisition.

Intangible assets are amortised over their useful life (or over 10 years if their useful life cannot be established).

**Payments to foreign affiliates**
There are no special tax provisions regarding deductibility of payments to foreign affiliates for services provided. They may be deducted in full if the general deductibility criteria are met. Charges with respect to administrative support provided by foreign affiliates may be deductible, but due care should be taken with regard to documentary support.

**Group taxation**
At present, Russia does not allow any group relief.

Legislation introducing the option to file a consolidated profits tax return is being considered by the government and is expected to be adopted in 2010 (with effect from 2011). According to the draft law, a consolidated taxpayer regime (CT) may be established provided that all companies meet the following conditions:

- The total amount of federal taxes accrued and recorded in the tax return for the calendar year preceding the year in which the CT is created exceeds RUB 15 billion;
- The total revenue from the sale of goods, products, work and services, and operating income in the financial reports of the calendar year preceding the year in which the CT is created exceeds RUB 100 billion;
- The total assets value reported as of the first day of the calendar year in which the CT is created exceeds RUB 1 trillion;
- The limit on a share in a direct or indirect holding in CT companies is 90%;
- The holding company must be a Russian legal entity; and
- CT participants cannot have foreign representative offices.

The limits are rather high and it is expected that only a few groups of companies will be able to apply the CT regime and, accordingly, the provisions in the law to exempt intra-group transactions from transfer pricing control from the tax authorities.

**Tax incentives**
At present, the following types of incentives exist in Russia:
Russian Federation

- Regional incentives granted by regional or local authorities with respect to taxes paid to their budgets;
- Special tax regimes in special economic zones (SEZ); and
- Research and development incentives.

The incentives briefly are described as follows:

a. Regional incentives in the form of reduced tax rates for taxes payable to regional budgets (primarily profits tax and property tax) are granted to certain classes of taxpayers (typically large investors or entities operating in specific industries). The extent of regional incentives and the willingness of regional authorities to grant them have been diminishing over time.

b. The following types of SEZ are established in Russia:
   - Technical research and implementation zones for scientific projects;
   - Industrial production zones to develop industrial production;
   - Tourism-recreation zones for the development and effective use of Russian tourist resources; or
   - Port zones.

SEZ residents may take advantage of different combinations of benefits, such as reduced profits tax, exemption from property tax and land tax, and in some cases exemption from customs duty and VAT.

c. The following R&D incentives are available to taxpayers in Russia:
   - Certain R&D services are exempt from VAT;
   - Certain R&D service-related expenses, as listed by the government, are deductible using a coefficient of 1.5; and
   - Fixed assets used in the sphere of science and technology may be amortised with an accelerated coefficient of 3.

**Tax accounting**

Since 1 January 2002, tax accounting has been mandatory. Tax accounting may be based on statutory accounting records (where accounting methods are the same).

**Withholding taxes (WHT)**

In accordance with the general provisions of the tax code, income received by a foreign legal entity and not attributed to a PE in Russia is subject to withholding income tax in Russia (to be withheld at source). Withholding income tax rates are as follows:

- 15% on dividends and income from participation in Russian enterprises with foreign investments;
- 10% on freight income;
- 20% on some other income from Russian sources, including royalties and interest; or
- 20% of revenue or 20% of the margin on capital gains (from the sale of immovable property located in Russia, or shares in Russian subsidiaries where the immovable property located in Russia represents more than 50% of assets).

Taxation of the margin (rather than the gross amount of income received from the above sales) may be applied only if proper documentary support of expenses is available.
Tax should be withheld by the tax agent and paid to the Russian Government. Income tax withholding rates may be reduced under a relevant double taxation treaty, whose provisions may be applied based on confirmation of tax residence, to be provided by a foreign company to the Russian tax agent prior to the date of payment (no advance permission from the Russian tax authorities is required), and also provided general conditions are fulfilled (proof of beneficial ownership, etc.).

The Russian tax authorities recognise the terms of former USSR treaties until they are renegotiated by the Russian Government, and the tax treaty network is continuously updated. The list below is current as of 15 April 2010, and indicates the withholding tax rates stipulated in the treaties.

* In general a 0% tax rate applies to interest payments to the governments of contracting states, and to payments guaranteed by the government.

** A 0% tax rate may be applied provided such interest is paid (a) in connection with the sale on credit of any industrial, commercial or scientific equipment, or (b) in connection with the sale on credit of any merchandise by one enterprise to another.

*** The Federal Law ratifying the Convention was signed by the Russian President in November 2009. There is currently no official information on the date when the Convention enters into force.

### Tax administration

#### Payments
Companies pay advance profits tax payments on a monthly basis. The final payment for the year is due by 28 March of the following year. The mechanism of paying other taxes may differ.

#### Returns filing
Companies are required to file tax returns with the tax authorities on a monthly, quarterly or annual basis, depending on the particular tax. Some taxes (i.e., profits tax, property tax, etc.) are paid in monthly, quarterly or annual instalments, with a final adjustment made when annual tax returns are submitted. An annual profits tax return must be filed by 28 March of the year following the end of the reporting year.

Significant developments

The Saudi Arabian tax law was completely re-written, as of 30 July 2004, for all taxpayers whose financial year starts after this effective date. The withholding tax regulations took effect as of 30 July 2004, irrespective of when the financial year started for the taxpayer.

The tables below outline the main features of the revised tax law.

Persons subject to taxation

**Swap transactions**

The Department of Zakat and Income Tax (DZIT) introduced new rules on the taxation of swap transactions in early 2009 for Swaps that have been approved as qualifying swap transactions under the Capital Markets Authority rules.

**Taxes on corporate income**

The rate of income tax is 20% of the tax adjusted profits. Withholding tax rates are between 5% and 20%. Zakat, an Islamic assessment, is charged on the company’s zakat base at 2.5%.

Only non-Saudi investors are liable for income tax in Saudi Arabia. In most cases, Saudi citizen investors (and citizens of the Gulf Cooperation Council (GCC) countries, who are considered to be Saudi citizens for Saudi tax purposes) are liable for Zakat. Where a company is owned by both Saudi and non-Saudi interests, the portion of taxable income attributable to the non-Saudi interest is subject to income tax, and the Saudi share goes into the basis on which Zakat is assessed.

Capital gains are subject to tax or zakat, as appropriate, at the normal tax or zakat rate.

According to the income tax law, the following persons are subject to tax:

- A resident capital company to the extent of its non-Saudi shareholding;
- A resident non-Saudi natural person who carries on activities in the Kingdom;
- A non-resident person who carries on activities in the Kingdom through a PE;
- A non-resident person who has other income subject to tax from sources within the Kingdom;
- A person engaged in natural gas investment fields; and
- A person engaged in oil and other hydrocarbon production.
Saudi Arabia

**Corporate residence**

A company is considered a resident company if it meets any of the following conditions:

1. It is formed under the Saudi Arabian Regulations for Companies; and/or
2. If the headquarters is situated within the Kingdom.

**Other taxes**

**Social insurance tax**
Social insurance tax is paid monthly based on the monthly basic salary plus housing with an upper limit of SAR 45,000 and is computed at 2% for non-Saudi employees and paid by the employer. For Saudi employees, the rate is 20% and is paid by both the employees (9%) and the employer (11%).

**Withholding tax**
There are withholding tax regulations (see section titled “Withholding taxes”).

**Value-added tax (VAT)**
There is currently no VAT system in Saudi Arabia.

**Other taxes**
There is no form of stamp, transfer, excise, sales, turnover, production, real estate or property taxation except in so far as they may fall within the scope of Zakat, which is applicable only to Saudi nationals.

**Branch income**

Taxable income from a branch of a non-Saudi based corporation is taxed at 20%. Certain charges incurred by the headquarters are not deductible on the branch tax return.

**Income determination**

**Inventory valuation**
The weighted average-cost method is used for valuing inventory under Saudi tax law.

**Capital gains**
Gains on the disposal of non-listed shares are taxed at a rate of 20%.

**Stock dividends**
Stock dividends distributed to the non-resident recipient shareholders are subject to a 5% withholding tax.

**Foreign income**
The gross income of any company carrying on its business activities both inside and outside Saudi Arabia is considered to include all the income that the company receives locally from any source within Saudi Arabia, as well as the income that the company derives from outside Saudi Arabia.
**Other significant items – imports and supply contracts**

Saudi tax law provides that no profit will be considered to arise from a contract for the supply of goods to Saudi Arabia, provided delivery of the goods is either free on board (FOB) or cost, insurance and freight (CIF) to a Saudi port. However, should the contract provide for the delivery and/or installation of materials at a point inside Saudi Arabia, the supplier may be considered to be carrying on business within Saudi Arabia, and, as a consequence, the contract may be subject to Saudi taxation as follows:

- If the material cost was identified in the supply contract separately from the cost of work performed in the Kingdom, then taxes will be assessed on the work that will be performed in the Kingdom on a deemed-profit basis at a minimum of 15% of the total value of such work.
- If the supply contract indicates a total cost for the supply and other activities in the Kingdom, then the work performed in the Kingdom will be assigned a value equal to 10% of the contract value for each type of activity, and a deemed profit of a minimum of 15% of the estimated work will be computed, which will be subject to tax according to Saudi tax regulations.

**Deductions**

**General**

All expenses that are necessary and normal to the business, paid or accrued, are allowable deductions, provided the expense meets the following conditions:

- It is an actual expense, supported by a verifiable document or other qualifying evidence;
- It is related to the generation of taxable income;
- It is related to the subject tax year; and
- It is of a non-capital nature.

**Loan charges (interest expenses)**

The deduction is limited to the lower of the loan charge incurred during the tax year, if related to income that is subject to tax, or the result of the following formula, whichever is less.

The taxpayer’s total income from loan charges, plus 50% of (a minus b) as below:

a. Equals income subject to tax other than income from loan charges.
b. Equals expenses allowed under the law other than loan charge expenses.

Banks are not subject to this formula.

**Bad debt**

Bad debts, provided they meet the following conditions, are deductible:

- The bad debt was previously declared in the appropriate year’s income;
- The debt resulted from sale of goods or services;
- The company holds a certificate from the taxpayer’s certified public accountant certifying that the debt has been written off in the taxpayer’s books and records, based on a decision by the taxpayer at the appropriate management level;
Saudi Arabia

- Serious efforts have been exerted by the taxpayer to collect the debt with no success and the inability of the debtor to pay has been proved based on a judicial ruling or bankruptcy;
- The debt is not from a related party; and
- There is a commitment by the taxpayer to reinstate, as income, any written-off debt whenever collected.

**Allocations and reserves**

Allocations and reserves formed during the year as follows:

- Bank allocations to a reserve fund for doubtful debts are allowable deductions. However, a bank must submit a certificate from the Saudi Arabian Monetary Agency (SAMA) stating the amount of doubtful debts and the amount of doubtful debts collected during the year, which should be reinstated in the tax base of the year of collection.
- Insurance/reinsurance companies may deduct, based on industry standards, a reserve for unearned premiums and for unexpired risks, provided that it is reported in the tax base of the following year.
- A reserve for unearned premiums means a part of premium amounts collected or stated in books that covers risks related to the future tax year(s). A reserve for unexpired risks means the amount of compensation claimed or reported, but for which the payment process falls short of completion during the tax year.
- A taxpayer may reduce its book profit by the amount of reserves used during the year that had been readjusted when made, to increase income or decrease expenses in the year of formation. Examples of such reserves are end-of-service awards, doubtful debt, and drops in prices. Such amounts are allowed, provided the following conditions are met:
  - The used amount was paid or accrued during the year, and it is supported by documentation; and
  - The reserve had been adjusted in the year of formation to increase the tax base.

**School fees**

School fees paid by taxpayers for their employees' children are deductible expenses, provided they meet the following conditions:

- They are paid to a local licensed school; and
- This benefit is stated in the employment contract.

**Pension fund**

Employers' contributions to employees' pension funds or savings funds established under the Kingdom's rules and regulations are deductible, provided that such contribution, one payment or in aggregate, is not in excess of 25% of the employee's income before the employer's contributions and that the fund meets the following:

- The fund is established according to special provisions that clearly stipulate conditions of subscription and rights of subscribers;
- Such obligation is stated in the employment contract or in the Articles of Association of the establishment; and
- The fund has a character independent of the establishment and has separate accounts audited by an independent certified public accountant.
Research and development (R&D)
A deduction is allowed for R&D expenditure incurred during the tax year in connection
with the generation of income that is subject to tax. Such expenditure relates to
technical, scientific and engineering experiments, computer systems or similar
research. This provision does not apply to the acquisition of land and facilities, or to
equipment used for research. Such facilities and equipment are subject to depreciation
under the law.

Depreciation
Depreciation deduction under the following limitations as stipulated by the law:

- The asset is not intended for resale and is to be used, in full or in part, for the
  entity’s purposes;
- The asset is of a depreciable nature that loses value because of use or because of
  wear and tear and obsolescence and which has a value extending beyond the end of
  the taxable year;
- The asset is owned by the business, as per the ownership document for buildings,
  and contracts and invoices for other assets; and
- The asset depreciation is allowed even if the asset becomes inoperational during
  the tax year.

The depreciation for tax purposes is calculated as follows, based on the following five
categories of depreciable tangible or intangible assets, other than land:

<table>
<thead>
<tr>
<th>Category/Asset</th>
<th>Depreciation rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>1) Fixed buildings</td>
<td>5</td>
</tr>
<tr>
<td>2) Industrial and agricultural movable buildings</td>
<td>10</td>
</tr>
<tr>
<td>3) Factories, machines and equipment, and computer application programs, passenger cars and cargo vehicles</td>
<td>25</td>
</tr>
<tr>
<td>4) Expenditures for geological surveying, drilling, exploration, and other preliminary work to exploit and develop natural resources and their fields</td>
<td>20</td>
</tr>
<tr>
<td>5) All other tangible or intangible assets not included in previous categories, such as furniture, planes, ships and trains, and goodwill</td>
<td>10</td>
</tr>
</tbody>
</table>

The declining balance method of depreciation according to the above rates should be
followed for tax purposes.

There are also rules for depreciation relating to assets either acquired or disposed.
Essentially, 50% of the allowable acquisition price or disposal proceeds is added
to or subtracted from the asset pool in the first year, and the remaining 50% in the
following year.

Assets under build own transfer (BOT), and build, own, operate, and transfer (BOOT)
are allowed to be depreciated over the contract period. This presumes, although it is
not clear, that assets under the BOT and BOOT schemes actually will have a separate
grouping in addition to the above prescribed groups.

Non-deductible expenses
The following expenses are non-deductible:
• Wages, salaries and whatever is so deemed, in cash or in kind, paid to an owner, partner or shareholder, or to a member of their families, being a parent, spouse, sons/daughters and siblings (this provision does not apply to stockholders in a stock company).

• Compensation in cash or in kind paid to a partner, shareholder, or to a family member including a parent, spouse, sons/daughters and siblings for a property or service to the extent that the compensation is higher than the fair market value of such property or service at time of transaction.

• Entertainment expenses incurred for events such as parties, sports competitions, entertainment trips and activities, etc.

• Expenses of a natural person for personal consumption, such as personal withdrawals, dependents’ cost of living or education.

• Income tax and related fines and penalties paid or payable to the Kingdom or to other countries.

• Financial fines or penalties paid or payable to any party in the Kingdom, such as traffic fines, or fines for causing damage to public utilities. This does not include fines or penalties paid for breach of contractual obligations, such as fines on delayed or defaulted completion of contracts. Such fines are deductible, provided they are documented by the contracting party and the income from such penalties is reported in the year of recovery.

• Any bribe or similar payment which is considered an illegal practice in the Kingdom, even if paid abroad.

• Insurance commission in excess of 3% of total premiums collected in the Kingdom through an agent or others and regardless of whether or not the agent is a partner.

• Employer contributions to their employees’ legal pension fund, social insurance or savings funds.

• Payments made to headquarter offices located abroad by wholly owned local subsidiaries or branches, such as:
  a. Royalties or commissions;
  b. Loan charges (interest expense) or any other financial fees; and
  c. Indirect administrative and general expenses allocated on an estimated basis.

• The value of goods or services delivered to the taxpayer by related parties to the extent that it is in excess of an arm’s-length value.

**Group taxation**

There is currently no concept of taxation on a consolidated basis, or group relief, for related companies in Saudi Arabia, other than for wholly owned subsidiaries of Saudi/Gulf Cooperation Council owned companies that are subject to Zakat. However, an entity operating in the Kingdom that has undertaken more than one project under the same commercial registration is required to consolidate the results of such projects into the financial statements of that entity and subject them to taxation as a single operation.

**Tax incentives**

**Inward investment**

The Saudi Arabian government lists the following as incentives potentially available to qualifying companies:

• There are no restrictions on repatriation of profits, fees, capital, salaries, or other monies.
• The government of Saudi Arabia has granted tax concessions to six less-developed regions in the Kingdom, with the intention of attracting more investment. These tax privileges are granted for a period of 10 years from the start of any project. The tax cuts will be offered in the following regions:
  • Ha’il;
  • Jazan;
  • Najran;
  • Al-Baha;
  • Al-Jouf; and
  • Northern territory.

The qualifying investing company’s annual tax bill can be reduced by:
• Half the annual training expenditure on Saudis.
• Half the annual salaries paid to Saudis.
• More deductions are granted if investment capital for any project exceeds SAR 1 million and if more than five employees of Saudi nationality have jobs of a technical or administrative nature with contracts of at least one year.
• There have been indications recently that incentives may be extended to research and development expenditure but no details have been forthcoming.

• An exemption from customs duties is available on machinery and raw materials that are required for approved projects, provided that they are not available in the local market. Such exemptions should be applied for prior to their importation and are subject to certain terms.

**Capital investment**
No specific incentives are available for capital investment other than those listed under the section titled *Inward investment*.

**Withholding taxes (WHT)**
Payments made from a resident party or a PE to a non-resident party for services performed are subject to withholding taxes. The rates vary from 5%, 15% and 20% based on the type of service and whether the beneficiary is a related party.

The withholding tax should be paid within the first 10 days of the month following the month during which the payment was made.

The domestic rate for withholding tax is 5% on dividends, 15% on royalties and 5% on interest.

**Tax treaties**
Saudi Arabia has entered into tax treaties with several countries including France, India, Pakistan, China, Austria, Malaysia, South Africa, South Korea, Turkey, Italy and United Kingdom.

There are a number of other treaties not yet in force (i.e., Greece, Russia, The Netherlands, Uzbekistan, Germany and Belarus) and negotiations with some 20 other countries are in progress.
Double tax treaties have not yet been effectively tested in Saudi Arabia. However, they generally follow the Organisation for Economic Co-operation and Development (OECD) model treaty and may provide certain relief, including withholding tax on dividends, royalties and interest.

**Tax administration**

**Returns**
Tax filings are based on the company’s fiscal-year. Returns are due to be filed with the DZIT and tax due must be paid within 120 days after the taxpayer’s year-end. The system is one of self-assessment.

Advance tax payments are required to be made for a current tax year under the following conditions:

- The taxpayer has earned income during the year;
- An advance payment is 25% of the amount resulting from the taxpayer’s tax liability based on the previous year return minus the withheld tax;
- The computed payment is at least SAR 500,000;
- Three equal advance payments of tax on the last day of the sixth, ninth and twelfth months of the tax year; and/or
- Late payment of an advance payment is subject to a delay penalty of 1% of the amount due for every 30 days of delay.

Significant developments

In 2009 amendments were introduced into law that increased excise duty rates on certain products, notably: 15% to 20% for cigarettes; 30% to 45% for other kinds of tobacco; and 30% to 40% for alcoholic drinks. These measures were aimed at reducing the consumption of alcohol and tobacco.

Additionally, a 2% tax on telecommunication use and access was introduced in 2009. To offset the tax, the purchase of mobile telephones (and other types of telephones) are no longer subject to value-added tax (VAT) and customs duty.

Taxes on corporate income

Branches and companies are liable for 25% corporate income tax (CIT). A minimum CIT is due in case of lack of profits and the amount depends on the annual turnover:

• XOF 500,000 in case of an annual turnover up to XOF 250,000,000;
• XOF 750,000 if the annual turnover ranges from XOF 250,000,000 to XOF 500,000,000; and
• XOF 1,000,000 in case of an annual turnover over XOF 500,000,000.

Corporate residence

Companies are considered as Senegalese residents if they have a registered fixed establishment. Nonetheless, foreign companies that are not registered locally may be deemed to have a permanent establishment (PE) in Senegal in relation to their local activity, and be subsequently subject to tax liabilities. The general criteria of a PE deriving from the General Tax Code are close to the Organisation for Economic Co-operation and Development (OECD) standards. Double tax treaties can be applicable and can provide specific definitions. These double tax treaties are based on the OECD model in most cases.

Senegal has concluded such treaties with Belgium, Canada, France, Italy, Morocco, Mauritania, Norway, Qatar, Tunisia and state members of the West African Economic and Monetary Union (UEMOA) including: Benin, Burkina-Faso, Côte d’Ivoire, Guinea-Bissau, Mali, Niger and Togo.
Senegal

Other taxes

Value-added tax (VAT)
Subject to certain exclusions, most commercial operations are subject to an 18% VAT duty. A 17% special tax on banking operations is applicable instead of VAT.

Business licence tax
Annual duty is constituted by a fixed annual payment (fixed duty) and a proportional duty calculated in most cases on the basis of the rental value of premises used. The amounts and rates of these taxes are fixed according to the type and size of the activity carried out.

Tax on built real estate (land with buildings and/or industrial equipment fixed thereon)
It applies to owners of buildings, factories, industrial premises or equipment fixed on the land. The tax rate is 5% for common buildings and 7.5% for factories and industrial premises. It is applied on the basis of the rental value of the lands, buildings, etc.

Tax on non-built real estate
It applies to owners of land without buildings, factories, industrial premises or equipment fixed on the land. The tax rate is fixed at 5%. It is applied on the basis of the rental value of the land.

Stamp/registration duties
There are many stamp and/or registration duties depending on the operations. For example:

- 1% registration duty applicable to the incorporation of a company and the increase in cash of the share capital;
- 1% registration duty applicable to transfer of stocks;
- 1% registration duty applicable to transfer of debts;
- 15% registration duty applicable to sale of business;
- 15% registration duty applicable to transfer of real estate; and
- 5% registration duty applicable to rent agreements.

Tax on vehicles
An owner of a motor vehicle (car, truck or motorbike) must pay an annual registration tax ranging from XOF 18,000 to XOF 200,000 per vehicle, depending on its nature and horsepower.

Company tax on vehicles
In addition to the tax on vehicles, companies owning or renting vehicles (more than 15 days a year) must pay a specific annual tax on them. Rates range from XOF 50,000 to XOF 200,000, depending on the nature and horsepower of the vehicle.

Branch income
In general, the tax on branch income is similar to that of corporate income. Nonetheless, a 10% duty is automatically applied to profits generated after corporate income tax. It corresponds to an automatic application of the 10% tax on payment of dividends applicable to a company.
**Income determination**

**Inventory valuation**
Inventory is generally stated at the lower of cost or market value. Last-in, first-out (LIFO) and first-in, first-out (FIFO) are permitted. Book and tax conformity is required.

**Capital gains**
Regarding companies, capital gains deriving from the transfer of assets are subject to the 25% corporate income tax. There is no basket system. The taxable base will be reduced to one-third if the transfer of assets arises due to a cessation of activity. However, if the transfer of assets is made less than five years after the start of the business, a one-half reduction of the taxable base will be applicable.

Sales of stocks by a non-resident are liable to the 25% corporate income tax, subject to the application of a double tax treaty.

**Inter-company dividends**
If a parent company domiciled in Senegal owns 20% of the subsidiary (main condition for the application of the parent-subsidiary corporation special taxation status), a 95% reduction on the dividends received is applicable for corporate income tax purposes.

**Foreign income**
In general, profits generated in Senegal are taxed under Senegal’s income tax law. Profits generated outside Senegal and constituting a permanent establishment in the relevant country are not taxed in Senegal. Profits generated outside Senegal and constituting a permanent establishment in the relevant country are not taxed locally. A double tax treaty can provide different rules.

**Stock dividends**
Stock dividends are unusual in Senegal. However, this kind of distribution would be taxable at the general withholding tax rate of 10% on the basis of its real value.

**Deductions**

**Depreciation and depletion**
The rates of depreciation are not provided by the law. The rate is determined on the normal and predictable duration of use of the asset by taking into account normal wear and tear. In practice, there are standard rates for common assets. Accelerated depreciation can be applicable, subject to conditions.

**Net operating losses**
Tax losses may be carried forward to the next three years. The carryback procedure does not exist. Losses corresponding to the depreciation of assets can be forwarded indefinitely.

**Payments to foreign affiliates**
Reasonable royalties, interest, and management service fees paid to foreign parent companies are tax-deductible. Supporting documents (invoices, contracts, etc.) will be necessary to prove that these expenses are justified. Transfer pricing issues are rare.
Senegal

**Other significant items**
Interest paid to shareholders may be deducted when it relates to loans with an amount inferior or equal to the amount of the share capital and whose rate is inferior or equal to the base rate of the Central Bank of West African States plus two points.

Provisions are deductible if they correspond to a risk or a probable cost that is more than possible and leads to a decrease of the assets. Provisions for paid holidays and retirement compensation are not deductible.

Payments made to specific chartered organisations are deductible at a rate of up to 0.2% of turnover.

Headquarter expenses, which are a proration of the worldwide office expenses, may be allocated to the Senegal branch. This proration is based upon a ratio of the local turnover of the branch and the worldwide turnover of the parent company. It applies to the total amount of headquarters’ expenses incurred by the company. In addition, the deductibility of headquarters expenses is limited to 20% of the accounting profits before the deduction. This limitation does not apply to other types of services provided by headquarters such as technical assistance.

Fines, penalties and foreign taxes are not deductible.

**Group taxation**
Group taxation is not permitted.

**Tax incentives**

**The Investment Code**
The Investment Code applies to investments over XOF 100,000,000 (mainly production, processing, industrial, tourism, agricultural and complex trade). Advantages: Customs duties exemption, suspension of VAT payment for three years, corporate income tax limitation applicable, etc.

**The status of the free export company**
Agriculture, industry and telecommunications companies that have an exporting potential amounting to at least 80% of their turnover may qualify for the free export company status. Advantages: corporate income tax rate of 15%, exemption of dividend tax, exemption of business license tax, exemption of taxes on real estate, and exemption of registration duty for incorporation or bylaws change purposes.

**Miscellaneous incentives**
There is a wide range of investment laws for investments higher than XOF 250,000,000,000 (negotiation of a derogatory tax regime), including the mining code and the petroleum code, among others.
Withholding taxes (WHT)

Senegal has various withholding taxes. The primary ones are:

- A 20% withholding tax on remuneration paid for services rendered by a foreign individual or foreign company;
- A 10% withholding tax on dividends distributed;
- A 13% withholding tax on bond interest;
- An 8% withholding tax on deposits or guaranteed interest on accounts with a bank; and
- A 16% withholding tax on other revenues, notably interest on loans.

These withholding taxes may be limited by double tax treaties.

Tax administration

Returns

Companies must file corporate income tax returns by 30 April of the year following the tax year (calendar one) for corporate income tax purposes.

VAT returns must be filed monthly.

Business license tax and taxes on real estate are due annually.

Payment of tax

Corporate tax must be paid in two instalments (each equal to one-third of the previous year’s tax) by 15 February and 30 April. The outstanding balance payment amount of the tax due must be paid by 15 June.

For the first financial year of a newly incorporated company, no instalment is due; the new company pays the whole corporate income tax before 15 June of the following year.

Significant developments

The Corporate Profit Tax (CPT) law was introduced in April 2001. Amendments to the CPT law were enacted on 27 March 2010 and apply to determination of the CPT liability for fiscal year 2010.

A new customs law has been adopted and is effective as of 4 May 2010. This law represents a significant step forward in the process of aligning Serbian customs legislation with the European Union (EU) Community Customs Code.

Taxes on corporate income

The rate of corporate profit tax is 10%.

Corporate residence

A legal entity is considered to be a resident of Serbia if it is established or has its place of effective management and control in the territory of the Republic of Serbia. Residents are taxed on their income generated in the territory of the Republic of Serbia, as well as on their worldwide income. Non-residents are taxed only on their income sourced through a permanent establishment (PE) on Serbian territory. A PE is any permanent place of business through which a non-resident conducts its business.

Other taxes

Value-added tax (VAT)

The VAT was introduced on 1 January 2005 and generally follows the EU’s Sixth Directive.

A taxpayer for VAT purposes is a person who independently, and in the course of its business activities, undertakes the supply of goods and services, or import of goods. Business activity is defined as the permanent activity of a manufacturer, salesperson or service provider for the purpose of gaining income. A branch or other operating unit can be a taxpayer.

A non-resident without a head office or PE within Serbia cannot register for VAT purposes.
The VAT rates are as follows:

- The standard VAT rate – 18% (for most taxable supplies); and
- A reduced VAT rate – 8% (for basic food stuffs, daily newspapers, utilities etc.).

In addition to these tax rates, there is a 0% tax rate with the right of deduction of the input VAT which applies to the export of goods, transport and other services directly related to exports, international air transport, etc.

A 0% tax rate without the right of deduction of the input VAT applies to trading in shares and other securities, insurance and reinsurance, and the lease of apartments, business premises, etc.

The VAT law requires taxpayers to file VAT returns and pay VAT within 10 days of the end of each taxable period. The usual taxable period is a calendar month, but if a taxpayer’s total turnover (for the last 12 months) is less than RSD (Serbian dinar) 20 million or is forecast (for the next 12 months) to be so, the taxable period is three calendar months.

**Customs duties**
Goods imported into Serbia are subject to customs duty rates provided in the Law on Customs Tariff. These rates are *ad valorem* (the only exception is related to the importation of other cigarettes containing tobacco, where a combined *ad valorem* and specific customs duty rate is prescribed) and applies to goods originating in countries which have a most favoured nation (MFN) status in trading with Serbia. Goods originating in other countries are subject to MFN duty rates increased by 70%.

At the moment, the only trading partner with Serbia that does not have MFN status is Taiwan.

Customs duty rates in Serbia range from 0% to 57.6% with most being under 30%. At the moment, the 57.6% rate only applies to cigarettes containing tobacco – tariff code 2402 20 90 00.

**Excise duties**
Excise duties are levied on producers and importers of the following goods:

- Oil derivatives;
- Tobacco products;
- Alcoholic beverages; and
- Coffee (green, roasted, ground and coffee extracts).

Excise duty in Serbia is specific (for oil derivatives, alcoholic beverages, cigars and cigarillos), *ad valorem* (for coffee and pipe tobacco), and combined (for cigarettes – specific + *ad valorem* on retail price).

Excise duties stated in Serbian currency are adjusted on a half-year basis according to variations of the consumer price index (CPI) declared by relevant government bodies in charge of statistics. For oil derivatives, government can modify the specific excise duty amounts during the year according to changes in prices of crude oil on the market.
**Property tax**

Property tax is payable in Serbia by all legal entities and individuals who own or have rights over real estate located in the Republic of Serbia, such as:

- Ownership rights;
- Right of occupancy;
- Tenancy rights over an apartment or a building for a period longer than one year or for an indefinite period; and
- Urban land usage right (municipal, public and other state-owned land) larger than 10 acres in area.

Where the taxpayer keeps books, the property tax on real estate is levied at a flat rate which cannot exceed 0.40%.

**Branch income**

Non-residents carrying on business in Serbia through a branch are taxed on their Serbian sourced income at a rate of 10%. A branch is considered to be a PE.

**Income determination**

Taxable profit is determined by adjusting the accounting profit as stated in the profit and loss statement (determined in accordance with International Financial Reporting Standards (IFRS) and local accounting and audit legislation) and in accordance with the provisions of the CPT Law.

For taxpayers who, according to local legislation, are not obliged to apply IFRS, taxable profit is determined according to the special guidelines prescribed by the ministry of finance.

The following expenses are not recognised for corporate profit tax purposes:

- Non-documented expenses;
- Provisions for receivables from the entities that are creditors at the same time;
- Presents provided to political organisations;
- Presents provided to related parties;
- Penalty interest for late payment of taxes;
- Expenses related to forced collection of taxes and other liabilities;
- Fines and penalties (both commercial and the one charged by the authorities);
- Contractual fines and penalties;
- Non-business related expense;
- Calculated but unpaid redundancy payments (deductible when paid);
- Impairment of assets (deductible in tax period in which asset is disposed or used);
- Direct write-off of receivables (under certain conditions); and
- Long-term provisions (except those for renewal of natural resources, expenses within warranty period and other mandatory long-term provisions).

The following expenses are recognised for corporate profit tax purposes only up to a certain limit:

- Depreciation in the amount computed in accordance with the tax legislation;
- Advertising and promotional expenses up to 5% of total revenues;
Serbia

- Representation expenses up to 0.5% of total revenues;
- Expenses for health care, scientific, educational, humanitarian, religious, ecological, cultural and sport related purposes up to 3.5% of total revenues; and
- Membership fees paid to chambers of commerce and other associations (except political parties) up to 0.1% of gross revenue.

Valuation of inventory
Cost of materials and the purchase value of merchandise are tax-deductible up to an amount calculated by applying the average weighted cost method or the first-in-first-out (FIFO) method. If another method is used, an adjustment for tax purposes should be made.

Capital gains
Capital gains are generated by the sale or other transfer of real estate, rights related to industrial property, as well as shares, stocks, securities, certain bonds and investment units. A capital gain is determined as the difference between the sale and purchase price of the asset concerned, determined in accordance with the provisions of the Law. If the amount is negative a capital loss results.

Capital gains are taxed separately from the trade or business income. Consequently, capital gains/losses cannot be used to offset business losses/gains.

However, capital gains can be offset with capital losses occurring in the same period. A capital loss can be carried forward for five years.

The capital gains tax rate is 10%.

Foreign income
Companies resident in Serbia are taxed on their worldwide income.

When profit generated in another country is taxed in the foreign country, a company has the right to decrease its tax liability by claiming a tax credit from the tax authorities in Serbia. This tax credit is equal to the tax paid in the foreign country, but it cannot exceed the amount of the tax that would have been paid in Serbia.

A Serbian entity is entitled to a tax credit for the withholding tax paid on distributed dividends and underlying CPT paid abroad (by its non-resident subsidiary). The tax credit cannot exceed the amount of corporate tax that would have been paid in Serbia. Non-utilised tax credit can be carried forward by the parent company for five years. The parent company is required to own not less than 25% of a non-resident subsidiary for at least one year before filing the tax return.

A resident taxpayer also has the right to decrease its tax liability for withholding tax paid abroad by its non-resident subsidiary on interest and authorship fees.

Deductions
Intangible and fixed assets are divided into five groups, with depreciation rates prescribed for each (Group I: 2.5%; II: 10%; III: 15%; IV: 20%; and V: 30%). A straight-line depreciation method is prescribed for the first group, which includes real estate, while a declining balance method is applicable for assets in the other groups.
Serbia

Assets subject to tax depreciation are all tangible and intangible (except goodwill) assets with useful life longer than one year and acquisition value above the average monthly gross salary published in Serbia at the moment of acquisition.

Transfer prices
A transfer price is the price of transactions between related parties. Related parties exist if there is a possibility of control or influence over business decisions between them. Ownership of 50% or more of shares is considered as potential control. Influence over business decisions exists when an associated party holds 50% or more or individually holds the greatest portion of votes in the taxpayer’s management bodies. If the same persons participate in the management or control of both companies, a connection between them will be deemed to exist.

A company should disclose transactions with related parties separately at transfer prices and at arm’s-length prices in its corporate tax calculation. Positive difference between these prices (adjustments of expenses) and negative difference (adjustments of revenues) is included in taxable profit.

Thin capitalisation
The old thin capitalisation rule has been changed considerably. It is our understanding that interest and related expenses arising in related-party loans are now deductible up to four times the taxpayer’s net assets (10 times for banks). In addition, the carryforward of non-deductible interest due to the application of the thin-cap rule is no longer available.

Tax loss
The taxpayer has the right to carryforward and utilise tax losses incurred over the following five years.

Group taxation
Tax grouping/consolidation is allowed to a group of companies where all members are Serbian residents and one company directly or indirectly controls at least 75% of the shares in another company. Each company files its own tax balance sheet and the parent company files a consolidated tax balance sheet for the whole group.

In the consolidated tax balance sheet, losses of one or more companies are offset by the profits of other related companies. Each company is liable for the portion of tax attributable to its share of the group’s taxable profit.

Once approved by the ministry of finance, tax grouping/consolidation applies for at least five years.

Tax incentives
Profit earned on the basis of a concession is tax exempt for a period of five years.
**Tax credits**

The minimum investment in property, plant and equipment (PPE) required to qualify for the 10-year tax holiday is RSD 800 million. To qualify for the credit, a taxpayer must employ at least 100 new workers for an indefinite period. The tax holiday is available for the 10-year period in proportion to the investment made. The number of employees employed in the tax period in which the taxpayer qualified for the tax holiday must be retained throughout the whole tax holiday period.

A five-year tax holiday is available for companies conducting business in undeveloped regions that invest at least RSD 8 million in fixed assets. In addition, the company is obliged to employ at least five new workers for an indefinite period. The tax holiday is available for the five year period in proportion to the investment made.

A tax credit of 20% (40% for small enterprises) is available for qualifying investments in fixed assets. The credit is limited to 50% (70% for small enterprises) of the assessed corporate profit tax liability in the current tax period. Unused tax credits can be carried forward for 10 years.

Taxpayers generating profit in a newly established operating unit in an underdeveloped region may claim tax credits for a period of two years in an amount proportional to the profit generated by that unit.

Taxpayers classified into one of the following industries: agriculture, fishing, production of textile yarn and fabrics, garments, leather, base metals, standard metal products, machines, office machines, electrical machines, radio, TV and communication equipment, medical instruments, motor vehicles, recycling and video production are entitled to receive a tax credit in the amount of 80% of investments made in fixed assets which were not previously in use in Serbia. Unused tax credits can be carried forward up to 10 years.

**Withholding taxes (WHT)**

Withholding tax is calculated and paid at the rate of 20% on payments such as dividends/share in profit, royalties (including neighbouring authorship rights and intellectual property rights), interest income, capital gains, lease payments for real estate and other assets made to a non-resident, unless a Double Tax Treaty (DTT) applies to provide a reduced rate.

Withholding tax is also payable on a non-resident's income realised on the basis of performing entertaining, artistic, sports and similar programmes in Serbia, which is not taxed as income of an individual (performer, musician, sportsman etc.).

Capital gains realised by non-residents (both from residents or other non-residents) are subject to Serbian withholding tax. Non-residents should appoint a fiscal representative in Serbia who should submit a tax return within 15 days from the realisation of capital gain. Based on the tax return, Tax Authorities will issue a decision assessing tax liability (if any).

In order to benefit from application of a relevant DTT, non-residents (i.e., the income recipient) must provide a tax residency certificate on the form prescribed by the Serbian Ministry of Finance stamped by the relevant body from the non-resident’s country of residence.
Withholding tax rates envisaged by applicable DT Ts are provided in the following table.

**Notes**

1. If the recipient company owns/controls at least 25 percent (25%) of the equity of the paying company, the lower of the two rates applies.
2. A new double taxation treaty was signed with Denmark in 2009, but it is not applicable yet. Meanwhile, the old treaty is still applicable.
3. The treaty has not been ratified by one of the parties.
4. A tax rate of five percent (5%) will be applicable to literary and scientific works of art, films and works created like films, or other source of reproduction tone or picture. A tax rate of 10 percent (10%) will be applicable to: patents, petty patents, brands, models and samples, technical innovations, secret formulas or technical procedure.
5. Only in cases when dividends are to be paid to Serbian residents. If paid to Malaysian residents, they are taxable at 20 percent (20%) in Serbia.
6. A zero percent rate (0%) is applicable in cases when the income recipient is the government or government-owned banks.
7. Withholding rate refers solely to dividends distributed from Serbia. In Malta, withholding tax cannot be higher than corporate tax on profit before dividend distribution.
8. Will become applicable from 1 January 2011.

### Tax administration

The tax period in Serbia is the calendar year. However, entities have a possibility to opt for a different tax period other than the calendar year (subject to the approval of the ministry of finance), but still 12 months long. Once approved, such tax period must be applied for at least five years.

Tax returns together with all supporting documents (e.g., tax depreciation and tax credit forms) must be filed with the tax authorities by 10 March of the following year.

A newly established company needs to register with the tax authorities within 15 days of registration with the court.

Corporate profit tax is payable monthly in advance instalments by the fifteenth of the following month for the prior calendar month. The amount of payable advances is determined on the basis of a company’s corporate tax calculation for the previous year.

**Significant developments**

The Economic Strategies Committee, which was tasked with developing strategies for Singapore’s future economic growth, recommended improving skills, innovation and productivity as the basis for sustaining economic growth. The 2010 Budget was announced on 22 February 2010 and the changes proposed were generally consistent with these recommendations.

Corporate tax changes relate mainly to the introduction of incentives for productivity and innovation, mergers and acquisitions, the maritime sector and international legal services. In addition, certain income tax, goods and services tax (GST) and stamp duty incentives for real estate investment trusts, listed registered business trusts, aircraft rotables and donations that expired or are due to expire this year were renewed. There were also changes to the incentives for offshore insurance and the Financial Sector Incentive and the replacement of industrial building allowances with a new Land Intensification Allowance.

**Taxes on corporate income**

Tax on corporate income is imposed at a flat rate of 17% for the year of assessment 2010 (i.e., for income derived in accounting periods ending in 2009). This is a one percent reduction in the rate from the prior year. There is an exemption of up to SGD 152,500 out of the first SGD 300,000 of chargeable/taxable income.

For qualifying start-up companies, a three-year tax exemption on the first SGD 100,000, and a further exemption of up to SGD 100,000 on the next SGD 200,000 of chargeable/taxable income is available.

Singapore adopts a one-tier taxation system, under which all dividends are tax exempt in the shareholder’s hands.

**Corporate residence**

In Singapore, the tax residence of a corporation is determined by the place where the central management and control of its business is exercised. This is taken generally to mean the place where the directors meet to exercise de facto control, although the Inland Revenue Authority of Singapore (IRAS) has recently set out further qualifying criteria.
Other taxes

Goods and services tax (GST)
GST is charged at 7% on the supply of goods and services made in Singapore by a taxable person in the course or furtherance of business.

The only exemptions from GST are prescribed financial services (including life insurance) and the sale or rental of residential properties. Zero-rating only applies to the export of goods and international services (defined).

GST is also levied on imports of goods, at the time of importation. However, there are reliefs available to ease the cash-flow burden of import-export traders by suspending GST at the time of importation. GST is not currently charged on imports of services.

A taxable person is one who is, or is required to be, registered for GST as his taxable turnover exceeds SGD 1 million per year. Voluntary registration is permitted if the taxable turnover is below the registration limit, subject to conditions.

A supply of goods is made in Singapore if the goods are in Singapore at the time of supply, and a supply of services is made in Singapore, if the supplier belongs in Singapore. Generally, a person belongs in Singapore if he has a business (including carrying on a business through a branch or agency) or fixed establishment in Singapore.

A taxable person is allowed to offset the input GST paid on taxable purchases against the output GST chargeable on supplies made by him. However, certain purchases are specifically denied an input GST deduction. These include supplies of goods and services such as non-business expenses, club subscription fees, family benefits, car rental expenses, motor vehicle expenses, medical expenses and transactions involving betting, sweepstakes, lotteries, fruit machines or games of chance.

A non-resident is not entitled to GST refunds except by appointing a resident tax agent to act on his behalf. The resident tax agent can then recover import GST paid on behalf of the non-resident business, but will be required to account for output GST on any subsequent supply of the non-resident’s goods in Singapore.

Foreign workers’ levy
In certain industries a levy not exceeding SGD 500 per month is assessed for each foreign employee. It was announced in the 2010 Budget that levy rates will be gradually increased over the next three years.

Property tax
Property tax is levied at 4% on the annual value of owner-occupied residential premises and at 10% on the annual value of all other houses, land, buildings, or tenements. A property tax rebate of up to SGD 100 per year was given in 2008 and 2009 each for owner-occupied residential property. In addition, a 40% rebate (after other existing rebates) was given for 2009 for owner-occupied residential property and commercial and industrial property.

Stamp duties
Stamp duties are levied on written documents relating to stocks and shares at 0.2%, and relating to immovable property in Singapore at graduated rates of up to 3%.
Singapore

Leases with annual rents not exceeding SGD 1,000 are exempt from stamp duty.

**Branch income**

Tax rates on branch profits are the same as on corporate profits. There is no branch profits remittance tax on the repatriation of profits to the head office.

**Income determination**

*Inventory valuation*

There are no special rules as to which valuation basis should be adopted for inventories (stock-in-trade) in the case of a continuing business, as long as the basis is consistent from one year to another. However, the last-in, first-out (LIFO) basis of valuation is not permitted for tax purposes. Generally, tax reporting conforms to book reporting.

**Capital gains**

There is no tax on capital gains. Where there is a series of transactions or where the holding period of an asset is relatively short, the tax authorities may take the view that a business is being carried on and attempt to assess the gains as trading profits of the corporation. The UK Badges of Trade, which are used in judicial decisions to distinguish capital and revenue transactions, are generally applied in determining this issue. They include the existence of a profit seeking motive, the number of transactions, the nature of the asset, the existence of similar trading transactions or interests, changes to the asset, the way the sale was carried out, the source of finance, the interval of time between purchase and sale and the method of acquisition.

**Inter-company dividends**

There are no special concessions for Singapore inter-company dividends. Singapore dividends are exempt in the hands of the recipient.

**Foreign income**

A corporation, whether resident in Singapore or not, is taxed on foreign income when it is received in Singapore. Legislative provisions govern the basis of treating foreign income as received in Singapore. There are no special rules for taxing the undistributed income of foreign subsidiaries. Where income is earned from treaty countries, double taxation is avoided by means of foreign tax credit granted under those treaties. For non-treaty countries, unilateral tax credit is given in respect of foreign tax on all foreign-sourced income, effective as of the year of assessment 2009 (i.e., for income derived in accounting periods ending in 2008). Foreign dividends, foreign branch profits and foreign service fee income remitted to Singapore are exempt from tax subject to certain conditions. A temporary tax amnesty was introduced in the 2009 Budget for all foreign-sourced income, but this expired on 21 January 2010.

**Stock dividends**

Stock dividends generally are not taxable. However, certain distributions could be treated as deemed dividends in certain circumstances.

**Deemed dividends**

Certain distributions to shareholders under a capital-reduction scheme, a share buy-back or a share redemption exercise may be treated as dividends paid by the company. Under the one-tier taxation system, this is not a significant issue unless the transaction is not correspondingly treated as a dividend in the hands of the
shareholder. In which case, the gain may be taxable if it is in respect of a trade or business.

**Deductions**

**Depreciation and depletion**

Tax depreciation is allowable at specified rates on buildings used in qualifying industry sectors, subject to conditions. However, during the 2010 Budget, industrial building allowances were replaced by a Land Intensification Allowance. The latter provides for faster depreciation, but is subject to approval as it is allowed as a tax incentive. Transitional provisions for industrial building allowances are available for taxpayers who committed to qualifying capital expenditure before the Budget announcement.

Tax depreciation is available on machinery and equipment on a straight-line basis over their specified working life for all types of business. In lieu of the straight-line basis, accelerated tax depreciation allowances can be claimed by all businesses on all machinery and equipment in equal instalments over three years.

For machinery and equipment purchased during the accounting periods ending in 2009 and 2010 (years of assessment 2010 and 2011), tax depreciation may be claimed over two years instead of three, with 75% of the claim allowed in the first year of assessment and the remainder allowed in the second.

A 100% depreciation allowance is available on capital expenditure incurred on computers, robots, standby generators, pollution control and energy-efficient equipment, certain diesel-driven vehicles and prescribed automation equipment.

Writing down allowances on a straight-line basis over five years is allowable on the cost of acquisition of intellectual property, subject to certain conditions, while a 100% writing down allowance is allowed for capital expenditure on approved research and development cost-sharing arrangements entered into on or after 17 February 2006.

Gains on tax depreciable property (that is, the excess of proceeds over tax base) are taxed as ordinary income to the extent that tax depreciation has been allowed; that is, any clawback of tax depreciation on the disposal of the asset is taxed.

**Net operating losses**

Loss carryover, including unutilised tax depreciation allowances, is unlimited, provided shareholdings in the loss-making corporation have not changed beyond 50% of the issued and paid-up capital. Additionally, for tax depreciation allowances to be carried forward, the same trade needs to be continued. The tax authorities may exercise discretion to allow carryover of tax losses and unutilised tax depreciation even when there has been a change in shareholding beyond 50%, absent any tax avoidance motives. Losses of up to SGD 100,000 incurred by the company in the current year can be carried back for one year. For the years of assessment 2009 and 2010 (income years 2008 and 2009) the amount allowed to be carried back was increased to SGD 200,000 and the period for which the losses can be carried back was increased to three years.

**Payments to non-residents, including foreign affiliates**

These payments are deductible, provided they are fair and reasonable, are revenue in nature and can be seen to be relevant to earning the payer’s income. Unless a lower treaty rate applies, interest on loans and rentals from movable property are subject
Singapore

to withholding tax at 15%. Royalty payments are subject to withholding tax at 10%. The tax withheld represents a final tax, and applies only to non-residents who are not carrying on any business in Singapore or who have no permanent establishment in Singapore. Technical assistance and management fees for services rendered in Singapore are taxed at the prevailing corporate rate. However, this is not a final tax. Royalties, interest, rental of movable property, technical assistance and management fees can be exempt from withholding tax in certain situations, or subject to reduction in tax rates applicable, usually under fiscal incentives, or double taxation agreements.

Payments made to public entertainers and non-resident professionals who perform services in Singapore also are subject to a final tax of 15% on the gross income. For public entertainers, this appears to be a final tax unless they qualify to be taxed as Singapore tax residents. However, non-resident professionals may elect to be taxed at the prevailing tax rate for non-resident individuals of 20% on net income if this results in a lower tax cost. The witholding tax rate on payments to non-resident entertainers has been reduced to 10% from 22 February 2010 to 31 March 2015.

Taxes
Income taxes are not deductible generally in determining corporate income. However, irrecoverable GST is deductible under certain circumstances. The foreign workers’ levy and property taxes are deductible to the extent they are incurred wholly and exclusively in the production of income.

Other significant items
Private automobile expenses are not deductible.

Donations are deductible only if they are made in cash or another prescribed form and to an approved recipient. The deduction allowed for qualifying donations is generally 200% of the value of the donation. However, the deduction is increased to 250% of the value of qualifying donations made in 2009 and 2010.

The tax deduction for medical expenses is limited to 2% of total payroll if the employer implements certain portable medical insurance or benefit schemes. Otherwise, the amount deductible will be limited to 1% of total payroll. Where the company is exempt or taxed at a reduced rate, the expenses disallowed are taxed at the prevailing corporate rate.

A tax deduction for employee share-based remuneration (stock award or stock option schemes) is allowed only if treasury shares are purchased to fulfill such obligations. The deduction is restricted generally to the actual outlay incurred.

Borrowing costs incurred on capital employed in the production of income will be allowed a tax deduction effective as of the year of assessment 2008, if the costs are incurred as a substitute for interest or to reduce interest costs.

Effective as of the year of assessment 2009 (i.e., for income derived in accounting periods ending in 2008), expenses incurred in respect of R&D carried out in Singapore qualify for a tax deduction of 150% of the R&D expenses incurred.
**Group taxation**

A company is allowed to transfer excess current year trade losses, current year tax depreciation, and current year approved donations to another company within the same group if certain conditions are satisfied.

Broadly, to qualify for group relief, companies must be incorporated in Singapore, belong to the same “75%” group of companies such that there must be at least a 75% ownership relationship between claimant and transferor, and have the same accounting year-end. In addition, a group must comply with certain prescribed set-off and apportionment rules.

**Tax incentives**

There are various tax incentives available to taxpayers involved in specified activities or industries identified as being beneficial to Singapore’s economic development.

**Inward investment**

Incentives are available to pioneer industries, high-value-added or expanding industries and to export services.

Corporations manufacturing approved products with high technological content, providing qualifying services or engaging in countertrade activities may apply for tax exemption for five to 15 years under the pioneer tax incentive. Corporations may apply for their post-pioneer profits to be taxed at a reduced rate under the Development and Expansion Incentive as discussed below.

Under the Development and Expansion Incentive, corporations engaging in new high-value-added projects, expanding or upgrading their operations, or undertaking incremental activities after their pioneer or post-pioneer period may apply for their profits to be taxed at a reduced rate of not less than 5% for an initial period of up to 10 years. The total tax relief period is subject to a maximum of 20 years (inclusive of the post-pioneer relief period previously granted, if applicable).

An approved enterprise providing selected export services with respect to overseas projects is given tax exemption for 90% of the qualifying export income. The exemption is given for a period of five years, with provision for an extension.

**Capital investment**

The various incentives include investment allowances and the merger and acquisition allowance.

Under the investment allowance, a tax exemption is granted on an amount of profits based on a specified percentage (of up to 100%) of the capital expenditure incurred for qualifying projects or activities within a period of up to five years (up to eight years for assets acquired on hire-purchase on or after 15 February 2007).

The merger and acquisition allowance allows a write-off over five years of 5% of the value of qualifying merger or acquisition deals executed between 1 April 2010 and 31 March 2015, subject to a cap of SGD 5 million per year of assessment. This incentive is available only to companies that are incorporated, tax resident and carrying on a business in Singapore.
Financial services
Various incentives include:

1. Financial sector incentive (FSI) scheme – This scheme covers approved bond intermediaries, Asian currency units, approved derivative traders, approved fund managers, equity capital market intermediaries, operational headquarters, syndicated offshore credit and underwriting facilities, providers of high-value-added processing services supporting financial activities, futures members of the Singapore Exchange Limited and members of the Singapore Commodity Exchange Limited. High growth, high-value-added activities such as services and transactions relating to the bond market, derivatives market, equity market (i.e., futures, securities trading, which includes sale of stocks, shares, bonds and other securities, and extends to brokerage, nominee and custodian services in relation to securities trading), credit facilities syndication and Islamic finance will be exempt from tax or taxed at 5%, whilst other broader range financial activities will only qualify for a 12% tax rate. The tax incentive period may vary from five, seven or 10 years subject to certain conditions being met.

2. Finance and treasury centre (FTC) – Income derived by an FTC from approved finance and treasury centre activities is taxed at a reduced rate of 10%. Approved activities include regional and international treasury and fund management activities, corporate finance and advisory services, economic and investment research and analysis, and credit control and administration.

3. Debt securities – A package of tax exemptions and reduced tax rates is available to various players in the Singapore bond market, including certain Islamic financing arrangements.

4. Offshore insurance – Approved insurance companies engaged in the business of insuring and reinsuring offshore risks are taxed at 10% on qualifying income arising from offshore risks business, and at 5% on qualifying income arising from writing offshore Islamic insurance (takaful) and reinsurance (retakaful) business. Tax exemption is available for qualifying income from the writing of both onshore and offshore marine hull and liability risk insurance and offshore specialised risk insurance, and for qualifying income of approved offshore captive insurance companies. In addition, a concessionary tax rate of 10% is available to qualifying insurance and reinsurance brokers on income derived from the provision of insurance broking and advisory services to non-Singapore based clients.

5. Real Estate Investment Trusts (REITs) – Distributions made to foreign non-individual investors by a listed REIT out of rental from Singapore real estate are subject to a reduced tax rate of 10%, subject to certain conditions. Listed REITs investing in foreign properties can apply for tax exemption for certain foreign income received in Singapore. Distributions out of this income similarly are exempt. Stamp duty relief is available upon the transfer of immovable Singapore property to a REIT, and GST concessions are available with respect of overseas non-residential properties and special purpose vehicles or sub-trusts.

6. Islamic financing arrangements – The income tax, stamp duty and GST treatment of (a) Islamic financing arrangements based on (i) the cost-plus (Murabaha) concept, (ii) the investment-partnership (Mudaraba) concept, (iii) the leasing-with-option-to-purchase (Ijara Wa Igtina) concept for mortgage financing; and (b) Islamic debt securities (Sukuk) is aligned with conventional financing contracts that they are economically equivalent to, subject to certain conditions. In addition, concessionary tax rates are available for certain activities relating to Islamic financing (see FSI scheme and Offshore insurance above).
7. Maritime Finance Incentive (MFI) – Approved ship investment managers are taxed at 10% on their qualifying management-related income. Approved ship investment vehicles are tax exempt on their qualifying vessel lease income. Approved container investment enterprises are taxed at 5% or 10% on qualifying income from container-leasing. Approved container investment management companies are taxed at 10% on qualifying management fees.

8. Infrastructure Project Finance – Tax exemption is available for interest income earned from qualifying investments in qualifying infrastructure projects/assets. FSI companies that provide project finance advisory services related to qualifying projects/assets pay tax at 5% on their qualifying income, and companies that provide management services to qualifying business trusts and funds pay tax at 10% on their qualifying income. Stamp duty relief is available also on the transfer of such projects/assets to listed companies.

**Other incentives**

Other incentives include:

1. Headquarters (HQ) schemes – Approved regional headquarters in Singapore are taxed at a concessionary rate of tax of 15% on qualifying overseas income. Approved international headquarters can negotiate for various tax incentives, including tax exemption or concessional tax rates on qualifying income.

2. Incentives for not-for-profit organisations, international arbitration, shipping companies, investment holding companies, oil traders, international traders, general insurance companies, leasing companies, trust companies, cyber traders, international freight and logistics operators and the provision of international legal services include tax exemptions or concessionary tax rates of 10% for qualifying income. The concessionary tax rate for liquefied natural gas (LNG) trading, aircraft leasing, qualifying oil traders and international traders is further reduced to 5%.

**Withholding taxes (WHT)**

Domestic corporations paying certain types of income are required to withhold tax, as shown in the following table. The numbers in parentheses refer to the notes below.

### Notes

1. Singapore has no withholding tax on dividends over and above the tax on the profits out of which the dividends are declared. However, some treaties provide for a maximum withholding tax on dividends should Singapore impose such a withholding tax in the future.

2. The non-treaty rates (a final tax) apply only to non-residents who do not carry on business in Singapore or have a permanent establishment in Singapore. This rate may be further reduced by tax incentives.

3. Interest:
   
   a. Lower rate or exemption if received by a financial institution.
   
   b. Exempt if paid to the government.
   
   c. Lower rate or exemption if paid by an approved industrial undertaking.
   
   d. Exempt if paid by a bank and received by a bank.
   
   e. Exempt if paid to a bank but linked to a government loan agreement or paid to specific financial institutions/banks.
   
   f. Exempt if paid in respect of an approved loan or indebtedness.

4. Royalties:
   
   a. Royalties on literary or artistic copyrights, including film royalties, are taxed at the non-treaty rate.
   
   b. Lower rate for payments in connection with industrial, commercial or scientific equipment.
   
   c. Lower rate for payments in connection with patents, designs, secret formulas/processes, or industrial, commercial or scientific equipment/experience.
   
   d. Exempt if paid to the government.
   
   e. Exempt for approved royalties.
   
   f. Lower rate or exemption for industrial royalties in accordance with domestic laws.

7. Treaties:
   
   a. Treaty with Saudi Arabia covers only international air transport.
   
   b. Treaty with Chile covers only international ship operations.
   
   c. Treaties with Hong Kong and the United States cover only shipping and air transport activities.
   
   d. Treaty applies from 1 January 2010.
**Singapore**

**Tax administration**

**Returns**
Tax is computed for each tax year based on the income earned in the preceding year (the tax basis period). The tax basis period is the calendar year; however for business profits, the accounting year would be adopted generally. The corporation files a return of income, and the tax is assessed by the Comptroller of Income Tax. There is no fixed date for the issue of assessments.

**Payment of tax**
Assessed tax is payable within one month after the service of the notice of assessment, whether or not a notice of objection to the assessment has been lodged with the tax authorities. Application may be made to the Comptroller to pay estimated tax liabilities on a monthly basis. However, the Comptroller is under no obligation to grant such an application.

Late payment of tax will attract penalties up to a maximum of 17% of the outstanding tax.

**Other issues**

**Transfer pricing**
The Income Tax Act contains provisions that may be used in a transfer pricing context to effectively allow IRAS to challenge and revise inter-company transactions, and specific transfer pricing provisions were introduced in 2009 which define the arm’s-length principle and provide the IRAS a right to make transfer pricing adjustments in cases where taxpayers do not comply with the arm’s-length principle.

The IRAS has also issued transfer pricing guidelines to supplement the provisions in the Income Tax Act and the various treaties signed by Singapore. The guidelines cover the application of the arm's-length principle and documentation requirements relating to all related party transactions, including local related party transactions. The intention of the guidelines is to help taxpayers substantiate their transfer prices with their related entities by maintaining adequate documentation to mitigate the risk of tax adjustment by the IRAS and to safeguard them from potential economic double taxation. The IRAS has also provided guidance on matters relating to Mutual Agreement Procedures (MAP) and Advance Pricing Arrangements (APA).

In 2009, the IRAS also issued guidance on the application of the arm's-length principle to related party loans and services.

Although Singapore’s income tax rates are traditionally lower than the majority of its trading partners, the IRAS is increasing its focus on transfer pricing issues.

**Adoption of International Financial Reporting Standards (IFRS)**
Companies incorporated in Singapore and Singapore branches of foreign companies are required by the Companies Act to prepare and present financial statements that comply with the Singapore Financial Reporting Standards (SFRS). In Singapore, the Accounting Standards Council (ASC) has the statutory authority to issue SFRS for adoption.
The SFRS is principally based on and substantially similar to the International Financial Reporting Standards (IFRS) that are issued by the International Accounting Standards Board (IASB). The SFRS will converge with IFRS by 2012 for use by listed companies. For unlisted companies, the development of IFRS for small and medium-sized entities is being observed and evaluated.

Companies are required to submit financial statements as part of their tax return filing. The IRAS generally accepts financial statements prepared for statutory filing, although companies that have been allowed to prepare their financial statements using standards other than SFRS, such as IFRS or the Generally Accepted Accounting Principles (GAAP) adopted by the United States, may be required to explain and/or account for any differences and make the necessary tax adjustments, if any.

In relation to financial instruments, the Income Tax Act was amended to align the tax treatment with the accounting treatment prescribed by SFRS 39 (Financial Instruments: Recognition and Measurement).

**Sample corporate tax calculation**
Fiscal year ended 31 December 2009 (year of assessment 2010).

Significant developments

The tax legislation in the Slovak Republic (Slovakia) was significantly amended 1 January 2004. The legislation is subject to frequent amendments and new official interpretations. Therefore, it is advisable to contact PricewaterhouseCoopers Bratislava for up-to-date information. The latest amendment recently approved by the Slovak Parliament is effective from 1 January 2010. Thus, the information included in this summary applies from 1 January 2010 unless otherwise stated.

Taxes on corporate income

As a member state of the Organisation for Economic Cooperation and Development (OECD), the Slovak Republic's system of corporate taxation generally follows OECD guidelines and principles.

Slovakia has a flat corporate income tax (CIT) rate of 19%, and does not have local, state or provincial CIT.

Corporate residence

A company is a resident in the Slovak Republic if it has its registered seat or effective place of management in the Slovak Republic. A foreign company may create a permanent establishment (PE) if its employees (or persons working for it) are present and providing services in the Slovak Republic on behalf of the foreign company where this activity meets the definitions of permanent place of business; or if the employees conclude and negotiate agreements on the foreign entity's behalf; or if the foreign entity establishes a building site within the territory of the Slovak Republic.

Other taxes

Value-added tax (VAT)

A basic VAT rate of 19% applies to all taxable supplies with certain exceptions, medical products and printed materials have a VAT rate of 10%, and certain food products (such as meat, raw milk, eggs, and honey) placed on the market by entities producing small quantities, have a VAT rate of 6%. Exempt supplies without credit entitlement include postal services, financial and insurance services, education, public radio and TV broadcasting services, health and social services, the transfer and leasing of real estate (with exceptions), and lottery services. There are also other VAT-exempt transactions without credit entitlement as well as exempt taxable supplies with credit entitlement.
Slovak Republic

VAT grouping is possible if certain conditions are met.

**Stamp taxes**
There are no special stamp taxes in Slovakia.

**Excise tax**
Excise tax is charged on the release to free tax circulation or import of tobacco products, wine, spirits, beer and mineral oil. In addition, effective 1 July 2008, excise tax is also charged on electric energy, coal and natural gas.

**Immovable property tax**
Immovable property tax is governed by the Act on Local Taxes, and is divided into: land tax, building tax and tax on apartments. Immovable property tax is calculated based on the area of the real estate, its location and its type, as well as the tax rate of each self-governing region.

Real estate transfer tax was abolished effective 1 January 2005, and there are no stamp duties or similar taxes on share or other property transfers, although small administrative fees are payable to register such transactions.

**Transfer taxes**
Transfer taxes are not applicable for Slovakia.

**Turnover taxes**
Turnover taxes are not applicable for Slovakia.

**Registration taxes**
Registration taxes are not applicable for Slovakia.

**Customs duties**
- Goods imported from non-EU countries are subject to import customs clearance.
- Goods exported from the EU customs territory have to be declared for export customs clearance.
- The person responsible for paying the customs debt is the declarant.
- The declarant is the person making the customs declaration in his own name, or the person in whose name the customs declaration is made.
- The custom declaration should be made in the prescribed form and manner (in writing or by another action).
- Import or export duties are customs duties and other charges payable on the import or export of goods (import VAT, excise duties and charges under the common agricultural policy).
- The customs authorities require declarants to provide a deposit to cover the customs debt in the event that a customs debt arises. Such a deposit may be in cash, or may be provided by a guarantor.

To communicate with the customs offices, each person must have an Economic Operator Registration and Identification Number (EORI), which is registered by the customs authorities on request. EORI registration is mandatory for customs clearance.

**Motor vehicle tax**
Vehicle tax applies to vehicles that are used for business purposes in the Slovak Republic, regardless of where they may be registered. The taxpayer is the entity that
uses the vehicle for business purposes. The tax rate depends on engine capacity, vehicle size and the decision of each self-governing region.

**Inheritance tax and gift tax**

Inheritance tax and gift tax were abolished from 1 January 2004.

**Branch income**

A foreign company may trade through a Slovak branch, which must be registered in the Slovak Commercial Register. The taxable income of the branch may not be lower than that which an independent entity (e.g., a Slovak company) would achieve from carrying out similar activities under similar conditions. If the branch’s taxable income cannot be assessed based on its income less costs, as adjusted for tax purposes, certain other methods may be used. A taxpayer may ask the tax authorities in writing to approve such a method. A Slovak tax resident entity is able to deduct from its tax base a tax loss made by its taxable PE (e.g., branch) outside Slovakia.

**Income determination**

The tax base is generally the accounting result as determined under Slovak statutory accounting rules, adjusted for tax purposes. Under the transfer pricing rules, the tax base should be increased by the difference in prices charged between a Slovak entity and its foreign related parties compared with those that would be charged between independent parties. Slovak tax law generally reflects OECD rules with respect to transfer-pricing methods.

Capital gains from the disposal of assets are included in the CIT base. The tax treatment of capital losses depends on the type of asset on which they arose.

Dividends paid out of profits earned on or after 1 January 2004, and liquidation surpluses and settlement amounts to which shareholders became entitled on or after 1 January 2004, are not subject to tax. Income received by inheritance or donation, and income from acquiring new shares due to an increase in share capital from retained profits or mergers and demergers within Slovakia or the European Union (EU), is also not subject to tax.

Companies resident in the Slovak Republic are taxed on their worldwide income, including income of its foreign branches. Credit relief is available for foreign tax paid under most of Slovakia’s double tax treaties (DTTs). Alternatively, exemption of foreign income taxed abroad from taxation in Slovakia may apply.

The taxpayer may decide whether to include unrealised foreign exchange differences relating to unsettled payables and receivables in the tax base in the tax period when they are accounted for or in the tax period when they are realised. However, the decision to exclude these differences must be made in writing to the Tax Office before the start of the tax period. Any subsequent decision to revert back to including these differences must be made before the end of the tax period concerned.

**Reserve fund**

When a joint-stock company is incorporated, it must create a reserve fund of at least 10% of its share capital. The statutory reserve fund must be increased annually by an
Slovak Republic

amount set out in the company’s Articles of Association, but not less than 10% of its net profit, up to a total of 20% of the share capital.

A limited liability company must create a reserve fund following the first year in which it reports a profit, at the latest. The minimum contribution is then 5% of the net profit each year (or more if specified in the company’s Articles of Association) up to a total of at least 10% of the company’s share capital.

A branch of a foreign company is not required to set up a reserve fund.

A reserve fund may be used to cover prior year losses of the company, and, in certain other limited situations, but it is not distributable.

**Business combinations**

Two alternative tax treatments may be used for business combinations including in-kind contributions to a company’s share capital, mergers and demergers.

Under the first alternative, the taxpayer should value assets for tax purposes using their current market values, and the revaluation difference must be reflected in the appropriate company’s tax returns within seven years of the transaction. Under the second alternative, the taxpayer should continue to use the original tax book values of the assets, and revaluation difference is not taxable/tax deductible.

When selling a business as a going concern, the purchaser must include goodwill or negative goodwill, acquired as part of the purchase, in its tax base within seven tax periods.

**Deductions**

**Depreciation**

Tax depreciation is calculated on an asset-by-asset basis using a straight-line or reducing-balance method at statutory rates, and is generally available for expenditure incurred on tangible fixed assets. The tax depreciation of intangible fixed assets equals the accounting depreciation. Some types of assets are excluded from depreciation, such as land, artwork and national monuments. Tangible fixed assets are classified into tax depreciation groups to which different depreciation periods apply, as follows:

<table>
<thead>
<tr>
<th>Depreciation group</th>
<th>Depreciation (years)</th>
<th>Examples</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>4</td>
<td>Motor vehicles, office machines and computers, tools and implements</td>
</tr>
<tr>
<td>2</td>
<td>6</td>
<td>Engines, most production line equipment, furniture</td>
</tr>
<tr>
<td>3</td>
<td>12</td>
<td>Buildings made of metal, turbines, air-conditioning systems, ships</td>
</tr>
<tr>
<td>4</td>
<td>20</td>
<td>Buildings of a permanent nature</td>
</tr>
</tbody>
</table>

Taxpayers do not have to depreciate an asset every year. Tax depreciation may be interrupted in any year and continued in a later year without a loss of the total tax depreciation available.
A lessee can depreciate a tangible fixed asset held under a financial lease. For tax purposes, the depreciation period equals the leasing period, and the tax depreciation base equals the acquisition value of the leased asset without VAT and financing costs, plus expenses related to acquisition of the leased asset that the lessee incurred before the asset was put into use.

The value to be used as the basis for tax depreciation depends on how the asset is acquired and is usually based on one of the following:

- Acquisition costs (the price for which the asset was acquired); or
- The taxpayer’s own costs incurred, if the asset is acquired or produced internally.

**Losses**
A company or branch may carryforward and utilise a tax loss for a period of up to five years following the year in which the loss arose, and for up to seven years for tax losses reported after 31 December 2009. Each year’s tax loss should be considered separately, and can be utilised over its own five- or seven-year period.

Carryback of losses is not available in Slovakia.

**Bad debt provisions**
Provisions for unsecured receivables from loans created by banks, and bad debts of regular commercial companies, are fully tax-deductible (subject to certain conditions) once the debt has been overdue for more than 1,080 days (20% of the bad debt is tax-deductible when it has been overdue for more than 360 days, and 50% after 720 days). Tax deductions already taken for bad-debt provisions created before 1 January 2008 had to be adjusted to bring them in line with the above rules and included in the CIT base equally over 2008 and 2009 tax periods.

**Charitable contributions**
Charitable contributions are treated as gifts which are not tax-deductible.

**Non-deductible expenses**
Expenses are generally tax-deductible if incurred to generate, secure and maintain the entity’s taxable income. However, certain costs are specifically not tax-deductible. These include entertainment costs, penalties and fines, various provisions, and certain expenses in excess of statutory limits (e.g., employee travel expenses and meal allowances).

**Fines and penalties**
Contractual penalties and late payment interests are generally tax-deductible on a cash basis; however, other penalties are not tax-deductible.

**Goodwill**
Depreciation of goodwill is not tax-deductible, with the exception of goodwill that arose as of 2010 at the purchase of business as a going concern, or at the contribution of business as a going concern under fair value alternative.

**Start-up expenses**
Start-up expenses are tax-deductible in the period when incurred.
Slovak Republic

Pension expenses
Contributions to supplementary pension savings made by the Slovak employer on behalf of the employee, up to 6% of the gross salary of the employee participating in these plans, are tax-deductible.

Group taxation
There is no concept of group CIT in the Slovak Republic. Each company in a group is taxed individually.

Treatment of inter-company items
Dividends are not treated as taxable costs as they are paid out of the profit after tax.

Royalties, commissions and other payments paid to foreign related parties are tax-deductible provided they would be taxable if paid to a third party, and if the charges are in line with transfer pricing rules.

Related party transactions
Under the transfer pricing rules, prices in transactions between a Slovak company and its foreign-related parties should be at arm’s length, which means the prices should be at rates similar to those that would be charged between unrelated parties for the same or similar transactions under comparable conditions.

If transactions between the related parties are not made at arm's length, and this results in a reduction in the Slovak entity’s corporate tax base, then the tax authorities can adjust the corporate tax base to that which it would have been achieved if arm’s-length prices had been used.

Thin capitalisation rules
There are no thin capitalisation rules in Slovakia.

Tax incentives
There are several types of investment incentives potentially available, including corporate tax credits, discounts on the price of publicly owned real estate, and financial support for creating jobs or for training employees. All of these are treated as state aid.

Various conditions must be met in order for a company to qualify for state aid. These include a minimum amount of investment in fixed assets, the amount depends mainly on the type of project and where it is located.

Investment incentives
Investment incentives (including tax credits) are potentially available for projects in the following areas:

- Industry;
- Technology centres;
- Shared services centres; and
- Tourism.
The granting of a tax relief is subject to approval of the Slovak authorities. If certain conditions are met, a taxpayer may apply tax relief in the five subsequent years following tax period in which the relief was granted.

**Research and development (R&D) incentives**
R&D incentives currently available under Slovak law are as follows:

- Subsidies for research and development projects from the state budget; and
- Income tax relief – at the amount incurred for research and development.

Types of projects which can be granted investment incentives:

- Fundamental research projects;
- Experimental development projects;
- Applied research projects;
- Feasibility studies;
- Protection of intellectual and industrial property; and
- Staffing of research and development functions.

**Withholding taxes (WHT)**

The following payments are subject to withholding tax when made by Slovak companies to foreign parties. However, a DTT may reduce or eliminate the rate:

<table>
<thead>
<tr>
<th>Payment Description</th>
<th>Percentage</th>
</tr>
</thead>
<tbody>
<tr>
<td>Management fees for services provided in the Slovak Republic</td>
<td>19</td>
</tr>
<tr>
<td>Royalties*</td>
<td>19</td>
</tr>
<tr>
<td>Interest on loans and deposits**</td>
<td>19</td>
</tr>
</tbody>
</table>

* Royalties paid to related EU-resident companies are not subject to withholding tax if certain conditions are met.

** Interest paid to related EU-resident companies is not subject to withholding tax if certain conditions are met.

Dividends paid out of profits arising in 2004 and later years are not subject to Slovak withholding tax.

Withholding tax should be paid to the Tax Office no later than 15 days from the end of the calendar month following that in which the payment was made. The withholding obligation lies with the Slovak resident taxpayer. If the tax is not properly withheld, the unpaid tax becomes the Slovak tax resident’s tax liability, and a penalty may be assessed.

**Double tax treaties (DTT)**

### Notes

1. The lower rate applies to cultural royalties.
2. The lower rate applies to interest on loans and credits granted by a bank for at least 10 years in connection with the sale of industrial equipment; with the study, installation or furnishing of industrial or scientific units; or with public works.
3. The zero-rate applies to interest on loans and credits in connection with the sale of industrial, business or scientific equipment, or the sale of goods.
The zero-rate applies if the interest received is related to loans (monetary or non-monetary) provided to the government of the other contracting state corporation or any other institution with state shareholding or to loans provided to a bank institution under a governmental approval.

The zero-rate applies to copyrights.

The zero-rate applies to interest received by a resident of one state in respect of indebtedness of the other state government or political subdivision/local authority, or in respect of a loan made/guaranteed by the other state government in respect of imports/exports.

The zero-rate applies if the interest is received by the government or the central bank or other state institutions, or if the receivables on which the interest is paid are guaranteed/financed/indirectly financed by the government/governmental institutions (see treaty for exact wording).

The rate of 5% applies to royalties for the use or the right to use of patent, draft or model, plan, confidential formula or procedure, for information related to industrial or scientific experience and for the use or the right to use of an industrial, business or scientific device.

The rate of 10% applies to royalties for the use or the right to use of trademark or for information related to business experience. The rate of 15% applies to royalties, other than those stated above.

Slovakia is waiting for Egypt to announce its approval of DTT.

Slovakia is waiting for Libya to announce its approval of DTT.

**Tax administration**

The standard fiscal year is a calendar year, but a Slovak entity may opt to change this to a different 12-month period. A corporate tax return must be filed together with the entity’s financial statements within three months following the fiscal year-end. A three-month extension to the filing deadline may be used. Also, if part of the income to be reported in the tax return is from sources abroad, the taxpayer may extend the filing deadline by up to six months. To extend the filing deadline, the taxpayer has to notify the tax office before the normal filing deadline. After notification, the deadline is automatically extended.

The balance of tax due for a fiscal year is payable by the filing deadline.

Advance payments of corporate tax must be paid monthly or quarterly during the current tax period. Instalments are usually based on the last known tax liability of the entity. It is not necessary to pay tax advances if the last tax liability did not exceed EUR 1,659.70. After the tax return for the preceding tax period is filed, and the final tax liability is known, any outstanding tax is paid and a new schedule for paying advances for the current year is made.

**Statute of limitations**

A tax may not normally be assessed or additionally assessed more than five years (10 years when DTT treaty was applied, including transactions with foreign related parties) after the end of the year during which the obligation to file a tax return arose, or during which the taxpayer was obliged to pay the tax. If a tax inspection is undertaken within this five-year period, another five-year period commences from the end of the year in which the taxpayer was notified of this action.

If a tax payer utilises a tax loss reported as of 2010, a tax or additional tax cannot be assessed more than seven years after the end of the year in which the obligation to file a tax return in which a tax payer reported the tax loss arose.
However, tax may be assessed, or additionally assessed, no later than 10 years after the end of the year during which the obligation to file a tax return arose, or during which the taxpayer was obliged to pay the tax.

**Other issues**

**International Financial Reporting Standards (IFRS) adoption**
Slovakia has adopted most of the principles of IFRS in its accounting law. However, there are still some differences between IFRS and Slovak accounting standards.

**Obligation to prepare statutory financial statements according to IFRS**
Financial institutions (banks, insurance companies, etc.) must prepare their statutory financial statements according to IFRS. In addition, a company which fulfils two or more of the following conditions, in two consecutive accounting periods, must prepare its statutory financial statements according to IFRS:

- The total value of assets is more than EUR 165,969,594;
- Net turnover exceeds EUR 165,969,594; and/or
- The average number of employees in the individual accounting period exceeds 2,000.

If the Slovak taxpayer is obliged to prepare its financial statements under IFRS, the tax base is derived from either:

- The profit before tax under IFRS, adjusted for tax purposes using the “IFRS Tax Bridge” issued by the Slovak Ministry of Finance; or
- The profit before tax under Slovak statutory accounting standards.

**Transfer pricing documentation**
All Slovak taxpayers must keep sufficient transfer pricing documentation to justify prices charged by or to their foreign related parties. The Slovak Ministry of Finance has issued a guideline setting out detailed requirements for transfer pricing documentation (the Guideline) for entities which are obliged to prepare their financial statements under IFRS.

Slovak tax inspectors may require transfer pricing documentation during a tax inspection, and without such documentation transfer pricing adjustments (increased tax base) are much more likely to be imposed. In addition, entities reporting under IFRS may be specifically penalised for not keeping transfer pricing documentation or for non-compliance of their documentation within the Guideline requirements.
Corporate taxes in Slovenia

Significant developments

Tax relief for investments in the Pomurje region
In 2010 a new decree came into effect that enables entities based in the Pomurje region of Slovenia to benefit from additional employment incentives and additional tax relief for investments. These extra benefits are available for 2010 to 2015. As a result, provided certain conditions are met, entities with their seat in Pomurje are entitled to a 70% tax allowance for investments in equipment and intangible assets as well as to certain employment allowances.

Other changes to corporate tax
The Slovene Corporate Income Tax (CIT) Act, which became effective on 1 January 2007, was amended twice during 2009 introducing further changes.

The main purpose of the amendments was to harmonise the provisions in the CIT Act with the provisions in the European Union (EU) Treaty and European Economic Area (EEA) Agreements. The amendments provide tax relief on donations made both in cash and, in certain cases, contributions in-kind made for specific purposes, not only to residents of Slovenia and EU member states, but also to member states of the EEA.

There have also been changes to the CIT Act with respect to withholding tax and amendments that provide a general tax allowance for investments in equipment and intangible assets. The section on “Withholding taxes” includes the effects of these changes.

Taxes on corporate income

The corporate tax rate was reduced from a flat rate of 21% in 2009 to a flat rate of 20% for 2010 and thereafter.

A special tax regime is granted for certain economic zones where additional tax allowances for investment and employment may be available.

Taxpayers, such as non-profit or charitable organisations, associations, foundations, etc., are exempt from corporate taxation on their non-profit-making activities.

Investment funds as well as pension funds, pension insurance companies and venture capital companies may be taxed at a rate of 0% if certain conditions are met.

There are no state or local taxes on income.
**Corporate residence**

A legal entity is considered to be a Slovenian tax resident, provided that the entity:

- Has its statutory (registered) seat in Slovenia; or
- Has its place of effective management located in Slovenia.

The preceding conditions do not exclude a society or any association of persons, including an association under civil or foreign law that does not have legal identity, from also being considered to be a Slovene tax resident.

Slovenian tax residents are liable to pay tax on their worldwide income. Slovenian tax non-residents are taxed only on income from sources in Slovenia, including income earned through permanent establishments (PE) in Slovenia.

**Other taxes**

**Tonnage tax**
In July 2007, the Slovene Tonnage Tax Act came into force. The tonnage tax is an alternative to the CIT and applies as of 1 January 2008.

A company may request to be subject to tonnage tax instead of CIT if it meets certain conditions (i.e., it operates in maritime transport in international shipping) and notifies the tax authorities in advance.

**Value-added tax (VAT)**
A basic VAT rate of 20% applies to all taxable supplies.

A lower VAT rate of 8.5% generally applies to foodstuffs; live animals; seeds; plants; water supplies; medicines; medical equipment; transport of passengers; books; admission fees; royalties for writers and performers; certain works of art; certain residential properties; hotel accommodation; use of sport facilities; burial and cremation services; public hygiene services; minor repairs of bicycles; shoes and clothing; domestic care services; hairdressing services.

Exempt supplies without credit entitlement include financial and insurance/reinsurance services, rent and lease of immovable goods (with exceptions), tax and court stamps, lottery services, trade of land, health and social services, etc. There are also other VAT-exempt transactions without a credit entitlement as well as exempt taxable supplies with a credit entitlement.

VAT grouping is not possible within Slovenia.

**Excise tax**
Excise tax is charged on the release into free tax circulation or import of tobacco products, alcohol and alcohol drinks, fuel and mineral oils, and electricity.

**Real estate tax**
Real estate tax of 2% is charged on real estate transfers and leases, unless VAT has been charged on the transaction.
Slovenia

**Customs duties**
- Goods imported from non-EU countries are subject to import customs clearance.
- Goods exported from the EU customs territory have to be declared for export customs clearance.
- The person responsible for paying the customs debt is the declarant.
- The declarant is the person making the customs declaration in his own name, or the person in whose name the customs declaration is made.
- The customs declaration should be made in the prescribed form and manner (in writing or by another action specified by law).
- Import or export duties are customs duties and other charges payable on the import or export of goods (import VAT, excise duties, environmental tax and motor vehicle tax).

For purposes of communication with the customs offices, each person has to be identified by an EORI number (Economic Operator Registration and Identification Number), which is registered by the customs authorities on request. EORI registration is mandatory for customs clearance.

**Environmental tax**
Environmental tax is charged on carbon dioxide emissions, waste disposal, lubricating oils and fluids, and used motor vehicles.

**Motor vehicle tax**
Motor vehicle tax applies to all vehicles, which are registered for the first time in the territory of the Republic of Slovenia. The taxpayer is the entity that imports the vehicle from EU or non-EU countries. The tax rate depends on fuel range and emission of CO$_2$ and ranges from 0.5% to 31%.

**Insurance premium tax**
This tax is levied on insurance premiums and paid by insurance companies. The tax rate is 6.5%.

**Branch income**
If a branch meets the conditions, as set out in the tax legislation and relevant double-tax treaties, to be treated as a PE, then it will be liable to pay tax in Slovenia on profits that are attributable to the PE.

The profit that is attributed to a PE is determined broadly in line with Organisation for Economic Co-operation and Development (OECD) principles. Generally, the attributable profit is the profit that would be expected to be earned by the PE if it were an independent taxpayer performing the same or similar activities and/or business.

A branch whose activities do not create a PE is not subject to corporate tax in Slovenia.

**Income determination**

**General rules**
Taxable profits are assessed in accordance with Slovenian Accounting Standards 2006 or International Financial Reporting Standards (IFRS) and modified for certain revenues and certain expenses, which are partly or wholly tax non-deductible.
Generally, business expenses that are necessary to generate taxable revenues are tax-deductible.

**Dividend income received**

Dividends and similar income received by a Slovenian taxpayer are generally 95% exempt from taxation as long as the distributor was subject to Slovenian corporate tax or to a comparable profits tax. The exceptions to this are where dividends represent untaxed reserves of the distributor, or where the distributor is tax resident in a country that:

- Is outside the EU;
- Has a corporate tax rate less than 12.5%; and
- Is included in a list published by the Ministry of Finance.

**Capital gains exemption**

Under certain circumstances, the gains made by a Slovenian taxpayer on the disposal of an equity shareholding are 47.5% exempt from taxation. Similarly, 47.5% of a loss arising on the disposal of such a shareholding would not be deductible for corporate tax. The above treatment applies to the disposal of shareholdings of at least 8% that have been held for at least six months and where the taxpayer disposing of the holding employed at least one person during the six-month holding period.

The above treatment is not available for the disposal of a shareholding of a company which is resident in a country that:

- Is outside the EU;
- Has a corporate tax rate less than 12.5%; and
- Is included in a list published by the Ministry of Finance.

**Related party transactions**

Prices between a Slovenian entity and its related parties must be set, for tax purposes, at fair market value using the arm’s-length principle. Broadly speaking, taxpayers are related by direct or indirect or common shareholdings of over 25%; through a participation in management; or by control through other means including through contractual terms.

For transactions between two related Slovenian tax residents, provided neither is in an “advantaged” position, (advantaged usually means having unutilised tax losses), there is, no actual requirement for the companies to adjust their tax returns to reflect an arm’s-length price.

Taxable persons must prepare transfer pricing documentation. The Slovenian rules regarding such documentation follow the EU Code of Conduct on transfer pricing documentation for associated enterprises in the European Union (EU TPD).

**Deductions**

**Depreciation and amortisation**

There are eight tax depreciation groups, with maximum annual depreciation or amortisation rates for each. Any depreciation charges in excess of these rates are not tax-deductible in the period incurred, but may be deductible in subsequent tax periods, until the asset is fully depreciated or disposed of.
In general, if goodwill is impaired for accounting purposes, then the impairment cost may be treated as tax-deductible. The amount that may be treated as tax-deductible in any one tax period is limited to 20% of the initial value of the goodwill.

**Net operating losses**

Tax losses may be carried forward to reduce taxable profits indefinitely, but loss carrybacks are not permitted. Loss relief may not exceed the amount of current taxable income. Generally, losses that are generated in multiple tax years are absorbed chronologically. The right to carry losses forward may be forfeited if the ownership of the capital or voting power of the taxpayer claiming the loss carryforward changes by more than 50% within the tax period and the taxpayer either has not performed business activities for two years prior to the change of ownership or substantially changes its business activity two years prior to or after the change in ownership.

Treatment of tax losses mentioned in the preceding paragraph does not apply for those losses that are generated in the year of the change of ownership or prior tax periods.

**Business-related expenses**

In general, business expenses which are necessary to generate taxable revenues are fully tax-deductible. The following expenses are considered unnecessary for the generation of taxable revenues and are not deductible for tax purposes:

- Expenses which are not directly necessary for performing business activities or are not incurred as a consequence of a business activity;
- Expenses of a private character; and
- Expenses which do not correspond to standard business practice.

Salaries and other payments relating to employment (e.g., wage compensation, holiday allowances, employer’s social security contributions, long-service awards, severance benefits paid upon retirement, solidarity assistance and reimbursement of business related expenses) are generally fully tax-deductible.

The costs of benefits in kind are also tax-deductible if such benefits are taxed for the individual under the Personal Income Tax Act.

Some of the most common non-deductible expenses include:

- Penalties and the cost of bribes;
- Input VAT that could have been reclaimed in accordance with the VAT act;
- Donations, although a tax incentive may be available. Please see the Tax incentives section for more information;
- Entertainment costs, which are only 50% tax-deductible;
- Costs relating to the supervisory board, which are only 50% tax-deductible; and
- Legal and other costs of incorporation, which may be deductible for the parent company, but not for the entity being incorporated.

**Related-party interest**

Companies may deduct interest expense on loans from their owners or other associated parties up to a maximum of the amount calculated by using the prescribed interest rate published by the Ministry of Finance. Taxpayers must increase taxable profits by the amount of any excess interest expense, unless they can prove that they could have received the loan on comparable terms from an unrelated party.
**Thin capitalisation**
Interest payments on loans granted, or guaranteed, by a related party (a party which directly or indirectly owns at least 25% of the shares or voting rights in the taxpayer) are not tax-deductible to the extent that the loan amount exceeds the thin capitalisation threshold specified in law. This does not apply to loan recipients who are banks or insurance companies. Generally speaking the thin capitalisation threshold would be exceeded if the debt-to-equity ratio exceeds 6:1.

The debt-to-equity threshold ratio will decrease as follows:

- 6:1 for 2010;
- 5:1 for 2011; and
- 4:1 for 2012.

**Provisions**
Certain provisions are only 50% tax-deductible when accrued, with the remaining 50% being treated as tax-deductible when the provision is utilised. The provisions which are subject to this treatment are provisions for warranties granted when selling products or providing services, reorganisations/redundancies, anticipated losses from onerous contracts, pensions, long-service bonuses and severance payments on retirement.

**Bad debt provisions**
Bad debt provisions are only tax-deductible if the amount does not exceed the lower of:

- The arithmetic mean of the bad debts written-off in the past three tax periods, under certain conditions specified in the tax law; and
- The amount corresponding to 1% of taxable revenues of the tax period.

In order to take advantage of this deduction, a company must be able to calculate amounts for both tests and then take the lower of the two amounts so calculated. If the company is not able to determine the amount for either, the cost of the bad debt provision is not tax-deductible until the provision is utilised.

Costs of bad debts are tax-deductible when the debt is finally written-off, provided there is a finalised court procedure or the creditor can demonstrate that it would cost more to pursue the debtor than the debt is worth, or that it has done everything required by good business practice to try to recover the debt.

**Group taxation**
Group tax returns were abolished with the introduction of the CIT Act from 1 January 2007. However, special provisions allow a group of taxable persons to continue to file a group tax return, until the period for which approval was granted to file a group tax return expires, in accordance with CIT Act.

**Tax incentives**

**Investment allowances**
As of 1 January 2007, general investment allowances have been abolished; however, a tax allowance for investment in equipment and intangible assets is available for investments made after 1 January 2008. The tax allowance is limited to the lesser of 30% of the value of the assets acquired or EUR 30,000.
**Research and development (R&D) allowances**

A 20% investment allowance is granted for investments in R&D within the tax period. Such an investment tax allowance may be obtained for expenditure on:

- Internal R&D activities within the company; and
- The purchase of R&D equipment from related or unrelated parties or from a private research institution.

In addition, the following higher investment allowances can be available for companies that are established in certain regions in Slovenia, which have lower GDP rates than the state average:

- 30% investment allowance for investments in locations where the average regional GDP rate ranges between the state average and 15% lower than the state average; and
- 40% investment allowance for investments in locations where the average regional GDP rate is more than 15% below the state average.

**Allowances for employing certain individuals**

A taxpayer that employs trainees or students to undertake practical work may reduce its taxable profits by an additional 20% of the average monthly payment paid to such persons, for every month the person carries out the work.

A taxpayer that employs disabled persons may decrease its taxable profits by an additional 50% of the salary paid to such persons. A taxpayer that employs a disabled person or a person with a combination of total hearing loss and speech impairment may reduce its taxable base by an additional 70% of the salary paid to such person.

**Donations**

A taxpayer may claim a reduction of its taxable profits for donations made for humanitarian, disabled, charitable, scientific, educational, medical, sports, cultural, ecological and religious purposes to residents of Slovenia or of EU or EEA member states, up to 0.3% of the taxable person’s taxable revenues. An additional allowance of 0.2% of the taxpayers’ taxable revenues is available for payments made for cultural purposes and to voluntary organisations that work for the public interest to protect the public from natural and other disasters.

A taxpayer may decrease its taxable base for payments made to political parties and representative trade unions, up to an equal to three times the average monthly salary per employee of the taxpayer.

**Pension allowances**

Under certain conditions, a tax-deductible allowance for voluntary supplementary pension insurance may apply, of up to 24% of compulsory contributions for pension and disability insurance for insured employees, but may not exceed EUR 2,390 annually per employee.

**Withholding taxes (WHT)**

In Slovenia, tax must be calculated and withheld on the payments made by residents and non-residents on Slovenian-sourced income to recipients outside Slovenia.
Payments to which the withholding tax rules apply include payments for dividends, interest, copyrights, patents, licences, leases on real estate situated in Slovenia, services of performing artists and services charged from low-tax jurisdictions. As of 1 January 2007, a rate of 15% of withholding tax applies.

If a double-tax treaty exists, the withholding tax rate may be reduced in line with the provisions of the treaty. Similarly for payments of interest, royalties and dividends within Europe, the Interest and Royalties directive and the Parent Subsidiary directive, respectively, may also reduce this withholding tax rate to zero.

Furthermore, WHT is not deducted on dividends paid to a parent company in another EU Member State if those dividends are subject to an exemption from tax in the hands of the recipient, provided certain conditions are met.

</tbody>
</table>

* Under certain treaties, the withholding tax rate depends on whether, and to what extent, the recipient participates in the capital of the distributor. Generally, if the recipient holds a participation of more than 25% in the distributing company, the dividends are subject to a lower 5% withholding tax rate. The higher withholding tax rate is, however, normally due when the participation is less than 25%.

** Some double-tax treaties include specific provisions whereby interest payments are subject to a 0% withholding tax rate, if certain conditions are met.

** Tax administration **

The tax period should be the calendar year. However, a tax period may differ from the calendar year, but may not exceed a period of 12 months. In this case, the tax authorities must be informed about the chosen tax period, and the taxable entity will not be allowed to change its tax period for the following three years.

A tax return must be submitted to the tax authorities by the end of the third month following the end of the tax year.

Tax is paid in advance in monthly instalments (if the amount of prepayment exceeds EUR 400 per month) or in quarterly instalments (if the amount of prepayment is less than EUR 400 per month) determined on the basis of the previous year’s assessment.
Corporate taxes in South Africa

**Significant developments**

After the switch from the source-based taxation to the worldwide taxation of South African (SA) residents in 2000, and the introduction of capital gains tax in 2001, the SA tax system has not undergone fundamental changes. Smaller reforms, however, are ongoing. In 2008, the most significant changes introduced by the government included: a reduction of the corporate tax rate from 29% to 28%, the introduction of industrial tax incentives, the introduction of an electricity levy coupled with incentives for renewable-source energy, and the introduction of a special tax package in terms of which very small businesses may elect to pay a presumptive, turnover-based tax instead of normal income tax.

In the 2009 Budget, there were several more announcements. These included the implementation of the electricity levy announced in the 2008 budget, reduction of the current *ad valorem* excise duty rate on the sale of new motor vehicles and an introduction of an additional excise duty component to take into account carbon dioxide emissions. From an administrative perspective, the 2009 Budget included a provision that the lodging (filing) of an objection will no longer suspend payment of the taxes due and a final set of amendments to support the dividends tax reform.

**Secondary tax on companies reform**

The Secondary Tax on Companies (STC) is a tax borne by the company on any dividends declared and paid to shareholders. A reform of STC that was launched in 2007 will likely culminate in the latter part of 2010 with the introduction of a withholding tax on dividends. This tax will replace the current STC in an attempt to align the SA system of taxing the corporate profits with the worldwide practice.

**Administrative developments**

In 2009, administrative developments include employer reconciliations of employee’s tax (withheld by the employer on the employee’s remuneration) to be submitted more than once per year and employer reconciliations to extend to the Skills Development Levy (SDL) and Unemployment Insurance Fund contributions (UIF). Furthermore, 2008 and later income tax returns for companies and trusts can be filed via the South African Revenue Service (SARS) e-filing on the internet. Previously, e-filing with SARS was possible only for individual income tax returns.
Taxes on corporate income

Normal tax
In South Africa, the tax rate applicable for corporate income of companies for tax years ending between 1 April 2008 and 31 March 2010 is a flat 28%. In the three previous years the tax rate was 29%.

Close corporations, which are essentially a simplified form of company, are taxed at the same rate as companies and are subject to the same taxation rules.

An employment company, (i.e., a company that provides certain services that are performed by persons who have an interest in the company) is taxed at 33% of its taxable income. Similarly, a branch of a company with its effective place of management outside SA (i.e., a non-resident company) is taxed at 33%.

Small business corporations (i.e., a company with only natural persons as members/owners and with gross income of not more than ZAR 14 million) are taxed at 0% on the first ZAR 54,200 of taxable income earned, 10% on the amount above ZAR 54,200, but not exceeding ZAR 300,000, and 28% on the amount exceeding ZAR 300,000.

To reduce the compliance costs for very small companies, a turnover-based presumptive tax is effective after 1 March 2009. Companies with a turnover of less than ZAR 1 million per year can elect to pay this tax instead of normal corporate income tax, at a rate ranging from 0 to 7.5%, depending on the turnover.

Special rates apply in certain industries, such as insurance and mining.

Secondary tax on companies (STC)
STC is levied at a rate of 10% (12.5% for dividends distributed before 1 October 2007) on the net dividends declared by SA resident companies. The net dividend amount is calculated by deducting dividends accrued from dividends declared during the dividend cycle. The company declaring the dividend, not the recipient, is liable for payment of the tax. Branches of foreign companies are exempt from STC but subject to a higher statutory income tax rate.

STC is in the process of being replaced with a withholding tax on dividends, which will be charged at the rate of 10%. In the case of foreign shareholders, the rate may be reduced by an applicable double taxation agreement. It is anticipated that the switch from STC to a withholding tax will become effective in the latter part of 2010. As part of the change, all dividend credits (i.e., dividends accrued to the company that currently can be set-off against dividends declared) will expire.

Capital gains tax
Although the capital gains tax forms part of income tax, the two taxes are not fully integrated. Gains realised by companies are taxed at the normal corporate income tax rate. However, only 50% of gains are included in the taxable income, bringing the effective rate for gains down to 14% (starting from the 2008/9 tax year).

Mining companies
There are two formulae: one for gold-mining companies that have elected to be exempt from secondary tax on companies (STC) and the other for such companies that are subject to STC. The formula for gold-mining companies subject to STC will, from the
12-month period ending 31 March 2010, be \( Y = 34 - 170/x \), and for those exempt from STC, \( Y = 43 - 215/x \). For these formulae, the following applies.

\[
\begin{align*}
x &= \text{the ratio, expressed as a percentage, is calculated as follows:} \\
&\quad \text{Taxable income from gold mining} \\
&\quad \text{Total revenue (turnover) from gold mining} \\
&\quad \text{and} \\
\end{align*}
\]

\( y = \text{calculated percentage which represents the rate of tax to be levied} \)

The maximum tax rate, which applies only to companies income from specified oil and gas activities is capped at 28% as from the 2008/9 tax year and the companies are entitled to enter into so-called fiscal stabilisation agreements with the SA government to “lock in” this rate. The agreement will not prevent the company from benefiting from any possible rate reduction in the future.

The rate of STC for the companies engaged in SA oil and gas activities is 5%. Where, however, a company was engaged in oil and gas activities under the so-called OP 26 right (a right to mine oil and gas), it is completely exempt from STC. The normal STC rate of 10% will apply, if the company is engaged in refining.

The branches of foreign companies engaged in SA oil and gas activities are taxed at a maximum rate of 31%.

**Long-term insurance companies**

Life insurance companies are obliged to follow the “four-fund approach”, with policies divided into four funds, depending on the nature of the beneficiary. Each fund is then allocated assets according to the risk carried by the fund. Funds are treated as separate taxpayers and taxed at four separate rates. These rates are 30% for individual policyholder funds, 0% for untaxed policyholder funds, 28% for company policyholder funds, and 28% for corporate funds.

**Corporate residence**

A SA resident company is subject to tax on its worldwide income, irrespective of source. Non-residents are taxable on SA actual or deemed source income.

A company is resident in SA, if it is incorporated, established or formed in SA, or has its place of effective management in SA. However, a company that is deemed to be exclusively resident in another country by the terms of a double taxation agreement is excluded from SA residency.

The place of effective management is, in terms of the Interpretation Note issued by the SARS, interpreted as the place where the operational management of the company is carried out. Where a double taxation agreement entered into by SA and a foreign country presumes a different interpretation, such as a place of directors’ meeting, it is believed that SA will have to adopt such different interpretation. However, such approach has not yet been tested by the courts.
Royalties and know-how payments made to non-residents for the use of or right to use intellectual property rights in SA are deemed to be from an SA source. The payer of the royalty or know-how payment is obliged to deduct a withholding tax of 12% of this payment, which is a final tax payable by the recipient of such income. The 12% withholding tax may be reduced by the terms of the relevant tax treaty.

If one or more residents together hold more than 50% of the voting or participation rights in a foreign company then it is a “controlled foreign company” (CFC) in relation to those residents. The income of a CFC is imputed to the controlling holders in proportion to their holdings, subject to certain exclusions and tax credits where applicable.

Foreign dividends are, in principle, taxed in SA, except for the exemptions applicable to “qualifying” dividends. A qualifying foreign dividend requires a holding by the recipient of at least 20% of the total equity share capital and voting rights in the company declaring the dividend.

**Other taxes**

**Value-added tax (VAT)**

VAT is an indirect tax, which is largely directed at the domestic consumption of goods and services and at goods imported into SA. The tax is designed to be paid mainly by the ultimate consumer or purchaser in SA. It is levied at two rates, namely a standard rate (currently 14%) and a zero rate (0%).

All suppliers of goods and services having an annual turnover currently exceeding ZAR 1,000,000 are obliged to register as VAT vendors and to charge output VAT. Other vendors may elect to register as VAT vendors provided their annual turnover exceeds ZAR 50,000. If they do not register, they are prohibited from charging VAT on goods or services they supply and claiming an input tax (rebate of VAT paid) on goods and services which they acquire.

Supplies which are charged with tax at a zero rate are primarily supplies of goods or services which are exported from SA. Standard rated and zero rated supplies are known as taxable supplies. Other supplies are known as exempt and non-supplies. Very few business transactions carried out in SA are not subject to VAT. The tax is collected by businesses which are registered as vendors with SARS on all taxable supplies throughout the production and distribution chain. Sales or supplies by non-vendors are not subject to VAT. Under the VAT system, vendors normally pay VAT on expenses (input tax) and charge VAT on supplies made (output tax). This mechanism, therefore, ensures that only the so-called ‘added-value’ is taxed. Due to VAT being a self-assessment system, the output tax collected may be reduced by input tax paid. Thereafter, the net amount is payable to, or refundable by, the SARS. The self-assessment returns are due regularly within prescribed periods (tax periods).

An invoice-based VAT system has been in force since 30 September 1991. The VAT system is similar to those used in Western Europe and New Zealand.

**Vendor:** A vendor is a person who is registered or is required to be registered as a vendor. There are two criteria for registration: the carrying on of an enterprise and the value of taxable supplies. A person who does not carry on an enterprise cannot register as a vendor. An enterprise is any enterprise or activity carried on continuously.
or regularly within or partly within SA in the course of which goods or services are supplied for a consideration, whether or not for a profit. Included are certain activities of public authorities, local authorities, welfare organisations and share block companies. Specifically excluded are the activities of a permanent, independent branch located outside SA, services rendered by an employee to his employer and activities involving the making of exempt supplies.

If a person (company, individual, trust, or partnership) carries on an enterprise and has a taxable supplies turnover for a past or future 12-month period in excess of ZAR 1,000,000, it must register as a vendor. Taxable supplies include supplies at the standard rate or the zero rate but exclude (for registration purposes) exempt supplies and certain abnormal turnover (e.g., that are attributable to the cessation of an enterprise).

If the value of taxable supplies of a person carrying on an enterprise is less than this amount, the person may voluntarily register as a vendor in certain circumstances.

Once registered, vendors pay VAT on taxable supplies made to them for the purpose of their enterprise and charge VAT on the taxable supplies made by them in the course or furtherance of their enterprise. If the VAT the vendor pays exceeds the VAT the vendor charges in a tax period, the vendor obtains a refund of the excess from the Receiver of Revenue. If the VAT charged exceeds the VAT paid by a vendor in a tax period, the vendor pays the excess to the receiver. Depending on the value of taxable supplies and the vendor’s choice, a vendor will have a one, two, or four (calendar) month tax period. Farmers may (subject to certain turnover requirements) elect to have a six calendar month tax period. For each tax period a vendor must submit a VAT return together with the payment of any VAT liability. The return also activates a refund of VAT in appropriate cases.

Goods and services: For a liability for VAT to exist, there must be a supply or importation of goods or services. Goods are corporeal movable things, fixed property and real rights in such things and property. The meaning of “services” is very broad and includes the granting, assignment, cession, or surrender of any right or the making available of any facility or advantage.

Imports: Services imported by a vendor and utilised or consumed by the vendor for the making of taxable supplies are not subject to VAT. In addition, the VAT Act has a schedule that lists goods that are exempt from VAT on importation, whether by a vendor or an unregistered person.

Zero-rated supplies: The VAT Act contains a list of the supplies of goods or services that are taxed at the zero rate. Most of the items refer to exports and international transport, but other specified goods utilised for farming purposes, the sale of an enterprise as a going concern, fuel subject to the fuel levy and deemed supplies by welfare organisations are also zero-rated.

A zero-rated supply made by a vendor is subject to VAT but at a rate of 0%. Under a zero-rated supply a vendor does not charge VAT on the consideration for the supply and obtains a refund or credit for the VAT paid on taxable supplies utilised in the making of the zero-rated supplies.
**South Africa**

*Exempt supplies*: In addition to zero-rated supplies, the VAT Act contains a list of the supplies of goods or services that are exempt from VAT. From 1 October 1996 all fee-based financial services are subject to VAT. The charging of interest remains exempt. Other exempt supplies include residential rentals, basic foodstuffs, non-international passenger transport by road or rail and educational services. Under exempt supplies by vendors, the vendors do not charge VAT on the supply, and they are not entitled to a deduction or credit for the VAT paid by them on goods and services supplied to them for the making of the exempt supply. Accordingly, vendors treat the VAT paid by them, and for which they do not obtain a deduction or credit, as another cost and recover it in the consideration they charge for the making of the exempt supply.

**Skills development levy (SDL)**
The Skills Development Levy (SDL) is a compulsory levy to fund the education and training as envisaged by the Skills Development Act. The levy is payable by an employer and cannot be deducted from the remuneration payable to an employee. Small employers with an annual payroll of less than ZAR 500,000 are exempt from the levy. SDL is levied at the rate of 1% of payroll. It is payable monthly, together with income tax that the employer has withheld on its employees' salaries.

**Unemployment insurance fund (UIF) contributions**
Employers are required to contribute on behalf of their employees on a personalised basis to the UIF. The rate of contributions is 1% of gross remuneration payable to an employee, however, the monthly cap of ZAR 124.78 applies. Another 1%, subject to the same cap, is payable by the employee and withheld by the employer.

**Compensation for occupational injuries and diseases (COIDA) fund**
Employers are liable for making annual contributions to the COIDA Fund. COIDA contributions are a payroll cost that cannot be deducted from the employee's salary. The rates vary depending on the employer's industry, for example, a rate of 1.62% is applied to the salaries of employees involved in the manufacture of pottery up to a maximum salary band of ZAR 214,305 per annum.

**Donations tax**
Donations tax is payable by the resident companies at a flat rate of 20% on the donations made. An annual exemption of ZAR 10,000 is available.

Public companies, comprising mostly listed companies, are exempt from donations tax. Also, an exemption is available for donations made to certain charities and other non-profit organisations. Disposal of assets below their market value is a donation and, at least theoretically, subject to donations tax.

**Securities transfer tax (STT)**
Stamp duty and uncertified securities tax has been abolished and replaced by securities transfer tax (STT). STT came into effect on 1 July 2008 and applies to the transfer of listed and unlisted securities on or after 1 July 2008. The tax rate is 0.25%, which is applied to the taxable amount in respect of the transfer of a security. The taxable amount is usually the consideration for which the security is purchased or the market value of the security, if the consideration declared is less than the market value or if no consideration was paid. STT will be payable by the company that has issued the shares in question. However, the company can recover the tax from the person acquiring the shares.
Transfer duty
A transfer duty is levied on the sale or transfer of immovable property. The rate applicable to companies is 8%, calculated on the higher of purchase price or market value. Transfers of immovable property subject to VAT are exempt from transfer duty.

Customs duties
Customs duties are charged on importation of goods into SA. The import duties may include anti-dumping and countervailing duties. No customs duties are charged on trade between SA and Botswana, Lesotho, Namibia and Swaziland, as these five countries constitute a Southern African Customs Union.

Excise duties
Excise duty is levied on certain locally manufactured goods as well as their imported equivalents. A specific duty at a pre-determined amount is levied on tobacco and liquor, and an ad valorem duty (calculated as a percentage of price) on cosmetics, televisions, audio equipment, and automobiles. Relief from excise duty is available for exported products and for certain products produced in the course of specified farming, forestry and (limited) manufacturing activities.

Fuel levy
A fuel levy is charged on petroleum fuel sold. From 1 April 2009, the levy is 150 cents per litre of petrol and 135 cents per litre of diesel.

Electricity levy
Due to the inability of the national electricity provider, Eskom, to meet the growing demand for electricity, SA has experienced what may be called an energy crisis. To support energy efficiency, the government has implemented a 2 cents/kWh levy on electricity generated from non-renewable sources. The levy is collected at the source by the electricity producer. The levy is effective from 1 July 2009.

Air passenger tax
Passengers departing on international flights pay air passenger tax at the rate of ZAR 80 on flights to Botswana, Lesotho, Namibia and Swaziland, and ZAR 150 on other flights. The tax is added to the price of the ticket.

Branch income
SA branches of foreign companies are not considered to be separate legal entities for tax purposes and no tax is withheld on transfers of profits to the head office. Branches of foreign companies are taxed at a rate of 33% for tax years ending on or after 1 April 2008. For the three previous tax years, the companies are taxed at the rate of 34% and are exempt from STC.

However, a branch must register as a taxpayer and submit tax returns. Separate financial statements must be drawn up for the SA trading operations. For all practical purposes, the SARS will treat the branch as a separate entity. For example, inter-branch cost recoveries levied by the head office incurred in the production of SA income normally will be allowed as a deduction by the branch.

In terms of double taxation agreements, the taxation of branches is limited to cases where the branch constitutes a permanent establishment.
South Africa

**Income determination**

**Inventory valuation**

Inventories generally are stated at the lower of cost or net realisable value. Write-downs of inventory for slow-moving and obsolete items must be justified, and a general policy on a percentage basis is not permitted. LIFO (last-in, first-out) is not accepted for tax purposes.

**Capital gains**

A total of 50% of net capital gains realised on the disposal of capital assets is included in taxable income from 1 October 2001 for companies and trusts other than special trusts. Special trusts and life assurance individual policyholder funds will include 25% of the realised net capital gains in taxable income. Currently, capital gains tax does not apply to retirement funds.

**Inter-company dividends**

Dividends, other than foreign dividends, are not subject to tax in the hands of companies, but the company declaring the dividend is liable for STC. Qualifying foreign dividends are also not subject to tax where they are received by resident shareholders holding in excess of 20% of the equity share capital and voting rights of the company declaring the dividend. Dividends received by residents holding less than 20% of such capital will be taxable in SA subject to a tax credit for foreign withholding taxes payable by the recipient shareholder.

**Foreign income**

Foreign income received by a SA resident company is subject to tax in SA. Double taxation may be avoided under certain double taxation agreements or by way of unilateral credit for foreign tax payable on foreign income.

Section 6quat of the South African Income Tax Act makes provision for a rebate against normal SA tax in respect of foreign taxes paid on foreign sourced income or a deduction against income of foreign taxes paid on SA sourced income. In both instances the taxpayer must be a SA resident, the income must be included in their taxable income and is not exempt and that income was subject to a foreign which is not recoverable. The rebate is limited to the total normal tax payable calculated by applying the ratio of the total taxable income attributable to the foreign tax to the total taxable income. The deduction, however, may not exceed the income on which the foreign tax was levied.

**Stock dividends**

Stock dividends (capitalisation issues of shares) are not subject to tax or STC, until the stock is realised.

**Other significant items**

**Transfer pricing:** Transfer pricing legislation has been in SA law since 1995, however it has only been in recent years that SARS has focussed on this area of taxation. The rules require those liable to tax in SA to follow arm's-length principles in their dealings with inter alia connected persons that are not tax residents of SA.

Section 31 of the South African Income Tax Act of 1962 combines transfer pricing and thin capitalisation (explained below) measures. Section 31(2) provides the commissioner the power to adjust the consideration of a transaction to an arm's-length price for the purposes of computing the South African taxable income of a taxpayer.
This rule applies to both goods and services as well as to direct and indirect financial assistance.

Section 31 is a discretionary section which means that whilst the taxpayer can place some comfort on the fact that the commissioner must have applied due care and reasonableness in raising a transfer pricing adjustment, the onus of proof for rebutting such adjustments rests squarely with the taxpayer.

**Thin capitalisation rules**: The thin capitalisation rules may be applied by SARS where financial assistance, such as a loan, advance or debt, or the provision of any security, is granted by a non-resident investor to a resident investee who is either a connected person, or a corporate entity in which the investor has a direct or indirect interest entitling it to participate in not less than 25% of the dividends, profits, capital or votes.

The thin capitalisation rules, when applied, disallow the deductibility of interest paid by the SA resident to the foreign lender, to the extent that such interest is considered to be excessive by the SARS. The excessive interest is determined in terms of the formula:

\[
A = B \times \frac{[(C-D)/C]}{C}
\]

Where:

- \(A\) = Disallowable interest, limited to interest incurred in respect of financial assistance granted on or after 19 July 1995
- \(B\) = Total interest incurred during the year in respect of all financial assistance in existence during the year
- \(C\) = The weighted average of all interest-bearing financial assistance in existence during the year
- \(D\) = The greater of: three times the fixed capital of the SA company; or the weighted average of all interest-bearing financial assistance granted prior to 19 July 1995 which existed during the year.

In broad terms, the rules will not be applied if the debt-to-equity ratio falls within a safe haven ratio of 3:1. In other words, where the financial assistance granted by the non-resident investor does not exceed three times the fixed capital (being essentially share capital, share premium and accumulated profits) of the resident investee and the interest rate does not exceed the weighted average of prime plus 2% for SA Rand denominated loans, or the relevant weighted average interbank rate plus 2% for loans denominated in other currencies.

These rules do not apply to financial assistance granted by a “parent” company to its branch operating as an external company in SA.

**Deductions**

**Depreciation and depletion**
A depreciation (wear and tear) allowance may be deducted on movable assets used for the purpose of trade. There are no statutory provisions relating to rates of wear and tear, but SARS has published a table of periods over which the assets may be written
off, in the absence of evidence to support a different write off period. The rates of wear and tear, based on the cash cost, are calculated either according to the straight-line or diminishing balance method (see Capital investment in the Tax incentives section).

New and unused machinery used in the process of manufacture or in a similar process is depreciable at the rate of 40% in the first year of use and 20% in the three following years. If the machinery is not new and unused, an allowance of 20% per year over five years is available.

An accelerated depreciation schedule (50% in the first year of use, 30% in the second and 20% in the third year) applies to the machinery and articles used in farming, production of biodiesel or bio-ethanol and production of energy from renewable sources.

Buildings and other permanent structures may not be depreciated, apart from an annual allowance for each of the following:

1. Buildings used in a process of manufacture or a process similar to a process of manufacture – For buildings erected before 1 January 1989 a 2% per year rate applies. For buildings erected after 1 January 1989, a 5% rate applies. However, buildings erected between 1 July 1996 and 30 September 1999 are subject to an accelerated depreciation rate of 10% per year;
2. Hotel buildings – For hotel buildings erected from 4 June 1988 a 5% rate applies. For buildings built prior to 4 June 1988 the rate of 2% applies. Improvements within the existing building framework that commenced on or after 17 March 1993 are depreciated at the rate of 20%;
3. Agricultural cooperative storage buildings – Buildings erected on or after 1 January 1989 are subject to a 5% rate. Buildings built prior to 1 January 1989 are subject to a 2% rate;
4. Housing projects of not less than five units – Housing projects of not less than five units of residential accommodation, which consist of more than one room and the erection of which commenced on or after 1 April 1982 and before 21 October 2008, are subject to a 2% rate of depreciation. After 21 October 2008, a new allowance of 5% is available on this type of property. The 5% depreciation rate is available to the taxpayer provided that the unit is used by the taxpayer solely for trade purposes, the unit is situated in SA and the taxpayer owns at least five units in SA used for the purposes of trade. An additional allowance will be available for a low-cost residential unit. Additionally, from 21 October 2008, taxpayers also are granted relief for the transfer of ownership on a contract for deed basis of employer provided low cost residential units to employees;
5. Buildings in urban development zones – More discussion can be found in “Capital investment in the tax incentives section;
6. Specific allowances are also provided for pipelines, transmission lines, railway lines, airport property, ships, mining operations, and other qualifying industrial assets;
7. Buildings used and specifically equipped for certain research and development activities can be depreciated 50% in the first year of use, 30% in the second and 20% in the third year; and
8. Commercial buildings – The cost to the taxpayer of any new and unused building owned by the taxpayer, or any new and unused improvement to any building owned by the taxpayer, if that building or improvement wholly or mainly is used by the taxpayer for trade purposes, other than the provision of residential
accommodation is subject to a 5% rate of depreciation. This allowance is applicable to any building or improvement contracted for on or after 1 April 2007 and the construction of which commenced on or after 1 April 2007.

An allowance for assets disposed of or scrapped during a year of assessment is determined by reference to the cost less allowances already granted and the proceeds on disposal (if any). Recoupments of allowances granted are taxable where disposal proceeds exceed the tax basis at the time of sale. Such recoupments cannot exceed the cost of the asset. Proceeds above cost will be taxed as a capital gain.

Book depreciation does not need to be consistent with tax depreciation.

No cost or percentage depletion is available for natural resources.

**Net operating losses**
Losses may be carried forward indefinitely, provided an active trade or business of a similar nature is carried on without interruption. There is no loss carryback in SA.

**Payments to foreign affiliates**
Deductions may be claimed for royalties, managerial service fees and interest charges paid to foreign affiliates, provided such amounts approximate those that would be paid to an unrelated entity in an arm’s-length transaction.

Interest deductions may be limited where the paying company is thinly capitalised (refer to the Thin capitalisation rules).

Specific provisions apply for “bullet interest” (bullet interest is a once off upfront lump sum payment of interest). Any interest expenditure must be spread over the life of the interest-bearing arrangement on the compounding accrual basis.

**Taxes**
Payroll taxes are deductible from taxable income for the corporation.

**Research and development (R&D)**
To encourage innovation, the current costs related to certain R&D activities carried on in SA are 150% deductible. The cost of machinery and other capital assets acquired for the purposes of research and development may be depreciated 50% in the first year of use, 30% in the second and 20% in the third year.

**Inventory**
The cost of inventory is, in principle, deductible as soon as the inventory is acquired. However, at the end of each year the cost of the inventory still on hand has to be added to the company’s income. Then in the next year, it can be deducted again. This has the effect of timing the deduction of the cost of inventory to match the time of its realisation.

**Assets acquired for shares issued**
When current assets are acquired by a company in return for the shares or debt instruments issued to the seller, the purchaser of the assets may deduct the lesser of the market value of the assets immediately after acquisition or the market value of the shares immediately after acquisition.
**South Africa**

**Group taxation**

Group taxation generally is not permitted in SA. However, relief is given for transactions between group companies to allow for reorganisations, provided certain requirements are met.

In general, the relief will only apply to transactions between companies within the same group. A group of companies is defined as a controlling company and one or more controlled companies in relation to that controlling company. A controlling company means a company holding directly or indirectly at least 70% of the equity of any other company. After 1 October 2007, non-resident companies cannot form part of a group of companies.

Corporate rollover relief is available for company formation, asset-for-share transaction, amalgamation transaction, intra-group transaction, unbundling transaction, and a transaction relating to liquidation, winding-up and deregistration.

The relief may cover the capital gains tax arising from the disposal of capital assets, income tax arising from the disposal of a depreciable asset, income tax arising from the disposal of trading stock, donations tax arising from the disposal of an asset, STC and transaction taxes.

**Tax incentives**

**Inward investment**

Cash grants, received within the terms of a Government Incentive Scheme (see Other incentives) by taxpayers with manufacturing operations or similar processes are exempt from income tax on such grants.

**Capital investment**

The available capital incentives are as follows:

1. For assets brought into use after 15 December 1989, a 20% annual rate of depreciation applies to plant and machinery used in a process of manufacture or in a similar process or to machinery and equipment used in the hotel trade. An accelerated rate of 33⅓% per year is applicable for new and unused plant and machinery acquired and placed in service in a manufacturing process under an agreement executed during the period commencing on 1 July 1996 and ending on 30 September 1999. Plant and machinery brought into use on or after 1 March 2002 that was acquired in terms of an agreement concluded after 1 March 2002, will qualify for a 40% allowance in the first year and a 20% allowance in the following three years. Machinery and equipment used for farming are depreciated at the rate of 50% in the first year, 30% in the next year and 20% in the final year;
2. Residential buildings, initial allowance – If construction commenced prior to 21 October 2008, housing projects of not less than five units may qualify for an initial depreciation allowance of 10% of the cost in the year in which they are completed and rented for the first time; and
3. Buildings in urban development zones – Improvements to an existing building in an urban development zone, here the existing structural or exterior framework is preserved and brought into before 31 March 2014, qualify for an accelerated allowance of 20% per year. Buildings that are erected, extended or added to in an urban development zone on or after 21 October 2008 and which are not covered
by the first mentioned allowance qualify for a 20% allowance in the first year and a 8% allowance in the following 10 years. From 21 October 2008, new and unused low-income residential units located in urban development zone demarcations will be subject to an additional annual depreciation allowance. The rate will be 25% in the first year, 13% in the succeeding five years and 10% in the year following the last year. Improvements will be subject to a depreciation allowance of 25% over a period of four years.

**Other incentives**

Taxpayers may also obtain the following incentives:

1. The Critical Infrastructure Fund is a cash grant for projects that are designed to improve critical infrastructure in SA. The incentive covers up to 30% of the development costs in qualifying infrastructure;
2. The Foreign Investment Grant is available to registered, incorporated foreign investors in new manufacturing businesses in SA. It covers up to 15% of the costs to a limit of ZAR 3 million of moving new machinery and equipment from abroad to a manufacturing location in SA;
3. The Skills Support Programme is a cash grant for skills development with the objective of encouraging greater investment in training and creating opportunities for the introduction of new advanced skills;
4. Industrial policy projects – In 2008, a ZAR 2 billion incentive package for investors in energy efficient projects over three years was announced. The incentive is available for industrial projects participating in the manufacturing sector (other than alcohol or alcohol related products, tobacco or tobacco related products, arms and ammunition and bio-fuels, which have a negative impact on food security). Companies are divided into those with a qualifying status and those with a preferred status. The status is determined in terms of a point system. The proposed project must either be a “brownfield project” (expansion or upgrade of an existing industrial project) or a “greenfield project” (a wholly new industrial project, which uses new and unused manufacturing assets). Approved projects may be granted a tax allowance known as an additional investment allowance equal to: 55% of the cost of any manufacturing asset used in an industrial policy project with preferred status; or 35% of the cost of any manufacturing asset used in any other approved industrial policy project. However, the additional investment allowance may not exceed ZAR 900 million in the case of any greenfield project with a preferred status, or ZAR 550 million in the case of any other greenfield project; or ZAR 550 million in the case of any brownfield project with a preferred status, or ZAR 350 million in the case of any other brownfield project. In addition to the above, a company may also claim a deduction known as an additional training allowance; and
5. Venture capital companies – In order to assist small- and medium-sized businesses to raise capital to finance businesses, a tax incentive for investors in small- and medium-sized enterprises through venture capital companies has been introduced. This incentive became effective on 1 July 2009 and will last for 12 years. A deduction will be allowed from the income of an individual, a listed company (or a controlled group company in relation to a listed company) in respect of expenditure actually incurred by that person with respect of shares issued to that person by a venture capital company. A company may deduct its entire expenditure in respect of shares, provided that the shares held by that company and other companies within the same group do not constitute more than 10% of
the equity shares of the venture capital company. The deduction available to an individual is capped at ZAR 750,000. A venture capital company is essentially a holding company deriving its income from equity investments in small and medium companies that, in turn, derive their income from active trade within SA. A venture capital company has to be specifically approved by SARS.

Incentives are also available for industrial export.

**Withholding taxes (WHT)**

**Resident corporations**
No withholding taxes, other than payroll taxes, are levied against payments to resident corporations.

**Royalties payable to non-residents**
The accruals and receipts by non-residents of South-African sourced royalties are subject to withholding taxes, as follows:

**Notes**

1. Recipient is the beneficial owner of the royalty.
2. Royalty is subject to tax in recipient country.
3. 15% is levied on royalties for cinematographic or television films.
4. The maximum rate for copyright royalties, royalties for use of computer software and patents concerning industrial, commercial and scientific experience is 6% of the royalties paid, otherwise 10%.
5. Maximum rate of 10% of the adjusted amount (being 70% of the gross royalties) for use of industrial, commercial or scientific equipment.
6. The 5% rate applies to royalties for the use of a copyright. A 7% rate applies to royalties for the use of patents, trademarks, designs, models, etc.
7. In respect of right to use industrial, commercial or scientific equipment and transport vehicles a 10% rate applies.
8. Maximum rate of 15% on royalties arising from the use of, or the right to use trademarks.
As of 6 March 2010 the following information holds:

- The treaty with the United Kingdom extends to Grenada and the Seychelles;
- Comprehensive agreements have been ratified by SA with the Democratic Republic of Congo, Gabon, Rwanda and Sudan;
- Comprehensive agreements have been signed but not ratified with Germany and Mexico;
- Comprehensive agreements or amendments to current agreements have been negotiated or renegotiated but not signed with Bangladesh, Chile, Cuba, Cyprus, Estonia, Ireland, Kenya, Kuwait, Lesotho, Latvia, Lithuania, Madagascar, Malawi, Malta, Morocco, Namibia, Oman, Qatar, Serbia, Seychelles, Singapore, Sri Lanka, Sweden, Syria, United Arab Emirates, United Kingdom, Zambia, Zimbabwe and Vietnam; and
- There is a limited sea and air transport agreement with Brazil.

**Non-resident entertainers and sportspersons**

A withholding tax at the rate of 15% applies to all payments made to non-resident entertainers and sports persons in respect of their activities exercised in SA. This tax applies in respect of all activities exercised on or after 28 July 2006.

**Tax administration**

**Returns**

The corporate fiscal year is the same as the company’s financial year. It may be changed upon application showing reasonable cause. Annual income tax returns must be submitted within one year from the end of the company’s fiscal year.

**Payments**

Payments are made with provisional returns filed at six-month intervals from the fiscal year-end and are generally based on the last issued assessment. Interest is charged on any underpayment outstanding for more than six months after the fiscal year-end except in the case of February year-ends, in which case it is seven months. Any balance (together with interest) is then paid following assessment.

Significant developments

Over the past 12 months, the following significant amendments have been made to Spanish law on direct taxation of companies:

• A Royal Decree law passed on 9 April 2010 (RDL 6/2010) approves certain measures to boost economic recovery. The measures laid down in this legislation include, most notably, the extension until 2012 of free depreciation (a method to depreciate the assets can be chosen that may result in an effective depreciation higher than that which results from established methods) for new tangible fixed assets and investments in real estate used for business activities which can be availed of by companies if they maintain or increase their staff levels. This tax relief introduced with Law 4/2008 was initially applicable for tax years commencing in 2009 and 2010 and has now been extended to tax years 2011 and 2012.

• A law passed on 1 March 2010 (Law 2/2010) incorporates certain European Union (EU) directives on indirect taxation into Spanish law amending Spain’s non-residents’ income tax law. This law increases the types of expenses which are tax deductible when determining taxable income for non-residents’ income tax levied on Spanish non-residents with tax residence in the EU and no Permanent Establishment (PE) in Spain. For this tax, deductible expenses now include all expenses stated in personal income tax law which are directly related to income earned in Spain and directly and inseparably linked to an activity carried out in Spain.

• The state general budget law for 2010 (Law 26/2009) was passed on 23 December 2009. The most notable amendments made with this law are as follows:
  1. Increase of the tax rate levied on savings income and certain capital income and gains to 19%.
  2. Increase of (i) the general rate of withholding for corporate income tax, (ii) the non-residents’ income tax rate levied on sums transferred by a PE to its head office, and (iii) the non-residents’ income tax rate levied on dividends, interest and capital gains generated on transfers of assets, to 19%.
  3. The corporate income tax rate for companies which maintain or increase their staff levels and comply with certain requirements is reduced for tax years commencing in 2009, 2010 and 2011 as follows: (a) For taxable income up to EUR 120,202.41, the tax rate is 20%; and (b) For taxable income over EUR 120,202.41, the tax rate is 25%.

• A law passed on 26 October 2009 (Law 11/200) introduces a special regime for publicly traded real estate investment trusts (REITs) into Spanish law.
Taxes on corporate income

The general corporate income tax rate in Spain is currently 30%. Other tax rates (ranging from 25% to 35%) may apply depending on the type of company which is taxed and the type of business which is carried out.

Small companies (i.e., companies with a turnover under EUR 8 million in the preceding tax year) are taxed at the following rates:

- Taxable income up to EUR 120,202.41 is taxed at a 25% tax rate; and
- The part of the taxable income which exceeds this threshold is taxed at the general tax rate of 30%.

The tax rate levied on companies forming part of a group depends on the total amount of the corporate group's turnovers. The general 30% tax rate is levied when the sum of the group companies’ turnovers exceeds EUR 8 million.

A new regulation came into force in Spain as of December 2009 which establishes lower tax rates for companies which maintain or increase their staff levels. These rates are as follows:

- Taxable income up to EUR 120,202.41 is taxed at a 20% tax rate.
- The part of the taxable income which exceeds this threshold is taxed at the tax rate of 25%.

These lower rates of 20% and 25% apply retroactively to tax years commencing after 1 January 2009 until tax years commencing in 2011 and are applicable on the compliance of, amongst others, the following requirements: (i) the income generated all the company’s business activities does not exceed EUR 5 million; (ii) the company’s total staff is not more than 25 employees; and (iii) the company’s average number of employees during the twelve-month period following the commencement of the tax year in question is not less than one employee and not less than the company’s average number of employees during the twelve-month period prior to the commencement of the tax year in question.

For PEs in Spain of foreign companies, non-residents’ income tax is chargeable on their taxable income at a 30% tax rate. Non-residents’ income tax is levied on non-established foreign companies/individuals which obtain income in Spain (see section on Withholding tax).

Corporate residence

A company is resident in Spain and subject to corporate income tax on its worldwide income when:

- It has been incorporated in accordance with Spanish law;
- Its registered office is in Spain; and/or
- Its “effective” head office is in Spain.

Under Spanish law a company’s “effective” head office is in Spain when its business activities are managed and controlled from Spain.
Companies established in a country or territory where no tax is levied or which is a tax haven are deemed to be tax resident in Spain in the following cases:

- When the company’s main assets consist, directly or indirectly, of property located or rights fulfilled or exercised in Spain; and /or
- When the company’s core business activity is carried on in Spain.

This presumption may be refuted by the company if it can prove that it is effectively administered and managed in the country or territory in which it is established and that it was incorporated and operates for valid economic and business reasons and not merely for the purpose of managing securities or other assets.

**Other taxes**

**Value-added tax (VAT)**

Spanish VAT is payable on supplies of goods and services carried out in Spanish VAT territory and on imports/intra-European Union acquisitions of goods and services. There are three rates for the different types of goods and services, which are as follows:

1. Ordinary rate of 16%, to be increased to 18% in July 2010, applied on regular supplies of goods and services.
2. Reduced rate of 7%, to be increased to 8% in July 2010, applied on basic necessities (e.g., food and agricultural products not included in the “super reduced” 4% rate (4%), dwellings, and other qualifying services).
3. Super reduced rate of 4% applied on basic necessities other than those classified under the reduced rate (e.g., bread, milk, books, medicine, etc.).

In the Canary Islands, a specific tax is applied in lieu of VAT, called the Canary Island General Indirect Tax (IGIC). The ordinary IGIC rate is 5% and the other IGIC rates are 0%, 2%, 9% and 13% (20% or 35% for tobacco). IGIC is similar to VAT but it has some significant differences, such as the exemption established for telecommunications services. Imports of tangible goods into the Canary Islands are subject to this tax. In Ceuta and Melilla, sales tax is applied instead of VAT.

**Transfer tax**

A transfer tax of 6% or more frequently 7%, depending upon the region, is generally levied on *inter vivo* transfers, including real estate transfers and real estate leases that are exempt from VAT.

Second and ulterior transfers of buildings are exempt from VAT and thus, they are in principle, subject to transfer tax.

Residential leases are exempt from VAT and therefore subject to transfer tax.

Transfers of quoted or unquoted (listed or unlisted) securities are, in principle, exempt from both transfer tax and VAT, except in the following cases:

- Transfers of securities of a company whose real estate assets in Spain represent more than 50% of its total assets, or whose assets include securities in another company whose real estate assets in Spain represent at least 50% of its total assets are subject to and not exempt from transfer tax if the acquirer gains control of the real estate company as a result of the transfer; and...
• Transfers of securities received in exchange for real estate contributions carried out on the incorporation of a company or on the execution of a subsequent capital increase are also subject to and not exempt from transfer tax provided that not more than three years have elapsed between the date on which the contribution was made and the date on which the securities are transferred.

In addition, acquisitions of assets by new businesses in the Canary Islands are exempt from transfer tax on the compliance of certain requirements.

**Capital duty**
A 1% capital duty applies to incorporations of companies and capital increases, reductions and contributions by shareholders. Capital duty is incompatible with transfer tax and stamp duty in certain cases, but it is compatible with VAT.

**Stamp duty**
A stamp duty is mostly levied on notarial instruments and records documenting transactions which have an economic value and need to be registered in public registries (e.g., company, land and industrial property registries). A stamp duty is incompatible with transfer tax and capital duty, but compatible with VAT. The general rate is between 0.75% and 2% depending on the region of Spain and the taxable event.

Stamp duty is also levied on certain commercial documents (e.g., bills of exchange, promissory notes), court and administrative documents.

**Tax on non-resident companies owning real estate in Spain**
Non-resident companies which own real estate or hold real property rights in Spain are subject to a special levy accrued on 31 December and declared and paid in January of the following year in the place and manner established by law. The tax is 3% of the assessed value of the real estate. This special levy is not applicable for companies resident in a country which has signed a tax treaty, which includes an exchange-of-information provision, with Spain if the ultimate shareholders of such companies are resident in Spain.

In addition, some other exceptions are established for this levy.

**Business and professional activities tax**
The business and professional activities tax is a local direct tax levied annually on the operation in Spain of business, professional or artistic activities, regardless of whether they are carried out in a particular premises or not. The tax payable depends on different factors such as the type of activity carried out and the location and size of the premises where the activity is carried out.

Corporate income taxpayers and non-resident companies carrying on an activity in Spain through a PE are exempt from this tax if their net turnover for the tax year of the last corporate/non-residents' income tax return filed prior to the date of accrual of the local tax (1 January) was less than EUR 1,000,000.

**Others**
In addition to the taxes stated above, other taxes may be charged on companies such as (i) real estate tax, levied annually by local authorities on the ownership of real estate; (ii) a local tax levied on the increase of the value of urban land, chargeable when urban real estate is sold; (iii) motor vehicle tax, charged on the ownership of vehicles; (iv) tax
on constructions, installations and building works, charged on the cost of certain works which require town planning licences; and (v) waste collection fees.

**Branch income**

Income obtained by a company resident in Spain through a branch located outside Spain is treated as income generated by the head office and taxed accordingly. A tax exemption regime is applicable in this case on the compliance of certain requirements.

Income obtained by a branch in Spain of a non-resident company is taxed at the standard corporate income tax rate of 30% for tax years commencing after 1 January 2008 and, in most cases, the regulations established by tax law for resident companies are applicable.

Payments made by a branch to its head office or other PE of its head office for royalties, interest, commissions or technical assistance fees are not tax deductible. Management and general administrative expenses incurred by the foreign head office which can be allocated to the branch are tax deductible, if the payments of these expenses are made following a criteria of continuity and rationality and provided that certain documentary requirements and other formalities are complied with.

Under Spanish law, income obtained by a branch which is repatriated to its head office is taxed at source at general withholding tax rate of 19%. This tax is not chargeable in the case of a PE of a company resident in the EU (unless the company is resident in a tax haven). Most tax treaties signed by Spain do not establish any provisions on this matter and in these cases, it is generally understood that no tax is chargeable on income repatriated by branches. Some tax treaties such as the treaties with the US, Canada and Indonesia, expressly establish a tax on income repatriated by branches. For example, US head offices are taxed at a 10% rate on the repatriated profits of a Spanish branch under the US/Spanish tax treaty.

**Income determination**

**General rules**

The general rule for determining income for corporate income tax purposes is that accounting rules should be followed unless tax law establishes otherwise. In order to maintain this consistency, corporate income tax/PE Non-residents’ income tax returns include pages in which the company’s accounting/commercial balance sheet and profit and loss account figures should be entered.

In Spain, the tax authorities are authorised to modify accounting results exclusively for the purpose of determining tax results if they observe that a company’s accounting results have not been calculated in accordance with Spanish GAAP.

**Inventory valuation**

Inventory is valued at acquisition price or production cost under the average and first-in, first-out (FIFO) valuation methods (the replacement and base stock valuations methods may only be used in exceptional cases). Again since there are no specific tax rules for determining taxable income, accounting rules are also applicable for calculating valuation and obsolescence provisions for inventory.
Capital gains
Capital gains are taxable in the tax year in which they arise. They are treated as normal income and taxed at the standard corporate income tax rate of 30% (in the case of gains from real estate after taking into consideration an increase in the cost base for tax indexation purposes).

If the proceeds of the sale of qualifying tangible fixed assets and intangible assets or shares in companies are reinvested in similar assets within the time period established by law (from one year before the sale up to three years after the sale), the taxpayer may be eligible for a tax credit of 12% of the capital gain obtained from the sale (i.e., in this case, the effective capital gain taxation would be 18%). In the case of a sale of shares of a company, to be eligible for this tax credit, the interest in the company should be a minimum of 5% and should have been held for more than one year prior to the sale.

Inter-company domestic dividends
The amount of dividends included in the calculation of taxable income should be the gross amount. Upon meeting certain requirements, companies may be eligible for a tax credit for dividends equal to the tax rate applied by the company on the dividends received. This tax credit is generally allowed for the total dividends received from taxable domestic companies when the interest of the company receiving the dividend in the other company is 5% or more and such interest has been held for at least one year. This one-year holding period is deemed to be complied with if it is completed after the dividend is distributed.

This tax regime is to some extent the same as a tax exemption regime. When an interest in a company is less than 5% or is held for less than one year, the tax credit is 30% of half of the amount of the dividends received.

In addition, taxation on capital gains arising from the sale of shares by a company with at least a 5% interest in the subsidiary held for at least one year prior to the sale can be reduced by means of a tax credit for the tax rate applicable on the undistributed part of the subsidiary’s profits generated during the company’s holding period. The reason for this tax relief is that this capital gain is understood to be an underlying dividend.

Foreign income
Resident companies are taxed on their worldwide income. For foreign-source income, total or partial tax relief in the form of tax credits or exemptions is given if tax is levied on the income in both Spain and the foreign country where the income has been generated.

This tax relief may be available for:

- Economic double taxation, which is when the same income is taxed in the hands of two different taxpayers. For example another government taxes a foreign company on the income earned in that country and a Spanish resident shareholder is taxed on the dividends that it receives from the foreign company or the capital gains from transfers of its shares.
- Juridical double taxation, which is when the same income is taxed in two countries in the hands of the same taxpayer. For example the income is taxed (via a withholding tax) in the country where the income is generated and again in the other country where the recipient is resident.
Spain

The main characteristics of double tax relief are discussed below:

Dividends or profit-sharing income received by a Spanish company from a foreign company are tax exempt on the compliance of the following requirements:

a. The Spanish company has at least a 5% interest in the foreign company during the entire tax year prior to the tax year in which the dividend is paid. This one-year holding period is deemed to be complied with if it is completed after the dividend is distributed.

b. The foreign company is subject to a similar tax to Spanish corporate income tax and is not resident in a tax haven. The foreign tax is deemed to be similar to Spanish corporate income tax if the foreign company is resident in a country with which Spain has signed a tax treaty which establishes an exchange-of-information provision.

c. The income out of which the dividend is paid is generated from the business activities of the foreign company carried out abroad stipulated in corporate income tax law.

Capital gains arising from the sale of shares in foreign companies also qualify for a tax exemption provided that the requirements stated above are complied with during the holding period and the acquiring company is not resident in a tax haven. Tax exemption is limited in certain cases.

As an alternative to this “tax exemption” regime and applicable for dividend distributions only, a tax credit based on imputation is established. This tax credit allows the crediting of the foreign tax paid abroad on the income from which the dividends are paid and the foreign withholding tax paid on the profit distribution, up to the limit of the tax that would have been paid on the gross amount in Spain. The only requirement for the application of this “tax imputation” regime is that the Spanish company has at least a 5% interest in the foreign company during the twelve months prior to the date on which the dividend is due and payable. This one-year holding period is deemed to be complied with if it is completed after the dividend is distributed. The tax relief of this point may be carried forward for up to ten years.

Spanish international legislation provides for corporate income tax relief on “juridical” double taxation by applying the “tax imputation” regime. With this regime, gross foreign income (including foreign withholding tax paid) is considered for Spanish tax calculation purposes and a tax credit for the foreign withholding tax paid is applicable up to the amount of the corporate income tax that the company would have paid if such gross income had been obtained in Spain. The tax credit can be carried forward for up to 10 years, but the rate applicable will be the rate applicable at the moment when the tax credit is applied.

Under Spanish tax treaties and implemented EU tax directives, several methods have been established to avoid double taxation. The main one is the traditional deduction of a tax credit from the tax effectively paid. However, some treaties establish a tax exemption or the exclusive right to tax. Also, a tax-sparing clause is included in some treaties which allows for the deduction of not only the tax actually paid but a higher amount of tax.
Stock dividends
Corporate income tax is not levied on bonus shares (shares partially or totally given to shareholders in a capital increase charged against distributable reserves) although they should be taken into account when calculating the average cost of shares held for the levying of tax when the shares are sold.

Other significant items
The following items, amongst others, are excluded or deferred from taxable income:

- Distributed dividends corresponding to profits obtained by companies in tax years in which the flow-through tax regime (internal and international) has been applied; and
- Assets written up in accordance with revaluation laws and tax-protected restructuring transactions involving accounting capital gains.

Deductions

Depreciation (amortisation)
All assets, except land, are depreciable for tax purposes. Guideline tables of tax depreciation rates are established which state maximum per annum rates and maximum number of years of useful life for each asset type classified according to business sector. The straight-line depreciation method is normally used which is calculated over the asset’s useful life and applied on the asset’s cost or written-up value (if such write-up is acceptable for tax purposes). Off-book adjustments should be included in tax assessments if accounting depreciation exceeds tax depreciation/amortisation.

Qualifying assets with a useful life of more than one year can also be depreciated by one of the following declining-balance methods:

- By applying a constant percentage on the carrying amount of the asset multiplied by 1.5, 2, or 2.5 depending on the useful life of the asset (below five years, between five and eight years and over eight years, respectively); or
- By using the sum-of-digits method: The asset’s acquisition price is multiplied by the ratio between the number of the years in which it is depreciated/amortised in a descending order (e.g., in a three-year useful life, 3 for the first year, 2 for the second and 1 for the third) and the total numbers for the years of the asset’s useful life (1 + 2 + 3 = 6 for 3 years of useful life).

Buildings, furniture and fittings cannot be depreciated by the declining-balance methods.

Special depreciation plans for new assets can be approved by the tax authorities upon request, when they are subject to wear-and-tear at a higher rate than the normal rate applicable.

Recorded depreciation is fully tax deductible, even when it is higher than the depreciation which would result on applying any of the tax depreciation methods stated above, if the taxpayer is able to justify that the depreciation is real.

Mining assets and assets used for research and development, amongst others but not including buildings, can be freely depreciated/amortised for tax purposes.
Spain

Depletion is allowed for mining companies and companies involved in exploring/investigating natural oil resources as established in applicable legislation.

A 50% reduction may be applied for income obtained from licensing certain intangible assets on the compliance of certain requirements (the effective tax on this income would be 15%).

As from 2008, goodwill cannot be amortised under Spanish GAAP. However, it can be amortised for tax purposes at an annual rate of 5% on the compliance of certain requirements (e.g., it is acquired for consideration from a non-related party in accordance with the provisions of Section 42 of the Spanish Commercial Code and an obligatory non-distributable reserve is established).

New tangible fixed assets and property investments used for business activities and at the company’s disposal in 2009, 2010, 2011 and 2012 can be freely depreciated, provided that the company’s average number of staff during the year prior to the moment when the assets/property investments are at the disposal of the company is maintained during the following two years. Depreciation is fully tax deductible in this case even if it is not recorded in the company’s profit and loss account.

Intangible assets with a specific useful life may be amortised and such amortisation is tax deductible even if it is not recorded in the company’s profit and loss account, when the company complies with the following requirements: (i) the assets are acquired for consideration and (ii) the company does not form part of a group as defined in Section 42 of the Spanish Commercial Code. The tax deduction of the amortisation is up to 10% per annum; unless a lower useful life can be justified. If the two requirements stated above are complied with, amortisation on intangible assets which do not have a specific useful life is also tax deductible up to the 10% annual limit, regardless of whether they are amortised under Spanish GAAP or not.

Assets leased under financial lease contracts may be eligible, on the compliance of certain requirements, for the application of a special tax regime which enables accelerated depreciation (the part of the lease payments which corresponds to the recovery of the cost of the assets is tax deductible up to the limit of twice the straight-line tax depreciation rate).

**Tax-loss carryforwards**

Tax losses may be carried forward for 15 years but they cannot be carried back. There are no tax loss “baskets” (operating/capital) under Spanish law.

Complex rules may limit the use of tax losses of a company dissolved as a result of a restructuring operation and, in certain circumstances, when it has a change of shareholders.

**Payments to foreign affiliates**

Supplies of goods or services by a company not established in Spain to a Spanish group company should be valued at arm’s length. If recorded expenses for such goods/services exceed arm’s-length price, the tax deductibility of the excess amounts could be challenged in a tax inspection. The tax deductibility of expense charges received from tax havens is fully disallowed unless proper evidence of an actual service valued at arm’s length can be provided.
For tax periods commencing after 1 January 2007, management services received from outside Spain and recorded as distribution of costs of a group centre do not have to be documented in a written agreement entered into before the commencement of the services to ensure the tax deductibility of the expenses (as previously was the case), although it would be recommendable to have such an agreement. For any other types of services, an agreement recorded before a notary public is not obligatory under Spanish law, but it is advisable.

As regards the taxation in Spain of the foreign company which supplies the services, the withholding tax rate to be applied on the gross income obtained by the company is 24%. Dividends, interest and capital gains generated as a result of a transfer of assets are taxed at a 19% withholding tax rate. If management services, technical assistance or the performance of studies are solely used outside Spain and are linked to business carried on abroad, then no withholding tax is applicable. In addition, under most tax treaties signed by Spain, “business profits” obtained in Spain by non-residents are exempt from withholding tax. However, “business profits” is a miscellaneous residual category. For instance, if the amount obtained qualifies as a royalty payment, withholding tax would apply at the reduced tax treaty rates if the foreign company can obtain a document from the tax authorities of its country of residence certifying its tax residence. If no tax treaty applies, then the above 24% withholding tax rate is applicable (see section on Withholding tax).

**Taxes**

Taxes, other than corporate income tax that are recorded as an expense due to their nature (e.g., business and professional activities tax or capital duty levied on the incorporation of a company, but not, for example, withholdings) are tax deductible expenses. In some cases, indirect taxes such as non-deductible VAT or transfer tax could be added to the value of assets for depreciation purposes.

However, penalties imposed for failure to pay taxes and surcharges for late filing/payment or for other tax infringements are not tax deductible.

Late payment interest recorded as an expense is, in principle, tax deductible.

**Group taxation**

**Tax groupings for corporate income tax purposes**

Under Spanish tax law, companies can form a group and apply a special tax consolidation regime for corporate income tax purposes. Companies forming a tax group should formally pass a resolution agreeing to do so before the beginning of the first tax year in which the tax consolidation regime will be applied.

To apply the tax consolidation regime, the controlling company of the tax group should hold a 75% or higher interest, either directly or indirectly, in the companies forming the tax group at the beginning of the first tax year in which the tax consolidation regime is applied and this interest should be maintained during the year unless the controlling company is dissolved. For tax years commencing after 1 January 2010, the interest requirement is 70% for companies listed on the Stock Exchange.

The main characteristics of the tax consolidation regime are as follows:
Spain

- The taxable income of the tax group is the sum of the taxable incomes of each of the companies forming the group;
- The tax losses of any of the companies forming the group can be offset against the tax profits of any of the other group companies;
- For the calculation of consolidated taxable income, the tax profits (losses) generated from transactions carried out between group companies are eliminated and only included in consolidated taxable income when (i) they are carried out with third parties, (ii) a group company participating in the internal operation ceases to form part of the tax group and (iii) the tax consolidation regime is no longer applied by the group for whatever reason;
- Specific limitations apply regarding the offsetting of tax losses or the application of tax credits generated by the group companies before they formed part of the tax group. Such tax losses/credits may be offset (applied) by the tax group up to the limit of the tax profits/tax liability of the company which generated the losses/credits; and
- No withholding tax is chargeable over payments made between companies of the tax group, e.g., interest, dividends, etc.

**Tax groupings for VAT purposes**

As from 1 January 2008, groups of companies may also choose to be taxed under a special tax consolidation regime for VAT purposes. This special regime is optional but once it has been opted for, it should be applied for a minimum of three years which is extendible unless it is expressly waived by the companies.

The VAT consolidation regime may only be applied by groups resident in Spanish VAT territory which do not form part of any other VAT grouping.

The controlling company of the group should be a legal entity or PE which is not dependent on any other entity established in Spanish VAT territory and it should hold at least a 50% interest in the subsidiary companies of the group for the entire calendar year.

With the application of the VAT consolidation regime, there are two different options for taxation:

- The aggregation system, where the balances of the VAT returns of the individual companies of the group are totalled. The right to a tax deduction is exercised by the individual companies; or
- The consolidation system, where, in addition, an individual company can opt to reduce the VAT taxable income for inter-company operations; which is limited to the “external” cost.

**Tax incentives**

**Tax relief**

No specific tax relief is established in Spanish law for foreign investors. However, relief may be availed of by Spanish and foreign-owned companies alike. The types of tax relief available under corporate income tax law in Spain are described below.
Tax relief for business activity or place of business activity includes

- 50% tax credit on corporate income tax levied on income obtained in Ceuta and Melilla through companies established and carrying on activities during a full business cycle in these enclaves;
- 99% tax credit on the corporate income tax levied on income obtained from the supply of local public services, except when the state company in question is owned, partially or wholly, by a quoted/non-quoted company or individual; and
- 50% tax credit on the corporate income tax levied on income obtained from exports of films, books and similar cultural items, if profits are reinvested in the acquisition of assets used for such activities. This tax credit will be gradually reduced over the coming years and eliminated in 2014.

Tax relief for promoting certain investments
Many current tax credits for promoting certain investments are to be reduced and finally eliminated.

However, the largest tax credits for promoting investments (tax credit for the reinvestment of extraordinary profits and tax credit for research and development (R&D)) as well as tax credits to prevent internal and international double taxation are maintained.

R&D
A 25% tax credit is available for expenses incurred from R&D activities. If the expenses are higher than the average expenses incurred by the company during the previous two years, the tax credit is 42% for the excess amount.

An additional tax credit of 17% is available for staff expenses incurred for staff exclusively carrying out and qualified to carry out R&D activities.

An 8% tax credit is available for investments made in tangible fixed assets (excluding buildings) and intangible assets which are exclusively assigned to R&D activities.

Innovation
An 8% tax credit is available for expenses incurred from technological innovation activities.

Reinvestment of extraordinary profits
A 12% tax credit is available for sales of assets which are used for the company’s business activities when the amount obtained from the sale is reinvested in similar types of assets during a four-year period (as from one year prior to the sale up to three years after the sale). This tax credit therefore reduces the effective tax levied on sales of certain assets to 18%. The asset in which the reinvestment is made must be maintained for five years (three in the case of movable assets) unless its useful life is shorter.

The following tax credits will be eliminated in 2011:
- Tax credit for the promotion of information and communications technologies (3%);
- Tax credit for investments in vehicle navigation and tracking systems, adaptation of vehicles for the disabled and nursery school fees for staff’s children (2%);
- Tax credit for environmental investments (2%);
- Tax credit for staff training costs (1-2%);
Spain

- Tax credit for contributions made by employers to certain staff pension schemes (2%);
- Tax credit for export activities (3%); and
- Tax credit for expenses incurred in, or related to, financing staff continuing education programmes (1% to 2%). This tax credit can also be availed of for expenses incurred by companies to familiarise staff in the use of new technologies. These expenses are not a benefit in kind for the staff.

The tax credit for film productions (18%) will be eliminated in 2012.

The tax credit for investments in heritage assets (8%) and book editing (3%) will be eliminated in 2014. As from 2007, the rates applicable will be reduced by 12.5% each year.

**Other tax relief**

As an incentive to create employment, the following reduced tax rate is available for companies for tax years commencing on 1 January 2009 up to tax years commencing in 2011 if the company maintains or increases its staff and meets other requirements:

- Taxable income up to EUR 120,202.41 will be taxed at a 20% tax rate
- The part of the taxable income that exceeds such threshold will be taxed at the general tax rate of 25%

*(See section Taxes on income generated by companies for further details)*

A tax credit can be applied for increases in the number of disabled workers contracted per year on a permanent and full-time basis (EUR 6,000 per worker contracted). This increase is calculated by taking the average number of company workers meeting these requirements in the tax year in question and comparing it with the company’s average number of staff in the previous tax year.

As from 2008, goodwill cannot be amortised under Spanish GAAP but it can still be amortised for tax purposes at an annual rate of 5% on the compliance of some requirements (e.g., it is acquired for consideration from a non-related party in accordance with Section 42 of the Spanish Commercial Code, an obligatory mandatory reserve is established).

In addition to the tax relief stated above, other tax relief which may be availed of is commented in section *Deductions*.

**Special tax regimes**

Special tax regimes are applicable in the following cases:

- For Spanish and European Economic Interest Groupings.
- For joint ventures.
- For restructuring transactions. In this case, the special tax regime is a tax neutrality regime implemented under the EU Directive 90/434. As a general rule, under this regime, asset transfers carried out in these transactions do not have any tax implications (either from a direct, indirect or other Spanish tax perspective) for the parties involved (transferor, beneficiary and shareholder) until a subsequent transfer which is not protected by this regime.
The transactions that can be taxed under this regime are mergers, global transfers, spin-offs of business units/majority interests, splits, share-to-share transactions, contributions of business units and contributions of assets (this last transaction is not fully tax-protected). Each of them should comply with a series of requirements for the application of the regime.

**Brief outline of some significant features of this regime**

The tax credit position of a company dissolved as a result of a tax-protected restructuring transaction is “acquired” in full by the beneficiary company in the case of universal succession.

The “acquired” tax credits would only be those tax credits which are given in relation to assets transferred in transactions where the transferor is not dissolved or the succession is not a full succession for Spanish commercial purposes.

Regarding tax losses, the Spanish tax authorities hold the view that tax losses may not be transferred when the transferring company is not dissolved. When the transferring company is dissolved, the tax losses may be applied by the beneficiary company up to certain limits and with certain restrictions.

Financial goodwill arising in a merger transaction is amortised for tax purposes at a maximum annual rate of 5% by the Spanish beneficiary company of the merger if the seller of the shares which gives rise to the “merger” goodwill has been actually taxed for the equivalent capital gain in Spain or any other EU country (excluding tax havens) and has met certain other requirements. Depreciation of financial goodwill does not have to be recorded in the profit and loss account for it to be tax deductible although an annual amount should be charged to a non-distributable reserve (either from annual profits or from freely available reserves) which should be at least the tax deductible amount.

Under an EU anti-abuse clause, this tax regime cannot be applied if the transaction is done for the purpose of tax fraud or evasion. An additional anti-abuse clause in Spanish law similar to the EU clause provides that the tax regime can be applied only if it is for valid economic reasons, such as streamlining of activities or group restructuring to gain efficiency, but not to merely obtain a tax benefit. The tax authorities should be notified of the application of this tax regime.

- Tax transparency (international controlled foreign company rules). Not applicable for companies resident in the EU.
- Industrial development companies.
- Venture capital companies and funds and collective investment institutions.
- Lease transactions.
- Spanish holding companies of foreign companies. Spanish resident companies whose corporate purpose includes the holding and management of foreign companies’ shares are granted some tax benefits on complying with certain requirements.

The tax authorities should be notified of the application of this tax regime.

Companies taxed under this tax regime are granted a tax exemption on dividends and capital gains *(tax exemption stated in the section on Foreign income above)*
when they have a 5% direct interest or, if their interest is less than 5%, when the acquisition value of their interest is at least EUR 6 million.

In addition, the distribution of profits by the holding company to non-resident companies or individual shareholders is not taxable in Spain (unless the profits are distributed to a tax haven). Resident company shareholders are now entitled to an internal tax credit on dividends under Spanish law.

Contributions of shares in foreign subsidiaries qualifying for a tax exemption on dividends and capital gains made to a Spanish holding company have full tax neutrality under the tax neutrality regime applicable for restructuring transactions.

- Small and medium-sized companies are eligible for tax relief such as accelerated depreciation or more favourable bad debt provision treatment. Accelerated depreciation can be applied for assets acquired with amounts obtained from sales of trading assets. To be eligible for this relief, turnover should not exceed EUR 8 million (in the case of a group, the turnover of all companies should be considered for this purpose).

A reduced corporate income tax rate of 25% is levied on the first EUR 120,202 of annual tax profits.

Small and medium-sized businesses are eligible for a tax credit of 3% of investments made and expenses incurred to improve their capabilities in Internet access and business information management to improve the efficiency of their internal processes. This tax credit may be carried forward for a period of 15 years.

**Special economic and tax regime of the Canary Islands**

Due to the distance and isolation of the Canary Islands, they have traditionally enjoyed a special economic and tax regime with specific economic and tax measures different to those established for the rest of Spain.

Regarding direct taxes, the Canary Islands economic and tax regime establishes the following tax benefits for companies and businesses domiciled in the Canary Islands or with a PE in the Canary Islands:

- Up to 90% of annual undistributed accounting profits can be allocated to a special investment reserve and not taxed providing that they are invested within a four-year period (including the period during which the profits are obtained) in qualifying assets in the Canary Islands, certain public debt securities or shares in other companies operating in the Canary Islands which invest in qualifying assets.
- Most Spanish corporate income tax relief is 80% higher for companies and businesses located in the Canary Islands regarding both the relief granted. A 25% tax credit can be availed of for investments in new tangible fixed assets and, on the compliance of certain requirements, second-hand assets.
- A 50% tax credit of the corporate income tax liability is granted for taxable income generated from the production of tangible goods on carrying out agricultural, farming, industrial and fishing activities.
- A 90% tax credit of the corporate income tax liability is granted for profits of shipping companies generated from ships registered in the Canary Islands Special Ships and Shipping Companies Register. For sailors of such ships a 50% tax exemption can be applied on the personal income tax levied on their employment.
income and a 90% reduction on the part of their social security contributions paid by their employers.

Regarding indirect taxes, in addition to a lower taxation with the Canary Islands general indirect tax (IGIC at the general rate of 5%) compared to VAT and specific IGIC exemptions, the following should be noted:

- Companies domiciled in the Canary Islands which are Corporate Income taxpayers and which are newly incorporated, start new activities or improve their existing ones may benefit from the following tax relief:
  - Exemption from transfer tax and stamp duty on their incorporation and any capital increases made if the increase of capital is allocated to the acquisition of new assets.
  - Exemption from IGIC on supplies and imports of capital goods if the company has the right to offset 100% of IGIC borne.
- Shipping companies qualify for an exemption from transfer tax for any contracts related to ships registered in the Canary Islands Special Ships and Shipping Companies Register.
- Custom Free areas are available. Upon EU demand, there are restrictions on the application of some tax relief (special investment reserve, tax credits for production and new businesses’ indirect taxes relief) for the following industrial sectors: shipbuilding, synthetic fibres, automobile, iron, steel and coal.

**Canary Islands Special Zone tax regime**

In January 2000 a special Canary Islands Special Zone tax regime was approved by the EU. The main regulations of this regime established by the Spanish government are as follows:

- New companies may qualify for the application of this tax regime and, on the approval of the tax authorities, may be registered up to 31 December 2013 (applying the tax regime up to 31 December 2019). This may be extended by the EU.
- To qualify for the application of the tax regime, the company should:
  1. Covenant to make an investment in fixed assets for at least EUR 100,000 in Gran Canaria or Tenerife or EUR 50,000 in Fuerteventura, Lanzarote, La Palma, El Hierro or La Gomera, within the first two years of their business activity;
  2. Covenant to create at least five new jobs in Gran Canaria or Tenerife or three in the other islands;
  3. Provide a description of the business activities which will be carried out which justifies the company’s solvency, viability, international competitiveness and its contribution to the economic and social development of the Canary Islands;
  4. Establish its registered office and place of effective management in the Special Area;
  5. Have at least one company director who resides in the Canary Islands; and
  6. Carry out one of the qualifying business activities.
- The territory where this tax regime can be applied includes all the Canary Islands except for companies which intend to carry out industrial or commercial activities involving tangible goods, which must be located in specific controlled areas.
- Companies applying the tax regime may operate outside the Canary Islands through branches if separate accounting books are kept but the tax regime will not be applicable for such branches’ activities.
Spain

- Activities for which the tax regime can be applied include a wide range of industrial and commercial activities, most services and holdings. Credit and insurance entities are excluded and no stock exchanges are allowed.
- Companies applying the tax regime are subject to corporate income tax in Spain at a 4% rate for companies authorised from 1 January 2007 onwards and at a variable rate of between 1% and 5% for companies authorised before this date. The special 4% rate shall be levied on a maximum amount of the taxable income which will depend on the number of jobs created and the type of activity carried out by the company. The general corporate income tax regime establishes a 30% tax rate for Spanish companies applicable as from 2008. For small companies, the tax rate is 25% for the first EUR 120,202 of profits and 30% for remaining profits.
- Under this tax regime, companies can avail of large tax exemptions for IGIC, transfer tax and stamp duty and large reductions and simplified regulations for local taxes.
- Interest and some other returns from movable goods paid by companies under this tax regime are exempt from Spanish Non-Residents' Income Tax, except when paid to residents in tax havens.
- Benefits established in the EU Parent-Subsidiary Directive are extended to non-EU residents. These benefits are not applicable when the income is paid to residents in tax havens.
- A fee of EUR 732.51 is payable to be registered as a company which applies this tax regime and an annual fee of EUR 1,098.76 is payable to continue to be registered as qualifying for the tax regime.

Finally, Spanish Parliament has recently proposed some amendments to the law regulating the Canary Islands Special Zone tax regime including, amongst other tax benefits, a reduction of the special corporate income tax rate for companies which apply the regime to 1% for the first tax base segment.

**Withholding taxes (WHT)**

**Introduction**

Ordinarily, withholding tax is the mechanism by which the Spanish tax authorities collect the final tax levied on non-residents. In the case of resident beneficiaries, however, it is simply an advance payment of a tax that is then normally self-assessed by the resident taxpayer in the final annual tax return.

The advance payment system of withholding tax for resident beneficiaries referred to above also applies if non-resident companies/individuals not established in Spain sell their ownership in Spanish real estate. In this case, the acquirer of the real estate should levy a 3% withholding tax on the sale price on account of the 19% tax chargeable on the seller on its capital gain. Other capital gains (for instance, from a sale by a non-resident of a substantial interest in a Spanish company where neither a tax treaty nor internal rules establish a tax exemption) are taxed in the hands of the non-resident transferor, but the mechanics of levying the tax are not those of a withholding tax. In this case, the non-resident's tax is paid directly, through its representative or by the depositor or manager of the assets in question, if any.

The following table states the general withholding tax rates on income obtained by resident/non-resident companies. The most significant peculiarities regarding the rates for the type of income are stated in footnotes to the table.

Notes

The rates above are for income obtained by non-residents which is not related to any PEs which they may have in Spain.

Aside from these Tax Treaties, the following Tax Treaties are not yet in force as they are currently being negotiated or are not yet approved or published: Albania, Armenia, Barbados, Bosnia and Herzegovina, Costa Rica, Georgia, Kazakhstan, Kuwait, Namibia, Nigeria, Pakistan, Panamá, Peru, Senegal, Syria and Uruguay.

1. If a corporate taxpayer, as shareholder, is entitled to full tax relief on the dividend received, no withholding tax would be levied. As a general rule, corporate shareholders with at least a 5% interest held for at least one year are granted full tax relief.
2. The 19% withholding tax rate does not apply if, amongst other cases, the recipient is a resident bank or savings or other financial institution subject to corporate income tax, provided that this income is not portfolio income. In addition, no withholding tax is levied on interest arising between companies taxed under the tax consolidation regime.
3. A 19% withholding tax rate is levied on income generated under royalty and technical assistance agreements, from leases or from the granting of rights when ownership is not transferred, except when such income constitutes the habitual business activity of the recipient. A 24% rate is levied on fees received by a company for the transfer of rights to an image or consent or authorisation to its use.
4. Implementation of the EU Parent-Subsidiary Directive in Spanish law gives EU shareholders a withholding tax exemption on dividends from Spanish companies on the compliance of certain requirements. Luxembourg recipients of income which are companies under paragraph 1 of the protocol to the tax treaty with Spain (holding companies) are not allowed this exemption. Recipients of Luxembourg income, as companies regulated under paragraph 1 of the protocol to the tax treaty with Spain (holding companies), are not allowed this exemption.
5a. Spanish law establishes a withholding tax exemption on interest obtained by EU lenders not established in Spain on the compliance of certain requirements.
5b. The EU Interest and Royalties directive is applicable when appropriate.
6. The taxable income for supplies of services, technical assistance or assembly/installation work under engineering contracts, provided or carried out by non-resident companies with no PE in Spain does not follow the general rule of gross income. In such cases, total income can be reduced by related staff costs, certain supplies (water, electricity, telephone, etc.) and materials used for the services/work, provided that, in the case of staff costs, evidence can be provided that they were actually taxed in Spain. For royalties paid to EU lenders, a reduced tax rate of 10% is levied on the compliance of certain requirements.
7. Levied if the recipient is a company holding at least a 10% interest in the paying company; otherwise, a 15% rate is levied.
8. Interest paid by certain public institutions is tax exempt.
9. Interest paid to certain public institutions is tax exempt.
10. Interest arising from the acquisition of commercial, industrial or scientific equipment is tax exempt.
11. Interest paid on any loans granted by a bank or other financial institution is tax exempt.
12. For royalties for any copyright of literary work (including cinematograph films, and films or tapes for radio or television broadcasting), the rate levied is 14%.
13. Levied if the recipient is a company holding at least a 25% interest in the paying company; otherwise, a 15% rate is levied.
14. No withholding tax is levied on interest when both contracting states agree this and the loan is for no less than five years.
15. A 3% withholding tax rate is levied on royalties for the use of or right to use news. A 5% withholding tax rate is levied on royalties for any copyright of literary work (including cinematograph films, and films or tapes for radio or television broadcasting).
   A 10% withholding tax rate is levied on royalties for the use of or right to use copyright of industrial property, know-how or scientific, commercial or industrial equipment.
16. Levied if the recipient is a company holding a direct interest of at least 50% in the paying company for at least one year; otherwise a 15% rate is levied.
17. A tax exemption can be availed of for interest arising from commercial loans, loans guaranteed by public bodies for the promotion of exports and for interest arising from current accounts in banks or nominative advances between banks of both contracting states.
18. No withholding tax is levied if the requirements laid down in internal law which transposes the EU Parent-Subsidiary Directive are complied with.
19. Royalties for any copyright of literary, theatrical, musical or artistic work (with some exceptions such as films and TV programmes) are exempt from withholding tax.
20. The maximum withholding tax is 10% for interest paid to financial institutions for loans and credits granted for a minimum term of 10 years for the purchase of capital equipment.
21. Interest arising from securities issued by a contracting state is exempt from withholding tax.
22. A 10% withholding tax rate is levied on royalties on copyright of any literary, theatrical, musical or artistic work (including films and TV programmes).
23. Levied if the beneficial owner is a company (excluding partnerships) with at least a 25% interest in the paying company held directly or indirectly; otherwise a 15% rate is levied.
24. A reduced withholding tax rate is only levied if the income is taxed in Canada; otherwise the general rate is levied.
25. Levied if the recipient is a company with at least a 20% interest in the paying company held directly or indirectly; otherwise a 10% rate is levied.
26. Interest arising from bank or insurance company loans, bonds, some securities that are regularly negotiated on stock markets and credit sales of industrial equipment are taxed at a 5% tax rate.
27. A 5% withholding tax rate is levied on royalties for the use of industrial, commercial or scientific equipment.
28. Withholding tax is levied on 60% of gross royalties for the use of industrial, commercial or scientific equipment.
29. A 0% withholding tax rate is levied if the recipient is a company with at least a 20% interest in the paying company held directly or indirectly.
30. No withholding tax is levied if: (i) the beneficiary is a contracting state, one of its political subdivisions or one of its local entities; or (ii) interest is paid in connection with the sale on credit of merchandise or equipment to a company of a contracting state; or (iii) interest is paid on a long-term loan (five or more years) granted by a bank or financial institution resident in a contracting state.
31. A 0% withholding tax rate will be levied from 20 April 2011.
32. Reduced withholding tax rates or exemptions are not levied/applied if the income is paid to a company resident in a contracting state whose shares are directly or indirectly held, by more than 50%, by non-residents. This clause will not apply if the company can prove that it carries out important industrial or commercial activities and does not merely manage or hold shares.
33. No withholding tax is levied if: (i) the beneficiary is a contracting state, one of its political subdivisions or one of its local entities; or (ii) interest is paid in connection with the sale on credit of merchandise or equipment to a company of a contracting state; or (iii) interest is paid on a long-term loan (five or more years) granted by a bank or financial institution resident in a contracting state.
34. Denmark has terminated its tax treaty with Spain. The tax treaty ceased to have effect on 1 January 2009.
35. Royalties on copyright of any literary, theatrical, musical or artistic work, excluding films and TV programmes, are tax exempt if the recipient is resident in the other contracting state and taxed on such income in such state.
36. A 5% withholding tax rate is levied on interest arising from the sale of industrial, commercial or scientific equipment, the sale of merchandise from one business to another business, or the financing of construction, installation or assembly works.

37. A 5% withholding tax rate is levied on royalties on copyright of any literary, theatrical, musical or artistic work (excluding films and TV programmes).

38. A 9% withholding tax rate is levied on the gross amount of the dividends if the beneficiary owner is a company (other than a partnership) which has at least a 25% direct interest in the company paying the dividends.

39. Withholding Tax is not levied on interest if the recipient is a contracting state, one of its political subdivisions or one of its public bodies or local authorities or if the interest is paid to the Central Bank of the other contracting state.

40. No withholding tax is levied if the recipient is a company with at least a 50% direct interest in the company paying the dividends, provided that the dividends are distributed from profits taxed in Spain.

41. No withholding tax is levied on interest if: (a) the recipient is the other contracting state, its central bank or its political divisions; (b) the payer is a contracting state or its political divisions; (c) the interest arises from a loan or credit granted or guaranteed by a contracting state or its political divisions; (d) the recipient is a financial institution depending on a contracting state or its political divisions; or (e) the recipient is a pension fund qualifying for tax purposes in a contracting state and the income from such fund is tax exempt in the contracting state paying the dividend.

42. No withholding tax is levied if the French company has at least a 10% direct interest in the company distributing the dividend.

43. No withholding tax is levied if the French company receives interest; (i) from the other contracting state or any of its political divisions; or (ii) from a resident in the other contracting state from an underlying commercial or industrial activity; or (iii) in connection with a credit sale of industrial, commercial or scientific equipment; or (iv) for a loan granted by a financial institution.

44. No withholding tax is levied on royalties on copyright of any literary or artistic work (excluding films and TV programmes) if the recipient is the beneficiary owner.

45. No withholding tax is levied on interest paid to “Deutsche Bundesbank” or “Kreditanstalt für Wiederaufbau”.

46. Levied if the recipient is a company with at least a 25% direct interest in the paying company; otherwise; a 10% rate is levied.

47. No withholding tax is levied on interest if: (i) the interest is paid by a contracting state, one of its political subdivisions or one of its local entities; or (ii) the interest is paid to the other contracting state, one of its political subdivisions, or one of its local entities or to a body (including financial institutions) of such contracting state; or (iii) the interest is paid to another body (including financial institutions) in relation to loans granted by virtue of an agreement between both contracting states.

48. No withholding tax is levied on interest paid to the Central Bank of the other contracting state.

49. No withholding tax is levied on interest arising from the credit sale of industrial, commercial or scientific equipment.

50. A 10% withholding tax rate is levied on royalties for the use or cession of use of industrial, commercial or scientific equipment. The general 20% withholding tax rate is levied on technical services and other royalties.

51. No withholding tax is levied on interest if the recipient is a contracting state, one of its political subdivisions or one of its local entities or if the interest is paid to the Central Bank or a financial institution controlled by the other contracting state, its political subdivisions or its local entities.

52. No withholding tax is levied on interest arising from the credit sale of industrial, commercial or scientific equipment.

53. Levied if the recipient is a company with at least a 20% interest in the paying company; otherwise a 10% rate is levied.

54. Royalties for copyright on literary, theatrical, musical or artistic work are taxed at a 5% withholding tax rate. Royalties on films or other means of audio or video transmission,
for the use or right to use industrial, commercial or scientific equipment or over scientific works or under agreements between both states are taxed at an 8% rate.

55. A 5% withholding tax rate is levied on interest arising from the sale of industrial, commercial or scientific equipment, the sale of merchandise from one business to another business or a loan granted by a financial institution.

56. A 5% withholding tax rate is levied on royalties for copyright on literary, theatrical, musical or artistic work (excluding films and TV programmes).

57. A 4% withholding tax rate is levied on royalties for copyright on literary, theatrical, musical or artistic work (excluding films and TV programmes).

58. Reduced withholding tax rates are not levied when more than 75% of shares of the recipient company resident in a contracting state are owned directly or indirectly by non-residents and the income generated by the paying company is not taxed in its country of residence.

59. Levied if the recipient is a company with at least a 25% interest in the paying company with voting rights; otherwise a 15% rate is levied.

60. Levied if the recipient is a company with at least a 25% interest in the paying company for at least one year; otherwise a 15% rate is levied.

61. No withholding tax is levied on interest arising from a loan guaranteed by a contracting state.

62. Consideration received for renouncing, either totally or partially, the use or right to use goods or rights is considered to be a royalty.

63. No withholding tax is levied on interest paid in connection with the sale on credit of merchandise or equipment to a company of a contracting state or on interest paid on a long-term loan (five or more years) granted by a bank or credit institution resident in a contracting state.

64. No withholding tax is levied if the recipient is a company with at least a 5% direct interest in the paying company.

65. A 5% withholding tax rate is levied on royalties for technical services.

66. No withholding tax is levied on dividends paid to a shareholder resident in the other contracting state of the company distributing the dividend with at least a 25% interest.

67. A 10% withholding tax rate is levied on interest received by a bank (beneficial owner). A 5% withholding tax rate is levied if the recipient is a shareholder with at least a 25% direct interest; otherwise a 10% rate is levied.

68. Withholding tax is reduced to 10% if the recipient is a Dutch company with at least a 50% direct interest in the paying company. A 5% withholding tax rate is levied if the recipient is a shareholder with at least a 25% direct interest in the paying company.

69. Withholding tax is reduced to 10% if the recipient is a shareholder of the paying company with voting rights with at least a 10% direct interest; otherwise a 15% rate is levied.

70. A 10% withholding tax rate is levied on interest paid for bonds or similar securities generally offered to investors and related to transfers of industrial, commercial or scientific equipment. No withholding tax is levied on interest from bonds or similar securities issued by the state or a local entity, or from loans given or guaranteed by either of the two contracting states, Central Banks or financial institutions as agreed between the contracting states.

71. A 20% withholding tax rate is levied on any patents, trademarks, designs or models, plans, secret formulae or processes and computer software, or for the use of, or the right to use, industrial, commercial or scientific equipment, or for information concerning industrial, commercial or scientific experience. A 5% withholding tax rate is levied on any
copyright of literary, artistic or scientific work, excluding computer software and including
cinematographic films or tapes used for radio or television broadcasting.
78. No withholding tax is levied on interest paid to a contracting state, one of its political
subdivisions or one of its local entities, interest paid in connection with the sale on credit
of merchandise or equipment to a company of a contracting state or interest paid on any
long-term loan (seven years minimum) granted by a bank resident in a contracting state.
79. No withholding tax is levied on interest arising from the credit sale of industrial,
commercial or scientific equipment or merchandise.
80. A 10% withholding tax rate is levied on interest received by financial and insurance
entities. No withholding tax is levied on interest from loans granted by the government,
Central Bank or certain institutions.
81. A 5% withholding tax rate is levied on royalties for copyright (excluding films), whilst
an 8% withholding tax rate is levied on fees for leases of industrial, commercial or
scientific equipment.
82. A 4.95% withholding tax rate is levied on interest received by financial and insurance
entities. No withholding tax is levied on interest from loans granted by the government,
Central Bank or certain institutions.
83. No withholding tax is levied on interest if: (a) the recipient is the other contracting state, its
central bank or its political divisions; (b) the interest is paid by one contracting state or its
political divisions; (c) the interest arises from a loan or credit granted or guaranteed by a
contracting state to promote exports and development; (d) the recipient is a pension fund
qualifying for tax purposes in a contracting state and the income generated from the fund
is tax exempt in the contracting state paying the dividend; (e) the interest is paid in relation
to the credit acquisition of industrial, commercial or scientific equipment.
84. The withholding tax rate is 10% if the interest arises from a loan granted by a bank or is
related to a credit acquisition of merchandise or equipment.
85. Leased if the recipient is a shareholder of the paying company with at least a 50% interest.
86. A 5% withholding tax rate is levied for long-term loans (more than seven years).
87. No withholding tax is levied on dividends when they are paid to a shareholder with at least
a 25% interest held for at least two years, provided that the company distributing the
dividends is effectively taxed.
88. No withholding tax is levied if the royalties are paid between associated companies,
affiliated by at least a 25% direct interest held for at least two years or both held by a third
company with at least a 25% interest in both companies and corporate income tax is
levied on all of the companies.
89. Leased if the recipient is a shareholder of the paying company with at least a 50% interest.
A 10% withholding tax rate is levied if the recipient is a company with at least a 25%
direct interest; otherwise a 15% rate is levied.
90. Leased if the recipient is a shareholder of the paying company with at least a 10% interest;
otherwise a 15% rate is levied.
91. No withholding tax is levied on interest paid to a bank resident in Switzerland on a
long-term loan (over five years).

**Tax administration**

**Tax returns**
The tax system in Spain is a system of self-assessment and tax returns may be inspected
by the tax authorities. The tax year for corporate income tax purposes is the company’s
accounting year. The tax year cannot exceed 12 months and therefore commencement,
termination or change of a tax year can give rise to a period of less than one year.

**Payment of corporate income tax**
For corporate income tax, three on-account payments of the annual tax payment
should be made during the first 20 calendar days of April, October and December.
Large companies should calculate these advance payments as a percentage (21%)
of their annual tax profits or each period, i.e., at 31 March, 30 September and 30
November. Some allowances and the tax year’s advance payments can be credited
against this percentage of tax profits. Small companies can opt to calculate their
advance payments in the same way as large companies or to apply a rate (currently 18%) on their last corporate income tax liabilities paid for the previous period (on 1 April, 1 October or 1 December).

Annual corporate income tax returns should be filed and the tax paid within 25 calendar days following the six months subsequent to the end of the tax year (i.e., if the tax year coincides with the calendar year, the return should be filed between 1 July and 25 July of the following calendar year).

Other issues

Special tax regime applicable in the Basque country
The three provinces that make up the region of the Basque country (Alava, Guipúzcoa and Vizcaya) have an “economic agreement” with Spain’s central government (laid down and regulated by Law 12 of 23 May 2002) in accordance with which these regions are granted the right to regulate their own tax regimes.

There are certain provisions in this law regarding corporate income tax, which make this area of Spain more attractive for companies.

General tax rate
The general tax rate is 28%.

Lower tax rates
A reduced rate of 24% is levied on small companies. From 1 January 2010, a small company is considered to be a company which meets the following requirements in the year prior to the application of the special tax regime:

- Carries on an economic business activity;
- Its net turnover or assets are under EUR 10 million;
- Its average number of staff is under 50; and
- An interest of 25% or more in the company is not held, directly or indirectly, by a company that does not meet the previous requirements.

A 20% rate (24% in Guipúzcoa) is levied on real estate companies which comply with the following requirements:

- Their share capital is wholly owned by individuals during the whole tax year;
- More than half of their assets are securities or more than half of their assets are not used for economic business activities during at least 90 days of the tax year; and
- At least 90% of their profits are generated from investment income and capital gains.

A 21% rate is levied on companies that are floated on the Bilbao Stock Exchange and for brokerages and cooperatives. Companies that are floated on the Bilbao Stock Exchange are taxed at this rate for three years, as long as they are in the compliance of certain requirements.

Tax-loss carryforwards
Tax-losses may be carried forward for the following 15 years in Guipúzcoa. In Vizcaya and Alava, there is no time limit for the offsetting of tax losses.
**Spain**

*Tax deductibility of amortisation of goodwill and intangible assets*

Amortisation recorded for intangible assets (irrespective of whether they have a specific useful life or not), including goodwill, is tax deductible up to a maximum annual limit of 20% on the compliance of the following requirements:

- The assets have been acquired for consideration; and
- The acquiring and transferring companies are not associated parties.

*Financial goodwill*

Financial goodwill is tax deductible over a period of five years when at least a 5% interest is acquired in the company and these shares are not quoted on a Stock Exchange or if they are quoted on a Stock Exchange, they are shares of group or associated companies.

If the company from which the shares have been acquired has an interest in another company, the equity, assets and rights recorded in the group’s consolidated annual accounts should be taken into consideration for the purpose of calculating the amount of the financial goodwill.

If the company from which the shares have been acquired is a non-resident company, in addition to the requirements stated above, the following requirements should be complied with:

- The company is taxed in its country of residence by a tax which is identical or similar to Spanish corporate income tax; and
- The company carries on business activities abroad.

If the shares are not acquired on a stock market, the company which acquires the shares should not be in any of the situations provided for in Article 42 of the Spanish Commercial Code in relation to the transferring company.

*Depreciation periods*

The depreciation periods for assets are shorter than those under state corporate income tax law.

*Reinvestment of extraordinary income*

Income obtained from the sale of tangible fixed assets or intangible assets can be deducted from taxable income on the compliance of the following requirements:

- The amount obtained from the sale is reinvested in similar types of assets within a four-year period (as from one-year prior to the sale up to three years after the sale); and
- The asset in which the reinvestment is made is maintained for five years (three in the case of movable assets) unless its useful life is shorter; and
- For sales of shares in other companies when the interest held is at least 5% and it is has been held for a period of one year prior to the date of the sale, 60% of the income obtained from the sale can be deducted from taxable income.
Spain

Income generated from intellectual or industrial property
30% of the income obtained from the transfer of intellectual or industrial property rights can be deducted from taxable income on the compliance of certain requirements, and 60% if the company has created the intellectual or industrial property itself. There are no quantity limits to be complied with for the application of this deduction.

Tax credits
Investments in new tangible fixed assets
A 10% tax credit can be availed of for investments made in new tangible fixed assets on the compliance of certain requirements. The minimum depreciation period for the assets, excluding computer equipment, is five years.

The total amount of the investment is over EUR 60,100 and the investment complies with at least one of the following requirements:

- Exceeds 10% of the carrying amounts (minus depreciation/amortisation) of the company's tangible fixed assets, buildings and software during the previous year; and/or
- Exceeds 15% of the carrying amount of the same type of tangible fixed assets of the company during the previous year.

Special reserve for investments in production
A tax credit can be applied for the distribution of profits to a special reserve for investments in production on the compliance of the following requirements:

- The company invests the amount distributed to the reserve in new tangible fixed assets during the following two years;
- These assets are maintained by the company during a five-year period or during their useful life if it is less than five years; and
- The company's shareholder's equity is increased by the amount distributed to the reserve and this increase is maintained for a five-year period as from the date on which the investment was made.

The tax credit is 10% of the profits distributed to the reserve.

Research and development (R&D)
A 30% tax credit can be availed of for expenses incurred from R&D activities. If the expenses are higher than the average expenses incurred by the company during the previous two years, the tax credit is 50% for the excess amount.

An additional tax credit of 20% can be availed of for the following expenses:

- Staff expenses incurred for staff exclusively carrying out and qualified to carry out R&D activities; and
- Expenses incurred for projects contracted from certain universities and public organisations.

A 10% tax credit can be availed of for investments made in tangible fixed assets (excluding buildings) and intangible assets which are exclusively assigned to R&D activities.
Technological innovation
A 20% or 15% tax credit can be availed of for certain expenses incurred for technological innovation.

Expenses incurred for environmental conservation and improvement and for conservation of energy
Companies are eligible for a 30% tax credit for investments made in the equipment listed in the Basque List of Environmental Technologies on the compliance of certain requirements.

Companies may also qualify for a 15% tax credit for investments made and expenses incurred in tangible fixed assets on the compliance of certain requirements.

Export investments (e.g., foreign advertising, formation of companies and branches abroad)
This tax credit is the same as the credit available under State corporate income tax law.

Staff training
A 10% tax credit can be applied for expenses incurred in staff training. If the expenses are higher than the average expenses incurred by the company during the previous two years, the tax credit is 15% for the excess amount.
A tax credit can also be applied for expenses incurred for the obtaining of the OHSAS 18001 certificate and for training staff in new technologies.

Job creation
For tax years commencing during the period 1 January 2010 to 31 December 2011, the following tax credits can be availed of for job creation on the compliance of the requirements stated:

- EUR 4,600 for each job created provided that a permanent employment contract is signed with the employee;
- EUR 8,600 for each job created provided that a permanent employment contract is signed with the employee and a person who has special difficulties in finding employment is contracted; and
- The company’s average number of staff with permanent employment contracts should be increased by at least the same number of contracts that generated the tax credit and this increase should be maintained by the company for two years.

Time limits for the application of tax credits
In Guipúzcoa, tax credits can be carried forward for a period of 15 years as from the date on which the company qualifies for them. In Vizcaya and Alava there is no time limit for the application of tax credits.

Limits of the amount of tax credit applied
The combined sum of all investment tax credits, excluding those for R&D and technological innovation, may not exceed 45% of the company’s corporate income tax liability.

Significant developments
As of 1 May 2009, a 3% Nation Building Tax (NBT) is payable on the “liable turnover” by every person (a person includes any company, body of persons or any partnership) who imports any article, carries on the business of manufacture or carries on the business of providing a service of any description.

Taxes on corporate income
Resident companies and public corporations are liable for income tax on their worldwide taxable income. The rate of tax in general is 35% (33⅓% for any quoted public company, for five years from the year in which it becomes a quoted public company, and 15% for any company other than a holding company, a subsidiary company or an associate company of a group of companies, of which the taxable income does not exceed Sri Lankan Rupee (SRL) 5 million). A lower rate of 15% applies to profits from exports, fisheries, tourism and construction. The 15% rate applicable to the construction industry is restricted to resident companies only.

Public corporations are also subject to tax of an additional amount, the excess (if any) of 25% of the balance of profits left after deduction of the income tax payable at 35% or 15% over the amount of gross dividends distributed out of profits on which taxable income is computed.

In addition, income tax is payable at 10% of the gross dividends distributed by a resident company, other than such dividends distributed out of any dividend received from another resident company (and few other exceptions).

Deemed dividend tax at 15% is payable by any resident company in any tax year commencing from the tax year 2007 to 2008, if the said company has, in the preceding tax year, distributed dividends of less than 25% of the distributable profits (duly defined) for that preceding tax year.

Unit trusts and mutual funds are treated like resident companies for income tax purposes. Units of investment are treated like company shares, and returns thereon to investors are treated like company dividends. The tax rate is 10% on the profits derived by any unit trust or mutual fund.

The tax rate applicable to venture capital companies is 20%.
Non-resident companies are liable to income tax at 35% (or 15%, if the taxable income does not exceed SRL 5 million) of their Sri Lanka-source taxable income. Where profits are remitted in a tax year, tax is also payable in an amount equal to 10% of the remittances.

**Corporate residence**

Where a company has its registered or principal office in Sri Lanka or where the control and management of its business are exercised in Sri Lanka, the company is treated as resident for tax purposes.

**Other taxes**

*Economic service charge (ESC)*

The ESC is payable quarterly by every person (a person includes a company) and every partnership in respect of the aggregate turnover of the trade, business, profession or vocation at the rates varying from 0.05% to 1%, depending on the business activity, if the total turnover exceeds SRL 7.5 million for that quarter. ESC so paid is deductible from the income tax payable for that year of assessment. ESC is not refundable but could be carried forward for four immediately succeeding tax years and set-off against the income tax payable for those four tax years. Maximum ESC payable for any quarter is SRL 30 million.

*Social responsibility levy*

Social responsibility levy is payable by every company on the amount of income tax, dividend tax, deemed dividend tax and remittance tax chargeable at 1.5%. The payment should be made at the time of payment of income tax, dividend tax, deemed dividend tax and remittance tax.

*Nation building tax (NBT)*

NBT is chargeable from every person (person includes any company, body of persons or any partnership) who imports any article on the “liable turnover” from such importation, and who carries on the business of manufacture of any article or carries on the business of providing a service of any description on the liable turnover of the relevant quarter at the rate of 3% (1.5% rate is applicable to the “liable turnover” of rice manufactured from locally produced paddy). Certain specified articles or services are exempt from NBT.

Liable turnover means:

- In the case of importer; the value of any article ascertained under section 6 of the Value Added Tax Act for the purpose of importation.
- In the case of manufacturer; the proceeds receivable whether received or not from the manufacture and sale in Sri Lanka.
- In the case of service provider; the proceeds receivable whether received or not.

Bad debts, VAT and excise duty should not include to the liable turnover.

*Construction industry guarantee fund levy*

Construction industry guarantee fund levy is payable by each construction contractor or subcontractor on their contract value arising from any contract entered into,
calculated at the rates varying from 0.25% to 1%, depending on the value of the construction contract.

**Tourism development levy**
Tourism development levy is payable by tourist hotels and institutions licensed under the Tourist Development Act on the turnover of such institution at the rate of 1%.

**Employees’ provident fund**
Employers and employees are required to contribute specified percentages (employer, 12%; employee, 8%) of each employee's monthly emoluments/salary to the Employees Provident Fund (EPF) established by the Government. Alternatively, employers and employees must contribute to certain private provident funds approved by the labour authority.

**Employees’ trust fund**
Employers are also required to contribute a specified percentage (currently 3%) of each employee’s monthly emoluments/salary to the Employees Trust Fund established by the government.

**Turnover tax**
In terms of the Provincial Council Statutes, turnover tax at rates varying from 1% to 5% of turnover continues to be charged on any person who buys and sells articles in any area of Sri Lanka.

**Value-added tax (VAT)**
VAT is payable on imported goods and on the supply of goods (excluding in particular the supply to merchants who purchase goods locally) and services in Sri Lanka. Provisions are made for filing returns monthly or quarterly, based on specified criteria. Even where returns could be filed quarterly, the tax payments are required to be made on a monthly basis. Certain specified imports and domestically supplied goods and/or services are exempt.

The tax is payable on the prescribed valuations of imports and domestic supplies at a standard rate of 12%. There is also a higher rate of 20% for luxury items. Exports and certain specified international services are zero-rated. No registration for VAT is necessary if the total value of taxable supplies in a quarter is SRL 650,000 or less, or SRL 2,500,000 or less in a year. The input tax paid on the imports and supplies of goods (including capital goods) and services in a month, and used in the business of making taxable supplies in that month can be deducted from the tax payable (output tax) on such supplies, subject to a limitation of lesser of 85% of output tax or the actual input tax paid.

Refunds of excess tax paid are available to zero-rated supplies, to suppliers who are qualified to issue suspended tax invoices and to new businesses registered under Section 22 (7) of the VAT Act.

**Excise duties**
Excise duties and special excise levies are charged on tobacco, cigarettes, liquor, motor vehicles, selected petroleum products, paints, air conditioners, dishwashers, household washing machines and other products.
Stamp duty
Stamp duty is payable on specified instruments and documents at rates prescribed in the Gazette.

Share transaction levy
The Share transaction levy at the rate of 0.2% is chargeable from the buyer and from the seller on the sale of listed shares.

Local taxes
Taxes (more usually called rates) are currently assessed and collected annually from the owners of land and premises by the local authorities of the areas in which the properties are located. These authorities also charge and collect annual licence fees from certain businesses as well.

Branch income
Foreign companies are permitted to register a place of business in Sri Lanka or to be registered as an overseas company under local company law, where the business carried on conforms to the stipulations made under the exchange control law.

In addition to paying the standard corporate income tax, branches are subject to a 10% tax on remittance to a foreign head office.

The Sri Lanka-source income of foreign companies from a local 'place of business' is taxed at the non-resident company rates mentioned above. However, under most double-taxation-avoidance treaties that Sri Lanka has entered into, the income of a turnkey or service project will not be liable to income tax if its duration is less than a period specified in the treaty concerned. Where branch or project income is liable to income tax but the income is not readily ascertainable, the tax authority may prescribe that the income be computed on a fair percentage (not less than 6%) of the branch or project turnover in Sri Lanka.

Income determination
Business accounting for income tax purposes should, unless otherwise specified by the tax statute, conform to Sri Lanka Accounting Standards, which have been given statutory force by legislation enacted in 1995.

Inventory valuation
Inventories should be measured at the lower of cost and net realisable value.

Capital gains
There is no capital gains tax.

Capital gains from transfer of property are exempt from income tax.
Sri Lanka

**Dividends**
Resident company dividends paid on shares held by resident or non-resident persons are not assessable on the recipients if income tax is withheld on such dividends (see below), or the dividends are exempt from income tax, or the dividends are paid out of dividends received from resident companies.

Stock dividends (or bonus shares, in local parlance) are not taxable in the hands of a shareholder at the time of issue, but where such shares are capitalised out of company profits and there is a return of this capital to the shareholder within six years from the date of issue, the amount of capital returned to the extent of the paid-up value of the bonus shares is treated by definition as a dividend and is taxable in the hands of the shareholder. However, if the shareholder is a company, this dividend may not be assessable, as explained above.

**Deemed dividend**
Deemed dividend tax at 15% is payable by any resident company for every tax year on or before 30 October of that tax year, provided that 25% or more of its distributable profits (duly defined) for the immediate preceding year has not been distributed as dividends on or before 30 September of that year.

**Deductions**
In ascertaining the total income liable to income tax from the financial accounts filed by a company, deductions from revenue are permitted for outgoing and matching expenses incurred in producing the income, including special deductions.

**Depreciation**
An allowance for depreciation for wear and tear, calculated at:

- 33\(\frac{1}{3}\)% for ships if owned by a company for a period of three years;
- 25% of the cost of any information technology and machinery used for the construction industry for a period of four years;
- 20% for a period of five years of the cost of acquisition of any motor vehicle or furniture;
- 12.5% for a period of eight years of the cost of any other plant and equipment; and
- 6\(\frac{2}{3}\)% for a period of 15 years of the cost of any qualified building.

The cost of renewal of any capital asset, if no allowance exists, is deductible for depreciation of that asset.

**Bad debts and doubtful debts**
In the case of a bank or financial institution, deductibility of a specific bad debt provision is restricted to the lesser of the actual amount of the provision or 1% of the aggregate debts as at the end of the period for which profits are ascertained.

**Interest**
Interest paid or payable on borrowings for purposes of business, subject to the thin capitalisation rules pursuant to which, interest payments made between members of a group of companies, including holding companies, will be restricted to the debt equity ratio of 3:1 for manufacturing companies and 4:1 for other companies.
**Sri Lanka**

**Turnover tax**
Turnover tax payable at the provincial level is tax deductible.

**Formation or liquidation expenses of a company**
Termination gratuities paid to employees on cessation of business and annual payments made to an approved fund, held for payment under compulsory legislation of gratuities to employees upon termination of their services are deductible.

**Foreign taxes**
Taxes paid in a foreign country that does not have a tax treaty with Sri Lanka may be deducted.

**Non-deductible expenses**
Deductions not permitted for certain expenses or allowances, in the determination of total income are itemised below:

- Foreign travel expenses incurred in connection with a business, other than those expenses incurred solely in connection with the promotion of the export trade, or the provision of any services for payment in foreign currency or in carrying out an approved programme for the promotion of tourism;
- Business entertainment expenses incurred or entertainment allowances paid to executive officers;
- Any expenditure of a capital nature or any loss of capital, including book depreciation of capital assets;
- Sri Lanka income tax payable or any income tax or other similar tax payable in any country with which Sri Lanka has a double-taxation-avoidance treaty, other than the excess of the foreign-country tax on doubly taxed income over the maximum amount of the credit allowed in the foreign country for the Sri Lanka income tax on that income;
- Any other prescribed tax or levy;
- Depreciation allowances or rentals or annual payments or renewals in respect of vehicles used for purposes of business travel, or capital assets provided for the use of employees at their places of residence, other than motorcycles or bicycles used by non-executive staff and motor coaches used to transport employees to and from their places of work;
- The excess of management fee paid over SRL 1 million or 1% of turnover, whichever is lower, or such amount as may be determined by the tax authority. This restriction does not apply to a venture capital company, unit trust or mutual fund; and
- Input VAT, which is creditable against output VAT.

**Contribution**
Relief is still available as a deduction from assessable income, for contributions in money to an approved charity and contributions in money or in kind to the Government of Sri Lanka. The deduction for the former is subject to a ceiling of one-fifth of the assessable income of the company. In the case of the latter, there is no limit to the deduction and any un-recouped excess of such contributions over the assessable income is available for carryforward deduction from the following year’s assessable income and so on.
**Sri Lanka**

**Interest**
Deductions from the total income from all sources of a company are allowed for any interest payable on loans used for the construction or purchase of any building or the purchase of any site for construction of a building; or for any annuity, ground rent or royalty payable; or for a business loss other than a loss incurred in any business of life insurance and any business of finance leasing, including any loss current or brought forward from a previous year, up to a maximum limit of 35% of the total statutory income in determining the residual balance income, which would be assessable for income tax. Where such deductions exceed the total income, any unrelieved excess is carried forward for deduction in the succeeding tax year from its total statutory income for that year of assessment and so on.

**Royalties**
No deduction is allowed for a royalty payable by a person outside Sri Lanka to another person outside Sri Lanka.

**Losses**
No deduction from total income is allowed in a tax year for a business loss if at any time in that year more than one-third of the issued share capital of the loss-making company is held by persons who did not hold such share capital at any time in the year in which the loss was incurred. In such circumstances, the loss is deferred for deduction only from profits of the particular business in which the loss was incurred.

Any loss incurred in any business of life insurance could be deducted to the extent of any profits from such business included in such total statutory income. Similarly, any loss incurred in any business of finance leasing could be deducted to the extent of any profits from such leasing business included in such total statutory income.

Losses incurred in the creation of a trade or business may be carried forward indefinitely but only up to 35% of statutory income. Carryback of losses is not permitted.

**Group taxation**
There are no special provisions for taxation of companies in a group. Each company is taxed independently of others in the group.

**Tax incentives**
A tax holiday is available to companies engaged in:

1. Agriculture, agro processing, industrial and machine tool manufacturing, machinery manufacture, electronics, export of non-traditional products, or information technology and allied services.
2. Any designated project.
3. An undertaking for large-scale infrastructure development.
4. Small-scale infrastructure undertakings for generation of power, tourism, recreation, warehousing and cold storage garbage collection or disposal, construction of houses or hospitals.

The period of the tax holiday will be determined by reference to the nature of the undertaking and the amount invested in the project.
A tax holiday is available to any company that carries on any specified agricultural undertaking until 31 March 2011.

A five year tax holiday is available to a new venture capital company satisfying specified criteria.

A tax holiday is available to companies that commence new undertaking located outside the districts of Colombo and Gampaha and investing not less than SRL 30 million before 1 April 2009 in plant, machinery, furniture or building (and on land if such undertaking is an agricultural undertaking).

Exemption from income tax is granted for profits from relocated undertakings in relation to any company that has relocated outside the districts of Colombo and Gampaha and, which prior to 1 November 2005, was being carried on in a location within the districts of Colombo or Gampaha.

A five-year tax holiday is granted for the profits from the new undertaking of a company that is engaged solely in research and development in the field of science or technology with the object of using the results thereof for the production or improvement of products with a minimum investment of SRL 2 million.

Exemption from income tax is granted on the profits and income earned in foreign currency, remitted to Sri Lanka net of expenses (considered reasonable by the tax authority), by a resident company in respect of services (including a construction project) rendered outside Sri Lanka (previously, these profits were taxable at 15%).

Exemption from income tax is granted on the profits and income earned in foreign currency by any resident company, any resident individual or any partnership in Sri Lanka from the services rendered in or outside Sri Lanka in respect of any profession or vocation as is specified by the Commissioner General by notice published in the Gazette, if such profits and income (less such amount, expended outside Sri Lanka as is considered by the Commissioner General to be reasonable expenses) are remitted to Sri Lanka through a bank.

Exemption from income tax is granted on the profits and income for the period from 1 April 2009 to 31 March 2011 earned in foreign currency by any resident company, resident individual, or any partnership in Sri Lanka, from any service rendered in or outside Sri Lanka to any person or partnership outside Sri Lanka if such profits and income (less such amount expended outside Sri Lanka as is considered by the Commissioner General to be reasonable expenses) are remitted to Sri Lanka through a bank.

Exemption from income tax is granted in respect of dividends or interest received on the investment made outside Sri Lanka, provided that dividends and interest are remitted to Sri Lanka through a bank.

New or existing companies that export non-traditional goods are entitled to be taxed on the profits from these exports or services at a concessionary rate of 15% for a period of 20 years, ending on 31 March 2014 and 2015, respectively. Dividends paid by such companies out of profits earned from the exports of non-traditional goods, which are taxed at 15%, are in turn liable to tax of 10% in the hands of corporate shareholders where the income tax is already withheld from the dividends (see below).

Corporate profits from fisheries, construction and tourism are taxed at 15%. A company that produces or manufactures non-traditional goods and supplies these to a company for export or for use in the production or manufacture of goods for export by the latter company is entitled to be taxed on the profits from such supplies at a concessionary rate of 15%, provided the exporting company to which the goods are supplied is entitled to be taxed as mentioned above and the tax authority is satisfied that the goods supplied have been exported.
Sri Lanka

- Exemption from income tax is granted on the profits arising from trading in shares, rights to any share, bonus or share warrants in respect of which the share transaction levy has been charged.
- Exemption from income tax is granted on an amount equal to the interest or the discount paid or allowed to any non-resident person or to any licensed commercial bank in Sri Lanka by the issuer of any sovereign bond denominated in foreign currency, issued on or after 21 October 2008, by or on behalf of the government of Sri Lanka and on the profits and income from the sale of such sovereign bond.
- Exemption from income tax is granted on an amount equal to the interest or the discount paid or allowed to any person on or after 1 April 2009, on any Sri Lanka Development Bond denominated in United States dollars, issued by the Central Bank of Sri Lanka and on the profits and income from the sale of such Sri Lanka Development Bond.
- Exemption from income tax is granted on the profits and income derived by or accruing to any person or partnership from investment in Economic Resurgence Certificates, utilising money lying to credit of any account opened in any commercial bank or in any specialised bank with the approval of the Central Bank of Sri Lanka from and out of monies deposited in such account on or after 1 February 2009.
- Tax holidays outside the purview of the tax statute are also available in specified areas of investment to companies that enter into agreements with the Board of Investment of Sri Lanka (BOI). The specified areas include non-traditional export-oriented manufacturing and thrust industries, export-oriented services, large-scale projects of which the project cost exceeds SRL 500 million. Generous waiver of import duties on specified imports and other concessions are also available for these companies.

**Withholding taxes (WHT)**

Resident companies are entitled to withhold income tax at 10% of gross dividends payable to any shareholder that is chargeable with income tax, excluding any dividend received from another resident company and any dividend that is exempt from income tax.

Any person in Sri Lanka who pays or credits to a person or partnership outside of Sri Lanka any sum due as interest, rent, ground rent, royalty, or annuity is required to withhold income tax at a rate of 20% of the sum, but the requirement to withhold income tax does not apply to interest not sourced in Sri Lanka, or to interest on any loan or advance made by a banker or to interest paid on foreign currency held in an account with a foreign currency banking unit.

In particular instances, the tax authority may prescribe that income tax be withheld at a rate other than 20%, or the rate may be reduced for sums falling due as interest or royalties in respect of persons resident in countries with which Sri Lanka has double taxation treaties in force. Sri Lanka-source income from loan interest or royalties accruing to a non-resident company is taxed at a flat 20%, in the absence of a lower rate in the tax treaty with the home country of the non-resident.

Every bank and financial institution is required to withhold income tax at 10% on the amount of any interest paid on any sum of money deposited with it. The depositor is entitled to receive a certificate setting out the gross amount of interest, the amount of tax withheld and the net amount of interest paid. With respect to Treasury bills and
Treasury bonds issued by the Central Bank, the withholding tax rate of 10% applies to an investor from any country.

Every person or partnership that pays a fee to another person or partnership in consideration for services rendered by the latter in the course of any business, profession, vocation or activity of an independent character is required to withhold income tax at 5% of such fee and furnish a certificate to the payee similar to that described above. The withholding requirement is extended to any commission, brokerage fee or other income of a like nature, and also to any payment for supply of an article on contract through a tender or quotation.

Notes

The numbers in parentheses refer to the notes below.

1. 0% for copyright royalties.
2. 0% in certain circumstances.
3. 50% of normal tax.
4. These treaties are limited to the avoidance of double taxation of income from international transport by air.

Tax treaties with the following countries, which are in different stages of negotiation or finalisation, await entry into force: Austria, Bulgaria, Jordan, Lebanon, New Zealand, the Philippines, Egypt, South Africa and Cyprus.

New proposals from Croatia, Ukraine, Saudi Arabia and Luxembourg were received.

**Tax administration**

A tax year is any period of 12 consecutive months reckoned from 1 April in any calendar year to 31 March of the following year.

Sri Lanka has a pay-and-file system under which the income tax payable for each tax year is required to be paid in four instalments, on or before 15 August, 15 November and 15 February of the tax year and the 15 May immediately following the end of the tax year. If each instalment is not less than one-quarter of the income tax payable for the tax year immediately preceding, the balance of any income tax payable may be paid on or before 30 September immediately following the end of the tax year without incurring penalties.

Significant developments

In April 2010, the Government of the Federation of St. Kitts and Nevis (St. Kitts-Nevis) released a white paper on value-added tax (VAT) which it proposes to introduce in November 2010.

Taxes on corporate income

Corporate tax is currently imposed at a rate of 35% on all companies except exempt companies or enterprises that have been granted a tax concession. A company which carries on business exclusively with persons who are not resident in the Federation is exempt from all income, capital gains and withholding taxes. Companies registered under the Condominium Act are governed by that act and are not required to pay corporate tax.

Corporate residence

A corporation is deemed to be resident if it is incorporated in St. Kitts-Nevis or if it is registered as an external company doing business in St. Kitts-Nevis under the Companies Act.

Other taxes

Life insurance premium tax
A premium tax of 5% is levied on the premium income of all life insurance companies, whether resident or non-resident. In addition, a registration fee of East Caribbean dollar (XCD) 2 per XCD 1,000 or XCD 30, whichever is less, must be paid to the Comptroller of Inland Revenue.

General insurance premium tax
A premium tax of 5% is levied on the premium income (net of agent’s commission) of all general insurance companies, whether resident or non-resident.

Stamp duty on the transfer of property
Stamp duty is levied on the consideration for the sale or the value of the property as assessed by the Property Valuation Officer, whichever is higher.

The vendor is responsible for the payment of all stamp duty on property transfers on the following basis:
St. Kitts and Nevis

a. Transfer of property for consideration in money or value in kind of not less than the value of the property
   12%

b. Transfer of property for consideration in money or value in kind of less than the value of the property
   12%

c. Transfer of property without consideration in money or value in kind
   6%

d. Transfer of property in any Special Development Area other than the South East Peninsula
   14% (on the consideration or market value)

e. Transfer of property situated in the South East Peninsula
   18.5%

f. Transfer of property other than stock or debenture stock or funded debt or land
   2%

g. Transfer of property between husband and wife and between parents and children and vice versa
   XCD 100

h. Transfer of land by will or by similar instrument
   XCD 100

i. Transfer of registered condominium units
   5%

Where a developer has obtained concessions in connection with a house or building constructed on the land being transferred, the developer will be required to pay stamp duty on the same basis as noted in a., b. and c. above.

Where a developer has obtained concessions in connection with a house or building to be constructed on the land being transferred, then the developer will be required to pay stamp duty initially on the land on the same basis as noted in a., b. and c. above. However, when the house or building is subsequently constructed on the land with the aid of the concession, the owner of the building shall pay stamp duty on the house or building as provided in a., b. and c. above as if the concessions or any part thereof had not been utilised.

Where a developer has not obtained concessions in connection with a house or building constructed on the land being transferred, the developer will be required to pay stamp duty on the same basis as noted in a., b. and c. in respect of the land only.

**Stamp duty on the transfer of shares**

Stamp duty is levied on the value of the consideration for the sale of shares or debentures issued by or on behalf of a company or at the value assessed by the Property Valuation Officer, whichever is higher. The stamp duty is levied at a rate of 2%. If the company owns property and its value exceeds 50% of the value of the company’s assets then the stamp duty would be calculated using the applicable rate on the transfer of property.

**Stamp duty on mortgages**

Stamp duty is levied on the total amount secured and is applicable to both the registration and discharge of the mortgage. The standard rate is 1% and, for amounts secured in relation to a Special Development Area, the rate is 2%.

**Stamp duty on bank loans to aliens**

Stamp duty is levied on the total amount of the loan. The standard rate is 2.5% and, for loans to finance development in a Special Development Area, the rate is 5%.
Alien land holding licenses

To hold property as an owner, a non-citizen must first obtain an alien land holding licence and pay 10% of the market value of property or XCD 750, whichever is greater.

A non-citizen is required to obtain a licence to hold shares in a company which owns land, to vote at shareholders meetings of the company and to be a director of the company. Each licence costs XCD 250.

If a non-citizen purchases property in the Frigate Bay area then there is no requirement to obtain a licence and only a minimal fee of XCD 50 is payable.

If a non-national wishes to purchase land in the South-East Peninsula the non-national is required to obtain a licence prior to purchasing the property however, the payment of the 10% licence fee would be waived.

Property Tax – St. Kitts

Property tax is levied at varied rates on the basis of the market value of the real property (including land and building as assessed by the Chief Valuation Officer) and its class.

Property classes and rates of tax are as follows:

<table>
<thead>
<tr>
<th>Property Class</th>
<th>Rate</th>
</tr>
</thead>
<tbody>
<tr>
<td>Residential use property</td>
<td>0.2%</td>
</tr>
<tr>
<td>Commercial use property</td>
<td>0.3%</td>
</tr>
</tbody>
</table>

Annual allowances and tax rebates are available as follows:

1. Residential use property and condominium allowance of XCD 80,000 from the taxable value.
2. No property tax will be assessed on any buildings, condominiums etc. that are under construction.
3. New residential use property and condominiums are exempt from tax for one year from the date certified by the valuation officer.

Properties located in the South East Peninsula are assigned values based on fixed rates for land (XCD 20 per square ft.) and building (XCD 300 per square ft.). Property tax is then applied at a rate of 0.2%.

Where property situated in the South East Peninsula area is not developed within five years, a surcharge can be assessed at the rate per annum of 1% of the assessed market value and increased annually at the rate of 1% per annum thereafter until it reaches a maximum rate of 5% of the assessed market value while the property remains undeveloped. If property is less than one acre and undeveloped and owned by a resident for the purpose of erecting a house, such property shall be exempt from the surcharge upon application in writing to the Comptroller of Inland Revenue.

Property tax is payable on or before 30 June of each year. Tax is deemed to be in default if not paid within 30 days of becoming due. Interest is charged at a rate of 12% per annum on the unpaid taxes.
St. Kitts and Nevis

**Property tax – Nevis**
Property tax is levied at varied rates on the basis of the market value of the real property (including land and building as assessed by the Chief Valuation Officer) and its class.

Property class and rates are as follows:

**Residential**
- Building: 0.156%
- Land: 0.075%

**Commercial**
- Building: 0.3%
- Land: 0.2%

**Accommodation**
- Building: 0.3%
- Land: 0.2%

**Certified farming**
- Building: 0%
- Land: 0.01%

**Institutional**
- Building: 0.2%
- Land: 0.15%

Accommodation use property is defined as property for short term accommodation and includes a guest house.

Commercial use property is defined as property which does not include accommodation use property or property used for certified farming operations.

Annual allowances and tax rebates are available as follows:

1. Residential use property and condominium allowance of XCD 80,000 from the taxable value.
2. No property tax will be assessed on any buildings, condominiums etc. that are under construction.

Property tax is payable on or before 30 June of each year. Tax is deemed to be in default if not paid within 30 days of becoming due. Interest is charged at a rate of 12% per annum on the unpaid taxes.

**Value-added tax (VAT)**
There is currently no VAT. However, legislation is being drafted to introduce VAT in November 2010.

**Hotel accommodation and restaurant tax**
Hotel and restaurant tax is levied on the room revenue and revenue from food as follows:
St. Kitts and Nevis

- Hotel and accommodation and restaurant tax: 7%; and
- Island enhancement fund: 2%.

This tax is paid monthly and must be remitted to the Inland Revenue Department by the 15th of the following month. Interest at a rate of 1.25% per month or 15% per annum is charged on unpaid taxes in default.

These taxes will be repealed when VAT is introduced.

**Branch income**

Branch income is taxed on the same basis and at the same rate as the income of a corporation. Recharges of expenses from head office to the branch will be subject to withholding tax at a rate of 10%; however the recharges have to be justified and cannot be based on a percentage allocation.

A resident branch of a foreign company shall be regarded as a separate company and shall be taxed on the same basis as that of a locally registered corporation.

**Income determination**

**Inventory valuation**

Inventories are generally stated at the lower of cost or net realisable value. The first-in, first-out (FIFO) and average cost methods of valuation are generally used for book and tax purposes. However, the Comptroller of Inland Revenue will normally accept a method of valuation that conforms to standard accounting practice in the trade concerned. The last-in, first-out (LIFO) method is not permitted for tax or book purposes.

**Capital gains**

Capital gains tax will be imposed if an asset is sold within one year of the date of acquisition. The maximum rate of tax will be one half the corporation tax rate, which is 35%. Assets sold after one year will not attract capital gains tax.

**Inter-company dividends**

Dividends received by a company resident in St. Kitts-Nevis from another company resident in St. Kitts-Nevis are taxed at source at the rate of 35%. Credit is given to the recipient for the tax on the dividend in computing the tax liability.

**Foreign income**

A St. Kitts-Nevis corporation is taxed on foreign branch income when earned and on foreign dividends when received. Double taxation is avoided by means of foreign tax credits where active tax treaties exist and through deduction of foreign income taxes in other cases (the United Kingdom (UK), and the Caribbean Community (CARICOM)).

**Deductions**

**Depreciation and depletion**

Depreciation allowed for tax purposes is computed by the diminishing-balance method at prescribed rates. An initial allowance of 20% is granted on industrial buildings or structures and in respect of capital expenditure incurred on plant and machinery by a person carrying on a trade or undertaking, as defined. In addition, an annual
allowance of 2% – 5% is allowed on all buildings constructed after 1 March 1994. Concrete buildings are depreciated at a rate of 2% while the rate varies for other buildings depending on the type of material used in construction. Conformity between book and tax depreciation is not required. Any gain on the sale of depreciated assets is taxable as ordinary income up to the amount of tax depreciation recaptured. Initial allowances and annual allowances cannot reduce the tax that would have been otherwise payable by more than 50%. Any initial allowance or annual allowance not utilised may be carried forward indefinitely.

**Contributions to a pension fund**
Contributions made by an employer to a pension fund (approved by the Comptroller) on behalf of its employees up to a maximum of 5% of annual earnings of the employee or a maximum of XCD 2,000. Application should be made to the Ministry of Finance or to the Pension Fund Committee.

**Net operating losses**
Income tax losses may be carried forward for five years following the year in which the loss was incurred. However, the chargeable income of a company after deducting initial and annual capital allowances in any one income year may not be reduced by more than 50% by losses brought forward. No carryback of losses is permitted.

**Payments to foreign affiliates**
A company incorporated in St. Kitts-Nevis may claim a deduction for royalties, management fees and interest charges paid to foreign affiliates, provided the payments are equal to or less than what the corporation would pay to an unrelated entity. The deductibility of any payments to a foreign affiliate will be subject to an arm’s-length test and withholding tax would be payable at a rate of 10%.

**Non-deductible expenses – restriction on compensation**
Salaries, wages, leave pay, fee, commission, bonus, gratuity, or any other perquisite or such other payment which an employee of a company receives in the course of his employment or the value of any benefit to such employee or to any member of his family in excess of XCD 60,000 per annum would not be allowed as a deduction from chargeable profit.

**Non-deductible expenses – restriction on bad debts**
Specific bad or doubtful debts in excess of 5% of total trade receivables will not be allowed as a deduction.

**Group taxation**
Group taxation is not permitted.

**Tax incentives**

**Inward investment and capital investment**
Tax incentives are currently available under the following legislation.

*Income Tax Act, No. 17 of 1966*
The Act provides that if a hotel is licensed under the Hotel Aids Ordinance and constructs a hotel with in excess of 30 bedrooms, the hotel will receive an exemption from income tax for a period of 10 years beginning on the day it is first open for
business. If the hotel has less than 30 rooms then it would be entitled to a five year tax holiday. During the tax holiday period no initial deductions or annual capital allowance deductions shall be allowed. Thereafter, only the annual allowance would be allowed and will be computed on the total capital expenditure incurred during the holiday period less any assets sold. The net losses arising during the tax holiday period (i.e., the excess of accumulated tax losses over total profits) may be carried forward and reduced against profits following the expiration of the tax holiday in accordance with the normal rules for set-off of losses.

The Income Tax Act also provides that if a licence is granted to a pioneer manufacturer under the Pioneer Industries Act the manufacturer is entitled to a five year tax holiday or for such period up to 10 years or as provided in the licence.

**Hotel Aids Act**

The Act provides that a licence may be granted to any person who desires to construct or extend an existing hotel to import building material and equipment as specified in the licence for use in the construction of the hotel and to furnish and equip the hotel. The holder of a licence may not dispose of any hotel equipment within three years of being imported free of duties and taxes. Permission must be received from the Comptroller of Customs to dispose of any building material and hotel equipment within the three year period.

**Fiscal Incentives Act**

The Act provides that if a company is declared to be an approved enterprise to manufacture certain approved products then the manufacturer would be entitled to a tax holiday period of between 10 and 15 years depending on the classification of the approved enterprise. The net losses arising during the tax holiday period (i.e., excess of all losses over all profits) may be carried forward and set-off against profits of the approved enterprise for the five year period following the tax holiday period.

**Other incentives**

Approved manufacturing, agricultural, and tourist ventures are permitted to import building material and equipment free of customs duties.

A Memorandum of Understanding (MOU) between the government and small hotel operators provides for certain conditions under which small hotel operators will be eligible for duty free concessions on the refurbishment of their facilities every seven years, and on food and wine for their restaurant facilities where applicable. For the purposes of this new incentive package, a small hotel is defined as a hotel consisting of at least 10 rooms and not exceeding 99 rooms.

**Withholding taxes (WHT)**

A WHT at the rate of 10% should be withheld from payments made to non-residents in respect of the following:

- Dividends;
- Interest, annuity, premium, and discount;
- Rent, lease, contract, and royalty payments;
- A natural resource payment;
- Commissions, remuneration, fees, and licences;
St. Kitts and Nevis

- Charges for the provision of personal services, commercial advice, and managerial skills;
- Administration, management, or head office expenses;
- Profit;
- Technical, professional, vocational, and any other service fees;
- Accounting, actuarial, legal, and audit expenses;
- Non-life insurance premiums; or
- Any other annual or periodic payment or distribution.

**Tax treaties**

There is a tax treaty with the UK and a double taxation agreement between member states of CARICOM.

**Tax administration**

**Returns**

Taxes are assessed on a fiscal-year basis. The taxpayer must file an information return on Form CIT–01 by the fifteenth of the fourth month after the fiscal year end with the financial statements. The authorities either accept the self-assessment or issue a revised assessment. If a return is not filed on a timely basis the authorities have the power to issue estimated assessments. There is a 2.5% penalty for late filing (minimum of XCD 1). The taxpayer can object to assessments raised within one month and ask the Comptroller of Inland Revenue to review and revise. In the event that the objection is unsuccessful, the taxpayer may appeal to the Commissioners of Income Tax. Assessments may be reviewed and revised by the comptroller within the year of assessment or within six years of the expiration of the assessment year.

**Payment of tax**

Advance tax is payable in quarterly instalments on 15 March, 15 June, 15 September and 15 December of each year and is ordinarily based on the tax chargeable and assessed in the previous fiscal year. The standard amount of each instalment is determined as one-fourth of the tax chargeable in the previous fiscal year. If the assessment for the prior year has not been finalised the Comptroller of Inland Revenue can raise an assessment based on his best judgment.

The balance of tax due after the final assessment is issued, as notified in the assessment, is payable on or before the fifteenth of the fourth month after the fiscal year end. If the Comptroller of Inland Revenue revises the assessment then payment of the balance of taxes due is due one month after the date of issue of the revised assessment.

Tax is deemed to be in default if not paid by the fifteenth of the fourth month after the fiscal year end or within one month of the date of the notice of assessment, whichever is later. Interest of 1% per month or 12% per annum is charged on unpaid taxes in default.

Significant developments

In its annual budget address in April 2010, the government announced its intention to introduce tax reforms, which include the reintroduction of withholding tax on interest paid or accrued to non-residents, an increase in the tax on the use of cellular phones, a change in the property tax regime from the annual rental values to an open market valuation system for assessing residential properties, and an increase in the current rate of stamp duty for the conveyance and transfer sale or otherwise of a debenture, stock, debt or shares in a company. If enacted, the withholding tax rate on interest will be 15%; the tax on the use of cellular phones will increase from 10% to 15%; the property tax rate will change from 5% of the annual rental values to 0.25% of the open market valuation for residential properties; and an increase in the stamp duty from 2% of the nominal value of the shares to 0.5% of the net asset value of the company on a proportional basis. Some of these proposed tax changes have not been enacted to date, and are being reviewed. The following tax reforms that have been enacted are as follows:

1. Effective 1 May, 2010 a tax on the use of cellular phones is now 15% from 10%; and
2. Effective 14 June 2010, all persons making interest payments to non-residents should deduct withholding tax at a rate of 15%.

Taxes on corporate income

Income tax
Resident companies are subject to tax at a flat rate of 30% on taxable income. Companies that, prior to 2003, had tax in arrears, or had not complied with the requirements of the Income Tax Act (Act) were subject to tax at 33.33% until the arrears were paid and the company was compliant. Associations of underwriters are taxed at 30% on 10% of the gross premium arising in St. Lucia, and life insurance companies are taxed at 30% on 10% of the gross investment income arising in St. Lucia.

Corporate residence

Companies are regarded as resident if they are incorporated in St. Lucia, or managed and controlled through a permanent establishment (PE) in St. Lucia. A PE is defined as a fixed place or premises through which the business is wholly or partly carried on.
St. Lucia

**Other taxes**

**Value-added tax (VAT)**
VAT may be implemented in 2011, at the earliest.

**Consumption tax**
Consumption tax is levied on goods manufactured and on a wide range of imported goods. Rates range between 5% and 15%. For manufactured goods, the tax is charged on their open market value. For imported articles, consumption tax is charged as a percentage of the Cost, Insurance and Freight (CIF) value plus customs duty.

**Stamp tax**
Stamp tax is charged on any document that evidences a legal or contractual relationship between two or more parties. Additionally, many types of commercial and legal documents must be stamped, denoting the payment of taxes, which may be either at a fixed rate or at an *ad valorem* rate, depending, for example, on the value of the property transferred.

Stamp duty payable on the conveyance or transfer sale of immovable property, if paid by the purchaser is 5% *ad valorem*; if paid by the vendor where the vendor is not a citizen of St. Lucia or is a foreign company is 10% *ad valorem*; where the vendor is a citizen of St. Lucia or is a local company: (a) 2.5% *ad valorem* from XCD 50,000 to XCD 75,000 (b) 3.5% *ad valorem* from XCD 75,001 to XCD 150,000 and (c) 5% *ad valorem* from XCD 150,001 and over. The current rate of stamp tax under the stamp duty regulations for the conveyance, transfer sale of the debenture, stock, debt or shares of a company is 0.5% of the net asset value of the company, on a proportional basis.

The current regulations do not specify who pays the stamp duty on the transfer of shares, but the current practice is that the purchaser pays the 0.5% based on a recent balance sheet of the company. The government now proposes that the stamp duty on the sale of a company that owns immovable property would be the greater of 0.5% of the net asset value of the company, or the current stamp duties on the sale of the immovable property.

**Commercial property tax**
Commercial property tax is currently assessed at 0.25% of the open market value of the property. The owner is required to obtain a commercial valuation assessing the open market value of the property. All new commercial properties completed after 1 April 2001 can benefit from a three-year tax exemption from commercial property tax. The government now proposes an increase in the tax rate from 0.25% to 0.4% but no change to the current system has been enacted.

Residential property tax currently is charged on the annual rental value of property at the rate of 5%. Certain exemptions exist for new homeowners. The government now intends to change the property tax regime to an open market valuation system. Under the new regime, the rate will change to 0.4% of the open market valuation.

**Transfer tax**
Transfer tax is not applicable.
**Turnover tax**
Turnover tax is not applicable.

**Registration tax**
Registration tax is not applicable.

**Custom duty tax**
Customs duties are charged on a wide range of imported goods. Exemptions are granted for raw materials and plant and machinery used in manufacturing and for certain items imported by hotels under construction, extension or refurbishing projects.

**Excise tax**
Excise taxes are imposed on home-produced goods, mainly liquor, beer and cigarettes. ECD 1.44 per litre of liquid applies to beer in glass bottles and ECD 3.50 per liquid gallon applies to beers in metal cans. There is also an excise tax on fuel when fuel is imported by a wholesaler. Tax is included on the price of fuel paid at the gas pump. The tax rate formula is based on the current price provided by the supplier and regulated price at the gas pump.

**Branch income**
The tax rate on branch income is the same as that on income earned by resident companies. No additional tax is withheld on transfers of profits to the head office.

A proposal was announced by the government in 2009 to tax at a rate of 10% of after tax income of foreign owned branches and subsidiaries. If this proposal is enacted, withholding tax of 10% will be assessed on branch profits after tax, whether or not the profits are transferred to the head office. Some relief will be granted where branch profits are reinvested in new local property, plant and equipment, or other qualifying investments. This has not been enacted to date, and is being reviewed.

**Income determination**

**Inventory valuation**
Stocks generally are valued at the lower of cost or market value. Obsolescence is permitted where it occurs, but there are no provisions to account for monetary inflation on inventory valuation.

**Capital gains**
There is no tax on capital gains except in instances where such gains comprise a portion of the income-earning activities of the business; in this instance, the corporate rate applies.

**Inter-company dividends**
Inter-company dividends and dividends paid to individuals are not subject to tax.

**Foreign income**
Resident companies are taxed in St. Lucia on income earned outside St. Lucia. Reciprocal understandings exist with some countries for the avoidance of double taxation, and foreign tax is allowed as a credit against tax charged in St. Lucia. St. Lucia has no tax treaties with other countries, except for the member states that make up the
Caribbean Community (CARICOM). There is an agreement among the governments of CARICOM for the avoidance of double taxation. Where no agreement exists, the foreign tax offset is the lesser of the foreign tax paid or the tax payable on that income in St. Lucia.

**Stock dividends**
A bonus issuance of shares out of distributable earnings or out of a capital surplus on the sale of fixed assets of a company is not taxable. Distributions to shareholders on the reconstruction or winding-up of a company are not subject to withholding tax, and are not subject to tax in the hands of shareholders.

If the proposals announced by the government in 2009 are enacted, distributions to non-resident shareholders will be subject to withholding tax of 10%.

**Partnerships**
Partnerships are not subject to tax since they are treated as conduits; the individual partners are taxed on their share of the partnership income based on a tax table that ranges from 10% to 30%.

**Interest income**
The corporate tax rate of 30% applies to interest income. However, interest income accrued to a company on treasury bills, bonds, debentures and income earned on securities issued by member governments of the Eastern Caribbean Central Bank are exempt income.

**Royalty and rental income**
The corporate income tax rate of 30% also applies to royalty and rental income. However, rental income from a residential accommodation shall be exempt from tax, if certain requirements as defined by regulations are met.

**Unrealised exchange gains/losses**
Unrealised exchange gains/losses are not taxable.

**Common tax adjustments**
Some of the common tax adjustments in St. Lucia are:

- Depreciation expense – added back to income per the profit and loss account, but capital allowances are available.
- Uncovenanted donations – added back (this deduction is allowed if there is a deed of covenant for a period of at least three years in favour of any religious, charitable, medical or educational institution or sporting body or fund of a public character approved by the Cabinet, if the donation is made to the St. Lucia National Trust. However, the donation may not exceed 25% of the assessable income of the claimant company).
- Unrealised gains/losses – deducted/added back.
- Exempt income, such as government securities and bonds – deducted.

**Bribes, kickbacks, illegal payments**
Bribes, kickbacks and illegal payments received by a company are includible in taxable income.
Deductions

Depreciation and depletion
The following capital allowances are available:

• An initial allowance of 20% is granted on the acquisition of industrial, agricultural and commercial buildings (except for hotels and rental properties); on plant and machinery, including motor vehicles and furniture; and on fixtures and equipment.
• Thereafter, annual allowances for wear and tear, ranging from 10% to 33.33%, are granted on the reducing-balance method, except for industrial and agricultural buildings, which are allowed an annual rate of 5% and commercial buildings (except for hotels and rental properties), which are allowed an annual rate of 2.5%.

Gains on disposal are taxable as ordinary income to the extent of depreciation recovered, and any proceeds in excess of the cost of the asset are treated as a capital gain, which is not subject to tax. Where the proceeds on disposal are lower than the tax written-down value of the asset, a balancing allowance is granted for the shortfall.

Net operating losses
Net operating losses may be carried forward for up to six years if the losses have not been fully absorbed earlier. Losses may not be carried back. In carrying losses forward, the amount that can be claimed in any subsequent year is restricted to one-half of the assessable income of that year.

Payments to foreign affiliates
There are no restrictions on the deductibility of interest paid to foreign affiliates, if the transaction is carried out at arm's length and at the commercial rates. However, deductions for management charges, allocations of head office expenses, royalties, and other charges that are subject to 25% withholding tax, are restricted to the lesser of the aggregate of those charges or 10% of all allowable business deductions, excluding cost of sales.

Taxes
Consumption taxes paid on goods imported or purchased, and sold in the ordinary course of business, are deductible for tax purposes. Property taxes are deductible where the property is used in producing assessable income. Income taxes, penalties and interest on tax in arrears are not deductible.

Other significant items
Foreign exchange gains or losses arising from foreign exchange transactions on trading items are assessable or deductible as realised gains or losses, if settled within normal credit terms. Gains or losses on other instruments, including inter-company loans, are recognised only when actually realised.

Interest expense
Interest on any loan, including interest payable on debentures, is an allowable deduction to the extent that the amount of such loan was used for the purpose of producing assessable income.

Accrued expenses
Accrued expenses are deductible as long as they are business related.
Bad debt
Bad debt expense is deductible provided it has been brought to account in generating the company's assessable income for any income year.

Charitable contribution/donation
Charitable contributions/donations are an allowable deduction when the contributions/donations are made under a deed of covenant for a period of not less than three years to any religious, charitable, medical, or educational institution or sporting body or fund of a public character, approved by Cabinet, if such contributions/donations are made to the St. Lucia National Trust. However, the deduction with respect to such contributions/donations shall not exceed 25% of the assessable income of the company for that income year.

Contingent liabilities
Contingent liabilities are deductible expenses once they are recognised in the book of accounts.

Organisational and start-up expenses
All expenditures incurred in connection with incorporation costs for the establishment of a new small business enterprise are allowable deductions. A small business enterprise is an enterprise incorporated during the year of income and (i) is wholly owned by citizens of St. Lucia who have not been owners of previously incorporated businesses in St. Lucia; (ii) employs not more than 50 persons; (iii) has gross income that does not exceed ECD 1 million; (iv) engages in an activity on the listing of preferred business activities as approved by the Minister; and (v) satisfies the provision of any law in force with respect to micro or small scale business.

Pension expense
Current annual contributions to an approved pension fund are deductible expenses. However, where a special payment is made to an approved pension fund, in relation to a period of service by an employee prior to the setting up of the approved pension fund, or to meet any actuarially ascertained insufficiency in the resources of the approved pension fund to meet its obligations to its employees, such amount shall be allowed as follows: (i) where the special payment does not exceed the current annual contribution, such amount is wholly allowed; (ii) where the special payment exceeds the current annual contribution, such payment is an allowable deduction in such year of income, not exceeding five years; (iii) where under (ii) above, annual deductions are allowable over a number of years of income, the first such deduction is allowable for the income year for which the special payment is made.

Goodwill
Neither the amortisation of impaired goodwill nor the related write-off of it is an allowable deduction.

Other deductions
Meals and entertainment, officer's compensation/life insurance and payment to directors are deductible expenses, provided they are wholly and exclusively incurred by a company during that year of income for the purpose of producing its assessable income.
**Group taxation**

**Consolidation/Group taxation rules**
Group tax filing is not allowed in St. Lucia; however, group tax relief is available to allow the trading losses, excluding the current loss, of a resident company within a group to offset the profits of another resident company within the same group.

**Treatment of inter-company items**
Inter-company dividends are not subject to tax however, there is a proposal to withhold 10% tax on dividends paid or accrued to non-residents. Inter-company royalties, management charges and commissions paid to non-residents are subject to a 25% withholding tax. If the recent proposals announced by the government are enacted, inter-company interest payments to non-residents will be subject to a 15% withholding tax.

**Related party transactions**
Related party transactions are accepted if they are made on an arm’s-length basis. The Inland Revenue has the power under the Income Tax Act to make any adjustment deemed necessary to place such transactions at arm’s length.

**Tax incentives**

**Inward investment**
Income tax incentives and other fiscal concessions are provided under the Fiscal Incentives Act, the Tourism Incentives Act, the Special Development Areas Act and other concessions granted by the Cabinet of Ministers. The extent of the incentives and concessions granted are specific to the legislation or Cabinet conclusions, and depend on the impact that the investment would have on local employment, exports and the generation of foreign exchange earnings. The incentives granted include the following:

- Duty-free importation of raw materials, machinery, components, and spare parts and other inputs used in manufacturing, and the duty-free importation of construction materials, equipment and other inputs used in the construction and operation of hotels and other hospitality products;
- Income tax waivers of up to 100% of the taxable income of companies engaged in manufacturing, tourism and agriculture and other employment generating activities, for periods of up to 15 years;
- Whole or partial waivers of property tax, stamp duties, Alien Landholding License fees, withholding taxes and consumption taxes with respect to investments in specific areas, or in specific industries and activities;
- Guaranteed repatriation of capital, dividends and interest; and
- Export allowances for goods manufactured in St. Lucia and exported.

**Capital investment**
The Income Tax Act provides an initial allowance of 20% on the cost of property, plant and equipment, on which capital allowances may be claimed, in the year in which they are acquired. The Comptroller of Inland Revenue may also grant, on application, a higher rate for annual allowance for assets that have higher or abnormal wear and tear.

**Other incentives**
Tax incentives are also available in the Income Tax Act for hiring university graduates (additional 25% of salaries), hiring persons in the offshore financial services industry
with skills not available in St. Lucia, and complete or partial waivers of income tax on
the taxable profits of companies engaged in providing services to the offshore financial
services industry.

Foreign taxes paid
Where income has accrued to a resident and has been taxed in a foreign country with
which there is no double tax agreement, or is income to which a double tax agreement,
if there is one, does not relate, credit for tax on such income is allowed for the lesser of:
the tax payable in the foreign country or the tax charged under St. Lucia tax law.

Tax holiday
Tax holidays are available for manufacturing companies. The incentives are aimed
at increasing the manufacturing base of St. Lucia, the level of exports, and the use of
local materials and labour in production. An approved manufacturing enterprise will
be granted a tax holiday up to a maximum of 15 years. In determining the length of
the tax holiday, account is taken of the extent of the local value added to approved
products. Special tax concessions are available for capital construction in the hotel
industry. Capital expenditures on the construction of a hotel may offset profits for up to
15 years.

Withholding taxes (WHT)
Domestic corporations and persons that make certain payments of an income nature to
residents or non-residents are required to withhold tax on these payments as follows:

<table>

Tax administration

Returns
Tax returns must be filed within three months of the company’s fiscal year-end.
Returns must cover a 12-month period, which may be changed only with the
Comptroller’s permission.

Payment of tax
Tax is payable in instalments on 25 March, 25 June and 25 September in each year of
income, based on the preceding year’s income. Any remainder is payable within three
months of the end of the financial year.
St. Lucia

**Audit cycle**
Every locally incorporated company and any other company that has carried on business in St. Lucia in an income year are required to file an income tax return. The returns are due three months after the end of the company’s fiscal period. An extension of the filing date may be obtained. Financial statements must be submitted with the returns, together with a schedule reconciling taxable income with book income and various other schedules of additional information.

**Assessments**
The system is one of self-assessment. Upon receipt of the returns, the Inland Revenue Department examines the information provided and issues a notice of assessment at any time, subject to the statute of limitations. The Revenue Department may also issue assessments in the absence of returns.

**Appeals**
Within 30 days after the date of service of a notice of assessment or reassessment, the taxpayer may submit a written objection to the Revenue Department on any matters in such assessment or reassessment. If the Revenue Department confirms its assessment, the taxpayer may file an appeal with the Appeal Commission, which comprises seven persons appointed by the Minister of Finance. A decision by that body may be further appealed to the St. Lucia High Court within 30 days. An appeal against an order from this Court may be made to the Court of Appeal.

**Tax audits**
The Inland Revenue Department carries out audits of a selection of tax returns, usually at the taxpayer’s place of business. Audits may be carried out at any time prior to the expiration of the statute of limitations, whether or not notices of assessment have been issued. The Revenue Department has wide powers in determining the information it requires for these audits.

**Penalties and interest**
The following civil penalties and interest, which are non-deductible, are imposed:

- For late filing or for failure to file – 5% of the tax charge at filing date;
- For late payment – 10% of the unpaid tax at the due date;
- On tax and penalties unpaid – monthly interest at a rate of 1.04% ; and
- Tax knowingly evaded or sought to be evaded – 100% of the tax.

**Statute of limitations**
Assessments are not final until six years after the end of the income year, within which period assessments may be made at any time. In cases of misrepresentation or failure to disclose any material fact, a reassessment can be made at any time.

**Other issues**
The Income Tax Act, Chapter 15.02, became effective on 31 December 2001. The main purpose of this Act was to consolidate amendments that had been made to the previous Income Tax Act in the previous 12 years. There have been a number of amendments since 2001, mainly to reduce corporate tax rates and provide other relief and incentives granted in annual government budgets. Regional and national committees have made recommendations for tax reform but no major changes have been implemented or proposed.

Significant developments

There have been no recent significant developments in corporate taxation in Swaziland.

Taxes on corporate income

The corporate income tax rate is 30%.

Corporate residence

Income tax is levied on all income derived from sources generated within or deemed to be generated within the country, irrespective of whether the recipient of the income is actually resident in Swaziland.

Other taxes

There are no capital gains taxes or estate taxes.

Sales tax is levied at a rate of 14% (25% for liquor and cigarettes) on goods imported into Swaziland and on the first sale of goods manufactured for sale in Swaziland. Customs and excise duties are also imposed on such goods. A 14% tax is applicable to most professional services.

Branch income

Income tax on registered branch profits is calculated as for a resident company. In practice, branches are rare, as most foreign companies incorporate local subsidiary companies.

Income determination

Inventory valuation

Inventory valuation is not specific but is effectively at the lower of cost (first-in, first-out (FIFO) or average cost) and net realisable value.

Capital gains

Capital gains are not subject to income tax, provided it can be demonstrated that the gains are of a capital and not an income nature (i.e., recurring transactions).
**Inter-company dividends**  
Inter-company dividends are not subject to income tax. *(See Withholding taxes section.)*

**Foreign income**  
Foreign income is not subject to income tax unless it is deemed to be from a Swaziland source.

**Stock dividends**  
Stock dividends are paid out of taxed profits. Such dividends are not subject to income tax when received by a local company, but are subject to taxation in the hands of local individual taxpayers at the rate of 10%.

**Deductions**

**Depreciation**  
Depreciation (wear-and-tear) allowances calculated by the net-reducing-balance method are available as follows:

<table>
<thead>
<tr>
<th>Asset</th>
<th>Rate (%)</th>
</tr>
</thead>

</tbody>
</table>

For the first year after the addition of an asset, the wear-and-tear allowance is calculated on a monthly basis. With respect to leased assets, the lessor's claim for wear-and-tear allowance is usually spread over the lease period.

An initial allowance of 50% is granted for plant and machinery used in a manufacturing process, including hotel equipment. An initial allowance of 50% is
Swaziland

granted for industrial buildings used for manufacturing purposes and hotels, together with a 4% annual allowance.

**Net operating losses**
Losses may not be carried back but may be carried forward for as long as trading continues. If any break in trading occurs, the losses are forfeited.

**Payments to foreign affiliates**
Deductions may be claimed for payments of management service fees, interest and royalties to foreign affiliates, provided the payments are made under a written agreement, are reasonable and receive exchange control approval for transfers outside the rand monetary area. This approval is routinely given without any significant delay for bona fide transactions.

**Group taxation**
There is no specific group taxation legislation. All companies are assessed on individual profits and losses.

**Tax incentives**

**Tax holidays**
Tax holidays are no longer available.

**Development enterprises**
The Minister of Finance, along set guidelines and with prior consent of the Cabinet, may nominate a business as a developmental enterprise (i.e., a business the Minister deems to be beneficial to the development of the economy) for a grant of a Development Approval Order. If approved, the business generally will be granted tax concessions, for example, a lower corporate tax rate.

**Training expenditure**
Approved training schemes resulting in a 150% tax deduction of salaries is no longer available.

**Withholding taxes (WHT)**
Non-resident taxes are levied as follows.

**Dividends**
Tax is payable at the rate of 15% (12.5% for companies registered in Botswana, Lesotho and the Republic of South Africa). Variations may occur under certain double taxation agreements. Non-resident shareholders’ tax is payable within 30 days of the date on which the dividend is payable.

**Interest**
Tax is payable at the rate of 10% on interest. Non-resident tax on interest is payable within 14 days of the date of the accrual of the interest.
Entertainers and sportsmen
Tax is payable at the rate of 15% on income earned in Swaziland by entertainers and sportsmen. This tax relates only to public entertainers and sportsmen not ordinarily resident in Swaziland. The payer is required to deduct the tax and pay it within 15 days.

Contractors or professionals
Tax is payable at the rate of 15% on services provided by contractors or professionals in Swaziland (materials are not taxed to the extent that materials are incidental to the overall charge). The Commissioner of Taxes must be notified of any agreement relating to construction operations or professional services under which payments are made to non-resident persons within 30 days after entering into the agreement. It is required that the tax be paid within 15 days from the date of payment.

Tax administration

Returns
The tax year runs from 1 July to 30 June. Companies are required to have a 30 June year end, unless another year end date is approved by the Commissioner of Taxes; such approval is routinely given. Income tax returns should be submitted within 30 days of 30 June, unless an extension of time for submission is granted, which also is routinely given.

Payment of tax
Notice of the date of payment is usually given on the tax assessment.

Provisional tax
With respect to companies, provisional tax is payable in two instalments: one payment is due within six months of the company’s financial year-end and the other payment is due no later than the last day of the company’s financial year.

The estimate of taxable income for provisional tax purposes should not be less than the taxable income assessed for the latest preceding year of assessment, for which an assessment has been issued not less than 21 days before the date the estimate is made. This rule does not apply if the taxpayer can convince the Commissioner of Taxes that the taxable income for the current year will be less than the taxable income for the preceding year.

A provisional taxpayer becomes liable to pay a penalty if the estimate for taxable income for the second payment of provisional tax is both found to be less than 90% of the taxable income as finally determined and is less than the taxable income as assessed for the immediately preceding tax year.

Significant developments

The Swedish corporate tax rate has been reduced from 28% to 26.3%, partly to be financed by the interest deduction restrictions. The new tax rate is applicable for financial years commencing on or after 1 January 2009.

In 2009, Sweden enacted anti-debt push down provisions under which a deduction is not allowed for interest payments on any intra-group loans for the acquisition of shares from an affiliate, unless the creditor is taxed on the interest income at a rate of at least 10% (tax rate comparison), or it is shown that the share transfer and the debt is based on commercial reasons. Note that also for loan agreements that may have been signed years ago, the interest payments are covered by these new provisions.

In 2010, shares in partnerships (tax transparent entities) were included in the Swedish participation exemption regime for capital gains (thus, making capital losses non-deductible). This also includes capital gains from qualifying indirect holdings via a partnership. The provision requires that partners restore negative acquisition costs on the partnership share for taxation.

Taxes on corporate income

State (national) income tax
Taxable income is subject to tax at the rate of 26.3% for financial years commencing on or after 1 January 2009. The previous rate was 28%. All income of corporate entities is treated as business income.

Resident legal entities are liable for tax on their worldwide income unless tax treaties or special exemptions apply. Non-resident entities are taxed on income that is deemed to have its source within Sweden.

Corporate residence

A company is considered to be tax resident of Sweden, if it is incorporated in Sweden.

Other taxes

Value-added tax (VAT)
The Swedish VAT system is harmonised with the European Community rules. The general VAT rate is 25% and chargeable on most goods and services. Reduced rates apply to a few goods and services, such as food that is taxed at the rate of 12% and
transport of passengers that is taxed at the rate of 6%. Certain financial and insurance services are exempt from VAT.

**Stamp duty**

Stamp tax at 3% is payable on a transfer of real estate. The tax base consists of the highest of the purchase consideration or the tax assessed value of the real estate. Stamp tax on an intra-group transfer of real estate may be deferred as long as the real estate remains within the group.

**Social fees**

Mandatory social security charges payable by employers on remuneration to employees (or by the self-employed) are levied at approximately 31%. Reduced rates apply for young or old people. Social security charges are deductible for corporate tax purposes.

Pension benefits beyond the mandatory system are customary amongst most Swedish employers. A special salary tax is levied at approximately 24% on these additional pension premiums/commitments. The tax is deductible for corporate tax purposes.

**Real estate tax**

Buildings are divided into business premises and apartments. The tax rate on business premises is 1% of the tax assessed value. For industrial property, the tax rate is 0.5%. The tax rate on apartments has been lowered to SEK 1,272 per apartment but no more then 0.4% of the tax assessed value as of 1 January 2009.

**Branch income**

Branch income (permanent establishment income) is taxed at the corporate tax rate of 26.3% and general corporate tax rules apply for branch offices in Sweden. No withholding tax is levied on the outbound repatriation of taxed profits.

The term permanent establishment (PE) is defined as a fixed place of business through which the business is carried on from a specific establishment, such as a place of management, branch, office, factory, or workshop. Places where entrepreneurial work is carried on are also regarded as PEs as well if an agent or a representative who is dependent upon the foreign company habitually exercises his authority in Sweden.

The receipt of Swedish source royalties or fees for use of tangible or intangible assets by a foreign resident is also (subject to treaty) regarded as PE income.

**Income determination**

**Inventory valuation**

Inventories (stock-in-trade) are valued at acquisition cost or market value, whichever is lower. As an alternative, inventories may be valued at 97% of the total acquisition cost, which is determined on a FIFO (first-in, first-out) basis. LIFO (last-in, first-out) is not permitted. Generally, inventories should be stated at the same amount for tax and accounting purposes.

**Capital gains**

The abolishment of the capital gains taxation for corporations has under the participation exemption provisions made Sweden a favourable holding company location. The capital gains tax exemption applies for Swedish corporate entities on gains related to the disposal of shares held for business reasons.
Shares in Swedish corporations as well as in foreign companies can qualify as shares held for business reasons. Unquoted/unlisted shares will always be considered as held for business reasons. Quoted/listed shares are considered held for business reasons, provided that the company has a holding corresponding to at least 10% of the voting rights, or the shares are held in the course of the business. An additional condition regarding quoted/listed shares is that the shares must be held for a period of at least one year.

As of 2010, participation in partnerships (tax transparent entities) became included in the capital gains tax exemption regime (making losses non-deductible), including qualifying indirect holdings via a partnership.

An exception from the capital gains tax exemption applies for the sale of shares in a “shell company”, that is, a company or partnership where the market value of cash, shares and other marketable instruments (other than shares held for business reasons) and similar assets exceeds 50% of the consideration paid for the shares. The sale of a shell company results in harsh taxation of the gross consideration. Provided certain formalities are fulfilled it is, however, possible to avoid such taxation.

A consequence of the participation exemption is that capital losses on shares or participations held for business reasons are not deductible.

Capital losses on portfolio holdings of shares, share options, convertible debentures, and similar financial instruments are allowed only as an offset to capital gains on the same group of financial instruments. Certain special rules apply to computation of capital gains and losses on real estate.

**Inter-company dividends**
Participation exemption will apply for dividends received on shares held for business reasons (see above), and on qualifying holdings via partnerships. The requirement of a minimum holding period for a holding of quoted/listed shares can be fulfilled retroactively.

**Foreign income**
Companies resident in Sweden are taxed on their worldwide income. Non-resident entities are taxed on income that is deemed to have its source within Sweden.

A Swedish corporation is taxed on foreign branch income. Double taxation normally is avoided by means of either a deduction for foreign tax, or a foreign tax credit.

Dividends and capital gains from foreign subsidiaries are generally exempt from taxation according to the domestic provisions (tax exemption for dividends on shares held for business reasons, see above).

**Controlled foreign corporations (CFC) legislation**
Sweden’s CFC provisions aim at taxing a Swedish resident shareholder for shareholdings in low-taxed foreign entities. A Swedish resident shareholder with a holding in a CFC-entity will annually be taxed for its ownership portion of the income, according to provisions applicable to a Swedish corporation. For a corporation, the portion will be taxed at the Swedish corporate tax rate. Only holdings, direct or indirect through other foreign entities, corresponding to at least 25% (capital or voting rights) in the foreign entity could lead to CFC taxation. A foreign company is
considered lowly taxed, if the income in the company, calculated in accordance with Swedish provisions, is taxed at a rate below 14.47%. However, if the foreign entity is resident in an “approved country”, CFC taxation should not arise. Approved countries appear in an official “black/white” list. Active European Economic Area entities are under certain circumstances excluded from CFC taxation.

**Deductions**

**Depreciation and depletion**
The following allowances are available:

*Depreciation on fixed assets*
Land improvements may be depreciated at the rate of 5% per year of the acquisition cost. The maximum allowance is 100% of the tax basis of the improvement.

Buildings may be depreciated at rates between 2% and 5% per year of the taxable basis, depending on type and usage of the building. The maximum allowance is 100% of the tax basis of the building.

Machinery, equipment, motor vehicles, patents, leaseholds, and goodwill: The depreciation for tax purposes should correspond to the depreciation charged in the books and accounts, as long as the total net value of the assets is not less than the 70% of net value in previous accounts plus additions less proceeds of sales (i.e., 30% declining balance depreciation); or cost less 20% per year (i.e., 20% straight-line depreciation on remaining assets).

*Currently deductible*
The cost of assets having an expected life of not more than three years and the cost of assets not exceeding certain levels, depending on size of operations may be deducted immediately. Certain costs for repairs, maintenance and modifications of buildings may also be deducted immediately.

*Mines and quarries*
The entire cost of mines and quarries may be depleted over their expected exploitation period. These depletion amounts may be deducted annually but are limited to 100% of the acquisition cost of the mine or quarry.

*Net operating losses*
Tax losses may be carried forward indefinitely, subject to restrictions or forfeiture upon ownership changes, mergers and demergers, dispositions with creditors and certain other reorganisations.

*Payments to foreign affiliates*
Transactions with an affiliate not liable for tax in Sweden must be at arm’s length.

Formal transfer pricing documentation requirements apply since 1 January 2007.

*Taxes*
Generally, Swedish taxes are not deductible for tax purposes. However, specific taxes, fees and foreign taxes may be deductible. Recoverable VAT is not treated as an expense or cost.
Sweden

**Group taxation**

Swedish companies are not taxed on a consolidated basis. However, it is for qualifying groups (i.e., a holding of greater than 90% of the capital which must have been owned during the whole fiscal year) possible effectively to offset operating losses of one Swedish company against operating profits of another Swedish company by way of group contributions, which is tax deductible for the contributor and taxable for the recipient. European Economic Area (EEA) companies are regarded as Swedish companies for these purposes, if the recipient is taxable in Sweden.

**Tax incentives**

There are no specific tax incentives in Sweden for corporations. However, some generally applicable regimes exist.

First, machinery and equipment is subject to accelerated depreciation at a maximum 30% of declining balance rate.

Second, Sweden has an accrual income reserve account regime. The accrual income reserve regime allows for a tax-deductible appropriation for corporations of 25% of the taxable profit before appropriation to a reserve. Each year's appropriation forms a separate reserve that must be reversed to income no later than the sixth year following the appropriation. However, a standardised interest income is imposed on former years' appropriations with 72% of the interest rate on governmental debt notes.

Third, interest on any debt is deductible as long as it meets an arm's-length requirement, and the anti-debt push down provisions are not applicable. There is no outbound interest withholding tax. There are also no thin capitalisation rules for tax purposes.

**Withholding taxes (WHT)**

There are no Swedish taxes on interest and service fees paid to non-resident corporations or individuals. Such payments to resident corporations and individuals are taxed as ordinary income. Domestic withholding tax is due on various payments to resident individuals. Withholding taxes on dividends, royalties and certain rentals vary according to domestic law and tax treaties, as shown below.

Apart from the highlighted treaties, Sweden has concluded agreements on exchange of information in tax matters and partial tax treaties with many tax haven jurisdictions.

**Notes**

1. According to domestic law there is no withholding tax on dividends to a foreign company on shares held for business reasons (for the definition of shares held for business reasons, see above), provided that the foreign company is similar to a Swedish limited liability company (and some other legal entities) and is subject to income tax at similar level to that imposed on a Swedish company. Further, there is no tax liability for a legal entity of a member state of the EU if the entity owns 10% or more of the share capital in the distributing company and fulfils the conditions of the Directive (90/435) regarding parent company and subsidiaries.

2. The reduced rate shown after a stroke (/) refers to payments to corporations having requisite control. Where appropriate, the particular treaty should be consulted to see whether the reduced rate is applicable. For dividends to a foreign company on shares held for business purposes (see Note 1).

3. Swedish source royalties and certain rental fees are treated as a special form of PE, taxable at the corporate tax rate, subject to treaty reduction or waiver. Royalties paid
from Sweden to a company within the EU should not be taxed in Sweden if one of the companies holds at least 25% (capital) of the other, or where there are two companies concerned, at least 25% are held by another company within the EU. Indirect participation does not benefit from the legislation. Both the payer and the recipient must be legal entities under the EU directive.

4. Payments to resident corporations and individuals are taxed as ordinary income. Only resident banks and similar entities are required to withhold tax on payments of cash dividends to resident individuals.

5. Royalties and certain rentals paid by Swedish licensees are treated as business income taxable in Sweden and do not incur withholding taxes (see Note 3).

6. Note also the domestic provision stating a 0% withholding tax on dividends distributed on shares held for business reasons to qualifying entities (see Note 1).

7. Dividends – 10% of the gross amount if the company receiving the dividends owns at least 25% of the foreign company’s capital. Royalties – Of the gross amount paid for the use of, or the right to use:
   a. News – 3%;
   b. Copyright of literary, dramatic, musical, or other artistic work – 5%;
   c. Any patent, trademark, design or model, plan, or secret formula or process; industrial or scientific equipment or information concerning industrial, commercial or scientific experience; payments for the rendering of technical assistance – 10%; and
d. All other cases – 15%.

8. Royalties are normally taxable only in the recipient’s home country. However, where the royalty is paid by a Swedish legal entity that is more than 50% owned by one Austrian recipient, entity or individual, the tax in Sweden is a maximum of 10%.

9. Literary, artistic or scientific royalties – Nil; other royalties – 5%.

10. Royalties for use of industrial, commercial or scientific equipment – 5%; with respect to patents, secret formulas or processes or for information concerning industrial, commercial or scientific experience – 3%; other royalties – 10%.

11. Royalties for use of copyright and literary, dramatic, musical, and artistic royalties – nil. Other royalties – 10%. (Treaty should be consulted).

12. The treaty has effect on income derived on or after 1 January 2006.

13. The double taxation treaty does not include Hong Kong.

14. The same treaty is applicable to the Czech Republic and the Slovak Republic.

15. According to the Nordic multilateral tax treaty.

16. Dividends are exempt from tax if the recipient of the dividends is a company directly owning at least 10% of the capital of the company paying out the dividends. Certain rentals are subject to tax if there is a permanent establishment in a state other than the home state and the claim is connected with the business carried on from the permanent establishment. Concerning Iceland, dividends are normally exempt from tax for companies, but the tax rate is 15% if the dividends have been deducted from the income of the distributing company.

17. Royalties for the use of industrial, commercial or scientific equipment – 5%; other royalties – 10%.

18. Royalties with respect to patents, secret formulas or processes or for information concerning industrial, commercial or scientific experience – 5%; other royalties – 12.5%.

19. Royalties for the use of industrial, commercial or scientific equipment or for information concerning industrial, commercial or scientific experience – 10%; other royalties – 15%. (Treaty should be consulted.)

20. Literary, artistic or scientific royalties including films – 15%; other royalties – 10%. (Treaty should be consulted.)

21. Royalties with respect to patents, secret formulas or processes or for information concerning industrial or scientific experience – 5%; other royalties – 15%.

22. Commercial royalties, including films – 20%; copyright, literary, dramatic, musical, or artistic royalties – Nil.

23. Commercial royalties, including films – 15%; literary, dramatic, musical, or artistic royalties – 5%.

24. Literary, artistic, scientific, or film royalties – 10%; other royalties – 7%.
Sweden

25. Royalties with respect to patents, designs or models, secret formulas or processes or for information concerning industrial or scientific experience or for the use of industrial, commercial or scientific equipment involving a transfer of know-how – 5%; other royalties – 15%.

26. The treaty is applicable to all republics and autonomous provinces of the former Yugoslavia with the exception of Macedonia, with which Sweden has concluded a bilateral treaty.

**Tax administration**

**Returns**
The tax year corresponds to the calendar year. If the income is derived from business, the basis for tax assessment is the financial year. The year-end for a company may be fixed at any of the following dates: 30 April, 30 June, 31 August, or 31 December. Another year-end can be used if special permission by the tax agency is requested and granted. Swedish subsidiaries of foreign parents are generally permitted to adopt the same year-end as the parent company, provided it ends on the last day of the month.

Every corporate entity or registered branch must file an annual corporate income tax return, which generally should be filed by 2 May each year, covering the financial year-ending during the preceding calendar year. Extension may be available. The annual assessments are made by the local tax offices during the calendar year following the income year, and should be completed by end November. VAT returns and employer (employee PAYE and employer withholding) returns are normally due on a monthly basis.

**Income tax payments**
Income taxes are collected during the year in which the income is earned, under a preliminary tax system. A corporate entity's preliminary tax liability is determined by a preliminary tax assessment based either on the latest available final tax assessment or on a preliminary tax return filed by the company. The preliminary taxes are payable in monthly instalments. Interest surcharges on underpayment of preliminary taxes however, generally apply from 12 February the year after the financial year (the assessment year). Any balance owed by the taxpayer is payable in 90 days after the assessment has been made. Normally, any balance owed to the taxpayer is refunded in December of the assessment year.

**Tax penalty**
A taxpayer that submits incorrect or insufficient information in a tax return is charged a penalty amounting to up to 40% of the tax which, if the incorrect information had been accepted, would have been imposed or credited. The penalty and the rate may vary depending on the type of the incorrect information given.

**Tax administration**
Taxes are assessed by the tax agency. Depending on the circumstances, reassessments and/or appeals generally can be initiated within one and five years after the assessment year. Appeals can be made to the administrative court, and onwards to the administrative court of appeal, and in case of granted trial dispensation, onwards to the supreme administrative court.

Significant developments

The Corporate Tax Reform II enacted on 24 February 2008 by Swiss voters included many favourable changes for entrepreneurial activity and investment. In summary, the main benefits of the reform from a Swiss corporate tax perspective are:

• Extension of participation relief on dividend income (effective from 1 January 2011): The limits to obtain participation relief on dividend income after the effective date of 1 January 2011 are reduced to a participation of at least 10% from the existing 20% of capital or a market value of at least CHF 1 million, instead of the existing CHF 2 million limitation.

• Extension of participation relief on capital gains on the sale of investments (effective from 1 January 2011): After the effective date of 1 January 2011, limited companies and cooperatives desiring the participation relief on capital gains must sell an interest of at least 10%, instead of the existing 20% requirement. The minimum holding period of one year remains unchanged.

• Introduction of the capital contribution principle (effective from 1 January 2011): The change from the nominal principle to the capital contribution principle allows repayment of shareholders’ capital contributions without liability for Swiss withholding tax. In general, this also applies for premiums, additionally paid-in capital and contributions into the reserves of a company without increasing the nominal share capital. Specific transition rules apply. Shareholders’ capital contributions accumulated prior to 31 December 1996 are still subject to withholding tax. Effective from 1 January 2011, shareholders’ capital contributions contributed after 31 December 1996 are withholding tax exempt provided that they meet all necessary requirements and in particular that the correct recordings in the books of the company. As a matter of principle, Swiss withholding tax exempt distributions will also be income tax exempt at the level of the Swiss individual shareholder (holding the shares in his private assets), whereas the tax treatment of a corporate shareholder (or an individual shareholder holding the shares in his business assets) should be further analysed. Additional details should be clarified in the expected guidelines to be published by the Swiss tax administration.

• Imputation of income tax against capital tax: The cantons may impute corporate income tax against capital tax as of 1 January 2009.

• Extension of asset replacement (effective from 1 January 2011): The tax exempt transfer of undisclosed reserves in the case of an asset replacement is facilitated after the effective date of 1 January 2011.
Switzerland

In 2009, a new Swiss value-added tax (VAT) law was approved by the Swiss Parliament and put in force effective from 1 January 2010. The new VAT law features a noticeable simplification of the system, enhances transparency, is more customer-friendly and aims at providing more legal certainty.

Further, as from 1 January 2011, the VAT rates will be increased in order to support the solvency of the disability insurance. The increase is limited to seven years. The normal rate will increase by 0.4% to 8%, the privileged rate by 0.1% to 2.5% and the special rate by 0.2% to 3.8% (see VAT section).

**Taxes on corporate income**

- Federal level: The Swiss Federation levies a direct federal income tax at a flat rate of 8.5% on profits after tax (i.e., taxes are deductible from the tax basis in Switzerland, the tax rate on income before taxes amounts to approximately 7.83%). At a federal level, no corporate capital tax is levied.
- Cantonal/communal level: In addition to the direct federal income tax, each canton has its own tax law and levies cantonal and communal (municipal) income and capital taxes at different rates. Therefore, the tax burden of income (and capital) varies from canton to canton. Some cantonal and communal taxes are imposed at progressive rates.
- General rule: As a general rule, the approximate range of the maximum effective income tax rate on profit for federal, cantonal, and communal taxes is between 12.5% and 24%, depending on the company’s location.

**Corporate residence**

A company is considered resident in Switzerland if its place of incorporation is in Switzerland. Residency is also linked upon the place of effective management, which may be the centre from which day-to-day activities are directed or the place from which managerial decisions are made.

**Other taxes**

**Capital tax**

Corporate capital tax is only levied at a cantonal and not at a federal level. It is based on the corporation’s equity (the taxable equity corresponds to the sum of nominal capital, paid in surplus, retained earnings, other equity reserves and — according to Swiss thin cap rules — potential deemed equity). Tax rates vary from 0.001% to 0.5288%. Reduced rates are applicable for companies subject to a special cantonal tax regime (e.g., holding companies, mixed trading companies).

**Value-added tax (VAT)**

In 2009, a new Swiss VAT law was approved by the Swiss Parliament and put in force effective from 1 January 2010. The new VAT law features a noticeable simplification of the system, enhances transparency, is more customer-friendly and aims at providing more legal certainty.

As a matter of principle, proceeds of sales and services conducted in Switzerland are subject to VAT at the standard rate of 7.6%. However, goods for basic needs are subject to VAT at the rate of 2.4% and services in connection with the provision of lodging are...
subject to VAT at the rate of 3.6%. The registered taxpayer generally is entitled to offset
the amount of VAT charged by suppliers or paid on imports against the VAT payable.

As from 1 January 2011, the VAT rates will be increased in order to support the
solvency of the disability insurance. The increase is limited to seven years. The regular
rate will be increased by 0.4% to 8%, the privileged rate by 0.1% to 2.5% and the
special rate by 0.2% to 3.8%.

**Issuance stamp tax**
Issuance stamp tax (often known as capital duty) on the issue and increase of the
equity of Swiss corporations is levied at the rate of 1% on the fair market value of the
assets contributed, with an exemption on the first CHF 1 million of capital paid in,
whether it is made in an initial or subsequent contribution.

A tax ruling may be obtained to exempt a multitude of transactions from issuance
stamp tax. In particular, special rules allow for most reorganisations to take place on a
tax neutral basis.

In addition, generally, an existing foreign company may transfer assets to Switzerland
without incurring Swiss issuance stamp tax. However, if the company was formed
abroad and redomiciled to Switzerland exclusively or mainly in order to avoid Swiss
stamp taxes the issuance stamp tax may apply.

Issuance stamp tax is further payable with respect to the following instruments:

- Bonds, which are defined for the purposes of this tax as bonds, promissory notes
  issued in sequence and similar paper, discount paper and any other evidence of
  indebtedness in the form of a debt security or traded as if there were a debt security
  which is intended for public placement as well as participations in loans granted to
  Swiss debtors.
- Money market papers, which are identical instruments to bonds with a fixed term
  of not more than 12 months, issued by a Swiss body.

The following tax rates apply:

- 0.12% of the nominal value for each year or part thereof up to the maturity of
  a bond.
- 0.06% each year on the same basis for sub-participations and medium term bonds.
- 0.06% each year on commercial paper with the face value calculated at 1/360th for
  each day on which such paper is outstanding.

**Securities transfer stamp tax**
Swiss securities transfer stamp tax (often called securities turnover tax) is levied on
the transfer of Swiss and foreign securities in which Swiss securities dealers participate
as contracting parties or as intermediaries. The ordinary tax rate of Swiss securities
transfer stamp tax is 0.15% for securities issued by a tax resident of Switzerland and
0.3% for securities issued by a tax resident of a foreign country.

Swiss securities dealers are defined as any person professionally engaged in the buying
or selling of securities for his own account or for another person, including Swiss banks
and other Swiss bank-like institutions. But also companies holding taxable securities
whose book value exceeds CHF 10 million and remote members of a Swiss stock
exchange with regard to Swiss titles, which are quoted on the Swiss stock exchange, are considered as Swiss securities dealers.

Taxable securities include, but are not limited to, shares (including participations) and bonds. Options and many other derivative instruments are not subject to Swiss securities transfer stamp tax. However, the exercise of such financial instruments or derivatives may result in a taxable transfer of a security.

Various transactions are exempt from Swiss securities transfer stamp tax. With the enactment of the Swiss merger law in 2004, no Swiss securities transfer stamp tax is in general levied in the case of a merger or a reorganisation in which a Swiss securities dealer is involved and taxable securities (including participations) are transferred. Furthermore, the merger law also states an exemption from Swiss securities transfer stamp tax in case of a replacement of a participation. This is particularly important for holding companies, which qualify as Swiss securities dealers, as the law provides for a much more flexible basis than under prior law in transferring shares tax neutrally.

**Branch income**

The same tax principles apply for foreign corporations, provided that transactions with the head office or other branches are at arm’s length. There is no withholding tax on profit transfers to the head office.

**Income determination**

Resident companies are subject to corporate income tax on their worldwide income. Income attributable to permanent establishments or immovable property located abroad is, however, excluded from the Swiss tax base and only taken into account for rate progression purposes in the cantons that still apply progressive tax rates.

The statutory accounts of a Swiss company (or in the case of a foreign company, the branch accounts) serve as the basis for determining taxable income. There are generally very few differences between statutory profit and taxable profit apart from the participation relief for dividend and capital gains income (described below), adjustments required by tax law as well as the usage of existing tax loss carry forwards.

**Participation relief**

The participation relief is the name generally attributed to the tax relief received for qualifying dividend and capital gains income of a company. The participation relief is not an outright tax exemption, but rather a tax abatement mechanism. It is, therefore, also commonly referred to as “participation deduction” or “participation relief”.

The participation relief is computed as follows:

\[
\text{Net participation income} = \% - \text{age relief as a deduction from a company's income taxes}
\]

Taxable income

Net participation income consists of the gross participation income from qualifying dividends and qualifying capital gains income less related administration and financing costs and any depreciation of the participation that is linked to the dividend distribution. In most cases, the participation relief results in a full exemption of participation income from federal income tax or one close thereto. At a cantonal/
municipal level, cantonal tax regimes often are more favourable than the participation relief (the latter usually also granted by the cantons). The participation relief may be diluted in certain cases, for example if loss carryforwards are set off.

*Participation relief: Dividend income*
Dividends qualifying for the participation relief are those from participations representing at least 20% (after 1 January 2011: 10% of the share capital or 10% of profits and reserves) of the share capital of another company or those having a market value of at least CHF 2 million (after 1 January 2011: CHF 1 million). There is neither a minimum holding period nor a requirement that the dividend paying subsidiary is liable to income tax in its jurisdiction of residence.

*Participation relief: Capital gains income*
Capital gains derived from the disposal of a qualifying participation are entitled to participation relief, if the following conditions are cumulatively met:

- The participation sold was owned by the company for a period of at least one year; and
- The amount sold constitutes at least 20% (after 1 January 2011: 10% of the share capital or 10% of profits and reserves while partial sales of residual holdings of less than 10% are possible, provided their market value at the beginning of the year still amounted to at least CHF 1 million) of the share capital of the underlying subsidiary.

It is noteworthy that capital gains are only entitled to participation relief to the extent the sales price exceeds the original investment costs of the participation (whereas recaptured depreciations are taxable).

*Foreign income*
Swiss tax resident corporations are basically taxed on their worldwide income. However, income attributable to a foreign permanent establishment outside Switzerland is not taxed in Switzerland but may be taken into account only to determine the rate of tax applicable to taxable income. The same rule applies for income from real estate situated abroad.

Dividends, interest, and royalties from Swiss or foreign sources are included in assessable income. However, in certain cantons, special methods of assessment may apply for dividend and other income originating outside Switzerland. For dividend income, a relief generally is available at a federal income tax level as well as at a cantonal level (see the section Participation relief). The irrecoverable portion of foreign withholding taxes of most treaty countries can be credited against the related Swiss income taxes on the same income. Foreign withholding taxes of all non-treaty countries generally are not creditable, but they are deductible for income tax purposes.

There are no controlled foreign corporation (CFC) rules in Switzerland. Consequently, undistributed income of foreign subsidiaries is usually not taxed in Switzerland.
Deductions

As stated above, the statutory accounts of a Swiss company are the basis for determining taxable income. To be tax-deductible, an expense has to be booked in the statutory accounts accordingly.

In principle, it can be said that all business expenses that are booked in the statutory accounts are tax-deductible assuming they are economically justified from a tax perspective. If an expense is not a justifiable business expense in the sense of the tax law, it will be added back to taxable income. Examples typically include excessive depreciation, non-justified payments to related parties (e.g., hidden profit distributions), etc.

Guidelines for the most common deductions are set forth on the following pages.

Interest expense

Interest paid by a corporation to a third party is a deductible business expense. Interest paid to related parties (affiliates or shareholders) has to reflect the fair market rate and is subject to limitations.

With respect to related parties, the Federal Tax Administration annually issues safe harbour interest rates to be used on loans in CHF on the one hand and in foreign currencies on the other hand. The corporation may deviate from these safe harbour rates as long as it can prove that the rates used are at arm’s length and more appropriate in the present case.

The safe harbour rules for loans denominated in CHF applicable from 1 January 2010 are as follows:

<table>
<thead>
<tr>
<th>For loans made to related parties (in CHF)</th>
<th>Minimum interest rate</th>
</tr>
</thead>
<tbody>
<tr>
<td>Financed from equity</td>
<td>2 1/4%</td>
</tr>
<tr>
<td>Financed from debt (actual costs plus at least):</td>
<td></td>
</tr>
<tr>
<td>– On amount up to CHF 10,000,000</td>
<td>½%</td>
</tr>
<tr>
<td>– On amounts of more than CHF 10,000,000</td>
<td>¼%</td>
</tr>
<tr>
<td>– But in all cases at least</td>
<td>2 1/4%</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>

</tr>
</thead>
<tbody>
<tr>
<td>Home construction / agriculture</td>
<td>Industry and business</td>
</tr>
<tr>
<td>Real estate loans - a loan up to the amount possible for mortgage (i.e., 2/3 of the market value of the real estate)</td>
<td>2 1/4%</td>
</tr>
<tr>
<td>Real estate loans - other**</td>
<td>3%</td>
</tr>
<tr>
<td>Operational loans - made to trading and production companies</td>
<td>–</td>
</tr>
<tr>
<td>Operational loans - made to holding and asset administration companies</td>
<td>–</td>
</tr>
</tbody>
</table>

Guidelines for the most common deductions are set forth on the following pages.
In calculating the amount of the maximum interest permissible from a tax perspective, any potentially existing hidden equity has to be considered. Reference is hereby made to Circular No. 6 for direct federal tax purposes of 6 June 1997, which is also applicable for withholding tax and stamp tax purposes.

Whereby the following maximum interest rates for debt are applicable: land, villas, residences, vacation houses, and business premises, up to 70% of the market value and other real estate up to 80% of market value.

**Depreciation**

Maximum depreciation/amortisation rates allowed for tax purposes are issued by the Federal Tax Administration. Higher depreciation/amortisation is allowed for tax purposes, if the taxpayer can prove that such higher depreciation/amortisation is required from a statutory accounting perspective. Some cantons follow the federal guidelines, whereas some cantons apply and/or publish their own (more liberal) applicable depreciation/amortisation rates.

The following summary of the rates specified by the Federal Tax Administration provides the general range of allowable depreciation:

<table>
<thead>
<tr>
<th>Depreciation rates (from 2007)</th>
<th>Declining balance</th>
<th>Straight-line</th>
</tr>
</thead>
<tbody>

</tr>
<tr>
<td>– Motor vehicles</td>
<td>40%</td>
<td>20%</td>
</tr>
<tr>
<td>– Intangible assets</td>
<td>40%</td>
<td>20%</td>
</tr>
</tbody>
</table>

Some cantons (such as Zurich and Basel-City) take a more liberal approach and even permit a write-down of certain assets (including fixed assets) to 20% or nil of the purchase price in the first year, provided that such write-downs do not, in the aggregate, result in a drastic decline in taxable income or even a tax loss and are commercially justified. For this accelerated depreciation to be tax-deductible, it must be booked in the statutory accounts. As the cantonal tax authorities are responsible for assessing not only cantonal/communal income taxes, but also federal income taxes, the accelerated depreciation usually will be accepted for federal income tax purposes as well.

**Royalties**

Royalty payments are generally deductible for tax purposes as long as the royalty rate is at arm’s length.

**Management and service fees**

Management and services fees paid by a Swiss company to a related party are deductible as long as the fees are at arm’s length.
**Bad debt provision**  
Based on a longstanding but not published practice, it is admissible in Switzerland to set up an accounting provision for specific impaired debts, which will be accepted for tax purposes. Unlike most other countries, it is also possible in Switzerland to set up an additional (“lump sum”) bad debt provision of 5% on all domestic and 10% on all foreign receivables (i.e., after deduction of specific impaired debts), except for inter-company receivables and receivables to the public, enabling the taxpayer to defer the related tax liability until this provision has been released. Some cantons, such as Zurich, accept an even higher reserve (i.e., 10% on domestic and 20% on foreign receivables). This additional bad debt provision may have the character of a “hidden” (undisclosed) reserve and is possible to build because the Swiss accounting standards favour prudence over true and fair view accounting principles.

**Inventory provision**  
Similarly to the bad debt provision, it is also possible to build a “hidden” (undisclosed) reserve on a company’s inventory. This provision, which has also to be booked in the statutory accounts, is accepted for tax purposes (similar to the bad debt provision). Specifically, a company may build a provision for obsolete inventory as well as a hidden reserve on 33.3% of the inventory value after deduction of the obsolete inventory.

**Tax expenses**  
Corporate income and capital taxes paid to the Swiss Federation as well as to the cantons and the municipalities are tax-deductible.

**Foreign exchange losses**  
Realised foreign exchange gains and losses are included in the tax basis of a corporation as taxable/tax-deductible. Based on a recent federal court decision — for which applicability for a specific case has to be reviewed — unrealised gains or losses resulting from the translation of financial statements in a foreign (functional) currency to CHF may not be taxable/tax-deductible.

**Costs of employee share plans and stock option plans**  
The cost of employee share plans and stock option plans are generally deductible, assuming the employees eligible for the plan are employed by the Swiss company. The same holds true for the recharge of costs for plans covering local employees.

**Goodwill**  
Only acquired goodwill (derivative goodwill) may be capitalised in the statutory accounts and depreciated. Depreciation is generally allowed over five years.

**Group taxation**  
Tax is levied on each corporation as a separate entity, that is a parent company and its Swiss subsidiaries are taxed separately, and only the dividends from, but not the profits of, the subsidiaries are taxed in the parent company’s hands and form the basis of relief.

**Tax incentives**  

**Business incentives**  
Many cantons offer a great variety of incentives for newly established companies or for expansion investments, such as tax holidays or significant tax relief for cantonal and
communal tax purposes for up to 10 years. In some cantons or for specific regions, a tax holiday even for federal tax purposes may be granted if certain conditions are met.

**Privileged cantonal tax regimes**

Many cantons offer privileged corporate tax regimes. Usually, an up-front confirmation for such privileged tax regime can be obtained by way of an advance tax ruling with the cantonal tax authorities. Such ruling process usually takes at least four to six weeks.

A special tax status is granted for an unlimited period of time and can be relied upon unless the Swiss company’s circumstances change materially.

**Holding company tax regime**

The holding company tax status is available to companies, which meet the following conditions:

- The primary purpose of the company must be to hold and manage long term equity investments in affiliated companies and this purpose must be stated in the bylaws;
- The company must not be engaged in a commercial activity in Switzerland; and
- The company must pass an alternative asset or income test, whereby either two thirds of the company’s assets must consist of substantial shareholdings or participations or two thirds of total income of the company must consist of participation income (dividend income or capital gains) from such shareholdings and participations.

A qualifying holding company is exempt from all cantonal/communal income tax (with the exception of income from Swiss real estate which is subject to tax after deduction of typical mortgage expenditures on such real estate).

Consequently, a holding company is in principle only subject to an effective tax rate of 7.83% (i.e., federal income tax rate) prior to participation relief for qualifying dividends and capital gains. A reduced capital tax at cantonal/communal tax level usually applies.

A tax ruling may be obtained prior to forming the holding company from the cantonal tax authorities in the proposed canton of residence in order to confirm eligibility for the holding company status.

**Domicile company tax regime**

The domicile company tax status is available for companies, which only carry out administrative functions in Switzerland and no commercial activities.

Insofar as a company fulfils the above mentioned criteria, it may apply to the cantonal tax authorities in the proposed canton of residence for a tax ruling entitling it to the following taxation:

- A modest portion of foreign source income (i.e., from 0% – 15%) is subject to tax in accordance with the importance of the administrative function in Switzerland;
- Income from qualifying participations (including dividends, capital gains and re-evaluation gains) is usually tax exempt (whereas losses deriving from qualifying participations usually are non-tax-deductible);
- All income from Swiss sources is taxed at ordinary rates;
Switzerland

- Expenditures which are justified for business purposes are deductible from the income to which they have a business correlation; and
- Reduced capital tax rates usually are applicable.

The conditions to qualify as a domicile company vary from canton to canton. This is particularly the case with regard to determining the percentage of income from foreign sources subject to tax in Switzerland and to the definition of exactly what type of income is considered foreign source income.

A domicile company can be expected to be subject to an effective tax rate of 7.83% – 11% on foreign source income.

**Administrative/auxiliary/mixed company tax regime**
This tax status, which is very similar to the domicile company tax status, has been given different names by the cantons. Internationally it is most often referred to, however, as the “Mixed company” tax status.

In contrast to the pure domicile company status, it is permissible for a mixed company to undertake limited commercial activity in Switzerland. As a general rule, at least 80% of the income from commercial activities of a mixed company must be derived from non-Swiss sources (i.e., a maximum of 20% of income may be linked to Swiss sources). Many cantons additionally require that at least 80% of costs must be related to activities undertaken abroad.

Insofar as a company fulfils the above-mentioned criteria, it may apply to the appropriate cantonal tax authorities for a tax ruling entitling it to tax treatment analogous to the rules set forth above for domicile companies. Depending on the concrete Swiss activity and infrastructure, the portion subject to cantonal and communal income tax generally varies from 5% to 25% of the foreign source income and is generally higher than is the case for domicile companies. The exact portion needs to be clarified with the responsible cantonal tax authorities in the tax ruling.

The additional related statements set forth above for domicile companies are applicable.

**Withholding taxes (WHT)**

The statutory rate of Swiss withholding tax is 35%. Relief, if any, generally is granted by refund. Since 1 January 2005 a notification procedure is applicable upon request on dividends paid by a Swiss company to foreign shareholders with a substantial shareholding. The following table shows the residual/remaining tax for the recipient. Credit for the unrelieved portion of Swiss withholding tax may be available in the country of the recipient.

**Treaties in force (per 1 January 2010)**
The following table does not cover Swiss withholding taxes on interest payments based on mortgage loans with respect to Swiss located real estate.

Notes

1. In Switzerland, there is no withholding tax on interest deriving from regular loan agreements. In general, withholding tax is only levied on interest paid by banking institutions (or paid by entities tax-wise qualified as “banking institutions”) to non-banks, interest on bonds, bond-like loans. In Switzerland, a withholding tax may be levied on interest paid on mortgage loans with respect to Swiss located real estate; however, this is not covered in the table above.

2. There is no withholding tax on royalties, licenses, and similar fees payable by Swiss individuals or corporations (provided that the dealing at arm’s-length principle is met).

3. The statutory withholding tax rate of 35% is levied but refunded, provided that the respective earnings are declared as income for tax purposes.

4. No withholding tax is levied between Swiss group companies; tax liability may be met by notification procedure. For this purpose, a substantial holding is a participation of at least 20% in the capital or a market value of at least CHF 2 million. Effective from 1 January 2010, these thresholds will be lowered to 10% respectively CHF 1 million.

5. Certain types of interest payments income deriving from several countries are exempt from withholding tax (e.g., because only taxable in the resident state of the recipient). However, it is assumed that this is only of marginal relevance for Swiss tax purposes.

6. 15% residual tax for French companies with more than 10% shareholding if fulfilling the following requirements: i) no predominant shareholder of the company is EU or Swiss resident and ii) the shares are not traded at a stock exchange (neither the shares of the receiving nor of the distributing company).

7. Full relief of the withholding tax on interest paid for a loan granted by the Israel Government (including political subdivisions and local corporate bodies) or granted by the Israel Central Bank.

8. Interest on bank loans is 5%.

9. Full relief if certain requirements are met.

10. Interest on bank loans is 10%.

11. Full relief for certain dividend payments to certain US pension funds.

12. Full relief on certain categories of interest.

13. Interest on bank loans is 0%.

14. According to the territorial principle of Venezuela only certain persons can benefit from the tax relief.

15. Interest on bank loans to corporations 0%.

16. 0% withholding tax rate on dividends of participations of at least 25% as well as on interest payments is granted effective from 1 June 2007.

17. 20% minimal shareholding plus foreign investment of minimal USD 200,000.

18. 20% minimal shareholding plus foreign investment of minimal CHF 200,000.

19. 30% only on income bonds and on profit participating loans.

20. 5% for specific power houses.

21. 10% withholding tax for shareholdings between 20% and 50%; 7% withholding tax for shareholdings of more than 50%.

22. Rates effective from 1 January 2009.

*Bilateral Agreements respectively Art. 15 Savings Tax Agreement (STA) between Switzerland and the European Union (EU) apply as from 1 July 2005 and provide the following benefits:

- Upon request, Swiss withholding tax on dividends paid by a Swiss subsidiary company to its EU parent company may be reduced to nil (0%) (reduction at source) and are only subject to a notification procedure, if the following conditions are cumulatively met:
  - Direct minimum holding of 25% of the subsidiary’s capital for at least two years; and
  - Both companies are subject to corporate income tax.

- Upon request, withholding tax on interest and royalty payments made between associated companies or their permanent establishment resident respectively situated in Switzerland and the EU may be reduced to nil (0%) (reduction at source) in the source state, if the following conditions are cumulatively met:
Switzerland

- Direct minimum holding of 25% for at least two years (parent/subsidiary), or direct holding by a third company of minimum 25% in the capital of both companies for at least two years (sister companies); and
- Both companies are subject to corporate income tax.
- Transition periods/rules:
  - Greece, Latvia, Poland and Portugal: withholding tax rate on interests is 10% at maximum as of 1 July 2005 to 30 June 2009; as from 1 July 2009 to 30 June 2013, the maximum withholding tax rate is 5%, afterwards 0% (Nil rate).
  - Lithuania: withholding tax rate on interests is 10% at maximum as of 1 July 2005 to 30 June 2009; as from 1 July 2009 to 30 June 2011, the maximum withholding tax rate is 5%, afterwards 0% (Nil rate).
  - Specific transition rules applied in relation to Spain until 31 May 2007.
  - The above mentioned transition rules only cover the Swiss outbound perspective. Further transition rules may apply for Swiss inbound payments (e.g., for royalties paid to a Swiss company), e.g., with respect to Czech Republic, Estonia, Slovakia, Spain.
  - Double Tax Treaties between Switzerland and EU Member States with more favourable tax treatment of dividend, interest and royalty payments remain unaffected. In turn, the Bilateral Agreements between Switzerland and the European Union (EU) apply also in case there is no bilateral Double Tax Treaty with Switzerland and an EU-country (as is for example the case for Malta and Cyprus).
  - In general, the Bilateral Agreements between Switzerland and the European Union (EU) is also binding with respect to new member states of the EU.
  - The application of the Bilateral Agreements is subject to domestic and STA misuse conditions.

New treaties
Various treaties are subject to re-negotiations.

Tax administration

Overview
The tax year is the business year. Thus, the basis for corporate taxation is the applicable accounting period, which may end at any date within a calendar year.

The tax system is based on taxpayers’ declarations, with subsequent assessments being issued by the tax authorities on the basis of the tax returns filed. Companies are initially assessed on a provisional basis, the final assessments being issued after the tax base has been either the subject of a tax audit or declared final by the authorities.

Payment of tax
Unless payments on account are specifically requested, federal, cantonal, and communal taxes on income and capital are, in most cantons and for federal tax purposes, payable only upon receipt of a demand based on a provisional or final assessment. However, cantonal exemptions apply: as an example, based on the date of maturity of the respective tax year (30 September), the canton of Zurich levies late payment interest to the extent that the full (final) tax amount had not been paid in time (independent from any earlier provisional tax invoices). About one month before the due date, a (provisional) tax bill based on the latest tax return filed or the assessment of the preceding period is sent to the taxpayer. Payment is usually in two or three instalments. If the entire amount is paid up front, a discount may be granted.
Other issues

Transfer pricing
Switzerland is of the opinion that transfer pricing matter cannot be addressed by legislation, and therefore, has no plans to issue any domestic provisions on transfer pricing in the near future. There is, however, an increasing awareness of the issue and concern on the part of the Swiss tax authorities that taxpayers may transfer profits without economic justification to countries with strict transfer pricing rules and documentation requirements in order to avoid challenges by the respective local tax authorities. In this context Swiss tax authorities take an increasing interest in a company’s transfer pricing position in order to defend their own position. Some cantonal tax authorities are starting to focus on low risk/low profit entities located in Switzerland.

Switzerland follows the OECD Guidelines as closely as possible and recognises the arm's-length principle based on interpretation of actual legislation. To clarify transfer pricing issues, Switzerland offers an informal procedure for agreeing pricing policies in advance.

**Significant developments**

There have been no significant developments in corporate taxation in Syria in the last year.

**Taxes on corporate income**

**General income tax rates (including branches of foreign companies)**
Except for the special cases listed below, common corporate income tax rates (including branches of a non-resident entity) vary between 10% and 28% of profits, as follows:

<table>
<thead>
<tr>
<th>Taxable profit (in SYP – Syrian pounds)</th>
<th>Tax rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Up to 200,000</td>
<td>10</td>
</tr>
<tr>
<td>From 200,001 to 500,000</td>
<td>15</td>
</tr>
<tr>
<td>From 500,001 to 1,000,000</td>
<td>20</td>
</tr>
<tr>
<td>From 1,000,001 to 3,000,000</td>
<td>24</td>
</tr>
<tr>
<td>Over 3,000,000</td>
<td>28</td>
</tr>
</tbody>
</table>

Depending on the location of the taxpayer, an additional local administration surtax of 4% to 10% (of the tax amount) will apply.

**Joint-stock companies with more than 50% shares offered to the public**
Joint-stock companies offering more than 50% of their shares to the public are subject to a flat income tax rate (on profits) of 14%. In this case, the 4% to 10% administration surtax does not apply.

**Other joint-stock and limited liability companies and projects included under investment encouragement laws**
Joint-stock companies offering less than 50% of their shares to the public, limited liability companies and projects signed with Syrian companies included under the investment encouragement laws are subject to a flat income tax rate of 22% on profits. In this case, a 4% to 10% local administration surtax applies.

**Hotels, restaurants, and recreational establishments**
International standard, first- and second-class hotels, restaurants, lodging houses, related services, and all recreational establishments are subject to tax based on their turnover. The tax rate is 3%, and it covers both income tax and salary tax.
**Contracts with public sector, oil companies and non-residents**

A Syrian company contracting with the public sector and/or with an oil company or with a non-resident entity will be subject to a withholding tax based on the contract value (on that specific contract only) rather than income tax on real profits.

The same tax rate applies to non-resident contractors operating directly from abroad; they are subject to a 1%, 2%, 4%, 7% or 10% tax on the value of the contract.

The applicable rates vary according to the nature of the contract and the customer. The non-resident tax covers both income tax and salary tax of the foreign and local employees working on the contract.

**Corporate residence**

The following entities are considered Syrian residents for tax purposes:

- An entity whose principal activities are administered in Syria;
- An entity that adopts the Syrian Arab Republic as its headquarters; and
- Branches or offices of foreign companies in Syria.

Tax is levied on all corporeal and incorporeal persons, residents and non-residents, on all profits generated in Syria. The main premise for considering profits to have been realised in Syria is whether they occurred from efforts exerted in Syria, irrespective of the taxpayer’s identity or place of residency.

**Other taxes**

**Stamp duty**

Stamp duty generally is imposed on transactions such as the formation of corporations or the execution of documents, licenses, contracts, etc., at a rate ranging from 0.4% to 0.7%.

**Branch income**

The taxes on branch income are the same as taxes on corporate income (tax rate varies between 10% and 28%). *See Taxes on corporate income section.*

**Income determination**

**Capital gains**

Capital gains are considered taxable income, and are taxed at the normal corporate income rates (10% to 28%).

Capital gains include dividends, interest, revenue, premiums, and other cash income sources.

**Inter-company dividends/stock dividends**

Dividends paid by Syrian corporations on previously taxed income are not subsequently subject to tax upon distribution.
Syria

*Foreign income*
Income from any source, domestic or foreign, received by a company in Syria is subject to the applicable tax rate on profits.

*Deductions*

*Depreciation and depletion*
Depreciation of property, plant, and equipment (at rates fixed by the law) is deductible.

*Net operating losses*
Losses may be carried forward for five years. The carryback of losses is not available.

*Payments to foreign affiliates*
Payments to foreign affiliates are considered normal payments because Syria has no transfer pricing rules. However, the payments may be subject to withholding taxes.

*Deductible expenses*
The following expenses are deductible:

- Cost of goods sold;
- Cost of services rendered;
- Rent paid for the business premises (or rent value if the taxable entity owns the property);
- Salaries and incentives paid to employees/workers;
- Payments representing employer’s portion of social security contributions;
- Indemnities and allowances (end of service…) paid according to the labour law;
- Depreciation accepted according to each kind of profession and industry except depreciation of real estate;
- Taxes and duties levied during the year except the tax on profits; and
- Grants paid by taxable persons against official receipts for known public or private entities on condition the grants do not exceed 3% of net profits.

*Non-deductible expenses*
The following expenses are not deductible:

- Expenses leading to the increase of the value of fixed assets (capital expenditures);
- Personal expenses considered by the business owner (or/and his partner) as personal compensation; and
- Compensations for partners in some business entities.

*Group taxation*
There is no group taxation in Syria.

*Tax incentives*
Incentives are granted under other non-tax laws for certain industrial projects and for tourism.
Syria

**Withholding taxes (WHT)**

**Interests**
The income, revenue, and interest earned from accounts opened at Syrian banks and from treasury bonds are subject to an 8.25% withholding tax.

**Royalties**
Royalties paid to non-residents are subject to a 5% withholding income tax as well as a 2% withholding payroll tax.

**Resident contractors**
When a Syrian company performs contracts with the public sector and/or with an oil company, or with a non-resident entity, it will be subject to a withholding tax based on the contract value (on that specific contract) rather than income tax on real profits.

**Non-resident contractors**
Revenue earned by non-resident contractors in Syria is subject to a withholding tax based on the contract value (of that specific contract) rather than income tax on real profits.

**Double taxation treaties (DTTs)**
The table below shows the treaty and non-treaty withholding taxes:

Notes

a. Taxed only in the dividend beneficiary’s jurisdiction (when the beneficiary is owner of the shares).

b. Tax should not exceed:
   - 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that owns at least 10% of the shares of the company paying the dividends; or
   - 10% of the gross amount of the dividends in all other cases.

c. Tax should not exceed:
   - 5% of the gross amount of the dividends if the beneficial owner is a company that has owned at least 25% of the capital of the company paying the dividends; or
   - 10% of the gross amount of the dividends in all other cases.

d. Total Malta or Syrian tax on the profits of a company and the dividends distributed by such company, as the case may be, shall not exceed the maximum tax chargeable on the company’s profits out of which the dividends are paid.

e. Tax should not exceed:
   - 18% of the gross amount for any patent, trademark, design or model, plan, secret formula or process, industrial or scientific equipment, or for information concerning industrial or scientific experience;
   - 15% of the gross amount paid for any copyright of literary, artistic or scientific work; or
   - 10% of the gross amount of the dividends in all other cases.

f. Tax should not exceed:
   - 10% of gross amount paid for cinematographic films, magnetic films and tapes for television and radio; or
   - 15% of the sum paid for any copyright of a literary, artistic or scientific work, including cinematographic films and films and recordings for other forms of radio transmission or television transmission; any patent, trademark, design or model, plan, secret formula or secret process, as well as for the use or right to use industrial, commercial or scientific equipment and for information related to experience in the industrial, commercial or scientific area.

g. Tax should not exceed:
   - 18% of the gross amount of royalties paid for any patent, trademark, design or model, plan, secret formula or process, any computer software program, or for information concerning industrial, commercial or scientific experience;
   - 13.5% of the gross amount of royalties paid for any copyright of literary, artistic or scientific work; or
   - 4.5% of the gross amount of royalties paid for cinematographic films, programmes and recordings for radio or television broadcasting.

h. Tax should not exceed:
   - 15% of the gross amount of royalties paid for any patent, trademark, design or model, plan, secret formula or process, or for information concerning industrial, commercial or scientific experience; or
   - 10% of the gross amount of the royalties for the use of or the right to use any copyright of literary, artistic or scientific work including cinematographic films and recordings for radio and television.
Tax administration

Returns
The tax year in Syria is the calendar year.

Taxpayers in Syria shall comply with the following requirements:

- Tax returns must be filed by 31 May for limited liability and joint-stock companies and 31 March for other types of companies. Payment is due at the time of filing; and
- Payroll withholding tax should be submitted by the employer on a semi-annual basis.

Payment of tax

Penalties
A penalty is assessed for late payments 30 days after the filing date at a rate of 10%, up to the amount of the tax liability.

Statute of limitations
In Syria the statute of limitations with respect to tax is five years.

Permanent and temporary exemptions
Investment encouragement regulations allow foreign investors to benefit from customs exemptions for the imports used in the investment.

Permanent exemptions
Physical and moral persons and associations exempted from income tax either through the real profit or lump-sum profit method are the following:

- Types of consumers and investors’ cooperative associations;
- Farmers harvesting and selling crops; this exemption includes animals and livestock bred on their farming lands;
- Facilities in which stocks are bred or where poultry farming is exercised; subject to income tax according to the real-profit tax;
- Persons engaged in the following activities: composition, playing music, drawing, painting and other artistic practices;
- Day-care centres;
- Institutes and associations taking care of people with special needs;
- 75% of the yearly net profits for air and maritime transportation; and
- 50% of net profits of stock breeding and poultry farming facilities.

Significant developments

Most tax incentives previously offered under the Statute for Upgrading Industries (SUI) expired at the end of 2009 and have been replaced by a new Statute for Innovating Industries (SII). Under the SII, research and development (R&D) credits are available up to 15% of qualified R&D expenses incurred, with the maximum amount of tax credit capped at 30% of the tax payable for the year in which the expenses are incurred. In addition to R&D credits, subsidies are also available for certain qualified activities. See the Tax incentives section.

On May 28 2010, the Legislative Yuan passed the third reading for amending the current corporate income tax rate from 20% to 17%. The reduced tax rate applies to the taxable year 2010 and onward. See Income tax section.

Taxes on corporate income

Income tax
Income is taxed as follows:

<table>
<thead>
<tr>
<th>Taxable income</th>
<th>Tax thereon</th>
</tr>
</thead>
<tbody>
<tr>
<td>Up to NTD 120,000</td>
<td>Exempt</td>
</tr>
<tr>
<td>NTD 120,001 and over</td>
<td>17% of total taxable income</td>
</tr>
</tbody>
</table>

To help improve Taiwan's investment environment and boost foreign investors' interest in injecting money into Taiwan, the current corporate income tax rate has been reduced from 20% to 17% effective to the taxable year 2010 and onward.

Taxation of interest
Interest received on commercial paper, treasury bills and certain other interest-bearing financial instruments are subject to withholding tax rates of 10% and 15% for resident and non-resident taxpayers, respectively. However, such income is not subject to any other form of income tax and is effectively taxed separately from other income referred to above.

Tax on retained earnings
For earnings accumulated on or after 1 January 1998, an additional 10% profit retention tax will be imposed on any current earnings that remain undistributed by the end of the following year.
Taiwan

**Imputation tax system**
Taiwan operates an imputation tax system to eliminate double taxation on earnings of a corporation. The corporate income tax and 10% profit retention tax already paid by the company can be distributed to the domestic individual shareholders as tax credits to offset their individual income tax. However, the tax credits distributable to shareholders are subject to certain limitations.

Non-resident shareholders may credit the 10% profit retention tax previously paid by the investee company against the dividend withholding tax where the dividends are distributed from retained earnings that have already been subject to the 10% profit retention tax. Please note that credit for profit retention tax from withholding tax is calculated based on a prescribed formula.

**Income Basic Tax Act**
Effective from 1 January 2006, all Taiwan resident companies, as well as foreign companies with a fixed place of business or business agent in Taiwan, should calculate income basic tax if they earn certain income that is tax-exempt or enjoy certain tax incentives. The basic income of a company shall be the amount calculated in accordance with a formulae stipulated by the government, with a deduction of NTD 2,000,000. Currently, the income basic tax rate is 10%. If the basic income tax amount is greater than the regular income tax amount, taxpayers have to pay income tax based on regular income tax amount plus the difference between the basic tax amount and the regular income tax amount. On the other hand, if the regular income tax amount is greater than the basic income tax amount, no special action is required.

**Corporate residence**
According to Taiwan’s Company Act, the principal office of a company must be registered with the government. Corporate residence is determined by the place of registration, which normally is the place of central management.

**Other taxes**

**Business tax**
All sales of goods and services in Taiwan, as well as the importation of goods into Taiwan, are subject to business tax. The sellers and service providers are generally obligated to pay business tax for the sales of goods or services within Taiwan unless the law provides otherwise. For importation of goods, the business tax will be paid by the goods receivers or buyers via customs. For importation of services sold by foreign companies to Taiwanese buyers, business tax shall be paid by the service buyers. However, the service buyer will not be required to pay business tax if it adopts the value-added tax system, and is exclusively engaged in taxable transactions. There are two types of business tax systems: value-added tax and gross business receipts tax.

**Value-added tax (VAT)**
VAT is applicable to general industries, and the VAT rate is 5%. Under the VAT system, each seller collects output VAT from the buyer at the time of sale, deducts input VAT paid on purchases from output VAT, and remits the balance to the tax authority.

**Gross business receipts tax (GBRT)**
GBRT is applicable to specified industries, e.g., financial institutions, small businesses, etc. For banks, insurance companies, investment trust companies, securities and
Taiwan

futures firms, short-term commercial paper enterprises, and pawnshops, the rate is 2%. For re-insurance enterprises, the rate is 1%.

**Stamp tax**
Stamp taxes are imposed on each copy of the following documents executed within the territory of Taiwan (with the following respective tax rates):

1. Monetary receipts must have a revenue stamp of 0.4% of the amount received per piece. However a receipt for the money deposited by the bidder requires a revenue stamp of 0.1% of the amount received per piece.
2. Contract or deed for the sale or purchase of movable property must have revenue stamp of NTD 12 per piece.
3. Contractual agreement under which one party agrees to complete a specific piece of work for the other party for consideration must have a revenue stamp of 0.1% of the contract price.
4. Contract for the sale, transfer and partition of real estate must have a revenue stamp of 0.1% of the contract price.

**Commodity tax**
Commodity tax (excise duty) is levied on certain commodities, as specified in the Commodity Tax Act (including rubber tyres, beverages, cement, flat-glass, oil and gas, electrical appliances and vehicles), at the time when such goods are dispatched from a factory or when imported. Different rates of commodity tax apply to different types of commodities based on the value of the goods or the volume in specific circumstances.

**Property tax**
A tax is levied on property annually. At present, the rate for business properties is 3% of the assessed value and the rate for houses for private residence, private hospitals, professional offices and the premises of non-profit civil organisations is 1.2% or 2% of the assessed value.

**Securities transaction tax**
Tax is levied on securities transactions at the rate of 0.3% on gross proceeds from the sale of stocks. Trading in corporate bonds and financial bonds is temporarily exempt from securities transaction tax assessment.

**Customs duties**
Taiwan uses the Customs Cooperation Council Nomenclature (CCCN) to classify goods and set duty rates. The customs duty is payable by the consignee or the holder of the bill of lading for imported goods, and is based on the dutiable value or the volume of goods imported.

**Branch income**
A foreign company whose head office is located outside of Taiwan must keep separate books for each branch within Taiwan. A head office or regional headquarters’ general and administrative expenses may be allocated to the branch under certain conditions. Income tax is assessed only on the branch’s profits. A Taiwan branch should complete an annual income tax return. The applicable rates of taxation are shown under “Taxes on Corporate Income”. A Taiwan branch of a foreign company may remit after-tax profits to its head office without further taxation due.
Motion picture leasing
A foreign motion picture’s branch in Taiwan can deem 45% of its revenue from leasing of motion pictures as cost. However, if a foreign enterprise with no branch office in Taiwan leases motion pictures through agents, 50% of the revenues can be deemed as cost.

Foreign company
A foreign company with no fixed place of business or business agent in Taiwan is subject to withholding tax at source on its Taiwan-sourced income. Withholding tax rates on dividends, interest and royalties may be reduced if the recipient is a tax resident of a tax treaty country and the relevant treaty provides for a reduced rate.

A foreign company which is engaged in international transportation, construction contracting, provision of technical services, or machinery and equipment leasing, within Taiwan, and where the cost and expenses are proven to be difficult to calculate, may apply for an advance approval from the National Tax Administration (NTA) to adopt the deemed profit method to determine the taxable income as 10% or 15% of the gross revenues. This will effectively reduce corporate tax rate on gross revenues once the approval is obtained from the NTA (assuming the corporate tax rate is 17%).

Income determination
Taiwan-sourced income
The company is taxed on its net income, which is defined as gross annual income after deduction of costs, expenses, losses and taxes. Except for certain exempt items, income from all sources is subject to corporate income tax. Article 8 of the Income Tax Act and related guideline define the types of income that should be regarded as sourced in Taiwan.

The Guideline issued by the Ministry of Finance (MOF) on 3 September 2009 clarifies the scope of Taiwan-sourced income for the existing income categories. For example, fees received by a foreign company for service performed entirely outside of Taiwan are exempt from income tax assessment, subject to supporting evidentiary documents. This opens up opportunities for foreign companies to reassess whether their cross-border service charges are wholly or partially non-Taiwan-source income, and to claim associated costs and expenses as reduction.

The Guideline further provides clearer tax treatment on R&D cost sharing (so called “cost contribution arrangement”). When a Taiwanese company enters into a joint technical cooperation and development agreement with other foreign companies and certain required criteria is met, the payment of R&D costs thus allocated shall not be deemed as Taiwan-sourced income.

The guideline is effective on the date of issuance, and does not apply retroactively based on the tax authority’s current viewpoint, unless a case is undergoing tax remedy procedures.

Inventory valuation
Inventory must be valued at cost. If cost exceeds market price, the latter may be used as the valuation basis except where the last-in, first-out (LIFO) method is used. Cost may be determined by the LIFO, first-in, first-out (FIFO), moving-average, weighted-average
Taiwan

methods, specific identification method, or any other method approved by the tax authorities. Conformity between financial and tax reporting is not required.

**Capital gains**
Gains on the disposal of fixed assets are taxable as current-year income of the company, with the exception of gains on the sale of land. The capital gains tax on marketable securities is currently exempt. Instead, securities transaction tax is levied on the sales proceeds (see Other taxes above). However, if a foreign company has a fixed place of business or business agent in Taiwan, capital gains on the sale of marketable securities may trigger income basic tax for the foreign shareholder.

**Inter-company dividends**
Starting 1 January 1998, dividends received from local investee companies by a domestic corporate shareholder are not included in taxable income. In addition, the imputation tax credit derived from the dividend income of the investee corporation can be distributed to the domestic corporate shareholders, but this tax credit cannot be used to offset the domestic corporation’s income tax liability. The tax credits must be recorded in a separate book to be treated as tax credits available to the individual shareholders of the domestic corporate shareholders.

Dividends received from foreign subsidiaries are taxable, but credits are given for the withholding tax paid offshore, limited to the incremental tax liability that would result if the dividends were added to the Taiwan corporate shareholder’s taxable income and taxed at the Taiwan corporate income tax rate.

**Foreign income**
Foreign income received by a Taiwan corporation is taxed. Double taxation is avoided by means of foreign tax credits.

**Deductions**

**Depreciation and depletion**
Straight-line, fixed percentage on diminishing book value, sum-of-years-digit, unit-of-production and working-hour methods are acceptable depreciation methods to the tax office. With the approval of the tax authority, a company may revalue its fixed assets each time the government’s wholesale price index increases by 25% over the base period. A company’s base period is established at the time of purchase of fixed assets or at such time when a company revalues its fixed assets. Any increase in fixed assets may then be depreciated for tax purposes.

**Net operating losses (NOLs)**
Based on Article 39 of the Income Tax Act amended on 21 January 2009, effective from 23 January 2009, a company’s NOLs can be carried forward for 10 years instead of five years. This extension applies to NOLs incurred in 2003 and onwards.

**Payments to foreign affiliates**
Royalties, interest, and service fees paid to a foreign affiliate are subject to withholding tax. Royalties or service fees paid to a foreign entity may be tax-exempt if certain requirements are met and prior approval is obtained.
**Taxes**
All taxes other than income tax are generally deductible, unless where such taxes are related to tax-exempt income. However, tax penalties are not deductible. The tax associated with the acquisitions of real properties (such as taxes on the purchase of land) should be included in the cost of the land or building.

**Other significant items**
If a company invests in a foreign entity and holds at least 20% equity ownership (this limitation does not apply if special approval is obtained from the Executive Yuan), the company can attribute 20% of the investment amount to a “reserve for foreign investment loss.”

**Group taxation**
As a result of a qualified merger, acquisition and spin-off, a company may choose to file a single consolidated corporate income tax return with its subsidiaries if the company continuously holds over 90% of the shares of the subsidiaries for 12 months in a tax year.

**Transfer pricing**
The Taiwan MOF announced the Assessment Rules for non-arm’s-length transactions by Profit-seeking Enterprises (TP Assessment Rules) on 28 December 2004. The transfer pricing regulations were established to constrain multinational corporations from leaving their profits in countries with lower tax rates. For applicable companies, the disclosure of related party transactions in the corporate income tax return filing and the preparation of transfer pricing report will be required. Upon request, the transfer pricing report will have to be submitted to the Taiwan tax authority within one-month of notice. The transfer pricing report must demonstrate the company's good faith effort to comply with the assessment rules. Without proper reason, failure to comply with such rules will result in additional tax payable and financial penalties. The types of transactions governed by these regulations include the following: transfer of tangible assets; use of tangible assets; transfer of intangible assets; use of intangible assets; rendering of services; use of funds; and other types of transactions prescribed by the MOF.

**Tax incentives**
Certain tax incentives are provided to investors if they are located in prescribed areas such as science parks, economic processing zones, free trade zones and so on. Other tax credits are granted to qualifying companies that invest in specific businesses or industries promoted by the government, such as biotech.

Most tax breaks were previously offered under the Statute for Upgrading Industries (SUI), which expired at the end of 2009 and has been replaced by a new Statute for Innovating Industries (SII). Additional tax incentives are available under the Business Mergers and Acquisitions Act, the Financial Institutions Merger Act and other laws and regulations.

Notwithstanding the expiry of the SUI, companies can still apply for tax incentives under this statute if the requisite approvals had already been obtained from the government before the expiry date.
Taiwan

R&D tax incentive
Under the SII, R&D credits will be available up to 15% of qualified R&D expenses incurred, with the maximum amount of tax credit capped at 30% of the tax payable for the year in which the expenses were incurred. The unutilised R&D credits will be forfeited, and cannot be carried back or carried forward.

Tax concessions on merger
Under the Business Mergers and Acquisitions Act, a merger or consolidation of companies can be exempt from stamp tax, deed tax, securities transaction tax and business tax incurred from the merger or consolidation, if certain conditions are met. After the merger or consolidation, any tax concession previously enjoyed by the merged entities will continue to be applicable to the surviving company (or new company) after the merger or consolidation. However, the surviving company is required to manufacture the same products or provide services which were approved by the Ministry of Economic Affairs (MOEA) for tax concessions engaged by the merged entities in order to continue the concessions obtained previously.

The unexpired and unutilised NOLs of the participating entities prior to the merger or consolidation may be carried over to the surviving or newly-created entity according to the percentage of shareholding in the surviving or newly-created entity held by all shareholders of the participating entities.

Free-trade-zones
According to Act for the Establishment and Management of Free-trade-zones, foreign companies or their branch companies in Taiwan that apply for establishment or delegate free-trade-zone companies to store and/or perform simple processing in free-trade-zone and sell the products within and outside of Taiwan shall be exempted from corporate income tax. In the event that the annual domestic sales exceed 10% of the total annual domestic and foreign sales, the portion in excess shall not be exempted from corporate income tax.

Withholding taxes
Domestic corporations paying certain types of income are required to withhold as follows:

<table>
<thead>
<tr>

Notes

The numbers in parentheses refer to the following notes:

1. For non-resident enterprises, a 15% withholding tax applies to interest income derived from short-term bills, securitised certificates, corporate bonds, government bonds or financial debentures, as well as interest derived from repurchase transactions involving these bonds or certificates. The rate in all other cases is 20%, unless reduced under a tax treaty.
2. Royalties received by foreign enterprises that are specially approved in advance by the government are exempt from income tax.
3. A rate of 10% for shareholders that are companies (other than partnerships) with at least a 25% shareholding.
4. 7% of the gross amount of the interest arising in a territory and paid on any loan of whatever kind granted by a bank of the other territory.
5. The withholding tax rate on technical service fee payments is reduced to 7.5%.
6. The total tax burden of corporate income tax and dividends tax is not to exceed 40% of the total profits of the company.
7. A rate of 5% for shareholders with at least a 10% shareholding.

Tax treaties

Double taxation treaties entered into with the following countries: Australia, Gambia, Belgium, Denmark, Senegal, United Kingdom, Sweden, Indonesia, Israel, New Zealand, Netherlands, Singapore, South Africa, Swaziland, Macedonia, Malaysia, and Vietnam relate to corporate and individual income tax. Treaties with Canada, the European Union, Germany, Israel, Japan, Korea, Luxembourg, Netherlands, Norway, Sweden, Thailand, Macau, and the United States relate to certain earnings from the operation of ships and/or aircraft.

Tax administration

Returns

The tax year in Taiwan runs from 1 January to 31 December. Tax returns are filed on a self-assessment basis. Businesses may request approval from the local collection authority to file income tax returns using a fiscal year-end other than 31 December. Income tax returns are due no later than five months after the end of the tax year.

Payment of tax

Tax is paid on a self-assessment basis in two instalments. The first payment is based on 50% of the tax liability of the prior year’s tax return and is made in the ninth month of the enterprise’s fiscal year. However, if the taxpayer meets certain requirements,
Taiwan

it may self-assess the provisional tax based on the taxable income of the first half of
the current fiscal year. The second payment is made at the time of filing the annual
tax return. The returns are subsequently reviewed by the tax authorities, and a final
assessment is issued.

Effective from 21 January 2009, any overpaid tax as a result of the tax collection
authority’s mistake, shall be refunded to the taxpayer within two years of
acknowledgement of such mistake and shall not be subject to the original five-year
period for applying for refund where the taxpayer is responsible for the mistake.
The revised regulations shall apply retroactively to all overpaid taxes resulting from
mistakes attributable to the tax collection authority without regards to the original
five-year limitation.

Significant developments

Changes were introduced to the Tajikistan tax code (Law No. 571 dated 3 December 2009) effective 1 January 2010. The major changes with respect to the taxation of corporations include:

- Increase of the vehicle tax rates, newly enacted tax rate is 2.5% – 13.75% of calculation index; and
- A double tax treaty (DTT) with Latvia became effective 1 January 2010.

Taxes on corporate income

Generally, all Tajik legal entities are subject to taxation in Tajikistan. Tax is computed by applying the statutory 15% rate to taxable income (25% for enterprises operating in transport, communication, banking and service sectors), which is calculated as gross income decreased by allowed deductions and losses carried from previous periods. In Tajikistan, there is a minimum income tax on company income at the rate of 1% of aggregate annual income. Corporate income tax (CIT) is taken into account for minimum income tax. If CIT is less than minimum income tax on company income, then CIT should not be paid. Only a positive difference between CIT and minimum income tax should be paid. Nonetheless, minimum income tax should be paid in full amount.

Corporate residence

Legal entities formed under Tajik law, as well as legal entities whose effective control (management) is in Tajikistan, are recognised as residents for corporate tax purposes.

Other taxes

Value-added tax (VAT)

VAT is generally assessed on taxable turnover, which includes goods and services. The current VAT rate is 18%. Individuals and businesses are required to register as VAT payers when the established threshold of taxable turnover is exceeded. Generally, the tax code exempts the following from VAT: goods and services that are not provided in Tajikistan under the place of supply rules, sale, transfer or rent of real property, financial services, medical services, publishing, and certain other goods and services.

For goods, the place of supply is determined as the initial point of transportation. Services are generally considered to be provided at the place of business of the service.
provider or the actual place where services are rendered. However, for certain types of services, such as consulting and accounting, the services are considered to be provided at the location of the buyer.

A VAT refund is generally available for qualified exporters if input VAT exceeds assessed VAT.

VAT returns, together with issued and received invoices, are filed monthly, not later than the fifteenth day of the month following the reporting month. Payments are due by the same date.

**Excise taxes**
Excise tax is assessed on beverages, tobacco products, fuel, tires, passenger automobiles, and jewellery. Excise tax rates are established by the government.

**Social tax**
The employer is obliged to make social tax payments assessed on salary at the rate of 25%.

**Road tax**
The formula for calculating road tax is total deductions of the reporting year multiplied by the 2% tax rate (0.5% for trade companies). If actual deductions do not exceed 70% of gross income, the tax base for road tax would be 70% of gross income.

**Land tax**
Land tax is paid based on the area of the land plot and varies depending on the location.

**Real estate tax**
Real property tax applies to immovable real property such as buildings, houses and flats. The tax rate is calculated by multiplying the land tax rate by a relevant coefficient, which depends on the purpose of real property.

**Vehicle tax**
Vehicle tax is computed as a percentage of the calculation index applied for horse power of the vehicle engine. The percentage ranges from 2.5% to 13.75%.

**Customs duties**
Tariff rates:

- *Ad valorem* rate – calculated as a percentage of the customs value of the declared goods;
- Specific rate – calculated based on a specified statutory amount per one unit of the declared goods; and
- Combined rate – contains both types of rates.

The applicable rates established by the government range from 0% to 15%.

Tajikistan is signatory to several free trade agreements, primarily among the following Commonwealth of Independent States (CIS) countries: Russia, Belarus, Kazakhstan, and Kyrgyzstan.
**Customs fees**
A customs processing fee of 0.15% of the declared value of the goods is assessed during customs clearance.

**Branch income**
In addition to income tax, permanent establishments (PEs) are subject to branch profit tax at the rate of 8% of net profit after income tax, unless a lower rate is prescribed by an applicable DTT.

**Income determination**
Generally, all Tajik legal entities are subject to taxation in Tajikistan. Tajik residents are taxed on their worldwide income. Non-residents are subject to income tax in Tajikistan only on Tajikistan source income. Non-residents operating through a PE are generally subject to the same income tax provisions. Income tax is assessed on taxable income, which is the difference between gross income and allowed exemptions and deductions.

**Inventory valuation**
Inventory accounting for tax purposes generally follows inventory accounting for financial reporting purposes.

**Capital gains**
Capital gains on securities in general are taxed as business profits.

**Inter-company dividends**
Inter-company dividends are exempt from income tax.

**Foreign income**
Tajik residents are taxed on their worldwide income. Non-residents are subject to income tax in Tajikistan only on Tajikistan source income.

**Deductions**
In general, all business expenses (materials, payroll, etc.) are allowed as a deduction if the expenses are connected with the earning of income, not of a capital nature, and supported by proper documentation.

**Depreciation**
The deduction for costs related to fixed assets generally is made through depreciation and amortisation at rates ranging from 7% to 20%, using the declining balance method.

**Net operating losses**
Net operating losses may be carried forward for three years but may not be carried back.

**Interest deductibility**
Interest deductibility is generally limited to three times the refinancing rate of the National Bank of Tajikistan (currently 8%). For certain entities, additional limitations may apply.
Charity contributions
Charity contributions are limited to 10% of taxable income.

Taxes
Taxes paid to the budget of Republic of Tajikistan and other states are deductible except for:

- Income tax from individuals;
- Income tax from legal entities; and
- Penalties and fines.

Other significant items
Among other deductions specifically mentioned in the tax code are research and development, repair expenses, and geological and geophysical expenses.

Non-deductible expenses
Non-deductible expenses, specifically mentioned by the tax code, include fines and penalties, meals and entertainment, personal expenses, passenger vehicles, and non-business expenses.

Group taxation
There are no rules permitting grouping for tax purposes in Tajikistan.

Tax incentives
Tax incentives include tax-free special economic zones and an exemption from income tax for taxpayers that have made a certain amount of investments.

Withholding taxes (WHT)
Tajikistan source income of nonresidents is subject to WHT at its source at the rates shown in the following table:

<table>
<thead>
<tr>
<th>Types of income at a source of payment</th>
<th>Tax rate</th>
</tr>
</thead>
<tbody>
<tr>
<td>Dividends and interest</td>
<td>12%</td>
</tr>
<tr>
<td>Insurance and reinsurance premiums</td>

Notes

1. A rate of 5% of the gross amount of the dividends if the recipient is the enterprise (except a partnership) and directly holds at least 25% of the capital of the company paying the dividends; 10% of the gross amount of the dividends in all other cases.

2. A rate of 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that holds directly at least 10% of the capital of the company paying the dividends; 15% of the gross amount of the dividends in all other cases.

3. A rate of 10% of the gross amount of the dividends if the beneficial owner is a legal entity and directly holds no less than a 30% stake in the company paying the dividends; 15% of the gross amount of the dividends in all other cases.

4. A rate of 5% of the gross amount of the dividends if the beneficial owner is a company that holds at least 50% of the share capital of the company paying the dividends; 15% of the gross amount of the dividends in all other cases.

5. A rate of 0% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that holds directly at least 75% of the capital of the company paying the dividends; 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that holds directly at least 25% of the capital of the company paying the dividends; 10% of the gross amount of the dividends in all other cases.

6. A rate of 5% of the gross amount of the royalties paid for the use of or the right to use software, or industrial, commercial or scientific equipment; 10% of the gross amount of the royalties in all other cases.

7. A rate of 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that holds directly at least 25% of the share capital of the company paying the dividends; 10% of the gross amount of the dividends in all other cases.

8. A rate of 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that holds directly at least 25% of the share capital of the company paying the dividends; 10% of the gross amount of the dividends in all other cases.

9. A rate of 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that holds directly at least 25% of the share capital of the company paying the dividends; 15% of the gross amount of the dividends in all other cases.

10. A rate of 5% of the gross amount of the dividends if the beneficial owner is a person who holds directly at least 25% of the share capital of the company paying the dividends; 10% of the gross amount of the dividends in all other cases.

11. Interest arising in Tajikistan and paid to the government of Turkey or to the Central Bank of Turkey shall be exempt from Tajikistan tax; interest arising in Turkey and paid to the government of Tajikistan or to the National Bank of Tajikistan shall be exempt from Turkish tax.
Tajikistan

**Tax administration**

**Returns**
The tax code prescribes a calendar year as the tax year. Annual CIT declarations are due by 1 April in the year following the tax year-end.

Taxpayers are required to submit their estimated calculation of monthly advance payments of CIT.

**Payment of tax**
With respect to CIT, the advance payments are due every fifteenth day of the month, except individual entrepreneurs. Payment of any outstanding income tax liabilities is required within 10 calendar days following submission of the annual income tax declaration.

Reporting periods vary for other taxes.

**Fines and interest penalties**
The fine for failure to file a tax return ranges from a minimum amount of 1 calculation index (CI), which is currently TJS 35, to a maximum fine of 100 CI, or TJS 3,500. The amount of the fine depends on the taxpayer’s category and should be assessed based on each 10 days of delay. In the absence of tax returns, the tax authorities are entitled to assess taxes based on any information available.

Fines may be assessed in the amount of 10% to 20% of the understated tax liabilities. In severe cases, a violation may be considered a criminal offence.

A fine for failure to withhold and remit tax may be assessed in the amount of 3 to 200 CI (approximately TJS 1,225 – 7,000) of the tax not withheld.

Interest penalties may apply to late tax payments in the amount of 0.08% of the underpaid tax amount, for each day of tax underpayment.

**Statute of limitation**
Taxpayers are allowed to make changes to prior period tax returns within the statute of limitations (three years). No fines should apply to corrections in this case.

**Other issues**

**Accounting system**
In accordance with the governmental Resolution of the Republic of Tajikistan concerning International Standards of Financial Statements, the Ministry of Finance of the Republic of Tajikistan shall adopt the International Financial Reporting Standards (IFRS) through a step-by-step approach.

Accounting policies and practices are being revised in light of the legal requirement that companies adopt IFRS and International Accounting Standards. Such revised accounting policies should be adopted by companies’ boards of directors and disseminated to all the accounting units with clear instructions on how to introduce and follow the new policies and procedures.
Corporate taxes in Tanzania

Significant developments

The most significant recent changes in relation to income tax on corporations are the introduction of a concessionary income tax rate for companies newly listed on the Dar es Salaam Stock Exchange (DSE), and the introduction of an alternative minimum tax (AMT). Details on these changes are discussed below.

Taxes on corporate income

Income tax is charged at a rate of 30% on income of a resident corporation and of a permanent establishment (PE) of a non-resident corporation.

A reduced corporate tax rate of 25% applies for three consecutive years for companies newly listed on the DSE. To qualify, at least 30% of the company’s shares must be issued to the public.

A new AMT applies at a rate of 0.3% of the gross turnover of a company that is in “perpetual loss status” for a period of at least three consecutive years as a result of tax incentives. The practical application of this tax is unclear but it has been provided that this new tax will apply to income years ending on or after 31 July 2008.

Non-residents are also subject to tax on income sourced in Tanzania. Certain payments to non-residents are subject to tax at the relevant non-resident withholding tax (WHT) rate (see section on Withholding taxes for the relevant rates). Income from the disposal of investments in Tanzania is subject to income tax if such investments fall within the source rules, and in such a case the income will be taxed at a rate of 30%.

Corporate residence

A company is tax resident if it is incorporated or formed under the laws of Tanzania or if the management and control of its affairs is exercised in Tanzania.

Other taxes

Value-added tax (VAT)

VAT is chargeable on all taxable goods and services supplied in, or imported into, mainland Tanzania. For imported goods, VAT is payable at the time of importation together with any customs and excise duties. For imported services, VAT is accounted for by registered businesses through a “reverse charge” mechanism. The standard rate of VAT is currently at 18% but the export of goods and certain services is eligible for
Tanzania

zero rating. Businesses with an annual taxable turnover of more than TZS 40 million must register for VAT.

The Commissioner for VAT has the discretion to register as intending traders, investors whose projects have not commenced production, but who wish to be VAT registered in order to reclaim the tax they incur on start-up costs. VAT payable with respect to capital goods (as defined), which are imported or purchased in Tanzania, may be permanently deferred, subject to certain procedures being followed.

Supplies of certain goods and services are exempt from VAT. A business that produces only exempt supplies is unable to register for VAT and consequently unable to recover the VAT incurred on inputs. However, businesses in this category that import taxable services with a value over the registration threshold must register for VAT to account for the VAT on such services.

Certain goods and services supplied to specified entities are eligible for “special relief” from VAT. The “special relief” provisions enable supplies, which would otherwise be chargeable with VAT, to be made VAT free provided certain administrative requirements are followed.

Registered businesses must submit VAT returns, with any tax due, on a monthly basis.

Businesses entitled to VAT refunds can claim any remaining credit six months after a refund first became due, subject to all intervening returns being rendered. Any claim for a VAT refund must be supported by an auditor’s certificate. Businesses in a consistent refund position (e.g., exporters) can apply for approval to lodge their refund claims on a monthly basis.

Zanzibar has its own VAT Act but it is similar to the Mainland Tanzania Act.

**Customs duties**

Tanzania is a member of the East African Community, which became a Customs Union with effect from 1 January 2005 on the implementation of the East African Customs Union Protocol. This protocol provides for: a Common External Tariff (CET), elimination of internal tariffs, rules of origin, anti-dumping measures, a common Customs law, and common export promotion schemes.

The customs duty rates applicable under the CET are as follows:

<table>
<thead>
<tr>
<th>Category</th>
<th>Rate</th>
</tr>
</thead>
<tbody>
<tr>
<td>Raw materials, capital goods, agricultural inputs, pure-bred animals, medicines</td>
<td>0%</td>
</tr>
<tr>
<td>Semi-finished goods</td>
<td>10%</td>
</tr>
<tr>
<td>Finished final consumer goods</td>
<td>25%</td>
</tr>
</tbody>
</table>

Tanzania is also a member of the Southern African Development Community (SADC). Where goods are subject to a lower rate of duty from another trade bloc such as SADC, the lower duty rate applies until such a time as the trading arrangements between the trading blocs are harmonised.
Excise duties

Excise duty rates apply as follows:

<table>
<thead>
<tr>
<th>Item</th>

</tr>
</tbody>
</table>

Fuel levy

Fuel levy is charged on petroleum products at a rate of TZS 200 per litre.

Payroll taxes

Payroll taxes, including skills and development levy; is imposed at 6% of payroll cash costs, and also includes a 20% social security contribution. Whereby in general, 10% is borne by employers with the other 10% deducted from employee pay.
Stamp duty
Examples of instruments giving rise to stamp duty obligations include conveyances, leases, share transfers, issue and transfer of debentures. The current rate is 1% of the transaction value.

Local taxes
The local government levies property tax based on the value of premises. The rates vary depending on the value and location of the property. The local government is also entitled to charge a 0.3% service levy based on turnover generated in the relevant district. For agricultural produce and livestock, there is a cess tax, currently capped at 5% of the producer price.

Branch income
The income tax liability of a person with a PE in Tanzania is calculated as if the person and the PE are independent but as if the PE is resident in Tanzania. The income of the PE is taxed at the normal income tax rate for entities, namely 30%. The PE is also subject to a tax on “repatriated income,” which applies at a rate of 10% (being the same rate as a company would withhold on dividends). In certain circumstances, business activities of the head office may be attributed to the branch. Arrangements between a PE and head office generally are not recognised other than the transfer of an asset or liability between the two. Amounts derived/payments received and expenditures incurred/payments made that relate to assets held by, or liabilities owed by, the business of the PE, are attributed to the PE.

Income determination
Subject to any provision to the contrary in the Act, income is to be calculated in accordance with generally accepted accounting principles. Corporations must apply an accrual basis of accounting.

Transactions between related parties
With respect to transactions between related parties, there is an obligation to “quantify, apportion and allocate amounts” for income tax purposes on an arm’s-length basis. If the Commissioner considers that a person has failed to comply with this requirement, he may make such adjustments as he thinks appropriate.

The Commissioner has the power to make counteractive adjustments to a person’s tax liability, where he considers that an arrangement is a tax-avoidance arrangement.

Anti-avoidance
Other anti-avoidance provisions include the following:

- A change in the underlying control of an entity, accompanied by some change in the conduct of the business;
- Controlled foreign trusts and corporations;
- Income or dividend stripping arrangements; and
- Income splitting.
Controlled foreign trusts and corporations

Certain provisions relate to the treatment of unallocated income of controlled foreign trusts and corporations, however, in practice, this is more of academic interest as there is limited outward investment from Tanzania.

Deductions

In calculating taxable profit, deductions are allowed for revenue expenditures incurred wholly and exclusively in the production of income, with some statutory exceptions. For capital expenditures, there are specific tax depreciation allowances.

Special rules apply with regard to the valuation of trading stock and long-term contracts and in relation to the treatment of instalment sales and finance leases.

In certain circumstances, there is a restriction on the amount of deductible interest for what are termed “exempt-controlled resident entities,” whereby there is a deferral of relief for interest to the extent that the interest cost exceeds the sum of (a) interest income and (b) 70% of income before net interest income/expense.

In order to claim relief for bad debts it is necessary to demonstrate that all reasonable steps have been taken to pursue payment and that there is a reasonable belief that the debt claim will not be satisfied. Financial institutions, however, should normally be able to claim relief for provisions made in accordance with the standards established by the Bank of Tanzania.

Depreciation allowances – overview

The categories of depreciable assets and their tax depreciation rates are set out in the table below.

Expenditures on plant and machinery are generally written off on a reducing balance basis at rates of 37.5%, 25% or 12.5%, depending on the category of the asset. Certain plant and machinery for manufacturing, fish farming and tourist hotels benefits from a 50% allowance in the first year, with the normal rates applying to the remaining balance in subsequent years. There is an immediate write-off of expenditures on plant and machinery used in agriculture.

Expenditures on buildings qualify for a depreciation allowance of 5% per year on a straight-line basis. For intangible assets, the write-off is over the useful life of the asset.

Apart from the immediate write-off of plant and machinery, agricultural businesses also benefit from the immediate write-off of agricultural improvement expenditures (including the costs of clearing land and excavating irrigation channels, and planting perennial crops or tree bearing crops). Buildings, structures, dams, water reservoirs, fences and similar works of a permanent nature used in agriculture, livestock or fish farming are written off on a straight-line basis over five years.

Mining companies are entitled to a 100% capital deduction with respect to capital expenditure on exploration and development.

### Tax losses

There is no limit on the carryforward period for tax losses. However, there is ring-fencing of tax losses as follows:

- Losses from agricultural business can only be offset against profits derived from agricultural business.
- Foreign source losses can only be offset against foreign source profits.
- Losses on investments can only be offset against investment income.
- Foreign source losses on investments can only be offset against foreign source investment income.

In certain circumstances, tax losses may be forfeited on a change in the underlying control of an entity.
**Foreign tax credits**
A credit is automatically given for foreign tax paid by a resident on foreign income, but such credit may not exceed the Tanzanian tax rate applicable to that income. Any unrelieved amount of foreign tax credit may be carried forward (subject to the “change of control” provisions). An election also may be made to claim relief as an expense instead of as a credit.

**Group taxation**
There are no provisions for tax consolidation or group relief.

**Tax incentives**

**Agriculture, manufacturing, mining and tourism**
Tax incentives by way of generous capital deduction provisions are given for specific sectors, namely agriculture, manufacturing, mining and tourism. See the section on Deductions for further details.

**Export processing zones, special economic zones**
There are special benefits for export processing zones (EPZ) and special economic zones (SEZ). Included in the benefits availed to a person licensed to carry on business in an EPZ, as well as to SEZ investors selling in export markets, are a 10-year income tax holiday and WHT holiday, subject to a requirement to export at least 80% of production.

Tanzania

**Double tax treaties (DTTs)**
DTTs are in force with Canada, Denmark, Finland, India, Italy, Norway, South Africa, Sweden, and Zambia. In certain circumstances, these may reduce the WHT rates.

**Tax administration**

While the year of income for tax purposes is the calendar year, an entity may apply to use its own accounting period rather than the calendar year.

Taxable income and deductible expenditure is quantified in Tanzanian shillings. The Commissioner does have the power by notice in writing to permit quantification in a foreign currency convertible to Tanzanian shillings.

**Returns**

A statement of estimated tax payable containing an estimate of the chargeable income and the tax payable thereon is due for submission within three months from the beginning of the accounting period. A final tax return must be furnished within six months from the end of the accounting period. WHT returns must be submitted every half year. A late filing penalty applies monthly at an amount equal to the higher of (a) TZS 100,000 and (b) 2.5% applied to unpaid tax. If estimated tax is significantly underestimated, a penalty may also apply.

**Payment of tax**

Instalment tax is payable in four equal instalments not later than three months, six months, nine months, and twelve months from the beginning of the accounting period. Final tax is payable on the date on which the final return is due for submission, namely six months after the end of the accounting period. WHT is due seven days after the month of deduction. Interest on late payment is charged at the Bank of Tanzania discount rate.

Significant developments

There have been no significant developments regarding tax on corporate income during the past year.

Taxes on corporate income

Corporate income tax (CIT) is generally paid at a flat rate of 30% on net taxable profits.

A reduction is given to companies listed on the Stock Exchange of Thailand (SET) and the Market for Alternative Investment (MAI), the trading board established by the SET. The rates are shown below.

i. Companies listed between 6 September 2001, and 31 December 2005:

<table>
<thead>
<tr>
<th>Type of Company</th>
<th>CIT Rate</th>
</tr>
</thead>
<tbody>
<tr>
<td>Companies listed on the SET</td>
<td>25%</td>
</tr>
<tr>
<td>Companies listed on the MAI</td>
<td>20%</td>
</tr>
</tbody>
</table>

The reduced rate applies for five accounting periods commencing from the first accounting period that begins on or after the day the company has listed its securities on the SET or the MAI.

ii. Companies applying for listing between 1 January 2007, and 31 December 2008, and duly listed by 31 December 2009:

<table>
<thead>
<tr>
<th>Type of Company</th>
<th>CIT Rate</th>
</tr>
</thead>
<tbody>
<tr>
<td>Companies listed on the SET</td>
<td>25%</td>
</tr>
<tr>
<td>Companies listed on the MAI</td>
<td>20%</td>
</tr>
</tbody>
</table>

These rates will apply for three accounting periods starting from the first accounting period beginning on or after the day the company listed its securities on the SET or MAI.

iii. Listed companies other than those described previously:
Thailand

<table>
<thead>
<tr>
<th>Companies listed on the SET</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Net profit</strong></td>
</tr>
<tr>
<td>(a) THB 0 – 300,000,000</td>
</tr>
<tr>
<td>(b) Over THB 300,000,000</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Companies listed on the MAI</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Net profit</strong></td>
</tr>
<tr>
<td>(a) THB 0 – 20,000,000</td>
</tr>
<tr>
<td>(b) Over THB 20,000,000</td>
</tr>
</tbody>
</table>

These rates apply for three accounting periods commencing from the accounting period beginning on or after 1 January 2008.

Companies listed on the SET or MAI between 6 September 2001, and 31 December 2005, and whose concession rate as noted under item (i) above has expired, will be able to enjoy the concession rate under item (iii) but not beyond the accounting period ending on or after 31 December 2010.

Small and medium enterprises (i.e., companies and partnerships with paid-in capital not exceeding THB 5 million at the end of any accounting period) are subject to CIT at these reduced rates:

<table>
<thead>
<tr>
<th>Net profit</th>
<th>Rate</th>
</tr>
</thead>
<tbody>
<tr>
<td>(a) THB 0 – 150,000</td>
<td>Nil</td>
</tr>
<tr>
<td>(b) THB 150,001 – 1,000,000</td>
<td>15%</td>
</tr>
<tr>
<td>(c) THB 1,000,001 – 3,000,000</td>
<td>25%</td>
</tr>
<tr>
<td>(d) Over THB 3,000,000</td>
<td>30%</td>
</tr>
</tbody>
</table>

Banks are subject to CIT at the rate of 10% with respect to profits derived from lending to non-Thai residents from foreign currency funds obtained from non-Thai sources (so-called “out-out business”).

A special development zone has been established in five provinces in the far south of Thailand in which a company or juristic partnership located therein will be subject to CIT at the rate of 3% for the revenue earned from the manufacture or sale of goods or provision of services from the accounting period that begins on or after 1 January 2010, until the accounting period that ends on or after 31 December 2012.

**Corporate residence**

Corporate residence is determined by the place of incorporation. A company incorporated under the laws of Thailand is a resident company. A company incorporated abroad is subject to corporate income tax in Thailand if it is considered to be carrying on business in Thailand. The term “carrying on business in Thailand” is broad and, subject to the provisions of double taxation treaties, includes the presence of an employee, representative or go-between that results in a foreign corporation deriving income or gains in Thailand.
Other taxes

Value-added tax (VAT)
VAT is levied at the rate of 10% (reduced to 7% until 30 September 2010, unless extended further), except on exports, which are zero-rated, and a number of exempt goods and services (e.g., basic groceries, education, health care, interest, leasing of immovable property and sale of real estate).

Specific business tax
Specific business tax is levied on the gross receipts of certain businesses. Among the more significant items are interest and foreign exchange gains of banks and other financial institutions, and dealings in real estate, where the rate of tax is 3%.

The rate of specific business tax has been reduced to 0.01% for certain revenue derived by commercial banks and finance, securities and credit foncier businesses as well as businesses with regular transactions similar to commercial banking.

Municipality tax
An additional 10% of the specific business tax is levied as municipality tax.

Local taxes
There are three major local taxes:

1. Household and land tax – 12.5% of assessable economic rental income;
2. Signboard tax – Rates vary according to size; minimum of THB 200 per annum; and
3. Local development tax – Rates range between 0.25% and 0.95% of the value of land assessed by local authorities. This tax does not apply if the property is subject to household and land tax.

Capital taxes
There are no capital taxes in Thailand.

Branch income
Branches of foreign corporations pay income tax at the corporate tax rate on locally earned profits only. Branch profits remitted to the foreign head office are subject to additional tax at the rate of 10%. However, this is a tax on disposition of profits abroad and is not limited to remittances. For example, a credit of profits to the head office account in the books is held to be a disposition of profits abroad even though no remittance of funds takes place.

Income determination

Inventory valuation
Inventory is valued at the lower of cost or market price. Any recognised method of ascertaining the cost price may be used, but a change in the method may be made only with the prior approval of the director-general of the Revenue Department. Conformity between book and tax reporting is required.

Capital gains
There is no specific legislation governing capital gains. All capital gains earned by a company are treated as ordinary revenue for tax purposes. Capital gains on the sale of
investments derived from or in Thailand by a foreign company not carrying on business in Thailand are subject to a tax of 15%, withheld at source by the purchaser, unless otherwise exempt under a double tax treaty.

Gains from the sale of government bonds earned by a non-resident are exempt from income tax.

Exemptions
Certain types of income are exempt from corporate income tax. The exemptions cover interest on government bonds paid to a foreign company not carrying on business in Thailand, interest on foreign loans paid to financial institutions organised under specific law and wholly owned by a foreign government, dividends or share of profits paid by a joint venture to a Thai company or foreign company carrying on business in Thailand, etc.

Inter-company dividends
Dividends received from a Thai company by a company listed on the SET are exempt from tax. Dividends received by a non-listed company from other Thai companies are also exempt from tax, provided that the company receiving the dividends holds at least 25% of the total voting shares without any cross-shareholding. The tax exemption applies on the condition that the shares must be held for at least three months before and three months after the dividends are received.

In other cases, where one Thai company receives dividends from another Thai company, one half thereof is exempt from tax.

Dividends received from outbound investment are exempt from tax provided that the Thai company receiving the dividends holds at least 25% of the shares with voting rights of the company paying the dividends for a period of not less than six months before the date on which the dividends are received and the dividends must be derived from net profit in the foreign country taxed at a rate of not less than 15%. In the event that a “special law” in a particular foreign country provides a reduced tax rate or exemption for the net profit, the limited company which receives the dividends is still eligible for tax exemption.

Foreign income
Only Thailand incorporated companies are taxed on worldwide income. A foreign incorporated company is taxed on profits arising from or in consequence of business carried on in Thailand. A foreign company not carrying on business in Thailand is subject to a withholding tax on certain types of assessable income (e.g., interest, dividends, royalties, rentals and service fees) paid from or in Thailand.

The Revenue Code does not describe how foreign income received by a Thailand-incorporated company is taxed, but the Revenue Department regards foreign branch income as taxable when earned and foreign dividend income as taxable when received. Double taxation is relieved by way of a credit against the tax chargeable in Thailand.

Stock dividends
Stock dividends are taxable to the recipient as ordinary income.
**Deductions**

**Depreciation and depletion**

Deduction for wear and tear and depreciation is allowed as a percentage of cost. If the rate of deduction adopted by a company under its own accounting method is lower than the percentage of cost, deduction will be allowed only at the rate adopted by the company. The straight-line basis is the method most commonly used by companies, but any generally accepted basis, such as sum-of-the-years-digits method or double declining method, is permitted. Statutory rates are as shown:

<table>
<thead>
<tr>
<th>Type of Asset</th>

</tr>
<tr>
<td>If the period of use is limited</td>
<td>Percentage rate equals 100 divided by the number of years of use</td>
</tr>
<tr>
<td>Other assets not mentioned above, excluding land and inventory</td>
<td>20</td>
</tr>
</tbody>
</table>

Special depreciation methods for certain assets may be applied as follows:

- Machinery for research and development (R&D) may initially be depreciated at a higher rate (e.g., 40%) of cost, and the remaining balance is then depreciated at the prescribed rate;
- Machinery and equipment may initially be depreciated at a higher rate (e.g., 40%) of cost, and the remaining balance is then depreciated at a maximum of 20% per annum. This method is valid for machinery and equipment acquired until 31 December 2010; and
- Computer hardware and software may be depreciated within three accounting periods.
**Special depreciation method for small and medium enterprises (SME)**

SME are companies and juristic partnerships with fixed assets, excluding land, at a value of no more than THB 200 million and with no more than 200 employees. In addition to the special depreciation methods noted previously, SME are entitled to the following special depreciation methods:

- Machinery and equipment may initially be depreciated at a higher rate (e.g., 40%) of cost, and the remaining balance is then depreciated at the prescribed rate;
- Computer hardware and software may initially be depreciated at a higher rate (e.g., 40%) of cost, and the remaining balance is then depreciated within three accounting periods;
- Factory buildings may initially be depreciated at a higher rate (e.g., 25%) of cost, and the remaining balance is then depreciated at the prescribed rate; and
- Any assets not mentioned above acquired during an accounting period, excluding land and inventory, may be depreciated at 100% of cost but not exceeding THB 500,000. This special treatment will be available only until 31 December 2010.

**Net operating losses**

Losses may be carried forward for the following five accounting periods. Carryback of losses is not permitted.

**Payments to foreign affiliates**

A Thailand incorporated company may claim a deduction for royalties, management service fees and interest charges, provided they are expended exclusively for the purpose of generating profits or for the purposes of business in Thailand and do not exceed a reasonable amount.

**Taxes**

In general, all taxes are deductible except CIT and VAT together with fines, penalties and surcharges charged under the Revenue Code.

**Other significant items**

Deductions for allowable charitable contributions and certain other donations may not exceed 2% of net taxable profits. Deductions for educational support as approved by the Ministry of Education may be allowed at the rate of 200% of the actual expense, but not exceeding 10% of net profit before deductions of the allowable charitable contributions and certain other donations. Furthermore, deductions for the support of public recreational facilities may also be allowed at the rate 200% of the actual expense, but not exceeding 10% of net profit before deductions of the allowable charitable contributions and certain other donations after including the educational support expense.

**Group taxation**

Group taxation is not permitted.

**Tax incentives**

Tax incentives in certain industries eligible for promotion under the Investment Promotion Act and Board of Investment (BOI) announcements include the following:

- Exemption from or reductions of import duties on imported machinery;
Thailand

- A reduction of up to 90% of import duties on raw or essential materials imported for manufacturing for domestic sale;
- Exemption from CIT equal to the amount of the investment, excluding the cost of land and working capital, for three to eight years;
- Exclusion from taxable income of dividends derived from promoted enterprises during the period of exemption from CIT; and
- Exemption of up to five years from withholding tax on goodwill, copyright or other rights according to the contract approved by the BOI. (In practice, this incentive will be granted at the BOI’s discretion).

Additional incentives to encourage exports include the following:

- Exemption from import duties on raw materials and components imported for manufacturing for export;
- Exemption from import duties on the items imported for re-export; and
- The ability to deduct from corporate taxable income the amount equivalent to 5% of the increase in income derived from export over the previous year, excluding costs of insurance and transportation. (In practice, the BOI will not grant this incentive because of World Trade Organization regulations).

Additional incentives for enterprises located in an industrial estate or promotion zone include the following:

- Reduction of 50% of CIT for five years after the termination of a normal income tax holiday or from the date of earning income if no tax holiday is granted; and
- Double deduction from taxable income for the cost of transportation, electricity and water supply.

In 2009, the BOI granted exemption from CIT for eight years to a promoted company that has been granted approval for listing on the SET or MAI during the period in which the project still enjoys the incentive of CIT exemption. Applications for this privilege must be submitted by 31 December 2012 and the approval of the SET or MAI must be granted within the period of CIT exemption.

In January 2010, the BOI amended the incentives for SMEs in certain industries, retroactive to 16 November 2009, which include the following:

- Exemption from import duty on imported machinery regardless of location;
- Exemption from CIT for eight years, with no maximum amount, regardless of location;
- Permission to use used machinery in Thailand with a value not exceeding THB 10 million provided that the value of the investment in new machinery is not less than 25% of the total value of the used machinery; and
- Other rights and incentives will be granted according to the BOI announcement No. 1/2000.

Applications for this privilege must be submitted by 31 December 2011.

**Capital investment**
A Special Purposes Vehicle (SPV) for securitisation is granted tax exemption on income derived from a securitisation project approved by the Office of the Securities and Exchange Commission (SEC). Nevertheless, the operation and allocation of cash inflow
for debt and expenses settlement must follow the plan approved by the SEC. Moreover, no dividends will be paid to shareholders of an SPV until all remaining assets and benefits have been transferred back by the SPV to the originator of the securitisation project and the SPV ceases to exist.

**Regional operating headquarters (ROH)**
Regional operating headquarters (ROH) means a company organised under the Thai law providing administrative, technical assistance or supporting services to its domestic or overseas affiliated enterprises or branches in at least three countries other than Thailand with a paid-in capital of at least THB 10 million on the last day of any accounting period. Income from the provision of services must comprise at least 50% of the ROH income (reduced to one-third for the first three years).

The following tax incentives are available:

- 10% CIT on income from affiliated enterprises and branches for services rendered, including administrative services, technical assistance, management, R&D or training;
- 10% CIT on interest income received as a result of re-lending to affiliated enterprises or branches funds borrowed by the ROH;
- 10% CIT on royalty income derived from affiliated enterprises and branches and which is generated from R&D work performed in Thailand;
- CIT exemption on dividends received from domestic and overseas affiliated enterprises and branches;
- Personal income tax exemption for expatriate employees for services undertaken outside Thailand, provided that the relevant employment costs are not deducted by the ROH or an affiliated enterprise in Thailand; and
- Expatriate employees may elect to pay personal income tax at a rate of 15% for consecutive periods not exceeding four years provided they forego entitlement to withholding tax credits on their interest and dividend income.

**Notes**

The numbers in parentheses refer to the following notes:

1. The zero rate applies to a recipient company listed on the SET.
2. The 1% rate applies to interest paid to all resident corporations other than banks or finance companies, except where interest arises from bonds or debentures.
3. The progressive rate is in accordance with the personal income tax schedule.
4. The 10% rate applies to interest paid to a recipient that is a bank or financial institution (including an insurance company).
5. The 5% rate applies to royalties paid for the use of any copyright of literary, artistic or scientific work excluding cinematograph films and films, tapes or discs for radio or television broadcasting.
6. The 5% rate applies to royalties paid for the production or reproduction of any literary, dramatic, musical or artistic work excluding royalties with respect to motion picture films and works on film or videotape for use in connection with television.
7. The 5% rate applies to royalties paid for the use of any copyright of literary, dramatic, musical, artistic or scientific work including software, cinematograph films or films or tapes used for radio or television broadcasting; and the 10% rate applies to royalties paid for the use of industrial, commercial or scientific equipment or for information concerning industrial, commercial or scientific experience.
8. The 5% rate applies to royalties paid for the alienation or the use of any copyright of literary, artistic or scientific work excluding cinematograph films or films or tapes used for radio or television broadcasting, and the 10% rate for the alienation of any patent, trademark, design, or model, plan, secret formula, or process.
9. The 5% rate applies to royalties paid for the use of any copyright of literary, artistic or scientific work.
10. The 3% rate applies to interest paid on loans or credits granted for a period of four years or more with the participation of a public finance organisation to a public authority or to an enterprise in France that are tied to the sale of plant and machinery or studies relating to the equipping or supply of industrial, commercial or scientific installations, as well as public works. The 10% rate applies to interest paid to any financial establishment in France.
11. The zero rate applies to royalties paid to a contracting state or state-owned company with respect to films or tapes, and the 5% rate to royalties for the alienation or the use of any copyright of literary, artistic or scientific work.
12. The 10% rate applies to (a) interest paid to a bank or financial institution (including an insurance company) and (b) interest paid under a sale on credit of any equipment, merchandise or services.
13. The 5% rate applies to royalties paid for the use or the right to use any copyright of literary, artistic or scientific work and the 10% rate for the use or the right to use any patent, trademark, design, or model, plan, secret formula, or process.
14. The 5% rate applies to royalties paid for the use of any copyright of literary, artistic or scientific work excluding cinematograph films or films, tapes used for radio or television broadcasting.
15. The 10% rate applies to royalties paid for the use of any copyright; or the use of, or the right to use, any industrial, scientific or commercial equipment; or the use of, or the right to use, any motion picture film, or film or videotape or any other recording for use in connection with television, or tape or any other recording for use in connection with radio broadcasting; or the reception of, or the right to receive, visual images or sounds, or both, transmitted to the public by satellite or, cable, optic fibre or similar technology; or the use in connection with television or radio broadcasting, or the right to use in connection with...
television or radio broadcasting, visual images or sounds, or both, transmitted by satellite or cable, optic fibre or similar technology.

16. The 5% rate applies to royalties paid for the use of any copyright of literary, artistic or scientific work and the 10% rate applies to royalties paid for the use or the right to use industrial, commercial or scientific equipment.

17. The 10% rate applies to (a) interest paid to a bank or financial institution (including an insurance company) and (b) interest from a loan or debt claim that is guaranteed by the government.

18. The zero rate applies to royalties paid to a contracting state or a state-owned company with respect to films or tapes, and the 10% rate applies to royalties paid for the alienation or the use of any copyright of literary, artistic or scientific work.

19. The 5% rate applies to royalties paid for the alienation or the use or the right to use any copyright of literary, artistic or scientific work excluding cinematograph films or tapes used for television or broadcasting.

20. The 10% rate applies to royalties paid for the use of, or the right to use, any copyright of literary or artistic or scientific work including motion pictures, live broadcasting, film, tape or other means of the use or reproduction in connection with radio and television broadcasting, and for the use of, or the right to use industrial, commercial, or scientific equipment.

21. The 5% rate applies to royalties paid for the use of any copyright of literary, dramatic, musical, artistic or scientific work excluding cinematograph films or films or tapes used for radio or television broadcasting. The 8% rate applies to royalties in consideration of financial leasing for the use of, or the right to use, industrial, commercial, or scientific equipment.

22. The 5% rate applies to royalties paid for the use of any copyright of literary, artistic or scientific work including software, motion pictures and works on film, tape or other means of reproduction for use in connection with radio or television broadcasting. The 8% rate applies to royalties paid for the use of industrial, commercial or scientific equipment.

23. The 10% rate applies to interest paid (a) to a recipient that is a bank or financial institution (including an insurance company); (b) in connection with the sale on credit of any industrial, commercial or scientific equipment; or (c) in connection with the sale on credit of any merchandise by one enterprise to another enterprise.

24. The 10% rate applies to interest paid (a) to a recipient that is a bank or financial institution (including an insurance company); or (b) with respect to indebtedness arising as a consequence of a sale on credit of any equipment, merchandise or services, except where the sale was between persons not dealing with each other at arm's length.

25. The 5% rate applies to royalties paid for the use of or the right to use any copyright of literary, artistic or scientific work including software, and motion pictures and works on film, tape or other means of reproduction for use in connection with radio or television broadcasting and the 10% rate for the use of or the right to use any patent, trademark, design, or model, plan, secret formula or process.

26. The 10% rate applies to interest paid to the following recipients (a) in the case of a resident of Russia, any institution having a license to carry on banking operations; and (b) in the case of a resident of Thailand, any financial institution (including an insurance company).

**Tax administration**

**Returns**

The tax year for a company is its accounting period, which generally must have a duration of 12 months. However, the tax year may be less than 12 months in the case of the first accounting period after incorporation or after prior approval from both the revenue department and the business development department has been received for a change in the closing date.

The system is one of self-assessment. A company prepares and files its tax returns by the due dates and at the same time pays the taxes calculated to be due.
Thailand

**Withholding tax returns**
Withholding tax returns (except for the sale of immovable property) must be filed within seven days from the last day of the month in which income has been paid. The tax withheld can then be used as a credit against the corporate income tax payable of the payee.

**Payment of tax**
CIT is paid twice each year. A half-year return must be filed within two months after the end of the first six months of an accounting period. The tax to be paid is computed on one-half of the estimated profit for the full accounting period, except for listed companies, banks, certain other financial institutions and other companies under prescribed conditions where the tax is based on the actual net profit for the first six months. The annual tax return is filed within 150 days from the closing date of an accounting period, at which time the balance of the tax due is payable. Credit is given for the amount of tax paid at the half-year.

**Sample corporate tax calculation**

<table>
<thead>
<tr>
<th>Year ended 31 December 2010</th>

Significant developments

There have been no significant developments in the last year.

Taxes on corporate income

With effect from 1 January 2006 the standard rate of tax was reduced to 25%, but this varies in the case of certain classes of companies (e.g., life insurance companies). The current tax rates are as follows:

<table>
<thead>
<tr>
<th>Category</th>
<th>Rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Ordinary companies</td>
<td>25</td>
</tr>
<tr>
<td>Petroleum related companies</td>
<td>35</td>
</tr>
<tr>
<td>Life insurance companies</td>
<td>15</td>
</tr>
<tr>
<td>Petroleum production companies (petroleum profits tax)</td>
<td>50</td>
</tr>
</tbody>
</table>

These taxes are payable by way of quarterly instalments on 31 March, 30 June, 30 September and 31 December in the year of income based on the tax liability of the immediately preceding year with any balance of tax being paid on/before 30 April. Where the estimate for the current year is higher than the preceding year, the instalments must be based on the prior year plus 80% of the estimated increase over the prior year.

Corporate residence

Corporate residence is determined by reference to the location of the central management and control of the business of a company. The place of incorporation is regarded as merely one of the factors to be taken into account in determining where central management and control are located.

Other taxes

Business levy

With effect from 1 January 2001, corporations are subject to a business levy at the rate of 0.2% of gross revenue or receipts where the levy exceeds the corporation tax liability. Exemption is available for certain companies, including petroleum companies and companies whose annual turnover is less than TTD 200,000. This levy is payable
Trinidad and Tobago

quarterly, and the taxpayer is entitled to a tax credit of corporate tax up to a maximum of the business levy liability. The levy is a non-deductible expense for tax purposes.

**Green fund levy**
Effective 1 January 2001, a green fund levy of 0.1% is applicable to companies and partnerships doing business in Trinidad and Tobago and having gross income or receipts in excess of TTD 200,000 per annum. This levy is payable quarterly and is neither a deduction in computing chargeable income nor a credit against corporation tax due.

**Unemployment levy**
Only petroleum companies remain liable to the unemployment levy, at the rate of 5% of taxable profits. No set-off of prior year losses is permitted in computing the liability.

**Supplementary petroleum tax**
The supplementary petroleum tax (SPT) is chargeable on the gross income (derived from the sale of crude oil) less royalties and over riding royalties paid on the crude oil sold. The tax is computed separately in respect of land and marine operations and with effect from 2005 is a quarterly tax based on the actual gross income for each quarter.

The SPT is deductible in arriving at profits subject to petroleum profits tax.

**Value-added tax (VAT)**
VAT is applicable to a wide range of goods and services. The standard rate applicable to commercial supplies is 15%.

Certain basic unprocessed foods and agricultural supplies are zero-rated, as are crude oil, natural gas and all exported goods and services. Effective 1 January 1995, hotel accommodations and yachting services to non-residents are zero-rated.

A number of services, including financial services, real estate brokerage, residential rentals, and educational services, are exempt. However, with effect from 1 January 1994, financial services (as specified) are subject to a transaction tax at a rate of 15%. From 1 January 1993, imported inputs of highly capital-intensive manufacturers are exempt from VAT.

**Hotel accommodation tax**
With effect from 1 January 1995, hotels are subject to a hotel accommodation tax at a rate of 10% of the value of the accommodation.

**Insurance premium tax**
Also effective 1 January 1995, a tax at the rate of 6% has been imposed on insurance premiums in respect of general insurance contracts. Life insurance and reinsurance premiums are exempt.

**Branch income**
A branch is subject to Trinidad and Tobago taxation on all income directly or indirectly accruing in or derived from Trinidad and Tobago. The tax rates applicable on branch profits are the same as on corporate profits. In addition, branch profits, after deduction of corporation tax and reinvestments, are subject to withholding tax annually at varying rates on after tax profits which are remitted/deemed remitted to the head
Income determination

Income
A Trinidad and Tobago resident corporation is taxed on worldwide income. A non-resident company engaged in business in Trinidad and Tobago is taxed only on income directly or indirectly accruing in or derived from Trinidad and Tobago. Double taxation is avoided by means of foreign tax credits.

Inventory valuation
Inventories are generally stated at the lower of cost or market value. Cost may be determined by the first-in, first-out (FIFO) or the average-cost method. The last-in, first-out (LIFO) and base-stock methods are not generally accepted for tax purposes.

Capital gains
Gains on the disposal of chargeable assets within 12 months of acquisition are subject to tax at standard corporate rates. (see Depreciation and depletion under Deductions).

Inter-company dividends
Dividends received from both domestic subsidiaries and other domestic corporations are fully exempt from tax.

Stock dividends
A Trinidad and Tobago corporation can distribute tax-free a dividend of common stock (bonus issue) proportionately to all common stockholders.

Deductions

Depreciation and depletion
With effect from 1 January 1995, tax depreciation rates (wear-and-tear allowances) have been standardised by statute. Fixed assets are to be classified into one of four classes:

<table>
<thead>
<tr>
<th>Class</th>
<th>Description</th>
<th>Rate</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>Furniture and fittings, buildings and improvements</td>
<td>10%</td>
</tr>
<tr>
<td>B</td>
<td>Motor vehicles</td>
<td>25%</td>
</tr>
<tr>
<td>C</td>
<td>Heavy equipment, motor lorries, trucks, computer equipment</td>
<td>33.3%</td>
</tr>
<tr>
<td>D</td>
<td>Extra heavy equipment</td>
<td>40%</td>
</tr>
</tbody>
</table>

The allowance will be calculated at the rate applying to aggregate expenditure incurred on assets within the class acquired after 1 January 1995 on a declining-balance basis.

Companies currently enjoying benefits under the Fiscal Incentives Act and the Free Zones Act will be unable to claim the 10% wear and tear on buildings under this provision while petroleum companies are entitled to an initial allowance of 10% and annual allowance of 5% on a straight-line basis.

Accelerated tax depreciation is allowed to manufacturers in the form of an initial allowance at the rate of 75% on capital expenditure on plant and machinery. The
allowance is to be claimed in the year that the asset is first brought into use. For those companies engaged in the production of sugar, petroleum, or petrochemicals or enjoying concessions under the Fiscal Incentives Act, the rate is 20%.

Gains on sale of tax-depreciable assets are taxable as ordinary income (i.e., a balancing charge) but only when the written down value of the assets of a Class goes into credit. Prior to this the proceeds of sale are credited to the particular Class thereby reducing the written down value of the Class. Tax depreciation is not required to conform to book depreciation.

A company engaged in petroleum production business is entitled to capital allowances on tangible costs and intangible drilling and development costs as follows:

- **Tangible costs** – Initial allowance (20%) and annual allowance (20% SL); and
- **Intangible costs** – Initial allowance (10%) and annual allowance (20% reducing balance basis).

Allowances in respect of petroleum operations are granted from the earlier of (a) the year following the year in which the expenditure was incurred or (b) the year in which commercial production commences save that in the case of exploration activity the allowances are to commence from the year incurred.

**Net operating losses**
A trading loss may be carried forward indefinitely to be set-off against future profits.

Loss carrybacks are not permitted.

Effective 1 January 1997, a limited form of group loss relief has been introduced, whereby current year losses may be surrendered to a claimant company within a Group, except that the claimant’s tax liability cannot be reduced by more than 25%. Companies must be resident in Trinidad and Tobago. Only losses incurred after 1 January 1997 qualify for this relief.

**Payments to foreign affiliates**
A corporation engaged in business in Trinidad and Tobago may claim a deduction for royalties and interest charges paid to foreign affiliates, provided the amounts paid are at arm’s length and the appropriate withholding tax is deducted and properly accounted. For interest to be deductible for tax purposes the funds borrowed must have been utilised in the production of income and the recipient must be subject to tax in Trinidad and Tobago or otherwise specifically exempt therefrom.

Deduction for management charges (as this term is defined) paid to a non-resident is restricted to the amount of the management charges or 2% (2005 – 1%) of outgoings and expenses exclusive of the charges, whichever is the lower. Tax depreciation allowances may not be treated as an expense for this purpose. Withholding tax may also be applicable to management charges.

**Taxes**
Other than the supplementary petroleum tax, taxes or levies are not generally deductible in arriving at taxable profit (see Other taxes above).
Other significant items
Charitable contributions under a deed(s) of covenant to approved charity/charities are deductible up to a maximum of 15% of total income.

From 1994, contributions by local insurance companies to Catastrophe Reserve Funds are deductible for tax purposes up to the value of 20% of net premium income from property insurance business.

Group taxation
There is no provision for group taxation in Trinidad and Tobago, but with effect from 1 January 1997 a limited form of group loss relief has been introduced (see Net operating losses under Deductions).

Tax incentives
Tax holidays
Incentives include:

- Fiscal Incentives Act, 1979: An approved enterprise, which must be a locally incorporated resident corporation, may be granted an exemption from corporation tax for a period of up to 10 years, depending on the category under which it is approved. Exemption may be total or partial. Subject to approval, profits may be distributed tax-free to shareholders except in the case of certain non-resident shareholders, where the relief is restricted to so much of the tax as exceeds their liability in their country of residence. Net losses during the tax holiday period (i.e., the excess of total losses over total profits) may be carried forward for set-off without limitation for five years from the end of the tax holiday period, after which the normal set-off provisions for losses apply. Effective 1 January 2007, the tax holiday in respect of corporate tax is no longer granted.
- Approved tourism projects: Under the Tourism Development Act 2000, approved tourism development projects including hotels are granted a tax holiday for periods of up to seven years. In addition, a carryover from a tax exemption period is permitted of any loss arising out of the operation or renting of an approved tourism project to be written off against profits in accordance with normal Income Tax loss provisions, subsequent to the tax holiday period. An approved tourism project means a project declared to be so by the government.
- Approved mortgage and other companies: The profits of an approved company are exempt from corporation tax. The exempt profits when distributed to shareholders are exempt from corporation tax and income tax. Expenses incurred in the course of the approved mortgage business remain fully deductible.
- Business expansion scheme: The business expansion scheme was introduced in 1988 to allow approved small companies carrying on business in a regional development area and companies carrying out certain approved activities a tax credit of 15% of their chargeable profit. This scheme is to be restructured to encourage both individual and corporate investors to invest in venture capital companies by allowing a “tax rebate” on their investment. Effective 2006, the tax credit has been removed and replaced by a five year tax holiday.
- Free Zone: The profits of an approved company operating in a designated Free Zone are free from corporation tax. In addition, payments to non-residents are free of withholding tax. Approved activities include manufacturing.
Other allowances/incentives include:

- **Promotional expenses** – Promotional expenses incurred by local firms to promote the expansion of existing markets and/or the creation of new ones for the export of specified services or locally produced goods will be tax-deductible as an expense at 150% of the actual outlay. Tax-deductible promotional expenses are defined as those expenses incurred in respect of specified services or goods produced in Trinidad and Tobago. This includes such items as advertising in foreign markets and participation in trade fairs and missions.

- **Scholarship allowance** – From the year 2001 companies can deduct the actual expenses incurred in granting scholarships to nationals who are not employees, directors or associates of directors of the company for tertiary education.

- **Market development grants** – An Export Development Corporation was established to manage government export-development programme and also to do all things necessary and appropriate for the encouragement, promotion and expansion of export-oriented business. The Corporation was empowered to give financial assistance to exporters by way of market development grants. In 1994, the Tourism and Industrial Development Corporation was formed to incorporate in a single entity the functions of the Export Development Corporation, the Tourism Development Authority and the Industrial Development Corporation. This is now the authority responsible for administering the grants. These grants are not exempt from taxation unless (1) they have been made in respect of expenses incurred by an exporter prior to the export of the first commercial shipment of goods produced in Trinidad and Tobago and (2) the foreign market is not in a country specified as an “excluded country.” Market development grants will be awarded to exporters that meet the criteria set out by the Corporation. Qualifying expenses include costs incurred in research in foreign markets, product design and testing abroad.

- **Training** – An allowance of up to 100% of expenses may be claimed in respect of expenses incurred in the training or retraining of staff.

- **Production company allowance** equal to 150% of actual expenses incurred in respect of the company’s own audio, visual or video productions for educational or local entertainments or local culture up to a maximum of TTD 1.0 million:
  - Art and culture allowance;
  - Sportsman/sporting activity allowance; and
  - Audio, visual or video production allowance. Allowances are granted in respect of this activity (and the two aforementioned activities) based on the actual expenditure incurred but not exceeding TTD 1.0 million.

- **Child care/home work facility** – a deduction is allowed for the actual cost incurred in setting up a facility for dependents of employees who are minors up to a maximum of TTD 500,000 for each facility subject to an aggregate sum of TTD 3.0 million in any year.

**Withholding taxes (WHT)**

Withholding tax is imposed at varying rates up to 15%, depending on the nature of the payment, the status of the payee and the applicability of double taxation treaties. From January 1995, as a result of a reduction in the standard withholding tax rate, the tax treaty rate in some instances is now higher than the statutory rate. In such cases the lower statutory rate applies. The rates below have been adjusted to reflect these reductions:

**Notes**

The numbers in parentheses refer to the notes below:

1. Individuals.
2. Corporations. The lesser rate applies to parent companies.
3. The lesser rate applies to companies, other than investment companies, which control at least 10% of the voting power.
4. The rate is 10% of the gross amount if interest is paid to a resident of France; it is nil if the interest is paid to the French government or to any agency or instrumentality of the French government.
5. The rate is 10% of the gross amount if the interest is paid to a bank that is a resident of Germany, nil where interest is paid to certain stated governmental institutions and 15% of the gross amount in all other cases.
6. The rate is 10% of the gross amount if the interest is paid to a bank that is a resident of Sweden, nil where interest is paid to certain specified governmental institutions and 15% of the gross amount in all other cases.
7. The rate is 15% of the gross amount if the interest is paid to a bank or financial institution in the United States that does not have a permanent establishment in Trinidad and Tobago, nil where the interest is paid to the US government or to any agency or instrumentality wholly owned by the US government, and 20% of the gross amount in all other cases.
8. The rate applies to patent royalties.
9. The rate applies to copyright royalties and similar payments.
10. The rate applies to royalties paid in respect of the operations of mines or quarries or of the extraction or removal of natural resources.
**Tax administration**

**Returns**
The taxpayer is required to file a tax return with the Board of Inland Revenue by 30 April following the end of the fiscal period. An automatic six-month grace period is allowed, following which a penalty is imposed (effective October 1995) of TTD 1,000 for every six months or part thereof that the return remains unfiled.

**Payment of taxes**
Corporation tax, business levy and green fund levy are payable quarterly in advance on 31 March, 30 June, 30 September, and 31 December. Instalments of corporation tax are based on an estimate of the current year’s liability or tax based on the actual chargeable profits for the previous year, whichever is greater. The levy liabilities are based on the actual receipts for the quarter.

Significant developments

Corporate Income Tax Law No. 5520 replaced the former corporate income tax law as of 1 January 2006. The new law introduces extensive amendments, including formal clarification of issues such as transfer pricing and thin capitalisation in line with Organisation for Economic Co-operation and Development (OECD) guidelines and worldwide applications. It also includes new provisions such as controlled foreign company applications and anti-tax haven regulations.

Additionally, a new income tax law currently being prepared is expected to bring about significant changes in line with contemporary international tax practices.

Transfer pricing
The new corporate income tax law, includes considerable amendments to transfer pricing regulations, using OECD guidelines as a basis. If a taxpayer enters into transactions regarding the sale or purchase of goods and services with related parties, in which prices are not set in accordance with the arm's-length principle, the related profits are considered to have been distributed in a disguised manner through transfer pricing. Such disguised profit distribution through transfer pricing is not accepted as tax-deductible for corporate income tax (CIT) purposes. The methods prescribed in the law are the traditional transaction methods described in the OECD transfer pricing guidelines.

Controlled foreign corporation (CFC) rules
A CFC is established abroad, and at least 50% of the organisation is controlled directly or indirectly by tax-resident companies and real persons by means of separate or joint participation in the capital or dividends voting rights. A CFC also must meet certain conditions such as 25% or more of its gross revenue must comprise passive income, and it must be subject to an effective income tax rate lower than 10% for its commercial profit in its home country.

The CFC's profit may be included in the corporate income tax base of the controlling resident corporation in the fiscal period covering the month of year-end closing of the according CFC at the rate of the shares controlled, irrespective of whether it is distributed.

Thin capitalisation
According to the thin capitalisation regulation, if the ratio of the borrowings from shareholders or from persons related to the shareholders exceeds triple the shareholders' equity of the borrower company at any time within the relevant year, the
exceeding portion of the borrowing will be considered thin capital. Accordingly, under the new thin capitalisation regulation, the ratio of loans received from related parties to shareholders’ equity must be no more than three to one in order to eliminate Turkish thin capitalisation issues.

**Anti-tax haven provisions**
According to the new law, various payments made to corporations (including branches of resident corporations) that are established or operational in countries that are regarded by the Council of Ministers to undermine fair tax competition (through taxation or other practices) will be subject to taxation in Turkey, irrespective of whether the payments in question are subject to tax, or whether the corporation receiving the payment is a taxpayer.

In this case, withholding tax (WHT) at the rate of 30% is envisaged to be levied over these payments.

The Council of Ministers has not yet determined which countries receiving payments are considered tax havens. It is expected that the council will publish a list in line with recent OECD studies.

**Draft Turkish commercial code**
The draft Turkish Commercial Code is before Parliament for approval and is expected to enter into force as of 2011, although this event is not certain. Among the reforms, it will enable the incorporation of a joint stock company (A.S.) and a limited liability company (Ltd.) with a single shareholder or partner, respectively. It will also, for the first time in Turkey, cover group companies, i.e., the relations between the parent company and subsidiaries subject to the same principles and policies and gathered under the same group management. In order to ensure transparency, each capital company must have an internet site, a certain part of which is specific to information for stakeholders. Joint stock companies will be allowed to hold online general assembly meetings. All administrative transactions of joint stock companies may be conducted online, which will create such options as online attendance for general assembly meetings, online submission of motions, online negotiations and online voting.

**Portfolio investments**
In line with the amendments made in the income tax law effective 1 January 2006, certain investment income (e.g., capital gains on listed equities acquired after 1 January 2006 and interest and capital gains from domestic government bonds or treasury bills issued after 1 January 2006) derived by non-resident corporations without having a permanent establishment (PE) in Turkey and by non-resident individuals (non-residents) is currently subject to 0% WHT at source, subject to certain documentation requirements.

For Turkish individuals and corporations, certain investment income (e.g., capital gains and interest income on treasury bills and domestic government bonds issued after 1 January 2006) is subject to 10% WHT. A 0% WHT is currently applicable to capital gains from listed equities purchased after 1 January 2006 (excluding the listed equities of securities investment trusts acquired after 1 January 2006) derived by Turkish residents. A further 15% WHT is applicable for interest income from reverse-repo transactions and time deposits for both residents and non-residents.
Turkey

The WHT will be applied by local intermediary banks, brokerage houses or local custodian banks, instead of the conventional self-declaration mechanism, and the WHT would be the final taxation in Turkey for non-residents and Turkish individuals.

**Research and development (R&D) activities**
In the local tax regulations, tax incentives are provided via two laws. Under the provisions of Corporate Income Tax (CIT) Law No. 5520, R&D-related expenditures of companies can be wholly regarded as a deduction for CIT purposes.

On the other hand, Law No. 5746 related to the support of the R&D activities became effective in 2008. With this new law, R&D and innovation-related expenses of technology centre enterprises, R&D centres and those incurred in specific R&D and innovation projects (listed in the law), can be continually regarded as a deduction for CIT purposes.

You will find further information about the incentives provided by the new law under Tax incentives.

**E-invoicing**
“E-invoicing” is the general term given to invoices presented as electronic documents, the exchange of which between parties is made in a secure and careful manner. The e-invoice is not a new document with additional legal features, rather it possesses the same legal features of a printed invoice. The general application of e-invoicing among all companies is envisioned. The Revenue Administration registers user accounts for companies with approved e-invoice applications. Users, whose applications are approved, have to meet the obligation to obtain an Electronic Fiscal Stamp. The Electronic Fiscal Stamp refers to the electronic certification infrastructure established by TÜBİTAK-UEKAE on behalf of the Revenue Administration. Following activation of the certificate, e-invoicing can commence without further requirements. Only users with approved registration applications for e-invoicing can use the system to issue and receive e-invoices. It is not possible to issue e-invoices to those lacking a user account on the system.

Issuing, sending and receiving e-invoice can be accomplished by either:

- Integrated IT system; or
- The e-invoice portal (http://www.efatura.gov.tr).

It is only possible to issue e-invoices to registered users willing to receive e-invoices. If they request a printed invoice, a company is required to provide the counterparty with a printed invoice rather than an e-invoice.

**Taxes on corporate income**
Corporations are liable to taxation as described.

Profits generated, as adjusted for exemptions and deductions and including prior-year losses carried forward are liable to CIT at a rate of 20%.

Dividend distributions to individual and non-resident corporate shareholders are subject to WHT at a rate of 15%. This rate might be reduced for foreign shareholders in the presence of a tax treaty. Please note that dividend distributions to resident entities
and branches of non-resident entities are not subject to dividend WHT. Corporations are required to pay advance corporate tax based on their quarterly balance sheets and income statements at the rate of 20%. Advance corporate tax paid during the year is offset against the corporate tax liability calculated over the annual corporate tax return. The balance of advance tax can be refunded or used to offset other tax liabilities.

Turkish CIT legislation allows deduction of “all ordinary and necessary business-related expenses paid or incurred during the taxable year in carrying out any trade or business.” The general principle for tax deductibility is that payment should be a necessary business expense and it should be properly documented in accordance with the relevant provisions of tax procedural law. In cases of charges from related parties, arm’s-length pricing is also sought.

Tax losses may be carried forward for five years, but they may not be carried back.

**Corporate residence**

According to Turkish tax legislation, income taxation differs significantly based on the taxpayer’s place of residence.

If both the legal and the business headquarters of a company are located outside Turkey, the company is regarded as a non-resident entity. If one of these headquarters is located within Turkey, the company is regarded as a resident entity. Resident entities are subject to tax on their worldwide income, whereas non-resident entities are taxed solely on the income derived from activities in Turkey.

**Other taxes**

**Value-added tax (VAT)**

Deliveries of goods and services are subject to VAT at rates varying from 1% to 18%. The general rate applied is 18%. VAT payable on local purchases and on imports is regarded as “input VAT” and VAT calculated and collected on sales is considered “output VAT.” Input VAT is offset against output VAT in the VAT return filed at the related tax office. If output VAT is in excess of input VAT, the excess amount is paid to the related tax office. Conversely, if input VAT exceeds output VAT, the balance is carried forward to the following months to be offset against future output VAT. With the exception of a few situations such as exportation and sales to an investment incentive holder, there is no cash refund to recover excess input VAT.

Turkish VAT principles contain a “reverse-charge VAT mechanism,” which requires the calculation of VAT by resident companies on payments to foreign countries. Under this mechanism, VAT is calculated and paid to the related tax office by the Turkish company. The local company treats this VAT as input VAT and offsets it in the same month. This VAT does not create a tax burden for the Turkish or non-resident company, except for its cash flow effect on the former if there is insufficient output VAT to offset there from.

**Banking and insurance transactions tax (BITT)**

Banks and insurance companies are exempt from VAT but are subject to BITT at a rate of 5%, which is due on the gains of such companies from their transactions. The
Turkey

Purchase of goods and services by banks and insurance companies are subject to VAT, but this is considered as an expense or cost for recovery purposes.

Property taxes
Buildings and land owned in Turkey are subject to real estate tax at different rates.

Stamp tax (stamp duty)
Stamp tax applies to a wide range of documents, including but not limited to agreements, financial statements and payrolls. Stamp tax is levied as a percentage of the value stated on the agreements at rates varying between 0.165% and 0.825%. Salary payments are subject to stamp tax at the rate of 0.6% over the gross amounts paid, whereas an insignificant lump-sum stamp tax is calculated for some types of documents.

Special consumption tax (SCT)
There are four main product groups that are subject to special consumption tax at varying rates:

- Petroleum products, natural gas, lubricating oil, solvents and derivatives of solvents;
- Automobiles and other vehicles, motorcycles, planes, helicopters, yachts;
- Tobacco and tobacco products, alcoholic beverages; and
- Luxury products.

Unlike VAT, which is applied on each delivery, SCT is charged only once (except for some activities such as production).

Branch income

The branches are taxed solely on the income derived from activities in Turkey since they are regarded as non-resident entities for Turkish tax purposes. Branch profits are subject to Turkish corporate tax at the rate of 20%.

The branch profit transferred to headquarters is subject to dividend WHT at the rate of 15%, which might be reduced if a tax treaty applies.

Income determination

Turkish CIT legislation allows as a deduction for “all the ordinary and necessary expenses paid or incurred for the generation and sustenance of income during the taxable year in carrying on any trade or business.” The general principle for tax deductibility is that payment should be a necessary business expense and it should be properly documented in accordance with the relevant provisions of tax procedural law.

The methods used in calculating the value of year-end stock or goods sold are weighted average and first-in, first-out (FIFO). Stock-count deficits are recorded as disallowable expenses, whereas stock-count surpluses are treated as income at year-end for corporate tax purposes. Necessary VAT adjustments should also be made accordingly.
Capital gains
No separate rules exist with respect to capital gains taxation in Turkey. Capital gains and losses are included in the determination of corporate income. For resident companies there is a tax-planning tool to reduce the effective corporate tax rate on capital gains to 5% (75% of income is exempt from corporate tax – 20% * 25% = 5%) arising from the disposal of real estate or participation shares under certain conditions.

Dividends
In dividend distribution’s between Turkish resident companies, the dividend payer is exempt from WHT and the recipient is exempt from CIT.

Foreign-sourced income
In principle, foreign-sourced income is taxable in Turkey. However, foreign-sourced dividend income may also be subject to participation exemption, if certain conditions are fulfilled. A participation exemption for capital gains generated from a foreign subsidiary may also be available in Turkey, subject to certain conditions. Other foreign-source income such as royalties and interest is fully taxable in Turkey. Partial relief from taxation is granted insofar as the tax paid overseas does not exceed the rate of tax payable for the same income in Turkey.

Although undistributed income of foreign subsidiaries is not taxable in Turkey, CFC rules should be taken into consideration.

Income from foreign construction and repair activities
The profit from construction and repair activities carried out by Turkish corporations in foreign countries is exempt from corporate tax in Turkey according to Article 5(1)/h of the corporate tax law. It should be noted that if loss occurs from these activities, it is not possible to deduct this loss amount from income generated through domestic activities since deduction of a loss relating to foreign activities that are exempt from corporate tax in Turkey is unacceptable.

Stock dividends
A Turkish corporation may increase its paid-in capital via retained earnings. The recipient is not taxed for shares issued in this manner. In principle, a Turkish corporation is not allowed to hold its own shares.

Deductions

Depreciation and depletion
The application of depreciation has been amended as of 2004. Under these amendments, fixed assets acquired after 1 January 2004 are subject to depreciation at rates determined by the Ministry of Finance, based on their useful life. Fixed assets acquired before 1 January 2004 will continue to be depreciated using the former application, in which the maximum rate applicable is 20% per year. Depreciation can be calculated by applying either the straight-line or declining-balance method, at the taxpayer's discretion. The taxpayer may also change the option from declining-balance to straight-line (but not vice versa) at any time during the life of the asset. The applicable rate for the declining-balance method is twice the rate of the straight-line method, with 50% being the maximum applicable rate. Furthermore, in special cases the tax authorities may determine higher depreciation rates.
Turkey

Intangible assets are depreciated by the straight-line method over their estimated useful lives if objectively determinable.

Profits or losses on disposal of fixed assets (i.e., the difference between the proceeds and the written-down values) are included in taxable income in the year of disposal. If the renewal of disposed-of assets is considered necessary by the owners of the business concern, the profit accrued may be retained for up to three years without being taxed. After the purchase of new fixed assets, the profits may be offset against the depreciation of the new assets.

**Losses**
Corporate losses may be carried forward for five years. Losses may not be carried back.

**Payments to foreign affiliates**
Charges for royalties and interest by foreign affiliates may be deductible for tax purposes, provided that transfer pricing and thin capitalisation rules are followed. WHT and VAT implications should be considered.

**Taxes**
Essentially, CIT and VAT (with exceptions) are not deductible for CIT purposes. Fees and duties paid in relation to assets of the company are, in principle, deductible in determining taxable income.

**Pensions and employee termination benefits**
These expenses are deductible for CIT purposes only when they are paid, and are not subject to income withholding taxation beyond a certain limit.

**Bad debts**
Bad and doubtful accounts receivable are deductible under certain conditions. Amounts of the receivables collected afterwards are added to the profits of the year in which they are collected.

**Group taxation**
Consolidation of the accounts of group companies for tax purposes is not allowed in Turkey since each company is regarded as a separate taxpayer.

**Tax incentives**
The major income tax and VAT incentives available are as follows:

**Participation exemption for dividends**
There is an unconditional corporate tax and dividend WHT exemption for dividend income between Turkish companies. If a Turkish company has a shareholding in a foreign company this dividend income is exempt from corporate tax under certain conditions.

**Capital gains exemption**
For capital gains generated from the sale of shares in a Turkish company to another Turkish company, a 75% corporate tax exemption is applicable under certain conditions. In the event a foreign subsidiary is sold by a Turkish company, a corporate tax exemption at the rate of 100% is applicable under certain conditions.
Investment incentives
The Turkish government provides investment incentives (state aid) to eliminate inter-regional economic imbalance, facilitate a larger capital contribution by public and foreign investors to the capital build-up of the country and support activities that have a positive effect on employment. Generally speaking, state aid can be classified as either a tax or a non-tax incentive.

The principal prerequisite for benefiting from state aid, except investment allowance, is to obtain an Investment Incentive Certificate (IIC). The IIC is a document granted to investors for their investments by the Undersecretariat for the Treasury. It allows utilisation of the said benefits.

According to investment incentive legislation, in order to obtain an IIC, the minimum amount of total investment should be at least TRY 1,000,000.

The advantages of an IIC can be summarised as exemption from customs duty, RUSF and VAT. For example, the import of machinery and equipment (excluding raw materials, intermediate and operating products) is exempt from customs duty and Resource Utilisation Support Fund (RUSF) payments. In addition, VAT exemption is also applicable on the importation of eligible machinery and equipment.

On the other hand, from an income tax perspective, the legislation related to investment incentives has changed substantially. There are six main components of the new investment regulation:

1. Reduced corporate tax rate;
2. VAT exemption;
3. Exemption for social security premium (employer's portion);
4. Customs duty exemption;
5. Interest support; and

Free trade zone
Free trade zones are special sites that lie geographically within the country, but are deemed to be outside the customs territory. In these regions, the normal regulations related to foreign trade and other financial and economic areas are either inapplicable, partly applicable or superseded by new regulations.

In general, activities such as manufacturing, storage, packing, general trading, banking, insurance and trade may be performed in Turkish free trade zones. Goods moving between Turkey and the zones are treated, for all purposes, as exports or imports. However, operations within the zones are subject to the supervision of the zone management (and customs authorities), to whom regular activity reports must be submitted. Consequently, there is a requirement for zone users to maintain full accounting records (in Turkish) with respect to their activities. These accounting requirements extend to inventory records. Customs duty is levied on any unexplained inventory losses as though the goods had been imported into the country.

The right to operate in a free zone is conferred by an operating licence obtained from the Undersecretariat for Foreign Trade, which reviews the application for conformity with the objectives and types of activity specified by the Economic Affairs Coordination Council.
**Portfolio investment income**

Portfolio investment income derived by Turkish securities investment funds and securities investment trusts is exempt from corporate income taxation. The exempt corporate income of such securities investment funds and the securities investment trusts is subject to 0% corporate WHT. Certain income (e.g., interest and capital gains from domestic government bonds issued after 1 January 2006, capital gains derived from listed equities acquired after 1 January 2006) derived by these funds and trusts are subject to 0% withholding at source.

In line with the amendments made to the income tax law effective 1 January 2006, capital gains from listed equities of securities investment trusts acquired after 1 January 2006 and income from participation certificates of investment funds acquired after 1 January 2006 derived by non-resident corporations without a permanent establishment in Turkey and by non-resident individuals (non-residents) is currently subject to 0% income WHT at source, subject to certain documentation requirements. For individual and corporate residents, 10% rather than 0% WHT should be applicable to such gains and income. If certain conditions are satisfied, 10% WHT will not apply. The withholding will be applied by local intermediary banks, brokerage houses, or local custodian banks, instead of the conventional self-declaration mechanism and the WHT would be the final taxation in Turkey for non-residents and Turkish individuals.

**Research and development (R&D) activities**

In the last decade, the Turkish Parliament has enacted several regulations to provide incentives for R&D activities in Turkey. The three primary R&D incentives include significant advantages granted to investors planning R&D activities in science, software and technology in special zones known as “techno-parks”, cash subsidies from the Scientific and Technological Research Council of Turkey (TUBITAK) and corporate tax deductions.

On April 2008, a new R&D law was enacted to broaden incentives. One of the objectives of the law is to attract foreign investors with significant R&D activities abroad to invest in Turkey, by enabling non-resident companies with a subsidiary or branch in Turkey to benefit from R&D tax incentives.

The main incentives introduced by the new R&D law are:

**R&D deduction**

All eligible innovation and R&D expenditures made in technology centres or R&D centres, which must employ at least 50 full-time equivalent R&D personnel, or R&D and innovation projects supported by foundations established by law or international funds, can be deducted from the corporate income tax base at a rate of 100%. The same expenditures can also be capitalised and expensed through amortisation over five years in the case of successful projects, whereas the R&D expenditure on failed projects can be expensed immediately.

Companies with separate R&D centres employing more than 500 R&D personnel can, in addition to the aforementioned deduction, may deduct half of any increase in R&D expenditures over similar money spent in the previous period.

Any unutilised R&D deduction can be carried forward for an unlimited period of time, indexed to the revaluation rate, which is an approximation of the inflation rate.
**Income tax exemption**

80% of the salary income of eligible R&D and support personnel is exempt from income tax. However, this rate is increased to 90% for personnel with a doctorate degree.

**Social security premium support**

The Ministry of Finance will pay half the employer portion of social security premiums for R&D and support personnel for five years.

**Stamp tax (stamp duty) exemption**

Documents prepared in relation to R&D activities are exempt from stamp tax.

**Withholding taxes (WHT)**

There is no WHT on payments to resident corporations by other resident corporations, except for a 3% WHT on progress payments to contractors, both domestic and foreign, within the scope of construction work spanning more than one calendar year.

The local WHT rates are as follows:

Notes

1. The local rate of 10% will be applied in the event a higher rate is stipulated in the agreement.
2. Provisions for WHT at source are effective for amounts paid or credited on or after 1 January 2010.
3. A rate of 10% if the loan or other debt claim is for a period exceeding two years; 15% in all other cases (1).
4. A rate of 10% if the loan is taken for a period exceeding two years; 15% in all other cases (1).
5. A rate of 10% if the loan/credit is taken from a financial institution; 15% in all other cases (1).
6. A rate of 10% if the loan is taken from a bank or a financial institution; 15% in all other cases (1).
7. A rate of 10% if the credit/loan is taken from a bank, financial or savings institution, insurance company; 15% in all other cases (1).
8. A rate of 7.5% if the loan is taken from a financial institution; 10% in all other cases.
9. A rate of 10% if the interest is the result of a loan provided/given by a bank or if the interest is paid in return for an article of merchandise or equipment given to the contracting state on credit; 15% in all other cases (1).
10. A rate of 10% if the loan is taken from a financial institution, including insurance companies; 15% in all other cases (1).
11. A rate of 10% if the loan is taken for a period exceeding two years; 15% in all other cases (1).

12. A rate of 10% for the use of, the right to use or the sale (contingent on the productivity, use or disposition) of any copyright of literary, artistic or scientific work, including royalties in respect of motion pictures and works on film, tape, or other means of reproduction for use in connection with radio or television broadcasting, any patent, trademark, design or model, plan, secret formula or process, or for information concerning, industrial, commercial or scientific experience; 5% for the use of or the right to use industrial, commercial, or scientific equipment.

13. A rate of 5% for the use of industrial, commercial or scientific equipment; 10% in all other cases.

14. A rate of 15% for patent, trademark, design or model, plan, secret formula or process, or for information concerning industrial, commercial or scientific experience; 10% for the use of or the right to use any copyright of literary, artistic or scientific work including cinematographic films and recordings for radio and television.

15. The treaty has been terminated by Germany. The termination will apply for the periods following 1 January 2011, and in this context the provisions of the agreement will remain in effect for the fiscal years 2009 and 2010.

16. A rate of 5% in respect of a loan or credit made, guaranteed or insured for the purposes of promoting export by the Oesterreichische Kontrollbank AG or a similar Turkish public entity the objective of which is to promote the export; 10% if the interest is derived by a bank; 15% in all other cases (1).

17. If the beneficial owner of the “income from debt claims” is a resident of Saudi Arabia, the tax so charged shall not exceed 10% of the gross amount of income.

Notes

1. The local rate is 15% for dividends. Unless a lower rate is stated in the Agreement, the local rate is applied.

2. As per the provisions of the protocol amending the agreement the rate may be (partially or wholly) reduced;
   - For the Netherlands, to 10%, as long as, under the provisions of the Netherlands Company Tax Act and to the future amendments thereto, a company which is a resident of the Netherlands is not charged tax with respect to dividends the company receives from a company which is a resident of Turkey;
   - For Belgium: to 10%, under the provisions of the Belgian laws and of the future amendments thereto, a company which is a resident of Belgium is not charged to CIT with respect to dividends the company receives from a company which is a resident of Turkey, with respect to dividends paid by a company which is a resident of Turkey to a company which is a resident of Belgium;
   - For Austria: to 5%, if the beneficial owner is a company (other than a partnership) which holds directly at least 25% of the capital of the company paying the dividends, provided that such dividends are exempt from tax in Austria.

3. Subject to 5% of the gross amount of the dividends if the recipient is the government, or a public institution which is wholly owned by the government or its political subdivisions, or local authorities of the UAE.

4. The tax rate shall be 15% where the amount of the Turkish tax imposed on the income of the company paying dividends is less than 40% of such income derived in the accounting period ending immediately before the date when such dividends become payable.

5. The income should be subject to full corporate taxation in the hands of the Turkish tax-resident subsidiary.

6. The treaty has been terminated by Germany. The termination will apply for the periods following 1 January 2011, and in this context the provisions of the agreement will remain in effect for the fiscal years of 2009 and 2010.

7. The provisions for WHT at source are effective for amounts paid or credited on or after 1 January 2010.

8. If the beneficial owner of the dividends is a resident of Saudi Arabia, the tax so charged shall not exceed 5% of the gross amount of the dividends provided: (i) the beneficial owner is a company (other than a partnership) which holds directly at least 20% of the capital of the Turkish company paying the dividends, or (ii) the beneficial owner is a central bank or an entity which is wholly owned by the government.

**Tax administration**

A self-assessment system is used in Turkey.

All Turkish taxes are imposed under laws drafted by or with the involvement of the Ministry of Finance, and are promulgated by the Parliament. The central government, acting through the Ministry of Finance, imposes most of them, although local authorities have certain rights over some minor transaction charges. Tax procedures are governed by Tax Procedural Law No. 213.

**Returns**

Resident and non-resident entities having a PE are obliged to be registered for all taxes in Turkey (e.g., VAT, WHT, income tax, etc.) and file annual corporate income tax returns on a calendar-year basis unless permission to the contrary is specifically obtained from the Ministry of Finance.
The last date of submission of the corporate income tax return is the twenty-fifth of the fourth month following the fiscal year-end.

**Corporate income tax (CIT) certification**

In Turkey, a special kind of tax audit arises called “tax certification.” It is regulated under the provisions of Law No. 3568. A licensed tax auditor (“sworn financial advisor”) audits the accounts of a taxpayer from a tax perspective and certifies the accuracy of the CIT return.

In 1995, the Ministry of Finance announced that taxpayers whose tax returns have not been certified by a sworn financial advisor (Yeminli Mali Musavir, YMM) and whose assets and/or net turnover does not exceed the thresholds defined by the Ministry of Finance may not be in the priority tax inspection list. This tax certification service is utilised by the majority of companies in Turkey because such process helps identify and take corrective measures against erroneous actions that may otherwise be detected only upon a tax investigation by the Ministry of Finance.

**Payment of tax**

Corporate income tax must be paid by 30 April of the year of filing; taxable income is declared on a quarterly basis as advance tax on the fourteenth of the second month following each quarter, and is payable on the seventeenth of the same period. Advance corporate tax paid is offset against the final corporate tax calculated in the annual tax return.

Significant developments

The Law on Hydrocarbon Resources of 20 August 2008 (the petroleum law) re-establishes a legal framework for the exploration, development and other activities related to the production of hydrocarbon resources in Turkmenistan.

The petroleum law regulates activities in the oil and gas sector conducted under subsurface-use agreements (production-sharing agreements (PSAs), royalty contracts, service contracts, etc.) between contractors and the Turkmenistan government. The petroleum law stipulates a preferential tax regime to contractors under the above agreements. This preferential tax regime extends to subcontractors under those agreements.

The petroleum law also provides a waiver from any licensing requirements for eligible subcontractors.

Taxes on corporate income

Branches of foreign legal entities are subject to a 20% corporate income tax (CIT), whereas Turkmen legal entities are subject to an 8% CIT. Companies involved in oil and gas operations are subject to a 20% CIT, irrespective of the legal status/ownership structure. The CIT base is determined as gross income less allowable deductions. Residents of Turkmenistan are taxed on worldwide income; non-residents are subject to CIT only in respect of their Turkmenistan sourced income.

Corporate residence

Legal entities are treated as residents for purposes of the CIT if they are established in accordance with Turkmenistan law or their place of effective management is located in Turkmenistan.

Other taxes

Special purpose duty for improvement of urban and rural territories

A special duty aimed at improving urban and rural territories is imposed on registered entities (e.g., legal entities and branches). The duty applies at 1% of the taxable base for profits tax purposes. Generally, contractors and subcontractors operating under the umbrella of the petroleum law may be exempt from this duty.
Property tax
Property tax in Turkmenistan generally applies at the rate of 1% on the average annual net book value of fixed assets and average annual value of tangible assets used for business purposes and located in Turkmenistan. Generally, contractors and subcontractors operating under the umbrella of the petroleum law may be exempt from this tax.

Subsurface-use tax
Subsurface-use taxpayers are legal entities and individual entrepreneurs extracting natural resources and using land or subsoil waters for the extraction of chemical products. This tax does not normally apply to contractors and subcontractors operating under the umbrella of the petroleum law. Taxable operations include the sale of natural resources extracted by taxpayers and utilisation of natural resources for consumption. Tax rates vary depending on the goods being extracted. Natural or associated gas extraction is taxed at 22%, and crude oil extraction is taxed at 10%. Tax rates for other mineral resources vary depending on profitability (internal rate of return).

Social security payments
Social security is payable by employers at 20% of the total remuneration provided to local employees. Income paid to expatriate employees should not be subject to the social security contribution.

Advertising levy
An advertising levy is imposed on the amount of expenses on commercial advertising and is to be paid quarterly at the rate of 3% to 5% depending on the location of the payer within Turkmenistan. Generally, contractors operating under the umbrella of the petroleum law may be exempt from this levy.

Value-added tax (VAT)
VAT is generally payable at the rate of 15%. A zero-rate applies to exports of goods (except for oil and gas) and international transport services. Generally, contractors operating under the umbrella of the petroleum law may be exempt from this tax.

The tax base is sales turnover including excise tax. If a sale is made by state-fixed prices then it is the respective sales turnover including VAT and excise tax. The amount of input VAT incurred could be offset against the amount of output VAT. The amount of input VAT related to capital expenditures should be capitalised.

Contributions to Agriculture Development and Ashgabat City Development Funds
The contributions to the Agriculture Development Fund and Ashgabat City Development Fund are outside of the general tax legislation (tax code) and are provided for by specific decrees. Permanent establishments/branches of foreign legal entities are subject to those contributions on the same terms as local legal entities. Contribution to the Ashgabat City Development Fund only applies to entities located in Ashgabat City. The base for the contributions comprises the accounting income. The contribution rates are as follows:

- Agriculture Development Fund – 3%; and
- Ashgabat City Development Fund – 0.5%.

Generally, contractors and subcontractors operating under the umbrella of the petroleum law may be exempt from these contributions.
**Branch income**

Branches pay CIT at the rate of 20%. Turkmenistan does not impose branch profits tax in addition to the CIT.

Branches are taxed on profits received from activities in Turkmenistan. The gross income is reduced for expenses incurred (both inside and outside of Turkmenistan) in relation to the activities in Turkmenistan. The procedure for determining the taxable base for branches is generally similar to the one for Turkmen legal entities.

Branches subject to the standard tax regime also pay and file returns with respect to the other taxes described above.

**Income determination**

**Inventory valuation**
Inventory is valued at cost, including costs relating to their acquisition. The law permits the use of the weighted average, first-in, first-out (FIFO) and last-in, last-out (LIFO) methods.

**Capital gains**
Capital gains are taxable as normal business income.

**Inter-company dividends**
The tax code provides for relief from economic double taxation of inter-corporate dividends.

**Foreign income**
A resident company is subject to tax on its worldwide income (including capital gains).

**Deductions**

In general, taxpayers may deduct expenses paid or accrued during the year in connection with their business and aimed at income generation. All expenses must be substantiated by documentary proof.

The deduction of certain expenses is subject to specific ceilings. Such expenses include representation expenses, which are deductible at up to 1% of gross income. Furthermore, deductible norms for business travel expenses are established periodically by the government.

**Depreciation and depletion**
The tax depreciation is based on accounting depreciation.

Generally, for the purposes of CIT, depreciation accrued is deductible. Fixed assets acquired free of charge as well as assets of non-commercial legal entities, budget organisations and public associations should be excluded from depreciable assets for CIT purposes, even if they are used for generating income.

Depreciation on rented assets shall be deducted by the lessor (landlord).
Turkmenistan

**Net operating losses**
Loss is defined as excess of allowable deductions over gross revenue. Losses shall be carried forward and deducted in subsequent tax (reporting) periods, but not for more than three years. Losses cannot be carried back.

**Payments to foreign affiliates**
Administrative and management expenses incurred by the head office of a branch in Turkmenistan are not deductible at the branch level.

**Taxes**
For CIT purposes the following taxes are deductible: property tax, subsurface-use tax and levies established by the tax code (except the special-purpose duty for the improvement of urban and rural territories), accrued amounts of VAT in selling goods, performing work, rendering of services and amounts of excise tax included in the price of sold excisable goods by manufacturers of such goods.

**Other significant items**
Expenditures for the repair of fixed assets allowed for deduction shall comprise the cost of spare parts and consumable materials used for repair, remuneration of employees carrying out the repairs and other expenditures associated with such repairs, including payments to third parties for the purpose of such repairs.

Research and development costs (including those that produced no positive result) shall be subject to deduction from gross revenue, except for costs associated with the purchase of fixed assets, their installation and other costs of a capital nature.

**Group taxation**
There is no group taxation.

**Tax incentives**
Tax and investment incentives may be negotiated on a case-by-case basis. The President has often issued special decrees granting taxation exemptions and other privileges to specific investors. However, since adopting a new edition of the tax code in 2004 such practice has been significantly reduced.

**Withholding taxes (WHT)**
Turkmenistan source income generated by a foreign legal entity that has no permanent establishment in Turkmenistan generally is subject to withholding tax at the source of payment at 15% (6% for income from the lease of sea vessels and aircrafts). Relief may be available for withholding tax if a foreign entity is a resident of a country that has a valid double tax treaty with Turkmenistan and if the foreign entity complies with certain administrative procedures.

Currently, Turkmenistan has only a few double tax treaties in force. Turkmenistan is a successor to a number of double tax treaties concluded by the USSR, while some treaties were concluded and ratified by the government of Turkmenistan. The countries listed below are considered to have valid tax treaties with Turkmenistan:
Turkmenistan

Austria* Japan*
Armenia Kazakhstan
Belarus Pakistan
Belgium* Russia
France* Slovakia
Great Britain* Tajikistan
Germany* Turkey
Georgia Ukraine
India USA*
Iran Uzbekistan

* USSR treaties honoured by Turkmenistan.

**Tax administration**

**Returns**
Reports are generally filed quarterly within the month following the reporting quarter. Annual declaration of branches of foreign legal entities is due by 15 March of the year following the reporting one.

**Payment of CIT**
Advance payments under the standard tax regime are made before the thirteenth and twenty-eighth days of each month (unless agreed otherwise with tax authorities). Final payments upon results of the first quarter, first half-year, nine months and tax year are made within five days from the reporting deadlines. Under the petroleum law tax regime the CIT is paid once annually.

**Significant developments**

**Significant proposed changes in 2009**
The changes are contained in the Finance Act 2009 assented to on 3 November 2009 as well as statutory instruments issued during the year for value-added tax (VAT).

The VAT rate of 5% on the supply of residential dwellings was abolished by revocation order in 2009.

The supply of both goods and services for no consideration as part of business activities is now considered an application of the goods/services own use, which attracts VAT at market value. Previously, this section only applied to goods and not services.

The definition of a supply of goods was amended to include a lease of goods. Previously a supply of goods only included a sale of goods.

The list of exempt supplies has been expanded to include:

- Insurance brokerage services;
- Supply of specialised vehicles, plant and machinery, feasibility studies, engineering designs, consultancy services as well as civil works related to agriculture, education and health sector;
- All computer parts and accessories; and
- Supply of packing materials exclusively for use by the milling industry and diary industry for packing milled products and milk, respectively.

Other restrictions introduced include:

- Importation into Uganda of used refrigerators, freezers, computers and television sets was prohibited effective 1 April 2010;
- Importation, local manufacture, sale or use of polythene bags was prohibited effective on 1 April 2010; and
- Exportation of all kinds of scrap metals is now prohibited.

The amendments to the Income Tax Act (ITA) include:

- A deduction of 2% of income tax payable is granted to any employer who can prove to the Uganda Revenue Authority (URA) that at least 5% of their employees on full time basis are people with disabilities (PWDs);
• The threshold for tax depreciation for non-commercial vehicles has been doubled from UGX 30 million to UGX 60 million. This, in effect, doubles the capital allowances that can be claimed on non-commercial vehicles that are purchased after 1 July 2009;
• The income derived by a person from managing or running an educational institution is exempt;
• Allowances, reimbursements or per diems given to employees to pay for accommodations, meals or refreshments while on duty which do not exceed the cost incurred or likely to be incurred are not considered to be part of the employee’s income;
• The income derived by any person from agro-processing, which is already exempt from income tax if the person satisfies several conditions, is no longer restricted to locations outside the capital city (Kampala);
• Agro-processing has been defined to include an industrial or manufacturing process that substantially transforms or converts raw agricultural produce into a different chemical or physical state; and
• Income derived by persons who intend or actually export finished consumer or capital goods is exempt from income tax, subject to conditions. The conditions include: at least 80% of goods produced must be exported, proper records must be maintained and annual returns together with the final return of income must be submitted. The exemption is valid for 10 years, is not transferable and may not apply in any year in which the person did not fulfil the set conditions.

**Petroleum operations**
Several amendments were introduced in the ITA to cater for taxation of upstream petroleum operations. The legislation is still new and some amendments are expected with time.

**Taxes on corporate income**

The income tax rate applicable to the chargeable income of companies is 30%, with the exception of:

• Mining companies;
• Non-resident air transport, shipping and telecommunications companies; and
• Companies whose turnover is less than UGX 50 million.

The chargeable income of the company would be its gross income for the year less the total deductions allowed under the ITA.

The income tax rate applicable to mining companies is calculated using a specified formula \((70-1500/X)\) where \(x\) is the ratio of the company's chargeable income to the gross revenue for the year. However, the derived tax rate is subject to a minimum tax rate of 25% and a maximum tax rate of 45%.

A rate of one percent (1%) of turnover is used to determine tax payable by a resident taxpayer whose turnover is between UGX 20 million and UGX 50 million (approximately between USD 10,000 and USD 25,000), subject to certain thresholds.

However, on application to the Commissioner a taxpayer with a turnover of less than UGX 50 million may be taxed at 30%.
Uganda

**Corporate residence**

A company is resident in Uganda for a year of income if it:

- Is incorporated or formed under the laws of Uganda;
- Has its management and control exercised in Uganda at any time during the year of income; or
- Undertakes the majority of its operations in Uganda during a year of income.

A resident company is taxed on its income from all geographical sources where as a non-resident company is only subject to Uganda tax on income derived from sources in Uganda.

**Company tax returns**

All companies in Uganda (including branches) are under a self-assessment system. Companies are required to file a provisional tax return at the end of six months after the start of the accounting period, and pay 50% of the tax due for the year. The balance of the tax payable for the year is due at the end of the company’s 12 month period (year-end date).

Final tax returns and any balance of the tax due (if any) for a year are filed with the URA six months after year-end. For example if the company’s year-end date is 31 December 2009, it will be required to file its returns and pay the balance of the tax due by 30 June 2010.

**Other taxes**

**VAlue-added tax (VAT)**

VAT is governed by the VAT Act and administered by the URA. VAT is charged at the rate of 18% on the supply of most goods and services in the course of business in Uganda. Specified goods and services attract a zero rate of tax as well as exports to outside Uganda.

Some supplies are exempt from VAT, the main categories being Government subsidies, the supply of unprocessed foodstuffs, agricultural products and livestock, financial services, insurance services, unimproved land, leases and sale of certain residential properties, betting and gaming, education, medical and health services, social welfare services, pesticides, petroleum products subject to excise duty, machinery for processing agricultural or diary products, accommodation in hotels outside specified areas, computers, accessories and software. The supply of specialised vehicles, plant and machinery, engineering designs, feasibility studies, consultancy services and civil works related to hydro-power, roads and bridges’ construction, public water works, agriculture, education and health sectors is also exempt.

Zero rating is preferable to exemption, because the VAT on costs incurred in making a zero-rated supply can be recovered, while that incurred in making an exempt supply cannot be recovered.

The annual threshold for VAT registration is UGX 50 million (approximately USD 25,000). Persons who make supplies that are VATable and whose turnover exceeds UGX 50 million are required to register for VAT with the URA. VAT registered persons are required to:
• Charge VAT whenever they make supplies that are VATable.
• File monthly returns before the fifteenth day of the month following the reporting month.

**Credit for input tax**

In cases where a person making exempt supplies also makes taxable supplies, such a person may not claim input tax fully.

A person making exempt, zero-rated and standard supplies can recover all the input VAT if the exempt supplies are less than 5% of the total supplies. However, if the exempt supplies are more than 5% but less than 95%, the person is required to recover only a portion of the VAT input tax corresponding to the percentage of the taxable supplies. If the exempt supplies exceed 95%, the person cannot recover any input VAT.

**Imported services**

The VAT Act defines a supply of service to mean any supply which is not a supply of goods or money, including the performance of services for another person.

An imported service is one provided by a person normally resident outside Uganda who is not required to register for VAT in Uganda. According to regulation 14 of the VAT Regulations 1996, any person who imports a service into the country must account for VAT on such a service. The Regulations require the person importing the service to account for the VAT at the time when performance of the service is completed, or when payment for the service is made, or when the invoice is received from the foreign supplier, whichever is earliest.

The tax on such imported services is supposed to be computed at the rate of 18% of the cost of the service. Companies are required to prepare self-billed tax invoices to account for the input VAT. Further if the importer of the services is not registered for VAT, the importer is required to calculate and pay the VAT to URA.

Although there is no effect on the cash flow position, preparation of a self-billed tax invoice is important as it is a requirement by law. Failure to do so is tantamount to lack of compliance with the law, and a penalty of 2% per month compounded may apply.

**Pay as you earn (PAYE)**

The chargeable income of an individual for a year of income is charged to tax at the rates shown in the tables below. The chargeable income of a person for the year of income is the gross income of the person for the year less total deductions allowed under the ITA for the year.

The tables show both rates applicable for the resident and non-resident individuals. The income tax rates applicable to resident individuals/employees are as follows:

<table>
<thead>
<tr>
<th>Chargeable monthly Income</th>
<th>Tax rate</th>
</tr>
</thead>
<tbody>
<tr>
<td>Not exceeding UGX 130,000</td>
<td>Nil</td>
</tr>
<tr>
<td>Exceeding UGX 130,000 but not exceeding UGX 235,000</td>
<td>10% of the amount by which chargeable income exceeds UGX 130,000</td>
</tr>
<tr>
<td>Exceeding UGX 235,000 but not exceeding UGX 410,000</td>
<td>UGX 10,500 plus 20% of the amount by which chargeable income exceeds UGX 235,000</td>
</tr>
</tbody>
</table>
Uganda

<table>
<thead>
<tr>
<th>Chargeable monthly income</th>
<th>Tax rate</th>
</tr>
</thead>
<tbody>
<tr>
<td>Exceeding UGX 410,000</td>
<td>UGX 45,500 plus 30% of the amount by which chargeable income exceeds UGX 410,000</td>
</tr>
</tbody>
</table>

The income tax rates applicable to non-resident individuals/employees are as follows:

<table>
<thead>
<tr>
<th>Chargeable monthly income</th>
<th>Tax rate</th>
</tr>
</thead>
<tbody>
<tr>
<td>Not exceeding UGX 235,000</td>
<td>10%</td>
</tr>
<tr>
<td>Exceeding UGX 235,000 but not exceeding UGX 410,000</td>
<td>UGX 23,500 plus 20% of the amount by which chargeable income exceeds UGX 235,000</td>
</tr>
<tr>
<td>Exceeding UGX 410,000</td>
<td>UGX 58,500 plus 30% of the amount by which chargeable income exceeds UGX 410,000</td>
</tr>
</tbody>
</table>

**Stamp taxes**

Stamp duty is charged on a number of transactions at varying rates. Stamp duty is charged at 1% of the total value for a number of instruments, including: hire purchase agreements, composition deeds, leases, exchange of property, conveyance, transfers, share warrants, gifts and agreement relating to deposit of title deeds. Stamp duty of 0.5% is incurred on capital-raising activities such as increase of share capital; debentures, equitable mortgages, mortgage deeds. No stamp duty is charged on the increase of share capital where it is in fulfilment of a condition precedent for acquiring loan funds for a development project or where it is made on becoming public through the stock exchange. Stamp duty of UGX 5,000 is also charged in a number of various other instruments.

**Excise taxes**

Excise duties are imposed on goods considered luxuriant on importation and some selected goods locally produced. Examples include locally manufactured soft drinks, cigarettes, alcoholic drinks and spirits. A schedule of some of the rates is provided below:

<table>
<thead>
<tr>
<th>Item</th>
<th>Rate</th>
</tr>
</thead>
<tbody>
<tr>
<td>Cigarettes</td>
<td>Between UGX 20,000 and UGX 50,000 per 1,000 sticks subject to the type of cigarette</td>

</tr>
<tr>
<td>Wine produced from local raw materials</td>
<td>20%</td>
</tr>
<tr>
<td>Other wine</td>
<td>70%</td>
</tr>
<tr>
<td>Air time</td>
<td>12%</td>
</tr>
<tr>
<td>Fuel and oils</td>
<td>Between UGX 200 and UGX 720 per litre depending on the type of fuel/oil</td>
</tr>
</tbody>
</table>
Property taxes
Property taxes are administered by the local authorities.

Turnover taxes
Every promoter of gaming and pools promoted within Uganda and every principal agent of a promoter of gaming and pools promoted outside Uganda is liable to tax at 15% of the total amount of money received or the total amount of bets.

A tax of 5% is charged on gross income earned by non-resident persons carrying on the business of transmitting messages by cable, radio or optical fibre or satellite communication or provision of direct to home pay television services to subscribers in Uganda.

Registration taxes
Stamp duty of 0.5% applies on formation of a company or upon increase in shares. The stamp duty is payable by the purchaser and is payable to the Government of Uganda. Stamp duty of 0.1% applies on transfer of shares.

Customs duties
Many goods imported into Uganda are subject to customs duties. However, exemptions are available to various classes of plant and machinery imported into Uganda. The rates of duty are provided by the East African Community common external tariff code. Certain products imported from the East African community and the Common Market for Eastern and Southern Africa (COMESA) region enjoys special custom duty rates. Imported items are classified according to the nomenclature established under the international convention on the harmonised commodity description and coding system. Duty's range from 0% to 60% depending on the item imported.

Environmental taxes
Environmental levies are charged on every person who imports motor vehicles that are eight years old or older. Levies are also imposed on the importation of used household appliances. The levy on motor vehicles is 20% of the value of the vehicle as determined for customs duty purposes. Levies on electrical appliances range from UGX 20,000 to UGX 50,000 per item depending on the nature of the item.

Branch income
Tax is imposed on the income of a non-resident company derived from running a branch in Uganda. The chargeable income of a branch in Uganda is taxed at the corporation tax rate of 30% after deduction of tax allowable expenses. In addition to corporation tax, branches are subject to extra tax at a rate of 15% on any repatriated income for a year of income. The repatriated income is calculated using the A+(B-C)-D. Where A is the net assets at the beginning of the year, B is the net profit for the year, C is the tax charge for the year and D is the net assets at the end of the year.

Income determination
In arriving at chargeable income (taxable income) one has to go through the process of adjusting profits by taking into account deductions allowed and deductions not allowed as per the general rule principle.
Uganda

Chargeable income of a person is defined under section 15 of the Income Tax Act Cap 340 (ITA) to mean the gross income for the year less total deductions allowed under the Act for the year.

**Deductions**

**Deductibility of expenses**
The ITA sets out the following conditions for deductibility of an expense.

- There must be an expenditure or loss;
- The expenditure or loss must be incurred by a person during the year of income; and
- The expenditure must be incurred in the production of income included in the gross income.

No deduction is allowed for the following expenditures:

- Any expenditure or loss of a domestic or private nature, for instance, the cost incurred in the maintenance of the person and the person's family or residence and the cost of commuting between the person's residence and the work place;
- Any expenditure or loss of a capital nature;
- Any expenditure or loss recoverable under insurance contract or indemnity;
- Income tax payable in Uganda or in a foreign country;
- Any fine or similar penalty paid to a government or its sub-division for breach of any law;
- Any contribution or similar payment made to a retirement fund by the employee or for the benefit of any other person for instance company National Social Security Fund (NSSF) contributions;
- Any premium or similar payment made in respect of a life insurance policy for the life of the person paying the premium or on the life of some other person;
- Any income appropriated to a reserve fund or capitalised in any way; or
- The amount of pension paid to any person.

**Bad debts**
Deduction is allowed only if the amount was included in the person's income in the year of income or if it is in respect of money that was lent in the ordinary course of business by a financial institution in the production of income or if the amount of the debt claim was in respect of a loan granted to any person by a financial institution for the purpose of farming, forestry, fish farming, beekeeping, animal and poultry husbandry or similar operations. For the bad debt to be deductible, the taxpayer must demonstrate to the URA that reasonable steps to collect the debt were taken, and the taxpayer failed to recover the debt. In relation to a financial institution, it should be a debt in respect of which a loss reserve held against presently identified losses or potential losses, and which is therefore not available to meet losses which subsequently materialise, has been made.

**Meals, refreshments and entertainment**
These are allowed only where the value is included in the employment income of the employees or is excluded owing to the fact that it is provided on equal terms to all workers.
**Interest**
This is allowed if the interest is incurred in respect of a debt obligation by the company in the production of income included in the company's gross income. Interest arising from non-trade-related debt obligation is not allowed.

**Interest on loans for capital development**
Interest charged before capital investment is put to use has to be capitalised. Interest incurred after capital investment is put to use is allowed as a deduction.

If the company is foreign controlled, then the interest arising from the loan in excess of two times the company's equity will not be allowed (see Thin capitalisation).

**Charitable donations**
These are allowed if made to amateur sporting associations, religious, charitable or educational institutions of public character, trade unions and other similar associations. The donations should not exceed 5% of the person's chargeable income.

**Net operating and capital losses (carryback and carryforward period)**
A deduction is allowed for any assessed tax losses carried forward from previous years of income. Such tax losses are carried forward and deducted against future taxable profit of the business in the subsequent years of income. The losses can be carried forward indefinitely. There is no ring-fencing of losses except in the following circumstances:

i. Where, during a year of income, there has been a change of 50% or more in the underlying ownership of a company, as compared with its ownership one year previously, the company is not permitted to deduct an assessed loss in the year of income or in subsequent years, unless the company, for a period of two years after the change or until the assessed loss has been exhausted if that occurs within two years after the change:
   • Continues to carry on the same business after the change as it carried on before the change; and
   • Does not engage in any new business or investment after the change where the primary purpose of the company or the beneficial owners of the company is to utilise the assessed loss so as to reduce the tax payable on the income arising from the new business or investment.

ii. In cases where losses relate to farming the assessed farming loss can only be deducted from farming income of the taxpayer in the following year and not from any other income.

**Depreciation**
A deduction is allowed for the depreciation of the person's depreciable assets, other than minor assets, in accordance with the appropriate applicable rates as provided for under the ITA. Plant and machinery is pooled in four classes according to their nature. Capital allowances are granted at various rates on a reducing balance basis.

This has been discussed in detail under Tax incentives.

**Accrued expenses**
A taxpayer who is accounting for tax purposes on an accrual basis:

• Derives income when it is receivable by the taxpayer; and
Uganda

• Incurs expenditure when it is payable by the taxpayer.

An amount is treated as payable by the taxpayer when all the events that determine liability have occurred and the amount of the liability can be determined with reasonable accuracy, but not before economic performance with respect to the amount occurs. Economic performance occurs:

• With respect to the acquisition of services or property, at the time the services or property are provided;
• With respect to the use of property, at the time the property is used; or
• In any other case, at the time the taxpayer makes payment in full satisfaction of the liability.

Contingent liabilities
These are not tax-deductible.

Fines and penalties
These are not tax-deductible when used to pay for breach of law or subsidiary legislation.

Goodwill
No tax deduction is allowed for goodwill.

Start-up expenses
Start-up costs are deductible over four years on a straight-line basis beginning with the year of income in which the expenditure was incurred. This also applies to expenses incurred for the initial public offering at the stock market

Payment to foreign affiliates
These are deducted as long as they are incurred in the production of income.

Pension expenses
Employers are allowed a deduction for the contributions made to pension schemes on behalf of their employees. Employees, on the other hand do not get a deduction for the contributions they make to pension funds.

Payment for directors
Directors are treated as employees and therefore expenses incurred in respect of directors are deductible expenses.

Bribes, kickbacks, illegal payments
Non-business expenses are not tax-deductible, including those of a private nature.

Capital vs. ordinary transactions
Capital expenses are not fully deductible in the year in which they are incurred but capitalised and capital allowances claimable using the applicable rate to the class of asset for which they are capitalised.

Ordinary transactions which are of a revenue nature are fully tax-deductible in the year in which they are incurred.
**Foreign investment**
Residents are taxed on worldwide income but a tax credit is available with respect to tax if outside Uganda.

**Foreign income (anti-deferral regime, unremitted earnings)**
Uganda does not have a controlled foreign company regime.

**Interest income**
Interest income is taxable as part of business income at a rate of 30%. However, interest income earned by financial institutions with respect to agricultural loans is not subject to tax. Also interest income earned by financial institutions with respect to government securities is subject to tax at 15% as final tax.

Interest is also subject to withholding tax at 15%. Every resident person who pays interest to another resident or non-resident person should withhold tax at 15%. The withholding of tax between two resident persons tax does not apply where interest paid by a natural person; interest paid by a company to an associated company; interest paid to a financial institution; or interest paid which is exempt in the hands of the recipient. Specific conditions apply for non-residents to qualify for an exemption from withholding tax on interest in Uganda.

**Rent/royalties income**
Rental income for individuals is taxed at a rate of 20% after a standard allowable deduction of 20%. The taxable amount is subject to a specified threshold equivalent to approximately USD 800. Rental income for companies is included in gross income and taxed at the 30% corporate tax rate.

**Stock transactions**
A taxpayer is allowed a deduction for the cost of trading stock disposed of during a year of income. For tax purposes, the closing value of trading stock the lower of cost or market value of trading stock on hand at the end of the year of income.

**Unrealised exchange gains/losses**
The gains are not taxable and the losses are not tax-deductible.

**Permanent establishment (PE)**
A PE (branch) means a place where a person carries on business, and includes:

- A place where a person is carrying on business through an agent, other than a general agent of independent status acting in the ordinary course of business as such;
- A place where a person has, is using, or is installing substantial equipment or substantial machinery; or
- A place where a person is engaged in the construction, assembly, or installation project for 90 days or more, including a place where a person is conducting supervisory activities in relation to such a project.

**Group taxation**
There are no specific provisions in the law covering groups and therefore companies in a group do not get any special treatment for tax purposes.
Uganda

**Transfer pricing regime**
Uganda does not have specific transfer pricing legislation. However, the anti-avoidance provisions contained in Sections 90 and 91 of the ITA require transactions between associates to be at arm’s-length basis. These are the provisions that are often applied by the URA in instances where they are of the view that a non-resident person may be transferring profits from Uganda.

**Treatment of inter-company items (dividends, royalties, commissions, payments, receipts)**
Not relevant in the context of group taxation. Generally, dividend payments are not tax-deductible and dividend income is subject to tax at 30%. However, a dividend paid to a resident company, other than an exempt organisation, by another resident company is exempt from tax where the company receiving the dividend controls, directly or indirectly, 25% or more of the voting power in the company paying the dividend.

Royalties and commissions are tax-deductible.

**Thin capitalisation rules in Uganda**
Where a company intends to finance some of its Uganda operations by use of a foreign debt, the ITA provides for thin capitalisation rules in Uganda and the safe debt: equity harbour ratio is 2:1. The thin capitalisation rules are provided for in Section 89(1) of the ITA.

According to this Section, where a foreign controlled resident company which is not a financial institution has a foreign debt to foreign equity ratio in excess of 2 to 1 at any time during that year of income, a deduction is disallowed for the interest paid by the company during that year on that part of the debt which exceeds 2 to 1 ratio.

**Tax incentives**

**Start-up costs**
A company setting up business for the first time will be entitled to a tax deduction for all its start-up costs that are of capital nature which would otherwise not be tax-deductible under the ordinary tax rules. The start-up costs will be allowed as tax-deductible costs over a period of four years at a straight-line basis at the rate of 25% per annum.

The other tax incentives for investment in Uganda are mainly in the form of accelerated depreciation on capital plant and machinery for business. These are discussed in more detail below.

**Capital allowances/depreciation**
The ITA allows a taxpayer a deduction for the depreciation of their depreciable assets on a reducing balance basis. Depreciable assets are classified in four classes as follows:

<table>
<thead>
<tr>
<th>Class</th>
<th>Assets included</th>
<th>Rate of tax depreciation</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Computers and data handling equipment</td>
<td>40%</td>
</tr>
<tr>
<td>2</td>
<td>Automobiles, buses and mini-buses with a seating capacity of less than 30 passengers, goods vehicles with a load capacity of less than 7 tonnes; construction and earth moving equipment.</td>
<td>35%</td>
</tr>
</tbody>
</table>
### Class Assets Included

3. Buses with a seating capacity of 30 or more passengers; goods vehicles designed to carry or pull loads of 7 tonnes or more; specialised trucks, tractors; trailer-mounted containers; plant and machinery used in farming, manufacturing or mining operations.

<table>
<thead>
<tr>
<th>Class</th>
<th>Rate of tax depreciation</th>
</tr>
</thead>
<tbody>
<tr>
<td>3</td>
<td>30%</td>
</tr>
</tbody>
</table>

4. Rail cars, locomotives and equipment; vessels, barges, tugs and similar water transportation equipment; aircraft, specialised public utility plant, equipment and machinery; office furniture, fixtures and equipment, and any depreciable asset not included in another class.

<table>
<thead>
<tr>
<th>Class</th>
<th>Rate of tax depreciation</th>
</tr>
</thead>
<tbody>
<tr>
<td>4</td>
<td>20%</td>
</tr>
</tbody>
</table>

### Initial allowance

Where a taxpayer places an item of eligible property into service for the first time during the year of income they would qualify for a tax deduction for that year of income which is equal to 75% of the cost of the asset if the property is put into use outside Kampala, Entebbe, Namanve, Jinja and Njeru. However if the property is put into use in the above named areas the tax deduction would be equal to 50%.

Eligible property is defined to mean plant and machinery wholly used in the production of income included in the gross income but does not include goods or passenger vehicles, appliances of a kind ordinarily used for household purposes; or office or household furniture, fixtures and fittings.

### Industrial building allowance

A company is eligible to an industrial building allowance on its industrial and commercial buildings at a tax rate of 5% per annum on a straight-line basis. The industrial building allowance will be granted on the actual cost incurred in constructing the buildings.

In addition to the above, a company is entitled to initial allowance at the rate of 20% on the industrial building in the first year the building is put to use. The industrial building allowance will be computed on the residual value after the initial allowance of 20% on the power plant building.

An industrial building is defined to mean any building which is wholly or partly used, or held ready for use by a person in manufacturing operations; research and development into improved or new methods of manufacture; mining operations; an approved hotel business; an approved hospital; or approved commercial buildings.

### Computer hardware and software

There is VAT exemption on all computer hardware and software imported or bought locally.

### Scientific research expenditure, training expenditure and mineral exploration expenditure

100% allowance for scientific research expenditure, training expenditure and mineral exploration expenditure in the year of expenditure.
Uganda

Exemption of plant and machinery from VAT
Plant and machinery is exempt from customs duty on importation. Also a VAT deferral facility is available where VAT is deferred on importation of plant and machinery and subsequently waived upon approval by the relevant authorities.

Other exemptions
- Exemption for income derived from exportation of finished consumer and capital goods.
- A tax holiday of 10 years is available to exporters who export at least 80% of their produce of finished goods subject to certain conditions.
- Exemption of income derived from agro processing subject to certain conditions.
- Business income derived by a person from managing or running an educational institution.
- Exemption from withholding tax on importation of plant and machinery.
- New investors may be granted Investment Trader Status where they can claim their input VAT before they start to make taxable supplies. This is subject to certain conditions as specified by the VAT Act.
- Foreign tax credit – A resident taxpayer is entitled to foreign tax credit for any foreign income tax paid by the taxpayer in respect of foreign-source income included in the gross income of the taxpayer. The foreign tax credit allowed is subject to the income tax rate in Uganda.

Withholding taxes (WHT)
According to Section 83(1) of the ITA, a tax is imposed on every non-resident person who derives any dividend, interest, royalty, rent, natural resource payment or management charge from sources in Uganda.

Withholding tax at a rate 15% therefore applies on gross dividend payments, interest, management fees and royalty payments in respect of non-treaty countries.

However, section 83(5) exempts interest paid by a resident company in respect of debentures, which:
- Were issued by the company outside Uganda for the purpose of raising a loan outside Uganda;
- Were widely issued for the purpose of raising funds for use by the company in a business carried on in Uganda or the interest is paid to a bank or a financial institution of a public character; and
- The interest is paid outside Uganda.

A debenture is defined in the ITA as any form of debt including debenture stock, mortgage stock, loan, loan stock, or any similar instrument acknowledging indebtedness, whether secured or unsecured.

The term “widely issued” was clarified by a practice note issued on 20 July 2006 to mean that; for interest paid by a resident person in respect of debentures to be exempt from tax, the “public offer test” needs to be met. This means that the debentures, debenture stock, mortgage, mortgage stock, loan, loan stock or similar instrument acknowledging indebtedness whether secured or not must have been issued:
To a reasonable number of people operating in a capital market;
• To several investors with a history of previous acquisition of debt instrument or debentures;
• As a result of negotiations for the loan in a public forum used by financial markets dealing in debt instruments; or
• To a dealer, manager or underwriter for the purpose of placement of the debt instrument.

This therefore means that the issuance of debentures should be non-exclusive, and preferably in a capital market arrangement that caters for public involvement in order to fulfil the requirement of “widely issued”.

Notwithstanding the requirement of widely issued, section 83(5) (b) gives an alternative of the interest being paid to a bank or a financial institution of a public character being exempt from withholding tax. For such interest to be exempt the following conditions must be met:

• The loan must have been acquired by a resident company;
• The loan must have been raised outside Uganda;
• The funds should be raised purposely for carrying on business in Uganda;
• The interest on the loan should be paid to a bank or a financial institution of a public character; and
• And the interest should be paid outside Uganda.

This therefore means that if a company receives a loan outside Uganda from a bank or financial institution located outside Uganda for carrying on a business in Uganda, the interest which the company pays to the bank or financial institution of a public character will not be subject to withholding tax.

**Double taxation agreements (DTA)**

A taxpayer will also benefit from the provisions of the DTA where Uganda has DTAs with other countries. Please find below a table showing the countries with which Uganda has DTAs and the applicable tax rates on various categories of income.

According to section 88 (2) of the ITA, the terms of the international agreement to which Uganda is a party prevails over the provisions of ITA in case the terms of the international agreement are inconsistent with the provisions of the ITA.

Uganda

Note:

**With respect to the Uganda/Netherland DTA, the rate applicable on dividends is **15% except where the investment is new or is an expansion of the current investment made after the DTA entered into (10 September 2006).

**Tax administration**

**Audit cycle**
The laws do not provide for this.

**Statute of limitations**
The ITA requires a taxpayer to maintain records for at least five years after the end of the year to which the records relate.

The VAT Act provides for records to be maintained for six years after the end of the tax period to which they relate.

**Tax return due dates**
The ITA provides for two provisional returns within a 12-month period (financial year). The first provisional return is due within the first six months of the accounting year while the second is due by the end of the twelfth month of the accounting year. The Self Assessment Return (SAR) is due by the sixth month after the end of the accounting year. THE SAR must be filed together with an original copy of signed original statutory accounts.

VAT is due by the fifteenth day of the month following the month in which the transactions occurred.

**Payment of tax**
For all companies, a system of provisional payments on account, based on estimated profits, is in place. The first payment is due in the sixth month of the accounting period and the second payment is due in the twelfth month. The balance is expected to be paid together with the SAR.

**Topics of focus for tax authorities**
The focus keeps shifting but is generally based on the risk analysis of the information availed to them. Currently, the focus is on transfer pricing.

**Other issues**

**Exchange controls**
Not applicable in Uganda.

Significant developments

Ukraine continues to develop its tax system. There are plans to introduce a comprehensive tax code during 2010, which should ease compliance and administration. This code has not passed the Ukrainian Parliament as of May 2010.

Taxes on corporate income

Ukraine’s corporate profits tax, which has a uniform rate of 25%, applies to taxable profits earned by:

- Resident entities in Ukraine and abroad; and
- Non-residents with the source of such profits in Ukraine.

Reduced rates (0% and 3%) are applicable for income of insurance companies.

The corporate income tax (CIT) is levied at the state/national level; no CIT is levied at the regional or local level.

A withholding tax (WHT) at a rate of 15% applies for the majority of income payments for non-residents unless a relief is given under double taxation treaty (DTT) rules. Ukraine has 68 effective DTTs.

A unified tax is available for agricultural producers.

Corporate residence

Corporate residence is determined by the place of incorporation. Resident entities are taxed on their worldwide income. Non-resident entities are taxed on their Ukrainian-source income.

Other taxes

Other principal taxes and compulsory payments in Ukraine are value-added tax (VAT), personal income tax, pension fund charge, excise tax, land tax, tax on owners of motor vehicles, import duty and stamp duty. In addition, 14 local taxes may be levied at the discretion of local authorities.
Value-added tax (VAT)
Tax registration as a VAT payer is compulsory if the volume of an entity’s taxable transactions exceeds the compulsory registration threshold. The current registration threshold is UAH 300,000 for the previous 12 months. An entity qualifying as a taxable entity should register with the tax authorities at the place of its location and obtain a VAT registration number. In addition, a voluntarily VAT registration is available.

Transactions that are subject to VAT include:

• The supply of goods and services when the place of supply is in Ukraine, including supplies made without consideration;
• The importation of goods and ancillary services (i.e., services costs of which are included in goods customs value) into Ukraine; and
• Exportation of goods.

Transactions that are not subject to VAT include:

• The issue, sale and exchange of securities;
• The provision of property by a lessor to a lessee under an operating lease and return of property upon expiry of the operating lease;
• Interest/commission element of lease payments under financial lease agreements in the amount of up to double interest rate of the National Bank of Ukraine;
• Provision of financial loans and bank guarantees;
• Insurance and re-insurance services supplied by licensed insurers and services of insurance/reinsurance agents and brokers;
• Payment of royalties;
• Transfer of a taxpayer’s assets in the course of business transformation (practical issues exist); and
• Transit of cargo and passengers through Ukraine territory.

There are two VAT rates: 20% and 0%. The rate of 20% applies to almost all transactions subject to VAT except the export of goods and related services, which is taxable at 0%. The zero rate also applies to the supply of international transport services (part of transportation performed outside Ukraine) and toll manufacturing services. In practice, obtaining a VAT refund is difficult.

The provision of services to a non-resident is not considered zero-rated. Such services are either subject to 20% VAT or considered to be out of scope of VAT (effectively exempt with no right to claim input VAT).

Generally, VAT incurred by a registered entity on the purchase and/or importation of goods and services used for the purpose of its own business (except for VAT incurred in relation to exempt supply) may be recovered by way of a credit against output VAT. In the case VAT credit exceeds VAT output for two months, a VAT refund is available in form of cash payment or set-off against future VAT liabilities (subject to certain rules and limitations).

Excise tax
Excise tax applies to certain goods imported into, or produced in, Ukraine. Excisable goods include alcoholic beverages, beer, tobacco and tobacco products, cars and car bodies and petrol and diesel fuel.
Rates of excise tax can be *ad valorem* (in percentage to value of goods), specific (in monetary units per unit of goods’ characteristic) and combined.

**Import duty**
Import duty is payable by the importer when goods are imported into Ukraine and applies in accordance with the customs tariff. Currently, there are two rates of duty: relieved and full rates. Relieved rates of duty apply to goods originating from World Trade Organization (WTO) countries and countries which have granted Ukraine “most favoured nation” trade status. Full rates of duty apply to goods originating from other countries.

**Branch income**

*Permanent establishment (PE)*
A foreign company may set up a representative office in Ukraine. This is similar to an unincorporated branch. A non-resident company operating via a representative office is deemed to carry out business in Ukraine through a PE and may be subject to 25% CIT unless protected by a DTT. When a foreign company conducts business in Ukraine through a PE, taxable income should be determined on the same basis as for domestic entities.

The Ukrainian definition of a PE is similar to the PE definition provided by majority of tax treaties.

In particular, a non-resident’s PE is defined as a fixed place of business through which the business activity of a non-resident entity is wholly or partly carried on in Ukraine.

Ukraine has no special tax rules for non-commercial representative offices established to engage in liaison-type activities. Such offices are treated as a PE, but an exemption from income tax may be available under a relevant tax treaty if the activities of the representative office are not sufficient to constitute a PE for the foreign entity.

**Income determination**

Ukrainian legislation defines taxable profits as adjusted gross income (term used to depict taxable income) less allowable gross expenses (term used to depict deductible expenses) and depreciation charges. Gross income includes any sales and non-sales income received or accrued within a reporting period (i.e., quarter). Gross income is deemed to be received either on the date the goods/services are shipped/rendered, or the date the payment is received from the customer, whichever happens first.

**Dividends**
Dividends received by Ukrainian companies from foreign companies controlled by these Ukrainian companies (except for those having “offshore status”) are exempt from corporate income tax. Dividends distributed by Ukrainian companies to the extent of dividends received from companies under their control are not subject to advance corporate income tax, which is usually paid when distributing dividends.

**Interest**
According to the tax law, which has not yet been adopted at the time of publishing, Ukrainian banks should recognise income from lending accrued from 1 January 2009, but not received as of 1 January 2010 on a cash basis. If, however, income from lending
accrued from 1 January 2009 through 1 January 2010 has already been included into the taxable income during 2009, cash basis should not apply.

**Inventory**

The book value of inventories should be revaluated at the end of each reporting period (i.e., quarterly). If the book value of stocks at the end of the reporting period is less than their book value at the beginning of the reporting period, the difference is included in the deductible expenses of the taxpayer in this reporting period. The excess book value of goods at the end of the reporting period over their value at the beginning is included in taxable income.

Inventories may be valued for tax purposes using any of the following methods:

- Identified value of the appropriate inventory unit;
- Weighted average value of uniform inventories;
- First-in, first-out (FIFO) value of inventories;
- Target expenses; and
- For inventories sold on a retail basis, the inventory sales price.

**Deductions**

**Deductions - in general**

Gross expenses include any expense actually incurred or accrued in respect of the taxpayer’s business excluding non-allowable expenses specified by law. Generally, gross expenses are recognised either at the date of payment to a supplier (contractor) or at the date when goods, works or services were received, whichever occurs first. However, expenses incurred on purchase from non-residents or resident tax-exempt entities and entities that pay tax at reduced rates are recognised upon actual receipt of goods/services.

Starting from 1 January 2009, banks are entitled to a tax deduction of all loss provisions (including interest, commissions and in respect of all securities). After 1 January 2011, there will be a deduction limit of 80% of such provisions. Other financial institutions are entitled to a deduction of up to 80% of all loss provisions.

The draft law attempts to limit the deduction mentioned above. If approved banks will be entitled to claim a doubtful debt provision of only up to 40% until 1 January 2011, 30% – from 1 January 2011 until 1 January 2012 and 20% – starting from 1 January 2012. Other financial institutions are supposed to claim a doubtful debt provision of only up to 15% and 10% of debt claims, respectively.

**Depreciation**

Fixed assets costing more than UAH 1,000 with a useful life exceeding one year are required to be depreciated. Depreciation is determined on a quarterly basis, and is generally computed using the reducing-balance method at the following rates (separately presented for new assets purchased after 1 January 2004, and before that date):

<table>
<thead>
<tr>
<th>Description of fixed assets</th>
<th>Depreciation rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Group 1 (buildings, constructions and premises)</td>
<td>2%</td>
</tr>
<tr>
<td>Group 2 (transport vehicles, furniture, office equipment, household equipment, optical electronic and electrical appliances)</td>
<td>10%</td>
</tr>
</tbody>
</table>
**Description of fixed assets**

<table>
<thead>
<tr>
<th>Description</th>
<th>Depreciation rate (%)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Group 3 (all other assets)</td>
<td>6%</td>
</tr>
<tr>
<td>Group 4* (computers, devices for automatic processing of information, software, devices for scanning and printing, other information systems, telephone sets including mobile, microphones and portable radio transmitters)</td>
<td>15% (purchased after 1 January 2003)</td>
</tr>
</tbody>
</table>

*Those assets purchased prior to 1 January 2003 belong to Group 2 assets and are depreciated at 6.25% rate.

Land value may not be depreciated unless the land plot is purchased together with a building (Group 1).

Intangible assets may be depreciated using the straight-line method over the asset’s useful economic life up to a maximum of 10 years.

Effective January 2010, generous depreciation rates (up to 50%) may be applied to environmentally friendly new fixed assets not used before.

**Main points of concern:**

- In the current turbulent economic environment, most companies are experiencing a significant drop in revenue, and for many, claiming maximum tax depreciation rates may no longer provide a tax benefit.
- In certain cases, the utilisation of maximum rates may only increase the amount of tax loss.
- Ukrainian tax legislation provides for the possibility to apply for any depreciation rates up to the maximum quarterly rates set out by the law.
- During the crisis years it may be beneficial to apply reduced depreciation rates or not to apply them at all – such an election must be submitted together with the tax return for the first quarter of 2009 (i.e., by 10 May 2010).

**Net operating losses**

It is proposed by the draft tax law, not adopted at the date of publishing of this summary, that only 20% of accumulated loss carryforwards can be claimed to shelter taxable income in 2010. The remaining amount of the losses may be further carried forward without limitations.

**Payments of interest**

Interest paid is generally deductible for corporate profits for tax purposes if incurred for business needs. However, limitation for deductibility of interest expense applies if the borrower’s capital for at least 50% belongs to non-residents and the interest is payable to non-residents (and related entities) that have holding on the borrower’s capital. The same rule applies if the borrower is owned by tax-exempt entities and pays interest to them.

**Exchange gains**

Realised and non-realised foreign exchange gains and losses generally are treated as taxable/deductible if such gains or losses relate to the following types of indebtedness denominated in foreign currency:

- Principal amounts of loans and deposits;
Ukraine

- Interest accrued on financial loans and deposits that is overdue at the end of a reporting period; and
- Book value of debt securities.

The draft tax law proposes that only realised foreign exchange gains and losses related to indebtedness, originated starting from 1 January 2010, can be treated as taxable/deductible. However, this law is not adopted as of May 2010.

**Non-deductible expenses**

Deductible expenses include any expenses in cash or in kind incurred during acquisition of goods and services for further use in the taxpayer's business. Examples of non-deductible items include:

- Expenses that are not supported by relevant documents (e.g., contract, voucher, receipt, cheque, etc.);
- Expenses in relation to the financing of management bodies, including holding companies;
- Service fees paid to related entities unless there is documentation to prove that fees are paid in relation to services actually performed;
- Payments in respect of goodwill;
- Expenses in respect of car parking, 50% of expenses in respect of purchase of fuel and lubricants for cars and operating lease of cars;
- Expenses relating to the provision of employees with uniform, safety clothes and shoes as well as food, if the amount exceeds the norms established by the Cabinet of Ministers of Ukraine;
- Expenses relating to receptions, presentations, entertainment, sampling and provisions of goods and services free within the scope of an advertising campaign, if the amount exceeds 2% of the company's taxable profits for the previous year;
- Expenses in respect of warranty services if the amount exceeds 10% of the total value of the goods sold that have valid warranty terms;
- Insurance expenses (except for medical, pension and mandatory insurance) in the amount exceeding 5% of the total amount of deductible expenses incurred in the reporting period; and
- Payments for goods or services to foreign entities in listed jurisdictions operating offshore tax regimes (37 tax haven jurisdictions are listed by the Ukraine's Cabinet of Ministers) are deductible within 85% of payments, unless evidence is held that the foreign entity is subject to the ordinary tax rules of the respective foreign jurisdiction (i.e., it does not benefit from the offshore tax regime).

**Group taxation**

In Ukraine, each company is taxed individually. However, companies that have domestic unincorporated branches may pay consolidated corporate profits tax.

**Tax incentives**

Ukraine currently has few incentives, although some are available. The following businesses are entitled to benefit from them:

- The publishing and agricultural industries;
- Investment funds;
Enterprises selling domestically produced energy-saving goods in Ukraine, enterprises adopting energy-saving projects (up to 50% of profits may be exempt);

Starting January 2010, a tax exemption is available for producers of electric and heat energy-generated from bioenergy fuel as well as for producers of bioenergy-powered domestic equipment. Tax incentives are also available for producers of gas (methane); and

Certain tax incentives are granted to the Union of European Football Associations (UEFA) and its companies during the hosting stage of 2012 UEFA European Football Championship in Ukraine and to specific segments of the tourism industry.

**Withholding taxes (WHT)**

WHT must be remitted to the authorities no later than the date when the payment is made to the income recipient.

Passive income (e.g., dividends, interest, royalties) from Ukrainian sources that is paid to non-resident entities is generally subject to 15% WHT.

Other payments, including engineering services, lease payments, agency and brokerage fees, are also subject to 15% WHT, but payments for most other services are not subject to withholding.

A 15% WHT applies to income on the sale of real estate and on profits from the sale of securities.

Payments for freight services (including sea freight) are subject to 6% WHT.

WHT rates may be reduced under a relevant tax treaty.

Payments to non-resident persons for advertising services performed in Ukraine are not subject to withholding. However, the resident payer is required to pay, from its own funds, a 20% tax based on the value of such services. As the taxes on advertising and insurance are levied on a resident party, they cannot be relieved using a tax treaty.

A resident payer is similarly required to pay, from its own funds, a 12% tax if a payment is made to a foreign insurer or reinsurer whose rating of financial reliability does not meet requirements set by the authorised state agency. A 0% rate applies otherwise.

Notes
1. The ownership threshold for the non-portfolio rate is 10%, 20%, 25% or 50%, depending on the specific provisions in the treaty.
2. Several treaties contain a rate of 0% on interest paid to or guaranteed by a government or one of its agencies.
3. If more than one rate is shown, this means that the rate will depend on the type of royalties paid.
4. The lower rate applies to interest on current or deposit bank accounts, certificates of deposit, contributions to a credit union, and participatory and fixed-yield mortgage certificates.
5. The lower rate applies to interest paid on certain credit sales, and on loans granted by a financial institution.
6. The treaties with Cyprus, Japan, Malaysia and Spain were entered into by the USSR before it dissolved. Ukraine will continue to honour these treaties, unless they are superseded.
7. The lower rate applies to interest paid in connection with the sale on credit of any industrial, commercial or scientific equipment, unless the indebtedness is between associated enterprises.
8. The 0% rate applies if the investor holds at least 50% of the capital of the company paying the dividends and the capital invested is at least USD 1,000,000; the payer of dividend should not operate in the field of gambling, show business or intermediation business, or auctions).
9. The 0% rate will apply if a French company or companies hold directly or indirectly at least 50% of the capital of the Ukrainian company, and the aggregate investments exceeds EUR 762,245.
10. The lower rate applies to interest paid on any loan granted by a bank.
11. The 0% rate applies if the investor holds directly at least 50% of the capital of the company paying the dividends, and the capital invested is at least USD 300,000.
Ukraine

12. The 10% rate applies if the company receiving the dividend has, for an uninterrupted period of two years before the dividend is paid, owned at least 25% of the capital stock of the company paying the dividends.
13. The 5% rate applies if the capital invested is at least USD 50,000.
14. The 0% rate applies if the Swedish company holds directly at least 25% of the voting power of the company paying the dividends, and at least 50% of the Swedish company is held by Swedish residents.
15. The 0% rate applies only if the royalties are taxable in the United Kingdom.

Tax administration

Returns
Tax returns must be filed by the taxpayer on a monthly (VAT) or a quarterly basis. Monthly tax returns are due within 20 calendar days following the end of the reporting month, and quarterly returns are due within 40 calendar days following the last day of the reporting quarter.

Payment of tax
Taxes payable assessed on the basis of tax returns are due within 10 calendar days following the deadline for filing of relevant tax returns.

Tax accounting
According to the draft tax law, which is not adopted at the date of publishing of this report, all large companies with prior-year revenues of UAH 100 million or more, as per statutory books, should submit statutory reports to the tax authorities (in addition to tax reports).

It is also proposed that starting from 2011 such companies should compute temporary and permanent book-to-tax differences.

Significant developments

The United Arab Emirates (UAE) forms part of the Middle East region and is also a member of the Gulf Cooperation Council (GCC).

There is a growing trend of tax reforms in the Middle East region and this may result in changes to the tax laws in the UAE.

In particular, the UAE (along with the other GCC states) has committed to introduce a value-added tax (VAT) system. The UAE government has made significant progress toward the introduction of a VAT. While no formal legislative announcement date has been made, the introduction may be as early as 2012. PricewaterhouseCoopers has been engaged since late 2006 as the advisor to assist in the VAT implementation.

Advice should therefore be sought to confirm the current status of the UAE tax laws and reforms.

Taxes on corporate income

The UAE comprises of a Federation of seven Emirates namely, Dubai, Abu Dhabi, Sharjah, Al Ain, Ras Al-Khaimah, Umm Al-Quwain and Ajman. Currently, the UAE federation does not impose a federal corporate income tax in the Emirates. However, most of the Emirates constituting the UAE federation introduced income tax decrees in the late 1960's and taxation is therefore determined on an Emirate by Emirate basis.

Under the Emirate based tax decrees, corporate income taxes may be imposed on all companies (including branches and permanent establishments) at rates of up to 55%. However, in practice the corporate income tax is currently imposed only on oil & gas companies and branches of foreign banks having operations in the Emirate.

In addition, some of the Emirates have introduced their own specific banking tax decrees which impose tax on branches of foreign banks at the rates of 20%.

Corporate residence

Tax residence under the tax decrees of the various Emirates is based upon the French concept of territoriality. Basically, the French territoriality concept taxes profits based on territorial nexus, rather than taxing profits earned outside the country.
United Arab Emirates

Other taxes

Municipal tax
Most Emirates impose a municipality tax on annual rental payments. It is the tenants’ obligation to pay the tax; however, the tenants’ employer will typically pay the tax on behalf of the employee.

The municipality tax rates are currently 5% of residential rent and 10% of commercial rent.

Customs duty
Generally, a customs duty of 5% is imposed on the cost, insurance, freight (CIF) value of imports. Other rates may apply to certain goods such as alcohol and tobacco, and certain exemptions may also be available.

Hotel tax
Most Emirates impose a tax of 5 to 10% hotel tax on the value of hotel services and entertainment.

Branch income
As each Emirate has a different corporate income tax decree, the decree of each Emirate must be consulted to determine the treatment of foreign corporations.

Income determination
The tax decrees of the various Emirates levy taxation on financial accounting profits. The tax decrees may provide for additional adjustments in situations.

Deductions
Deductions are determined based on accounting principles and the tax decrees.

Group taxation
The UAE does not currently permit group taxation.

Tax incentives
The UAE offers numerous incentives including offering a range of free trade zones (FTZ). Currently, there are over 30 FTZs (and business parks) in the UAE each having its own regulations. Businesses (and their employees) established in FTZs are generally eligible for guaranteed tax holidays for 10 to 50 year (renewable) periods. The FTZ also offers exemption from customs duties. The laws granting these “holidays” and exemptions are not consistent among the various FTZ, and each FTZ therefore needs to be considered separately.

Withholding taxes
There are currently no withholding taxes in the UAE.
**Tax treaty network**

Taxpayers resident in the UAE have access to an extensive tax treaty network. Treaties currently in force are listed below. A number of other treaties are at various stages of negotiation.

Notes

1. The dirham (AED) exchange rate is currently fixed at US$1 = AED3.673.
2. N/a – Not available

**Tax administration**

Most companies operating in the UAE (except oil and gas companies and branches of foreign banks), are currently not required to file corporate tax returns in the UAE.

**Other issues**

The UAE has introduced a wage protection system (WPS) which has implications for all UAE employers, who have employees registered with the Ministry of Labour. This was introduced in the Cabinet Decree No.133/1 of 2007 and entered into force as of 1 September 2009.

The newly-introduced WPS involves the payment of salaries through a transfer to selected banks, financial institutions and bureau de change approved and authorised by the Government and imposes significant compliance obligations on UAE employers as well as penalties for non-compliance.
Significant developments

Several notable changes to the United Kingdom (UK) corporate tax system have been made and proposed in the past year, as discussed below. In addition, at the date of writing (21 May 2010), we are waiting for the new coalition Government to announce its Budget on 22 June 2010. The Government has stated that it intends to unveil a five-year road map for major reform of corporation tax. We currently have only a sparse indication of what this might involve, but it has been indicated that the corporation tax package will include:

• Measures to tackle tax avoidance (one of the members of the coalition supported the introduction of a general anti-avoidance rule (GAAR) in the election campaign, so this may be among the measures);
• The simplification of reliefs and allowances;
• A reduction in the headline rate of tax (paid for by the two measures above);
• The imposition of a bank levy;
• Reform of the complex controlled foreign companies (CFC) regime in such a way as to encourage MNCs to come to the UK, rather than to leave (a process that is already underway, as discussed below); and
• A refocusing of research and development tax credits on hi-tech companies, small firms and start-ups.

Changes that have taken effect in the past year

Following consultation on the taxation of foreign profits, a package of complex and far reaching measures has been introduced which impacts UK inbound, outbound and purely domestic businesses. It comprises:

• A tax exemption for most UK and non-UK dividends and other distributions received on or after 1 July 2009;
• The introduction of a “debt cap” restricting UK tax deductions for finance costs to the level of a group’s external finance expense, which will apply to amounts payable in accounting periods beginning on or after 1 January 2010;
• The repeal of the Treasury Consent legislation (which required prior consent to be obtained for certain transactions involving foreign subsidiaries) and its replacement with a new biannual reporting requirement (rather than quarterly as originally proposed) for transactions undertaken on or after 1 July 2009; and
• The abolition of certain CFC exemptions for accounting periods starting on or after 1 July 2009, subject to transitional provisions (with a more radical overhaul of the regime in prospect that is currently the subject of further consultation, see below).
Various changes have arisen over recent years as a result of challenges brought by taxpayers on the grounds that specific measures were in breach of one or more freedoms provided by EU law. Notably, in the last 12 months:

- The European Court of Justice (ECJ) has ruled that the UK's 1.5% stamp duty reserve tax (SDRT) "season ticket" charge on issuing shares into an EU clearance service is in breach. HM Revenue & Customs (HMRC) has therefore said that it will cease to apply that part of the SDRT rules and a number of claims are expected to clawback previous charges. It is as yet uncertain whether the ECJ decision will extend to American Depository Receipts and bearer instruments which also suffer a similar 1.5% charge; and
- The ECJ is considering the current restrictions on the ability of a UK resident parent company to claim group relief for income losses of a non-UK subsidiary resident in the European Economic Area (EEA) or which has incurred the relevant losses in a permanent establishment within the EEA.

For accounting periods beginning on or after 21 July 2009, large companies are required to notify HMRC of the identity of their senior accounting officer. This individual annually must certify that the company’s accounting systems are adequate for the purposes of accurate tax reporting, and both the individual officer and the company will be subject to penalties if there is a careless or deliberate failure to meet these obligations.

A new temporary “bank payroll tax” (BPT) was introduced in relation to certain payments by banks and similar employers in the period 9 December 2009 to 5 April 2010, with anti-avoidance rules that might also catch payments that have been delayed to fall outside this period. Broadly speaking, it will arise in connection with bonus payments to banking employees, but there are complex rules governing what these terms mean for the purpose of the BPT. This levy is payable at a rate of 50% but it is not deductible when calculating the employer’s taxable profits.

Following a period of consultation, HMRC has published a Code of Practice on Taxation for Banks (Code) with the aim of encouraging banks to comply with the spirit as well as the letter of the tax law. Adopting the Code is voluntary, but HMRC will consider whether a bank has adopted the policy (and, if so, how it is implementing it) as part of the risk-assessment process it undertakes in order to decide upon the level of attention it needs to pay the banks tax affairs. The Code was published on 9 December 2009 and, whilst HMRC accept that banks may require time to consider the implications of the document, they consider that adoption and implementation should take place soon after.

With effect from 22 April 2009, “disguised interest rules” were introduced to tax the return arising on certain shareholdings as if they arose on debts. This generally will be the case where the return is economically equivalent to interest, although there are various exclusions including straightforward group shareholdings and CFCs and arrangements entered into prior to 22 April 2009.

**Changes enacted but not yet in force**
Changes tightening the Disclosure of Tax Avoidance Schemes (DOTAS) (or Tax Avoidance Disclosure (TAD)) regime have been enacted but are not yet in force. These are intended to become operative in the autumn of 2010.
A further increase of 0.5% on employer’s national insurance contributions (NICs) also has been enacted which will be applicable from 6 April 2011. This increase is in addition to the 0.5% increase previously announced from that date, making an aggregate increase of 1%.

Consultations and proposals
There are a number of consultations currently in progress, most significantly:

• Regarding a radical overhaul of the CFC regime, with legislation not anticipated before Finance Bill 2011;
• Reviewing the UK taxation of foreign branches, which it has been announced will be conducted alongside the reform of the CFC rules;
• On the possibility of introducing a generic or principles-based rule to neutralise any UK tax advantage that arises as a result of “group mismatches”, i.e., where intra-group transactions are treated differently for tax purposes in the individual group members concerned; and
• Considering the possibility of a reduced 10% rate of corporation tax on UK patent income from a date to be confirmed in the future – otherwise to be known as the UK ‘patent box’.

In addition, the Government have put taxpayers on notice that they are:

• Considering extending the DOTAS/TAD regime (which currently covers corporation tax, income tax, capital gains tax, stamp duty, stamp duty land tax and national insurance contributions, with a similar scheme in place for VAT) to cover inheritance tax; and
• Keeping under review whether to introduce an extension to the ‘unallowable purpose’ anti-avoidance rule for loan relationships and derivative contracts, along the lines of the measure they proposed as part of the package of measures arising from the taxation of foreign profits consultation but did not enact.

Taxes on corporate income

General corporation tax rates
The normal rate is 28% for the year ending 31 March 2011. This has been the rate since 1 April 2008, before which it was 30%, and applies to companies with profits in excess of GBP 1,500,000. For UK resident companies with tax-adjusted profits below GBP 300,000, a lower rate is generally applicable. This small companies’ rate is 21%, and has been since 1 April 2008. Despite previous announcements that this rate would rise to 22% from 1 April 2010, it was announced in the 2009 Pre-Budget Report that this rise is deferred until 1 April 2011. (Previously it was 19% for several years and then increased to 20% from 1 April 2007.) For companies with tax-adjusted profits between GBP 300,000 and GBP 1,500,000, there is a sliding scale of tax rates. For corporate entities with associated companies, both profit limits are divided by the number of active companies worldwide. A 0% tax band existed for a number of years for companies with tax-adjusted profits below GBP 10,000 but this was withdrawn with effect from 1 April 2006.

Special corporation tax regimes
There are no special rates for, for example, financial concerns or manufacturing groups; in general all companies in all sectors are subject to the same corporate tax rates. There are however two exceptions to this general rule.
United Kingdom

Profits which arise from oil or gas extraction, or oil or gas rights, in the UK and the UK Continental Shelf “ring-fence profits”, are subject to tax in the UK in accordance with rates applicable in 2006, i.e., a full rate of 30% and a small companies’ rate of 19%. It should be noted that with effect from 17 April 2002, a supplementary tax charge applies to “adjusted ring-fence” profits in addition to normal corporation tax. The supplementary tax rate of 10% applied from 17 April 2002 to 31 December 2005, and subsequent to this date an increased rate of 20% applies.

Life insurance businesses are also taxed under a special regime, which effectively includes different corporate tax rates as well as special rules for quantifying profits.

**Petroleum revenue tax (PRT)**
A tax of 50% is levied on profits accruing from oil and gas extracted in the UK and in the UK territorial sea and continental shelf in respect of fields given development consent before 16 March 1993. PRT has effectively been abolished, together with associated relief and allowances, for fields that received development consent after 15 March 1993. PRT paid is deductible in computing corporation tax on the company’s total profits.

**Income tax for companies**
A non-resident company is subject to UK corporation tax only on the trading profits of a UK permanent establishment (as discussed further in the Corporate Residence section below). Any other UK source income received by a non-resident company is subject to UK income tax at the basic rate, currently 20%, without any allowances (subject to any relief offered by a double tax treaty if applicable). This charge most commonly arises in relation to UK rental income earnt by a non-resident landlord (NRL). The UK therefore operates a NRL Scheme which requires the NRL’s letting agent or tenants to withhold the appropriate tax at source unless they have been notified that the NRL has applied and been given permission to receive rents gross.

**Local taxes**
There are no local or provincial taxes on income.

Local taxes (known as “rates”) are levied on the occupiers of business property by reference to the property’s deemed rental (or “rateable”) value, subject to certain reliefs. The amounts paid are deductible for corporation tax purposes, provided they meet all the usual requirements for deductibility.

**Corporate residence**

**Basic rules**
UK incorporated companies generally are treated as UK resident. However, companies resident in the United Kingdom under domestic law, but treated as solely resident in a different country under that country’s double taxation treaty with the UK, are no longer treated as UK resident for the purposes of UK domestic tax law.

Additionally, subject to the above exception, companies incorporated overseas are also treated as UK resident if their central management and control is situated in the UK, that is, the place of the highest form of control and direction over a company’s affairs, as opposed to decisions on the day-to-day running of the business.
Direct tax liability
Tax residence is important because resident companies are taxable in the UK on their worldwide profits, while non-resident companies are subject to UK corporation tax only on the trading profits attributable to a UK permanent establishment, plus UK income tax (generally by way of withholding, though this is not the case with UK source rental profits) on certain UK source income.

For non-resident companies, the liability to corporation tax depends on the existence of any kind of permanent establishment (PE) through which a trade is carried on. The meaning of PE for UK tax purposes is set out in statute; it largely is based on the OECD Model Tax Convention definition, but is not identical in all respects. Subject to the terms of the relevant double taxation agreement, a non-resident company will have a PE in the UK if it either:

- Has a fixed place of business in the UK through which the business of the company is wholly or partly carried on; or
- An agent acting on behalf of the company has and habitually exercises authority to do business on behalf of the company in the UK.

A fixed place of business includes (but is not limited to) a place of management, a branch, an office, a factory, a workshop, an installation or structure for the exploration of natural resources, a mine, oil or gas well, quarry or other place of extraction of natural resources or a building or construction or installation project. A company is not however regarded as having a UK PE if the activities for which the fixed place of business is maintained or which the agent carries on are only of a preparatory or auxiliary nature (also defined in the statute).

Rules exist to explain how the PE’s profits should be evaluated for UK tax purposes. Financing arrangements between the branch and head office must be disregarded. There are special rules for banks to stop under-performing loans being allocated to the UK branch in a way that is considered unacceptable and similar potential manipulations. However, a deduction is given for a proportion of head office costs.

Other taxes

Value-added tax (VAT)
The standard rate of 17.5% applies to most goods and services, apart from domestic fuel and power, and certain other reduced-rate supplies, which are subject to VAT at 5%.

Most exports, most food, most public transport, books and publications, and certain other essential goods and services are zero-rated. Some supplies are exempt, the main categories being the grant of certain interests in land, insurance, financial services, betting and gaming, education, certain sports services, cultural services and health and welfare. Zero-rating is preferable to exemption, because the VAT on costs incurred in making a zero-rated supply can be recovered, while that incurred in making an exempt supply cannot.

VAT is chargeable on the supply of most goods and services made in the UK by “taxable persons” in the course of business, when their taxable turnover exceeds the registration thresholds. Taxable persons include individuals, companies, partnerships, clubs, associations or charities.
United Kingdom

Taxable persons who are not normally resident in the UK, and do not have a business establishment in the UK and, in the case of companies, are not incorporated in the UK, but who make taxable supplies, sales to unregistered persons in the UK, or acquisitions of goods in the UK (above the relevant limits), may be required to register and account for VAT here.

If the value of taxable supplies is over a specified limit, registration for VAT is compulsory unless the taxable supplies made are wholly or mainly zero-rated, in which case it is possible to apply for exemption from registration.

The rules applying to VAT and territoriality are different to those applying to direct tax in that they derive from the principles of the place of supply in EU law, as enshrined in EC VAT Directives. Having determined that a supply of goods or services has taken place, the second condition to be determined, if the transaction is to fall within the scope of UK VAT, is whether the supply takes place within the UK. The place of supply rules are different for goods and for services. A person or business belonging outside the UK, with no place of business here may nevertheless be liable to UK VAT registration where the place of supply of those goods or services is in the UK.

From 1 January 2010, for services the basic rule is that services are treated as made where the customer “belongs” or is established for VAT purposes, and the customer is responsible for accounting for the VAT due via the reverse charge procedure. However, this is subject to a number of special rules and exceptions. Determining where a business is established for VAT purposes is based on EU law criteria. From 1 January 2010, for business to consumer (B2C) supplies, the basic rule is that services are treated as made where the supplier “belongs” or is established for VAT purposes. For goods the basic rule is that a supply of goods is taxable in the territory where those goods are physically located at the time of supply. Hence if goods are supplied in the UK by a non-established taxable person there will still be a liability for VAT purposes and the person must register for VAT in the UK if the taxable supplies exceed the current UK VAT registration thresholds.

**Customs and excise duties**

Many goods imported into the UK from outside the European Union are subject to customs duties. The rates of duty are provided by the EU’s Common Customs Tariff and vary widely.

Excise duties are chargeable on most hydrocarbon oil products, alcoholic drinks and tobacco products imported into or produced in the UK. Purely as examples, most road fuels carry a duty of about 58p per litre, cigarettes duty of about GBP 114 per thousand (plus 24% of the retail price), tobacco of about GBP 124 per kg, most wines of about GBP 2.25 per litre, and spirits of about GBP 24 per litre of pure alcohol included.

**Insurance premium tax (IPT)**

IPT at 5% applies to premiums for most general insurance, such as for buildings and contents and motor insurance, where the insured risk is in the UK. Life assurance and other long term insurance remain exempt, though there are anti-avoidance rules surrounding long term medical care policies. As an anti-avoidance measure, the rate increases to 17.5% for insurance sold by suppliers of specified goods or services, e.g., mechanical breakdown insurance, travel insurance (irrespective of supplier), insurance sold with TV and car hire, and ‘non-financial’ guaranteed asset protection (GAP) insurance sold through suppliers of motor vehicles or persons connected with
them. Further anti-avoidance rules were introduced with effect from 9 December 2009 affecting administration or similar fees connected with contracts of insurance, charged under separate contracts by brokers and other intermediaries.

**Airport passenger duty**
Individuals leaving the UK by air are obliged to pay a duty, which in practice is invariably included in the cost of the air ticket. For journeys after 1 November 2009, rates of duty are based on a system of geographical banding and class of travel, ranging from a reduced rate of GBP 11 for short haul destinations in the lowest class of travel, to GBP 110 for long haul destinations in higher classes of travel. These rates are due to increase to between GBP 12 and GBP 170 respectively from 1 November 2010.

**Environmental taxes**
There are several environmental taxes as below, that is, “landfill tax,” “climate change levy” and “aggregates levy”.

**Landfill tax**
This is a tax on waste disposal in landfill sites. The standard rate from 1 April 2010 is GBP 48 per tonne, increasing to GBP 56 per tonne from 1 April 2011. The reduced rate for inert waste is GBP 2.50 per tonne from 1 April 2008.

**Climate change levy**
This is a tax on energy used in the UK such as electricity, gas, coal and so on, and is charged at rates that depend on the nature of the fuel used. There are reduced rates and exclusions from the charge, for example, supplies to domestic or charitable users and to those who carry out specific energy-saving measures.

**Aggregates levy**
This tax is levied on the extraction or importation of sand, gravel and crushed rock for commercial exploitation in the UK. The rate of tax is GBP 2.00 per tonne from 1 April 2009, increasing to GBP 2.10 per tonne from 1 April 2011.

**Stamp taxes**
Stamp duty is charged at 0.5% on instruments effecting sales of shares. Agreements to sell shares usually attract stamp duty reserve tax (SDRT) at 0.5%. The liability to SDRT may be cancelled by paying the stamp duty due on a stock transfer form (or other transfer instrument) executed in pursuance of the agreement. Stamp duty is not usually charged on an issue of shares, but is charged at a higher rate of 1.5% on an issue of shares in bearer form. Issues or transfers of shares to clearance services or depositary receipt systems attract SDRT at 1.5%. (Stamp duty at 1.5% may be payable on instruments effecting transfers of shares to such services or systems.) However, following a recent ECJ ruling, the 1.5% SDRT charge is no longer collected where the clearance service or depositary receipt system is based within the EU.

Transfers of land and buildings are charged to stamp duty land tax (at graduated rates up to 4%). Grants of new leases are charged to stamp duty land tax at 1% of the net present value of the rents payable in excess of GBP 150,000 plus up to 4% on any premium paid.
United Kingdom

**Employers’ national insurance contributions**
Employers are obliged to pay national insurance contributions based on a percentage of each employee’s earnings. For the year ending 5 April 2010, the rate is 12.8% on all earnings above GBP 105, increasing to 13.3% from 6 April 2011. There is some reduction for employees “contracted out” of the state pension scheme into a private scheme.

**Local municipal taxes**
Local taxes are not based on income, but rather are levied on the occupiers of business property by reference to a deemed annual rental value for the property concerned. These taxes are administered by regional local government authorities rather than central government.

**Landline duty**
A new tax known as “landline duty” may be introduced on UK telephone landlines (“local loops”) with effect from 1 October 2010. The duty (if introduced) will be charged at rate of 50 pence (GBP 0.50) per month on each “local loop”. The new tax was dropped from the Finance Act 2010 because of the General Election on 6 May 2010; whether it is enacted or not will depend on the view of the incoming government.

The reason for the tax being introduced was said to be to help fund the roll-out of superfast “next generation” broadband.

**Bank bonuses tax**
A “one-off” levy was imposed on bonuses paid by banks and certain other financial concerns between 9 December, 2009 and 5 April 2010 (after which the higher rate of personal income tax rose to 50% from 40%). The levy was calculated at 50% of any excess of each bonus over a GBP 25,000 limit, was payable by the employer, and was not deductible in computing their UK profits. The levy raised far more tax than was anticipated so it is possible that a similar levy may be imposed again at some future date.

**Branch income**

**Basic rules for UK branches**
Tax rates on the profits of PEs are the same as for domestic corporations, except that the small profits rate is not available to non-UK resident corporations unless under the terms of a double taxation treaty.

There are specific rules setting out how the PE’s profits should be evaluated for UK tax purposes, which broadly seek to treat the business as if it were a stand alone company. Financing arrangements between the branch and head office must be disregarded and there are special rules for banks to stop under-performing loans being allocated to the UK branch in a way that is considered unacceptable and similar potential manipulations. However, a deduction is given for a proportion of head office costs.

No tax is withheld on transfers of profits to the head office.

**UK companies’ branches**
The UK taxes on a worldwide basis, so non-UK branch profits are computed and taxed in the normal way for UK tax resident companies. However, UK tax will generally
be reduced by credit for local direct taxes paid, either under a treaty or via the UK’s unilateral relief rules.

The Pre-Budget Report 2009 announcements included a commitment by HM Treasury to review the viability of a foreign branch exemption system in consultation with stakeholders. If a decision is made to take this forward, legislation would not be enacted before the CFC reform is completed (i.e., 2011) at the very earliest because of the interaction with those rules. It may also have to wait further, until after the consultation on the reform of chargeable gains for companies has also been completed.

**Taxable income determination**

**Income determination – overview**
A UK resident company is taxed on its worldwide total profits.

The UK tax system requires those total profits to be calculated by finding the aggregate of (a) the company’s net income from each source and (b) the company’s net chargeable gains arising from the sale of capital assets.

The main sources of income recognised by the legislation are (a) profits of a trade, (b) profits of a property business, (c) non-trading profits (or losses) from loan relationships, mainly interest receivable or payable, (d) non-trading gains (or losses) on intangible fixed assets, (e) non-exempt dividends or other company distributions. Determining income from the first four of these relies heavily on the company’s accounts; determining income from the last does not, nor does calculating chargeable gains or income from lesser sources such as royalties.

The rules for determining the gross income in each category differ in certain respects according to the source concerned and are different again when calculating gains. Likewise there are also subtle differences in the rules concerning the deductions that are permissible in respect of different sources of income and in respect of gains. Because of this continuing reliance on taxing companies on a “source by source” basis, the UK system is not well suited to being analysed in terms of income determination and deductions as two wholly separate topics.

**Basic rules for accounts-based sources**
A company’s trading profits are based on its worldwide profit before tax in its accounts. Adjustments are made for non-trading receipts (such as dividends from other companies and income from property) and non-deductible expenditure (such as capital expenditure or expenditure which is not incurred for the purposes of the trade). Depreciation for tax purposes (known as capital allowances) is calculated and substituted for the depreciation charged in the accounts. There are also a number of other statutory adjustments to be made; three important ones are that pension contributions and deferred pay are broadly deductible only when paid, that a deduction is available for the notional cost of certain share awards to employees, and that where acquired intangibles are not depreciated in the accounts a 4% flat-rate deduction can usually be claimed. There are, however, many others.

Similar principles apply in relation to the calculation of profits of a property business.

The profits from a company’s trading and non-trading loan relationships and related matters are based on the accounts. For this source of income, the distinction between
United Kingdom

“capital” and “revenue” receipts and deductions is not relevant. All credits and debits in the accounts are aggregated in order to find the net profit or deficit. Certain statutory adjustments have to be made – from January 2010 these include an interest capping limitation. Broadly the same regime applies to income and expenses relating to intangibles including goodwill. For a trader these are therefore specific areas where capital amounts can be taxed or allowed.

For traders any profit or loss on loan relationships, and/or on intangibles, are generally included within the trading profits; they become a single source of profits. For loan relationships and intangibles not connected with a trade, the company has a separate source of profits or a separate class of loss.

**Income losses**

Where a loss arises in respect of a particular source of income, there are detailed rules regarding the possible offset of the loss. Carryback and sideways reliefs are often allowed within limits; carryforward is generally allowed and carried forward losses do not time expire.

More specifically, dealing with the main sorts of income losses,

i. trading losses may be set off against any other source of profit (or gains) in the same year, or may be carried back one year against profits from the same trade only (three years on the cessation of the trade), or may be carried forward without time limit against profits of the same trade only;

ii. property losses may also be set off against any other source of profit (or gains) in the same year, or may be carried forward without time limit against profits of any sort; they cannot, however, be carried back; and

iii. non-trading deficits (i.e., financing losses) can again be set off against any other source of profit (or gains) in the same year, or may be carried back one year against non-trading credits (i.e., financing profits) or may be carried forward without time limit against non-trading profits.

Non-trading companies may deduct the (non-capital) management expenses incurred in managing its investments from its total profits. Any excess management expenses can be carried forward (without limit) to set against profits in future years.

While income losses can generally be offset against capital gains of the same accounting period, capital losses are never available for offset against any type of income.

**Inventory**

In general, the book and tax methods of inventory valuation will conform. In practice, inventories are normally valued for tax purposes at the lower of cost or net realisable value. A first-in, first-out (FIFO) basis of determining cost where items cannot be identified is acceptable, but not the base-stock or the last-in, last-out (LIFO) method.

**Unrealised exchange gains/losses**

Unrealised exchange gains and losses tend to arise on debts and derivatives. They are then taxed or allowed on an accounts basis in the same way as other debits and credits arising out of loan relationships. Where they arise on other payables or receivables to a trader or property investor, they will again generally be taxed or allowed on an accounts basis. For a trader the taxable or allowable amount will become simply part...
of the trading profit or loss; for other companies it will become a separate source of taxable profit (a “non-trading credit”) or loss (a “non-trading deficit”).

Where they arise on other capital assets they will not generally be taxable or allowable, although they may in effect become so where the asset is realised.

**Dividends received**

Dividends received from non-UK companies traditionally have been subject to corporation tax in the hands of the recipient company, with credit given for foreign tax paid under the double tax relief (DTR) rules. However, with effect from 1 July 2009, most foreign dividends received by UK companies will be exempt from corporation tax; one of several criteria has to be met, but these are widely drawn. DTR will continue to be available on a dividend by dividend basis for non-exempt foreign dividends (but has not been extended to non-exempt UK dividends), although certain aspects of the DTR regime have now been repealed.

Dividends received from other UK companies have normally been exempted from corporation tax. However, from 1 July 2009, the treatment of UK-UK dividends and overseas-UK dividends has been aligned. So UK source dividends could now become taxable, though the width of the exemptions makes this unlikely.

**Capital assets**

Gains on capital assets are taxed at the normal corporation tax rates. The chargeable gain (or allowable loss) arising on the disposal of a capital asset is calculated by deducting from gross proceeds the costs of acquisition and subsequent improvements, plus the incidental costs of sale and indexation allowance. Indexation allowance compensates for the increase in costs based on the percentage rise (if any) in the UK retail prices index to the date of disposal. Indexation allowance is however limited: it cannot create or increase a capital loss, it can only reduce or eliminate a chargeable gain. These calculations must be done in sterling, so any foreign exchange gains and losses will be taxed (or relieved) on disposal.

Special rules apply to assets held since 31 March 1982.

Most acquisitions and disposals between UK group companies are treated as made on a no gain no loss basis (i.e., at base cost plus indexation). Otherwise acquisitions from, or disposals to, affiliates are treated as made at fair market value, as are other acquisitions or disposals not at arm’s length.

Capital losses are allowed only as an offset to capital gains. An excess of capital losses over capital gains in a company’s accounting period may be carried forward without limitation but may not be carried back.

There is anti-avoidance legislation concerning the computation of chargeable gains, notably to stop losses being created or gains avoided where assets are depreciated by intra-group transactions, or where losses are ‘bought in’ from third parties.

Gains realised on certain types of assets can be deferred where all or most of the proceeds are reinvested in other assets of those types within a specified period (generally three years). The ‘rolled-over’ gain then crystallises as and when the latter assets are sold. At present the main asset categories qualifying for roll-over are land and buildings used for a trade.
From 1 April 2002, most disposals by trading groups of shareholdings of 10% or more are exempt from tax. The main exceptions will be those of non-trading subsidiaries or subgroups, or of companies acquired within the previous year. As noted previously, gains on goodwill and other intangibles acquired after March 2002 will be taxed as income, not as capital gains.

**Controlled foreign corporation (CFC)**
Under the CFC regime, a UK resident company may be taxed on a proportion of the undistributed profits of certain UK-controlled non-resident companies in which the resident company has an interest.

No liability arises where one of a number of tests (e.g., the “exempt activities” test) can be satisfied. Until 1 July 2009 one of the exemptions available (the Acceptable Distribution Policy or ADP) was where virtually all of the CFC’s profits were paid up to the UK by way of dividend. However that exemption was withdrawn when the rules regarding the taxation of dividends were changed, which resulted in most CFC dividends being exempt.

As a result of a ECJ decision that the EC Treaty allows intra-EU CFC charges only where the arrangements are “wholly artificial”, an additional exemption (not written into the statute) is available to those CFCs that are actually established in an EEA state and carry on genuine economic activity there.

The Government currently is consulting on a radical overhaul of the CFC regime. This process is expected to continue well into 2010 and possibly beyond, with legislation not anticipated before Finance Bill 2011.

**Double tax relief**
The UK has an extensive network of double taxation treaties. Unilateral relief is generally available in any event to credit overseas tax paid on non-UK source profits against the UK tax on the same profits, so that while the relevant treaty might extend that relief, their main function for UK companies is to limit overseas withholding taxes that would otherwise be payable on passive income.

The UK has a complex regime allowing “underlying” tax relief in respect of foreign dividends, so that tax suffered at lower levels can be relieved (at least in part) where dividends flow to the UK via a chain of companies; but the importance of this regime reduced sharply in 2009 as almost all foreign dividends became exempt from tax.

**Partnerships**
In broad terms, if companies participate in UK partnerships (whether general partnerships, limited partnerships or limited liability partnerships) they will be taxed on a flow through basis. This will in broad terms mean that UK corporate partners will be taxed on trading, property or financing income as it arises in the partnership accounts, and on non-exempt dividends on a receipts basis.

When considering overseas entities, the UK authorities will not be bound by how the entity is classified in its country of origin. Case law has determined a number of matters that should be considered when establishing whether a non-UK entity should be taxed in the UK as if it were a company or a partnership. HMRC also maintains a public list of non-UK entities and the decisions it has previously made regarding their classification. However, if the parties have flexibility regarding the constitution of such
entities then their classification may be viewed differently, either by HMRC or the courts. This area is complex and therefore specialist advice should be sought.

**General rules for deductions**

As noted in the income section above, the UK tax system requires taxable profits to be calculated by aggregating (a) the company's net income from each source and (b) the company's net chargeable gains arising from the sale of capital assets. This approach gives rise to a particularly complicated regime so far as deductions are concerned. Expenses are usually allocated to the source of income (or occasionally by reference to income generally) or to the particular gain to which they relate. The rules governing their deductibility differ according to whether the expense relates to a capital gain or to income, and indeed according to the particular source of income concerned. For example, there is a considerable difference in the manner in which tax relief is given for expenses incurred by companies trading in property as compared to those that invest in property. The regime also has a large number of specific regimes dealing with particular types of deductions which take priority over the more general rules for each type of income.

We have therefore set out the general rule for trading expenses, being the most common category and, following that analysis, considered some specific common exceptions.

**General rules for trading expenses**

A trading company is generally permitted to deduct expenses that are incurred wholly and exclusively for the purposes of the company's trade, provided those costs are not capital in nature and are charged to the profit and loss account. There is a significant amount of case law surrounding whether expenses have been incurred wholly and exclusively for the purposes of a company's trade or as expenses of managing a company's investment business, and whether they are capital or not.

Relief is generally given in the period they are accrued in the accounts, subject to some specific exceptions. In particular, contributions to a registered pension scheme are only allowed on a “paid” basis with some further provisions under which some contributions may be spread over a number of years; and bonuses and other staff costs are only allowed on a paid basis if paid out more than nine months after the end of the accounts in which they are accrued.

This general rule is made subject to a raft of specific statutory provisions, some of which allow deductions and others of which limit them; some of the more important of these are discussed below, but there are many others. There is, as one example, a bar to deducting the costs of business entertainment, except within strict limits.

**Management expenses**

Holding companies are permitted a deduction for expenses to the extent that they are expenses of managing the company's investment business and are not capital in nature. Such costs would typically include audit fees, directors' costs, rent, local rates, and office costs. These costs can be set against any sources of profit the company may have (such as financing income). For the top company of a listed group, such expenses can be substantial.
United Kingdom

If the company has inadequate income (given that most dividend income will not be taxable) the excess can be surrendered as group relief. Alternatively it can be carried forward to set against future income, with no time limit.

Many of the specific prohibitions on the deduction of trading expenses (though not all) are extended to create a similar bar on the deduction of such costs as management expenses for non-traders; conversely, many rules giving traders a specific deduction for certain costs are extended to allow non-traders similar relief. But this is not invariably the case. For example, traders cannot deduct costs not “wholly and exclusively” incurred for the purposes of the trade; there is no similar rule for management expenses. However, the two specific limitations on trading deductions referred to above (pension contributions and late-paid remuneration) are extended to management expenses.

**Employee share schemes**

A deduction is often available to an employing company for the deemed cost of providing shares to employees, on a formula basis rather than the accounts charge (if any); this depends on the nature of the share plan and of the shares provided. This regime will generally allow a deduction to a subsidiary company whose employees receive shares (or options over shares) in the parent company.

**Fines, penalties and bribes**

Any payments that would constitute a criminal offence (e.g., a bribe), or would do so if paid inside the UK, are expressly not deductible as trading expenses or management expenses. Likewise fines and penalties imposed for breaking the law are also not deductible, although a deduction is usually available for legal costs incurred in defending such an action. Civil penalties, interest and default surcharges (e.g., relating to certain VAT defaults) are also generally non-deductible, except for damages which are compensatory rather than punitive (e.g., damages for defamation payable by a newspaper company).

The rule that any amount paid by way of a penalty for breach of the criminal law derives largely from case law, and was explicitly said to be a policy rule. It is applied strictly; parking fines, and fines for breaches of regulations, or for e.g., price-fixing, are not deductible.

The rule does not however extend to compensatory payments which are not punitive. So settlements in relation to negligence which harms customers or patients, or for breach of contract, or with employees for wrongful dismissal, ought to remain deductible.

**Bad debts, provisions, and reserves**

A provision will be deductible for tax purposes if (or to the extent that) it:

- Is in respect of allowable revenue expenditure;
- Is made in accordance with acceptable accounting practice;
- Does not conflict with any statutory rule governing the timing of relief (e.g., in relation to payment of staff costs); and
- Is estimated with sufficient accuracy.

This rule extends to bad debts on trading account. Generally, however, bad debts are dealt with under the “loan relationships” rules for financing costs and financing.
income. The rules there, however, are broadly the same; if the bad debt can be identified specifically enough to allow a bad debt provision which satisfies UK accounting standards, it should be deductible.

**Local taxes**
There are no local taxes on income.

Local municipal taxes (business rates) may be deducted from taxable income. These rates are based on property values.

**Funding costs**
Funding costs (primarily fees and interest) are broadly deductible on an accounts basis, even if capital in nature, but subject to thin capitalisation constraints (with no explicit safe harbours) and, from 1 January 2010, an interest cap based on the group’s external debt levels. This extends to foreign exchange deductions relating to debts owed and receivable.

Traders will take the deductions in computing trading income (which is also accounts based). Deductions relating to loans not used for trading purposes will give rise to “non-trading deficits” which, if not group relieved, can be offset against profits of the year generally, or carried back one year (against that year’s funding profits), or carried forward indefinitely against non-trading profits.

**Intangible fixed assets**
A similar regime has applied to intangible assets, such as patent rights, know-how and trademarks, and including goodwill, since 2002. Royalties are generally deductible on an accounts basis, and except in relation to “grandfathered” assets owned by the group on 31 March 2002, the accounts amortisation is also deductible (with an option to take a flat 4% deduction on goodwill even if not amortised in the accounts). Traders will take the deductions in computing trading income; non-traders will create a “non-trading loss on intangible fixed assets” which can be relieved as a loss against any profits of the year, carried back one year, or carried forward indefinitely.

Other types of depreciation are seldom allowable, but instead the UK has a wide (though diminishing) range of “capital allowances” which are discussed separately below.

Income costs relating to research & development (R&D) would normally be deductible in any event, but there is a special incentive connected with R&D which generally allows an additional deduction or the payment of a tax credit – see *Tax Incentives* section.

**Depreciation/amortisation**
Depreciation of fixed assets (other than goodwill and other intangibles) is not allowable as a deduction from any source of income. However traders, and most non-traders, are instead allowed specified rates of deduction in respect of specified classes of assets, together referred to as “capital allowances”, which are deducted in calculating trading income for traders, and (broadly) against income derived from the use of the fixed assets for non-traders.

In the period of expenditure, capital allowances are available, generally at 20% (25% prior to 1 April 2008) of the cost of machinery and equipment acquired for use in a
trade or property rental business; thereafter, tax depreciation is taken generally at 20% per annum on the reducing balance basis. However, a temporary 40% first year allowance was available on certain qualifying expenditure incurred in the 12-month period beginning on 1 April 2009 which came to an end, as planned, on 31 March 2010. With some exceptions (notably cars, ships and machinery and equipment in offices and other non-industrial buildings), the rate of tax depreciation for machinery and equipment with an expected useful life when new of at least 25 years, and purchased after 25 November 1996, is reduced to 10% (6% prior to 1 April 2008). Since 1 April 2008, this 10% rate also applies to certain integral features in buildings and thermal insulation.

Small and medium businesses, as defined, may have been eligible for capital allowances at a faster rate for expenditure on plant and machinery prior to 1 April 2008. For subsequent periods, all businesses, regardless of size, can claim an annual investment allowance of 100% on the first GBP 50,000 of most qualifying expenditure, rising to GBP 100,000 for expenditure incurred on or after 1 April 2010. This is restricted to a single allowance for groups of companies or associated businesses.

Enhanced allowances, typically at a rate of 100%, are available for expenditure on certain energy saving plant and other specific categories. The products and technologies supported by this regime are reviewed annually and detailed changes will be made in the summer of 2010 to implement the latest review.

The rate of tax depreciation of most plant or machinery leased to non-residents is restricted, generally to 10% but in some cases to nil. However, HMRC now accept that in some circumstances these rules may be contrary to EU law and for leases finalised on or after 1 April 2006 where the lessee is resident in an EEA country which does not give the lessee relief broadly equivalent to the UK’s capital allowances, HMRC will accept that the lessor is entitled to allowances at the normal 20% rate; in addition the 0% rate will not be enforced in the case of other EEA lessees.

New industrial buildings and certain hotels qualify for tax depreciation at 1% per annum from 1 April 2010 (previously 4% prior to 1 April 2008, 3% in 2008/9 and 2% in 2009/10) (straight-line basis) on cost. This allowance is withdrawn and will reduce to 1% from 1 April 2010 and 0% after 1 April 2011. No tax depreciation is normally allowed on other commercial buildings, apart from certain machinery and equipment embodied in the fabric of the buildings.

Tax depreciation of machinery and equipment, and of industrial buildings, can be disclaimed in whole or in part, thereby deferring allowances.

Depreciation allowances may also be available in respect of the cost of the acquisition of mineral assets and other qualifying expenditures relating to mineral extraction, generally at the rates of 10% and 25% respectively on the reducing balance basis; and in respect of various other types of capital expenditure, including the cost of ships, construction of public roads, and dredging.

Excess depreciation allowances are generally recaptured on disposal. This was done on an asset by asset basis for industrial buildings, but ceased to arise on disposals of industrial buildings on or after 21 March 2007. The recapture is calculated on a “pool” basis for most machinery and equipment in which case there is no recapture unless the sale proceeds exceeds the total tax written down value of the pooled assets. The
rules concerning which pool an asset goes into can be complex; a large company will generally have several pools ranging from single asset pools to a single large pool for most of its plant and machinery.

Where assets are leased, capital allowances are generally available to the lessor rather than the lessee. However, this is an area of complexity, and in some situations (generally relating to finance leases), the allowances are only available to the lessee.

**Losses**

Income losses may be carried forward indefinitely, and, in general, set against any type of non-trading profits, but in contrast losses of a particular trade can be carried forward only against profits of the same trade. Unlimited loss carryback is available for trading losses against total profits of (normally) the previous 12 months (provided the same trade was being carried on in that period). In addition, there is now a limited ability to carryback losses generated in accounting periods ending in the period 24 November 2008 to 23 November 2010 up to three years. The amount that can be carried back to the preceding year remains unlimited but this extension now allows additional losses of up to GBP 50,000 for each 12 month accounting period to be carried back for offset against the profits arising in the earlier two years. There is a more limited facility to carryback certain non-trading losses, also normally for 12 months. Losses can also generally be surrendered to other group companies to set against their taxable profits for the same period.

Capital losses may also be carried forward indefinitely but may not be carried back. There is no ability to surrender capital losses to fellow group members but gains or losses arising on a particular asset can be allocated to another group member (by means of a joint election on an asset by asset basis) and therefore there is a limited ability for the capital losses of one company to be offset against the gains of a fellow group member in the same or subsequent period.

**Group taxation**

**The basic rule**

Each individual corporate group member is required to submit their own tax return on a stand-alone basis, with the exception of the election available with respect to VAT (discussed below). However, there are a variety of ways in which their relationship with fellow group members is recognised in the UK tax system for the purposes of corporation tax, VAT and stamp duty.

**Corporation tax**

The corporation tax system includes a number of measures that advantage UK members of qualifying groups, all of which are subject to anti-avoidance measures.

Operating profits and losses arising in the same period can usually be offset between UK resident 75% affiliates within a worldwide group. This extends to offsetting the UK profits attributed to a UK PE of a non-UK resident group member. There are some restrictions, primarily where one of the two companies is not an economic 75% subsidiary of the group, or is subject to arrangements under which it might leave the group.

Intra-group transfers of capital assets between UK companies, including UK PEs, are normally tax-free, though the definition of group for these purposes is slightly different
to the definition for group relief. This treatment is also extended to intra-group transfers of loan relationships, derivatives and intangibles. There is generally a “degrouping” charge if the transferee company leaves the group within six years.

There is no automatic offset of capital gains and losses where these arise in different group companies, but it is normally possible for offset to be arranged by the appropriate tax-free transfer of the asset being disposed of to the third party. Such a tax-free transfer can either be actually done (prior to the third party disposal) or notionally only (by election between the companies concerned).

With effect from 1 April 2006, a UK resident parent company has been able to claim group relief for income losses of a non-UK subsidiary which is resident in the EEA or which has incurred the relevant losses in a permanent establishment within the EEA, provided that all possibilities of non-UK relief for the losses have been exhausted and future relief is unavailable. The EC has referred the UK to the ECJ over this “all possibilities” test and the fact that it must be met immediately after the end of the accounting period in which the loss arises, together with the fact that this extension of loss relief only applies to losses incurred after 1 April 2006.

In addition, the corporation tax system has a number of measures that seek to prohibit groups unfairly manipulating the tax system by shifting profits between group members (either internationally or within the UK) in a way that is considered unacceptable.

Under the CFC regime, a UK resident company may be taxed on a proportion of the undistributed profits of certain UK-controlled non-resident companies in which the resident company has an interest. No liability arises where one of a number of tests (e.g., the “exempt activities” test) can be satisfied. The Government is currently consulting on a radical overhaul of the CFC regime.

There is a transfer pricing regime that applies to UK-to-UK transactions as well as cross-border transactions. UK taxpayers are required to self-assess their compliance with its arm’s-length principle and must therefore identify and make transfer pricing adjustments when submitting their tax returns. Thin capitalisation is addressed within this regime, with no explicit safe harbours. This regime is discussed in more detail in the transfer pricing section.

Where a UK company borrows from a connected party that is not subject to UK tax in respect of the corresponding interest receipt (and certain other limited circumstances), the UK tax deduction may move to a paid basis rather than the usual accruals basis. However this so-called “late paid interest” rule has been modified in order to make it comply with the UK’s obligations under the EC Treaty. It now only applies where the creditor is a company that is resident or effectively managed in a non-qualifying territory, broadly a tax haven. The revised rule applies to accounting periods beginning on or after 1 April, 2009, although a company may elect that it not have effect for the first accounting period (not ending after 31 March, 2011) to which it would otherwise apply.

A debt cap has been introduced, applicable to accounting periods beginning on or after 1 January 2010, which limits the cumulative UK tax deductions group members may claim for finance costs to the level of a group’s external finance expense.
**Indirect tax**

Group companies can, subject to certain requirements, elect to account for VAT as if they were one taxable person, and where this is done, no VAT is charged on intra-group supplies of goods or services. The registration is made in the name of the representative member, who is responsible for completing and rendering the single return on behalf of the group. All the companies are jointly and severally liable for any VAT debts. VAT grouping is subject to detailed anti-avoidance provisions.

**Stamp duty and stamp duty land tax**

Transfers of assets within worldwide 75% groups are generally exempt from stamp duty and stamp duty land tax. The relief can be retrospectively withdrawn in certain circumstances, primarily where the transferee leaves the group within three years of the transfer.

**Tax incentives**

A variety of tax incentives are given in the form of enhanced tax depreciation allowances (known as capital allowances, see Deductions – depreciation). Some of these incentives are given by reference to the expenditure concerned and others by reference to the size of the company incurring that expenditure.

For example, a full write-off can be claimed in the year of expenditure on a range of “green” products and technologies. The list of items supported in this way is reviewed annually. It currently consists of the following: designated energy saving equipment; designated environmentally beneficial plant and machinery incurred from 1 April 2003; cars with low emissions (although the qualifying conditions have recently been tightened); plant or machinery relating to gas stations for refuelling vehicles with natural gas or hydrogen fuel incurred between 17 April 2002 to 31 March 2013; and conversion or renovation of business premises in designated disadvantaged areas of the UK incurred from 11 April 2007.

For periods after 1 April 2008, all businesses, regardless of size, can claim an annual investment allowance of 100% on the first GBP 50,000 of most qualifying expenditure, rising to GBP 100,000 for expenditure incurred on or after 1 April 2010. This is restricted to a single allowance for groups of companies or associated businesses.

Since 2002 a deduction, currently equal to 130% (125% before 1 April 2008) of the qualifying expenditure on R&D can also be claimed by large companies. For small and medium companies, as defined, a deduction equal to 175% (150% before 1 August 2008) of the qualifying expenditure on R&D is given in the year in which it is incurred, which can be surrendered for a cash payment (at a rate of GBP 24.50 for each GBP 100 of qualifying R&D spend) by companies that are trading at a loss or have not yet started to trade.

From 2001 a deduction equal to 150% of the qualifying expenditure on the remediation of contaminated land was given in the year incurred, which can be surrendered for a cash payment (at a rate of GBP 16 for each GBP 100 of qualifying land remediation spend) by companies that are trading at a loss. This relief is extended to expenditure on the remediation of derelict land for expenditure incurred on or after 1 April 2009.

There are special tax reliefs available for certain expenditure on UK films.
United Kingdom

There are no tax holidays nor any foreign investment incentives.

**Withholding taxes (WHT)**

**Introduction**

The table below sets out the rates of WHT applicable to payments of dividends, interest and royalties under UK domestic law where such a liability arises and the reduced rates that may be available under an applicable double tax treaty.

Under UK domestic law, a company may have a duty to withhold tax (withholding tax or WHT) in relation to the payment of either interest or royalties (or other sums paid for the use of a patent). The circumstances in which such a liability arises are discussed below.

There is no requirement to deduct WHT from dividends. Therefore, dividends may always be paid gross, regardless of the terms of the applicable double tax treaty.

Please note however that this is not an exhaustive list of all the deductions that might be required to be made in respect of UK tax from payments made to or by companies. In particular, non-resident companies that are subject to UK income tax on UK source rental profits (see further comment in Taxes on corporate income section above) will find their letting agent or tenants are obliged to withhold the appropriate tax at source (currently 20% without any allowances) from their rental payments unless the recipient has first applied and been given permission to receive rents gross under the Non-Resident Landlord Scheme. Two other important examples are the UK’s deduction at source regime for entertainers and sportsmen, and the scheme under which payments to unregistered subcontractors working on big building projects may need to have tax deducted at source.

**Interest**

As a general rule, UK domestic law requires companies making payments of interest to WHT at 20%. However, there are a number of exceptions to this general rule. The key exclusions are:

Payments of interest by UK resident companies if the beneficial owner of the interest is also a UK resident company, or a UK PE provided the interest concerned will be taxed in the UK as part of the PE’s trading profits;

- Payments of interest on a quoted Eurobond;
- Payments of interest that qualify for exemption under the EU Interest and Royalties Directive;
- Payments of interest paid to or by a UK bank (or a UK branch of a foreign bank);
- Payments of ‘short’ interest. This is, broadly speaking, interest on loans that will not be in place for more than a year. However, the definition can be contentious, and detailed advice should be taken on this if intending to utilise this exemption; and
- Payments of interest that do not “arise” in the UK. Whether a payment constitutes UK source interest is a complex issue and specialist advice needs to be taken if seeking to use this exception.

If none of these exceptions apply, a payment of interest must be made after the deduction of WHT unless (or until) HMRC has given authorisation that the payment
made be made gross (or with a reduced rate of WHT) because of the applicability of treaty relief for the recipient.

**Royalties**

UK domestic law requires companies making payments of patent, copyright and design royalties that arise in the UK to deduct WHT at 20%. In addition, there is also the possibility that other royalties that arise in the UK may also be subject to the same rate of withholding tax if they constitute ‘qualifying annual payments’, so specialist advice will be needed to clarify this. However certain types of royalties, such as film royalties and equipment royalties will generally not be subject to UK WHT.

Unlike the rule regarding interest, a company may make a royalty payment gross of WHT (or subject to a reduced rate of WHT under a treaty) without prior clearance having been given by HMRC if they reasonably believe at the time the payment is made that the payee is entitled to relief under the treaty. However, if that belief is later found to be incorrect, HMRC may direct that the payment must be made gross and the payer may be subject to interest and penalties in respect of the WHT that should have been withheld (even if their belief was reasonable).

Notes

1. A tax credit is available to UK resident individual shareholders on dividends received, as described above. Some double taxation treaties allow a half or full tax credit (less, normally, a 5% to 15% notional withholding tax) also to non-resident individuals and usually to corporate portfolio investors. Treaties that allow a payable credit are indicated by an asterisk (*). However, since 6 April 1999 the credit has been reduced from one quarter to one ninth, which has the result that unless note 14 below applies, the tax credit indicated by the asterisk is now in effect useless, since it is wholly eliminated by the (usually 15%) withholding tax allowed by the treaty.

2. Withholding tax applies only to “annual interest” (i.e., excluding interest on certain short-term loans). Banks and similar financial institutions are also normally able to pay annual interest to non-UK residents free of withholding tax. In addition, most of the UK treaties provide for a nil rate of withholding on interest paid to governmental and quasi-governmental lenders. Such exemptions are not separately indicated in the table below.

3. Some types of royalties are not subject to UK withholding tax, including film royalties and equipment royalties. Treaty provisions specifically relating to these are therefore not mentioned here.

4. From 6 April 2001, payments to any UK resident company (not just banks, as before) can be made free of withholding tax if the recipient is chargeable to tax on the interest or
royalty. Discussions continue as to whether this provision will be extended to recipients who are exempt from UK tax on the interest or royalty.

5. Where a reduced rate of withholding is allowed by any treaty, whether on interest or royalties, it is usual for this reduced rate to be stated not to apply to amounts which are in excess of a normal commercial rate of interest/royalty, or where the interest/royalty is effectively connected to a PE in the United Kingdom of the recipient or where the debt/license was created primarily to obtain the advantage of the treaty; such general limitations are not specifically indicated in the table below.

6. Nil on certain loans.

7. Treaty rate not applicable to certain loans held by tax-exempt holders and resold within three months of acquisition.

8. Lower rates, primarily of 3% on use of news, 5% on copyright royalties other than films and TV, and 10% on certain intellectual property, will in practice apply in almost all cases.

9. No repayable tax credit for companies.

10. A 5% rate on literary/artistic copyright royalties.

11. A 7.5% rate on interest paid to banks and other financial institutions.

12. The UK announced that the old UK/USSR treaty ceased to apply to certain former Soviet Republics on 5 April 2002 (such that from that date there was no treaty in force with any of those countries), whilst it continued to apply to others until new treaties were concluded. Treaties have subsequently been signed with a number of these states such that the old UK/USSR treaty currently only continues to apply to Tajikistan, Turkmenistan and Belarus (the last of which concluded a new treaty with the UK in 1995 which is not yet in force). The only remaining states without a treaty in force with the UK post 5 April 2002 are Armenia and Kyrgyzstan. Moldova signed a new treaty with the UK on 8 November 2007 which took effect in the UK from 6 April 2009.

13. A rate of 5% applies to patent royalties and no relief is given for motion picture film royalties, as provided by the 1962 treaty with South Africa that was extended to Namibia by an Exchange of Notes.

14. Half tax credit payable by the UK Exchequer to non-resident companies possessing 10% or more of the voting power of the paying company, subject to a notional withholding tax (which in current circumstances makes the actual repayment very small).

15. Nil on literary/artistic or scientific copyright royalties, excluding payments in respect of cinematograph films and films or tapes for radio or TV broadcasting.

16. The UK’s treaty with the former Yugoslavia is regarded as still in force between the United Kingdom and Croatia, Montenegro, Serbia and Bosnia-Herzegovina. Macedonia signed a new treaty with the UK on 8 November 2006 which took effect for UK withholding tax purposes on 1 January 2008. A new treaty with Slovenia was signed on 13 November 2007 and came into effect in the UK in April 2009.

17. The independent states of the Czech Republic and the Slovak Republic have confirmed that they will honour the treaty between the UK and the former Czechoslovakia.

18. The 10% rate applies to royalties for use of industrial, commercial or scientific equipment or experience as well as royalties in respect of patent, trademarks and know-how. Nil on all other royalties.

19. A rate of 10% on certain bank loans.

20. A rate of 10% in certain cases.

21. A rate of 15% on film and TV royalties.

22. A rate of 7% on royalties for use of (or right to use) industrial, commercial, or scientific equipment.

23. A rate of 5% on royalties for use of industrial, commercial, or scientific equipment.

24. No relief is available if the payment concerned is made to a company controlling (directly or indirectly) more than 50% of the voting power of the paying company. In addition, no relief is available in respect of cinematograph film royalties or amounts paid in respect of the extraction of natural resources.

25. Nil on government and local authority loans. The rate is 5% where the beneficial owner is a bank or insurance company or the interest is derived from bonds and securities that are regularly and substantially traded on a recognised securities market. The rate is 10% where the beneficial owner is not a bank or insurance company but the interest is paid
by a bank or by the purchaser of machinery and equipment to a person who sold that
equipment on credit.
26. A rate of 7% on interest paid to banks.
27. A rate of 10% on interest on bonds issued to the public.
28. A rate of 15% on royalties on films, TV and radio broadcasting.
29. A rate of 10% on copyright royalties.
30. A rate of 10% on interest paid to banks and other financial institutions.
31. A rate of 5% on literary/artistic/scientific copyright royalties.
32. Full relief for copyright royalties.
33. Lower rate may be substituted to match any lower rate agreed in a treaty between
Uzbekistan and a third Organisation for Economic Co-operation and Development
(OECD) country.
34. A rate of 10% for royalties on industrial, commercial or scientific equipment.
35. Nil on certain government loans.
36. A rate of 2% for royalties on industrial, commercial or scientific equipment.
37. Nil on literary/artistic copyright royalties, patent royalties and royalties for use of industrial,
commercial or scientific know-how and computer software.
38. New treaty effective for UK income tax (and therefore withholding tax) from 6 April 2007
reduced withholding tax on both interest and royalties to the rates shown in table. Prior to
this the rate of withholding tax on interest and royalties was 15% in both cases (subject, in
the case of interest, to note 7).
39. A rate of 5% applies to loans from banks and insurance companies, interest paid on
securities quoted on a stock exchange and on some sales of machinery and equipment.
40. A rate of 5% on royalties for the use of a patent, etc. concerning industrial, commercial, or
scientific experience.
41. A rate of 10% can be withheld if the recipient of the royalties controls more than 50% of
the voting power of the payer.
42. A rate of 15% can be withheld on royalties in respect of cinematograph or television films.
43. A rate of 5% can be withheld on royalties in respect of cinematograph or television films.
44. A new treaty with Saudi Arabia was signed on 31 October 2007 and entered into force
from 1 January 2009. It will be effective in the UK from 1 April 2010 for corporation tax and
from 6 April 2010 for income tax and capital gains tax purposes, including withholding tax.
The withholding tax rates were not changed by the new treaty and therefore the figures
shown above are valid both before and after this date.
45. Full relief is available for literary, artistic or scientific copyright (excluding royalties on
cinematograph films and films or tapes for TV or radio broadcasting). No relief is available
for amounts paid in respect of the extraction or removal of natural resources.
46. A new treaty with Poland was signed on 20 July 2006 and entered into force on 27
December 2006. It took effect in respect of UK withholding taxes from 1 January 2007,
changing the rates to those shown in the table above. The rates were previously nil in
respect of interest and 10% in respect of royalties.
47. HMRC intends to progress negotiations on new treaties in the year ending 31 March
2010 with: Australia, Croatia, Ethiopia, Germany, Hungary, Israel, New Zealand, Spain
and Thailand.
48. Nil if recipient is: the State; an individual; a company whose shares are substantially and
regularly traded on a stock exchange; a company owned at least 75% by residents of
Qatar; a pension scheme; or a financial institution independent of the payer.
49. Relief may be restricted to 15% in certain circumstances.
50. A new treaty with France was signed on 19 June 2008 and entered into force on 18
December 2009. It will take effect with respect to UK withholding taxes from 6 April 2010
but the rates remain as shown in the table above.
51. New tax treaties/protocols with the following states have been signed but have not yet
entered into force: Netherlands (2008), Mexico (2009), Cayman Islands (2008), Belgium
(2009), Qatar (2009), Luxembourg (2009), Singapore (2009), Switzerland (2009), Malaysia
(2009), Austria (2009), Oman (2009), Montserrat (2009), Georgia (2010) and Bahrain (2010).
These agreements will enter into force once both countries have completed the required
Parliamentary procedures and exchange of diplomatic notes and will take effect on the
dates set out therein.
52. Treaty effective in the UK for WHT purposes from 6 April 2009.
53. Reduced treaty rate only applicable if one of various conditions is met by either the beneficial owner or payer of the interest. This is to ensure that the benefit of the interest article can only flow to residents of the other treaty state.
54. The first tax treaty between the UK and Libya entered into force on 8 March 2010 and has effect in the UK for WHT purposes from 6 April 2010.

**Tax administration**

**Direct tax**
Companies are assessed by reference to accounting periods. Normally, the accounting period is the period for which the company makes up its accounts. However, an accounting period for corporation tax purposes cannot exceed 12 months so companies preparing statutory accounts for longer than 12 months need to prepare more than one corporation tax return. Companies must file their statutory accounts and tax return within one year from the end of the accounting period; the return must include a self-assessment of the tax payable, eliminating the need for assessment by HMRC (though HMRC retains assessing powers for certain cases where it is not satisfied with the return, or where the company fails to make a return).

For smaller companies, corporation tax is payable nine months after the end of the accounting period to which it relates (so before the return must be filed). For larger companies and groups, a system of quarterly payments on account (based on estimated profits) is in place, with the first payment being due in the seventh month of the accounting period concerned. A company will generally be considered large for this purpose in any accounting period in which it has taxable profits in excess of GBP 1,500,000 (that limit being reduced by reference to the number of companies under common control, where relevant).

There is generally a period of one year after submission of the tax return for the tax authorities to start an enquiry into any aspect of the return. This period is extended for returns submitted after the filing deadline, that are amended by the taxpayer, or where an issue is subsequently discovered that was not sufficiently disclosed within the standard period. This enquiry window was shortened for many companies for returns relating to accounting periods ending after 31 March 2008, and now runs for 12 months from the date the return was filed, rather than 12 months from the filing date. However companies which are members of a group that is not small will continue to be subject to the old rule.

The UK tax system can impose numerous penalties for failing to adhere to the self-assessment system. These include penalties for late filing of returns, failing to maintain appropriate records, submitting an incorrect return, making errors in certain documents sent to HMRC, unreasonably failing to report errors in assessments by HMRC and failing to respond to a notice of enquiry from the tax authorities within the specified time limit.

Requirements to file online and pay electronically are expected to be phased in for corporation tax from 2011.

For accounting periods beginning on or after 21 July 2009 large companies are required to notify HMRC of the identity of their senior accounting officer, who must certify annually that the accounting systems are adequate for the purposes of accurate
United Kingdom

tax reporting. Penalties are chargeable on the officer and the company for careless or deliberate failure to meet these obligations.

**Indirect tax**
VAT returns must be completed at preset intervals (usually every three months). Larger companies may be required to file monthly returns, or make monthly payments on account. From 1 April 2010, companies with an annual turnover of GBP 100,000 or more, and all newly-registered businesses (whatever their turnover) will be required to submit their VAT returns online and pay electronically. Smaller enterprises can apply for annual returns. VAT returns are usually required to be filed 30 days after the end of the period.

Annual accounting is available for taxable persons with annual turnover (taxable supplies, excluding VAT) not exceeding GBP 1,350,000.

Cash accounting is available for taxable persons with annual turnover (taxable supplies, excluding VAT) not exceeding GBP 1,350,000.

In addition a Flat Rate Scheme operates for small businesses and is intended to simplify VAT accounting procedures.

**Other issues**

**Adoption of International Financial Reporting Standards (IFRS)**
IFRS became mandatory for the consolidated financial statements of UK listed companies with accounting periods beginning on or after 1 January 2005.

Companies continue to have the choice of adopting IFRS or remaining on UK GAAP at entity level for all entities. Many groups therefore continue to apply UK GAAP in their entity accounts.

The UK Accounting Standards Board (ASB) is proposing a new 3-tier system of reporting going forward. It is proposed that all publicly accountable UK registered companies will have to report under IFRS (as endorsed by the EU) in accounting periods beginning on or after 1 January 2012. In addition, UK registered SMEs (broadly entities that do not have public accountability and publish general purpose financial statements for external users) must apply “IFRS for SMEs” (a simplified IFRS) from the same date. Finally, the Financial Reporting Standard for Smaller Entities (FRSSE) will still be an option for small companies or small groups as defined by the Companies Act 2006. However the options available to a company are subject to the requirements of the UK Company Law framework for consistency of GAAP within a group.

In our experience, many large groups are considering early adoption of EU-endorsed IFRS. However, under current UK law early adoption of IFRS for SMEs or FRSSE is not possible.

**Transfer pricing**
The UK has widely drafted transfer pricing rules that are intended to apply to almost any kind of transaction made or imposed between related parties that gives rise to a provision that:
• Differs from one that would have been made between third parties; and
• Gives rise to a UK tax advantage (potential or actual) to one or more of the parties.

These rules apply to UK-to-UK transactions as well as cross-border transactions.

This regime therefore applies not only to the provision of products and services but also to finance arrangements, including both the rate of return charged and the amount of loan principle (or equivalent) made available. It is therefore the mechanism by which the UK’s revenue authorities address the issue of thin capitalisation. Unlike many other territories, the UK does not operate any “safe harbours” of any kind in relation to the amount of debt or interest (or equivalents) it considers demonstrate that a UK company or group is not thinly capitalised. (Note that the UK now also has a debt cap regime which limits the amount of finance expense for which a UK tax deduction will be available by reference to the worldwide group’s external finance expense, as discussed in the Significant developments section).

Parties are considered related for this purpose where either one controls the other, or both are under common control. Control here is not confined to situations in which one party is the majority shareholder in the other. Effectively, control exists where one party has the power to ensure that the affairs of another party are conducted in accordance with the first party’s wishes. The concept is also subject to two important extensions:

• The rules apply to many joint venture companies where two parties each have an interest of at least 40%; and
• There are attribution rules to trace control relationships through a number of levels in determining whether parties are controlled for the purposes of the transfer pricing rules.

In addition, the regime restricts interest deductions to an arm’s-length basis where a financier, and persons who collectively control a company or a partnership, have “acted together” in relation to the financing arrangements of that company or partnership. The financier (usually a bank) can then be taken as controlling the company or partnership, and the loan becomes subject to transfer pricing limitations.

There are a number of exemptions which essentially exclude SMEs and dormant companies from the regime.

The effect of the rules is to require an arm’s-length provision to be substituted for the actual one, thereby increasing the party’s UK tax liability and cancelling out the UK tax advantage that would otherwise have arisen.

Where both parties to the transaction are UK taxpayers, the disadvantaged party will generally be entitled to claim a compensating adjustment (except where the transaction falls within the transfer pricing regime because of the “acting together” provisions), but only after the UK adjustment has been made. The legislation also provides that parties may make balancing payments to each other in such circumstances, of any amount up to the transfer pricing adjustment, which will neither be taxable for the recipient nor tax deductible for the payer.

Where the disadvantaged party is outside the UK tax net they can pursue a claim for relief under the relevant double tax agreement, if that provides a mechanism for
such relief; where the adjustment in the UK is to reduce a deduction for an amount paid under deduction of UK tax, the compensating adjustment rules should allow the overseas party to reclaim any withholding tax paid on the disallowed amount.

UK taxpayers are required to self assess their compliance with this arm’s-length principle. Companies and partnerships must therefore identify and make transfer pricing adjustments when submitting their tax returns. This is the case even where the disadvantaged party would be entitled to claim a compensating adjustment equal to the transfer pricing adjustment. An important implication of this approach is the potential for interest and penalties if the adjustment made is subsequently held to be wrong.

**UK tax legislation**
Announcements of new legislation generally occur twice each year. The main announcement is made on Budget Day (generally in March) when tax rates are set for the coming year. The other announcement is made in the Pre-Budget Report (generally in the period October to December). The new legislation is then included in an annual Finance Act, which is normally finalised in July. Much of the legislation introduced in recent years has been due to challenges under the EC treaty, or as a result of the tax planning being notified under the UK’s tax avoidance disclosure regulations.

UK tax law is periodically consolidated. Until recently the latest consolidation Act dated from 1988, which covered both income tax and corporation tax. Over the last few years income tax and corporation tax legislation has been consolidated separately, and currently the latter is to be found in the Corporation Tax Acts 2009 and 2010, and the Taxation (International and Other Provisions) Act 2010.

Significant developments

On 30 March 2010, President Obama signed the Health Care and Education Reconciliation Act of 2010, which amended a law enacted on 23 March 2010 (the Patient Protection and Affordable Care Act), to provide comprehensive health care reform. The legislation contains major changes to laws governing health insurance practices, Medicare, Medicaid, and related tax provisions. The Joint Committee on Taxation (JCT) staff estimated that the tax provisions in the legislation will raise USD 437.8 billion over 10 years. Some of the important business tax provisions included in the healthcare reform are as follows:

- Under the legislation, a transaction is treated as having economic substance, which is a prerequisite to being respected for Federal income tax purposes, only if (1) the transaction changes in a meaningful way (apart from the Federal income tax benefits) the taxpayer’s economic position, and (2) the taxpayer has a substantial purpose (apart from Federal income tax benefits) for entering into the transaction. The legislation creates a new 20% penalty for underpayments of tax attributable to any disallowance of claimed tax benefits by reason of the transaction lacking economic substance. If the relevant facts affecting the tax treatment of the transaction are not adequately disclosed, the penalty increases to 40%.

- For fuels sold or used after 31 December 2009, the legislation modifies the cellulosic biofuel producer credit to exclude certain “black liquor” fuels produced as a byproduct of the paper manufacturing process.

- For tax years beginning after 31 December 2010, the legislation requires an employer to report on each employee’s annual Form W-2 the value of the employee’s health insurance coverage provided by the employer.

- For payments made after 31 December 2011, the legislation broadly expands current reporting rules to require a business to file an information return for all payments that total USD 600 or more in the aggregate during a calendar year to a single business (other than to a tax-exempt corporation).

- Beginning in 2013, the legislation eliminates the deductibility of a subsidy under the Medicare Part D programme for companies that sponsor drug coverage meeting certain standards for their Medicare-eligible retirees.

- Beginning in 2014, the legislation imposes new penalties on firms with 50 or more full-time employees that have employees enrolled in subsidised coverage in the new health insurance exchange created under the legislation.

- Beginning in 2018, the legislation imposes a 40% excise tax on “high-value” health plans.
Previously, on 18 March 2010, President Obama signed the Hiring Incentives to Restore Employment (HIRE) Act, which provides two tax benefits to employers that hire workers who previously were unemployed or working part time. Employers who hire unemployed workers after 3 February 2010 and before 1 January 2011 may qualify for a 6.2% payroll tax incentive, effectively exempting them from their share of Social Security taxes on wages paid to these workers. In addition, for each worker retained for at least a year, employers may claim an additional general business tax credit, up to USD 1,000 per worker, when they file their 2011 income tax returns.

Prior to that, on 6 November 2009, President Obama signed the Worker, Homeownership, and Business Assistance Act of 2009. This legislation included an extension and expansion of the homebuyer credit and an extension and expansion of the five-year carryback of net operating losses. These tax benefits were offset by a delay in the application of worldwide allocation of interest, an increase in the penalties for failure to file partnership and S corporation returns, and an acceleration of corporate estimated tax payments.

The US corporate income tax rate is based on a progressive rate schedule; however, an alternative minimum tax see the Other taxes section provides for a flat rate with fewer deductions. The 39% tax rate applies to taxable income between USD 100,000 and USD 335,000 to eliminate the benefit of the 15% and 25% rates, and the 38% tax rate applies to taxable income between USD 15,000,000 and USD 18,333,333 to eliminate the benefit of the 34% rate. Special rules apply to personal service corporations and personal holding companies.

### Corporate residence

A corporation organised or created in the United States under the law of the United States or of any state is a domestic corporation. A domestic corporation is a resident corporation even though it does no business or owns no property in the United States. Resident corporations are taxed based on worldwide income. Generally, a foreign corporation engaged in a US trade or business is taxed at regular US corporate tax rates on income from US sources that is effectively connected with that business and at 30% on US source income not effectively connected with that business.
Other taxes

In addition to the regular federal income tax, the following taxes may apply:

Top rate on net capital gains
On current transactions, the long-term capital gains tax rate is the same as the tax rates applicable to ordinary income. Thus, the maximum rate is 35%, excluding the additional phase out rates. However, differences may arise where the alternative minimum tax is imposed.

Federal alternative minimum tax
An alternative minimum tax (AMT) is imposed on corporations other than S corporations (see below) and small C corporations (generally those with no three year average annual gross receipts exceeding USD 7.5 million). The tax is 20% of alternative minimum taxable income (AMTI) in excess of a USD 40,000 exemption amount (subject to a phase out). AMTI is computed by adjusting the corporation’s regular taxable income by specified adjustments and “tax preference” items. Tax preference or adjustment items could arise, for example, if a corporation has substantial accelerated depreciation, percentage depletion, intangible drilling costs, or non-taxable income.

Accumulated earnings tax
Corporations (other than S corporations, domestic and foreign personal holding companies, corporations exempt from tax under Subchapter F of the Internal Revenue Code (the Code), and passive foreign investment companies) accumulating earnings and profits for the purpose of avoiding shareholder personal income tax are subject to a penalty tax in addition to any other tax that may be applicable. The accumulated earnings tax is equal to 15% of “accumulated taxable income.” Generally, accumulated taxable income is the excess of taxable income with certain adjustments, including a deduction for regular income taxes, over the dividends paid deduction and the accumulated earnings credit. Note that a corporation can justify the accumulation of income, and avoid tax, based on its reasonable business needs.

Personal holding company tax
US corporations and certain foreign corporations that receive substantial “passive income” and are “closely held” may be subject to personal holding company tax. The personal holding company tax is 15% of undistributed personal holding company income and is levied in addition to the regular tax.

S corporations
Corporations with 100 or fewer shareholders, none of whom may be corporations, that meet certain other requirements may elect to be taxed under Subchapter S of the Code and are thus known as S corporations. S corporations are taxed in a manner similar, but not identical, to partnerships. Thus, S corporations generally are not subject to US Federal income tax.

Payroll taxes
Employers are subject to federal unemployment insurance tax (FUTA) of 6.2% on the first USD 7,000 of wages paid to employees meeting certain criteria. In addition, states impose workers’ compensation insurance tax at varying rates depending on state law and the nature of employees’ activities. Employers also are subject to social security contributions tax of 7.65% (including 1.45% Medicare tax) on the first USD 106,800
United States

(for 2009 and 2010) of wages paid to employees and 1.45% of Medicare tax on any wages in excess of USD 106,800.

**State and municipal taxes**
Corporate income tax rates vary from state to state and generally range from 1% to 12% (although some states impose no income tax). The most common taxable base is federal taxable income, which is modified by state provisions and generally is allocated to a state on the basis of a three factor formula: tangible assets and rental expense, sales and other receipts, and payroll. Other taxes that states may impose, in lieu of or in addition to taxes based on income, include franchise taxes and taxes on the capital of a corporation. State and municipal taxes are deductible expenses for federal income tax purposes.

**Excise taxes**
The federal and state governments impose excise taxes on a variety of goods. For example, a federal and state excise tax is imposed on gasoline and diesel fuel used for transportation. The excise taxes are levied item by item and lack any uniformity in rates.

**Value-added tax (VAT)**
No provisions exist for a VAT at the federal level. However, state and local governments may impose sales taxes.

**Stamp tax**
No provisions exist for a stamp tax at the federal level. However, state and local governments frequently impose stamp taxes at the time of officially recording the transaction based upon the value of the real estate.

**Other**
Most states and some cities impose sales or use taxes and a variety of property taxes on both real and personal property. The sales tax on real estate may be a stamp tax on the documents recording the transfer of the real estate.

**Branch income**
Tax rates on branch profits are the same as on corporate profits. The law also imposes a 30% branch profits tax in addition to US corporate level income taxes on a foreign corporation’s US branch earnings and profits for the year that are effectively connected with a US business. The taxable base for the branch profits tax is increased (decreased) by any decrease (increase) in the US net equity of the branch. The branch profits tax on profits may be reduced or eliminated entirely if a relevant treaty so provides (subject to strict “treaty shopping” rules). The purpose of the branch profits tax is to treat US operations of foreign corporations in much the same manner as US corporations owned by foreign persons.

With certain exceptions, a 30% (or lower treaty rate) branch profits tax also will be imposed on interest payments by the US branch to foreign lenders. In addition, the tax will apply if the amount of interest deducted by the branch on its US tax return exceeds the amount of interest actually paid during the year.
**Income determination**

**List of common book/tax adjustments**

Tax and financial accounting typically have differing treatment for the following items:

- Research and development;
- Domestic manufacturing costs;
- Depreciation of fixed assets;
- Amortisation of intangibles;
- Meals and entertainment;
- Foreign taxes; and
- Fines/penalties.

**Inventory valuation**

Inventories generally are stated at the lower of cost or market on a first-in, first-out (FIFO) basis. Last-in, first-out (LIFO) may be elected for tax purposes on a cost basis only and generally requires book and tax conformity.

The tax law requires capitalisation for tax purposes of several costs allocable to the manufacturing process that frequently are expensed as current operating costs for financial reporting (e.g., the excess of tax depreciation over financial statement depreciation).

**Capital gains**

Gains or losses on the sale or exchange of capital assets held for more than 12 months are treated as long-term capital gains or losses. Gains or losses on the sale or exchange of capital assets held for 12 months or less are treated as short-term capital gains or losses. The excess of net long-term capital gain over net short-term capital loss is considered net capital gain. Capital losses are allowed only as an offset to capital gains. An excess of capital losses over capital gains in a taxable year may be carried back three years and carried forward five years to be used against (offset) capital gains.

For dispositions of personal property and certain non-residential real property used in a trade or business, net gains are first taxable as ordinary income to the extent of the depreciation/cost recovery, with any remainder generally treated as capital gain. For other trade or business real property, net gains generally are taxed as ordinary income to the extent that the depreciation or cost recovery claimed exceeds the straight-line amount, with any remainder treated as capital gain.

An exception to capital gain treatment exists to the extent that losses on business assets were recognised in prior years. A net loss from the sale of business assets is treated as an ordinary loss. Future gains, however, will be treated as ordinary income to the extent of such losses recognised in the five immediately preceding years.

**Inter-company dividends**

A US corporation generally may deduct 70% of dividends received from other US corporations. The dividends received deduction is increased from 70% to 80% if the recipient of the dividend distribution owns at least 20% but less than 80% of the distributing corporation. Generally, dividend payments between US corporations that are members of the same affiliated group (see the Group taxation section) are deferred or eliminated until a transaction with a third party occurs. With minor exceptions, a US corporation may not deduct dividends it receives from a foreign corporation.
Foreign income (Subpart F income) of US taxpayers
Generally, a US corporation is taxed on its worldwide income, including foreign branch income earned and foreign dividends when received. Double taxation is avoided by means of foreign tax credits. Alternatively, a deduction may be claimed for actual foreign taxes that are paid. In the case of foreign subsidiaries that are more than 50% owned by US shareholders (commonly known as controlled foreign corporations or CFCs), certain types of undistributed income will be taxed currently to the US shareholders (Subpart F income). Generally, Subpart F income includes income that is easily transferred to a low-tax jurisdiction.

Income from certain passive foreign investment companies (where 75% or more of the income is passive or at least 50% of the assets held produce passive income) also is subject to current taxation. Current taxation occurs if the corporation elects to be a qualified electing fund (QEF) or there are actual distributions. If a QEF election is not made and the corporation makes an actual distribution, the distribution will be treated as an excess distribution to the extent it exceeds 125% of the average of the distributions made with respect to the stock over the three immediately preceding years. The excess distribution is spread over the taxpayer’s holding period, and the amount allocated to each year in the holding period is subject to tax at the highest marginal tax rate in effect for that year. This deferred tax amount also is subject to an interest charge. The interest charge is designed to pay the benefit of the tax deferral that arises out of having an overseas investment that pays no US income taxes.

US income of foreign taxpayers
Generally, if a foreign entity engages in a US trade or business, all income from sources within the United States that is connected with conducting such trade or business is classified as Effectively Connected Income (ECI). There are also situations in which foreign source income could be ECI. ECI generally is subject to tax at the same rate as corporate profits. A 30% branch profits tax is levied in addition to the US corporate level income tax, which may be reduced or eliminated entirely if a relevant treaty so provides. Deductions are allowed against ECI.

Tax treaties between the United States and other countries may provide special rules for allocating taxing authority between the treaty partners. Tax treaties may provide that income earned by a foreign entity that would otherwise be considered ECI is only taxable in the United States to the extent the profits are attributable to a permanent establishment of the foreign entity in the United States. A permanent establishment is generally defined as a fixed place of business.

Foreign Investment & Real Property Tax Act (FIRPTA)
FIRPTA provides that the gain or loss of a foreign person from the disposition of a US real property interest should be taken into account as if the taxpayer were engaged in a US trade or business and such gain or loss were effectively connected with such business. In these situations, the party purchasing the US real property interest from the foreign party is required to withhold 10% of the amount realised.

Fixed, determinable, annual or periodical (FDAP) income
FDAP income includes all income except gains from the sale of real or personal property and income excluded from gross income, without regard to whether the owner of the income is a US or foreign entity. Some examples of FDAP income include dividends, interest, royalties, and commissions. The gross amount of FDAP income or
gains from US sources that are not effectively connected with a US trade or business are taxed at a rate of 30%. Deductions against FDAP income are not allowed.

Certain kinds of FDAP income are treated as ECI by reason of statutory requirements, allowable elections, or meeting the requirements under either the Asset-Use Test or Business Activities Test.

Stock dividends
A US corporation can distribute a tax-free dividend of common stock proportionately to all common stock shareholders. If the right to elect cash is given, all distributions to all shareholders are taxable as dividend income whether cash or stock is taken. There are exceptions to these rules, and extreme caution must be observed before making such distributions.

Partnership income
The income (loss) of a partnership passes through to its partners so that the partnership itself is not subject to tax. Thus, each partner generally accounts for their distributive share of the partnership's taxable income.

Corporate reorganisations
In general, a corporate reorganisation involving a merger, acquisition, or consolidation is a taxable event under the general recognition provisions of the Code. However, a corporate reorganisation that meets certain statutory and judicial requirements may qualify as a tax-free transaction, with gain or loss generally not recognised or deferred to a later date.

Transfer pricing
Transfer pricing regulations govern how related entities set internal prices for the transfers of goods, intangible assets, services, and loans in both domestic and international contexts. The regulations are designed to prevent tax avoidance among related entities and place a controlled party on par with an uncontrolled taxpayer by requiring an arm’s-length standard. The arm’s-length standard generally is met if the results of a controlled transaction are consistent with results that would have been realised if uncontrolled taxpayers had engaged in a similar transaction under similar circumstances. If a company is not in compliance with the arm’s-length standard, the Internal Revenue Service (IRS) may raise taxable income and tax payable in the United States. After a transfer pricing adjustment, a multinational company may face double tax, paying tax twice on the same income in two countries. Multinational companies may request competent authority relief from double taxation through a tax treaty.

In order to avoid potential transfer pricing penalties, one avenue available to companies may be to obtain an advance pricing agreement with the IRS, unilaterally, or with the IRS and another tax authority, bilaterally, covering inter-company pricing.

Other
Interest income, rents, and royalties generally are includible in the determination of gross income.
United States

**Deductions**

**Depreciation**

Depreciation deductions are allowances that may be taken for capital outlays for tangible property. For property placed in service after 1986, capital costs must be recovered by using the modified accelerated cost recovery system (MACRS) method. Depending on the type of tangible property, the general cost recovery periods are three, five, seven, 10, 15, 20, 27.5, and 39 years (31.5 years for property placed in service before 13 May 1993). The cost recovery methods and periods are the same for both new and used property. Most tangible personal property is in the three, five or seven year class. Property placed in the three, five, seven, or 10 year class is depreciated by first applying the 200% declining balance method and then switching to the straight-line method at such a time as when use of the straight-line method maximises the depreciation deduction. Property in the 15 or 20 year class is depreciated by using the 150% declining balance method and later switching to the straight-line method. An election may be made to use the Alternative Depreciation System (basically, the straight-line method over prescribed lives). Residential rental property generally is depreciated by the straight-line method over 27.5 years. Non-residential real property is depreciated by the straight-line method over 39 years (31.5 years for property placed in service before 13 May 1993).

An election to use the straight-line method over the regular recovery period or a longer recovery period also is available. Alternatively, taxpayers may elect to use the 150% declining balance method over the regular recovery period for all property other than real property. This method is required for alternative minimum tax purposes.

For most tangible personal and real property placed in service in the United States after 1980 but before 1 January 1987, capital costs were recovered by the Accelerated Cost Recovery System (ACRS), which applied accelerated methods of cost recovery over periods specified by statute. The general ACRS recovery periods were three, five, 10, 15, 18, and 19 years.

Special rules apply to automobiles and certain other “listed” property. Accelerated depreciation deductions can be claimed only if the automobile is used 50% or more for qualified business use as defined in related regulations. Further, for automobiles placed in service after 1986, the allowable yearly depreciation deduction cannot exceed specific dollar limitations.

Separate methods and periods of cost recovery are specified by statute for certain tangible personal and real property used outside the United States.

Rapid amortisation may be allowable for certain pollution control facilities.

Tax depreciation is not required to conform to book depreciation. Tax depreciation generally is subject to recapture on the sale or disposition of certain property, to the extent of gain, which is subject to tax as ordinary income.

**Section 179 deduction**

Corporations can elect to expense, up to a statutory amount per year, the cost of certain eligible property used in the active conduct of a trade or business. This is commonly referred to as a 179 deduction for the Internal Revenue Code (code or TRC) section that allows the deduction. The maximum annual expensing amount for tax
years that begin in 2008 and 2009 is USD 250,000. For tax years beginning in 2010, the maximum annual expensing amount is USD 134,000. For tax years beginning in 2011 and thereafter, the maximum amount is USD 25,000. The maximum deduction amount is reduced dollar for dollar where the corporation places in service during the tax year qualified tangible personal property in excess of USD 800,000 for tax years that begin in 2008 and 2009. For tax years beginning in 2010, the investment limitation is USD 530,000.

For tax years beginning in 2011 and thereafter, the investment limitation is reduced to USD 200,000. In addition, the deduction under this election is limited to the taxable income of the business. The annual expensing limit is increased by an additional USD 35,000 for qualifying assets placed in service in certain distressed communities. The annual expensing limit also is increased for certain property placed in service in the Gulf Opportunity Zone or Kansas disaster area.

**Bonus depreciation**
A 50% special first year depreciation allowance (i.e., bonus depreciation) applies (unless an election out is made) for new MACRS property with a recovery period of 20 years or less, certain computer software, water utility property, and certain leasehold improvements acquired after 31 December 2007 and before 1 January 2010. The special allowance applies for regular income tax and AMT purposes. No AMT adjustment is made if the special allowance is used. The property must be placed in service before 2010 (before 2011 for certain longer lived property). The special allowance does not apply to property that must be depreciated using the Alternative Depreciation System or to “listed property” not used predominantly for business. The special allowance reduces basis before regular depreciation is figured. Additionally, claiming bonus depreciation on automobiles may affect the first year depreciation limits on such automobiles (as mentioned above).

**Depletion**
For natural resource properties other than timber and certain oil and gas properties, depletion may be computed on a cost or a percentage basis.

Cost depletion is a method of depletion applied to exhaustible natural resources, including timber, which is based on the adjusted basis of the property. Each year, the adjusted basis of the property is reduced, but not below zero, by the amount of depletion calculated for that year. The current year cost depletion deduction is based on an estimate of the number of units that make up the deposit and the number of units extracted and sold during the year.

Percentage depletion is a method of depletion applied to most minerals and geothermal deposits, and, to a more limited extent, oil and gas. Percentage depletion is deductible at rates varying from 5% to 25% of gross income, depending on the mineral and certain other conditions. Percentage depletion may be deducted even after the total depletion deductions have exceeded the cost basis. However, percentage depletion is limited to 50% (100% for oil and gas properties) of taxable income from the property (computed without allowance for depletion). Generally, percentage depletion is not available for oil or gas wells. However, exceptions exist for natural gas from geopressurised brine and for independent producers of oil and gas.
Net operating losses

A net operating loss (NOL) is generated when business deductions exceed gross income in a particular tax year. Depending on current tax law, an NOL may be carried back to offset past taxes and possibly obtain a refund or carried forward to offset future tax liability. Generally, a loss may be carried back two years and, if not fully used, carried forward 20 years. For tax years beginning before 6 August 1997 a loss may be carried back three years and, if not fully used, carried forward 15 years. For state tax purposes, carryback and carryforward provisions are often similar to the federal provisions, except that several states do not permit any carrybacks or carryforwards.

Special rules surrounding NOLs may apply if a taxpayer is located in a qualified disaster area. Special rules also apply relating to specified liability losses.

Complex rules may limit the use of net operating losses after a reorganisation or other change in corporate ownership. Generally, if the ownership of more than 50% in value of the stock of the loss corporation changes, a limit is placed on the amount of future income that may be offset by losses carried forward.

With certain exceptions, taxpayers may elect to increase the carryback period for an applicable NOL to three, four, or five years from two years under the Worker, Homeownership, and Business Assistance Act of 2009, which was signed by President Obama on 6 November, 2009. Under this act, an applicable NOL is the taxpayer’s NOL for any tax year ending after 31 December 2007, and beginning before 1 January 2010. Generally, an election may be made for only one tax year, but an eligible small business that made or makes an election under the Code as in effect before 6 November 2009, may make an election for two tax years.

Under this special provision of the Worker, Homeownership, and Business Assistance Act of 2009, the amount of an NOL that may be carried back to the fifth tax year before the loss year may not exceed 50% of the taxable income for that fifth preceding tax year, determined without consideration of any NOL generated in the loss year or during any tax year after the loss year. An NOL otherwise carried to tax years following the fifth preceding tax year is adjusted to take into account that the NOL may offset only 50% of the taxable income for that fifth preceding tax year. Note that the 50% limitation does not apply to an applicable 2008 NOL of certain eligible small businesses that made an earlier election.

The Worker, Homeownership, and Business Assistance Act of 2009 also suspends the 90% limitation on the use of any alternative tax NOL deduction attributable to the carryback of an applicable NOL for which the extended carryback period is elected. Transition rules prescribe how a taxpayer may revoke certain elections to waive the carryback period.

US manufacturing deduction

Over the last several decades, various tax incentive systems have been enacted in the United States to encourage exports and later repealed, including the extraterritorial income (ETI) regime, which was repealed as a result of a World Trade Organisation ruling that the ETI regime favoured US goods and violated the national treatment provisions of the General Agreement on Tariffs and Trade. In response, the United States enacted the American Jobs Creation Act of 2004, which introduced a phase-out repeal of ETI, and introduced the domestic production activities deduction under section 199, seeking to compensate US manufacturers for the loss of ETI benefits.
Under section 199, taxpayers are allowed a 9% deduction for qualified production activities (QPA) income (subject to a taxable income limitation), phased in at 3% in 2005 and 2006; 6% in 2007 through 2009 and 9% in 2010 and thereafter. The deduction is available to all taxpayers actively engaged in QPA. For corporate taxpayers, the deduction generally will mean a federal income tax rate of 33.95%, 32.90% and 31.85%, respectively, for the years in question, on QPA income. Importantly, the deduction also applies in calculating the alternative minimum tax. There is a limit on the amount of the deduction equal to 50% of W-2 wages allocable to QPA (subject to a specific effective date), and the deduction is not allowed for taxpayers that incur a loss from their production activities or have an overall loss (including a carryover loss) from all activities.

A taxpayer’s QPA income is calculated using the following formula: domestic production gross receipts less the sum of cost of goods sold allocable to such receipts and other expenses, losses, or deduction which are properly allocable to such receipts.

Payments to foreign affiliates
A US corporation generally may claim a deduction for royalties, management service fees, and interest charges paid to foreign affiliates, to the extent the amounts are actually paid and are not in excess of what it would pay an unrelated entity, (i.e., are at arm’s length). In addition, US withholding on these payments may be required.

Debt-to-equity rules
Thin capitalisation rules may apply to disallow interest payments related to excess debt and recharacterise such payments as dividends. The interest expense deduction can be limited and suspended if more than 50% of the adjusted taxable income of a thinly-capitalised corporation (with similar rules for a corporate partner in a partnership) is sheltered by interest paid to a related party (or paid to a third-party but guaranteed by the related party) who is not subject to US tax on the income.

Employee benefit plans (pension plans and expenses)
Through the Code, the government provides incentives for employers to provide retirement benefits to workers, including employee benefit, qualifying profit-sharing, or stock bonus plans. Usually, the employer will be allowed a current deduction for any contributions made to the fund, and the employee’s tax liability will be deferred until the benefit is paid. For profit, non-government employers generally have two types of available plans, which generally are subject to the reporting and disclosure requirements set forth under the Employee Retirement Income Security Act of 1974 (ERISA).

The first category of employee benefit plans is the defined benefit plan, or more commonly known as a pension plan, to which an employer contributes money, on an ongoing basis, to cover the amount of retirement income owed to retired employees under the plan (which will vary based on years of service, average salary, and/or other factors). Any investment gains or losses will not affect the amount of benefits paid to participants but will affect the amount an employer needs to contribute in order to cover its obligation.

The second category of employee benefit plans is the defined contribution plan, or more commonly known in the United States as a “401(k) plan”, to which an employer’s contributions (if any) are allocated amongst the separate accounts of participating employees, who also may contribute to their respective accounts. Investment gains or
United States

losses and the history of contributions will affect the value of a participant’s account at retirement but would not affect an employer’s contributions since the employer is not obligated to ensure any specified level of benefit in the plan.

Non profits, including churches and government entities, have similar employee benefit plans, except different requirements apply. Small employers and self-employed individuals also have similar options available but are subject to different requirements.

**Bribes, kickbacks, illegal payments**
An amount paid, directly or indirectly, to any person that is a bribe, kickback, or other illegal payment is not deductible.

**Taxes**
*See, for example, State and municipal taxes under the section on Other taxes.*

**Other significant items**
- Deductions for allowable charitable contributions may not exceed 10% of taxable income computed without regard to certain deductions, including charitable contributions themselves. Deductions for contributions so limited may be carried over to the five succeeding years, subject to the 10% limitation annually, as noted above.
- Bad debt resulting from a trade or business may be deducted in the year the debt becomes worthless. Determining the date the debt becomes worthless may present difficulty.
- No deduction generally is allowed for a contingent liability until such liability is fixed and determinable.
- No deduction generally is allowed for fines or penalties paid to the government for violation of any law.
- The cost of goodwill and most other intangibles assets generally is capitalised and amortisable ratably over 15 years.
- Generally, start up expenditures must be amortised over a 15 year period; however, a certain taxpayer may elect to deduct some expenses in the tax year in which the trade or business begins.
- Costs incurred for entertainment must meet strict tests in order to be deductible. The deduction for business meal and entertainment expenses is 50% of the expenses incurred. There are also limitations on the deductibility of international and domestic business travel expenses.
- Royalty payments, circulation costs, mine exploration and development costs, and other miscellaneous costs of carrying on a business are deductible subject to certain conditions and limits.
- Depending on the taxpayer’s tax accounting method, research and experimental expenditures may be deducted as incurred or treated as deferred expenses and amortised over a period of not less than 60 months; however, in general, the method used must be consistently applied.

**Group taxation**
An affiliated group of US “includible” corporations, consisting of a parent and subsidiaries directly or indirectly 80% owned, generally may offset the profits of one affiliate against the losses of another affiliate within the group by electing to file a consolidated federal income tax return. A foreign incorporated subsidiary may not be consolidated into the US group, except for certain Mexican and Canadian incorporated
entities. A partnership may not be included in a consolidated return, even if it is 100% owned by members of an affiliated group, since a partnership is not a corporation. However, a member's earnings that flow through from a partnership are included as part of the consolidated group's taxable income or loss. Filing on a consolidated (combined) basis also is allowed (or may be required or prohibited) in certain states.

Sales, dividends, and other transactions between corporations that are members of the same group generally are deferred or eliminated until such time as a transaction occurs with a non-member of the group. Losses incurred on the sale of members of the group are disallowed under certain circumstances.

**Tax incentives**

**Inbound investment**

There generally are no specific incentives related to inbound investment at the federal level, other than certain portfolio debt and bank deposit exceptions. The portfolio debt exception enables non-residents and foreign corporations to invest in certain obligations (which must meet certain statutory requirements to qualify as “portfolio debt”) in the United States without being subject to US income (or withholding) tax on the interest income. Certain state and local benefits may also be available.

**General business credit**

Various business credits are available to provide special incentives for the achievement of certain economic objectives. In general, these credits are combined into one “general business credit” for purposes of determining each credit’s allowance limitation for the tax year. The general business credit that may be used for a tax year is limited to a tax based amount. In general, the current year’s credit that cannot be used in a given year because of the credit’s allowance limitation may be carried back to the tax year preceding the current year and carried forward to each of the 20 years following the current year.

In general, the current year business credit is a combination of the following credits: (1) the investment credit; (2) the work opportunity credit; (3) the alcohol fuels credit; (4) the research credit; (5) the low-income housing credit; (6) the enhanced oil recovery credit; (7) the disabled access credit for certain eligible small businesses; (8) the renewable electricity production credit; (9) the empowerment zone employment credit; (10) the Indian employment credit; (11) the employer social security credit; (12) the orphan drug credit; (13) the new markets tax credit; (14) the small employer pension plan startup cost credit for eligible employers; (15) the employer-provided child care credit; (16) the railroad track maintenance credit; (17) the biodiesel fuels credit; (18) the low sulfur diesel fuel production credit; (19) the marginal oil and gas well production credit; (20) the distilled spirits credit; (21) the advanced nuclear power facility production credit; (22) the nonconventional source production credit; (23) the new energy efficient home credit; (24) the energy efficient appliance credit; (25) a portion of the alternative motor vehicle credit; (26) a portion of the alternative fuel vehicle refueling property credit; (27) the Hurricane Katrina housing credit; (28) the Hurricane Katrina employee retention credit; (29) the Hurricane Rita employee retention credit; (30) the Hurricane Wilma employee retention credit; (31) the mine rescue team training credit; (32) the agricultural chemicals security credit for eligible businesses; (33) the differential wage payment credit; (34) the carbon dioxide sequestration credit; and (35) a portion of the new qualified plug-in electric drive motor vehicle credit for vehicles that will vary based on the date of purchase.
United States

*Employment credits*
A “work opportunity tax credit” is available for employment of certain types of workers who began work for an employer after 30 September 1996 and before 1 September 2011. “Creditable” wages generally are the first USD 6,000 of wages paid to each qualified employee for the year. The credit is 40% of creditable wages, for a maximum credit of USD 2,400.

*Research and development (R&D)*
A credit against the federal tax equal to 20% of the sum of qualified research expenses incurred prior to 31 December 2009 in excess of the base amount (as discussed below) and basic research payments (as discussed below) to a qualified organisation may be obtained for certain periods. The base amount cannot be less than 50% of the current year’s qualified research expenditures. In tax years ending after 8 August 2005, the research expense credit also includes 20% of the taxpayer’s expenditures on qualified energy research undertaken by an energy research consortium.

In addition, for taxable years ending after 2006 taxpayers may be able to use the new alternative simplified credit (ASC) that does not use a gross receipts factor. The ASC generally equals 12% (14% in 2009) of qualified research expenditures (QRE) for taxable years that exceed 50% of the average QRE for the three taxable years preceding the credit determination year. Special transition rules apply to fiscal year 2006-2007 taxpayers.

Those taxpayers that, despite significant R&D investments, are unable to claim the standard R&D credit because their current R&D intensity is lower than during the credit’s 1984–88 “fixed base” period may use an elective “alternative incremental research credit” (AIRC). Under the AIRC, a graduated rate system applies to the extent that the taxpayer’s current year qualified research expenses (QREs) exceed a specified percentage of its average gross receipts for the prior four years (the “base amount”). This election to be subject to the alternative incremental credit regime applies to the tax year for which it is made and all later years unless the IRS consents to its revocation.

The deduction for R&D expenditures must be reduced by the entire amount of the credit unless an election is made to reduce the amount of the credit.

*Puerto Rico*
Puerto Rico is the most populous and politically significant US possession. Puerto Rico corporations are considered foreign for US tax purposes. In general, Puerto Rico corporations are liable to the US for tax on income effectively connected to a US trade or business and on passive income from US sources and on US branch profits. Tax paid to the United States may be eligible for a foreign tax credit against Puerto Rico tax liability.

US corporations operating in Puerto Rico may take a credit against income from Puerto Rico sources. The credit applies to income from operating an active trade or business in Puerto Rico or from the sale of substantially all the assets of such a trade or business. For tax years beginning after 1995, this credit is subject to limitations and generally is available only to existing claimants. All claimants may also take the credit on possession source investment income received or accrued before 1 July 1996. The credit is repealed for tax years beginning after 2005.
**Other US possessions**
The American Samoa, Guam, the Commonwealth of the Northern Mariana Islands, and the US Virgin Islands have their own independent tax departments. Accordingly, they have their own rules in addition to special provisions in the US tax code.

**Qualified private activity bonds**
Interest income received on certain qualified private activity bonds generally is exempt from federal income tax. This enables a business enterprise to issue the bonds at a lower interest rate.

**Foreign tax credit**
Generally, in any year, a taxpayer can choose whether to take as a credit (subject to limitation) or as a deduction foreign income, war profits, and excess profit taxes paid or accrued during the taxable year to any foreign country or US possession. A foreign tax credit (FTC) reduces US income tax liability dollar for dollar, while a deduction reduces the US income tax liability at the marginal rate of the taxpayer. For taxpayers with net operating losses, the FTC is of no value in such year. However, a benefit might be received either in an earlier year (through a refund of previously paid taxes) or a later year (through a reduction of future taxes). It also should be noted that a taxpayer has an ability to switch from credit to deduction (or from deduction to credit) at any time in a 10-year period commencing when the foreign taxes were paid or accrued.

In addition, the FTC goes beyond direct taxes to include foreign taxes paid “in lieu of” a tax upon income, war profits, or excess profits, which would otherwise generally be imposed. It also includes deemed-paid (indirect) taxes paid for certain US corporate shareholders of non-portfolio foreign corporations when actual or deemed dividends are received. Furthermore, the FTC system has numerous limitations to mitigate the potential abuses of the credit by the taxpayer.

**Other incentives**
State and local governments provide numerous incentives to encourage business and, thus, employment in their jurisdictions.

**Withholding taxes (WHT)**
The US has entered into various income tax treaties with countries in order to avoid double taxation of the same income and to prevent tax evasion. The table below from IRS Publication 901 (April 2010) summarises the benefits resulting from these treaties.

Notes

* Please note the tax rates and associated footnotes appearing in the “Royalties” column in the table address three types of royalties, as denoted in the most recent IRS publication. These three are Industrial Royalties, Motion Picture and Television Copyright Royalties, and “Other” Copyright Royalties. The back slashes “/” between each figure and associated footnote(s) are meant to demarcate these three types of royalties, respectively.

a. No US tax is imposed on a dividend paid by a US corporation that received at least 80% of its gross income from an active foreign business for the three-year period before the dividend is declared.
b. The reduced rate applies to dividends paid by a subsidiary to a foreign parent corporation that has the required percentage of stock ownership. In some cases, the income of the subsidiary must meet certain requirements (e.g., a certain percentage of its total income must consist of income other than dividends and interest). For Italy, the reduced rate is 10% to 50% of the voting stock (for a 12-month period) of the company paying the dividends. For Japan, dividends received from a more than 50% owned corporate subsidiary are exempt if certain conditions are met.

c. The exemption or reduction in rate does not apply if the recipient has a permanent establishment in the United States and the property giving rise to the income is effectively connected with this permanent establishment. Under certain treaties, the exemption or reduction in rate also does not apply if the property producing the income is effectively connected with a fixed base in the United States from which the recipient performs independent personal services. Even with the treaty, if the income is not effectively connected with a trade or business in the United States by the recipient, the recipient will be considered as not having a permanent establishment in the United States under IRC section 894(b).

d. The exemption or reduction in rate does not apply if the recipient is engaged in a trade or business in the United States through a permanent establishment that is in the United States. However, if the income is not effectively connected with a trade or business in the United States by the recipient, the recipient will be considered as not having a permanent establishment in the United States to apply the reduced treaty rate to that item of income.

e. For Thailand, the rate is 5% for royalties on the use of any copyright of literary, artistic, or scientific work, including software. For Iceland the rate is 5% for trademarks and any information for rentals of industrial, commercial, or scientific equipment.

f. Interest determined with reference to the profits of the issuer or one of its associated enterprises is taxed at 15%.

g. Contingent interest that does not qualify as portfolio interest is treated as a dividend and is subject to the rates under columns 2 and 3, as appropriate.

h. The exemption applies only to interest on credits, loans, and other indebtedness connected with the financing of trade between the United States and the C.I.S. member. It does not include interest from the conduct of a general banking business.

i. The rate for royalties with respect to tangible personal property is 7% (5% in the case of Sri Lanka).

j. Tax imposed on 70% of gross royalties for rentals of industrial or scientific equipment.

k. The rate in column 2 applies to dividends paid by a regulated investment company (RIC) or a real estate investment trust (REIT). However, that rate applies to dividends paid by a REIT only if the beneficial owner of the dividends is an individual holding less than a 10% interest (25% in the case of Portugal, Spain, and Tunisia) in the REIT.

l. Royalties not taxed at the 5% or 8% rate are taxed at a 10% rate, unless footnote (c) applies.

m. The rate is 5% for interest (a) beneficially owned by a bank or other financial institution (including an insurance company) or (b) paid due to a sale on credit of any industrial, commercial, or scientific equipment, or of any merchandise to an enterprise.

n. The rate is 10% if the interest is paid on a loan granted by a bank or similar financial institution. For Thailand, the 10% rate also applies to interest from an arm’s-length sale on credit of equipment, merchandise, or services.

o. This is the rate for royalties for the use of, or the right to use, industrial, commercial, and scientific equipment. The rate for royalties for information concerning industrial, commercial and scientific know-how is subject to the rate in column 4 (“other royalties”).

p. The exemption does not apply to cinematographic items, or works on film, tape, or other means of reproduction for use in radio or television broadcasting.

q. Amounts paid to a pension fund or employee benefit organisation that are not derived from the carrying on of a business, directly or indirectly, by the fund or organisation are exempt.

r. The rate in column 2 applies to dividends paid by a regulated investment company (RIC). Dividends paid by a real estate investment trust (REIT) are subject to a 30% rate.

s. An election can be made to treat this interest income as if it were industrial and commercial profits taxable under article 8 of this treaty.
t. The rate is 4.9% for interest derived from (1) loans granted by banks and insurance companies and (2) bonds or securities that are regularly and substantially traded on a recognised securities market. The rate is 10% for interest not described in the preceding sentence and paid (i) by banks or (ii) by the buyer of machinery and equipment to the seller due to a sale on credit.

u. The rate is 15% (10% for Bulgaria; 30% for Germany and Switzerland) for contingent interest that does not qualify as portfolio interest.

v. The rate is 15% for interest determined with reference to (a) receipts, sales, income, profits, or other cash flow of the debtor or a related person, (b) any change in the value of any property of the debtor or a related person, or (c) any dividend, partnership distribution, or similar payment made by the debtor to a related person.

w. Interest received by a financial institution is tax exempt. For Venezuela, the rate is 4.95% if the interest is beneficially owned by a financial institution (including an insurance company).

x. The rate in column 2 applies to dividends paid by a regulated investment company (RIC) or real estate investment trust (REIT). However, that rate applies to dividends paid by a REIT only if the beneficial owner of the dividends is (a) an individual holding not more than a 10% interest in the REIT, (b) a person holding not more than 5% of any class of the REIT’s stock and the dividends are paid on stock that is publicly traded, or (c) a person holding not more than a 10% interest in the REIT and the REIT is diversified.

y. Interest paid or accrued on the sale of goods, merchandise, or services between enterprises is exempt. Interest paid or accrued on the sale on credit of industrial, commercial, or scientific equipment is exempt.

z. Dividends received from an 80%-owned corporate subsidiary are exempt if certain conditions are met.

aa. Royalties for the use of, or right to use, a copyright of literary, artistic, or scientific work (excluding royalties for software, motion pictures, films, tapes, or other means of reproduction used for radio or television broadcasting) are exempt.

bb. Exemption or reduced rate does not apply to amount paid under, or as part of, a conduit arrangement.

cc. Interest is exempt if (a) paid to certain financial institutions, or (b) paid on indebtedness from the sale on credit of equipment or merchandise.

dd. Amounts paid to a pension fund that are not derived from the carrying on of a business, directly or indirectly, by the fund are exempt. This includes amounts paid by a REIT only if the conditions in footnote ee are met. For Sweden, to be entitled to the exemption, the pension fund must not sell or make a contract to sell the holding from which the dividend is derived within two months of the date the pension fund acquired the holding.

ee. The rate in column 2 applies to dividends paid by a regulated investment company (RIC) or real estate investment trust (REIT). However, that rate applies to dividends paid by a REIT only if the beneficial owner of the dividends is (a) an individual holding not more than a 10% interest in the REIT, (b) a person holding not more than 5% of any class of the REIT’s stock and the dividends are paid on stock that is publicly traded, or (c) a person holding not more than a 10% interest in the REIT and the REIT is diversified. Dividends paid to a pension fund from a RIC, or a REIT that meets the above conditions, are exempt. For Sweden, the pension fund must also satisfy the requirements in footnote dd.

ff. If the payments were for the use of, or the right to use, industrial, commercial, or scientific equipment, an election may be made to compute the tax on a net basis as if such income were attributable to a permanent establishment or fixed base in the US.

gg. The exemption does not apply if the recipient of the gain is an individual who is present in the United States for more than 119 days during the year.

hh. The rate applies to dividends paid by a real estate investment trust (REIT) only if the beneficial owner of the dividends is (a) an individual holding less than a 10% interest in the REIT, (b) a person holding not more than 5% of any class of the REIT’s stock and the dividends are paid on stock that is publicly traded, or (c) a person holding not more than a 10% interest in the REIT and the REIT is diversified.

**Tax administration**

**Returns**
The US tax system is based on the principle of self assessment. A corporate taxpayer is required to file an annual tax return (generally Form 1120) by the fifteenth day of the third month following the close of its tax year. A taxpayer can obtain an additional six month extension of time to file its tax return. Failure to timely file may result in penalties.

</tbody>
</table>

**Payment of tax**
A taxpayer’s tax liability generally is required to be prepaid throughout the year in four equal estimated payments and fully paid by the date the tax return is initially due. For calendar year corporations, the tax instalment payments are due by the fifteenth day of April, June, and September, and the tax liability must be fully paid by the fifteenth day of December. For fiscal year corporations, the tax instalment payments are due by the fifteenth day of the fourth, sixth, and ninth months, and the tax must be fully paid by the fifteenth day of the twelfth month of the tax year. Generally, no extensions to pay are allowed. Failure to pay the tax by the due dates as indicated above can result in estimated tax and late payment penalties and interest charges.

The instalment payments must include estimates of regular corporate income tax, alternative minimum tax, environmental tax, and, for foreign corporations, the tax
on gross transportation income. To avoid a penalty, corporations must calculate the instalment payments based on at least 25% of the lesser of (i) the tax shown on the current tax return or (ii) the prior year’s tax liability, provided that the tax liability was a positive amount in the prior year and that such year consisted of 12 months. However, corporations with taxable income of at least USD 1 million (before use of NOLs or capital loss carryforwards) in any of the three preceding years are not permitted to calculate the instalment based payment on the prior year’s tax liability, except in determining the first instalment payment. Instead, such corporations must calculate the instalment payments based on the tax shown on the current tax return.

Corporations with more than USD 1 billion in assets will be required to make estimated tax payments that are 100.25% of the amount otherwise due in July, August, or September of 2014. Such overpayments will be balanced out in October, November, or December of 2014 when payments of 99.75% of the amount otherwise due will be paid by corporations with more than USD 1 billion in assets.

**Audit cycle**
Generally, the US tax system is based on self-assessment; however, many large and midsize businesses are under continuous audit by the IRS and state tax authorities. The audits may include the entire list of taxes for which the business is liable. Smaller business and persons with lower incomes are generally subject to audit on a random basis.

Currently, the IRS is focused on abusive payments related to contribution to capital of a corporation, domestic manufacturing deduction, foreign earnings repatriation, foreign tax credit generators, repairs vs. capitalisation change in accounting method, research credit claims, transfer of intangibles/offshore cost sharing, withholding taxes, and employee classification.

**Statute of limitations**
The IRS generally has three years after an original return is filed to assess income taxes. A return will be deemed to have been filed on its due date, even if the return is actually filed on an earlier date.

**Tax shelter**
Treasury regulations require taxpayers to disclose transactions determined to be abusive or possibly abusive. Current information on these transactions, known as listed and reportable transactions, is available from the IRS website (www.irs.gov).

**Tax accounting and internal controls**
ASC 740, Income Taxes (formerly known as FASB Statement No. 109, Accounting for Income Taxes) addresses how companies should account for and report the effects of taxes based on income. ASC 740’s principles and requirements apply to domestic and foreign entities in preparing financial statements in accordance with US generally accepted accounting principles (GAAP), including not-for-profit entities with activities that are subject to income taxes. This scope includes: 1) domestic federal (national) income taxes (US federal income taxes for US enterprises) and foreign, state, and local (including franchise) taxes based on income; and 2) an enterprise’s domestic and foreign operations that are consolidated, combined, or accounted for by the equity method.
In recent years, controls around the accounting for income taxes have been a critical source of material weaknesses in companies’ internal controls over financial reporting. Accounting for income taxes also has been a primary reason for restating financial statements. Management should ensure that its judgments and estimates are reasonable (e.g., assessing the need for a valuation allowance on deferred taxes) and that the underlying internal control processes are reliable.

The adoption of International Financial Reporting Standards (IFRS) in the United States is set by the Securities and Exchange Commission (SEC). The timeline included in the SEC’s roadmap provides for adoption of IFRS in the United States between 2014 and 2016. The SEC has stated that it will reassess the transition to IFRS in 2011.

**Accounting for income taxes**

For US federal tax purposes, the two most important characteristics of a tax method of accounting are (1) timing and (2) consistency. If the method does not affect the timing for including items of income or claiming deductions, it is not an accounting method and generally IRS approval is not needed to change it. In order to affect timing, the accounting method must determine the year in which an income or expense item is to be reported.

In general, to establish an accounting method, the method must be consistently applied. Once an accounting method has been adopted for federal tax purposes, any change must be requested by the taxpayer and approved by the IRS. Changes in accounting methods cannot be made through amending returns. The two most common methods of accounting are the accrual basis and cash basis methods.

**Penalties**

Civil and criminal penalties may be imposed for failing to follow the IRC when paying US taxes. The civil penalty provisions may be divided into four categories: delinquency penalties, accuracy-related penalties, information reporting penalties, and preparer, promoter, and protester penalties. Many, but not all, have exception provisions to cover reasonable cause. In addition many have provisions directing how the penalties interact with the other penalties.

These four main civil penalty categories may further be divided. First the delinquency penalties may be divided into failure to file, failure to pay, and failure to make timely deposits of tax. Failure to make timely deposits of tax applies to taxpayers required to make instalment payments and withholding tax payments.

Second, the penalties relating to the accuracy of tax returns are divided into the negligence penalty, the substantial understatement penalty, substantial overstatement of pension liabilities, substantial estate or gift tax valuation underestimate, and the valuation penalties. These penalties are also coordinated with the fraud penalty to eliminate any stacking of the penalties. Again, like other provisions, the fraud penalty is not intended to be imposed as a stacked penalty.

The third category of penalties is the information reporting penalties. These penalties may be imposed upon those who only have a duty to report information to the IRS.

The fourth and final major category of civil penalties are the preparer, promoter, and protester penalties. Currently the most notable of these is the return preparer penalty for which there is a penalty for a position on a return for which the preparer did not
have substantial authority. Also included in this provision is a penalty for wilful or reckless attempt to understate the tax liability of another person. Additionally, return preparer penalties may be imposed for failure to furnish a copy of a return or claim for refund to the taxpayer, sign the return or claim for refund, furnish his or her identifying number, or file a correct information return.

Other promoter and protestor penalties include a penalty for promoting abusive tax shelters, aiding and abetting the understatement of tax liability, and filing frivolous income tax returns. Additionally, a court may award sanctions and costs if a person institutes or maintains a proceeding primarily for delay, takes a position that is frivolous, or unreasonably fails to pursue available administrative remedies.

In addition to these major civil penalties, international tax related penalties for failures other than timely and accurate filing (e.g., wilful failure to report international boycott activity, failure of an agent to furnish a notice of a false affidavit relating to the withholding tax on dispositions of US real property interests, failure of a US person to furnish information relating to controlled foreign corporations and controlled foreign partnerships, failure of a US person to report foreign bank accounts, etc.) exist. Pension and employee benefit related tax penalties exist that protect the policy reasons for the tax incentives including, most notably, early withdrawal of pension funds. Another group of specialised penalties apply to exempt organisations.

Criminal penalties exist for situations when the failures to stay within the tax system are more egregious. Although applicable to corporate taxpayers, they are applied more frequently to individuals.

In addition to the penalty provisions, interest at statutory rates generally applies to underpayments of tax.
Corporate taxes in Uruguay

Significant developments

Tax reform law and regulatory decrees, effective on 1 July 2007, have modified several aspects of the Uruguayan tax regime. The tax reform law eliminated 10 different taxes of limited scope and application which made up a small portion of the overall tax collection; combined three other taxes with similar characteristics; introduced an income tax on individuals and on non-residents; reduced the corporate income tax (CIT) statutory rate from 30% to 25%; and reduced the value-added tax (VAT) rate from 23% to 22%.

Additionally, the new tax legislation introduced transfer pricing rules and permanent establishment (PE) concepts following internationally accepted standards and modified the application of withholding (WHT) and capital taxes.

Also, the Uruguayan tax regime maintains certain rules and benefits such as the source principle for levying taxes (i.e., the territorial system of taxation). Accordingly, Uruguay taxes only income that is derived from activities conducted within its borders; income generated from property located in Uruguayan territory; or income derived from the economic use of rights within its territory. There also exist preferential tax regimes applicable to free zones, forestry, industrial and qualifying commercial investments.

Uruguay has concluded negotiations of double tax treaties (DTTs) (that follow the Organisation of Economic Co-operation and Development (OECD) model), with Mexico, Spain, Portugal, Switzerland, Finland, Liechtenstein, Malta, Belgium, and Korea, while recently, successfully renegotiating the DTT with Germany. In February 2010, Uruguay signed a memorandum to cooperate in the exchange of information with France, being a first step to conclude an agreement in that regard.

Taxes on corporate income

Net income derived from business activities conducted in Uruguay, obtained by legal entities resident in Uruguay and non-residents operating through a PE in Uruguay, is taxed at a rate of 25%.

In order to determine the net taxable income, all accrued expenses that are necessary for the generation of Uruguayan source income and that are duly documented are allowed as deductions. Additionally, a taxpayer will be able to deduct expenses from its gross income if such expenses are subject to taxation (either foreign or local
Uruguay

taxation) in the hands of the other party. A compulsory proportional deduction must be calculated if the tax is at a rate that is lower than 25%.

A 12% withholding tax (with some exceptions) is imposed on Uruguayan sourced income obtained by non-residents except in cases where the income is obtained through the operations of a PE in Uruguay.

Although the Uruguayan tax law follows the source principle, technical services (defined as services rendered in the fields of management, technical administration or advice of any kind), rendered by non-residents but associated with taxable income obtained by the local user in Uruguay is considered to be Uruguayan sourced for tax purposes and, thus, subject to taxation. However, it is also stated that when the taxable income obtained by the local user of the service does not exceed 10% of its total income, then only 5% of the service fee paid or credited abroad will be subject to non-resident income tax (“Impuesto a las Rentas de los No Residentes” or IRNR). Therefore, in these cases the effective withholding rate rises to 0.6% (5% x 12%).

**Corporate residence**

Legal entities are deemed to be resident in Uruguay when they are incorporated according to the local legislation.

**Other taxes**

**Value-added tax (VAT)**

Uruguayan VAT is levied at a general rate of 22% on the provision of services and on the circulation of goods within the limits of the Uruguayan territory. The importation of goods and value-added in regard to the construction of immovable assets are also within the scope of this tax.

The following items are either subject to a 10% VAT rate or exempt from the tax, entirely.

- Items subject to the 10% rate:
  - Food, medicines;
  - Hotel services;
  - Health services; and
  - The first sale of immovable assets.

- Items exempt from the tax:
  - Milk;
  - Books;
  - Magazines;
  - Agriculture machinery; and
  - Accessories.

**Net wealth tax (NWT)**

All types of legal entities and business enterprise owners are subject to a net wealth tax at a rate of 1.5%. This tax also follows the source principle, whereby only assets located or economically used in Uruguay are taxable. Taxpayers may reduce their capital tax liability in determining the net wealth tax basis, up to their total amount of CIT for the fiscal year. Such reduction may not exceed 50% of the capital tax
Uruguay

amount (this regulation is still pending; in practice taxpayers deduct 1%, which was established prior to the tax reform law).

The deduction of liabilities from the amount of taxable assets to determine the net wealth tax basis, is limited to the (i) average of debt with financial institutions, (ii) debt with suppliers of goods and services, (iii) taxes not yet due, (iv) debt with governments, international credit offices of which Uruguay is a member, and with foreign state financial institutions that lend funds for long-term productive projects, or (v) debt documented in debentures and obligations if its emissions are done in a public offering and such papers are quoted in a stock exchange.

**Tax of control of corporation**

Upon the set up of a corporation, a tax is payable at 1.5% on a notional basis amount which is determined by a variable rate.

This tax is also due annually at the end of each fiscal year, at a rate of 0.75% of the notional amount and may be deducted from the net wealth tax.

**Excise tax**

In general, this tax applies on the first transaction effected in the domestic market by manufacturers or importers of goods. Exports are not taxable.

Rates vary for each item and are generally fixed by the government within maximum parameters established by law. Goods subject to the highest rates are alcoholic beverages, tobacco, gasoline, fuel, lubricants, and other petroleum products.

**Tax on real estate transfer**

This tax applies to the transfer of immovable assets. Transfer is defined in an ample sense, as a sale, a cessation of the right to use, a transfer of inheritance rights, etc.

Both parties to the transfer contract are subject to this tax at a rate of 2% on the property's tax valuation (generally lower than market value). When the property is transferred without payment, the beneficiary pays tax at a rate of 4% on the property tax valuation, except in instances where the property is transferred to direct heirs or legatees, who pay tax at a rate of 3%.

**Branch income**

This annual tax is imposed at a rate of 25% on net income derived from business activities carried out in Uruguay. A 7% withholding tax is imposed on profits remitted or credited to a home office. The dividends and/or profits paid or credited to non-resident shareholders will not be subject to withholding tax when they are paid out of non-taxable income for CIT purposes. This exemption from tax is also applicable in capital redemptions for amounts received by the non-resident over the nominal value of the corresponding shares, as this excess will be considered a dividend/profit distribution.
Income determination

Inventory valuation
Replacement cost is permitted, as well as the first-in, first out (FIFO), last-in, first-out (LIFO) or average cost methods, irrespective of the inventory valuation method elected for accounting purposes. Adjustments for price-level changes may not be made.

Capital gains
Capital gains are treated as ordinary income, except for capital gains on property located in rural areas, which is exempt from tax under certain conditions.

Inter-company dividends
Dividends received from the participation in local subsidiaries are exempt, while dividends received from foreign subsidiaries are beyond the scope of this tax.

Foreign income
Uruguayan legal entities and non-residents operating through a PE in Uruguay are only subject to tax on income from Uruguayan sources under the territorial system of taxation and are not subject to tax on foreign sourced income.

Income derived from activities performed, assets located or rights utilised outside Uruguay, regardless of the nationality, domicile or residence of the parties participating in the transactions and the place where the transaction agreements are subscribed, is not subject to income tax.

As a general rule, duly documented expenses, necessary to obtain and preserve gross taxable income, are tax-deductible. Conversely, those expenses associated with deriving or preserving income not subject to income tax are not deductible from the taxable base.

Other significant items
An income adjustment for inflation has been in force since 1 January 1981, calculated by multiplying the increase in the wholesalers' price index for the financial year by the difference between the following:

1. Total assets at the beginning of the year, excluding fixed assets; and
2. Total liabilities at the beginning of the year

If (1) is greater than (2), then an inflation loss adjustment is deducted from gross income. However, if (2) is greater than (1), then an inflation gain adjustment is added.

Deductions

Depreciation and depletion
Straight-line depreciation over useful life is mandatory. Straight-line rates allowed are 2% per year for urban buildings, 3% per year for rural buildings and no less than 10% per year for new vehicles. Other rates are accepted if economically justified. No conformity between book and tax depreciation is required. The excess of the sales price over the fiscal value of depreciated property, restated for inflation, is considered taxable income.
Uruguay

Percentages for depletion computed on the cost of natural resource properties are allowed in accordance with generally accepted criteria.

Depreciation and depletion percentages are computed on the historical cost of the fixed assets revaluated at each year-end on the basis of the increase in the wholesalers’ price index. Capital gains derived from the revaluation of fixed assets are not considered taxable income.

Amortization of goodwill is not a deductible expense.

**Net operating losses**

Losses may be carried forward and deducted from net taxable income for the following five years, once adjusted for inflation. There are no loss carrybacks.

**Payments to foreign affiliates**

All accrued expenses that are necessary for the generation of Uruguayan source income and that are duly documented are allowed as deductions. Additionally, a taxpayer may deduct expenses from its gross income provided such expenses are subject to taxation (either foreign or local taxation) in the hands of the other party. A compulsory proportional deduction must be calculated if the tax is at a rate that is lower than the corporate income tax rate of 25%.

**Taxes**

Income and net wealth taxes are not-deductible.

**Group taxation**

Group taxation is not permitted.

**Tax incentives**

**Capital investment**

Please find below the main benefits granted to capital investments:

- **Income reinvested in fixed assets**
  - 40% of capital expenditures incurred on the purchase of industrial and agricultural machinery, vehicles and installations, computers, telecommunications equipment and some assets for the tourism industry are exempt.
  - 20% of capital expenditures incurred in the construction and expansion of industrial, agricultural and tourism buildings are exempt from income tax (limited to 40% of net taxable income in the year of expenditure).

- **Fixed assets**
  - Movable fixed assets directly connected to the industrial cycle and equipment for data processing acquired after 1 January 1998, are exempt from the net wealth tax.

- **CIT exemption**
  - Uruguay has modified the investment law (IL), achieving a better framework for local and foreign investments carried out in the country.
• To obtain tax benefits, the IL requires that enterprises obtain a government declaration. The Bureau of Investor Assistance is in charge of monitoring the correct fulfilment of these projects.

• The IL grants two kinds of benefits:
  • Automatic – This kind of benefit is only for manufacturing, extractive or farming/ranching activities, and includes:
    • Exemption from net wealth tax for chattel property directly engaged in the production cycle and data-processing equipment; and
    • Exemption from VAT and from CIT advance on the importation of such goods and reimbursement of VAT in the case of locally purchased items.
  • Discretionary – Benefits that may be obtained (not cumulative with automatic benefits):
    • Tax exemptions on importation of fixed assets items;
    • Net wealth tax exemptions, permanent for chattel property items, and for a period of eight years for construction work in Montevideo (capital city) and for a period of 10 years in the rest of the country;
    • VAT reimbursement on local purchase of goods and services for civil construction work;
    • Increased deductions for CIT in respect of fees and remunerations related to technological developments; and
    • Exemption from CIT depending on the nature and size of the project to be carried out. The executive power takes into account the following criteria to grant this benefit:
      • Addition of technology to improve competitiveness;
      • Contribution to export growth and diversification;
      • Contribution to geographic decentralisation;
      • Improvement of technological investigation, innovation and development; and
      • Generation of employment.

Auto-saving canalisation benefit
This benefit allows the company to deduct from the CIT basis, the amount of the capital increase done as a consequence of the reserves capitalisation, or of the in kind distribution of shares, for an amount equivalent to that of the investment carried out with the investor’s own funds.

• CIT deduction from taxable income, arbitrarily granted by the government, when the investment is totally or partially funded with the investor’s own funds.

Exports
VAT exemption on exports and VAT refund inclusion in the cost of goods and services to be exported.

Other incentives
Other incentives include the following:

Free zones
Commercial, industrial, services or investment activities conducted within or from the free zone to third countries by its users are not subject to tax. Free zone users are also exempt from all national taxes created or to be created, including those taxes for which a specific legal exemption is required, in connection with the activities performed within the free zone territory. Social security taxes as well as certain withholding taxes
Uruguay

are excluded from this exemption. Income tax payments of dividends made by these companies to their foreign shareholders are exempted.

**Holding companies (SAFIs or “Sociedades Anónimas Financieras de Inversión”)**
Uruguayan corporations whose principal activity is to invest outside the country in securities, bonds, shares, commercial paper, debentures, commodities, and property or to develop commercial activities abroad are exempt from all taxes under certain conditions. They are subject only to an annual tax of 0.3% on their net worth. These entities will have to comply with the General Tax Regime before 31 December 2010 requiring that from 1 July 2007, the incorporation of new SAFIs is no longer allowed (i.e., they have to reform and adapt to the tax regime and pay taxes like other taxpayers, and will no longer obtain special tax treatment). However, ordinary corporations may be used to hold foreign participations with no effective tax burden, due to the application of the territorial system of taxation.

**Trading companies**
Uruguayan Corporations that sell and buy foreign goods or services from Uruguay (which are not physically introduced to the country, in the case of goods, or which are not economically used in Uruguay, in the case of services) may determine the net Uruguayan source income on a notional basis of 3% of the gross margin (difference between the selling price and the purchase price). The applicable effective CIT rate is 0.75% (25% x 3%).

**Printing industry**
Companies that print books and educational material are exempt from the net wealth tax and VAT.

**Shipping industry**
Imports of material, supplies, and equipment required for the construction, maintenance and repair of shipyards or vessels are exempt from CIT.

**Income of water and air transportation companies**
This income is tax exempt. In the case of foreign companies, the exemption is subject to reciprocal treatment. The government may exempt from income tax, companies engaged in transportation by land, subject also to the conditions of reciprocal treatment.

**Forestry**
Income derived from forestry plantations up to July 2007 is tax exempt. Income derived from new forestry plantations is also tax exempt, but under strict conditions, such as wood quality.

**Software industry**
50% of the income derived from the production, development, implementation, updating and correction of previous versions, amongst others, of software is exempt from CIT for fiscal years ending between 1 January 2010 and 31 December 2010. Some conditions were requirements for exemption, such as those tasks had to be directly developed by the computer support producer. Related services had to be rendered to logical support producers as well.
Industrial parks
Individuals or legal entities that establish industrial parks within Uruguayan territory, as well as companies located within such industrial parks, are entitled to CIT exemption for their industrial equipment; (e.g., excise tax and VAT exemption on the acquisitions of such goods, amongst other benefits).

Tourism industry
Investments in the tourism industry have tax benefits related to CIT, VAT and NWT, as follows:

- Deduction of up to 40% of CIT in investments made in the fiscal year in hotel equipment and equipment for improving entertainment, moving and information services to tourists;
- Deduction of up to 20% of the CIT in investments made in construction and expansion of hotel buildings;
- VAT refund included in local acquisitions of goods and services for construction, improvement or expansion of Tourist Complexes;
- VAT exemption on import of goods for construction, improvement or expansion of Tourist Complexes;
- The list of operations included in the concept of exports of services for VAT purposes (thus zero-rated) was broadened including, among others, services related to accommodation that hotels, apartments and rural tourism establishments provide to tourists;
- NWT exemption for 10 years on investments in infrastructure and civil work for construction, improvement or expansion of Tourist Complexes;
- NWT exemption for four years on fixed assets investment for Tourist Complexes; and
- 50% exemption of import duties on materials and goods for construction, improvement or expansion as well as fixed assets of Tourist Complexes.

Withholding taxes (WHT)
As a consequence of the introduction of a tax on non-residents, from 1 July 2007, the WHT on certain payments or credit made abroad such as royalties, author rights, technical service fees and dividends/profits remittances is no longer applicable.

All Uruguayan sourced income obtained by non-residents (other than those obtained through a permanent establishment in Uruguay) is taxed at flat rates of up to 12% on gross income, with some exceptions, (i.e., interest on deposits in local currency for terms exceeding one year is taxed at 3%, interest on public bonds is taxed at 0%, dividends paid or credited by CIT taxpayers is taxed at 7%, provided they derived from taxable income), regardless of the tax treatment applicable to such income in the beneficiary country. This tax is basically collected by way of withholding.

Profits originated in the alienation of stock of CIT taxpayer companies obtained by non-residents are exempted only if such alienation is on bearer stocks. The alienation of registered stock is taxed at a rate of 12%.

Tax treaties
Uruguay signed tax treaties with Germany and Hungary several years ago. Recently, Uruguay has concluded negotiations of DTMs that follow the OECD model with Mexico, Spain, Portugal, Switzerland, Finland, Liechtenstein, Malta, Belgium and Korea, while
Uruguay

recently successfully renegotiating the DTT with Germany. In February 2010 Uruguay signed a memorandum to cooperate in the exchange of information with France, being a first step to conclude an agreement in that regard.

**Tax administration**

**Returns**
Most tax returns are filed on a fiscal-year basis. Some of them require more presentations before the Uruguayan Tax Office (i.e., VAT rules require filing a tax return monthly in addition to the annual return).

VAT, income and net wealth taxes are self-assessed.

**Payment of tax**
Income and capital taxes are paid monthly by way of advanced payments, which are calculated on the basis of the previous year’s tax. The difference between the advanced tax payments and the total annual tax calculated at fiscal year-end, is paid four months after the fiscal year-end.

Significant developments

Legislation in the Republic of Uzbekistan has been constantly evolving during the period of economic transition from its pre-independence socialist economy. On 14 April 1997, Uzbekistan introduced its first consolidated tax code, which in certain cases represents a significant change from the previous laws, regulations and decrees. The code became effective on 1 January 1998. Since that time, the tax authorities have issued a number of regulations and procedures on practical implementation of provisions of that tax code.

As of 1 January 2008, a new tax code was introduced. The new tax code unified the underlying principles of taxation and obligatory payments charged in Uzbekistan and provided practical guidance on calculation and payment previously set forth by specific instructions on each tax. With the introduction of the new tax code, all prior instructions have been abolished, and the new tax code is now the primary guidance on tax related matters. The current tax code has been amended as of 1 January 2010.

The information presented in this summary is based on the current tax code with amendments and other laws, regulations and practices as of 1 April 2010.

Taxes on corporate income

The corporate income tax (CIT) rate is set annually by presidential decree. By virtue of the government’s annual initiatives for the rate reduction, the CIT rate was reduced as follows:

<table>
<thead>
<tr>
<th>Year</th>
<th>Rate</th>
</tr>
</thead>
<tbody>
<tr>
<td>2010</td>
<td>9%</td>
</tr>
<tr>
<td>2009</td>
<td>10%</td>

<td>35%</td>
</tr>
<tr>
<td>1996</td>
<td>33%</td>
</tr>
<tr>
<td>1995</td>
<td>31%</td>
</tr>
</tbody>
</table>

In 2010, enterprises (i.e., legal entities) are subject to CIT at the rate of 9%.

Effective 1 January 2009, commercial banks are subject to CIT at the rate of 15%.

There is a local tax on accounting profit (less CIT), an “infrastructure development tax,” which is charged at a maximum rate of 8%.
Corporate residence

For Uzbek tax purposes, corporations are classified as resident or non-resident. A resident corporation is an Uzbek legal entity established in accordance with the Uzbek legislation.

Other taxes

Value-added tax (VAT), sales tax
Legal entities are subject to VAT, which is applied to taxable turnover and taxable imports. The rate for taxable turnover is 20%. This rate also applies to taxable imports, for which the tax base is determined as the customs value plus import duties and excise tax (on excise-liable goods). Export of goods for hard currency is generally zero-rated. Insurance and most types of financial services are exempt.

Property tax
The property tax rate in 2010 is 3.5% for legal entities. The tax is computed based on the net book value of the fixed assets adjusted for the effect of revaluation – which should be performed annually on 1 January – residual value of intangibles and value of overdue construction-in-progress. The rate is doubled for equipment not installed in due time.

Newly opened enterprises are exempt from property tax for a period of two years from their date of registration, unless such enterprises have been created on the basis of production facilities or assets of existing enterprises. There is also a rate reduction benefit available to companies engaged in production and export of goods (work, services). Property tax exemption is also available in respect to equipment financed by loan for a period of settlement of the loan not to exceed five years; leased property – for a period of the lease; and new technological equipment – for a period of up to five years.

Turnover taxes
There are three mandatory contributions equaled to taxes that are charged on the enterprise’s gross annual turnover (less VAT and excise tax): 2010 road fund, generally imposed at a rate of 1.5%; pension fund imposed at a rate of 1.5%; and school development fund imposed at a rate of 0.5%.

The taxable base (and tax rate in exceptional cases) for these mandatory contributions may differ depending on the type of activity of a company.

Other taxes include a water-use tax, land tax, excise tax on produced and imported excise-liable goods and a subsurface-use tax.

Branch income

There is no “branch” concept in the Uzbek legislation. However, there is a concept of “permanent establishment” (PE) in Uzbekistan, which allows foreign legal entities to perform business activities without establishing an Uzbek company. A PE is generally subject to CIT, property tax, land and water use taxes and net profits tax. Unified social payment on employment remuneration is to be paid in the same manner as applicable for Uzbek legal entities. A PE is also a withholding agent for personal income taxes and individual pension fund contributions.
PEs of foreign legal entities are taxed on their profits from Uzbekistan activities. In 2010, PEs of foreign legal entities are subject to CIT at a standard rate of 9%. The filing deadline for the PE CIT declaration is 25 March following the reporting year. Payment is made annually and due within a month after the assessment note has been issued by the tax authorities. Effective 1 January 2008 PEs of foreign legal entities are subject to net profits tax, which is assessed at 10% on profits retained after the payment of CIT.

**Income determination**

**Inventory valuation**
Uzbek legislation permits the application of first-in, first-out (FIFO) and the average cost method for the valuation of inventory for tax purposes.

**Capital gains**
Capital gains arising from the disposal of tangible and intangible assets are calculated as the difference between the selling price and the net book value of an asset. The capital gain is included in taxable profits, and the capital losses are deductible (only if the disposed asset had been used for business purposes for three or more years). This provision is applicable to Uzbek legal entities and PEs of foreign legal entities duly registered with the Uzbek tax authorities. Capital gains on non-resident companies may be subject to income tax withholding to be assessed on the selling price with no deduction of the net book value.

**Inter-company dividends**
Dividends paid by a domestic subsidiary will be subject to 10% WHT at the source. The net dividends received by its domestic parent company will then be excluded from its CIT base. Such net dividends received by a foreign parent company would be taxed in accordance with the respective country’s internal legislation or double taxation treaty (DTT) provisions (if Uzbekistan has a DTT with this country).

**Foreign income**
Foreign income/relief is provided for foreign taxes paid in countries with which Uzbekistan has a DTT.

**Deductions**
The tax base for CIT purposes varies significantly from the computation of taxable profits as in most Western jurisdictions. Expenditures such as entertaining, business trip allowances exceeding the statutory norms, management fees and certain other costs are either non-deductible or restricted to very low levels.

Effective 1 January 2010, the abovementioned expenditures are treated as deductible for calculating CIT by PEs, although there is a different set of add-back rules set out for them (e.g., interest on head office loans, royalty, etc.).

**Depreciation and depletion**
Fixed assets are pooled into seven groups. Depreciation for tax purposes can be charged at rates not to exceed the maximum rates set by the tax code for each group (ranging from 5% to 20%). If depreciation for accounting purposes is charged at higher rates (compared with the maximum tax code rates), the difference would be treated as a temporary difference for CIT purposes (i.e., deducted in future periods).
Uzbekistan, Republic of

**Net operating losses**
In cases where goods/services are sold below cost (or given for free), the revenue should be adjusted for tax purposes to the cost or purchase price of the goods/services. Production wastes and defects within statutory norms, and losses resulting in force-majeure circumstances are generally deductible. Losses from fixed assets disposal also may be deducted, if the fixed asset has been used for three or more years.

**Tax losses**
Tax losses may be carried forward for a period of five years, allowing a reduction of taxable income of the respective year by up to 50%. Loss carryback is not permitted.

**Payments to foreign affiliates**
Transfer pricing rules have been reintroduced in the tax code effective 1 January 2010. The tax authorities may now adjust prices used by interrelated parties in cases where these prices differ from the prices that would have been set forth by independent customers-suppliers.

**Taxes**
Generally, taxes are deductible for CIT purposes. The exceptions are the infrastructure development tax based on after-tax profits and the net profits tax for PEs.

**Interest on short-term loans**
Interest is deductible, except for interest on overdue/delayed loans and interest capitalised in the value of fixed assets (i.e., in cases where a loan was obtained to purchase fixed assets).

**Group taxation**
There is no provision for consolidation of income or losses by related companies for tax purposes.

**Tax incentives**
The current tax legislation offers certain tax incentives to encourage manufacturers, importers and exporters of strategically important products. There are tax incentives for enterprises in oil and gas exploration/development projects, production enterprises with a substantial foreign investment component, enterprises engaged in the production and export of goods for foreign currency (when export share exceeds 15%), companies rendering certain services, producers of consumer goods, etc.

There are also customs exemptions offered by the legislation for goods imported by individuals within the norms of duty-free import, technological equipment imported by foreign investors as their charter fund contribution, technological equipment imported under projects for creation of new or the modernisation of existing production facilities (with appropriate certificates issued by an authorised bank), property imported for production needs by foreign investors and enterprises with foreign investment with foreign participation in the equity not less than 33%, etc.

<td>20%</td>
</tr>
</tbody>
</table>

Double taxation treaty (DTT) relief
Foreign legal entities that do not carry on activities in Uzbekistan through a PE are subject to WHT on income from sources in Uzbekistan, subject to the terms of a relevant DTT. Uzbekistan has signed DTTs with 49 countries; 44 of them are in force.

DTTs in force establish withholding rates as follows:

<table>
<thead>
<tr>

Notes

1. Where the beneficial shareholder owns no less than 10% of the voting shares.
2. Where the beneficial owner holds at least 10% of the capital of the paying entity.
3. Where royalties are paid for patents, trademarks, know-how, etc.
4. Where royalties are paid for copyrights on literature, cinema, musical works, etc.
5. Where royalties are paid for secret formulas or processes or know-how.
6. Where royalties are paid for computer software, patents, designs or models or plans.
7. Where one of the following conditions is met: (a) recipient is a local authority or corporate body constituted under public law, including the central bank of the state, or interest paid by local authorities or corporate bodies; (b) interest is paid in respect to debt claims or loans, guaranteed, insured or aided by the state or on behalf of the state; (c) interest is paid in respect to credit sales of industrial, commercial, scientific equipment of goods and merchandise or provision of services by an enterprise to another enterprise; or (d) interest is paid in respect to a loan of any kind granted by a bank.
8. Where the beneficial shareholder owns no less than 25% of the capital of the paying entity.
9. Where the recipients of the interest are governments of contracting states or any governmental body (such interest is exempt from WHT).
10. Where royalties are paid in respect to uses or the rights to use industrial, commercial or scientific equipment.
11. Where the beneficial shareholder owns no less than 20% of the voting shares.
12. Where interest is paid in respect to: (a) a loan made, guaranteed or insured by the government of the other state; (b) the sale on credit of industrial, commercial, or scientific equipment; (c) the sale of merchandise by an enterprise to another enterprise; or (d) a loan of any kind granted by a bank.
13. Where the interest is received by any financial institution (including insurance companies).
14. Where interest is beneficially owned by the other contracting state or local authority or an instrumentality of such other state authority and is not subject to tax by that other state.
15. Where the recipients of the interest are governments of contracting states, National Bank of Hungary, Eximbank Hungary Pte. Ltd., Central Bank of Uzbekistan, or the National Bank of Uzbekistan for foreign economic activity (such interest is exempt from WHT).

There may be other WHT rates offered by protocols to the individual treaties.

Tax administration

Uzbek enterprises, including entities with foreign investment, are required to make advance instalments of CIT in each quarter based on estimated profits in the quarter. The instalments are payable by the fifteenth day of each month. Final quarterly payments based on actual profit figures are payable no later than the filing deadline for the quarterly tax returns (which is the twenty-fifth day of the month following the period of assessment).

Significant developments

There have not been significant tax or regulatory developments in the past year.

Taxes on corporate income

Corporations domiciled in the country are subject to corporate income tax on their Venezuelan and foreign source income, whereas corporations domiciled abroad with a permanent establishment (PE) in the country are levied on their Venezuelan and foreign-source income attributable to said establishment. They are able to claim any similar taxes paid abroad on foreign source income as a tax credit. Non-domiciled corporations without a PE are subject to the corporate income tax provided that the source of revenue is located in the country.

Corporate income is taxed at the following rates (Tariff 2):

<table>

Tax units (TU)

The 1994 Income Tax Law reform established the concept of a taxable unit as an element that reduces the negative effects created by inflation on the determination of the tax rates. The tax code established the initial TU at Bs 1,000, with annual basis adjustments according to the variation on the consumer price index (CPI) from the previous year. During 2009 the TU was Bs 55.00 and for 2010 it is Bs 65.00.

Oil exploitation and certain related income is taxed at a flat rate of 50%. As of 2007, joint venture corporations are also subject to a 50% income tax rate instead of the general corporate income tax rate of 34%. Corporations engaged in the exploration and exploitation of non-associated gas and the processing, refining, transportation, distribution, commercialisation and exportation of the gas and its components or companies exclusively engaged in the refining of hydrocarbons or improvement of extra heavy oil are afforded additional tax considerations.
**Municipal business licence tax**
Companies and business entities as well as individuals and unincorporated companies are subject to municipal tax on gross income from industrial or trade activities carried on in the municipality during the fiscal year. The rates range from 0.1% to 10.0%, depending on the activity and the municipality.

**Corporate residence**

According to the Venezuelan tax code, the following companies are regarded as domiciled:

- Companies incorporated in Venezuela and registered with the Mercantile Registry as established by commercial law; and
- Foreign companies registered with the Superintendence of Foreign Investments (SIEX) to be domiciled in Venezuela as branches duly registered with the Mercantile Registry.

The following companies are non-domiciled but subject to Venezuelan taxes:

- Foreign companies registered with SIEX to provide technical assistance, technological services, royalty items and professional services from abroad;
- Foreign banks granting loans to local companies;
- Foreign companies leasing goods to local companies; and
- Foreign companies deriving income from economic activities carried out in Venezuela or from assets in Venezuela.

According to the Venezuela Income Tax Law (VITL), generally, a passive party is deemed to be carrying out operations in Venezuela through a PE when:

1. The passive party, in the Venezuelan territory, owns, directly or through an agent, employee or representative:
   - An office, fixed place of business or an activity centre where its activities are totally or partially carried on;
   - Management head quarters, branches, offices, factories, shops, facilities, warehouses, stores, construction, installations or assembling works, when the duration thereof exceeds six months; or
   - Agencies or representatives authorised (according to the VITL) to contract in the name of or on behalf of the passive party.

2. The passive party, in the Venezuelan territory, performs, directly or through an agent, employee or representative, professional, artistic activities.

3. The passive party, in the Venezuelan territory, possesses, directly or through an agent, employee, representative or other contracted personnel, other work places where the operations are wholly or partially performed.

Any agent acting independently shall be excluded from this definition, except if such representative has the power to conclude contracts in the name of the principal.
Venezuela

Other taxes

Value-added tax (VAT)
Federal VAT or (“Impuesto al Valor Agregado” or IVA) is a one-time tax payable by the ultimate consumer of all types of products and services. However, each business entity involved in the process, from the sale of raw materials to the production and distribution of finished products to the ultimate consumer, is required to include the tax on its products to customers (output tax) and to pay the tax on its purchases or imports of goods and services (input tax). The amount paid by the business entity is credited against the amount due on its own activities. The net amount payable by each entity represents a tax on the value added.

In general, a VAT does not represent an additional cost to a business enterprise because even though all types of business enterprises, including government departments and agencies (with some exceptions), are required to accept charges of the tax by suppliers on their purchases of goods and services, such amounts are normally deductible from the liability of the business enterprises for the tax on their respective bills to customers.

Exceptions exist, principally when the sales of an enterprise are exempt from VAT, in which case the enterprise is treated as the final consumer and must absorb any VAT charges on its purchases except insofar as its activities are subject to the zero rate. Input tax paid on goods or services used to produce items that are exempt from VAT may be deducted for CIT purposes.

Taxable transactions
Although a number of significant exceptions are provided by law, in general, VAT is payable on all sales, rental and importation of goods, and rendering of services executed or used in the country.

Sales of goods
The law defines a sale as any transmission of tangible goods, including those made on a conditional basis or through an irrevocable trust. The taxable amount of a sale includes the sales price as well as other amounts charged to the purchaser for other taxes, duties, interest, or surcharges. VAT becomes payable at the earlier of: (1) when the goods are invoiced, (2) shipped to the customers, or (3) when the price is paid in full or in part.

Exempt sales include the following:

- Certain foods and other products for human consumption;
- Fertilisers as well as any natural gas used in the manufacturing thereof;
- Some products for animal consumption;
- Medicine;
- Products derived from hydrocarbons and some raw materials intended to improve the quality of gasoline;
- Wheelchairs;
- Books, magazines, newspapers, and the paper used in producing these products;
- Vehicles, aircraft and trains for passenger transport;
- Machinery and equipment for agribusiness; and
- Scientific equipment purchased by the government.
**Services**

Taxable services are those rendered within Venezuela by one person to another on an independent basis, transportation of passengers or goods, agency activities, technical assistance and transfer of technology. VAT is payable to service providers at the time the invoice is issued, the service is rendered or the fee becomes demandable, whichever comes first. The taxable amount includes the price of services, as well as charges to the customers for other taxes, interest, etc.

Exempt services include the following:

- Domestic land and maritime transportation of passengers;
- Educational services;
- Accommodations for students and persons with disabilities;
- Healthcare and dental services, surgery and hospitalisation;
- Theatres, sports and cultural events;
- Food services for employees and students;
- Certain utilities (e.g., electricity, water);
- Housecleaning;
- Transport services for hydrocarbon-derived fuels; and
- Services involving livestock, poultry and other minor species including breeding and production.

**Exports**

Exports are zero-rated. Consequently, VAT is not payable on exports, including exports of in-bond processing companies, technical fees to foreign residents and sales to in-bond processing companies and companies that export their entire production. Sale of natural hydrocarbon by joint ventures regulated by the Hydrocarbon Law to Petroleos de Venezuela S.A. (PDVSA) and affiliated companies are also taxable at 0%. Though exporters do not collect VAT on export sales, they may recover VAT charges on their purchases of goods and services by means of a refund certificate. This certificate may be used to pay other tax obligations.

Additionally, a zero rate applies to independent personal services provided by residents in Venezuela that are used solely by and for the benefit of persons abroad without a PE or fixed base in Venezuela.

**Tax rates**

The rate may change every year, within the range of 8% to 16.5%. Currently the general VAT rate is 12%.

An additional tax rate of 10% is applicable to sales and imports of luxury products: vehicles valued at more than USD 30,000, motorcycles with a cylinder capacity of 500 cc, nickel or token game machines, aircraft used for recreational or sport purposes, fighting bulls, trained horses, caviar, jewellery with precious stones valued at a price exceeding USD 500.

An 8% VAT applies to the following transactions:

- Goats, sheep and minor species for slaughter or breeding;
- Meats in their natural state, or refrigerated, frozen or salted meats, or meats in brine of goats, sheep and poultry;
- Shortening;
• Rendering of professional services to any government entity, in any level or branch of government, provided such services do not involve any commercial transactions but rather predominantly intellectual work or efforts; and
• Domestic air passenger transportation.

**Payment and collection**
Excess VAT charged or chargeable to customers over VAT paid to vendors or customs authorities – Servicio Nacional Integrado de Administración, Aduanera y Tributaria (SENIAT) – including the correspondent payment, must be remitted to SENIAT within the first 15 days of the following month.

**VAT exoneration**
Among the fiscal policy measures applicable pursuant to the conjuncture, sector and regional situation of the country’s economy, the National Executive is entitled to exonerate the import and sales of goods and the rendering of services set forth in the respective decree from the payment of VAT.

**Refunds/special regime for exporters**
The VAT law establishes a special regime for taxpayers engaged in the export of national goods or services (goods produced or services supplied in Venezuela), provided that such operations qualify as exports in the terms set forth in the VAT law. According to this regime, taxpayers are entitled to recover the tax incurred through the purchase of goods and reception of services (input VAT) related to export activities. If such exporters carry out sales in the country, they will be entitled to recover only the input VAT related to foreign sales.

**Refunds/special regime for industrial projects**
The VAT law stipulates a special regime for taxpayers engaged in the execution of industrial projects, whose duration exceed six taxable periods. Pursuant to this regime, taxpayers will be able to suspend the use of input VAT generated during their operating stage, until the time they begin generating fiscal output VAT.

Taxpayers engaged in the execution of industrial projects aimed at exporting or generating foreign currency may (with prior consent of the tax authorities) choose to recover the tax incurred through the construction operations involving the project, provided that these construction operations are carried out during the pre-operating stage of such project.

Input VAT subject to recovery must be determined after computing output VAT. In other words, input VAT originated from purchasing goods and receiving services is not subject to recovery if the output VAT was not subtracted.

**VAT withholding regimes**
Taxpayers, qualified by the tax administration as special taxpayers, were designated as liable parties in their capacity as withholding agents in regard to payment of the VAT generated in their purchase of tangible goods or services received by providers that are regular taxpayers for VAT purposes.
The law on the special contribution for hydrocarbon’s extraordinary international market prices

This law has been in effect since 15 April, 2008 and establishes a special contribution payable for those who export or transport liquid hydrocarbons, both natural and improved, as well as derivative products outside the country.

This law is applicable when, in regard to any given month, the average price of Brent crude exceeds USD 60 per barrel. The amount of special contribution per barrel is equivalent to 50% of the difference between the aforementioned monthly average and the threshold price (USD 60 per barrel). In addition, when the aforementioned average exceeds USD 100, 60% is to be applied to any difference between the aforementioned monthly average and said threshold price (USD 100).

This contribution is payable monthly in foreign currency to the National Development Fund (FONDEN). The amounts paid in connection to this special contribution are accounted for as costs for income tax purposes.

Gift and inheritance tax

Inter-vivos transfers, inheritances, estates and trusts are taxed individually based on their relationship with the testator/decedent. Both personal and real property located in Venezuela are subject to taxation, as well as property located abroad when transferred to individuals domiciled in Venezuela. The same tax rates and tax treatment apply to both inheritance and gifts.

The following are deemed taxable property:

- Shares, obligations and securities issued in Venezuela and abroad by companies constituted or domiciled in Venezuela;
- Securities issued abroad by foreign companies when they are owned by persons domiciled in Venezuela;
- Rights attached to assets or property in Venezuela; and
- Personal rights or obligations where the legal bases arose in Venezuela.

The tax rates on both inheritance and gifts range from 1% to 55% of the share distributed to the beneficiary or the amount of the inter-vivos gift.

Inherited shares corresponding to ascendants, descendants, spouses, adoptive parents and adopted children under 75 TU are exempt from tax. A tax credit is available for inheritance tax, varying from 5% to 40% of the tax due on each distributed share where the total tax does not exceed 250 TU, depending upon the relationship of the beneficiary or legatee with the decedent.

Donations of assets valued at less than 25 TU are not subject to tax unless the cumulative amount received from the same donor during a five-year period exceeds this amount.

Public registry tax

Commercial companies are registered with the Mercantile Registry Office and are subject to a tax levied upon incorporation of a company and the registration of capital increases. The tax is 1% of the amounts of subscribed or increased capital.
Venezuela

The sale of a going concern is also registered in the Mercantile Registry Office and is subject to a tax at a rate of 2%, levied upon the total amount of the sell.

**Payroll taxes and other contributions**

Contributions applicable to domiciled companies in Venezuela:

</tbody>
</table>

Notes

The numbers in parentheses refer to the notes below:

1. As of 1 May, 2010, the minimum monthly metropolitan salary amount was increased to VEB 1,223.39.
2. According to the current system, the employer’s contribution to social security will depend on the company’s risk qualification (minimum risk, middle risk or maximum risk).
3. Regarding *Instituto Nacional de Capacitación y Educación Socialista* (INCES) contribution, the employer must contribute 2% of the total wages and salaries paid to employees.
4. Employers are also required to withhold 0.5% of the annual profit-sharing bonus paid to employees.
5. According to the *Ley Orgánica del Sistema de Seguridad Social* (LOSSS), generally contribution basis relevant to the new systems, may not exceed 10 minimum salaries. For social security purposes, the transition rules establish a contribution basis of five metropolitan minimum salaries for urban workers. No cap is expressly established in the transition rules for the housing system and the work, security and health regime.
6. Contributions to be made to this regime are exclusively for the employer and vary depending on the risk associated to the company. A company’s risk is to be determined by the *Instituto Nacional de Prevención, Salud y Seguridad Laborales* (INPSASEL). To date, INPSASEL has not been created and employers will continue making their contributions to the Venezuela Social Security Institute.
7. Ley Orgánica de Prevención, Condiciones y Medio Ambiente de Trabajo (LOPCYMAT) regulations do not establish a cap for the contribution. However, as mentioned, the LOSSS establishes a maximum of the minimum urban salaries. For this reason, there are several contrary interpretations on whether a cap should be applied in this case.

**Customs duties**
As a general rule, the importation of goods into Venezuela is subject to customs duties. These duties are generally levied on the cost, insurance and freight (CIF) value of the product being imported, excluding VAT. Custom duty rates generally range from 5% to 35%. The duty rates vary depending on the product involved. In general, import tariffs are 5% for capital goods, 10% to 15% for raw materials and intermediate goods, and 15% to 35% for finished products. In addition, all imports are subject to customs handling charges, duty imports and VAT.

**Branch income**
Branches of foreign corporations are subject to the same tax rules as Venezuelan corporations. Inter-branch income and deductions must be eliminated. The positive difference between a branch’s annual book and fiscal income is deemed to be remitted to the branch’s head office (branch profits tax). Such remittances are subject to the 34% flat dividend tax regardless of whether there is an actual payment unless the branch can provide proof of reinvestment of its profits for a five-year period. If such proof is established, no deemed remittance is assumed. A Venezuelan taxpayer has to recognise, annually on an accrual basis, income generated in a company or other legal entity it controls which is located in a jurisdiction with low fiscal taxation (JLFT). Further, investments in JLFT must be declared to the SENIAT.

**Income determination**

**Inventory valuation**
Inventories may be valued at cost or the lower of cost or market value. Any method generally accepted for accounting purposes can be accepted for tax purposes.
**Capital gains**

Capital gains are taxable as ordinary income, and capital losses are deductible from ordinary income. Capital losses resulting from the sale of stock, capital reduction or liquidation of a company are deductible under the following conditions:

- The cost of the capital stock was not in excess of the price quoted on a stock exchange or an amount with a reasonable relationship to the book value of the capital stock;
- The holding period of the investment was for at least two years immediately preceding the date of the sale; or
- The stockholder proves that the company selling the shares carried on economic activities for at least two years, preceding the date of sale.

At present, the tax law contains two different rulings relevant to the deductibility of losses incurred through operations on the Venezuelan Stock Market; one of which has been described, above. The second ruling pertains to income obtained from operations on the local market. This income is subject to a final 1% tax that is withheld at the source. Losses in this kind of operation are not deductible against other income (see above for additional considerations). Corporate shareholders not domiciled in Venezuela may not deduct such losses from other taxable income other than dividends arising from Venezuelan sources.

Gains upon liquidation or reduction of capital are taxable to the liquidating entity.

A dividend tax is levied at a flat rate of 34% on the positive difference between book income and tax income generated after 2000. Book income is understood to be that approved at a shareholders’ meeting and based on the financial statements prepared pursuant to generally accepted accounting principles. To determine the applicable difference, a last-in, first-out (LIFO) method applies. The 34% (domestic) rate can be mitigated under tax treaties to 10%, 5% or even 0%. Withholding is to be made at the moment a dividend is declared or credited to the account a recipient.

Dividends obtained from companies incorporated or domiciled abroad or incorporated abroad and domiciled in Venezuela are taxed at a flat 34% rate.

**Foreign income**

Beginning 1 January, 2001, extraterritorial income is subject to Venezuelan income tax. The broadening of the territoriality regime is based on the concept of worldwide income taxation, according to which:

- Domiciled companies must pay a tax on total income whether from national or foreign source;
- Companies domiciled abroad with PE in the country will pay tax on their income, whether of national or foreign source, attributable to the Venezuelan PE;
- Non-domiciled companies will pay taxes on their income originated or caused in Venezuela; and
- Domiciled companies as well as companies domiciled abroad with PE in Venezuela may credit the tax paid abroad for earnings of extraterritorial source against the income tax payable in Venezuela, subject to limitations.
Foreign technical assistance and services
Taxable income of foreign taxpayers providing technical assistance or technological services from abroad to individuals or entities that use them in Venezuela or assign them to third parties is presumed to be 30% of gross income for technical assistance fees and 50% of gross income for technological service fees. If the contract does not specify the proportion in which the services are rendered, the law provides that 60% of the technical assistance and technological service fees are deemed to be rendered abroad (i.e., foreign-source) with the other 40% deemed to rendered in Venezuela. The law also provides that 75% of the entire income related to technological services and 25% of that related to technological assistance is rendered abroad if not otherwise specified in the contract. (See also Withholding taxes).

International fiscal transparency
A regime of international fiscal transparency is created for the purpose of establishing special standards of fiscal control, governing capital investments in countries classified as JLFT, or tax havens. Under certain conditions a Venezuelan taxpayer may be required to recognise income generated in its JLFT subsidiary on an accrual basis in its tax return.

Stock dividends
Beginning 1 January, 2001, dividends of stock will be subject to payment of the aforementioned tax dividend. Moreover, as of 1 January, 2002, stock dividends will be subject to an advanced payment of dividend tax equivalent to 1% of the dividend distributed. Stock dividends will have no cost for tax purposes.

Transfer pricing
Taxpayers that carry out operations with related parties abroad must calculate their income, costs and deductions by applying a defined methodology of transfer pricing. This regime is applicable to imports, exports and interest paid to recipients abroad as well as technical assistance, technological services and royalty fees. With the amendment of the 2007 income tax law, Venezuela introduced thin capitalisation rules that limit the deduction of interest from debt with related parties in excess of a 1:1 debt-to-equity ratio. Under these rules, if the average of a taxpayer's debt (with related and unrelated parties) exceeds the average amount of its equity for the respective fiscal year, the excess debt is treated as equity for income tax purposes. Consequently, the ability to deduct interest on related-party loans may be affected.

Inflation adjustment
A system for the adjustment of non-monetary assets, non-monetary liabilities and shareholder's equity has been established. “Non-monetary assets” include land, construction, machinery, vehicles, installations, inventories, and investments other than in securities (e.g., bonds and stocks). There are two phases to the adjustments: (1) initial adjustments and (2) annual adjustments. Both phases are mandatory adjustments for taxpayers engaged in commercial, industrial, financial, and insurance operations and in the exploitation of mines and hydrocarbons. The annual adjustment is optional for taxpayers performing non business activities.

Initial adjustment
The initial adjustment on depreciable fixed assets requires a registration tax of 3% on the amount of the adjustment.
Venezuela

The initial adjustment must be filed at the closing date of any fiscal year ending after 1 January, 1993. This adjustment is applicable to all non-monetary assets and non-monetary liabilities.

The initial adjustment is calculated by applying the variations between the CPI of the Caracas Metropolitan Area prevailing in the month in which the non-monetary assets were acquired and the month corresponding to the initial adjustment. Assets acquired before 1950 are deemed to have been acquired in January 1950.

A registry tax of 3% is applied exclusively to the initial revaluation adjustment of depreciable fixed assets. For payment, taxpayers must be registered with the Asset Revaluation Registry, maintained by the tax administration. The resulting tax may be paid in three consecutive annual instalments, beginning on the date of registration.

Companies in the pre-operating stage, deemed to end with the first invoice must determine and pay a 3% tax once the pre-operating period has ended.

Depreciation or amortisation (see below) on the revaluation adjustment is allowed, based on the original estimated life of the asset.

**Annual adjustment**

The annual adjustment is applied each year in determining the taxable income. This adjustment, effective as of 1 January 1993, applies to fiscal periods beginning after that date. The adjustment factor must be applied to the following balance sheet items at the closing date of the fiscal year. The resulting adjustment will increase or decrease taxable income.

<table>

</tr>
</tbody>
</table>
Notes

The numbers in parentheses refer to the notes below:

1. Tax initial equity is defined as the difference between assets and liabilities at the beginning of the tax year, less accounts receivable from administrators, affiliated and related companies. In order to determine the initial tax equity, assets not located in the country as well as goods, debts and liabilities entirely applied to the production of deemed, exempt or exonerated income, are excluded.

2. Inventories are to be valued at historical cost for purposes of applying the CPI. The provisions of the income tax law detail the procedures for applying the CPI. The revaluation of inventories in the tax year is included as part of the initial inventories of the following year.

3. The annual revaluation adjustment of fixed assets is considered part of the cost when the assets are sold.

Net losses arising from the annual adjustment that have not been offset, may be carried forward only to the next tax period (one year).

Gains or losses, originating from the adjustment of accounts receivable or investments, as well as debts and liabilities in foreign currency or with a readjustability clause, are deemed to be carried out during the fiscal year in which they become demandable, collected or paid, whichever comes first.

**Deductions**

**Depreciation and depletion**
Depreciation is generally computed on a straight-line basis although any other generally accepted method for accounting purposes is also accepted. Depreciation is not allowed on real estate used as rental property. Depreciation on the stepped-up portion of assets revalued by any method other than the inflation adjustments noted above is not permitted.

**Net operating losses**
Losses may be carried forward three years. Loss may not be carried back. As previously stated, losses from inflation adjustment may be carried forward only one year.

Foreign losses may be offset only against foreign profits.

**Payments to foreign affiliates**
A Venezuelan corporation may claim a deduction for royalties and technical assistance and for technical service fees paid to foreign affiliates, subject to the following conditions:

- The contract is registered within 60 days of execution with the Superintendence of Foreign Investments (SIEX);
- Income tax payable by the recipient is withheld at the source;
- Transfer pricing requirements are met; or
- In the case of technical assistance and technological services fees, the expenses maybe deducted if such services cannot be otherwise provided in Venezuela.

Foreign companies domiciled in Venezuela are allowed to deduct royalties paid to parent companies or foreign affiliates. Companies must notify the SIEX of payments
Venezuela

made within 60 days (See also the section on Withholding taxes). Branches of foreign companies, however, may not deduct such payments to head offices or related parties.

**Taxes**
Municipal, state and local taxes are deductible in determining taxable income. Corporate taxes are not deductible.

**Other significant items**
Deductions for allowable charitable contributions are limited to 10% of taxable income (before deducting contributions) when taxable income does not exceed TU 10,000. When taxable income exceeds TU 10,000, charitable contributions are limited to 8% of taxable income. For oil extraction companies the deduction is limited to 1% of the pre-contribution tax amount.

Payments required by the labour law, such as profit sharing (generally between 15 days’ and four months’ salary) and severance indemnity accruals are also deductible. In cases of unjustified dismissals, double severance indemnities must be paid. However, accruals for such additional indemnities are generally not deductible until paid.

**Group taxation**
Group taxation is no longer possible.

**Tax incentives**

**Capital investment**
A tax reduction of 10% is available for investments in assets, programmes and activities aimed at the conservation and protection of the environment.

A special 10% investment tax credit is granted on the value of new investments in fixed assets (excluding land) made by those legal entities obtaining income from industrial and agro-industrial activities, construction, electricity, telecommunications, science, technology, and generally any industrial activity that represents an investment in advanced technology. This tax credit may be taken if such new investments are dedicated to effectively improving the productive capacity or creating a new enterprise.

The tourist sector will be entitled to a 75% investment tax credit on the amount of new investments. The agricultural sector will enjoy an 80% investment tax credit.

An additional 10% tax credit is granted on the amount of investments in assets, programmes, and activities aimed at the preservation and protection of the natural environment, the recovery of hydrocarbon and gas exploration and exploitation areas carried out in a production unit’s areas of influence.

Investment tax reductions may be carried forward up to three years.

**Other incentives**
Some customs duty incentives are available, such as drawbacks on the import of materials used for exporting products. This may take the form of a tax refund certificate issued by the Ministry of Finance. The certificate is a negotiable bond and will be accepted by the Treasury Funds Office for payment of national taxes. Determination of the amount of the refund will take into account the import duties
effectively paid at the time the materials used in the manufacture of the exported product were received in Venezuela.

**Withholding taxes (WHT)**

Resident corporations making certain types of payments must withhold taxes. T2 refers to Tariff 2. These include the following:

<table>
<thead>
<tr>

Notes

1. Withholding taxes constitute prepayments against final tax liabilities as determined by the income tax return when filed.
2. Includes commissions earned in instances other than through a dependent relationship (e.g., employer/employee). Commissions are subject to withholdings in the same manner as salaries and wages.
Venezuela

3. The rates for non-residents are similar to those rates applicable for payments to a non-domiciled corporation not resident in a treaty country and rendering services from abroad with no PE in Venezuela.

4. Excludes payments exempted under international shipping agreements.

Tax treaties
There are currently comprehensive treaties for the avoidance of double taxation with the following countries:

<table>
<thead>
<tr>
<th>Austria</th>
<th>Germany</th>
<th>Portugal</th>
</tr>
</thead>
<tbody>
<tr>
<td>Barbados</td>
<td>Indonesia</td>

</tbody>
</table>

Treaties with other countries outside the countries listed above are being negotiated.

The treaties with Brazil, Mexico and Vietnam have been published in the Official Gazette and signed by the contracting parties but have not entered into force since diplomatic notes have not been exchanged.

Tax administration

Returns
Final tax returns must be filed within three months following the end of the tax year. The system is one of self-assessment.

Payment of tax
The total amount of tax due must be paid at the time of filing the annual return. Estimated tax payments must be paid consecutively in six monthly instalments. Companies engaged in mining, hydrocarbon exploitation and related activities must make 12 equal monthly estimated tax payments.

Exchange control
On January 2003 the Venezuelan government and the Venezuelan Central Bank restricted the free foreign currency trade and established an Exchange Control Regime, which is characterised by the following aspects:

The Venezuelan Central Bank (VCB) centralises the purchase and sales of foreign currency.

All foreign currency derived from the export of goods, services, and technology must be sold to the VCB, through the financial system and at the official exchange rate. Exporters are to be registered with the Users Registry and are to consign certain documentation certifying good fiscal status. Likewise, the sale of every foreign currency, introduced in the country for various concepts, including direct foreign investment, to the VCB is mandatory. In such case, said foreign currency is to be
registered with the SIEX for re-exportation and remittance purposes. The acquisition of foreign currency for imports is also subject to application for “Foreign Currency Authorisation,” which is subject to certain conditions.

The Law on Foreign Exchange Crimes is in effect, thereby establishing the actions that constitute exchange crimes and their respective penalties. Said penalties may be both criminal and pecuniary.

**Significant developments**

There were no significant developments in the corporate income tax (CIT) regulations from November 2009 to May 2010.

**Taxes on corporate income**

**Standard rates**

All taxes are imposed at the national level. There are no local, state or provincial taxes. The standard CIT rate is 25%. Enterprises operating in the oil and gas industry will be subject to CIT rates ranging from 32% to 50% depending on each project.

**Preferential rates**

Preferential CIT rates of 10% and 20% are available where certain criteria are met. See Tax incentives for further information.

**Calculation of taxable profits**

Taxable profit is the difference between total revenue, whether domestic or foreign sourced, and deductible expenses, plus other assessable income.

Taxpayers are required to prepare an annual CIT return which includes a section for making adjustments between accounting profits and taxable profits.

**Corporate residence**

Enterprises established under the law of Vietnam are subject to corporate taxes. In addition, Vietnam has a broadly worded permanent establishment (PE) definition.

**Other taxes**

**Value-added tax (VAT)**

VAT is applied to goods and services used for production, trading and consumption in Vietnam (including goods and services purchased from abroad), with certain exemptions. Depending on the category of goods or services, the VAT rates are 0%, 5%, and 10% (the standard rate). Exported goods and services are subject to 0% rate (subject to conditions).

**Special sales tax (SST)**

SST is a form of excise tax that applies to selected goods and services, such as alcohol, imported automobiles having less than 24 seats, motorcycles, airplanes, boats, petroleum, air-conditioners up to 90,000 BTU, cigarettes, playing cards, discotheques,
massages, karaoke, casinos, gambling, golf clubs, and entertainment with betting and lotteries. For goods, SST is charged at the production or importation stage. Rates range from 10% to 70%.

**Production royalties**
Production royalties in the form of a natural resource tax (NRT) are payable in industries exploiting natural resources such as oil and gas, other minerals, forests, fisheries, and importantly, natural water. The tax rates vary depending on the natural resource being exploited, ranging from 1% to 40% and are applied to the production output at a specified taxable value per unit. Various methods are available for the calculation of the taxable value of the resources, including cases where the commercial value of the resources cannot be determined.

**Property taxes**
The rental of land use rights by foreign investors (if not contributed as capital) is in effect a form of property tax. It is usually known as land rental and the range of rates is wide depending upon the location, infrastructure and the industrial sector in which the business is operating.

**Customs duties**
Import duty rates are classified into three categories: ordinary rates, preferential rates and special preferential rates. Preferential rates are applicable to imported goods from countries that have most-favoured-nation status with Vietnam (MFN, also known as normal trade relations). The MFN rates are in accordance with Vietnam's World Trade Organization (WTO) commitments and are applicable to goods imported from other member countries of the WTO.

Special preferential rates are applicable to imported goods from countries that have a special preferential trade agreement with Vietnam.

Import duty exemptions are provided for encouraged projects and goods imported in certain circumstances.

Export duties are charged only on a few items, basically certain natural resources. Rates range from 0% to 33%.

**Branch income**
Branches of foreign entities are subject to the same CIT regime for entities incorporated in Vietnam.

**Income determination**

**Inventory valuation**
At present there are no provisions for valuing inventories or determining inventory flows. The tax treatment follows the accounting treatment.

**Asset revaluation**
Gains from the revaluation of assets (including land use rights with definite term) for the purposes of capital contribution or transfer upon division, demerger, consolidation, merger, conversion of business are subject to CIT at the 25% standard rate.
Vietnam

Gains from the revaluation of land use rights with indefinite terms for the purpose of capital contribution or transfer upon division, demerger, consolidation, merger, conversion of business will not be taxed on the basis that the enterprise receiving the land use rights is not allowed to amortise the land use rights. However the enterprise receiving the land use rights shall be taxed if it subsequently revalued the land use rights before contributing the land use rights as capital/transferring to another enterprise.

Gains from the revaluation of land use rights for the purpose of capital contribution to investment projects for construction of houses and infrastructure facilities for sale shall be fully taxed in the year of contribution.

**Capital gains**
Gains made by a foreign investor on a transfer of an interest in a limited liability company are subject to 25% CIT. The assignee is required to withhold the tax due from the payment to the assignor, and account for this to the tax authorities.

Gains earned by a foreign investor from selling shares in a public joint-stock company irrespective of whether it is listed or non-listed is subject to CIT at a deemed rate of 0.1% of the sales proceeds. However, it is unclear if the same treatment applies to selling shares in a non-public joint-stock company.

**Inter-company dividends**
Inter-company dividends are generally non-taxable. No withholding tax applies to dividend payments.

**Foreign income**
Foreign income, under the domestic tax law, is subject to 25% CIT with tax credits available.

**Stock dividends**
Dividends received from investments in other companies in Vietnam are from after tax profits and are not taxed currently.

**Other income**
The following other income is subject to 25% CIT and will not be entitled to tax incentives (including preferential tax rate and exemption/reduction):

- Income from transfer of real estate;
- Income from royalty, leasing of assets;
- Income from transfer of assets;
- Interest income;
- Income from trading of foreign currency;
- Reversal of provisions;
- Collected written off debts;
- Unidentified payables;
- Difference between penalties and compensation for breaching economic contracts; and
- Gain from the revaluation of assets.
Deductions

Depreciation and depletion
Tax depreciation may differ from accounting depreciation. Depreciation in excess of the rates specified in the regulations on tax depreciation is not deductible. These regulations specify maximum and minimum permissible effective lives for various classes of assets, including intangibles. Current straight-line tax depreciation rates are as follows:

<table>
<thead>
<tr>
<th>Depreciation rates</th>
<th>%</th>
</tr>
</thead>
<tbody>
<tr>
<td>Buildings</td>
<td>2 – 16.67</td>
</tr>
<tr>
<td>Office equipment</td>
<td>10 – 20</td>
</tr>
<tr>
<td>Automobiles</td>
<td>3.33 – 16.66</td>
</tr>
<tr>
<td>Machinery and equipment</td>
<td>5 – 33.33</td>
</tr>
</tbody>
</table>

Net operating losses
Losses may be carried forward for five years. Carryback of losses is not permitted.

Payments to foreign affiliates
There are no special restrictions on the deductibility of royalties, loan interest and service fees paid to foreign affiliates (except for those paid by branches). However the payment must be at arm’s length as required by transfer pricing regulations. Certain contracts for the transfer of technology and foreign loans must be registered with the competent authorities.

Taxes
Creditable input VAT, CIT, and other fees/charges are not deductible for CIT purposes.

Other significant items
The following are specifically stated to be non-deductible:

- Depreciation of fixed assets which is not in accordance with the prevailing regulations;
- Employee remuneration expenses which are not actually paid or are not stated in a labour contract or collective labour agreement;
- Life insurance premiums for employees;
- Interest on loans corresponding to the portion of charter capital not yet contributed;
- Reserves for research and development not in accordance with the prevailing regulations;
- Interest on loans from non-economic and non-credit organisations exceeding 1.5 times the interest rate set by the State Bank of Vietnam;
- Provisions for stock devaluation, bad debts, financial investment losses, product warranties, or construction work which are not in accordance with the prevailing regulations;
- Advertising, promotion (except certain items), conferences/parties, commissions, prompt payment discounts exceeding 10% of total other deductible expenses (this cap is increased to 15% for newly-established enterprises for the first three operating years);
- Unrealised foreign exchange gain/losses due to the revaluation of foreign currency items other than account payables at the end of a financial year;
Vietnam

- Donations except certain donations for education, health care, natural disasters, or building charitable homes for the poor;
- Management expenses allocated to permanent establishments in Vietnam by the foreign company’s head office which are not in accordance with the regulations;
- Penalties;
- Creditable input value-added tax, business income tax, personal income tax and other fees/charges.
- For certain businesses such as insurance companies, securities trading, and lotteries, the Ministry of Finance provides specific guidance on deductible expenses for CIT purposes.

Group taxation

There is no provision for any form of consolidated filing or group loss relief.

Tax incentives

Inward investment
Tax incentives are granted based on regulated encouraged sectors and difficult socio-economic locations. The sectors which are encouraged by the Vietnamese Government include education, health care, sport/culture, high technology, environmental protection, scientific research, infrastructural development and computer software manufacture.

The two preferential rates of 10% and 20% are available for 15 years and 10 years respectively, starting from the commencement of operating activities. When the preferential rate expires, the CIT rate reverts to the standard rate.

Investors may be considered for tax holidays and reductions. The holidays take the form of a complete exemption from CIT for a certain period beginning immediately after the enterprise first makes profits, followed by a further period where tax is charged at 50% of the applicable rate. However, where the enterprise has not derived profits within three years of the commencement of operations, the tax holidays/tax reduction will start from the fourth year of operation. Criteria for eligibility to these holidays and reductions are set out in the CIT regulations.

Additional tax reductions may be available for engaging in manufacturing, construction, and transportation activities which employ several female staff, and/or ethnic minorities.

Small- and medium-size enterprises (as regulated) and certain other certain eligible enterprises can enjoy a three month deferral of 2010 CIT payments.

Withholding taxes (WHT)

Interest
An interest WHT of 10% applies to payments to an overseas lender. Offshore loans provided by certain government or semi-governmental institutions may obtain an exemption from the interest withholding tax where a relevant double taxation agreement or Inter-Government Agreement applies.
Royalties, license fees, etc.
A 10% royalty withholding tax applies in the case of payments made to a foreign party for transfers of technology, unless the transfers are contributed as part of legal capital (akin to equity). Transfers of technology are defined very broadly. Certain contracts for the transfer of technology must be registered with the competent authorities.

Management fees, etc.
Withholding tax applies on management fees and head office charges.

Payments to foreign contractors
A withholding tax on payments to foreign contractors applies where a Vietnamese contracting party (including a foreign-invested enterprise incorporated in Vietnam) contracts with a foreign party that does not have a licensed presence in Vietnam irrespective of whether the services are provided in Vietnam or overseas.

Foreign contractors can apply to be deduction-method VAT payers if they adopt the Vietnamese accounting system. If accounting records are adequate, the foreign contractor will pay CIT on actual profits, but otherwise on a deemed-profit basis.

For direct (non-deduction-method) foreign contractors, VAT and CIT will be withheld by the contracting party at a deemed percentage of taxable turnover. Various rates are specified according to the nature of the contract performed. For CIT the withholding tax rate varies from 0.1% to 10%. For VAT, the effective withholding tax rate can also range from 3% to 5%. The VAT withheld by the contracting party is an allowable input credit in its VAT return.

A summary of VAT and CIT rates follow:

<table>

</tbody>
</table>

Notes

(*) On the basis import VAT is paid.
Vietnam

**Cross-border leases**

A Vietnam-based lessee is required to withhold tax from payments to an offshore lessor.

The above deemed CIT rates may be affected by a relevant double tax agreement.

Notes

(*) Not in force.

1. In some cases the limits set by the treaty are not lower than the present withholding rate under domestic law. Therefore, the domestic rates will apply.
2. Interest derived by certain government bodies is exempt from withholding tax.
3. Royalty withholding tax rates vary for certain types of royalties.

**Tax administration**

**Audit cycle**

Tax audits are carried out regularly and often cover a number of tax years. Prior to an audit, the tax authorities send the taxpayer a written notice of time and scope of the audit inspection.

**Statute of limitations**

The general statute of limitations for imposing tax administration penalties is five years. The tax authorities can collect under declared and unpaid tax at any time.

There are detailed regulations setting out penalties for various tax offences. These range from relatively minor administrative penalties through to tax penalties amounting to various multiples of the additional tax assessed.

In practice, imposition of penalties has been arbitrary and inconsistent. However in recent periods, there has been a much tougher stance adopted by the tax authorities. Hence where tax is paid late, as a result for example of a tax audit investigation, there is a significant likelihood of penalties being imposed. Notably where tax adjustments
Vietnam

are made at a tax audit, any resulting additional taxable profits are not eligible for any CIT incentives to which a company may be entitled.

**VAT returns and payments**
Taxpayers must file monthly VAT returns and remit the VAT payable no later than the twentieth day of the following month.

**CIT returns and payments**
CIT shall be declared and paid provisionally on a quarterly basis (based on actual revenues and expenses of each quarter). Quarterly CIT returns and payment must be made no later than the thirtieth day of the next quarter. Annual finalisation return and the audited financial statements must be filed within 90 days of the end of the financial year.

The standard tax year is the calendar year. However, different accounting year-ends can be used if approval is obtained from the authorities.

**Corporation tax calculation**
Fiscal year ending 31 December 2009 (in VND millions)

**Other issues**

**Foreign investment restrictions**
In several fields, foreign investment will not be licensed or only licensed under special conditions. For sectors in the List of Conditional Investment Sectors, the investment is subject to certain conditions, which include: television, production and publishing cultural products, telecommunication, transportation by all means, cigarette production, exploring and processing natural resources, real-estate business, education, medical services and distribution.

**Exchange controls**
All buying, selling, lending and transfer of foreign currency need to be made through credit institutions and other financial institutions authorised by the State Bank of Vietnam (SBV).

Outflow of foreign currency by transfer is authorised for certain transactions such as payments for imports and services abroad, refund of loans contracted abroad and payment of interest accrued thereon, transfer of profits and dividends, and revenues from transfer of technology.
All monetary transactions in Vietnam must be undertaken in Vietnamese Dong. Exceptions are applicable to payments for exports made between principals and their agents, and payments for goods and services purchased from institutions authorised to receive foreign currency payments such as for air tickets, shipping and air freight, insurance and international communications.

**Forms of doing business**
According to the Law on Enterprises, a foreign-invested enterprise may be established as either a single member limited liability or a limited liability with more than one member, a joint-stock company, or a partnership.

**Intellectual property**

Vietnam is signatory to the Paris Convention, the Madrid Agreement on International Trademark Registration, and the Patent Cooperation Treaty and is a member of the World Intellectual Property Organisation. Vietnam has entered into an agreement on copy rights with the US. According to the Vietnam-US Bilateral Trade Agreement, Vietnam is further under the obligation to adhere to Berne Convention.

Significant developments

Zimbabwe’s annual budget presentation was held on 2 December 2009 by the Minister of Finance, the Honorable Tendai Biti, and the proposed changes have been promulgated into law.

The announcements relating to corporate tax can be summarised as follows:

Value-added-tax (VAT)

It was recommended that all registered operators will have to use electronic tax registers (ETRs) that can be linked to the Zimbabwe Revenue Authority (ZIMRA) beginning 1 April 2010. A notice has since been published by ZIMRA that operators should not undertake the requirement pending further instructions.

Each company or person will have one VAT number only. Presently, the law allows companies or persons to separately register divisions or branches.

The basis for calculating VAT on imports is altered to impose the tax on the value inclusive of customs duty.

Un-beneficiated chrome exports are subject to the standard rate of VAT (15%) beginning 1 January 2010. These were previously zero-rated.

Income tax

The corporate tax rate for companies (other than mining companies with special mining leases, but including branches) was reduced from an effective rate (including a 3% AIDS levy) of 30.9% to 25.75% (which include a base rate of 25% plus a 3% AIDS levy).

Capital allowances are granted on qualifying additions to fixed assets in four equal annual amounts at a rate of 25% (over four years). This was previously allowed over three years (at 50% in the first year and at 25% in the following two years).

It has been proposed to alter the basis of taxation from a ‘source basis’ to ‘residence system’. The legislation to enable this as well as the simplification of the Income Tax Act is being drafted at present.
Taxes on corporate income

Zimbabwe presently operates on a source-based tax system. This means that income from a source within or deemed to be within Zimbabwe will be subject to tax in Zimbabwe unless a specific exemption is available. The government is considering a move to a 'residence'-based tax system.

Income earned by foreign companies from a source within or deemed to be within Zimbabwe will be subject to tax in Zimbabwe. In such a case, one should determine whether the foreign entity is obliged to register a local entity. A company is required to register a branch if it has established a place of business or is otherwise considered to be trading in Zimbabwe. A local subsidiary company may be registered as an alternative to a branch operation.

In the event that Zimbabwe has entered into a double taxation agreement with the foreign company, the entity will only be taxable in Zimbabwe if it operates through a permanent establishment (PE) which, in most cases, includes a fixed place of business. The establishment of a local entity or branch will usually create a PE. The provisions of the related tax treaty should; however, be considered. If a PE exists, only a portion of the income attributable to the PE will be subject to tax in Zimbabwe.

Non-residents who do not have a place of business in Zimbabwe may, however, be subject to withholding tax. See Withholding tax section for additional details.

It should be noted that capital gains tax is payable in Zimbabwe on the disposal of immovable property or shares that are held in listed or unlisted companies.

The specific circumstances of a transaction should be considered to determine whether the transaction gives rise to taxation in Zimbabwe.

Anti-avoidance

Please note that Zimbabwe legislation does contain basic anti-avoidance sections that empower the Commissioner General to disregard the implications of a transaction or scheme if it can be proven that:

1. Such transaction or scheme had been entered into to avoid or postpone the payment of any duty or levy imposed by the Act; and
2. It was entered into or carried out by means or in a manner that would not normally be employed in the entering into or carrying out of a transaction, operation, or scheme of the nature of the transaction, operation, or scheme in question; or
3. Has created rights or obligations that would not normally be created between persons dealing at arm's length under a transaction, operation, or scheme of the nature of the transaction, operation, or scheme in question; and
4. Was entered into or carried out solely or mainly for the purposes of the avoidance or the postponement of liability for the payment of any tax duty or levy.

The Commissioner General may at his sole discretion impose this legislation on any transaction or scheme, which will place the onus of proof on the taxpayer to prove that any/all of the requirements noted above will not be applicable to the transaction or scheme.
Zimbabwe

**Transfer pricing**
No detailed transfer pricing legislation is currently in place in Zimbabwe. The law does, however, allow the Commissioner General to substitute a new sale price to a transaction where he considers the declared sale price to be too high or low.

**Thin capitalisation**
The law prohibits the deduction of amounts incurred in excess of specified limits in respect of management and general administration expenses as well as interest. This applies to branches or subsidiaries of both local and foreign companies.

The limit on management and general administration expenses is based on such expenses exceeding 1% and 0.75% (respectively for a company already in production and prior to production) of total tax-deductible expenses.

The limit on the deductibility of interest is based on a company incurring interest charged by a subsidiary, a fellow subsidiary, or a holding company when the debt to equity ratio exceeds 3:1.

**Treaty relief**
Zimbabwe has entered into double tax treaties (DTT) with the following countries:

- Bulgaria;
- Canada;
- France;
- Germany;
- Malaysia;
- Mauritius;
- Netherlands;
- Norway;
- Poland;
- South Africa;
- Sweden; and
- United Kingdom.

Zimbabwe has either negotiated, or is currently negotiating, tax treaties with the following countries:

- Botswana;
- Democratic Republic of Congo;
- Indonesia;
- Iran;
- Jamaica;
- Namibia;
- Serbia and Montenegro;
- Seychelles;
- Tanzania;
- Tunisia; and
- Zambia.

**Corporate residence**
Currently, the Zimbabwean tax system is based on source and not on residency. Zimbabwe is moving towards a residence-based taxation system, but the details are still to be announced. Income derived or deemed to be derived from sources within Zimbabwe is subject to tax.

Source is the place where income originates or is earned, not the place of payment. If goods are sold pursuant to a contract entered into within Zimbabwe, the source of income is deemed to arise in Zimbabwe, regardless of the place of delivery or transfer of title.

Certain types of income arising outside Zimbabwe may in the hands of a domestic company be deemed to arise in Zimbabwe and be taxed as such. Examples are interest
and certain copyright royalties arising outside Zimbabwe. Where the income is deemed to be from Zimbabwe, relief of the foreign tax suffered, up to a maximum of the Zimbabwe tax, may be allowed as a tax credit.

Otherwise, and except for the PE concept embodied in the tax treaties, corporate residence is of little tax significance.

**Other taxes**

**Value-added tax (VAT)**

VAT is a transaction tax, and the implications will vary for different transactions. Some transactions are taxed at a rate of 15% or 0% while other transactions are exempt from VAT. Input tax deductions may be claimed, subject to certain provisions. Advice on VAT implications of specific transactions related to corporate operations should be obtained prior to execution of transactions.

VAT shall be levied on every taxable supply by a registered person. A taxable supply means any supply of goods or services in the course or furtherance of a taxable activity.

A taxable activity means any activity that is carried on continuously or regularly in Zimbabwe, which involves the supply of goods or services for consideration.

VAT is payable on all imports for home consumption into Zimbabwe, subject to certain exemptions (e.g., in terms of a technical assistance agreement, donations to the State, goods of which the local supply is zero-rated, etc).

Import VAT is payable on the import value plus the applicable customs duty.

A company/branch is required to register for VAT if it supplies goods or services on a regular basis for consideration and if its taxable supplies (standard-rated and zero-rated supplies) exceed USD 60,000 in any 12-month period.

Registered vendors are required to levy VAT on all taxable supplies at the standard rate of 15%.

A registered VAT vendor is entitled to deduct input tax credits paid in the course of taxable supplies made to such person, provided that a tax invoice is available to support the input tax deduction. It is also important to take note of deemed input tax deductions and prohibited input deductions. Import VAT paid may only be deducted as input tax if the import was in furtherance of a taxable activity and the required documentation (e.g., stamped customs entries) is held by the importer.

**Customs and excise**

Zimbabwe is a member of Southern African Development Community (SADC) as well as Common Market for Eastern and Southern Africa (COMESA). Customs duties are payable according to the general customs tariffs that are legislated for in Zimbabwe. Preferential duty rates apply on imports from SADC or COMESA countries while goods may be imported free of customs duties from Namibia in terms of the Zimbabwe-Namibia Free Trade Agreement.

Excise duties are levied on local production of excisable products and are included on most excisable products imported from other countries.
Zimbabwe

Excise and fuel levies are levied on petrol, diesel, and illuminating kerosene.

Security is required by Customs on all temporary importations to cover import VAT and customs duties (if applicable). Imports of goods subject to customs duties into registered Customs’ bonded warehouses are provided for (i.e., payment of duties may be deferred until the goods are entered for home consumption or acquitted if exported).

**Stamp duty**

Certain transactions may attract stamp duty. The amount of stamp duty payable will differ and will be based on the nature of every individual transaction.

The basic transactions can be summarised as follows:

<table>
<thead>
<tr>
<th>Transaction</th>
<th>Stamp duty</th>
</tr>
</thead>
<tbody>
<tr>
<td>Bonds</td>
<td>0.4% (USD 0.40 for every USD 100 or part thereof)</td>
</tr>
<tr>
<td>Brokers notes – purchase of securities</td>
<td>0.25% (USD 0.25 per every USD 100 or part thereof)</td>
</tr>
<tr>
<td>Brokers notes – purchase/sale of any movable property other than a security</td>
<td>0.10% (USD 0.10 per every USD 100 or part thereof)</td>
</tr>
<tr>
<td>Brokers notes – purchase/sale of any immovable property</td>
<td>1% (USD 1.00 per every USD 100 or part thereof)</td>
</tr>
<tr>
<td>Off market share transfer instruments</td>
<td>2% or USD 2</td>
</tr>
<tr>
<td>Cheques</td>
<td>0.05% (USD 0.05)</td>
</tr>
</tbody>
</table>

Tax advice should be obtained for major transactions in respect of the transactions mentioned above in order to ensure that the correct stamp duty implications are considered.

**Transfer duty**

Transfer duty is payable on the acquisition value of property acquired.

Transfer duty is payable at the following rates:

<table>
<thead>
<tr>
<th>Persons</th>
<th>Value of the property (USD)</th>
<th>Rate of transfer duty</th>
</tr>
</thead>
<tbody>
<tr>
<td>All</td>
<td>0–5,000</td>
<td>1%</td>
</tr>
<tr>
<td>All</td>
<td>5,001–20,000</td>
<td>2% of the value above 5,000</td>
</tr>
<tr>
<td>All</td>
<td>20,001–100,000</td>
<td>3% on the value above 20,000</td>
</tr>
<tr>
<td>All</td>
<td>100,001 and above</td>
<td>4% of the value above 100,000</td>
</tr>
</tbody>
</table>

Transfer duty is normally payable by the buyer but the agreement for the sale of the property will determine the person liable to pay these costs. In addition, conveyance costs of up to 3% (plus 15% VAT) must be added on.

**Exchange control**

Zimbabwe has been operating a multi-currency system since February 2009. The Zimbabwe dollar (ZWD) was demonetarised effective April 2009. This has had a significant impact on the country’s exchange control regulations.
The Exchange Control Handbook in Zimbabwe is not available to the public and the banking institutions are the only bodies which have access to these regulations.

Transactions that involve the transfer of funds to countries outside Zimbabwe are generally subject to Bank of Zimbabwe approval.

The issue of shares in a Zimbabwe company to persons residing outside of Zimbabwe requires specific exchange control approvals. In terms of new legislation, a limit of 49% is available for non-residents. A 51% local shareholding by indigenous persons is a requirement. Applications may be made for increased levels; each case will be decided on its own merits.

**Branch income**

Branch income that is received or has accrued from a source within or deemed to be within Zimbabwe is taxable in Zimbabwe in terms of the normal corporate tax rules.

A branch is regarded as an extension of its foreign head office. A branch may therefore not deduct fees paid to its foreign head office (unless a tax treaty makes provision for such deduction) as it is argued that a branch cannot transact with itself. Reimbursement of actual expenses may, however, be deducted, subject to the normal deduction rules.

A 20% withholding tax is imposed on any payments made in respect of head office charges.

The amount of fees charged by the head office to the Zimbabwe branch is also subject to a limitation, usually based on a maximum of 1% of total expenditure (excluding the charge itself and any capital allowances). Exchange control regulations also limit the remittability of administration and management fees to 2% of turnover.

**Income determination**

The Zimbabwe Income Tax Act (Act) tax base for corporate taxes is not on profits but rather taxable income. Zimbabwe still uses the ‘source’ basis of determining income, and as yet has not moved to raising tax on a residence basis. The source and nature of the income determines whether the amount is taxable or not. In addition to amounts received or accrued from actual Zimbabwean sources, there are deeming provisions that bring income from foreign sources into Zimbabwean taxable income.

In general, all receipts from a Zimbabwe source are taxed, excluding amounts that are proven by the taxpayer as being capital receipts. Most expenditure items and some specified exemptions are deductible against income. Capital expenditure is generally not deductible, with amounts on specific items being deductible by way of annual allowances spread over a period.

**Deductions**

**Tax deductions**

The Act makes provisions for specific deductions. Some of the deductions, such as the deduction of foreign exchange losses, development and exploration costs, hire purchase allowances, manufacturing allowances, etc, can be more complex.
Zimbabwe

**Capital allowances**
The cost (including finance charges) of machinery, implements, and other articles used by the taxpayer in the production of income is deductible in four equal annual allowances. No apportionment is required where the asset was held for less than 12 months.

Industrial buildings (including hotels) constructed and used by the taxpayer in the production of income qualify for an initial allowance of 25% of erection cost in the year they are first brought into use. Thereafter, an annual allowance of 25% is deductible for each year following the year of erection. Additions to existing buildings (not alterations or repairs) qualify for the same deductions. It is important to note that the allowance is calculated on the cost of erection and not the cost of acquisition. In these cases the allowances are set at 5% of the cost.

A mining exploration expenditure incurred before commencement of production is deductible in full in the first year of production against income derived from the mine. A subsequent development expenditure is presently written off in the year expended. This aspect of Zimbabwe's mining legislation is currently under review.

Capital allowances may also be deducted in respect of patents, trademarks, leasehold improvements, etc.

A recovery or recoupment of allowances previously claimed should be included in the gross income of a taxpayer in the event that the allowance is recovered or recouped by way of disposal. The recoupment is presently calculated on the capital allowances previously granted.

**Trading losses**
Assessed tax losses may be carried forward for up to six years provided the company continues to trade. This restriction does not apply to mining companies. Tax laws do not allow for losses to be transferred to other group companies and anti-avoidance provisions may be triggered by transactions designed to transfer or exploit assessed losses.

Assessed losses are reduced in the event of a compromise agreement with creditors.

**Group taxation**
No taxation of combined operations is allowed in Zimbabwe including where operations are conducted by more than one company.

**Tax incentives**
It has been announced by the Minister of Finance that Zimbabwe is moving away from taxation incentives; however, the following are still available.

Kindly note that this is a high-level summary, and certain conditions should be met in order to utilise these incentives.
### Tax treatment for normal taxpayers vs. Tax incentive vs. Person for whom incentive is available and duration of incentive

<table>
<thead>
<tr>
<th></th>
<th>Tax treatment for normal taxpayers</th>
<th>Tax incentive</th>
<th>Person for whom incentive is available and duration of incentive</th>
</tr>
</thead>
<tbody>
<tr>

<td>First five years – 0%. Thereafter – normal rate.</td>
<td>Industrial park developer.</td>
</tr>
</tbody>
</table>

### Withholding taxes (WHT)

WHT are applicable where dividends and royalties or similar payments are declared or distributed to non-Zimbabwean residents (and Zimbabwean residents in some instances).

#### Dividends

Dividends declared by a Zimbabwean company to a non-resident holding company will be subject to non-resident shareholders tax (NRST), a withholding tax. NRST will be payable at a rate of 15% unless treaty relief is available. Dividends from companies listed on the Zimbabwe Stock Exchange have a rate of 10%. NRST is payable within 10 days after declaration of the dividend.
**Royalties or similar payments**
WHT on royalties are payable once a Zimbabwean company pays a royalty to a non-Zimbabwean resident. WHT is levied at a rate of 15% and is payable within 10 days of the date of payment.

A royalty includes payment for the use or right to use any patent or design, trademark, copyright, model, pattern, plan, formula or process, or any other property or right of a similar nature. It also includes the imparting of any scientific, technical, industrial, or commercial knowledge or information for use in Zimbabwe. The nature of the amount payable should therefore be carefully considered in order to determine whether the relevant amount represents a royalty.

**Fees**
Fees are defined to include amounts that are technical, managerial, administrative, or consultative in nature; costs are paid externally. There are some exceptions, but the definition is broad and brings in most costs that may be charged to a Zimbabwean person.

WHT is levied at a rate of 15% and is payable within 10 days of the date of payment.

**Interest**
WHT of 15%, calculated on the gross amount of interest, is payable on interest accruing to any person resident in Zimbabwe. This applies to interest arising from a registered banking institution or unit trust scheme. The tax withheld is a final tax, and the financial institution is responsible to withhold the tax.

Non-resident investors, however, are exempt from any withholding tax on interest.

**Summary of withholding tax payable**
The non-residents withholding tax rates and treaty relief for Zimbabwean double tax agreements can be summarised as follows. It should be noted that the tax treaties contain certain requirements that should be met before the reduced tax rate may be applied.

The definitions of dividends, royalties, and interest in the various treaties should also be considered.

<table>

</tbody>
</table>

* Applies to unlisted companies. The rate for companies listed on the Zimbabwe Stock Exchange is reduced to 10%.

** Resident persons have a 15% WHT on interest arising from financial institutions. Interest from other sources is taxed at the corporate tax rate.

N/A means that the provisions of the tax treaty limited the rate to a rate that is higher than the local Zimbabwearn rate. It should be noted that a treaty can only provide tax relief and cannot impose a higher tax rate.

These are payable within 10 days of the date of distribution or accrual.

**Tax administration**

The due date for filing of returns can be summarised as follows:

<table>
<thead>
<tr>
<th>Return</th>
<th>Due date</th>
</tr>
</thead>
<tbody>
<tr>

PwC’s annual report *Paying Taxes*, a joint publication with the World Bank Group, helps to address these questions. It’s a unique report based on a comprehensive study of tax regimes in 183 economies worldwide.

Whether you’re collecting taxes or paying them, this study provides useful insights and identifies efficiencies which can benefit both parties. To pre-order your copy of *Paying Taxes 2011*, due out on 18 November 2010, visit [www.pwc.com/payingtaxes](http://www.pwc.com/payingtaxes)
Global tax networks
Employees are probably your organisation’s greatest asset and your biggest challenge. The PwC Human Resource Services (HRS) network helps you create value by helping you actively manage your people.

Working with our network gives you access to specialists in four core disciplines:

• International assignments.
• HR management (including benchmarking services through Saratoga).
• Reward and remuneration.
• People management and change.

We have one of the world’s largest human resource (HR) advisory networks to give you all the support you need. Our 6,000 professionals in over 100 countries follow the same multi-disciplinary approach to people management to give you the consistency that is so important when working across borders.

During this decade we expect dramatic change in the global employee competitive landscape. For instance, research¹ shows that 94% of new graduates expect to work across more geographic borders than their parents did – this implies the cost and administrative burden of assigning employees to work internationally will escalate.

Working alongside our specialists in international assignments, we’ll help you to stay ahead by:

• Designing and putting in place strategies and policies to align your objectives with your organisation’s business strategy;
• Providing cross-border tax advice, so your organisation and your assignees understand the implication of the assignment on their tax bill; and
• Delivering IT solutions so you can remotely control tax and administration details for assigned individuals.

Our specialists have a solid grounding in areas such as tax, compensation, benefits, pensions and HR data metrics so that we can put together the team that is right for you.

¹Managing tomorrow’s people 2020 – www.pwc.com/managingpeople2020
Managing tomorrow’s people

Organisations depend on people, and people depend on organisations. But, in a time of unprecedented turbulence, how do we make sure that both can thrive?

PwC’s new survey *Managing People in a Changing World* is a fascinating snapshot of the planet at work – what’s new, what’s exciting and what’s troubling for both employers and employees.

We explore a whole range of fascinating topics, including:

- How employers are reacting to the global downturn;
- How organisations are leading, developing and engaging their people; and
- The influence of the public on the people agenda.

If you work in human resources, this is essential reading.

To learn how to create value through your people, and for your people, download your copy at [www.pwc.com/managingpeople2020](http://www.pwc.com/managingpeople2020)
Indirect Taxes

To give the best advice on indirect taxation, we believe you need to work closely with the people devising it. Over the years we’ve made a point of building strong relationships with tax authorities, tax policy makers, governments, the Organisation for Economic Co-operation and Development (OECD), the World Customs Organization (WCO) and the World Trade Organization (WTO). We’ve consciously recruited a large number people from these organisations, who’ve either created policies or put them in place. Result, we have a thorough understanding of indirect taxes from every perspective.

We appreciate that indirect taxes can be very different depending on which industry sector you work in. So our indirect tax and customs specialists across the world, work closely with PwC industry specialists to really understand the specific issues in your sector, and give you advice with genuine insight.

And because the implications of indirect taxes can be so important to your business, we customise the support we give you, and use the latest technology, to provide you with what you need, wherever you are and whenever you need us.

**We inform**
- You’ll find the latest Value-added tax (VAT)/goods and services tax (GST) news, information, publications, and conference details at globalvatonline.pwc.com

**We advise**
- Our advice on strategy, structuring and planning will help you mitigate indirect tax costs and risks, to help you get the best from your indirect tax function.
- We can either advise on compliance and reporting, or you can take care of it by outsourcing your compliance to us.
- We can help you improve your processes through automation and digitisation, using tax engines, Enterprise Resource Planning (ERP), e-invoicing, e-archiving and e-filing.

**We support**
- We can help you with internal controls, Sarbanes-Oxley Section 404 reviews and indirect tax risk management.
- We can help you negotiate with tax authorities, obtain rulings, or manage dispute resolution and litigation.
- We organise conferences, training and regional peer group discussions to keep you abreast of the latest industry sector developments and best practices in indirect taxes.
- We help governments develop VAT/GST systems and provide support with VAT/GST reforms and implementations.

Changes to VAT and Goods & Services Tax (GST) happen all the time. When they do, we can tell you about them, quickly.

Subscribe to our Global VAT Online (GVO) service and we’ll deliver indirect tax news from over 70 countries to your inbox. From mitigating risk, to making your VAT/GST teams as effective as possible, we’ll support you so you understand what these changes mean, and what you need to do about them.

**Why subscribe?**

*Instant updates*
As soon as anything changes – anywhere in the world – we’ll tell you.

*Facts, when you need them*
Search online for specific information about VAT and GST topics in one country or several across the world.

*Insider reports and knowledge*
Read PwC publications and the latest feature articles, from our leading indirect taxes specialists.

**A specialist team, on hand**
Find details about our indirect tax teams across the world – in more than 130 countries.

**Tricks of the trade**
Use our tax tools, or learn about the techniques we use, to help you make the most of your indirect taxes teams.

**Access to industry events**
Get details about our indirect taxes seminars, conferences and courses around the world.

**How to subscribe**
Subscriptions start from €1,000 a year. To subscribe, go to [https://globalvatonline.pwc.com](https://globalvatonline.pwc.com)
International Tax Services

The pressures on business to manage tax across borders – along with growing regulation and the need to stay competitive in a global market – means that a local perspective on international tax is not enough. With specialists experienced in complex international tax matters across the world, our network is well positioned to give you top quality advice. It’s this combination of local and global expertise that gives you real insight into managing tax across borders.

Our International Tax Services network helps multinational businesses achieve their goals in the most tax-efficient way, through:

- Identifying locations for tax efficient holding companies;
- Cross-border financing and treasury solutions;
- Tax planning for controlled foreign companies;
- Planning by utilising income tax treaties;
- Profit repatriation;
- Loss utilisation planning;
- Developing tax efficient supply chains and shared services;
- Inbound and outbound structuring;
- Intellectual property and intangible assets planning;
- Addressing regional tax issues e.g., EU tax harmonisation;
- Credit management and planning; and
- Utilising best practice business models.

Global news, with local knowledge

If your company works around the world, we can help you stay on top of developments in tax, regulation and legislation globally, wherever you are.

Sign up to our International Tax Services (ITS) news alerts and we’ll send you breaking news updates. These updates will guide you on the effects on your business operations, the transactions you make and what it means for you.

**What you get**
Regular news alerts, keeping you up-to-date with changes and developments in international tax.

**How to subscribe**
To read the latest alerts – and to sign up for future alerts – go to [www.pwc.com](http://www.pwc.com)
Defensible strategy

Governments around the world are in deficit, and need to maximise their tax revenues to help fill the gaps. They’re challenging multinational companies, and expect them to justify their tax planning strategies with real substance – clear economic justifications for the way they’ve organised their legal entities and operating models around the world.

PwC’s book *Substance: Aligning international tax planning with today’s business realities* guides you through these harsh realities and shows:

- The kind of substance the tax authorities are looking for;
- How they’ll challenge a lack of substance, and how to defend yourself; and
- Whether the substance rules will prevent you from achieving an acceptable effective/cash tax rate.

To get the most value from your tax strategy and dealing with the world’s tax authorities, this is essential reading. Order your copy now, either by asking your regular PwC contact, or visiting [www.pwc.com/substance](http://www.pwc.com/substance).
Legal Services

We understand that one size doesn’t fit all when it comes to legal services. With over 2,000 corporate lawyers in more than 75 countries, we’re able to tackle problems in a way that is genuinely specific to your business. As well as specialist legal advice, we also offer day-to-day general counsel support.

We support businesses with teams drawn from the range of skills within the PwC global network. Depending on your legal issues, we might include tax advisers, human capital consultants, corporate finance specialists, actuaries, management consultants, or accountants. We’ll put together whatever it takes to give you the most creative solution in the least possible time.

We support businesses in these areas:

- Asset management;
- Corporate and commercial issues;
- Corporate secretarial;
- Dispute resolution;
- Employment;
- Financial services;
- Immigration;
- Public law; and
- Real estate.

Whether you're buying, selling or merging, it’s vital to extract as much value as possible from a deal. With an international network of 700 Mergers and Acquisitions (M&A) specialists, experienced in every type of transaction, we know how to help you structure and finance the deal to your best advantage.

Our M&A specialists support you through every stage of the deal. They work closely with our transactions services, corporate finance and legal teams, so that all aspects of the deal are covered by experienced specialists.

We combine all this experience and insight to:

- Assess and manage acquisition / merger risk;
- Structure acquisitions for the best net cash flows;
- Prepare businesses for disposal;
- Carry out pre-acquisition or pre-sale due diligence;
- Develop tax-efficient deal structuring; and
- Design post deal tax solutions.

Do you know what your total tax bill is, beyond corporate income tax? Do you know how it compares with your industry average? More importantly, do your stakeholders understand the total impact of the taxes you pay?

PwC’s Total Tax Contribution (TTC) framework helps you grasp all this, and gives you a standardised methodology to measure and communicate your financial contribution to society, either country-by-country or globally. We can help you collect all your data, compare it with the right benchmarks, and communicate the results.

To understand the full value of the taxes you pay, find out more about TTC at www.pwc.com/ttc
Sustainability and Climate Change Tax

Sustainability and climate change continues to evolve as a business issue. Momentum is building. As such, you need more than advice on the current state – you need advice that anticipates what legislative and policy changes are likely to happen. You need that advice to help you to predict how these developments will impact your business. You also need to understand how your organisation is changing to address sustainability and climate change as a business issue and how existing taxes impact on those changes.

Our Sustainability and Climate Change Tax network helps businesses and investors in two ways: it helps them stay on top of global trends and developments in climate change related policy; and it helps businesses address the tax implications of climate change related policy and their organisation’s response to the business issue. Our sustainability and climate change tax services include advice on:

- Governmental policy consulting;
- Policy and legislative changes;
- Financing sustainability;
- Fund structuring;
- Renewables’ investments;
- Green property;
- Environmental taxes;
- Changing behaviours, recruitment and retention; and
- Reward strategies around the adoption of the sustainability and climate change agenda.

News about green taxes and regulation. Straight to your desktop

Changes in environmental taxes and regulations are starting to gain momentum. Our Global Environmental Tax and Regulation Monitor (GETRM) can help you stay on top of the changes, wherever you are.

**Why subscribe?**
Whether you’re looking to save money, get an advantage over the competition, or stay fully compliant with the rules and regulations, here’s why to sign up.

**Monthly updates**
You will receive monthly updates on key environmental tax and regulatory developments, from all over the world.

**80,000 news sources**
Our network of global tax experts have joined up with LexisNexis, covering over 80,000 news sources around the world – including environmental business newsletters.

**Expert analysis**
Our sustainability and climate change specialists will share their views and insight to help you understand what the changes mean for you.

**For the whole team**
You can give direct access to GETRM to as many people as you like – wherever they are, whichever department they work in.

**How to subscribe**
A subscription for one person costs £900 a year, plus VAT. If you need more people to have access, we offer discounts.

To subscribe, or for more information, visit [www.pwc.com/greenpolicyupdates](http://www.pwc.com/greenpolicyupdates)
**Tax Controversy and Dispute Resolution**

By giving you insight into your company’s risks and exposures across different territories and disciplines, we can be the effective option to help you deal with tax disputes, audits, and examinations, from prevention through to management and resolution. Our specialists also use their experience to help businesses put in place consistent and defensible practices and policies, so they know what to expect in the future.

The Tax Controversy and Dispute Resolution network brings together ex-revenue and government officials, accountants, economists, international tax litigators, and industry sector specialists, in all areas of direct and indirect tax, as well as customs duties, employment taxes, and tax fraud. But we think being effective is about more than just knowledge; it’s about having an insight into what could happen next. So we build strong relationships with governments and policy makers worldwide. That way, we’re close to the people who are setting the dispute agenda, and know how to work with them to get the right result.

We support businesses across the life-cycle of a controversy (not just resolution or litigation) through:

- Tax dispute prevention techniques;
- Tax audit management practices;
- Tax dispute resolution alternatives;
- Global strategic planning of tax audits and disputes (including policy development); and
- Tax risk management, analysis, and disclosures.

Expert tax insight, around the globe

Keeping up with the increasing pace of change surrounding tax policy and administrative developments worldwide can be a real challenge for multinational companies. We can help you stay up-to-date with the latest developments and explain what these changes mean for you.

**What you get**
You will receive a monthly Tax Policy Bulletin, with analysis and insights on tax policy changes around the world. By drawing on our experience of tax policy issues and insights from relationships with organisations such as the OECD, we will alert you to new developments and give you guidance on what impact these changes will have on your business.

**How to subscribe**
To read the latest bulletins – and to sign up for future alerts – visit [www.pwc.com](http://www.pwc.com).
When it comes to managing taxes today, many businesses find that the approaches they've taken in the past no longer work. This could be due to changes in their industry or organisation – whether it’s new or changing legislation, structural changes, pressure from shareholders and regulators, or cuts in headcount and budgets.

The specialists in our global Tax Management and Accounting Services (TMAS) network have the experience to help you find an approach that works for your business, so that you retain effective control over your taxes.

We can help you navigate the complex decisions you need to make to update your tax management systems. We can also take you through options to achieve the best delivery model, and how to take advantage of technology that supports you, especially if your business works around the world.

If you’d rather outsource all or part of your tax compliance, we’ll take care of it. We can coordinate the outsourcing of your compliance, across borders, for direct and indirect taxes, statutory financial statement production and tax reporting. And our outsourcing arrangements include software that gives you central control, and lets you see the status of compliance around the world, wherever you operate.

Our TMAS network can help you:

**Be more efficient**
- We help clients develop tax strategies and policies, and review the effectiveness of tax and risk procedures.
- We work with businesses to improve their processes around compliance, tax reporting and statutory financial statements.
- We look for opportunities to introduce technology that supports tax compliance and reporting, improves connectivity and integration with wider finance systems and improves data and process management.

**Be more compliant**
- We help tax functions work effectively with the wider finance functions to reduce risk, benefit from shared service centres, and other finance transformation projects.
- We produce financial statements both territorially and globally.
- We build cross-border outsourcing models that take care of tax compliance, statutory financial statement production and tax reporting.
- We help businesses to maintain a good relationship with the revenue authorities and support them in carrying out risk assessments.

**Be more engaged**
- We can help you build a consensus across your organisation, by getting your people behind the business case for change.

**To find out more, please contact:**

Transfer pricing is a minefield. Governments around the world are now much tougher on regulations, on the documentation they demand, on enforcement, and on the penalties they impose.

PwC’s annual review, *International Transfer Pricing 2010/11*, is essential reading to guide you through that minefield. It covers a range of transfer pricing issues in over 60 countries, and shows why you need a coordinated and defensible strategy for transfer pricing, and why you need to re-evaluate it regularly to allow for changes in your business and the markets you operate in.

The right amount of effort can produce huge dividends – a low and stable tax charge, and the ability to defend yourself against an investigation by tax authorities. To find out how to achieve this kind of value, ask your PwC transfer pricing specialist, or visit [www.pwc.com/internationaltp](http://www.pwc.com/internationaltp).
Transfer Pricing

The scrutiny of transfer pricing by tax authorities worldwide has intensified. Our network of transfer pricing specialists has extensive experience in dealing with revenue authorities around the world. Using their expertise in economics, dispute resolution and industry, they can help you prepare for the challenges this scrutiny will present.

As a network of specialists, we help companies develop sustainable, tax-efficient structures, and help make them more compliant with legal requirements. We help them respond quickly to an audit and resolve transfer pricing disputes. We also assist them so they’re less exposed to transfer pricing risks in the future.

We’ve built a network of 1,800 transfer pricing specialists in over 70 countries. Here’s how our transfer pricing network can help you manage risks and improve your tax efficiency:

**We advise**

- We develop coordinated, centralised global documentation and defence processes, building in the requirements of each jurisdiction.
- We draft economic and industry studies.
- We negotiate Advance Pricing Agreements (APAs).
- We benchmark licensing fees for intangible assets and royalties.
- We assess potential benefits and risks of transfer pricing in your existing global operations.

**We support**

- We assist businesses with experienced testimony and litigation support.
- We help resolve global disputes and Competent Authority negotiations.
- We help multinational organisations centrally control and manage sales to third parties, including managing all accompanying opportunities and risks.
- We perform due diligence.

Specialist knowledge on transfer pricing. As it happens

If you’re looking for the latest news on transfer pricing, sign up to our Pricing Knowledge Network (PKN) updates. We’ll keep you up to date with what’s happening in transfer pricing. And our specialists will look at the wider effects, and what they mean for your business.

**What you get**

*E-bulletins*
We’ll send you regular emails, based on what you tell us you want to know – whether it’s about specific countries or topics, or both.

*Breaking news, to your inbox*
As soon as we hear about transfer pricing developments, we’ll send it straight to you.

*Expert analysis*
We’ll share analysis of major inter-company pricing issues and related developments from around the world.

*Invitations to events*
You will receive invitations to our transfer pricing conferences and master classes.

Creation, protection and management

Growth depends on innovation. And creating value from innovation depends on mastering the mysteries of intellectual property (IP). The most successful businesses are those who are best at creating, protecting and managing their IP, across its life cycle from invention to exploitation.

Two of our tax partners, Isabel Verlinden and Axel Smits, have distilled their experiences into an indispensable book, *Mastering the Intellectual Property Life Cycle: A global perspective on the tax-efficient management of IP rights*.

This book helps you:

- Manage and control the tax, legal and accounting aspects of IP;
- Understand how the rules differ across 45 countries worldwide; and
- Devise and deploy new IP strategies that boost your bottom line.

If you’re looking to turn bright ideas into money-making propositions, this is the book for you. To order your copy, visit [www.pwc.com/iplifecycle](http://www.pwc.com/iplifecycle)

If you are responsible for managing taxes in a business which trades or operates across a number of different territories, you will recognise how much of a challenge it can be trying to keep on top of the corporate tax rates and rules in each of those countries, notwithstanding the fact that these frequently change.

*Worldwide Tax Summaries – Corporate Taxes 2010/11* is a useful reference tool, to help you manage taxes around the world. It offers quick access to information about corporate tax systems in 139 countries worldwide, in an easily digestible format.

Written by local PwC tax specialists in each country, it covers the latest changes in legislation, residency, gross income, deductions, tax credits, tax administration, other taxes and tax rates, up to date (unless otherwise stated) as of 28 May 2010.
